

SENATE—Monday, July 17, 2006

The Senate met at 12 noon and was called to order by the Honorable ROBERT F. BENNETT, a Senator from the State of Utah.

PRAYER

The Chaplain, Dr. Barry C. Black, offered the following prayer:

Eternal Lord God, our hope for years to come, make us today a channel through which Your love and grace may flow. Empower us to live exemplary lives that will compel others to glorify You. When we confront adversaries, give us love and forbearance. Strengthen us to go beyond the minimum in service to others.

Inspire our Senators with Your presence. Teach them to press their weaknesses close to Your strength, that they may find light in darkness, courage for life's battles, and endurance for life's pains.

We pray in Your holy Name. Amen.

PLEDGE OF ALLEGIANCE

The Honorable ROBERT F. BENNETT led the Pledge of Allegiance, as follows:

I pledge allegiance to the Flag of the United States of America, and to the Republic for which it stands, one nation under God, indivisible, with liberty and justice for all.

APPOINTMENT OF ACTING PRESIDENT PRO TEMPORE

The PRESIDING OFFICER. The clerk will please read a communication to the Senate from the President pro tempore (Mr. STEVENS).

The assistant legislative clerk read the following letter:

U.S. SENATE,
PRESIDENT PRO TEMPORE,
Washington, DC, July 17, 2006.

To the Senate:

Under the provisions of rule I, paragraph 3, of the Standing Rules of the Senate, I hereby appoint the Honorable ROBERT F. BENNETT, a Senator from the State of Utah, to perform the duties of the Chair.

TED STEVENS,
President pro tempore.

Mr. BENNETT thereupon assumed the chair as Acting President pro tempore.

RESERVATION OF LEADER TIME

The ACTING PRESIDENT pro tempore. Under the previous order, the leadership time is reserved.

MORNING BUSINESS

The ACTING PRESIDENT pro tempore. Under the previous order, there

will now be a period for the transaction of morning business until 12:30 p.m., with the time equally divided.

RECOGNITION OF THE MAJORITY LEADER

The ACTING PRESIDENT pro tempore. The majority leader is recognized.

SCHEDULE

Mr. FRIST. Mr. President, today the Senate will conduct a period of morning business with the time equally divided until 12:30. At 12:30, we will begin the debate on the three bills related to stem cell research, and we will have debate throughout the day and tomorrow, with the time alternating between the majority and minority in 30-minute increments, and then proceed to stacked votes tomorrow afternoon at 3:45. Each of these votes will require 60 votes for passage. The votes on Tuesday will be the first votes of the week.

On Friday, we were able to reach an agreement on the Water Resources Development Act, and Chairman INHOFE will be managing the floor consideration of that bill on Tuesday and Wednesday.

STEM CELL RESEARCH

Mr. FRIST. Mr. President, over the next 2 days we will be discussing the issues surrounding stem cell research and discussing a total of three bills over the course of 48 hours. Our discussion over the next 2 days will focus on science and on ethics and how science and ethics interplay.

Science: We are in a remarkable era of exciting and rapidly accelerating advances in developmental biology. New doors of exploration have been thrown wide open by the Human Genome Project and by our new knowledge and our new understanding of molecular and cellular mechanisms. Some have called this 21st century the century of cells—a century that will explode with regenerative medicine so that heart surgeon BILL FRIST will no longer have to cut out a diseased heart and replace that diseased heart with a healthy heart but would rather treat a patient with cells requiring no surgery.

We are going to be discussing ethics. Although not easy, we do have to confront head-on the difficult issues around life's beginnings, all of which have large scientific, moral, and religious implications. The rapidly advancing science has taken us to today's debate.

As we will see in our discussions on the floor of the Senate, it is safe to say that no scientific issue is more divisive today than this discussion surrounding stem cells. As others have said, you can't do an end run around all of these ethical challenges. They are before us, and they are going to come with increasing frequency with advancing science. Our responsibility as policymakers is, through deliberation and through dialog and through debate, to frame those moral principles which protect and defend human dignity and promote scientific advances and medical applications that will lead to healing.

In the last century, we faced ethical controversies over organ transplantation, my field: Who would receive a scarce organ? What are the criteria to determine brain death? We had ethical discussions and ethical controversies over blood transfusions: Who receives blood transfusions? What are the indications? We also faced ethical dilemmas over genetic therapy.

Well, the 21st century, the current century, brings even more profound ethical questions, and they are going to come with increasing frequency. How we and humanity handle our gathering control over these mysteries of cell development and embryo development will reflect who we are as a people and where we are going.

Today, the Senate will begin debate on these three important pieces of legislation: the Alternative Pluripotent Stem Cell Therapies Enhancement Act, from Senators SANTORUM and SPECTER; the Fetus Farming Prohibition Act of 2006, Senators SANTORUM and BROWNBACK; and the Stem Cell Research Enhancement Act, the so-called—in the House—Castle-DeGette bill, and in the Senate, the Specter-Hatch bill.

Many of my colleagues have, like me, spent hours grappling with these issues: the future of stem cell research, how we balance pro-life positions with the potential for new life and health offered by stem cell research. There is, perhaps, an inclination to avoid such difficult issues, to ignore them and to let others debate, but I have come to realize we must participate in defining research surrounding the culture of life. If not, it will define us.

Five years ago, on July 18, 2001, I came to the Chamber and laid out a comprehensive proposal to promote stem cell research within an ethical framework. I proposed 10 specific interdependent principles. I also said that policymakers and the public must reassess on an ongoing basis the research and the circumstances under which it

is conducted because science will continue to advance. As the 21st century progresses and as science—developmental biology—advances, we will continually face moral and ethical challenges. It is our responsibility, as individuals and as a body politic, to reassess the constructs governing biomedical research. It will define us. That is why I brought cord legislation to the floor earlier in the year, and it was passed.

As I said then and as I believe now, we must also do all we can to pursue other alternative strategies that will hold potential for developing pluripotent stem cell lines without damaging or destroying nascent human life. That is why, in the package before us today, I have asked the Senate to consider legislation to enhance support for alternatives to embryonic stem cell research. I am extremely pleased that Senator SANTORUM and Senator SPENCER worked together to craft the Alternative Pluripotent Stem Cell Therapies Enhancement Act. Their bill is similar to legislation I worked on with Senator ISAKSON and others of our colleagues last year, and I encourage every Senator to support it.

This bill would fund alternative methods of potentially deriving pluripotent stem cells, including extracting from embryos that are no longer living, nonlethal and nonharmful extraction from embryos; extraction from artificially created organisms that are not embryos but are embryo-like; and reprogramming adult cells to a pluripotent state through fusion with embryonic cell lines. There is no reason this legislation shouldn't gather the support of every Member of this body. It should unify us.

The second bill we will consider is the Fetus Farming Prohibition Act of 2006. Specifically, the bill prohibits the implantation and gestation of an embryo in a human or animal for the purpose of aborting for research—the manufacture of human life for experimental purposes. Senators BROWNBACK and SANTORUM have proposed legislation that would draw a clear line which should not be crossed. This is a forward-leaning pro-life bill, a moral guardrail in place before any inducement exists to promote it.

Shortly after I originally outlined my principles 5 years ago, President Bush announced his policy on embryonic stem cell research. It federally funded embryonic stem cell research for the first time. It did so within an ethical framework, and it showed respect for human life.

President Bush and I do not differ about the need for strong guidelines governing stem cell research. His policy was generally consistent with the principles I set forth a month before his announcement back in 2001. However, as science has progressed over the last 5 years, we have learned that fewer

than the anticipated number of cell lines have proved suitable for research, and I think the limit on cell lines available for federally funded research is too restrictive.

H.R. 810, the Stem Cell Research Enhancement Act, addresses this restriction in our current policy. It has many shortcomings, but it is clearly consistent with my fifth principle on stem cell research: "Provide funding for embryonic stem cell research only from blastocysts that would otherwise be discarded." In fact, the bill applies what I proposed in 2001 verbatim. It allows Federal funding for research using only those embryonic stem cells derived from blastocysts that are left over after in vitro fertilization and would otherwise be discarded.

Mr. President, in closing, all three of the bills the Senate will address beginning at 12:30 today will raise profound ethical questions that are challenging. They merit serious dialogue, and they merit serious debate. That is why I am pleased that on an issue of this magnitude, Senators will have the opportunity over the next 2 days to have their ideas considered and voted on separately and cleanly.

Mr. President, I yield the floor.

Mr. KYL. Mr. President, am I correct that we are now in a period of morning business?

The ACTING PRESIDENT pro tempore. The Senator is correct.

Mr. KYL. Mr. President, I ask unanimous consent to speak for 3 minutes.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

ISRAEL

Mr. KYL. Mr. President, I rise again today to discuss the situation in the Middle East where our Israeli allies are fighting unprovoked aggression by a terrorist army on their border. To date, over 1,000 rockets and missiles have been fired into Israel, killing more than a dozen civilians. It was especially disturbing to hear that the missile which collapsed a three-story building in Haifa earlier today was a Syrian model, loaded with ball bearings to cause maximum civilian casualties.

At a time when one of our closest allies is threatened by indiscriminate attacks on its population centers and our President and Secretary of State are overseas, it is incumbent on this body to remain united in standing behind Israel. I am pleased that the leadership is drafting a resolution expressing bipartisan condemnation of Hezbollah's attacks and in support of Israel's right to respond in the name of self-defense.

I am pleased that our allies, too, understand the grave nature of this crisis and its origins. The joint statement released over the weekend by the G8 states unequivocally that this violence:

Results from efforts by extremist forces to destabilize the region and to frustrate the aspirations of the Palestinian, Israeli, and Lebanese people for democracy and peace. These extremist elements and those that support them cannot be allowed to plunge the Middle East into chaos, and a wider conflict.

Even some Arab governments, including Saudi Arabia, Egypt, and Jordan, took the commendable step of chastising Hezbollah for its "unexpected, inappropriate, and irresponsible acts."

In light of the chaos being precipitated by Hezbollah's rocket and missile capability—a capability being provided directly to Hezbollah by the governments of Syria and Iran—I thought it would be appropriate to take a moment today to talk about how that threat can be addressed. The estimated 13,000 missiles currently in Hezbollah's arsenal are hidden throughout Southern Lebanon, in private homes, caves, and factories. At present, the only way to destroy these systems is to search them out on foot—a risky and potentially provocative solution. Alternatively, Israeli forces can strike at missile launchers after they have fired, meaning that at least one salvo will already be en route. It would be a vast improvement if Israel had the option of neutralizing the Hezbollah threat through defensive, rather than offensive means.

Israel currently has access to Patriot and Arrow missile defense technologies, great systems which are critical for defending against longer-range missiles, but poorly suited to defend Israeli territory from the types of rockets and missiles currently being fired by Hezbollah.

It is for this reason that I support the U.S. Missile Defense Agency efforts—in cooperation with the Israeli Missile Defense Organization—to develop a system for short-range missile defense. Aimed at projectiles with a range of less than 200 kilometers, this system would provide Israel with another way to defend itself, rather than having to rely exclusively on offensive action. It is propitious that the Defense Appropriations Committee is marking up its bill this week. For more than a year, I have worked with Senators STEVENS and INOUE to support the short-range missile defense program. Under their leadership, I believe that the committee will provide the investment necessary to accelerate fielding of the system. Unfortunately, the need for a redoubled effort is now clearer than ever.

We still do not know how the current crisis is going to end. What we can and should say, however, is that Israel has the full support of this body in its ongoing efforts to fight terrorists, protect its citizens, and create the circumstances for peaceful coexistence with Lebanon, and all of its neighbors.

ORDER FOR STAR PRINT—H.R. 5672

Mr. KYL. Mr. President, I ask unanimous consent that H.R. 5672 be star printed.

The ACTING PRESIDING pro tempore. Without objection, it is so ordered.

Mr. KYL. Mr. President, I suggest the absence of a quorum.

The ACTING PRESIDING pro tempore. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. SPECTER. Mr. President, I ask unanimous consent that the order for the quorum call be dispensed with.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

CONCLUSION OF MORNING BUSINESS

The ACTING PRESIDENT pro tempore. Morning business is closed.

FETUS FARMING PROHIBITION ACT OF 2006

ALTERNATIVE PLURIPOTENT STEM CELL THERAPIES ENHANCEMENT ACT

STEM CELL RESEARCH ENHANCEMENT ACT OF 2005

The ACTING PRESIDENT pro tempore. Under the previous order, the hour of 12:30 having arrived, the Senate will proceed to the consideration of S. 3504, S. 2754, and H.R. 810, en bloc, which the clerk will report.

The legislative clerk read as follows:

A bill (H.R. 810) to amend the Public Health Service Act to provide for human embryonic stem cell research.

A bill (S. 3504) to amend the Public Health Service Act to prohibit the solicitation or acceptance of tissue from fetuses gestated for research purposes, and for other purposes.

A bill (S. 2754) to derive human pluripotent stem cell lines using techniques that do not knowingly harm embryos.

Mr. SPECTER. Mr. President, I ask unanimous consent that I may use this hourglass during the course of the debate.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

Mr. SPECTER. Mr. President, it is difficult to characterize the importance of the debate which the Senate is now beginning because the most fundamental aspect of human life is our health. Without our health, there is nothing we can do. Medical research has performed wonders, and stem cells, which came upon the scene in November of 1998, have the most remarkable potential of any scientific discovery ever made with respect to human

health. These stem cells have the capacity to regenerate disease cells in the human body and have the capacity to cure maladies of all sorts, including cancer, heart disease, Parkinson's, Alzheimer's, spinal cord—the long litany of maladies which confront mankind.

The stem cell debate began with the hearings conducted by the Appropriations Subcommittee on Labor, Health and Human Services, which I chair and on which Senator TOM HARKIN is ranking member. We began those hearings within days of the November 1998 announcement and have had some 18 hearings on stem cells to explore all ramifications of the potential of stem cells.

There is now an avalanche of evidence that the use of stem cells in scientific research has boundless potential. The state of the law is that federal funding may only be used for a limited number of obsolete stem cell lines.

The bill which is the fundamental issue before the Senate today is H.R. 810, which Senator HARKIN and I introduced as a Senate bill with some 42 co-sponsors, which would allow research on embryonic stem cells.

There are two other bills at issue. One is S. 2754 which Senator SANTORUM and I have introduced which relates to long-range research not involving the embryos, but it is totally separate and distinct from H.R. 810 in that it does not have the potential that the embryonic stem cells have and it is long range.

The third bill is S. 3504 which relates to fetus farming prohibition, and I believe there will be little controversy about this bill. The bill would deal with two unethical activities—the solicitation or acceptance of human fetal tissue knowing that a pregnancy was deliberately initiated to provide such tissue and the solicitation or acceptance of tissues or cells from a human embryo or fetus that was gestated in the uterus of a nonhuman animal. I believe there will be no contest about that.

I expect relatively little contest about S. 2754, which does not in any way relate to the importance of research on embryonic stem cells.

The embryonic stem cells are used from many embryos which have been created for in vitro fertilization. Customarily, a dozen or so are created, maybe three or four are used, and the others are then frozen and ultimately will be discarded. There are some 400,000 of those embryos which are frozen today, and the likelihood of their being used is nil.

Senator HARKIN and I introduced legislation to provide for Federal funding to encourage adoption of these embryos. If they could be used to create human life, I would not in the remotest way contend that they ought to be used for scientific research. But the fact is that they will either be used for scientific research or thrown away.

When the issue of adoption was raised, as I say, we took the lead in the Labor, Health and Human Services, and Education Subcommittee in the year 2002 and appropriated \$1 million and since then have appropriated more in succeeding years.

As of May 31, 2006, the Snow Flake Organization, one of the Department of Health and Human Services' embryonic adoption grantees, had a news conference announcing that there had been 100 births since 1997. As of May 31, 2006, the National Embryo Donation Center had a total of 28 deliveries or ongoing pregnancies. Out of the 400,000, even with Federal funding available to encourage adoption, the number is 128, which makes it conclusive that these 400,000 embryos will either be used for scientific research or thrown away.

The bill which Senator HARKIN and I have introduced is very carefully structured to be sure that it satisfies the strictest ethical scrutiny.

This is the essence of the bill: first, that the stem cells were originally created for fertility treatment purposes; second, are in excess of the clinical need; third, the individual seeking fertility treatments for whom the embryos were created has determined that the embryos will not be implanted in a woman; fourth, they will be otherwise discarded; and fifth, the individual for whom embryos were created has provided written consent for embryo adoption.

This bill does not allow Federal funds to be used for the derogation of stem cell lines, a step in the process where the embryo is destroyed—the lines are created and the embryos are destroyed before they are subjected to research which is funded by the Federal Government under the bill which Senator HARKIN and I are promoting.

The evidence of the utility of these embryonic stem cells is unquestioned, and the need for more stem cell lines similarly is unquestioned.

On August 9, 2001, President Bush made an Executive determination to allow Federal research on some 60 existing stem cell lines. It was later determined that there might be as many as 70 lines. It has since been determined that there are no more than 20 lines, and perhaps even fewer. These existing lines are tainted with mouse feeder cells, which is a technical consideration that they can't be used.

The experts in the field: Dr. Nabel, Director of the National Institutes of Health (NIH) Heart, Lung, and Blood Institute, focused on the unavailability of stem cells for research, noting that only four stem cell lines are currently in common use.

The enormous advantages of stem cells were outlined in some detail by the various Directors of the NIH.

Dr. Zerhouni, Director, NIH, said:

Embryonic stem cell research holds great promise for treating, curing, and improving

our understanding of disease, as well as revealing important basic mechanisms involved in cell differentiation and development.

Dr. Fauci, Director of the National Institute of Allergy and Infectious Diseases, said:

NIAMD believes that embryonic stem cell research could be advanced by the availability of additional cell lines. Individual stem cell lines have unique properties. Thus, we may be limiting our ability to achieve the full range of potential therapeutic applications of embryonic stem cells by restricting research to the relatively small number of lines currently available.

Dr. Battey, Director of the Deafness Institute, said:

The more stem cell lines available for study the more likely a cell line will be maximally useful for a given research, and potentially clinical, application . . . the scientific community would be best served by having a greater number of human embryonic stem cell lines available for study.

Dr. Nabel, the director of the Heart, Lung, and Blood Institute, said:

. . . we recognize that the limitations of existing cell lines are hindering scientific progress among a community that is very eager to move forward in this promising area. We support the creation of dissemination of newer stem cell lines in the expectation that it will advance this field and hasten progress in basic and clinical research.

Similar opinions were articulated by Dr. Tabak, director of the Dental Institute; by Dr. Volkow, director of the National Institute of Drug Abuse; by Dr. Collins of the Human Genome Institute; by Dr. Neiderhuber, director of the Cancer Institute; by Dr. Rodgers, acting director of the Diabetes and Digestive Disease Institute; by Dr. Landis, director of the Neurology Institute; by Dr. Berg, director of the General Medical Sciences Institute; by Dr. Alexander, director of the Child Health Institute; by Dr. Sieving, director of the Eye Institute; by Dr. Schwartz, director of the Environmental Health Institute; by Dr. Hodes, director of the Aging Institute; by Dr. Li, director of the Alcohol Abuse Institute; by Dr. Alving, acting director of the Center for Research Resources. All concur with the need for additional stem cell lines for research in dealing with the maladies in their own particular area.

By way of a strictly personal note, I had a little root canal work done this morning. The dentist asked me what was going on in the Senate today. I told him about stem cell research. He said: I hope you win your case because it will help us on root canal work. The embryonic stem cells can be injected into the canal with the diseased tissue, and you can have a third set of teeth.

Wherever I turn, people in the medical research field—and I regret I have had a lot of contacts—extol the enormous virtues of stem cells—that they have the capacity to replace diseased cells. If you deal with a heart problem and you have a diseased area, the stem cells can be injected. These embryonic

stem cells have remarkable flexibility and capacity to provide a healthy cell to replace the diseased cell.

We have had remarkable articulation of support from Members of the Senate, as well as Members of the U.S. House of Representatives. The House bill was passed with a comfortable margin, with some 50 Republicans crossing party lines. In the Senate, we have many Senators who are most actively known in the pro-life community, and while they would not make a woman's right to choose available, they do actively support stem cell research. It is important to focus on the difference that being against a woman's right to choose has nothing to do with the issue of stem cell research. They are entirely separate.

Authors of the June 4, 2004, letter to the President on stem cell research include some of the strongest pro-life Senators in our body, including Senator ORRIN HATCH, Senator GORDON SMITH, Senator LAMAR ALEXANDER, Senator THAD COCHRAN, Senator KAY BAILEY HUTCHISON, Senator TRENT LOTT, Senator JOHN MCCAIN, and Senator JOHN WARNER. There is every expectation there will be more Senators from the strong pro-life community who will be supporting embryonic stem cell research.

We have support from two of our colleagues who were very active on the pro-life side, former Senator John Danforth and former Senator Ben Nighthorse Campbell.

On the strictly personal level, I have noted the declaration by President Nixon in 1970 when he declared war on cancer. Had that war been pursued with the same diligence we pursue other wars, I believe cancer would long ago have been cured. Without unduly dwelling on my own situation with Hodgkin's, a year of chemotherapy, I think had the research been fulfilled, I would have been spared that malady.

The maladies such as heart disease, cancer, Parkinson's, and Alzheimer's disease strike approximately 110 million Americans a year. We all know people close to us who have been stricken with cancer or heart failure. My own chief of staff, Carey Lackman, a beautiful young woman of 48, was stricken with breast cancer and died 2 years ago. My son's law partner, Paula Klein, a beautiful woman with two young children, age 55, died of breast cancer. A Federal judge, Edward R. Becker, well known to the Senate for his active work for more than 2 years on asbestos legislation, died in May 2006 from prostate cancer which had metastasized. Those are anecdotal, typical of tens of thousands, hundreds of thousands of people who have died or are incapacitated from diseases which could be cured with stem cell research. It is not only the individuals who contract the maladies, it is their families. It is their loved ones.

President Reagan's wife, Mrs. Nancy Reagan, who is a very nonpublic retiring person, has taken a public stand in support of embryonic stem cell research because of the understanding and impact on her life when President Reagan had Alzheimer's and she had to care for and watch her husband suffer from that malady. We have had very extensive indicators, evidence, that stem cell research could delay the onset of Alzheimer's and, perhaps, cure it entirely.

The conflict which we have on this issue between ideology and science is one which mankind has faced repeatedly in the course of our historical experience. A century from now, people will look back at this debate on stem cell research and wonder how we cannot possibly utilize all of the benefits of science to stop people from dying, to stop people from suffering, when we have these embryos which are either going to be thrown away or used. They are not going to create living people. If they were, no one would be suggesting they be used for scientific research.

There are a number of striking examples of rejection of scientific knowledge at various stages in our human history which, in retrospect, are absurd. For example, in 1486, a committee of the Spanish Government concluded that the voyage proposed by Christopher Columbus should not be funded because "the Western Ocean is infinite and perhaps unnavigable . . . [and] . . . so many centuries after the Creation, it was unlikely anyone could find hitherto unknown lands of any value."

Fortunately, Queen Isabella, disagreed.

Galileo was imprisoned for his support of Copernicus' theory that the planets revolved around the Sun. This allowed the acceptance of a theory upon which all of modern astronomy and space travel are based and what we know from our own experience in the solar system.

Michael Servetus has research on human anatomy. Pope Boniface VIII banned the practice of cadaver dissection in the 1200s. This stopped the practice for over 300 years and greatly slowed the accumulation of education regarding human anatomy. Finally, in the 1500s, Michael Servetus used cadaver dissection to study blood circulation. He was tried and imprisoned by the Catholic Church.

Anesthesia for women in labor was founded by James Simpson in 1848. Reporting his discovery that anesthesia could be used to lessen pain during child birth, the Scottish Calvinist Church objected to the use of anesthesia during labor because "pain of child birth was God's will." The Scottish Calvinist Church stifled anesthesia use by refusing to baptize any children who were born while a person was anesthetized.

Thomas Edison, who brought electricity to us, had a similar experience.

The Committee on Lighting by Electricity in the British House of Commons did not believe that electricity was practical, saying:

There is not the slightest chance of [electricity] competing, in any general way, with gas. There are defects about the electric light which, unless essential changes take place, must entirely prevent its application to ordinary lighting purposes.

Fortunately, that view did not prevail. Fortunately, since it is 102 degrees today and we have an air-conditioned Senate Chamber.

Vaccines, in 1772, in response to the new science of vaccination, Rev. Edward Massey declared:

Diseases are sent by Providence for the punishment of sin, and the proposed attempt to prevent them is a diabolical operation.

Had vaccines been outlawed, millions of lives would have been lost.

In the 1820s, Dr. Dionysus Lardner, Professor of Natural Philosophy and Astronomy at University College, London, stated, referring to rail travel:

Rail travel at high speed is not possible because passengers, unable to breathe, would die of asphyxia.

If it were true, I would not be here today. I would have had to find another way than rail travel to come from Philadelphia to arrive in time for this debate.

I go through this list, and it is only an abbreviation of a much longer list to show how attitudes at different times in retrospect look foolish, look absolutely ridiculous.

When we see in our everyday existence the enormous suffering from so many maladies, there is just no sensible, logical reason why we should not make use of stem cell research.

When I joined the Subcommittee on Health and Human Services in 1981, the budget for the National Institutes of Health (NIH) was a little over \$3 billion. With the leadership of that subcommittee, those funds have now been increased to almost \$29 billion annually. We are being outstripped by other countries which are undertaking embryonic stem cell research. They are taking our scientists. We have the capacity with the NIH and the Federal funding to make enormous additional progress on medical research to save lives, to save pain and suffering. We ought to do so. We ought to pass the Specter-Harkin bill—the Senate's version of the House-passed bill—and seek to persuade the President of the United States that this is a bill which ought to be signed into law.

I know my 30 minutes is up, so I yield to my distinguished colleague from Iowa, Senator TOM HARKIN.

The PRESIDING OFFICER (Mr. BURR). The Senator from Iowa.

Mr. HARKIN. Mr. President, first, I congratulate Senator SPECTER on an exemplary opening statement on this 2-day debate we will be engaged in and also thank him, as I will in my formal

statement, for his leadership over the past several years on so many issues of health care, and this one in particular. I am proud to join him in this effort, as I have for the last year, to try to get H.R. 810 to come up.

Mr. President, we have waited a long time for this day to come, I think too long. We could have and should have voted on H.R. 810 more than a year ago after it passed in the House with a strong bipartisan majority. So we have lost some valuable time. But more to the point, America's best medical researchers have lost valuable time. But be that as it may, H.R. 810 has finally come to the Senate floor, and we will vote on it tomorrow afternoon.

I thank majority leader BILL FRIST for brokering the agreement to make this vote possible. It took courage for him to announce last summer that he supports the bill. And it took courage for him to schedule this vote. I have already commended him privately, and I commend him publicly as well.

Again, I thank Senator SPECTER for leading the effort to promote stem cell research for so many years. He chaired the very first hearing in Congress on embryonic stem cells, as he said in his remarks, in December of 1998. And, again, just repeating what Senator SPECTER had said—but for the sake of emphasis—our Labor, Health, and Human Services Appropriations Subcommittee has held 18 hearings on this research since then.

Senator SPECTER and I also introduced the very first bill in Congress on stem cell research in January of 2000. So Senator SPECTER and I have traveled a long road together, and I thank him for being such an extraordinary leader and partner in this effort.

I also thank the other Senate leaders on stem cell research: Senator HATCH, Senator FEINSTEIN, Senator SMITH, and Senator KENNEDY. Counting Senator SPECTER and myself, there are three Republicans and three Democrats on the list who have led the effort to bring up H.R. 810 and pass it, and it has been a truly bipartisan effort all the way.

Most of all, I thank the hundreds of thousands of families and patients who never gave up, who kept up the pressure to bring this bill to the floor, and who are so eager to see H.R. 810 sent to the President's desk for his signature. They have kept the faith. Now it is our job to see they are not disappointed.

Under the UC agreement, we will debate and vote on three bills. But make no mistake, the only one that really matters is H.R. 810, the Stem Cell Research Enhancement Act. This is the one bill that, at long last, will unleash some of the most exciting and promising research of modern times.

So, as we begin this debate, it is a good time to step back and ask: Why is there so much support for H.R. 810? Hundreds of patient advocacy groups have endorsed the bill; so have dozens

of Nobel Prize winning scientists, dozens of research universities, and, I might add, so has the American public. Polls now show that 72 percent of Americans support embryonic stem cell research—72 percent—compared with 24 percent who oppose it. That is a 3-to-1 margin. So the American people—three out of four—are in favor of embryonic stem cell research.

Why? Well, the answer is very simple. Embryonic stem cell research offers real hope—real hope—for people with Lou Gehrig's disease, real hope for people with Parkinson's, real hope for people with spinal cord injuries, real hope for people with heart disease, real hope for people with diabetes, real hope for people with cancer, real hope for people who suffer from autoimmune diseases such as lupus. All told, more than 100 million Americans have diseases that one day could be treated or cured with embryonic stem cell research. Here is just a brief list of them: cardiovascular disease, autoimmune disease, Alzheimer's, Parkinson's, spinal cord injuries, birth defects, severe burns—millions of Americans who could be cured or helped with stem cell research.

But it is not just Members of Congress who are saying it; we have asked top scientists. Senator SPECTER and I sent letters to the National Institutes of Health last week. Senator SPECTER referred to that in his remarks. We asked their top scientists for their thoughts on stem cell research. Every single one of them said embryonic stem cell research offers enormous potential. We asked 19 NIH scientists—heads of the different individual institutes—and all 19 agreed.

Here is what Dr. Zerhouni, the NIH director, wrote to us:

Embryonic stem cell research holds great promise for treating, curing, and improving our understanding of disease.

This is from Dr. Elizabeth Nabel, the director of the Heart, Lung, and Blood Institute. She wrote:

Embryonic stem cell research has vast potential for addressing critical health [care] needs.

And it is not just NIH scientists who believe this way. In a letter from Dr. J. Michael Bishop, who won the Nobel Prize in medicine in 1989, he writes:

The vast majority of the biomedical research community believes that human embryonic stem cells are likely to be the source of key discoveries related to many debilitating diseases.

I could go on and on, but I think you get the picture. Scientists agree: embryonic stem cell research offers enormous hope—real hope—for easing human suffering.

Now, some may ask: I thought the Federal Government already supports embryonic stem cell research. What about the speech the President gave 5 years ago?

Well, let me try to explain the President's policy as was enunciated 5 years

ago. He gave the speech on August 9, 2001. I remember it well. I was listening to it. I was on the road. I was listening to it on the radio.

The President, at that time, said that federally funded scientists could conduct research on embryonic stem cells only if the stem cells had been derived prior to 9 p.m., August 9, 2001. Well, I thought to myself at the time—and I have thought since—that is rather odd. It is morally OK to do research on stem cells derived before 9 p.m., but it is not morally acceptable to do research on stem cells derived after 9 p.m.? Well, I thought to myself, why not 9:05? What about 9:15 p.m. or 9:30 or midnight? Why was 9 p.m. the magic cutoff hour on August 9, 2001?

Well, clearly it was totally arbitrary. That just happened to be when the President gave his speech. But for whatever reason, the President said only those lines derived by 9 p.m. August 9, 2001, were eligible for federally funded research.

At the time, after I checked into it, some of us were hopeful that the policy would work. But it has not, and here is why. When President Bush announced his policy, he said 78 stem cell lines were available. Many people thought 78 stem cell lines might be enough, might have enough genetic diversity to actually do the kind of research we needed. But as the years progressed, we found that only 21—only 21—of the approved lines are actually available for study; not 78, only 21.

We found out something else I did not know at the time. All 21 of these lines are contaminated by mouse cells. In other words, the embryonic stem cells were grown on mouse cells, so they are contaminated, making it highly unlikely ever to be used for any kind of human therapy. I ask: Would any of you want to have stem cells used for your illness if they were contaminated with mouse cells? I do not think so, and neither do the scientists. And the other thing we found out is that now many of the 21 lines are too unhealthy to use. They have actually become sick.

Dr. Nabel of the NIH Heart, Lung, and Blood Institute wrote to me that only four of these lines are in common use—four. Dr. Jeremy Berg, another NIH director, director of the general medical sciences, said there are about six lines in common use.

So what is happening now is that these policy restrictions are making our scientists work with one arm tied behind their back. It is having a chilling impact on scientists thinking about entering the field.

Dr. Nora Volkow, director of the NIH Drug Abuse Institute, said it is stifling interest in research. She said:

Despite general interest and enthusiasm in the scientific community for embryonic stem cell research, the limited number of available lines has translated into a general lack of research proposals.

Well, if you are a research scientist at one of our hundreds of universities around the country, and you are eligible for NIH funding, would you want to do research on only four lines that may not lead to anything? Would you put in a proposal to do that? You could be one of our budding genius researchers. You might want to put your efforts and endeavors into something else rather than a dead-end policy.

So I submit that the President's policy is not a way forward, it is a dead-end street. It offers only false hope—false hope; not real hope, false hope—to the millions of people across America and the world who are suffering from diseases that could be cured or treated through embryonic stem cell research.

Meanwhile, hundreds of new stem cell lines have been derived since the President's arbitrary deadline of August 9, 2001. These lines are uncontaminated. They are healthy. But they are totally off limits to federally funded scientists. I do not mean just scientists who work at NIH; I am talking about all the scientists who work in all of our universities and research institutions across America. They are off limits—off limits. They cannot use it. It is really a shame.

I was listening to Senator SPECTER earlier talk about some of the earlier pronouncements, some by the Catholic Church, back in the Middle Ages, some by—he mentioned another Calvinist Church—I don't know who all he mentioned—but the views at that time and how we look back and say: How could they have been so blind to prohibit certain activities, such as using cadavers for scientific experimentation to learn how the body works so we could perhaps cure illnesses and diseases?

I was listening to that, and I thought: We have new stem cell lines, uncontaminated with mouse feeder cells, healthy, ready to go. Scientists cannot use them. And I thought: We do not require astronomers today to explore the skies with 19th century telescopes. We do not tell our geologists to study the Earth with a tape measure. If we are serious about realizing the promise of stem cell research, our scientists need access to the best stem cell lines available.

And, again, I would not want anyone to take just my word for it. I think Dr. James Battey knows more about stem cell research than anyone at the National Institutes of Health. He runs the stem cell task force there, and this is what he wrote when I asked him whether it would help our scientists to have access to more stem cell lines. Here is his direct quote:

The more cell lines available for study, the more likely a cell line will be maximally useful for a given research, and potentially clinical, application. For this reason, the scientific community would be best served by having a greater number of human embryonic stem cell lines available for study.

That is from a letter to me from Dr. James Battey, chair of the NIH Stem Cell Task Force, dated July 13, 2006.

Dr. Volkow of the Drug Abuse Institute was even more blunt. She wrote:

Access to a wider array of embryonic stem cell lines would definitely increase scientific opportunity and the chances of breakthrough discoveries.

I should note that scientists in many other countries around the world do not face these kinds of arbitrary restrictions. When you talk to researchers in England, for example, our policy makes no sense to them. They cannot understand why stem cell lines derived on one date are fine to use, but if they are derived on another date they are off limits. They do not have arbitrary barriers like that in England, and that is a big reason so many of the major advances in stem cell research are happening there rather than in the United States.

So we need a stem cell policy in this country that offers real, meaningful hope to patients and their loved ones. That is what H.R. 810 would provide.

Under this bill, federally funded researchers could study any stem cell line regardless of the date it was derived as long as strict ethical guidelines are met. I think it is important to run through some of those ethical guidelines.

First, the only way a stem cell line could be eligible for federally funded research is if it were derived from an embryo that was otherwise going to be discarded. As Senator SPECTER pointed out, there are more than 400,000 embryos in the United States left over from fertility treatments that are currently sitting frozen in storage. The moms and dads have had all the children they want; they no longer need any more of these embryos, and most of them will be discarded. It happens every single day at fertility clinics around the country. People have used in vitro fertilization, had their children, and they don't want any more. Rather than continue to pay the facility to store them and freeze them, they call up and say we don't want them anymore. The facility discards them. It happens every day.

All we are saying is, instead of discarding them as leftover embryos, let's allow couples, if they wish, to donate them to create stem cell lines that can cure diseases and save lives. The choice is this: Throw them away or use them to ease suffering and, hopefully, cure diseases.

It is the second choice that I believe is truly moral and truly respectful of human life. Again, I have to emphasize, as I will today and tomorrow time and time again, H.R. 810 does not create any new embryos. Not one new embryo will be created under H.R. 810—only those left over in in vitro fertilization clinics, and only if the moms and dads give their written consent.

As I said, the second ethical requirement requires them to provide informed written consent. Again, a lot of people don't realize this, but the President's policy is a little fuzzy on the matter of informed and written consent. Some of the 21 federally approved lines—especially those coming from other countries—don't meet that requirement. So we need to pass H.R. 810 to tighten the ethical guidelines on stem cell research, so there is no question that the embryos were donated voluntarily.

Finally, H.R. 810 prohibits anyone from being paid to donate embryos. There is no chance under this bill that women could be exploited to go through the donation process against their will. So no money can change hands. The three ethical guidelines, to repeat, are: One, we can only use excess embryos in in vitro fertilization clinics; second, there must be informed written consent for the donation of those embryos; and third, no money can exchange hands to pay for any of these.

Let me address one more issue, and that is the matter of the so-called alternative ways of deriving stem cells. Some opponents of this will speak today and tomorrow and argue that we don't need to pass H.R. 810. Instead, they say, we should put our current stem cell research on hold in hopes that some new way of deriving stem cells will pan out some time, hopefully, in the future.

That would be a tragic mistake. I support any ethical means to improve the lives of human beings who are suffering. In fact, Senator SPECTER and I included language in our appropriations bill last year urging NIH to support research on alternative ways of deriving stem cells. But not one of these so-called alternative methods has ever succeeded in producing a stem cell line. Right now, they are just theories. Maybe one day, 5 years or 7 years or 10 years or 15 years from now, one of these methods will pan out. But maybe not.

I think this chart tells the story. The NIH estimates that there are about 400 stem cell lines worldwide, almost all of which were derived after the President's arbitrary cutoff date of August 9, 2001. Every one of these lines was derived the same way, using embryos that were left over from infertility treatments that would otherwise have been discarded. So you see on the chart "stem cell lines derived using current method," and we have about 400 stem cell lines worldwide. Now, how many lines were derived using unproven alternative methods? Zero. It is 400 to zero.

Yet we will hear today and, I think, tomorrow from some who say we should pass other bills. We should not use the proven method we have, but we should go to alternative methodolo-

gies. We know right now that zero stem cell lines have been derived from using those alternative methodologies.

Again, should we pursue these alternative methods? Of course. This is no prohibition against that. We should open every door we can in the ethical pursuit to cures. But meanwhile, people we love are dying from Parkinson's and ALS, and children are suffering from juvenile diabetes. Should we say wait another 5, 7, or 10 years and see if we can derive stem cells from these alternative methods? Maybe we can, maybe we cannot. If we cannot, what do we do then? Say the doors are all closed? Meanwhile, we have many stem cell lines derived from leftover embryos in in vitro fertilization clinics.

Another point about the alternatives bill. Even if Congress were to pass it and the President signs it, it has absolutely no impact on the progress of stem cell research. That is because the other bills we are voting on here don't authorize anything NIH cannot do already. We had a hearing. Senator SANTORUM, the author of that bill, was at the hearing. We had people from NIH. Senator DURBIN was there and he asked the question:

Can you tell me whether S. 2754—

which is another one of the companion bills we will be voting on tomorrow—authorizes research on stem cells at the NIH that currently is not permissible or legal?

Dr. James F. Battey at NIH said:

No, it does not.

That was on June 27 of this year. So the alternatives bill, S. 2754, might not do any harm, but it doesn't do any good either. It just says, NIH, you can do what you can already do. Well, that is fine with me; I have no problem with that. But don't be fooled into thinking that S. 2754 somehow takes the place of H.R. 810. It doesn't.

That is one more reason we need to focus on H.R. 810.

In closing, my nephew Kelly is one of the millions of Americans whose hopes depend on stem cell research. He has been a quadriplegic for about 27 years since suffering a spinal cord injury in a terrible accident while he was in the U.S. Navy and serving on an aircraft carrier. Kelly's hope has been that sometime scientists will finally find a way to mend his spinal cord so he can walk again. He has been following very closely the whole issue of embryonic stem cell research. His hope, like the hope of Christopher Reeve's, was—we all remember him, our first "Superman"; he fought so hard for embryonic stem cell research before he passed away. They both hoped embryonic stem cell research would lead to a breakthrough that would allow them to walk again. Kelly asks all the time: When is the Senate going to vote on H.R. 810?

You know, we have seen the videos of mice whose spinal cords have been

damaged so they could not walk and were treated with stem cells from other mice and they are now walking again. As Christopher Reeve once said after reviewing the video of one of these white rats that could not walk but was given stem cells and now was walking, "Oh, to be a rat."

Well, after more than a year of prayers and pressure, my nephew Kelly and millions of other Americans suffering from disease and paralysis will get their wish. I am optimistic that we have the 60 votes necessary to pass H.R. 810 tomorrow and send it immediately to the President's desk. There are a lot of stories. I am sure we all have family stories such as my nephew's.

Here is a letter from the ALS Association—the Amyotrophic Lateral Sclerosis Association, also called Lou Gehrig's Disease. It says, in part:

The advancement of stem cell research is vital for people such as Roger Gould from Ames, IA. ALS has steadily eroded Roger's ability to control muscle movement, limiting his ability to speak, walk, move his arms, and lead the type of life most all of us take for granted. Ultimately, the disease will take his life. Stem cell research provides promise to people such as Roger and his wife Cindy that one day an effective treatment for ALS will be found. It also gives hope to thousands of others that ALS no longer will mean death in an average of 2 to 5 years after diagnosis; that one day we may be able to prevent ALS from taking the lives of people such as Rob Borsellino, a nationally recognized columnist from Des Moines, IA, who lost his battle against ALS last month, a year after his diagnosis.

I ask unanimous consent that this letter be printed in the RECORD following my statement.

The PRESIDING OFFICER. Without objection, it is so ordered.

(See exhibit 1.)

Mr. HARKIN. Mr. President, my time is up. Again, this is going to be a good debate, a good airing of the issues. Tomorrow we will vote on this bill and send it to the President. I am hopeful that the President, after reviewing it and looking at what happened in the past—the new things that have come to light because of the mouse feeder cells and the contamination of those lines—will sign the bill and give real hope to millions of Americans.

I yield the floor.

EXHIBIT 1

THE AMYOTROPHIC LATERAL
SCLEROSIS ASSOCIATION,
Washington, DC, July 12, 2006.

U.S. Senate,
Washington, DC.

DEAR SENATORS: The ALS Association (ALSA) strongly supports the Senate's consideration of legislation to advance stem cell research. We are grateful for the bipartisan efforts of Senators to bring this important issue up for a vote before the August Congressional recess and are particularly appreciative of the leadership on this issue demonstrated by Majority Leader Bill Frist (R-TN) and Senator Tom Harkin (D-IA).

We understand that the Senate will consider three different stem cell initiatives

during the week of July 17. We strongly urge the Senate to pass all three proposals, including H.R. 810, the Stem Cell Research Enhancement Act. These initiatives, and H.R. 810 in particular, provide our nation with the best opportunity to fully explore the promise of stem cell research and the hope that it may lead to a treatment and cure for ALS.

The ALS Association is the only national voluntary health association dedicated solely to the fight against Amyotrophic Lateral Sclerosis (ALS), more commonly known as Lou Gehrig's disease. Our mission is to improve the quality of life for those living with ALS and to discover a treatment and cure for this deadly disease.

ALSA supports the ethical expansion of the Administration's stem cell policy as provided for in H.R. 810, permitting the use of embryos originally created for fertility treatment upon the consent of those individuals for whom the embryos were created. Importantly, the bill would arm researchers and scientists with the tools and resources they need to determine the potential embryonic stem cell research has to prevent, treat and cure countless diseases. This is especially important for people with ALS, for there is no cure for the disease and although there is one drug available to treat ALS, it only prolongs life by a few months.

The advancement of stem cell research is vital for people like Roger Gould from Ames Iowa. ALS has steadily eroded Roger's ability to control muscle movement, limiting his ability to speak, walk, move his arms and lead the type of life most all of us take for granted. Ultimately, the disease will take his life. Stem cell research provides promise to people like Roger and his wife Cindy that one day an effective treatment for ALS will be found. It also gives hope to thousands of others that ALS no longer will mean death in an average of two to five years after diagnosis; that one day we may be able to prevent ALS from taking the lives of people like Rob Borsellino, a nationally recognized columnist from Des Moines, IA who lost his battle against ALS last month, just a year after his diagnosis.

Through our innovative TREAT ALS program, The ALS Association is pursuing an aggressive strategy to advance the development of new treatments for ALS, bringing innovations from the lab to the bedside faster than ever before. Exploring the potential of stem cells is an important component of this effort. In fact, recent research funded by ALSA and published in the *Annals of Neurology* just this month, shows that stem cell therapy can partially restore motor function—function which ALS destroys. Other research in stem cells also show promise for ALS. While translating the promise of stem cell research into treatments and a cure for the disease continues to be a hope for the future, it is important that we explore all potential avenues for treating this horrific disease. An expansion of the current federal policy on stem cell research can only benefit the search for a treatment and cure for ALS.

Therefore, we urge the Senate to pass H.R. 810 and help ensure that people with ALS can benefit as quickly as possible from the very best that science and technology has to offer, including the potential innovations that can result from embryonic stem cell research.

Sincerely,

STEVE GIBSON,
Vice President, Government Relations
and Public Affairs.

The PRESIDING OFFICER. Under the previous order, the majority controls the next 30 minutes.

The Senator from Oklahoma is recognized.

Mr. COBURN. Mr. President, I wish to take 5 minutes of my allotted 15 minutes to answer some of the questions raised by Senator HARKIN and Senator SPECTER.

I think it is very important that the American public understands what this debate is. We have heard a lot of statements this morning that there are no cures other than fetal stem cell research, and that could not be further from the truth. I am a practicing physician. I deliver babies. I have read almost every article published in the last 12 months on stem cells, both embryonic and nonembryonic adult. The fact is there is not one cure in this country today from embryonic stem cells.

We talked about 21 lines, but what they don't say is there is no limitation in this country at all on private research from any of the 400 lines Senator HARKIN mentioned. There also is a statement by the caretaker and many scientists that the lines are not contaminated. As a matter of fact, they are not contaminated. The question is, do we want to do what is best to get us further down the road to treat people? I am a two-time cancer survivor; I had cancer of the colon and melanoma. With the treatments that are available—I desire the treatments that can come out of stem cell research, there is no question. But every disease Senator HARKIN listed—every disease save ALS—has an adult stem cell or cord blood stem cell cure that has already been proven in humans, without using embryonic stem cells. What is the science behind it? What is the science that tells us we are going to have trouble with embryonic but not with the other? It is called the mitochondria. If you study physiology at all, what you know is every cytoplasm of every cell has mitochondria in it.

The only way to use an embryonic stem cell line and to use it effectively without falling into the trap of contamination or cross-immunization—in other words, allergy to the treatment—is to somehow quiet mitochondria. They are the energy source for cells. They have DNA. So none of the problems that are seen with your own adult stem cells or cord blood from your own child will be existing in a treatment from your own stem cells.

The reason we should spend more money on our own stem cell lines today is because there will not be complications from them as is noted in every study that has thus far been done on embryonic stem cells.

The Senator mentioned the rats. The only study that shows neurologic improvement is when the rats were sacrificed at 8 weeks. Every other study, when they let the rats live to 12 weeks, show teratoma or tumor formation, which is the problem with embryonic stem cells.

I hope the American people will listen. It is not about not getting where we want to go, but there is false hope, tremendous false hope in what we are about to do when, in fact, if we would redouble our efforts on the other areas of stem cells.

One final point and then I will yield. There is a germ cell line, stem cell line, which goes against everything Senator HARKIN says. It has been proven in this country; it has been proven in Germany. It comes from ovarian tissue and testicular tissue. It is, without a doubt, the greatest thing on the horizon for us because it has none of the problems associated—I am not talking the ethical problems, I am talking the scientific problems associated with embryonic stem cells. There are none of the problems with it.

I have seen beating heart tissue from germ cell lines. It can create every area. There are three tissues, endoderm, ectoderm and mesoderm. That is the important reason why embryonic is thought to be so important.

One final point on dedifferentiation, the ability to take a cell that is in your body today and make it go backward. That has been accomplished. We now see multiple lines of pluripotent cells from our own bodies.

The choice is not destroy embryos, and if we don't, we will not get good research; the choice is go where the money is leading us, and the money is leading us into adult stem cells, germ cell lines, and other lines that have none of the problems of embryonic stem cells.

The PRESIDING OFFICER. The Senator from Kansas.

Mr. BROWNBACK. Mr. President, I thank my colleague from Oklahoma for his short, clear statement. I have some charts that will back him up.

I am delighted we are having this debate. It is time. We last debated this issue on the Senate floor in 1998. A lot has developed since then. As my colleague from Oklahoma pointed out, much of the science has passed by the embryonic stem cell and the need for embryonic stem cells, as the science has gone to adult stem cells and cord blood, and that is where the treatments are. I will show pictures of patients in that area and what is taking place.

I am delighted to be debating my colleagues. We have been debating this issue for some time. I think it is time we have a vote and look at this issue.

When I was a young Congressman first running for Congress in Chanute, KS, a young man approached me. He knew me and knew I was running for office. He said: Can you answer one question for me?

I said: I will try. I was anxious to be of help. I was anxious to prove I knew policy issues, I knew right from wrong, and I would be a good Congressman for him.

He asked me: Why is it we will fine somebody up to half a million dollars for destroying a bald eagle's egg, and yet we will fund the destruction of young humans? Why is it Federal law, both cases at that point in time, as far as the funding of abortion—I don't remember when that was changed, although now we are talking about the destruction of young human life again.

He said: Why is that?

I thought for a while. I thought: That is a good question. I don't know why that is.

I have a picture which may seem an odd place to start this debate, but it will tie in, and I will show how. I have a picture of a bald eagle's egg and a bald eagle. If I asked my 8-year-old children what happens if I destroy this egg, will I get this eagle? they will say: No, you don't get the eagle if you destroy the egg.

Why not? That egg is not an eagle.

I know, but the egg is the eagle because the eagle comes out of the egg.

Well, he doesn't look like him.

I know it is an eagle in the egg, and if you destroy the egg, you don't get the eagle. That is why we say in the Endangered Species Act, if you destroy this bald eagle's egg, you can have a maximum fine of up to half a million dollars.

I want to show some other eggs, if I can. These are human embryos, fertilized eggs. They are fertilized eggs such as this bald eagle's egg is. This one, Mother Teresa once was a human embryo. JFK was once a human embryo. Martin Luther King was once a human embryo. Ronald Reagan was once a human embryo.

Again, I think if we ask ourselves a simple question: If I destroy this, do I destroy this in the same way? Does it happen? If I destroy this human embryo—everybody on the Earth was a human embryo at some time—if I destroy that human embryo, do I somehow go ahead and get to be here anyway?

The answer, of course, again, if you ask my 8-year-old children, is: No, you don't get to be here because you destroyed the very start of your life, you destroyed the beginning of it, you destroyed that biological entity you were because the same genetic material that was there was in Ronald Reagan, and it was a unique set of genetic material, unique to him. The same for Martin Luther King, JFK, or Mother Teresa, and the billions of people around the world. We all started as a human embryo, and if you destroy the embryo, you destroy the person.

It is a unique set of genetic material right after the fertilization takes place. It doesn't matter where the fertilization takes place. It can take place in an IVF clinic or the old-fashioned way or it can take place by cloning. You still have this. You can have this, or you can destroy this and never get

that. That is pretty direct, straightforward, nobody argues it. And we are not talking theology, as people try to drag this into the debate. We are talking basic biology. This is basic biology 101. If you destroy the embryo, you don't get the full-scale person. This is a genetic person, entity, special, unique, sacred, and so is this person.

My point one of this is, if we use taxpayers' dollars to fund the expansion of embryonic stem cell research, you have to inherently destroy young humans to do this, and do we want to do that? What was previously said in Dickey-Wicker was: No, we will not use taxpayers' dollars to destroy young human life. Here we would change that and say: Yes, we do; it is for a special purpose, a special reason; these are unique; these are something we are really going to get cures for. And that is my second point, cures.

The other side has talked about cures for a long period of time, and I want cures, and we are getting cures to take place. If we had taken the half a billion dollars, \$500 million that we have invested in embryonic stem cell research in animals and humans and invested that instead in adult stem cell research and cord blood research, we would probably have a lot more people in clinical trials today. We would have a lot more people, I believe, being treated and alive today if we had taken the half a billion dollars that we put, in the last 5 years, into these areas of embryonic stem cell research and put them in adult stem cells and cord blood, we would have more people alive today, walking around, experiencing treatments and I believe cures. Let me show some faces of these people.

This is a beautiful lady, Jacki Rabon. She was involved in a traffic accident. She is a paraplegic. She had to go to Portugal to get a treatment with her own adult stem cells. They are olfactory stem cells from the base of the nose. They take them out, grow them, and put them back in the spinal cord injury area. She had no feeling, no mobility, nothing below the waist. She is now getting feeling in her hips through this treatment, adult stem cells, her own stem cells. She is getting feeling in the hips and walking with the use of braces, but she had to go to Portugal to do this. Why isn't this being done in America? Why aren't we having people treated here? We are not adequately funding this area. She wants to walk and I want her to walk and she could, but we are taking money and putting them into these speculative areas when we have cures that are working. We have to go to Portugal to get them.

Let's look at this next picture. This is an amazing story. This young man is named Ryan Schneider. I hosted him at a press conference 2 hours ago. He is 3 years old, a young man with cerebral palsy. His mother saved his cord blood.

At 2 years of age, she started noticing that he was not growing and that

his arms were retracting. She took him to the doctors and they said: Yes, CP; he has CP. The mother was devastated, but she would not give up.

The morning after the diagnosis, she was lying in bed and she had this a-ha moment. She said: I saved his cord blood and let's use the cord blood and treat him with the cord blood because I think that can work and get him moving again.

She called all around the country and couldn't find anybody willing to do this procedure. She was pleading with these doctors: It is simply his own cord blood, taking his own cord blood and putting it back in; this isn't going to hurt him.

They said: We can't do it, not sure, we don't have FDA protocol.

Finally, she finds a researcher at Duke University, whom we had in to testify, who said: Yes, we will do it, and the worst thing that can happen is nothing because nothing will happen, it is his own cord blood; it is not going to hurt him.

She goes down to Duke University, takes his own cord blood, and they inject it in him. This is when he was 2. He was at a press conference today. There is no retraction taking place in the arms. He has full mobility. The thing he likes to do the most is bug his 8-year-old sister, which is what his mother said today: We like that, too, that he wants to do that. He has a word vocabulary that is normal for the age range. She said: Why isn't this an FDA-approved situation? Why are we not doing more research? Why aren't more people storing and saving cord blood so when this happens people can get cures?

Well, we haven't put enough funding into it. If we had put the half a billion more dollars into this area instead of embryonic, we might have a bunch of kids treated for CP who are not getting treated and be like Ryan running around and bugging his sister instead of having CP.

Here is a real interesting story, too, Keone Penn. We had him in to testify. He has sickle-cell anemia. He was dying. It is a real difficulty. Sickle cell is a very difficult problem to face, very painful problem for a child to face. He went through the New York Cord Blood Center, got treatment there, got a match. They had enough of a genetic match that it works for him. There are no indicators of sickle-cell anemia today. None. He isn't in Washington today, but we have had him in to testify.

We need a lot more cord blood stored. We need a lot more diversity of cord blood stored. We could use that half a billion dollars to store more cord blood and have more ethnic diversity so more people can get treated, so more people such as him will live, not die; so more people will not have to suffer what he went through. There could be real

treatments with these dollars to help them.

No. 1, why are we destroying young human life? We fine people for destroying life in other forms that we want to preserve, such as the bald eagle. No. 2, why would we take this money away from current areas where we can really treat people and especially in the areas where we are not getting any treatments, we are having all the problems with tumor formation, as Dr. COBURN noted. Why are we doing that? So that fewer people are getting treatments and people are having to go overseas to get these treatments? Why? And why would we ask to do more of it now? That is what this bill is basically asking to do: That we would change Federal law so you could destroy human life with Federal taxpayer dollars. No. 2, that we would use this money, and more of it, to fund speculative areas that even their set of scientists are saying are a minimum of a decade or two away from treatments which we are not getting, and we have taken away from Keone Penn, and treatments that he could get. Why? What sense does that make?

In 1943, C.S. Lewis delivered a series of lectures—this is the gentleman who did the Narnia series that has been made into a movie that a lot of young people have seen and read the Narnia series books, along with a lot of other pieces—a brilliant writer and a brave man. He did a lecture series called “The Abolition Of Man” in 1943, a very forward-looking series, and he noted at one point: “If man chooses to treat himself as raw material, raw material he will be.” It echoes themes of what we are hearing today. I don’t give anybody over to a bad heart. I think everybody wants cures. I want cures. I see a way we can get treatments and hopefully cures. I want things done ethically. I don’t give anybody over to a bad heart. But what we are doing is treating man as raw material—raw material to feed into a system that we hope will produce some results.

Unfortunately, it is not the first time we have in human history that we have treated people as raw material. We have frequently, in the past, subjected the weaker to the will of the stronger, and we have always regretted it afterwards. We shouldn’t do that today. It shouldn’t have happened then, and we don’t need to do it now. We are talking about the embryo, the young human life.

I want to go through a couple of these points about what it is we are talking about. President Clinton’s bioethics board defined young human life—and I want to give their definition for it. The National Bioethics Advisory Commission says that an embryo is: “The developing organism from the time of fertilization”—the time of fertilization—“until significant differentiation has occurred, when the orga-

nism then becomes known as a fetus.” So it is an embryo by that Presidential advisory bioethics analysis.

And here is a definition taken from a textbook, the Human Embryology textbook states:

Although life is a continuous process, fertilization is a critical landmark because, under ordinary circumstances, a new, genetically distinct human organism is thereby formed. The combination of 23 chromosomes present in each pronucleus results in 46 chromosomes in the zygote.

Thus the diploid number is restored and the embryonic genome is formed. The embryo now exists as a genetic unity.

That isn’t SAM BROWNBACK saying this, this is Human Embryology, Third Edition, saying that.

We have a distinct genetic entity once it is formed. It doesn’t matter the location. It can be the old-fashioned way, as I noted at the outset, via the human body; in vitro fertilization; it can be what some refer to as somatic cell nuclear transfer, SCNT, or what most refer to as human cloning. It is a separate entity.

Pioneer stem cell researcher Jamie Thompson goes further. He says of human cloning: “By any reasonable definition, you’re creating an embryo. If you try to define it away, you’re being disingenuous.” Jamie Thompson. So we are talking about a human embryo.

Now, some would say it is not big enough to be human life. Here I want to make a point, on this chart, if I could. My colleagues made the point that the human embryo is about this big; very small at its beginning of life. Therefore, because it is small and is fragile and it can’t do anything on its own, you know, it is really not human life. And we should be able to destroy it, for a good purpose. We are doing this for a good purpose. This isn’t us being malicious; we are doing this for a good purpose. Well, the interesting thing about that, as I said at the outset—of course, when you destroy this, you never get the full human at any point in time. This is a separate genetic entity, even at this point in time. Also, the point was made to me one time that if the Big Bang theory is correct, then at one point in time, this is the size of the universe. Then it is all condensed down, this much matter is condensed down to that infinitesimal, small size before it blows. So I guess if you destroy it then, it doesn’t become the universe, but that doesn’t matter. It is too small to be seen as significant, and it can’t do anything on its own. It sits in a frozen state, and because it can’t take care of itself, because it can’t grow, because it can’t breathe in this situation, then it is not human—because it can’t care for itself, because it is too fragile. It doesn’t breathe. It doesn’t do some of the things that we give over to the presence of life.

I want to give some examples, real quick, of young people—let’s use this

one. This is Isaiah Sullivan Royal, born to Hannah and Jed Royal. Hannah works in my office. Isaiah was born significantly premature. As you can see, he is a fighter. He is a tough little guy. He has been through a lot—more medical treatments than most people would have gone through in their lifetime already. Without human intervention, without help, he doesn’t survive and make it. Yet he is a young human, and he is beautiful. Talk to his parents about him. So the idea that just because of smallness, you can’t take care of yourself doesn’t make you human, is completely false. Do we want to say that because you are young and small and weak, you are worthless or helpless or you are not human, which would be even worse? That just doesn’t stand. That doesn’t stand to reason. Yes, human life is fragile, but it is of infinite worth and it is of infinite value.

I want to now look at the overall issue of where we are with adult stem cell work. Dr. COBURN hit on this area, and I want to put some more points to it. We have, by peer review articles, 72 different areas, different human maladies being treated with adult stem cells or with cord blood—72. There was recently an article in one of the magazines saying: Well, we don’t think the number is actually 72, it may be 68, it may be this or that.

We can wait a day or two and it will be up to 72 because there are more coming out in all of the areas. Some people are quibbling and saying: Well, these are not in FDA treatment trials. That is true, a number of them are not because we don’t have sufficient funding. A half a billion dollars would really help us to move that along to get these in FDA treatment trials. These are in human clinical applications, where there are human beings treated for 72 different maladies by adult stem cells or cord blood—72, and for embryonic, we have zero.

We have known about embryonic stem cells in mice for 25 years. We have not been able to get them to work in this situation. They form tumors and they are rapid growing. With adult stem cells we know what they are about, we know what they are doing, and they are working, and people are being treated: 72 adult stem cell treatments to zero embryonic treatments. Again, you can quibble that they are not in FDA trials, not available to everybody. That is true. A lot of people are having to go overseas for treatments in some cases, and in some cases they are actually treatments that were developed in the United States, but because of FDA approval processes being long, they are having to get treatment overseas, even though the process was developed here.

I want to show you the specific areas, and this is—I am breaking the rules on charts because this one has—this one is too busy, but it is the only way I can

get it all on one chart: 72 current human clinical applications using adult stem cells.

As I said, we could wait a week or 2 weeks, it will be more. Here are some of the amazing ones: Bladder diseases, they are developing, actually growing bladders with your own stem cells for people who have had bladder cancer or something of that nature, they are able to actually form a shell structure and the cells grow around it. The ones I like the best are in the heart areas, the cardiovascular. I had David Foege speaking at a press conference we had, he could hardly walk, advanced stroke, because of his heart problem, no infracturing rate. The physicians—I am sure I am butchering the words—I am a lawyer. I apologize for that. But he got this treatment, and he went first to a place in the United States, and they said: Look, you are just too advanced in your problematic stage. We are not going to treat you here because we want to treat early on and we only have so much money and we could use more, but we only have so much.

So the guy goes to Thailand for the treatment—it may have been developed in the United States. I am not certain that it was developed in the United States, but it is used here but only on people with great opportunity to make it through. He goes to Thailand, gets this treatment. His indicators of what happened to him in the stroke are diminishing. He is out walking. He spoke at the press conference that we had, and this man has got life again. Otherwise, he would, in all probability, be dead today. And how many people are like him, that because we have slowed the development of the adult field down by putting so many of our resources in the nonproductive embryonic area, and we are getting interesting science, but with adult we are talking about real people now. We are talking about real lives of individuals. How many more of them can get treated, and how many people can afford to fly to Bangkok to get this treatment? How many are able to do that? Yet they could go somewhere in the United States. I mean, my goodness, I hope we start thinking about the people involved in this and seeing the success in so many various and different fields. I think it is important we would do that.

Mr. President, I want to point out we will have, as my colleagues know, three votes that will be taking place. I do hope people will support the fetal farming ban. We shouldn't be growing young fetuses and using them for research, period. Some people are wanting to grow them further, cells differentiate and use it then. What we are talking about is an actual ban on that. I am hoping my colleagues will support that because we should not be doing that. I hope everybody would see that there is a huge moral dilemma with doing that. It is a bill that will be put

forward. There is an alternative bill coming up with these pluripotent cells that I am hoping my colleagues can support.

The focal point is this, do we use taxpayer dollars, Federal taxpayer dollars, to destroy young human life for research purposes? I would hope it is seen that we could develop and put forward a very clear argument and rationale as to why you shouldn't do that. It is illegal. The Dickey-Wicker appropriations language, to start off with, that is the law we previously passed. It is immoral. We shouldn't use a weaker person for the benefit of a stronger person. And it is unnecessary. That is actually the beauty of it. We are presenting false choices to people. The choice that works has no ethical problem, and we can get broad-based support for it. Then, we can have more Jacki Rabons, Ryan Schneiders, and Keone Penns who are getting treatments now, and their lives are being saved, people staying in the United States for treatment rather than going overseas for the treatment, and we have got a lot of people being successfully treated and hopefully cured.

I may use that term "cured" too loosely because these are at the early stages. These are treatments that are showing enormous promise, but we can't—they are not, many of them are not in any sort of FDA-approved trial, so we can't use that term "cure." But we have a lot of successes.

The other road that is being talked about is the use of human life as raw material, and if we do that, raw material we will be. We will cheapen life. And we cheapen life any time we use it for anything other than the sacredness that life is. I hope, at the end of the day, that would be the thing we grab onto. Clearly, embryonic stem cell research is unnecessary. We don't want to cheapen human life.

Mr. COBURN. Mr. President, would the Senator yield for a question?

Mr. BROWNBACK. I am happy to yield.

Mr. COBURN. Is there any prohibition in the United States today for private money to fund any type of fetal research, embryonic stem cell research?

Mr. BROWNBACK. Reclaiming my time, no, there is not. There is no limitation today on State dollars, private dollars, foreign dollars, whatever you want to call it.

Mr. COBURN. As a matter of fact, California passed, I think, Proposition 71: \$500 million over the next 10 years in fetal stem cell research?

Mr. BROWNBACK. I think actually the number is \$3 billion.

Mr. COBURN. Three billion dollars. So there is no limitation at the present time.

Mr. BROWNBACK. None whatsoever.

Mr. COBURN. Is the Senator aware of the private investment dollars that are

presently—the private investment dollars—not Government dollars, not State dollars—that are now going into embryonic stem cell research versus adult stem cell and germ line stem cell and cord blood, the ratio is about 100 to 1?

Mr. BROWNBACK. Mr. President, reclaiming my time, it is, and it is a very interesting feature that where the private money is going, where people have to show production coming out of it, it is all going into the adult cord blood because people know the science. And that is why I want to conclude with what I started with.

In many respects, the science has passed this debate by. The science is saying: Do the adult, do the cord blood. The embryonic is not working, and you have enormous ethical problems with doing that, and we don't need to go that way. That is where the private dollars then are going, which I would hope my colleagues would look at as well.

Mr. President, I yield the floor.

The PRESIDING OFFICER. Under the previous order, the minority controls debate for the next 30 minutes.

Mr. LEVIN. Mr. President, I don't know if there is a fixed order for the minority. If not, I will yield myself 15 minutes.

The PRESIDING OFFICER. The Senator from Michigan is recognized.

Mr. LEVIN. We stand at the threshold of a new era of medical discovery. We can already glimpse the dramatic lifegiving advances in regenerative medicine that lie ahead, but we remain mired down at this point with breakthroughs on the horizon but not within reach unless we change the President's policy on stem cell research.

Embryonic stem cell research could hold the key to curing diseases that no other research can cure. As best we know now, an embryonic stem cell is unique in nature. It and it alone can develop into any other type of cell in the body. An embryonic stem cell and an embryonic stem cell alone can become a nerve cell, a muscle cell, or any of the more than 200 types of cells in the body. The research into directing the creation and use of these cells may be extraordinarily difficult, but it is easy to understand how creating healthy cells could replace diseased cells and could save an untold number of lives.

One example of the possibilities of stem cell research is the hope that it offers for those suffering from Parkinson's disease. Parkinson's disease is a motor system disorder that results from a loss of brain cells that produce dopamine. Individuals with Parkinson's disease often experience a trembling in the hands or arms or face and impaired balance and coordination. As the disease develops, it can become difficult to walk, talk, and complete other basic tasks. With research, scientists may be able to coax embryonic

stem cells into becoming healthy neurons that produce the desperately needed dopamine. And if those neurons can be successfully transplanted into a patient with Parkinson's disease, that person could be cured.

The list of other diseases ripe for stem cell research is long. Lou Gehrig's disease is a progressive neuromuscular disease characterized by a degeneration of the nerve cells of the brain and spinal cord. Juvenile diabetes is an autoimmune disease in which the immune system attacks the pancreas, destroying insulin-producing cells.

Alzheimer's disease is a form of dementia that afflicts the part of the brain that controls memory, language, and thought. Spinal cord injuries interrupt the sensory pathway between the brain and the rest of the body.

Now, imagine if embryonic stem cell research could produce replacements for the nerve cells ravaged by Lou Gehrig's disease, for the insulin-producing cells destroyed by diabetes, for the brain cells washed away by Alzheimer's, for the neural pathways severed by spinal cord injuries. Stem cell research could offer the millions of Americans suffering from these and other diseases not just hopes but cures. It could give them and their families—who are often physically, financially, and emotionally exhausted—their lives back.

Many technical hurdles stand in the way of that day. These discoveries will not be easy. But it is wrong to throw additional and unnecessary obstacles in front of our doctors, researchers, and scientists. That is precisely, however, what the President's policy has done.

On August 21, 2001, President Bush issued an Executive order that the Federal Government would only fund embryonic stem cell research on stem cell lines created before that date. "Stem cell line" is the name given to constantly dividing cells that continue to be derived from a single embryo. Most independent experts estimated at the time of the President's Executive order that only 80 stem cell lines, a totally inadequate amount, would be available for Federal research. Even worse, most of those 80 lines were determined to be polluted and unusable, leaving only about 20 stem cell lines actually available to scientists. That number is far too small to tap the vast potential of this research.

The President did not question the legitimacy of the science being used in stem cell research but the ethics of using embryos, scientifically known as blastocysts, until implanted through in vitro fertilization. A blastocyst consists of around 150 cells, which is smaller than the point of a pin. While the blastocyst is destroyed during the process of extracting embryonic stem cells, the key fact is that any that are

used for stem cell research would have been discarded and destroyed anyway. That is a fact that opponents refuse to deal with.

These blastocysts are created by in vitro fertilization clinics and, for a variety of reasons, will not be used for implantation and will, therefore, eventually be discarded.

Last month, the Detroit News editorialized against a Michigan law restricting embryonic stem cell research and used words that equally apply to the President's policy. The News wrote:

The justification for this law is to protect human embryos, but the fact that fertility clinics can simply discard them means that the research ban is pointless.

The logic of some embryonic stem cell research opponents is totally befuddling. They are apparently willing to ignore the discarding of the embryos by fertility clinics, but they label as morally objectionable the life-giving use of embryos which would otherwise be discarded. I believe that embryonic stem cell research is truly a life-giving, not a life-destroying, process because of the extraordinary potential for healing living, breathing human beings who have names and faces and loved ones.

While the President is fighting against research in America, other countries are pressing ahead. America has always been at the forefront of scientific innovation, and we could do this research faster, more efficiently, and more ethically than most other countries. We also have an obligation to speed its potential benefits to the American people and to people around the world.

The President's policy, however, has stifled private-public partnerships and has hindered our potential impact in this area. Today, other countries are poised to reap the life-giving rewards of stem cell research while we fall further behind.

Over a year ago, the House took a significant step toward overcoming Presidential opposition by passing the Stem Cell Research and Enhancement Act, H.R. 810, which would remove the President's arbitrary prohibition against using stem cells created after August 21, 2001. That is another fact that opponents refuse to deal with. The President's date of August 21, 2001, is breathtakingly illogical. How can the President argue that it is OK to use embryos created before that date for research, even though in his view it was the taking of a life but that after that date it is unethical to do so?

H.R. 810 would pave the way for hundreds or thousands of additional stem lines to be made available. It is bipartisan legislation, and it passed overwhelmingly in the House.

Shortly after the House made its strong statement in favor of exploring the medical potential of embryonic stem cell research, the Senate majority leader committed to bringing that

bill up for floor consideration. Senator FRIST understands how great the life-enhancing possibilities are, and he has chosen to side with his fellow physicians and with the future in supporting this research.

This bill has the strong support of the American Medical Association, the Coalition for the Advancement of Medical Research, the Association of American Universities, the Christopher Reeve Foundation, the Juvenile Diabetes Research Foundation, the Leukemia and Lymphoma Society, the Parkinson's Action Network, and more than 200 additional organizations. More important, it has the overwhelming support of the American people. If the President vetoes this bill, I hope we will resoundingly override his veto.

As part of the unanimous consent agreement to consider this legislation, we are considering two additional bills as well. The bill put forward by Senators SANTORUM and SPECTER would emphasize the use of adult stem cells instead of embryonic stem cells. Adult stem cells may have some potential, but they do not have the critically essential ability of the embryonic stem cell to become any other type of cell.

Dr. Sean Morrison, the director of the University of Michigan's Center for Stem Cell Biology, and one of the top stem cell researchers in the country, wrote recently in the Detroit Free Press about another alternative to embryonic stem cells being touted, adult stem cells from umbilical cords. Dr. Morrison wrote:

Umbilical cord cells are used clinically only to replace blood-forming cells. There is no compelling evidence that these cells could ever be used to replace cells in other tissues. These cells are not an alternative to embryonic stem cells, which can replace any cell type in the body. . . . That is why there is near universal agreement among respected scientists and patient advocacy groups that current restrictions [against embryonic stem cell research] should be relaxed.

We may be on the cusp of one of the greatest miracles in the history of medicine. The door of possibility is ajar, inviting us to enter. But we cannot make these great strides if our researchers continue to be hampered by President Bush's overly restrictive policy. We owe it to everybody suffering from—or who may in the future be afflicted by—these dread diseases to move boldly toward a brighter future.

I yield the floor.

THE PRESIDING OFFICER. The Senator from South Dakota is recognized.

Mr. JOHNSON. Mr. President, today I speak in support of legislation this Chamber has been waiting to consider for more than a year. I am pleased that wait is finally over. I encourage my colleagues to join me in voting to give hope to millions of Americans living with diseases for which embryonic stem cell research offers their only real hope of a cure. These patients are often desperate and have been waiting for

their Congress to take action for nearly 5 years, since August 9, 2001, when the President defied common sense and stifled the promise and the hope offered by stem cell research.

This essential legislation has already passed the House of Representatives by an overwhelmingly large bipartisan majority. Today, I want to briefly share my thoughts on why the current policy on stem cell research is unsustainable and woefully inadequate, clarify some misconceptions about the Stem Cell Research Enhancement Act, and share the stories of some South Dakotans who will enormously benefit from the passage of this bill.

Current law allows federally funded research on only those stem cells derived as of August 9, 2001. At the time, there were more than 65 stem cell lines available worldwide. While this number represented marvelous progress from the first derivation of an embryonic stem cell in 1998, we know now that it was just the tip of the iceberg of possibility.

Today we know only 22 of those first 65 lines are viable for research, and virtually none will produce medical therapies permitted for use in humans. This is because at the time the only way to maintain stem cell lines was to use mouse cells to help them grow. Since then, scientists working with private funds—and no thanks to the Federal Government—have developed stronger and more robust stem cell lines that are not dependent on mouse cells and could lead to therapies for actual use in humans.

We must open these new lines to research supported by Federal funding. The United States is home to the world's largest and most distinguished organizations dedicated to maintaining and improving health through medical science. The National Institutes of Health and the Centers for Disease Control and Prevention conduct research that is critical to understanding human disease and its treatment. These centers rely on Government funding to continue their work, and if we do not fund their research on embryonic stem cell lines, the United States will fall behind the rest of the world in scientific and medical advancement. If the Stem Cell Research Enhancement Act does not become law, we not only risk the futures of Americans living with currently incurable diseases, we also risk our national reputation as the home of the world's most innovative and distinguished scientists working to improve the health.

This is not just a matter of international medical research prestige; it directly goes to the millions of families around the world who will at last have hope that we can conquer the planet's most awful diseases and injuries.

The Stem Cell Research Enhancement Act creates a closely monitored and controlled stem cell research ef-

fort. The bill will allow vital, life-giving research to progress using frozen fertilized embryos that would otherwise be incinerated as medical waste. The choice is simple: life-giving research or incineration of excess cells.

Stem cell research is conducted with egg cells fertilized in a laboratory for the sole purpose of assisting childless couples who wish to have a baby. After choosing embryos for implantation in the mother, the remainder are routinely destroyed as medical waste. I believe these cells, of which hundreds of thousands are now stored at fertility clinics, would be better used to advance medical research that holds great promise for curing or preventing some of the world's worst diseases, as well as for repairing spinal cord and other injuries. I believe choosing research over incineration is a moral choice.

My South Dakota values, my religious faith, and my commitment to South Dakota families tell me we must choose life-giving research over incineration of these cells.

The Stem Cell Research Enhancement Act imposes tighter ethical rules than exist under current law. Any donated embryos must be created solely for fertility treatment and must be in excess of the clinical need of those seeking fertility treatment. Furthermore, the bill requires written consent from those who wish to donate the embryonic cells and prohibits financial incentives for donation.

Stem cells in umbilical cord blood have provided effective therapies for diseases such as leukemia and sickle cell anemia. However, there are many other diseases, including type 1 diabetes, Alzheimer's, and Parkinson's, which doctors cannot treat or cure with cord blood stem cells. Because of this fact, we must advance research in other areas, including embryonic stem cell research, to access all available options for curing the debilitating diseases plaguing so many of our fellow Americans.

Earlier, I mentioned that this bill gives hope to millions of Americans living with diseases for which embryonic stem cell research offers the only hope for a cure. I have been honored to meet many of these individuals in my home State of South Dakota.

This bill gives hope to 3-year-old Alexander Sohl from Brandon, SD. His parents, Terry and Laurie, told me little Alexander's very first words were not "mommy" or "daddy" but "no shot"—his insulin treatments began when he was just a baby. And it is stem cell research that gives his family hope that the daily inflicted pain and the threat to the very life of this small child can at last end.

This bill gives hope to Bonnie Younkin. Bonnie lives in Huron, SD, and was diagnosed with Parkinson's disease in 2002 when she was in her

early 50s. Though living with her disease is a daily battle, Bonnie also serves as an advocate for awareness of the disease and increased funding for Parkinson's research as the State's action coordinator. It can run in families; Bonnie is the fourth female in her family diagnosed with Parkinson's, and she lives in fear that her three daughters and one granddaughter may have a similar diagnosis in their future. Bonnie called my office last week, to touch base in advance of this debate. Upon hearing that I remained committed to supporting this bill, she had just two words, "Bless you."

South Dakota families are desperate for this research to commence—and to proceed.

Choosing research over incineration is a moral choice. I have prayed about this issue, and my deeply held religious faith tells me that respect for human life, respect for God's children, requires this life-saving research to proceed rather than the continued incineration of frozen excess embryo cells that are sitting in fertility clinics classified as medical waste.

Let there be no mistake: There are three bills being considered by the Senate this week. But unless a Senator votes for H.R. 810, the Stem Cell Research Enhancement Act, he or she will not have voted for this meaningful life-giving research.

I urge my colleagues to join me in affirming that respect—that respect for life—by voting for the Stem Cell Research Enhancement Act. Choose research and life over incineration.

I yield the floor.

THE PRESIDING OFFICER. Under the previous order, the minority is recognized.

MR. HARKIN. Mr. President, I have a letter from a number of different groups endorsing H.R. 810. It is patient advocacy groups, health organizations, research universities, scientific institutes, religious groups, and others. There are 205 groups listed here. I will not go through all of them, obviously, but I think it is important that all of these groups be laid upon the RECORD. I ask unanimous consent that the letter be printed in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

JULY 14, 2006.

*U.S. Senate,
Washington, DC.*

DEAR SENATOR: We, the undersigned patient advocacy groups, health organizations, research universities, scientific societies, religious groups and other interested institutions and associations, representing millions of patients, scientists, health care providers and advocates, write you with our strong and unified support for H.R. 810, the Stem Cell Research Enhancement Act. We urge your vote in favor of H.R. 810 when the Senate considers the measure next week.

Of the bills being considered simultaneously, only H.R. 810 will move stem cell research forward in our country. This is the

bill which holds promise for expanding medical breakthroughs. The other two bills—the Alternative Pluripotent Stem Cell Therapies Enhancement Act (S. 2754) and the Fetus Farming Prohibition Act (S. 3504)—are NOT substitutes for a YES vote on H.R. 810.

H.R. 810 is the pro-patient and pro-research bill. A vote in support of H.R. 810 will be considered a vote in support of more than 100 million patients in the U.S. and substantial progress for research. Please work to pass H.R. 810 immediately.

Sincerely,

Mr. HARKIN. Mr. President, I have a letter from the American Society for Cell Biology. The letter was sent to Senator HATCH, dated July 17. It says:

The Senate will shortly be considering legislation to permit the National Institutes of Health (NIH) to fund research with additional and new and existing human embryonic stem cell (hESC) lines. As staunch supporters of biomedical research and particularly research with hESCs, we trust that you will exert your influence to ensure passage of H.R. 810. Scientists engaged in ESC research are counting on you and like-minded Senate colleagues to assure its passage.

The President must also be persuaded not veto this legislation for if we continue on the path he set five years ago, United States investigators will be out of the running in converting embryonic stem cells into important new therapies. It is especially frustrating and demeaning that American scientists are prohibited from using their NIH grant funds for research with the hundreds of hESC lines generated outside the United States or generated in this country with private funding.

I note there are 27 leading scientists on this letter, 17 of them having received the Nobel Prize for medicine in one form or another.

I ask unanimous consent that this letter be printed in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

THE AMERICAN SOCIETY FOR
CELL BIOLOGY,
Bethesda, MD, July 17, 2006.

Hon. ORRIN HATCH,
U.S. Senate,
Washington, DC.

DEAR SENATOR HATCH: The Senate will shortly be considering legislation to permit the National Institutes of Health (NIH) to fund research with additional and new and existing human embryonic stem cell (hESC) lines. As staunch supporters of biomedical research and particularly research with hESCs, we trust that you will exert your influence to ensure passage of H.R. 810. Scientists engaged in ESC research are counting on you and like-minded Senate colleagues to assure its passage.

The President must also be persuaded not to veto this legislation for if we continue on the path he set 5 years ago, United States investigators will be out of the running in converting embryonic stem cells into important new therapies. It is especially frustrating and demeaning that American scientists are prohibited from using their NIH grant funds for research with the hundreds of hESC lines generated outside the United States or generated in this country with private funding.

Also, S. 2754, the "Alternative Pluripotent Stem Cell Therapies Enhancement Act," sponsored by Senators SPECTER and SANTORUM, seems to us, superfluous. Ostensibly, it is intended to authorize research "to derive human pluripotent stem cell lines using techniques that do not harm embryos." However, at present, such research is currently permissible and, therefore, does not require congressional legislation; indeed, the National Institutes of Health may currently be funding such efforts.

Moreover, all the alternative procedures advanced in the report by the President's Council on Bioethics and other alternative methods that have been suggested encounter equally vexing ethical concerns. Hence, S. 2754 is unneeded and if passed would deflect from the current urgent need for generating new stem cell lines from excess IVF-derived blastocysts.

Sincerely,

Peter Agre, M.D., Vice Chancellor for Science and Technology, James B. Duke Professor of Cell Biology, Duke University School of Medicine, Nobel Prize in Chemistry, 2003.

Bruce Alberts, Professor of Biochemistry and Biophysics, University of California, San Francisco, President Emeritus, National Academy of Sciences.

Mary C. Beckerle, Ph.D., Ralph E. and Willia T. Main Presidential Professor, University of Utah, President, American Society for Cell Biology.

Eric Wieschaus, Department of Molecular Biology, Princeton University, Nobel Prize in Physiology or Medicine, 1995.

Mr. COBURN. Mr. President, will the Senator yield for a question?

Mr. HARKIN. Yes.

Mr. COBURN. Is the Senator aware of the research that has been done on juvenile diabetes thus far in terms of embryonic stem cell research and adult stem cell research?

Mr. HARKIN. I am not intimately knowledgeable of all of the nuances in research that is being done. We had hearings, and we have the information in our hearing record on a lot of that. Standing here now, I don't know all of that.

Mr. COBURN. Is the Senator aware that the only successful treatments for juvenile diabetes to come from stem cells have come from adult stem cells, and in fact that the embryonic stem cells have one-fiftieth the amount of insulin, were not effective, and ended after about 80 days after transplantation? Is the Senator aware of that?

Mr. HARKIN. Will the Senator repeat that? I was reading something.

Mr. COBURN. Is the Senator aware that of the human studies which have thus far been done on juvenile diabetes in fact the successful one was adult stem cells and the unsuccessful one was embryonic stem cell? Is the Senator aware of that fact?

Mr. HARKIN. Let me respond this way: First, I note that the Juvenile Diabetes Research Foundation, which represents families all over America who are affected with juvenile diabetes, is in support of H.R. 810. I want that on the record. In fact, they have been one of the strongest supporters.

Second, the transplantation of insulin-producing pancreatic cells is already known to reverse the most damaging symptoms of type 1 diabetes. The problem with that is the limited number of organ donors out there who donate pancreases. That seems to be the problem.

Could I ask the Senator, are there enough pancreas donors out there to take care of everyone with juvenile diabetes?

Mr. COBURN. It is not required. Actually, today the science shows that ductal cells from the patient's own pancreas can be induced to become stem cells that then produce insulin-producing cells. There is no transplantation needed. In fact, these ductal cells have been proven and demonstrated to produce the same eyelet cells that the patient did initially when they were grown as an embryo.

Mr. HARKIN. I have heard this argument before. I am not a scientist. I don't know all of the nuances, I would be the first to admit. I do know, however, that every time that has come up, the Juvenile Diabetes Research Association disagrees that this is a viable pathway toward curing all of those with juvenile diabetes.

Mr. COBURN. They cannot disagree. It has only been done for 3 months, and it is successful. There have been no successful embryonic cells taken from the duct of the pancreas of children with diabetes, converted into cells, and have in fact cured their diabetes.

Mr. HARKIN. How many people have been cured of juvenile diabetes with this?

Mr. COBURN. For 3 months is all we know. I don't know the numbers. I think it is eight or nine. This protocol is being done in Europe at the present time.

Mr. HARKIN. Is it not being done in the United States?

Mr. COBURN. No, it is not being done in the United States.

Mr. HARKIN. Have any of these findings been published?

Mr. COBURN. They have been published in peer-reviewed articles. I would be happy to submit them for the RECORD.

Mr. HARKIN. I would appreciate that.

Mr. COBURN. I thank the Senator for allowing me to ask those questions.

Mr. HARKIN. I thank the Senator. There is a good colloquy.

I would further ask the Senator from Oklahoma—this has been done for 3 months—do we have any data to show that this does cure juvenile diabetes? Does it abate it somewhat? I don't know what the outcomes have been for these eight or nine people.

Mr. COBURN. Here is the key point that needs to be made in this debate: If you use your own cells, you will not have tumors, you will not have rejection. If you use embryonic stem cells, you will have tumors, you will have teratomas, and you will have rejection.

That is what we know. That is why I, as a scientist, have not raised the life issue here once, but I am adamantly pro-life. I believe the science is so far ahead of this debate. When everyone knows what is really going on in terms of research, they are going to want the dollars put into the stem cells, both in terms of dedifferentiation—we know we can differentiate cells backward to make them pluripotent—and also to isolate cells from our own human body to use back on us. That is an important part of the debate.

Mr. HARKIN. I thank the Senator.

I again say that all the Nobel scientists, all of the leading scientists in America simply do not agree with the Senator from Oklahoma. These are the people involved in cell biology and that kind of research.

The Senator says embryonic stem cells will produce tumors. We do not know that is true. We do not have any real long-term data to know anything about how embryonic stem cells will work later on.

The PRESIDING OFFICER. The time of the Senator has expired.

Under the previous order, the majority is recognized for the next 30 minutes.

Mr. COBURN. I inquire of the Chair, under the previous order, if the majority is not here, who assumes control of the time?

The PRESIDING OFFICER. The time is reserved for the majority to be recognized.

Mr. COBURN. Mr. President, it is my understanding that Senator FRIST has this time. He has advised me I can use the time until he arrives.

The PRESIDING OFFICER. The Senator from Oklahoma.

Mr. COBURN. I will spend a few minutes. This is a very emotional debate for every family in this country. Every family in this country has someone who, in fact, has a disease that will be impacted in the future by research that is ongoing in terms of stem cell research.

I make a couple of points. We have heard today a couple of very strong statements that are highly inaccurate.

One is that the only way you will cure this is with embryonic stem cells. No one knows that. As a matter of fact, most of the cures in science have come not by what we thought was going to happen but by what happened that surprised us. That is not true.

No. 2, there is no ban at the present time on research in this country on embryonic stem cells. What there is a ban on is using additional Federal funds to create additional stem cells, but additional stem cells can be created outside of the Government.

The Senator from South Dakota created a false choice. The false choice is not incineration. There are 400,000 embryos that are frozen in this country today; 93 percent of those the parents want to save for themselves. So that leaves us a smaller portion. If you look at the numbers, when you thaw embryos, you have a 50-percent wastage, you lose 50 percent of them. The false choice Senator JOHNSON put forward was this: they either get burned up or they get used for embryonic stem cell research. This last week, the 108th baby was born through this Operation Snowflake—which is adopted embryos—so that is not the only choice.

The other thing is, if everyone will recognize, in the fertility community in this country, that in Europe, they do not have a problem with excess embryos. We overdo it in this country in terms of creating embryos for fertility clinics. We create about four times as many obstetrician and fertility specialists as the rest of the world. The choice is not incinerate or use for embryonic stem cell research.

The majority leader has arrived. I yield my time.

The PRESIDING OFFICER. The majority leader.

Mr. FRIST. Mr. President, I thank both of my colleagues for the superb comments thus far over the last 30 minutes but, indeed, since we started at 12:30 today.

As I opened this morning, I made it clear that this debate would be the first of the 21st-century dilemmas that involve ethical considerations and considerations around science, probably the first of many. I say the first; obviously, we have dealt with some other

ethical issues in medicine over the last 5 years, but much of the discussion will focus around science and ethics and that nexus, that crossing of those two, and the interplay.

It is important that we debate this and that all concerns are put on the table, ultimately. These three bills give that opportunity.

Let me add that this probably will be the first of many debates like this in the Senate. I know there are a lot of my colleagues who asked: Why are we bringing this up now? Why are we talking about these tough issues which do force us to address issues about the distinctions of life, the early days of life and also the hope and the promise of science as it goes forward and that interplay? This Senate will have to get used to it.

This Senate will have to focus on those issues as we move forward because science, where it used to be growing at a small clip, is now growing at leaps and bounds, not exponentially but close to exponentially, and will continue to do so.

Less than a century ago, we did not have antibiotics, we did not have vaccines. We had measles, mumps, smallpox, polio—all diseases that ravaged our populations, in this country and around the world. Because of science, because of public health initiatives, they have essentially been eradicated. We will see forward momentum. That momentum will be accelerated in biomedical research.

I mentioned earlier today in opening the debate that when people look back at the 21st century, I would say maybe the next decade is the decade of the cells. Much of our discussion is about developmental biology. That has built upon the foundation of the shoulders of new knowledge regarding molecular and cellular development, coupled with the new understanding that is a product of a sequencing of the human genome from a decade of the last century.

What is important is that the rules, regulations, guidelines, and the framework must be defined and in large part must be defined by this Senate. That is our responsibility as Senators, as representatives of the American people, their attitude, their thought, their philosophies. They are our constituents.

A second point I made when I first started talking about stem cell research 5 years ago is we will have to continually assess and then reassess in light of advancing science certain rules, guidelines, and regulations we put in place. In part, that is why we are here today.

We have three bills before the Senate. My colleagues have talked about those three bills: the Fetus Farming Prohibition Act, the Alternative Pluripotent Stem Cell Therapies Enhancement Act, and the Stem Cell Research Enhancement Act. Each addresses a different facet of the issues

raised by advancing research, advancing developmental biology, advancing stem cell research. Each one of them demands thoughtful consideration and deliberation which will play out over the course of today and tomorrow.

I spent my entire professional career as a transplant surgeon, a professional who specializes in moving living tissue from one person to another person—say an organ or a heart. Take out a heart, put in a heart. Take out a lung, put in a lung. Thus, my interest before coming to this Senate focused on many of the same issues that come before the Senate today: advancing science, how do we define “brain death,” something we did in the 1960s, to make transplantation of the human heart possible.

Thus, it was a little over 5 years ago—on July 18, 2001—that I laid out a comprehensive proposal, a framework at that time, which I believed would both promote stem cell research but also provide an ethical framework through which such research could be conducted. That was 2001, about 2½ years after embryonic stem cells had just been discovered by James Thomson at the University of Wisconsin, or the human embryonic stem cells.

At that time, 5 years ago, I laid out 10 specific interdependent principles. The principles dealt with all types of stem cell research—the adult stem cells, the germ stem cells, embryonic stem cells. They have helped to guide my assessment of stem cell research over the last 5 years, and they have provided a framework I have used and consistently gone back and adopted as I looked at various pieces of legislation on stem cells before this Senate. I will read those 10 principles because of their inclusiveness and their interdependence:

No. 1, ban embryo creation for research.

No. 2, continue funding the ban on the derivation.

No. 3, ban human cloning.

No. 4, increase adult stem cell research.

No. 5, provide funding for embryonic stem cell research only from blastocysts that would otherwise be discarded.

No. 6, require a rigorous informed-consent process.

No. 7, limit the number of stem cell lines.

No. 8, establish a strong public research oversight system.

No. 9, require ongoing independent scientific and ethical review.

No. 10, strengthen and harmonize fetal tissue research restrictions.

The principles are meant to stand the test of time even when applied to a field as rapidly changing as stem cell research.

Yes, I do believe both embryonic and adult stem cell research should be Federally funded but should only be done so within a carefully regulated, fully

transparent, fully accountable framework, ensuring the highest level of respect for that moral significance of the human embryo. But we should fund research when it comes to embryonic stem cell research only if those embryos, only if those stem cell lines were derived from blastocysts that, with 100 percent certainty, are not going to be frozen forever, are not going to be adopted but with 100 percent certainty and with appropriate consent would be discarded, would be thrown away.

Today, we do debate science, developmental biology, and we debate ethics. We are called upon to confront the distinctions around life’s early goings when we do so. As my colleagues know, I am pro-life. I do believe human life begins at conception. It is at this moment, at conception, that the organism is complete—immature, yes, but complete. It is genetically distinct, it is biologically human, living. Development is a gradual process, it is a continual process. All of us in this Senate were at one time an embryo. It represents human life at its earliest stage of development. It is a continuum, coming all the way through. That is the science. That is not religion. That is not faith. That is the science. Thus, I believe strongly that an embryo does have moral significance. It needs to be treated with the utmost dignity and respect.

We have three bills before the Senate. The Fetus Farming Prohibition Act of 2006, the implantation and gestation of the human embryo into either a human or an animal for the purpose of aborting for research—that prohibition is what the discussion is about. Clearly, that would fall far short of “utmost dignity and respect.”

The bill before the Senate ensures this practice is never employed in human research in the United States. That purposeful development of a human embryo, the manufacturing of human life for experimentation and its ultimate destruction is morally reprehensible. It offends the conscience, degrades the value of human life, and, of course, is not medically necessary. Yet it is a practice that some in the field of developmental biology just might be inclined to pursue if those guidelines, if those regulations, are not out there. Why? To look at the later stages beyond the embryo in terms of development and how cells function, or it might be, as we have heard argued before, that the cells have a different nature after the embryo stage but before delivery of the fetus itself and have more stability or more differentiation. This particular legislation preempts, it stops that possibility.

Not only would this be a flagrant lack of respect for nascent human life, but it would also create powerful incentives for women to undergo an intense regimen of superovulation drugs and surgery with potentially dev-

astating side effects. It could exploit women, the most likely targets of egg harvesting or fetal farming. Under no circumstances could human fetus farming be labeled “medical advancement.” It is the exact opposite, an unconscionable regression of the mores that define our culture, a culture that upholds respect for life and health.

As a transplant surgeon, I have had that opportunity to see firsthand how new medical discoveries and technologies can save lives and make life more fulfilling for others. In fact, my entire professional career was spent on these newer therapies, these newer technologies, in order to give others a better life. But at the same time, whether it is in the laboratory, where I spent a lot of time, or at the bedside, I have been able to also witness how fear can also delay scientific advances that are out there before us.

So before us today is that challenge to bridge this divide. And we should reject an outright fear of all technological advance. We have to work together to allow science to advance and to promote those medical advances, whether it is in developmental biology or the human genome project, in order to give a healthier life or more life to others. But we have to do so. That is why we bring these bills to the floor, within an ethical and moral framework, in this pursuit.

Even while we reject a fear of scientific and technological advancement, we still have to—we must; it is our responsibility—live within limits. Limits do not hamper human advances but, rather, allow us to preserve them and to promote them. That is why we can reject this practice of fetus farming while still embracing the hope that is offered by stem cell research. Senators BROWNBACK and SANTORUM worked hard to bring this important legislation to the floor, and I hope my colleagues will join me in supporting it.

The second bill, the Alternative Pluripotent Stem Cell Therapies Enhancement Act, put forth by Senators SANTORUM and SPECTER, is a very important bill, the purpose of which is to step back from and to remove the ethical considerations that surround the unique potential that these pluripotent stem cells have.

Five years ago, when I came to the floor in 2001, I said the following:

We should not let the potential of this research drive the moral considerations themselves. . . . We do not know what the next great discovery is going to be 6 months from now. . . . So the oversight process has to be responsive, has to be ongoing. It has to recognize that science moves very quickly.

That is why we are here. We recognize that science cannot be practiced in a vacuum. We need to promote and accelerate these medical advances. But we also need to ensure that research practices are channeled along lines that respect human life and dignity.

What seemed impossible even 5 years ago now seems possible. Exciting techniques are beginning to emerge that just may make it unnecessary to have to destroy that embryo, to disaggregate or dismember that embryo, in order to obtain cells that have the pluripotent properties that are either exactly like or very similar to the embryonic stem cells. And we have talked about it a little bit earlier today, and in the past, as to the unique property these embryonic stem cells have, which is this pluripotentiality, which has two concepts to it: No. 1 is that they can become any tissue—theoretically, they can become any tissue—and that is in the differentiation; and, secondly, this overall process of self-renewal, that they can renew and replicate themselves again and again and again.

An adult stem cell might be reprogrammable. You might be able to directly reprogram that cell to an earlier stage to make it more pliable, to take it back to an earlier or closer to an embryonic phase. Adult stem cells can be what we call multipotential, and that means they can differentiate, and you can back them down to differentiate into certain tissues. The embryonic stem cell is pluripotential, and the range of tissues it can differentiate to are much greater.

But this reprogramming, coming back earlier to the adult stem cell, earlier and earlier along its chronological development, gives the opportunity to send that adult stem cell into various regions; thus, this direct reprogramming concept opens up great potential. To me, and I would hope to every Member of this body, this type of research—research that stops short of having to destroy an embryo—to obtain pluripotent cells through alternative ways should be supported, and I hope can be supported, by everybody in this body.

In May of last year, 2005, the President's Council on Bioethics issued a report bringing these alternative sources attention. At that time, I asked and worked with several of my colleagues to put together a piece of legislation for which we could say Federal funding will go in that direction to derive these alternative means of developing these pluripotential cells. With more Federal support, and with more emphasis, these newer methods may pay off hugely in terms of scientific advantage and clinical advantage.

They may be the way to bridge these moral and ethical differences among people who hold wildly different and broadly different views, which we will actually hear on the floor over the course of today and tomorrow on stem cell research. Why? Because they avoid any destruction of the human embryo. The alternative methods of potentially deriving pluripotent cells, that were spelled out in the Council on Bioethics report of May of last year, include: extraction from embryos that are no

longer living; a second proposal was blastomere extraction, which involves a nonlethal and nonharmful extraction of the blastomeres from embryos—and, indeed, several researchers over the course of the last year, since that proposal was initially made, have reported success in that regard—thirdly, extraction from artificially created organisms that are not embryos, but embryolike—this was initially proposed by Bill Hurlbut at Stanford and subsequently demonstrated by Dr. Rudolf Jaenisch and others at MIT—fourthly, the direct reprogramming of adult or somatic cells to a pluripotent state through fusion with embryonic cell lines.

We are already driving and promoting ethical alternatives such as adult stem cell research and therapies and cord cell research, both of which have been important to date in the treatment, as well as other types of therapy.

Today, adult stem cell research is the only type of stem cell research that has resulted in proven treatments for human patients. At the Multiorgan Transplant Center that I established and directed at Vanderbilt, we did bone marrow transplants, which are commonly done for treatment of many types of cancers now; at that point, for many types of blood disease. We have had bone marrow transplants done in this country for, oh, about 40 years. The first bone marrow transplant was done in 1968.

Stem cells taken from cord blood have shown great promise in treating the myeloproliferative disorders, the leukemias, congenital immune system disorders.

Recently, cord blood cells have shown some ability to become natural cells, which could lead to treatments for more heart disease and Parkinson's disease. The first cord blood transplant was done about 20 years ago in 1988.

So every day we unlock more of the mysteries of human life, more ways to promote and enhance our health. This compels the profound questions we address, moral questions with which we understandably struggle. Transplantation itself posed a question similar to those we face with stem cell research, a little bit different in that organs were transplanted principally, when I got started, at the end stage of life. People without a heart would be dying 4 to 6 months later. We had to define, as I mentioned earlier, what is brain death. We had ethical considerations about how to allocate a very few number of organs to the many people who waited, which literally meant some people would die waiting for that scarce organ—all ethical considerations.

If we can devise a moral and ethical framework, then it is my belief we will have the chance to save many lives and make many countless other lives more

fulfilling. That is why it is imperative we get our stem cell policy right scientifically, morally, and ethically.

A lot of diseases have been mentioned on the floor, and I guess over the next 2 days I will have the opportunity to come back and talk about some of those particular diseases. Adult stem cells, we know, are so powerful. They have effectively treated so many diseases today. I mentioned bone marrow transplantation. But the list will be coming to the floor, and they have come to the floor, about the number of therapies with bone marrow transplantation and other adult stem cells. Embryonic stem cells, however, do have this unique capacity of self-replication, self-renewal over time, and greater potential to differentiate into other types of tissues. Unlike other stem cells, these embryonic stem cells are pluripotent, where adult stem cells tend to be multipotent. That means the embryonic stem cells have the capacity to become a greater range of types of tissues. They are capable of renewing themselves and replicating themselves over and over again indefinitely.

A number of people have brought up what the current administration policy is. As we all know, on August 9, 2001, President Bush laid out his principles and put in place a policy, which I supported, that for the first time allowed Federal funding for embryonic stem cell research. The President's policy was consistent with my initial principles—my seventh principle: to limit the number of stem cell lines. In order to accomplish that limiting the number of lines, the President used a date: August 9, 2001.

The President's policy also says: Let's support stem cell lines that have been derived from blastocysts that were going to be thrown away or discarded. His policy is the same in that regard. The cell lines we federally support today all came from blastocysts that were left over by in vitro fertilization that were going to be discarded. The President basically said it was OK to do that before August 9, but after August 9 that will not be allowed anymore, and we will only fund those cell lines.

I thought it was very important that Congress continue oversight. Remember, 5 years ago or 6 years ago, I said we are going to be coming back to this again and again and again. I think that oversight absolutely is critical.

This third bill, the Stem Cell Research Enhancement Act, which is the House-passed bill, the Specter-Hatch, the Castle-DeGette bill, is the bill most people will be spending most of their time on over the next day and a half.

Over the last 5 years—while it was widely believed when the President put forth his policy that there would be 78 embryonic stem cell lines available for Federal funding—we have learned,

through science, that has not been the case. In fact, of the initial anticipated 78 lines, there are, right now, about 22 lines that are eligible. There is some concern that these lines are becoming less and less stable and less replicative than initially thought.

While we know that this embryonic stem cell research is at a very early stage—remember, these embryonic stem cells were discovered, first, just in 1998; unlike adult stem cells, where we have 40 years of research history—we do know that the embryonic stem cell research is moving fast and moving quickly.

The question is: Are there a sufficient number of cell lines to keep that research going? I believe right now that the current policy unduly restricts the number of cell lines. As I have said, I am going to be supporting and voting for H.R. 810, the Stem Cell Research Enhancement Act. I do not think it is an ideal piece of legislation. It has a few essential shortcomings as written. It restricts funding to blastocysts left over after IVF that would otherwise be discarded. And that is consistent with my fifth principle. But the shortcomings do have to be addressed somewhere.

First, it lacks a strong ethical and scientific oversight mechanism. Second, the bill does not prohibit financial or other incentives between scientists and fertility clinics. Third, the bill does not specify whether the patients or clinic staff or anyone else has the final say about whether an embryo will be implanted or will be discarded.

And were circumstances different and had the House not acted so quickly and sent the bill over—I think we should have had the opportunity to have a thorough examination and rewrite of that bill. However, even with those reservations, I do support the Stem Cell Research Enhancement Act. As I said, it is completely consistent with my principles from 5 years ago.

Many of my colleagues, such as I, have spent countless hours grappling with this issue—the future of stem cell research. How do we balance pro-life positions with the potential for new life and health offered by stem cell research? There is, perhaps, an inclination to avoid such difficult issues, to ignore them and let others debate. But I believe and feel strongly that we must participate in defining research surrounding the culture of life.

If we don't do that, it will define us. Finally, I thank all of my colleagues. I know we will have a good debate over the next day. We will have those votes at 2:45 tomorrow. I hope those votes will show there are areas of consensus among us and that where differences exist we can respectfully articulate and vote our conscience.

The PRESIDING OFFICER. Under the previous order, the minority is in control of time for the next 30 minutes.

The Senator from Iowa is recognized.

Mr. HARKIN. Mr. President, I know that one of the cosponsors of the bill, one of the great leaders in the Senate on stem cell research, has arrived on the floor to speak. I know the Chair will be recognizing her shortly.

I wanted, again, to just take a moment to sort of repeat for emphasis sake what has been said before. I think the distinguished majority leader referred to that also. It is just that here we have an instance where so many leading scientists around, U.S. Nobel Prize winners, and all the disease groups—I submitted a compendium of about 205, and I think that may soar to 500 or 600 by the end of the day—are supporting H.R. 810.

Lest one thinks that, A, either they have all been hoodwinked into thinking this bill is something it is not or, B, that these are malevolent people who want to just destroy embryos without any thought about the morality or the ethics of it, they are simply mistaken. First of all, none of these people have been hoodwinked, and most of these scientists are as ethical and moral a people as you could find anywhere. They are saying let's use these blastocysts, embryos, or however you want to define them to enhance life, cure disease and illness, rather than having them be discarded, and to do it in a very ethical manner. That is what this bill provides.

With that, I yield the floor.

The PRESIDING OFFICER. The Senator from California is recognized.

Mrs. FEINSTEIN. Mr. President, I rise to support the Stem Cell Research Enhancement Act. Passage of this legislation will finally allow scientists to fully pursue the promise of stem cell research. It will offer hope to millions of our people. Mr. President, we have waited a long time for this day. Earlier, Senator HARKIN spoke to the fact that it was in 1998 when he and Senator SPECTER introduced the first bill dealing with stem cell research. I recall that year I introduced one of the first bills dealing with ethical standards surrounding stem cell research. So it has been 8 years.

Now, finally, the House of Representatives overwhelmingly approved bipartisan legislation. In the intervening time, we have all heard from patients, survivors, and scientists who are desperate to pursue this research that one day could lead to treatments and cures for diabetes, cancer and, yes, even spinal cord injury. Forty Nobel laureates have weighed in with their support, as did former First Lady Nancy Reagan.

While we were waiting, we lost Christopher and Dana Reeve, tireless advocates of stem cell research, and an inspiration for all of us. Millions more American families experienced firsthand the devastation wrought by catastrophic illnesses.

My colleagues and I, Senators SPECTER, HARKIN, KENNEDY, HATCH, and

SMITH, worked tirelessly to bring this to a vote. We pushed privately, we wrote letters, we gave speeches, and we held press conferences to highlight the plight of patients who are living with illnesses day in and day out.

Finally, after all of this pleading and delay, the Senate is acting.

I thank my colleagues for their longstanding leadership on this issue, and I am also very grateful to the majority leader, Senator FRIST, for his support for stem cell research and his work with his caucus to reach this agreement that has made this debate possible.

For all of the controversy that it is generating, the Castle-DeGette Stem Cell Research Enhancement Act is remarkably simple. It reverses the failed policy announced by President Bush in 2001 when he restricted Federal funding to stem cell lines already in existence.

At the time, the President himself recognized the great promise of stem cell research. He sought to find middle ground, announcing a policy that provided Federal funding for more than 60 preexisting genetically diverse stem cell lines. This was morally acceptable, he said, because the life-or-death decision for these stem cell lines had already been made.

Unfortunately, the policy did not work out as promised. These available lines are all contaminated with mouse feeder cells and, therefore, are useless for human research purposes. They don't have the diverse genetic makeup that may be necessary to find cures to benefit all Americans. Researchers cannot use them to examine rare and deadly genetic diseases.

Castle-DeGette states that embryos to be discarded from in vitro fertilization clinics may be used in federally funded stem cell research no matter when they were created.

While opponents have suggested that this bill will lead us down a slippery slope, the parameters created by the bill are actually numerous and they are very strict:

The embryos must be left over following fertility treatment.

It must be clear that the embryos will be discarded.

The people donating the embryos must provide written consent.

These donors may not be compensated for their donation.

These restrictions mean that over 400,000 embryos could become available, all while ensuring that researchers meet the highest of ethical standards.

Let us be clear. We are talking about embryos that will be destroyed whether or not this bill becomes law. It is an indisputable fact that these embryos have no future.

We should not confuse the research permitted under this bill with the activities described under the two other bills currently before us. I am going to

support these bills. Yet it is important to realize that their passage will do nothing to change the status quo.

The Fetus Farming Prohibition Act bans activities that occur in horror movies, not in our research labs. We should not allow these farfetched and frightening techniques, which no respected scientist anywhere endorses, to distract from the plight of millions of Americans seeking cures from devastating diseases.

This debate is also not about the myriad research approaches envisioned in the Alternative Pluripotent Stem Cell Therapies Enhancement Act, as introduced by my colleagues, Senators SPECTER and SANTORUM. This research can already be funded with Federal dollars. Respected scientists are examining a variety of ways to create these multipurpose cells and, of course, this work should continue.

We simply don't know which research approaches will prove fruitful and which will fail. Alternative techniques may lead eventually to cures for serious afflictions, or they may not. Scientists, not Senators, should determine what research to pursue.

Supporting only the Specter-Santorum alternative is not an endorsement of stem cell research. It is an affirmation of a policy that is leaving American researchers far behind in one of the most important fields of scientific discovery, and I want to spend a moment on that.

Because of President Bush's restrictions, some of our best and brightest scientists are leaving the United States to work overseas in countries that have embraced the promise of comprehensive stem cell research. This brain drain has hit my State particularly hard. Let me give you a few examples.

Roger Peterson, a renowned scientist, left the University of California Medical Center in San Francisco in 2001, citing the unfriendly research climate in the United States. He is now conducting human stem cell research at Cambridge University in the United Kingdom. He and his UK team are exploring the biology behind pluripotent, or multipurpose stem cells, and are looking for ways to use them for treatment. He would not have had Federal funding to do this work in the United States, so he left.

Dr. Judith Swain, from the University of California San Diego, will leave for Singapore in September, where she will work at Singapore's state-funded research institute called Biopolis. Her husband, Dr. Edward Holmes, also of the University of California at San Diego, is a ranking official in California's stem cell agency. He is also leaving for Singapore.

NIH researchers, Neal Copeland and Nancy Jenkins, turned down offers to join Stanford University's stem cell department. They, too, are moving to

Singapore. Copeland has said that he selected Singapore because of its "unfettered support of human embryonic stem cell research."

These are but a few examples of the costs of this President's policy.

Researchers are attracted by the federal funding provided in at least 10 other nations—Germany, Finland, France, Sweden, United Kingdom, South Korea, Singapore, Israel, China, and Australia. These investments total hundreds of millions of dollars that are already producing tangible progress.

Sweden funds, with federal funds, 400 researchers today. South Korea and China are each funding an additional 300. Australia has pledged \$90 million through 2011. This investment has already paid off, as Australian researchers have discovered a way to manipulate stem cells into lung cells. This technology could one day be used to treat cystic fibrosis.

Scientists from around the world have come to Singapore's Institute of Bioengineering and Nanotechnology. There, they are using stem cells to produce artificial kidneys. This could one day free people from the burden of kidney dialysis.

Researchers in other countries now author an increasing proportion of stem cell papers than those in the United States.

Foreign researchers have derived almost three-quarters of the world's new stem cell lines, moving quickly ahead of our country, the United States.

Other nations have the money, the researchers, the facilities, and the new stem cell lines they need to move forward. They are learning more about stem cells every day and laying the foundation for groundbreaking cures.

American scientists, on the other hand, cannot obtain Federal funding to do this work. These Federal funding restrictions have a real world impact on ongoing research.

American scientists are making great strides with work on mouse stem cells. They are showing what could be possible if there is Federal funding to extend this work into humans.

Researchers at Stanford University have recently turned cells derived from mouse embryos into one of the building blocks of blood vessels. This advance means they may eventually be able to grow entirely new blood vessels, offering great promise to patients suffering from heart disease. But without Federal funds, it is unlikely they can get the stem cell lines to be able to do the human research.

A research team at Johns Hopkins used cells from mouse embryos to regenerate nerves in paralyzed rats. After treatment, many of the rats regained enough strength to walk and bear weight on their previously paralyzed hind legs.

Mr. President, do you know what this means? This means it might—just

might—be possible to do something science said could never be done, and that is to regenerate a severed spinal column, to regenerate the nerves which scientists always thought never again could be regenerated.

We would never have thought discoveries such as this were possible even a few years ago. So think of what it means for every paraplegic or quadriplegic to know that there is hope out there, that the first rat tests have shown it works?

The next step is the human stem cell lines, to be able to carry out that research on humans, and that is exactly what we are talking about today.

Scientists now must work to translate these promising advances into cures for humans. Such a feat will almost certainly require access to viable lines of human stem cells, and unless we pass Castle-DeGette and unless the President signs Castle-DeGette, these lines will not be available in the United States to regenerate a severed spinal column, to regenerate blood vessels, or to do anything else.

Mike Armstrong, an old friend and chairman of the Johns Hopkins board of trustees, made this very point in a letter he wrote stating news of this advance. Here is what he said:

Treatments not only for paralysis, but for ALS, for multiple sclerosis, and similar diseases of the brain now seem possible. The exact timeframe is impossible to predict, but it will almost certainly depend on the availability of Federal funding.

It will depend on the availability of Federal funding, and that is what is at stake in this debate. He goes on to say:

The level of funding that will ultimately be required to advance this field of science to human trials, however, suggests that Federal funding will be necessary. Yet, under current Federal policy, the only stem cell lines eligible for Federal funding were created using mouse feeder cells and could never be used in clinical trials with humans.

Could never be used in clinical trials for humans.

I am particularly proud of the commitment demonstrated by California scientists and activists in the face of these restrictions. In 2004, California voters approved a proposition, proposition 71. That proposition created and funded the California Institute of Regenerative Medicine. It funded it with \$3 billion of taxpayers' dollars over 10 years, and it supported promising research conducted in my State. This work will be done with careful ethical oversight. It also bans human reproductive cloning, something we all agree is immoral and unethical.

This investment, hopefully, once it gets past the court tests, will make California a leader in this industry and in finding cures that will change the lives of suffering patients.

Other States are making similar investments. Connecticut, Illinois, New Jersey, Maryland, and others are considering after 5 years of delay because

of the restriction on Federal funding—they are taking steps to move this important work forward on a State basis. But—and here is the but—a patchwork, State-by-State approach is no way to run science policy. States have many other responsibilities, such as funding education, building infrastructure, and so on, and we shouldn't expect them to solely carry the burden of funding one of the most promising fields of science.

There is a reason we invest so much in the National Institutes of Health and the biomedical research they conduct. The NIH can then set national standards and ensure that research is not being duplicated and to see that it is carried out under ethical standards. This is something everyone should want. You should want that Federal oversight of NIH over all research funding that is funded with Federal dollars.

It is also important to remember that this debate is about real people whose lives are impacted by illness every single day, day in, day out. I have heard from so many Californians who have been personally impacted by diseases that could one day be cured with stem cell research. I want to tell a few of those stories.

Leslie Bishop Franco from Oakland, CA, wrote to me to say she supports stem cell research because her mother was diagnosed with Alzheimer's at the age of 57. Her mother quickly became unable to work and then unable to care for herself. Leslie and her sisters and brothers cared not only for their own young children but also for their mother. This is something many families know all too well.

Leslie writes that even if stem cell research does not "lead to a cure for Alzheimer's as it has the potential in other diseases like Parkinson's and diabetes, it will provide crucial insights into the disease and the usefulness of new drugs."

Mark Siegel from Los Angeles has suffered from Parkinson's for 8 years. For over half the time he has been ill, the President's policies have slowed stem cell research. Mark was diagnosed when he was 36 years old. One of my sons-in-law was just diagnosed, and he is 44 years old.

What happens in Parkinson's slowly erodes one's motor control. Mark Siegel's condition had forced him to change jobs, and he is afraid we are losing the race against time to find a cure and save his life.

Jennifer Heumann from Huntington Beach, CA, has been living with juvenile diabetes since she was 2 years old, and she is now 16. She says diabetes hasn't stopped her from playing varsity tennis or going to high school dances, but she knows her disease can cause serious complications. Without a cure, she has a 65-percent chance of dying from heart disease or stroke and a 60-percent chance of developing nervous system damage.

Jennifer writes:

These are the cold, hard facts, but I am not content to admit they are my destiny. I believe that a cure is in sight, and that embryonic stem cell research may be the key to finding this cure. If this is the case, how can we justify passing up this opportunity?

We all should ask that question. This impressive young woman is hard to argue with. She makes a very eloquent point, and until we know what kinds of research could lead to cures for these catastrophic diseases, we should support scientists and we should push ahead every possible lead.

These patients and family members represent only a few of the tens of thousands of Californians I have heard from who support stem cell research. As a matter of fact, by the latest poll, 72 percent of Americans support stem cell research.

We don't want to spread false hope. There is still much we don't understand about stem cells. Some of the cures may never come to fruition, but unless we allow our scientists to continue their work, we will never, ever know. How can any of us tell a patient suffering from juvenile diabetes, a cancer victim, or a young man with heart disease, that the Senate decided not to allow researchers to pursue all the scientific leads that may one day offer them a cure? How can we say that? How can we say we know better? How can we say because of a small proportion of people's beliefs we are going to stop all Federal research in the United States of America?

Last week, Karl Rove declared that the President is emphatic about vetoing this legislation. I hope not. The President himself acknowledged the great promise of stem cells back in 2001, and with the health of millions of Americans at stake, it is my hope that if and when this bill tomorrow afternoon passes the Senate and if and when it goes to the President of the United States, he will reconsider his veto threat. Too many lives depend upon the advances which may well be possible.

Either you are for stem cell research or you are not. It is that simple. True support for stem cells means lifting the restrictions from hampering some of the most promising research, and only Castle-DeGette, only H.R. 810 will do that. No matter what the President decides on other legislation we are considering today, rejecting H.R. 810 is a rejection of science. It is a rejection of the hopes of millions of patients. This vote and the President's reaction to it should not be about assuaging a small but vocal minority with views far from the mainstream of 72 percent of the American people. Patients and their families deserve more than the President's first veto. How would you like it if you were President of the United States and the first veto of your political career were a veto of the one thing

that offers hope for millions of Americans suffering from catastrophic disease? The one thing out there.

I want to assure these patients that my colleagues and I will not stop fighting for this. We will continue to push in every way possible. Patients suffering from these catastrophic illnesses have already waited too long. American scientists have already fallen behind their international counterparts, and the time has come to finally pass Castle-DeGette on a sweeping bipartisan basis, just as the House of Representatives did 13 months ago.

Thank you very much. I yield the floor.

The PRESIDING OFFICER. Under the previous order, the next 30 minutes will be controlled by the majority.

Mr. COBURN. Mr. President, Senator BROWBACK has graciously allowed me to take 10 minutes of his time. I would like to do that at this time.

First of all, I would like to set the record straight: the United States remains the world's leader of published stem cell articles and human embryonic stem cell articles. Specifically, it was April 6 of this year when that statement was made. From 1998 through the end of 2005, the United States published 46 percent of all papers published worldwide—by far the single largest proportion. The remaining 54 percent was divided among 17 other countries.

Mr. President, I ask unanimous consent to have printed in the RECORD the latest peer review articles that have been brought up to date for this year. This is about 15 pages long, and it has multiple entries. For every disease that has been mentioned on the Senate floor by those supporting the embryonic stem cell research, there are treatments ongoing today using adult stem cells.

The PRESIDING OFFICER. Without objection, it is so ordered. (See exhibit 1.)

Mr. COBURN. Mr. President, the other thing I think we ought to make sure of—and I just want to go back. The Senator from California claims 72 percent of Americans favor stem cell research. That is true. That is true, if you ask it that way. But if you ask it: Should your tax dollars be used to destroy embryos to then create a research mechanism, it falls to 38 percent. So there is a difference between the ethical dilemma. I understand people can honorably disagree on the ethical dilemma, but we ought to be truthful about what the polling actually says. If you specifically say what we are doing, you get a much different answer.

I want to talk for a minute about something the majority leader discussed. He is a transplant surgeon. There are two problems transplant surgeons face. One is enough organs, which is a difficult problem in our

country today, but the second problem is rejection. Nobody is talking about the long-term consequences of where we go.

Let's assume everything that everyone says about embryonic stem cell research is right. I am highly skeptical of that, but let's assume that it is. You still have this little problem called histocompatibility; in other words, rejection. Whatever you do with it, you are going to have a problem with rejection. And the thing that is so exciting about germ cell—and I want to explain that for a minute. Germ cells—pluripotent stem cells—just as powerful as embryonic, they can do everything that embryonic can. They don't have that problem. No. 1, they are pluripotent; No. 2, they continue to reproduce pluripotent cells just like embryonic. That is new research. That is 6 months old. It was discovered here first. It was duplicated in Germany last month. So that is a brand new study.

The point is, you don't have rejection because you are taking your own cells to create a pluripotent cell, and that is the wonderful thing about adult stem cells, about cord blood stem cells, about germ cells, is that they create a pluripotent cell. There is no rejection. So when you hear all the talk about embryonic stem cell research, the thing to remember is when you get the treatment, you are going to have the side effects like everybody else who has the transplant—if it works—and that is immune-suppressive drugs. You are going to have to have them. The only way not to have that is to do fetal farming or human cloning, where you clone yourself and then take part of what you have cloned back, which we already know is illegal and is banned. So it is important for the debate to focus on that.

Everybody in this country wants cures. Everybody wants to do the thing that will get us there the fastest with the least complications, and we want to invest our dollars in what will be most successful.

One of the things my dad taught me is to look around the world, and if you want to see what is happening, follow the money. If you look around the world today, the world as a whole, and you look at where the money is being spent, it is not being spent on embryonic stem cells. It is being spent on stem cells from us, just like we had the debate a moment ago. We now know ductal cells from somebody's pancreas can create new insulin-producing cells. We know now the mucosa, the lining of your mouth, can create cells to make you a new cornea. You don't have to have a cornea transplant in the future because your own cells are going to be able to create a new cornea. We also know that we have stem cells in our body that can take away cystoid macular edema, this aging process where we as seniors start to lose our

vision—the cloudiness—the macular area of the retina starts to fall away. All of these wonderful things that we are doing versus nothing that has been accomplished.

I also would refer to the reference of the Senator from California to the renal success. It wasn't done with an embryonic stem cell, it was done with an adult stem cell. That research was all adult stem cells. So we end up tending to confuse what has really happened.

The fact is, all the success in treatment, all the success in terms of who is willing to invest private capital, where they are putting it, they are not putting it in embryonic. There is a reason for it. It is because in the long term it won't be the best treatment. It is fun science. As a doctor, I will tell you there could be no more fun or rewarding or interesting science than embryonic stem cell because you can turn things on and turn things off. There is no question about it. But what we are finding out is you can actually do that with our own cells, our own stem cells.

This idea of de-differentiation—and I want to explain that for a minute because we are going to hear a lot about it in the next 10 years—we take one of your stem cells, one of your multipotent—not totipotent, not pluripotent, but multi—and reverse its mechanism where we make it pluripotent. We are doing that in several stem cells now with an enzyme called *reversa*, where they are reversing the cell structure and making it revert back to what it was; in other words, grow in reverse to become pluripotent.

So I hope everybody will remember, this isn't a choice about cures or no cures. We are getting cures like crazy right now with adult stem cells and cord blood. We are going to be doing tons more when this germ cell comes forward. There is no question the scientific community is extremely excited about germ cell pluripotent stem cells because it has all the potential that an embryonic stem cell has and none of the problems.

With that, I yield back my remaining time, and I thank the Senator from Kansas.

Kim D-I et al., Angiogenesis facilitated by autologous whole bone marrow stem cell transplantation for Buerger's disease, *Stem Cells* 24, 1194-1200, 2006

IMMUNODEFICIENCIES

Severe combined immunodeficiency syndrome

Grunebaum E et al., Bone marrow transplantation or severe combined immune deficiency, *Journal of the American Medical Association* 295, 508-518, 1 February 2006

Cavazzana-Calvo M et al.; "Gene therapy of human severe combined immunodeficiency (SCID)-X1 disease"; *Science* 288, 669-672; April 28, 2000 (NOTE: gene therapy using bone marrow adult stem cells as gene vehicle)

X-linked lymphoproliferative syndrome and X-linked hyperimmunoglobulin M syndrome

Banked unrelated umbilical cord blood was used to reconstitute the immune system in 2 brothers with X-linked lymphoproliferative syndrome and 1 boy with X-linked hyperimmunoglobulin-M syndrome. Two years after transplantation, all 3 patients have normal immune systems. These reports support the wider use of banked partially matched cord blood for transplantation in primary immunodeficiencies.

Reference: Ziegner UH et al.; "Unrelated umbilical cord stem cell transplantation for X-linked immunodeficiencies"; *J Pediatr* 138(4), 570-573; April 2001

Eight children with severe immunodeficiencies treated by adult bone marrow stem cell transplants. Six of 8 showed relatively normal immune system after 1 year.

Reference: Amrolia, P. et al., "Nonmyeloablative stem cell transplantation for congenital immunodeficiencies", *Blood* 96, 1239-1246, Aug. 15, 2000.

Mr. BROWNBACK. Mr. President, I want to thank my colleague from Oklahoma. He is learned. He has spent the time to study these issues as a doctor. He has worked on these issues and he cares a great deal about them, and I appreciate his time and his focus on this issue.

I want to discuss a few additional things in response to the comments that have been made thus far. I want to get back to what we are talking about. We are talking about destroying young human life for research purposes. I will show a picture of that so people will get the idea—and I know people do—but it is important to remember we all started out looking like this. Even the Presiding Officer, as handsome as he is, looked like this at one point in time. Just a clump of cells—that was him.

This is a particular young person by the name of Hannah with whom I just met a few hours ago. This is when she was adopted as a frozen embryo, and this shows her development taking place. If you destroy her here, we don't get her here. That is the key. She was called a snowflake: an adopted frozen embryo.

I hope some people who are maybe watching or hear about this, if they have frozen human embryos, they consider putting them up for adoption because a number of people want to adopt them.

A couple of people adopted Hannah. They had fertility problems themselves, could not conceive. They used IVF, and so adopted her as a snowflake, as a frozen embryo. She was implanted, and now we have Hannah. Hannah is

quite—I guess you would say out of the mouths of babes, children, comes great wisdom.

This is a chart she did last year when she was in Washington. When the House was considering legislation—this same legislation—she did this chart, this letter that kids write, my kids write—I love them. She said—this is Hannah—snowflake: We're kids, I love you. Then she draws three pictures here below. This is her smiling because she got adopted, and she is here. Here is another frozen embryo—these are embryos—that is sad because he is still sitting in a frozen state, and then here is one that, as she explains, is saying: What, are you going to kill me? This was her explanation to her mother who just gave this chart to me.

I hope people really would think about that. This is not just a clump of tissue. This is not just a group of a few cells. This is not a hair follicle. This is not a fingernail. This is Hannah. And, if nurtured, she grows to be just this beautiful child. We have a lot of them, frozen embryos, and I hope people will consider putting them up for adoption because there are a lot of people who want to adopt them.

My colleagues talked about cures. I want cures. I have talked a lot about cures here on the floor. I have talked about it for a lot of years. There are 72 clinical human trials using adult cord research. If we want the people Senator FEINSTEIN and others talked about to get cures now, the certain way to do this is to not fund embryonic stem cell research. The people she is talking about are not going to be cured any time soon.

I want to read some quotes from scientists talking about cures from embryonic stem cell research. I want to lay my hands on this real quick so that people can hear what the scientists are saying about this particular area. Let me get to that in a second, as soon as we can pull that out from the notebook.

I want to hit a second point on this and then print this for the RECORD. Mr. President, I will ask unanimous consent that this be printed in the RECORD at the end of my statement.

Mr. President, this is a series of one-page—a cover article on stem cells, embryonic stem cells forming tumors. We have talked about this being a problem. This has been a problem on fetal tissue research, about 15 years ago. This stack is of the front pages of peer-reviewed articles citing embryonic stem cells creating tumors when implanted in other animals. Let me just read a few of these summations. This is just the front cover, and people can look up the whole article if they want.

More than 70 percent of the mice that received embryonic stem cells derived neuro processors—or precursor cells developed teratomas, 70 percent teratomas, tumors. That was a 2006 article.

Rats grafted with embryonic stem cells de-differentiated in vitro for 16 days developed severe teratomas—tumors. This is an article for publication, March of 2006. I am just reading the front page of these.

Here is another article, a 2005 article. We conclude that pluripotent cell types used in this study are unsuitable for achieving safe engraftment in a Guinea pig brain. Why? Creation of teratomas—tumors.

Unlimited self-renewal and high differentiated potential poses the risk of tumor induction after engraftment. This is just the front page of another article, December of 2004.

Here is another article. Conclusions: the cells will, however, form a tumor if they leak into an improper space such as the thoracic cavity. This is an article from 2003.

Then I have three more articles. These are just summations of peer-reviewed articles. They form tumors. That is the problem with embryonic stem cells.

So the Senators from California, Michigan, Iowa, and Pennsylvania and other places saying we want cures—I want cures. The research is saying embryonic stem cells form tumors. You put them into individuals, they form tumors. And while we hope at some point in time something positive happens, the problem is, they form tumors. This isn't working. So if we want treatments and cures, the answer isn't embryonic stem cells, it is adult stem cells, cord blood, where we don't have a tumor formation problem and where we are getting all of these initial successes that are taking place.

We are also going to consider legislation—and I will come back to another point here—we are going to consider legislation on fetus farming. There are three bills that are up and one of the bills is to ban fetal farming—fetus farming. I want to speak on that bill. I am a cosponsor of the bill. It would prohibit a gruesome procedure known as fetus farming. I am hopeful this passes with broad bipartisan support.

What this prevents is growing young humans to a certain stage, then harvesting their parts like an organ donor—parts. You grow a cloned human to a certain stage, let the cells differentiate and then harvest the parts. The Fetus Farming Prohibition Act is intended to prevent the exploitation of women for the purpose of harvesting spare organs, bodies parts, and tissue. In an ideal world we wouldn't need this type of legislation, yet we have already seen four scientific papers published on proof of concept of where they clone an animal to harvest the tissue to put into another animal to see if there was a rejection issue. Such proof of concept or proof of principle is simply the first case you take before actually moving to doing it in humans. That is why we seek to ban this particular procedure.

Some of my colleagues are saying of course nobody would think about doing this. I remember at the outset of this debate 8 years ago, everybody said of course we are not going to clone human beings. That is not necessary; that is abhorrent, and we wouldn't do that. The same people who were saying that are now saying it is essential we clone human beings, so the distance from "of course we would never" to "of course we must" seems to only take a matter of years and that is why we are seeking to ban this particular area of using human beings. Human beings, as I said at the outset, are ends in themselves. They should not be used for somebody else's purposes. It is beneath human dignity to turn humans into commodities—that is organ factories—and that would be the case with fetus farming. That is what this act does; it prohibits it. I am hopeful my colleagues can strongly support this ban on fetal farming that is going to come before this body and I hope will pass the House and be sent to the President for signature.

I want to talk about an area that perhaps we all pretty easily fall into. That is, we get contacted by individuals who have a particular malady or disease or genetic problem and we tell them we want to give them a cure.

We do want to give them a cure. Everyone in this body wants to give them a cure. But then false hope can be held out or people can start down a road that doesn't produce. That is where we have been going. That is where we are going with the embryonic stem cells. This is a route into which we put half a billion Federal taxpayer dollars and it hasn't produced. It is time to move somewhere else. We have tried this route before.

I want to quote one of my colleagues on fetal tissue research. Some of my colleagues remember 10 or 15 years ago we were debating fetal tissue research. The promises sound strangely familiar, what people said.

There is substantial evidence that fetal tissue research will offer a new hope of prolonged life, greater quality of life, and perhaps one day even a cure for many of these diseases at a tremendous economic and social cost-saving to the country.

Then people frequently would list different areas that would be covered, such as Alzheimer's and Parkinson's disease and the like.

We funded fetal tissue research. The reason I mentioned this is it is quite a bit like fetal farming. In fetal tissue research the fetus is aborted and then body parts harvested for use in somebody else, and that was going to cure everybody. We were going to get rid of Alzheimer's and Parkinson's and Lou Gehrig's and cancer and all these areas with great promise. Yet we saw what happened on the fetal tissue research.

Parkinson's research is set back by failure of fetal cell grants—disastrous side effect—

absolutely devastating—it was tragic, catastrophic, it's a real nightmare. And we can't selectively turn it off.

That was what the researchers said when they took fetal tissue and put it in somebody to deal with Parkinson's disease. What we are trying to prohibit with the Fetal Farming Act is this from backing up even further, or doing it in a clone state, and inserting cancerous tumors into individuals. You can't selectively turn it off. That is why we want to ban this. That is why it is the wrong thing to do. It was the wrong thing to do then, using fetal tissue in that particular case.

It is also the wrong thing to promise people these cures when we look at the science of this and you know pretty likely this is not going to work—from all the scientific evidence. Let me read from some of the eminent scientists. By the way, the material I had printed for the RECORD on tumor formation, I believe every one of these scientists, at least most of the scientists published in these articles, are pro embryonic stem cell research. They support embryonic stem cell research. They want it to work. The problem is, tumor formation, just as we saw with fetal tissue research. The cell grows fast, undifferentiated, but it can get in the brain and in some cases formed fingernails or hair follicles instead of brain tissue.

What are some of the scientists who are strong embryonic stem cell supporters saying about the likelihood of human treatments using embryonic stem cells? Here I am quoting from people who support this research. Lord Winston, a British stem cell expert, has warned his colleagues over the political hype in support of human embryonic stem cells:

One of the problems is that in order to persuade the public that we must do this work, we often go rather too far in promising what we might achieve. This is a real issue for the scientists. am not entirely convinced that embryonic stem cells will, in my lifetime, and possibly anybody's lifetime for that matter, be holding quite the promise that we desperately hope they will.

This was in a lecture he gave in 2005. If we want to cure people, as different colleagues are talking about and giving different human examples, people examples—this is a clear route here, adult and cord blood. Put the money there if we want to cure people. If we want to do the scientific research, that is another thing, but if we want to cure people, we have an answer and it has no ethical problem to it. But we should not overhype the embryonic stem cells when the lead scientist say he thinks it is unlikely any time soon, if ever, to work, as I just quoted to you there.

Let me give another quote from the journal "Science." It carried a piece last summer in which supporters of embryonic—destructive human embryonic stem cell research admitted:

It is necessary that prospective donors of human eggs recognize the large gap between

research and therapy. This is particularly important in frontier areas of research where therapeutic impact in humans is unproven.

Also, it is nearly certain that the clinical benefits of the research are years or maybe decades away. This is a message that desperate families and patients will not want to hear.

If we are talking cures, we have an answer here. But it is not embryonic stem cell research. Otherwise we should not be talking about cures. We should be talking maybe about research on embryos, research on embryonic stem cells. We are interested in how they work, but we should not be talking cures because the cures are coming in the adult and cord blood route.

I will have the "Science" article printed. I ask unanimous consent all these be printed in the RECORD at the end of my presentation.

The PRESIDING OFFICER. Without objection, it is so ordered.

(See exhibit 1.)

Mr. BROWNBACK. This is an op-ed piece in the Washington Post. David Shaywitz put it in, in 2005.

While stem cell advocates have helped voters connect stem cell research with compelling images of patients who might one day benefit from treatments, such therapies are unlikely to emerge soon enough to benefit most current proponents. . . .

. . . scientists must do a better job of articulating the limitations of our existing knowledge, taking care to emphasize not only the ultimate therapeutic potential of these cells, but also how far we are from achieving such therapies.

That is from scientists who support embryonic stem cell research. Let's be clear what we are talking about in this particular field.

Now I want to talk about the pluripotent nature of adult stem cells. Here, Dr. COBURN, Dr. FRIST, and others would be better qualified, obviously, than I could ever dream of being about this topic, but this has been raised for some period of time. The theory has gone, embryonic stem cells are pluripotent, they can form any type of cells. Adult stem cells cannot. Their plasticity is insufficient for them to be able to form other types of cells.

I simply point to this chart, listing 16 peer-reviewed studies showing alternative sources of pluripotent stem cells other than embryonic stem cells, and almost all of these are out of adult stem cells—pluripotency.

I urge my colleagues, the science has moved quite rapidly on this. I hope we can get up to speed with where the science is on this. There is pluripotency in other stem cells. There is pluripotency in cells other than the embryonic stem cells. We have the alternative bill, the Santorum-Specter bill, looking at other alternative sources of embryonic-type like stem cells that you do not have to destroy an embryo to get to. Look at those fields and those areas, these adult stem cells and this research, rather than

saying the only source is embryonic, because it is not. That is not the only source because the science continues to move on through this and find other areas of pluripotency in adult stem cells as they are created.

Because I have a little bit of time—I ask the Chair, how much time is remaining?

The PRESIDING OFFICER. The Senator has 4½ minutes.

Mr. BROWNBACK. Fantastic. I have a picture I want to show, then, because this is a real hope. It is also a bit of a tragedy. Here is a gentleman I hosted at a hearing about Parkinson's disease. He suffers from Parkinson's disease. He had an adult stem cell treatment. We got him in to testify. It is adult stem cells put back in his own part of the brain, it is his own cells, so there is not a rejection problem. He was Parkinson's free for 5 years. We had trouble getting him in to testify. He was out doing African safaris and things. We couldn't get him to come in.

I say that because that is the beauty of it. The tragedy of it is some of the Parkinson's traits are coming back. He would love to have another treatment for Parkinson's with his own adult stem cells. Yet we have so few clinical trials going on, we are so short in the funding of this, that he is not able to get additional treatments or other Parkinson's patients aren't able to get this.

I ask my colleagues, if we want to treat, let's take the half a billion dollars and let's put it into research for a guy such as this, where we have a real promising start. He was Parkinson's free of things here for 5 years, and then it started coming back.

My final comment I have in the time I have left is: What a beautiful time. What an opportunity we have for people to live longer and better lives. This is a glorious time for us to make a step forward.

Senator FEINSTEIN from California and I cochair the cancer caucus. We are setting an objective of ending deaths by cancer in 10 years. It is going to have to be aggressive to be able to do this. We are going to have to do some work on these adult and cord blood stem cell areas. What a beautiful time. Let's invest wisely. Let's not check our morals at the door—our values. Let's treat every single human as a sacred, beautiful child of the living God and we are going to be here 10 years from now with amazing stories of things that have happened, and a happy heart, and a clear conscience at the same time—that we did it, we did it the right way, that more people are alive today, not dead, we didn't sacrifice other human beings in the process, and people are cured. People with spinal cord injuries are walking. People with Parkinson's no longer have it.

We have people in whom this is taking place today. We didn't give them

cancer in the process of trying to cure them—where we are having the troubles with the embryonic stem cells.

This can happen if we will go the right way, ban the fetal farming, not expand and use taxpayer dollars to fund destructive human embryonic research where you destroy a human, and look at these alternatives. It can and it will happen. And that—that is going to be a beautiful day.

I believe my time has expired and I yield the floor

EXHIBIT 1

STEM-CELL REALITY: "ESC TREATMENTS DECADES AWAY"

"Similarly, it is important not to use the term 'therapy' when what is meant is 'research' and not to refer to human embryonic stem cell research as 'therapeutic cloning.' There is currently no such thing as 'therapeutic cloning' and this is not 'therapeutic cloning research,' nor can we say with any certainty that 'cell therapy' is in the near future."

(Source: Magnus & Cho, "Issues in Oocyte Donation for Stem Cell Research," Science Vol. 308, 1747-1748, June 17, 2005.)

Last summer, the prestigious journal Science carried a piece, in which supporters of destructive human embryonic stem cell research admit:

"It is necessary that prospective donors [of human eggs] recognize the large gap between research and therapy. This is particularly important in frontier areas of research where therapeutic impact in humans is unproven.

"Also, it is nearly certain that the clinical benefits of the research are years or maybe decades away. This is a message that desperate families and patients will not want to hear.

STEM-CELL REALITY: OVER-HYPED ESC'S

British Stem Cell Expert Lord Winston

Lord Winston, a British stem cell expert, has warned his colleague over the political hype in support of human embryonic stem cells:

"One of the problems is that in order to persuade the public that we must do this work, we often go rather too far in promising what we might achieve.

This is a real issue for the scientists. I am not entirely convinced that embryonic stem cells will, in my lifetime, and possibly anybody's lifetime for that matter, be holding quite the promise that we desperately hope they will."

(Source: "Should We Trust the Scientists?" Gresham College Lecture, June 20, 2005)

STEM-CELL REALITY: "ESC THERAPIES UNLIKELY SOON"

Harvard stem cell researcher—and proponent of destructive human embryonic stem cell research—David Shaywitz writes in an op-ed carried by the Washington Post:

"While stem cell advocates have helped voters connect embryonic stem cell research with compelling images of patients who might one day benefit from treatment, such therapies are unlikely to emerge soon enough to benefit most current proponents . . .

". . . scientists must do a better job of articulating the limitations of our existing knowledge, taking care to emphasize not only the ultimate therapeutic potential of these cells, but also how far we are from achieving such therapies."

(Source: David Shaywitz, "Stem Cell Reality," *The Washington Post*, April 29, 2005.)

[From the *New York Times*, Mar. 8, 2001]

PARKINSON'S RESEARCH IS SET BACK BY
FAILURE OF FETAL CELL IMPLANTS

(By Gina Kolata)

A carefully controlled study that tried to treat Parkinson's disease by implanting cells from aborted fetuses into patients' brains not only failed to show an overall benefit but also revealed a disastrous side effect, scientists report.

In about 15 percent of patients, the cells apparently grew too well, churning out so much of a chemical that controls movement that the patients writhed and jerked uncontrollably.

The researchers say that while some patients have similar effects from taking too high a dose of their Parkinson's drug, in this case the drugs did not cause the symptoms and there is no way to remove or deactivate the transplanted cells.

On the researchers' advice, six patients who enrolled in the study but who had not yet had the implantation operation have decided to forgo it.

The results, reported today in *The New England Journal of Medicine*, are a severe blow to what has been considered a highly promising avenue of research for treating Parkinson's disease, Alzheimer's disease and other neurological ailments. The study indicates that the simple solution of injecting fetal cells into a patient's brain may not be enough to treat complex diseases involving nerve cells and connections that are poorly understood. Some say it is time to go back to the laboratory and to animals before doing any more operations on humans.

The findings may also fuel the debate over whether it is appropriate to use tissue from aborted fetuses to treat diseases. Despite their disappointment, some researchers said they hoped that the results would not bring fetal cell research to an abrupt halt. The research has been controversial because the fetal cells were obtained from abortion clinics.

"This is still our one great hope for a cure," said Dr. J. William Langston, who is scientific director and chief executive officer at *The Parkinson's Institute* in Sunnyvale, Calif.

Parkinson's disease occurs when cells of the substantia nigra region in the base of the brain die, for unknown reasons. The hope was that fetal substantia nigra cells might take over for them. But, the study showed, in older patients the operation had no benefit and in some younger patients, the transplants brought on nightmarish side effects.

Although the paper depicts the patients with the side effects in impassive clinical terms, doctors who have seen them paint a very different picture.

Dr. Paul E. Greene, a neurologist at the *Columbia University College of Physicians and Surgeons* and a researcher in the study, said the uncontrollable movements some patients suffered were "absolutely devastating."

"They chew constantly, their fingers go up and down, their wrists flex and distend," Dr. Greene said. And the patients writhe and twist, jerk their heads, fling their arms about.

"It was tragic, catastrophic," he said. "It's a real nightmare. And we can't selectively turn it off."

One man was so badly affected that he could no longer eat and had to use a feeding tube, Dr. Greene said. In another, the condi-

tion came and went unpredictably throughout the day, and when it occurred, the man's speech was unintelligible.

For now, Dr. Greene said, his position is clear: "No more fetal transplants. We are absolutely and adamantly convinced that this should be considered for research only. And whether it should be research in people is an open question."

Dr. Gerald D. Fischbach, who was director of the *National Institute of Neurological Disorders and Stroke*, which sponsored the study, said that while the operation had been promoted by some neurosurgeons as miraculous, this was the first time it was rigorously evaluated. It used sham surgery as a comparison, a controversial and rarely used strategy but one that researchers felt was necessary to understand the true effects of the operation.

Dr. Fischbach, who is now dean of the faculty of medicine at the *Columbia University College of Physicians and Surgeons*, was the director of the institute only at the end of the study.

"Ad hoc reports of spectacular results can always occur," Dr. Fischbach said. "But if you do these studies systematically, this is the result you get."

The surgery, he added, "is not the final solution that people would have hoped going into it."

In the study, researchers, led by Dr. Curt R. Reed of the *University of Colorado Health Sciences Center* in Denver and Dr. Stanley Fahn of the *Columbia University College of Physicians and Surgeons*, recruited 40 patients, ages 34 to 75, who had had Parkinson's disease for an average of 14 years. The patients were randomly assigned to have substantia nigra cells from four fetuses implanted in their brains or to have sham surgery, for comparison.

The surgery took place in Colorado and the patients were evaluated in New York. The fetal cell surgery involved drilling four small holes in the patient's forehead and then inserting long needles through the holes into the brain and injecting fetal cells. The sham surgery involved drilling the holes but not injecting needles into the brain. After a year, the patients were told whether they had the fetal cell surgery and, if not, they were offered it if they wanted it.

The study's primary measure of success was whether the patients themselves noticed that they were better, as determined by a survey that they mailed in a year later but before they knew whether they had had fetal cell implants or a sham operation. The study found no difference between the two groups—neither those who had had the fetal cell operation nor those who had had the sham surgery notice an improvement in their symptoms.

Other tests, like neurologists' assessments of the patients while they were taking their medication and the patients' assessments of their condition in diaries they kept also showed no effect of the surgery. And there was no difference between the two groups in the doses of drugs needed to control the disease.

The one glimmer of hope came from assessments by neurologists before the patients had had their first dose of medication in the morning. By that measure, the 10 patients under age 60 who had had the fetal cell implants seemed better than those who had had sham surgery, with less rigidity, although their tremor was just as bad.

Dr. Freed hailed that result, saying, "It was clear-cut improvement."

And, he added, the fetal cells survived in most patients' brains.

"I would be disappointed if people used a strict clinical trial approach," Dr. Freed said. "This study is about multiple phenomena."

Others were less enthusiastic, pointing out that finding subgroups after the fact who may have benefited suggests a hypothesis for future studies, not evidence of an effect.

"We try to teach everybody that you have to identify beforehand what's the primary outcome," said Dr. William Weiner, the director of the *Maryland Parkinson's Disease and Movement Disorder Center* and a professor of neurology at the *University of Maryland School of Medicine* in Baltimore, referring to the measure of success determined before the study began. "In this case, they picked a subjective assessment by the patients themselves, which I think is a very good one."

And so, Dr. Weiner said, when the patients noticed no improvement, "the study was negative."

In addition, Dr. Langston said, even if a Subsequent study confirmed that the surgery had an effect on the condition in younger patients before they took their medicine in the morning, and even if there was a way of preventing the terrible side effect, the operation would still hardly be a breakthrough. Parkinson's disease is almost always a disease of the elderly, he noted, adding that well under 10 percent of patients who would be candidates for the surgery are younger than 60.

The wiggling and writhing movements first emerged a year after the operation, showing up in five of the younger patients who had at first appeared to benefit from fetal cell surgery—three who had the operation in the initial phase of the study and two who had it a year later, when they learned that they had originally had a sham surgery. While doctors sometimes see such effects in Parkinson's patients, it is caused by giving too much of drugs that act like dopamine in the brain. And it can be controlled by reducing the drugs.

In this case, however, drugs were not the culprit. Even when doctors took away the drugs, the symptoms persisted.

The fetal implant study had been controversial from the start, both because it included sham surgery and because it used fetal tissue from abortions. But many Parkinson's disease experts said it had to be done because doctors were already offering the surgery to patients, and charging them for it, at costs of \$40,000 or more, with no evidence that they were helping them. Yet patients, facing a disease in which brain cells slowly and inexorably die and in which even the drugs that once controlled their symptoms of tremor and rigidity would inevitably fail, took their chances with the operation, thinking they had little to lose.

Dr. Freed said he was the first in the United States to offer the treatment, starting in 1988 with a 52-year-old man, who is still alive although, of course, he also still has Parkinson's disease.

Dr. Freed continued to offer it to paying patients while he was treating those who were part of the federal study and whose procedures were paid for by the study. He said he considered these other operations research because he experimented with different amounts and placements of fetal cells. He has given fetal cell implants to 27 patients, he said, with the most recent operation last October.

Dr. Freed said his group was now implanting less fetal tissue and putting the tissue in a different area of the brain, hoping to avoid

the devastating side effects. But, he said it would be a mistake to stop doing the surgery altogether.

"To say that you can't do or shouldn't do human research because the research has uncertain outcome, I think would be a bad decision," Dr. Freed said.

Meanwhile, a second federally financed study of the operation is winding to a close, and some researchers say it is time to go back to animal studies and learn more about the complex roles of the brain cells involved in Parkinson's disease.

Dr. Weiner said that if a patient came to him today seeking advice, he would say: "The bottom line for patients is that human fetal cell transplants are not currently the best way to go. If you are willing to pay for them, you can still have them done. But my advice is you ought not to do this."

EMBRYONIC STEM CELL-DERIVED NEURONALLY COMMITTED PRECURSOR CELLS WITH REDUCED TERATOMA FORMATION AFTER TRANSPLANTATION INTO THE LESIONED ADULT MOUSE BRAIN

(By Marcel Dihn e)

ABSTRACT

The therapeutic potential of embryonic stem (ES) cells in neurodegenerative disorders has been widely recognized, and methods are being developed to optimize culture conditions for enriching the cells of interest and to improve graft stability and safety after transplantation. Whereas teratoma formation rarely occurs in xenogeneic transplantation paradigms of ES cell-derived neural progeny, more than 70% of mice that received murine ES cell-derived neural precursor cells develop teratomas, thus posing a major safety problem for allogeneic and syngeneic transplantation paradigms. Here we introduce a new differentiation protocol based on the generation of substrate-adherent ES cell-derived neural aggregates (SENAs) that consist predominantly of neuronally committed precursor cells. Purified SENAs that were differentiated into immature but postmitotic neurons did not form tumors up to four months after syngeneic transplantation into the acutely degenerated striatum and showed robust survival.

TRANSPLANTATION OF HUMAN EMBRYONIC STEM CELL-DERIVED CELLS TO A RAT MODEL OF PARKINSON'S DISEASE: EFFECT OF IN VITRO DIFFERENTIATION ON GRAFT SURVIVAL AND TERATOMA FORMATION

(By Anke Brederlau)

ABSTRACT

Human embryonic stem cells (hESCs) have been proposed as a source of dopamine (DA) neurons for transplantation in Parkinson's disease (PD). We have investigated the effect of in vitro predifferentiation on in vivo survival and differentiation of hESCs implanted into the 6-OHDA (6-hydroxydopamine)-lesion rat model of PD. The hESCs were cocultured with PA6 cells for 16, 20, or 23 days, leading to the in vitro differentiation into DA neurons. Grafted hESC-derived cells survived well and expressed neuronal markers. However, very few exhibited a DA neuron phenotype. Reversal of lesion-induced motor deficits was not observed. Rats grafted with hESCs predifferentiated in vitro for 16 days developed severe teratomas, whereas most rats grafted with hESCs predifferentiated for 20 and 23 days remained healthy until the

end of the experiment. This indicates that prolonged in vitro differentiation of hESCs is essential for preventing formation of teratomas.

SURVIVAL AND ENGRAFTMENT OF MOUSE EMBRYONIC STEM CELL-DERIVED IMPLANTS IN THE GUINEA PIG BRAIN

(By A.J. Robinson)

ABSTRACT

α -Mannosidosis is a lysosomal storage disease resulting from a deficiency of the enzyme α -D-mannosidase. A major feature of α -mannosidosis is progressive neurological decline, for which there is no safe and effective treatment available. We have a guinea pig model of α -mannosidosis that models the human condition. This study investigates the feasibility of implanting differentiated mouse embryonic stem cells in the neonatal guinea pig brain in order to provide a source of α -mannosidase to the affected central nervous system.

Cells implanted at a low dose (1.5×10^3 cells per hemisphere) at 1 week of age were found to survive in very low numbers in some immunosuppressed animals out to 8 weeks. Four weeks post-implantation, cells implanted in high numbers (10^5 cells per hemisphere) formed teratomas in the majority of the animals implanted. Although implanted cells were found to migrate extensively within the brain and differentiate into mature cells of neural (and other) lineages, the safety issue related to uncontrolled cell proliferation precluded the use of this cell type for longer-term implantation studies. We conclude that the pluripotent cell type used in this study is unsuitable for achieving safe engraftment in the guinea pig brain.

NEURALLY SELECTED EMBRYONIC STEM CELLS INDUCE TUMOR FORMATION AFTER LONG-TERM SURVIVAL FOLLOWING ENGRAFTMENT INTO THE SUBRETINAL SPACE

(By Stefan Arnbold, Helmut Klein, Irina Semkova, Klaus Addicks, and Ulrich Schraermeyer)

Purpose. To determine whether transplantation of embryonic stem (ES) cells into the subretinal space of rhodopsin-knockout mice has a tumorigenic effect.

Methods. Mouse ES-cell-derived neural precursor cells carrying the sequence for the green fluorescent protein (GFP) gene were grafted subretinally into the eyes of rhodopsin^{-/-} mice, whereas control animals underwent sham surgery. Eyes were retrieved after 2, 4, and 8 weeks after cell injection or sham surgery for histologic analysis.

Results. Gross morphologic, histologic, and immunohistochemical analysis of eyes at 2 and 4 weeks after engraftment exhibited no morphologic alterations, whereas neoplasia formation was detected in 50% of the eyes evaluated at 8 weeks after engraftment. Because the neoplasias expressed differentiation characteristics of the different germ layers, they were considered to be teratomas. The resultant tumor formation affected almost all layers of the eye, including the retina, the vitreous, and the choroid.

Conclusions. Although ES cells may provide treatment for degenerative disease in the future, their unlimited self-renewal and high differentiation potential poses the risk of tumor induction after engraftment. Thus, more care must be taken before using ES cell transportation as a therapeutic option for patients with degenerative disease.

ENGRAFTMENT AND TUMOR FORMATION AFTER ALLOGENEIC IN UTERO TRANSPLANTATION OF PRIMATE EMBRYONIC STEM CELLS

(By Takayuki Asano)

Background. To achieve human embryonic stem (ES) cell-based transplantation therapies, allogeneic transplantation models of nonhuman primates would be useful. We have prepared cynomolgus ES cells genetically marked with the green fluorescent protein (GFP). The cells were transplanted into the allogeneic fetus, taking advantage of the fact that the fetus is so immunologically immature as not to induce immune responses to transplanted cells and that fetal tissue compartments are rapidly expanding and thus providing space for the engraftment.

Methods. Cynomolgus ES cells were genetically modified to express the GFP gene using a simian immunodeficiency viral vector or electroporation. These cells were transplanted in utero with ultrasound guidance into the cynomolgus fetus in the abdominal cavity (n=2) or liver (n=2) at the end of the first trimester. Three fetuses were delivered 1 month after transplantation, and the other, 3 months after transplantation. Fetal tissues were examined for transplanted cell progeny by quantitative polymerase chain reaction and in situ polymerase chain reaction of the GFP sequence.

Results. A fluorescent tumor, obviously derived from transplanted ES cells, was found in the thoracic cavity at 3 months after transplantation in one fetus. However, transplanted cell progeny were also detected (~1%) without teratomas in multiple fetal tissues. The cells were solitary and indistinguishable from surrounding host cells.

Conclusions. Transplanted cynomolgus ES cells can be engrafted in allogeneic fetuses. The cells will, however, form a tumor if they "leak" into an improper space such as the thoracic cavity.

STEM CELLS, TISSUE ENGINEERING AND HEMATOPOIETIC ELEMENTS: TERATOMA FORMATION LEADS TO FAILURE OF TREATMENT FOR TYPE I DIABETES USING EMBRYONIC STEM CELL-DERIVED INSULIN-PRODUCING CELLS

(By Takahisa Fujikawa)

Embryonic stem (ES) cells have been proposed to be a powerful tool in the study of pancreatic disease, as well as a potential source for cell replacement therapy in the treatment of diabetes. However, data demonstrating the feasibility of using pancreatic islet-like cells differentiated from ES cells remain controversial. In this study we characterized ES cell-derived insulin-expressing cells and assessed their suitability for the treatment of type I diabetes. ES cell-derived insulin-stained cell clusters expressed insulin mRNA and transcription factors associated with pancreatic development. The majority of insulin-positive cells the clusters also showed immunoreactivity for C-peptide. Insulin was stored in the cytoplasm and released into the culture medium in a glucose-dependent manner. When the cultured cells were transplanted into diabetic mice, they reversed the hyperglycemic state for ~3 weeks, but the rescue failed due to immature teratoma formation. Our studies demonstrate that reversal of hyperglycemia by transplantation of ES cell-derived insulin-producing cells is possible. However, the risk of teratoma formation would need to be eliminated before ES cell-based therapies for the treatment of Diabetes are considered.

TRANSPORTATION OF APOPTOSIS-RESISTANT EMBRYONIC STEM CELLS INTO THE INJURED RAT SPINAL CORD

(By Michael J. Howard)

ABSTRACT

Murine embryonic stem cells were induced to differentiate into neural lineage cells by exposure to retinoic acid. Approximately one million cells were transplanted into the lesion site in the spinal cords of adult rats which had received moderate contusion injuries 9 days previously. One group received transplants of cells genetically modified to over-express *bcl-2*, which codes for an anti-apoptotic protein. A second group received transplants of the wild-type ES cells from which the *bcl-2* line was developed. In the untransplanted control group, only medium was injected. Locomotor abilities were assessed using the Basso, Beattie and Bresnahan (BBB) rating scale for 6 weeks. There was no incremental locomotor improvement in either transplant group when compared to control over the survival period. Morbidity and mortality were significantly more prevalent in the transplant groups than in controls. At the conclusion of the 6-week survival period, the spinal cords were examined. Two of six cords from the *bcl-2* group and one of 12 cords from the wild-type group showed gross evidence of abnormal growths at the site of transplantation. No similar growth was seen in the control. Pathological examination of the abnormal cords showed very large numbers of undifferentiated cells proliferating the injection site and extending up to 1.5 cm rostrally and caudally. These results suggest that transplanting KD3 ES cells, or apoptosis-resistant cells derived from KD3 line, into the injured spinal cord does not improve locomotor recovery and can lead to tumor-like growth of cells, accompanied by increased debilitation, morbidity and mortality.

[From Diabetologia, Feb. 14, 2004]

INSULIN EXPRESSING CELLS FROM DIFFERENTIATED EMBRYONIC STEM CELLS ARE NOT BETA CELLS

(By S. Sipione)

ABSTRACT

Aim/hypothesis. Embryonic stem (ES) cells have been proposed as a potential source of tissue for transplantation for the treatment of Type 1 diabetes. However studies showing differentiation of beta cells from ES cells are controversial. The aim of this study was to characterise the insulin-expressing cells differentiated in vitro from ES cells and to assess their suitability for the treatment of diabetes.

Methods. ES cell-derived insulin-expressing cells were characterised by means of immunocytochemistry, RT-PCR and functional analyses. Activation of the Insulin I promoter during ES-cell differentiation was assessed in ES cell lines transfected with a reporter gene. ES cell-derived cultures were transplanted into STZ-treated SCID-beige mice and blood glucose concentrations of diabetic mice were monitored for 3 weeks.

Results. Insulin-stained cells differentiated from E cells were devoid of typical beta-cell granules, rarely showed immunoreactivity for C-peptide and were mostly apoptotic. The main producers of proinsulin/insulin in these cultures were neurons and neuronal precursors and a reporter gene under the control of the insulin I promoter was activated in cells with a neuronal phenotype. Insulin was released into the incubation medium but the secretion was not glucose-dependent. When the cultures were transplanted in diabetic mice they formed teratomas and did not reverse the hyperglycemic state.

Conclusions/Interpretation. Our studies show that insulin-positive cells in vitro-differentiated from ES cells are not beta cells and suggest that alternative protocols, based on enrichment of ES cell-derived cultures with cells of the endodermal lineage, should be developed to generate true beta cells for the treatment of diabetes.

The PRESIDING OFFICER. Under the previous order, the minority is in control of the next 30 minutes.

Mr. HARKIN. Mr. President, I was going to ask the Senator from Kansas—I will even do it on my time. I

guess our next speaker is not here right now. If the Senator from Kansas would perhaps engage me in a colloquy, I would ask about the gentleman whose picture he has up there. How is he doing now? I understand that, frankly, while his Parkinson's was relieved for a while, it has reverted and he is back in his previous state. Does the Senator know about that?

Mr. BROWNBACK. Yes. If you caught my comments on the floor, I stated that is part of the tragedy here. He had 5 years Parkinson's free, wants an additional treatment using the same adult stem cell procedure he had before that worked, and can't get it. We don't have sufficient funding to move that on forward.

Mr. HARKIN. I say to my friend, I don't understand that. I have a chart here that shows stem cell funding, embryonic stem cell funding, is \$38.3 million last year and adult stem cell funding is \$200 million. You are telling me out of \$200 million they can't help one individual?

Plus, I ask my friend from Kansas, if this is so promising, why is the entire Parkinson's network that represents all the people with Parkinson's disease 100 percent behind H.R. 810? Why are they so supportive of H.R. 810 and not this approach?

Mr. BROWNBACK. If I could answer on both of those, I would have printed in the RECORD the funding over the past 4 years for both embryonic and adult and cord blood stem cells. We put about half a billion in embryonic, both animal and human, over the past 5 years. I ask unanimous consent to have this printed in the RECORD, to point to the level of funding we have put in both of those

There being no objection, the material was ordered to be printed in the RECORD, as follows:

U.S. FEDERAL TAXPAYER FUNDING, TOTAL NIH STEM CELL RESEARCH, FY 2002–2006

[Dollars in millions]¹

	FY 2002 actual			FY 2003 actual			FY 2004 actual			FY 2005 actual			Combined total		
	Non-embryonic	Embryonic	Total	Non-embryonic	Embryonic	Total	Non-embryonic	Embryonic	Total	Non-embryonic	Embryonic	Total	Non-embryonic	Embryonic	Total
Human, Subtotal	170.9	10.1	181.0	190.7	20.3	211.0	203.2	24.3	227.5	199.4	39.6	239.0	764.2	94.3	858.5
Nonhuman, Subtotal	134.1	71.5	205.5	192.1	² 113.5	305.6	235.7	² 89.3	325.0	273.2	97.0	370.2	835.1	371.3	1206.3
NIH, Total	305.0	81.6	386.6	382.9	² 133.8	516.6	439.0	² 113.6	552.5	472.5	136.7	609.2	1599.4	465.7	2064.9

¹ Numbers may not add due to rounding.

² Decrease from FY03 to FY04 is the result of a change in methodology used to collect nonhuman embryonic funding figures. This methodology change also contributed to an increase in nonhuman non-embryonic.

Mr. BROWNBACK. Second, I would point out on Parkinson's, I don't know why the Parkinson's advocacy community would support that. I find it hard to believe they would oppose us doing more work in this field. I would simply ask you, or others, if we have a place that is working and we have another place that is producing tumors, why wouldn't you put more in a place that is working?

Mr. HARKIN. I say to my friend from Kansas—and I see Senator NELSON is here to speak. He had previously been scheduled to do so—first, I didn't see all the figures the Senator sent to the desk. I would like to see those. I heard him talk about a half billion dollars. Frankly, what the Senator from Kansas is talking about is animal embryonic. We are talking about human—human experiments here, not animal.

Mr. BROWNBACK. If I could respond?

Mr. HARKIN. I am more interested in the human than I am about human and animal.

Second, on cancer and tumors, it is my understanding—I am not a scientist, but in talking with the scientists—the fact that an undifferentiated stem cell causes cancer is exactly what they are looking for. It is the gold standard. I thought it was the gold standard for determining whether you have an embryonic stem cell.

Let me see if I can repeat it as told to me. If you derive a stem cell line from an embryo, you don't really know if you have stem cells. So the scientists take the undifferentiated cells and put them in a mouse to see if it causes cancer. That is the gold standard—to see whether there is a stem cell line.

No one is talking about putting undifferentiated cells into your body or mine or anyone else's. We are talking about undifferentiated cells and then finding how they make nerve cells, how they make heart cells, how they make tissue cells, how they make brain cells. Only after they are differentiated would they then be put into a person, not undifferentiated.

I hear all about the terms. I heard that earlier this morning. I thought I would check up on it. That is what I found out.

I would be glad to engage in a colloquy.

Mr. COBURN. Mr. President, let me clarify for the record. I think it is very important. There is a difference between cancer and teratoma. They use the formation of teratomas to make a differentiation of whether this is a part of the cell. That is not a cancer. Teratomas are not necessarily cancer. They are tumors but not necessarily cancer.

Mr. HARKIN. They are tumors. That is what I heard the Senator say.

Mr. COBURN. If you do not have a tumor, I would just as soon have a teratoma as cancer.

Mr. HARKIN. I don't know. I am a little confused. Is the Senator saying, if a stem cell has been introduced and is undifferentiated, it causes cancer or teratoma?

Mr. COBURN. No. The Senator alluded to the fact that there is a gold standard of whether an embryonic stem cell is pluripotent or whether it produces a teratoma. That means it has components of the three layers of an embryo—exoderm, endoderm, and mesoderm—which create all the other tissues.

Mr. HARKIN. But the fact is the inference from some of the statements, I think, is that thus far stem cells, when introduced, cause cancer. That is not so. That has not been proven. That has not been proven at all.

Mr. COBURN. It has. Most of the time teratoma.

Mr. BROWNBACK. Mr. President, I submitted for the RECORD seven peer-reviewed articles on the creation of tumors.

Mr. HARKIN. Tumors but not cancer.

Mr. BROWNBACK. We have been down this road before. We tried this on the fetal tissue research. Remember that debate of 10 to 15 years ago. They had fast-growing cells, Parkinson's, and heart disease. When we inserted them into actual human patients, here is what it did. It created disastrous results because they formed all sorts of

tissues along with cancer. We have been here before, as the Senator knows, on trying to get these sort of different cells from other bodies into one.

Mr. HARKIN. We have gone down a lot of blind alleys in medical research in the past. I have often said that one of the reasons for basic research is that you have 11 doors that are closed. The answer to the problem and the answer to your endeavor may be behind one of those doors. When you have enough funding to open one door, you know what the odds are against you finding it. Or if you have funding for half, then you know what the odds are against you opening the right door. A lot of doors don't lead to anything. A lot of basic research goes down the path, and they find out that is not the answer. So they have to shift to something else. That happens all the time. That is what basic research is all about.

I do not know the specific thing. I am not surprised that many things in the past that scientists have gone down the road on have not led to something curative or therapeutic or something like that which helps us.

That doesn't mean that we have tried something before with devastating effects which doesn't say that we can't then do embryonic stem cell research.

I get back to the point that when you have almost every disease group in this country supporting the bill that is before us, H.R. 810, you have Nobel laureates, scientists, doctors, and you have 19 Directors of NIH saying that this has great potential, then I say, again, to my friends that you have to make either one of two assumptions. Either all of these people have been hoodwinked and they do not know what they are talking about or they have no care or concern about ethics or morals or anything else. I think both assumptions are wrong. I think these people know. They are informed. They may not know every little thing medical doctors might know, but they know the potential.

Second, I think they are vastly ethical and moral people.

I hope we will have some further colloquies on this later.

Mr. BROWNBACK. I would love to respond with a quick response. I think a third option is people are kind of interested in what these cells will do. I quoted from Lord Winston, a British stem cell researcher, saying it is an interesting area, but it is not going to produce any likely cures in my lifetime. But they are curious. They are looking at it and saying it is an interesting area of research. If we are going to cure people, let us cure people and let us talk about that kind of research.

The Senator has been very kind to let me speak.

Mr. HARKIN. The Senator has been very kind. I think we can engage at some other point.

I yield the floor.

The PRESIDING OFFICER. The Senator from Florida.

Mr. NELSON of Florida. Mr. President, we just heard a great deal of discussion and disagreement. My bottom line on this whole issue of stem cell research is that a vast majority of the medical and scientific community feels that this is a process which would lead to medical breakthroughs in the fight against disease. To this Senator, that is worth exploring.

There is hardly a Senator here whose life has not been touched by disease, in one way or another, through their family. In this particular Senator's life, my family has been touched by disease, and we don't know the cause of it. Amyotrophic lateral sclerosis, or ALS, otherwise known as Lou Gehrig's disease. It took down the great baseball player, Lou Gehrig. For years, the researchers have looked and looked and researched and researched and have not found a cure. The ALS community, along with many other communities, is concerned about the treatment and cure of diseases on which stem cell research might offer a clue.

Researchers believe that stem cells may have the potential to treat over 100 million Americans who suffer from a variety of conditions, many of which you heard already discussed on the floor of the Senate today.

There is a T-shirt that I jogged in this morning. It was given to me by the Miami Project. One of the most graphic symbols on this T-shirt is the international symbol of a wheelchair-bound person, and that international symbol suddenly starts to become upright and walks. The Miami Project was put together after the tragedy of a spinal cord injury to the son of Nick Buoniconti, the all-pro linebacker of the great Miami Dolphins team, the undefeated team of 1972. When his son was at a Citadel football game, he suffered that injury. Now the son and the father are both behind Miami Project, trying to find a cure for spinal cord injuries. And all the medical researchers feel that stem cell research is very promising for Alzheimer's, Parkinson's, cardiovascular disease, cancer, and I already mentioned ALS and diabetes.

If that occurred, think what that would mean as we grapple with the Federal budget that is going out of control because of the accelerating cost of Medicare. If we were able to treat and cure some of these diseases, think about how much cost savings that would create. And clearly, in this Senator's mind, a secondary consideration is the fact of eliminating, almost miraculously, the plague of these diseases by the stem cells that have the ability to reproduce themselves and potentially develop into different kinds of cells in the human body.

Of course, you have already heard in the debate today about the extensive

research and being able to treat certain diseases. When confronted with this a few weeks before September 11, 2001, the President announced that the administration would only allow Federal funding for this research to be used on existing colonies of embryonic stem cells. Of course, you have heard the chorus in the scientific community, since then, expressing concern about the quality, the longevity, and the availability of these lines—and they believe that the research advancement requires new embryonic stem cell lines. The key is to increase the availability of the quality embryonic stem cell lines.

The current rules have limited the supply and have resulted in fewer investigators focusing their efforts on stem cell research. Therefore, progress has been limited because of Federal funding in this research being limited. We have the ability to fix that. We can do that in this bill before the Senate.

This Senator intends to support this bill. This bill lifts the President's current restriction that allows researchers to receive the Federal funding for the study of embryonic stem cells. These stem cells can only be derived from embryos originally created for fertility treatments and that are willingly donated by patients and, I might say, that are slated to be discarded.

We will get a substantial majority of votes in the Senate. Although we hear the threats of a veto, it would be my hope the President will reexamine this issue. We are only talking about one kind of stem cell research. This is the stem cells that come through a rather complicated progress, from a fertilized egg that was going to be discarded.

There is another promising way of doing this called somatic cell nuclear transfer where it is not even a fertilized egg. You take an egg, scoop out the nucleus, take a stem cell from the donor—it can be from a skin cell—put that nucleus in, and activate the process of growing cells. That process of stem cell research has enormous promise.

This Senator has heard from thousands of Floridians who suffer on a daily basis from some of these terrible diseases. The Senate has the ability to bring hope to these people. It is time to act. The Senate should pass this bill and pass it with a fairly sizable majority, giving scientists the tools they need to search for cures.

I yield the floor.

The PRESIDING OFFICER. The Senator from Illinois

Mr. OBAMA. Mr. President, a few weeks ago I was visited by two of my constituents—Mary Schneider and her son Ryan.

When Ryan was just 2 years old, his parents and doctors noted severe delays in his motor and speech development, and he was diagnosed with cerebral palsy. His parents were dev-

asted, as the prognosis for any children with cerebral palsy is quite grim, and given the severity of Ryan's condition, his doctors didn't have much hope for his improvement.

Yet, his parents had hope. Because when Ryan was born, his parents had saved his cord blood, a viable but limited source of stem cells. They found a doctor at Duke University who was willing to perform an experimental infusion with these cells to see if they might improve his condition.

They did. In fact, they seem to have cured him.

Within months of the infusion, Ryan was able to speak, use his arms, and eat normally, just like any other child—a miracle his family had once only dreamed of.

Ryan's story exemplifies the power and the promise of stem cells to treat and cure the millions of Americans who are suffering from catastrophic, debilitating and life-threatening diseases and health conditions.

Each year, 100,000 Americans will develop Alzheimer's disease. Over 1 million adults will be diagnosed with diabetes this year, which can lead to complications such as blindness, damaged nerves and loss of kidney function. And there are far too many individuals with spinal cord injuries who are struggling to maintain mobility and independence.

For most of our history, medicine has offered little hope of recovery to individuals affected by these and other devastating illnesses and injuries. Until now.

Recent developments in stem cell research may hold the key to improved treatments, if not cures, for those affected by Alzheimer's disease, diabetes, spinal cord injury and countless other conditions.

Many men, women and children who are cancer survivors are already familiar with the life-saving applications of adult stem cell research. Patients with leukemia or lymphoma often undergo bone marrow transplants.

One of my old law partners back in Chicago underwent a bone marrow transplant at the age of 30. It is a type of stem cell transplant which can significantly prolong life or permanently get rid of cancer. This is what happened, fortunately, to my partner. He is now cancer free. This therapy has been used successfully for decades and is saving lives every day.

Now, here is the problem. This particular breakthrough of adult stem cells has its limitations. Adult stem cells, as has already been mentioned by the distinguished Senator from Iowa, such as those which are used in bone marrow transplants can only be collected in small quantities. They may not be a match for the patient. They have limited ability to transform into specialized cells.

Cord blood, like the kind Ryan used, has limitations as well. If, for example,

Ryan's condition should deteriorate or he should have another illness, there is simply not enough cord blood cells left for a second use. His mother has told us that the few remaining cells would have to be cloned to get enough cells for future use or they would have to obtain stem cells from another source.

These and other difficulties are the reason scientists have started to explore other types and other sources of stem cells, including embryonic stem cell research. Embryonic stem cells can be obtained from a number of sources, including in vitro fertilization. At this very moment, there are over 400,000 embryos being stored in over 400 facilities throughout the United States. The majority of these are reserved for infertile couples. However, many of these embryos will go unused, destined for permanent storage in a freezer or disposal. It makes sense for us to expand and accelerate research using these embryos, just as we should continue to explore the viability of adult stem cell use and cord blood use.

All over the country, exciting progress is being made in the area of embryonic stem cell research. At the University of Illinois, they are discovering that stem cells have the potential to treat blood disorders, lung diseases, and heart damage. At Johns Hopkins, researchers use mouse embryonic stem cells to restore damaged nerves and restore mobility in paralyzed rats. One cannot help but think it is a matter of when, not if, the research will be able to help those who have lost the ability to walk.

For these reasons, I am proud to be a longtime supporter of greater stem cell research. While I was a member of the Illinois Senate, I was the chief cosponsor of the Ronald Reagan Biomedical Research Act, which would specifically permit embryonic stem cell research in Illinois and establish a review of this research by the Illinois Department of Public Health.

I am proud to be a cosponsor of the stem cell bill before the Senate today. This bill embodies the innovative thinking we as a society demand and medical achievement requires. By expanding scientific access to embryonic stem cells which would be otherwise discarded, this bill will help our Nation's scientists and researchers develop treatments and cures to help people who suffer from illnesses and injuries for which there currently are none.

The bill is not without limits. It requires that scientific research also be subject to rigorous oversight. I recognize there are serious moral and ethical issues surrounding this debate. I am respectful of those on the other side. I also realize that we are not talking about harvesting cells that would have been used to create life. We are not talking about cloning humans. We are talking about using stem cells that would otherwise have been discarded

and lost forever. We are talking about using those stem cells to possibly save the lives of millions of Americans.

Democrats want this bill passed. Conservative pro-life Republicans want this bill passed. By large margins, the American people want this bill passed. It is only the White House right now that is standing in the way of progress, standing in the way of so many potential cures.

I ask, after this bill passes—because I am confident it will pass in the Senate—that the President think about this before he picks up his pen to deliver his first veto in 6 years. I ask that he think about Ryan Schneider and his parents and all the other families sitting and waiting and praying for a cure, hoping that somewhere a researcher or scientist will find an answer.

There was a time in the middle of the last century when America watched helplessly as a mysterious disease left thousands, especially children, disabled for life. The medical community worked tirelessly to fight to try to find a cure, but they needed help. They needed funding to make their research possible.

With a world war raging and the country still emerging from the Depression, the Federal Government could have ignored their plight or told them to find their own cure, let it be funded privately, but that is not what happened. Instead, FDR helped to galvanize a community of compassion and organized the March of Dimes to find the cure for polio. While Roosevelt knew that his own polio would never be cured by the discovery of a vaccine, he also knew that at its best, the Government can be used as a force to accomplish together what we cannot achieve on our own. So the people began to care. The dimes piled up, and the funding started to flow. And 50 years ago, Jonas Salk discovered the polio vaccine.

Americans are looking for that kind of leadership today. All over the country, patients and families are waiting today for Congress and the President to open the door to the cures of tomorrow. At the dawn of this new century, we should approach this research with the same passion, the same commitment that has led to so many cures and saved so many lives throughout our history. I urge my colleagues to support this bill.

I yield back the remainder of my time.

Mr. HARKIN. How much time remains on our side?

The PRESIDING OFFICER. The minority has 3 minutes.

Mr. HARKIN. Mr. President, I yield that time to the Senator from Kentucky. We had a colloquy earlier that maybe we can find some time before 5 for Senator DORGAN to speak. I yield the floor.

The PRESIDING OFFICER. Under the previous order, the majority is in control of the next 30 minutes.

The Senator from Kentucky.

Mr. BUNNING. Mr. President, I come to the Senate today to speak on the three bills related to stem cell research. One of these bills is wrong, but I believe that the other two are worthy pieces of legislation.

Stem cell research is a controversial issue in the medical, scientific, and religious communities, as well as in Congress. I am not opposed to stem cell research; however, I am 100 percent opposed to embryonic stem cell research. This is why I oppose H.R. 810, the Stem Cell Research Enhancement Act of 2005. This bill would remove all current protections against the destructive use of embryos for harvesting stem cells. I firmly believe it is wrong to take these sources of life and destroy them, even if it is for a benign purpose such as medical research.

Current Federal policy on stem cell research developed out of a compromise between proponents of research and those who endeavor to protect life at its earliest stages, brokered by President Bush. This is the first administration to allow Federal funding of embryonic stem cell research. Today's policy allows Federal funds to be used for embryonic stem cell lines that were in existence prior to August 9, 2001.

As an opponent of the destruction of human embryos, I believed the Bush administration's decision to allow the embryonic stem cell research was misguided. H.R. 810 goes even further than the current policy. It cancels the protections of the 2001 cutoff for research by allowing research of all embryonic stem cells created from in vitro fertilization treatments. This legislation would move us in the wrong direction on this issue.

Some have said that these excess embryos which would be used for research would be destroyed anyway. However, I do not think this makes ethical sense. Just because these budding lives will not survive does not mean that we should ghoulishly conduct experiments on them.

I believe there is a disconnect between what many Americans believe about this issue and what the facts are. For one, we are debating the use of Federal funds for embryonic stem cell research. We are not debating the legality of embryonic stem cell research. Any company or organization that wants to conduct or fund embryonic stem cell research may do so. I just do not think taxpayers should be forced to pay for it.

Also, there are different kinds of stem cells. Adult stem cells, such as those derived from cord blood tissue, do not require the destruction of a human embryo. Why walk down such a dangerous ethical path when there is

no need to do so? These adult stem cells have proven very effective in combating several serious conditions, such as diabetes and spinal cord injuries, among others.

This leads me to another point. We have seen the benefits that come from adult stem cell research. However, we have yet to see any tangible benefits from any embryonic stem cell research. Many scientists agree that these kinds of stem cells might—I say “might”—be able to help fight disease someday, but it has not happened yet. We are talking about ending human life when no lives have been saved yet. Who knows how many human embryos we will have to destroy before any tangible progress is made.

That being said, I am pleased to see that the Senate is considering S. 2754, the Alternative Pluripotent Stem Cell Therapies Enhancement Act. This bill could very well remove the most contentious issues of this debate. Embryonic stem cells are pluripotent, meaning that they could potentially have a wide variety of uses. It is this quality that drives the supporters of embryonic stem cell research to their position. However, great strides have been made in deriving pluripotent stem cells from sources that do not destroy embryos.

S. 2754 would authorize Federal funding to conduct research on the creation of nonembryonic pluripotent stem cells. If successful, we would be able to end this debate by funding a morally acceptable replacement for research involving human embryo destruction. I urge the Senate to adopt this measure.

The final bill the Senate is debating on the subject is S. 3504, the Fetus Farming Prohibition Act. I fully support passage of this legislation. This bill would ban research from fetal farms where human embryos are implanted in nonhuman uteruses. It would also ban embryos from human pregnancies created specifically for research.

Most people would find these requirements to be self-evident. However, some groups have said this is unnecessary because research already follows ethical guidelines that forbid this. That may be the case, but I believe we should take these ethical guidelines and give them the force of law to prevent the possibility of such gruesome methods ever being used by researchers. I urge my colleagues to pass this bill.

I do not like to see people with medical conditions suffer. However, I believe many advocates of embryonic stem cell research are playing on the hopes and griefs of many people whose lives are touched by illness. We are at an ethical crossroads with this issue. We must stay true to our values of respecting life. It seems foolish to stubbornly barrel ahead with Federal funding for embryonic stem cell research

when, with a small bit of patience, we can put aside the moral and ethical concerns and proceed down a path we can all agree upon.

In closing, I firmly believe we cannot create life and then destroy it in order to save another life. I urge my colleagues to vote against the Stem Cell Research Enhancement Act and to support S. 2754 and S. 3504.

Mr. President, I yield back the remainder of my time.

The PRESIDING OFFICER. The Senator from Oklahoma.

Mr. COBURN. Mr. President, I want to spend a few minutes to kind of outline some of the statements that have been made. To just show how off base from reality some of them are, we heard there was a ban on embryonic stem cell research. There is no ban on embryonic stem cell research. As a matter of fact, the American people paid \$40 million this last year on embryonic stem cell research—human, \$40 million. So there is no ban. And considering that, there is a significant industry in the private sector that is researching it.

We heard there are only 21 cell lines around, available. There are 400 cell lines available to scientists. There are 21 that Federal dollars can be spent on. So let's be real clear about what the real facts are.

We also heard from the Senator from Florida that all medical researchers believe that embryonic stem cell research is the best hope. That could not be further from the truth. All of them do not. As a matter of fact, there is a large number who do not believe that way at all, based on not ethical concerns, on scientific concerns. They think it is not an acceptable way.

We heard the Senator from Illinois saying that adult stem cells can only be collected in small quantities. That is not true at all. Many adult stem cell lines are reproductive of themselves. They are progenitor cells. They reproduce themselves. They come from amniotic membrane. They come from bone marrow. They come from endometrial lining. They come from placental tissue. They come from cord blood. They come from the spleen and the liver. They come from all sorts of areas in our body.

We heard the Senator from California say we should let the scientists decide, not the Senators. Let's talk about Tuskegee. We let the scientists decide that one. I can think of two or three more instances in the 20th century when we let the scientists decide, and we went down a path that all of us were grieved over.

When Senator SPECTER opened the debate today, there was, again, the assumption, in his first statement, that there is no embryonic fetal stem cell research. Not true. He also said none of the others have the potential of embryonic stem cell research. Well, I think

there is a large body of science and a larger body of scientists who would disagree with that, especially as they study the new breakthroughs on germ cell pluripotent stem cells.

I am going to ask to have printed in the RECORD a Rand study on the available numbers of human embryos, where in fact there are 400,000. But they outline, in great detail, that the fact is, a very small percentage of those are available for fetal research. They also outline in great detail so the American public can know that for every two embryos you are going to thaw, one of those two will die during the thawing process.

So for this limited number, the most number of new cell lines, if you took all that are available today, would be less than what is available in the world today. It is 273 cell lines. So we have this great big demand, that we are going to get all this, but what we are going to get is less than what is out in the world today.

Mr. President, I ask unanimous consent that the Rand study I referred to be printed in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

[From the Rand Law & Health Research Brief]

HOW MANY FROZEN HUMAN EMBRYOS ARE AVAILABLE FOR RESEARCH?

Frozen human embryos have recently become the focus of considerable media attention. Frozen embryos are a potential source of embryonic stem cells, which can replicate themselves and develop into specialized cells (e.g., blood cells or nerve cells). Researchers believe that such cells might be capable of growing replacement tissues that could be used to treat people suffering from a number of diseases, including cancer, Alzheimer's disease, and diabetes. Among the most contentious issues in the stem cell debate are whether frozen embryos should be used to produce stem cells for research purposes and whether it is appropriate to use federal funds for research involving human embryos.

Many of the proposed resolutions to the embryonic stem cell debate are based on assumptions about the total number of frozen human embryos in the United States and the percentage of that total that is available for research. Accurate data on these issues, however, have not been available. Guesses on the total number of embryos have ranged wildly from tens of thousands to several hundred thousand.

RAND researchers Gail L. Zellman and C. Christine Fair, together with the Society of Assisted Reproductive Technology (SART) Working Group led by David Hoffman, MD, have completed a project designed to inform the policy debate by providing accurate data on the number of frozen embryos in the United States and how many of those embryos are available for research purposes. Their findings include the following:

Nearly 400,000 embryos (fertilized eggs that have developed for six or fewer days) have been frozen and stored since the late 1970s.

Patients have designated only 2.8 percent (about 11,000 embryos) for research. The vast majority of frozen embryos are designated for future attempts at pregnancy.

From those embryos designated for research, perhaps as many as 275 stem cell

lines (cell cultures suitable for further development) could be created. The actual number is likely to be much lower.

VAST MAJORITY OF FROZEN EMBRYOS ARE HELD FOR FAMILY BUILDING

The practice of freezing embryos dates back to the first infertility treatments in the mid-1980s. The process of in vitro fertilization often produces more embryos than can be used at one time. In the United States, the decision about what to do with the extra embryos rests with the patients who produced them.

The RAND-SART team designed and implemented a survey to determine the number and current disposition of embryos frozen and stored since the mid-1980s at fertility clinics in the United States and the number of those embryos designated for research. The survey was sent to all 430 assisted reproductive technology facilities in the United States, 340 of which responded. Estimates for nonresponding clinics were developed using a statistical formula based on a clinic's size and other characteristics. The results show that as of April 11, 2002, a total of 396,526 embryos have been placed in storage in the United States. This number is higher than expected; previous estimates have ranged from 30,000 to 200,000.

Although the total number of frozen embryos is large, the RAND-SART survey found that only a small percentage of these embryos have been designated for research use. As the figure illustrates, the vast majority of stored embryos (88.2 percent) are being held for family building, with just 2.8 percent of the total (11,000) designated for research. Of the remaining embryos, 2.3 percent are awaiting donation to another patient, 2.2 percent are designated to be discarded, and 4.5 percent are held in storage for other reasons, including lost contact with a patient, patient death, abandonment, and divorce.

EMBRYOS AVAILABLE FOR RESEARCH DO NOT HAVE HIGH DEVELOPMENT POTENTIAL

Although the 11,000 embryos designated for research might seem like a large number, the actual number of embryos that might be converted into stem cell lines is likely to be substantially lower. Because assisted reproductive technology clinics generally transfer the best-quality embryos to the patient during treatment cycles, the remaining embryos available to be frozen are not always of the highest quality. (High-quality embryos are those that grow at normal rates.) In addition, some of the frozen embryos have been in storage for many years, and at the time that some of those embryos were created, laboratory cultures were not as conducive to preserving embryos as they are today. Some embryos would also be lost in the freeze-and-thaw process itself.

To illustrate how such laboratory conditions might limit the number of embryos available for research, the RAND-SART team performed a series of calculations. Drawing upon the few published studies in this area, they estimated that only about 65 percent of the approximately 11,000 embryos would survive the freeze-and-thaw process, resulting in 7,334 embryos. Of those, about 25 percent (1,834 embryos) would likely be able to survive the initial stages of development to the blastocyst stage (a blastocyst is an embryo that has developed for at least five days). Even fewer could be successfully converted into embryonic stem cell lines. For example, researchers at the University of Wisconsin needed 18 blastocysts to create five embryonic stem cell lines, while researchers at The Jones Institute used 40 blastocysts to create three lines.

Using a conservative estimate between the two conversion rates from blastocyst to stem cells noted above (27 percent and 7.5 percent), the research team calculated that about 275 embryonic stem cell lines could be created from the total number of embryos available for research. Even this number is probably an overestimate because it assumes that all the embryos designated for research in the United States would be used to create stem cell lines, which is highly unlikely.

The RAND-SART survey found that almost twice as many frozen embryos exist in the United States as the highest previous estimate. Only a small percentage of these embryos are available for research because the vast majority are reserved for family building. Among those that are in principle available for research, some have been in storage for more than a decade and were frozen using techniques that are less effective than those that are currently available.

Mr. COBURN. Now, why do we want multiple cell lines? It goes back to the issue I have been talking about all day. It is called tissue rejection. That is the wonder of adult stem cells and germ cell pluripotent stem cells versus embryonic. With embryonic, there is rejection because there is an allergy to the foreign tissue. It is called the HLA, histocompatibility complex. The only way around that, with fetal embryonic stem cells, is to clone yourself—the only way you will get around it. And it will only work well in women. Only if you clone yourself with your own egg do you avoid all the allergy implications of foreign tissue.

So I think it is very important that we—it is OK to have this debate, but some of the claims we hear—we actually heard, and I know he did not mean this, Senator SPECTER talking about embryos injected into the pulp of the tooth to create a new set of teeth. He did not mean embryos. He meant pluripotent stem cells. But you do not want pluripotent. What you want is the epidermal stem cells that produce teeth in the first place. That is what is great about adult stem cells. We are going to be able to do that with adult stem cells.

He also stated that embryonic stem cell research is outstripping all of the research. That is not true. It is not true at all. The vast majority of success in stem cells today lies not with embryonic stem cells, it lies with everything but embryonic stem cells.

Now, I do not deny as a scientist that would be a wonderful area in which to work. There is lots unknown, and if you are a scientist today, and they say you can go to this area where there are all these areas where you can work and go and move and everything, it is a fun area of research. But it is loaded with hazards, just like the Senator from Kansas talked about, in terms of fetal tissue. The fact is, as we may someday learn how to turn on and turn off some of these cell lines, we do not know that yet. It is fine to perfect that in animals. It is not fine to perfect that in human clinical trials until we have

that absolutely controlled. I do not have any trouble with what we are doing now, doing that in the private sector.

But the question is, do we ask American taxpayers to use their money to destroy embryos—embryos for which there are 2 million people in the country who would love to adopt—do we ask them to destroy that with their tax money so we can do that research, even though it is occurring in the private sector at a far greater rate than it is in the public finance sector?

So I think this really boils down to two questions: false choices and false promises. Let me outline them. The false promise is that only embryonic stem cells are going to solve the problem. It is not true.

The second promise is we are going to get treatments, but we are not going to have to clone. You are going to have to clone if you are going to get treatments from embryonic stem cells.

No. 3 is that adult stem cells and the pluripotent lines, as well as germ cell lines, will not be able to do what embryonic stem cells do. That is not proven anywhere in the scientific literature. That is a false promise.

And No. 4 is the false promise issue that you cannot take adult stem cells and dedifferentiate, move backwards, to make them pluripotent, which we are seeing great science with an enzyme today called reversa. So those are the false promises that are out there.

Now, there are four false choices, I believe. One is that there is no cure without embryonic stem cells. That, for sure, the evidence does not show. Another is that there will not be any research unless the Government pays for it. That is not true at all. The research is ongoing across the world in lots of areas without government research, and much more so in our country outside of government research.

The third choice is that there is no life in an embryo. The fact is there is. Now, we had one Senator talk about the fact that they are going to be incinerated. If you talk about the 108 snowflake babies, the other 2 or 3 organizations that are adopting those, those children believe that fact that there is wonderful potential with the amount of demand.

I am not saying that people who disagree with me on the ethical issues are bad or immoral people. I am saying I am not fighting this on ethical issues. I am fighting this on common sense, to see what things are happening and where we are seeing success and keeping up with the science. This debate in the Senate today is almost all about a year and a half old, as far as the science is concerned. I am talking about the new science. That is why I worked so hard to stay up on it.

Finally, the promise is what every scientist knows, what every embryologist knows and every cell biolo-

gist knows, which is the mighty mitochondria. You cannot clone without having potential rejections unless you clone yourself with your own egg. There is different DNA in the mitochondria and the cell cytoplasm. I appreciate the spirit of the debate, and I hope the American people understand that it is not a false choice of no research versus some. The question is, Do we destroy unborn children? Two, do we give Federal dollars to do that? Thank you.

The PRESIDING OFFICER. The Senator from West Virginia is recognized. The Senator is to be aware that the majority controls the time until 5 p.m.

Mr. BYRD. Mr. President, I am aware of that. I ask unanimous consent that, notwithstanding and without any prejudice to any Senator, to speak for 5 minutes on another matter.

The PRESIDING OFFICER. Is there objection?

Mr. BYRD. Not showing an interruption at this point.

The PRESIDING OFFICER. Is there objection?

Mr. DORGAN. Mr. President, reserving the right to object, my understanding was that I would be recognized for 10 minutes following the presentation by Senator COBURN. I don't object to anything someone else wishes to do, provided that following that presentation, I am recognized for 10 minutes. Would that be part of the unanimous consent request?

Mr. BYRD. I make that part of my request.

The PRESIDING OFFICER. Is there objection?

Mr. HARKIN. If I might, as a manager, we are on strict time limits. At 5 o'clock, Senator KENNEDY gets 25 minutes and then 5 minutes goes to Senator REED. At 5:30, it goes back to the other side. If we take time here and there, it spills over, and someone is going to lose time.

Mr. KENNEDY. I will be glad to yield 5 minutes of my time to the Senator from West Virginia.

The PRESIDING OFFICER. Is there objection? Without objection, it is so ordered.

The Senator from West Virginia is recognized.

(The remarks of Mr. BYRD are printed in today's RECORD under "Morning Business".)

The PRESIDING OFFICER. Under the previous order, the Senator from North Dakota is recognized for 10 minutes.

Mr. DORGAN. Mr. President, all of us have great pride in being able to serve in this great body and the purpose of it is, of course, to be engaged in public policy debate, how to advance this country's interests. We come to this debate today on something that is very important, very controversial. This country's search in many areas—social justice, science, and so many areas of

our lives—is a search that never ends. We have split the atom. We have spliced genes. We did the human genome project, developed the owner's manual for the human body. We invented plastics and radar and silicon chips, cured polio, cured smallpox, built airplanes and learned to fly them, and built rockets and walked on the moon; we invented the telephone, the computer, and the television.

It is pretty unbelievable, but this country is hardly out of breath. We continue to inquire, continue to search, and continue to ask questions. Those questions, especially in science, are, in some cases, difficult questions. We will have three pieces of legislation we will vote on tomorrow dealing with stem cell research. One piece of legislation prevents something that is not being done. I will not have any problem supporting that; preventing something that is not being done is not posing any difficulty for me. The second piece of legislation authorizes that which is already authorized. I have no difficulty with that vote either. I will be happy to support that.

The third piece of legislation is called embryonic stem cell research. That is the basis of the controversy being discussed today. Those in this Chamber and those throughout this country who have lost loved ones to dreaded diseases understand the urgency to unlock the mysteries of these diseases. I lost a beautiful young daughter some years ago to heart disease. I wondered then, and I wonder now, and I will wonder for some long while, if there is anything that we could do to unlock the mystery of that devastating killer. But it is not just heart disease. It is diabetes, Alzheimer's, Parkinson's, cancer—the list goes on and on.

Every day, people die. Every day, there are scientists who inquire: What can be done? What can we do to unlock the mysteries to find cures for these terrible diseases?

Stem cell research. Mr. President, there are 1 million people walking on this Earth who were conceived outside of the womb in a test tube. There are 1 million living people who were conceived through in vitro fertilization. We had somebody testify before the Senate Commerce Committee a few years ago, and he said none of those people should have been born, it was wrong and in vitro fertilization should not exist. It is wrong, he said. I disagree with him. It is the blessing to provide the opportunity to have a family to so many couples who were childless through in vitro fertilization, using the egg and sperm and uniting them outside of the womb, implanting them, and providing a child for those families.

At in vitro fertilization clinics, many more eggs are fertilized than are used. Some are stored and frozen. Those fro-

zen embryos at in vitro fertilization clinics, when they are not going to be used in the future, are discarded, simply thrown into a wastebasket. They become waste and they are discarded. Some of my colleagues would say each and every one of those represents murder. I don't believe that, but some of my colleagues would insist on that position. That is murdering an embryo. We have 400,000 of those embryos stored, cryogenically frozen, at in vitro fertilization clinics. Around 8,000 to 11,000 of them a year will be simply discarded.

The question is: Should we relax the ban on Federal funding of stem cell research and allow the use of frozen embryos that otherwise are going into a wastebasket, that otherwise are going to be discarded? Should we allow the use of them with ethical boundaries and be concerned about the ethics of its use for scientific research, to try to find the cures to these terrible diseases? Should we allow that? The answer clearly is yes.

Are we comparing someone who is suffering from Parkinson's, someone who has Alzheimer's, someone with heart disease or cancer or diabetes to an embryo that is going to be discarded into a wastebasket—8,000 to 11,000 of them a year? Do we find an equivalency there?

Do you believe that all of those unused fertilized eggs that are frozen at an IV clinic, an in vitro fertilization clinic, that are discarded, that each and every one represents a murder? Some believe that. I don't.

What is pro-life, I believe, what is life-giving is to be able to continue in this area of science with ethical guidelines but continue this search to unlock the mysteries of these diseases.

My colleague a moment ago said quite correctly that we don't prevent stem cell research. He is quite right about that. This issue is the restriction of Federal funding, and, of course, a substantial amount of the funding for scientific research, research in health care in this country, comes from the Federal Government.

If we take a look at what has happened with respect to the United States and the rest of the world, we will see, because President Bush has imposed restrictions on stem cell research, we have lost a substantial amount of ground to the rest of the world. We are falling far behind.

This is not about Republicans or Democrats. It is not about conservatives or liberals. Let me quote Nancy Reagan: Science has presented us with a hope called stem cell research, which may provide our scientists with answers that have so long been beyond our grasp. I just don't see how we can turn our backs on this—there are just so many diseases that can be cured, or at least helped. We have lost so much time already, and I just really can't bear to lose any more.

Nancy Reagan watched the ravages of Alzheimer's disease destroy her husband, our former President, the late Ronald Reagan. I believe she understands the urgency with which we pursue this purpose. I can read the pain in this message, and that pain exists—my guess—with so many in this Chamber and across the country who have watched loved ones die because of dread diseases that have wasted away their lives. The question is: Are we willing to do something about that? Can we do something about that? Will we retard or will we advance science? Will we hold back or will we encourage the scientists to search for these cures?

I hope the Senate will do just as the House has done and indicate that we believe that with proper ethical guidelines, stem cell research should continue with Federal funding. I believe, as I said, this is about saving lives, this is not about taking lives.

I understand that this is a sensitive subject. In fact, in my last campaign for office 2 years ago, my opponent ran television commercials saying that my position was to be supportive of planting embryos into mommies' wombs and growing them for a while and then harvesting them for body parts. That is the Byzantine nonsense which, unfortunately, attends part of this debate. No one here—certainly not me—would ever countenance anything resembling that, and yet much of the political discussion about this issue becomes so bizarre and so Byzantine that it is detached from reality.

The bill that is before the Senate that I just described—I am not talking about the first two bills, the one that prevents something that is not being done. I don't have a problem with that. Or the one that authorizes something that is already authorized, and I have no problem with that.

I am talking about the legislation dealing with stem cell research. The bipartisan coalition that brought it to the Senate includes Republicans, Democrats, conservatives, and liberals. My hope is the Senate will act on this legislation with a veto-proof majority and decide whatever the President does that we have made this decision and the decision should stick.

The PRESIDING OFFICER (Mr. ALEXANDER). The Senator's time has expired. The Senator from Massachusetts is recognized.

Mr. KENNEDY. Mr. President, I believe I am to be recognized for 20 minutes. I would like the Chair to let me know when I have 3½ minutes remaining.

The PRESIDING OFFICER. The Chair will do that.

Mr. KENNEDY. Mr. President, I join my friend and colleague from North Dakota in giving special recognition to Mrs. Reagan on this issue. As someone who has been interested in this issue

for some time, as many of my colleagues have, I think all of us pay tribute to her, to a very gracious, lovely, wonderful, warm First Lady and someone I admire so much because after she has been to the top of the mountain, so to speak, and entitled to a very secure and well-deserved retirement, she is still restless about this issue and tireless about talking with people and speaking about this issue with great knowledge, great awareness, great understanding, and great compassion. I mention that at this time. I think we all know this debate has moved farther down the road toward a hopeful conclusion because of her work.

Today, the Senate begins the debate on legislation unlike any other we have considered this year. Today's debate is not about economic gain or loss or helping one State or one region of the country. Today's debate is about something far more basic, something that touches the spirit of every American. Today's debate is about hope.

Hope is one of those qualities of spirit that makes us human. Hope allows us to dream of a better life for our children, our community, our world, and especially for loved ones now suffering or in pain. Hope is what stem cell research holds for the parents of children with diabetes who dream of a day when their constant fears for their children's well-being are things of the past. Hope is what stem cell research brings to those with Parkinson's disease who long for a time when the tremors of that disease are banished forever. Hope is what stem cell research brings to millions of Americans who seek better treatments and better drugs for cancer or diabetes, spinal injury, and many other serious conditions. And hope cannot be extinguished or destroyed, but it can be delayed.

In the Bible, the Book of Proverbs tells us:

Hope deferred makes the heart sick.

And today hearts are sick almost to the breaking point because, for the last 5 years, the Bush administration has shut down the stem cell research program begun at the National Institutes of Health and imposed the arbitrary restrictions on this lifesaving research.

Hope soared anew a year ago when the House of Representatives set aside partisan differences and courageously approved legislation to end those restrictions and to give our scientists the tools they need to make the progress in the fight against disease. The vote in the House affirmed that embryonic stem cells can promote a true culture of life by enabling fuller, longer lives for millions of our citizens. The House voted for hope, for progress, and for life.

The supporters of this legislation in the Senate come from backgrounds as diverse as its proponents in the House. All of the supporters of H.R. 810, with our different backgrounds and different

faiths, representing different parts of this country, have concluded that support of this legislation is the moral choice to make.

The legislation before us takes only two actions, but they hold the key to medical progress.

First, our legislation overturns the restrictions on the embryonic stem cell research imposed by Presidential order 5 years ago. That unilateral action by the administration bypassed Congress and froze progress in its tracks by barring the NIH from funding research on stem cells derived after 9 p.m. eastern daylight time, August 9, 2001—an arbitrary date and time chosen solely to coincide with a Presidential speech.

At the time the President's order was issued, it was claimed that over 60 independent stem cell colonies, or lines, would be available to NIH researchers. Initially, the NIH listed 78 such lines in its registry, but time and the unalterable facts of science have shown that two-thirds of these lines are useless or that claims about them proved to be an illusion.

Today, only 21 stem cell lines are available to NIH researchers, and all of these were obtained using out-of-date methods and outmoded techniques. Each of these 21 lines is contaminated with animal tissue because each was cultured on a so-called feeder layer of mouse cells. Techniques developed since 2001 have allowed scientists to grow stem cells without mouse cells, but these are all off limits to NIH-funded scientists because of the administration's restrictive policy.

Even if the 21 lines were not contaminated with mouse cells, they would still be unusable for treatments. The reason is that the use of every one of these cells is constrained by a legal contract called a material transfer agreement, and each of these documents contains a clause forbidding the use of the cells in patients.

Let me be clear. If the cells in the NIH registry weren't already useless for treatment because they are contaminated, they would be useless because the contract under which they are provided forbids their use in patients.

Five years ago, we warned that imposing an arbitrary date restriction on new stem cell lines would freeze progress by denying NIH researchers access to new lines that might hold the key to medical breakthroughs, and these fears have proven well-founded.

Since the restrictions were imposed, scientists working overseas or with limited private funds have developed new lines with exceptional promise for research. For example, Dr. Douglas Melton at Harvard has derived 17 new stem cell lines with improved techniques. Scientists at the University of California have shown that stem cells can be derived without contamination from animal cells. And doctors in

Israel have developed stem cell lines that have genetic traits with the potential of treating hereditary diseases, such as muscular dystrophy. These astonishing breakthroughs could lead to new cures and new understanding of these disorders, but the administration's restrictions bar NIH from supporting research to explore their promise. To unlock the healing power of stem cell research, the first action our legislation takes is to end the ban that keeps NIH from supporting research on new stem cell lines.

But science without ethics is like a ship without a compass. Strong ethical guidelines are needed to ensure that scientific progress follows the moral course that we as a society set. For this reason, the second major action our legislation takes is to establish ethical safeguards for stem cell research. And once again allowing NIH to lead stem cell research, we bring more research under the strong ethical standards that are part of every NIH grant for any kind of medical research. The bedrock principles of these standards are informed consent of the patient and approval of an ethics committee.

In addition, when it comes to stem cell research, our legislation requires NIH to go beyond these general requirements and requires NIH to issue specific standards for stem cell research. Before the NIH stem cell research program was terminated in the early days of the Bush administration, it had developed an extensive and robust ethical framework for the research. These requirements include an extra level of review to assure that all research was conducted according to special protections applicable to stem cell research. They limit research only to cells derived from embryos from fertility clinics that were never to be used to initiate a pregnancy and were likely to be discarded. They prohibit payment for donation of cells. They forbid improper inducements to donate embryos to further ensure that all cells used for research must come from embryos that would not be used to initiate a pregnancy.

I want to take a moment to discuss this last point in detail. Even with the intense debate on stem cells over the last 5 years, there remains some confusion about the source of stem cells. The cells are not derived from fetuses, they are not from embryos that might otherwise have been used to start a pregnancy.

Our legislation explicitly requires the stem cells to be derived:

From human embryos that have been donated from in vitro fertilization clinics, were created for the purpose of fertility treatment, and were in excess of the clinical need of the individuals seeking such treatment.

Those are the words, Mr. President.

In fertility clinics around the country, there are thousands of embryos

that are simply thrown away. Hundreds of thousands more are frozen and never used. They are not the result of a pregnancy; they are not the product of an abortion or a miscarriage. The only way they can produce life is to be implanted in a woman, and these embryos we propose to save for research have not been and will not be. We believe it is better to save embryos that would otherwise be destroyed so they can give the gift of life to patients who are suffering. Life is too precious to allow an opportunity to cure illness to be simply thrown away.

Some say this debate is only about science, and that it is not a moral choice. I disagree. A vote on this bill involves a deeply moral choice. It is a choice between making progress toward better treatment for patients or spurning a chance for new cures. There are deeply moral people on both sides of this debate, but I am convinced that medical progress is the right one.

We have faced similar choices many times in the past. In the 1970s, Congress was considering whether to ban research on recombinant DNA—the very foundation of biotechnology. Then, as now, some raised ethical concerns or dismissed the promise of this research as a pipedream, and urged Congress to forbid it. In the 1980s, Congress made the right choice by rejecting attempts to outlaw IVF, a technique that has fulfilled the hopes and dreams of thousands of parents who never would have been able to have a child otherwise.

Other forms of medical progress brought similar controversy: transplantation, blood transfusion, even vaccines. All of these breakthroughs were once new and controversial, with strong voices raised against them. All were discussed and debated and eventually adopted in ways that are consistent with American values. Each time we looked to the future and saw the potential of controversial research, we chose progress, and the benefits have been immense.

We should make the same choice on stem cell research. We should not allow the misplaced fears of today to deny patients the cures of tomorrow.

Some argue that we should support research on adult stem cells, or stem cells from umbilical cords, or stem cells derived from using new genetic techniques. I agree. We should leave no stone unturned in the search for new cures. Perhaps some cures will come from one technique and other breakthroughs from another. Let's encourage our scientists to explore every avenue that is ethical and could lead to progress. But there is no sense in closing the door on one of the most promising areas of medical research discovered in decades, while we wait for other, less hopeful methods to show success or failure. That is not my assessment; it is the judgment of every major scientific leader in America.

According to a letter by 80 Nobel laureates:

For disorders that prove not to be treatable with adult stem cells, impeding human pluripotent stem cell research risks unnecessary delay for millions of patients who may die or endure needless suffering while the effectiveness of adult stem cells is evaluated.

The Institute of Medicine was just as clear on the need for embryonic stem cell research:

Embryonic stem cells studied in animals clearly are capable of developing into multiple tissues and capable of long-term self-renewal in culture, features that have not yet been demonstrated with many adult stem cells.

In a letter to the Senate Appropriations Committee, Dr. Elias Zerhouni, the Director of the NIH, said:

It is clear that more cell lines would be helpful in ensuring expeditious progress in this important field of science.

His conclusions were echoed by other NIH Institute Directors such as Dr. Elizabeth Nabel, head of the NIH Institute on Heart, Lung and Blood Disorders, who said:

The limitations of existing cell lines are hindering scientific progress among a community that is very eager to move forward in this promising area.

The judgment of the Nation's scientific leaders could not be clearer or more emphatic: Yes, we should study adult stem cells, but we should let science decide which approach works best for patients.

But in the end, this debate is not about abstract principles or complex terms of science. It is about people who look with hope to stem cell research to help them with the challenges they face.

Two years ago, I held a forum in Boston on the promise of stem cell research. One of the participants was Moira McCarthy Stanford from Plymouth, MA, whose 14-year-old daughter Lauren has juvenile diabetes. I wish to end my remarks today with a letter that Lauren wrote to me. It explains far more eloquently than any Senator could the urgent need to pass this legislation. These are Lauren's words:

For as long as I can remember, I have had to take a lot of leaps of faith. I have had to believe my parents when they told me taking four or five shots a day and pricking my finger eight or more times a day was just a new kind of normal. I had to—

The PRESIDING OFFICER. The Senator has 3½ minutes remaining.

Mr. KENNEDY. I thank the Presiding Officer.

I had to just smile and say I'm fine when a high blood sugar or a low blood sugar forced me to the sidelines in a big soccer game, or into the base lodge on a perfect ski day, or out at the pool during a swim meet.

But when I watched, with my parents, President Bush's decision on stem cell research in the summer of 2001, I just could not accept it. You see, the one thing that has helped me accept all I have had to accept these years is the presence of hope. Hope keeps me going.

That night, President Bush talked about protecting the innocent. I wondered then: What about me? I am truly innocent in this situation. I did nothing to bring my diabetes on. There is nothing I can do to make it any better. All I can do is hope for a research breakthrough and keep living the difficult, demanding life of a child with diabetes until the breakthrough comes. How, I ask my parents, is it more important to throw discarded embryos into the trash than it is to let them be used to hopefully save my life.

I am so happy to hear that the Senate is thinking of passing H.R. 810. I can dream again—dream of that great day when I write a thank you letter to the Senate, to the House, and everyone who helped me become just another girl; a girl who dreamed and hoped and one day, got just what she wanted: her health and her future. That's all I'm really asking for.

Those are Lauren's words, and they command us to act. Tomorrow, we must cast a vote of conscience and of courage. We must reaffirm that our common value of bringing hope to those who need it outweighs any single ideology. We must approve the Stem Cell Research Enhancement Act, and we must call upon the President of the United States not to veto hope.

I thank the Chair.

Mr. REED. Mr. President, I believe I have 5 minutes under the order.

The PRESIDING OFFICER. The minority controls the time until 5:30.

Mr. REED. Mr. President, I yield myself 5 minutes.

I wish to take a few moments talking about H.R. 810, the Stem Cell Research Enhancement Act. Last year, the House overwhelmingly passed this bill, and I am pleased that the Senate will now finally consider this legislation. My colleague in the other body, Congressman JIM LANGEVIN, has been a staunch advocate for stem cell research and has played a central role in advancing this legislation through the House of Representatives, and I commend him for that.

I hope to be able to stand on the Senate floor a few years from now to highlight the advancements that have been made in the treatment of spinal cord victims, children with diabetes, and Parkinson's treatment because of embryonic stem cell research. However, I fear that even if the Senate approves legislation, patients will only see further delays in promising stem cell research.

The President endorsed the use of Federal funds research on existing cell lines in his August 2001 Executive Order. At the time of the announcement, he said:

Scientists believe further research using stem cells offers great promise that could help improve the lives of those who suffer from many terrible diseases—from juvenile diabetes to Alzheimer's, from Parkinson's to spinal cord injuries. And while scientists admit they are not yet certain, they believe stem cells derived from embryos have unique potential.

This is from the President's Executive Order.

We know now that the stem cell lines identified in the Executive Order were not the panacea for breakthrough medical research. There are only 22 stem cell lines available for federally funded research, and since they were derived in the absence of scientific and ethical guidelines, they have proven unsuitable for most research. At the same time, there are approximately 400,000 frozen embryos in IVF clinics that will likely be destroyed. While I recognize the many benefits of using embryonic stem cells in biomedical research, I also realize that many serious ethical and moral issues have to be considered. I believe Federal guidelines designed to create and uphold strict oversight of these practices can achieve the appropriate balance needed in order to ensure that this research is being carried out in an acceptable manner.

H.R. 810 sets forth responsible rules and limitations for obtaining excess embryos as well as adequate standards for conducting research involving embryonic stem cells. It would establish the necessary framework for oversight so that principled research can finally be allowed to proceed.

Some of my colleagues believe embryonic stem cell research is not necessary, given some of the tremendous advances adult stem cells have yielded. Indeed, I wholeheartedly support continued progress in the area of adult stem cell research and was proud to be one of the lead sponsors of the Stem Cell Therapeutic and Research Act, which Congress enacted late last year. This bill was essential in maintaining patient access to lifesaving treatments through the National Marrow Donor program and also opening the door to the developments of a companion registry system for cord blood.

We know the use of umbilical cord blood in treating diseases such as leukemia, sickle cell anemia, and rare but deadly genetic disorders such as Krabbe disease is showing tremendous promise. The Stem Cell Therapeutic and Research Act solidified the Nation's commitment to increasing the number of cord blood transplants by providing additional Federal funds to help public cord blood banks increase their inventory, as well as support outreach, patient advocacy, and coordinating information and education activities.

The President also recognized the importance of this avenue of research. During the 2001 Executive Order, he said:

You should also know that stem cells can be derived from sources other than embryos. And many scientists feel research on these types of stem cells are also promising. Many patients suffering from a range of diseases are already being helped with treatment developed from adult stem cells.

He went on to add:

However, most scientists, at least today, believe that research on embryonic stem

cells offer the most promise because these cells have the potential to develop from all of the tissues of the body.

Those are the President's words. I urge all of us to heed those words today.

I urge the Senate to support H.R. 810 and also the President to sign it into law. I also intend to support S. 3504 and S. 2754, but neither of these measures is a substitute for H.R. 810.

Mr. President, I yield the floor, and I note the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. ISAKSON. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. ISAKSON. Mr. President, I rise to take advantage of the time assigned or allotted for all of us to discuss what is obviously a passionate, controversial, and important issue. But I rise to talk about it from, probably, a different perspective than some of the other speeches—at least those I have heard. I want to talk prospectively, about what happens after this debate is over.

If all the predictions come true, at the end of the day we will not debate stem cells for the rest of this year because the agreement to bring it to the floor was that we come to the floor, we debate these three bills, and the debate would be over for the year.

The debate will not be over. In fact, if anything, this is probably the beginning of a long debate as we deal with the ethics and the morality and the hope and the promise of science as it relates to stem cells—in particular, embryonic stem cells.

When the President issued his order in August of 2001, I supported it because it invested in embryonic stem cell research and it clearly drew the line in terms of how far we would go. I have been supportive of the President's policies on embryonic stem cell research since.

When H.R. 810 passed, I began to do what I think all of us should do. I began to get educated as best I could on this controversial and important issue. Dr. Michael Johns at Emory University helped me. Dr. Steven Stice, at the University of Georgia, helped me. I sat through more than a few demonstrations—not sales presentations but demonstrations of programs and efforts in embryonic stem cell research underway, under NIH guidelines, and were moving forward.

I learned a lot. I learned this promise of embryonic stem cells was uncovered or identified in 1998. Research has been done for 8 years. They hold great promise. Adult stem cells have been around longer and have demonstrated promise beyond what embryonic has today, but

that is because of the time and the amount of money that has been invested.

But I learned one thing. I am not smart enough to know what the end result of all this research will be, but I am smart enough to know that our country must continue to be a player in the research. Everywhere NIH is involved, you have standards, you have ethics, you have procedures, and you have protocols. It is very important that all those exist in such a delicate and important type of human life. We must be respectful of human life.

The proposal in H.R. 810 that is of concern is that it involves the destruction of an embryo that, if implanted, could become a human being. That is a legitimate concern for us as a country to have.

When Senator FRIST began fielding inquiries with regard to this issue, months ago, after H.R. 810 passed the House, I engaged myself as I was in this learning process in hopes of finding a prospect where we could match the standards of ethics we all want and also invest in the hope for the future. I believed that there was a way—in fact, there is a way—that we could invest in embryonic stem cell research without involving the destruction of an embryo that could be transferable to the womb and become a fetus.

For a second, I wish to discuss that on the floor simply, if nothing else, to point out that there are many opportunities of hope out there that meet both the ethical and the moral as well as the scientific desire that I think a consensus of this body has.

Dr. Steven Stice is a noted researcher at the University of Georgia. I had the privilege of meeting him last year. I have three times been to his clinic at the university. Dr. Steven Stice is a man who understands the concern over the ethics of the destruction of a viable embryo. So in the development of embryonic lines BG01, 2, and 3, which were developed prior to August of 2001 and are in operation at the University of Georgia today, those stem cell lines were derived from the byproducts of in vitro fertilization that could not be implanted and could not be frozen.

My point to you, the Presiding Officer, and the ladies and gentlemen of the Senate, is this: There are three lines that exist today that were derived from the byproducts of in vitro fertilization that could not be implanted in the womb and become a fetus or be frozen for subsequent implantation. Under the Gardner et al. principles in the grading of material in in vitro fertilization, there is a clear line of that which is viable, that which can be frozen, and that which cannot. It doesn't involve the discarding of anything that can be viable, but it does lend hope that from sources other than the viable embryos, stem cells can be derived.

I respect human life and I want us, as a nation, to always be respectful and never disrespectful of it and its potential. I also respect the wonder of science in innovation and the great discoveries that it has brought. I stand here today believing that you can do both and that as we move forward, beyond this debate, beyond a veto if it takes place—whatever the fire and substance is—we should start tomorrow looking at these other alternatives. Just in the 18 months since this issue began to bubble up in the Senate, there have been breakthroughs, such as single cell extraction from embryos without the destruction of the embryo—something that holds great promise for those cells to actually replicate themselves into stem cells.

We can do it. It is important that we stay on course to do it. But it is important that we not break the ethical principles to which we are committed and always be respectful of life.

In the course of the negotiations with the leader—and I want to inject something here with regard to Majority Leader FRIST. I don't know anybody who has ever been dealt a tougher hand in terms of coming to a resolution of these issues. I thank him for the amount of input he let me have. Unfortunately, I was unsuccessful in being a part of the final debate, in terms of what I just described, in terms of the stem cell lines they are operating on at the University of Georgia, but I think under the circumstances he did the best he could.

Sincerely I stand here as a Member of the Senate with 4 years remaining in my term, knowing that we will revisit this issue time and again. As science changes and moves forward, there will be ways we can embrace, ethically and rightfully, research that holds hope and promise for those who suffer and those who are afflicted.

My last comment is this. I was a real estate broker in my private life, before I came to Congress. I am not a doctor and I am not a scientist. I have heard some declaratory statements on the floor about what research will and will not prove in the future. I didn't just fall off a turnip truck. You do research to determine what you are going to find out, not just to predict what it will or will not do.

As we go through this difficult, tenuous debate over a subject of immense importance to the American people, let's look for ways that we can be respectful of human life and open the doors for the furtherance of development in science in embryonic stem cells. I submit there are ways to do both, and I will be here to work with the leader, with my colleagues, and with our President to unlock those doors so that promise and hope exists and we never breach the ethical divide that caused the debate today.

I yield the remainder of my time and suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. BROWNBACK. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BROWNBACK. Mr. President, I see the next speaker is here, and I yield the floor.

The PRESIDING OFFICER. The Senator from Maine is recognized.

Ms. SNOWE. Mr. President, I rise today to speak to an issue of tremendous significance to countless Americans and to generations to come—the matter of stem cell research. I thank the majority leader for his tireless efforts to ensure consideration of stem cell legislation. The bottom line is, there is research we could be conducting today that could help us treat—and in some cases cure—some of our most serious diseases. That is why two-thirds of Americans favor embryonic stem cell research and why I have cosponsored H.R. 810, the Stem Cell Research Enhancement Act.

The promise of stem cell legislation lies in the simple fact that embryonic stem cells have the unique potential to develop into any of the cells which could be needed to treat the multitude of diseases from which Americans suffer. The vast potential of stem cell therapy is key to many future therapy because in so many diseases, cells are lost and their function is often irreplaceable. Stem cells offer an opportunity to actually replace cells which are lost.

Consider today that 20 million Americans live with diabetes. Despite treatment with drugs and insulin, many experience vision loss, injury to extremities, heart disease and other complications. For years, scientists have sought to find a cure. And today stem cells offer that potential to end dependence on insulin, freeing millions from diabetes.

In many diseases, there simply is not even a therapy to replace the function of lost cells. Brain disorders such as Parkinson's disease, ALS or "Lou Gehrig's disease," and Alzheimer's disease have only limited treatment options available. We simply cannot replace the function which is lost. But with new therapies derived from stem cells, we could see major breakthroughs in avoiding the terrible toll that millions now experience.

Today the Senate is considering three bills. The first of these, the Fetus Farming Prohibition Act, certainly addresses an issue about which I expect there is no disagreement in the Senate. No embryo should ever be conceived for the purpose of producing stem cells. That is not at issue. Nor does any reputable scientist desire to work with human tissue produced in an animal.

These prohibitions are not controversial and I believe my colleagues will join me in supporting them.

In fact, 1 year ago this week, I joined with Senators FEINSTEIN, SPECTER, HATCH, and others to introduce the Human Cloning Ban Act to make indisputably clear another prohibition—that no human would be cloned. Nor is stem cell research about conducting research on embryos.

I do share with the majority leader the concern that we address the highest levels of ethical standards, and I have great confidence that with the Federal Government playing a role in this research, we can bring such standards to bear.

This is essential—that the Federal Government be constructively engaged.

The second piece of legislation concerns stem cell research already supported by the Federal Government. My colleague, Senator SANTORUM, has introduced legislation—the Alternative Pluripotent Stem Cell Therapies Enhancement Act, S. 2754—to promote the use of "alternative stem cells." These are typically "adult stem cells." These cells are already partly specialized, and have the potential to develop into several kinds of cells. Yet they are not the same as embryonic stem cells, which can develop into potentially any kind of tissue. So their use is limited. Cord blood stem cells are an example of this type of cell, and they have certainly proven useful in treating some diseases.

I must note that no obstacles currently exist to the kind of research the Santorum bill addresses. Clearly, adult stem cells have potential, and certainly research on them should continue to be pursued. Yet by passing this bill we do not open any new avenues to our scientists. In fact, we can make them take a detour. This is why.

We know that in order to use embryonic stem cells to make cells which can be used to treat a disease—like diabetes—scientists must learn how to make the cell become the right type.

But an adult stem cell is actually already somewhat specialized, so one could not use them to produce many of the types of cells we need to produce new therapies. Essentially, one would have to take such a stem cell and reverse its development back to an embryonic stage and then begin the task to develop it into the specialized cell required. It is as if you were driving down an interstate on a trip, took an exit, made a few turns, and then decided to back up in reverse all the way to the interstate in an attempt to try another destination. This is not the way to get where you are going.

So while adult stem cells have promise—they certainly are not comparable to an embryonic cell—with its potential to become any type of cell in the body. And even if you could turn an adult stem cell into an embryonic stem

cell—you have simply doubled the obstacles and work required to reach your destination—which is a cure. That means millions of lives lost as you pursue a convoluted course. . . .when embryonic stem cells provide a far more direct path to creating cures.

That is why I am a sponsor of the Stem Cell Research Enhancement Act—H.R. 810—the third bill on which we will vote. Remember that we shared hope for progress back in August of 2001 when the President declared research could utilize the stem cell lines then in existence. Yet scientists have found that many of the cells were contaminated or otherwise unusable. In part we know that even when a stem cell line is created, it cannot reproduce indefinitely. So we must address how we may obtain additional cell lines for medical research.

I thank Senators SPECTER and HARKIN, and Representatives CASTLE and DEGETTE for joining together to work to address the fundamental question of federal participation in embryonic stem cell research. The legislation which they produced sets a very constrained set of circumstances under which embryonic stems cells may be obtained in order to assure we can move this vital research forward within an ethical framework. Never will an embryo be created for research purposes, nor does this legislation facilitate such studies. The act assures that an embryo may be used only when it would not ever be used for infertility treatment. Donation must be voluntary, under full informed consent and no financial or other inducement may be given.

The fact is that fertility treatment has allowed many to have families whom otherwise could not. A consequence of this remarkable therapy is that some embryos are created which will not be used. I must note that under the Stem Cell Research Enhancement Act, it will be the couple who will—under no bias—decide whether they will be used. This legislation facilitates that donation.

Today Americans who have faced fertility problems are facing the question of what to do with unused embryos. Indefinite storage is not truly an option—we know that we cannot maintain the viability of these embryos indefinitely. So given the choices available, some couples see the potential to help those suffering from serious disease. It assures that this gift can be given and used to help medical progress.

I believe many Americans who have undergone fertility treatment and realized a gift of life in their families will opt to save lives through a donation which promises to save many lives. But it must always be individual conscience that is the determinative factor—and I respect the views and conscience of each and every individual on this matter.

There can be no doubt that stem cell research will move forward. The real question is whether our Nation will be engaged . . . whether our scientists will realize the breakthroughs . . . whether we will produce the treatments. Or whether those developments will draw our best minds and new medical investment abroad, where American vision and oversight will not influence the future of medicine.

I believe in stem cell research. More than 70 percent of the American people believe in stem cell research. I believe in it because I cannot look at a person suffering from a debilitating, and even fatal disease and support prohibitions which impede ethical research aimed at alleviating of that suffering. That is why I joined with my colleagues in the Senate in urging President Bush to ease the current restrictions on the use of stem cells so that research can move forward and lives could be saved. That is why I am a sponsor of the Senate version of this legislation introduced by Senators SPECTER and HARKIN. It is why I urge my colleagues to give that bill their support. This is the bill which will make a difference. I urge the President to reconsider this issue, and urge his support. Hopefully he will not veto this legislation because ultimately the alternative is to accept the status quo. The status quo is not right for those suffering from these diseases and for future generations who will.

I think back to President Reagan's passing 2 years ago, and remember the outpouring of concern we all had for our former President, and the First Lady and their entire family. We spoke much of the tragedy of Alzheimer's Disease and how we must do more to alleviate the suffering. Nancy Reagan inspired us all with her courage—and inspires us no less in her call for research which could alleviate the suffering from so many diseases. Her recent words call out to us, "A lot of time is being wasted . . . A lot of people who could be helped are not being helped."

I cannot think of a more significant living memorial to our former President than to allow more research to be done in order to find new cures for diseases affecting millions of people.

Today I ask my colleagues to consider allowing individuals—who have through modern medical science, enjoyed a gift of life, to contribute to saving other lives. That is exactly what H.R. 810 does, and that is why we must send this bill to the President and he must sign it.

The PRESIDING OFFICER. The Senator from Kansas is recognized.

Mr. BROWNBACK. Mr. President, how much time remains on our side?

The PRESIDING OFFICER. There is 8 minutes 30 seconds.

Mr. BROWNBACK. Thank you very much.

I want to point out in a little different format to my colleagues that

when we talk about direct areas of being able to get treatments—we covered this some today—this is a little bit of a different presentation and a little more directly related to where we are getting treatments in this field, which is in the adult stem cell field. Here are some of the various areas where we get direct treatments.

The area of embryonic research, while interesting and intriguing, is not producing any results. It is not producing any cures. We are getting direct results from the adult, and we are not getting the formation of tumors in the adults. This area is working.

I also point out this is at no cost. People say these are embryos and we are throwing them away. You look at that. And I had this morning in my office and at a press conference three snowflake babies. These are all babies who were in in vitro fertilization clinics, were not going to be implanted by the natural parents, were given up for adoption. They are here now, and they are beautiful and they are wonderful. They are absolutely precious.

This isn't some sort of throwaway commodity. I point out to people that if you are one of those individuals who have frozen embryos—the number I hear is that 1 in 10 people in the United States suffer from infertility problems. There are a lot of people who would want to and do want to implant these frozen embryos and give them the nurturing they need to become humans we would all recognize. I hope people will look at that.

My other point is on President Reagan, who certainly was an inspiration for me to get into public office, and had a beautiful winsomeness about his presentation of truth. He was a fabulous individual. President Reagan was pro life. President Reagan did not and would not agree with the destruction of young human life. In fact, he said at one point in time, if there is a doubt about whether it is a life, if somebody was dying and there was a doubt about whether they are dead, you wouldn't put them in a casket and bury them. You would give them the benefit of the doubt. You would say, Well, let us work to bring them back.

The same on the young end—if there is a question, you err on the side of life. You treat this as life. There is a kind of common sense about it.

President Reagan was pro life. He fought for pro-life issues. He would not want to see us destroy one human life for the benefit of another.

A final point in this area: President Reagan suffered Alzheimer's disease. Alzheimer's is, as I understand it being explained to me, a plaque disease on the brain material. It is highly unlikely it is going to be treated with stem cells. Parkinson's is an area where we have adult stem cell treatment—a different type of disease. But the disease President Reagan fell to

was Alzheimer's. It is highly unlikely that any stem cell, even adult or cord blood, and even more unlikely embryonic or cloning, would deal with the area of Alzheimer's.

The only reason I mention that is I think we need to try to be very accurate in our debate in saying what is a good possibility and hope and what is not. That one would be unlikely. Parkinson's we have a good shot at in the adult stem cell, and we have some early treatments already showing some promise in that particular field. But I don't think it is wise that we bring that up in that particular instance in the case of Alzheimer's. I think it is important that we be very clear about what this is and what will work and what will not.

The other thing I want to make mention of when we are talking about cures for things in this field is let us talk about areas where we have real scientific prospects of getting this done in the adult field. In the embryonic, as we have said for some period of time, it is unlikely to produce any sort of direct benefit to patients any time in the near future. That is according to scientists who are pro embryonic stem cell research. We can do more research in this field. There is some understanding from the presentation of the Senator from Georgia talking about other areas to derive embryonic type of stem cells. That is something we can do. The scientific community is producing more and more results in that particular area which I think are quite helpful and quite promising for us. It removes the ethical dilemma on this. It would be deriving embryonic type stem cells but without destroying embryos.

We are coming up with this along with the stem cell line. People are coming up with this in other fields. There is no reason to go into the ethical area—the question of destroying human life with taxpayer dollars to be able to get that done. I think it is important that we point out those particular areas in this bioethical debate.

One of the bills we will be voting on is an alternative bill. I talked about the fetal farming bill. I hope that passes 100 to zero so we can ban fetal farming. A lot has been talked about on H.R. 810, which is expansion of the stem cell lines using embryos and Federal taxpayer dollars to do that.

What has been talked about less is this area of the Santorum-Specter bill which would create embryonic type stem cells without destroying embryos. Here is a way for people, if they are troubled about the ethics of destroying a young human—I really do not want to do that, but you think there is a promising area of inquiry on these embryonic type stem cells and you are looking at this saying, Yes, it is not producing cures or results right now, but it might in a decade or two, so I

would like to see this pursued—here is an ethical alternative for you to pursue. You don't have to say, Let's destroy this young human life. You can say, Let us go with the alternative here where we are finding scientifically that we can derive these types of stem cells without the destruction of human life, embryos. If you like this field of inquiry, I raise a question about embryonic stem cells because we have invested \$5 billion in animal and human. We don't have any applications for it today, but if you are still saying we still ought to invest in this field because it might produce something, it might produce something big, you have an alternative which you can vote for in this Santorum-Specter alternative bill, and say, We want to pursue the science in this particular field. That is an area and a possibility that could work and we can and should, I think, pursue. I think it would be a good alternative for somebody who is in that type of quandary about which way to pursue this.

I will have further comments later on this evening. I don't want to take up the other side's time. I yield the floor. I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. HARKIN. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER (Mr. ISAKSON). Without objection, it is so ordered.

Mr. HARKIN. Mr. President, we are awaiting the arrival of a Senator on our side to speak on the stem cell issues. Until that happens, I will take a couple of minutes to talk about something my friend from Kansas brought up earlier today about adult stem cell treatments.

I am reading a letter from Scienceexpress, a publication of Science magazine. It is entitled, "Adult Stem Cell Treatments for Diseases?"

Opponents of research with embryonic stem (ES) cells often claim that adult stem cells provide treatments for 65 human illnesses. The apparent origin of those claims is a list created by David A. Prentice, an employee of the Family Research Council who advises U.S. Senator Sam Brownback (R-KS) and other opponents of ES cell research.

Prentice has said, "Adult stem cells have now helped patients with at least 65 different human diseases. It's real help for real patients". On 4 May, Senator Brownback stated, "I ask unanimous consent to have printed in the Record the listing of 69 different human illnesses being treated by adult and cord blood stem cells".

In fact, adult stem cell treatments fully tested in all required phases of clinical trials and approved by the U.S. Food and Drug Administration are available to treat only nine of the conditions on the Prentice list, not 65.

Again, it exposed most of these as kind of being bogus. One of those listed

was testicular cancer. Testicular cancer is not being treated with adult stem cells, at least not successfully. In fact, according to the Scienceexpress article, the study that is supposed to be the basis for that claim is actually a study on how to isolate adult stem cells.

The Senator from Kansas also has a list that included several leukemias and lymphomas. Let's hear what George Dahlman of the Leukemia and Lymphoma Society has to say about that.

On behalf of the Leukemia & Lymphoma Society, I am writing in response to assertions that adult stem cells have treated or cured several blood cancers, including several leukemias, lymphomas and multiple myeloma.

As a representative of more than 700,000 patients and their caregivers in this country that battle blood cancers on a daily basis, our organization would like to emphasize as the Senate debates H.R. 810, the Stem Cell Research and Enhancement Act, that we exist today because we have not found cures for these devastating diseases. Furthermore, the claim that treatment of blood cancers with cord blood, blood or marrow stem cells—known as hematopoietic stem cells—demonstrates the potential of 'adult stem cell' research or is a substitute for embryonic stem cell research is misleading and disingenuous.

Mr. Dahlman concludes:

The Leukemia & Lymphoma Society asks that you and your colleagues pass H.R. 810, and not accept any substitutes.

All in all, according to the science journal, only nine diseases of the 65 examined have proved to even respond to treatment with adult stem cells.

The authors of the analysis conclude that claims about stem cells being in general use for 65 diseases are false. Such claims "mislead lay people and cruelly deceive patients."

Again, we are going to hear a lot of talk about all we can do other than embryonic stem cell research. This should not be a debate about whether we do adult stem cells, cord blood, or all these other things. They are all worthy of research.

Those that are for adult stem cell research, cord blood, bone marrow research, that type of thing, all say they want to do that to the exclusion of embryonic stem cells. Those who are in support of H.R. 810 say let's do them all and do them all in an ethically acceptable manner.

Again, we have strong ethical guidelines. One, we do not create any embryos with this bill. You can only use the embryos that are already existing in IVF clinics that are left over that will be discarded. Second, we must have written informed consent of the donors. Third, no one can get paid; no money can change hands. You cannot entice someone to donate these embryos with money. We have strong ethical guidelines.

Lastly, I have heard comments today time and time again about how this

bill, H.R. 810, involves the destruction of embryos. I challenge anyone to show me where in H.R. 810 it provides for the destruction of any embryos. Under the Dickey-Wicker amendment that is now existing, no Federal funds can be used to destroy embryos. All H.R. 810 says is that once stem cells are derived through private means or whatever, then Federal funds can be used to go to universities or to other researchers to study these embryonic stem cells.

There is nothing in this bill, and I challenge anyone to show me in H.R. 810 where it provides for the destruction of any embryos; it does not. To say otherwise is being disingenuous. The Dickey-Wicker amendment still applies. No Federal money can be used for the destruction of embryos, plain and simple.

I see my colleague from Illinois is here. I yield the floor.

Mr. DURBIN. I thank the Senator from Iowa not only for yielding but also for being the leader on our side of the aisle on this issue, with Senator SPECTER on the Republican side. I am glad this day has finally come. This matter has been on the calendar for over a year.

For over a year, millions of Americans have been wondering when the Senate will take this up. Finally, it has been scheduled. A lot of people outside this Chamber had a lot to do with it being scheduled. First Lady Nancy Reagan stood up and spoke up when she saw the late President suffering from Alzheimer's. Her voice has made a difference. I salute her for that. Christopher and Dana Reeve, both gone now, in their lifetime, the dedication and energy they put on this issue made all the difference in the world.

There are three votes tomorrow. There is only one that gets to the heart of the issue. There are some that are going to address a lot of different issues from different perspectives, but there is only one that counts when it comes to stem cell research. The Stem Cell Research Enhancement Act is the only bill that expands Federal funding for embryonic stem cell research, the type that holds out so much promise.

The other two bills are well intentioned. I am not going to say anything negative about them. I will vote for them because, frankly, they make little or no difference. One of them bans practices that presently are not being used. I guess that is a good thing to do. I will vote for that bill.

The other one, by Senator SANTORUM of Pennsylvania, won't accomplish much. This was the question I asked of Dr. James Battey of the National Institutes of Health about the Santorum bill: Can you tell me whether S. 2754 authorizes research on stem cells at the NIH that currently is not permissible or legal?

He answered: No, it does not.

So it does not give new authority to NIH, and it does not expand research.

It has some motive other than medical for being offered.

William Neaves, a leading stem cell researcher, has it right:

This is not a contest between adult stem cells and embryonic stem cells. Instead, it is a contest between society and disease.

I have listened to some of the arguments in the Senate. Some of the arguments are that adult stem cell research has great potential. I believe that is true. I believe we should pursue it aggressively. However, the argument seems to be that if that is the case, then we do not have to concern ourselves with embryonic stem cell research.

I am a liberal arts lawyer and do not profess to know about medical research, but why foreclose a whole area of research with embryonic stem cells that the greatest minds in America tell us is so promising? Why wouldn't we do both, both adult stem cell research, as well as embryonic stem cell research? From that point of view, I cannot follow the logic in opposing this bill.

Former Senator John Danforth is another person who has thought about this issue. I respect him a lot. He is an ordained Episcopal minister and a longtime opponent of abortion. Like tens of millions of Americans, he comes from a family that knows the pain of disease. He lost one of his brothers to Lou Gehrig's disease. He wrote this in the *St. Louis-Post Dispatch*:

A choice between two understandings of human life. On one hand, we have millions of people who suffer from ALS, Alzheimer's, juvenile diabetes, Parkinson's, spinal cord injuries and cancer—and the loved ones who care for them and suffer by their sides. On the other hand, we have tiny bundles of unfertilized cells existing in petri dishes.

He went on to write, the people who oppose stem cell research:

should explain to the afflicted and their loved ones why they care more about those cell bundles than they do about the people.

This Stem Cell Research Enhancement Act has been supported by so many groups. I ask unanimous consent, Mr. President, to have the names of some of those groups printed in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

WHO SUPPORTS H.R. 810

The Stem Cell Research Enhancement Act is supported by more than 200 patient groups, scientists and medical research groups. They include: American Medical Association, American Association for Cancer, American Diabetes Association, Juvenile Diabetes Foundation, American Pediatric Society, March of Dimes, the ALS Association, Parkinsons Action Network, Alzheimer's Association, Parent Project Muscular Dystrophy, Kidney Cancer Association, Coalition for Pulmonary Fibrosis, and the Society for Neuroscience Research.

Mr. DURBIN. I would say that all of the big names in medical research in

America support this bill. They understand this is the real deal. This is the bill that will make a difference. The other two may not.

Among the other groups supporting the Stem Cell Research Enhancement Act are the Republican Main Street Partnership, the B'nai B'rith International, and a long list of people representing religious organizations from almost every denomination in America.

Why do we need this? We need it because President Bush decided in 2001 to take a position on medical research. I do not think there is a precedent in American history for what he did. He basically said we were going to cut off Federal funding for those who were involved in embryonic stem cell research, except for a limited number of lines. He identified 78 stem cell lines on the day of his speech and said that scientists who received any Federal funding at all could work only on those stem cell lines.

As Senator HARKIN has pointed out over and over, not only were the 78 lines reduced to 22, they are all contaminated. They cannot be used for this research anymore. So President Bush is not offering any hope when it comes to this area of research. I do not want to get into the moral argument here because it is almost religious. It is moral and theological here. But if the President could rationalize 78 stem cell lines as being appropriate and all right for research, then he has fundamentally decided the research is permissible, I suppose. I do not follow his logic. And I do not follow the logic of some who oppose it who say that because this is a product of in vitro fertilization and has the potential for life that we should not do research. We know that in that process, some of these fertilized eggs will end up being implanted in the womb of an expectant mother in the hope she becomes pregnant, and others will not be used. It is the nature of the process. They make more of these fertilized eggs than they will need in the hopes that one will work.

Then what happens to the rest? Well, they are going to be discarded. They are not used to find cures for diseases. But for those who find it immoral to use the product of that process for medical research, I still am troubled by the notion that they have not come to the floor asking that we ban in vitro fertilization, because we know that is a natural consequence of this process. And if it is permissible and moral and legal to have a process which results in these extra cells, I do not understand the moral question about using these fertilized cells to give people a chance to live and to live their lives better. I just do not understand that.

To measure the impact of President Bush's policy, Stanford University looked at peer-reviewed research published in scientific journals. They

found that embryonic stem cell research in the United States made up one-third of the papers published in 2002 but only a fourth of those published in 2004. Research is slowing down. President Bush's decision is reducing the number of opportunities for embryonic stem cell research.

The world's best and most respected scientists—our own NIH leadership—tell us that this area of scientific research could lead to treatments and cures. Dr. James Battey chairs the NIH working group on stem cells. This is what he said before the Senate Labor, HHS Subcommittee:

There's no scientist that I know who would argue that more stem cell lines wouldn't accelerate the pace of scientific research. . . . Cell lines offer scientific opportunities that are right now beyond the reach of federal funds.

Other things have changed since President Bush's decision in 2001 as well. We have learned more about the potential of stem cell research. Dr. John Kessler is the chair of the neurology department at Northwestern University Medical School in Chicago, which I am honored to represent. He is also the father of a 20-year-old daughter who is paralyzed as a result of a spinal cord injury. He told me personally that he finds the current administration policy "unconscionable" in light of everything we have learned since 2001.

H.R. 810—the real bill, the one that is important, and the one that will make the difference—would loosen the handcuffs on America's scientists. It would allow scientists to receive Federal funding to use embryonic stem cell lines in their research if—and only if—two very specific conditions are met. First, the stem cell lines must be derived from eggs that were produced for in vitro fertilization but are going to be discarded. The choice is research or destruction of these potential means of creating medical opportunities. Second, both adults to whom the eggs belong must provide written consent that the eggs be donated to science.

It is estimated 400,000 excess eggs are being stored now in clinics around the country, stored in petri dishes at 300 degrees below zero. Opponents of this research say it is unethical to use them for research. But if they are not used, they will be destroyed. How in the world can that be the right ethical, moral choice to destroy the opportunity for research to cure disease?

I see my colleague from Washington is here, and I know she wants to speak. I will close by saying this: I have met some of the children who are victims of juvenile diabetes. I guess it comes home personally when you sit down with these kids and their mothers, and the mothers say: I wake my daughter up twice in the midst of the night to take a blood test to see how she is doing. Think about that for that poor

little girl being awakened twice each night. And think about the mother and her worries that that little girl, who she loves so much, may go blind or lose a limb or die. And think about the hope they have in their hearts that this research will go forward.

I have met the victims of ALS and diabetes and Parkinson's and Alzheimer's. I know they are praying we do the right thing tomorrow. I hope we pass this bill. I am not certain it will pass, but I am hopeful it will. It will have strong support on this side of the aisle, and I hope there will be enough votes on both sides of the aisle to enact it. Then the bill will go to President Bush, and he will have a moment in the history of this country to make a momentous decision. If he decides to go forward and veto the stem cell research bill, it will be the first veto of the Bush Presidency.

President Bush described himself politically when he ran for office as a compassionate conservative. His decision on the future of this bill will be the test of his compassion. If he has compassion for those who are suffering across America, who are praying for the hope this research can bring, I hope he will pray over his decision long and hard. And if we pass this bill, I hope he will sign it and give these Americans a chance for a better tomorrow.

Mr. President, I yield the floor.

The PRESIDING OFFICER. The Senator from Washington.

Ms. CANTWELL. Mr. President, I join my colleagues on the floor to speak about H.R. 810. I applaud the Senator from Illinois for his comments because I know he has many fine research institutions in his State and has met with many people who suffer from a variety of diseases who could be helped if H.R. 810 is passed and signed by the President. So I commend him for his remarks.

I certainly thank the Senator from Iowa for being out here all afternoon talking about the importance of this legislation and trying to communicate how important it is that H.R. 810, the legislation that focuses on embryonic stem cell research, be passed and signed by the President.

I also want to say I know the Senator from Kansas has been out here, and I have enjoyed working with him on a variety of pieces of legislation, particularly legislation that dealt with international marriage brokers, trying to protect women who come to America, making sure they got full information about people who were helping them apply for visas before they come to the country. So I certainly have enjoyed working with the Senator from Kansas on other legislation.

But I wish to say I think it is important we focus our debate on H.R. 810—an important bill on embryonic stem cell research—in the context of science, because I believe Congress

must not stand in the way of science. I think tomorrow's vote is exactly what that is about. So I want to be clear that I support that legislation and will work to overturn any attempts to veto this legislation.

Like my colleagues, I have met these Americans who for too long have wanted to have hope. They have waited to have real hope that there would be a lifesaving stem cell research program. Many Americans believe we can do better. We know there are 3 million Americans who need help, and we understand that by investing today we can save lives tomorrow. We understand, for Americans who suffer from Alzheimer's or ALS or Parkinson's disease, it really does mean hope and a new way of looking at opportunity for them.

We will have a debate about this continuing today and tomorrow. But we need to keep in mind it is good science that is at question. For us in Washington State, with 35,000 Washingtonians living with Parkinson's disease today, understanding what embryonic stem cell research can do for them is of utmost importance.

We also have 300,000 Washingtonians who have been diagnosed with diabetes who, obviously, are very interested in this legislation. We have 160,000 Washington State residents who struggle with heart failure and understand there is so much that could be done in this particular area of research. We have 5,000 Washingtonians who suffer from spinal cord injuries. So there are people all over our State with various medical challenges who are looking to us to make the right decision and to allow critical research to give them promise for opportunity in the future.

At the Fred Hutchinson Cancer Research Center—I know my colleague from Iowa has visited the Fred Hutchinson Research Center—they are applying groundbreaking science and using adult stem cells to treat blood cancers such as leukemia, lymphoma, and various other diseases. They are also looking to do the same for kidney cancers.

The Benaroya Research Institute at Virginia Mason in Seattle is working with stem cells on a collaborative 5-year project to grow a living heart. The effort could lead to tissue-engineered replacement hearts, and it means that could help us with various challenges in that particular area of health care.

The University of Washington, which is in Seattle, boasts 70 scientists involved in aspects of stem cell biology addressing everything from liver disease to coronary heart disease. Three years ago, the NIH named the University of Washington one of the three exemplary centers for human embryonic stem cell research. But in the last 5 years, since President Bush banned the funding for embryonic stem cell research, it is as though our Nation has turned its back on that science and

that work that could be done, and I am sure not just in Washington State. But that is a representative example of what could be done if we moved forward.

It is important we continue to move forward by passing H.R. 810. The truth is that right now adult stem cells do not have anywhere near the scientific potential as embryonic stem cells. Their application is limited. Their reach is finite. And we do have a better option. Allowing federally funded research on embryos that would otherwise be destroyed would provide a much-needed expansion. Everything from eradicating, in our past, polio to mapping the human genome, our Nation has been a leader and an innovator in science and medicine. So let's not fall behind now. Just as we are challenged with so many of these diseases, we need to do more.

Of the original 78 stem cell lines the administration permitted scientists to work on, only 21 are available today. Lab scientists must turn to private investors and already struggling State governments to carry on this critical research. So researchers in my State, in the State of Washington, say that Federal funding would increase research opportunities and allow scientists to use that money much more effectively.

In March of 2006, the University of Washington announced that because of Federal funding restrictions, it would seek to establish a stem cell institute with private money and, instead, looks to raise \$100 million in private funds to help it move forward. The University of Washington plans to reflect the intense competition it faces from other universities around the country that are boosting their research into stem cells which have permitted them to treat a variety of diseases. So the competition will continue. But we could be working together in a much more collaborative fashion, in a way that would help us extend the scope of that research.

It is very important because so many of those involved in this particular area believe passionately we need this new area of expansion. One of those individuals, Dr. Storb of the Fred Hutchinson Cancer Research Center in Seattle, recently said this:

We have exhausted research on adult stem cells. They do not do the trick. We have worked with them for 30 years now and know that they do not make all of the tissues in the body.

He further went on to say:

If the public wants cell-based therapies, then we must conduct that kind of stem cell research. We may learn more from embryonic cells how to program adult cells, but we have to work with embryonic cells to do just that.

So this Congress, I believe, must not stand in the way of science. We have three bills we will vote on tomorrow, but only H.R. 810 actually clears the

way for critical research that could lead to cures for so many debilitating diseases.

There is no viable alternative to improving the research and serious investments that I believe H.R. 810 will provide. When we are talking to Americans who suffer from diseases such as Alzheimer's, Parkinson's, and others, I think it is important, as my colleague from Illinois stated, that we must keep in mind the stories of individuals.

Mr. President, one such individual is a 4-year-old who died of brain cancer. Her mother wrote to us saying how important this bill was in holding opportunities for other people in other families who suffer from brain cancer. To me, it is so important that we pass this legislation and help those individuals and families who are suffering by giving them hope for promising research that we know science can provide.

I yield the floor.

The PRESIDING OFFICER. The Senator from Iowa is recognized.

Mr. GRASSLEY. Mr. President, today, as everybody is doing, I want to discuss the three stem-cell-research-related bills before the Senate. I have been in the Senate for 26 years now. Every day, we make decisions that impact Americans. It becomes difficult, however, when we debate bills that involve the lives of women and families, especially those who are sick and dying. We must be cognizant of their plights, but we cannot forget about those who don't have a voice.

Tomorrow, I will vote in favor of those who are not yet brought into this world. I will vote for those who don't have a chance to speak against legislation that doesn't give them a chance at life.

First, I intend to support S. 3504, the ban on fetus farming. This bill states that a person cannot solicit or knowingly acquire, receive, or accept a donation of fetal tissue or an embryo if the pregnancy was initiated to provide such material. This bill will reduce the likelihood that women will be used solely for their production of embryos. We have to draw the line, and we have to prevent the corruption that could occur.

Second, I intend to support a bill numbered S. 2754, which directs the National Institutes of Health to fund alternative techniques for stem cell research. It will allow researchers to use different techniques to derive pluripotent stem cells without destroying human life. This research could be done under current law, but a vote in support of this bill will send a signal to the NIH that we want to see even more of this research.

Finally, I will oppose H.R. 810 because it would expand Federal funding for embryonic stem cell research.

Some of my colleagues will characterize the bill, H.R. 810, as a lifesaving opportunity for many people with dis-

eases. The focus will be on promises, hopes, and dreams. This focus disregards that this bill will allow researchers to use and abuse embryos. And there are enormous moral and ethical consequences associated with that research.

You cannot mess with the facts. An embryo is life. No Senator can disagree with that assertion. Once you realize that fact—that an embryo is life—you have to realize that this bill takes life and plays with it.

In addition, this bill doesn't prohibit cloning. In fact, it will make cloning even more attractive. Why would we want to go down this road of unethical research when we have a method that already works?

We all know that adult stem cell research has proven effective. We are investing the taxpayers' money in research that benefits the American people. We in Congress have to realize that there is a difference between hope and hype. I, for one, will not be misled.

Adult stem cells have already proven effective for over 72 treatments. I will not list them all, but some of them relate to adult stem cells being used to treat brain tumors, multiple sclerosis, arthritis, and Parkinson's disease. Peripheral blood stem cells have treated testicular cancer, lymphoma, and breast cancer. Cord blood stem cells have treated leukemia. Olfactory stem cells from the nose can develop into heart cells, liver cells, kidney cells, muscle cells, brain cells, and nerve cells. Bone marrow stem cells and stem cells from fat have the ability to differentiate and form other body tissues.

I wish I could list the advances with embryonic stem cell research, but I cannot; there are none. There are no treatments for human patients. So there is no evidence on which to argue that this research should be expanded with public resources.

I have a story about a person that I have known for 44 years, David Foege. I have known him since he was a page at the Iowa State Legislature back in 1962. He is originally from Waverly, IA, so even though he lives in Florida, I still consider him a constituent. There is evidence, then, through Dave Foege that we should continue supporting adult stem cell research.

Just 2 weeks ago, I had an opportunity to meet with David, who is now 61 years old and living in Florida. This is the story he told to me. David was given a life sentence because of heart failure. Three years ago, David was told that he had little chance of surviving. His heart was losing all function and there was little that doctors could do. David then turned to stem cell therapy. He found doctors in Bangkok that would harvest his own stem cells and then inject them back into his own heart. His own stem cells—his adult stem cells, not embryonic stem cells—cured him. His heart function

has improved by 70 percent. David is alive and well, playing golf, and currently taking a cruise in Belize. Without adult stem cell therapy, David would not be here.

Embryonic stem cell research, on the contrary, has not yielded this kind of success that we have from adult stem cells. It makes sense to direct public resources to what works. Prioritizing resources: It makes sense for public resources to help those with heart disease, the No. 1 killer in the United States. It makes sense to encourage research that will work for those with Parkinson's, diabetes, cancer, and autoimmune diseases. Why would we want to desert patients in the United States by spending dollars on research that has not been proven?

I will oppose H.R. 810 not only because of the ethical consequences but because it doesn't prioritize our use of fiscal resources.

Let's be clear. There is no current policy in place that bans embryonic stem cell research. Everybody knows that we are doing some through the Federal Government because, being perfectly legal in the United States, President Bush, in 2001, allowed taxpayer dollars to be used for that research. This debate in the Senate today and tomorrow is not whether we want to ban or allow research, it is whether we want to spend our dollars on embryo creation and destruction.

Today, the Congress appropriates nearly \$30 billion for medical research through the National Institutes of Health. Every year, hundreds of advocates come to my office to say that \$30 billion is not enough. They say these funds are important to continue research and trials that are already started. So what would happen to those arguments if there was a higher priority placed through passage of H.R. 810? Will we have to double the budget again for NIH like we did between 1998 and 2003? I don't think that is possible given that was already done starting in the year 1998. So it makes me wonder whether we are prioritizing the use of Federal research dollars through the National Institutes of Health the way we should.

We don't have an infinite amount of Federal funding. We cannot pretend there is enough money to go around. We do have to prioritize. So I urge my colleagues to realize that Congress can only disburse so many funds. We can only fix so many problems. Therefore, we need to think rationally. We need to make tough choices. One of those tough choices might be to pursue what is proven to work, which is greater use of adult stem cells. The right choice, then, is to invest in what works. Let's keep the ball rolling with research that has been proven.

Mr. President, I yield the floor.

The PRESIDING OFFICER. The Senator from Texas is recognized.

Mrs. HUTCHISON. Mr. President, I ask unanimous consent to have 5 minutes to talk as in morning business regarding the resolution that will be on the Senate floor later tonight or tomorrow regarding condemning Hezbollah.

The PRESIDING OFFICER. Is there objection? Without objection, it is so ordered. The Senator from Texas is recognized for 5 minutes.

(The remarks of Mrs. HUTCHISON are printed in today's RECORD under "Morning Business.")

Mrs. HUTCHISON. I yield the floor.

The PRESIDING OFFICER. The Senator from Ohio.

Mr. VOINOVICH. Mr. President, I rise today in support of legislation to expand the Federal investment in adult and umbilical cord blood stem cell research, as well as scientific ways to create embryonic stem cell lines without destroying human embryos.

It is important to point out that there are two very important categories of stem cells. I know that my colleagues are going to have a little difficulty with this because I have had difficulty with this. This is medical terminology.

The first, embryonic stem cells, as their name suggests, are derived from human embryos developed from eggs that have been fertilized in an in vitro fertilization clinic. Removing stem cells from these embryos destroys their potential life, making their use very controversial and something I cannot morally support.

On the other hand, adult stem cells are undifferentiated cells found among differentiated cells in tissues or organs. Adult stem cells can renew themselves and will eventually differentiate into a special cell. However, before this occurs, the undifferentiated stem cells can be gathered by scientists without any harm to the individual.

Also included in this ethical category of stem cells are those from umbilical cord blood derived from the placenta of a newborn baby. With the birth of my seventh grandchild last summer, I learned a great deal about the benefits of preserving cord blood stem cells. Once considered medical waste and discarded after birth, science has determined that cord blood has the potential to save thousands of lives.

And that is exactly why I came to the floor today, to explain these differences and to highlight the unmatched value of adult and cord blood stem cells.

By the way, when I found out about the umbilical cord blood coming from the placenta, we are now freezing that umbilical cord, and each year we will pay some money to maintain it. But that umbilical cord can be used to help my seventh grandchild or, for that matter, the whole family. It is something more people should find out about.

I am concerned that the vast majority of Americans are unaware that some of the most promising advances in medical research and treatment today are not attributed to embryonic stem cells; rather, they are the result of noncontroversial, nonlife-ending use of adult and umbilical blood cord cells.

Unfortunately, many of the individuals who support embryonic stem cell research have been kept in the dark about the advances of umbilical and adult stem cell treatments and have been oversold on embryonic stem cell research, which is still in its infancy.

While embryonic cells have never been successfully used to treat even one disease—not used to treat one disease to date—adult stem cells have been used to treat 72 diseases, such as breast cancer, multiple sclerosis, rheumatoid arthritis, sickle cell anemia, spinal cord injuries, and many others. I have read reports that adult stem cells from a young girl's own fat cells were used to repair or regenerate a 19-square-inch section of her skull. I have also learned of a Parkinson's patient who has been without the vast majority of the disease's symptoms for 6 years after being treated with his own adult stem cells.

Even more encouraging, the potential use of adult and umbilical cord therapies continues to expand. In fact, there is a real possibility that these types of stem cells will be able to yield the same results as embryonic, or what they call pluripotent stem cells, without the need to destroy human life.

The American Journal of Pathology recently reported that a group of scientists have isolated a novel population of multipotent adult stem cells from human hair follicles—think of that, human hair follicles—which, like embryonic stem cells, express neural crest and neuron stem cell markers, as well as the embryonic stem cell transcription factors.

In other words, what we are saying is that they produce the same thing we would get if we were using the embryos that so many are anxious to use.

I was introduced to the promise of adult and umbilical stem cell research by experts at the National Center of Regenerative Medicine in my hometown of Cleveland, OH. The individual institutions involved in this partnership—Case Western Reserve University, University Hospital, and the Cleveland Clinic—each bring an expertise to the center that is leading the Nation in the use of nonembryonic stem cells to regenerate new tissue and diseased organs rather than using drugs or devices to improve the function of the organ.

The National Center for Regenerative Medicine team has told me that they are interested in the rapid translation of adult and umbilical cord stem cell technology into patients that is not possible today with embryonic stem cells.

Since 1976, investigators at the center have studied nonembryonic stem cells and performed their first stem cell transplant as early as 1980. That is back in 1980. Investigators at the center are now able to cure leukemias and lymphomas with nonembryonic stem cell transplantation, as well as to fix unstable bone fractures and treat genetic disorders.

In the next several years, investigators at the center believe they will be able to address cancer, bone, heart, and neurological disorders with nonembryonic stem cell treatments. They are hopeful that the new advances will lead to treatment of degenerative arthritis, will decrease the severity of graft versus host disease after stem cell transplantation, and allow physicians to use a patient's own stem cells to repair heart damage following congestive heart failure, as well as to use their own neural stem cells to improve function after spinal cord damage. All of the things that folks are talking about because we have to have these embryonic stem cells because this is what we have to do—we are already on our way. We are making progress with adult and with umbilical cord stem cells.

The center has 10 ongoing or planned clinical trials to further explore the use of stem cell therapies to reduce the risks of chemotherapy, treat certain heart conditions, and improve umbilical stem cell treatment for leukemia. I recently had the privilege to personally hear two young Ohioans discuss the successful adult stem cell treatment received at the center for an aggressive form of leukemia and a severely broken bone that would not heal with traditional treatment.

I will never forget this young woman who was there. It was a meeting at the regenerative center. She talked about the fact that she was in this terrible motorcycle accident. She was a mountain climber, she was a skier, she was a runner. She was told by all of her doctors that she wouldn't be able to run again, that she would have to hobble around. She went to the Cleveland Clinic, to the regenerative center, and as a result of using her stem cells, they were able to repair the problem that she had in her leg.

Today she is running. I am getting goosebumps right now. I will never forget it. She started to cry. She hugged her doctor. We all started to cry. It was a miraculous thing using adult stem cells.

As a result, I support the legislation introduced by my colleagues from Pennsylvania, the Alternative Pluripotent Stem Cell Therapies Enhancement Act. The bill would require the Secretary of Health and Human Services to develop techniques for the isolation, derivation, protection or testing of stem cells not derived from a human embryo.

The bill would also require the Secretary to prioritize stem cell research

that will reap near-term clinical benefits. It is my hope that this type of progress will help eliminate the controversy surrounding embryonic stem cell research without any compromise of scientific advancement.

I have the greatest sympathy for patients and their families who continue to struggle with a wide range of painful, life-ending diseases. Further, I understand what it is like to watch a loved one suffer and the tragedy of losing a member of your family, even a young child, to a life-ending disease. I personally lost my father to diabetes and my nephew C.T. to bone cancer. I have been a witness to the devastating effects of Alzheimer's, arthritis, and many other diseases.

One can hardly take issue with these individual efforts to seek out a potential cure, but too often, I fear, proponents of embryonic stem cell research provide patients with false promises from unproven, unexplored embryonic stem cells, while ignoring the real substantial progress that has been made with adult and blood cord treatments.

I am gravely concerned about the possible implication of spending taxpayers' dollars on an issue such as embryonic stem cell research that divides Americans on moral and ethical grounds, and I believe it is my moral responsibility to direct the Federal Government's dollars toward the areas of research that have the greatest near-term potential to help the largest number of Americans.

Since I have been a Member of the Senate, we have doubled the funding for the National Institutes of Health, NIH, and greatly increased the amount of medical research the Federal Government is able to fund, including increasing the amount of money available for research on all stem cells from \$226 million in 1999 to \$568 million this year.

However, as you know, Mr. President, in recent years with the cost of the war, the need to protect our homeland, and natural disasters such as Katrina, the amount the Federal budget has available for these priorities is getting smaller and smaller. We are seeing that now with the appropriations bills in the Senate.

I meet with groups all the time, and they ask me for increases in funding for research for diseases that personally impact on their families. I am sure they visit your office, Mr. President, every couple of weeks: We want more money for NIH to take care of this, to take care of that. Just within my own family, I met recently with my former brother-in-law in support of childhood cancer, and through my son I have heard a very emotional presentation by a group of my constituents on behalf of juvenile diabetes research. Again, if everyone in the Senate had been at that meeting, I think they would have said:

Look, we have to do more, spend more money on juvenile diabetes.

There is a tremendous need to pursue treatments for these and many other diseases, but we face a reality of limited funding. That is the real world.

We have to be smart about spending our money, and in the current budget environment, I have concerns that increasing funding for research on embryonic stem cell will take away opportunities for research in areas such as adult and umbilical cord blood research, or even research for treatment of specific diseases such as cancer, juvenile diabetes, and others that have proven their usefulness.

Consequently, and in light of all the advances and results science has provided with adult and umbilical cord stem cells, I urge my colleagues to continue to direct Federal funding toward the noncontroversial areas of adult and umbilical cord blood stem cell research. I urge my colleagues to do that.

Mr. President, I yield the floor.

The PRESIDING OFFICER. The Senator from Kansas.

Mr. BROWNBAC. Mr. President, as we are waiting for my colleagues to come to the floor, I want to address some issues that have been brought forward and talked about previously.

Mr. President, I see my colleague from Iowa, and I am prepared to answer—he had raised a question about whether we had 72 different areas of treatment for adult stem cells, and so I wanted to respond.

The PRESIDING OFFICER. Unfortunately, the majority's time has expired.

Mr. BROWNBAC. Mr. President, I yield the floor.

Mr. HARKIN. Mr. President, I see the distinguished Senator from Washington is here to make her statement on this bill, and I would yield the floor to Senator MURRAY for her comments.

The PRESIDING OFFICER. The Senator from Washington is recognized.

Mrs. MURRAY. Mr. President, I thank my colleague for yielding me time tonight on this important legislation. I rise tonight to express my support for expanding stem cell research. This innovative research offers us a chance to save lives.

Families across this country are holding out hope that we will finally allow science to move forward and deliver on the promise of stem cell research. That is exactly what we should be doing. But, unfortunately, today the hands of American scientists are tied by political restrictions. I believe we can expand stem cell research while still maintaining strict ethical safeguards. That is why I will be supporting H.R. 810.

Back in 2001, President Bush imposed restrictions on promising stem cell research. Since that time, we have

learned that there aren't as many useful stem cell lines as the President suggested. The Bush administration promised us that 60 lines would be available for research. To date, only 15 are available, and it appears that all of those lines have contamination problems. The President's restrictions have held back American science and stalled promising research. It is time to correct that mistake and allow our country to make progress.

Stem cell research is about improving medicine, and it is about saving lives. For patients with Parkinson's or Alzheimer's, diabetes or multiple sclerosis, stem cell research holds promising potential to provide the tools to understand, treat, and someday cure these devastating diseases.

I understand the challenges and frustrations these diseases cause. When I was just 15 years old, my dad was diagnosed with multiple sclerosis. In a few short years, his illness became very bad, so bad that he couldn't work anymore, and for most of my life my dad was in a wheelchair. His illness had a profound impact on my entire family. My mom, who stayed home to raise seven kids, had to work to care for him and had to get a job so she could support our family. She got that job, but it was never enough to support seven kids and a husband who was in a wheelchair and with growing medical bills.

I can only imagine how different our lives would have been had there been a cure for M.S. Back then, we didn't have the tools to find a cure, but today we do, and these tools unfortunately are being blocked by an ideological policy that puts politics over science. I think we can do better than that.

My dad's challenges are similar to the struggles millions of Americans and their families face every day. They deserve a chance, and they deserve hope. That is why we can't let the current restrictions stand.

A short time ago, I received a letter from a constituent of mine who lives in Mercer Island, and he wrote:

My 17-year-old son was recently involved in an automobile accident and is now paralyzed from the upper chest down. Stem cell research looks to be our brightest hope by far. Please help give him the chance to ride a bike, go for a hike, and run with his friends again. Please, support stem cell research.

As that father points out, this is about people. It is about keeping our country on the cutting edge of science and research, and I am proud to represent a State that has a strong reputation for scientific research. But for our country to remain a leader in this promising field, our scientists and our researchers need the support of our Government. America should never take a back seat to other countries in the search for promising new cures.

Unfortunately, the President's current stem cell research policy is tying the hands of our scientists by limiting

the number of lines eligible for Federal funding. We can do better than that.

In fact, the majority of this Congress has been trying to correct the President's mistake for over a year now. H.R. 810 passed the House of Representatives 13 months ago. Since that date, my colleagues and I have been fighting to bring this issue of stem cell research to the Senate floor. We wrote letters, we pleaded on the floor, and we asked Republican leaders numerous times for even a few hours to debate and pass this bipartisan bill. Our efforts to promote research and offer hope had been denied at every turn. But now, finally, our day has come, and after more than a year of obstruction, we finally have a chance to offer hope to millions of patients and their families. On a bipartisan basis, I believe this bill will pass.

But, of course, we know that is not the whole story. Shortly after we got word that this bill would finally come to the floor, I was dismayed to see headlines announcing that Karl Rove, President Bush's chief political officer and adviser, guaranteed a veto of this important bill. In nearly 6 years in office, President Bush has never once vetoed a bill. It is pretty amazing to me that he would choose this bill—this bill which offers basic hope and opportunity to so many Americans—for his first veto. I believe the President is wrong on this issue, and I think threatening a veto is wrong.

I am here this evening to pledge my support for this bill and to call on my colleagues to support it. But next, I call on them to ask the President in no uncertain terms to stand with us in support of open opportunity, stand with us in support of medical research, stand with us and, more importantly, with millions of Americans who are waiting on a cure, in support of stem cell research.

For far too long, this administration's ideology has trumped research. Politics has been more important than science. With this bill, President Bush has a chance to change course and put people ahead of personal political ideology. I urge him to do the right thing.

For our patients, for their families, and for the future of our Nation's research leadership, it is time for the Senate to pass H.R. 810, and it is time for the President to sign it. Let's take the handcuffs off of our scientists and let them find the cures that will save lives.

Mr. President, I yield the floor.

Mr. HARKIN. Mr. President, I thank the Senator from Washington for her very eloquent statement, and I thank all of the Senators who have come over here today to speak on this important issue.

We have about 20 minutes left in this half hour. I don't have any other Senators right now, but if there are other Senators on our side who wish to take a few minutes to speak on this bill, I would be glad to yield to them.

However, I would like to take this time to sum up, if I can, what we have heard today. We have come to the end of our first day of debate on stem cell research, and I think it has been a very enlightening debate and a very good exposition of the different sides of this issue. I hope the American people who have tuned in to watch this have learned a great deal about why we need to pass H.R. 810, the Stem Cell Research Enhancement Act. As we know, that bill passed the House by a bipartisan majority over a year ago, and I think it has a strong bipartisan majority here in the Senate. Certainly the bill itself is sponsored bipartisanly. If we can pass it tomorrow—and I am confident we can and we will—H.R. 810 can go straight to the President's desk.

I would like to reiterate a few things we have heard today.

First, H.R. 810 has enormous popular support. I have here a letter that was just transmitted to me, and it is a list of different advocacy groups, health organizations, research universities, scientific societies, religious groups, and other interested institutions and associations representing millions of patients, scientists, health care providers, and advocates, writing in strong support for H.R. 810. They point out in this letter that this is the bill which holds promise for expanding medical breakthroughs. The other two bills, the Alternative Pluripotent Stem Cell Therapies Enhancement Act, S. 2754, and the Fetus Farming Prohibition Act, S. 3504, are not substitutes for a "yes" vote on H.R. 810.

This letter is signed by 590 advocacy groups. I have been on this Senate floor now 21 years. We all get letters and things that come in expressing support, but I daresay I have never seen anything as overwhelming as this: 590 different groups. Earlier this year, I submitted a list of 205 different groups.

Mr. President, I ask unanimous consent that at the conclusion of my comments on this portion, this list of 590 groups be printed in the RECORD.

The PRESIDING OFFICER. Without objection, it is so ordered.

(See exhibit 1.)

Mr. HARKIN. I thank the Presiding Officer.

Again, those are advocacy groups and scientific associations—590.

How about the American people? Three out of four Americans agree: support stem cell research. The question asked in a national poll: Do you support embryonic stem cell research? Seventy-two percent of Americans said yes. Seventy-two percent. That is pretty overwhelming.

I heard the distinguished Senator from Ohio here just a few moments ago say that one of the reasons he was opposed to the bill was because we wanted to do things that would not divide Americans. He thought this would divide Americans. Divide Americans?

Seventy-two percent are in favor of it. Over 590 different advocacy groups expressing support, and 205 other disease-related groups all in support. This doesn't divide America at all. Of course, there is always going to be somebody opposed to something around here. But I haven't seen anything that received this much overwhelming support in a long time. As a matter of fact, passing embryonic stem cell research, H.R. 810, will pull Americans together in the fight against disease. And it is bipartisan. As I said, the bill passed the House bipartisanship. The sponsors of the bill itself were three Republicans and three Democrats.

It was stated earlier today a couple of times about a letter that former First Lady Nancy Reagan had written. I thought I would have it blown up and put on a chart for people around the country to take a look at, just to show you how this has nothing to do with partisanship. It shows it is from the office of Nancy Reagan dated May 1, 2006, a letter to ORRIN HATCH, Senator ORRIN HATCH of Utah, who was one of the co-sponsors of this bill. It says:

Dear Orrin:

Thank you for your continued commitment to helping the millions of Americans who suffer from devastating and disabling diseases. Your support has given so much hope to so many.

It has been nearly a year since the United States House of Representatives first approved the stem cell legislation that would open the research so we could fully unleash its promise. For those who are waiting every day for scientific progress to help their loved ones, the wait for U.S. Senate action has been very difficult and hard to comprehend.

I understand that the U.S. Senate is now considering voting on H.R. 810, the Stem Cell Research Enhancement Act, sometime this month. Orrin, I know I can count on friends like you to help make sure this happens. There is just no more time to wait.

Sincerely, Nancy.

When you have seen a loved one suffer from Alzheimer's—I am sure as Mrs. Reagan watched the former President suffer from Alzheimer's—it motivates you to say: Whatever we can do to advance the research, to hopefully get a cure someday, that is what we should do.

For those of us who have friends who have Parkinson's disease, those of us who have seen friends and loved ones die of Lou Gehrig's disease, for those of us who have members of our family or close friends who have had spinal cord injuries, this motivates us to do everything humanly possible to expand this field of research.

My friend Christopher Reeve said, one time when we had watched a film of a rat, a white mouse or white rat, that had its spinal cord damaged so it couldn't walk and then it received embryonic stem cells and then it walked again, Christopher Reeve, former Superman said, "Oh, to be a rat."

It holds so much promise, embryonic stem cell research, to ease the suffering and the pain of so many people.

I hear today talk about we have to do adult stem cells; maybe there is not enough money.

Again, I refer to my friend from Ohio, who was here earlier who said funding for medical research is probably going down because of the war and because of Katrina and because of homeland security.

I said: Wait a minute, earlier this year this Senate voted 73 to 27, to put \$7 billion back in the budget so we wouldn't cut medical research—73 votes in the Senate. I don't know, 73 votes is pretty overwhelming. It was \$7 billion we were supposed to put back in to help medical research. I don't know to what the Senator was referring.

I have heard talk today about adult stem cells and all these other things and how we had adult stem cells do this and adult stem cells do that. Why haven't embryonic stem cells led to treatment as much as adult stem cells have? Scientists have been doing research on adult stem cells for over 30 years, and we still, after 30 years, have not extracted one stem cell line from adult cells—not one.

Now embryonic stem cells were only derived in 1998, 8 years ago, and they have only been getting Federal funding in a limited manner since 2002, under the guidelines the President set down in 2001, which limited the number of stem cell lines to then 78, which we found out later was only 21 stem cell lines.

Again, there are no arbitrary restrictions on research on adult stem cells. Scientists and private companies don't have to be skittish about doing the research. They don't have to worry that all of a sudden the Federal Government is going to ban it or limit it, so they can plan ahead and do long-term research.

Let's compare that situation with human embryonic stem cells. As I said, we didn't derive them until 1998 and the first Federal grant wasn't awarded until 2002. Even now, only a tiny fraction of the total Federal budget for human stem cell research is used for human embryonic stem cells. The vast majority still goes for adult stem cells.

Here it is. I pointed this out earlier today. Human embryonic stem cells in fiscal 2006 from NIH, \$38.3 million. Adult stem cells, \$200 million. Again, only a tiny fraction going for human embryonic stem cells. Five times as much is going for adult stem cell research. So it is no wonder, after 30 years and all this research and all this money, that more diseases are being treated today with adult stem cells.

Scientists have only been studying embryonic stem cells for 5 years, with one arm tied behind their back. That one arm being tied their back by the President's proclamation of August 9, 2001, that only stem cell lines derived before 9 p.m. that evening could receive Federal funding. Anything de-

rived after 9 p.m. could not receive Federal funding.

I have wondered ever since, why was it morally acceptable to use stem cell lines derived prior to 9 p.m. on August 9 of 2001 but morally unacceptable for funding of stem cell lines derived after 9 p.m. Can someone please tell me the ethics of that. Can someone please tell me why 9 p.m. on August 9 of 2001 is some kind of a moral dividing line? It is totally arbitrary. The President could have said stem cell lines derived at 10 p.m. or he could have said stem cell lines derived before Christmas of this year. It is the same thing. No one has taken this floor to define why August 9, at 9 p.m., is some kind of a moral dividing line.

The fact is, it doesn't really matter what I think about the potential of embryonic stem cell research. It doesn't matter a heck of a lot what other Senators may think about the potential of embryonic stem cell research. What matters is what does the great body of scientists think about the potential.

The overwhelming majority of reputable biomedical scientists also believe we should pursue embryonic stem cell research; not to the exclusion of others but that we should pursue it.

I have a letter from Dr. J. Michael Bishop who won the Nobel Prize in medicine in 1989. Here is what he says:

The vast majority of the biomedical community believes that human embryonic stem cells are likely to be the source of key discoveries relating to many debilitating diseases. In fact, some of the strongest advocates for human embryonic stem cell research are those scientists that have devoted their careers to the study of adult stem cells.

I have a letter from Dr. Alfred G. Gilman, who won the Nobel Prize in medicine in 1994.

It has become obvious, however, that the number of stem cell lines actually available under current policy is too small and is controlled by a limited monopoly, which has made it significantly more difficult and expensive for research to be conducted. These limits have hindered the important search for new understanding and treatment of devastating diseases.

I have a letter from the Director of the NIH, Dr. Elias Zerhouni.

Embryonic stem cell research holds great promise for treating, curing, and improving our understanding of disease.

The breakthroughs are coming. But they take time. They take a lot of scientists researching. This is not something you can put two people on. They need a lot of different lines. Embryonic stem cell research should be ongoing at universities all across America, at our great research institutions, and it ought to be done under the guidance and direction and ethical guidelines of NIH and the ethical guidelines that we have in this bill.

The clampdown on embryonic stem cell research before it even has a chance to start shows a total lack of understanding about how science

works, how research works. I have often said that basic research is similar to having 10 doors and they are closed. There is a high probability that behind one of the doors is the answer to your question. If you open one door, you know what the odds are of finding the right answer. If you open two doors, the odds are a little bit better. If you open five doors, the odds are 50–50.

That is what basic research is about. It has been said here a lot of the earlier research on fetal tissue came to nothing. A lot of basic research comes to nothing—in terms of an actual application. But almost all basic research adds to our body of knowledge. Maybe, from one of those basic research grants that was put on the shelf, some other scientist coming along later on might pick something from that, put two or three together and find something.

I am reminded of John Embers, a scientist—I believe he was at Harvard. I will check my facts on that, but I believe he was a doctor at Harvard many years ago. I am talking about a long time ago. I am talking about in the 1940s. He had done some interesting research, basic research on kidney cells of monkeys because they had unique properties. It was a funny research. It was on certain Rhesus monkeys and the oddity of certain kidney cells.

Dr. John Enders didn't get anything for it. He did the research, put it on the shelf, and nothing ever came of it, until a few years later another scientist, examining in another area, remembered Dr. Enders' work, went back and got it, coupled it with his, and came up with something called the Salk polio vaccine. It wasn't until over 25 years later that Dr. John Enders finally received the Nobel Prize for his research.

But I suppose someone 5 years after Dr. Enders had done his research would have said: Why did we spend money on that foolish kind of research? It didn't lead to anything. It kept some scientists employed, but it didn't lead to anything. But Dr. Salk came along, coupled that research with what he was doing and came up with the Salk polio vaccine.

That is a true story.

Again, we have to understand a lot of this is basic research. A lot of it will lead to nothing. But as more and more scientists get involved in examining embryonic stem cells and how they grow, how they multiply, how they differentiate, how they become nerve tissue, how they become brain tissue, how they become skin tissue, how they become blood tissues—as they begin to investigate that, I am sure there will be a lot of blind alleys. But I submit that everything that is done builds the body of scientific evidence that we need, the science that will eventually lead to a cure of a disease. That is the promise of embryonic stem cell research. To stop it now or to limit it doesn't make sense.

People talk about the ethics and morality. I have heard talk about we have to protect innocent life. This is an embryo; an embryo with 100 cells, 200 cells. You can take whatever view you want of that embryo. The point is that the bill we are talking about does not destroy one embryo. It only says that we can get funding for the research on those. These are embryos that are going to be discarded anyway, in in vitro fertilization clinics. They are being discarded every day.

Why don't people come out and say: Stop in vitro fertilization. Make it a crime. You don't hear anybody saying that because 50,000 babies were born last year to people who wanted to have a baby and couldn't have one and used in vitro fertilization. Once they have their children, they call up the in vitro clinic and say: I don't want the remaining embryos, just discard them. I ask you, what is the moral thing to do, just discard them or, with the written consent of the donors, use those embryonic stem cells to save lives and ease suffering and cure disease? That, to me, is the moral and the ethical choice.

I see my time is up and I yield the floor.

EXHIBIT 1

U.S. SENATE,

Washington, DC, July 14, 2006.

DEAR SENATOR: We, the undersigned patient advocacy groups, health organizations, research universities, scientific societies, religious groups and other interested institutions and associations, representing millions of patients, scientists, health care providers and advocates, write you with our strong and unified support for H.R. 810, the Stem Cell Research Enhancement Act. We urge your vote in favor of H.R. 810 when the Senate considers the measure next week.

Of the bills being considered simultaneously, only H.R. 810 will move stem cell research forward in our country. This is the bill which holds promise for expanding medical breakthroughs. The other two bills—the Alternative Pluripotent Stem Cell Therapies Enhancement Act (S. 2754) and the Petus Farming Prohibition Act (S. 3504)—are NOT substitutes for a YES vote on H.R. 810.

H.R. 810 is the pro-patient and pro-research bill. A vote in support of H.R. 810 will be considered a vote in support of more than 100 million patients in the U.S. and substantial progress for research. Please work to pass H.R. 810 immediately.

Sincerely,

The PRESIDING OFFICER. The Senator from Georgia.

Mr. CHAMBLISS. Mr. President, I rise today to speak about stem cell research. This is a very delicate and very tough issue and these are difficult decisions that we will all have to make this week.

Some scientists believe that advancement in research requires the creation and development of new embryonic stem cell lines. The truth of the matter is that there are very promising alternatives to embryonic stem cell research, such as stem cells from adult tissue like bone marrow and umbilical cord blood. These cells have repeatedly demonstrated the capability of turning into most tissue types providing the basis for advanced research to find cures for many diseases, including leukemia, Parkinson's disease, juvenile diabetes, sickle cell anemia, heart disease and spinal cord injuries. To date, we have seen promising results coming from the research that has been conducted on these types of cells. Doctors have successfully treated 69 diseases

and injuries using adult stem cells such as Lupus, arthritis, liver damage, brain tumors and various forms of cancer. It is vital that we continue to conduct important medical research and continue producing these types of results providing hope for patients and their families.

I am very thankful for the accomplishments that have been made in modern medicine, those of which many of us have already enjoyed or perhaps will in the future.

However, I see the life changing results that have come from adult stem cell research, and can't help but compare these to the lack of results we have seen from embryonic stem cell research which has not provided the concrete benefits to patients that we have seen otherwise. We should not discount the possibilities surrounding the discoveries that lie ahead within medical research, but, since we have seen results from alternative types of stem cell research, not involving embryonic stem cells, should we spend federal money on researching something that has yielded few positive results?

I have seen positive results from the research we have done in the area of adult stem cell research. In fact, an overwhelming proportion of privately funded research is going towards adult stem cell research.

This is a strong indication of what researchers think regarding the direction of future stem cell research. Adult stem cells and other similar alternatives have helped thousands of patients throughout the world, while the results of embryonic stem cell research have not helped any one patient yet.

I have seen the proven results and lives that have benefited from the research done on adult stem cells. It has been proven that the results of this research have created procedures that have assisted in saving lives, and curing illnesses. Advancements are constantly being made in science, medical research, and technology and so this issue is constantly changing. Just look at how far we have come in the last year on this issue. This debate is not going to be over after this vote, tomorrow but rather the debate is just beginning. However, at this time, I feel that the taxpayer's money should be spent in places where we yield the best results for patients, and currently this is in the area of adult stem cell research.

It is my hope, Mr. President, that we continue to see monumental steps made in medical research, stem cell and otherwise, and that we find cures to diseases such as juvenile diabetes, cancer, sickle cell anemia, and Alzheimer's disease.

I yield the floor.

The PRESIDING OFFICER. The Senator from Kansas is recognized.

Mr. BROWNBACK. Mr. President, I thank my colleague from Georgia for his comments. We are about to wrap up

the first full day of debate. We will vote tomorrow on a package of three votes. This is an important debate. This is one area that we have needed to debate for some period of time. We haven't had a real debate on a pending bioethics bill since 1998. The science has changed dramatically since 1998 and the debate at that point in time. We should benefit from this debate and from the science. All of us are interested in people such as Jacki Rabon. I have shown her picture before, but I want to make the point again because several of my colleagues have talked about people with spinal cord injuries. They talk about people with Parkinson's disease and what they wanted to do was cure that—to get something that would work for them. That is what was motivating them. I just want to help this person.

Here is a real live person; traffic accident; paraplegic from the waist down; an active athlete; excited about her future—and that all changed in a few seconds.

We all know this story too well because we have heard it and seen it in our own communities. I simply ask my colleagues: What is the most likely treatment route for her? Is it adult and cord blood stem cells or is it embryonic stem cells? We have to make choices on dollars and where you invest funds. If we take the \$.5 billion that we have invested in the embryonic stem cells in human and animals over the last 5 years and say we are going to get people such as Jacki walking again, what are we going to invest that money in? Is it going to be on embryonic or adult? She is already showing some improvement and feeling in her hip area. She is able to walk now with braces—through use of adult stem cell therapy which, unfortunately, she has had to go to Portugal to get. Researchers are here, but they cannot get into the FDA trials.

Clearly, the answer, if we want her to walk again during her lifetime, is to work and to fund adult and cord blood stem cells. That is where we are going to get the treatments. That is where it is working.

The other areas may provide some interesting science. But if we are interested in helping people such as Jacki, we have one area that works, and we have another area into which we have put \$.5 billion and it hasn't worked—and we know that.

I want to show you a picture of Dennis Turner. He has been brought up in this debate. I have had him in to testify. He is a Parkinson's patient. We want to cure Parkinson's disease. He was Parkinson's-free for 5 years because of adult stem cell therapy. It started to come back after that period of time, but he got 5 years of his life back.

If our objective is to have a treatment or cure for people such as Dennis

Turner, where are we going to put the money? Are we going to put it in embryonic stem cells, where the scientists supporting it say this will take decades to find any sort of treatment, if they ever find a treatment, or put it into the adult stem cell area where they are already showing some results?

I know if I have limited resources, I would want to put my money where it is most likely to yield. It clearly is in the adult and cord blood stem cell area.

A lot of allegations and questions have been made regarding adult stem cells and cord blood and whether they are actually showing the types of results that I have been suggesting.

I ask unanimous consent to have printed in the RECORD at the end of my statement the current list—it gets updated often—of 72 current human clinical applications using adult stem cells.

The PRESIDING OFFICER. Without objection, it is so ordered.

(See exhibit 1.)

Mr. BROWNBACK. Mr. President, next week it will may be 75, but for this week it is 72.

My point in saying highlighting this is that some have said they really question whether we are getting that many treatments. There have only been nine FDA-approved full clinical trials, full treatment areas using adult stem cells. Okay. I will take that. I do not know if that is an accurate number. But remember that FDA is the standard where you have to go through clinical trials 1 and 2 to get the application and get it tested before it is fully used.

I note that people are challenging how many areas of adult stem cell are being treated. I welcome this debate. I think we should be looking at the science and where it is going. They were saying we really question whether this many areas of adult stem cell treatments are actually happening. They produced an addendum to their challenge on it. They went through all of the 65 areas at that time. It is now 72. But when they did the review, it was 65. The Senator from Iowa was particularly challenging whether we have this many treatment areas. He pulled out one on testicular cancer and said: I don't think they are really getting it there. But this addendum is the people challenging the number of adult stem cell areas that have treatment. On testicular cancer, the researcher described a clinical evaluation showing improved long-term survival of a relapsed testicular cancer patient following the radical therapy that included a transplant of adult stem cells from bone marrow or blood. The research is actually showing that it was an improvement.

I am not saying that these are all FDA-approved areas. This is an area of research. But you actually have a researcher saying it showed improvement. This isn't the group who is chal-

lenging whether we are getting these treatments at all. They are not cures today. This is research. But the research shows a promise even in the area that they challenge.

Leukemia—this is from the same addendum. Two clinical studies, each incorporating multiple leukemia types, indicate that adult stem cell transplants from bone marrow or umbilical cord blood improved the survival of children with leukemia.

That is not FDA approved. But it is working. This, after only a short period of time that we have been working with all these different types of adult stem cells. We have known about them in bone marrow for some period of time.

Some patients with Hodgkin's lymphoma show an overall improved survival rate when transplanted with adult stem cells from blood.

The list goes on and on.

I welcome a debate about whether we are getting treatment for areas where people are showing improvement taking place with adult and cord blood because the truth of matter is we are. These are not all FDA approved. We never said that they were. The problem is we need more money to be able to get more of these FDA trials so that we can get more people treated. If we do that, there is a very promising area that is already showing results. Why not put your money there?

Let me give my colleagues a visual of this, if anybody is interested. There is a notebook of showing the accumulation of recent advances in adult stem cell research and other alternatives to cloning and embryonic stem cell research. This is a one-page summary of each of these areas where we are getting treatment. Note that I am not saying cures. I want to be very careful with my words. The treatments are promising in adult and cord blood.

Look how thick this book is. This is just one-page summaries of each of these various areas—cord blood, cartilage, brain damage, cancers. It has been very impressive.

If you do not like this example or if you are still questioning whether we are showing this much progress in adult stem cell, I invite people to go on the Internet and look at a site called ClinicalTrials.gov. This is an area where clinical trials are listed on the Internet. I didn't know about it until today. It sounded very interesting to me. It shows, as of now—I guess these numbers are actually growing with 565 such clinical trials currently active or recruiting patients using adult or cord blood stem cells to treat people.

If we want to cure people, if we want to find real treatments, if we want to see cures for people with spinal cord injuries, Parkinson's, diabetes, cancer or heart disease, the clear area to invest in is adult and cord blood. That is the clear area to go into.

Let us look on the other side of the aisle on this the embryonic stem cell work which is being pushed here today.

By the way, my colleagues have known about this for a very long time. We have known about embryonic stem cells for 25 years. We have worked and looked at these things for a long period of time.

They say this is arbitrary and it is not going to support killing embryos. What is being talked about is using taxpayer money to expand the lines of embryonic stem cell research. To get embryonic stem cells, you have to destroy an embryo.

The President set a date, August 9 at 9 p.m., when he was delivering a speech to the Nation saying, after this point in time, we are not going to fund it any further because we do not want to fund the additional destruction of human life. We will work on it on a prior date. That is why that date was picked.

Here is a clear demarcation. We will fund it prior; we have to the tune of half a billion on human and animal. It is both. After that, we will not fund it on humans because the life-and-death decision has already been made on these designs prior to August 9 but not on future ones.

Now, if we say we are going to use taxpayer money to fund any human embryonic stem cell research, people could go out today after we fund this, destroy human embryos, develop the lines, and have Federal taxpayer dollars. I again point out to my colleagues, there are no prohibitions in the United States today against any embryonic stem cell research. You can do it anywhere you want. We do have a limitation on the Federal taxpayer dollars, on where they can go in the future destruction of human life.

Now, with this half a billion that we have invested over the last 5 years, how many human treatments do we have from embryonic stem cells? I have a notebook that shows the number of human treatments. I will show this notebook again. This is adult and cord blood. Here are human treatments on embryonic stem cell research. We do not have the research. It is not there. They do not exist.

It is interesting research. It has proven very problematic to get to people.

A number of my colleagues have been pushing this bill for some period of time, and I do not question or challenge what they were doing. I think they want to find cures. But the problem is we have not found treatments in the embryonic field.

They were saying in the year 1999 one of my colleague's medical experts testified that it may well be within 5 years of a cure for Parkinson's disease, Alzheimer's, and a long list of other human ailments. Stem cell research has enormous potential.

That is true. But it is adult cord blood stem cell research that is working. It is not embryonic. The embryonic has not produced the treatments.

That was 1999. We are 7 years later, and it has not produced a peer-reviewed treatment.

We have scientists who testified at a hearing in 1998. Mr. President, I refer my colleagues to www.access.gpo.gov/congress/senate for that testimony.

Mr. President, when Dr. Gearhart was asked how long will it be before we get these cures to Parkinson's, Alzheimer's, or cancer, he responded:

I actually think within several years, to be honest with you . . .

That was 1998. Eight years later, here we are. Dr. Gearhart—one of the leading researchers in this field.

Then Dr. Thompson, one of the leading researchers on Parkinson's:

I am going to say 5 to 10 years more. It will be one of the first ones.

We do have a treatment being developed. And it is adult stem cells for Parkinson's. We do not need to make this life-and-death decision and expand taxpayer funding for the embryonic lines.

My point is, in 1998 the leading researchers were saying we will have these cures in a few years, 5 to 10 years, and now researchers are saying it is decades, if even in their lifetime, that it will happen.

I conclude with this point. If this were all in the abstract and we were saying that we will spend another half a billion in this area, go ahead and do that, you could say: Well, all right, we spend a lot of money around here, we will do that. The problem with it is: how many millions of dollars will be spent on research, which is based on destroying human embryos that become human people? This is the beginnings of human life. That is the real ethical rub on top of the financial rub of whether this is the right place to invest.

I have cited the snowflake child, Hannah previously. Was she just a clump of stem cells? Early life can be very fragile.

This is Isaiah Royal, born to one of my staff members. Isaiah Royal was born at 24 weeks of age, very early. He is a fighter. But I don't think you can possibly say he is not human life. He is just 23 weeks after the embryonic stage that we are talking about, 23 weeks and a couple of days after that. Would you deny that he is human life? You would say no, of course not. Isaiah is struggling. He weighed 1 pound 14 ounces at birth. He is a good, tough, fighter. But we are talking about fragile human life, and it should be treated as sacred. We should not do research on it. Human life is important.

This is an important question. I urge my colleagues to vote against H.R. 810.

EXHIBIT I

72 CURRENT HUMAN CLINICAL APPLICATIONS USING ADULT STEM CELLS

ANEMIAS & OTHER BLOOD CONDITIONS

Sickle cell anemia.
Sideroblastic anemia.

Aplastic anemia.
Red cell aplasia (failure of red blood cell development).

Amegakaryocytic thrombocytopenia.
Thalassemia (genetic [inherited] disorders all of which involve underproduction of hemoglobin).

Primary amyloidosis (A disorder of plasma cells).

Diamond blackfan anemia.
Fanconi's anemia.
Chronic Epstein-Barr infection (similar to Mono).

AUTO-IMMUNE DISEASES

Systemic lupus (auto-immune condition that can affect skin, heart, lungs, kidneys, joints, and nervous system).

Sjogren's syndrome (autoimmune disease w/symptoms similar to arthritis).

Myasthenia (An autoimmune neuromuscular disorder).

Autoimmune cytopenia.
Scleromyxedema (skin condition).
Scleroderma (skin disorder).
Crohn's disease (chronic inflammatory disease of the intestines).

Behcet's disease.
Rheumatoid arthritis.
Juvenile arthritis.
Multiple sclerosis.
Polychondritis (chronic disorder of the cartilage).

Systemic vasculitis (inflammation of the blood vessels).

Alopecia universalis.
Buerger's disease (limb vessel constriction, inflammation).

BLADDER DISEASE

End-stage bladder disease.

CANCERS

Brain tumors—medulloblastoma and glioma.

Retinoblastoma (cancer).
Ovarian cancer.
Skin cancer: Merkel cell carcinoma.
Testicular cancer.
Lymphoma.
Non-Hodgkin's lymphoma.
Hodgkin's lymphoma.
Acute lymphoblastic leukemia.
Acute myelogenous leukemia.
Chronic myelogenous leukemia.
Chronic myelomonocytic leukemia.
Juvenile myelomonocytic leukemia.
Cancer of the lymph nodes: Angioimmunoblastic lymphadenopathy.

Multiple myeloma (cancer affecting white blood cells of the immune system).

Myelodysplasia (bone marrow disorder).
Breast cancer.

Neuroblastoma (childhood cancer of the nervous system).
Renal cell carcinoma (cancer of the kidney).

Soft tissue sarcoma (malignant tumor that begins in the muscle, fat, fibrous tissue, blood vessels).

Ewing's sarcoma.
Various solid tumors.
Waldenström's macroglobulinemia (type of lymphoma).

Hemophagocytic lymphohistiocytosis.
POEMS syndrome (osteosclerotic myeloma).

Myelofibrosis.

CARDIOVASCULAR

Acute Heart damage.
Chronic coronary artery disease.

IMMUNODEFICIENCIES

Severe combined immunodeficiency syndrome.
X-linked lymphoproliferative syndrome.

X-linked hyper immunoglobulin M syndrome.

LIVER DISEASE

Chronic liver failure.
Liver cirrhosis.

NEURAL DEGENERATIVE DISEASES & INJURIES

Parkinson's disease.
Spinal cord injury.
Stroke damage.

OCULAR

Corneal regeneration.

WOUNDS & INJURIES

Limb gangrene.
Surface wound healing.
Jawbone replacement.
Skull bone repair.

OTHER METABOLIC DISORDERS

Hurler's syndrome (hereditary genetic disorder).
Osteogenesis imperfecta (bone/cartilage disorder).
Krabbe Leukodystrophy (hereditary genetic disorder).
Osteopetrosis (genetic bone disorder).
Cerebral X-linked adrenoleukodystrophy.

Mr. BROWNBACK. I yield to my colleague from Virginia who is here to speak on some important topics.

The PRESIDING OFFICER. The Senator from Virginia.

Mr. WARNER. Mr. President, I thank my distinguished colleague. We have another distinguished colleague here. It is my understanding that at 8 o'clock, the time of the distinguished Senator from Kansas now shifts to the other side of the aisle, but my colleague said he only wants 3 or 4 minutes.

Mr. BROWNBACK. I have other things I can cover. I understand the distinguished Senator from Virginia wanted to come over and speak on a very pressing matter of foreign policy. That is why I yielded the time to my colleague.

Mr. WARNER. I will try to compress my time in 10 minutes.

Mr. BROWNBACK. Good.

If I could, what does the Senator from Iowa desire?

Mr. HARKIN. If the Senator would yield, I understand the Senator from Virginia wanted 10 minutes. I said I didn't intend to speak for half an hour; I just wanted to speak for about 5 minutes at 8 o'clock and yield back the remainder of my time and he could speak as long as he wanted to at that time. It is only 15 minutes from now. I thought the Senator from Kansas was probably going to use up most of the time.

Mr. BROWNBACK. I was. But I understood that my colleague wanted to speak on this particular issue. If the Senator wants to summarize and my colleague from Virginia wants to wait, I was offering him that courtesy because he had discussed coming over here early to do that.

Mr. WARNER. I am here to accommodate all.

Would the Senator like to finish his remarks?

Mr. HARKIN. I say to the Senator from Virginia, go ahead and take your time. I will speak later. That is fine.

(The remarks of Mr. WARNER are printed in today's RECORD under "Morning Business.")

Ms. COLLINS. Mr. President, as a long-time supporter of stem cell research, I want to commend the majority leader for working out an agreement that will give the Senate the opportunity to act on this critically important issue.

I am particularly pleased that the Senate will finally have the opportunity to vote on the Stem Cell Research Enhancement Act. I am proud to be a cosponsor of this bipartisan bill which will expand the number of stem cell lines that are eligible for federally funded research, enabling scientists to take full advantage of the scientific and medical opportunities provided by stem cells. At the same time, it establishes standards and creates a framework to ensure that this research is conducted ethically.

The promise of embryonic Stem cell lines lies with their potential to develop into virtually any cell, tissue, or organ in the body. As a consequence, this research holds considerable potential to treat and even cure a vast array of diseases and conditions. Researchers could, for example, potentially generate insulin-producing islet cells for patients with juvenile diabetes; neurons to treat Parkinson's disease, ALS, and Alzheimer's disease; as well as bone marrow cells to treat cancer. It is estimated that more than 100 million Americans are currently afflicted by diseases or disabilities that have the potential to be treated through this research.

On August 9, 2001, President Bush announced that Federal funds could, for the first time, be used to support research on embryonic stem cells. This research, however, was limited to existing embryonic stem cell lines created prior to 9 p.m. on that day.

In the 4 years since the President made that announcement, this stem cell policy has fallen far short of its original goals. While the Human Embryonic Stem Cell Registry at the NIH lists 78 stem cell lines, at best, no more than 212 lines will ever be available for research under the current policy.

Moreover, as Dr. John Gearhart of Johns Hopkins University told the Special Committee on Aging last year, existing lines are "contaminated with animal cells, lack genetic diversity, are not disease-specific and are not adequate for researchers to apply to a wide variety of diseases." Limiting researchers to these lines therefore places huge and unnecessary roadblocks in the way of possible treatments and cures for devastating diseases like Alzheimer's disease, ALS, cancer and diabetes.

We have learned a lot about stem cells since 2001. For example, scientists have now created methods for growing stem cell lines that are free of animal

cells, greatly improving their potential for treating and curing disease. They have also created "disease specific" stem cell lines. Under the current policy, however, these "new and improved" stem cell lines are not available to federally funded researchers in the United States.

It is therefore time for us to update our stem cell policy to reflect what we have learned so that we can accelerate this important research, which hold such promise for millions of Americans and their families.

The Stem Cell Research Enhancement Act lifts the current restriction so that stem cell lines are eligible for federally funded research regardless of the date on which they were created. Federal funding, however, would continue to be restricted to stem cells derived from embryos originally created for fertility treatments that are in excess of the clinical need and that otherwise would be discarded.

The legislation also requires the informed consent of the donors and prohibits any financial inducement to donate. Finally, the bill calls on the National Institutes of Health to develop strict guidelines to ensure that researchers adhere to clear ethical and moral standards.

As the founder and co-chair of the Senate Diabetes Caucus, I am particularly excited about the promise that stem cell research holds for a cure for diabetes. Early research has shown that stem cells have the potential to develop into insulin-producing cells to replace those that have been destroyed in people with type I diabetes.

Last year, I chaired a hearing in conjunction with the Juvenile Diabetes Research Foundation's Children's Congress to examine the devastating impact that juvenile diabetes has had on American children and their families. We heard heartbreaking testimony from children who had traveled to Washington to tell Congress what it is like to have diabetes, just how serious it is, and how important it is that we fund the research necessary to find a cure.

Steffi Rothweiler from Falmouth, ME, told the committee that she actually couldn't remember having a normal life without nights and weekends, and every hour of every day to take care of diabetes. She told us about her parents, who have given up their nights and weekends, and every hour of every day to take care of her and make sure that she stays in tight control of her blood sugar levels so that she can stay as healthy as possible. Steffi asked that we do all that we can to find a cure for diabetes as quickly as possible. We simply cannot ignore the potential that embryonic stem cell research holds for wonderful young people like Steffi.

I am sensitive to the ethical concerns raised by opponents of this research.

That is why I have cosponsored the legislation introduced by Senators SANTORUM and SPECTER to encourage the development of alternative methods for deriving stem cells without using embryos.

The fact is, however, that the embryos that will be used for this research would otherwise be discarded. In my view, the ethical choice is to use them for research that may benefit millions of Americans rather than discard them as medical waste.

Moreover, what is often ignored in this debate is that embryonic stem cell research is occurring in the private sector, where it is outside the purview of the NIH. It therefore lacks the scientific and ethical oversight that routinely occurs with federally funded research. Dr. Allen Spiegel, who was then the Director of the National Institute of Diabetes and Digestive and Kidney Diseases, testified at our Children's Congress hearing last year. He told the committee that, while NIH routinely works very closely with the private sector, in the area of stem cell research, "there is a wall." By expanding our current stem cell policy, we are tearing down that wall, allowing more research but with clear ethical standards.

Opponents of embryonic stem cell research contend that adult stem cells derived from tissue, such as bone marrow, are a sufficient replacement for embryonic stem cells in forwarding this important research. I believe that we need both. But, as Dr. Spiegel told our committee, with regard to diabetes research:

We need to do embryonic stem cell first because it can give us a better understanding of what causes Type I diabetes . . . because it will actually inform our ability to work with adult stem cells . . . and finally, because, and one cannot guarantee or promise this, the embryonic stem cells themselves, if successfully turned into insulin-secreting beta cells, could be the source of cell therapy.

Mr. President, I believe that it would be tragic not to take advantage of this opportunity to accelerate research that can potentially help millions of people. I therefore urge my colleagues to join me in voting for the Stem Cell Research Enhancement Act.

The PRESIDING OFFICER. The Senator from Iowa.

Mr. HARKIN. Mr. President, I will not take the entire 25 minutes that are left, but I did want to close out a little bit today before we proceed into tomorrow by just responding to a few of the things that were said today to try to clear up a couple of issues.

The Senator from Kansas, my good friend, was going on and on about stem cells, as he has most of the day, and about how all these treatments and everything are out there. I could respond to every one of them, but I think what we have to keep in mind is that if all of these diseases that the Senator from

Kansas talked about have been treated with adult stem cells, how come all of the patient advocacy groups for these diseases support H.R. 810?

One has to wonder, when you listen to the Senator from Kansas outline all these diseases that are being helped by adult stem cells. He brings up the picture of the guy who had Parkinson's. He was helped with adult stem cells. But, again, he has now gone back and he is where he was before.

Well, if adult stem cells are doing so much, why is the Parkinson's group, the Parkinson's Action Network, supporting H.R. 810? Why are all these advocacy groups supporting H.R. 810 if adult stem cells are so great? Are they just a bunch of stupid people out there? Have they been hoodwinked and misguided?

These advocacy groups know. They know what is going on. And they know that S. 2754 is no substitute for H.R. 810. While adult stem cells are fine, as I pointed out earlier, they have been investigating and doing science on adult stem cells for over 30 years.

Now, just another little thing that happened: The Senator from Kansas, I heard him say: Well, they have been investigating animal stem cells for 20 years.

That might lead you to think: Well, we have been looking at stem cells for 20 years. Not so. We never derived human embryonic stem cells until 1998—8 years ago. So I wanted to make the record clear on that.

Now, the Senator also mentioned something about testicular cancer. He made all kinds of claims about adult stem cells helping testicular cancer. Let me read from a letter written by Craig Nichols, MD, a member of the board of the Lance Armstrong Foundation. We all know the Lance Armstrong Foundation is basically focused on testicular cancer because that is what Lance Armstrong had. And he licked it. But let me quote from the letter written on July 14:

Dear Senator FRIST:

As a member of the Lance Armstrong Foundation's Board of Directors, I am writing in response to assertions that adult stem cells have treated or cured the disease of testicular cancer. . . . I feel that it is important to set the record straight on this issue.

Testicular cancer is the most common cancer among men ages 15-35 and approximately 8,000 men will be diagnosed with testicular cancer in the United States this year. While testicular cancer is one of the most curable forms of cancer, our organization would like to emphasize as the Senate debates H.R. 810 . . . that we have NOT completely eradicated the disease.

There is not an FDA-approved adult stem cell treatment generally available to treat testicular cancer.

The Senator from Kansas kind of, in his comments, led us to think that there might be. Here is what Dr. Nichols said:

Rather, adult stem cells enable testicular cancer patients to withstand a higher dose of

chemotherapy during treatment for the disease.

The adult stem cells enable patients to withstand a higher dose of chemotherapy. Dr. Nichols says:

We support exploring every avenue of research, including embryonic stem cell research within specified ethical limits, until a cure is found. . . .

The Lance Armstrong Foundation asks that you and your colleagues pass H.R. 810, and not accept any substitutes.

I ask unanimous consent that this letter from the Lance Armstrong Foundation be printed in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

LANCE ARMSTRONG FOUNDATION,
Austin, TX, July 14, 2006.

Hon. WILLIAM FRIST,
Majority Leader, U.S. Senate,
Washington, DC.

DEAR SENATOR FRIST: As a member of the Lance Armstrong Foundation's (LAF) Board of Directors, I am writing in response to assertions that adult stem cells have treated or cured the disease of testicular cancer. While the mission of the LAF is to inspire and empower people affected by ALL types of cancer, I feel that it is important to set the record straight on this issue.

Testicular cancer is the most common cancer among men ages 15-35 and approximately 8,000 men will be diagnosed with testicular cancer in the United States this year. While testicular cancer is one of the most curable forms of cancer, our organization would like to emphasize as the Senate debates H.R. 810, the Stem Cell Research and Enhancement Act, that we have NOT completely eradicated the disease.

There is not an FDA-approved adult stem cell treatment generally available to treat testicular cancer. Rather, adult stem cells enable testicular cancer patients to withstand a higher dose of chemotherapy during treatment for the disease.

We support exploring every avenue of research, including embryonic stem cell research within specified ethical limits, until a cure is found. The most respected scientists in our field view embryonic stem cells as an area of research that must be explored, and one that our government must make a commitment to support. The Lance Armstrong Foundation asks that you and your colleagues pass H.R. 810, and not accept any substitutes.

Sincerely,
CRAIG NICHOLS, M.D.,
Member of the Board,
Lance Armstrong Foundation.

Mr. HARKIN. Now, we hear claims that leukemia and lymphomas have been cured or treated by adult stem cells. Here is what George Dahlman of the Leukemia and Lymphoma Society has to say about that:

On behalf of the Leukemia and Lymphoma Society, I am writing in response to assertions that adult stem cells have treated or cured several blood cancers, including several leukemias, lymphomas and multiple myeloma.

As a representative of more than 700,000 patients and their caregivers in this country that battle blood cancers on a daily basis, our organization would like to emphasize, as the Senate debates H.R. 810 . . . that we exist today because we have not found cures

for these devastating diseases. . . . the claim that treatment of blood cancers with cord blood, blood or marrow stem cells—known as hematopoietic stem cells—demonstrates a potential of “adult stem cell” research or is a substitute of embryonic stem cell research is misleading and disingenuous.

Again, this says that the claim that treatment of blood cancer with marrow stem cells demonstrates that adult stem cells is a substitute is misleading and disingenuous.

Mr. Dahlman concludes:

The Leukemia and Lymphoma Society asks that you and your colleagues pass H.R. 810, and not accept any substitutes.

Mr. President, we have heard a lot of talk about these embryos and that we all started as a dot. I have often used this example. I have said: What is an embryo? I have often put a dot on a piece of paper and held it up for audiences to see and said that is what we are talking about. It is that big, the size of a period at the end of a sentence. That is not to diminish the importance of an embryo. But I use it in comparison. An embryo at the blastocyst stage has between 100 and 200 cells. That embryo we are talking about that is in an in vitro fertilization clinic and frozen in liquid nitrogen will never become a human being unless and until it is implanted into a uterus and it takes hold and develops. Sometimes they are implanted and they don't take hold and they are discharged. So an embryo is potential life—potential in that if it is implanted and takes hold, it could become a human being. It is potential life.

Look at this photo of Lauren Stanford. She says:

I am so happy to hear that the Senate is thinking of passing H.R. 810. I can dream again—dream of that great day when I write a thank you letter to the Senate, the House, and everyone who helped me become just another girl; a girl who dreamed and hoped and one day got just what she wanted; her health and future.

Lauren Stanford has diabetes. She knows what will happen if she is not cured. At some point in her life, she will probably become blind. At some point in her life, she will probably lose a foot, a leg, one or more of her limbs. At some point in her life, diabetes will take her. Lauren Stanford. I don't know her. I don't know that I ever met Lauren Stanford. This is not potential life; this is real life. This is a human being who is living right now.

That dot on the paper is an embryo. Is it alive? Of course it is alive. Is it a human being? No. It is potential life. Lauren Stanford is real life.

Read the bill. Read H.R. 810. Ethical guidelines. We can only use those embryos that are left over from in vitro fertilization that are going to be discarded. Read the bill:

Prior to the consideration of embryo donation and through consultation with the individuals seeking fertility treatment, it was determined that the embryos would never be

implanted in a woman and would otherwise be discarded.

Written consent.

The individuals seeking fertility treatment donated the embryos with written informed consent and without receiving any financial or other inducements to make the donation.

It has to be determined, before any embryo could ever be used for stem cell derivation, that the embryos would never be implanted in a woman and would otherwise be discarded. Every day, fertility clinics discard unwanted embryos. People have IVF—50,000 babies were born last year to couples who wanted to have a baby and could not and needed IVF. But some embryos were left over. Well, couples who have had their children then call up the clinic or the clinic calls them and the clinic says: Do you want to continue to pay for us to keep these embryos frozen?

If you have had your children and you don't want to expand your family, you say: No, I don't want to pay for that anymore. Guess what. The IVF clinic discards it. I have heard they basically throw them in the sink and wash them down the sink. They are only as big as a period at the end of a sentence.

So the real question for us really comes down to that, unless we want to outlaw in vitro fertilization and make it a crime, which I don't hear anybody here wanting to do. As long as we have in vitro fertilization and have leftover embryos, the real question for us is this: If the donors of those embryos, through written informed consent, determine it will never be implanted in a woman and will be discarded, is it better to have them discarded and flushed down the drain or used for the kind of scientific research that will cure Lauren Stanford of her diabetes? Potential life versus real life. Potential life that will be discarded versus real life. Potential life that will be flushed down the drain versus Lauren Stanford, real life. That is the question for us.

We hear all of these arguments around here about we were all an embryo at one time. Of course we were. The question is, What happens to all those embryos? Right now, they are being discarded, and it is perfectly legal to do so. I don't see anyone here with legislation saying it is going to be a crime for them to be discarded, a crime to have in vitro fertilization. Really, that is the choice. Do we discard potential life or do we use it to save real life? This is not potential life, this is real.

My nephew Kelly, who suffered a tragic accident on an aircraft carrier 27 years ago, hasn't walked since. He keeps hope alive that one day he will walk again. He knows about the research that has been done on rats and mice where spinal cords have been reconnected using embryonic stem cells. He knows that. I have never heard him

say it, but I suppose he would probably echo what Christopher Reeve once said: Oh, to be a rat.

He knows that. That is real life. Kelly is a real person. He is alive. He is not potential life. That is our decision when we face the vote tomorrow on H.R. 810.

So all these other arguments about adult stem cells and this kind of stuff, fine, I have nothing against adult stem cell research. I am in favor of it. We ought to keep it going. But to choke off—not what I say but what the leading scientists say, the leading Nobel Prize winners say, what all of these disease groups who have medical people sitting on their boards, what they all say is the most promising avenue of research for curing Alzheimer's, juvenile diabetes, spinal cord injuries, Parkinson's, and ALS, the most promising is not adult stem cells. It is embryonic stem cells. That is what they say, not me.

To cut that off and to say, no, we won't do it is telling Lauren Stanford that potential life, that an embryo the size of a pencil dot, yes, is life; it is human potential that is as important as she is; that they have equal weight on the scales. I am sorry, Mr. President, I don't think so, not when it is going to be discarded, legally thrown down the drain. And as long as we have strict ethical guidelines in the bill—strict ethical guidelines, more than exists right now, stronger ethical guidelines than are in the law right now.

To me, there is really only one answer. We should be in favor of this real life of curing diseases, seeking treatments and cures in an ethical manner, which is what this bill does. So I hope that tomorrow we have an overwhelming vote in favor of H.R. 810.

I understand today the administration came out with a Statement of Administration Policy, or SAP as it is called around here, saying the President would veto it. I hope the President rethinks this. He is overseas anyway. Let's face it, we are all kind of captives of our staff around here. Staff tells us this and that. OMB says this, OMB says that. I am hopeful this is the work of some staff, that the President hasn't thought about it. He has been overseas focused on the G8; now, I am sure, focused on the Middle East.

I hope when President Bush thinks about it that he remembers Lauren Stanford, that he will remember the letter from Nancy Reagan and he will come down on the side of real life, and he will come down on the side of an ethical approach to embryonic stem cell research.

I still believe in miracles, and I hope a miracle will occur and the President of the United States finds it in his heart to say that what he did on August 9, 2001, was done with a lack of adequate knowledge. He can say: Look, we thought there were 78 lines, and

there were not; there were only 21 lines. We didn't know they were all contaminated with mouse feeder cells. They can't be used for human therapies. That he will say in light of all that we know now, and with the strict ethical guidelines we have in this bill, I see fit to sign into law H.R. 810.

That is my hope. That is the hope of Lauren Stanford. That is the hope of the millions of Americans out there who suffer from Alzheimer's, the millions who suffer from spinal cord injuries and their families and caregivers and Parkinson's and ALS, and so many more.

Tonight they are praying—they are praying—that a miracle occurs and that the President will change his mind and sign this bill. And until the very moment that he vetoes it, I will remain hopeful that miracle will occur.

Mr. President, I yield the floor and suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. FRIST. Mr. President, I ask unanimous consent the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, so ordered.

MORNING BUSINESS

Mr. FRIST. I ask unanimous consent there now be a period for morning business with Senators permitted to speak for up to 10 minutes each.

The PRESIDING OFFICER. Without objection, it is so ordered.

THE GREAT COMPROMISE; AN AMERICAN MOMENT

Mr. BYRD. Mr. President, yesterday, July 16, was the anniversary of one of the greatest events in American history. It was 219 years ago that our Founding Fathers were meeting at the Constitutional Convention in Philadelphia, attempting to formulate a workable plan of Government. At the time, the young American Government was operating under the Articles of Confederation, which every day was proving to be unworkable.

For 7 weeks, the Constitutional Convention had been working to devise a better form of Government, a "more perfect union." It would be a Government with three branches: an executive branch, a legislative branch, and a judicial branch. The branches of the Government would have separated powers and the ability to check and balance one another.

The Convention delegates had already made a number of important decisions about the structure of the Congress. The Convention had set the minimum age for Members of the Senate at 30 and a term length at 6 years, as opposed to 25 years of age for Members of

the House of Representatives, who would have 2-year terms.

But then came the stumbling block, how the States would be represented in Congress. Delegates from the large States believed that because their States contributed more to the Nation's financial and defensive resources, they should have greater representation in the legislative bodies. Small State delegates demanded that all States be equally represented in both Houses.

Hours, even days, of heated, contentious debate followed. A number of proposals, including one by Benjamin Franklin, were considered and rejected. Stalemate was in the air. Failure threatened the Convention and the youthful Republic was stymied, stopped in its tracks. If the Constitutional Convention collapsed, it meant that the American Government would have to continue operating under the flawed and failing Articles of Confederation.

So maybe it was a miracle in Philadelphia. It may have been divine intervention. Who knows. Perhaps it was because there were great political leaders and they acted as mature political statesmen. Politics, it is said, is the art of compromise. And this is exactly what our Founding Fathers did; they compromised. They worked out a compromise, the Great Compromise, also known as the Connecticut Compromise because it was designed by the Connecticut delegates Roger Sherman and Oliver Ellsworth. It provided a dual system of congressional representation. In the House of Representatives, every State would be assigned a number of seats in proportion to its population. In the Senate, all States would have the same number of seats.

Just 8 days after the Great Compromise was adopted, the Convention was able to elect a committee to draft a detailed Constitution embodying the fundamental principles of the proceedings.

Today, representation of the two Houses of Congress seems so logical and so accepted that we take it for granted. Perhaps it is for that reason that we pass this anniversary with very little notice, too little notice—that is a shame—and no fanfare. It was a crucial moment in history. An American moment. It should be recognized and honored and remembered.

Thou, too, sail on, O Ship of State!
Sail on, O Union, strong and great!
Humanity with all its fears,
With all the hopes of future years,
Is hanging breathless on thy fate!
We know what Master laid thy keel,
What Workmen wrought thy ribs of steel,
Who made each mast, and sail, and rope,
What anvils rang, what hammers beat,
In what a forge and what a heat
Were shaped the anchors of thy hope!
Fear not each sudden and sound and shock,
'Tis of the wave and not the rock;
'Tis but the flapping of the sail,

And not a rent made by the gale!
In spite of rock and tempest's roar,
In spite of false lights on the shore,
Sail on, nor fear to breast the sea!
Our hearts, our hopes, are all with thee,
Our hearts, our hopes, our prayers, our tears,
Our faith triumphant o'er our fears,
Are all with thee—are all with thee!

Mr. DORGAN. Mr. President, let me thank the Senator from West Virginia for reminding us, once again, of an important part of this country's great history. He educates all of us on the floor of the Senate, and I appreciate his comments.

Mr. BYRD. Mr. President, I thank the distinguished Senator. Were it not for that compromise, we would not be here today. There would be no Senate. There would be no Republic as we know it.

I thank the Senator.

The PRESIDING OFFICER. The Senator from Virginia.

THE MIDDLE EAST

Mr. WARNER. Mr. President, I thank the distinguished Presiding Officer.

During the course of the day, there was brought to the attention of the Members of the Senate a resolution regarding the situation in the Middle East. It was my understanding this resolution would be brought to the Senate tonight and that presumably it would be agreed to by the Senate.

My concern is that there are certain additional matters which should be included. If the Senate is going to exercise the important act of bringing this up, seeking unanimous consent, and the message goes out all over the world that the Senate has spoken, I would support what is in this resolution. I believe now that is not going to take place tonight for various reasons.

It is imperative that I address what was to have taken place, what I was told was to have taken place, assuming the unanimous consent could be achieved on both sides.

No. 1, this matter is so important, it deserves an opportunity for a number of Senators to speak on a resolution of this import. I am now advised by our cloakroom that it will not be taken up tonight, but I will take this opportunity to address parts of it or at least one part that I think should bear further careful drafting and possibly be changed. Otherwise, it is only one section, on page 3, item 3, which says:

(3) urges the President to continue fully supporting Israel as Israel exercises its right of self-defense in Lebanon and Gaza;

There is no question about their right of self-defense against Hezbollah and Hamas, but I wondered whether we should draft it in this way.

I urge those, since we are not going to take it up tonight, to make sure there is not an ambiguity there because the people of Lebanon are suffering enormously at this time, as are

the people in Gaza. Many of those people are not aligned with either Hezbollah or Hamas.

I am also concerned about the Government in Lebanon and the actions which are taking place now, what do we do if that Government were to fall.

I would vote for this resolution if it were brought up tonight. I would have addressed the Senate and brought up other matters which I will now discuss.

I turn now again to the fact that this is so important, it deserves the consideration of every Senator and a debate of some length. I don't know about the schedule of the Senate, but if we are going to go forward and send a message to the world about our position in the Senate with respect to the conflicts in Palestine, Lebanon, and Israel, and the suffering that is taking place on all borders, each side of the various borders, then it deserves very careful consideration.

The purpose of me taking the floor is to point out some areas which deserve full consideration in that debate which are not included. I don't criticize the drafter of this resolution, but it requires the consideration of the whole Senate rather than a unanimous consent with a number of Senators who may not be here tonight.

In the course of that debate, I urge a larger focus. For example, there is no mention in the resolution of some perhaps 25,000 Americans who are trapped or engulfed in one way in this conflict. How best do we address this conflict to help protect those 25,000 persons? That is an essential part of this debate.

Second, I said the following on Friday night in response to a press inquiry when I first learned of this conflict:

While I fully recognize that Israel was a victim of provocative attacks on her people and sovereignty, I urge the Administration to think through very carefully how Israel's extraordinary reaction could affect our operations in Iraq and our joint diplomatic efforts to resolve the Iranian nuclear issue.

This is a very critical time for the United States in the Middle East, and the Israeli actions will certainly have an impact beyond just Lebanon and Gaza.

I stand by that statement. That is why I urge, and I am pleased to say this resolution, at such time as it would be brought up, will be broadened to cover the other points.

First, are the 25,000 Americans trapped? Second, this Nation has made a very great sacrifice to achieve goals established by our President and a coalition of forces associated with our country in both Iraq and Afghanistan. Over 2,500 have lost their lives in Iraq; over 300 have lost their lives in Afghanistan. That is U.S. forces. Our coalition partners have lost. We have 20,000-plus wounded, many severely wounded in Iraq and Afghanistan. And \$436 billion is a rough calculation of just a part, not all, but a significant part of the investment of our country in achieving our goals in those nations, of stabilizing their governments now with free

elections in both countries and hopefully enabling those governments to gain the strength to provide for the peoples of Iraq and Afghanistan, a measure of liberty and freedom and possibly democracy which we enjoy here and in other nations.

What is the effect of any statement made by the Senate? What is the effect on that very fragile situation in both countries? There is a resurgence in Afghanistan. I was just there a short time ago—and each of us have followed the news to date—a resurgence in the fighting. NATO has come in.

We cannot just address one portion of the Middle East conflict without seeing how the manner in which we address that could affect the other areas, notably Afghanistan and Iraq.

So I say to my colleagues, as I said Friday night, we urge our President, our administration, as they take such, hopefully, bold and firm and convincing initiatives in regard to the conflicts in Israel and Gaza and Lebanon, to be mindful of how it could impact on our conflicts in Afghanistan and Iraq and our negotiations thus far with Iran in participating with other nations—not unilaterally—to try to bring about some resolution of what many of us considered up until this conflict—and I am not sure how we are going to eventually characterize the magnitude and the future potential spreading of this conflict—but certainly up until this conflict, in my judgment, the potential of Iran gaining nuclear weapons was absolutely—there was nothing more serious, in my judgment, than to try to resolve that.

There is no reference in here to the other Arab nations. It is quite interesting; some of those nations have come forward in strong condemnation, joined our country, joined other nations, in condemning Hamas and Hezbollah. That is of importance.

Now we see today that so many nations say the United States must take a stronger role in trying to work our way through this conflict, yes, supporting Israel but at the same time trying to bring about some resolution to spare the life and limb and suffering in Palestine, Lebanon, and Israel, to see that it not spread to other areas.

Now, our President has indicated that the Secretary of State will soon embark on a mission. What we say in the Senate must be carefully drafted so it does not remove the flexibility that our Secretary of State—a very able person—will need in helping to resolve this problem.

So I say that historically this Nation has stood steadfast, and I am proud that I have been among those in this Chamber in my 28 years here, to strongly support Israel. Our Nation is viewed upon as an honest broker—recognizing our support of Israel but as an honest broker. If the world is going to look to us as to how we can provide

that leadership, I do not want any loss of flexibility on the part of the President and the Secretary of State and such others who may be tasked to try to work out this situation.

Yes, I conclude our support for Israel is very strong, Mr. President, but it cannot be unconditional.

I yield the floor.

CONDEMNING HEZBOLLAH

Mrs. HUTCHISON. Mr. President, I rise to speak in support of a resolution the Senate is expected to soon consider, and which I have cosponsored, along with Senator FRIST, who is the lead sponsor, and Senators REID, BIDEN, SANTORUM, NELSON of Florida, KYL, BOND, and LEVIN. It is a resolution that condemns Hezbollah and expresses support for Israel's right to self defense.

All of us are watching in horror what is happening there, and I think it is important that the United States Senate speak forcefully in support of our President. The G-8 leaders have spoken this week to condemn Hezbollah and terrorist activities and to ask the Government of Lebanon to help find the Israeli soldiers who are being held hostage and free them and to disarm Hezbollah.

Mr. President, there should be no misunderstanding. Israel has fully complied with the United Nations mandate. They have no forces in Lebanon and yet they have continued to withstand attack after attack from Hezbollah.

We watched with sadness last year when Lebanon's former Prime Minister was assassinated by terrorists.

I think we have to put the blame where we believe it lies. We know Iran and Syria are infiltrating Lebanon with support for Hezbollah and Hamas.

We know Hezbollah and Hamas are committed to the destruction of Israel. Since 1948 it has been forced to continually fight for its very existence, and yet in the middle of this it has stood as a democratic form of government, with a free economy. Israel has never backed away from its fundamental commitment to freedom and human liberty.

So, Mr. President, I think this is something the United States Senate should stand firm with this bipartisan resolution that says we do support our President and the G-8 leaders and condemn Hezbollah. We encourage the Government of Lebanon, to stop these attacks on Israel, and locate and return the soldiers who have been taken hostage. Let's add our voice to that of the unified leaders of the world who are saying this should not be allowed to happen.

We must speak together, we must stay together, we must support Israel's right to self-defense and understand that they should have the support of a

unified world community, saying to the terrorists and the governments that are supporting the terrorists—Hamas, Hezbollah, Iran, Syria supporting them—that the world is not going to sit by and let people be terrorized. This is a global war on terror, and we must speak.

I thank the distinguished Senator from Kansas for allowing me to speak. I know I am speaking during the stem cell debate. The resolution will be considered soon, and I wanted to speak on the floor because I think it is so important what is happening in the world today, and we must speak as a unified voice in the Senate.

VISIT TO NEW ORLEANS

Mr. FEINGOLD. Mr. President, I recently made a brief visit to New Orleans to see for myself where things stand now, not quite 11 months after Hurricane Katrina hit the gulf coast. Katrina, of course, was the first of two major hurricanes to ravage that area last year. I only had the chance to see a small part of the area hit by that first storm, but what I did see was striking.

The news reports cannot fully convey the devastation or the enormity of the problems the region faces in trying to put things back in working order. One problem feeds into another. Businesses can't get back up and running without employees. Workers don't want to return without a safe place to live, without a school for their children, and without health care and other essential services upon which we all rely. Hospitals and other health providers face the same staffing shortages that businesses face. The neighborhood schools face challenges both in the physical infrastructure—providing a safe place in which kids can learn—and staffing shortages. All of these issues must be addressed.

Housing is an overarching challenge. I saw neighborhood after neighborhood still empty and unlivable. The outside shell of some homes was still standing, but the inside was uninhabitable because of the flood of toxic liquid filth that soaked into those houses.

I also saw lots where homes had stood but where now there was nothing but a slab of concrete. While many are living in the notorious FEMA trailers, many others, I understand, are having a hard time getting approval for a trailer. I was pleased to learn a little bit more about the so-called Katrina cottages that might be an alternative to the trailers, and I look forward to learning still more about them.

So much still needs to be done that one can be overwhelmed by the size of the task that remains. I have a great deal of respect for those who have made the commitment to remain in or move back to the city, for those who are working to make the neighborhoods habitable again, for the State

and local law enforcement, the National Guard, and all the other dedicated individuals who are working so hard to bring the region back.

I still have a lot to learn about the particulars of what is needed in New Orleans and the other areas ravaged by Hurricanes Katrina and Rita—what is working, what has not worked, what Congress can still do to help. My central message today is that people from other parts of the country should not think that the gulf coast has recovered from those two hurricanes. That simply isn't the case. People are making progress, but there is still a very long way to go.

To put it in perspective, I will compare it to another place I visited earlier this year: Banda Aceh, Indonesia. I was there in February, a little more than a year after it was devastated by the tsunami in late 2004. Having been to both places, I was struck by what the people in Banda Aceh and New Orleans had in common, both because of what they went through and because of the incredible resilience they have shown in the wake of those tragedies. But I was just as struck by how those places differed—especially how, in many ways, New Orleans seemed worse off than Banda Aceh did a year after the disaster.

When I visited Banda Aceh in February 2006—a little over a year after the original tsunami hit—though many of the reconstruction programs had yet to be completed, there was visible progress being made, thanks in large part to the generosity of the American taxpayer. I saw homes, roads, buildings, and bridges being built with funds that the American Government generously gave to the victims of the tsunami.

I strongly support the aid we have given to those in Banda Aceh and others who were the victims of the tsunami in 2004, and no one disputes that we have responsibility to help them rebuild. But we cannot let the disasters of Hurricanes Katrina and Rita be forgotten. We have a special duty to the people of the Gulf Coast who still need us. Almost a year later, after more than 1,500 people were killed and countless lives were disrupted, our fellow Americans do still need us. We still need to stand by them as they rebuild their lives, and I know the people of Wisconsin stand ready to help.

ADDITIONAL STATEMENTS

HONORING THE LIFE OF A GREAT COLORADAN

• Mr. SALAZAR. Mr. President, I would like to recognize the life of Edward G. Eid, the head of the Colorado State Soccer Association, CSSA, who died recently while attending the World Cup soccer tournament in Munich, Germany.

Ed Eid passionately believed in the power of soccer to bring people together. He knew that the beautiful game, as we saw in this year's World Cup, can bridge national, linguistic, racial, economic, and cultural gaps.

Ed Eid used soccer to strengthen and bind communities in our State and across the globe. As a coach, he took a team to compete behind the Iron Curtain, recognizing that shared passions for sport could warm a relationship between superpowers. At CSSA he reached out to teams from immigrant communities, helping kids from all walks of life learn the game and participate in leagues.

When Ed Eid immigrated to the U.S. in 1958, soccer had not yet entered the American mainstream. The sport thrived in immigrant communities, but the U.S. had neither a professional league nor its own soccer icons. After fighting through adversity and discrimination to become a successful entrepreneur, Eid dedicated more and more time to helping the game he loved gain ground. Thanks to his efforts, and the efforts of other visionaries like him, soccer is the most widely played game in America.

Mr. Eid is survived by a wonderful family. He was especially proud of his two grandchildren, Alex and Emily Eid. Earlier this year he saw his daughter-in-law, Allison, appointed by Governor Bill Owens to the Colorado Supreme Court. And he saw his son, Troy, nominated by President Bush to be Colorado's next U.S. Attorney.

The legacy of Ed Eid's life is clear. In the soccer leagues of Colorado, in all the communities he has touched, and in a sport whose popularity is growing by leaps and bounds, he will be sorely missed.●

MESSAGE FROM THE HOUSE

ENROLLED BILLS SIGNED

At 7:37 p.m., a message from the House of Representatives, delivered by Ms. Niland, one of its reading clerks, announced that the Speaker has signed the following enrolled bills:

S. 655. An act to amend the Public Health Service Act with respect to the National Foundation for the Centers for Disease Control and Prevention.

H.R. 2872. An act to require the Secretary the Treasury to mint coins in commemoration of Louis Braille.

MEASURES DISCHARGED

The following measure was discharged from the Committee on Environment and Public Works by unanimous consent, and referred as indicated:

H.R. 125. An act to authorize the Secretary of the Interior to construct facilities to provide water for irrigation, municipal, domes-

tic, military, and other uses from the Santa Margarita River, California, and for other purposes; to the Committee on Energy and Natural Resources.

MEASURES PLACED ON THE CALENDAR

The following bill was read the second time, and placed on the calendar:

H.R. 9. An act to amend the Voting Rights Act of 1965.

EXECUTIVE AND OTHER COMMUNICATIONS

The following communications were laid before the Senate, together with accompanying papers, reports, and documents, and were referred as indicated:

EC-7537. A communication from the Deputy Secretary of Defense, transmitting, pursuant to law, a report on the military operations of the Armed Forces and the reconstruction activities of the Department of Defense in Iraq and Afghanistan for the period ending April 30, 2006; to the Committee on Armed Services.

EC-7538. A communication from the Regulations Coordinator, Centers for Medicare and Medicaid Services, Department of Health and Human Services, transmitting, pursuant to law, the report of a rule entitled "Medicare Program; Citizenship Documentation Requirements" (RIN0938-A051) received on July 11, 2006; to the Committee on Finance.

EC-7539. A communication from the Assistant Secretary, Legislative Affairs, Department of State, transmitting, pursuant to the Arms Export Control Act, the certification of a proposed license for the export of defense articles or defense services sold commercially under contract in the amount of \$100,000,000 or more to Germany; to the Committee on Foreign Relations.

EC-7540. A communication from the Assistant General Counsel, Division of Regulatory Services, Department of Education, transmitting, pursuant to law, the report of a rule entitled "Establishment of Regulations for the Academic Competitiveness Grant and National Science and Mathematics Access to Retain Talent Grant Programs, and Grant and Loan Program Amendments; Interim Rule" received on July 11, 2006; to the Committee on Health, Education, Labor, and Pensions.

EC-7541. A communication from the Principal Deputy Associate Administrator, Office of Policy, Economics, and Innovation, Environmental Protection Agency, transmitting, pursuant to law, the report of a rule entitled "Approval and Promulgation of Air Quality Implementation Plan; Idaho" (FRL No. 8191-6) received on July 11, 2006; to the Committee on Environment and Public Works.

EC-7542. A communication from the Principal Deputy Associate Administrator, Office of Policy, Economics, and Innovation, Environmental Protection Agency, transmitting, pursuant to law, the report of a rule entitled "Approval and Promulgation of Air Quality Implementation Plans; Rhode Island Update to Materials Incorporated by Reference" (FRL No. 8185-1) received on July 11, 2006; to the Committee on Environment and Public Works.

EC-7543. A communication from the Principal Deputy Associate Administrator, Office of Policy, Economics, and Innovation, Environmental Protection Agency, transmitting,

pursuant to law, the report of a rule entitled "Approval and Promulgation of Air Quality Implementation Plans; Virginia; NSR in the Ozone Transport Region" (FRL No. 8196-8) received on July 11, 2006; to the Committee on Environment and Public Works.

EC-7544. A communication from the Principal Deputy Associate Administrator, Office of Policy, Economics, and Innovation, Environmental Protection Agency, transmitting, pursuant to law, the report of a rule entitled "Approval and Promulgation of Air Quality Implementation Plans; West Virginia; Redesignation of the City of Weirton PM-10 Non-attainment Area to Attainment and Approval of the Maintenance Plan" (FRL No. 8197-1) received on July 11, 2006; to the Committee on Environment and Public Works.

EC-7545. A communication from the Principal Deputy Associate Administrator, Office of Policy, Economics, and Innovation, Environmental Protection Agency, transmitting, pursuant to law, the report of a rule entitled "Indiana; Final Approval of State Underground Storage Tank Program" (FRL No. 8195-8) received on July 11, 2006; to the Committee on Environment and Public Works.

EC-7546. A communication from the Principal Deputy Associate Administrator, Office of Policy, Economics, and Innovation, Environmental Protection Agency, transmitting, pursuant to law, the report of a rule entitled "National Emission Standards for Hazardous Air Pollutants for Integrated Iron and Steel Manufacturing Facilities" (FRL No. 8196-6) received on July 11, 2006; to the Committee on Environment and Public Works.

EC-7547. A communication from the Program Analyst, Federal Aviation Administration, Department of Transportation, transmitting, pursuant to law, the report of a rule entitled "Modification of Class E Airspace; Scott City, KS" ((RIN2120-AA66)(Docket No. 06-ACE-2)) received on July 11, 2006; to the Committee on Commerce, Science, and Transportation.

EC-7548. A communication from the Program Analyst, Federal Aviation Administration, Department of Transportation, transmitting, pursuant to law, the report of a rule entitled "Standard Instrument Approach Procedures (60); Amdt. No. 3170" ((RIN2120-AA65)(Docket No. 30498)) received on June 11, 2006; to the Committee on Commerce, Science, and Transportation.

EC-7549. A communication from the Program Analyst, Federal Aviation Administration, Department of Transportation, transmitting, pursuant to law, the report of a rule entitled "Standard Instrument Approach Procedures (38); Amdt. No. 3171" ((RIN2120-AA65)(Docket No. 30499)) received on June 11, 2006; to the Committee on Commerce, Science, and Transportation.

EC-7550. A communication from the Regulatory Ombudsman, Federal Motor Carrier Safety Administration, Department of Transportation, transmitting, pursuant to law, the report of a rule entitled "Parts and Accessories Necessary for Safe Operation: Protection Against Shifting and Falling Cargo" (RIN2126-AA88) received on July 11, 2005; to the Committee on Commerce, Science, and Transportation.

EC-7551. A communication from the Program Analyst, Federal Aviation Administration, Department of Transportation, transmitting, pursuant to law, the report of a rule entitled "Airworthiness Directives; Empresa Brasileira de Aeronautica S.A. Model ERJ 170-100 LR, -100 STD, -100 SE, and -100 SJ Airplanes; and Empresa Brasileira de Aeronautica S.A. Model ERJ 190-100 LR, -100 STD, and -100 IGW Airplanes" ((RIN2120-

AA64)(Docket No. 2006-NM-111)), received on July 11, 2006; to the Committee on Commerce, Science, and Transportation.

EC-7552. A communication from the Program Analyst, Federal Aviation Administration, Department of Transportation, transmitting, pursuant to law, the report of a rule entitled "Airworthiness Directives; Airbus Model A318, A319, A320, and A321 Airplanes" ((RIN2120-AA64)(Docket No. 2006-NM-101)), received on July 11, 2006; to the Committee on Commerce, Science, and Transportation.

EC-7553. A communication from the Program Analyst, Federal Aviation Administration, Department of Transportation, transmitting, pursuant to law, the report of a rule entitled "Airworthiness Directives; Hamilton Sundstrand Model 14RF-9 Propellers" ((RIN2120-AA64)(Docket No. 2006-NE-18)), received on July 11, 2006; to the Committee on Commerce, Science, and Transportation.

EC-7554. A communication from the Program Analyst, Federal Aviation Administration, Department of Transportation, transmitting, pursuant to law, the report of a rule entitled "Airworthiness Directives; Empresa Brasileira de Aeronautica S.A. Model EMB-120, -120ER, -120FC, -120QC, and -120RT Airplanes" ((RIN2120-AA64)(Docket No. 2006-NM-016)), received on July 11, 2006; to the Committee on Commerce, Science, and Transportation.

EC-7555. A communication from the Program Analyst, Federal Aviation Administration, Department of Transportation, transmitting, pursuant to law, the report of a rule entitled "Airworthiness Directives; Viking Air Limited Model DHC-7 Airplanes" ((RIN2120-AA64)(Docket No. 2006-NM-049)), received on July 11, 2006; to the Committee on Commerce, Science, and Transportation.

EC-7556. A communication from the Program Analyst, Federal Aviation Administration, Department of Transportation, transmitting, pursuant to law, the report of a rule entitled "Airworthiness Directives; Airbus Model A321-100 Series Airplanes" ((RIN2120-AA64)(Docket No. 2006-NM-084)), received on July 11, 2006; to the Committee on Commerce, Science, and Transportation.

EC-7557. A communication from the Program Analyst, Federal Aviation Administration, Department of Transportation, transmitting, pursuant to law, the report of a rule entitled "Airworthiness Directives; Bombardier Model CL-600-2B19 Airplanes" ((RIN2120-AA64)(Docket No. 2006-NM-233)), received on July 11, 2006; to the Committee on Commerce, Science, and Transportation.

EC-7558. A communication from the Program Analyst, Federal Aviation Administration, Department of Transportation, transmitting, pursuant to law, the report of a rule entitled "Airworthiness Directives; Boeing Model 757 Airplanes" ((RIN2120-AA64)(Docket No. 2005-NM-192)), received on July 11, 2006; to the Committee on Commerce, Science, and Transportation.

EC-7559. A communication from the Program Analyst, Federal Aviation Administration, Department of Transportation, transmitting, pursuant to law, the report of a rule entitled "Airworthiness Directives; Bombardier Model CL-600-2B19" ((RIN2120-AA64)(Docket No. 2006-NM-214)), received on July 11, 2006; to the Committee on Commerce, Science, and Transportation.

EC-7560. A communication from the Program Analyst, Federal Aviation Administration, Department of Transportation, transmitting, pursuant to law, the report of a rule entitled "Airworthiness Directives; Boeing Model 767 Airplanes" ((RIN2120-AA64)(Docket No. 2006-NM-228)), received on July 11, 2006;

to the Committee on Commerce, Science, and Transportation.

EC-7561. A communication from the Program Analyst, Federal Aviation Administration, Department of Transportation, transmitting, pursuant to law, the report of a rule entitled "Airworthiness Directives; Boeing Model 777-200 and -300 Series Airplanes" ((RIN2120-AA64)(Docket No. 2006-NM-278)), received on July 11, 2006; to the Committee on Commerce, Science, and Transportation.

EC-7562. A communication from the Program Analyst, Federal Aviation Administration, Department of Transportation, transmitting, pursuant to law, the report of a rule entitled "Airworthiness Directives; Boeing Model 767-200 and -300 Series Airplanes" ((RIN2120-AA64)(Docket No. 2006-NM-123)), received on July 11, 2006; to the Committee on Commerce, Science, and Transportation.

EC-7563. A communication from the Program Analyst, Federal Aviation Administration, Department of Transportation, transmitting, pursuant to law, the report of a rule entitled "Airworthiness Directives; Gulfstream Model GV and GV-SP Series Airplanes" ((RIN2120-AA64)(Docket No. 2006-NM-182)), received on July 11, 2006; to the Committee on Commerce, Science, and Transportation.

EC-7564. A communication from the Program Analyst, Federal Aviation Administration, Department of Transportation, transmitting, pursuant to law, the report of a rule entitled "Airworthiness Directives; BAE Systems Limited Model BAe 146 and Avro 146-RJ Airplanes" ((RIN2120-AA64)(Docket No. 2006-NM-178)), received on July 11, 2006; to the Committee on Commerce, Science, and Transportation.

EC-7565. A communication from the Program Analyst, Federal Aviation Administration, Department of Transportation, transmitting, pursuant to law, the report of a rule entitled "Airworthiness Directives; Raytheon Model Hawker 800XP Airplanes" ((RIN2120-AA64)(Docket No. 2006-NM-017)), received on July 11, 2006; to the Committee on Commerce, Science, and Transportation.

EC-7566. A communication from the Program Analyst, Federal Aviation Administration, Department of Transportation, transmitting, pursuant to law, the report of a rule entitled "Airworthiness Directives; Rolls-Royce plc RB211 Series Turbofan Engines" ((RIN2120-AA64)(Docket No. 2003-NE-12)), received on July 11, 2006; to the Committee on Commerce, Science, and Transportation.

EC-7567. A communication from the Program Analyst, Federal Aviation Administration, Department of Transportation, transmitting, pursuant to law, the report of a rule entitled "Airworthiness Directives; Viking Air Limited Model DHC-7 Airplanes" ((RIN2120-AA64)(Docket No. 2002-NM-184)), received on July 11, 2006; to the Committee on Commerce, Science, and Transportation.

EC-7568. A communication from the Program Analyst, Federal Aviation Administration, Department of Transportation, transmitting, pursuant to law, the report of a rule entitled "Airworthiness Directives; Airbus Model A300 B4-600R and A300 F4-600R Series Airplanes" ((RIN2120-AA64)(Docket No. 2005-NM-211)), received on July 11, 2006; to the Committee on Commerce, Science, and Transportation.

EC-7569. A communication from the Program Analyst, Federal Aviation Administration, Department of Transportation, transmitting, pursuant to law, the report of a rule entitled "Airworthiness Directives; Boeing Model 737-600, -700, -700C, -800, and -900 Series Airplanes" ((RIN2120-AA64)(Docket No. 2004-

NM-238)), received on July 11, 2006; to the Committee on Commerce, Science, and Transportation.

EC-7570. A communication from the Program Analyst, Federal Aviation Administration, Department of Transportation, transmitting, pursuant to law, the report of a rule entitled "Airworthiness Directives; Engine Components Incorporated Reciprocating Engine Connecting Rods" ((RIN2120-AA64)(Docket No. 2005-NE-07)), received on July 11, 2006; to the Committee on Commerce, Science, and Transportation.

EC-7571. A communication from the Program Analyst, Federal Aviation Administration, Department of Transportation, transmitting, pursuant to law, the report of a rule entitled "Airworthiness Directives; Boeing Model 747-100B, 747-200B, 747-200F, 747-300, 747-400, 747-400F, and 747SP Series Airplanes" ((RIN2120-AA64)(Docket No. 2006-NM-036)), received on July 11, 2006; to the Committee on Commerce, Science, and Transportation.

EC-7572. A communication from the Attorney Advisor, Department of Transportation, transmitting, pursuant to law, (2) reports relative to vacancy announcements within the Department, received on July 12, 2006; to the Committee on Commerce, Science, and Transportation.

EC-7573. A communication from the Deputy Assistant Secretary of the Interior, Bureau of Land Management, Department of the Interior, transmitting, pursuant to law, the report of a rule entitled "Grazing Administration—Exclusive of Alaska" (RIN1004-AD42) received on July 12, 2006; to the Committee on Energy and Natural Resources.

EC-7574. A communication from the Chairman, Federal Energy Regulatory Commission, transmitting, pursuant to law, a report describing the progress made in licensing and constructing the Alaska natural gas pipeline and describing any issue impeding that progress; to the Committee on Energy and Natural Resources.

EC-7575. A communication from the Director, Office of Personnel Management, transmitting, pursuant to law, the report of a rule entitled "Senior Executive Service Pay" (RIN3206-AL01) received on July 11, 2006; to the Committee on Homeland Security and Governmental Affairs.

EC-7576. A communication from the Acting Senior Procurement Executive, Office of the Chief Acquisition Officer, National Aeronautics and Space Administration, transmitting, pursuant to law, the report of a rule entitled "Federal Acquisition Regulation; Federal Acquisition Circular 2005-11" (FAC 2005-11) received on July 12, 2006; to the Committee on Homeland Security and Governmental Affairs.

INTRODUCTION OF BILLS AND JOINT RESOLUTIONS

The following bills and joint resolutions were introduced, read the first and second times by unanimous consent, and referred as indicated:

By Mr. HATCH (for himself and Mr. KENNEDY):

S. 3668. A bill to amend the Public Health Service Act to provide for the expansion and improvement of traumatic brain injury programs, and for other purposes; to the Committee on Health, Education, Labor, and Pensions.

By Mr. CARPER (for himself and Mr. GREGG):

S. 3669. A bill to suspend temporarily the duty on certain footwear with coated or lam-

inated textile fabrics; to the Committee on Finance.

By Mr. CARPER (for himself and Mr. GREGG):

S. 3670. A bill to suspend temporarily the duty on certain men's footwear covering the ankle with coated or laminated textile fabrics; to the Committee on Finance.

By Mr. CARPER (for himself and Mr. GREGG):

S. 3671. A bill to suspend temporarily the duty on certain other footwear covering the ankle with coated or laminated textile fabrics; to the Committee on Finance.

By Mr. CARPER (for himself and Mr. GREGG):

S. 3672. A bill to suspend temporarily the duty on certain footwear not covering the ankle with coated or laminated textile fabrics; to the Committee on Finance.

By Mr. CARPER (for himself and Mr. GREGG):

S. 3673. A bill to suspend temporarily the duty on certain women's footwear covering the ankle with coated or laminated textile fabrics; to the Committee on Finance.

By Mr. CARPER (for himself and Mr. GREGG):

S. 3674. A bill to suspend temporarily the duty on certain women's footwear not covering the ankle with coated or laminated textile fabrics; to the Committee on Finance.

By Mr. CARPER:

S. 3675. A bill to extend the suspension of duty on Methyl 2-[[[4-(dimethylamino)-6-(2,2,2-trifluoroethoxy)-1,3,5-trimethylamino]carbonyl]amino]sulfonyl]-3-methylbenzoate and application adjuvants; to the Committee on Finance.

By Mr. GRASSLEY:

S. 3676. A bill to amend the Congressional Accountability Act of 1995 to apply whistleblower protections available to certain executive branch employees to legislative branch employees, and for other purposes; to the Committee on Homeland Security and Governmental Affairs.

By Mr. BINGAMAN (for himself, Mr. SANTORUM, Mrs. MURRAY, Mr. AKAKA, Mr. JEFFORDS, Mr. KERRY, Mr. HARKIN, and Mr. LIEBERMAN):

S. 3677. A bill to amend title XVIII of the Social Security Act to eliminate the in the home restriction for Medicare coverage of mobility devices for individuals with expected long-term needs; to the Committee on Finance.

SUBMISSION OF CONCURRENT AND SENATE RESOLUTIONS

The following concurrent resolutions and Senate resolutions were read, and referred (or acted upon), as indicated:

By Mr. VOINOVICH (for himself, Mr. DEWINE, and Mr. ALLEN):

S. Res. 533. A resolution commemorating the 60th anniversary of the permanent integration of professional football by 4 pioneering players; considered and agreed to.

ADDITIONAL COSPONSORS

S. 195

At the request of Mr. LIEBERMAN, the name of the Senator from California (Mrs. BOXER) was added as a cosponsor of S. 195, a bill to provide for full voting representation in Congress for the citizens of the District of Columbia, and for other purposes.

S. 914

At the request of Mr. ALLARD, the name of the Senator from Wisconsin (Mr. KOHL) was added as a cosponsor of S. 914, a bill to amend the Public Health Service Act to establish a competitive grant program to build capacity in veterinary medical education and expand the workforce of veterinarians engaged in public health practice and biomedical research.

S. 1035

At the request of Mr. INHOFE, the name of the Senator from Arkansas (Mr. PRYOR) was added as a cosponsor of S. 1035, a bill to authorize the presentation of commemorative medals on behalf of Congress to Native Americans who served as Code Talkers during foreign conflicts in which the United States was involved during the 20th century in recognition of the service of those Native Americans to the United States.

S. 1597

At the request of Mr. ENZI, the name of the Senator from Pennsylvania (Mr. SANTORUM) was added as a cosponsor of S. 1597, a bill to award posthumously a Congressional gold medal to Constantino Brumidi.

S. 1864

At the request of Mr. TALENT, the name of the Senator from Georgia (Mr. ISAKSON) was added as a cosponsor of S. 1864, a bill to amend the Internal Revenue Code of 1986 to treat certain farming business machinery and equipment as 5-year property for purposes of depreciation.

S. 1907

At the request of Mr. JOHNSON, the name of the Senator from Wyoming (Mr. ENZI) was added as a cosponsor of S. 1907, a bill to promote the development of Native American small business concerns, and for other purposes.

S. 2014

At the request of Mr. DEWINE, the name of the Senator from Arkansas (Mr. PRYOR) was added as a cosponsor of S. 2014, a bill to amend title 38, United States Code, to expand and enhance educational assistance for survivors and dependents of veterans.

S. 2123

At the request of Mr. NELSON of Florida, his name was added as a cosponsor of S. 2123, a bill to modernize the manufactured housing loan insurance program under title I of the National Housing Act.

S. 2250

At the request of Mr. GRASSLEY, the names of the Senator from Indiana (Mr. BAYH) and the Senator from Arkansas (Mrs. LINCOLN) were added as cosponsors of S. 2250, a bill to award a congressional gold medal to Dr. Norman E. Borlaug.

S. 2491

At the request of Mr. CORNYN, the name of the Senator from Oregon (Mr.

SMITH) was added as a cosponsor of S. 2491, a bill to award a Congressional gold medal to Byron Nelson in recognition of his significant contributions to the game of golf as a player, a teacher, and a commentator.

S. 2590

At the request of Mr. COBURN, the names of the Senator from Georgia (Mr. ISAKSON) and the Senator from Virginia (Mr. ALLEN) were added as cosponsors of S. 2590, a bill to require full disclosure of all entities and organizations receiving Federal funds.

S. 2677

At the request of Mr. SMITH, the name of the Senator from Pennsylvania (Mr. SANTORUM) was added as a cosponsor of S. 2677, a bill to amend the Internal Revenue Code of 1986 to extend the investment tax credit with respect to solar energy property and qualified fuel cell property, and for other purposes.

S. 2762

At the request of Mr. AKAKA, the name of the Senator from Maine (Ms. COLLINS) was added as a cosponsor of S. 2762, a bill to amend title 38, United States Code, to ensure appropriate payment for the cost of long-term care provided to veterans in State homes, and for other purposes.

S. 3238

At the request of Mr. CORNYN, the names of the Senator from California (Mrs. FEINSTEIN) and the Senator from Massachusetts (Mr. KENNEDY) were added as cosponsors of S. 3238, a bill to require the Secretary of the Treasury to mint coins in commemoration of the 50th anniversary of the establishment of the National Aeronautics and Space Administration and the Jet Propulsion Laboratory.

S. 3659

At the request of Mrs. LINCOLN, the name of the Senator from Louisiana (Ms. LANDRIEU) was added as a cosponsor of S. 3609, a bill to amend title XVIII of the Social Security Act to provide for the treatment of certain physician pathology services under the Medicare program.

S. 3659

At the request of Ms. SNOWE, the names of the Senator from Louisiana (Ms. LANDRIEU), the Senator from Indiana (Mr. BAYH) and the Senator from Arkansas (Mr. PRYOR) were added as cosponsors of S. 3659, a bill to reauthorize and improve the women's small business ownership programs of the Small Business Administration, and for other purposes.

S. 3667

At the request of Mr. FRIST, the name of the Senator from Kentucky (Mr. BUNNING) was added as a cosponsor of S. 3667, a bill to promote nuclear nonproliferation in North Korea.

S. RES. 407

At the request of Mr. MENENDEZ, the name of the Senator from New York

(Mrs. CLINTON) was added as a cosponsor of S. Res. 407, a resolution recognizing the African American Spiritual as a national treasure.

S. RES. 420

At the request of Mr. SMITH, the name of the Senator from Oregon (Mr. WYDEN) was added as a cosponsor of S. Res. 420, a resolution expressing the sense of the Senate that effective treatment and access to care for individuals with psoriasis and psoriatic arthritis should be improved.

S. RES. 507

At the request of Mr. BIDEN, the names of the Senator from Illinois (Mr. DURBIN) and the Senator from Georgia (Mr. ISAKSON) were added as cosponsors of S. Res. 507, a resolution designating the week of November 5 through November 11, 2006, as "National Veterans Awareness Week" to emphasize the need to develop educational programs regarding the contributions of veterans to the country.

S. RES. 510

At the request of Mr. MARTINEZ, the names of the Senator from Delaware (Mr. BIDEN), the Senator from Connecticut (Mr. LIEBERMAN) and the Senator from Louisiana (Ms. LANDRIEU) were added as cosponsors of S. Res. 510, a resolution designating the period beginning on June 28, 2006, and ending on July 5, 2006, as "National Clean Beaches Week", supporting the goals and ideals of that week, and recognizing the considerable value and role of beaches in the culture of the United States.

S. RES. 531

At the request of Mr. LIEBERMAN, the names of the Senator from Massachusetts (Mr. KENNEDY), the Senator from Massachusetts (Mr. KERRY) and the Senator from Illinois (Mr. DURBIN) were added as cosponsors of S. Res. 531, a resolution to urge the President to appoint a Presidential Special Envoy for Sudan.

STATEMENTS ON INTRODUCED BILLS AND JOINT RESOLUTIONS

By Mr. HATCH (for himself and Mr. KENNEDY):

S. 3668. A bill to amend the Public Health Service Act to provide for the expansion and improvement of traumatic brain injury programs, and for other purposes; to the Committee on Health, Education, Labor, and Pensions.

Mr. HATCH. Mr. President, as we face the close of the 109th Congress in the coming months, I feel it is important that we reauthorize the Traumatic Brain Injury Act. It is my pleasure to introduce this reauthorization bill along with the ranking minority member of the Senate Health, Education, Labor, and Pension Committee, Senator TED KENNEDY, with whom I worked on the original legislation over

10 years ago. Our colleagues on the House side, Representatives BILL PASCRELL, JR., and TODD RUSSELL PLATTS, have just recently introduced a companion bill with the same goal of reauthorizing the TBI Act this year.

Sustaining a traumatic brain injury—or TBI—can be both catastrophic and devastating. The financial and emotional costs to the individual, family, and community are enormous. Traumatic brain injuries contribute to a substantial number of deaths and cases of permanent disability annually.

Of the 1.4 million who sustain a TBI each year in the United States: 50,000 die; 235,000 are hospitalized; and 1.1 million are treated and released from an emergency department. Brain injuries are the most frequent reasons for visits to physicians and emergency rooms.

These statistics are more revealing when one considers that every 16 seconds someone in the U.S. sustains a head injury; every 12 minutes, one of these people will die and another will become permanently disabled. Of those who survive, each year, an estimated 80,000 to 90,000 people experience the onset of long-term disability associated with a TBI. An additional 2,000 will exist in a persistent vegetative state.

Even more startling is the fact that brain injury kills more Americans under the age of 34 than all other causes combined and has claimed more lives since the Turn of the Century than all United States wars combined. Sixty-eight percent of war veterans are returning home with sustained brain injuries.

The distress of TBI is not limited to diagnosis. A survivor of a severe brain injury typically faces 5 to 10 years of intensive services and estimated lifetime costs can exceed \$4 million. Direct medical costs and indirect costs such as lost productivity of TBI totaled an estimated \$60 billion in the United States in 2000.

The Traumatic Brain Injury Act is the only Federal legislation specifically addressing issues faced by 5.3 million American children and adults who live with a long-term disability as a result of traumatic brain injury. Reauthorization of the Traumatic Brain Injury Act will provide for the continuation of research, not only for the treatment of TBI but also for prevention and awareness programs which will help decrease the occurrence of traumatic brain injury and improve the long-term outcome.

In 2006, Congress has an opportunity to strengthen the TBI Act by authorizing the Centers for Disease Control and Prevention, CDC, to determine the incidence and prevalence of traumatic brain injury in the general population of the United States, including all age groups and persons in institutional settings such as nursing homes, correctional facilities, psychiatric hospitals,

child care facilities, and residential institutes for people with developmental disabilities.

This legislation authorizes the Health Resources and Services Administration, HRSA, to make grants for projects of national significance that improve individual and family access to service systems; assist states in developing service capacity; improve monitoring and evaluation of rehabilitation services and supports; and address emerging needs of servicemen and women, veterans, and individuals and families who have experienced brain injury through service delivery demonstration projects.

This bill also authorizes HRSA to include the American Indian Consortium as an eligible recipient of competitive grants awarded to States, Territories, and the District of Columbia to develop comprehensive system of services and supports nationwide.

Furthermore, this bill instructs HRSA and the Administration on Developmental Disabilities to coordinate data collection regarding protection and advocacy services.

The TBI Act offers balanced and coordinated public policy in brain injury prevention, research, education, and community-based services and supports for individuals living with traumatic brain injury and their families.

Mr. President, reauthorization of the Traumatic Brain Injury Act will further provide mechanisms for the prevention, treatment and the improvement of the quality of life for those Americans and their families who may sustain such a devastating disability. I ask my colleagues' support in promptly reauthorizing the Traumatic Brain Injury Act.

Mr. KENNEDY. Mr. President, today I am proud to join with Senator HATCH in sponsoring the reauthorization of the Traumatic Brain Injury Act. This bill will provide valuable assistance to the millions of children and adults in our nation who are facing an array of problems because of their injuries.

First, it is critical for us to acknowledge the important role which the programs authorized under this bill can play for the large number of soldiers wounded in the war. As of June 2006—almost 19,000 service members have been wounded in Iraq and data continue to demonstrate that brain injuries are approximately two-thirds of the injuries suffered in the war.

On top of that, there is an extremely high incidence of traumatic brain injuries among children between birth and age 14—approximately 475,000 a year—and some of the highest numbers of injuries are among children under the age of five.

Soldiers and children—I cannot think of groups more deserving of our attention.

Reauthorization of the TBI Act is crucial to continued federal funding for

a range of traumatic brain injury programs. The bill will reauthorize grants that have provided vital assistance to States, Territories, the District of Columbia, and American Indian Consortia in building or enhancing coordinated systems of community-based services and supports for children and adults with traumatic brain injuries.

In addition, when Congress first authorized the Traumatic Brain Injury Act as part of the Children's Health Act of 2000, it had the foresight to include funding for the Protection and Advocacy for Individuals with Traumatic Brain Injury Program. This program has played a crucial role because individuals with traumatic brain injury have help in returning to work, finding a place to live, accessing needed supports and services such as attendant care and assistive technology, and obtaining appropriate mental health, substance abuse, and rehabilitation services. Often those with brain injuries—including our returning veterans—are forced to remain in extremely expensive institutional settings far longer than necessary because the community-based supports and services they need are not available. Effective protection and advocacy services for people with traumatic brain injury can lead both to reduced Government expenditures and increased productivity, independence and community integration for patients. However, those who advocate for the injured must possess specialized skills and the work is often time-intensive.

This legislation also provides funding for critical CDC programs that provide extremely important surveillance and injury prevention information.

In a time when both the administration and Congress are searching for programs that provide the right kind of "bang for the Federal buck," the recent findings in an Institute of Medicine March 2006 report show that the TBI programs work. Last year the various programs in the TBI bill were funded for a total of only \$12 million—yet look at the good they do. Not only should these programs be reauthorized, the funding also should be increased.

The IOM calls the TBI programs an "overall success," stating that "there is considerable value in providing funding," and "it is worrisome that the modestly budgeted HRSA TBI Program continues to be vulnerable to budget cuts." As the IOM study suggests, this program must be continued and allowed to grow in order to ensure that each state has the resources necessary to maintain critical services and advocacy for the estimated 5.3 million people currently living with disabilities resulting from brain injury.

Again, soldiers and children, I cannot think of two more deserving groups of people in our Nation. We owe them the services and advocacy that these critical programs offer. And I urge our col-

leagues to support the passage of this important piece of bipartisan disability legislation this year.

By Mr. GRASSLEY:

S. 3676. A bill to amend the Congressional Accountability Act of 1995 to apply whistleblower protections available to certain executive branch employees to legislative branch employees, and for other purposes; to the Committee on Homeland Security and Governmental Affairs.

Mr. GRASSLEY. Mr. President, I rise today to announce that I am introducing a bill that will extend whistleblower protections currently available to certain executive branch employees to legislative branch employees.

This bill is long overdue. The Office of Compliance has called for these changes on numerous occasions in recent years, and they are very supportive of this bill.

I have fought for whistleblowers for many years. Whistleblowers are the key to exposing a dysfunctional bureaucracy. Government agencies too often want to cover up their mistakes. Without insiders being brave enough to uncover these violations or waste, the American taxpayer would continue to pay for them. These people should not be punished for bringing the misdeeds to light.

Whistleblowers in the executive branch have helped me do my job of oversight. We have done a good job to make sure that whistleblowers in the executive branch are protected. It is simply not fair, nor is it good governance for Congress to enact whistleblower protections on the other branches of Government without giving its own employees the same consideration. This bill merely extends those same protections that other Government employees enjoy to Congress's own employees.

I fully back hard-working Government employees who serve to protect our country, and I hope my colleagues will join me. Congress needs to make sure that its own employees can speak up without retaliation when they blow the whistle on fraud, waste, or abuse.

Mr. President, I ask unanimous consent that the text of this bill be printed in the RECORD.

There being no objection, the text of the bill was ordered to be printed in the RECORD, as follows:

S. 3676

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. APPLICATION OF WHISTLEBLOWER PROTECTION RULES TO LEGISLATIVE BRANCH EMPLOYEES.

(a) IN GENERAL.—Part A of title II of the Congressional Accountability Act of 1995 (2 U.S.C. 1311 et seq.) is amended—

(1) in the heading, by striking "FAIR LABOR STANDARDS," and all that follows and inserting "AND OTHER PROTECTIONS AND BENEFITS";

(2) by redesignating section 207 as section 208; and

(3) by inserting after section 206 the following:

“SEC. 207. RIGHTS AND PROTECTIONS UNDER WHISTLEBLOWER PROTECTION RULES.

“(a) RIGHTS AND PROTECTIONS DESCRIBED.—
“(1) IN GENERAL.—No employing office may take or fail to take, or threaten to take or fail to take, a personnel action (within the meaning of chapter 23 of title 5, United States Code) with respect to any covered employee or applicant for employment because of—

“(A) any disclosure of information by a covered employee or applicant which the employee or applicant reasonably believes evidences—

“(i) a violation of any law, rule, or regulation; or

“(ii) gross mismanagement, a gross waste of funds, an abuse of authority, or a substantial and specific danger to public health or safety;

if such disclosure is not specifically prohibited by law and if such information is not specifically required by Executive order or the rules of the Senate or the House of Representatives to be kept secret in the interest of national defense or the conduct of foreign affairs; or

“(B) any disclosure to the General Counsel, or to the Inspector General of a legislative or executive agency or another employee designated by the head of the legislative or executive agency to receive such disclosures, of information which the employee or applicant reasonably believes evidences—

“(i) a violation of any law, rule, or regulation; or

“(ii) gross mismanagement, a gross waste of funds, an abuse of authority, or a substantial and specific danger to public health or safety.

“(2) DEFINITIONS.—For purposes of this section and for purposes of applying the procedures established under title IV for the consideration of alleged violations of this section—

“(A) the term ‘covered employee’ includes an employee of the Government Accountability Office or Library of Congress; and

“(B) the term ‘employing office’ includes the Government Accountability Office and the Library of Congress.

“(b) REMEDY.—The remedy for a violation of subsection (a) shall be such remedy as would be appropriate if awarded under chapter 12 of title 5, United States Code, with respect to a prohibited personnel practice described in section 2302(b)(8) of such title.

“(c) REGULATIONS TO IMPLEMENT SECTION.—

“(1) IN GENERAL.—The Board shall, pursuant to section 304, issue regulations to implement this section.

“(2) AGENCY REGULATIONS.—The regulations issued under paragraph (1) shall be the same as the substantive regulations promulgated by the Merit Systems Protection Board to implement chapters 12 and 23 of title 5, United States Code, except to the extent that the Board of Directors of the Office of Compliance may determine, for good cause shown and stated together with the regulation, that a modification of such regulations would be more effective for the implementation of the rights and protections under this section.”

(b) TECHNICAL AND CONFORMING AMENDMENTS.—

(1) TABLE OF CONTENTS.—The table of contents for part A of title II of the Congress-

sional Accountability Act of 1995 is amended—

(A) in the item relating to part A, by striking “FAIR LABOR STANDARDS,” and all that follows and inserting “AND OTHER PROTECTIONS AND BENEFITS”;

(B) by redesignating the item relating to section 207 as relating to section 208; and

(C) by inserting after the item relating to section 206 the following:

“Sec. 207. Rights and protections under whistleblower protection rules.”

(2) APPLICATION OF LAWS.—Section 102(a) of the Congressional Accountability Act of 1995 (2 U.S.C. 1302(a)) is amended by adding at the end the following:

“(12) Section 2302(b)(8) of title 5, United States Code.”

By Mr. BINGAMAN (for himself, Mr. SANTORUM, Mrs. MURRAY, Mr. AKAKA, Mr. JEFFORDS, Mr. KERRY, Mr. HARKIN, and Mr. LIEBERMAN):

S. 3677. A bill to amend title XVIII on the Social Security Act to eliminate the in the home restriction for Medicare coverage of mobility devices for individuals with expected long-term needs; to the Committee on Finance.

Mr. BINGAMAN. Mr. President, I rise today to introduce the Medicare Independent Living Act of 2006 with Senators SANTORUM, MURRAY, COLLINS, AKAKA, JEFFORDS, KERRY, HARKIN, KENNEDY, and LIEBERMAN. This legislation would eliminate Medicare’s “in the home” restriction for the coverage of mobility devices, including wheelchairs and scooters, for those with disabilities and expected long-term needs. This includes people with multiple sclerosis, paraplegia, osteoarthritis, and cerebrovascular disease that includes acute stroke and conditions like aneurysms.

As currently interpreted by the Centers for Medicare and Medicaid Services, CMS, the “in the home” restriction prevents beneficiaries from obtaining wheelchairs that are necessary for use outside the home. This precludes beneficiaries who need a wheelchair to access work, the community at-large, his or her place of worship, school, physician’s offices, or pharmacies.

On July 13, 2005, 34 senators wrote Secretary Leavitt asking the Department of Health and Human Services, or HHS, to modify the “in the home” requirement so as to “improve community access for Medicare beneficiaries with mobility impairments.”

Unfortunately, CMS continues to impose the “in the home” restriction on Medicare beneficiaries in need of mobility devices. The result is that people who may not need a wheelchair to get around their house but do need one to get around their communities, such as to a job, church, or the grocery store, can’t get Medicare to pay for one. As the Medicare Rights Center in a report entitled “Forced Isolation: Medicare’s ‘In The Home’ Coverage Standards for

Wheelchairs” in March 2004 notes, “This effectively disqualifies you from leaving your home without the assistance of others.”

Furthermore, in a Kansas City Star article dated July 3, 2005, Mike Oxford with the National Council on Independent Living noted, “You look at mobility assistance as a way to liberate yourself.” He added that the restriction “is just backward.”

In fact, policies such as these are not only backward but directly contradict numerous initiatives aimed at increasing community integration of people with disabilities, including the Americans with Disabilities Act, the Ticket-to-Work Program, the New Freedom Initiative, and the Olmstead Supreme Court decision.

According to the Medicare Rights Center update dated March 23, 2006, “This results in arbitrary denials. People with apartments too small for a power wheelchair are denied a device that could also get them down the street. Those in more spacious quarters get coverage, allowing them to scoot from room to room and to the grocery store. People who summon all their willpower and strength to hobble around a small apartment get no help for talks that are beyond them and their front door.”

In New Mexico, I have heard this complaint about the law repeatedly from our State’s most vulnerable disabled and senior citizens. People argue the provision is being misinterpreted by the administration and results in Medicare beneficiaries being trapped in their home.

The ITEM Coalition adds in a letter to CMS on this issue in November 25, 2005, “There continues to be no clinical basis for the ‘in the home’ restriction and by asking treating practitioners to document medical need only within the home setting, CMS is severely restricting patients from receiving the most appropriate devices to meet their mobility needs.”

Therefore, our bipartisan legislation would clarify that this restriction does not apply to mobility devices, including wheelchairs, for people with disabilities in the Medicare Program. The language change is fairly simple and simply clarifies that the “in the home” restriction for durable medical equipment does not apply in the case of mobility devices needed by Medicare beneficiaries with expected long-term needs for use “in customary settings such as normal domestic, vocational, and community activities.”

This legislation is certainly not intended to discourage CMS from dedicating its resources to reducing waste, fraud, and abuse in the Medicare system, as those efforts are critical to ensuring that Medicare remains financially viable and strong in the future. However, it should be noted that neither Medicaid nor the Department of

Veterans Affairs impose such “in the home” restrictions on mobility devices. As Senator BROWNBACK said to the Kansas City Star, it is important to lift the restriction “to reflect our goal of ensuring that Americans with disabilities are able to live independent, healthy, and productive lives.”

I thank Senators SANTORUM, MURRAY, COLLINS, AKAKA, JEFFORDS, KERRY, HARKIN, KENNEDY, and LIEBERMAN for cosponsoring this important legislation, and attached is a fact sheet that I request to be printed in the RECORD. I would also ask unanimous consent to have printed in the RECORD copies of the letter to the administration and the response that was received by Capitol Hill.

There being no objection, the additional material was ordered to be printed in the RECORD, as follows:

U.S. SENATE,
Washington, DC, July 13, 2005.

Re reconsideration of the Medicare “In the Home” requirement on wheelchair coverage.

Hon. MICHAEL O. LEAVITT,
Secretary, Department of Health and Human Services, Washington, DC.

DEAR SECRETARY LEAVITT: The undersigned members write to request that you modify the “in the home” requirement in Medicare’s wheeled mobility benefit to improve community access for Medicare beneficiaries with mobility impairments.

We commend CMS for its dedication to reducing waste, fraud and abuse in the Medicare system, particularly under the mobility device benefit, and fully support your intention to protect precious Medicare funds and resources. Additionally, we commend the agency for recently taking on the task of creating a new and, hopefully, more appropriate Medicare coverage criteria for mobility devices. However, we are concerned that CMS’ current interpretation of the “in the home” requirement may continue to act as an inappropriate restriction in meeting the real-life mobility needs of Medicare beneficiaries with physical disabilities and mobility impairments.

Recently CMS announced a final National Coverage Determination (NCD) for mobility assistance equipment (MAE) that fails to adequately address the concerns of beneficiaries and other parties with the “in the home” restriction.

In order to ensure that the “in the home” requirement does not act as a barrier to community participation for Medicare beneficiaries with disabilities and mobility impairments; we ask that you modify this requirement through the regulatory process. Additionally, if your agency concludes that the “in the home” requirement cannot be addressed through the regulatory process, we request that you respond with such information as quickly as possible, so that Congress may begin examining legislative alternatives.

We thank you for your consideration of this matter.

Sincerely,
Jeff Bingaman, Rick Santorum, John Kerry, Joseph I. Lieberman, Barbara Mikulski, Maria Cantwell, Edward M. Kennedy, Patty Murray, Evan Bayh, Mark Dayton, Jack Reed, Johnny Isakson, Sam Brownback, Jon S. Corzine,

James M. Talent, Pat Roberts, Frank Lautenberg.

James M. Jeffords, Christopher S. Bond, Mike DeWine, Daniel K. Akaka, Mary L. Landrieu, Debbie Stabenow, Charles E. Schumer, Ron Wyden, Herb Kohl, Patrick J. Leahy, Arlen Specter, Hillary Rodham Clinton, Christopher J. Dodd, John McCain, Carl Levin, Tom Harkin, Olympia J. Snowe.

THE SECRETARY OF
HEALTH AND HUMAN SERVICES,
Washington, DC, October 25, 2005.

Hon. CHARLES F. BASS,
House of Representatives,
Washington, DC.

DEAR MR. BASS: Thank you for your letter regarding the “in the home” requirement for Mobility Assistive Equipment (MAE).

The Centers for Medicare & Medicaid Services (CMS) is required to follow section 1861(n) of the Social Security Act (the Act) which states “the term ‘durable medical equipment’ includes iron lungs, oxygen tents, hospital beds, and wheelchairs (which may include a power-operated vehicle that may be appropriately used as a wheelchair, but only where the use of such a vehicle is determined to be necessary on the basis of the individual’s medical and physical condition and the vehicle meets such safety requirements as the Secretary may prescribe) used in the patient’s home (including an institution used as his home other than an institution that meets the requirements of subsection (e)(1) of this section or section 1819(a)(1)), whether furnished on a rental basis or purchased. . . .” CMS further defined the durable medical equipment (DME) benefit category at 42 CFR section 414.202 to include equipment that can (a) withstand repeated use, (b) is primarily and customarily used to serve a medical purpose, (c) is not generally useful in the absence of illness or injury, and (d) is appropriate for use in the home.

There are two practical requirements that must be satisfied for coverage of DME which are a logical result of the definition of DME:

(1) The equipment must be appropriate for use in the home. This requirement excludes a gasoline-powered vehicle, for example.

(2) The patient must have a need to use the equipment in the home. This requirement excludes equipment that is only necessary for use outside the patient’s home.

Therefore, we do not cover equipment if it is exclusively needed outside of the home. However, if DME is needed in the home and the beneficiary also uses it outside the home, the equipment would still be covered. For example, a high strength wheelchair may be covered when appropriate for home use even though it may also be useful outside the home. We do not have any restrictions on the use of the equipment outside of the home as long as there is also a need to use it in the home.

I hope this information has been helpful. Please call me if you have any further thoughts or questions. I will also provide this response to the cosigners of your letter.

Sincerely,

MICHAEL O. LEAVITT.

SUBMITTED RESOLUTIONS

SENATE RESOLUTION 533—COMMEMORATING THE 60TH ANNIVERSARY OF THE PERMANENT INTEGRATION OF PROFESSIONAL FOOTBALL BY 4 PIONEERING PLAYERS

Mr. VOINOVICH (for himself, Mr. DEWINE, and Mr. ALLEN) submitted the following resolution, which was considered and agreed to:

S. RES. 533

Whereas the integration of sports supported other ongoing efforts to permanently end racial segregation as an accepted practice in the United States;

Whereas, in 1946, 4 African-American football players, William “Bill” K. Willis and Marion Motley, who played for the Cleveland Browns, and Kenny Washington and Woody Strode, who played for the Los Angeles Rams, all signed contracts to play professional football;

Whereas, on August 7, 1946, Bill Willis was the first of this pioneering foursome to sign a contract to play professional football for the Cleveland Browns forever ending the race barrier in professional football, 1 full year before Jackie Robinson broke the race barrier in professional baseball;

Whereas, thanks to the significant contributions of Bill Willis and Marion Motley, the Cleveland Browns won the National Football League (NFL) Championship in 1950 which was the first year the Cleveland Browns played in the NFL;

Whereas, in addition to permanently ending the race barrier in professional football, Bill Willis and Marion Motley were recognized for their outstanding professional football careers by their election to the Pro Football Hall of Fame; and

Whereas 2006 marks the 60th anniversary of the permanent integration of professional football, and the NFL will commemorate this milestone during the 2006 Pro Football Hall of Fame Game: Now, therefore, be it

Resolved, That the Senate—

(1) recognizes the 60th anniversary of the permanent integration of professional football; and

(2) respectfully requests the Secretary of the Senate to transmit for appropriate display an enrolled copy of this resolution to—

(A) the Pro Football Hall of Fame in Canton, Ohio; and

(B) William K. Willis, the only surviving member of the pioneering foursome who permanently ended the race barrier in professional football.

AUTHORITY FOR COMMITTEES TO MEET

COMMITTEE ON ENERGY AND NATURAL RESOURCES

Mr. COBURN. Mr. President, I ask unanimous consent that the Committee on Energy and Natural Resources be authorized to meet during the session of the Senate on Monday, July 17, 2006, at 2:30 p.m. The purpose of this hearing is to receive testimony relating to the implementation of the Energy Policy Act of 2005 Provisions on Hydrogen and Fuel Cell Research and Development.

The PRESIDING OFFICER. Without objection, it is so ordered.

COMMITTEE ON FOREIGN RELATIONS

Mr. COBURN. Mr. President, I ask unanimous consent that the Committee on Foreign Relations be authorized to meet during the session of the Senate on Monday, July 17, 2006, at 3 p.m. to hold nominations hearings.

The PRESIDING OFFICER. Without objection, it is so ordered.

PRIVILEGES OF THE FLOOR

Mr. SPECTER. Mr. President, on behalf of the leader, I ask unanimous consent that floor privileges be granted for the duration of the stem cell debate to the following: Dr. Roger Johns of Senator HATCH's office; Laura Holland, Jeff McCaffrey, Jon Koegler, Martina Bebin, and Dave Schmickel of Senator ENZI's office; and Nicole Weitz of Senator FRIST's office.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

Mr. HARKIN. Mr. President, I ask unanimous consent that Nathan Porteshawver and Tracie Bryant of my staff be granted floor privileges for the duration of today's session.

On behalf of Senator KENNEDY, I ask unanimous consent that Ahmed Salem, an intern on his HELP Committee staff, be accorded floor privileges during the consideration of the three bills addressing the stem cell issue and all rollcall votes thereon.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

Mr. HARKIN. Mr. President, on behalf of Senator ROCKEFELLER, I ask unanimous consent that the following legislative fellows in his office be accorded floor privileges for the duration of Senate consideration of stem cell bills, and on all votes thereon: Dr. Al Pheley, a Robert Wood Johnson fellow; and Bruce Gilberg, an American Association for the Advancement of Sciences fellow.

Mr. COBURN. Mr. President, I ask unanimous consent that floor privileges be granted to Lesley Stewart of Senator ENZI's staff, and also Matt Blackburn of my staff for the duration of the stem cell debate.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BROWNBACK. Mr. President, I ask unanimous consent that the privilege of the floor be granted to Nicholas Greenway and Eugene Lipkin, interns here on Capitol Hill.

The PRESIDING OFFICER. Without objection, it is so ordered.

DEPARTMENT OF HOMELAND SECURITY APPROPRIATIONS ACT, 2007

On Thursday, July 13, 2006 the Senate passed H.R. 5441, as follows:

H.R. 5441

Resolved, That the bill from the House of Representatives (H.R. 5441) entitled "An Act

making appropriations for the Department of Homeland Security for the fiscal year ending September 30, 2007, and for other purposes," do pass with the following amendment:

Strike out all after the enacting clause and insert:

That the following sums are appropriated, out of any money in the Treasury not otherwise appropriated, for the Department of Homeland Security for the fiscal year ending September 30, 2007, and for other purposes, namely:

TITLE I

DEPARTMENTAL MANAGEMENT AND OPERATIONS

OFFICE OF THE SECRETARY AND EXECUTIVE MANAGEMENT

For necessary expenses of the Office of the Secretary of Homeland Security, as authorized by section 102 of the Homeland Security Act of 2002 (6 U.S.C. 112), and executive management of the Department of Homeland Security, as authorized by law, \$82,622,000: Provided, That not to exceed \$40,000 shall be for official reception and representation expenses.

OFFICE OF THE UNDER SECRETARY FOR MANAGEMENT

For necessary expenses of the Office of the Under Secretary for Management, as authorized by sections 701 through 705 of the Homeland Security Act of 2002 (6 U.S.C. 341 through 345), \$163,456,000: Provided, That not to exceed \$3,000 shall be for official reception and representation expenses: Provided further, That of the total amount provided, \$8,206,000 shall remain available until expended solely for the alteration and improvement of facilities, tenant improvements, and relocation costs to consolidate Department headquarters operations.

OFFICE OF THE CHIEF FINANCIAL OFFICER

For necessary expenses of the Office of the Chief Financial Officer, as authorized by section 103 of the Homeland Security Act of 2002 (6 U.S.C. 113), \$26,018,000.

OFFICE OF THE CHIEF INFORMATION OFFICER

For necessary expenses of the Office of the Chief Information Officer, as authorized by section 103 of the Homeland Security Act of 2002 (6 U.S.C. 113), and Department-wide technology investments, \$306,765,000; of which \$79,521,000 shall be available for salaries and expenses; and of which \$227,244,000 shall be available for development and acquisition of information technology equipment, software, services, and related activities for the Department of Homeland Security, and for the costs of conversion to narrowband communications, including the cost for operation of the land mobile radio legacy systems, to remain available until expended: Provided, That none of the funds appropriated shall be used to support or supplement the appropriations provided for the United States Visitor and Immigrant Status Indicator Technology project or the Automated Commercial Environment: Provided further, That the Chief Information Officer shall submit to the Committees on Appropriations of the Senate and the House of Representatives, not more than 60 days after the date of enactment of this Act, an expenditure plan for all information technology projects that: (1) are funded under this heading; or (2) are funded by multiple components of the Department of Homeland Security through reimbursable agreements: Provided further, That such expenditure plan shall include each specific project funded, key milestones, all funding sources for each project, details of annual and lifecycle costs, and projected cost savings or cost avoidance to be achieved by the project.

ANALYSIS AND OPERATIONS

For necessary expenses for information analysis and operations coordination activities, as

authorized by title II of the Homeland Security Act of 2002 (6 U.S.C. 121 et seq.), \$298,663,000, to remain available until September 30, 2008, of which not to exceed \$5,000 shall be for official reception and representation expenses.

OFFICE OF INSPECTOR GENERAL

For necessary expenses of the Office of Inspector General in carrying out the provisions of the Inspector General Act of 1978 (5 U.S.C. App.), \$90,185,000, of which not to exceed \$100,000 may be used for certain confidential operational expenses, including the payment of informants, to be expended at the direction of the Inspector General: Provided further, That the Department of Homeland Security Inspector General shall investigate whether, and to what extent, in adjusting and settling claims resulting from Hurricane Katrina, insurers making flood insurance coverage available under the Write-Your-Own program pursuant to section 1345 of the National Flood Insurance Act of 1968 (42 U.S.C. 4081) and subpart C of part 62 of title 44, Code of Federal Regulations, improperly attributed damages from such hurricane to flooding covered under the insurance coverage provided under the national flood insurance program rather than to windstorms covered under coverage provided by such insurers or by windstorm insurance pools in which such insurers participated: Provided further, That the Department of Homeland Security Inspector General may request the assistance of the Attorney General and the Department of Justice in conducting such investigation and may reimburse the costs of the Attorney General and the Department of Justice in providing such assistance from such funds: Provided further, That the Department of Homeland Security Inspector General shall submit a report to Congress not later than April 1, 2007, setting forth the conclusions of such investigation.

TITLE II

SECURITY, ENFORCEMENT, AND INVESTIGATIONS

UNITED STATES VISITOR AND IMMIGRANT STATUS INDICATOR TECHNOLOGY

For necessary expenses for the development of the United States Visitor and Immigrant Status Indicator Technology project, as authorized by section 110 of the Illegal Immigration Reform and Immigration Responsibility Act of 1996 (8 U.S.C. 1221 note), \$399,494,000, to remain available until expended: Provided, That of the total amount made available under this heading, \$200,000,000 may not be obligated for the United States Visitor and Immigrant Status Indicator Technology project until the Committees on Appropriations of the Senate and the House of Representatives receive and approve a plan for expenditure prepared by the Secretary of Homeland Security that—

(1) meets the capital planning and investment control review requirements established by the Office of Management and Budget, including Circular A-11, part 7;

(2) complies with the Department of Homeland Security information systems enterprise architecture;

(3) complies with the acquisition rules, requirements, guidelines, and systems acquisition management practices of the Federal Government;

(4) includes a certification by the Chief Information Officer of the Department of Homeland Security that an independent verification and validation agent is currently under contract for the project;

(5) is reviewed and approved by the Department of Homeland Security Investment Review Board, the Secretary of Homeland Security, and the Office of Management and Budget; and

(6) is reviewed by the Government Accountability Office.

CUSTOMS AND BORDER PROTECTION

SALARIES AND EXPENSES

For necessary expenses for enforcement of laws relating to border security, immigration, customs, and agricultural inspections and regulatory activities related to plant and animal imports; purchase and lease of up to 4,500 (3,500 for replacement only) police-type vehicles; and contracting with individuals for personal services abroad; \$5,329,874,000, of which \$44,000,000 shall be used to hire an additional 236 border patrol agents; of which \$3,026,000 shall be derived from the Harbor Maintenance Trust Fund for administrative expenses related to the collection of the Harbor Maintenance Fee under section 9505(c)(3) of the Internal Revenue Code of 1986 (26 U.S.C. 9505(c)(3)) and notwithstanding section 1511(e)(1) of the Homeland Security Act of 2002 (6 U.S.C. 551(e)(1)); of which not to exceed \$45,000 shall be for official reception and representation expenses; of which not less than \$172,676,000 shall be for Air and Marine Operations; of which such sums as become available in the Customs User Fee Account, except sums subject to section 13031(f)(3) of the Consolidated Omnibus Budget Reconciliation Act of 1985 (19 U.S.C. 58c(f)(3)), shall be derived from that account; of which not to exceed \$150,000 shall be available for payment for rental space in connection with preclearance operations; of which not to exceed \$1,000,000 shall be for awards of compensation to informants, to be accounted for solely under the certificate of the Secretary of Homeland Security: Provided, That for fiscal year 2007, the overtime limitation prescribed in section 5(c)(1) of the Act of February 13, 1911 (19 U.S.C. 267(c)(1)) shall be \$35,000; and notwithstanding any other provision of law, none of the funds appropriated by this Act may be available to compensate any employee of United States Customs and Border Protection for overtime, from whatever source, in an amount that exceeds such limitation, except in individual cases determined by the Secretary of Homeland Security, or the designee of the Secretary, to be necessary for national security purposes, to prevent excessive costs, or in cases of immigration emergencies.

AUTOMATION MODERNIZATION

For expenses for customs and border protection automated systems, \$461,207,000, to remain available until expended, of which not less than \$318,490,000 shall be for the development of the Automated Commercial Environment: Provided, That none of the funds made available under this heading may be obligated for the Automated Commercial Environment until the Committees on Appropriations of the Senate and the House of Representatives receive and approve a plan for expenditure prepared by the Secretary of Homeland Security that—

(1) meets the capital planning and investment control review requirements established by the Office of Management and Budget, including Circular A-11, part 7;

(2) complies with the Department of Homeland Security information systems enterprise architecture;

(3) complies with the acquisition rules, requirements, guidelines, and systems acquisition management practices of the Federal Government;

(4) includes a certification by the Chief Information Officer of the Department of Homeland Security that an independent verification and validation agent is currently under contract for the project;

(5) is reviewed and approved by the Department of Homeland Security Investment Review Board, the Secretary of Homeland Security, and the Office of Management and Budget; and

(6) is reviewed by the Government Accountability Office.

TECHNOLOGY MODERNIZATION

For expenses for customs and border protection technology systems, \$131,559,000, to remain available until expended: Provided, That of the funds made available under this heading, \$100,000,000 may not be obligated until the Committees on Appropriations of the Senate and the House of Representatives receive and approve a plan for expenditure prepared by the Secretary of Homeland Security that—

(1) meets the capital planning and investment control review requirements established by the Office of Management and Budget, including Circular A-11, part 7;

(2) complies with the Department of Homeland Security information systems enterprise architecture;

(3) complies with the acquisition rules, requirements, guidelines, and systems acquisition management practices of the Federal Government;

(4) includes a certification by the Chief Information Officer of the Department of Homeland Security that an independent verification and validation agent is currently under contract for the project;

(5) is reviewed and approved by the Department of Homeland Security Investment Review Board, the Secretary of Homeland Security, and the Office of Management and Budget; and

(6) is reviewed by the Government Accountability Office.

AIR AND MARINE INTERDICTION, OPERATIONS, MAINTENANCE, AND PROCUREMENT (INCLUDING RESCISSION OF FUNDS)

For necessary expenses for the operations, maintenance, and procurement of marine vessels, aircraft, unmanned aerial vehicles, and other related equipment of the air and marine program, including operational training and mission-related travel, and rental payments for facilities occupied by the air or marine interdiction and demand reduction programs, the operations of which include the following: the interdiction of narcotics and other goods; the provision of support to Federal, State, and local agencies in the enforcement or administration of laws enforced by the Department of Homeland Security; and at the discretion of the Secretary of Homeland Security, the provision of assistance to Federal, State, and local agencies in other law enforcement and emergency humanitarian efforts, \$472,499,000, to remain available until expended: Provided, That no aircraft or other related equipment, with the exception of aircraft that are one of a kind and have been identified as excess to United States Customs and Border Protection requirements and aircraft that have been damaged beyond repair, shall be transferred to any other Federal agency, department, or office outside of the Department of Homeland Security during fiscal year 2007 without the prior approval of the Committees on Appropriations of the Senate and the House of Representatives.

In addition, of the funds appropriated under this heading in title II of the Department of Homeland Security Appropriations Act, 2006 (Public Law 109-90; 119 Stat. 2068) for a covert manned surveillance aircraft, \$14,000,000 are rescinded.

CONSTRUCTION

For necessary expenses to plan, construct, renovate, equip, and maintain buildings and facilities necessary for the administration and enforcement of the laws relating to customs and immigration, \$288,084,000, to remain available until expended.

IMMIGRATION AND CUSTOMS ENFORCEMENT SALARIES AND EXPENSES

For necessary expenses for enforcement of immigration and customs laws, detention and removals, and investigations; and purchase and

lease of up to 2,740 (2,000 for replacement only) police-type vehicles; \$3,740,357,000, of which not to exceed \$7,500,000 shall be available until expended for conducting special operations under section 3131 of the Customs Enforcement Act of 1986 (19 U.S.C. 2081); of which not to exceed \$15,000 shall be for official reception and representation expenses; of which not to exceed \$1,000,000 shall be for awards of compensation to informants, to be accounted for solely under the certificate of the Secretary of Homeland Security; of which not less than \$102,000 shall be for promotion of public awareness of the child pornography tipline; of which not less than \$203,000 shall be for Project Alert; of which not less than \$5,400,000 may be used to facilitate agreements consistent with section 287(g) of the Immigration and Nationality Act (8 U.S.C. 1357(g)); and of which not to exceed \$11,216,000 shall be available to fund or reimburse other Federal agencies for the costs associated with the care, maintenance, and repatriation of smuggled illegal aliens: Provided, That none of the funds made available under this heading shall be available to compensate any employee for overtime in an annual amount in excess of \$35,000, except that the Secretary of Homeland Security, or the designee of the Secretary, may waive that amount as necessary for national security purposes and in cases of immigration emergencies: Provided further, That none of the funds in this Act or any other appropriations Act may be used to fund any activity other than those activities funded in fiscal year 2005 to facilitate agreements consistent with section 287(g) of the Immigration and Nationality Act (8 U.S.C. 1357(g)): Provided further, That of the total amount provided, \$15,770,000 shall be for activities to enforce laws against forced child labor in fiscal year 2007, of which not to exceed \$6,000,000 shall remain available until expended: Provided further, That an additional \$58,000,000 shall be available under this heading and authorized for 1,700 additional detention beds spaces and the necessary operational and mission support positions, information technology, relocation costs, and training for those beds and the amount made available under the heading "DISASTER RELIEF" in this Act is reduced by \$58,000,000.

FEDERAL PROTECTIVE SERVICE

The revenues and collections of security fees credited to this account, not to exceed \$516,011,000, shall be available until expended for necessary expenses related to the protection of federally-owned and leased buildings and for the operations of the Federal Protective Service.

AUTOMATION MODERNIZATION

For expenses of immigration and customs enforcement automated systems, \$20,000,000, to remain available until expended: Provided, That of the funds made available under this heading, \$16,000,000 may not be obligated until the Committees on Appropriations of the Senate and the House of Representatives receive and approve a plan for expenditure prepared by the Secretary of Homeland Security that—

(1) meets the capital planning and investment control review requirements established by the Office of Management and Budget, including Circular A-11, part 7;

(2) complies with the Department of Homeland Security information systems enterprise architecture;

(3) complies with the acquisition rules, requirements, guidelines, and systems acquisition management practices of the Federal Government;

(4) includes a certification by the Chief Information Officer of the Department of Homeland Security that an independent verification and validation agent is currently under contract for the project;

(5) is reviewed and approved by the Department of Homeland Security Investment Review

Board, the Secretary of Homeland Security, and the Office of Management and Budget; and

(6) is reviewed by the Government Accountability Office.

CONSTRUCTION

For necessary expenses to plan, construct, renovate, equip, and maintain buildings and facilities necessary for the administration and enforcement of the laws relating to customs and immigration, \$101,281,000, to remain available until expended.

TRANSPORTATION SECURITY ADMINISTRATION

AVIATION SECURITY

For necessary expenses of the Transportation Security Administration related to providing civil aviation security services under the Aviation and Transportation Security Act (49 U.S.C. 40101 note; Public Law 107-71; 115 Stat. 597), \$4,751,580,000, to remain available until September 30, 2008, of which not to exceed \$10,000 shall be for official reception and representation expenses: Provided, That of the total amount made available under this heading, not to exceed \$3,790,132,000 shall be for screening operations, of which \$141,400,000 shall be available only for procurement of checked baggage explosive detection systems and \$171,500,000 shall be available only for installation of checked baggage explosive detection systems; and not to exceed \$961,448,000 shall be for aviation security direction and enforcement presence: Provided further, That the Transportation Security Administration shall provide passenger and baggage screeners and related resources at the New Castle Airport in Wilmington, Delaware, as long as commercial air service is provided at that airport: Provided further, That of the funds appropriated under this heading, \$25,000,000 shall not be obligated until after the Secretary of Homeland Security submits to the Committees on Appropriations of the Senate and the House of Representatives a detailed report in response to findings in the Department of Homeland Security Office of Inspector General report (OIG-04-44) concerning contractor fees: Provided further, That security service fees authorized under section 44940 of title 49, United States Code, shall be credited to this appropriation as offsetting collections and shall be available only for aviation security: Provided further, That the sum herein appropriated from the General Fund shall be reduced on a dollar-for-dollar basis as such offsetting collections are received during fiscal year 2007, so as to result in a final fiscal year appropriation from the General Fund estimated at not more than \$2,331,580,000: Provided further, That any security service fees collected in excess of the amount made available under this heading shall become available during fiscal year 2008: Provided further, That notwithstanding section 44923 of title 49, United States Code, the share of the cost of the Federal Government for a project under any letter of intent shall be 75 percent for any medium or large hub airport and not more than 90 percent for any other airport, and all funding provided by section 44923(h) of title 49 United States Code, or from appropriations authorized under section 44923(i)(1) of title 49, United States Code, may be distributed in any manner determined necessary to ensure aviation security and to fulfill the Government's planned cost share under existing letters of intent: Provided further, That Members of the United States House of Representatives and United States Senate, including the leadership; and the heads of Federal agencies and commissions, including the Secretary, Under Secretaries, and Assistant Secretaries of the Department of Homeland Security; the United States Attorney General and Assistant Attorneys General and the United States attorneys; and senior members of the Executive Office of the President, including the Director of the Office of Management and Budget; shall not

be exempt from Federal passenger and baggage screening: Provided further, That beginning in fiscal year 2007 and thereafter, reimbursement for security services and related equipment and supplies provided in support of general aviation access to the Ronald Reagan Washington National Airport shall be credited to this appropriation and shall be available until expended solely for these purposes.

SURFACE TRANSPORTATION SECURITY

For necessary expenses of the Transportation Security Administration related to providing surface transportation security activities, \$37,200,000, to remain available until September 30, 2008.

TRANSPORTATION THREAT ASSESSMENT AND CREDENTIALING

For necessary expenses for the development and implementation of screening programs of the Office of Transportation Threat Assessment and Credentialing, \$29,700,000, to remain available until September 30, 2008.

TRANSPORTATION SECURITY SUPPORT

For necessary expenses of the Transportation Security Administration related to providing transportation security support and intelligence under the Aviation and Transportation Security Act (Public Law 107-71; 115 Stat. 597; 49 U.S.C. 40101 note), \$618,865,000, to remain available until September 30, 2008.

FEDERAL AIR MARSHALS

For necessary expenses of the Federal Air Marshals, \$699,294,000.

UNITED STATES COAST GUARD

OPERATING EXPENSES

For necessary expenses for the operation and maintenance of the United States Coast Guard not otherwise provided for; purchase or lease of not to exceed 25 passenger motor vehicles, which shall be for replacement only; payments under section 156 of Public Law 97-377 (42 U.S.C. 402 note; 96 Stat. 1920); and recreation and welfare; \$5,534,349,000, of which \$340,000,000 shall be for defense-related activities; of which \$24,255,000 shall be derived from the Oil Spill Liability Trust Fund to carry out the purposes of section 1012(a)(5) of the Oil Pollution Act of 1990 (33 U.S.C. 2712(a)(5)); and of which not to exceed \$10,000 shall be for official reception and representation expenses: Provided, That none of the funds made available by this or any other Act shall be available for administrative expenses in connection with shipping commissioners in the United States: Provided further, That none of the funds made available by this Act shall be for expenses incurred for yacht documentation under section 12109 of title 46, United States Code, except to the extent fees are collected from yacht owners and credited to this appropriation.

ENVIRONMENTAL COMPLIANCE AND RESTORATION

For necessary expenses to carry out the environmental compliance and restoration functions of the United States Coast Guard under chapter 19 of title 14, United States Code, \$10,880,000, to remain available until expended.

RESERVE TRAINING

For necessary expenses of the Coast Guard Reserve, as authorized by law; operations and maintenance of the reserve program; personnel and training costs; and equipment and services; \$123,948,000.

ACQUISITION, CONSTRUCTION, AND IMPROVEMENTS (INCLUDING RESCISSIONS OF FUNDS)

For necessary expenses of acquisition, construction, renovation, and improvement of aids to navigation, shore facilities, vessels, and aircraft, including equipment related thereto; and maintenance, rehabilitation, lease and operation of facilities and equipment, as authorized by law; \$1,145,329,000, of which \$19,800,000 shall be derived from the Oil Spill Liability Trust

Fund to carry out the purposes of section 1012(a)(5) of the Oil Pollution Act of 1990 (33 U.S.C. 2712(a)(5)); of which \$24,750,000 shall be available until September 30, 2011, to acquire, repair, renovate, or improve vessels, small boats, and related equipment; of which \$14,000,000 shall be available until September 30, 2011, to increase aviation capability; of which \$92,268,000 shall be available until September 30, 2009, for other equipment; of which \$20,680,000 shall be available until September 30, 2009, for shore facilities and aids to navigation facilities; and of which \$993,631,000 shall be available until September 30, 2011, for the Integrated Deepwater Systems program: Provided, That the Commandant of the Coast Guard is authorized to dispose of surplus real property, by sale or lease, and the proceeds shall be credited to this appropriation as offsetting collections and shall be available until September 30, 2009: Provided further, That the Secretary of Homeland Security shall submit to the Committees on Appropriations of the Senate and the House of Representatives, in conjunction with the President's fiscal year 2008 budget, a review of the Revised Deepwater Implementation Plan that identifies any changes to the plan for the fiscal year; an annual performance comparison of Deepwater assets to pre-Deepwater legacy assets; a status report of legacy assets; a detailed explanation of how the costs of legacy assets are being accounted for within the Deepwater program; an explanation of why many assets that are elements of the Integrated Deepwater System are not accounted for within the Deepwater appropriation under this heading; a description of the competitive process conducted in all contracts and subcontracts exceeding \$5,000,000 within the Deepwater program; a description of how the Coast Guard is planning for the human resource needs of Deepwater assets; and the earned value management system gold card data for each Deepwater asset: Provided further, That the Secretary shall submit to the Committees on Appropriations of the Senate and the House of Representatives a comprehensive review of the Revised Deepwater Implementation Plan every 5 years, beginning in fiscal year 2011, that includes a complete projection of the acquisition costs and schedule for the duration of the plan through fiscal year 2027: Provided further, That the Secretary shall annually submit to the Committees on Appropriations of the Senate and the House of Representatives, at the time that the President's budget is submitted under section 1105(a) of title 31, United States Code, a future-years capital investment plan for the Coast Guard that identifies for each capital budget line item—

(1) the proposed appropriation included in that budget;

(2) the total estimated cost of completion;

(3) projected funding levels for each fiscal year for the next five fiscal years or until project completion, whichever is earlier;

(4) an estimated completion date at the projected funding levels; and

(5) changes, if any, in the total estimated cost of completion or estimated completion date from previous future-years capital investment plans submitted to the Committees on Appropriations of the Senate and the House of Representatives: Provided further, That the Secretary shall ensure that amounts specified in the future-years capital investment plan are consistent to the maximum extent practicable with proposed appropriations necessary to support the programs, projects, and activities of the Coast Guard in the President's budget as submitted under section 1105(a) of title 31, United States Code, for that fiscal year: Provided further, That any inconsistencies between the capital investment plan and proposed appropriations shall be identified and justified.

In addition, of the funds appropriated under this heading in title II of the Department of Homeland Security Appropriations Act, 2006 (Public Law 109-90; 119 Stat. 2087), \$79,200,000 are rescinded from the unexpended balances specifically identified in the Joint Explanatory Statement (House Report 109-241) accompanying that Act for the Fast Response Cutter, the service life extension program of the current 110-foot Island Class patrol boat fleet, and accelerated design and production of the Fast Response Cutter.

In addition, of the funds appropriated under this heading in title II of the Department of Homeland Security Appropriations Act, 2006 (Public Law 109-90; 119 Stat. 2087), \$1,933,000 are rescinded from the unexpended balances specifically identified in the Joint Explanatory Statement (House Report 109-241) accompanying that Act for the covert surveillance aircraft.

In addition, of the funds appropriated under this heading in title II of the Department of Homeland Security Appropriations Act, 2006 (Public Law 109-90; 119 Stat. 2087), \$1,835,000 are rescinded from the unexpended balances specifically identified in the Joint Explanatory Statement (House Report 109-241) accompanying that Act for the automatic identification system.

ALTERATION OF BRIDGES

For necessary expenses for alteration or removal of obstructive bridges, as authorized by section 6 of the Truman-Hobbs Act (33 U.S.C. 516), \$15,000,000, to remain available until expended.

RESEARCH, DEVELOPMENT, TEST, AND EVALUATION

For necessary expenses for applied scientific research, development, test, and evaluation; and for maintenance, rehabilitation, lease, and operation of facilities and equipment; as authorized by law; \$17,573,000, to remain available until expended, of which \$495,000 shall be derived from the Oil Spill Liability Trust Fund to carry out the purposes of section 1012(a)(5) of the Oil Pollution Act of 1990 (33 U.S.C. 2712(a)(5)): Provided, That there may be credited to and used for the purposes of this appropriation funds received from State and local governments, other public authorities, private sources, and foreign countries for expenses incurred for research, development, testing, and evaluation.

RETIRED PAY

For retired pay, including the payment of obligations otherwise chargeable to lapsed appropriations for this purpose, payments under the Retired Serviceman's Family Protection and Survivor Benefits Plans, payment for career status bonuses, concurrent receipts and combat-related special compensation under the National Defense Authorization Act, and payments for medical care of retired personnel and their dependents under chapter 55 of title 10, United States Code, \$1,063,323,000.

UNITED STATES SECRET SERVICE

PROTECTION, ADMINISTRATION, AND TRAINING

For necessary expenses of the United States Secret Service, including purchase of not to exceed 755 vehicles for police-type use, of which 624 shall be for replacement only, and hire of passenger motor vehicles; purchase of motorcycles made in the United States; hire of aircraft; services of expert witnesses at such rates as may be determined by the Director of the Secret Service; rental of buildings in the District of Columbia, and fencing, lighting, guard booths, and other facilities on private or other property not in Government ownership or control, as may be necessary to perform protective functions; payment of per diem or subsistence allowances to employees where a protective assignment during the actual day or days of the visit of a protectee requires an employee to work 16 hours per day or to remain overnight at a post of duty;

conduct of and participation in firearms matches; presentation of awards; travel of Secret Service employees on protective missions without regard to the limitations on such expenditures in this or any other Act if approval is obtained in advance from the Committees on Appropriations of the Senate and the House of Representatives; research and development; grants to conduct behavioral research in support of protective research and operations; and payment in advance for commercial accommodations as may be necessary to perform protective functions; \$918,028,000, of which not to exceed \$25,000 shall be for official reception and representation expenses: Provided, That up to \$18,000,000 provided for protective travel shall remain available until September 30, 2008: Provided further, That the United States Secret Service is authorized to obligate funds in anticipation of reimbursements from Federal agencies and entities, as defined in section 105 of title 5, United States Code, receiving training sponsored by the James J. Rowley Training Center, except that total obligations at the end of the fiscal year shall not exceed total budgetary resources available under this heading at the end of the fiscal year.

INVESTIGATIONS AND FIELD OPERATIONS

For necessary expenses for investigations and field operations of the United States Secret Service, not otherwise provided for, including costs related to office space and services of expert witnesses at such rate as may be determined by the Director of the Secret Service, \$304,205,000; of which not to exceed \$100,000 shall be to provide technical assistance and equipment to foreign law enforcement organizations in counterfeit investigations; of which \$2,366,000 shall be for forensic and related support of investigations of missing and exploited children; and of which \$6,000,000 shall be a grant for activities related to the investigations of missing and exploited children and shall remain available until expended.

ACQUISITION, CONSTRUCTION, IMPROVEMENTS, AND RELATED EXPENSES

For necessary expenses for acquisition, construction, repair, alteration, and improvement of facilities, \$3,725,000, to remain available until expended.

TITLE III

PREPAREDNESS AND RECOVERY PREPAREDNESS

MANAGEMENT AND ADMINISTRATION

For salaries and expenses of the Office of the Under Secretary for Preparedness, the Office of the Chief Medical Officer, and the Office of National Capital Region Coordination, \$30,572,000, of which no less than \$2,741,000 may be used for the Office of National Capital Region Coordination, and of which \$6,459,000 shall be for the National Preparedness Integration Program: Provided, That none of the funds made available under this heading may be obligated for the National Preparedness Integration Program until the Committees on Appropriations of the Senate and the House of Representatives receive and approve a plan for expenditure prepared by the Secretary of Homeland Security: Provided further, That not to exceed \$7,000 shall be for official reception and representation expenses: Provided further, That none of the funds made available in this title under the heading "Management and Administration" may be used for travel by an officer or employee of the Department of Homeland Security until the Under Secretary for Preparedness has implemented the recommendations in the report by the Inspector General of the Department of Homeland Security titled "Progress in Developing the National Asset Database", dated June 2006; or until the Under Secretary for Preparedness submits a report to the Committee on Homeland Security

and Governmental Affairs and the Committee on Appropriations of the Senate and the Committee on Homeland Security and the Committee on Appropriations of the House of Representatives explaining why such recommendations have not been fully implemented.

OFFICE FOR DOMESTIC PREPAREDNESS

STATE AND LOCAL PROGRAMS

For grants, contracts, cooperative agreements, and other activities, including grants to State and local governments for terrorism prevention activities, notwithstanding any other provision of law, \$2,400,000,000, which shall be allocated as follows:

(1) \$500,000,000 for formula-based grants and \$350,000,000 for law enforcement terrorism prevention grants under section 1014 of the USA PATRIOT ACT (42 U.S.C. 3714): Provided, That the application for grants shall be made available to States within 45 days after the date of enactment of this Act; that States shall submit applications within 90 days after the grant announcement; and that the Office for Domestic Preparedness shall act within 90 days after the grant announcement: Provided further, That not less than 80 percent of any grant under this paragraph to a State (other than Puerto Rico) shall be made available by the State to local governments within 60 days after the receipt of the funds.

(2) \$1,172,000,000 for discretionary grants, as determined by the Secretary of Homeland Security, of which—

(A) \$745,000,000 shall be for use in high-threat, high-density urban areas: Provided, That not later than September 30, 2007, the Secretary shall distribute any unallocated funds provided for in title III of the Department of Homeland Security Appropriations Act, 2006 (Public Law 109-90; 119 Stat. 2075) under the heading "STATE AND LOCAL PROGRAMS" under the heading "OFFICE FOR DOMESTIC PREPAREDNESS" to assist organizations (as described under section 501(c)(3) of the Internal Revenue Code of 1986 and exempt from tax under section 501(a) of such Code) determined by the Secretary to be at high-risk or potential high-risk of a terrorist attack: Provided further, That applicants shall provide for the Secretary's consideration prior threats or attacks (within or outside the United States) by a terrorist organization, network, or cell against an organization described in the previous proviso, and the Secretary shall consider prior threats or attacks (within or outside the United States) against such organizations when determining risk: Provided further, That the Secretary shall report to the Committees on Appropriations of the Senate and the House of Representatives the risk to each designated tax exempt grantee at least 3 full business days in advance of the announcement of any grant award;

(B) \$210,000,000 shall be for port security grants for the purposes of section 70107(a) through (h) of title 46, United States Code, which shall be awarded based on risk notwithstanding subsection (a), for eligible costs as defined in subsections (b)(2), (3), and (4);

(C) \$5,000,000 shall be for trucking industry security grants;

(D) \$12,000,000 shall be for intercity bus security grants;

(E) \$150,000,000 shall be for intercity passenger rail transportation (as defined in section 24102 of title 49, United States Code), freight rail, and transit security grants; and

(F) \$50,000,000 shall be for buffer zone protection grants:

Provided, That for grants under subparagraph (A), the application for grants shall be made available to States within 45 days after the date of enactment of this Act; that States shall submit applications within 90 days after the grant announcement; and that the Office for Domestic Preparedness shall act within 90 days after receipt of an application: Provided further, That

not less than 80 percent of any grant under this paragraph to a State shall be made available by the State to local governments within 60 days after the receipt of the funds: Provided further, That for grants under subparagraphs (B) through (F), the applications for such grants shall be made available to eligible applicants not later than 75 days after the date of enactment of this Act, eligible applicants shall submit applications not later than 45 days after the date of the grant announcement, and the Office for Domestic Preparedness shall act on such applications not later than 45 days after the date on which such an application is received.

(3) \$40,000,000 shall be available for the Commercial Equipment Direct Assistance Program.

(4) \$338,000,000 for training, exercises, technical assistance, and other programs (including mass evacuation preparation and exercises): Provided, That not less than \$18,000,000 is for technical assistance:

Provided, That none of the grants provided under this heading shall be used for the construction or renovation of facilities, except for a minor perimeter security project, not to exceed \$1,000,000, as determined necessary by the Secretary of Homeland Security: Provided further, That the preceding proviso shall not apply to grants under subparagraphs (B), (E), and (F) of paragraph (2) of this heading: Provided further, That grantees shall provide additional reports on their use of funds, as determined necessary by the Secretary of Homeland Security: Provided further, That funds appropriated for law enforcement terrorism prevention grants under paragraph (1) and discretionary grants under paragraph (2)(A) of this heading shall be available for operational costs, to include personnel overtime and overtime associated with Office for Domestic Preparedness certified training, as needed: Provided further, That the Government Accountability Office shall report on the validity, relevance, reliability, timeliness, and availability of the risk factors (including threat, vulnerability, and consequence) used by the Secretary for the purpose of allocating discretionary grants funded under this heading, and the application of those factors in the allocation of funds to the Committees on Appropriations of the Senate and the House of Representatives on its findings not later than 45 days after the date of enactment of this Act: Provided further, That within 7 days after the date of enactment of this Act, the Secretary shall provide the Government Accountability Office with the threat and risk methodology and factors that will be used to allocate discretionary grants funded under this heading.

FIREFIGHTER ASSISTANCE GRANTS

For necessary expenses for programs authorized by the Federal Fire Prevention and Control Act of 1974 (15 U.S.C. 2201 et seq.), \$680,000,000, of which \$552,500,000 shall be available to carry out section 33 of that Act (15 U.S.C. 2229) and \$127,500,000 shall be available to carry out section 34 (15 U.S.C. 2229a) of that Act, to remain available until September 30, 2008: Provided, That not to exceed 5 percent of this amount shall be available for program administration.

EMERGENCY MANAGEMENT PERFORMANCE GRANTS

For necessary expenses for emergency management performance grants, as authorized by the National Flood Insurance Act of 1968 (42 U.S.C. 4001 et seq.), the Robert T. Stafford Disaster Relief and Emergency Assistance Act (42 U.S.C. 5121 et seq.), the Earthquake Hazards Reduction Act of 1977 (42 U.S.C. 7701 et seq.), and Reorganization Plan No. 3 of 1978 (5 U.S.C. App.), \$220,000,000: Provided, That total administrative costs shall not exceed 3 percent of the total appropriation.

RADIOLOGICAL EMERGENCY PREPAREDNESS PROGRAM

The aggregate charges assessed during fiscal year 2007, as authorized in title III of the Departments of Veterans Affairs and Housing and Urban Development, and Independent Agencies Appropriations Act, 1999 (42 U.S.C. 5196e), shall not be less than 100 percent of the amounts anticipated by the Department of Homeland Security necessary for its radiological emergency preparedness program for the next fiscal year: Provided, That the methodology for assessment and collection of fees shall be fair and equitable and shall reflect costs of providing such services, including administrative costs of collecting such fees: Provided further, That fees received under this heading shall be deposited in this account as offsetting collections and will become available for authorized purposes on October 1, 2007, and remain available until expended.

UNITED STATES FIRE ADMINISTRATION AND TRAINING

For necessary expenses of the United States Fire Administration and for other purposes, as authorized by the Federal Fire Prevention and Control Act of 1974 (15 U.S.C. 2201 et seq.) and the Homeland Security Act of 2002 (6 U.S.C. 101 et seq.), \$45,887,000.

INFRASTRUCTURE PROTECTION AND INFORMATION SECURITY

For necessary expenses for infrastructure protection and information security programs and activities, as authorized by title II of the Homeland Security Act of 2002 (6 U.S.C. 121 et seq.), \$525,056,000, of which \$442,547,000 shall remain available until September 30, 2008: Provided, That of the amount made available under this heading, \$20,000,000 may not be obligated until the Secretary submits to the Committees on Appropriations of the Senate and House of Representatives the report required in House Report 109-241 accompanying the Department of Homeland Security Appropriations Act, 2006 (Public Law 109-90) on resources necessary to implement mandatory security requirements for the Nation's chemical sector and to create a system for auditing and ensuring compliance with the security standards: Provided further, That not later than 120 days after the date of the enactment of this Act, the Secretary of Homeland Security shall submit a classified report describing the security vulnerabilities of all rail, transit, and highway bridges and tunnels connecting Northern New Jersey and New York City to the Committee on Appropriations of the Senate; the Committee on Appropriations of the House of Representatives; the Committee on Commerce, Science, and Transportation of the Senate; and the Committee on Transportation and Infrastructure of the House of Representatives.

FEDERAL EMERGENCY MANAGEMENT AGENCY

ADMINISTRATIVE AND REGIONAL OPERATIONS

For necessary expenses for administrative and regional operations, \$249,499,000, including activities authorized by the National Flood Insurance Act of 1968 (42 U.S.C. 4001 et seq.), the Robert T. Stafford Disaster Relief and Emergency Assistance Act (42 U.S.C. 5121 et seq.), the Earthquake Hazards Reduction Act of 1977 (42 U.S.C. 7701 et seq.), the Defense Production Act of 1950 (50 U.S.C. App. 2061 et seq.), sections 107 and 303 of the National Security Act of 1947 (50 U.S.C. 404, 405), Reorganization Plan No. 3 of 1978 (5 U.S.C. App.), and the Homeland Security Act of 2002 (6 U.S.C. 101 et seq.): Provided, That not to exceed \$3,000 shall be for official reception and representation expenses.

READINESS, MITIGATION, RESPONSE, AND RECOVERY

For necessary expenses for readiness, mitigation, response, and recovery activities,

\$240,000,000, including activities authorized by the National Flood Insurance Act of 1968 (42 U.S.C. 4001 et seq.), the Robert T. Stafford Disaster Relief and Emergency Assistance Act (42 U.S.C. 5121 et seq.), the Earthquake Hazards Reduction Act of 1977 (42 U.S.C. 7701 et seq.), the Defense Production Act of 1950 (50 U.S.C. App. 2061 et seq.), sections 107 and 303 of the National Security Act of 1947 (50 U.S.C. 404, 405), Reorganization Plan No. 3 of 1978 (5 U.S.C. App.), and the Homeland Security Act of 2002 (6 U.S.C. 101 et seq.): Provided, That of the total amount made available under this heading, \$30,000,000 shall be for Urban Search and Rescue Teams, of which not to exceed \$1,600,000 may be made available for administrative costs: Provided further, That the Secretary of Homeland Security, in consultation with the Secretary of Health and Human Services and the Attorney General of the United States, shall conduct an assessment of the models used by the Louisiana family assistance call center and the National Center for Missing and Exploited Children in assisting individuals displaced by Hurricane Katrina of 2005 in locating members of their family to determine how these models may be modified to assist individuals displaced in a major disaster (as that term is defined in section 102 of the Robert T. Stafford Disaster Relief and Emergency Assistance Act (42 U.S.C. 5122)) in locating members of their family: Provided further, That the Secretary of Homeland Security shall submit to the chairman and ranking member of the Committee on Homeland Security and Governmental Affairs; the Committee on Health, Education, Labor, and Pensions; and the Committee on the Judiciary of the Senate; and the chairman and ranking member of the Committee on Homeland Security, the Committee on Energy and Commerce, and the Committee on the Judiciary of the House of Representatives results of the assessment conducted under the previous proviso; as well as a plan to implement the findings of such assessment, to the maximum extent practicable.

PUBLIC HEALTH PROGRAMS

(INCLUDING TRANSFER OF FUNDS)

For necessary expenses for countering potential biological, disease, and chemical threats to civilian populations, \$33,885,000: Provided, That the total amount appropriated and, notwithstanding any other provision of law, the functions, personnel, assets, and liabilities of the National Disaster Medical System established under section 2811(b) of the Public Health Service Act (42 U.S.C. 300hh-11(b)), including any functions of the Secretary of Homeland Security relating to such System, shall be permanently transferred to the Secretary of the Department of Health and Human Services effective January 1, 2007.

DISASTER RELIEF

(INCLUDING TRANSFER OF FUNDS)

For necessary expenses in carrying out the Robert T. Stafford Disaster Relief and Emergency Assistance Act (42 U.S.C. 5121 et seq.), \$1,640,000,000, to remain available until expended: Provided, That of the total amount provided, not to exceed \$15,000,000 shall be transferred to the Department of Homeland Security Office of Inspector General for audits and investigations related to natural disasters subject to section 503 of this Act: Provided further, That none of the funds appropriated or otherwise made available under this heading may be used to enter into contracts using procedures based upon the unusual and compelling urgency exception to competitive procedures requirements under section 303(c)(2) of the Federal Property and Administrative Services Act of 1949 (41 U.S.C. 253(c)(2)) or section 2304(c)(2) of title 10, United States Code, unless the contract is for the procurement of only such property and services as are necessary to address the immediate

emergency and is only for so long as is necessary to put competitive procedures in place in connection with such procurement and the Secretary of Homeland Security notifies the Committees on Appropriations and Homeland Security and Government Affairs of the Senate and Appropriations and Homeland Security of the House of Representatives of such contract not later than 7 days after the contract is entered into.

DISASTER ASSISTANCE DIRECT LOAN PROGRAM ACCOUNT

For administrative expenses to carry out the direct loan program, as authorized by section 319 of the Robert T. Stafford Disaster Relief and Emergency Assistance Act (42 U.S.C. 5162), \$569,000: Provided, That gross obligations for the principal amount of direct loans shall not exceed \$25,000,000: Provided further, That the cost of modifying such loans shall be as defined in section 502 of the Congressional Budget Act of 1974 (2 U.S.C. 661a).

FLOOD MAP MODERNIZATION FUND

For necessary expenses under section 1360 of the National Flood Insurance Act of 1968 (42 U.S.C. 4101), \$198,980,000, and such additional sums as may be provided by State and local governments or other political subdivisions for cost-shared mapping activities under section 1360(f)(2) of such Act, to remain available until expended: Provided, That total administrative costs shall not exceed 3 percent of the total appropriation.

NATIONAL FLOOD INSURANCE FUND

(INCLUDING TRANSFER OF FUNDS)

For activities under the National Flood Insurance Act of 1968 (42 U.S.C. 4001 et seq.), and the Flood Disaster Protection Act of 1973 (42 U.S.C. 4001 et seq.), \$128,588,000, which is available as follows: (1) not to exceed \$38,230,000 for salaries and expenses associated with flood mitigation and flood insurance operations; and (2) not to exceed \$90,358,000 for flood hazard mitigation which shall be derived from offsetting collections assessed and collected under section 1307 of the National Flood Insurance Act of 1968 (42 U.S.C. 4001 et seq.), to remain available until September 30, 2008, including up to \$31,000,000 for flood mitigation expenses under section 1366 of that Act, which amount shall be available for transfer to the National Flood Mitigation Fund until September 30, 2008: Provided, That in fiscal year 2007, no funds in excess of: (1) \$70,000,000 for operating expenses; (2) \$692,999,000 for commissions and taxes of agents; (3) such sums as necessary for interest on Treasury borrowings shall be available from the National Flood Insurance Fund; and (4) not to exceed \$50,000,000 for flood mitigation actions with respect to severe repetitive loss properties under section 1361A of that Act and repetitive insurance claims properties under section 1323 of that Act, which shall remain available until expended: Provided further, That total administrative costs shall not exceed 3 percent of the total appropriation.

NATIONAL FLOOD MITIGATION FUND

(INCLUDING TRANSFER OF FUNDS)

Notwithstanding subparagraphs (B) and (C) of subsection (b)(3), and subsection (f), of section 1366 of the National Flood Insurance Act of 1968 (42 U.S.C. 4104c), \$31,000,000, to remain available until September 30, 2008, for activities designed to reduce the risk of flood damage to structures pursuant to such Act, of which \$31,000,000 shall be derived from the National Flood Insurance Fund.

NATIONAL PRE-DISASTER MITIGATION FUND

For a pre-disaster mitigation grant program under title II of the Robert T. Stafford Disaster Relief and Emergency Assistance Act (42 U.S.C. 5131 et seq.), \$149,978,000, to remain available

until expended: Provided, That grants made for pre-disaster mitigation shall be awarded on a competitive basis subject to the criteria in section 203(g) of such Act (42 U.S.C. 5133(g)), and notwithstanding section 203(f) of such Act, shall be made without reference to State allocations, quotas, or other formula-based allocation of funds: Provided further, That total administrative costs shall not exceed 3 percent of the total appropriation.

EMERGENCY FOOD AND SHELTER

To carry out an emergency food and shelter program under title III of the Stewart B. McKinney Homeless Assistance Act (42 U.S.C. 11331 et seq.), \$151,470,000, to remain available until expended: Provided, That total administrative costs shall not exceed 3.5 percent of the total appropriation.

TITLE IV

RESEARCH AND DEVELOPMENT, TRAINING, AND SERVICES

UNITED STATES CITIZENSHIP AND IMMIGRATION SERVICES

For necessary expenses for citizenship and immigration services, \$134,990,000.

FEDERAL LAW ENFORCEMENT TRAINING CENTER SALARIES AND EXPENSES

For necessary expenses of the Federal Law Enforcement Training Center, including materials and support costs of Federal law enforcement basic training; purchase of not to exceed 117 vehicles for police-type use and hire of passenger motor vehicles; expenses for student athletic and related activities; the conduct of and participation in firearms matches and presentation of awards; public awareness and enhancement of community support of law enforcement training; room and board for student interns; a flat monthly reimbursement to employees authorized to use personal mobile phones for official duties; and services as authorized by section 3109 of title 5, United States Code; \$207,634,000, of which up to \$43,910,000 for materials and support costs of Federal law enforcement basic training shall remain available until September 30, 2008; of which \$300,000 shall remain available until expended for Federal law enforcement agencies participating in training accreditation, to be distributed as determined by the Federal Law Enforcement Training Center for the needs of participating agencies; and of which not to exceed \$12,000 shall be for official reception and representation expenses: Provided, That the Center is authorized to obligate funds in anticipation of reimbursements from agencies receiving training sponsored by the Center, except that total obligations at the end of the fiscal year shall not exceed total budgetary resources available at the end of the fiscal year.

ACQUISITION, CONSTRUCTION, IMPROVEMENTS, AND RELATED EXPENSES

For acquisition of necessary additional real property and facilities, construction, and ongoing maintenance, facility improvements, and related expenses of the Federal Law Enforcement Training Center, \$63,246,000, to remain available until expended: Provided, That the Center is authorized to accept reimbursement to this appropriation from government agencies requesting the construction of special use facilities.

SCIENCE AND TECHNOLOGY

MANAGEMENT AND ADMINISTRATION

For salaries and expenses of the Office of the Under Secretary for Science and Technology and for management and administration of programs and activities, as authorized by title III of the Homeland Security Act of 2002 (6 U.S.C. 181 et seq.), \$104,414,000: Provided, That of the amount provided under this heading, \$60,000,000 shall not be obligated until the Committees on

Appropriations of the Senate and the House of Representatives receive and approve an expenditure plan by program, project, and activity; with a detailed breakdown and justification of the management and administrative costs for each; prepared by the Secretary of Homeland Security that has been reviewed by the Government Accountability Office: Provided further, That the expenditure plan shall include the method utilized to derive administration costs in fiscal year 2006 and fiscal year 2007: Provided further, That not to exceed \$3,000 shall be for official reception and representation expenses.

RESEARCH, DEVELOPMENT, ACQUISITION, AND OPERATIONS

For necessary expenses for science and technology research, including advanced research projects; development; test and evaluation; acquisition; and operations; as authorized by title III of the Homeland Security Act of 2002 (6 U.S.C. 181 et seq.); \$714,041,000, to remain available until expended: Provided, That no university participating in the University-based Centers of Excellence Program shall receive a grant for a period in excess of 3 years: Provided further, That none of the funds provided under this heading shall be made available for management and administrative costs: Provided further, That \$2,000,000 under this heading shall be available for the construction of radiological laboratories at Pacific Northwest National Laboratory: Provided further, That funding will not be available until a Memorandum of Understanding between the Department of Homeland Security and the Department of Energy has been entered into.

DOMESTIC NUCLEAR DETECTION OFFICE

MANAGEMENT AND ADMINISTRATION

For salaries and expenses of the Domestic Nuclear Detection Office and for management and administration of programs and activities, \$30,468,000: Provided, That no funds will be made available for the reimbursement of individuals from other Federal agencies or organizations in fiscal year 2008: Provided further, That not to exceed \$3,000 shall be for official reception and representation expenses.

RESEARCH, DEVELOPMENT, AND OPERATIONS

For necessary expenses for radiological and nuclear research, development, testing, evaluation and operations, \$234,024,000, to remain available until expended; and of which not to exceed \$65,000,000 shall be made available for transformation research and development; and of which no less than \$40,000,000 shall be made available for radiation portal monitor research and development: Provided, That of the amount provided, \$80,000,000 shall not be obligated until the Secretary of Homeland Security provides notification to the Committees on Appropriations of the Senate and the House of Representatives that the Domestic Nuclear Detection Office has entered into a Memorandum of Understanding with each Federal entity and organization: Provided further, That each Memorandum of Understanding shall include a description of the role, responsibilities, and resource commitment of each Federal entity or organization for the domestic nuclear global architecture.

SYSTEMS ACQUISITION

For expenses for the Domestic Nuclear Detection Office acquisition and deployment of radiological detection systems in accordance with the global nuclear detection architecture, \$178,000,000, to remain available until September 30, 2009; and of which no less than \$143,000,000 shall be for radiation portal monitors; and of which not to exceed \$5,000,000 shall be for the Surge program: Provided, That none of the funds provided for the Sodium Iodine Manufacturing program shall be made available until a cost-benefit analysis on the Advance Spectroscopic Portal monitors is submitted to the

Committees on Appropriations of the Senate and the House of Representatives by the Secretary of Homeland Security and reviewed by the Government Accountability Office.

TITLE V

GENERAL PROVISIONS

SEC. 501. No part of any appropriation contained in this Act shall remain available for obligation beyond the current fiscal year unless expressly so provided herein.

SEC. 502. Subject to the requirements of section 503 of this Act, the unexpended balances of prior appropriations provided for activities in this Act may be transferred to appropriation accounts for such activities established under this Act: Provided, That balances so transferred may be merged with funds in the applicable established accounts and thereafter may be accounted for as one fund for the same time period as originally enacted.

SEC. 503. (a) None of the funds provided by this Act, provided by previous appropriations Acts to the agencies in or transferred to the Department of Homeland Security that remain available for obligation or expenditure in fiscal year 2007, or provided from any accounts in the Treasury of the United States derived by the collection of fees available to the agencies funded by this Act, shall be available for obligation or expenditure through a reprogramming of funds that: (1) creates a new program; (2) eliminates a program, project, or activity; (3) increases funds for any program, project, or activity for which funds have been denied or restricted by the Congress; (4) proposes to use funds directed for a specific activity by either of the Committees on Appropriations of the Senate or House of Representatives for a different purpose; or (5) contracts out any function or activity for which funds have been appropriated for Federal full-time equivalent positions; unless the Committees on Appropriations of the Senate and the House of Representatives are notified 15 days in advance of such reprogramming of funds.

(b) None of the funds provided by this Act, provided by previous appropriations Acts to the agencies in or transferred to the Department of Homeland Security that remain available for obligation or expenditure in fiscal year 2007, or provided from any accounts in the Treasury of the United States derived by the collection of fees available to the agencies funded by this Act, shall be available for obligation or expenditure for programs, projects, or activities through a reprogramming of funds in excess of \$5,000,000 or 10 percent, whichever is less, that: (1) augments existing programs, projects, or activities; (2) reduces by 10 percent funding for any existing program, project, or activity, or numbers of personnel by 10 percent as approved by the Congress; or (3) results from any general savings from a reduction in personnel that would result in a change in existing programs, projects, or activities as approved by the Congress; unless the Committees on Appropriations of the Senate and the House of Representatives are notified 15 days in advance of such reprogramming of funds.

(c) Not to exceed 5 percent of any appropriation made available for the current fiscal year for the Department of Homeland Security by this Act or provided by previous appropriations Acts may be transferred between such appropriations, but no such appropriations, except as otherwise specifically provided, shall be increased by more than 10 percent by such transfers: Provided, That any transfer under this section shall be treated as a reprogramming of funds under subsection (b) of this section and shall not be available for obligation unless the Committees on Appropriations of the Senate and the House of Representatives are notified 15 days in advance of such transfer.

(d) Notwithstanding subsections (a), (b), and (c) of this section, no funds shall be reprogrammed within or transferred between appropriations after June 30, except in extraordinary circumstances which imminently threaten the safety of human life or the protection of property.

SEC. 504. None of the funds appropriated or otherwise made available to the Department of Homeland Security may be used to make payments to the "Department of Homeland Security Working Capital Fund", except for the activities and amounts allowed in the President's fiscal year 2007 budget, excluding sedan service, shuttle service, transit subsidy, mail operations, parking, and competitive sourcing: Provided, That any additional activities and amounts shall be approved by the Committees on Appropriations of the Senate and the House of Representatives 30 days in advance of obligation.

SEC. 505. Except as otherwise specifically provided by law, not to exceed 50 percent of unobligated balances remaining available at the end of fiscal year 2007 from appropriations for salaries and expenses for fiscal year 2007 in this Act shall remain available through September 30, 2008, in the account and for the purposes for which the appropriations were provided: Provided, That prior to the obligation of such funds, a request shall be submitted to the Committees on Appropriations of the Senate and the House of Representatives for approval in accordance with section 503 of this Act.

SEC. 506. Funds made available by this Act for intelligence activities are deemed to be specifically authorized by the Congress for purposes of section 504 of the National Security Act of 1947 (50 U.S.C. 414) during fiscal year 2007 until the enactment of an Act authorizing intelligence activities for fiscal year 2007.

SEC. 507. The Federal Law Enforcement Training Center shall lead the Federal law enforcement training accreditation process, to include representatives from the Federal law enforcement community and non-Federal accreditation experts involved in law enforcement training, to continue the implementation of measuring and assessing the quality and effectiveness of Federal law enforcement training programs, facilities, and instructors.

SEC. 508. None of the funds in this Act may be used to make a grant allocation, discretionary grant award, discretionary contract award, or to issue a letter of intent totaling in excess of \$1,000,000, or to announce publicly the intention to make such an award, unless the Secretary of Homeland Security notifies the Committees on Appropriations of the Senate and the House of Representatives at least 3 full business days in advance: Provided, That no notification shall involve funds that are not available for obligation.

SEC. 509. Notwithstanding any other provision of law, no agency shall purchase, construct, or lease any additional facilities, except within or contiguous to existing locations, to be used for the purpose of conducting Federal law enforcement training without the advance approval of the Committees on Appropriations of the Senate and the House of Representatives, except that the Federal Law Enforcement Training Center is authorized to obtain the temporary use of additional facilities by lease, contract, or other agreement for training which cannot be accommodated in existing Center facilities.

SEC. 510. The Director of the Federal Law Enforcement Training Center shall schedule basic or advanced law enforcement training (including both types of training) at all four training facilities under the control of the Federal Law Enforcement Training Center to ensure that these training centers are operated at the highest capacity throughout the fiscal year.

SEC. 511. None of the funds appropriated or otherwise made available by this Act may be

used for expenses of any construction, repair, alteration, or acquisition project for which a prospectus, if required by the Public Buildings Act of 1959 (40 U.S.C. 3301), has not been approved, except that necessary funds may be expended for each project for required expenses for the development of a proposed prospectus.

SEC. 512. None of the funds in this Act may be used in contravention of the applicable provisions of the Buy American Act (41 U.S.C. 10a et seq.).

SEC. 513. Notwithstanding any other provision of law, the authority of the Office of Personnel Management to conduct personnel security and suitability background investigations, update investigations, and periodic reinvestigations of applicants for, or appointees in, positions in the Office of the Secretary and Executive Management, the Office of the Under Secretary for Management, Analysis and Operations, Immigration and Customs Enforcement, Directorate for Preparedness, and the Directorate of Science and Technology of the Department of Homeland Security is transferred to the Department of Homeland Security: Provided, That on request of the Department of Homeland Security, the Office of Personnel Management shall cooperate with and assist the Department in any investigation or reinvestigation under this section: Provided further, That this section shall cease to be effective at such time as the President has selected a single agency to conduct security clearance investigations under section 3001(c) of the Intelligence Reform and Terrorism Prevention Act of 2004 (Public Law 108-458; 50 U.S.C. 435b) and the entity selected under section 3001(b) of such Act has reported to Congress that the agency selected under such section 3001(c) is capable of conducting all necessary investigations in a timely manner or has authorized the entities within the Department of Homeland Security covered by this section to conduct their own investigations under section 3001 of such Act.

SEC. 514. (a) None of the funds provided by this or previous appropriations Acts may be obligated for deployment or implementation, on other than a test basis, of the Secure Flight program or any other follow on or successor passenger prescreening programs, until the Secretary of Homeland Security certifies, and the Government Accountability Office reports, to the Committees on Appropriations of the Senate and the House of Representatives, that all 10 of the conditions contained in paragraphs (1) through (10) of section 522(a) of the Department of Homeland Security Appropriations Act, 2005 (Public Law 108-334; 118 Stat. 1319) have been successfully met. Until the Secure Flight program or a follow on or successor passenger screening program has been deployed or implemented, the Transportation Security Administration shall provide airlines with technical or other assistance to better align their reservation and ticketing systems with terrorist databases to assist in alleviating travel delays and other problems associated with mistaken identification.

(b) The report required by subsection (a) shall be submitted within 90 days after the certification required by such subsection is provided, and periodically thereafter, if necessary, until the Government Accountability Office confirms that all 10 conditions have been successfully met.

(c) During the testing phase permitted by subsection (a), no information gathered from passengers, foreign or domestic air carriers, or reservation systems may be used to screen aviation passengers, or delay or deny boarding to such passengers, except in instances where passenger names are matched to a Government watch list.

(d) None of the funds provided in this or previous appropriations Acts may be utilized to develop or test algorithms assigning risk to passengers whose names are not on Government watch lists.

(e) None of the funds provided in this or previous appropriations Acts may be utilized for data or a database that is obtained from or remains under the control of a non-Federal entity: Provided, That this restriction shall not apply to Passenger Name Record data obtained from air carriers.

SEC. 515. None of the funds made available in this Act may be used to amend the oath of allegiance required by section 337 of the Immigration and Nationality Act (8 U.S.C. 1448).

SEC. 516. None of the funds appropriated by this Act may be used to process or approve a competition under Office of Management and Budget Circular A-76 for services provided as of June 1, 2004, by employees (including employees serving on a temporary or term basis) of United States Citizenship and Immigration Services of the Department of Homeland Security who are known as of that date as Immigration Information Officers, Contact Representatives, or Investigative Assistants.

SEC. 517. (a) None of the funds appropriated to the United States Secret Service by this Act or by previous appropriations Acts may be made available for the protection of a person, other than persons granted protection under 3056(a) of title 18, United States Code, and the Secretary of the Department of Homeland Security.

(b) Notwithstanding (a) of this section, the Director of the United States Secret Service may enter into a fully reimbursable agreement to perform such service for protectees not designated under 3056(a) of title 18, United States Code.

SEC. 518. The Secretary of Homeland Security, in consultation with industry stakeholders, shall develop standards and protocols for increasing the use of explosive detection equipment to screen air cargo when appropriate.

SEC. 519. (a) The Secretary of Homeland Security is directed to research, develop, and procure new technologies to inspect and screen air cargo carried on passenger aircraft at the earliest date possible.

(b) Existing checked baggage explosive detection equipment and screeners shall be utilized to screen air cargo carried on passenger aircraft to the greatest extent practicable at each airport until technologies developed under subsection (a) are available.

(c) The Transportation Security Administration shall report air cargo inspection statistics within 15 days of the close of each quarter of the fiscal year to the Committees on Appropriations of the Senate and the House of Representatives, by airport and air carrier, including any reasons for non-compliance with the second proviso of section 513 of the Department of Homeland Security Appropriations Act, 2005 (Public Law 108-334; 118 Stat. 1317), within 45 days after the end of the quarter.

SEC. 520. (a) None of the funds available for obligation for the transportation worker identification credential program shall be used to develop a personalization system that is executed without fair and open competition for both the implementation and production of the program and identification cards.

(b) The Transportation Security Administration shall certify to the Committees on Appropriations of the Senate and the House of Representatives not later than December 1, 2006, that the competition required under subsection (a) has been achieved.

SEC. 521. None of the funds made available in this Act may be used by any person other than the privacy officer appointed under section 222 of the Homeland Security Act of 2002 (6 U.S.C. 142) to alter, direct that changes be made to,

delay, or prohibit the transmission to Congress of any report prepared under paragraph (5) of such section.

SEC. 522. No funding provided by this or previous appropriation Acts shall be available to pay the salary of any employee serving as a contracting officer's technical representative (COTR) or anyone acting in a similar or like capacity who has not received COTR training.

SEC. 523. Except as provided in section 44945 of title 49, United States Code, funds appropriated or transferred to Transportation Security Administration "Aviation Security", "Administration" and "Transportation Security Support" in fiscal years 2004, 2005, and 2006 that are recovered or deobligated shall be available only for procurement and installation of explosive detection systems for air cargo, baggage, and checkpoint screening systems, subject to section 503 of this Act.

SEC. 524. (a) Within 60 days of enactment of this Act, the Secretary of the Department of Homeland Security shall revise DHS MD (Management Directive) 11056 to provide for the following:

(1) That when a lawful request is made to publicly release a document containing information designated as sensitive security information (SSI), the document shall be reviewed in a timely manner to determine whether any information contained in the document meets the criteria for continued SSI protection under applicable law and regulation and shall further provide that all portions that no longer require SSI designation be released, subject to applicable law, including sections 552 and 552a of title 5, United States Code.

(2) That sensitive security information that is four years old shall be subject to release upon request unless—

(A) the Secretary or his designee makes a written determination that identifies a rational basis why the information must remain SSI;

(B) the information is covered by a current sensitive security information application guide approved by the Secretary or his designee in writing; or

(C) such information is otherwise exempt from disclosure under applicable law:

Provided, That any determination made by the Secretary under clause (a)(2)(A) shall be provided to the party making a request to release such information and to the Committees on Appropriations of the Senate and House of Representatives as part of the annual reporting requirement pursuant to section 537 of the Department of Homeland Security Appropriations Act, 2006 (Public Law 109-90; 119 Stat. 2088).

(3) Common and extensive examples of the individual categories of SSI information cited under 49 CFR 1520(b)(1) through (16) in order to minimize and standardize judgment by covered persons in the application of SSI marking.

(b) Not later than 120 days after the date of enactment of this Act, the Secretary of Homeland Security shall report to the Committees on Appropriations of the Senate and the House of Representatives on the progress that the Department has made in implementing the remaining requirements of section 537 of the Department of Homeland Security Appropriations Act, 2006 (Public Law 109-90; 119 Stat. 2088), including information on the current procedures regarding access to SSI by civil litigants and the security risks and benefits of any proposed changes to these procedures.

SEC. 525. RESCISSION. From the unobligated balances from prior year appropriations made available for Transportation Security Administration "Aviation Security" and "Headquarters Administration", \$4,776,000 are rescinded.

SEC. 526. The Department of Homeland Security Working Capital Fund, established under section 403 of the Government Management Re-

form Act of 1994 (31 U.S.C. 501 note; Public Law 103-356), shall continue operations during fiscal year 2007.

SEC. 527. RESCISSION. Of the unobligated balances from prior year appropriations made available for the "Counterterrorism Fund", \$16,000,000 are rescinded.

SEC. 528. RESCISSION. From the unobligated balances from prior year appropriations made available for Transportation Security Administration "Aviation Security", \$61,936,000 are rescinded.

SEC. 529. None of the funds made available in this Act may be used to enforce section 4025(1) of Public Law 108-458 if the Assistant Secretary (Transportation Security Administration) determines that butane lighters are not a significant threat to civil aviation security: Provided, That the Assistant Secretary (Transportation Security Administration) shall notify the Committees on Appropriations of the Senate and the House of Representatives 15 days in advance of such determination including a report on whether the effectiveness of screening operations is enhanced by suspending enforcement of the prohibition.

SEC. 530. RESCISSIONS. Of the unobligated balances from prior year appropriations made available for Science and Technology, \$55,000,000 for "Management and Administration" and \$184,000,000 from "Research, Development, Acquisition, and Operations" are rescinded: Provided, That of the total amount rescinded from "Management and Administration", \$30,000,000 shall be from the contingency fund and \$25,000,000 shall be from the Homeland Security Institute.

SEC. 531. Notwithstanding any other provision of law, the Secretary of Homeland Security shall consider the Hancock County Port and Harbor Commission in Mississippi eligible under the Federal Emergency Management Agency Public Assistance Program for all costs incurred for dredging from navigation channel in Little Lake, Louisiana, sediment deposited as a result of Hurricane George in 1998: Provided, That the appropriate Federal share shall apply to approval of this project.

SEC. 532. The Department of Homeland Security shall, in approving standards for State and local emergency preparedness operational plans under section 613(b)(3) of the Robert T. Stafford Disaster and Emergency Assistance Act (42 U.S.C. 5196b(b)(3)), account for the needs of individuals with household pets and service animals before, during, and following a major disaster or emergency: Provided, That Federal agencies may provide assistance as described in section 403(a) of the Robert T. Stafford Disaster and Emergency Assistance Act (42 U.S.C. 5170b(a)) to carry out the plans described in the previous proviso.

SEC. 533. RESCISSION. From the unexpended balances of the United States Coast Guard "Acquisition, Construction, and Improvements" account specifically identified in the Joint Explanatory Statement (House Report 109-241) accompanying the Department of Homeland Security Act, 2006 (Public Law 109-90) for the development of the Offshore Patrol Cutter, \$20,000,000 are rescinded.

SEC. 534. TRANSFER. All obligated and unobligated balances of funds, totaling not less than \$98,552,000, for the Transportation Security Laboratory shall be transferred from the Science and Technology "Research, Development, Acquisition, and Operations" account to the Transportation Security Administration "Transportation Security Support" account effective October 1, 2006.

SEC. 535. (a)(1) Within 45 days after the close of each month, the Chief Financial Officer of the Department of Homeland Security shall submit to the Committees on Appropriations of the

Senate and the House of Representatives a monthly budget execution report that sets forth the total obligational authority appropriated (new budget authority plus unobligated carry-over), undistributed obligational authority, amount allotted, current year obligations, unobligated authority (the difference between total obligational authority and current year obligations), beginning unexpended obligations, year-to-date costs, and year-end unexpended obligations, of the Department of Homeland Security.

(2) The information required under paragraph (1) shall be provided for each Departmental component and the Working Capital Fund at the level of detail shown in the table of detailed funding recommendations displayed at the end of the Statement of Managers accompanying the conference report on this Act.

(3) Each report submitted under paragraph (1) shall include for each Department of Homeland Security component the total full-time equivalent for the prior fiscal year, the on-board total full-time equivalent on September 30 of the prior fiscal year, the estimated total full-time equivalent for the current fiscal year, and the on-board total full-time equivalent on the last day of the month for the applicable report.

(b) Obligation authority and transfer authority provided under section 503 and 504 of this Act shall not be available unless on the date of a notification under section 503 and 504, the Committees on Appropriations of the Senate and House of Representatives have received the most recent report required by subsection (a) of this section.

SEC. 536. None of the funds provided by this or previous appropriations Acts or transferred to the Department of Homeland Security that remain available for obligation or expenditure in fiscal year 2007, or provided from any accounts in the Treasury of the United States derived by the collection of fees available to the agencies funded by this Act, shall be available for obligation or expenditure for the Office of the Federal Coordinator for Gulf Coast Rebuilding effective October 1, 2006, unless the Committees on Appropriations of the Senate and the House of Representatives receive a reprogramming notification for fiscal year 2006 pursuant to section 503 of Public Law 109-90 and a budget request and expenditure plan for fiscal year 2007 for this office.

SEC. 537. The Federal Law Enforcement Training Center instructor staff shall be classified as inherently governmental for the purpose of the Federal Activities Inventory Reform Act of 1998 (31 U.S.C. 501 note).

SEC. 538. Section 7209(b)(1) of the Intelligence Reform and Terrorism Prevention Act of 2004 (Public Law 108-458; 8 U.S.C. 1185 note) is amended by striking from “(1) DEVELOPMENT OF PLAN.—The Secretary” through “7208(k).” and inserting the following:

“(1) DEVELOPMENT OF PLAN AND IMPLEMENTATION.—

“(A) The Secretary of Homeland Security, in consultation with the Secretary of State, shall develop and implement a plan as expeditiously as possible to require a passport or other document, or combination of documents, deemed by the Secretary of Homeland Security to be sufficient to denote identity and citizenship, for all travel into the United States by United States citizens and by categories of individuals for whom documentation requirements have previously been waived under section 212(d)(4)(B) of the Immigration and Nationality Act (8 U.S.C. 1182(d)(4)(B)). This plan shall be implemented not later than 3 months after the Secretary of State and the Secretary of Homeland Security make the certifications required in subsection (B), or June 1, 2009, whichever is earlier. The plan shall seek to expedite the travel of frequent travelers, including those who reside in

border communities, and in doing so, shall make readily available a registered traveler program (as described in section 7208(k)).

“(B) The Secretary of Homeland Security and the Secretary of State shall jointly certify to the Committees on Appropriations of the Senate and the House of Representatives that the following criteria have been met prior to implementation of Section 7209(b)(1)(A)—

“(i) the National Institutes of Standards and Technology has certified that the card architecture meets the International Organization for Standardization ISO 14443 security standards, or justifies a deviation from such standard;

“(ii) the technology to be used by the United States for the passport card, and any subsequent change to that technology, has been shared with the governments of Canada and Mexico;

“(iii) an agreement has been reached with the United States Postal Service on the fee to be charged individuals for the passport card, and a detailed justification has been submitted to the Committees on Appropriations of the Senate and the House of Representatives;

“(iv) an alternative procedure has been developed for groups of children traveling across an international border under adult supervision with parental consent;

“(v) the necessary technological infrastructure to process the passport cards has been installed, and all employees at ports of entry have been properly trained in the use of the new technology;

“(vi) the passport card has been made available for the purpose of international travel by United States citizens through land and sea ports of entry between the United States and Canada, Mexico, the Caribbean and Bermuda; and

“(vii) a single implementation date for sea and land borders has been established.”.

SEC. 539. Notwithstanding any time limitation established for a grant awarded under title I, chapter 6, Public Law 106-31, in the item relating to Federal Emergency Management Agency—Disaster Assistance for Unmet Needs, the City of Cuero, Texas, may use funds received under such grant program until September 30, 2007.

SEC. 540. None of the funds made available in this Act for United States Customs and Border Protection may be used to prevent an individual not in the business of importing a prescription drug (within the meaning of section 801(g) of the Federal Food, Drug, and Cosmetic Act) from importing a prescription drug from Canada that complies with the Food, Drug, and Cosmetic Act.

SEC. 541. The Secretary of Homeland Security shall submit a report to the Committees on Appropriations of the Senate and the House of Representatives, not later than February 8, 2007, that—

(1) identifies activities being carried out by the Department of Homeland Security to improve—

(A) the targeting of agricultural inspections;

(B) the ability of United States Customs and Border Protection to adjust to new agricultural threats; and

(C) the in-service training for interception of prohibited plant and animal products and agricultural pests under the agriculture quarantine inspection monitoring program of the Animal and Plant Health Inspection Service; and

(2) describes the manner in which the Secretary of Homeland Security will coordinate with the Secretary of Agriculture and State and local governments in carrying out the activities described in paragraph (1).

SEC. 542. Any limitation, directive, or earmarking contained in either the House of Representatives or Senate report accompanying H.R. 5441 shall also be included in the con-

ference report or joint statement accompanying H.R. 5441 in order to be considered as having been approved by both Houses of Congress.

SEC. 543. Any reports required in this Act and accompanying reports to be submitted to the Committees on Appropriations and the Department of Homeland Security's annual justifications of the President's budget request shall be posted on the Department of Homeland Security's public website not later than 48 hours after such submission unless information in the report compromises national security.

SEC. 544. Notwithstanding any other provision of this Act, \$1,000,000 shall be made available from appropriations for training, exercises, technical assistance, and other programs under paragraph (4) under the subheading “STATE AND LOCAL PROGRAMS” under the heading “OFFICE FOR DOMESTIC PREPAREDNESS” under title III, for the Chief Financial Officer of the Department of Homeland Security to ensure compliance with the Improper Payments Information Act of 2002 (31 U.S.C. 3321 note).

SEC. 545. None of the amounts available or otherwise available to the Coast Guard under title II of this Act under the heading “UNITED STATES COAST GUARD” under the heading “OPERATING EXPENSES” may be obligated or expended for the continuation of operations at Long Range Aids to Navigation (LORAN) stations nationwide, except in Alaska, the far northwest, and the far northeast continental United States of America.

SEC. 546. No amount appropriated by this or any other Act may be used to enforce or comply with any statutory limitation on the number of employees in the Transportation Security Administration, before or after its transfer to the Department of Homeland Security from the Department of Transportation, and no amount appropriated by this or any other Act may be used to enforce or comply with any administrative rule or regulation imposing a limitation on the recruiting or hiring of personnel into the Transportation Security Administration to a maximum number of permanent positions, except to the extent that enforcement or compliance with that limitation does not prevent the Secretary of Homeland Security from recruiting and hiring such personnel into the Administration as may be necessary—

(1) to provide appropriate levels of aviation security; and

(2) to accomplish that goal in such a manner that the average aviation security-related delay experienced by airline passengers is reduced to a level of 10 minutes.

SEC. 547. Not later than 6 months after the date of enactment of this Act, the Secretary of Homeland Security shall submit a report to the Committees on Appropriations of the Senate and the House of Representatives with an assessment of short-term (defined as within 2 years after the date of enactment of this Act), intermediate-term (defined as between 2 years and 4 years after such date of enactment), and long-term (defined as more than 4 years after such date of enactment) actions necessary for the Department of Homeland Security to take in order to assist Federal, State, and local governments achieve communications interoperability, including equipment acquisition, changes in governance structure, and training.

SEC. 548. (a) Section 114 of title 49, United States Code, is amended by striking subsection (o) and redesignating subsections (p) through (t) as subsections (o) through (s), respectively.

(b) The amendment made by subsection (a) shall take effect 180 days after the date of enactment of this Act.

SEC. 549. DATA-MINING. (a) DEFINITIONS.—In this section:

(1) DATA-MINING.—The term “data-mining” means a query or search or other analysis of 1 or more electronic databases, whereas—

(A) at least 1 of the databases was obtained from or remains under the control of a non-Federal entity, or the information was acquired initially by another department or agency of the Federal Government for purposes other than intelligence or law enforcement;

(B) a department or agency of the Federal Government or a non-Federal entity acting on behalf of the Federal Government is conducting the query or search or other analysis to find a predictive pattern indicating terrorist or criminal activity; and

(C) the search does not use a specific individual's personal identifiers to acquire information concerning that individual.

(2) DATABASE.—The term “database” does not include telephone directories, news reporting, information publicly available via the Internet or available by any other means to any member of the public without payment of a fee, or databases of judicial and administrative opinions.

(b) REPORTS ON DATA-MINING ACTIVITIES BY THE DEPARTMENT OF HOMELAND SECURITY.—

(1) REQUIREMENT FOR REPORT.—The head of each department or agency in the Department of Homeland Security that is engaged in any activity to use or develop data-mining technology shall each submit a report to Congress on all such activities of the agency under the jurisdiction of that official. The report shall be made available to the public.

(2) CONTENT OF REPORT.—Each report submitted under paragraph (1) shall include, for each activity to use or develop data-mining technology that is required to be covered by the report, the following information:

(A) A thorough description of the data-mining technology and the data that is being or will be used.

(B) A thorough description of the goals and plans for the use or development of such technology and, where appropriate, the target dates for the deployment of the data-mining technology.

(C) An assessment of the efficacy or likely efficacy of the data-mining technology in providing accurate information consistent with and valuable to the stated goals and plans for the use or development of the technology.

(D) An assessment of the impact or likely impact of the implementation of the data-mining technology on the privacy and civil liberties of individuals.

(E) A list and analysis of the laws and regulations that govern the information being or to be collected, reviewed, gathered, analyzed, or used with the data-mining technology.

(F) A thorough discussion of the policies, procedures, and guidelines that are in place or that are to be developed and applied in the use of such technology for data-mining in order to—

(i) protect the privacy and due process rights of individuals; and

(ii) ensure that only accurate information is collected, reviewed, gathered, analyzed, or used.

(G) Any necessary classified information in an annex that shall be available to the Committee on Homeland Security and Governmental Affairs, the Committee on the Judiciary, and the Committee on Appropriations of the Senate and the Committee on Homeland Security, the Committee on the Judiciary, and the Committee on Appropriations of the House of Representatives.

(3) TIME FOR REPORT.—Each report required under paragraph (1) shall be submitted not later than 90 days after the end of fiscal year 2007.

SEC. 550. (a) Not later than 6 months after the date of enactment of this Act, the Secretary of Homeland Security shall hereafter issue interim final regulations that establish homeland security requirements, including minimum standards and required submission of facility security plans to the Secretary, for chemical facilities that the Secretary determines present the great-

est security risk and that are not currently regulated under Federal law for homeland security purposes.

(b) Interim regulations under this section shall apply to a chemical facility until the effective date of final regulations issued under other laws by the Secretary, that establish requirements and standards referred to in subsection (a) that apply with respect to that facility.

(c) Any person that violates an interim regulation issued under this section shall be liable for a civil penalty under section 70117 of title 46, United States Code.

SEC. 551. Not later than 1 year after the date of enactment of this Act, the Secretary of Homeland Security shall establish and conduct a pilot program at the Northern Border Air Wing bases of the Office of CBP Air and Marine, United States Customs and Border Protection, working expeditiously with the Administrator of the Federal Aviation Administration to test unmanned aerial vehicles for border surveillance along the international marine and land border between Canada and the United States.

SEC. 552. Not later than February 8, 2007, the Assistant Secretary for Immigration and Customs Enforcement of the Department of Homeland Security shall submit a report to Congress on the costs and need for establishing a sub-office in Greeley, Colorado.

SEC. 553. Not later than 90 days after the date of the enactment of this Act, the Secretary of Homeland Security shall submit to the Committees on Appropriations of the Senate and the House of Representatives a report on the feasibility and advisability of locating existing Louisiana facilities and assets of the Coast Guard in the Federal City Project of New Orleans, Louisiana, as described in the report of the Defense Base Closure and Realignment Commission submitted to the President in 2005 during the 2005 round of defense base closure and realignment under the Defense Base Closure and Realignment Act of 1990 (part A of title XXIX of Public Law 101–510; 10 U.S.C. 2687 note).

SEC. 554. Notwithstanding any other provision of this Act, funding made available under title VII, under the heading UNITED STATES COAST GUARD ACQUISITION, CONSTRUCTION, AND IMPROVEMENTS may be used to acquire law enforcement patrol boats.

SEC. 555. SCREENING OF MUNICIPAL SOLID WASTE. (a) DEFINITIONS.—In this section:

(1) BUREAU.—The term “Bureau” means the Bureau of Customs and Border Protection.

(2) COMMERCIAL MOTOR VEHICLE.—The term “commercial motor vehicle” has the meaning given the term in section 31101 of title 49, United States Code.

(3) COMMISSIONER.—The term “Commissioner” means the Commissioner of the Bureau.

(4) MUNICIPAL SOLID WASTE.—The term “municipal solid waste” includes sludge (as defined in section 1004 of the Solid Waste Disposal Act (42 U.S.C. 6903)).

(b) REPORTS TO CONGRESS.—Not later than 90 days after the date of enactment of this Act, the Commissioner shall submit to Congress a report that—

(1) indicates whether the methodologies and technologies used by the Bureau to screen for and detect the presence of chemical, nuclear, biological, and radiological weapons in municipal solid waste are as effective as the methodologies and technologies used by the Bureau to screen for those materials in other items of commerce entering the United States through commercial motor vehicle transport; and

(2) if the report indicates that the methodologies and technologies used to screen municipal solid waste are less effective than those used to screen other items of commerce, identifies the actions that the Bureau will take to achieve the same level of effectiveness in the screening of

municipal solid waste, including actions necessary to meet the need for additional screening technologies.

(c) IMPACT ON COMMERCIAL MOTOR VEHICLES.—If the Commissioner fails to fully implement an action identified under subsection (b)(2) before the earlier of the date that is 180 days after the date on which the report under subsection (b) is required to be submitted or the date that is 180 days after the date on which the report is submitted, the Secretary shall deny entry into the United States of any commercial motor vehicle carrying municipal solid waste until the Secretary certifies to Congress that the methodologies and technologies used by the Bureau to screen for and detect the presence of chemical, nuclear, biological, and radiological weapons in municipal solid waste are as effective as the methodologies and technologies used by the Bureau to screen for those materials in other items of commerce entering into the United States through commercial motor vehicle transport.

SEC. 556. (a) CONSTRUCTION OF BORDER TUNNEL OR PASSAGE.—Chapter 27 of title 18, United States Code, is amended by adding at the end the following:

“§ 554. Border tunnels and passages

“(a) Any person who knowingly constructs or finances the construction of a tunnel or subterranean passage that crosses the international border between the United States and another country, other than a lawfully authorized tunnel or passage known to the Secretary of Homeland Security and subject to inspection by the Bureau of Immigration and Customs Enforcement, shall be fined under this title and imprisoned for not more than 20 years.

“(b) Any person who knows or recklessly disregards the construction or use of a tunnel or passage described in subsection (a) on land that the person owns or controls shall be fined under this title and imprisoned for not more than 10 years.

“(c) Any person who uses a tunnel or passage described in subsection (a) to unlawfully smuggle an alien, goods (in violation of section 545), controlled substances, weapons of mass destruction (including biological weapons), or a member of a terrorist organization (as defined in section 2339B(g)(6)) shall be subject to a maximum term of imprisonment that is twice the maximum term of imprisonment that would have otherwise been applicable had the unlawful activity not made use of such a tunnel or passage.”

(b) CLERICAL AMENDMENT.—The table of sections for chapter 27 of title 18, United States Code, is amended by adding at the end the following:

“Sec. 554. Border tunnels and passages.”

(c) CRIMINAL FORFEITURE.—Section 982(a)(6) of title 18, United States Code, is amended by inserting “554,” before “1425.”

(d) DIRECTIVE TO THE UNITED STATES SENTENCING COMMISSION.—

(1) IN GENERAL.—Pursuant to its authority under section 994 of title 28, United States Code, and in accordance with this subsection, the United States Sentencing Commission shall promulgate or amend sentencing guidelines to provide for increased penalties for persons convicted of offenses described in section 554 of title 18, United States Code, as added by subsection (a).

(2) REQUIREMENTS.—In carrying out this subsection, the United States Sentencing Commission shall—

(A) ensure that the sentencing guidelines, policy statements, and official commentary reflect the serious nature of the offenses described in section 554 of title 18, United States Code, and the need for aggressive and appropriate law enforcement action to prevent such offenses;

(B) provide adequate base offense levels for offenses under such section;

(C) account for any aggravating or mitigating circumstances that might justify exceptions, including—

(i) the use of a tunnel or passage described in subsection (a) of such section to facilitate other felonies; and

(ii) the circumstances for which the sentencing guidelines currently provide applicable sentencing enhancements;

(D) ensure reasonable consistency with other relevant directives, other sentencing guidelines, and statutes;

(E) make any necessary and conforming changes to the sentencing guidelines and policy statements; and

(F) ensure that the sentencing guidelines adequately meet the purposes of sentencing set forth in section 3553(a)(2) of title 18, United States Code.

SEC. 557. Notwithstanding any other provision of law, the Secretary of Homeland Security shall provide personnel and equipment to improve national security by inspecting international shipments of municipal solid waste, and shall levy a fee limited to the approximate cost of such inspections.

SEC. 558. (a) Not later than 6 months after the date of enactment of this Act, the Secretary of Homeland Security, in coordination with the Secretary of State, the Federal Communications Commission, and relevant agencies in the States of Alaska, Idaho, Montana, Oregon, and Washington, shall—

(1) evaluate the technical and operational challenges with respect to interoperable communications facing regional, local, State, and Federal authorities in preparing for the 2010 Olympics; and

(2) develop an integrated plan for addressing such technical and operational challenges.

(b) The Secretary of Homeland Security shall submit and present the plan developed under subsection (a) to the Committee on Commerce, Science, and Transportation of the Senate and the Committee on Energy and Commerce of the House of Representatives.

SEC. 559. The Secretary of Homeland Security may not take any action to alter or reduce operations within the Civil Engineering Program of the Coast Guard nationwide, including the civil engineering units, facilities, and design and construction centers, the Coast Guard Academy, and the Research and Development Center until the Committees on Appropriations and Commerce, Science, and Transportation of the Senate receive and approve a plan on changes to the Civil Engineering Program of the Coast Guard. The plan shall include a description of the current functions of the Civil Engineering Program and a description of any proposed modifications of such functions and of any proposed modification of personnel and offices, including the rationale for such modification, an assessment of the costs and benefits of such modification, any proposed alternatives to such modification, and the processes utilized by the Coast Guard and the Office of Management and Budget to analyze and assess such modification.

SEC. 560. (a) All amounts made available under this Act for travel and transportation shall be reduced by \$43,000,000.

(b) All amounts made available under this Act for printing and reproduction shall be reduced by \$1,000,000.

SEC. 561. None of the funds made available by this Act may be used to take an action that would violate Executive Order 13149 (65 Fed. Reg. 24607; relating to greening the government through Federal fleet and transportation efficiency).

SEC. 562. (a) The Transportation Security Administration shall require each air carrier and

foreign air carrier that provides air transportation or intrastate air transportation to submit plans to the Transportation Security Administration on how such air carrier will participate in the voluntary provision of emergency services program established by section 44944(a) of title 49, United States Code.

(b)(1) Not more than 90 days after the date of the enactment of this Act, the Transportation Security Administration shall prepare a report that contains the following:

(A) Procedures that qualified individuals need to follow in order to participate in the program described in subsection (a).

(B) Relevant contacts for individuals interested in participating in the program described in subsection (a).

(2) The Transportation Security Administration shall make the report required by paragraph (1) available, by Internet web site or other appropriate method, to the following:

(A) The Congress.

(B) The emergency response agency of each State.

(C) The relevant organizations representing individuals to participate in the program.

SEC. 563. Not later than 90 days after the date of enactment of this Act, the Director of the Federal Emergency Management Agency in conjunction with the Director of the National Institutes of Standards and Technology shall submit a report to the Senate Committee on Appropriations outlining Federal earthquake response plans for high-risk earthquake regions in the United States as determined by the United States Geological Survey.

SEC. 564. Not later than 6 months after the date of enactment of this Act, the Secretary of Homeland Security shall establish revised procedures for expeditiously clearing individuals whose names have been mistakenly placed on a terrorist database list or who have names identical or similar to individuals on a terrorist database list. The Secretary shall advise Congress of the procedures established.

SEC. 565. Of the amount appropriated or otherwise made available by title II of this Act under the heading "UNITED STATES COAST GUARD", "OPERATING EXPENSES", \$13,934,000 may be available for the purpose of the National Capital Region Air Defense mission of the Coast Guard.

SEC. 566. (a) The Congress makes the following findings:

(1) Domestic methamphetamine production in both small- and large-scale laboratories is decreasing as a result of law enforcement pressure and public awareness campaigns.

(2) It is now estimated that 80 percent of methamphetamine consumed in the United States originates in Mexico and is smuggled into the United States.

(3) The movement of methamphetamine into the United States poses new law enforcement challenges at the border, in the financial system, and in communities affected by methamphetamine.

(4) Customs and Border Protection is working to stop the spread of methamphetamine by examining the movement of the drug and its precursors at the borders and points of entry.

(5) Customs and Border Protection is a vital source of information for the Drug Enforcement Administration and other law enforcement agencies.

(b) It is the sense of the Senate that Customs and Border Protection should continue to focus on methamphetamine in its reporting and analysis of trade flows to prevent the spread of methamphetamine throughout the United States.

SEC. 567. Not later than 30 days after the date of enactment of this Act, the Secretary of Homeland Security shall submit to the Committee on

Appropriations a report addressing the compliance by the Department of Homeland Security with the recommendations set forth in the July 6, 2006, Inspector General of Homeland Security report entitled "Progress in Developing the National Asset Database". The report shall include the status of the prioritization of assets by the Department of Homeland Security into high-value, medium-value, and low-value asset tiers, and how such tiers will be used by the Secretary of Homeland Security in the issuance of grant funds.

SEC. 568. (a) Not later than 60 days after the initiation of any contract relating to the Secure Border Initiative that is valued at more than \$20,000,000, and upon the conclusion of the performance of such contract, the Inspector General of the Department of Homeland Security shall review each action relating to such contract to determine whether such action fully complies with applicable cost requirements, performance objectives, program milestones, inclusion of small, minority-owned, and women-owned businesses, and time lines.

(b) If a contract review under subsection (a) uncovers information regarding improper conduct or wrongdoing, the Inspector General shall, as expeditiously as practicable, submit such information to the Secretary of Homeland Security, or to another appropriate official of the Department of Homeland Security, who shall determine if the contractor should be suspended from further participation in the Secure Border Initiative.

(c) Upon the completion of each review under subsection (a), the Inspector General shall submit a report to the Secretary that contains the findings of the review, including findings regarding—

(1) cost overruns;

(2) significant delays in contract execution;

(3) lack of rigorous departmental contract management;

(4) insufficient departmental financial oversight;

(5) contract bundling that limits the ability of small businesses to compete; or

(6) other high risk business practices.

(d)(1) Not later than 30 days after the receipt of each report submitted under subsection (c), the Secretary shall submit a report to the congressional committees listed in paragraph (3) that describes—

(A) the findings of the report received from the Inspector General; and

(B) the steps the Secretary has taken, or plans to take, to address the problems identified in the report.

(2) Not later than 60 days after the initiation of each contract action with a company whose headquarters is outside of the United States, the Secretary shall submit a report regarding the Secure Border Initiative to the congressional committees listed in paragraph (3).

(3) The congressional committees listed in this paragraph are—

(A) the Committee on Appropriations of the Senate;

(B) the Committee on Appropriations of the House of Representatives;

(C) the Committee on the Judiciary of the Senate;

(D) the Committee on the Judiciary of the House of Representatives;

(E) the Committee on Homeland Security and Governmental Affairs of the Senate; and

(F) the Committee on Homeland Security of the House of Representatives.

SEC. 569. Of the amount appropriated by title VI for Customs and Border Protection for Air and Marine Interdiction, Operations, Maintenance, and Procurement, such funds as are necessary may be available for the establishment of the final Northern border air wing site in Michigan.

SEC. 570. None of the funds appropriated by this Act shall be used for the seizure of a firearm based on the existence of a declaration or state of emergency.

SEC. 571. PILOT INTEGRATED SCANNING SYSTEM. (a) DESIGNATIONS.—

(1) IN GENERAL.—Not later than 90 days after the date of the enactment of this Act, the Secretary of Homeland Security (referred to in this section as the “Secretary”) shall designate 3 foreign seaports through which containers pass or are transhipped to the United States to pilot an integrated scanning system that couples non-intrusive imaging equipment and radiation detection equipment, which may be provided by the Megaports Initiative of the Department of Energy. In making designations under this subsection, the Secretary shall consider 3 distinct ports with unique features and differing levels of trade volume.

(2) COLLABORATION AND COOPERATION.—The Secretary shall collaborate with the Secretary of Energy and cooperate with the private sector and host foreign government to implement the pilot program under this subsection.

(b) IMPLEMENTATION.—Not later than 1 year after the date of the enactment of this Act, the Secretary shall achieve a full-scale implementation of the pilot integrated screening system, which shall—

(1) scan all containers destined for the United States that transit through the terminal;

(2) electronically transmit the images and information to the container security initiative personnel in the host country and/or Customs and Border Protection personnel in the United States for evaluation and analysis;

(3) resolve every radiation alarm according to established Department procedures;

(4) utilize the information collected to enhance the Automated Targeting System or other relevant programs; and

(5) store the information for later retrieval and analysis.

(c) REPORT.—Not later than 120 days after achieving full-scale implementation under subsection (b), the Secretary, in consultation with the Secretary of Energy and the Secretary of State, shall submit a report, to the appropriate congressional committees, that includes—

(1) an evaluation of the lessons derived from the pilot program implemented under this section;

(2) an analysis of the efficacy of the Automated Targeted System or other relevant programs in utilizing the images captured to examine high-risk containers;

(3) an evaluation of software that is capable of automatically identifying potential anomalies in scanned containers; and

(4) a plan and schedule to expand the integrated scanning system developed under this section to other container security initiative ports.

(d) IMPLEMENTATION.—As soon as practicable and possible after the date of enactment of this Act, an integrated scanning system shall be implemented to scan all containers entering the United States prior to arrival in the United States.

SEC. 572. EXPANSION OF THE NATIONAL INFRASTRUCTURE SIMULATION AND ANALYSIS CENTER.

(a) DEFINITIONS.—In this section:

(1) CRITICAL INFRASTRUCTURE.—The term “critical infrastructure” has the meaning given the term in section 1016(e) of the USA PATRIOT Act (42 U.S.C. 5195c(e)).

(2) EMERGENCY AND MAJOR DISASTER.—The terms “emergency” and “major disaster” have the meanings given the terms in section 102 of the Robert T. Stafford Disaster Relief and Emergency Assistance Act (42 U.S.C. 5122).

(3) NATIONAL INFRASTRUCTURE SIMULATION AND ANALYSIS CENTER.—The term “National In-

frastructure Simulation and Analysis Center” means the National Infrastructure Simulation and Analysis Center established under section 1016(d) of the USA PATRIOT Act (42 U.S.C. 5195c(d)).

(4) PROTECT.—The term “protect” means to reduce the vulnerability of critical infrastructure in order to deter, mitigate, or neutralize an emergency, natural disaster, terrorist attack, or other catastrophic event.

(b) AUTHORITY.—

(1) IN GENERAL.—The National Infrastructure Simulation and Analysis Center shall serve as a source of national competence to address critical infrastructure protection and continuity through support for activities related to—

(A) counterterrorism, threat assessment, and risk mitigation; and

(B) an emergency, natural disaster, terrorist attack, or other catastrophic event.

(2) INFRASTRUCTURE MODELING.—

(A) PARTICULAR SUPPORT.—The support provided under paragraph (1) shall include modeling, simulation, and analysis of the systems comprising critical infrastructure, in order to enhance critical infrastructure preparedness, protection, response, and recovery activities.

(B) RELATIONSHIP WITH OTHER AGENCIES.—Each Federal agency and department with critical infrastructure responsibilities under Homeland Security Presidential Directive 7, or any successor to such directive, shall establish a formal relationship, including an agreement regarding information sharing, between the elements of such agency or department and the National Infrastructure Simulation and Analysis Center.

(C) PURPOSE.—

(i) IN GENERAL.—The purpose of the relationship under subparagraph (B) shall be to permit each Federal agency and department described in subparagraph (B) to take full advantage of the capabilities of the National Infrastructure Simulation and Analysis Center consistent with its workload capacity and priorities (particularly vulnerability and consequence analysis) for real-time response to reported and projected emergencies, natural disasters, terrorist attacks, or other catastrophic events.

(ii) RECIPIENT OF CERTAIN SUPPORT.—Modeling, simulation, and analysis provided under this subsection shall be provided to relevant Federal agencies and departments, including Federal agencies and departments with critical infrastructure responsibilities under Homeland Security Presidential Directive 7, or any successor to such directive.

SEC. 573. Notwithstanding any other provisions of law, the Secretary of Homeland Security shall consult with National Council on Radiation Protection and Measurements (in this section referred to as the “NCRP”) and other qualified organizations and government organizations in preparing guidance and recommendations for emergency responders, to assist recovery operations, and to protect the general public with respect to radiological terrorism, threats, and events.

SEC. 574. The Comptroller General shall provide a report to the Senate and House Committees on Appropriations no later than thirty days after enactment describing the impact on public safety and on the effectiveness of screening operations resulting from the modification of the list of items prohibited from being carried aboard a passenger aircraft operated by an air carrier or foreign air carrier in air transportation or intrastate air transportation set forth in section 1540 of title 49, Code of Federal Regulations, as of December 1, 2005, to be carried aboard a passenger aircraft.

TITLE VI

BORDER SECURITY INFRASTRUCTURE ENHANCEMENTS

SEC. 601. (a) Notwithstanding any other provision of law, the Secretary of Homeland Security shall adjust fees charged by the Department against any non-United States citizen by notice in the Federal Register no later than January 1, 2007, to achieve not less than \$350,000,000 in additional receipts by September 30, 2007: Provided, That the Secretary may adjust only those fees authorized under the Immigration and Nationality Act and the Illegal Immigration Reform and Immigrant Responsibility Act: Provided further, That this adjustment shall be in addition to fees authorized under 8 United States Code 1356.

(b) Amounts collected under subsection (a) shall be deposited in the accounts as provided by 8 United States Code 1356: Provided, That of the total amount collected pursuant to subsection (a) the Secretary shall transfer the following amounts:

(1) \$25,000,000 to Customs and Border Protection “Salaries and Expenses” for vehicle replacement;

(2) \$105,000,000 to Customs and Border Protection “Air and Marine Interdiction, Operations, Maintenance, and Procurement” for air asset replacement and air operations facilities upgrades;

(3) \$90,000,000 to Customs and Border Protection “Construction”;

(4) \$30,000,000 to Immigration and Customs Enforcement “Salaries and Expenses” for vehicle replacement; and,

(5) \$15,000,000 to Immigration and Customs Enforcement “Automation Modernization”.

(c) Of the total amount collected pursuant to subsection (a) \$85,000,000 shall be made available to United States Citizenship and Immigration Services: Provided, That of the additional amount available, \$47,000,000 shall be for Business Transformation and \$38,000,000 shall be for Fraud Detection and National Security initiatives.

(d) Amounts deposited under paragraph (b) shall remain available until expended for the activities and services described in paragraphs (b) and (c).

TITLE VII

SUPPLEMENTAL APPROPRIATIONS FOR PORT SECURITY ENHANCEMENTS

The following sums are appropriated, out of any money in the Treasury not otherwise appropriated, to enhance port security for the fiscal year ending September 30, 2006, and for other purposes, namely:

CUSTOMS AND BORDER PROTECTION

SALARIES AND EXPENSES

For an additional amount for “Salaries and Expenses”, \$251,000,000, to remain available until expended.

UNITED STATES COAST GUARD

OPERATING EXPENSES

For an additional amount for “Operating Expenses”, \$23,000,000, to remain available until expended: Provided, That funding is available to accelerate foreign port security assessments, conduct domestic port vulnerability assessments, and perform unscheduled security audits of facilities regulated by chapter 701 of title 46, United States Code, commonly known as the Maritime Transportation Security Act of 2002.

ACQUISITION, CONSTRUCTION, AND IMPROVEMENTS

For an additional amount for “Acquisition, Construction, and Improvements” for acquisition, construction, renovation, and improvement of vessels, aircraft, and equipment, \$184,000,000 for the Integrated Deepwater Systems program,

to remain available until expended: Provided, That funding is available to acquire maritime patrol aircraft and parent craft patrol boats, to provide armed helicopter capability, and to sustain the medium endurance cutter fleet.

OFFICE FOR DOMESTIC PREPAREDNESS
STATE AND LOCAL PROGRAMS

For an additional amount for "State and Local Programs", \$190,000,000 to remain available until September 30, 2007: Provided, That the entire amount shall be for port security grants pursuant to the purposes of subsection (a) through (h) of section 70107 of title 46, United States Code, which shall be awarded based on risk notwithstanding subsection (a), for eligible costs as defined in paragraphs (2), (3), and (4) of subsection (b).

TITLE VIII
UNITED STATES EMERGENCY
MANAGEMENT AUTHORITY

SEC. 801. SHORT TITLE.

This title may be cited as the "United States Emergency Management Authority Act of 2006".

SEC. 802. UNITED STATES EMERGENCY MANAGEMENT AUTHORITY.

Title V of the Homeland Security Act of 2002 (6 U.S.C. 311 et seq.) is amended—

(1) by striking the title heading and inserting the following:

"TITLE V—NATIONAL PREPAREDNESS AND RESPONSE";

(2) by striking sections 501 through 503;

(3) by striking sections 506 and 507;

(4) by redesignating sections 504, 505, 508, and 509 as sections 521, 522, 523, and 524, respectively;

(5) by redesignating section 510 (relating to procurement of security countermeasures for the strategic national stockpile) as section 525;

(6) by redesignating section 510 (relating to urban and other high risk area communications capabilities) as section 526; and

(7) by inserting before section 521, as so redesignated by this section, the following:

"SEC. 501. DEFINITIONS.

"In this title—

"(1) the term 'all-hazards-plus' means an approach to preparedness, response, recovery, and mitigation that emphasizes the development of capabilities that are common to natural and man-made disasters, while also including the development of capabilities that are uniquely relevant to specific types of disasters;

"(2) the term 'Authority' means the United States Emergency Management Authority established under section 502;

"(3) the term 'Administrator' means the Administrator of the Authority;

"(4) the term 'Federal coordinating officer' means a Federal coordinating officer as described in section 302 of the Robert T. Stafford Disaster Relief and Emergency Assistance Act (42 U.S.C. 5143);

"(5) the term 'National Advisory Council' means the National Advisory Council on Emergency Preparedness and Response established under section 508;

"(6) the term 'National Incident Management System' means the National Incident Management System as described in the National Response Plan;

"(7) the term 'National Response Plan' means the National Response Plan prepared under Homeland Security Presidential Directive 5 or any presidential directive meant to replace or augment that directive;

"(8) the term 'Nuclear Incident Response Team' means a resource that includes—

"(A) those entities of the Department of Energy that perform nuclear or radiological emergency support functions (including accident response, search response, advisory, and technical

operations functions), radiation exposure functions at the medical assistance facility known as the Radiation Emergency Assistance Center/Training Site (REAC/TS), radiological assistance functions, and related functions; and

"(B) those entities of the Environmental Protection Agency that perform such support functions (including radiological emergency response functions) and related functions;

"(9) the term 'Regional Advisory Council' means a Regional Advisory Council on Preparedness and Response established under section 503;

"(10) the term 'Regional Administrator' means a Regional Administrator for Preparedness and Response appointed under section 507;

"(11) the term 'Regional Office' means a Regional Office established under section 507; and

"(12) the term 'surge capacity' means the ability to rapidly and substantially increase the provision of search and rescue capabilities, food, water, medicine, shelter and housing, medical care, evacuation capacity, staffing, including disaster assistance employees, and other resources necessary to save lives and protect property during a catastrophic incident, or other natural or man-made disaster.

"SEC. 502. UNITED STATES EMERGENCY MANAGEMENT AUTHORITY.

"(a) IN GENERAL.—There is established in the Department the United States Emergency Management Authority, headed by an Administrator.

"(b) MISSION.—The mission of the Authority is to—

"(1) lead the Nation's efforts to prepare for, respond to, recover from, and mitigate the risks of natural and man-made disasters, including catastrophic incidents;

"(2) partner with State and local governments and emergency response providers, with other Federal agencies, with the private sector, and with nongovernmental organizations to build a national system of emergency management that can effectively and efficiently utilize the full measure of the Nation's resources to respond to a catastrophic incident or other natural or man-made disaster;

"(3) develop a Federal response capability that, when necessary and appropriate, can act effectively, rapidly, and proactively to deliver assistance essential to saving lives or protecting or preserving property or public health and safety in a natural or man-made disaster;

"(4) fuse the Department's emergency response, preparedness, recovery, mitigation, and critical infrastructure assets into a new, integrated organization that can effectively confront the challenges of a natural or man-made disaster;

"(5) develop and maintain robust Regional Offices that will work with State and local governments and emergency response providers to identify and address regional priorities;

"(6) under the leadership of the Secretary, coordinate with the Commandant of the Coast Guard, the Director of Customs and Border Protection, the Director of Immigration and Customs Enforcement, the National Operations Center, and other agencies and offices in the Department to take full advantage of the substantial range of resources in the Department that can be brought to bear in preparing for and responding to a natural or man-made disaster;

"(7) carry out the provisions of the Robert T. Stafford Disaster Relief and Emergency Assistance Act (42 U.S.C. 5121 et seq.);

"(8) provide funding, training, exercises, technical assistance, planning, and other assistance, to build local, State, regional, and national capabilities, including communications capabilities, necessary to respond to a potential natural or man-made disaster;

"(9) implement an all-hazards-plus strategy for preparedness that places priority on building

those common capabilities necessary to respond to both terrorist attacks and natural disasters while also building the unique capabilities necessary to respond to specific types of incidents that pose the greatest risk to our Nation; and

"(10) promote, plan for, and facilitate the security and resiliency of critical infrastructure and key resources, including cyber infrastructure, against a natural or man-made disaster, and the post-disaster restoration of such critical infrastructure and key resources.

"(c) ADMINISTRATOR.—

"(1) IN GENERAL.—The Administrator shall be appointed by the President, by and with the advice and consent of the Senate.

"(2) QUALIFICATIONS.—The Administrator shall have not less than 5 years of executive leadership and management experience in the public or private sector, significant experience in crisis management or another relevant field, and a demonstrated ability to manage a substantial staff and budget.

"(3) REPORTING.—The Administrator shall report to the Secretary, without being required to report through any other official of the Department.

"(4) PRINCIPAL ADVISOR ON EMERGENCY PREPAREDNESS AND RESPONSE.—

"(A) IN GENERAL.—The Administrator is the principal emergency preparedness and response advisor to the President, the Homeland Security Council, and the Secretary.

"(B) ADVICE AND RECOMMENDATIONS.—

"(i) IN GENERAL.—In presenting advice with respect to any matter to the President, the Homeland Security Council, or the Secretary, the Administrator shall, as the Administrator considers appropriate, inform the President, the Homeland Security Council, or the Secretary, as the case may be, of the range of emergency mitigation, preparedness, response, and recovery options with respect to that matter.

"(ii) ADVICE ON REQUEST.—The Administrator, as an emergency preparedness and response advisor, shall provide advice to the President, the Homeland Security Council, or the Secretary on a particular matter when the President, the Homeland Security Council, or the Secretary requests such advice.

"(iii) RECOMMENDATIONS TO CONGRESS.—After informing the Secretary, the Administrator may make such recommendations to Congress relating to emergency preparedness and response as the Administrator considers appropriate.

"(C) RETENTION OF AUTHORITY.—Nothing in this paragraph shall be construed as affecting the authority of the Secretary under this Act.

"SEC. 503. AUTHORITIES AND RESPONSIBILITIES.

"(a) IN GENERAL.—The Administrator shall provide Federal leadership necessary to prepare for and respond to a natural or man-made disaster, including—

"(1) carrying out the mission to reduce the loss of life and property and protect the Nation from all hazards by leading and supporting the Nation in a comprehensive, risk-based emergency preparedness and response program of—

"(A) mitigation, by taking sustained actions to reduce or eliminate long-term risk to people and property from hazards and their effects;

"(B) preparedness, by planning, training, and building the emergency preparedness and response workforce to prepare effectively for, mitigate against, respond to, and recover from any hazard;

"(C) response, by conducting emergency operations to save lives and property through positioning emergency equipment, personnel, and supplies, through evacuating potential victims, through providing food, water, shelter, and medical care to those in need, and through restoring critical public services;

"(D) recovery, by rebuilding communities so individuals, businesses, and governments can

function on their own, return to normal life, and protect against future hazards; and

“(E) critical infrastructure protection, by establishing an inventory of, and protections for, public and private sector critical infrastructure, including cyber and communications assets;

“(2) increasing efficiencies, by coordinating efforts relating to mitigation, preparedness, response, recovery, and infrastructure protection;

“(3) helping to ensure the effectiveness of emergency response providers in responding to a natural or man-made disaster;

“(4) providing the Federal Government’s response to a natural or man-made disaster, including—

“(A) managing such response;

“(B) directing the Domestic Emergency Support Team, the National Disaster Medical System, and (when operating as an organizational unit of the Department under this title) the Nuclear Incident Response Team;

“(C) overseeing the Metropolitan Medical Response System; and

“(D) coordinating other Federal response resources, including requiring deployment of the Strategic National Stockpile, in the event of a natural or man-made disaster;

“(5) working with Federal, State, and local government personnel, agencies, and authorities to build a comprehensive national incident management system to respond to a natural or man-made disaster;

“(6) with respect to the Nuclear Incident Response Team (regardless of whether it is operating as an organizational unit of the Department under this title)—

“(A) establishing standards and certifying when those standards have been met;

“(B) conducting joint and other exercises and training and evaluating performance; and

“(C) providing funds to the Department of Energy and the Environmental Protection Agency, as appropriate, for homeland security planning, exercises and training, and equipment;

“(7) helping to ensure that emergency response providers acquire interoperable and sustainable technology;

“(8) assisting the President in carrying out the functions under the Robert T. Stafford Disaster Relief and Emergency Assistance Act (42 U.S.C. 5121 et seq.);

“(9) administering homeland security emergency management, first responder, and other preparedness grants;

“(10) administering and implementing the National Response Plan, including monitoring, evaluating, and ensuring the readiness of each emergency support function under the National Response Plan;

“(11) coordinating with the National Advisory Council;

“(12) ensuring the protection of critical infrastructure by—

“(A) carrying out the responsibilities under paragraphs (2) through (6) of section 201(d);

“(B) helping ensure the protection and resiliency of key resources and critical infrastructure, including cyber infrastructure, against a natural or man-made disaster; and

“(C) planning for, assisting with, and facilitating, the restoration of key resources and critical infrastructure, including cyber infrastructure, in the event of a natural or man-made disaster;

“(13) establishing in each Regional Office a Regional Advisory Council on Preparedness and Response, to advise the Regional Administrator of that Regional Office on emergency preparedness and response issues specific to the region; and

“(14) otherwise carrying out the mission of the Authority as described in section 502(b).

“(b) ADDITIONAL RESPONSIBILITIES RELATED TO CATASTROPHIC INCIDENTS.—

“(1) IN GENERAL.—The Administrator, in consultation with the Secretary and other senior Department officials, shall develop a national emergency management system that is capable of responding to catastrophic incidents.

“(2) IDENTIFICATION OF RESOURCES.—

“(A) IN GENERAL.—The Administrator shall develop and submit to Congress annually an estimate of the resources of the Authority and other Federal agencies needed for and devoted specifically to developing local, State, and national capabilities necessary to respond to a catastrophic incident.

“(B) CONTENTS.—Each estimate under subparagraph (A) shall include the resources both necessary for and devoted to—

“(i) planning;

“(ii) training and exercises;

“(iii) Regional Office enhancements;

“(iv) staffing, including for surge capacity during a catastrophic event;

“(v) additional logistics capabilities;

“(vi) other responsibilities under the Catastrophic Incident Annex of the Catastrophic Incident Supplement of the National Response Plan; and

“(vii) State and local catastrophic preparedness.

“(c) ALL-HAZARDS-PLUS APPROACH.—In carrying out this section, the Administrator shall implement an all-hazards-plus strategy that places priority on building those common capabilities necessary to prepare for, respond to, recover from, and mitigate the risks of terrorist attacks and natural disasters, while also building the unique capabilities necessary to prepare for, respond to, recover from, and mitigate the risks of specific types of incidents that pose the greatest risk to the Nation.

“SEC. 504. AUTHORITY COMPONENTS.

“There are transferred to the Authority the following:

“(1) Except as provided in title III of the Department of Homeland Security Appropriations Act, 2007, regarding the transfer of the National Disaster Medical System, the Federal Emergency Management Agency, as constituted on June 1, 2006, including all of its functions, personnel, assets, components, and liabilities, and including the functions of the Under Secretary for Federal Emergency Management relating thereto.

“(2) The Directorate of Preparedness, as constituted on June 1, 2006, including all of its functions, personnel assets, components, and liabilities, and including the functions of the Under Secretary for Preparedness relating to the Directorate, as constituted on that date.

“SEC. 505. PRESERVING THE UNITED STATES EMERGENCY MANAGEMENT AUTHORITY.

“(a) DISTINCT ENTITY.—The Authority shall be maintained as a distinct entity within the Department.

“(b) REORGANIZATION.—Section 872 shall not apply to the Authority, including any function or organizational unit of the Authority.

“(c) PROHIBITION ON CHANGES TO MISSIONS.—

“(1) IN GENERAL.—The Secretary may not substantially or significantly reduce the authorities, responsibilities, or functions of the Authority or the capability of the Authority to perform those responsibilities, except as otherwise specifically provided in an Act enacted after the date of enactment of the United States Emergency Management Authority Act of 2006.

“(2) CERTAIN TRANSFERS PROHIBITED.—No asset, function or mission of the Authority may be diverted to the principal and continuing use of any other organization, unit, or entity of the Department, except for details or assignments that do not reduce the capability of the Authority to perform its missions.

“SEC. 506. DIRECTORS.

“(a) IN GENERAL.—There shall be in the Authority a Director for Preparedness and a Direc-

tor for Response and Recovery, each of whom shall be appointed by the President, by and with the advice and consent of the Senate, and shall report to the Administrator.

“(b) QUALIFICATIONS.—

“(1) IN GENERAL.—A Director shall have—

“(A) not less than 5 years of—

“(i) executive leadership and management experience in the public or private sector; and

“(ii) significant experience in crisis management or another relevant field; and

“(B) a demonstrated ability to manage a substantial staff and budget.

“(2) CONCURRENT EXPERIENCE.—Service during any period of time may be used in meeting the requirements under both clause (i) and (ii) of paragraph (1)(A).

“(c) INITIAL DIRECTORS.—The individual serving as the Under Secretary for Preparedness and the individual serving as the Under Secretary for the Federal Emergency Management Agency on the effective date of the United States Emergency Management Authority Act of 2006, may serve as the Director for Preparedness and the Director of Response and Recovery, respectively, until a Director for Preparedness or a Director of Response and Recovery, as the case may be, is appointed under subsection (a).

“SEC. 507. REGIONAL OFFICES.

“(a) IN GENERAL.—

“(1) REGIONAL OFFICES.—The Administrator shall establish 10 Regional Offices of the Authority.

“(2) ADDITIONAL OFFICE.—In addition to the Regional Offices established under paragraph (1), the Administrator may designate the Office for National Capital Region Coordination under section 882 as a Regional Office.

“(b) MANAGEMENT OF REGIONAL OFFICES.—

“(1) REGIONAL ADMINISTRATOR.—Each Regional Office shall be headed by a Regional Administrator for Preparedness and Response, who shall be appointed by the Administrator. Each Regional Administrator for Emergency Preparedness and Response shall report directly to the Administrator.

“(2) QUALIFICATIONS.—Each Regional Office shall be headed by an individual in the Senior Executive Service qualified to act as a senior Federal coordinating officer to provide strategic oversight of incident management when needed.

“(c) RESPONSIBILITIES.—

“(1) IN GENERAL.—The Regional Administrator shall work in partnership with State and local governments, emergency managers, emergency response providers, medical providers, the private sector, nongovernmental organizations, multijurisdictional councils of governments, and regional planning commissions and organizations in the geographical area served by the Regional Office to carry out the responsibilities of a Regional Administrator under this section.

“(2) RESPONSIBILITIES.—The responsibilities of a Regional Administrator include—

“(A) ensuring effective, coordinated, and integrated regional preparedness, mitigation, response, and recovery activities and programs for natural and man-made disasters (including planning, training, exercises, and professional development);

“(B) coordinating and integrating regional preparedness, mitigation, response, and recovery activities and programs for natural and man-made disasters (including planning, training, exercises, and professional development), which shall include—

“(i) providing regional and interstate planning assistance;

“(ii) organizing, in consultation with the Administrator, regional training and exercise programs;

“(iii) providing support and coordination officers for State and local government training and exercises;

“(iv) participating in emergency preparedness and planning activities by State, regional, and local governments;

“(v) assisting in the development of regional capabilities needed for a national catastrophic response system; and

“(vi) helping to coordinate and develop interstate agreements;

“(C) establishing and overseeing 1 or more strike teams within the region under subsection (e), which shall serve as the focal point of the Federal Government’s initial response efforts for a natural or man-made disaster within that region, and otherwise building Federal response capabilities to respond to a natural or man-made disaster within that region;

“(D) working with the private sector to assess weaknesses in critical infrastructure protection in the region and to design and implement programs to address those weaknesses;

“(E) coordinating all activities conducted under this section with other Federal departments and agencies; and

“(F) performing such other duties relating to such responsibilities as the Administrator may require.

“(d) AREA OFFICES.—The Administrator shall establish an Area Office for the Pacific and an Area Office for the Caribbean, as components in the appropriate Regional Offices.

“(e) REGIONAL OFFICE STRIKE TEAMS.—

“(1) ESTABLISHMENT.—In coordination with other relevant Federal agencies, each Regional Administrator shall establish multi-agency strike teams that shall consist of—

“(A) a designated Federal coordinating officer;

“(B) personnel trained in incident management;

“(C) public affairs, response and recovery, and communications support personnel;

“(D) a defense coordinating officer;

“(E) liaisons to other Federal agencies;

“(F) such other personnel as the Administrator or Regional Administrator determines appropriate; and

“(G) individuals from the agencies with primary responsibility for each of the emergency support functions in the National Response Plan, including the following:

“(i) Transportation.

“(ii) Communications.

“(iii) Public works and engineering.

“(iv) Emergency management.

“(v) Mass care.

“(vi) Housing and human services.

“(vii) Public health and medical services.

“(viii) Urban search and rescue.

“(ix) Public safety and security.

“(x) External affairs.

“(2) LOCATION OF MEMBERS.—The members of each Regional Office strike team, including representatives from agencies other than the Department, shall be based primarily at the Regional Office that corresponds to that strike team.

“(3) COORDINATION.—Each Regional Office strike team shall coordinate the training and exercises of that strike team with the State and local governments and private sector and nongovernmental entities which the strike team shall support when a natural or man-made disaster occurs.

“(4) PREPAREDNESS.—Each Regional Office strike team shall be trained, equipped, and staffed to be well prepared to respond to natural and man-made disasters, including catastrophic incidents.

“(5) AUTHORIZATION OF APPROPRIATIONS.—There are authorized to be appropriated such sums as necessary to carry out this subsection.

“SEC. 508. NATIONAL ADVISORY COUNCIL ON EMERGENCY PREPAREDNESS AND RESPONSE.

“(a) ESTABLISHMENT.—Not later than 60 days after the date of enactment of the United States

Emergency Management Authority Act of 2006, the Secretary shall establish an advisory body under section 871(a), to be known as the National Advisory Council on Emergency Preparedness and Response.

“(b) RESPONSIBILITIES.—The National Advisory Council shall advise the Administrator on all aspects of emergency preparedness and response.

“(c) MEMBERSHIP.—

“(1) IN GENERAL.—The members of the National Advisory Council shall be appointed by the Administrator, and shall, to the extent practicable, represent a geographic (including urban and rural) and substantive cross section of State and local government officials and emergency managers, and emergency response providers, from State and local governments, the private sector, and nongovernmental organizations, including as appropriate—

“(A) members selected from the emergency preparedness and response fields, including fire service, law enforcement, hazardous materials response, emergency medical services, and emergency preparedness and response personnel;

“(B) health scientists, emergency and inpatient medical providers, and public health professionals;

“(C) experts representing standards setting organizations;

“(D) State and local government officials with expertise in terrorism preparedness and emergency preparedness and response;

“(E) elected State and local government executives;

“(F) experts in public and private sector infrastructure protection, cybersecurity, and communications;

“(G) representatives of the disabled and other special needs populations; and

“(H) such other individuals as the Administrator determines to be appropriate.

“(d) APPLICABILITY OF FEDERAL ADVISORY COMMITTEE ACT.—

“(1) IN GENERAL.—Notwithstanding section 871(a) and subject to paragraph (2), the Federal Advisory Committee Act (5 U.S.C. App.), including subsections (a), (b), and (d) of section 10 of such Act, and section 552b(c) of title 5, United States Code, shall apply to the Advisory Council.

“(2) TERMINATION.—Section 14(a)(2)(B) of the Federal Advisory Committee Act (5 U.S.C. App.) shall not apply to the Advisory Council.

“SEC. 509. NATIONAL INCIDENT MANAGEMENT SYSTEM INTEGRATION CENTER.

“(a) IN GENERAL.—There is in the Authority a National Incident Management System Integration Center.

“(b) RESPONSIBILITIES.—

“(1) IN GENERAL.—The Administrator, through the National Incident Management System Integration Center, and in consultation with other Federal departments and agencies and the National Advisory Council, shall ensure ongoing management and maintenance of the National Incident Management System, the National Response Plan, any other document or tool in support of Homeland Security Presidential Directive 5, or any other Homeland Security Presidential Directive relating to incident management and response.

“(2) SPECIFIC RESPONSIBILITIES.—The National Incident Management System Integration Center shall—

“(A) periodically review, and revise, as appropriate, the National Incident Management System and the National Response Plan;

“(B) review other matters relating to the National Incident Management System and the National Response Plan, as the Administrator may require;

“(C) develop and implement a national program for National Incident Management System

and National Response Plan education and awareness;

“(D) oversee all aspects of the National Incident Management System, including the development of compliance criteria and implementation activities at Federal, State, and local government levels;

“(E) provide guidance and assistance to States and local governments and emergency response providers, in adopting the National Incident Management System; and

“(F) perform such other duties relating to such responsibilities as the Administrator may require.

“SEC. 510. NATIONAL OPERATIONS CENTER.

“(a) DEFINITION.—In this section, the term ‘situational awareness’ means information gathered from a variety of sources that, when communicated to emergency preparedness and response managers and decision makers, can form the basis for incident management decision-making.

“(b) ESTABLISHMENT.—There is established in the Department a National Operations Center.

“(c) PURPOSE.—The purposes of the National Operations Center are to—

“(1) coordinate the national response to any natural or man-made disaster, as determined by the Secretary;

“(2) provide situational awareness and a common operating picture for the entire Federal Government, and for State and local governments as appropriate, for an event described in paragraph (1);

“(3) collect and analyze information to help deter, detect, and prevent terrorist acts;

“(4) disseminate terrorism and disaster-related information to Federal, State, and local governments;

“(5) ensure that critical terrorism and disaster-related information reaches government decision-makers; and

“(6) perform such other duties as the Secretary may require.

“(d) RESPONSIBILITIES.—The National Operations Center shall carry out the responsibilities of the Homeland Security Operations Center, the National Response Coordination Center, and the Interagency Incident Management Group, as constituted on September 1, 2005.

“SEC. 511. CHIEF MEDICAL OFFICER.

“(a) IN GENERAL.—There is in the Authority a Chief Medical Officer, who shall be appointed by the President, by and with the advice and consent of the Senate. The Chief Medical Officer shall report directly to the Administrator.

“(b) QUALIFICATIONS.—The individual appointed as Chief Medical Officer shall possess a demonstrated ability in and knowledge of medicine and public health.

“(c) RESPONSIBILITIES.—The Chief Medical Officer shall have the primary responsibility within the Department for medical issues related to natural and man-made disasters, including—

“(1) serving as the principal advisor to the Secretary and the Administrator on medical and public health issues;

“(2) coordinating the biosurveillance and detection activities of the Department;

“(3) ensuring internal and external coordination of all medical preparedness and response activities of the Department, including training, exercises, and equipment support;

“(4) serving as the Department’s primary point of contact with the Department of Agriculture, the Department of Defense, the Department of Health and Human Services, the Department of Transportation, the Department of Veterans Affairs, and other Federal departments or agencies, on medical and public health issues;

“(5) serving as the Department’s primary point of contact for State and local government, the medical community, and others within and outside the Department, with respect to medical and public health matters;

“(6) discharging, in coordination with the Under Secretary for Science and Technology, the responsibilities of the Department related to Project Bioshield;

“(7) establishing doctrine and priorities for the National Disaster Medical System, consistent with the National Response Plan and the National Incident Management System, supervising its medical components, and exercising predeployment operational control, including—

“(A) determining composition of the teams;

“(B) overseeing credentialing of the teams; and

“(C) training personnel of the teams;

“(8) establishing doctrine and priorities for the Metropolitan Medical Response System, consistent with the National Response Plan and the National Incident Management System;

“(9) managing the Metropolitan Medical Response System, including developing and overseeing standards, plans, training, and exercises and coordinating with the Office of Grants and Training on the use and distribution of Metropolitan Medical Response grants;

“(10) assessing and monitoring long-term health issues of emergency managers and emergency response providers;

“(11) developing and updating, in consultation with the Secretary of Health and Human Services, guidelines for State and local governments for medical response plans for chemical, biological, radiological, nuclear, or explosive weapon attacks;

“(12) developing, in consultation with the Secretary of Health and Human Services, appropriate patient tracking capabilities to execute domestic patient movement and evacuations, including a system that has the capacity of electronically maintaining and transmitting the health information of hospital patients;

“(13) establishing and providing oversight for the Department’s occupational health and safety program, including workforce health; and

“(14) performing such other duties relating to such responsibilities as the Secretary or the Administrator may require.

“(d) **LONG-TERM HEALTH ASSESSMENT PROGRAM.**—The Chief Medical Officer, in consultation with the Director of the National Institute for Occupational Safety and Health, shall establish a program to assess, monitor, and study the health and safety of emergency managers and emergency response providers, following Incidents of National Significance declared by the Secretary under the National Response Plan.

“SEC. 512. PUBLIC AND COMMUNITY PREPAREDNESS.

“The Administrator shall promote public and community preparedness.

“SEC. 513. SAVER PROGRAM.

“(a) **IN GENERAL.**—In the Department there is a System Assessment and Validation for Emergency Responders Program to provide impartial evaluations of emergency response equipment and systems.

“(b) **REQUIREMENTS.**—The program established under subsection (a) shall—

“(1) provide impartial, practitioner relevant, and operationally oriented assessments and validations of emergency response provider equipment and systems that have not already been third-party certified to a standard adopted by the Department, including—

“(A) commercial, off-the-shelf emergency response provider equipment and systems in all equipment list categories of the Standardized Equipment List published by the Interagency Board for Equipment Standardization and Interoperability; and

“(B) such other equipment or systems as the Secretary determines are appropriate;

“(2) provide information that enables decision-makers and emergency response providers to better select, procure, use, and maintain

emergency response provider equipment or systems;

“(3) assess and validate the performance of products within a system and subsystems; and

“(4) provide information and feedback to emergency response providers through the Responder Knowledge Base of the National Memorial Institute for the Prevention of Terrorism, or other appropriate forum.

“(c) **ASSESSMENT AND VALIDATION PROCESS.**—The assessment and validation of emergency response provider equipment and systems shall use multiple evaluation techniques, including—

“(1) operational assessments of equipment performance on vehicle platforms;

“(2) technical assessments on a comparative basis of system component performance across makes and models under controlled conditions; and

“(3) integrative assessments on an individual basis of system component interoperability and compatibility with other system components.

“(d) **PERSONAL PROTECTIVE EQUIPMENT.**—To the extent practical, the assessment and validation of personal protective equipment under this section shall be conducted by the National Personal Protective Technology Laboratory of the National Institute for Occupational Safety and Health.

“SEC. 514. NATIONAL SEARCH AND RESCUE RESPONSE SYSTEM.

“(a) **NATIONAL SEARCH AND RESCUE RESPONSE SYSTEM.**—There is established in the Authority an emergency response system known as the National Search and Rescue Response System that provides a national network of standardized search and rescue resources to assist State and local governments in responding to any natural or man-made disaster.

“(b) **ADMINISTRATION OF THE SYSTEM.**—

“(1) **TASK FORCE PARTICIPATION.**—The Administrator shall select eligible search and rescue teams that are sponsored by State and local government entities to participate as task forces in the National Search and Rescue Response System. The Administrator shall determine the criteria for such participation.

“(2) **AGREEMENTS WITH SPONSORING AGENCIES.**—The Administrator shall enter into an agreement with the State or local government entity that sponsors each search and rescue team selected under paragraph (1) with respect to the team’s participation as a task force in the National Search and Rescue Response System.

“(3) **MANAGEMENT AND TECHNICAL TEAMS.**—The Administrator shall maintain such management and other technical teams as are necessary to administer the National Search and Rescue Response System.

“SEC. 515. METROPOLITAN MEDICAL RESPONSE SYSTEM.

“(a) **IN GENERAL.**—There is in the Authority a Metropolitan Medical Response System. Under the Metropolitan Medical Response System, the Assistant Secretary for Grants and Planning, in coordination with the Chief Medical Officer, shall administer grants to develop, maintain, and enhance medical preparedness systems that are capable of responding effectively to a public health crisis or mass-casualty event caused by a natural or man-made disaster.

“(b) **USE OF FUNDS.**—The Metropolitan Medical Response System shall make grants to local governments to enhance any of the following activities:

“(1) Medical surge capacity.

“(2) Mass prophylaxis.

“(3) Chemical, biological, radiological, nuclear, and explosive detection, response, and decontamination capabilities.

“(4) Emergency communications capabilities.

“(5) Information sharing and collaboration capabilities.

“(6) Regional collaboration.

“(7) Triage and pre-hospital treatment.

“(8) Medical supply management and distribution.

“(9) Fatality management.

“(10) Such other activities as the Secretary may provide.

“SEC. 516. EMERGENCY MANAGEMENT ASSISTANCE COMPACT.

“(a) **IN GENERAL.**—The Secretary, acting through the Administrator, may make grants for the purposes of administering and improving the Emergency Management Assistance Compact consented to by the Joint Resolution entitled ‘Joint Resolution granting the consent of Congress to the Emergency Management Assistance Compact’ (Public Law 104-321; 110 Stat. 3877).

“(b) **USES.**—A grant under this section shall be used to—

“(1) carry out recommendations identified in after-action reports for the 2004 and 2005 hurricane season issued under the Emergency Management Assistance Compact;

“(2) coordinate with the Department and other Federal Government agencies;

“(3) coordinate with State and local government entities and their respective national associations;

“(4) assist State and local governments with credentialing emergency response providers and the typing of emergency response resources; or

“(5) administer the operations of the Emergency Management Assistance Compact.

“(c) **AUTHORIZATION OF APPROPRIATIONS.**—There are authorized to be appropriated to the Secretary to carry out this section \$4,000,000 for each of fiscal years 2007 through 2010. Amounts appropriated under this section shall remain available for 3 fiscal years after the date on which such funds are appropriated.

“SEC. 517. OFFICE FOR THE PREVENTION OF TERRORISM.

“(a) **ESTABLISHMENT.**—There is established in the Department an Office for the Prevention of Terrorism, which shall be headed by a Director.

“(b) **DIRECTOR.**—

“(1) **REPORTING.**—The Director of the Office for the Prevention of Terrorism shall report directly to the Secretary.

“(2) **QUALIFICATIONS.**—The Director of the Office for the Prevention of Terrorism shall have an appropriate background with experience in law enforcement, intelligence, or other anti-terrorist functions.

“(c) **ASSIGNMENT OF PERSONNEL.**—

“(1) **IN GENERAL.**—The Secretary shall assign to the Office for the Prevention of Terrorism permanent staff and other appropriate personnel detailed from other components of the Department to carry out the responsibilities under this section.

“(2) **LIAISONS.**—The Secretary shall designate senior employees from each component of the Department that has significant antiterrorism responsibilities to act a liaison between that component and the Office for the Prevention of Terrorism.

“(d) **RESPONSIBILITIES.**—The Director of the Office for the Prevention of Terrorism shall—

“(1) coordinate policy and operations between the Department and State and local government agencies relating to preventing acts of terrorism within the United States;

“(2) serve as a liaison between State and local law enforcement agencies and the Department;

“(3) in coordination with the Office of Intelligence, develop better methods for the sharing of intelligence with State and local law enforcement agencies;

“(4) work with the Assistant Secretary of the Office of Grants and Training to ensure that homeland security grants to State and local agencies, including the Law Enforcement Terrorism Prevention Program, Commercial Equipment Direct Assistance Program, grants for fusion centers, and other law enforcement programs are adequately focused on terrorism prevention activities; and

“(5) coordinate with the Authority, the Department of Justice, the National Institute of Justice, law enforcement organizations, and other appropriate entities to develop national voluntary consensus standards for training and personal protective equipment to be used in a tactical environment by law enforcement officers.

“(e) PILOT PROJECT.—

“(1) IN GENERAL.—The Director of the Office for the Prevention of Terrorism, in coordination with the Director for Response, shall establish a pilot project to determine the efficacy and feasibility of establishing law enforcement deployment teams.

“(2) FUNCTION.—The law enforcement deployment teams participating in the pilot program under this subsection shall form the basis of a national network of standardized law enforcement resources to assist State and local governments in responding to a natural or man-made disaster.

“(f) CONSTRUCTION.—Nothing in this section may be construed to affect the roles or responsibilities of the Department of Justice.

“SEC. 518. DEPARTMENT OFFICIALS.

“(a) CYBERSECURITY AND TELECOMMUNICATIONS.—There is in the Department an Assistant Secretary for Cybersecurity and Telecommunications.

“(b) UNITED STATES FIRE ADMINISTRATION.—The Administrator of the United States Fire Administration shall have a rank equivalent to an assistant secretary of the Department.

“SEC. 519. CREDENTIALING.

“(a) DEFINITIONS.—In this section—

“(1) the term ‘credential’ means to provide documentation that can authenticate and verify the qualifications and identity of managers of incidents, emergency response providers, and other appropriate personnel including by ensuring that such personnel possess a minimum common level of training, experience, physical and medical fitness, and capability appropriate for their position;

“(2) the term ‘credentialing’ means evaluating an individual’s qualifications for a specific position under guidelines created in this section and assigning such individual a qualification under the standards developed in this section; and

“(3) the term ‘credentialed’ means an individual has been evaluated for a specific position under the guidelines created under this section.

“(b) REQUIREMENTS.—

“(1) IN GENERAL.—The Administrator shall enter into a memorandum of understanding to collaborate with the Emergency Management Assistance Compact and other organizations to establish, in consultation with the Authority, nationwide standards for credentialing all personnel who are likely to respond to an emergency or major disaster.

“(2) CONTENTS.—The standards developed under paragraph (1) shall—

“(A) include the minimum professional qualifications, certifications, training, and education requirements for specific emergency response functional positions that are applicable to Federal, State and local government;

“(B) be compatible with the National Incident Management System; and

“(C) be consistent with standards for advance registration for health professions volunteers under section 3191 of the Public Health Services Act (42 U.S.C. 247d–7b).

“(3) TIMEFRAME.—The standards developed under paragraph (1) shall be completed not later than 6 months after the date of enactment of the United States Emergency Management Authority Act of 2006.

“(c) CREDENTIALING OF DEPARTMENT PERSONNEL.—Not later than 1 year after the date of enactment of this Act, the Secretary and the Administrator shall ensure that all personnel of

the Department (including temporary personnel) who are likely to respond to an emergency or major disaster are credentialed.

“(d) INTEGRATION WITH NATIONAL RESPONSE PLAN.—

“(1) DISTRIBUTION OF STANDARDS.—Not later than 6 months after the date of enactment of this Act, the Administrator of the Authority shall provide the standards developed under subsection (b) to all Federal agencies that have responsibilities under the National Response Plan.

“(2) CREDENTIALING OF AGENCIES.—Not later than 180 days after the date on which the standards are provided under paragraph (1), each agency described in paragraph (1) shall—

“(A) ensure that all employees or volunteers of that agency who are likely to respond to an emergency or major disaster are credentialed; and

“(B) submit to the Secretary the name of each credentialed employee or volunteer of such agency.

“(3) LEADERSHIP.—The Administrator shall provide leadership, guidance, and technical assistance to an agency described in paragraph (1) to facilitate the credentialing process of that agency.

“(e) DOCUMENTATION AND DATABASE SYSTEM.—

“(1) IN GENERAL.—Not later than 1 year after the date of enactment of this Act, the Administrator of the Authority shall establish and maintain a documentation and database system of Federal emergency response providers and all other Federal personnel credentialed to respond to an emergency or major disaster.

“(2) ACCESSIBILITY.—The documentation and database system established under paragraph (1) shall be accessible to the Federal coordinating officer and other appropriate officials preparing for or responding to an emergency or major disaster.

“(3) CONSIDERATIONS.—The Administrator shall consider whether the credentialing system can be used to regulate access to areas affected by a major disaster.

“(f) GUIDANCE TO STATE AND LOCAL GOVERNMENTS.—Not later than 6 months after the date of enactment of this Act, the Administrator shall—

“(1) in collaboration with the Emergency Management Assistance Compact provide detailed written guidance, assistance, and expertise to State and local governments to facilitate the credentialing of State and local emergency response providers and typing of assets commonly or likely to be used in responding to an emergency or major disaster; and

“(2) in coordination with the Emergency Management Assistance Compact and appropriate national professional organizations, assist State and local governments with credentialing the personnel and typing the resources of the State or local government under the guidance provided under paragraph (1).

“(g) REPORT.—Not later than 6 months after the date of enactment of this Act and annually thereafter, the Director of the Authority shall submit to the Committee on Homeland Security and Governmental Affairs of the Senate and the Committee on Homeland Security of the House of Representatives a report describing the implementation of this section, including the number and level of qualification of Federal personnel trained and ready to respond to an emergency or major disaster.

“(h) AUTHORIZATION OF APPROPRIATIONS.—There are authorized to be appropriated such sums as are necessary to carry out this section.

“SEC. 520. TYPING OF RESOURCES AND ASSETS.

“(a) DEFINITIONS.—In this section—

“(1) the term ‘typed’ means an asset or resource has been evaluated for a specific func-

tion under the guidelines created under this section; and

“(2) the term ‘typing’ means to define in detail the minimum capabilities of an asset or resource.

“(b) REQUIREMENTS.—

“(1) IN GENERAL.—The Administrator shall enter into a memorandum of understanding to collaborate with the Emergency Management Assistance Compact and other organizations to establish, in consultation with the Authority, nationwide standards for typing of resources and assets commonly or likely to be used in responding to an emergency or major disaster.

“(2) CONTENTS.—The standards developed under paragraph (1) shall—

“(A) be applicable to Federal, State and local government; and

“(B) be compatible with the National Incident Management System.

“(c) TYPING OF DEPARTMENT RESOURCES.—Not later than 1 year after the date of enactment of this Act, the Secretary shall ensure that all resources and assets of the Department that are likely to be used to respond to an emergency or major disaster are typed.

“(d) INTEGRATION WITH NATIONAL RESPONSE PLAN.—

“(1) DISTRIBUTION OF STANDARDS.—Not later than 6 months after the date of enactment of this Act, the Administrator of the Authority shall provide the standards developed under subsection (b) to all Federal agencies that have responsibilities under the National Response Plan.

“(2) TYPING OF AGENCIES, ASSETS, AND RESOURCES.—Not later than 180 days after the date on which the standards are provided under paragraph (1), each agency described in paragraph (1) shall—

“(A) ensure that all resources and assets (including teams, equipment, and other assets) of that agency that are likely to be used to respond to an emergency or major disaster are typed; and

“(B) submit to the Secretary a list of all typed resources and assets

“(3) LEADERSHIP.—The Administrator shall provide leadership, guidance, and technical assistance to an agency described in paragraph (1) to facilitate the typing process of that agency.

“(e) DOCUMENTATION AND DATABASE SYSTEM.—

“(1) IN GENERAL.—Not later than 1 year after the date of enactment of this Act, the Administrator shall establish and maintain a documentation and database system of Federal resources and assets likely to be used to respond to an emergency or major disaster.

“(2) ACCESSIBILITY.—The documentation and database system established under paragraph (1) shall be accessible to the Federal coordinating officer and other appropriate officials preparing for or responding to an emergency or major disaster.

“(f) GUIDANCE TO STATE AND LOCAL GOVERNMENTS.—Not later than 6 months after the date of enactment of this Act, the Administrator of the Authority, in collaboration with the Emergency Management Assistance Compact, shall—

“(1) provide detailed written guidance, assistance, and expertise to State and local governments to facilitate the typing of the resources and assets of State and local governments likely to be used in responding to an emergency or major disaster; and

“(2) assist State and local governments with typing the resources and assets of the State or local governments under the guidance provided under paragraph (1).

“(g) GRANTS.—The Secretary may make grants to the party states of the Emergency Management Assistance Compact to develop and maintain a database of typed resources and assets of State and local governments.

“(h) REPORT.—Not later than 6 months after the date of enactment of this Act and annually thereafter, the Administrator shall submit to the Committee on Homeland Security and Governmental Affairs of the Senate and the Committee on Homeland Security of the House of Representatives a report describing the implementation of this section, including the number and type of Federal resources and assets ready to respond to an emergency or major disaster.”.

SEC. 803. CONFORMING AMENDMENTS. (a) EXECUTIVE SCHEDULE.—

(1) ADMINISTRATOR.—Section 5313 of title 5, United States Code, is amended by adding at the end the following:

“Administrator of the United States Emergency Management Authority.”.

(2) DIRECTORS.—Section 5314 of title 5, United States Code, is amended by adding at the end the following:

“Directors, United States Emergency Management Authority.”.

(3) FEMA OFFICERS.—

(A) FEDERAL INSURANCE ADMINISTRATOR.—Section 5315 of title 5, United States Code, is amended by striking “Federal Insurance Administrator, Federal Emergency Management Agency,” and inserting “Federal Insurance Administrator, United States Emergency Management Agency.”.

(B) INSPECTOR GENERAL.—Section 5315 of title 5, United States Code, is amended by striking “Inspector General, Federal Emergency Management Agency.” and inserting “Inspector General, United States Emergency Management Agency.”.

(C) CHIEF INFORMATION OFFICER.—Section 5315 of title 5, United States Code, is amended by striking “Chief Information Officer, Federal Emergency Management Agency.” and inserting “Chief Information Officer, United States Emergency Management Agency.”.

(b) OFFICERS OF THE DEPARTMENT.—Section 103(a) of the Homeland Security Act of 2002 (6 U.S.C. 113(a)) is amended—

(1) by striking paragraph (5) and inserting the following:

“(5) An Administrator of the United States Emergency Management Authority.”;

(2) by striking paragraph (2); and
(3) by redesignating paragraphs (3) through (10) (as amended by this subsection) as paragraphs (2) through (9), respectively.

(c) REFERENCES.—Any reference to the Federal Emergency Management Agency, or the Director thereof, in any law, rule, regulation, certificate, directive, instruction, or other official paper in force on the effective date of this title shall be considered to refer and apply to the United States Emergency Management Authority and the Administrator thereof, respectively.

(d) TABLE OF CONTENTS.—The table of contents in section 1(b) of the Homeland Security Act of 2002 (6 U.S.C. 101 et seq.) is amended by striking the items relating to title V and sections 501 through 509 and inserting the following:

“TITLE V—NATIONAL PREPAREDNESS AND RESPONSE

“Sec. 501. Definitions.

SEC. 804. AUTHORIZATION OF APPROPRIATIONS.

There are authorized to be appropriated such sums as are necessary to carry out this title and the amendments made by this title.

SEC. 805. EFFECTIVE DATE.

This title, and the amendments made by this title, shall take effect on January 1, 2007.

TITLE IX

BORDER LAW ENFORCEMENT RELIEF ACT

SEC. 901. SHORT TITLE.

This title may be cited as the “Border Law Enforcement Relief Act of 2006”.

SEC. 902. FINDINGS.

Congress finds the following:

(1) It is the obligation of the Federal Government of the United States to adequately secure the Nation’s borders and prevent the flow of undocumented persons and illegal drugs into the United States.

(2) Despite the fact that the United States Border Patrol apprehends over 1,000,000 people each year trying to illegally enter the United States, according to the Congressional Research Service, the net growth in the number of unauthorized aliens has increased by approximately 500,000 each year. The Southwest border accounts for approximately 94 percent of all migrant apprehensions each year. Currently, there are an estimated 11,000,000 unauthorized aliens in the United States.

(3) The border region is also a major corridor for the shipment of drugs. According to the El Paso Intelligence Center, 65 percent of the narcotics that are sold in the markets of the United States enter the country through the Southwest Border.

(4) Border communities continue to incur significant costs due to the lack of adequate border security. A 2001 study by the United States-Mexico Border Counties Coalition found that law enforcement and criminal justice expenses associated with illegal immigration exceed \$89,000,000 annually for the Southwest border counties.

(5) In August 2005, the States of New Mexico and Arizona declared states of emergency in order to provide local law enforcement immediate assistance in addressing criminal activity along the Southwest border.

(6) While the Federal Government provides States and localities assistance in covering costs related to the detention of certain criminal aliens and the prosecution of Federal drug cases, local law enforcement along the border are provided no assistance in covering such expenses and must use their limited resources to

combat drug trafficking, human smuggling, kidnappings, the destruction of private property, and other border-related crimes.

(7) The United States shares 5,525 miles of border with Canada and 1,989 miles with Mexico. Many of the local law enforcement agencies located along the border are small, rural departments charged with patrolling large areas of land. Counties along the Southwest United States-Mexico border are some of the poorest in the country and lack the financial resources to cover the additional costs associated with illegal immigration, drug trafficking, and other border-related crimes.

(8) Federal assistance is required to help local law enforcement operating along the border address the unique challenges that arise as a result of their proximity to an international border and the lack of overall border security in the region.

SEC. 903. BORDER RELIEF GRANT PROGRAM. (a) GRANTS AUTHORIZED.—

(1) IN GENERAL.—The Secretary is authorized to award grants, subject to the availability of appropriations, to an eligible law enforcement agency to provide assistance to such agency to address—

(A) criminal activity that occurs in the jurisdiction of such agency by virtue of such agency’s proximity to the United States border; and
(B) the impact of any lack of security along the United States border.

(2) DURATION.—Grants may be awarded under this subsection during fiscal years 2007 through 2011.

(3) COMPETITIVE BASIS.—The Secretary shall award grants under this subsection on a competitive basis, except that the Secretary shall give priority to applications from any eligible law enforcement agency serving a community—

(A) with a population of less than 50,000; and
(B) located no more than 100 miles from a United States border with—

(i) Canada; or
(ii) Mexico.

(b) USE OF FUNDS.—Grants awarded pursuant to subsection (a) may only be used to provide additional resources for an eligible law enforcement agency to address criminal activity occurring along any such border, including—

(1) to obtain equipment;
(2) to hire additional personnel;
(3) to upgrade and maintain law enforcement technology;
(4) to cover operational costs, including overtime and transportation costs; and
(5) such other resources as are available to assist that agency.

(c) APPLICATION.—

(1) IN GENERAL.—Each eligible law enforcement agency seeking a grant under this section shall submit an application to the Secretary at such time, in such manner, and accompanied by such information as the Secretary may reasonably require.

(2) CONTENTS.—Each application submitted pursuant to paragraph (1) shall—

(A) describe the activities for which assistance under this section is sought; and
(B) provide such additional assurances as the Secretary determines to be essential to ensure compliance with the requirements of this section.

(d) DEFINITIONS.—For the purposes of this section:

(1) ELIGIBLE LAW ENFORCEMENT AGENCY.—The term “eligible law enforcement agency” means a tribal, State, or local law enforcement agency—

(A) located in a county no more than 100 miles from a United States border with—

(i) Canada; or
(ii) Mexico; or

(B) located in a county more than 100 miles from any such border, but where such county

has been certified by the Secretary as a High Impact Area.

(2) **HIGH IMPACT AREA.**—The term “High Impact Area” means any county designated by the Secretary as such, taking into consideration—

(A) whether local law enforcement agencies in that county have the resources to protect the lives, property, safety, or welfare of the residents of that county;

(B) the relationship between any lack of security along the United States border and the rise, if any, of criminal activity in that county; and

(C) any other unique challenges that local law enforcement face due to a lack of security along the United States border.

(3) **SECRETARY.**—The term “Secretary” means the Secretary of the Department of Homeland Security.

(e) **AUTHORIZATION OF APPROPRIATIONS.**—

(1) **IN GENERAL.**—There are authorized to be appropriated \$50,000,000 for each of fiscal years 2007 through 2011 to carry out the provisions of this section.

(2) **DIVISION OF AUTHORIZED FUNDS.**—Of the amounts authorized under paragraph (1)—

(A) $\frac{2}{3}$ shall be set aside for eligible law enforcement agencies located in the 6 States with the largest number of undocumented alien apprehensions; and

(B) $\frac{1}{3}$ shall be set aside for areas designated as a High Impact Area under subsection (d).

(f) **SUPPLEMENT NOT SUPPLANT.**—Amounts appropriated for grants under this section shall be used to supplement and not supplant other State and local public funds obligated for the purposes provided under this title.

SEC. 904. ENFORCEMENT OF FEDERAL IMMIGRATION LAW.

Nothing in this title shall be construed to authorize State or local law enforcement agencies or their officers to exercise Federal immigration law enforcement authority.

This Act may be cited as the “Department of Homeland Security Appropriations Act, 2007”.

MEASURE PLACED ON THE CALENDAR—H.R. 9

Mr. FRIST. I understand there is a bill at the desk due for a second reading.

The PRESIDING OFFICER. The clerk will read the bill by title for the second time.

The legislative clerk read as follows:

A bill (H.R. 9) to amend the Voting Rights Act of 1965.

Mr. FRIST. In order to place the bill on the calendar under the provisions of rule XIV, I object to further proceeding.

The PRESIDING OFFICER. Objection being heard, the bill will be placed on the calendar.

ORDER FOR STAR PRINT—H.R. 5672

Mr. FRIST. I ask unanimous consent that the report to accompany H.R. 5672 be star printed.

The PRESIDING OFFICER. Without objection, it is so ordered.

DISCHARGE AND REFERRAL—H.R. 125

Mr. FRIST. I ask unanimous consent the Committee on Environment and Public Works be discharged from fur-

ther consideration of H.R. 125 and the bill be referred to the Committee on Energy and Natural Resources.

The PRESIDING OFFICER. Without objection, it is so ordered.

COMMEMORATING THE 60TH ANNIVERSARY OF THE PERMANENT INTEGRATION OF PROFESSIONAL FOOTBALL

Mr. FRIST. I ask unanimous consent the Senate now proceed to consideration of S. Res. 533, which was submitted earlier today.

The PRESIDING OFFICER. The clerk will report the resolution by title.

The legislative clerk read as follows:

A resolution (S. Res. 533) commemorating the 60th anniversary of the permanent integration of professional football by 4 pioneering players.

There being no objection, the Senate proceeded to consider the resolution.

Mr. FRIST. I ask unanimous consent the resolution be agreed to, the preamble be agreed to, and the motion to reconsider be laid upon the table.

The PRESIDING OFFICER. Without objection, it is so ordered.

The resolution (S. Res. 533) was agreed to.

The preamble was agreed to.

The resolution, with its preamble, reads as follows:

S. RES. 533

Whereas the integration of sports supported other ongoing efforts to permanently end racial segregation as an accepted practice in the United States;

Whereas, in 1946, 4 African-American football players, William “Bill” K. Willis and Marion Motley, who played for the Cleveland Browns, and Kenny Washington and Woody Strode, who played for the Los Angeles Rams, all signed contracts to play professional football;

Whereas, on August 7, 1946, Bill Willis was the first of this pioneering foursome to sign a contract to play professional football for the Cleveland Browns forever ending the race barrier in professional football, 1 full year before Jackie Robinson broke the race barrier in professional baseball;

Whereas, thanks to the significant contributions of Bill Willis and Marion Motley, the Cleveland Browns won the National Football League (NFL) Championship in 1950 which was the first year the Cleveland Browns played in the NFL;

Whereas, in addition to permanently ending the race barrier in professional football, Bill Willis and Marion Motley were recognized for their outstanding professional football careers by their election to the Pro Football Hall of Fame; and

Whereas 2006 marks the 60th anniversary of the permanent integration of professional football, and the NFL will commemorate this milestone during the 2006 Pro Football Hall of Fame Game: Now, therefore, be it

Resolved, That the Senate—

(1) recognizes the 60th anniversary of the permanent integration of professional football; and

(2) respectfully requests the Secretary of the Senate to transmit for appropriate display an enrolled copy of this resolution to—

(A) the Pro Football Hall of Fame in Canton, Ohio; and

(B) William K. Willis, the only surviving member of the pioneering foursome who permanently ended the race barrier in professional football.

FREEDOM TO DISPLAY THE AMERICAN FLAG ACT OF 2005

Mr. FRIST. I ask unanimous consent the committee on Banking, Housing and Urban Affairs be discharged from further consideration of H.R. 42, and the Senate proceed to its immediate consideration.

The PRESIDING OFFICER. Without objection, it is so ordered. The clerk will report the bill by title.

The legislative clerk read as follows:

A bill (H.R. 42) to ensure that the right of an individual to display the flag of the United States on residential property not be abridged.

There being no objection, the Senate proceeded to consider the bill.

Mr. FRIST. I ask unanimous consent the bill be read a third time and passed, the motion to reconsider be laid on the table, and any statements be printed in the RECORD.

The PRESIDING OFFICER. Without objection, it is so ordered.

The bill (H.R. 42) was ordered to a third reading, was read the third time, and passed.

UNANIMOUS CONSENT AGREEMENT—H.R. 5441

Mr. FRIST. I ask unanimous consent that notwithstanding passage of H.R. 5441, amendments Nos. 4642, 4570, and 4578 be further modified with the changes at the desk.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendments, as modified, are as follows:

AMENDMENT NO. 4642, AS MODIFIED

On page 66, line 5, strike “\$166,456,000” and insert “\$163,456,000”.

On page 91, line 6, strike “\$2,393,500,000” and insert “\$2,400,000,000”.

On page 93, strike lines 7 and 8, and insert the following:

“(4) \$338,000,000 for training, exercises, technical assistance, and other programs (including mass evacuation preparation and exercises): *Provided*, That not less than \$18,000,000 is for technical assistance.”.

On page 120, increase that amount on line 9 by \$3,500,000.

AMENDMENT NO. 4570, AS FURTHER MODIFIED

On page 68, line 9, strike “General.” and insert the following: “General: *Provided further*, That the Department of Homeland Security Inspector General shall investigate whether, and to what extent, in adjusting and settling claims resulting from Hurricane Katrina, insurers making flood insurance coverage available under the Write-Your-Own program pursuant to section 1345 of the National Flood Insurance Act of 1968 (42 U.S.C. 4081) and subpart C of part 62 of title 44, Code of Federal Regulations, improperly attributed damages from such hurricane to flooding covered under the insurance coverage provided under the national flood insurance program rather than to windstorms

covered under coverage provided by such insurers or by windstorm insurance pools in which such insurers participated: *Provided further*, That the Department of Homeland Security Inspector General may request the assistance of the Attorney General and the Department of Justice in conducting such investigation and may reimburse the costs of the Attorney General and the Department of Justice in providing such assistance from such funds: *Provided further*, That the Department of Homeland Security Inspector General shall submit a report to Congress not later than April 1, 2007, setting forth the conclusions of such investigation."

On page 120, increase the amount on line 9 by \$3,000,000.

On page 68, increase the amount on line 6 by \$3,000,000.

AMENDMENT NO. 4578, AS MODIFIED

On page 90, line 15, strike "of which \$8,000,000" and insert "of which no less than \$2,741,000 may be used for the Office of National Capital Region Coordination, and of which \$6,459,000".

ORDERS FOR TUESDAY, JULY 18,
2006

Mr. FRIST. I ask unanimous consent that when the Senate completes its business today, it stand in adjournment until 9:45 a.m. on Tuesday, July 18. I further ask that following the prayer and pledge, the morning hour be deemed expired, the Journal of proceedings be approved to date, the time for the two leaders be reserved, and the Senate proceed to a period of morning business with the time equally divided until 10 a.m.; further, I ask unanimous consent that at 10 a.m. the Senate proceed to the stem cell bills under the previous order. I further ask unanimous consent that the Senate stand in recess from 12:30 to 2:15 to accommodate the weekly policy luncheons.

The PRESIDING OFFICER. Without objection, it is so ordered.

PROGRAM

Mr. FRIST. Mr. President, today we have been debating the stem cell re-

search bills. That debate will continue at 10 o'clock tomorrow morning, again the time alternating between the two sides. Senators are reminded that we will have votes on these bills tomorrow afternoon starting at 3:45. Each bill does require 60 votes for passage. These votes tomorrow afternoon will be the first votes of the week. Following that stem cell debate, we will be considering the Water Resources Development Act. We hope to complete consideration of that bill on Wednesday afternoon.

ADJOURNMENT UNTIL 9:45 A.M.
TOMORROW

Mr. FRIST. If there is no further business to come before the Senate, I ask unanimous consent that the Senate stand in adjournment under the previous order.

There being no objection, the Senate, at 8:43 p.m., adjourned until Tuesday, July 18, 2006, at 9:45 a.m.

HOUSE OF REPRESENTATIVES—Monday, July 17, 2006

The House met at 12:30 p.m. and was called to order by the Speaker pro tempore (Mr. BOUSTANY).

DESIGNATION OF SPEAKER PRO TEMPORE

The SPEAKER pro tempore laid before the House the following communication from the Speaker:

WASHINGTON, DC,
July 17, 2006.

I hereby appoint the Honorable CHARLES W. BOUSTANY, Jr. to act as Speaker pro tempore on this day.

J. DENNIS HASTERT,
Speaker of the House of Representatives.

MORNING HOUR DEBATES

The SPEAKER pro tempore. Pursuant to the order of the House of January 31, 2006, the Chair will now recognize Members from lists submitted by the majority and minority leaders for morning hour debates. The Chair will alternate recognition between the parties, with each party limited to not to exceed 30 minutes, and each Member, except the majority leader, the minority leader, or the minority whip, limited to not to exceed 5 minutes.

RECESS

The SPEAKER pro tempore. Pursuant to clause 12(a) of rule I, the Chair declares the House in recess until 2 p.m. today.

Accordingly (at 12 o'clock and 31 minutes p.m.), the House stood in recess until 2 p.m.

□ 1400

AFTER RECESS

The recess having expired, the House was called to order by the Speaker pro tempore (Mr. GOHMERT) at 2 p.m.

PRAYER

The Chaplain, the Reverend Daniel P. Coughlin, offered the following prayer: O to be chosen.

What a joy, O Lord, to be selected by others. But to what depths are we awakened once we know You have called us to be Your very own.

There is a surprising freedom found in being God's children. You watch over and protect us as we obey Your commands. Our destiny is in Your hands as we try to follow Your holy inspiration.

You open our hearts and our hands to care for the poor. You comfort the alien in our welcome. You bind us together as each goes about the daily task that we may give You glory and honor every day of our lives, both now and forever. Amen.

THE JOURNAL

The SPEAKER pro tempore. The Chair has examined the Journal of the last day's proceedings and announces to the House his approval thereof.

Pursuant to clause 1, rule I, the Journal stands approved.

PLEDGE OF ALLEGIANCE

The SPEAKER pro tempore. Will the gentleman from Arizona (Mr. RENZI) come forward and lead the House in the Pledge of Allegiance.

Mr. RENZI led the Pledge of Allegiance as follows:

I pledge allegiance to the Flag of the United States of America, and to the Republic for which it stands, one nation under God, indivisible, with liberty and justice for all.

COMMUNICATION FROM THE CLERK OF THE HOUSE

The SPEAKER pro tempore laid before the House the following communication from the Clerk of the House of Representatives:

OFFICE OF THE CLERK,
HOUSE OF REPRESENTATIVES,
Washington, DC, July 14, 2006.

Hon. J. DENNIS HASTERT,
The Speaker, House of Representatives,
Washington, DC.

DEAR MR. SPEAKER: Pursuant to the permission granted in Clause 2(h) of Rule II of the Rules of the U.S. House of Representatives, the Clerk received the following message from the Secretary of the Senate on July 14, 2006, at 11:08 am:

That the Senate concurs in the House amendment S. 655.

That the Senate disagrees to the House amendments and agrees to Conference; appoints conferees S. 250.

That the Senate agreed to S. Con. Res. 109.

That the Senate passed S. 3525.

With best wishes, I am,

Sincerely,

KAREN L. HAAS,
Clerk of the House.

IMMIGRATION REFORM

(Ms. FOXX asked and was given permission to address the House for 1 minute.)

Ms. FOXX. Mr. Speaker, I rise today to support Republican efforts aimed at

curbing our Nation's immigration problem.

House Republicans are determined to send a bill to the President that will secure our borders, punish employers who knowingly use illegal labor, make English our official language, and remove incentives for immigrants to enter our country illegally.

However, some Democrats seem determined to undermine our Nation's immigration laws. They support the Reid-Kennedy bill, which will allow 60 million new immigrants to enter our country over the next 20 years and will guarantee Social Security benefits to immigrants for the time they were in America illegally.

Mr. Speaker, rewarding those who break our laws is not the way to deal with America's immigration problem. This is an issue we cannot afford to compromise on, and I encourage my colleagues to support strict immigration reform in the interest of national security.

SECURE THE BORDERS FIRST

(Mrs. BLACKBURN asked and was given permission to address the House for 1 minute and to revise and extend her remarks.)

Mrs. BLACKBURN. Mr. Speaker, we are seeing it everywhere we go and we are hearing it from all of our constituents every time we go home, every time we hold a town hall meeting, and every time we show up in a local community: illegal entry into this country and the presence of those who have made a decision to break the law to come here.

Illegal immigration is an issue to be addressed, and here it is on the front page of The Washington Post. Twelve hundred miles from the border, U.S. border town, yes, indeed, by those individuals who would choose to enter the country illegally. Every town has become a border town and every State has become a border State.

I encourage our colleagues to hang tough in this debate and stay with the House bill where we secure the border first.

ANNOUNCEMENT BY THE SPEAKER PRO TEMPORE

The SPEAKER pro tempore. Pursuant to clause 8 of rule XX, the Chair will postpone further proceedings today on motions to suspend the rules on which a recorded vote or the yeas and nays are ordered, or on which the

□ This symbol represents the time of day during the House proceedings, e.g., □ 1407 is 2:07 p.m.

Matter set in this typeface indicates words inserted or appended, rather than spoken, by a Member of the House on the floor.

vote is objected to under clause 6 of rule XX.

Record votes on postponed questions will be taken after 6:30 p.m. today.

MARINE MAMMAL PROTECTION ACT AMENDMENTS OF 2006

Mr. RENZI. Mr. Speaker, I move to suspend the rules and pass the bill (H.R. 4075) to amend the Marine Mammal Protection Act of 1972 to provide for better understanding and protection of marine mammals, and for other purposes, as amended.

The Clerk read as follows:

H.R. 4075

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. SHORT TITLE.

This Act may be cited as the "Marine Mammal Protection Act Amendments of 2006".

SEC. 2. AMENDMENT REFERENCES.

Except as otherwise expressly provided, whenever in this Act an amendment or repeal is expressed in terms of an amendment to, or repeal of, a section or other provision, the reference shall be considered to be made to such section or other provision of the Marine Mammal Protection Act of 1972 (16 U.S.C. 1361 et seq.).

SEC. 3. TECHNICAL CORRECTIONS.

(a) COMMITTEE REFERENCES.—The Marine Mammal Protection Act of 1972 (16 U.S.C. 1361 et seq.) is amended by striking "Committee on Merchant Marine and Fisheries" each place it appears and inserting "Committee on Resources".

(b) OBSOLETE REFERENCE TO SECTION.—Section 118(c)(3)(A)(i) (16 U.S.C. 1387(c)(3)(A)(i)) is amended by striking ", except that" and all that follows through "is valid".

SEC. 4. LIMITED AUTHORITY TO EXPORT MARINE MAMMAL PRODUCTS.

(a) IN GENERAL.—Section 101(a)(6) (16 U.S.C. 1371(a)(6)) is amended by redesignating subparagraph (B) as subparagraph (C), and by inserting after subparagraph (A) the following:

"(B) A marine mammal product may be exported from the United States if the product—

"(i) is legally possessed, and exported by, a citizen of the United States for noncommercial purposes in conjunction with travel outside the United States and the product is imported into the United States by the same person upon the termination of travel;

"(ii) is legally possessed, and exported by, a person that is not a citizen of the United States for noncommercial purposes;

"(iii) is legally possessed and exported as part of a cultural exchange, by an Indian, Aleut, or Eskimo residing in Alaska; or

"(iv) is owned by a Native inhabitant of Russia, Canada, or Greenland and is exported for noncommercial purposes—

"(I) in conjunction with, and upon the completion of, travel within the United States; or

"(II) as part of a cultural exchange with an Indian, Aleut, or Eskimo residing in Alaska."

(b) CONFORMING AMENDMENT.—Section 101(a)(6)(A)(i) (16 U.S.C. 1371(a)(6)(A)(i)) is amended by inserting "for noncommercial purposes" after "United States" the first place it appears.

SEC. 5. CAPTIVE RELEASE PROHIBITION.

Section 102(a) (16 U.S.C. 1372(a)) is amended—

(1) in paragraph (4) by striking "subsection 104(c); and" and inserting "section 104(c);";

(2) in paragraph (5) by striking the period and inserting "; and"; and

(3) by adding at the end the following:

"(6) for any person that is subject to the jurisdiction of the United States to release any captive marine mammal unless specifically authorized to do so under section 104(c)(3)(A), 104(c)(4)(A), or 109(h), except that this paragraph shall not apply to the temporary release of any marine mammal that is maintained in captivity under section 7524 of title 10, United States Code (including any progeny of a marine mammal maintained under that section)."

SEC. 6. ANNUAL REPORT REQUIREMENT.

Section 103(f) (16 U.S.C. 1373(f)) is amended in the first sentence, by inserting "and notwithstanding Public Law 104-66" after "thereafter".

SEC. 7. PERMIT CLARIFICATIONS.

(a) CLARIFICATIONS.—Section 104 (16 U.S.C. 1374) is amended as follows:

(1) Subsection (c)(7) is amended by inserting "notwithstanding any other provision of law" after "requesting the permit".

(2) Subsection (c)(9) is amended to read as follows:

"(9)(A) No marine mammal may be exported—

"(i) for the purpose of public display, unless the Secretary of Agriculture evaluates and verifies, and thereafter notifies the Secretary, that the receiving facility meets standards that are comparable to the requirements that a person must meet to receive a permit under this subsection for that purpose; or

"(ii) for the purpose of scientific research or enhancing the survival or recovery of a species or stock, unless the receiving facility meets standards that are comparable to the requirements that a person must meet to receive a permit under this subsection for that purpose.

"(B) The Secretary may not require or request, through comity or any other means, that any marine mammal or its progeny remain subject to the jurisdiction of the United States when located in waters or on lands that are subject to the jurisdiction of another country."

(3) Subsection (c)(10) is amended—

(A) in the first sentence by inserting "held within the lands and waters of the United States" after "marine mammals" each place it appears;

(B) by inserting after the first sentence the following: "The Secretary shall update the inventory on an annual basis."; and

(C) in subparagraph (D) by inserting "ownership, or other" after "date of".

(b) REVIEW AND REPORT REGARDING INVENTORY.—

(1) REVIEW.—The Secretaries of Commerce and the Interior shall, by not later than 12 months after date of the enactment of this Act, jointly conduct a review of the inventory maintained under section 104(c)(10) of the Marine Mammal Protection Act of 1972 (16 U.S.C. 1374(c)(10)), the use of the information in the inventory, and the costs, benefits, and issues associated with the development of an online inventory.

(2) CONSULTATION.—In conducting the review, the Secretary shall consult and solicit input from persons who are required to provide information for the inventory.

(3) REPORT.—The Secretary shall submit a report to Committee on Resources of the House of Representatives and the Committee on Commerce, Science, and Transportation of the Senate on the findings of the review

under this subsection. The report shall include the following:

(A) Recommendations on whether the inventory should be maintained by the Secretary or by another person under contract.

(B) How the Secretary would oversee maintenance of the inventory carried out under contract.

(C) How public access and access by Federal agencies to the inventory can be maintained if the inventory is maintained under contract.

(D) How the Secretary can minimize duplication on the information the Secretary receives from public display facilities and reduce the paper work burden on those facilities.

(E) An estimate of the cost of maintaining the inventory.

(F) A description of how the Secretary will ensure the secure maintenance of the data in the inventory.

(G) An analysis of the potential that online availability of the information in the inventory could adversely affect the safety of the animals.

(c) LIMITATION ON NOTIFICATION REQUIREMENTS.—Section 104(c) (16 U.S.C. 1374(c)) is amended in paragraph (2)(E) in the first sentence, and in paragraph (8)(B)(i)(II), by inserting before the period at the end the following: ", except that if the transport is for purposes of public display and the transfer is between facilities where the ownership and care of the marine mammal will be under the same license or registration issued under the Animal Welfare Act (7 U.S.C. 2131 et seq.) then only a notice of transport is required".

SEC. 8. FINES AND PENALTIES.

(a) FINES AND PENALTIES, GENERALLY.—Section 105 (16 U.S.C. 1375) is amended—

(1) in subsection (a)(1) by striking "\$10,000" and inserting "\$20,000"; and

(2) in subsection (b) by striking "\$20,000" and inserting "\$30,000".

(b) VESSEL PENALTY.—Section 106(b) (16 U.S.C. 1376(b)) is amended by striking "\$25,000" and inserting "\$35,000".

SEC. 9. MARINE MAMMAL GRANTS.

Section 110(a) (16 U.S.C. 1380(a)) is amended to read as follows:

"(a) AUTHORIZATION OF ASSISTANCE; ANNUAL REPORT.—

"(1) AUTHORIZATION OF ASSISTANCE.—The Secretary may make grants, or provide financial assistance in such other form as the Secretary considers appropriate, to any Federal or State agency, public or private institution, or other person for the purpose of assisting such agency, institution, or person to undertake research in subjects that are relevant to the protection and conservation of marine mammals.

"(2) REPORTS.—

"(A) REPORTS BY SECRETARY.—The Secretary shall include a description of the results of research carried out with assistance under this section in the annual report required under section 103(f).

"(B) REPORTS BY FEDERAL AGENCIES.—The head of each Federal agency that conducts and provides funds for research on marine mammals shall report annually to the Committee on Resources of the House of Representatives and the Committee on Commerce, Science, and Transportation of the Senate on funding provided and research conducted regarding marine mammals during the preceding year.

"(3) CONTRIBUTIONS.—For purposes of carrying out this section, the Secretary may accept, solicit, receive, hold, administer, and use gifts, devises, and bequests."

SEC. 10. FISHERIES GEAR DEVELOPMENT.

Section 111 (16 U.S.C. 1381) is amended as follows:

(1) Subsection (a) is amended to read as follows:

“(a) **FISHING GEAR DEVELOPMENT PROGRAM.**—

“(1) **IN GENERAL.**—The Secretary of Commerce (in this section referred to as the ‘Secretary’) shall—

“(A) carry out a program for the purpose of devising improved fishing gear and methods so as to reduce to the maximum extent practicable the incidental taking of marine mammals in connection with fishing operations; and

“(B) make every practicable effort to develop, evaluate, and make available to owners and operators of fishing vessels such gear and fishing method improvements as quickly as possible.

“(2) **COORDINATION WITH OTHER COUNTRIES.**—

The Secretary may coordinate with other countries to foster gear technology transfer initiatives to reduce to the maximum extent practicable the incidental mortality and serious injury of marine mammals throughout the full extent of their range.”

(2) By adding at the end the following:

“(e) **GEAR IMPROVEMENT MINI-GRANT PROGRAM.**—

“(1) **IN GENERAL.**—Subject to the availability of appropriations, the Secretary may establish a grant program to provide financial assistance for developing, manufacturing, testing, or designing new types of fishing gear designed to reduce to the maximum extent practicable the incidental taking (including incidental mortality and serious injury) of marine mammals.

“(2) **GRANT AMOUNT AND PURPOSES.**—The amount of a grant under this subsection may not exceed \$20,000.

“(3) **GRANT APPLICATIONS.**—To receive a grant under this section, an applicant must submit an application in such form and manner as the Secretary may prescribe.

“(4) **CONSULTATION REGARDING CRITERIA.**—The Secretary shall consult with the Secretary of the Interior and the Marine Mammal Commission regarding the development of criteria for the awarding of grants under this subsection.

“(5) **ADMINISTRATIVE COSTS.**—Of amounts available each fiscal year to carry out this subsection, the Secretary may expend not more than \$40,000 to pay the administrative expenses necessary to carry out this subsection.

“(6) **CONTRIBUTIONS.**—For purposes of carrying out this section, the Secretary may accept, solicit, receive, hold, administer, and use gifts, devises, and bequests.”

SEC. 11. CONFORMING AMENDMENT.

Subsection (c) of the Dolphin Protection Consumer Information Act (16 U.S.C. 1385) is amended in paragraph (2) by striking “160 degrees west longitude” and inserting “150 degrees west longitude”.

SEC. 12. TAKE REDUCTION PLANS.

(a) **IN GENERAL.**—Section 118 (16 U.S.C. 1387) is amended as follows:

(1) In subsection (a) by striking “commercial” each place it appears in paragraphs (1) and (5).

(2) In subsection (c)(1) by striking so much as precedes subparagraph (B) and inserting the following:

“(c) **REGISTRATION AND AUTHORIZATION.**—(1) The Secretary shall, within 90 days after the date of enactment of the Marine Mammal Protection Act Amendments of 2006—

“(A) publish in the Federal Register for public comment, for a period of not less than

90 days, any necessary changes to the Secretary’s list of fisheries published under section 114(b)(1) in the Federal Register on August 24, 1994 (along with an explanation of such changes and a statement describing the marine mammal stocks interacting with, and the approximate number of vessels or persons actively involved in, each such fishery), with respect to—

“(i) commercial and recreational fisheries that have frequent incidental mortality and serious injury of marine mammals;

“(ii) commercial and recreational fisheries that have occasional incidental mortality and serious injury of marine mammals; or

“(iii) commercial fisheries that have a remote likelihood of or no known incidental mortality or serious injury of marine mammals.”

(3) In subsection (c)(1) in subparagraphs (B) and (C) by striking “commercial”.

(4) In subsection (c)(2)(A) by striking “commercial”.

(5) In subsection (c)(3)(A) in the matter preceding clause (i) by striking “a commercial fishery” and inserting “that fishery”.

(6) In subsection (c)(3)(E) by inserting “commercial” after “any”.

(7) In subsection (c)(5)(B) by striking “commercial”.

(8) In subsection (d)(1) in the matter preceding subparagraph (A) by striking “commercial fishing operations” and inserting “fishing operations in a fishery listed under subsection (c)(1)(A)(i) or (ii)”.

(9) In subsection (d)(3) in the matter preceding subparagraph (A) by striking “commercial fisheries” and inserting “fisheries listed under subsection (c)(1)(A)(i) or (ii)”.

(10) In subsection (d)(4) as follows:

(A) In the matter preceding subparagraph (A) by striking “commercial fisheries” and inserting “fisheries listed under subsection (c)(1)(A)(i) or (ii)”.

(B) In subparagraph (A) by striking “commercial fisheries” and inserting “fisheries listed under subsection (c)(1)(A)(i) or (ii)”.

(C) In subparagraph (B) by striking “commercial fisheries” and inserting “fisheries listed under subsection (c)(1)(A)(i) or (ii)”.

(D) In subparagraph (C) by striking “commercial fisheries” and inserting “fisheries listed under subsection (c)(1)(A)(i) or (ii)”.

(11) In subsection (d)(5) by striking “commercial fishing operations” and inserting “fishing operations in fisheries listed under subsection (c)(1)(A)(i) or (ii)”.

(12) In subsection (e) in the matter preceding paragraph (1)—

(A) by striking “commercial” each place it appears; and

(B) by striking “this Act” and inserting “this section”.

(13) In subsection (f) by striking so much as precedes paragraph (2) and inserting the following:

“(f) **TAKE REDUCTION PLANS.**—(1) The Secretary shall develop and implement a take reduction plan designed to assist in the recovery or prevent the depletion of each strategic stock which interacts with a fishery listed under subsection (c)(1)(A)(i) or (ii), unless the Secretary determines, after notice and opportunity for public comment, that the level of fishery related mortality and serious injury is having a negligible impact on that stock. The Secretary may develop and implement a take reduction plan for any other marine mammal stocks which interact with a fishery listed under subsection (c)(1)(A)(i) which the Secretary determines, after notice and opportunity for public comment, has a high level of mortality and serious injury across a number of such marine mammal stocks.”

(14) In subsection (f)(2)—

(A) by striking “6 months” and inserting “9 months”; and

(B) by striking “commercial fishing operations” each place it appears and inserting “fishing operations in fisheries listed under subsection (c)(1)(A)(i) or (ii)”.

(15) In subsection (f)(3) by striking “commercial”.

(16) In subsection (f)(4)(B) by striking “commercial fishing operations” and inserting “fishing operations in fisheries listed under subsection (c)(1)(A)(i) or (ii)”.

(17) In subsection (f)(5)—

(A) in subparagraph (A) by striking “6 months” and inserting “9 months”; and

(B) in subparagraphs (A) and (B) by striking “commercial” each place it appears.

(18) In subsection (f)(6)(A)—

(A) by striking “(not later than 30 days)”; and

(B) in clause (ii) by striking “commercial fisheries” and inserting “fisheries listed under subsection (c)(1)(A)(i) or (ii)”.

(19) In subsection (f)(6)(C) in the second sentence, by inserting before “, and others” the following: “, where appropriate a representative of the office of General Counsel of the National Oceanic and Atmospheric Administration, a representative of the National Marine Fisheries Service having responsibilities related to fisheries science, a representative of the National Marine Fisheries Service having responsibilities related to law enforcement, and a representative of the appropriate National Marine Fisheries Service Regional Administrator”.

(20) In subsection (f)(7)—

(A) in subparagraph (A)(i) by striking “6 months” and inserting “9 months”; and

(B) in subparagraph (B)(i)—

(i) by striking “not later than 60 days” and inserting “not later than 120 days”; and

(ii) by adding at the end the following: “Before publishing any plan that is different than the draft plan proposed by a take reduction team, the Secretary shall reconvene the team and explain to the team the differences between the published plan and the draft plan proposed by the team.”; and

(C) in subparagraph (B)(ii)—

(i) by striking “6 months” and inserting “9 months”; and

(ii) by striking “not later than 8 months” and inserting “not later than 11 months”.

(21) In subsection (f)(7)(C) by striking “Not later than 60 days” and inserting “Not later than 90 days”.

(22) In subsection (f)(7)(D) by striking “commercial”.

(23) In subsection (f)(8)—

(A) in subparagraph (C) by striking “Not later than 60 days” and inserting “Not later than 180 days”; and

(B) by striking “commercial” each place it appears.

(24) In subsection (f)(9) as follows:

(A) in subparagraph (A) by striking “commercial fisheries or restrict commercial fisheries” and inserting “fisheries listed under subsection (c)(1)(A)(i) or (ii) or restrict such fisheries”.

(B) in subparagraphs (B) and (C) by striking “commercial” each place it appears.

(C) in subparagraph (D) by striking “commercial fishing operations” and inserting “participation in a fishery listed under subsection (c)(1)(A)(i) or (ii)”.

(25) In subsection (g)(1) by striking “commercial fisheries” and inserting “fisheries listed under subsection (c)(1)(A)(i) or (ii)”.

(26) In subsection (g)(3)(B) by striking “commercial”.

(27) In subsection (g)(4) by striking “commercial fishery” and inserting “fishery listed under subsection (c)(1)(A)(i) or (ii)”.

(28) In subsection (j) by inserting “including observer, research, and education and outreach programs,” after “For purposes of carrying out this section.”.

(29) By amending subsection (d)(1)(C) to read as follows:

“(C) identify current fishery regulations and changes in fishing methods or technology that may increase or decrease incidental mortality and serious injury.”.

(30) In subsection (f)(2) in the last sentence by inserting “conservation benefits of” before “State or regional fishery management plans.”.

(31) By amending subsection (f)(4)(A) to read as follows:

“(A) a review of the information in the final stock assessment published under section 117(b), any substantial new information, a review of the conservation benefits from current State and regional fishery management regulations;”.

(b) STOCK ASSESSMENTS.—Section 117(a)(4) is amended—

(1) by striking “and” at the end of subparagraph (C);

(2) by inserting “and” at the end of subparagraph (D); and

(3) by adding at the end the following:

“(E) potential conservation benefits provided by State and regional fishery management regulations;”.

(c) CONFORMING AMENDMENT.—Section 101(a)(5)(E) (16 U.S.C. 1371(a)(5)(E)) is amended by inserting “or recreational” after “commercial” each place it appears.

SEC. 13. PINNIPED CONTROL PROGRAM.

Section 120 (16 U.S.C. 1389) is amended by adding at the end the following:

“(k) NONLETHAL REMOVAL AND CONTROL.—

(1) The Secretary shall conduct a program on the nonlethal removal and control of nuisance pinnipeds. The program shall include a review of measures that have been taken to effect such removal and control, the effectiveness of these measures, and the development of new technologies to deter nuisance pinnipeds.

(2) The Secretary shall include, among the individuals that develop the program under this subsection, representatives of the commercial and recreational fishing industries and, as appropriate, individuals with scientific proficiency, technical credentials, and expertise.

(3) The Secretary is encouraged, where appropriate, to use independent marine mammal research institutions in developing and in conducting the program.

(4) The Secretary shall, by December 31 of each year, submit an annual report on the results of research under this subsection to the Committee on Resources of the House of Representatives and the Committee on Commerce, Science, and Transportation of the Senate.

(l) QUALIFIED NONLETHAL CONTROL PROJECTS.—

(1) IN GENERAL.—The Secretary may, to the extent amounts are available to carry out this subsection, provide a grant to any eligible applicant to carry out a qualified nonlethal control project in accordance with this subsection.

(2) APPLICATIONS.—The Secretary shall—

(A) publish guidelines for and solicit applications for grants under this subsection not later than 6 months after the date of enactment of this subsection; and

(B) receive, review, evaluate, and approve applications for grants under this subsection.

(3) ELIGIBLE APPLICANT.—To be an eligible applicant for purposes of paragraph (1), an applicant must—

(A) be a State, local government, or interstate or regional agency; and

(B) have adequate personnel, funding, and authority to carry out and monitor or maintain a nonlethal control of nuisance pinnipeds project.

(4) QUALIFIED CONTROL PROJECT.—To be a qualified control project under this subsection, a project must—

(A) by humane and nonlethal means, remove, deter, and control nuisance pinnipeds in areas where they are a recurrent and persistent threat to public health and safety; and

(B) encourage public notice, education, and outreach on project activities in the affected community.

(5) GRANT DURATION.—Each grant under this subsection shall be to provide funding for the Federal share of the cost of a project carried out with the grant for up to 2 fiscal years.

(6) REPORTING BY GRANTEE.—

(A) IN GENERAL.—A grantee carrying out a control project with a grant under this subsection shall report to the Secretary at the expiration of the grant.

(B) REPORT CONTENTS.—Each report under this subsection shall include specific information on the methods and techniques used to control nuisance pinniped species in the project area, and on the ensuing results.

(7) COST SHARING.—

(A) FEDERAL SHARE.—Except as provided in paragraphs (2) and (3), the Federal share of the cost of a project carried out with a grant under this subsection shall not exceed 75 percent of such cost.

(B) APPLICATION OF IN-KIND CONTRIBUTIONS.—The Secretary may apply to the non-Federal share of costs of a control project carried out with a grant under this subsection the fair market value of services or any other form of in-kind contribution to the project made by non-Federal interests that the Secretary determines to be an appropriate contribution equivalent to the monetary amount required for the non-Federal share of the activity.

(C) DERIVATION OF NON-FEDERAL SHARE.—The non-Federal share of the cost of a control project carried out with a grant under this subsection may not be derived from a Federal grant program or other Federal funds.

(8) CLARIFICATION.—Nothing in this subsection shall be interpreted as suspending or waiving any requirement under any other provision of this Act.”.

SEC. 14. MARINE MAMMAL COMMISSION.

(a) NUMBER OF EMPLOYEES.—Section 206(5) (16 U.S.C. 1406(5)) is amended by striking “; except that no fewer than 11 employees must be employed under paragraph (1) at any time”.

(b) ADMINISTRATION.—Section 206 (16 U.S.C. 1406) is amended—

(1) in paragraph (4) by striking “(but at rates for individuals not to exceed \$100 per diem)”;

(2) in paragraph (5) by striking “Financial” and all that follows through the end of that sentence.

SEC. 15. STRANDING AND ENTANGLEMENT RESPONSE.

(a) COLLECTION AND UPDATING OF INFORMATION.—Section 402(b)(1)(A) (16 U.S.C. 1421a(b)(1)(A)) is amended by inserting “or entangled” after “stranded”.

(b) ENTANGLEMENT RESPONSE AGREEMENTS.—

(1) IN GENERAL.—Section 403 (16 U.S.C. 1421b) is amended—

(A) by amending the section heading to read as follows:

“SEC. 403. STRANDING OR ENTANGLEMENT RESPONSE AGREEMENTS.”; and

(B) in subsection (a) by inserting “or entanglement” before the period.

(2) CLERICAL AMENDMENT.—The table of contents at the end of the first section is amended by striking the item relating to section 403 and inserting the following:

“Sec. 403. Stranding or entanglement response agreements”.

(c) LIABILITY.—Section 406(a) (16 U.S.C. 1421e(a)) is amended by inserting “or entanglement” after “stranding”.

(d) ENTANGLEMENT DEFINED.—

(1) IN GENERAL.—Section 410 (16 U.S.C. 1421h) is amended—

(A) by redesignating paragraphs (1) through (6) in order as paragraphs (2) through (7); and

(B) by inserting before paragraph (2) (as so redesignated) the following:

“(1) The term ‘entanglement’ means an event in the wild in which a living or dead marine mammal has gear, rope, line, net, or other material wrapped around or attached to it and is—

“(A) on a beach or shore of the United States; or

“(B) in waters under the jurisdiction of the United States.”.

(2) CONFORMING AMENDMENT.—Section 408(a)(2)(B)(i) (16 U.S.C. 1421f-1(a)(2)(B)(i)) is amended by striking “section 410(6)” and inserting “section 410(7)”.

(e) JOHN H. PRESCOTT MARINE MAMMAL RESCUE ASSISTANCE GRANT PROGRAM.—

(1) AUTHORIZATION OF APPROPRIATIONS FOR GRANT PROGRAM.—Section 408(h) (16 U.S.C. 1421f-1(h)) is amended by striking “\$5,000,000 for each of fiscal years 2001 through 2003” and inserting “\$5,000,000 for each of fiscal years 2007 through 2010”.

(2) ADMINISTRATIVE COSTS AND EXPENSES.—Section 408 (16 U.S.C. 1421f-1) is amended—

(A) by adding at the end of subsection (a)(1) the following: “All funds available to implement this section shall be distributed to eligible stranding network participants for the purposes set forth in this paragraph and paragraph (2), except as provided in subsection (f).”; and

(B) by amending subsection (f) to read as follows:

“(f) ADMINISTRATIVE COSTS AND EXPENSES.—Of the amounts available each fiscal year to carry out this section, the Secretary may expend not more than 5 percent or \$80,000, whichever is greater, to pay the administrative costs and administrative expenses to implement the grant program under subsection (a). Any such funds retained by the Secretary for a fiscal year for such costs and expenses that are not used for such costs and expenses before the end of the fiscal year shall be provided as grants under subsection (a).”.

(3) EMERGENCY ASSISTANCE.—Section 408 (16 U.S.C. 1421f-1) is amended—

(A) in subsection (a) by redesignating paragraph (2) as paragraph (3), and by inserting after paragraph (1) the following:

“(2) Subject to the availability of appropriations, the Secretary may also enter into cooperative agreements, contracts, or such other agreements or arrangements as the Secretary considers appropriate to address stranding events requiring emergency assistance.”;

(B) in subsection (d) by inserting “(1)” before the text, and by adding at the end the following:

“(2) Funding for emergency stranding projects shall not be subject to the funding limit established in paragraph (1).”;

(C) in subsection (e)—

(i) in paragraph (1) by striking “The non-Federal” and inserting “Except as provided in paragraph (2), the non-Federal”;

(ii) by redesignating paragraph (2) as paragraph (3); and

(iii) by inserting after paragraph (1) the following:

“(2) EMERGENCY ASSISTANCE.—No non-Federal contribution shall be required for funding for a response to an emergency stranding event.”; and

(D) in subsection (g) by redesignating paragraph (2) as paragraph (3) and inserting after paragraph (1) the following:

“(2) EMERGENCY ASSISTANCE.—The term ‘emergency assistance’ means assistance provided for a stranding event that—

“(A) is not an unusual mortality event as defined in section 409(6);

“(B) leads to an immediate increase in required costs for stranding response, recovery, or rehabilitation in excess of regularly scheduled costs;

“(C) may be cyclical or endemic; and

“(D) may involve out-of-habitat animals.”.

(4) CONTRIBUTIONS.—Section 408 (16 U.S.C. 1421f-1) is amended by adding at the end the following:

“(i) CONTRIBUTIONS.—For purposes of carrying out this section, the Secretary may solicit, accept, receive, hold, administer, and use gifts, devises, and bequests.”.

(f) AUTHORIZATION OF APPROPRIATIONS FOR MARINE MAMMAL UNUSUAL MORTALITY EVENT FUND.—Section 409(3) (16 U.S.C. 1421g(3)) is amended by striking “\$500,000 for fiscal year 1993” and inserting “\$125,000 for each of fiscal years 2007 through 2010”.

SEC. 16. SCRIMSHAW EXEMPTION.

Any valid certificate of exemption referred to in section 18 of Public Law 103-238 (16 U.S.C. 1539 note) that was valid under that section on April 29, 1999, shall be valid during the 11-year period beginning October 31, 1999.

SEC. 17. POLAR BEARS.

(a) IN GENERAL.—The Marine Mammal Protection Act of 1972 (16 U.S.C. 1361 et seq.) is amended by adding at the end thereof the following:

“TITLE V—POLAR BEARS

“SEC. 501. DEFINITIONS.

“In this title:

“(1) AGREEMENT.—The term ‘Agreement’ means the Agreement Between the Government of the United States of America and the Government of the Russian Federation on the Conservation and Management of the Alaska-Chukotka Polar Bear Population, signed at Washington, D.C., on October 16, 2000.

“(2) ALASKA NANUUQ COMMISSION.—The term ‘Alaska Nanuuq Commission’ means the Alaska Native entity, in existence on the date of enactment of this title, that represents all villages in the State of Alaska that engage in the annual subsistence taking of polar bears from the Alaska-Chukotka population and any successor entity.

“(3) IMPORT.—The term ‘import’ means to land on, bring into, or introduce into, or attempt to land on, bring into, or introduce into, any place subject to the jurisdiction of the United States, without regard to whether the landing, bringing, or introduction constitutes an importation within the meaning of the customs laws of the United States.

“(4) POLAR BEAR PART OR PRODUCT.—The term ‘part or product of a polar bear’ means any polar bear part or product, including the gall bile and gall bladder.

“(5) SECRETARY.—The term ‘Secretary’ means the Secretary of the Interior.

“(6) TAKING.—The term ‘taking’ has the meaning given the term in the Agreement.

“(7) COMMISSION.—The term ‘Commission’ means the commission established under article 8 of the Agreement.

“SEC. 502. PROHIBITIONS.

“(a) IN GENERAL.—It is unlawful for any person who is subject to the jurisdiction of the United States—

“(1) to take any polar bear in violation of the Agreement;

“(2) to take any polar bear in violation of the Agreement or any annual taking limit or other restriction on the taking of polar bears that is adopted by the Commission pursuant to the Agreement;

“(3) to import, export, possess, transport, sell, receive, acquire, or purchase, exchange, barter, or offer to sell, purchase, exchange, or barter any polar bear, or any part or product of a polar bear, that is taken in violation of paragraph (2);

“(4) to import, export, sell, purchase, exchange, barter, or offer to sell, purchase, exchange, or barter any polar bear gall bile or polar bear gall bladder;

“(5) to commit, solicit another person to commit, or cause to be committed, any offense under this subsection; or

“(6) to violate any regulation promulgated by the Secretary to implement any of the prohibitions established in this subsection.

“(b) EXCEPTIONS.—For the purpose of forensic testing or any other law enforcement purpose, the Secretary, and Federal law enforcement officials, and any State or local law enforcement official authorized by the Secretary, may import a polar bear or any part or product of a polar bear.

“SEC. 503. ADMINISTRATION.

“(a) IN GENERAL.—The Secretary, acting through the Director of the United States Fish and Wildlife Service, shall do all things necessary and appropriate, including the promulgation of regulations, to implement, enforce, and administer the provisions of the Agreement on behalf of the United States. The Secretary shall consult with the Secretary of State and the Alaska Nanuuq Commission on matters involving the implementation of the Agreement.

“(b) UTILIZATION OF OTHER GOVERNMENT RESOURCES AND AUTHORITIES.—

“(1) OTHER GOVERNMENT RESOURCES.—The Secretary may utilize by agreement, with or without reimbursement, the personnel, services, and facilities of any other Federal agency, any State agency, or the Alaska Nanuuq Commission for purposes of carrying out this title or the Agreement.

“(2) OTHER POWERS AND AUTHORITIES.—Any person authorized by the Secretary under this subsection to enforce this title or the Agreement shall have the authorities that are enumerated in section 6(b) of the Lacey Act Amendments of 1981 (16 U.S.C. 3375(b)).

“(c) ENSURING COMPLIANCE.—

“(1) TITLE I AUTHORITIES.—The Secretary may use authorities granted under title I to enforce this title.

“(2) ADDITIONAL AUTHORITIES.—Any gun, trap, net, or other equipment used, to aid in the violation or attempted violation of this title shall be subject to seizure and forfeiture under section 106.

“(d) REGULATIONS.—

“(1) IN GENERAL.—The Secretary shall promulgate such regulations as are necessary to carry out this title and the Agreement.

“(2) ORDINANCES AND REGULATIONS.—If necessary to carry out this title and the Agreement, and to improve compliance with any

annual taking limit or other restriction on taking adopted by the Commission and implemented by the Secretary in accordance with this title, the Secretary may promulgate regulations that adopt any ordinance or regulation that restricts the taking of polar bears for subsistence purposes if the ordinance or regulation has been promulgated by the Alaska Nanuuq Commission.

“SEC. 504. COOPERATIVE MANAGEMENT AGREEMENT; AUTHORITY TO DELEGATE ENFORCEMENT AUTHORITY.

“(a) IN GENERAL.—The Secretary, acting through the Director of the United States Fish and Wildlife Service, may share authority under this title for the management of the taking of polar bears for subsistence purposes with the Alaska Nanuuq Commission if such commission is eligible under subsection (b).

“(b) DELEGATION.—To be eligible for the management authority described in subsection (a), the Alaska Nanuuq Commission shall—

“(1) enter into a cooperative agreement with the Secretary under section 119 for the conservation of polar bears;

“(2) meaningfully monitor compliance with this title and the Agreement by Alaska Natives; and

“(3) administer its co-management program for polar bears in accordance with—

“(A) this title; and

“(B) the Agreement.

“SEC. 505. COMMISSION APPOINTMENTS; COMPENSATION, TRAVEL EXPENSES, AND CLAIMS.

“(a) APPOINTMENT OF U.S. COMMISSIONERS.—

“(1) APPOINTMENT.—The United States commissioners on the Commission shall be appointed by the President, in accordance with paragraph 2 of article 8 of the Agreement, after taking into consideration the recommendations of—

“(A) the Secretary;

“(B) the Secretary of State; and

“(C) the Alaska Nanuuq Commission.

“(2) QUALIFICATIONS.—Both of the United States commissioners shall have knowledge or expertise in polar bears.

“(3) SERVICE AND TERM.—Each United States commissioner shall serve—

“(A) at the pleasure of the President; and

“(B) for an initial 4-year term and such additional terms as the President shall determine.

“(4) VACANCIES.—

“(A) IN GENERAL.—Any individual appointed to fill a vacancy occurring before the expiration of any term of office of a United States commissioner shall be appointed for the remainder of that term.

“(B) MANNER.—Any vacancy on the Commission shall be filled in the same manner as the original appointment.

“(b) ALTERNATE COMMISSIONERS.—

“(1) IN GENERAL.—The Secretary, in consultation with the Secretary of State and the Alaska Nanuuq Commission, shall designate an alternate commissioner for each member of the United States section.

“(2) DUTIES.—In the absence of a United States commissioner, an alternate commissioner may exercise all functions of the United States commissioner at any meetings of the Commission or of the United States section.

“(3) REAPPOINTMENT.—An alternate commissioner—

“(A) shall be eligible for reappointment by the President; and

“(B) may attend all meetings of the United States section.

“(c) DUTIES.—The members of the United States section may carry out the functions and responsibilities described in article 8 of the Agreement in accordance with this title and the Agreement.

“(d) COMPENSATION AND EXPENSES.—

“(1) COMPENSATION.—A member of the United States section shall serve without compensation.

“(2) TRAVEL EXPENSES.—A member of the United States section shall be allowed travel expenses, including per diem in lieu of subsistence, at rates authorized for an employee of an agency under subchapter I of chapter 57 of title 5, United States Code, while away from the home or regular place of business of the member in the performance of the duties of the United States-Russia Polar Bear Commission.

“(e) AGENCY DESIGNATION.—The United States section shall, for the purpose of title 28, United States Code, relating to claims against the United States and tort claims procedure, be considered to be a Federal agency.

“SEC. 506. VOTES TAKEN BY THE UNITED STATES SECTION ON MATTERS BEFORE THE COMMISSION.

“In accordance with paragraph 3 of article 8 of the Agreement, the United States section, made up of commissioners appointed by the President, shall vote on any issue before the United States-Russia Polar Bear Commission only if there is no disagreement between the United States commissioners regarding the vote.

“SEC. 507. IMPLEMENTATION OF ACTIONS TAKEN BY THE COMMISSION.

“(a) IN GENERAL.—The Secretary shall take all necessary actions to implement the decisions and determinations of the Commission under paragraph 7 of article 8 of the Agreement.

“(b) TAKING LIMITATION.—Not later than 60 days after the date on which the Secretary receives notice of the determination of the Commission of an annual taking limit, or of the adoption by the Commission of other restriction on the taking of polar bears for subsistence purposes, the Secretary shall publish a notice in the Federal Register announcing the determination or restriction.

“SEC. 508. APPLICATION WITH OTHER TITLES OF ACT.

“The authority of the Secretary under this title is in addition to, and shall not affect the authority of the Secretary under, the other titles of this Act or the Lacey Act Amendments of 1981 (16 U.S.C. 3371 et seq.) or the exemption for Alaskan natives under section 101(b) of this Act.

“SEC. 509. AUTHORIZATION OF APPROPRIATIONS.

“There is authorized to be appropriated to the Secretary to carry out this title and the Agreement \$2,000,000 for each of fiscal years 2007 through 2010.”

(b) CLERICAL AMENDMENT.—The table of contents in the first section of the Marine Mammal Protection Act of 1972 (16 U.S.C. 1361 et seq.) is amended by adding at the end the following:

“TITLE V—POLAR BEARS

“Sec. 501. Definitions.

“Sec. 502. Prohibitions.

“Sec. 503. Administration.

“Sec. 504. Cooperative management agreement; authority to delegate enforcement authority.

“Sec. 505. Commission appointments; compensation, travel expenses, and claims.

“Sec. 506. Votes taken by the United States Section on matters before the Commission.

“Sec. 507. Implementation of actions taken by the Commission.

“Sec. 508. Application with other titles of Act.

“Sec. 509. Authorization of appropriations.”

(c) TREATMENT OF CONTAINERS.—Section 107(d)(2) of the Marine Mammal Protection Act of 1972 (16 U.S.C. 1377(d)(2)) is amended—

(1) by striking “or other conveyance” and inserting “, other conveyance, or container”; and

(2) by striking “or conveyance” and inserting “conveyance, or container”.

The SPEAKER pro tempore. Pursuant to the rule, the gentleman from Arizona (Mr. RENZI) and the gentleman from West Virginia (Mr. RAHALL) each will control 20 minutes.

The Chair recognizes the gentleman from Arizona.

GENERAL LEAVE

Mr. RENZI. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days to revise and extend their remarks and include extraneous material on the bill under consideration.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Arizona?

There was no objection.

Mr. RENZI. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, I urge my colleagues to support this legislation, which reauthorizes portions of the Marine Mammal Protection Act, authored by Resources Chairman RICHARD POMBO.

The Marine Mammal Protection Act was enacted in 1972 with the purpose of protecting and restoring marine mammal populations. The act has been very successful over its 30-year history in recovering marine mammal populations, and this legislation builds on those accomplishments.

Recently, there have been many news reports on the status of polar bears and other arctic marine mammal species. H.R. 4075 includes language which will allow for increased international cooperation to help protect the shared U.S.-Russia polar bear population. In fact, without these provisions, the future of polar bear populations in Russia is very much in jeopardy. It also authorizes much needed research which will afford us the opportunity to better understand the needs of marine mammals and give us the means to better conserve these species for future generations.

H.R. 4075 also authorizes the Prescott Marine Mammal Stranding program. The Prescott program has been very successful in recovering and rehabbing thousands of stranded marine mammals. The Prescott program supports a network of facilities around the Nation that have dedicated themselves to the recovery of stranded marine mammals.

H.R. 4075 includes additional provisions which will support the development of cleaner fishing gear to reduce interactions with marine mammals. It also authorizes research to develop

nonlethal measures to control nuisance pinniped populations. Finally, H.R. 4075 clarifies the permit requirements for marine mammals on public display.

While it is not a major reauthorization of the Marine Mammal Protection Act, these amendments have been carefully crafted and are specifically designed to enhance the fundamental conservation goals of this important law. This is a good conservation bill. It is good for marine mammals, and it should be overwhelmingly adopted.

Finally, I wish to thank Chairman HENRY HYDE of the International Relations Committee and Chairman BILL THOMAS of the Ways and Means Committee and their staffs for their cooperation in moving this legislation. At this time I will include in the RECORD an exchange of letters between our committees on this bill.

I urge an “aye” vote on H.R. 4075.

COMMITTEE ON RESOURCES,
HOUSE OF REPRESENTATIVES,
Washington, DC, July 13, 2006.

Hon. WILLIAM M. THOMAS,
Chairman, Committee on Ways and Means,
Washington, DC.

DEAR MR. CHAIRMAN: I ask your cooperation to help schedule consideration by the House of Representatives of H.R. 4075, the Marine Mammal Protection Act Amendments of 2006, during the week of July 17–21, 2006. I have proposed an amendment to this bill which includes text from S. 2013, the United States-Russia Polar Bear Conservation and Management Act of 2005. The Committee on Ways and Means has a jurisdictional interest in this Senate bill because of its inclusion of trade measures.

My staff has worked with yours to develop a mutually-agreed on text for this amendment, and I have enclosed this amendment for your review. I ask that you not seek a referral of H.R. 4075 based on the inclusion of this language to expedite Floor scheduling. Of course, this action would not be considered as waiving or affecting your jurisdiction over the subject matter of the amendment, nor as precedent for any future referrals of similar measures. Moreover, if the bill is conference with the Senate, I would support naming Ways and Means Committee members to the conference committee for the trade provisions. I would also be pleased to include this letter and your response in the Congressional Record during consideration of the bill on the Floor.

Mr. Chairman, I have been very pleased with the tremendous degree of cooperation between our two Committees. Your staff, especially Angela Ellard and Steven Schrage, has been responsive and thoughtful, and my staff very much appreciates their support and teamwork. I hope that you will give my request serious consideration and I look forward to your response.

Sincerely,

RICHARD POMBO,
Chairman.

COMMITTEE ON WAYS AND MEANS,
HOUSE OF REPRESENTATIVES,
Washington, DC, July 13, 2006.

Hon. RICHARD W. POMBO,
Chairman, Committee on Resources,
Washington, DC.

DEAR CHAIRMAN POMBO: Thank you for your letter regarding H.R. 4075, the “Marine Mammal Protection Act Amendments of 2006,” which is scheduled for floor consideration during the week of July 17th.

As you noted, the Committee on Ways and Means maintains jurisdiction over trade measures. H.R. 4075, as amended, includes text which falls within the jurisdiction of the Committee on Ways and Means. However, in order to expedite this bill for floor consideration, the Committee will forgo action. This is being done with the understanding that it does not in any way prejudice the Committee with respect to the appointment of conferees or its jurisdictional prerogatives on this bill or similar legislation in the future.

I appreciate your cooperation in this matter and agree to your offer to include this exchange of letters in the Congressional Record during floor consideration.

Best regards,

BILL THOMAS,
Chairman.

COMMITTEE ON RESOURCES,
HOUSE OF REPRESENTATIVES,
Washington, DC, July 12, 2006.

Hon. HENRY J. HYDE,
Chairman Committee on International Relations,
Washington, DC.

DEAR MR. CHAIRMAN: I ask your cooperation to help schedule, consideration by the House of Representatives of H.R. 4075, the Marine Mammal Protection Act Amendments of 2006, during the week of July 17-21, 2006. I have proposed an amendment to this bill which includes text from S. 2013, the United States-Russia Polar Bear Conservation and Management Act of 2005. Obviously, the Committee on International Relations has a jurisdictional interest in this Senate bill.

My staff has worked with yours to develop a mutually-agreed-on text for this amendment, and I have enclosed this amendment for your review. I ask that you not seek a referral of H.R. 4075 based on the inclusion of this language to expedite Floor scheduling. Of course, this action would not be considered as waiving or affecting your jurisdiction over the subject matter of the amendment, nor as precedent for any future referrals of similar measures. Moreover, if the bill is conferred with the Senate, I would support naming International Relations Committee members to the conference committee for the polar bear provisions. I would also be pleased to include this letter and your response in the Congressional Record during consideration of the bill on the Floor.

Mr. Chairman, I have been very pleased with the tremendous degree of cooperation between our two Committees. Your staff has been responsive and thoughtful, and my staff very much appreciates their support and teamwork. I hope that you will give my request serious consideration, and I look forward to your response.

Sincerely,

RICHARD POMBO,
Chairman.

Hon. RICHARD W. POMBO,
Chairman, Committee on Resources,
Washington, DC.

DEAR MR. CHAIRMAN: Thank you for your letter concerning H.R. 4075, the "Marine Mammal Protection Act Amendments of 2006." I understand that the text of your proposed amendment contains text from S. 2013, the "United States-Russia Polar Bear Conservation and Management Act of 2005."

The language in question does impact the Rule X jurisdiction of the Committee on International Relations. However, since our committees have developed a mutually agreed-upon text for this amendment, I will

agree not to seek a referral of H.R. 4075 in order to expedite your Committee's ability to schedule this for House consideration.

I appreciate your willingness to support the appointment of conferees from this Committee on this matter, should it go to conference. Please place our exchange of letters into the Record during the debate on this matter.

With best wishes,

Sincerely,

HENRY J. HYDE,
Chairman.

Mr. Speaker, I reserve the balance of my time.

Mr. RAHALL. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, in 1972 Congress enacted the Marine Mammal Protection Act to protect marine mammals from harmful human activities. It is a landmark statute in our pantheon of national environmental laws, providing for the conservation and management of whales, dolphins, porpoises, seals, sea lions, and other marine mammals.

In the past, consideration of amendments to MMPA was done on a bipartisan basis, such as significant changes made by Congress in 1994. However, during this Congress, I have stood opposed to further consideration of MMPA legislation the Resources Committee approved almost 1 year to this day, until today. Let me emphasize that my opposition was until today.

This was because the bill would have eliminated a fundamental mandate of MMPA known as the "deadline for the zero rate mortality goal." In other words, we, as a Nation, are to strive to put into place management regimes which will reduce, and ideally eliminate, marine mammal fatalities at the hands of human beings.

The troublesome provision which would have eliminated the deadline has been dropped from the legislation we are now considering. In this regard I would like to express my appreciation to Chairman POMBO for agreeing to this, and I am pleased to say that I support the bill as amended today and urge its approval by this body.

Mr. Speaker, I yield back the balance of my time.

Mr. RENZI. Mr. Speaker, I yield back the balance of my time.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from Arizona (Mr. RENZI) that the House suspend the rules and pass the bill, H.R. 4075, as amended.

The question was taken; and (two-thirds having voted in favor thereof) the rules were suspended and the bill, as amended, was passed.

A motion to reconsider was laid on the table.

SPRINGFIELD ARMORY NATIONAL HISTORIC SITE, MASSACHUSETTS ACT OF 2006

Mr. RENZI. Mr. Speaker, I move to suspend the rules and pass the bill

(H.R. 4376) to authorize the National Park Service to enter into a cooperative agreement with the Commonwealth of Massachusetts on behalf of Springfield Technical Community College, and for other purposes, as amended.

The Clerk read as follows:

H.R. 4376

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. SHORT TITLE.

This Act may be cited as the "Springfield Armory National Historic Site, Massachusetts Act of 2006".

SEC. 2. FINDINGS.

Congress finds as follows:

(1) The Site commemorates the role of the Springfield Armory in the Nation's military history, a role that the Armory served for almost 200 years.

(2) The role of the Springfield Armory began in 1777, when the site was selected as the location for a magazine and laboratory for the development, production and storage of guns and powder during the American Revolution.

(3) Following the American Revolutionary War, in 1794 Congress officially established the Springfield Armory and for much of the 19th century the Springfield Armory developed and supplied most of the military small arms manufactured by the United States for the United States Armed Services.

(4) In addition to its historical role in the development and manufacturing of small arms, the Springfield Armory was also the site of Shay's Rebellion.

(5) In 1968 the Armory was deactivated as a military installation and in 1974 Congress established the Springfield Armory National Historic Site. A portion of the Site is administered by the National Park Service. The remainder of the Springfield Armory National Historic Site, known as the "Preservation Control Area", is owned and administered by the Commonwealth of Massachusetts on behalf of Springfield Technical Community College.

(6) The Preservation Control Area contains several historic buildings that are in a state of disrepair. The deteriorating condition of these historic buildings threatens to undermine the character and integrity of the Springfield Armory National Historic Site and their repair, renovation, maintenance and rehabilitation is essential to the continued preservation of the Site and its museum and collections.

SEC. 3. PRESERVATION CONTROL AREA DEFINED.

For purposes of this Act, the term "Preservation Control Area" means that portion of the Site that is owned by the Commonwealth, as defined in the Memorandum of Understanding Between the United States and the Commonwealth of Massachusetts dated August 21, 1999.

SEC. 4. COOPERATIVE AGREEMENT WITH RESPECT TO THE PRESERVATION CONTROL AREA.

(a) IN GENERAL.—The Secretary of the Interior, acting through the National Park Service, may enter into a cooperative agreement with the Commonwealth of Massachusetts on behalf of Springfield Technical Community College to provide financial assistance to that college for the purpose of maintaining, preserving, renovating, and rehabilitating any historic structures within the Springfield Armory National Historic Site, including historic structures located within the Preservation Control Area.

(b) FIFTY PERCENT MATCH.—The Federal share of the cost of activities carried out using any assistance or grant under this Act shall not exceed 50 percent.

The SPEAKER pro tempore. Pursuant to the rule, the gentleman from Arizona (Mr. RENZI) and the gentleman from West Virginia (Mr. RAHALL) each will control 20 minutes.

The Chair recognizes the gentleman from Arizona.

GENERAL LEAVE

Mr. RENZI. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days to revise and extend their remarks and include extraneous material on the bill under consideration.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Arizona?

There was no objection.

Mr. RENZI. Mr. Speaker, I yield myself such time as I may consume.

H.R. 4376, introduced by Congressman RICHARD NEAL of Massachusetts and amended by the House Resources Committee, would authorize the National Park Service to enter into a cooperative agreement with the State of Massachusetts on behalf of Springfield Technical Community College to maintain and preserve lands the college owns and administers within the Springfield Armory National Historic Site.

This is a noncontroversial bill, and I urge its adoption.

Mr. Speaker, I reserve the balance of my time.

Mr. RAHALL. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, the majority has already explained the purpose of H.R. 4376, which was introduced by our colleague from Massachusetts, Representative RICHARD NEAL.

For nearly 200 years, the Springfield Armory was important to the manufacture of U.S. military small arms.

□ 1415

The national historic site, which was established in 1974, includes historic resources administered by the National Park Service as well as historic resources owned by the Commonwealth of Massachusetts on behalf of the Springfield Community College.

The gentleman from Massachusetts, Representative NEAL, is to be commended for his efforts to preserve this historic site. He has worked diligently to maintain and enhance the relationship between Federal, State and local interests involved in the preservation and interpretation of the historic resources located at the Springfield Armory site.

Mr. Speaker, we support H.R. 4376 and urge adoption of the legislation by the House today.

Mr. Speaker, I yield back the balance of my time.

Mr. RENZI. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, I want to add a personal note, if I could.

In 1960, my father, Major General Gene Renzi, went to Springfield Armory and bought two 30.06 sniper rifles that were used in the Korean War. We bought them for \$1 each. We restored them, and those are the same deer hunting rifles that I used and I now pass on to my son. The guys coming back from the Korean War and World War II would actually dispense these rifles through the Springfield Armory.

So for a guy who is a deer hunter, who is not that good of a shot, but for a guy who is a deer hunter, my first 30.06 we ever got came out of the Springfield Armory Works.

So I am thankful today to be able to work with the ranking member and see this legislation pushed through.

Mr. Speaker, I yield back the balance of my time.

Mr. NEAL of Massachusetts. Mr. Speaker, I rise in support of H.R. 4376, the "Springfield Armory National Historic Site, Massachusetts Act of 2005." This legislation authorizes the National Park Service to enter into a cooperative agreement with the Commonwealth of Massachusetts on behalf of Springfield Technical Community College.

Over 30 years ago, in 1974, my predecessor, Congressman Edward Boland, and Senator KENNEDY were successful in creating the Springfield Armory National Historic Site. This Boland-Kennedy legislation set in motion three decades of cooperation between the National Park Service, which manages the armory museum, and Springfield Technical Community College.

The National Park Service and Springfield Technical Community College are neighbors that together occupy the National Historic Site.

The Springfield Armory was the first national armory in the United States. In fact, the armory was founded in 1777, when the site was selected as the location for a magazine and laboratory for the development, production, and storage of guns and powder during the American Revolution.

Following the American Revolutionary War, in 1794 Congress officially established the Springfield Armory. George Washington visited the site, which also happened to be the site of Shay's Rebellion. For much of the 19th century, the Springfield Armory developed, manufactured and supplied most of the small arms used by the United States armed services. The Springfield Armory National Historic Site has a rich heritage that is an integral part of our Nation's history.

In 1968 the armory was deactivated as a military installation and in 1974 Congress established the National Historic Site. The National Park Service has operated the armory museum on these grounds, and it houses the most outstanding and historically significant arms collection in the country.

The future and fate of both the armory museum and Springfield Technical Community College are inextricably linked. Many of the historic buildings on the site are actually located on the college's property, not National Park Service land, although a visitor to the campus would not be able to tell where NPS property ends and college property begins.

The land outside the portion of the site administered by NPS is known as the "Preservation Control Area." These college-owned buildings are subject to strict architectural and preservation rules. Many of these historic buildings owned by the college must be preserved and maintained pursuant to standards defined by the Secretary of the Interior. But these historic buildings are in a state of great disrepair and the college cannot easily move to maintain and preserve them absent the full participation of the Park Service. Not only does this deterioration of the facilities hurt the college, but also undermines the attractiveness of the National Park Service area, including the armory museum.

My legislation seeks to recognize and update the partnership that has existed over these many years between the Park Service and the college by authorizing the Park Service to enter into a cooperative agreement with the Commonwealth for NPS to provide financial assistance to the college for the purpose of maintaining, preserving, renovating, and rehabilitating the many historic structures within the Springfield Armory National Historic Site.

The Park Service frequently enters into such cooperative agreements where the object of the agreement is of direct benefit to the Park Service and its mission or for other public purposes. If these great historic buildings on the site can be renovated with the assistance of the Park Service, it will bring forward a more vibrant and attractive historic site and museum. The Park Service and the college will be able to partner on many joint educational ventures that utilize these revitalized historic facilities.

The Springfield Armory National Historic Site is a treasure to the city of Springfield, the Commonwealth of Massachusetts and to the Nation. The site is in desperate need of renovation. Enactment of this legislation is the first step toward ensuring the preservation of a site, which has played so vital a role in our Nation's history.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from Arizona (Mr. RENZI) that the House suspend the rules and pass the bill, H.R. 4376, as amended.

The question was taken; and (two-thirds having voted in favor thereof) the rules were suspended and the bill, as amended, was passed.

A motion to reconsider was laid on the table.

TRAIL OF TEARS STUDY ACT

Mr. RENZI. Mr. Speaker, I move to suspend the rules and pass the bill (H.R. 3085) to amend the National Trails System Act to update the feasibility and suitability study originally prepared for the Trail of Tears National Historic Trail and provide for the inclusion of new trail segments, land components, and campgrounds associated with that trail, and for other purposes, as amended.

The Clerk read as follows

H.R. 3085

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. REVISION OF FEASIBILITY AND SUITABILITY STUDY OF TRAIL OF TEARS NATIONAL HISTORIC TRAIL.

Section 5(a)(16) of the National Trails System Act (16 U.S.C. 1244(a)(16)) is amended—

(1) in subparagraph (B), by striking “subsections” and inserting “sections”; and

(2) by adding at the end the following new subparagraph:

“(C) Not later than 6 months after the date of the enactment of this Act, the Secretary of the Interior shall complete the remaining criteria and submit to Congress a study regarding the feasibility and suitability of designating, as additional components of the Trail of Tears National Historic Trail, the following routes and land components by which the Cherokee Nation was removed to Oklahoma:

“(i) The Benge and Bell routes.

“(ii) The land components of the designated water routes in Alabama, Arkansas, Oklahoma, and Tennessee.

“(iii) The routes from the collection forts in Alabama, Georgia, North Carolina, and Tennessee to the emigration depots.

“(iv) The related campgrounds located along the routes and land components described in clauses (i) through (iii).”

The SPEAKER pro tempore. Pursuant to the rule, the gentleman from Arizona (Mr. RENZI) and the gentleman from West Virginia (Mr. RAHALL) each will control 20 minutes.

The Chair recognizes the gentleman from Arizona.

GENERAL LEAVE

Mr. RENZI. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days to revise and extend their remarks and include extraneous material on the bill under consideration.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Arizona?

There was no objection.

Mr. RENZI. Mr. Speaker, I yield myself such time as I may consume.

H.R. 3085, introduced by Congressman ZACK WAMP of Tennessee and amended by the House Resources Committee, would amend the National Trails System Act to update the feasibility and suitability study originally prepared for the Trail of Tears in 1987 to provide for the inclusion of new trail segments, land components, and campgrounds associated with the trail, particularly the Bell and Benge segments.

As my colleagues are aware, the Trail of Tears National Historic Trail encompasses the primary water route and northern land route used during the forced removal of the Cherokee Nation from its homelands in the Southeast United States to Indian Territory, which is present-day Oklahoma.

I urge adoption of this bill

Mr. Speaker, I reserve the balance of my time.

Mr. RAHALL. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, the majority has already explained the purpose of H.R. 3085 which was introduced by our colleague from Tennessee, Mr. ZACK WAMP.

There is wide support for a trail study and designation by members of

the Cherokee Nation and others interested in the history of the forced removal of Native Americans from portions of the Eastern U.S. It is our hope that the study of these additional trail segments will help to develop the most appropriate means to preserve and interpret this important aspect of our American History.

Mr. Speaker, we support H.R. 3085 and I have no objection to adoption of the legislation by the House today.

Mr. Speaker, I reserve the balance of my time.

Mr. RENZI. Mr. Speaker, I yield such time as he may consume to the gentleman from Tennessee, Mr. ZACK WAMP, the author of the bill.

Mr. WAMP. Mr. Speaker, I want to thank both gentlemen, the gentleman from Arizona and the gentleman from West Virginia, certainly the chairman of the full committee, Mr. POMBO, the subcommittee chairman, the ranking member of the subcommittee as well, and everyone who has worked on this bill. I am very proud to be the lead sponsor of H.R. 3085. I think it is a very important issue for the Congress to take up, and I urge all of my colleagues to vote for it.

H.R. 3085, the Trail of Tears Study Act, is cosponsored by 20 of my colleagues, all from districts and States in which the additional components are located. I would also like to add that S. 1970, the Senate companion bill, is sponsored by Senator TOM COBURN and cosponsored by the majority leader, BILL FRIST, and Senator LAMAR ALEXANDER.

As a consequence of the Indian Removal Act of 1830, a detachment led by John Benge traveled 734 miles starting at Fort Payne, Alabama, and continuing through Tennessee, Kentucky, Missouri, Arkansas and Oklahoma.

The treaty party group, led by John A. Bell, traveled 765 miles, starting at Charleston, Tennessee, traveling through 10 counties in Tennessee, passing through Arkansas, and on to Oklahoma. Also included are 29 forts and immigration depots located near Fort Payne, Alabama; Ross's Landing, present-day Chattanooga; and Fort Cass, present-day Charleston, Tennessee, where the Cherokee initially were taken after being rounded up from their homes.

Consequently, the intent of H.R. 3085 is to study an expansion of the current Trail of Tears National Historic Trail, which Congress designated in 1987, to include these additional documented components into the National Trails System Act.

The proposed additions have been documented by the National Park Service historians, military journals and newspaper accounts. The bill directs the Secretary of the Interior to complete within 6 months the remaining criteria necessary to determine the designation of additional routes to the Trail of Tears National Historic Trail.

Even today, many interpretation activities along the Trail of Tears seek to remember the historic routes taken by the Benge detachment and the Bell Treaty party as we are considering inclusion in the National Trails System.

I want to be very clear that it is my intent that this legislation respect private property rights absolutely. I believe the National Park Service has demonstrated strong partnerships geared toward respecting the private property of citizens and administration of the current Trail of Tears National Historic Trail and will continue to do so upon the addition of these routes.

The designation and interpretation of the sites and trails associated with the Cherokee removal will enhance public understanding of American history. Our greatness as a Nation is our ability to look at our own history objectively and in proper perspective, being mindful of the errors of the past in order not to repeat them.

Through this legislation, we will honor the historic footsteps taken by the Cherokee, document their courage, and highlight their character as a great tribe of strong people.

Finally, because of historical significance, H.R. 3085 enjoys broad support not only within Congress, but also with the Cherokee Nation, the Eastern Band of Cherokee and associated trail organizations such as the Trail of Tears Association. This legislation is a wonderful example of how Congress can better understand a national event through commemoration of the Cherokee story.

I believe the Secretary of Interior will find that the additional routes meet the historical significance, suitability, and feasibility required by the National Park Service for designation as part of the Trail of Tears National Historic Trail.

On June 29 of last year, I introduced H.R. 3085 at a press conference with Principal Chief of the Cherokee Nation Chadwick Smith, the Vice Chief of the Eastern Band of Cherokee Nation Larry Blythe, the Trail of Tears Association, and many of the original cosponsors like Congressmen CHARLES TAYLOR, JIMMY DUNCAN, TOM COLE, MARION BERRY and LINCOLN DAVIS.

I would like to thank Rob Howarth and the entire National Park Service staff, the staff of the House Resources Committee and the subcommittee, and my legislative director, Melissa Chapman, for a job very well done.

I would also like to say anecdotally, in east Tennessee we are claiming the Trail of Tears as part of our heritage, as part of our strength. On the Tennessee River, we have the Moccasin Bend National Archeological District now being implemented by the National Park Service. We have the passage at Ross's Landing, which is an extraordinary waterfall leading down to the Tennessee River, which in Cherokee art tells the story of the Trail of

Tears. Up river at Blythe Ferry we have the Cherokee Memorial Park under construction, where 8,000 Cherokee all crossed the Tennessee River at the same time, and now the Trail of Tears Documentation Act. So we are very grateful for the cooperation and participation we have had.

Mr. Speaker, I urge passage

Mr. RAHALL. Mr. Speaker, I yield back the balance of my time.

Mr. BERRY. Mr. Speaker, I am so pleased that the U.S. House of Representatives is considering H.R. 3085, the Trail of Tears Documentation Act, which I introduced last year with my friend, Representative ZACH WAMP. This important legislation has 20 cosponsors from 8 different states and works to preserve an important chapter of our history so others can learn from our past.

The lessons that lie along the Trail of Tears are more than a chapter in a history book. They are the lessons that teach future generations to celebrate diversity rather than to push it into the farthest corners of our country. Only by experiencing this tragedy can we begin to understand why so many Native Americans died along this trail.

The Trail of Tears Documentation Act would encourage the Secretary of the Interior to complete the National Historic Trail of Tears from North Carolina to Oklahoma. The proposed routes include two trails in Arkansas where close to 2,000 Cherokee traveled after the U.S. government forced them to find new land in Indian Territory. The Bell route heads up the Arkansas River from Tennessee through Little Rock and Fort Smith, and the Bengé route extends west from Randolph County to Washington County.

Our legislation asks the Secretary of the Interior to conduct a feasibility study of the additional trail segments, emigration depot, and land components currently missing along the historic trail. Once complete, individuals will be able to travel the entire length of the trail and experience interpretations of that period in American history.

It is unacceptable that such a critical part of our history remains a patchwork of missing pieces. As Americans, we need to capture this part of history so we never forget the stories of families torn apart at the hands of our country. By preserving this trail, we will give our children and grandchildren the opportunity to experience this tragedy firsthand and develop a better understanding of what happened to Native Americans in this country.

Mr. RENZI. Mr. Speaker, I yield back the balance of my time.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from Arizona (Mr. RENZI) that the House suspend the rules and pass the bill, H.R. 3085, as amended.

The question was taken.

The SPEAKER pro tempore. In the opinion of the Chair, two-thirds of those present have voted in the affirmative.

Mr. RENZI. Mr. Speaker, on that I demand the yeas and nays.

The yeas and nays were ordered.

The SPEAKER pro tempore. Pursuant to clause 8 of rule XX and the

Chair's prior announcement, further proceedings on this question will be postponed.

NATIONAL CAPITAL TRANSPORTATION AMENDMENTS ACT OF 2006

Mr. TOM DAVIS of Virginia. Mr. Speaker, I move to suspend the rules and pass the bill (H.R. 3496) to amend the National Capital Transportation Act of 1969 to authorize additional Federal contributions for maintaining and improving the transit system of the Washington Metropolitan Area Transit Authority, and for other purposes, as amended.

The Clerk read as follows

H.R. 3496

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. SHORT TITLE; FINDINGS.

(a) SHORT TITLE.—This Act may be cited as the “National Capital Transportation Amendments Act of 2006”.

(b) FINDINGS.—Congress finds as follows:

(1) Metro, the public transit system of the Washington metropolitan area, is essential for the continued and effective performance of the functions of the Federal Government, and for the orderly movement of people during major events and times of regional or national emergency.

(2) On 3 occasions, Congress has authorized appropriations for the construction and capital improvement needs of the Metrorail system.

(3) Additional funding is required to protect these previous Federal investments and ensure the continued functionality and viability of the original 103-mile Metrorail system.

SEC. 2. FEDERAL CONTRIBUTION FOR CAPITAL PROJECTS FOR WASHINGTON METROPOLITAN AREA TRANSIT SYSTEM.

The National Capital Transportation Act of 1969 (sec. 9-1111.01 et seq., D.C. Official Code) is amended by adding at the end the following new section:

“AUTHORIZATION OF ADDITIONAL FEDERAL CONTRIBUTION FOR CAPITAL AND PREVENTIVE MAINTENANCE PROJECTS

“SEC. 18. (a) AUTHORIZATION.—Subject to the succeeding provisions of this section, the Secretary of Transportation is authorized to make grants to the Transit Authority, in addition to the contributions authorized under sections 3, 14, and 17, for the purpose of financing in part the capital and preventive maintenance projects included in the Capital Improvement Program approved by the Board of Directors of the Transit Authority.

“(b) USE OF FUNDS.—The Federal grants made pursuant to the authorization under this section shall be subject to the following limitations and conditions:

“(1) The work for which such Federal grants are authorized shall be subject to the provisions of the Compact (consistent with the amendments to the Compact described in subsection (d)).

“(2) Each such Federal grant shall be for 50 percent of the net project cost of the project involved, and shall be provided in cash from sources other than Federal funds or revenues from the operation of public mass transportation systems. Consistent with the terms of the amendment to the Compact described in subsection (d)(1), any funds so provided shall

be solely from undistributed cash surpluses, replacement or depreciation funds or reserves available in cash, or new capital.

“(c) APPLICABILITY OF REQUIREMENTS FOR MASS TRANSPORTATION CAPITAL PROJECTS RECEIVING FUNDS UNDER FEDERAL TRANSPORTATION LAW.—Except as specifically provided in this section, the use of any amounts appropriated pursuant to the authorization under this section shall be subject to the requirements applicable to capital projects for which funds are provided under chapter 53 of title 49, United States Code, except to the extent that the Secretary of Transportation determines that the requirements are inconsistent with the purposes of this section.

“(d) AMENDMENTS TO COMPACT.—No amounts may be provided to the Transit Authority pursuant to the authorization under this section until the Transit Authority notifies the Secretary of Transportation that each of the following amendments to the Compact (and any further amendments which may be required to implement such amendments) have taken effect:

“(1) An amendment requiring all payments made by the local signatory governments for the Transit Authority and for the cost of operating and maintaining the adopted regional system are made from amounts derived from dedicated funding sources. For purposes of this paragraph, a ‘dedicated funding source’ is any source of funding which is earmarked and required under State or local law to be used for payments to the Transit Authority.

“(2) An amendment establishing the Office of the Inspector General of the Transit Authority in accordance with section 3 of the National Capital Transportation Amendments Act of 2006.

“(3) An amendment expanding the Board of Directors of the Transit Authority to include 4 additional Directors appointed by the Administrator of General Services, of whom 2 shall be nonvoting and 2 shall be voting, and requiring one of the voting members so appointed to be a regular passenger and customer of the bus or rail service of the Transit Authority.

“(e) AMOUNT.—There are authorized to be appropriated for grants under this section such sums as are made available to the Secretary of Treasury to make payments to the Transit Authority pursuant to section 9(k) of the Outer Continental Shelf Lands Act (43 U.S.C. 1338).

“(f) AVAILABILITY.—Amounts appropriated pursuant to the authorization under this section—

“(1) shall remain available until expended; and

“(2) shall be in addition to, and not in lieu of, amounts available to the Transit Authority under chapter 53 of title 49, United States Code, or any other provision of law.”.

SEC. 3. WASHINGTON METROPOLITAN AREA TRANSIT AUTHORITY INSPECTOR GENERAL.

(a) ESTABLISHMENT OF OFFICE.—

(1) IN GENERAL.—The Washington Metropolitan Area Transit Authority (hereafter referred to as the “Transit Authority”) shall establish in the Transit Authority the Office of the Inspector General (hereafter in this section referred to as the “Office”), headed by the Inspector General of the Transit Authority (hereafter in this section referred to as the “Inspector General”).

(2) DEFINITION.—In paragraph (1), the “Washington Metropolitan Area Transit Authority” means the Authority established under Article III of the Washington Metropolitan Area Transit Authority Compact (Public Law 89-774).

(b) INSPECTOR GENERAL.—

(1) APPOINTMENT.—The Inspector General shall be appointed by the vote of a majority of the Board of Directors of the Transit Authority, and shall be appointed without regard to political affiliation and solely on the basis of integrity and demonstrated ability in accounting, auditing, financial analysis, law, management analysis, public administration, or investigations, as well as familiarity or experience with the operation of transit systems.

(2) TERM OF SERVICE.—The Inspector General shall serve for a term of 5 years, and an individual serving as Inspector General may be reappointed for not more than 2 additional terms.

(3) REMOVAL.—The Inspector General may be removed from office prior to the expiration of his term only by the unanimous vote of all of the members of the Board of Directors of the Transit Authority, and the Board shall communicate the reasons for any such removal to the Governor of Maryland, the Governor of Virginia, the Mayor of the District of Columbia, the chair of the Committee on Government Reform of the House of Representatives, and the chair of the Committee on Homeland Security and Governmental Affairs of the Senate.

(c) DUTIES.—

(1) APPLICABILITY OF DUTIES OF INSPECTOR GENERAL OF EXECUTIVE BRANCH ESTABLISHMENT.—The Inspector General shall carry out the same duties and responsibilities with respect to the Transit Authority as an Inspector General of an establishment carries out with respect to an establishment under section 4 of the Inspector General Act of 1978 (5 U.S.C. App. 4), under the same terms and conditions which apply under such section.

(2) CONDUCTING ANNUAL AUDIT OF FINANCIAL STATEMENTS.—The Inspector General shall be responsible for conducting the annual audit of the financial accounts of the Transit Authority, either directly or by contract with an independent external auditor selected by the Inspector General.

(3) REPORTS.—

(A) SEMIANNUAL REPORTS TO TRANSIT AUTHORITY.—The Inspector General shall prepare and submit semiannual reports summarizing the activities of the Office in the same manner, and in accordance with the same deadlines, terms, and conditions, as an Inspector General of an establishment under section 5 of the Inspector General Act of 1978 (5 U.S.C. App. 5). For purposes of applying section 5 of such Act to the Inspector General, the Board of Directors of the Transit Authority shall be considered the head of the establishment, except that the Inspector General shall transmit to the General Manager of the Transit Authority a copy of any report submitted to the Board pursuant to this paragraph.

(B) ANNUAL REPORTS TO LOCAL SIGNATORY GOVERNMENTS AND CONGRESS.—Not later than January 15 of each year, the Inspector General shall prepare and submit a report summarizing the activities of the Office during the previous year, and shall submit such reports to the Governor of Maryland, the Governor of Virginia, the Mayor of the District of Columbia, the chair of the Committee on Government Reform of the House of Representatives, and the chair of the Committee on Homeland Security and Governmental Affairs of the Senate.

(4) INVESTIGATIONS OF COMPLAINTS OF EMPLOYEES AND MEMBERS.—

(A) AUTHORITY.—The Inspector General may receive and investigate complaints or information from an employee or member of

the Transit Authority concerning the possible existence of an activity constituting a violation of law, rules, or regulations, or mismanagement, gross waste of funds, abuse of authority, or a substantial and specific danger to the public health and safety.

(B) NONDISCLOSURE.—The Inspector General shall not, after receipt of a complaint or information from an employee or member, disclose the identity of the employee or member without the consent of the employee or member, unless the Inspector General determines such disclosure is unavoidable during the course of the investigation.

(C) PROHIBITING RETALIATION.—An employee or member of the Transit Authority who has authority to take, direct others to take, recommend, or approve any personnel action, shall not, with respect to such authority, take or threaten to take any action against any employee or member as a reprisal for making a complaint or disclosing information to the Inspector General, unless the complaint was made or the information disclosed with the knowledge that it was false or with willful disregard for its truth or falsity.

(5) INDEPENDENCE IN CARRYING OUT DUTIES.—Neither the Board of Directors of the Transit Authority, the General Manager of the Transit Authority, nor any other member or employee of the Transit Authority may prevent or prohibit the Inspector General from carrying out any of the duties or responsibilities assigned to the Inspector General under this section.

(d) POWERS.—

(1) IN GENERAL.—The Inspector General may exercise the same authorities with respect to the Transit Authority as an Inspector General of an establishment may exercise with respect to an establishment under section 6(a) of the Inspector General Act of 1978 (5 U.S.C. App. 6(a)), other than paragraphs (7), (8), and (9) of such section.

(2) STAFF.—

(A) ASSISTANT INSPECTOR GENERALS AND OTHER STAFF.—The Inspector General shall appoint and fix the pay of—

(i) an Assistant Inspector General for Audits, who shall be responsible for coordinating the activities of the Inspector General relating to audits;

(ii) an Assistant Inspector General for Investigations, who shall be responsible for coordinating the activities of the Inspector General relating to investigations; and

(iii) such other personnel as the Inspector General considers appropriate.

(B) INDEPENDENCE IN APPOINTING STAFF.—No individual may carry out any of the duties or responsibilities of the Office unless the individual is appointed by the Inspector General, or provides services procured by the Inspector General, pursuant to this paragraph. Nothing in this subparagraph may be construed to prohibit the Inspector General from entering into a contract or other arrangement for the provision of services under this section.

(C) APPLICABILITY OF TRANSIT SYSTEM PERSONNEL RULES.—None of the regulations governing the appointment and pay of employees of the Transit System shall apply with respect to the appointment and compensation of the personnel of the Office, except to the extent agreed to by the Inspector General. Nothing in the previous sentence may be construed to affect subparagraphs (A) through (B).

(3) EQUIPMENT AND SUPPLIES.—The General Manager of the Transit Authority shall provide the Office with appropriate and adequate office space, together with such equip-

ment, supplies, and communications facilities and services as may be necessary for the operation of the Office, and shall provide necessary maintenance services for such office space and the equipment and facilities located therein.

(e) TRANSFER OF FUNCTIONS.—To the extent that any office or entity in the Transit Authority prior to the appointment of the first Inspector General under this section carried out any of the duties and responsibilities assigned to the Inspector General under this section, the functions of such office or entity shall be transferred to the Office upon the appointment of the first Inspector General under this section.

SEC. 4. RESTRICTIONS ON DISPOSITION OF CERTAIN PROPERTIES.

(a) PROHIBITION ON DISPOSITION OF CERTAIN PROPERTY.—

(1) IN GENERAL.—The Washington Metropolitan Area Transit Authority (hereafter in this section referred to as the "Transit Authority") may not sell, lease, or otherwise convey or dispose of the property described in paragraph (2) unless the Transit Authority meets each of the following conditions:

(A) The Transit Authority has held a separate, additional public hearing after October 20, 2005, regarding the disposition of the property at which members of the general public had the opportunity to comment.

(B) The Transit Authority has submitted a report to the Committee on Government Reform of the House of Representatives and the Committee on Homeland Security and Governmental Affairs of the Senate on the costs and benefits associated with the disposition of the property, the impact of the disposition on parking facilities available at the Vienna Metrorail station, and the effect of the disposition on the capacity of the Vienna Metrorail station and the entire Metrorail system.

(2) PROPERTY DESCRIBED.—The property described in this subsection consists of approximately 3.75 acres located in Fairfax County, Virginia, and is contained in all or part of the following parcels on the Fairfax County tax map:

- (A) Parcel 48—1((1)), 90 Portion.
- (B) Parcel 48—1((1)), 91B Portion.
- (C) Parcel 48—1((6)), 7A.
- (D) Parcel 48—1((6)), 8B.
- (E) Parcel 48—1((24)), 38A.

(b) CONDITIONS FOR DISPOSITION OF CERTAIN PROPERTY.—

(1) IN GENERAL.—The Transit Authority may not sell, lease, or otherwise convey or dispose of the property described in paragraph (2) unless the Transit Authority meets each of the following conditions:

(A) The Transit Authority has met with the Mayor and members of the Council of the City of Takoma Park, Maryland, and community representatives to discuss each of the following issues related to the disposition of such property:

(i) The movement of buses and other vehicles, pedestrians, and bicycles to and from the Takoma Park Metrorail station.

(ii) The provision of bus bays, based on recommendations of the Transit Authority and the Maryland Transit Administration's Ride-On program.

(iii) The enhancement of public green space on the property, based on the Central District Plan for Takoma DC.

(B) The Transit Authority will work with residents and elected officials of Takoma Park, Maryland, and the Takoma area of the District of Columbia throughout the planning phase of the development of such property.

(C) The Transit Authority has submitted a statement to the Committee on Government Reform of the House of Representatives and the Committee on Homeland Security and Governmental Affairs of the Senate certifying that the Transit Authority has met the conditions described in subparagraphs (A) and (B).

(2) PROPERTY DESCRIBED.—The property described in this paragraph consists of Lots 820, 821, 822, 823, 829, 831, 832, 833, 839, 840, 841, 845, 846, 847, 848, 849, 850, and 851 in Square 3352 and Lots 811, 812, and 813 in Square 3353 of the District of Columbia Real Property Assessment Database.

(C) RESTRICTIONS ON DEVELOPMENT OF CERTAIN PROPERTIES.—

(1) RESTRICTION.—The Transit Authority may not sell, lease, or otherwise convey any of the real property described in paragraph (2) other than in accordance with a development plan for the property which meets the following requirements:

(A) The plan shall require that any portion of the property used for residential purposes shall be used only for owner-occupied, multi-family dwellings.

(B) The plan must provide for the use of a portion of the property for commercial purposes.

(C) The plan shall be developed in consultation with appropriate representatives of the local governments and communities for the area in which the property is located.

(2) PROPERTY DESCRIBED.—The property described in this paragraph is any real property of the Transit Authority which is located within one mile of the Largo Town Center Metro Rail Station.

(d) NO EFFECT ON OTHER AUTHORITIES.—Except as specifically provided, nothing in this section may be construed to affect any law, rule, or regulation governing the development or disposition of real property of the Transit Authority.

SEC. 5. STUDY AND REPORT BY COMPTROLLER GENERAL.

(a) STUDY.—The Comptroller General shall conduct a study on the use of the funds provided under section 18 of the National Capital Transportation Act of 1969 (as added by this Act).

(b) REPORT.—Not later than 3 years after the date of the enactment of this Act, the Comptroller General shall submit a report to the Committee on Government Reform of the House of Representatives and the Committee on Homeland Security and Governmental Affairs of the Senate on the study conducted under subsection (a).

The SPEAKER pro tempore. Pursuant to the rule, the gentleman from Virginia (Mr. TOM DAVIS) and the gentlewoman from the District of Columbia (Ms. NORTON) each will control 20 minutes.

Mr. HENSARLING. Mr. Speaker, is the gentlewoman opposed to the motion? If not, I request the time in opposition.

The SPEAKER pro tempore. Is the gentlewoman from the District of Columbia opposed to the motion?

Ms. NORTON. Mr. Speaker, I am not opposed to the legislation, nor should anybody else in this Chamber be.

The SPEAKER pro tempore. Is the gentleman from Texas opposed to the motion?

Mr. HENSARLING. I am, Mr. Speak-

er. The SPEAKER pro tempore. Pursuant to clause 1(c) of rule XV, the gentleman from Texas (Mr. HENSARLING) will be recognized for 20 minutes along with the gentleman from Virginia (Mr. TOM DAVIS).

The Chair recognizes the gentleman from Virginia.

GENERAL LEAVE

Mr. TOM DAVIS of Virginia. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks and include extraneous material on the bill under consideration.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Virginia?

There was no objection.

Mr. TOM DAVIS of Virginia. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, I rise today in strong support of H.R. 3496, as amended, the National Capital Transportation Amendments Act of 2006. This important legislation would establish critical new oversight and accountability mechanisms for the Washington Metropolitan Area Transit Authority, including an inspector general and an increased Federal presence on the Authority's board of directors. These steps are being taken to ensure that the funding provided to the Authority by Virginia, Maryland, the District of Columbia and the Federal Government are being spent as effectively and efficiently as possible. I urge my colleagues to support this important legislation.

In 1960, President Eisenhower signed the National Capital Transportation Act to provide for the development of a regional rail system for the Nation's Capital. He did so in recognition of the need to provide reliable access to government facilities for Federal workers, contractors, and citizens. Over the years, other Presidents have also recognized this need: Kennedy, Johnson, Nixon, Carter, and most recently, President George H.W. Bush.

Past Congresses have done so as well. In 1969, the National Capital Transportation Act was signed into law. Subsequently, Congress passed amendments to this act in 1979 and 1990. The sentiment expressed by Congress in supporting Metro in 1979 remains the same today: "Congress finds that an improved transportation system for the National Capital region is essential for the continued and effective performance of the functions of the Government of the United States, for the welfare of the District of Columbia, for the orderly growth and development of the National Capital region, and for the preservation of the beauty and dignity of the Nation's Capital."

The sole purpose of the previous authorizations was to provide the easy and reliable access to government for

Federal employees and citizens that President Eisenhower envisioned. Today, the Metro system remains an indispensable resource for the Federal Government. At peak times, over half of Metro riders are Federal employees and contractors. Metro's record riderships have occurred during historic events, where people from all over the country flocked to the Nation's Capital for the national gathering; President Reagan's funeral, the Fourth of July celebrations, Presidential inaugurations.

□ 1430

In times of national crisis, the Metro system has also proved indispensable to the Federal Government, such as during the September 11 terrorist attacks in which Metro served as the primary means out of a city under lockdown.

In many ways, the Metro system is the lifeblood of the Federal Government. More than 15 Federal agencies in the National Capital region are located adjacent to Metro stations. This is not a coincidence. Federal agencies rely on the Metro system to get their employees to and from the workplace year round in all types of weather. Unfortunately, as was recently evident when Metro suffered delays due to torrential rains that hit the region, when Metro shuts down, the Federal Government shuts down.

In 1965, 1969, 1979 and 1990, Congress recognized the unique relationship between the Federal Government and Metro, acknowledging the shared responsibility in maintaining the Metro system to make sure it keeps pace with the growing service demands.

Without a similar commitment today, Metro will no longer remain a viable transportation option to the Federal Government or the region. Last month, as part of the Deep Ocean Energy Resources Act, the House voted to devote funds from future OCS receipts for Metro revitalization.

The bill today sets out other measures necessary to ensure that these dollars are well spent. Before I detail what this bill does, let me detail what it does not do. It does not authorize any additional appropriations for the Metro system. This bill is about good government, something I am sure we can all agree on.

Specifically, this bill requires the three jurisdictions comprising WMATA, Maryland, Virginia Virginia and the District, to come up with a dedicated revenue source to cover capital and operational expenses.

As GAO recently reported, Metro is unique among major transit systems in that it only derives a tiny amount of its budget from dedicated sources. This legislation would require the local jurisdictions to come together and rectify a long-standing discrepancy.

The bill also creates an Inspector General for the Washington Metropolitan Area Transit Authority. Most

major transit systems have an IG in place already. There is no question Metro is a complex organization with many moving parts. Thus, it is especially important that appropriate controls are in place to identify and address managerial, financial, and operational discrepancies and problems.

Without the legislation we are considering today, the Federal funding for Metro that was authorized as part of the Deep Ocean Energy Resources Act last month would have no strings attached to it. The purpose of H.R. 3496 is to establish an Inspector General to monitor the operations and to ensure that the Federal funding generated by the OCS receipts would not be allocated unless the local jurisdictions have committed to equally share the financial responsibilities with the Federal Government.

Finally, the bill adds four Federal members to the WMATA Board of Directors, including for the first time a Federal presence on the WMATA board. Since Metro is such an integral part of the Federal Government's day-to-day operations, it stands to reason there should be a direct Federal representation in Metro's affairs.

Mr. Speaker, this bill is not about funding; it is about the good use of funding. Congress has long recognized the national significance of the Metro system. The provisions of this bill will ensure our Nation's subway is a model of efficiency and good performance.

Mr. Speaker, I urge my colleagues to support this important legislation.

Mr. Speaker, I reserve the balance of my time

Mr. HENSARLING. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, I rise today in opposition of H.R. 3496 for several reasons. Number one, Mr. Speaker, I don't quite understand why this is on the suspension calendar today.

Second of all, Mr. Speaker, the Federal taxpayer is paying a lot of money already to help subsidize this particular transit system. I am not sure if more payments are really worthwhile at this time.

Next, Mr. Speaker, we have over 10,000 Federal programs today. At what point do we say enough is enough? And, Mr. Speaker, I am very concerned that when the dots are connected, the dust settles, whatever metaphor you want to use, that unfortunately the taxpayers will be on the hook for an additional \$1.5 billion that they had not counted on. And that money ultimately, Mr. Speaker, has to come from somewhere.

First, Mr. Speaker, let me address the concern I have of why we have this on the calendar in the first place. Certainly under our House Republican Conference rules, legislation creating new Federal programs, I thought, was not supposed to be put on the suspension calendar.

As we all know, typically our suspension calendar is used frequently to honor somebody with the naming of a post office, to congratulate a sports team, to declare breast cancer awareness week. I don't think it is to put taxpayers on the hook for \$1.5 billion, which ultimately, if this bill passes, I believe could be the result.

Now, I have no doubt that since it is on the suspension calendar that it will receive a very, very healthy vote as Members just start to arrive and, frankly, do not pay as close attention to the suspension calendar as opposed to bills coming up in regular order.

But I fear at the end of the day, again, this does authorize a new program. If it did not authorize a new program, why are we here today? Why did we not simply have a Member propose an amendment to perhaps the transportation bill or the homeland security bill? So in that respect, Mr. Speaker, I am concerned that this is being handled on this particular calendar.

Next, Mr. Speaker, how much is enough? I admit the Federal Government has had a lengthy partnership with the Washington Metropolitan Transit Authority. \$6.2 billion or 60 percent of the construction costs, I believe, were picked up by the Federal taxpayer; 40 percent of the capital costs over the last decade. But the WAMTA is already receiving formula grants under titles 5307 and 5309. So they are already receiving Federal funds, if you will, a dedicated revenue source from the Federal Government already. I believe in inflation-adjusted terms that is about \$1.5 billion over the last 10 years.

And I think if you look back, these annual grants are now more or less three times what they were 10 years ago. Again, Mr. Speaker, I ask the question, how much is enough? You add it all up, Mr. Speaker, that is a lot of money.

Now, I certainly applaud the gentleman from Virginia for wanting to put in greater oversight and greater accountability into the system. I know that his committee provided a number of articles from a Washington Post expose, I think, dating back 9, 10, 11 months ago, that indicated that trains broke down 64 percent more often now than several years ago, that the Washington Metro Transit Authority had spent \$383 million on 192 rail cars, and those cars break down almost as often as the old cars.

Several hundred million, according to The Washington Post, was spent to refurbish old cars from the 1980s and those refurbished break down even more often. \$9 million was spent to renovate 178 escalators, and a third break down more often than before renovation.

So I would say if there was a system that perhaps was in need of a little greater oversight and a little greater

accountability, this is it. Otherwise, Mr. Speaker, I fear that what we would be doing is punishing success and rewarding failure. I certainly hope that the gentleman from Virginia indeed did take these steps in his bill. And for that aspect of the bill, I certainly congratulate that portion of it.

But, Mr. Speaker, the thing that concerns me the most is at a time that our Nation is facing unparalleled national debt, when we are a Nation at war, at what point do you say "no" to a new program? Again, according to the Heritage Foundation, we have over 10,000 Federal programs spread across 600 different agencies. How much is enough?

I believe in our last budget we have \$75 billion, more or less, in transportation funding. Now that is up 83.5 percent in just 10 years. In other words, Mr. Speaker, we have almost doubled the Federal contribution to transportation, almost doubled in just a decade.

Again, how much is enough? I believe we have over 28 Federal programs dedicated to mass transit. And I believe in the most recent SAFETEA-LU bill, that translates to \$45.3 billion.

Are the number of government programs only limited by our imagination, the imagination of Members to come to the floor and propose it? No matter how worthy they are, again, how many are enough? Maybe, Mr. Speaker, we should start limiting government programs by the ability of taxpayers in future generations to pay for them.

Now, I certainly want to applaud the gentleman from Virginia from attempting to offer an offset to the spending. I think I may agree to disagree with the gentleman, but my fear is again when the dots are connected and the dust settles, I am not sure it is a real offset. My fear is that it will prove to be a mirage.

What happens here, Mr. Speaker, is that the gentleman is claiming offsetting receipts from H.R. 4761. Now, when that bill was originally written, it was coming to the floor violating our Budget Act, violating our budget resolution. I am happy to say that that was corrected by a manager's amendment.

But it appears that receipts from the Outer Continental Shelf drilling are spoken for, between State revenue sharing and several new entitlement programs that were included in H.R. 4761. I know that this is an authorization bill; but had it been a mandatory bill, if it had ultimately resulted in real spending, CBO would have scored this money in such a way that it would have busted the budget.

And, Mr. Speaker, if the funding does materialize, again in the years that it is spent, it will end up contravening our budget. And I don't see that the revenue-sharing agreement is going away with the States. I don't see these other mandatory programs going away. So maybe the gentleman did indeed secure an offset. Maybe his program is

fully offset. But, Mr. Speaker, if his program is fully offset, somebody else's program is not.

At the end of the day, it is a little bit like musical chairs; and I fear when the music stops, the taxpayer is the only one who is left standing.

Next, Mr. Speaker, I am a little concerned about what is happening in our Congress with respect to earmarks. According to the Heritage Foundation, this particular bill, weighing in at \$1.5 billion, may constitute the largest earmark ever. I thought this was the House that wanted to start reforming earmarks, which among other things I would hope would lead to fewer of them, and perhaps less costly earmarks.

I mean, recently we have had the bridge to nowhere, weighing in at about \$250 million; the railroad to nowhere, weighing in at about \$750 million; and now we have everything, the bike improvements, the curb extensions, the bus bays, the new rail cars of the WMATA weighing in at about \$1.5 billion.

Again, Mr. Speaker, that is a lot of money. And ultimately, Mr. Speaker, the bottom line is, someone is going to have to pay for all of this; and part of our job in Congress is to decide upon priorities and make some very, very tough decisions. But, again, if this all comes to fruition, ultimately there is \$1.5 billion more that is going to be spent over 10 years than was expected.

There are only three places that money ultimately comes from: either we place more debt on our children, we raise taxes, or we end up spending less somewhere else. Now, right now we are awash in tax revenues. We have the highest number of tax revenues we have had in the history of America. Corporate tax revenues are up roughly 40 percent last year. Individual tax revenues are up roughly 15 percent. We do not seem to have a taxing problem in the Nation's Capital.

I do think, though, Mr. Speaker, maybe we have a spending problem. We are spending over \$23,000 per American household for only the fourth time in our Nation's history. Since I was born, the Federal budget has grown seven times faster than the family budget.

In the last 10 years alone, Federal funding for international affairs is up 89 percent; agriculture, 118 percent; education, 113 percent; and as I mentioned earlier, the transportation function, 83 percent.

Meanwhile, inflation over the same period grew 25 percent; median family income, 33 percent. We are more than spending over inflation, and the Federal budget is growing beyond the family budget. When do you say enough is enough? Let's look at the national debt. Although we have had great news recently in reducing the Federal deficit, the debt continues to increase.

We have gone from roughly \$5.5 trillion to \$8 trillion in just 5 years. Unless

we balance the budget tomorrow, every new program's cost is going to get added to the national debt, and ultimately that burden is borne by our children and our grandchildren.

We know that our entitlement spending, Social Security, Medicare and Medicaid, is growing way beyond our ability to pay for it. And we know that we are facing a rather nasty fork in the road. If you look at CBO, OMB, GAO and anybody who has looked at Federal budgetary trends, they will tell you.

□ 1445

Within one generation, either we are going to have no Federal Government, except Medicare, Medicaid and Social Security. There will be nothing else left to give the Washington Metropolitan Transit Authority, much less the border security or FAA or anybody else. Or the other fork in the road is we will have to double taxes on our children and grandchildren just to balance the budget.

Again, Mr. Speaker, we have to make tough decisions, and I have no doubt that the gentleman is sincere in that this money would go for a very, very good purpose. But there are lots of good purposes out there, Mr. Speaker, including the purpose of ensuring that our children and grandchildren do not inherit an America with greater debt and less freedom and less opportunity.

If we say "yes" to every Member's program today, no matter how worthy it may be, we are going to end up saying "no" to our children's future tomorrow. Because of that, Mr. Speaker, I urge my colleagues to say "no" to H.R. 3496.

Mr. Speaker, I reserve the balance of my time.

Mr. TOM DAVIS of Virginia. Could I ask how much time is remaining on each side?

The SPEAKER pro tempore. The gentleman from Virginia (Mr. TOM DAVIS) has 14½ minutes remaining and the gentleman from Texas (Mr. HENSARLING) has 8 minutes remaining.

Mr. TOM DAVIS of Virginia. Mr. Speaker, I yield 2 minutes to the gentleman from Virginia (Mr. WOLF), who has been a champion of transportation in the Washington area during his tenure in Congress.

Mr. WOLF. Mr. Speaker, I rise in support of the bill. The bill brings accountability. I have a note here and I quote, "CBO expects that the proposed amendment would not authorize any additional appropriations."

I would read that one more time: "CBO expects that the proposed amendment would not authorize any additional appropriations."

I rise in support of the bill, H.R. 3496, the National Capital Transportation Amendments Act. The legislation would ensure, and what Mr. DAVIS is trying to do, accountability for the Federal funding that is provided to the

Washington Metropolitan Area Transit Authority, or, as they call it, Metro. The bill would require an IG office to be established and to provide oversight of the system.

You would have thought that the system would have had an IG, but it requires Virginia, Maryland, and the District of Columbia to identify dedicated funding sources to the Metro system.

The bill also adds Federal members to the Metro board of directors, and I think these are good ideas. The Metro system in Washington, as Mr. DAVIS has said, is known as the Nation's subway system.

Visitors from all over the country and the world use the system daily when visiting our Nation's Capital, and Metro's highest ridership, as Mr. DAVIS said, occurs when national events are taking place, such as Presidential inaugurations when people come from all over the country.

The Metro system also supports the Federal workforce. Federal employees rely on the system. Many people up here on Capitol Hill and other agencies, FBI, CIA, DIA, DEA, all the other ones, commute back and forth to work every day. During peak times, over half of Metro's riders are Federal employees.

Finally, this system is vital to the emergency needs of the region. During the terrorist attack of 9/11, Metro was a reliable way to ensure that thousands of people were able to safely and quickly evacuate the city. In order to help hold Metro accountable, which Mr. DAVIS's bill has done, is accountability for Metro for the use of its Federal funds.

I urge adoption of this measure.

Mr. HENSARLING. Mr. Speaker, I reserve the balance of my time.

Mr. TOM DAVIS of Virginia. I recognize the gentlewoman from the District of Columbia for 5 minutes.

Ms. NORTON. Mr. Speaker, when I was asked did I want to accept time in opposition, when I said nor should any Member of this body, I was not being rhetorical. This bill is indispensable to the Federal Government, and it is indispensable to the 20 million visitors who come every year.

I don't want anyone to think that the chairman and the Members who have come forward would have the chutzpah to come forward and say support a local transportation system.

This system was created by the National Transportation Act. It was not created by Maryland, Virginia, or the District of Columbia but by the Federal Government. It was created by the Federal Government, because by 1969, the Federal presence had spread to Maryland and Virginia, and it was very clear that the Federal Government itself could not operate without a modern transportation system allowing what amounts to 200,000 workers today to get from one place to the other.

Meanwhile, the gentleman from Texas has cited the many programs

and the transportation funds that the local jurisdictions get, and that, of course, is what has supported this system ever since. What this funding is necessary for is capital funding in order to keep the system up and operating because of pressure put on the system by the Federal Government and nobody but the Federal Government. Almost half of those who ride every day are Federal employees.

Without dedicated funding, and here is where the chairman and the Members of the region deserve real credit because there is no dedicated funding for the system, so it has to be funded on an annual basis. The chairman's bill, supported by all of us, essentially says no funding is available unless there is a dedicated funding source.

So it performs the task that is responsible to the Federal Government by saying, here is your share that you must give, and it says to the local jurisdictions, you do not get the Federal share unless you come forward not just with funding, but with dedicated funding. The purpose of this bill is to deal with the initial investment that the Federal Government made, which is now going down the drain because the local jurisdictions cannot in fact, by themselves, deal with the maintenance and capital costs that Federal pressure has put on it.

Let me tell you what I mean by Federal pressure. We are so dependent on this system, that we subsidize Federal workers to, in fact, take Metro. As it is, you cannot, in fact, get on the roads here, even with Metro. Imagine what would happen if Metro were not available; but it is becoming unavailable because its cars are so crowded that there are many Federal workers who believe that they should just as well take a car, something that the roads coming to and from the District cannot stand.

I am a member of the Homeland Security Committee. I do not believe there is a single Member who would not not understand what in the post-9/11 world this transportation system means to the safety and security of this region. But I can tell you from my work, and the chairman is also on the committee, that it adds to the necessity that President Eisenhower saw in 1969, and an additional one that we cannot turn our heads from.

Ask your own constituents how they get around Washington when they come. There are 20 million of them. They are not my constituents, and they are not Chairman DAVIS's constituents, they are yours. And they would be lost without the Metro system.

The beauty of the bill is that it is going to get the local jurisdictions to do what all of our hectoring has not made them do until now, and that is to get the dedicated funding so that the cars, which are now overloaded with Federal workers every morning, you

cannot get on these cars, will indeed have additions to them; so the facilities, indeed, can be maintained. The gentleman complained about that. He was perfectly right. There are not the funds to maintain it and keep it operating if you depend only on the three local jurisdictions.

Mr. TOM DAVIS of Virginia. Mr. Speaker, I yield 3 minutes to the gentleman from Maryland (Mr. VAN HOLLEN), a strong transportation advocate.

Mr. VAN HOLLEN. Mr. Speaker, I want to thank my colleague, Mr. DAVIS, the chairman of the Government Reform Committee, for his leadership on this very important national issue.

As my colleague Ms. NORTON pointed out, the Federal Government was there at the creation of the Washington Metro system, and has a huge investment already in the Washington Metro system. This legislation is designed to help protect the Federal investment, the investment taxpayers have already made in that national system. I don't know why anybody would not want to provide the accountability measures to ensure that this investment is protected going forward.

We have, as we know, a system that the Federal Government relies upon to bring thousands of employees to work every day: workers who work in our national security agencies, workers who work at the Department of Health and Human Services, and all the other Federal agencies that help provide services to the American people every day.

This system is also a critical link in any evacuation plan of the Nation's Capital. Imagine everyone trying to get out of this city without using the Metro system to take thousands of people out. You would have gridlock. You wouldn't be able to do it.

Now, Mr. DAVIS has already pointed out this House is already on record just a few weeks ago in providing the Federal investment. We have done that. The only question now is whether we are going to provide the accountability piece, whether we are going to say to the Washington Metro system, you are going to be held accountable for that Federal investment in order to protect the Federal taxpayers. That is what it is all about.

I think it is worth underscoring the four major accountability provisions. Number one, we are asking the local jurisdictions that contribute to the system to make sure that they do it.

Why would we, the Federal Government, want to be at the whim, on a year-to-year basis, of whether local jurisdictions are going to be able to provide their part of this Federal-local partnership? That doesn't make any sense from the point of view of the Federal Government.

Second, it requires the establishment of the inspector general. Don't we want somebody there to make sure we pro-

tect that investment, an independent auditor who can look after that Federal taxpayer investment?

Third, we add four new members to WMATA's board. Right now, none of the board members are accountable to the Federal Government. Don't we want board members who are accountable to the Federal taxpayer, as well as board members who are accountable to the other contributing jurisdictions?

Fourth, it requires that Metro take on some other issues that have festered over a period of time and which make it more difficult to fulfill its Federal mandate and its responsibilities to the Federal Government.

Now, I want to commend the Metro system for doing what they have done with the budget they have got. But there is no doubt in order to keep the system viable going forward, the Federal Government needs to maintain its historic contribution and the local partners need to continue to make theirs.

The only question with this bill is whether we are going to be asking WMATA to make sure it has accountability provisions in place to protect that very important Federal investment. I would say, why wouldn't we want to protect the taxpayers who have made an investment in this very important national transportation infrastructure right from the beginning?

Mr. TOM DAVIS of Virginia. Mr. Speaker, I would recognize my distinguished colleague from northern Virginia, a neighbor, and also a strong transportation advocate, Mr. MORAN, for 3 minutes.

Mr. MORAN of Virginia. Mr. Speaker, I thank the chairman of the Government Reform Committee and applaud him for his leadership, as well as Mr. WOLF's, particularly when Mr. WOLF was chairman of the Appropriations Subcommittee for Transportation, Ms. NORTON representing the District of Columbia, and Mr. VAN HOLLEN representing the Maryland suburbs.

We are a team. We are a team, but we are representing the interests of the entire Congress. The principal reason why we need the Metro system is to transport our employees, the Federal workforce. If we did not have this Metro system, our Federal Government could not function. We don't have the road capacity to get them to and from work.

Even with Metro, we have the second-worst congestion in the country, and it is the most expensive. We need a better Metro system, and the only way that we can meet today's demands is by having a dedicated source of revenue. That is what this bill does.

But the funding has already been taken care of. It passed the House. The House voted for it. This is not about finding the money for Metro. This is

about insuring that it gets used properly.

□ 1500

This is about putting limitations on Metro, providing more Federal oversight for the Metro system, ensuring that local governments in the Washington area contribute their fair share, as should the State governments. The local and the State governments are willing to do that, as long as the Federal Government does; and the Federal Government should, because the principal people it serves are the Federal workforce.

President Eisenhower condemned the land that established the transit system. President Nixon and President Carter both signed legislation to get Metro on track.

Imagine if we did not have a Metro system when we have the Presidential inauguration, when we have these major national events in our Nation's Capital. We could not function. We are primarily dependent upon this transportation system so that this government, the government of the Nation's Capital, the principal government of the entire free world can function.

Everything does not happen here on Capitol Hill. Everyone can't live here. People have to travel to get here. They have to get back home. You have to have a regional economy and a regional population; and in a dense metropolitan area you have got to have a Metro system, so that they can function. And it ought to be a first-class Metro system. This does not even ensure it is going to be first class, but at least it ensures it is going to be able to be adequate to meet the needs of the local, the State and the national governments, and it ensures that there is going to be Federal oversight and that it will serve the needs of our Federal workforce.

Again, I applaud the chairman for bringing it to the floor today and securing its financing last week.

Mr. HENSARLING. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, I have listened very carefully to this debate, and I am unconvinced at the end of the day that the combination of these two bills is not spending additional taxpayer money. In fact, I have in my hand the committee report, before the two bills were separated, dated April 26 that on page 11 it clearly says for those grants, the bill would authorize the appropriation of \$1.5 billion to the Secretary. I admit that is a report before the two bills were separated.

But a combination of the two, again, is going to put the taxpayer on the hook for an additional \$1.5 billion, and I think, Mr. Speaker, what we have to do is peel away the layers of the onion here and see what we have.

Again, we already have Federal programs in place to help fund WMATA.

We already have moneys flowing. So either we are looking at new funding today, or we are looking at a new program, or we are looking at both.

Regardless, a combination of the two, I believe, will spend more money, and Mr. Speaker, even if it was budget neutral, even if it was budget neutral, when we are looking at a Federal debt that has gone from roughly \$5.5 trillion to \$8.5 trillion in just about 5 years, I am not sure I want any new Federal programs until we do a better job in preventing this debt from being imposed upon our children, at a time when we have the highest level of tax revenues we have ever had in the Nation's history.

Again, Mr. Speaker, we don't have a taxing problem. We have a spending problem, and I am not here to say that there are not many worthy provisions of this bill, and I am glad to hear about all the accountability features of the bill. I don't quite know why that has to be combined with a billion and a half new spending since, again, the Federal taxpayer is already contributing to this mass transit system at a very healthy clip.

But one of the reasons I would be leery of authorizing new funds, as President Reagan, one of my favorite Presidents, once said that the closest thing to eternal life on Earth is a Federal program. So what happens in the outyears as this program continues on and on and on? I am not sure anybody here on this floor today knows for certain.

I can tell you this: I got into the fatherhood business 4 years ago. I now have a 4-year-old daughter and 2½-year-old son; and I can tell you once I helped bring them into the world, they have been very hungry, very expensive, and very needful people. Now, I love them very much, but again, using this analogy, they can get very expensive in the outyears.

So, Mr. Speaker, another point I would like to address as many speakers came here today to make a very compelling argument that this was a vital transportation program, that it was a very vital program related to our homeland security, God forbid should another 9/11 occur. But if this is true, Mr. Speaker, I ask the question, why was this program not originally funded in the homeland security appropriations bill? Why was this project not originally funded in the transportation appropriations bill? Many competing interests come together in those bills, hopefully within a budget constraint, and decisions are made about Federal priorities. So, again, if this is such a priority, I am wondering why it was not included there.

But again, Mr. Speaker, at the end of the day, my concern here is that somehow, some way a combination of these two bills is going to mean at a time when tax revenues are at their highest,

at a time when the national debt is at its highest, at a time where we already have 10,000 Federal programs and they grow each day, that we are going to have a new Federal program, and again, no matter how worthy it may be, without taking away some other lower-priority Federal program, and I just do not believe that the OCS dedicated revenue stream that was already spoken for, that even if the gentleman from Virginia has been successful, and maybe he has been, in dedicating that funding to his bill, then some other program has gone unfunded; and therefore, again the Federal taxpayer today in the future will be on the hook.

For those reasons, Mr. Speaker, I would urge defeat of the bill.

Mr. Speaker, I yield back the balance of my time.

Mr. TOM DAVIS of Virginia. Before I begin, I would ask unanimous consent to put the memorandum from Greg Waring of the Congressional Budget Office into the RECORD noting that CBO has reviewed the proposed amendment and it does not authorize any additional appropriations, score of zero.

The SPEAKER pro tempore (Mr. ADERHOLT). Is there objection to the request of the gentleman from Virginia?

There was no objection.

NATURAL & PHYSICAL RESOURCES
COST ESTIMATES UNIT CONGRES-
SIONAL BUDGET OFFICE,

From: Greg Waring
Sent: Tuesday, July 11, 2006 5:42 PM
To: Puccerella, Ed
Cc: Robert Murphy; Mark Hadley
Subject: HR 3496 budgetary impact

Ed: CBO has reviewed the proposed amendment to H.R. 3496. The language would link funding for the capital and preventive maintenance projects to the authorization of appropriation provided in Section 30 of H.R. 4761, as passed the House of Representatives on June 29, 2006. CBO expects that the proposed amendment would not authorize any additional appropriations.

Please let me know if you have any additional questions.

GREGORY WARING,
Analyst.

From: Puccerella, Ed
Sent: 7/11/2006 4:52 PM.

GREG: Per our conversation with Budget Committee and you all at CBO here is the revised appropriation language that the Chairman would like to add to H.R. 3496 when it goes to the floor. Can you please confirm that this language would not authorize any additional appropriations that are not otherwise authorized under H.R. 4761 as passed by the House? We would like this language to be effectively budget neutral.

Thanks, Ed

(e) Amount.—There are authorized to be appropriated such sums as are made available to the Secretary of Treasury to make payments to the Washington Metropolitan Area Transit Authority pursuant to section 9(k) of the Outer Continental Shelf Lands Act (43 U.S.C. 1338).

(f) Availability.—Amounts appropriated pursuant to the authorization under this section

(1) shall remain available until expended; and

(2) shall be in addition to, and not in lieu of, amounts available to the Transit Authority under chapter 53 of title 49, United States Code, or any other provision of law.

EDWARD J. PUCCERELLA,
COMMITTEE ON GOVERNMENT REFORM,
TOM DAVIS,
CHAIRMAN.

Mr. TOM DAVIS of Virginia. Mr. Speaker, this is not a new program. This program was authorized in 1960 and signed by President Eisenhower. It has been reauthorized four times; and I hope it has a long life, a long productive life, taking commuters off clogged roads and using mass transit so we can reduce our energy dependency on foreign oil.

Mr. Speaker, this is not an authorization of funds. It is about making sure, as my colleagues have said, that this money is spent well. If this goes down, the money still goes through without any checks and balances and Inspector Generals or any of these being set up. If you vote against this bill, you are not saying we should not spend any extra dollars on the Metro system. You are not saying that. You are saying they can spend the extra dollars without the congressional oversight.

Statistics show that Metro is, in fact, one of the best run systems, but I am not willing to say they are so good that no improvements are required and additional oversight is not required.

The provisions in this came from a GAO report. It is our responsibility in Congress to ensure Federal dollars are well spent. There should be nothing contentious about requiring an Inspector General, adding Federal members to the board, or requiring the jurisdictions to truly provide stable funding to the system.

So I urge my colleagues to offer this bill their full support.

I appreciate the comments of my colleague. He has long been a supporter of no further Federal spending, but we are out the barn door on this. That happened under the previous legislation, under the Deep Ocean Energy Resources Act. This refines it and controls it and makes sure the money is well spent.

I hope my colleagues will join us in legislation that scores zero with the Congressional Budget Office and reauthorizes this legislation.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from Virginia (Mr. TOM DAVIS) that the House suspend the rules and pass the bill, H.R. 3496, as amended.

The question was taken.

The SPEAKER pro tempore. In the opinion of the Chair, two-thirds of those present have voted in the affirmative.

Mr. HENSARLING. Mr. Speaker, on that I demand the yeas and nays.

The yeas and nays were ordered.

The SPEAKER pro tempore. Pursuant to clause 8 of rule XX and the

Chair's prior announcement, further proceedings on this question will be postponed.

FEDERAL JUDICIARY EMERGENCY TOLLING ACT OF 2006

Mr. SENSENBRENNER. Mr. Speaker, I move to suspend the rules and pass the bill (H.R. 3729) to provide emergency authority to delay or toll judicial proceedings in United States district and circuit courts, as amended.

The Clerk read as follows

H.R. 3729

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. SHORT TITLE.

This Act may be cited as the "Federal Judiciary Emergency Tolling Act of 2006".

SEC. 2. EMERGENCY AUTHORITY TO DELAY OR TOLL JUDICIAL PROCEEDINGS.

(a) IN GENERAL.—Chapter 111 of title 28, United States Code, is amended by adding at the end the following:

"§ 1660. Emergency authority to delay or toll judicial deadlines

"(a) TOLLING IN DISTRICT COURTS.—

"(1) IN GENERAL.—In the event of a natural disaster or other emergency situation requiring the closure of courts or rendering it impracticable for the United States Government or a class of litigants to comply with deadlines imposed by any Federal or State law or rule that applies in the courts of the United States, the chief judge of a district court that has been affected may exercise emergency authority in accordance with this section.

"(2) SCOPE OF AUTHORITY.—(A) The chief judge may enter such order or orders as may be appropriate to delay, toll, or otherwise grant relief from the time deadlines imposed by otherwise applicable laws or rules for such period as may be appropriate for any class of cases pending or thereafter filed in the district court or bankruptcy court of the district.

"(B) Except as provided in subparagraph (C), the authority conferred by this section extends to all laws and rules affecting criminal and juvenile proceedings (including, prearrest, post-arrest, pretrial, trial, and post-trial procedures), civil actions, bankruptcy proceedings, and the time for filing and perfecting an appeal.

"(C) The authority conferred by this section does not include the authority to extend—

"(i) any statute of limitation for a criminal action; or

"(ii) any statute of limitation for a civil action, if—

"(I) the claim arises under the laws of a State; and

"(II) extending the limitations period would be inconsistent with the governing State law.

"(3) UNAVAILABILITY OF CHIEF JUDGE.—If the chief judge of the district is unavailable, the authority conferred by this section may be exercised by the district judge in regular active service who is senior in commission or, if no such judge is available, by the chief judge of the circuit that includes the district.

"(4) HABEAS CORPUS UNAFFECTED.—Nothing in this section shall be construed to authorize suspension of the writ of habeas corpus.

"(b) CRIMINAL CASES.—In exercising the authority under subsection (a) for criminal

cases, the court shall consider the ability of the United States Government to investigate, litigate, and process defendants during and after the emergency situation, as well as the ability of criminal defendants as a class to prepare their defenses.

"(c) TOLLING IN COURTS OF APPEALS.—

"(1) IN GENERAL.—In the event of a natural disaster or other emergency situation requiring the closure of courts or rendering it impracticable for the United States Government or a class of litigants to comply with deadlines imposed by any federal or States law or rule that applies in the courts of the United States, the chief judge of a court of appeals that has been affected or that includes a district court so affected may exercise emergency authority in accordance with this section.

"(2) SCOPE OF AUTHORITY.—The chief judge may enter such order or orders as may be appropriate to delay, toll, or otherwise grant relief from the time deadlines imposed by otherwise applicable laws or rules for such period as may be appropriate for any class of cases pending in the court of appeals.

"(3) UNAVAILABILITY OF CHIEF JUDGE.—If the chief judge of the circuit is unavailable, the authority conferred by this section may be exercised by the circuit judge in regular active service who is senior in commission.

"(4) HABEAS CORPUS UNAFFECTED.—Nothing in this section shall be construed to authorize suspension of the writ of habeas corpus.

"(d) ISSUANCE OF ORDERS.—The Attorney General or the Attorney General's designee may request issuance of an order under this section, or the chief judge of a district or of a circuit may act on his or her own motion.

"(e) DURATION OF ORDERS.—An order entered under this section may not toll or extend a time deadline for a period of more than 14 days, except that, if the chief judge (whether of a district or of a circuit) determines that an emergency situation requires additional extensions of the period during which deadlines are tolled or extended, the chief judge may, with the consent of the judicial council of the circuit, enter additional orders under this section in order to further toll or extend such time deadline.

"(f) NOTICE.—A court issuing an order under this section—

"(1) shall make all reasonable efforts to publicize the order, including announcing the order on the web sites of all affected courts and the web site of the Federal judiciary; and

"(2) shall, through the Director of the Administrative Office of the United States Courts, send notice of the order, including the reasons for the issuance of the order, to the Committee on the Judiciary of the Senate and the Committee on the Judiciary of the House of Representatives.

"(g) REQUIRED REPORTS.—A court issuing one or more orders under this section relating to an emergency situation shall, not later than 180 days after the date on which the last extension or tolling of a time period made by the order or orders ends, submit a brief report to the Committee on the Judiciary of the Senate, the Committee on the Judiciary of the House of Representatives, and the Judicial Conference of the United States describing the orders, including—

"(1) the reasons for issuing the orders;

"(2) the duration of the orders;

"(3) the effects of the orders on litigants; and

"(4) the costs to the judiciary resulting from the orders.

"(h) EXCEPTIONS.—The notice under subsection (f)(2) and the report under subsection

(g) are not required in the case of an order that tolls or extends a time deadline for a period of less than 14 days.”

(b) CLERICAL AMENDMENT.—The table of sections at the beginning of chapter 111 of title 28, United States Code, is amended by adding at the end the following new item:

“1660. Emergency authority to delay or toll judicial deadlines.”

The SPEAKER pro tempore. Pursuant to the rule, the gentleman from Wisconsin (Mr. SENSENBRENNER) and the gentleman from Michigan (Mr. CONYERS) each will control 20 minutes.

The Chair recognizes the gentleman from Wisconsin.

GENERAL LEAVE

Mr. SENSENBRENNER. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days within which to revise and extend their remarks and include extraneous materials on H.R. 3729 currently under consideration.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Wisconsin?

There was no objection.

Mr. SENSENBRENNER. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, I rise in support of H.R. 3729. This legislation would grant the chief judge of any district or appeals court the authority to enter an order to delay or toll any deadlines on pending cases whenever an affected court has closed due to a natural disaster or other emergency situation.

While the court can generally be expected to give consideration to the difficulties faced by litigants in such cases, this legislation is designed to ensure that the court also gives appropriate consideration to the unique burdens that may be imposed on the Federal Government in responding to an emergency.

When a disaster occurs, the field offices of Federal law enforcement agencies may lose access to case files, evidence and other materials critical to the timely prosecution and adjudication of pending cases. Additionally, the government may be forced to reallocate personnel and other resources to address critical, often life-threatening, situations that arise as a consequence of such disasters. Last year's devastating hurricanes that struck New Orleans and much of the gulf region provide a recent example of circumstances where this bill would help ensure that justice can continue to be administered.

The version of H.R. 3729 we consider today reflects bipartisan, clarifying changes adopted in committee based on discussions with the Administrative Office of the U.S. Courts and the Department of Justice. This legislation preserves the primacy of State law by expressly providing that the bill's authority does not extend to any statute of limitation for a criminal or civil ac-

tion if the claim arises under State law and extending that limitation would be inconsistent with the governing State law.

Additionally, the bill expressly provides that the bill not be construed to authorize suspension of habeas corpus, and places a limitation of 14 days on the amount of time a deadline may be extended or tolled while preserving the ability of a judge to seek additional time extensions.

Finally, this legislation requires that a court issuing an order to toll or delay deadlines make all reasonable efforts to publicize the order on the Web sites of the Federal judiciary and all affected courts and notify the House and Senate Judiciary Committees when such action is taken.

Mr. Speaker, this bill helps ensure that the fair and timely administration of justice, which is central to our form of government, is not imperiled by natural disasters or other emergency circumstances.

I urge my colleagues to support this legislation.

Mr. Speaker, I reserve the balance of my time.

Mr. CONYERS. Mr. Speaker, I yield myself such time as I may consume, and I rise in support of H.R. 3729.

The bill, as has been indicated, makes several key changes to current law which will help guarantee our Federal court system will be able to adequately function in the wake of a natural disaster or other emergency.

First, it provides the chief judge of a Federal judicial district with the appropriate level of discretion to toll or delay deadlines for any class of cases pending before the court at the time of a natural disaster or emergency.

It also, in a newly proposed section 2 of the bill, includes important language which makes clear that this bill is not to be construed to authorize the suspension of the writ of habeas corpus, as has been noted as a very important consideration.

Third, the legislation limits the amount of time that a chief judge may extend or toll a deadline to no more than 14 days, except where the judge determines that an emergency situation requires additional extensions.

And finally, for any court that decides to toll or delay a deadline, the legislation creates a notice requirement. Among other things, this notice requirement would direct courts to make all reasonable efforts to publicize the order, including announcing the order on Web sites of all affected courts and the Web site of the Federal judiciary and require the director of the Administrative Office of the Courts to send copies of each notice, including the reasons for their issuance, to the House and the Senate Judiciary Committees.

□ 1515

It is worth noting that this latter provision will go a long way toward

helping our committee conduct adequate oversight and assist in our efforts to detect any possible abuses.

In closing, I thank the chairman of the Committee on the Judiciary, Mr. SENSENBRENNER, for his willingness to work with Members on this side of the aisle to address many of our concerns regarding the legislation. This is truly bipartisan. I urge my colleagues to support this worthwhile measure

Mr. Speaker, I yield back the balance of my time.

Mr. SENSENBRENNER. Mr. Speaker, I yield back the balance of my time.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from Wisconsin (Mr. SENSENBRENNER) that the House suspend the rules and pass the bill, H.R. 3729, as amended.

The question was taken.

The SPEAKER pro tempore. In the opinion of the Chair, two-thirds of those present have voted in the affirmative.

Mr. SENSENBRENNER. Mr. Speaker, on that I demand the yeas and nays.

The yeas and nays were ordered.

The SPEAKER pro tempore. Pursuant to clause 8 of rule XX and the Chair's prior announcement, further proceedings on this question will be postponed.

VOLUNTEER PILOT ORGANIZATION PROTECTION ACT OF 2006

Mr. SENSENBRENNER. Mr. Speaker, I move to suspend the rules and pass the bill (H.R. 1871) to provide liability protection to nonprofit volunteer pilot organizations flying for public benefit and to the pilots and staff of such organizations, as amended.

The Clerk read as follows:

H.R. 1871

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. SHORT TITLE.

This Act may be cited as the “Volunteer Pilot Organization Protection Act of 2006”.

SEC. 2. FINDINGS AND PURPOSE.

(a) FINDINGS.—Congress finds the following:

(1) Scores of public benefit nonprofit volunteer pilot organizations provide valuable services to communities and individuals.

(2) In calendar year 2001, nonprofit volunteer pilot organizations provided long-distance, no-cost transportation for over 30,000 people in times of special need.

(3) Such organizations are no longer able to reasonably purchase non-owned aircraft liability insurance to provide liability protection, and thus face a highly detrimental liability risk.

(4) Such organizations have supported the interests of homeland security by providing volunteer pilot services at times of national emergency.

(b) PURPOSE.—The purpose of this Act is to promote the activities of nonprofit volunteer pilot organizations flying for public benefit and to sustain the availability of the services that such organizations provide, including transportation at no cost to financially

needy medical patients for medical treatment, evaluation, and diagnosis, as well as other flights of compassion and flights for humanitarian and charitable purposes.

SEC. 3. LIABILITY PROTECTION FOR NONPROFIT VOLUNTEER PILOT ORGANIZATIONS FLYING FOR PUBLIC BENEFIT AND TO PILOTS AND STAFF OF SUCH ORGANIZATIONS.

Section 4 of the Volunteer Protection Act of 1997 (42 U.S.C. 14503) is amended—

- (1) in subsection (a)(4)—
 (A) by redesignating subparagraphs (A) and (B) as clauses (i) and (ii), respectively;
 (B) by inserting “(A)” after “(4)”;
 (C) by striking the period at the end and inserting “; or”; and
 (D) by adding at the end the following:
 “(B) the harm was caused by a volunteer of a nonprofit volunteer pilot organization that flies for public benefit, while the volunteer was flying in furtherance of the purpose of the organization and was operating an aircraft for which the volunteer was properly licensed and insured, unless the conduct constitutes a Federal crime of terrorism (as such term is defined in section 2332b(g)(5) of title 18, United States Code) or an act of domestic terrorism (as such term is defined in section 2331 of such title), or unless the entity has been convicted of an offense under section 2339A of such title.”;

- (2) in subsection (b)—
 (A) by amending the heading to read as follows: “CONCERNING RESPONSIBILITY OF VOLUNTEERS”;

- (B) by inserting “(1)” before “Nothing”;

- (C) by adding at the end the following new paragraph:

“(2) Nothing in this section shall be construed to affect the liability for negligence of a volunteer of a nonprofit volunteer pilot organization that flies for public benefit with respect to amounts within the limits of liability insurance coverage that such volunteer is required to obtain pursuant to subsection (a)(4)(B) for liability protection under this section.”;

- (3) in subsection (c)—
 (A) by inserting “(1)” before “Nothing”;

- (B) by adding at the end the following new paragraph:

“(2) Notwithstanding paragraph (1), a nonprofit volunteer pilot organization that flies for public benefit, and the staff, mission coordinators, officers, and directors (whether volunteer or otherwise) of such organization or a referring agency of such organization, shall not be liable with respect to harm caused to any person by a volunteer of such organization, while the volunteer is flying in furtherance of the purpose of the organization and is operating an aircraft for which the volunteer is properly licensed and has certified to such organization that such volunteer has in force insurance for operating such aircraft. Such referring agency shall include, among others, any nonprofit organization that provides disaster relief services that place staff, volunteers, evacuees, goods, supplies, or cargo on aircraft flights being coordinated by volunteer pilot organizations in circumstances of disaster response and relief.”.

SEC. 4. REPORT BY ATTORNEY GENERAL.

(a) **STUDY REQUIRED.**—The Attorney General shall carry out a study on the availability of insurance to nonprofit volunteer pilot organizations that fly for public benefit. In carrying out the study, the Attorney General shall make findings with respect to—

(1) whether nonprofit volunteer pilot organizations are able to obtain insurance;

(2) if no, then why;

(3) if yes, then on what terms such insurance is offered; and

(4) if the inability of nonprofit volunteer pilot organizations to obtain insurance has any impact on the associations’ ability to operate.

(b) **REPORT.**—After completing the study, the Attorney General shall submit to Congress a report on the results of the study. The report shall include the findings of the study and any conclusions and recommendations that the Attorney General considers appropriate.

The **SPEAKER** pro tempore. Pursuant to the rule, the gentleman from Wisconsin (Mr. **SENSENBRENNER**) and the gentleman from Michigan (Mr. **CONYERS**) each will control 20 minutes.

The Chair recognizes the gentleman from Wisconsin.

GENERAL LEAVE

Mr. **SENSENBRENNER**. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days within which to revise and extend their remarks and include extraneous material on H.R. 1871 currently under consideration.

The **SPEAKER** pro tempore. Is there objection to the request of the gentleman from Wisconsin?

There was no objection.

Mr. **SENSENBRENNER**. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, I rise in support of H.R. 1871, the Volunteer Pilot Organization Protection Act. This bill is narrowly tailored to correct specific liability exposure for volunteer and nonprofit activities.

In 1997, Congress passed the Volunteer Protection Act to shield volunteers from liability from some forms of negligence in response to concerns that America’s lawsuit culture was inhibiting this country’s rich tradition of volunteerism. However, that act does not protect volunteers who operate an automobile, vessel or aircraft, nor does it protect the organizations that coordinate the volunteers.

There are approximately 30 separate volunteer pilot organizations flying for the public benefit, the largest of which function together as Angel Flight America. These organizations coordinate almost 8,000 volunteer pilots, who fly anywhere from one to 50 volunteer missions a year, all at their own personal expense. These pilots conduct public benefit aviation, which includes activities ranging from environmental observation, wilderness rescue, delivery of medical supplies and organs, and transport of medical patients. In the area of medical patient transport alone, volunteer pilot organizations provided free, long-distance transportation to over 40,000 patients and their escorts in 2003.

As beneficial as these groups are in the normal course, they are crucial in

times of crisis. For example, in the wake of Hurricane Katrina, Angel Flight America, through its role with the Homeland Security Emergency Air Transportation System, flew over 500 missions in the first week after the storm, bringing in emergency workers, agency staff, volunteers, and supplies.

These volunteer pilots also flew high-risk individuals to safer locations, and once there assisted groups such as the National Center for Missing and Exploited Children in reuniting parents and children separated in the evacuation of New Orleans. Overall, Angel Flight America coordinated over 2,200 flights in the areas affected by Hurricane Katrina, second only to the United States military.

Despite the invaluable services they provide, these groups are not protected from liability by the Volunteer Protection Act and face difficulty in obtaining the necessary insurance because of liability exposure fears. In many cases, the volunteer pilot organizations cannot obtain, at any cost, the type of liability insurance that they need. In addition, hospitals and other medical establishments are sometimes reluctant to refer patients to volunteer pilot medical transport services because of their own fear of liability exposure based upon the simple act of recommending needy patients to nonprofit volunteer pilots.

This legislation limits the liability exposure for volunteer pilots and organizations by bringing them within the scope of coverage of the Volunteer Protection Act. The legislation will not confer blanket immunity. Liability will attach for gross negligence or reckless, willful, or criminal misconduct. The bill would also have an added benefit of allowing hospitals, clinics and other organizations, including those organizations active in rescue operations like the American Red Cross, to refer needy patients for no-cost medical transport with less fear of their own liability exposure.

Further, the bill requires that the pilots purchase insurance in order to be covered by the liability protections.

I would also note that this bill contains two amendments that address specific concerns that were raised about earlier versions of this bill. The first amendment, which was adopted during the committee markup, ensures that the liability protections do not extend to anyone who engages in terrorist activities.

The second amendment, which was negotiated after the markup with Representative **SCOTT** of Virginia and Representative **DRAKE**, provides that volunteer pilots, who are required to carry insurance under the bill, can be liable up to the limits of that insurance. The pilots would not, however, be personally liable for any amounts above their insurance for simple negligence.

Mr. Speaker, H.R. 1871 will end the cycle of litigation and the threat of

such litigation that has stifled the efforts of public-minded volunteer pilots who risk their lives to assist others. The bill is supported by a wide array of charitable organizations, including the American Red Cross, the National Organization For Rare Disorders, Angel Flight America, and the National Air Transportation Association.

In 2004, the House overwhelmingly passed similar legislation with the support of 385 Members. I would urge my colleagues to support this important legislation.

Mr. Speaker, I reserve the balance of my time

Mr. CONYERS. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, as much as I appreciate volunteer pilot organizations and the pilots, this bill creates a number of problems for me that I would like to bring to the attention of our membership, and it makes it difficult for me to support H.R. 1871.

If you didn't know that there was a Volunteer Protection Act already on the books, this would sound like something that is very important and very necessary. But there is, and H.R. 1871 undoes the balance achieved in the Volunteer Protection Act by exempting pilots and aircraft carriers from liability, and it applies not only to pilots but it applies to staff of an organization, mission coordinators, officers and directors of the volunteer pilot organizations, referring agencies, whether they are for profit or not for profit. And it would leave innocent victims without recourse in some situations by reducing the standard of care applicable to pilots.

It does nothing to tackle the real problem which is underlying in this bill. What is it? Well, it is that the insurance industry has failed to offer insurance to the volunteer pilot organizations and they can't get it. They can't get insurance. And so this measure flies in the face of already enacted law named the Volunteer Protection Act, which was passed 8 years ago and extending over five Congresses.

The Volunteer Protection Act, as opposed to this measure, was carefully deliberated and negotiated. But this measure before us wipes the slate clean by giving volunteer pilots protection from liability, despite the fact that the Volunteer Protection Act specifically excluded that category of volunteers from protection.

Under the Volunteer Protection Act, pilots and those operating aircraft were specifically left out of the liability exemption because of the highly dangerous nature of the activity and the fact that States already require these pilots to have insurance. The measure undoes that and exempts pilots from liability.

Moreover, it goes further than the Volunteer Protection Act by giving this exemption to not only the pilots

but also to the staff, the mission coordinators and directors of the organizations and referring agencies. In the Volunteer Protection Act, Congress made sure it was only the volunteers being protected. We don't do that here.

Finally, as I have said, the real problem is with the insurance industry. Why won't they offer insurance to volunteer pilot organizations? Well, during the hearing of this legislation in the 108th Congress, it was suggested that these nonprofit volunteer pilot organizations need liability protection because they can't get insurance. If this is the case, why not have a bill that requires insurance agencies to offer insurance to these organizations? Why not that instead of in the reverse, exempting everyone almost under the sun from liability.

So what we are establishing here is a national policy specifically allowing certain pilots to operate their aircraft negligently and still escape liability. Thank goodness we haven't had any cases like this, but by immunizing both the negligent pilot and the organization that arranges and provides the transportation, this bill could leave victims of an air tragedy and their surviving families with no means of seeking compensation for their loss.

I hope that the House of Representatives will not turn its back on the victims of air tragedies, and I hope that none of them will occur. But for those reasons, I cannot support the passage of this bill.

Mr. Speaker, I reserve the balance of my time.

Mr. SENSENBRENNER. Mr. Speaker, I yield 5 minutes to the author of the bill, the gentlewoman from Virginia (Mrs. DRAKE).

Mrs. DRAKE. Mr. Speaker, allow me to begin by thanking key individuals whose efforts brought this legislation to the floor today. First, let me thank Chairman SENSENBRENNER for his diligence in moving this bill through the Committee on the Judiciary.

I would also like to thank Ed Boyer of Angel Flight America located in Virginia Beach for raising this important issue and whose vision will help hundreds of private citizens respond in time of crisis.

I would also like to thank my friend and colleague, Mr. BOBBY SCOTT, for working with me to bring the best possible bill to the floor today.

Finally, allow me to thank Sarah Hamlett, who put in countless hours to make this bill a reality.

Today, we have an opportunity to take important action that will encourage the natural altruism and patriotism that Americans have repeatedly demonstrated in times of crisis.

In the past 5 years, our Nation has seen two great disasters, one at the hands of terrorists and one at the hands of Mother Nature. In both cases, Americans responded with a tremen-

dous outpouring of compassion, lending their time, skills and dollars to a range of charitable organizations.

□ 1530

In response to both 9/11 and Hurricane Katrina, the thousands of civil aviators who make up Angel Flight America, stood ready to serve and, indeed, played a major role in the disaster response.

Flying over 150 missions following 9/11 and more than 2,200 missions in response to Katrina, these pilots led an aviation disaster response second only to that of the U.S. military.

But providing a coordinated aviation response during national emergencies is only a part of the underlying mission for most nonprofit volunteer organizations. Their most common mission is to provide emergency medical transportation services for needy families.

Each year, volunteer pilots transport hundreds of people with life-threatening illnesses thousands of miles in order to receive specialized medical attention, as well as transporting patients in remote locations who would otherwise be unable to receive care. Yet, despite the importance of their mission, these organizations have been left out of the Volunteer Protection Act in its current form.

This legislation addresses this mission by amending the Volunteer Protection Act to include organizations such as Angel Flight so they may continue to fulfill their mission and provide a critical service for needy families, seeking specialized medical attention.

It is important to note that I have worked closely with Congressman SCOTT to ensure that this legislation does not shield pilots from liability in instances of criminal misconduct or gross negligence.

Instead, this legislation provides nonprofit volunteer pilot organizations the security they need to grow and expand their mission to more parts of our country and provide a well-coordinated response in times of national emergencies.

I encourage all of my colleagues to support this important bipartisan legislation.

Mr. CONYERS. Mr. Speaker, I have no further requests for time, and I yield back the balance of my time.

Mr. SENSENBRENNER. Mr. Speaker, I have no further requests for time, and I yield back the balance of my time.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from Wisconsin (Mr. SENSENBRENNER) that the House suspend the rules and pass the bill, H.R. 1871, as amended.

The question was taken; and (two-thirds having voted in favor thereof) the rules were suspended and the bill, as amended, was passed.

A motion to reconsider was laid on the table.

CLARIFYING TREATMENT OF SELF-EMPLOYMENT FOR PURPOSES OF LIMITATION ON STATE TAXATION OF RETIREMENT INCOME

Mr. SENSENBRENNER. Mr. Speaker, I move to suspend the rules and pass the bill (H.R. 4019) to amend title 4 of the United States Code to clarify the treatment of self-employment for purposes of the limitation on State taxation of retirement income, as amended.

The Clerk read as follows

H.R. 4019

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. CLARIFICATION OF TREATMENT OF SELF-EMPLOYMENT FOR PURPOSES OF THE LIMITATION ON STATE TAXATION OF RETIREMENT INCOME.

(a) *IN GENERAL.*—Section 114(b)(1)(I) of title 4, United States Code, is amended—

(1) by inserting “(or any plan, program, or arrangement that is in writing, that provides for retirement payments in recognition of prior service to be made to a retired partner, and that is in effect immediately before retirement begins)” after “section 3121(v)(2)(C) of such Code”,

(2) by inserting “which may include income described in subparagraphs (A) through (H)” after “(not less frequently than annually”,

(3) by adding at the end the following: “The fact that payments may be adjusted from time to time pursuant to such plan, program, or arrangement to limit total disbursements under a predetermined formula, or to provide cost of living or similar adjustments, will not cause the periodic payments provided under such plan, program, or arrangement to fail the ‘substantially equal periodic payments’ test.”, and

(4) by adding at the end the following: “(4) For purposes of this section, the term ‘retired partner’ is an individual who is described as a partner in section 7701(a)(2) of the Internal Revenue Code of 1986 and who is retired under such individual’s partnership agreement.”.

(b) *APPLICATION.*—The amendments made by this section apply to amounts received after December 31, 1995.

The SPEAKER pro tempore. Pursuant to the rule, the gentleman from Wisconsin (Mr. SENSENBRENNER) and the gentleman from Michigan (Mr. CONYERS) each will control 20 minutes.

The Chair recognizes the gentleman from Wisconsin.

GENERAL LEAVE

Mr. SENSENBRENNER. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days within which to revise and extend their remarks and include extraneous material on H.R. 4019 currently under consideration.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Wisconsin?

There was no objection.

Mr. SENSENBRENNER. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, I rise in support of H.R. 4019, a bill to amend title 4 of the

United States Code to clarify the treatment of self-employment for the purposes of the limitation on State taxation of retirement income.

This bill makes technical and clarifying amendments to the legislation enacted in 1996 to restrict the ability of States to tax certain pension income received by their former residents and nonresidents who earned income in that State.

Virtually every State correctly interpreted the law to encompass all retired individuals as Congress intended, and adjusted their tax systems accordingly. However, after 10 years, at least one State has sought to promote an interpretation of the law at odds with congressional intent by taxing the retirement income of partners who no longer live in the State or who may never even have ever lived there.

H.R. 4019 clarifies and reiterates the policy Congress wrote into Public Law 104–95, that States are prohibited from taxing the retirement income of all nonresident retirees, whether the individual is a retired employee, partner or principal.

Mr. Speaker, this bill, which enjoys bipartisan support, merely restores fairness and the original intent of Congress by reaffirming that States should treat all retirees equally.

I urge my colleagues to join me in supporting this legislation.

Mr. Speaker, I reserve the balance of my time.

Mr. CONYERS. Mr. Speaker, I yield myself as much time as I may consume.

Mr. Speaker, I rise in support of H.R. 4019, and I support the measure which is intended to clarify current law that prohibits States from taxing the retirement income of any nonresident, whether the individual is a retired employee, partner or a principal, and says that the benefits reduction calculations under the bill include components from both qualified and non-qualified plans.

Now, since 1996, States have adjusted their tax system to reflect the policy and to allow several different interpretations. The policy would upset expectations and reliance upon the law. And what we are doing is eliminating that possibility. This would also, without this change, further confuse the tax system and certainly lead to unnecessary litigation.

It should be noted that the States affected by Public Law 104–95 have adjusted their tax schemes to comply with the law as they understood it. However, there is one State presently that construes the statute in contravention of the original intent, and if this State, New York, is permitted to implement its interpretation of the bill, other States may follow. This, in turn, would most definitely spur an unlimited amount of needless litigation. So it is essential that for consistency

and uniformity that this legislation be enacted.

We should note that neither the Federation of Tax Administrators nor the National Governors Association are opposing this clarification.

This clarification is needed to protect the current State taxation policies, and I am proud to support it and urge my colleagues to do as well.

Mr. CANNON. Mr. Speaker, I would like to thank Chairman SENSENBRENNER, Ranking Member CONYERS and Representatives WATT for their work and leadership on this legislation.

H.R. 4019 is a technical amendment to Public Law 104–95. This legislation clarifies that all retirees should be treated the same with regard to how States may tax retirement payments.

In 1996, Congress passed Public Law 104–95 to prohibit States from taxing the retirement income of nonresident retirees. Essentially, if retirees, most of whom are on fixed incomes, are not living in the State, then no State except the State where the individual resides should tax the retirees’ incomes.

After passage of the 1996 law, most States interpreted the law, as it was intended, to apply to all retirees, including employees and partners. One State, however, has recently taken the position that it can treat retired employees of a company and retired partners in partnership differently. This State’s interpretation is contrary to the original intent of the law and would allow for a State to tax the retirement payments of a person who retires from a partnership, no matter where that retiree is living. This was not the intent of Congress when the bill was passed, as was emphasized at our hearing by our former colleague Mr. Gekas, who was chair of the subcommittee when Public Law 104–95 was enacted. Congress intended for all retirees to be treated the same under the law, and H.R. 4019 simply clarifies that intent. States must treat all retirees similarly.

I have worked with the State tax administrators and crafted a manager’s amendment that passed the full committee by voice vote in order to alleviate their initial concerns, an appreciate their efforts in coming to the table to reach agreement.

I urge all of my colleagues to support H.R. 4019.

Mr. CONYERS. Mr. Speaker, I have no further requests for time, and I yield back the balance of my time.

Mr. SENSENBRENNER. Mr. Speaker, I have no further requests for time, and I yield back the balance of my time.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from Wisconsin (Mr. SENSENBRENNER) that the House suspend the rules and pass the bill, H.R. 4019, as amended.

The question was taken; and (two-thirds having voted in favor thereof) the rules were suspended and the bill, as amended, was passed.

A motion to reconsider was laid on the table.

RECESS

The SPEAKER pro tempore. Pursuant to clause 12(a) of rule I, the Chair declares the House in recess until approximately 6:30 p.m. today.

Accordingly (at 3 o'clock and 38 minutes p.m.), the House stood in recess until approximately 6:30 p.m.

□ 1830

AFTER RECESS

The recess having expired, the House was called to order by the Speaker pro tempore (Mr. PETRI) at 6 o'clock and 30 minutes p.m.

COMMUNICATION FROM THE HON. CHARLIE NORWOOD, MEMBER OF CONGRESS

The SPEAKER pro tempore laid before the House the following communication from the Honorable Charlie Norwood, Member of Congress:

U.S. CONGRESS,
HOUSE OF REPRESENTATIVES,
Washington, DC, July 17, 2006.

Hon. J. Dennis Hastert,
Speaker, House of Representatives, Washington DC.

DEAR MR. SPEAKER: This is to notify you formally, pursuant to rule VIII of the Rules of the House of Representatives, that I have been served with a civil deposition subpoena, issued by the Superior Court of Fulton County, GA, for documents and testimony.

After consultation with the Office of General Counsel, I have determined that compliance with the subpoena is consistent with the precedents and privileges of the House.

Sincerely,

CHARLIE NORWOOD,
Member of Congress.

ANNOUNCEMENT BY THE SPEAKER PRO TEMPORE

The SPEAKER pro tempore. Pursuant to clause 8 of rule XX, proceedings will resume on motions to suspend the rules previously postponed.

Votes will be taken in the following order:

H.R. 3085, by the yeas and nays;

H.R. 3496, by the yeas and nays;

H.R. 3729, by the yeas and nays.

The first and third electronic votes will be conducted as 15-minute votes. The second vote in this series will be a 5-minute vote.

TRAIL OF TEARS STUDY ACT

The SPEAKER pro tempore. The pending business is the question of suspending the rules and passing the bill, H.R. 3085, as amended.

The Clerk read the title of the bill.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from Arizona (Mr. RENZI) that the House suspend the rules and pass the bill, H.R. 3085, as amended, on which the yeas and nays are ordered.

The vote was taken by electronic device, and there were—yeas 356, nays 5, not voting 71, as follows

[Roll No. 375]

□ 1922

So (two-thirds of those voting having responded in the affirmative) the rules were suspended and the bill, as amended, was passed.

The result of the vote was announced as above recorded.

A motion to reconsider was laid on the table.

PERSONAL EXPLANATION

Mr. BOOZMAN. Mr. Speaker, I was absent from votes today, July 17, 2006, due to a delay in my flight back to Washington, DC. Had I been present, I would have voted in the following manner: H.R. 3085—"yea"; H.R. 3496—"nay"; H.R. 3729—"yea".

PERSONAL EXPLANATION

Ms. PRYCE of Ohio. Mr. Speaker, I was unable to vote during the following rollcall votes. Had I been present, I would have voted as indicated below:

Rollcall No. 375, H.R. 3085—To amend the National Trails System Act to update the feasibility and suitability study originally prepared for the Trail of Tears National Historic Trail and provide for the inclusion of new trail segments, land components, and campgrounds associated with that trail, and for other purposes, I would have voted "yea".

Rollcall No. 376, H.R. 3496—National Capital Transportation amendments Act of 2005, I would have voted "yea".

Rollcall No. 377, H.R. 3729—Federal Judiciary Emergency Tolling Act of 2005, I would have voted "yea".

PERSONAL EXPLANATION

Mr. BILIRAKIS. Mr. Speaker, I was unable to cast recorded votes on rollcall Nos. 375 and 377. Had I been present, I would have voted "yea" on both votes.

PERSONAL EXPLANATION

Mr. GREEN of Wisconsin. Mr. Speaker, I was absent from Washington on Monday, July 17, 2006. As a result, I was not recorded for rollcall votes Nos. 375, 376 and 377. Had I been present, I would have voted "yea" on rollcall Nos. 375 and 377. I would have voted "nay" on rollcall No. 376.

SNAKES IN THE GRASS

(Mr. POE asked and was given permission to address the House for 1 minute.)

Mr. POE. Mr. Speaker, in west Texas, rattlesnakes are king. They are deadly. They are poisonous. In the vastness of the heat, these snakes roam every town, every ranch. No place is safe, especially in the summer.

When their well-known rattle whistles through the air, it is a warning for all to beware. And if they bite you, you die. They still lock down their poisonous jaws on prey, ranging from people to cattle, inhabiting the snake-infested land. These snakes live among us and they kill us.

Mr. Speaker, Hezbollah is a snake in the grass, a terror ring funded by Iran, living beside the Israelis, slithering in the cloak of night, knowing no borders. Taking lives, claiming victims.

We have heard Hezbollah's rattle. Why are we surprised? A rattlesnake does not change. You cannot negotiate with one. The snakes of Hezbollah are terrorists, and Israel has every right to turn and fight now that they have heard the rattle and seen this sneak snake attack.

And that's just the way it is.

THE CRISIS IN THE MIDDLE EAST

(Mr. McDERMOTT asked and was given permission to address the House

for 1 minute and to revise and extend his remarks.)

Mr. McDERMOTT. Mr. Speaker, the question is, Does silence mean agreement?

The United States is the only superpower in the world; yet the President has been on the sidelines since the start of the Middle East crisis.

There are 25,000 Americans in harm's way in Lebanon, but the President has yet to reassure them, or us, that the United States is doing everything possible to protect our citizens and get them out of harm's way. A U.S. warship was ordered to sail out of the Port of Haifa. Why weren't U.S. helicopters flown in to evacuate Americans visiting Israel? And why are we only now flying helicopters into Lebanon to begin evacuating Americans?

The President had days to speak, but waited, and then let the G-8 nations issue a joint communique.

Why didn't this President dispatch the Secretary of State to the region immediately?

The United States must lead if there is any hope of restoring stability to the region. The President's silence is unacceptable. In the midst of this crisis, his silence is intolerable. He is AWOL.

REPORT ON RESOLUTION PROVIDING FOR CONSIDERATION OF H.J. RES. 88, MARRIAGE PROTECTION AMENDMENT

Mr. GINGREY, from the Committee on Rules, submitted a privileged report (Rept. No. 109-573) on the resolution (H. Res. 918) providing for consideration of the joint resolution (H.J. Res. 88) proposing an amendment to the Constitution of the United States relating to marriage, which was referred to the House Calendar and ordered to be printed.

PROTECTING FLORIDA'S MANATEE POPULATION

(Ms. GINNY BROWN-WAITE of Florida asked and was given permission to address the House for 1 minute and to revise and extend her remarks.)

Ms. GINNY BROWN-WAITE of Florida. Mr. Speaker, I rise in support of the bill H.R. 4075, the Marine Mammals Protection Act, legislation that protects a true wonder of nature, the Florida manatee.

Living in Florida's streams, swamps, and rivers, manatees are beloved throughout my district and especially in Citrus County.

The Marine Mammals Protection Act provides new and increased protections for the manatees from fishermen and from wildlife loss.

Chairman RICHARD POMBO deserves credit for bringing this bill up for a vote and helping to protect one of Florida's most precious natural resources.

Mr. Speaker, this legislation will provide grants and protections to help

ensure that Florida's sea cows will be around for my grandchildren, my great grandchildren, and everyone to enjoy years into the future.

There actually is a preserve in my area where the manatees, once they are injured, can go for treatment, and it is a wonderful, wonderful resource. Thankfully, the manatee has come back from being endangered.

THE U.S. RESPONSE TO THE CRISIS IN THE MIDDLE EAST

(Ms. JACKSON-LEE of Texas asked and was given permission to address the House for 1 minute and to revise and extend her remarks.)

Ms. JACKSON-LEE of Texas. Mr. Speaker, when you are home in your district, there are those who are looking at the crisis in the Middle East and asking what is the response of the United States. And, yes, of course Israel has the right to defend. But the President of the United States, the Executive, has the right as well to stand and call boldly for a cease fire.

We are the superpower of the world. We do have Americans in harm's way. I myself have students in the Mickey Leland internship program who are making their way back home from Israel.

What I would say is that this is a time for engagement. This is a time for drawing parties from the Arab states as well as Israel and others who would go into the Mideast, sit down in Jordan or other states that are surrounding the area, and actually have a confrontation, a meeting, an understanding, if you will, to bring some solution.

It is important for us to be in the way of saving lives. It is important for us to acknowledge the necessity of finding balance so that we can save lives.

Soldiers should be returned, but we should not ignore the opportunity for engagement. We must be in the Mideast. We must draw the parties together. We must find a solution. We must save lives.

□ 1930

SPECIAL ORDERS

The SPEAKER pro tempore (Mr. BOUSTANY). Under the Speaker's announced policy of January 4, 2005, and under a previous order of the House, the following Members will be recognized for 5 minutes each.

BLAZING GUNS

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Texas (Mr. POE) is recognized for 5 minutes.

Mr. POE. Mr. Speaker, news from the second front: The border war con-

tinues. It sounds like a scene from Lonesome Dove or some other western movie. Hundreds of shots were ringing out over the Rio Grande River, piercing the night for a period of minutes. But movie villains, this was not. These are real outlaws that are shrouded in darkness and shooting at Americans, just like in the old days.

The gunfire belongs to the border, the U.S.-Mexican border. Just last week, in the moonlight, was a scene of machine gun madness. It could have been a fatal barrage of bullets.

Last Wednesday night, Border Patrol and Hidalgo County, Texas, sheriff's deputies patrolling the Rio Grande River, the international border between Mexico and the United States, stumbled upon two boys from Mexico that were running from outlaws on the Mexican side. They had just raided their ranch and kidnapped their father and killed a ranch hand, so they were fleeing these criminals.

They were swimming to the safety of the United States. They were hiding in the cornfields of Mexico for several hours while machine gun carrying killers were looking for them.

But violence did not end on the Mexican side of the river where it started. The victims swam across the river to their escape into the hands of U.S. law enforcement officers. Seconds after stumbling on the boys, law enforcement officers on the border and sheriff's deputies were engulfed in a barrage of bullets.

The bad guys on the Mexican side of the border, these thugs who were lying in wait, would wait no more, and they decided to fire on American peace officers from their side of the river. As many as 10 men with machine guns turned their guns to fire 200 to 300 rounds of ammunition at law enforcement officers on the American side of the river.

Luckily, the Americans had built a levee on the American side, just like a fortress, and they were protected from these kidnapers who would shoot their automatic weapons as if they were on the Israeli-Lebanon border. Their bullets ricocheted off this dirt wall. The deputies dove behind it, but they never returned fire to the Mexican side.

This gang-style rural warfare you hear about on battlefields is in our own American backyard. In just the last year and a half, this is the fifth time Border Patrol has been shot at.

Former Texas Ranger Doyle Holdrige put it best. He said, "After dark on the Texas-Mexican border, it gets western."

You won't even normally find Hidalgo County deputies in that area of the border. Their sheriff doesn't allow them to go there. He said it is too dangerous to patrol that portion of the river. Instead, the sheriff only reacts to calls for help, spending the rest of the

time trying to make their presence known in neighborhoods that are in fear living on the border.

Sheriff Lupe Trevino says the Federal Government has left the gate wide open, allowing thugs, plain criminals, to do damage on the American side of the border. He says drastic cuts have washed away homeland security funding and drained funds from community policing from this border area in South Texas.

Sheriff Trevino says a lack of enforcement, lack of funding and lack of Federal support has left local authorities to stand by, while guerillas fire machine guns at them, invaders take over their neighborhoods and leave local law enforcement in harm's way while on border patrol.

Mr. Speaker, this shootout of 200 to 300 rounds barely made the news last week. We hear all about the border shootings on the Israeli-Lebanon border, but, Mr. Speaker, our government should be as concerned about the gunfire on our border as we are about blazing guns in the Middle East.

And that's just the way it is

IN SUPPORT OF ISRAEL'S RIGHT TO SELF-DEFENSE

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from New Jersey (Mr. PALLONE) is recognized for 5 minutes.

Mr. PALLONE. Mr. Speaker, I rise to express my support, my strong support, for the Nation of Israel as it exercises its right to self-defense in the face of terrorist attacks.

I am sure my colleagues are aware that back on June 25th, members of the Hamas terrorist organization attacked an Israeli military post outside the Gaza Strip. Two Israeli soldiers were killed and another was captured. Israel responded to this clear act of war with appropriate force, seeking the return of its soldier and an end to rocket attacks coming from the Gaza Strip. The violence continued, though, with Gaza-based terrorists firing a rocket into a high school in the city of Ashkelon.

Many of Hamas' top leaders have advocated the kidnapping of Israeli soldiers, including the Palestinian Foreign Minister, who said in March that Hamas should kidnap Israeli soldiers and exchange them for jailed Palestinian terrorists.

Of course, attacks on Israel from the Gaza Strip were just the beginning. Last week, Hezbollah terrorists attacked Israeli soldiers in northern Israel, killing eight and kidnapping two. They also began firing rockets on northern Israeli towns, including Haifa, the third-largest city in the country.

Israel again responded to this act of war by seeking to defend themselves. They entered Lebanon in an attempt both to rescue the kidnapped soldiers

and prevent Hezbollah terrorists from committing further acts against Israel. They also blockaded the country to prevent Iran and Syria from sending further supplies, arms, and terrorists into Lebanon to support Hezbollah's actions.

This weekend, however, with increasing attacks from Hezbollah, Israel officials are now warning civilians as far south as Tel Aviv to be on alert for rocket attacks. There is also word that Iranian Revolutionary Guard soldiers are in southern Lebanon, helping to train Hezbollah and equip them with new, longer-range missiles and rockets, so they can threaten more Israeli citizens.

Unfortunately, Mr. Speaker, world leaders have not solidly backed Israel's right to self-defense. While the Bush administration expressed support for Israel's actions, support for our ally in the Middle East has not come from all corners. In fact, last week the European Union criticized Israel's response as "disproportionate." I would like to know what the EU would think if one of their member nations were attacked by terrorists and the U.S. referred to their response as "disproportionate."

The EU has also condemned Israel for its air and sea blockade of Lebanon. That blockade is necessary, however, because we know that otherwise Iran and Syria would continue to funnel more and more weapons and personnel into southern Lebanon.

Mr. Speaker, on Friday I wrote to the current EU president to express my strong disapproval of the European Union's comments. I will include for the RECORD that letter.

The fact is, Mr. Speaker, that Israel has complied with international agreements, such as U.N. Security Council Resolution 425, by withdrawing from Lebanon. Unfortunately, the Lebanese Government has not held up its end of the bargain, failing to control southern Lebanon, rein in Hezbollah and support peace and security on their southern border, as required by Security Council Resolution 1559 from September 2004.

Hamas, meanwhile, called Hezbollah's actions "a heroic operation." Despite what many international observers thought might happen, Hamas is not acting like a responsible government. Instead, they are sticking to their roots as a terrorist organization, encouraging the sort of attacks that flared up in the recent violence.

Mr. Speaker, the international community needs to stand behind the State of Israel and support it as they defend themselves against terrorist attacks. I understand that tomorrow we are going to consider a resolution on the House floor that would express support for Israel and condemn the attacks by Hamas and Hezbollah, and I urge my colleagues in the strongest possible terms to vote for this resolution.

For the sake of the Israeli people and all residents of the region, I hope the current violence ends soon. But we must recognize Israel's right to defend itself and do what it must to end terrorist attacks against their soldiers and their people.

Mr. Speaker, I include for the RECORD the letter referred to earlier.

CONGRESS OF THE UNITED STATES,
HOUSE OF REPRESENTATIVES,
Washington, DC, July 14, 2006.

Prime Minister MATTI VANHANEN,
President in Office, Council of the European
Union, 1000 Brussels, Belgium.

DEAR PRIME MINISTER VANHANEN: I am writing to express my strong disapproval of comments made by the European Union (EU) and individual member nations in reaction to Israel's response to terrorist attacks against them.

As you know, on June 25 members of the Hamas terrorist group attacked an Israeli military post in southern Israel, killing two Israeli soldiers and kidnapping another, Cpl. Galid Shalit. In response, Israel took actions to try to rescue Shalit, end attacks against its citizens, and hold the Palestinian Authority responsible. It is well-known that top Hamas leaders, including Ahmed Jaabari and Jamal Abu Samhadna, helped plan the attack on the Israeli post.

Later, on July 12, members of the Lebanese-based Hezbollah terrorist group attacked northern Israel, killing eight soldiers and kidnapping two others. These actions came despite the fact that UN Security Council Resolution 425 requires Lebanon to reestablish its authority in the southern portion of the country and to work towards international peace and security along its border with Israel. In response, Israel has imposed an air and sea blockade on Lebanon and sought to reduce Hezbollah's ability to attack Haifa and other Israeli population centers.

Despite the fact that Israel has exercised past restraint and is now acting in clear self-defense to protect its people, the EU issued a statement criticizing Israel for a "disproportionate use of force"—comments echoed by French President Jacques Chirac and Spanish Prime Minister Jose Luis Rodriguez Zapatero. The EU also said that "the imposition of an air and sea blockade on Lebanon cannot be justified."

I find those comments to be misguided and unfair to Israel. In order to defend itself and its citizens from attacks on two sides, Israel has responded with the intent of ending the terrorist organizations' capacity to carry out further violence. The blockade is necessary to prevent further arms, military supplies, and terrorists from entering Lebanon and being used against Israel. It is widely known that Hezbollah has long been funded and aided by both Syria and Iran, and that assistance would continue during the violence if Israel were not to impose the blockade.

The United States has stood behind Israel and supported them as a democratic ally in a troubled region. It is disappointing to see that the EU does not seem to understand the need for Israel to defend itself against terrorist attacks.

I strongly urge you to reconsider your comments and instead issue a statement in support of Israel's right to defend itself.

Sincerely,

FRANK PALLONE, Jr.
Member of Congress.

RAISING AWARENESS OF AND FUNDING FOR RADIO AL MAHABA

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from New York (Mrs. MCCARTHY) is recognized for 5 minutes.

Mrs. MCCARTHY. Mr. Speaker, tomorrow the House will take up H. Res. 784, a resolution I introduced that honors Radio Al Mahaba, an Iraqi radio station that offers the Middle East's only programming for women. The station began broadcasting on April 1, 2005, as an educational tool for the women of Iraq.

Historically, Iraqi women were extremely well educated, but the educational oppression brought on by Saddam Hussein led to the illiteracy rate for women rising to 75 percent. Saddam's regime drove women back to confinement and the extremists restricted them with harsh rules and practices, mostly imported from Iran and Saudi Arabia.

After Saddam was ousted, the women of Iraq needed some way to reach out to all women nationwide, to talk to them directly and provide help.

Bushra Jamil, an Iraqi who was living in Canada, saw this as an opportunity to empower the women of Iraq as it transitioned to a democracy. Bushra returned home and created Radio Al Mahaba.

Once the station began broadcasting, the response from Iraqi women was astonishing. Radio Al Mahaba programs included news, call-in talk shows, covering various legal, health and educational topics, as well as music programs. The station became so popular that they were broadcasting 16 hours a day in three languages: Arabic, Kurdish and English.

While we take radio shows that cater to women for granted, this was a revolutionary concept in the Middle East. Women who had been oppressed for years were finally able to hear their side of the story. And Radio Al Mahaba provided a forum for women to make sure that their voices were heard.

The station received 100 calls a day from women asking questions, giving advice and voicing their opinions of how to rebuild their country. The radio station had found an audience, and they were financially in good shape as well from new sponsorships.

But last October, Radio Al Mahaba fell silent. The terrorist attack on the Palestinian Hotel in Baghdad destroyed their transmitter. And while the radio station was not the target of this attack, many leaders in Iraq were not all that upset that these women's voices were silenced once again.

But the women of Radio Al Mahaba were resilient. They found another transmitter, but it wasn't as powerful as the one they lost during the terrorist attack. The new transmitter could only reach about one-third of

their listening audience. And less listeners meant less sponsorship revenue for the station.

Unfortunately, the rented transmitter died about a month ago, and they are in desperate need of funds to get back on the air. Once they receive this funding, they plan to expand listening audiences to include all of Iraq and its neighbors. They also plan on broadcasting in Persian to reach the women of Iran, who have been oppressed for nearly 30 years.

If democracy in Iraq is going to succeed, women will have to play a role, a vital role, in making sure that it goes forward. The radio station can be the place for women in Iraq and throughout the Middle East to learn about the issues that will affect their lives. It allows them place to be heard without often violent consequences for the first time in their lives.

The right to educate yourself and to be heard are cornerstones of our democracy, and these characteristics should be carried over to the new Iraq.

At this point in Iraq's history, the station is in the midst of a battle. But not just a military battle, but also in the battle for Iraqi women's rights against fundamentalists.

The station's 28 full-time and part-time staff risk their lives every day to make sure that the voices are heard. Despite this terrible risk, they are all very dedicated because, in one of the staffer's words, "they want to reach out and touch people's lives. They want to give hope and knowledge, empowerment support and the passage of freedom to Iraqi women."

Mr. Speaker, I recently had a chance to talk to President Bush about this station and he was very enthusiastic about the role it will play in democracy in Iraq. It is my hope that the passage of tomorrow's resolution honoring the radio station will raise awareness and find funding for the station so they can continue their message of hope to the women of the Middle East.

A PARODY OF CONGRESS

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Oregon (Mr. DEFAZIO) is recognized for 5 minutes.

Mr. DEFAZIO. Mr. Speaker, something odd has happened. There are a lot of odd things that happen around here, but the Republican Web site, the one that they use for scheduling the weekly activities of Congress, has been hacked by writers for the John Stewart Show, and they don't seem to mind. So we are going to be a parody of Congress this week instead of a real Congress this week, despite the fact that we are borrowing \$1.4 billion a day to run the government, we are running a \$2 billion a day trade deficit, average families haven't seen their wages go up in 5 years, and we are raining tax cuts on the wealthy.

There are a few real things that we could deal with that the American people are concerned about. Maybe high gas prices. No, those things are not on the agenda. We have the faux agenda for Congress, which is designed purely for either entertainment purposes or for political purposes.

Well, what are we doing? We are taking up an amendment to ban the threat of gay marriage. Now, let's see. The Senate didn't pass it.

□ 1945

That means it is not going forward. But, nonetheless, the House is going to use valuable time to vote on banning the threat of gay marriage even though we know that the constitutional amendment cannot move forward because the Senate has already disapproved this venture.

But it is good for the ratings, entertainment value. The John Stewart writers thought it would be fun to bring that up in the House. So we are going to bring it up. Then we are going to do another thing here called "court stripping." We are going to say there are only two and a half branches of Congress, or maybe one and a half, the President and half a Congress, and the judiciary only if they are pets of the President and the Congress.

That is, no judge will be allowed to hear a case challenging the Pledge of Allegiance. Now, no judge has found the Pledge of Allegiance unconstitutional. Quite the opposite, they have found that the use of the words "under God" is de minimis in the Pledge and have upheld its use.

But the Republicans, they do not even want judges to hear those cases any more and reject those claims any more, because they think that this might provide entertainment value or excite some strange people in the Republican base. So we will spend a day on court stripping instead of dealing with high-energy prices.

Then we are going to take up two phony bills on a serious issue, stem cell research, could have tremendous benefits for the American people. The President is opposed to stem cells, the Republicans are opposed to stem cell research. The United States is falling behind the whole rest of the world.

Americans will have to go overseas to get procedures that have been developed by stem cell research that could cure Parkinson's or other debilitating diseases, because the Republican right wing does not want research on using stem cells, but the American public does want that research.

So we are going to take up two fake bills, two pretend bills. We are going to ban a practice that is not happening called fetal farming, and everybody will probably vote for that, and then we are going to authorize them to do what they can already on the President's lame program that is not work-

ing and is having America fall behind on stem cell research. So you see, we are really for stem cell research.

Well, not really, because the lines they are using are all corrupted and it is not going anywhere. And then the real bill, the real compromise bill that passed the House, it passed the United States House of Representatives, is going to probably pass the Senate this week. It will go to the President and he will veto it.

So in order to give them political cover or to provide entertainment value, they will vote on two fake stem cell bills, and then vote to support the President in vetoing the real stem cell bill that could provide tremendous advances in research for the American people.

So this is a sort of play Congress week. Maybe it was not the Stewart writers, maybe it was Colbert who was going through interviewing Members of Congress, and he might have gotten some of the data there.

But in any case, instead of dealing with very real problems that are confronting Americans, instead of dealing with world crises, instead of dealing with high energy prices, growing debt, stagnant wages, you know, access to better education for our kids, health care, high-cost pharmaceuticals, adequately funding veterans benefits, no, none of that is on the schedule this week.

This week we do not have time for those things because we are playing Congress taking up bills that are not going anywhere, or that are pretend bills that will go somewhere to cover up the fact that they are killing the real bill that would do something useful and also that, you know, we are taking up constitutional amendments that are not going to pass. Hooray for the Republican majority.

IS THE UNITED STATES BANKRUPT?

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Ohio (Ms. KAPTUR) is recognized for 5 minutes.

Ms. KAPTUR. Mr. Speaker, there are plenty of signs that the United States economy is not working well. One of the signs is our national debt. The latest figures show we are somewhere ever \$8 trillion in the hole, and every day the hole gets deeper. You would think someone here in Washington would pay attention.

Back in the year of 2000, as a result of major decisions made during the 1990s by the Congress, by then President Clinton, we were able to balance the annual budget and were actually paying down this enormous debt, the accumulated debt of the country.

So things do not look too good there, and the United States has to cover those borrowings by borrowing from

foreign interests. We know nearly half of U.S. debt securities are now purchased by foreign interests, and the United States is in hock, having to pay every year hundreds of billions of dollars in interest, interest to those foreign holders of our debt, interest we could be spending here at home; dollars we could be spending here inside the borders of the United States, rather than to those who are loaning us the money.

Another sign of our predicament is this, that is, the monthly and annual trade deficits of our country, where more imports are coming into our Nation, more and more and more every month, every day, every year, than we export out.

It is not that we are not exporting things. We are. But we are importing vastly more than we are exporting. In fact, the latest figures, compiled by the U.S. Census Bureau, indicate that in the month of May, the last month for which we have final figures, our goods and services deficit went up another \$63.8 billion in 1 month. In 1 month.

That means, if you look at these monthly figures of our trade deficit, more imports coming in here than exports going out, in January of this year, they surpassed the debt, the trade debt from last year, in February, in March, in April, and then in May. May was worse than April. Without question, this year will go down as one in which the United States will have amassed the largest trade deficit in history.

We are literally in uncharted waters, because when these goods are purchased in our country, those dollars that are then forked over for those goods go somewhere else. Go somewhere else. And then those countries, take China, for example, or Korea, any of the nations with whom, or Japan with whom we have huge trade deficits, have those dollars to spend. We do not have them to spend. They do.

So they are literally taking our earned assets, and they are trading them internationally. In fact, the State of Indiana just did something incredible. They made a decision to lease out the Indiana Turnpike to foreign interests. This is unbelievable.

This is unbelievable. So the poor State of Indiana, the taxpayers of that State that had paid off the bonds on the turnpike over 30 years ago are now in hock to Spanish and Australian investors for the next 99 years. Unbelievable.

It is like a fire sale. Chicago Skyway did the same thing. Leasing out a public asset to foreign interests. And then we not only owe them the annual interest payments; but our children and our grandchildren, you can just see the pieces of America being taken away because we are not paying our own way.

There was an article in a London paper, the Telegraph, the headline of

which is, "U.S. could be going bankrupt." And it is really talking about at what point do you officially declare bankruptcy. And it says, the United States is heading for bankruptcy, and research by Professor Laurence Kotlikoff for the Federal Reserve Bank of St. Louis said the United States is indeed bankrupt insofar as it will be unable to pay its creditors, who in this context are current and future generations to whom it has explicitly or implicitly promised future net payments of various kinds.

Certainly pension benefits, certainly health care benefits, all of those endangered because the Nation is in hock. We owe others. What is interesting about that Indiana turnpike deal is that the tolls have been doubled now. So the foreign interests to which the Indiana turnpike was leased out have now doubled the costs on the U.S. consumer. We do not have control of our own future until we get the trade accounts and our budget accounts in order.

Certainly the President ought to submit a balanced budget. Certainly this Congress ought to pass one. That has not happened during the Bush administration.

[From the Telegraph (UK), July 14, 2006]

U.S. 'COULD BE GOING BANKRUPT'

(By Edmund Conway, Economics Editor)

The United States is heading for bankruptcy, according to an extraordinary paper published by one of the key members of the country's central bank.

A ballooning budget deficit and a pensions and welfare timebomb could send the economic superpower into insolvency, according to research by Professor Laurence Kotlikoff for the Federal Reserve Bank of St. Louis, a leading constituent of the U.S. Federal Reserve.

Prof. Kotlikoff said that, by some measures, the U.S. is already bankrupt. "To paraphrase the Oxford English Dictionary, is the United States at the end of its resources, exhausted, stripped bare, destitute, bereft, wanting in property, or wrecked in consequence of failure to pay its creditors," he asked.

According to his central analysis, "the U.S. government is, indeed, bankrupt, insofar as it will be unable to pay its creditors, who, in this context, are current and future generations to whom it has explicitly or implicitly promised future net payments of various kinds".

The budget deficit in the U.S. is not massive. The Bush administration this week cut its forecasts for the fiscal shortfall this year by almost a third, saying it will come in at 2.3pc of gross domestic product. This is smaller than most European countries—including the UK—which have deficits north of 3pc of GDP.

Prof. Kotlikoff, who teaches at Boston University, says: "The proper way to consider a country's solvency is to examine the lifetime fiscal burdens facing current and future generations. If these burdens exceed the resources of those generations, get close to doing so, or simply get so high as to preclude their full collection, the country's policy will be unsustainable and can constitute or lead to national bankruptcy.

"Does the United States fit this bill? No one knows for sure, but there are strong reasons to believe the United States may be going broke."

Experts have calculated that the country's long-term "fiscal gap" between all future government spending and all future receipts will widen immensely as the Baby Boomer generation retires, and as the amount the state will have to spend on healthcare and pensions soars. The total fiscal gap could be an almost incomprehensible \$65.9 trillion, according to a study by Professors Gokhale and Smetters.

The figure is massive because President George W. Bush has made major tax cuts in recent years, and because the bill for Medicare, which provides health insurance for the elderly, and Medicaid, which does likewise for the poor, will increase greatly due to demographics.

Prof. Kotlikoff said: "This figure is more than five times U.S. GDP and almost twice the size of national wealth. One way to wrap one's head around \$65.9 trillion is to ask what fiscal adjustments are needed to eliminate this red hole. The answers are terrifying. One solution is an immediate and permanent doubling of personal and corporate income taxes. Another is an immediate and permanent two-thirds cut in Social Security and Medicare benefits. A third alternative, were it feasible, would be to immediately and permanently cut all federal discretionary spending by 143pc."

The scenario has serious implications for the dollar. If investors lose confidence in the U.S.'s future, and suspect the country may at some point allow inflation to erode away its debts, they may reduce their holdings of U.S. Treasury bonds.

Prof. Kotlikoff said: "The United States has experienced high rates of inflation in the past and appears to be running the same type of fiscal policies that engendered hyperinflations in 20 countries over the past century."

Paul Ashworth, of Capital Economics, was more sanguine about the coming retirement of the Baby Boomer generation. "For a start, the expected deterioration in the Federal budget owes more to rising per capita spending on health care than to changing demographics," he said.

"This can be contained if the political will is there. Similarly, the expected increase in social security spending can be controlled by reducing the growth rate of benefits. Expecting a fix now is probably asking too much of short-sighted politicians who have no incentives to do so. But a fix, or at least a succession of patches, will come when the problem becomes more pressing."

DROUGHT ISSUES IN SOUTH DAKOTA

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from South Dakota (Ms. HERSETH) is recognized for 5 minutes.

Ms. HERSETH. Mr. Speaker, I rise today to call to my colleagues' attention a dire and worsening situation developing in South Dakota and in several other States across the Great Plains. South Dakota is currently experiencing a severe, if not historic, drought; and it is getting worse.

Almost every week we are breaking records for lack of rainfall and high temperatures in communities across

the State. Keep in mind that South Dakota was one of the hardest-hit regions of the country during the Dust Bowl of the 1930s. We have seen droughts before, and this one may ultimately rank among the worst.

I have beside me the most recent Drought Monitor map released last Thursday. As you can see, a significant portion of central South Dakota indicated here on the map is considered in an exceptional drought, the most severe category the Monitor recognizes.

A considerably larger portion of the State is experiencing extreme drought, and 80 percent of the State is currently experiencing some drought today. Let me share some statistics with you. The ranching communities of Kadoka and Newell both experienced their second driest June on record. For the months of April and June combined, the communities of Timber Lake, Kennebec, and Faulkton experienced the driest conditions ever for those communities. And we have records going back more than 100 years.

The first 6 months of this year were the driest ever for Timber Lake. That community received 3.61 inches of precipitation for the entire 6-month period, a mere 35 percent of average. It also set an all time record temperature on Saturday of 112 degrees.

Also last Saturday, it was 116 degrees in Mobridge, South Dakota, a regional trade center, larger than the other towns I have mentioned. Mobridge, located near the North Dakota border along the Missouri River, it is a regional trade center, larger than the other towns that I mentioned. It had the driest 6 months ever recorded in that community, only 2.23 inches of precipitation over an entire half year.

This is less than 25 percent of their average rainfall. This is farm and ranch country and the effects have been devastating. Agricultural conditions are very dire and deteriorating. I have heard reports of ranchers completely liquidating their cattle herds as feed and water disappear. There is insufficient grass to get the entire herd through the summer; there is no hay to get these animals through the fall and winter. Wheat fields have burned up and hopes for a decent corn and soybean harvest are fading fast.

The record high temperatures of last week have come at the time that the corn is tasseling, a critical time for the crop. A farmer can lose up to 8 percent of yield a day under conditions of such severe stress. Conditions on the afternoon of July 15 on the family farm of one of the leaders of the South Dakota Corn Growers Association was 112 degrees in the shade, only 20 percent humidity, accompanied by 42 mile-an-hour winds. This in the center part of the State as well, but a bit more south and east.

Despite burn bans in many counties in the State, wild fires are becoming an

increasing problem as well. As just one example, on July 5, a prairie fire began near Wakpala, South Dakota, and it burned across 600 acres of grassland in 25 minutes.

The water level in Lake Oahe, the largest of South Dakota's four Missouri River reservoirs, continues to drop and is now only about 4 feet above the record low set 2 years ago. Unfortunately, the precipitation outlook is not good. According to Weather Service computer models and projections, there is no relief in sight. Any new rainfall is expected to be light and isolated, and temperatures are expected to be much warmer than average in the coming weeks.

The temperature in our State capital of Pierre on Saturday was 117 degrees, an all-time record temperature. The Climate Prediction Center's most recent drought outlook predicts that the current drought will not only continue; it will worsen in the Dakotas and may expand across eastern Montana, Minnesota, and parts of Iowa.

Unfortunately, compared to other natural disasters, drought suffers from some real public relations disadvantages. First, they do not get memorable names to personify them like hurricanes. They creep in slowly and quietly, and they don't destroy buildings or sweep away trees; they do not inundate cities.

In other words, they simply do not make for good video on the evening news. But the damage they wreak is just as real as any other natural disaster. Droughts devastate family farms and ranches, small businesses and local economies. Families and communities suffer the same kind of economic and emotional toll from droughts that are caused by other natural disasters.

The stress for families worsens as the cattle herd is sold and nonfarm or ranch employment is sought if any can be found in smaller rural communities.

□ 2000

Sometimes, such severe droughts even weaken the intrinsic optimism of the people who live and work and raise families in rural America. That is what is beginning to happen in central South Dakota today. Conditions there are truly devastating, and it is becoming increasingly clear that Congress must do something to address this situation.

Many other areas of the country are similarly affected and they deserve our attention and our assistance, just as much as do victims of hurricanes or floods or earthquakes or any other natural event that devastates economies and lives.

Mr. Speaker, I appreciate this opportunity to bring this situation to my colleagues' attention, and I look forward to working together to address this important matter.

10TH ANNIVERSARY OF THE CRASH OF TWA FLIGHT 800

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from New York (Mr. BISHOP) is recognized for 5 minutes.

Mr. BISHOP of New York. Mr. Speaker, today is the 10th anniversary of the tragic crash of TWA Flight 800, which took the lives of 230 men and women off the coast of Long Island, near my congressional district. It is important that we keep alive the memory of those who perished over the Atlantic just moments after departing for home or on a school trip or to visit loved ones, and we must do all that we can to safeguard the flying public against future disasters.

Just as importantly, the brave families of those who lost their loved ones during the Flight 800 disaster deserve our recognition, as do the emergency personnel, volunteers and neighbors who selflessly worked for days on end in the recovery efforts.

Like other challenging times our Nation has faced, the reaction to the Flight 800 catastrophe brought out the best not only in my constituents, but in so many others in the surrounding towns, States and across the Nation who joined in mourning the loss of so many lives and helped a community recover from its most horrific tragedy.

Throughout and despite their grief, the families of the victims worked tirelessly to build a permanent memorial with the help of Navy Seabees and thousands of dedicated local and building trade union members. Today this solemn monument serves as a constant reminder of our tremendous loss one decade ago.

The memory of the passengers of Flight 800 lives on because of the continued work of people who will always remember what happened. I have visited the site of the Flight 800 Memorial many times. The recent completion of the monument offers some measure of closure to everyone who was affected by this terrible tragedy.

In the 10 years since Flight 800, hundreds of thousands have visited the park in an acknowledgment of a shared sorrow for those who died. The monument ensures that future generations can do the same.

As we recognize the 10th anniversary of the Flight 800 disaster, it is important that we take stock of our progress in preventing air disasters over the last decade.

We have made some great strides in aviation safety, particularly, for example, with design upgrades for planes and an ongoing effort to mitigate fuel tank flammability, the cause of the Flight 800 crash.

But what haven't we done? Regrettably, we have not addressed the underlying cause of the Flight 800 explosion. The FAA has delayed taking on this challenge for years, and we still do not

have a final FAA directive that will protect every air traveler.

The cause of the Flight 800 catastrophe was determined years ago, and we know how to prevent similar disasters. We have the technology to protect against another tragedy like the one witnessed 10 years ago, but to date we still don't have the mandate for change.

Last year, I introduced H.R. 4174, the Transport Aircraft Fuel Tank Safety Act, which requires the FAA to retrofit all planes with new technology and to increase safety. In addition, I have recently petitioned the Transportation and Infrastructure Committee to hold hearings on the safety of fuel tanks on airplanes and get to the bottom of why we don't upgrade all planes with the necessary technology.

I am hopeful that my colleagues here in the Congress will work with me to bring an end to this delay. With the completion of the Flight 800 monument, we have taken significant steps towards maintaining the memory of Flight 800, but we should also ensure that we don't have another Flight 800.

I would like to offer my deepest condolences to the surviving families and friends of the victims of Flight 800, and to commend them on the grace and dignity with which they handled unspeakable pain.

TAKE IMMEDIATE ACTION TO WITHDRAW OUR TROOPS FROM IRAQ

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Missouri (Mr. CLAY) is recognized for 5 minutes.

Mr. CLAY. Mr. Speaker, I rise to address the House for 5 minutes.

Mr. Speaker, as a member of the Out of Iraq Caucus, I urge this administration to take immediate action on a plan to withdraw our troops from Iraq. The American people were misled into this war, and they want the leaders of this Nation to take responsibility and end this war now.

I was among those who opposed the tragic decision to launch this war. I warned that the invasion and occupation of Iraq would plunge us into a bloody quagmire of violence that would only intensify the instability in the Middle East and leave our own Nation less secure and less able to protect our national interest.

The sad truth is that all the grimmest predictions have now come true. Today, the Taliban are mounting a major comeback in Afghanistan. Iran is on the verge of producing a nuclear weapon. Somalia is dominated by an al Qaeda-inspired militia, and the Hezbollah has attacked Israel. In return, Israel has attacked Lebanon. Here at home, our Nation is at risk.

As fundamental recommendations of the 9/11 Commission remain unfulfilled,

those who still support the Iraq war often claim it has made this Nation a safer place, that it has kept away the terrorists and stopped another 9/11 tragedy.

Unfortunately, such wishful thinking is only an effort to justify the horrendous human suffering that we have caused by this misguided mission, an effort to justify a war that was never properly planned and executed, a war that has wounded thousands and cost the lives of 2,547 American soldiers.

The human toll of this war is still climbing, and throughout the world terrorism is on the rise. This administration talks a lot about national security, but without doing anything about it.

Those in Congress know the war in Iraq has made America a more vulnerable Nation. Congress is appropriating millions and millions of dollars on homeland security projects. The U.S. Capitol complex is saturated with security, and certainly no one in this body behaves as if the war in Iraq has made our Nation safe from terrorism.

In fact, the Iraq war has only inspired terrorism. Democracy is not flourishing in the Middle East, and the costs of the Iraq war and our global antiterrorist operations will top \$500 billion next year.

It is time to bring our troops home and to devote our resources to protecting the American people.

SUPPORT ISRAEL IN THE WAR ON TERRORISM

The SPEAKER pro tempore (Mr. REICHERT). Under a previous order of the House, the gentleman from New York (Mr. ENGEL) is recognized for 5 minutes.

Mr. ENGEL. Mr. Speaker, today I was proud to be one of the speakers outside the United Nations in New York at a huge rally in support of Israel. It was attended by tens of thousands of people and showed strong support for the people of Israel as they struggle against terrorism. I would hope that later on this week there will be a resolution on the House floor to once again show Congress' bipartisan support for Israel.

Mr. Speaker, Israel's fight against terrorism is our fight. The war on terrorism is our war. It is everybody's war. We need to support Israel in this time of struggle. It makes no difference whether terrorists drop bombs on Haifa or send planes into the World Trade Center or blow up innocent commuters on their way to work in India or London or Madrid, or blow up people in hotels in Bali and other places.

Terrorism is terrorism, and those of us who think that terrorism is only over there are certainly kidding themselves. Terrorism is everywhere, and the only way to stomp out terrorism is to show a resolve and to get the job

done by defeating terrorists. That is precisely what Israel is trying to do.

Let us remember who started this war. Israel pulled out of Lebanon 6 years ago, so there is no pretext of any occupation. There is no pretext of anything other than the fact that terrorists would like to destroy democratic societies such as Israel, and Israel remains the only democracy in the Middle East.

These terrorists want to destroy the democratic way of life, not only in Israel, but in America and all other democracies of the world. That is why Israel's fight is the fight of all decent nations, including the United States of America.

These terrorists want to destroy life. Israel is standing up to them and saying enough is enough. We should let Israel finish the job.

Israel wants to knock out the terrorist group Hezbollah for good, so they can never return to south Lebanon and threaten Israel's communities from the south of Lebanon on the northern border with Israel. We should let them do that because the status quo is not acceptable. We have already heard words from the naysayers telling Israel to use restraint.

Mr. Speaker, I don't believe that we can use restraint, or that Israel can use restraint, or that any country can use restraint towards terrorists that are out to kill them and us. We should let Israel finish the job.

Let us remember how this started. The terrorists came down from Lebanon, raided Israel, went on Israeli territory, killed Israeli soldiers, captured a couple of them, took them across the border. That is how it started.

Imagine if this had happened to us, if someone came from the Mexican border or the Canadian border, attacked U.S. soldiers on U.S. soil, killed some of them and then took them back over the border.

Mr. Speaker, we would be just as outraged, and we would have every right to go after those terrorists. That is what Israel is going to do.

Hezbollah is a terrorist organization. It is fighting a proxy war for Iran and Syria. Iran and Syria lurk behind this. Iran and Syria are the biggest supporters of terrorism.

A couple of years ago, this Congress passed and the President signed the Syria Accountability and Lebanese Sovereignty Restoration Act. I wrote that act. I was the lead sponsor of that act, along with my good friend, Congresswoman ILEANA ROS-LEHTINEN. That act slapped sanctions on Syria for the first time in history.

President Bush has only implemented some of the sanctions in that act, and I call on the President to now implement all of the sanctions on the act. Now is the time. Now we have to show Syria and other countries that

support terrorists that we are resolved to defeat terrorism.

I was very happy when the United States vetoed the one-sided resolution at the United Nations, once again condemning Israel, once again discrediting the United Nations. The United States needs to be steadfast in support, and this Congress needs to do so as well.

So in conclusion, let me say I look forward to a resolution later on in this week. The United States needs to stand by its friend, Israel, and Israel needs to stand by its friend, the United States, and all peace-loving and democratic nations in the world ought to stand shoulder to shoulder firmly against terrorism. Because if terrorism is not contained in one area of the world, it surely will come to every other area of the world.

THE U.S.-OMAN FREE TRADE AGREEMENT

The SPEAKER pro tempore. Under the Speaker's announced policy of January 4, 2005, the gentleman from Pennsylvania (Mr. ENGLISH) is recognized for 60 minutes as the designee of the majority leader.

Mr. ENGLISH of Pennsylvania. Mr. Speaker, tonight we rise at a time when people all over the world are watching the Middle East, are watching the bombs that have lit up both Israel and Lebanon, are watching the troop movements and are hoping earnestly for peace.

□ 2015

Certainly the support of Israel is going to be loudly and consistently articulated in this Chamber this week, but we also have an opportunity to do something substantive, to improve our engagement with the Middle East in the coming week.

This week, we have an opportunity to vote on a substantive agreement which will bring one of the nations of the Middle East closer to the United States, promote economic opportunity and integration in the region, and lay the groundwork, in my view, for closer ties between the United States and some of our key partners in the Middle East and one in particular.

With that in mind, Mr. Speaker, I rise tonight as cochairman of the Middle East Economic Partnership Caucus, and I expect to be joined by a couple of my other cochairmen, to talk tonight about the benefits of the U.S.-Oman Free Trade Agreement, which we expect to be voted on in the House this week.

At a time when there is great instability in the Middle East, at a time when we are concerned on how the Middle East affects our homeland security, at a time when we want to do something positive to create economic opportunities in a region where the lack of them has spawned terrorism, this is a small, but important, opportunity.

The Middle East, we believe, is increasingly becoming economically integrated with the West, and if we want to fight the root causes of terrorism, we should be encouraging that. It is critical that now, more than ever, we encourage this integration to promote closer ties, democracy and social liberalization through a process of economic interaction and close cooperation.

In recent years, America's dialogue in the Middle East has been deepened by the addition of bilateral and, ultimately, strongly bipartisan free trade agreements, first with Israel, then with Jordan, then with Morocco and, most recently, with Bahrain.

The U.S.-Oman FTA, slated for a vote in the House Chamber this Thursday, largely builds off of the successful model that was set by the U.S.-Bahrain FTA, further supporting openness and stronger ties between the U.S. and the Middle East and the Maghreb regions.

Over the past year, Oman has clearly demonstrated a powerful commitment to this agreement and closer relations with the West, both in terms of its political will and institutional resources, making significant strides in improving its labor practices and opening its markets and being accountable for intellectual property issues and cracking down on intellectual property violations.

In numerous communications with our U.S. trade Representative, Omani leaders have promised to take a number of concrete steps by October 31, 2006, to build on the strong labor reforms already implemented, and in my view, as a member of the Trade Subcommittee who has closely followed this process, Oman has come further than virtually any other country we have ever engaged in this manner in dealing with core labor issues. Their commitment shows Oman's determination to address all concerns, while respecting the rule of law and its legislative processes.

In addition, all of these commitments are fully verifiable because Oman has agreed to have all of them reviewed under the FTA's labor consultation mechanism. The U.S.-Oman Free Trade Agreement provides one of the highest degrees of market access of any U.S. free trade agreement to date and accounts for a substantial market access across Oman's entire services regime.

This agreement will make 100 percent of U.S. imports and exports and consumer and industrial goods duty free on the day the agreement enters into force. It also provides duty free treatment to 87 percent of our agricultural exports from day one. In terms of being accountable for intellectual property rights violations, Oman has agreed to criminal standards for copyright infringement and stronger remedies and penalties. It will increase criminal and

civil protection against unlawful encoding of satellite TV signals and criminalize end-use piracy, providing strong deterrence against piracy and counterfeiting.

This is just a small sample of some of the benefits of the U.S.-Oman FTA, and this agreement is far more important than the small market that Oman would suggest.

We recognize that Oman is a small place. It is probably the equivalent, in terms of purchasing power comparability, of entering into a free trade agreement with our own North Dakota, but it is extremely significant because it is a part of a much larger Middle East puzzle. It is part of a region that we expect, in coming years, to build much closer ties with, and the Oman agreement, as it has been laid out and as their government has agreed to embrace, is a very strong model for going forward with future agreements in this region.

The U.S.-Oman FTA is, after all, a comprehensive and high-standard agreement. High standards are provided for including comprehensive protection for intellectual property rights, government procurement transparency, and trade facilitation. Developing a high-quality FTA with Oman will establish a high standard for all of the other Gulf Cooperation Council Members and set a very high standard for them to meet.

Consequently, the FTA represents a significant benefit to U.S. trade that extends well beyond those benefits that currently exist in Oman. The FTA establishes a secure, predictable, legal framework for U.S. investors in Oman and includes high-standard legal protection for their model on U.S. legal principles, such as substantive due process and the ability to comment on proposed laws and regulations.

Mr. Speaker, the FTA also creates and expands opportunities for U.S. goods and services. This FTA will broaden and strengthen the bilateral, commercial relationship between the United States and Oman beyond the approximately \$748 million generated in two-way trade during 2004. One hundred percent of this bilateral trade in consumer and industrial products will become duty free under this agreement.

The U.S.-Oman FTA will build upon the trade and investment framework agreement signed between our two countries on July 7, 2004, and will spur continued growth of U.S. direct investment which in 2003 was \$358 million, a substantial increase over the previous year. In addition, the FTA will increase the competitiveness of U.S. exporters and service providers in the Omani market, providing for an increased market share for U.S. manufacturers and service providers. In 2004, U.S. goods exports were \$330 million, up 2.3 percent from 2003.

Oman, in my view, is a likely market for U.S. oil and gas equipment and services, transportation equipment, water and environmental technology, medical equipment, electrical and mechanical equipment, power generation and transmission equipment and services, telecommunications equipment and services, franchising, and U.S. poultry and beef. In each of these areas, we potentially will get a leg up on our foreign competition.

At the same time, Mr. Speaker, the FTA will encourage greater political and economic reforms. It is worth remembering that in 1997 Omani laws were enacted guaranteeing Omani women equal rights in both education and employment. Women have the right to vote and run for office in consultation council elections, which are held every 4 years.

In 1992, in an attempt to balance growth on its non-oil sector with concern for its natural resources, Oman developed a national conservation strategy, which was subsequently approved by the Council of Ministers and spells out the need and procedures for incorporating environmental considerations in the development plans.

In 1994, Oman became a member of the International Labor Organization, the ILO, and has satisfied various labor-related accession requirements for membership to the WTO.

In 2003, it is worth noting the government adopted its first comprehensive labor law that allows workers the right of association and to pursue labor disputes in court. That law abolished the 1973 prohibition on the right to strike. This is a radical move in a part of the Arab world where labor rights is increasingly an important movement.

The U.S.-Oman FTA advances modernization programs, implemented by Sultan Qaboos. In accordance with its accession to the WTO in 2000, Oman announced its intention to eliminate mandatory shelf life standards for shelf stable foods and to adopt internationally recognized CODEC standards for the labeling of prepackaged foods.

Additionally, as part of its WTO accession, Oman has adopted derogations to the Gulf Cooperation Council patent law to comply with its obligations under the TRIPS agreement, and has committed itself to begin negotiations to join the WTO agreement on government procurement.

In 2004, Oman removed its temporary ban on imports of U.S. poultry and poultry products, moving ahead of some of our other trading partners.

We need to recognize, Mr. Speaker, this agreement also provides support for an important strategic ally in the war on terrorism. This, I think, is as strong a reason to support this agreement as any.

The United States has maintained relations with the sultanate since the early years of American independence,

and that friendship has grown over time. Oman supported the 1979 Camp David Accords and was one of three Arab League states that did not break relations with Egypt after signing the Egyptian-Israeli Peace Treaty in 1979.

In April of 1994, Oman hosted the plenary meeting of the Water Working Group of the peace process, the first gulf state to do so.

Oman occupies a strategic position on the Strait of Hormuz at the entrance to the Persian Gulf. Following the Iranian revolution and the Soviet invasion of Afghanistan, Oman was the very first of the gulf states to formalize defense ties with the U.S. Oman has been a party with the U.S. to a military cooperation agreement since 1980, which was recently renewed in 2000. May I say, Mr. Speaker, when I joined a delegation that went to Oman just a year ago, I was very impressed by the commitment of Sultan Qaboos, as he articulated it to us, to continue and to strengthen this relationship.

It is worth noting that the Oman-U.S. Facilities Access Agreement has provided crucial support to the protection of Kuwaiti tankers in 1987. In 1988, during the Persian Gulf crisis, Oman assisted the U.N. coalition effort. Military bases in Oman were used in 2001 by U.S. coalition forces involved in ground raids against both the Taliban and Afghanistan and against Osama bin Laden.

The U.S.-Oman FTA, in other words, in my view at least, is a key building block toward building a broader set of economic relationships in the Middle East that can encourage economic growth. It is consistent with the 9/11 Commission's observation and recommendation, and here I quote: "that the U.S. Government has announced the goal of working toward a Middle East trade area. A comprehensive U.S. strategy to counterterrorism should include economic policies that encourage development, more open societies and opportunities for people to improve the lives of their families and to enhance prospects for their children's future."

This important statement by the 9/11 Commission I think is consistent with moving forward this week to approve this Oman FTA.

□ 2030

Mr. Speaker, in assessing the impact of the Oman FTA, I have done a lot of research and I have tried to, I think, come up with an honest assessment of how this free trade agreement will affect our balance of trade.

As the Speaker well knows, I have spoken here many times about my concern about our large trade imbalance, about the fact that we are running a record trade deficit, and I am happy to say that my research suggests that the U.S.-Oman FTA will be a move in the right direction, if adopted. This FTA builds upon a well-established and re-

ceptive market for U.S. goods and services.

In 2005, U.S. exports were \$593,000,000, up significantly from 2004. And again, I would note that 100 percent of bilateral trade in consumer and industrial products will become duty-free effective immediately on passage of this agreement, creating a substantial market in that part of the Middle East for our exports beyond what we have already.

Additionally, this FTA benefits key U.S. export and service sectors such as the banking, securities, audio visual, express delivery, telecommunications, computer and related services, distribution, health care, insurance, construction, architecture and engineering sectors.

This agreement, as I have noted before, also contains tough intellectual property rights provisions to enforce strict antipiracy and counterfeiting laws. While we continue to call for an ambitious outcome of the negotiations of the WTO-Doha Development Round, we also recognize that it is important that we go forward with bilateral agreements such as the Oman agreement.

The passage of this FTA would send a strong signal to the world that the U.S. is going to continue to be a leader on trade policy, and that we were committed to opening a very important additional beachhead in the Middle East.

I think that when I talk to people in northwestern Pennsylvania, an area where we export a lot of manufactured goods, people want to know if this or any other new FTA has the potential to create future trade imbalances. I think it is particularly instructive that the U.S. International Trade Commission has done a study of the Oman FTA, and I would like to read from a part of the executive summary.

The finding of the ITC was as follows: The U.S.-Oman FTA will likely have a small but positive impact on the U.S. economy. The benefits will likely be moderated by the relatively small size of Oman's economy and Oman's share of U.S. trade. Oman accounted for less than .5 percent of total U.S. goods trade in 2004. The trade and welfare effects of tariff elimination on trade and goods will likely be negligible, reflecting not only the small volume of trade between the United States and Oman, but also the low tariffs on current bilateral trade. Tariff liberalization under the FTA will likely have little effect on the U.S. economy, industry and consumers because U.S. imports of most goods from Oman already enter duty-free or at low duty rates. Tariff liberalization will likely have a greater effect on U.S. imports of apparel from Oman, albeit from a small and diminished 2005 base. As such, the expected increase in U.S. apparel imports from Oman will be small in absolute value and quantity terms. In addition, the resulting increased annual levels of U.S.

apparel imports from Oman will likely remain below the 2004 level of U.S. apparel imports from Oman. Most of the expected growth in U.S. apparel imports from Oman will likely displace U.S. apparel imports from other countries rather than domestic production.

Continuing, the FTA will likely increase export opportunities for U.S. firms when Oman immediately removes its uniform tariff of 5 percent ad valorem on U.S. goods and as it phases out its other tariffs on U.S. goods. The 5 percent tariff applied to 91 percent of U.S. exports to Oman in 2004. These exports consist mostly of machinery, transportation equipment, and measuring instruments. The FTA will also likely increase opportunities for U.S. providers of services through improved market access and greater regulatory transparency. For example, the FTA will liberalize provisions affecting trade in insurance services as well as banking and securities services such as asset management services.

So I think the point here, Mr. Speaker, is that this is a great opportunity for us, not a great threat, but is also an opportunity, I think, for closer economic engagements in the Middle East.

With that, I would like to yield to the gentleman from Wisconsin, Mr. RYAN, who is cochairman of our caucus, for such time as he may consume.

Mr. RYAN of Wisconsin. I thank the gentleman for yielding. I just want to congratulate the gentleman for all his leadership on this issue. And I too want to come to the floor of the House of Representatives to talk about how important this Oman trade agreement really is and how it fits in the whole scheme of things with respect to our strategy for the Middle East.

Now, a lot of people are paying attention to the Middle East. We watched over the weekend all of the awful things that are happening in Israel and southern Lebanon, and we realize that if we are to win the war on terror, we have to look at a short-term strategy and a long-term strategy. And when I think about the things we want to accomplish with the Middle East and with moderate Arab countries, democracy. Democracy and freedom and individual rights are the ultimate, the ultimate weapon against terrorism. When a young person grows up into a closed society with no opportunity to reach his or her destiny or his aspirations or dreams, they are going to be more susceptible to the likes of al Qaeda. They are going to be more susceptible to joining into some kind of a perverted ideology that can convince a young man or a young woman to strap on a suicide belt and go into a pizza parlor and blow themselves up. But people growing up in free societies, in democracies, are people who have a chance to reach their aspirations, to channel their energies to better themselves and their families. By growing up in a free

society, that is how we can ultimately make sure that our children aren't fighting the war on terror that we are fighting, aren't confronting the kind of awful terrorism we are confronting.

Why does anything that I just said have anything to do with the Oman trade agreement? Well, here, Mr. Speaker, is what it has to do with the Oman trade agreement. With these trade agreements, we don't get just lower tariffs for corn and soybeans and cars and plastics; with these trade agreements, we get good government. With these trade agreements, we get these countries who voluntarily change their rules and their laws to be more free and open to their own people. By engaging in a trade agreement with the United States of America, a country in the Middle East such as Oman, embraces the rule of law, embraces enforceable contracts, individual rights.

Let me just go through a few of the things that Oman has agreed to as a consequence and as a part of this free trade agreement.

Political reforms. Oman has enacted reforms to increase public participation in government, extending voting rights for its consultative council to all citizens over the age of 21, and appointing women to key positions in its government, including the first female Ambassador from an Arab country appointed to serve in the United States. Oman is a leader in women's rights. Oman is a leader in suffrage so that women are treated more equally in the Arab Gulf.

Economic reforms. Oman has enacted broad economic reforms to open itself to trade and investment and provide opportunities to its citizens. In fact, the economic freedom of the world 2005 ranks Oman 17 of 127 countries analyzed in terms of economic freedom. They are the second highest ranking among all countries in the proposed Middle East free trade area.

Labor reforms. This is where a lot of progress has been made. Oman has unilaterally, across all labor laws, through decrees and commitments, upgraded their labor standards for their workers, for their employees, for their citizens to at least the ILO core standards. This is the strongest labor agreement, trade agreement, we have ever had with the free trade agreements with the United States.

Mr. ENGLISH of Pennsylvania. Will the gentleman yield for a moment on that point?

Mr. RYAN of Wisconsin. I would be happy to yield.

Mr. ENGLISH of Pennsylvania. Because the gentleman really was, on the floor, our leading not only advocate for but expert on the Bahrain FTA, comparing this free trade agreement and the commitment the government has made on top of it at a time certain, to the agreement made by Bahrain, how does this compare in strength?

Mr. RYAN of Wisconsin. This exceeds the Bahrain agreement because, like Bahrain, Oman agreed not only to the core ILO, International Labor Organization standards and worker rights, but with the Bahrain agreement, Bahrain simply agreed to introduce legislation to their Parliament and then try to pass the legislation, upgrading their labor standards.

Oman went beyond that. Oman agreed to decree, to put these into law. So not only, with Bahrain we got the promise to propose legislation; in Oman we got the law. We got the changes. Changes are taking place right now as we speak. Some changes took place last week. All of the labor standard increases will take place by October 30 of this year. So the fact is with Oman, because of the negotiations of the free trade agreement, we are rising the tide of worker rights. We are rising the quality and openness of this society. We are looking at an ally who has been a tremendous ally in the war on terror. They have ended their Israeli boycotts. They have opened up and are opening up trade with Israel. They are giving women unprecedented rights relative to other Arab countries. And all of this is being done because of trade agreements.

We didn't send a division of soldiers to Oman. We didn't parachute the 82nd Airborne into Oman. We didn't fire a bullet. We didn't put a boot on the ground. We engaged in trade negotiations and trade agreements, and this democratization, this openness, this free economic model, is being embraced by the Omanis because of these trade agreements.

So what we are accomplishing here is the single most important aspect of our war on terror, the single most important aspect of making sure that our children are safe from a world of terror when they reach our age group, when they come of age; and that is, making the Middle East more free, more democratic, more open, so that young people growing up in these countries will have opportunities to pursue their dreams, to pursue their aspirations, to determine the direction of their own lives.

That, in a nutshell is why these agreements are so important in the Middle East. That is why this particular agreement with Oman is so important to pass because of all of the wonderful things they are doing to help their own countrymen, to open up their society, to liberalize their economy, to give people individual rights in their economy so they can reach those dreams, all with an agreement that is in our best interest economically.

It is good for our jobs. We will sell more of American-made equipment. We will sell more American-made agricultural products. We will get more jobs out of the deal, and they will get closer to a much more open society. That, Mr.

Speaker, is what I call a win-win situation. That is why I think it is so important that we take all of these wonderful reforms that they have enacted and pass the rest of these into law by implementing this Oman Free Trade Agreement, because it is good for Omanis, it is good for Americans, and it is, most importantly, good for keeping democracy alive in the Middle East, keeping freedom alive, and keeping terrorism at bay.

Mr. ENGLISH of Pennsylvania. Will the gentleman yield again?

Mr. RYAN of Wisconsin. I would be happy to.

Mr. ENGLISH of Pennsylvania. On that point, I think it is important that the listeners and our colleagues understand some of the labor standards that are being implemented here. We are talking about a commitment by Oman to strengthen collective bargaining laws, to protect the right to strike, to ensure the reinstatement of wrongly dismissed workers, to allow multiple union federations, to ensure adequate penalties for antiunion discrimination, to end the government involvement in union activity and to do things like strengthen efforts against child labor that have been such a blight in that region.

Oman, at a stroke, is taking a real leadership role in moving forward in this area that is going to set this up as a modernizing government and as a modernizing society that really is going to be a good example in the region. And I wonder if the gentleman agrees with me that this breakthrough by Oman is something not only important for us to sustain in terms of our economic opportunities, but also, I think, fulfills part of our role as a liberalizing force in the world and setting the right sort of example in the Middle East.

□ 2045

Mr. RYAN of Wisconsin. I will. And if the gentleman will yield, I just want to read a quote from the 9/11 Commission report which talked about these FTAs, and the 9/11 Commission which revealed what should America do to win the war on terrorism to make Americans safer again. They said a "comprehensive U.S. strategy should include economic policies that encourage development, more open societies and opportunities for people to improve the lives of their families and enhance the prospects of their children." That is why we should engage in these FTAs, these free trade agreements in the Middle East.

This new breakthrough from Oman on all these higher labor standards that they are raising is precedent setting. It does encourage its neighbors just like Bahrain is now engaging in. It encourages their neighbors to increase not only their standards of labor for their citizens but to increase their citi-

zens' access to prosperity, access to opportunity, access to bettering their lives for themselves. That is what is accomplished by seeing this dialogue take place. That is what is accomplished when we as Americans engage in mutual economic agreements like this.

The thing that also impresses me with the Oman Free Trade Agreement, just like we had with Bahrain and Morocco and others, is our governments are getting to know each other much better. Because we are involved in a global war on terrorism, it inevitably involves a strong level of dialogue between the United States Government and the United States Congress and the governments and the leaders of those countries. But what we are lacking is human-to-human interaction, people-to-people interaction, understanding of the American people, of the citizens of Oman, the citizens of Bahrain, the citizens of Middle Eastern countries.

That is what trade accomplishes. Trade brings people together. Trade brings people into engaging in mutually beneficial endeavors, the people of America, farmers, manufacturers. We make tractors, Case Construction Equipment in Racine, Wisconsin. We sell cheese. We grow corn and soybeans, General Motors cars. We want our people to go to these countries and understand them, know them, sell them their products and have people-to-people interaction. And if we have people-to-people interaction through trade, through business agreements, through business arrangements, then we have better understanding of one another. And better understanding of one another, better friendships will bridge the gaps between cultures. That will help us fundamentally understand what is going on in the Middle East, and it will help them understand us.

My biggest fear is that people in the Arab world, they call it the infamous "Arab Street," that they will look at al Jazeera or VH1 or some distorted lens of what Americans stand for, of who Americans are, of what American culture is, and that is how they will frame their opinions. That is not what I want them to think America is all about. What I hope people in the Arab world think America is all about is by meeting an American, is by meeting somebody from America who can engage in an agreement of mutual economic behavior, who can engage in trade, who can sell corn and soybeans and things like that.

That is how we help bridge this gap, bring understanding of each other, and work together to fighting the war on terror. By bringing moderate Muslim countries in allegiance with us and growing our alliances and growing our strategic allies, we will help defeat the terrorists. The minority of Islamic fundamentalists in this part of the world that seek to do them and us harm, we

can work together and defeat that. And what the best consequence of it at the end of the day is people become more prosperous. There are more jobs created at both sides of the ocean, both sides of the equation.

That is why I think this is such an important trade agreement, and that is why this is an important part of our continuing efforts to increase ties and economic engagement with countries in the Middle East. And this is, of all things, one of the most successful foreign-policy tools we have at our disposal, and it is a sign of respect. It shows these countries, Oman in particular, that we respect them. We respect their people. We respect their leaders. We respect the reforms that they are implementing to give their people more freedom. That is a sign of respect, and I think with respect you get better understanding, better allies, and better strategic alliances, and that is all to the good.

I just want to thank the gentleman from Pennsylvania for having this hour to discuss this. We will be voting on this in a couple of days, and this is yet again a very, very important piece of our foreign policy and our economic policy to create more jobs here and to make us more safe. And I just want to thank the gentleman for having this discussion tonight.

Mr. ENGLISH of Pennsylvania. Mr. Speaker, I want to thank the gentleman for coming forward and so vividly presenting on the floor a positive vision of how we can engage the Middle East, how we can help them create opportunities, and how we can offer a positive agenda for fighting Islamofascism by getting at its root causes, by creating economic opportunities for young Arab men, by creating economic opportunities for these communities at a time when, in lieu of those opportunities, increasingly they turn to a dark vision of the world.

I think tonight, as the skies are lit up in Lebanon and over Israel, it is important for us to be able to offer a different approach for engaging those countries and for ultimately bringing them into the economic mainstream. I thank the gentleman for his extraordinary remarks.

Mr. RYAN of Wisconsin. If the gentleman will yield further.

Mr. ENGLISH of Pennsylvania. I will yield, and I believe we have another speaker as well.

Mr. RYAN of Wisconsin. I think it is important to note the bipartisan nature of these agreements in the past. We had the best vote count of this session of Congress on a trade agreement in the last Bahraini Free Trade Agreement. We passed with large bipartisan votes the Moroccan Free Trade Agreement. We passed with great bipartisan votes the Jordanian Free Trade Agreement. The Oman Free Trade Agreement already passed with a very large

bipartisan vote in the other body, the Senate.

We, hopefully, will continue to pass these things with good bipartisan agreements because in this sense it is very important that as we go overseas on an issue that is so important that we speak with one voice, as Democrats and as Republicans, that we make these bipartisan. And I am very pleased with the fact that Congress has for large measure treated these important Middle East free trade agreements on a bipartisan basis. Our caucus includes three Republican cochairmen and three Democrat cochairmen. So I do believe that we will see support from the other side of the aisle. I do not know how big it will be, but it is very important that we speak with one voice, saying it is not just the Republicans who want to do this, it is not just the Democrats. It is that the Americans want to engage in trade with the Middle East countries we are talking about. We want to support their efforts to modernize, their efforts to open, to liberalize their economies. And that to me is a very important signal.

I see that we have been joined by the gentleman from Connecticut.

Mr. ENGLISH of Pennsylvania. Mr. Speaker, I am most grateful and delighted that a strong advocate of trade and fair trade has joined us tonight to speak out on the Oman Free Trade Agreement.

I yield to the gentleman from Connecticut (Mrs. JOHNSON) on this point.

Mrs. JOHNSON of Connecticut. Mr. Speaker, I thank the gentleman from Pennsylvania for yielding.

And I am delighted to be here on the floor with two of my colleagues who have been tremendous advocates of this free trade agreement and of the concept of free trade, the principle of free trade internationally and in our country.

I want to make two general points. I am sorry that I wasn't able to be here earlier, and I do not want to repeat what my colleagues have said. But there are two important overall points that I want to make that, even if you have made them, are worth thinking again about.

First is why free trade is important. Retirees simply do not, by definition, buy enough consumer goods to drive an economy our size. We are accustomed to a standard of living that is, frankly, the highest in the world. Our children expect to grow up and participate as adults in an economy that is thriving, in well-paying jobs that can provide them with a standard of living that my generation has enjoyed. Yet as the number of retirees explodes and the number of young people in the workforce contracts, our own Nation cannot provide the demand for goods that can produce the overall gross national product that will assure the standard of living we are accustomed to. So fu-

ture generations are going to be more dependent on trade than we have been, and we must open markets for their goods.

The American population will not be able to buy the amount of stuff that would drive an economy that can produce the standard of living that we have enjoyed. So if we do not have consumers around the world, and, remember, the great majority of consumers are outside the United States, if we do not cultivate them, if they do not open their markets to our products, then we cannot sustain the level of economic well-being, the standard of living to which we have been accustomed, and we thereby disadvantage our children.

This small agreement with one small country will allow consumer and industrial goods to enter that country 100 percent duty free. One hundred percent duty free. And agricultural products will enter 87 percent duty free and over 10 years reach 100 percent duty free. This is a small market, but we are making these agreements with country after country after country. And most startling, our exports are growing most rapidly and the majority of our growth in export goods is with those countries that we have negotiated trade agreements with. Now, that stands to reason because if you sell your goods into a country where there is no duty, they are going to do better than if you sell them into a country where there is a 20 percent, 30 percent, 40 percent, 50 percent duty that pushes that price right up.

So in the big picture, our children, our grandchildren cannot do well unless we lay the foundation by opening markets for American products all across the world. So our economic well-being depends on free trade agreements. Those free trade agreements, and the gentlemen here on the floor with me tonight have been strong advocates of fair trade agreements, these free trade agreements address labor standards, environmental standards. We are the only Nation in the whole world that pushes those issues in the negotiation of trade agreements with other countries, and we are reaching new standards as we move forward and gain more experience.

Now we do not just require labor standards. We help nations build institutions to enforce those standards. So we look at do you have a department of labor. We look at does the department of labor have sufficient staff to enforce the law. We look at do the regulations take seriously the responsibility of enforcement. And we literally help nations not only understand how labor standards help them deliver the benefits of world trading to all in their society, but we help them understand that just having the standards to support all their people is not enough.

You do have to be able to enforce those standards. You do have to be able

to take action against the exploitive employer. So these trade agreements are good for our kids. They are good for peoples of the world.

And that brings me to my second major point. Our security depends on agreements like that we have negotiated with Oman. The 9/11 Commission report cited our Middle Eastern free trade agreements and call for action on "a comprehensive U.S. strategy that should include economic policies that encourage development, more open societies, and opportunities for people to improve the lives of their families and enhance the prospects of their children's future." In other words, the 9/11 report was saying if you do not address the causes that are creating terrorism and the willingness to be terrorists in other societies, you cannot solve the problem.

And I want to just conclude by saying how very impressed I was when Ways and Means Committee members a little less than 2 years ago made a trip to the Middle Eastern nations that were interested in trade agreements and whose other trading agreements were about to expire.

□ 2100

We knew that they would need to think about this in advance carefully.

We know that participating in trade agreements means other countries have to modernize their law to meet high international standards. We knew it would take time, and we wanted to be sure to alert these other countries to the challenges that lay ahead for them in negotiating these free trade agreements and to the enormous benefits that would accrue to their people in not only the present but future generations.

I must say, I was extremely impressed with the Sultan of Oman. He understood exactly what this was going to mean to his people. He is one of the Middle East leaders who understands that oil is a limited resource and he must prepare a broader base for economic success for his people in his own country, and he is doing some of the work in the more advanced areas of desalinization, thinking about the importance of water to his people and the demand in the world economy, particularly in the Middle East, for potable water.

He is a very forward-looking man. He is very committed to participation in the political process by women as well as men. He has appointed successful women to his top council. They do things slightly differently because they are coming from a different path, but he was very proud to have started worker committees. That was his initiative, because he knows workers have to have a better voice. They have to be free to talk about the problems, to work with management, to work with owners for everyone's success.

In this agreement, he has moved light years ahead, looking at the labor laws of other countries, understanding what it is going to take to provide the kind of support and protection that working people need in order for the benefits of trade to affect the lives, the quality of lives, the hopes and dreams, the opportunities of all the people in each society.

So when you look at not only the way this agreement opens markets and what that means for our people, when you look at what this means for our security as this great friend of ours, for over 170 years, and a leader in the region in economic and governance reforms, what they accomplish by moving forward into new thinking and new institutions to modernize their economy, all embodied in this trade agreement, you know it means not only greater prosperity for his country and for our country, it means greater peace for the world.

Free trade is about peace and prosperity. It must be fair trade. It must help all take part in the benefits of the trade agreement.

This is a remarkable agreement, and I very much appreciate the two gentlemen on the floor here, Mr. RYAN of Wisconsin and Mr. ENGLISH of Pennsylvania, for their diligent participation in all the consultative processes, because Congress is a part of developing these free trade agreements, that make these agreements possible. Your knowledge and expertise is truly a great service that you have given this country and that you have given our friend, Oman.

Mr. ENGLISH of Pennsylvania. Madam Speaker, I would simply like to thank the gentlelady for her extraordinary and insightful comments in capsulizing the very powerful argument and ultimately recognizing the key role of Oman in that region.

I would be happy to yield to the gentleman from Wisconsin if he would like to make concluding remarks, and then I would like to make a further contribution, with the inspiration of the gentlelady from Connecticut.

Mr. RYAN of Wisconsin. I thank the gentleman for yielding. I want to draw off the inspiration I just received from the gentlelady from Connecticut's comments.

As I listened to her give this excellent overview of not only the benefits of these trade agreements, but of this one in particular, of all the work that the Omanis have gone through to bring this up into shape, to increase their worker rights, to increase their transparency, to increase their participation in women's rights, I just couldn't help but thinking, What if we don't pass this? What if we say no? What if we here in the House of Representatives this week say, that is not good enough, sorry, no, to the Omanis?

The Omanis are taking a risk in their neighborhood. They are choosing whether or not to go down the path of the Iranians and the Syrians and others like that, or to go down the path of openness, of freedom, to be an ally with the U.S. in fighting the war on terror and giving people freedom.

What if we say no to that? I just cannot imagine the consequences of us working with this ally of ours, getting them to agree to all of these enormous amounts of reforms and concessions to make this trade agreement work, and then only to say no. That, in my opinion, Madam Speaker, would be a tragedy.

It would be a tragic mistake to say to this country, this ally, these people whom we have the utmost amount of respect for, to say, sorry, partisan politics. It is an election year. Didn't mean to have you as collateral damage, but no. That to me would be an outright tragedy if that happened.

So I want to conclude on a high note, and that high note is just as we helped lift the tide of freedom and economic engagement and economic freedom in Morocco, in Israel, in Jordan, in Bahrain, so too do I think we will do this in Oman this week. And all of that is going to increase U.S. jobs. Yes, it is going to help us sell more products to the region. But, most importantly, it is going to help the people in these countries have a better life. It is going to help them be more free. And that is going to help make sure that my children, my kids, who are 4, 3, and 1 year old, make sure that they live in a peaceful America, that they don't have to fight the fight against terror that we are right now engaged in. That is what this means to me when I put my card in the voting machine and vote on this agreement in a couple of days.

That is why this is so dearly important. That is why this is not just your rank-and-file trade agreement for widgets and corn and dairy or whatever. That is why this is an important trade agreement.

I really encourage all of my colleagues, put the partisan blinders aside for that day and vote with America, vote for your kids, vote for good economics and vote for freedom in the Middle East.

Madam Speaker, with that, I would be happy to conclude and say thank you to the gentleman from Pennsylvania, Mr. ENGLISH, for all your leadership on this issue. Thank you for hosting this discussion tonight. I think it has been very helpful. I just look forward to making sure this actually occurs, I think on Thursday when we do this.

Mr. ENGLISH of Pennsylvania. Madam Speaker, I thank the gentleman.

With that, I want to thank the gentleman again for his leadership on this issue, his vision and his commitment

to building closer ties between the United States and the Middle East region.

The gentleman raised the very important question of not only the substance of the Oman agreement, but also its symbolism, because I think there will clearly be consequences to not passing the Oman FTA, if that were to happen in the House.

Oman, as the gentlelady noted, has been a steadfast ally of the United States for over 170 years. Oman has been a hugely valuable partner on the war on terror and has hosted U.S. soldiers and permitted the U.S. to use Oman as a critical launch site for ongoing operations in Afghanistan. Oman has embarked on what is clearly a large-scale, if not unprecedented, reform effort.

In terms of labor rights, worker safety, women's rights, Oman has shown tremendous commitment to improving these standards for both Omani workers, as well as the large number of expat workers currently working in Oman. They have a large number of guest workers, and this is part of their initiative.

Reforms in the area of labor have been commendable, even exceeding the level of commitment made by Bahrain as they entered into FTA with us. Were the Oman FTA not to receive the support of a wide majority of Congress, it would send tonight absolutely the wrong signal, not only to Oman, but to the entire Middle East region at a very sensitive moment. Passage of the FTA is not only in the commercial and political interests of the United States, it is also necessary to support the reforms in Oman and to deliver an important shot in the arm to stability in the Middle East region.

It is clear that despite turmoil within the Middle East, Oman has risen to become a regional leader, improving its labor standards, opening its markets and being accountable for intellectual property rights violations, among others.

Furthermore, our pact with Oman solidifies the strong U.S.-Oman alliance in the global war on terror. We listened tonight to the recommendation of the 9/11 Commission, and also we have the March 2006 National Security Strategy specifically citing the need to advance trade and economic liberalization in the Persian Gulf region as a key part of a comprehensive U.S. strategy to bolster security, to fight terrorism and to oppose Islamofascism. However, America's influence in the region has to be measured by more than projected military might. If we are going to help anchor the Middle East in the modern world, we clearly must reduce conflict in the region by promoting growth and opportunity.

As the gentleman from Wisconsin said tonight, the U.S.-Oman FTA is a win-win policy that only builds upon

our country's goal of strengthening economic relations and increasing trade, fair trade, with our partners in the Middle East. By strengthening our ties with the key strategic ally committed to trade liberalization and economic reform, the U.S.-Oman FTA will demonstrate to other countries in the region the benefits of free and open rules-based trade and engagement with the United States.

I hope that come Thursday, my colleagues on a bipartisan basis, as the gentleman put it, will put aside their partisan blinders and consider supporting this trade pact when it reaches the floor. A "yes" vote means yet another step on the long road to expanding new economic opportunity for both of our regions.

IRAQ WATCH

The SPEAKER pro tempore (Mrs. SCHMIDT). Under the Speaker's announced policy of January 4, 2005, the gentleman from Connecticut (Mr. LARSON) is recognized for 60 minutes as the designee of the minority leader.

Mr. LARSON of Connecticut. Madam Speaker, once again we come to the floor this evening as part of Iraq Watch. We do so this evening with both heavy and somber hearts for everything that is going on as we currently speak in the Middle East. Our hearts especially go out to our great ally Israel, as it wards off vicious attacks by Hezbollah. Once again, it only underscores the need for us in this body to do the kind of oversight and review and have the kind of dialogue and discussion that has been absent on the floor of this House and in our respective committees.

Madam Speaker, as we have on so many of these occasions, we begin this evening by once again honoring as well those brave men and women who wear the uniform of our country. They serve this Nation so valiantly.

Let me also acknowledge so many veterans and individuals who have played such a key role, especially those from the Vietnam era, in understanding and helping us recognize that it is so important to differentiate between the warriors and the war. So we salute those brave men and women who are in harm's way, who are dealing with untenable situations they are confronted with in Iraq.

I especially want to draw attention again to a bill that we have before this body that we are still seeking more signatures to, and requesting and asking the Speaker and the majority leader to bring it to the floor by unanimous consent.

□ 2115

I do not believe that there is anyone in this body that does not understand the need for making sure that the Iraqi government does not grant amnesty to

those who kidnap, kill, torture and maim American citizens and American troops.

And so I think it is so vitally important that this message be sent, especially as the insurgency only intensifies in the region. Brookings Institute and others who have polled find that 47 percent of the people in Iraq believe that it is okay to kill Americans. It is time that we send a clear message. That is why we come to the floor on successive evenings to send a clear message to the American public about what is transpiring before our eyes.

We pause, as I said earlier, both in somber and peaceful resolution that this conflict can be resolved speedily and we especially pray for those Americans who need to be evacuated from harm's way.

Madam Speaker, I am joined this evening by several of my colleagues who have come to this floor on repeated occasions to talk about a new direction that is needed in the Middle East, a new direction that needs to be taken by this Congress, a new direction that needs to be taken by this President, so we provide an opportunity for this great country of ours to once again move us forward out of harm's way and into a peaceful resolution to what has become consistently a quagmire known as Iraq.

With that, I recognize the gentleman from Massachusetts (Mr. DELAHUNT).

Mr. DELAHUNT. Madam Speaker, I thank my friend and colleague from Connecticut. It is good to be joined by my other colleague from New York (Mr. BISHOP) and Chris Van Hollen from Maryland.

Madam Speaker, I would like to speak for just a moment regarding what is happening in terms of the war on terror. We should all be alarmed. We see the events of recent days unfolding in Lebanon, Israel, in Gaza. And it is clear that terrorism is spreading. It is not declining.

I would submit that those events were inevitable, the law of unintended consequences, if you will, that many of us predicted when the resolution that authorized the invasion of Iraq came to the floor. I dare say that in the Middle East today there is an awareness on the part of world opinion that the war in Iraq has increased the likelihood of terrorist attacks around the world.

A recent poll that was commissioned by the BBC, and again, this was a poll that was taken in some 35 countries, found that 60 percent of the world believes that the threat of terrorism has increased some 60 percent, while only 12 percent believed that it has declined.

And the nexus was the war in Iraq, and the conduct of the war in Iraq. They saw the war in Iraq as an impediment to the defeat of terrorism. And the experts agree. There was a survey done of more than 100 individuals with extensive foreign policy experience and national security backgrounds.

And what was particularly disturbing is that among the experts, 84 percent said that the United States was not winning the war on terrorism, and some 86 percent said that the world was becoming more, not less, dangerous in terms of terrorism because of our involvement in Iraq.

This is extremely frightening. And let me put forth a premise to you, to my colleagues. I would suggest that it is not unrelated that we see Hamas and Hezbollah asserting themselves today, in the past several weeks, because there is a growing awareness that the United States is bogged down in Iraq, and that world opinion in terms of the role of the United States in Iraq is highly negative.

And what do we see in terms of the new Iraqi government and its relationship with Iran, a sponsor of Hezbollah and a sponsor of Hamas? We see exchange of diplomats. We see a billion dollar line of credit coming from Iran to Iraq. We see a military corporation agreement between Iran and Iraq. Iran, the sponsor of Hezbollah and Hamas. That is what we see. That is what we are seeing.

And we are listening to the foreign minister, the foreign minister of Iraq when asked about the United States pressuring Iran to disclose where they are in the development of nuclear technology, to disclose whether any of those efforts could be utilized to develop a nuclear bomb, a nuclear weapon.

And the Iraqi foreign minister is saying, do not pressure the Iranians; accept their word. I mean, what is happening? Are the American people aware of these particular events? And then of course at the same time, the forgotten war, if you will, the country that harbored al Qaeda, that was ruled by a radical Islamists sect called the Taliban is on the verge of unraveling.

The Afghan defense minister recently made this statement: we need five times the number of security forces to address the issue of a resurgent Taliban. Without them we are in real danger of collapse. So everywhere we look in terms of the Middle East, we see danger and we see danger to Israel, we see danger in the entire region. And we hear, "Stay the course."

Mr. LARSON of Connecticut. Madam Speaker, the gentleman makes a great premise that he asks us to respond to. But what I would like to do, if I could, is respond by quoting from a column in the New York Times yesterday by Frank Rich, who said: "The Bush doctrine was a doctrine in name only, a sales strategy contrived to dress up the single mission of regime change in Iraq with the philosophical grandiosity worthy of FDR. There was never any serious intention of militarily preempting either Iran or North Korea whose nuclear ambitions were as naked then as they are now, or striking the countries

that unlike Iraq were major enablers of Islamic terrorism. 'Axis of evil' was merely a classier brand name from the same sloganeering folks who gave us compassionate conservatism, and 'a uniter not a divider.'"

Madam Speaker, with that I would like to yield to my distinguished colleague from New York (Mr. BISHOP).

Mr. BISHOP of New York. Madam Speaker, I thank the gentleman from Connecticut for yielding, and I thank him also for his leadership in organizing these very important discussions on the administration's failed policy with respect to Iraq, and for that matter the administration's failed policy with respect to the conduct of our foreign affairs in general.

It is a subject that we discuss all too infrequently in this Chamber. Let me just pick up on the point that Mr. LARSON just made. It was 4½ years ago that the President came into this Chamber to deliver his State of the Union Address for 2002.

It was in that address that he first characterized North Korea and Iran and Iraq as the Axis of Evil. And I think it is without argument, without debate today, that all three of those states present this country, our country, with greater threats to our safety and security than they did when they were first characterized as the axis of evil, and that is because we have embarked on a failed strategy in Iraq that has bogged us down, that is apparently without end, without success, and yet prevents us, because of our preoccupation with Iraq and because of the troop strength that has been needed in Iraq and prevents us from dealing with the threat that is now posed and was posed at the time by North Korea and the threat that was posed and is now posed by Iran.

Let me also comment on something that Mr. DELAHUNT from Massachusetts said repeatedly, the war in Iraq has been characterized as the centerpiece of the war on terror. It is frankly not at all the centerpiece on the war on terror. It is a diversion from the war on terror. It is a diversion that does not serve either the country well or serve our allies well.

We have a foreign policy, it seems to me, that is rooted in ideology as opposed to pragmatism, and we are learning the limits of applying that ideology as we deal unsuccessfully with the situation in North Korea and the situation in Iran.

We see the Middle East in flames as we speak, and we recognize that we have a long history that nothing good happens in the conflict between Israel and the Palestinian territories unless the United States is intimately involved in being an honest broker to bring about resolution of vexing and difficult issues.

Let me share just a couple of statistics that I think speak to just how far

off track we are in Iraq. The number of insurgents in 2003 was 5,000. Today that number stands at 20,000. I am sure we all remember when the insurgency was described as a few dead-enders.

I am sure we all remember when the Secretary of Defense rather dismissively described what was happening in Iraq by saying that "freedom is messy."

□ 2130

We now have a situation where those dead-enders, so to speak, have metastasized into 20,000 insurgents. The average number of daily attacks has risen in just 1 year from 53 to 75. This does not sound like an insurgency that is in its final throes, and yet that is what we were told.

The number of civilian casualties resulting from sectarian violence has increased by 600 per month, now to a total of nearly 1,600 lost innocent lives per month. That is the equivalent of a 9/11 every 2 months in Iraq. Would any one of us stand for that if that were happening in this country? We certainly would not. Yet the carnage continues, and sectarian violence has increased dramatically over this period of time.

Financially, the burn rate has doubled from nearly \$4 billion per month to \$8 billion per month over the past 2 years, and I am sure we all remember how dismissively the administration handled the early estimates of the war. When Mr. Lindsey first said it would be \$100- to \$200 billion that was dismissed out of hand, and we were told that it would be no more than \$50- or \$60 billion for the war. We are now \$300 billion and counting, as I say, with no end in sight.

We all wish that we could believe the administration's happy talk with respect to stability taking hold, with respect to progress being made. But we are now 3½ years into this tragic conflict, and we are no closer to the goal of an Iraqi state that does not pose threats to the safety and security of this Nation.

Mr. LARSON of Connecticut. I want to thank the gentleman from New York for his insightful comments, many of which were echoed by Paul Krugman in a New York Times article today called March of Folly.

With that I would like to yield to the gentleman from Maryland, Mr. VAN HOLLEN.

Mr. VAN HOLLEN. I thank my colleague from Connecticut, and thank him for his leadership on this very important issue of national security, and thank my colleagues Mr. DELAHUNT and Mr. BISHOP of New York for all of their leadership.

I would just like to pick up where Mr. DELAHUNT and others left off with respect to the forgotten war in Afghanistan. I do think it is important, when we look at the situation in the world

today, and we look at the violence erupting in the Middle East, we do remember what happened here in the United States back on September 11, 2001, and the origins of that attack.

As he reminds us, the attack on the United States, September 11, 2001, came from al Qaeda, al Qaeda that was sheltered by the Taliban government in Afghanistan; and that the world was with us when we responded, fully and forcefully, to those attacks of September, 2001.

In fact, the United Nations unanimously passed a resolution supporting us, our NATO allies universally supported us. In fact, they enacted a charter, part of a NATO charter saying an attack on one was an attack on all.

Yet today we are seeing in Afghanistan there has been a resurgence of Taliban activity, and at a very time when we are facing that resurgence, the United States is not providing a commitment that we need to make sure that we succeed against those who began and perpetrated the attacks of September 11, 2001.

Back then, instead of focusing on that battle against those who attacked us, we did divert our resources and our energy in Iraq.

The President gave a number of reasons back then for the action we were taking. We remember well the twin pillars of the argument. He said, well, they have got weapons of mass destruction. Many of us said, let's let the U.N. inspectors have a little more time to see whether that is true or not true.

The President said, no more time, we are going in. He also said there was collaboration between al Qaeda and the regime of Saddam Hussein in Iraq. The 9/11 Commission and many others have proven that that is not true either.

But it is important to remember that the President also advanced some other reasons for going to war in Iraq. One of the arguments he made was by the United States going to Iraq. By invading Iraq, we would help build stability in the Middle East, that we would promote democracy in the Middle East, that we would reduce the influence of the hardliners in the area and increase the influence of the moderates.

In fact, just a few weeks before the invasion of Iraq, in a speech before the American Enterprise Institute, here is what the President had to say. I think it is important to reflect on his words then as we look now at the terrible violence erupting in the Middle East.

He said then, and this was one of the rationales he gave us for going to war in Iraq, success in Iraq could also begin a new stage for Middle Eastern peace and set in motion progress for a truly democratic Palestinian state. The passing of Saddam Hussein's regime will deprive terrorist networks of a wealthy patron that pays for terrorist training and offers rewards to families of suicide bombers, and other regimes will be

given a clear warning that support for terror will not be tolerated. That was a word of his to Iran and others.

Without this outside support for terrorism, Palestinians who are working for reform and long for democracy will be in a better position to choose new leaders.

Well, in fact, what has happened in the Middle East, since the invasion of Iraq is the opposite of what the President has said.

We know now that when we invaded Iraq, we took the lid off Pandora's box, that we set in motion longstanding grievances within different groups within Iraq, the Sunnis, and Shiias and the Kurds, and that outsiders exploited the mess that was created in Iraq, and al Qaeda, that had never operated out of Iraq, did become active in Iraq.

In fact, what happened was our invasion of Iraq strengthened the hands of extremist groups throughout the region. It made it more difficult for the more moderate Arab governments to support the United States, because people in their countries saw that the United States had invaded Iraq, and they said there was no reason for this war of choice against Iraq.

The big winner, the big winner, of course, as Mr. DELAHUNT pointed out, has been Iran. Iran has very successfully exploited the chaos and the vacuum that has been created in Iraq as a result of the mess there. They have gone into Iraq. They have many agents there, and they, as we know, are also exploiting the feelings of others throughout the region, especially Hezbollah. They have provided missiles to Hezbollah, missiles that are now being used to rain down on northern Israel.

Iran, Iran, as a result, has become much more of a power in the region. Iran, one of the other countries the President named as the axis of evil, has, in fact, been strengthened by the President's decision to go to war in Iraq.

You just need to read the comments of other Arab leaders in the region, from some of the more moderate Arab countries who say today, they ask, this is quoted in *The New York Times*, Who is benefiting, asked a senior official of one of the Arab countries, critical of Hezbollah. Definitely not the Arabs or the peace process, but definitely the Iranians are benefiting.

Arab leaders have long been concerned about Iran, and the great irony of our invasion of Iraq is it has greatly strengthened the hand of Iran and greatly strengthened the hands of the extremists in the region who have been fueled by the antagonism that is unleashed toward the United States and the West by our actions there.

Mr. LARSON of Connecticut. The gentleman makes an excellent point. Every time I travel back to my district, the question that more often

than not is raised at every forum, every community gathering, every town hall meeting is, How is it that the United States could go from a position in the aftermath, the immediate aftermath of September 11th, with having the entire world on our side, to the point where we are today where so many are opposed to our policies?

What is it that took us down that perilous course? How could it be that the former President, Bush the first, if you will, and his advisers, were the most outspoken critics about going into Iraq, warning this current administration of its folly, of its danger?

I can remember very distinctly being in Saudi Arabia with JACK MURTHA and talking to our Ambassador there, and saying to him that, oh, it seems as though you have a gathering storm here in Saudi Arabia, in August of 2002.

He said, gathering storm? He said, Congressman, you are from New England, aren't you? I assume you either read the book or saw the movie. He says, we have over 35 percent unemployment. We have a median income that has dropped from 28,000 to under 7,000 per household. What we have here is not a gathering storm, what we have here is a perfect storm.

If we preemptively strike this toothless tiger in Iraq, we will unwittingly accomplish what Osama bin Laden failed to do. We will create a united Islamic jihad across the Middle East and drive it into chaos. The voices of reason, the voices screaming out at the time were Snowcroft, Eagleburger, Baker, Kissinger, all warning against this folly.

Yet as you point out, we persisted.

Mr. VAN HOLLEN. Well, I think that is absolutely right. You see this whole shift, overnight, in world opinion, again from the world being on our side and willing to fight alongside us in the war on terror that had been precipitated by the attacks of Osama bin Laden and al Qaeda. That was one day.

After the invasion of Iraq that turned out to be based on totally false premises, you saw the world turn against us. Some people here ask, Why does it matter whether people around the world like us or support our policies? Why does it matter if people in the Middle East have a positive view of the United States? Why does it matter if the Islamic world has a positive view of the United States?

Well, here is the problem. If you don't have the support of those countries, it is very difficult to get their cooperation in the war on terror. It is very difficult for them to say we are going to help you in the United States in this battle on terror. That is one problem.

The other problem is, it is a total contradiction between our efforts to promote democracy in the region, on the one hand, and to say we don't care what the people in those countries

think, on the other hand. Because if we want to promote democracy, which means that we want leaders in the region to be elected by the people, then we better make sure that the people who are electing them support our goals and support our objectives.

Because if the people who are electing the leaders in Middle East countries hate the United States and want to bring harm to the United States, it is very difficult for someone running for office there to say they support our efforts and support our policy.

You saw the election in the Palestinian areas of Hamas and the extremists as opposed to the Palestinian Authority. The Palestinian Authority had said, we want to work with the United States, and we want to work with Israel toward a peace process. But the people, when they had a choice, for all sorts of reasons chose the more extremist Hamas.

So the perceptions of the United States and our policies overseas have a direct bearing on our own security here at home. You cannot say you want to promote democracy in the Middle East, on the one hand, and say you don't care if they hate America, on the other hand.

□ 2145

If they hate America, they are going to elect leaders who reflect the will of the people, and that is bad for the United States, and yet our actions have fueled that kind of antagonism and hatred and actually made us less, not more, secure.

Mr. LARSON of Connecticut. Madam Speaker, we have been joined by the gentlewoman from California (Ms. WATERS) who certainly has embodied from the outset in opposition to this war the voice of reason as it relates to getting us out of Iraq.

Ms. WATERS. I thank very much Representative LARSON. I would like to thank you for the leadership that you are providing in putting together these opportunities night after night on the floor to illuminate what is going on in Iraq. You are absolutely right.

I am the Chair of the Out of Iraq Caucus, and we have our 1-year anniversary as of this week. We organized because we understood very well that something was very wrong with this war. It was not a popular thing to do, but increasingly, Members began to join. We do have 72 Members. We have other Members who are recognizing, as they work in their districts across this country, that the people of America are sick and tired of this war. They believe that the President of the United States has mismanaged this war, and they want to bring our troops home.

The violence that we are witnessing on a daily basis in Iraq is absolutely unconscionable. The violence is such that not only are the Sunnis being attacked by the Shiias, but innocent people are being killed. Civilians are being

killed day in and day out, and to tell you the truth, Mr. LARSON, and other Members here and Mr. DELAHUNT who has worked on this issue so long and so hard, I think it is easy for us to conclude at this point, no matter how difficult it is, that we have destabilized Iraq with our occupation.

When we went into Iraq supposedly because they had weapons of mass destruction and discovered that there were none; when we decided to change our tune, that is, the President of the United States and talk about wanting to instill a democratic government, the American people said, okay, the President of the United States must know what he is talking about.

So they have a new government. Saddam Hussein is behind bars. There are no weapons of mass destruction, and you know what is going on? The civil war that this President and this administration is in denial about, but if you read the papers today, you even have Sunnis that are saying, well, we do not like the Americans, we do not like this occupation, but you know, we need them now to help us be protected against these attacks that are coming at us on a daily basis.

So we recognize that the President of the United States started this discussion about the training of the Iraqi soldiers and how we were doing such a good job, there was a turning point, and they were going to be able to take over and to provide security for that country.

Well, in the first place, we did not go there. The President of the United States did not tell the American people we were going there, to be in the middle of a civil war, to protect one group from the other. Never said that. And now that is the only reason we are there, because we have got to protect the Sunnis from the Shiias? I mean, that is what our American soldiers are supposed to be doing. Our American soldiers who come from these towns and these hamlets do not know a Shiia from a Sunni, and then they get in situations where they are shooting to kill, and people would criticize them when they do not know what it is they are confronted with. We are there because we have to negotiate this civil war by way of warfare.

I think it is unconscionable what is happening there, and I think it is time for this administration to admit that not only have they made a mistake, but they have not trained enough Iraqi soldiers to take over the security of this country, and there is no number of Iraqi soldiers being trained in sight that will take over the security of this country. These groups who have been at each other's throats for centuries and maybe were contained by a strong man, right or wrong, are in the throes of a full civil war.

Mr. DELAHUNT. Madam Speaker, I think the gentlewoman asks a very le-

gitimate question, but I do not think you were present in the Chamber when I referred to a statement dated July 13 coming from the Afghan defense minister, a gentleman by the name of Abdul Rahim Wardak, who said that the Afghan Army cannot secure the country without at least 150,000 more troops, five times what it has today, and that in his opinion, and he clearly represents the sentiment of the government, it is an opportunity for the United States to double the assistance given to Afghanistan. In other words, we left Afghanistan before we finished the job.

What I find particularly interesting is that we do not hear that from this administration, but the new head of NATO, the NATO force in Afghanistan, a British general, David Richards, made this observation: Afghanistan's Taliban rebels have taken advantage of a power vacuum and grown stronger because the world's attention has been distracted by Iraq.

How true. I agree with him. I agree with him. And if one looks around the landscape again, I am sure it has not been on the front page, but we all here present in this Chamber today know what is happening in Somalia. Radical Islamist warlords have taken over Somalia. Winning the war on terror, you know, the rest of the world believes that we are losing the war on terror.

Many of the gentlemen that were referred to, Eagleburger, Lawrence Cobb, and others that have served in Republican administrations, agree that because of Iraq we are losing the war on terror today and eroding our own national security.

Mr. BISHOP of New York. Madam Speaker, if the gentleman would yield, I would just like to expand on a point that the gentlewoman from California made. She talked about the report in today's New York Times that Sunni leadership is now asking American troops to stay to deal with the sectarian violence, and it points out the folly, if you will, of what purports to be our exit strategy.

I mean, the President has said repeatedly that as the Iraqi Army stands up, then we will stand down. We have now stood up a significant number of Iraqi soldiers and law enforcement officers, and yet here we have the Sunni leadership, which has been adamantly opposed to our presence in the country, adamantly opposed to our occupation of the country, now asking us to stay.

And so what does that suggest? It suggests that we do not have an exit strategy at all, or the one that has been put out there by the President is one that has absolutely no chance of yielding any kind of beneficial result in Iraq.

Mr. LARSON of Connecticut. That is what the General Accountability Office says as well. The GAO report calls for a new direction in Iraq. The GAO re-

port of July 11 says that the administration's national strategy for victory in Iraq is questionable and victory cannot be achieved without significant change in the President's current stay-the-course strategy. It is unclear, it goes on to say, how the United States will achieve its desired end-state in Iraq, given the significant changes in assumptions underlying U.S. strategy.

Ms. WATERS. Madam Speaker, if the gentleman will yield, it was alluded to earlier that not only were we distracted from doing the job in Afghanistan and we have ended up in this morass in Iraq, it was reported, and I do not have the documentation for it, that Mr. Wolfowitz, Mr. CHENEY and some of the other war hawks had said, once we are in Iraq, we tie down; then on to Iran and on to Syria. Now, I do not know if that is true, if Iraq was to be used as a staging ground to then move on to the attack in Iran and in Syria, but I think that the Iranians believe it, and I think the Syrians believe it.

I watch what we are learning every day about the fact that many of those missiles that are being launched from Beirut are missiles that have been manufactured in Syria, and we also know that the Iranians have their hand in support of Hezbollah and what is going on.

Now, this says an awful lot, and you guys alluded to it a bit earlier. Here we are, here we are tied down in the middle of a civil war in Iraq and having threatened with no more than talking about the axis of evil but even beyond that, going into these neighboring countries, and now I think they are about to put us on the run, trying to distract us and have us react in different parts of the Middle East. And of course, we cannot do that with Kim Jong Il looking over our back in North Korea, launching missiles over into the Japan Sea. And we have got Tehran who has told us that they would certainly continue with their development of nuclear capability.

So here we are, Afghanistan, we are spending much of our soldiers' time trying to protect Karzai who is sitting in Kabul and not doing anything, and as you said, the Taliban and the warlords are really running it.

We are getting overwhelmed. We are getting outmaneuvered. We are placing the American people at great risk, and it is about time we just go ahead and tell it like it is. We have created more risk than not, when in fact this war on terrorism was supposed to be about making the American people safer.

Mr. DELAHUNT. Madam Speaker, if my friend would just yield for a moment just to confirm points that were made by everybody, but specifically by CHRIS VAN HOLLEN, there is a GAO report that was issued in April of 2005 that speaks to the issue of deepening and broadening anti-American sentiment all over the world. We have all

seen the polling data. It is frightening. Talk about a world opinion that threatens our national security.

And the GAO specifically alluded to the fact that it has the potential to dramatically hurt our commercial interests. One only has to check the price of oil. One only has to look at today's stock market report. Everywhere we turn the implications and consequences of this failed policy is hurting the American people, our national security, our commercial interests and everything that is attendant thereto.

Then, when we start to examine the relationship between the new government in Iraq and Iran, why have we spilled the blood of more than 2,500 Americans and already have appropriated taxpayer dollars on the way to \$500 billion?

□ 2200

And by the way, I am sure if you haven't, that you will find in your mail tomorrow a letter, a Dear Colleague letter from our friend and colleague from Illinois, Jan Schakowsky. And she makes the point that on July 7, the Iraqi, not Iranian Parliament Speaker, Mahmoud al-Mashhadani had this to say. He accused Jews of financing acts of violence in Iraq in order to discredit Islamists who control the Parliament and government so they can install their agents in power.

Some people say we saw you beheading, kidnapping and killing. In the end, we even started kidnapping women who are our honor. These acts are not the work of Iraqis. I am sure that he who does this is a Jew and the son of a Jew. I can tell you about these Jewish Israelis and Zionists who are using Iraqi money and oil to frustrate the Islamic movement in Iraq and come with their agents.

Is this what we have wrought?

These words should be condemned by the President. I am sure we all would join in a resolution condemning the words of this head of the Iraqi Parliament, this Iraqi Government that has executed a bilateral military agreement with Iran.

Where are we heading, my friends?

Mr. VAN HOLLEN. Would the gentleman yield?

The sad part about so much of this is that so much of it was foreseeable, if only the President and the White House had listened to people who knew what they were talking about in this very important foreign policy area.

I quoted earlier this evening the words of the President in a speech that he gave at the American Enterprise Institute on the eve of going to war in Iraq, when he talked about the fact that our invasion of Iraq would create a new era of stability in the region. It would help create a domino effect of creating new democratic movements in the region. It was sort of the big bang of creation of democratic governments

in the region. That was what the President said.

But the fact of the matter is at the same time the President gave that speech, the experts were telling him the opposite, and yet they were ignored because their advice did not fit the decision that President and some of his advisers had made.

Just a month ago, Paul Pillar, who was the head of the Bureau of Near East and South Asia at the Central Intelligence Agency at the time of the invasion, testified; and here is what he told the Congress just recently. He told the Congress that what is happening was, in fact, predicted in the national intelligence estimate of that time. Here is what he said. And on the situation, this is his testimony about a month ago. And on the situation that would be faced in post-Saddam Iraq, the Intelligence Community produced, on its own initiative, its assessment of the likely challenges there. It presented a picture of a political culture that would not provide fertile ground for democracy, and foretold a long, difficult, and turbulent transition. It forecasted in a deeply divided Iraqi society there was a significant chance that sectarian and ethnic groups would engage in violent conflict unless an occupying power prevented it. It also assessed that the war and occupation would boost political Islam, increase sympathy for terrorist objectives and make Iraq a magnet for extremists from elsewhere in the Middle East.

This is the assessment of the Central Intelligence Agency before we went to war in Iraq. The people who knew the region, the people who understood the consequences of an invasion were ignored by this White House.

So we have to ask ourselves, where is the accountability in this system?

From day one in this administration, the people who got it wrong have been rewarded, and the people who got it right have been ignored. And yet what this administration says to us is "Trust us." Just stay the course. More of the same.

Well, we have had years of failed policy. No one has been held accountable. What do we expect in the years ahead and the days ahead and the months ahead from an administration that refuses to hold those who get it wrong accountable and ignores all those who get it right?

Mr. DELAHUNT. That is an excellent point, my friend, if you would yield for just one minute.

Mr. VAN HOLLEN. I would be happy to yield.

Mr. DELAHUNT. But what is most disturbing is that this House, run by the Republican Party, has failed to ask those questions of this administration, and thereby abrogated its responsibility to the American people to ask the questions that would have made a difference.

Did Mr. Pillar come before this Congress?

I can enumerate name after name of voices that, well, I could put up a long list of generals, General Batiste, General Eaton, General Zinni, who spoke truth to power, who said, This is the wrong course.

And listen, we never had a hearing until just recently in the committee of jurisdiction, the House International Relations Committee. Shame on us. Shame on this institution, Mr. Speaker.

Mr. LARSON of Connecticut. Will the gentleman yield?

The gentlemen, I think, words of both my distinguished colleagues from Massachusetts and Maryland are summed up very well in Frank Rich's article yesterday when he said, This Presidency never had a vision for the world. It, instead, had an idea fixed on one country, Iraq, and in pursuit of that obsession, recklessly harnessed American power to a gut-driven improvisation and PR strategies, not doctrine, that has not changed, even now.

And with that, let me at this point recognize our colleague, the distinguished lady from Texas, who has also come to the floor this evening.

Ms. JACKSON-LEE of Texas. I thank the distinguished vice chairman for his leadership, his consistent leadership, along with my colleagues. And I particularly thank Congresswoman WATERS for the vision of the Out of Iraq Caucus.

As I listened to many of you isolate or emphasize intelligence failures, leadership failures, generals who had the expertise of war, I wanted to bring as we talk this evening, to the forefront the whole concern, the human toll.

As I know that we are speaking tonight, there are thousands of military families who are about the American fabric across the land. We already know that some of them are barely making ends meet. Some of them are on food stamps.

But just this past weekend we sent 140 more of those from my congressional district out of Ellington Field. Some have been redeployed before. Some are on their first, second, third redeployment.

If you speak to our Armed Services Committee, they will tell you that we have depleted most of the back-up of our military prowess. The battalions that were in Kuwait are not one, two, three and four. They are down to maybe one battalion, if you will, that is in reserve. And so we have a crisis not only that is impacting the direction of the Iraq war, but the overextending of our military.

The 20,000, 15- to 20,000 injured, who are physically maimed and mentally maimed; resources in the Department of Defense appropriations, not enough to cover the mental health needs of

these individuals, and as well, the silence of their injury, not being seen by the American people, and the cost that will be put upon society without, I believe, any direction in any harvesting of dollars that will help these military personnel.

The very crux of where we are today in Iraq has a lot to do with some of the misdirection, the political misdirection of our soldiers. They won the war, but yet they were expected to be policemen. They are expected to be political officers, if you will; they are expected to build infrastructure with no guidance. And so out of that frustration comes Haditha. Out of that frustration comes the brutal murder of a young woman and her family, because you are talking about redeploying soldiers once, but then two, three, four, times.

I met a soldier in the airport, and they said, four times I have been redeployed.

□ 2210

So as I look at the crisis in Israel and Lebanon and now to the other side of us, North Korea, frankly, any talk about attacking Iran begs the question of whether or not we have the kind of military resources to even engage in that kind of conversation.

I think we failed in Iraq because we did not engage. We did not first develop a political and foreign policy that could engage the region. Not Saddam Hussein. We know he was a despot. But the region, to ask for our allies' support, to ensure that the inspections had gone forward.

And now with Israel our hands are tied. We know that we want to ensure that soldiers are sent back to their sovereign country. Israel has a right to defend herself. But we also realize that the United States has to show a balanced perspective, calling for a ceasefire, sending an envoy team of high-level reporting directly to the President, and engaging in foreign policy that says we realize that the region is important. A secure and safe Israel, a two-state response to the Palestinian issue, but the region is important.

And when we went into Iraq, we said to the region you are not important. We can be an aggressor. We can go in and attack. We thought we could go in without any fallback, with impunity. And now we see that our generals are now disagreeing with us, that our allies in the Arab states are now falling away from us, that the crisis is at such a level that our credibility is so shattered that when the region needs us most, which is now, there is a question of whether or not we have the kind of leadership and credibility going in. This is what Iraq has brought to us and the American people.

I commend my colleagues for organizing this special order to discuss the conduct and costs of the war in Iraq. I look forward to engaging in dialogue with my colleagues about

the most important issue facing the country today and the most fateful and ill-considered decision of this Administration.

I. THE BUSH IRAQ POLICY HAS HARMED THE U.S. MILITARY

A few weeks ago we learned the sad news that the 2,500th soldier has been killed in Iraq. More than 19,000 others have been wounded. The Bush administration's open-ended commitment of U.S. troops to Iraq has weakened the U.S. Army, the National Guard, and the Army Reserves. The extended deployments in Iraq have eroded U.S. ground forces and overall military strength. A Pentagon-commissioned study concluded that the Army cannot maintain its current pace of operations in Iraq without doing permanent damage to the quality of the force. So more than three years of a continuous deployment of U.S. troops to Iraq has:

Contributed to serious problems with recruitment, with the U.S. Army missing its recruitment targets last year;

Forced the Army to lower its standards for military recruits; and

Led to military equipment shortages that hamper the ability of U.S. ground forces to do their job in Iraq and around the world.

II. THE IRAQ WAR HAS BEEN MISMANAGED AND THE RESULTS HAVE BEEN DISASTROUS

Quotes from the retired generals calling for the ouster of Defense Secretary Donald H. Rumsfeld:

We went to war with a flawed plan that didn't account for the hard work to build the peace after we took down the regime. We also served under a secretary of defense who didn't understand leadership, who was abusive, who was arrogant, who didn't build a strong team.—Retired Army Maj. Gen. John Batiste.

My sincere view is that the commitment of our forces to this fight was done with a casualness and swagger that are the special province of those who have never had to execute these missions—or bury the results.—Retired Marine Lt. Gen. Gregory Newbold.

They only need the military advice when it satisfies their agenda. I think that's a mistake, and that's why I think he should resign.—Retired Army Maj. Gen. John Riggs.

We grow up in a culture where accountability, learning to accept responsibility, admitting mistakes and learning from them was critical to us. When we don't see that happening it worries us. Poor military judgment has been used throughout this mission.—Retired Marine Gen. Anthony Zinni, former chief of U.S. Central Command.

I really believe that we need a new secretary of defense because Secretary Rumsfeld carries way too much baggage with him. . . . I think we need senior military leaders who understand the principles of war and apply them ruthlessly, and when the time comes, they need to call it like it is.—Retired Army Maj. Gen. Charles Swannack.

He has shown himself incompetent strategically, operationally and tactically, and is far more than anyone responsible for what has happened to our important mission in Iraq. . . . Mr. Rumsfeld must step down.—Retired Army Maj. Gen. Paul Eaton.

III. WAR IN IRAQ HAS DIVERTED RESOURCES AND ATTENTION FROM OTHER FRONTS IN THE FIGHT AGAINST GLOBAL TERRORIST NETWORKS

The killing of Abu Musab Al-Zarqawi was a major success for U.S. troops, but it is not likely to diminish Iraq's insurgency. Iraqis

make up 90 percent of Iraq's insurgency, unlike foreign fighters like Zarqawi, and a primary motivation for Iraq's insurgency is the U.S. troop presence. Even after the Samarra shrine attack in February threatened to push Iraq into all-out sectarian civil war, the vast majority of attacks still target U.S. forces.

Outside of Iraq, the Bush administration has failed to present a realistic strategy for countering the threat posed by the global terror networks. In a recent survey of more than 100 of America's leading foreign policy experts conducted by Foreign Policy magazine and the Center for American Progress, eight in 10 (84 percent) do not think that the United States is winning the war on terror. The War in Iraq has not helped America win the broader fight against global terrorists. Instead:

By invading Iraq without a realistic plan to stabilize the country, the Bush administration created a new terrorist haven where none had previously existed.

By maintaining an open-ended military presence in Iraq, the Bush administration is presenting U.S. terrorist enemies with a recruitment tool and rallying cry for organizing attacks against the U.S. and its allies.

According to the National Counter-Terrorism Center, the number of large-scale terrorist attacks in Iraq increased by over 100 between 2004 and 2005, with a total 8,299 civilians killed in 2005.

Osama bin Laden remains at large and Al Qaeda offshoots proliferate.

By diverting resources and attention from Afghanistan to an unnecessary war of choice in Iraq in 2003, the Bush administration has left Afghanistan exposed to a resurgence of the Taliban and Al Qaeda. The United States needs to complete the mission in Afghanistan and cannot do it with so many troops bogged down in Iraq.

By focusing so many U.S. resources on Iraq, the Bush administration has taken its eye off the ball in places like Somalia, which was overrun by Islamist militias tied to Al Qaeda last week.

IV. THE WAR IN IRAQ HAS INCREASED THE BURDEN ON U.S. TAXPAYERS WITHOUT STABILIZING IRAQ OR MAKING AMERICANS SAFER

Over the last three years, the United States has spent more than \$300 billion in Iraq, yet the investment has failed to stabilize Iraq or improve the overall quality of life for most Iraqis. According to the Congressional Research Service, total assistance to Iraq thus far is roughly equivalent to total assistance, adjusted for inflation, provided to Germany—and almost double that provided to Japan from 1946 to 1952. Yet on key metrics like oil production, Iraq has failed to advance beyond pre-war levels, and quality of life indicators remain dismal:

Oil production is below pre-war levels (2.6 million barrels per day in 2003 vs. 2.1 million barrels per day in May 2006);

The majority of water sector projects and health care clinics planned in 2003 remain not completed, despite spending hundreds of millions of dollars;

One in three Iraqi children is malnourished and underweight, according to the United Nations Children's Fund.

Rather than a record of progress and achievement, the Bush administration's record is one of corruption and waste:

Remaining unaccounted for is \$8.8 billion given to Iraqi ministries by the Coalition Provisional Authority (CPA), according to the Congressional Research Service;

Iraqi Defense Ministry officials spent \$1 billion on questionable arms purchases;

The Interior Ministry has at least 1,100 ghost employees, costing \$1.3 million a month.

In short, we have no strategy, no support from allies or friends in the region, a nascent civil war in the country we are supposed to be helping, an overstretched military, a misdirected counterterrorism effort, and a massive diversion of funds in support of a failed effort.

V. MULTIPLE DEPLOYMENTS HURT MORALE AND FAMILIES—MULTIPLE DEPLOYMENTS TAKING TOLL ON MILITARY FAMILIES, ANSWERS QUESTIONS OF HOW TO HELP FAMILIES OF DEPLOYED SERVICE MEMBERS

Military families need greater psychological, emotional, and organizational assistance according to the results of a new survey released March 28 of this year by the National Military Family Association (NMFA).

The study, "Cycles of Deployment Report," which focused on the needs of military families, shows service members and military families are experiencing increased levels of anxiety, fatigue, and stress. In response, NMFA outlined recommendations for meeting these challenges amid multiple and extended deployments, increased rates at which service members are called upon for service, and the heavy reliance on National Guard and Reserve forces.

This report clearly shows the range of support programs for families has expanded since the start of the War on Terror. However, multiple deployments and a high operations tempo mean different types of support are needed for families' continued success before, during, and after deployment. The survey results provide the Department of Defense a detailed roadmap for making sure families are taken care of during this important time.

Key findings from this study about the impact of deployment includes:

Almost half of respondents reported they have used or would use counseling services such as anger management classes and family counseling. Three quarters of those who stated they were better able to deal with subsequent deployments found counseling services to be helpful.

Two-thirds of military families surveyed did not have contact with their unit or unit network volunteer during the critical pre-deployment stage.

Less than one-half reported a consistent level of family support through the pre-deployment, deployment, and post-deployment phases. Seventeen percent reported no support was available.

Many respondents are concerned that volunteers who help families adjust to life during deployment and what to expect after the reunion are becoming fatigued and subject to "burn-out." They stated that the leaders of unit family groups should be paid or have paid professional support personnel assigned.

Military family members with civilian jobs face pressure to avoid taking time off before, during, or after deployment. Sixty percent of military spouses are employed outside the home and many have either quit their jobs or are considering it.

Military families are worried about how the reunion will go with their deployed family member even as they are worrying about their servicemember's safety in the field. Unfortunately, many families are not taking advantage of specific return and reunion briefings and activities.

Many respondents expressed that when entering a second or third deployment, they carry unresolved anxieties and expectations from the last deployment(s). While they may have gained knowledge of resources available to them, respondents whose servicemember deployed multiple times reported being more fatigued and increasingly concerned about their family relationships.

Although challenged by the demands of deployment, families noted they are proud of their servicemember and their service to our country. They understand that family support is primarily their personal responsibility, but they expect "The Military" to provide support as well.

VI. RECOMMENDATIONS TO DEAL WITH STRESS OF MULTIPLE DEPLOYMENTS

The National Military Families Association has developed a series of recommendations for how the Department of Defense (DoD) can better train and support military staff and civilian volunteers to assist military families, including:

Expand program and information outreach. Create formats for families to access support services and maintain touch with their commands and unit family group that live too far from either the unit or from other military families.

Assist families in developing in realistic expectations and then meet them. Educate military families about what to expect before, during, and after deployments.

Direct more resources to support family volunteers. Increase the level of resources and paid professionals both counselors and administrative, to support the logistics of family support and conducting family readiness activities.

Address return and reunion challenges throughout the deployment cycle. Help with the reintegration of a servicemember with the family after deployment.

Recognize that family time is important. Encourage service leaders to give family time a higher priority when planning operational activities, especially for servicemembers who have only been back from deployment for a few months.

Continue deployment briefings throughout the year. Never assume families have all the information they need. Ongoing deployment briefings can especially help new spouses or the parents of new recruits. Experienced family members also may find new challenges during a subsequent deployment or find the accumulated stress from multiple deployments creates the need for re-engagement with the family readiness/support group or for accessing different support personnel.

VII. IMPACT OF DEPLOYMENT OF NATIONAL GUARD

In addition, Madam Speaker, the large and extended deployment of National Guard units overseas has undermined the ability of the United States to deal with terrorist attacks or natural disasters. For example, State officials in Louisiana and Mississippi struggle to overcome the absence of National Guard mem-

bers from their States in the wake of Hurricane Katrina. In Louisiana, about 100 of the National Guard's high-water vehicles remain abroad—even as the State continues to rebuild from Hurricane Katrina. Coastal North Carolina is missing nearly half its Humvee fleet, and Guard officials there say shortages have forced the State to pool equipment from different units into one pot of hurricane supplies.

In addition, the equipment the Guard needs to help in the aftermath of natural disasters like Hurricane Katrina is in shorter supply because the gear is in use in combat zones, is battle-damaged, or has been loaned to cover gaps in other units.

CONCLUSION

Madam Speaker, our troops in Iraq have never faltered and they have never failed. They were never defeated in battle. They won the war they were sent to fight. They completed their mission. They performed magnificently.

They have earned the right to return home and be reunited with their families and loved ones. Now is not the time for us in Congress to falter or fail. Now is the time to embrace a plan for our troops in Iraq that offers a chance of success. We need a plan that will work. There is only one such plan. It is the Murtha Plan I support.

Mr. LARSON of Connecticut. Madam Speaker, I thank the gentlewoman for joining us again and again pointing out that she, like so many of us, has said good-bye to troops, mainly to Reservists and members of the National Guard who have been deployed and redeployed, and our hearts go out to their families and, as we have at the outset at the end of every one of these Iraq Watches, spoke about the difference between the warriors and the war, and we continue to salute them. And I thank the gentlewoman from Texas.

We only have a few more minutes, and I want the gentleman from Massachusetts and the gentlewoman from California to have the opportunity to close. But I do want to thank the Members for coming down here from New York and Maryland, Texas, California, and Massachusetts and say to the American people that we come here out of love of country. It is because of love of country and because we are more often than not denied a voice on this floor, not only denied a voice on this floor but in the committees, where oversight and review is so important.

Why is that so, you might ask? It is so, unfortunately, because this is a one-party town where our erstwhile colleagues on the other side are in control of the House of Representatives, the Senate, and the executive branch of government. And they are able to shut off debate and stifle this side of the aisle even from coming forward with alternative resolutions on matters so important.

FURTHER MESSAGE FROM THE
SENATE

A further message from the Senate by Ms. Curtis, one of its clerks, announced that the Senate has passed without amendment a bill of the House of the following title:

H.R. 42. An act to ensure that the right of an individual to display the flag of the United States on residential property not be abridged.

The message also announced that the Senate has passed with an amendment in which the concurrence of the House is requested, a bill of the House of the following title:

H.R. 5441. An act making appropriations for the Department of Homeland Security for the fiscal year ending September 30, 2007, and for other purposes.

The message also announced that the Senate insists upon its amendment to the bill (H.R. 5441) "An Act making appropriations for the Department of Homeland Security for the fiscal year ending September 30, 2007, and for other purposes.", requests a conference with the House on the disagreeing votes of the two Houses thereon, and appoints Mr. GREGG, Mr. COCHRAN, Mr. STEVENS, Mr. SPECTER, Mr. DOMENICI, Mr. SHELBY, Mr. CRAIG, Mr. BENNETT, Mr. ALLARD, Mr. BYRD, Mr. INOUE, Mr. LEAHY, Ms. MIKULSKI, Mr. KOHL, Mrs. MURRAY, Mr. REID, and Mrs. FEINSTEIN, to be the conferees on the part of the Senate.

SPREADING FREEDOM AND DEMOCRACY THROUGHOUT THE WORLD

The SPEAKER pro tempore (Mrs. SCHMIDT). Under the Speaker's announced policy of January 4, 2005, the gentleman from Iowa (Mr. KING) is recognized for half the remaining time until midnight.

Mr. KING of Iowa. Madam Speaker, I appreciate the privilege of being recognized here in the United States House of Representatives. And I came to the floor to talk about a number of things that I am convinced are of importance to Americans.

And as I sat through this discussion over the last 45 minutes or so that I have tuned an ear to this, I cannot help but move into some of my disagreements with the remarks that were made by some of my esteemed colleagues on the other side of the aisle.

And I want to state first that I appreciate the tone of their remarks tonight. Sometimes they are not so tolerant, they are not so patient, and the tone gets a little more intense than it was. It does not change my disagreement. I just appreciate the approach that they bring in our disagreement. And that is what we are supposed to do here. We are supposed to air our differences, Madam Speaker, and lay those things out, and the American people tune in on what we do, and they

weigh in with each of us, and we draw our conclusions based upon our convictions plus the input that comes from all over this country.

So I would first say that the statement was made consistently that we invaded Iraq totally on false premises. And, first, I would remind the body of resolution 1441, the last United Nations resolution that finally was the last straw. There were a number of other resolutions that Saddam Hussein violated. And we know that it was not our responsibility to prove that he did not have weapons of mass destruction. It was his responsibility to comply with the United Nations, to comply with the weapons inspectors. He did not do that.

The war that took place in 1991, Desert Storm, that war was never over because it was not completed because Saddam did not comply with the conditions of the cease-fire.

So the resolutions came before the United Nations. Resolution 1441 was the last-straw resolution, and that was supported by, of course, all members of the Security Council, and it passed the United Nations. Someone needed to enforce the resolution if the United Nations was to have any teeth in anything that they did. If there was to be peace in the Middle East, someone had to enforce that resolution. And if we were going to keep Saddam Hussein out of his neighbors' territory, like Kuwait that he went into that began this in the first place, someone had to enforce the resolution.

So the second generation of Bushes stepped forward and built a magnificent coalition, a coalition of more than 30 countries, a coalition of the willing that went in and liberated Iraq beginning in March of 2003 and crossed that country with armored columns into Baghdad, the largest city ever in the history of the world to be liberated and occupied by a foreign power. That happened in a matter of weeks, Madam Speaker. It was a magnificent military accomplishment. And it was done with fewer troops than the first time, I agree.

But as I listened too, I will not call it the dissent on this side because certainly we have not read the majority opinion. I hear from this general, he disagreed with the number of troops, and this general thought that we could not probably keep the Iraqis on our side, and this one thought there was going to be a civil war, and some of the people in the CIA disagreed, and a GAO analysis tells us that we really should not be there.

Who are these people, Madam Speaker? Who are they to be directing our foreign policy? Are these elected individuals that are the voices of the people? Are they the Commander in Chief? Do they speak for the Commander in Chief, Madam Speaker? What business do they have weighing in? Is their voice in the wilderness of any more

volume or any more credibility than the next person on the street, the next person that might be your neighbor? Do they have any more credibility than the elected Members of the United States House of Representatives or the United States Senate?

My answer to that is no. Some of them were involved in foreign policy. Some of them were involved in military policy. I will grant that. I heard three generals that were named. I think I could probably come up with six to nine generals that disagree with the President's policy. But if it is nine generals, I will see your nine generals and I will raise you 9,000 generals who do not disagree with the President's policy and have not disagreed with the President's policy.

And I would like to lay this out for the mission that it is. There is a Bush doctrine, and this Bush doctrine was finally recognized by the national news media when on the west portico of this Capitol building, President Bush gave his second inaugural address, and in that second inaugural address, he laid out his vision.

Now, it was laid out prior to that. It was laid out at least in his State of the Union address January 28, 2003. It was laid out in his defense strategy for the United States of America, which came out in the previous September, 2002. And he made it clear that his vision was to promote freedom, to promote liberty, especially in these countries that fostered and bred terrorists. It was a clear policy established. "The Nationality Security Strategy of the United States" was the name of the document published in September of 2002. Very consistent with the President's speeches. Freedom beats in the heart of every person. All people yearn to breathe free. Free people do not go to war against other free people.

And I have often, on the floor of the House of Representatives, Madam Speaker, talked about the similarities and the corollaries between the end of the Cold War and how we can get to the end of this global war on terror. And I point out that November 9, 1989, the Berlin Wall came down. It came down from the force of a people that wanted to be free. They yearned to get out of that trap that they were in.

□ 2220

They yearned to reach across to their fellow man, their neighbors, their family members that were divided by that wall down through the middle of Berlin. But it was the yearning for freedom that made the difference.

When they climbed up on top of that wall, they took hammers and chisels and chipped the stone out and the concrete out, and when they broke bottles of champagne on there and climbed up on top and danced and sang and celebrated, it was a glorious day.

Much of the world missed the point. Much of the world, and I remember

watching the network news media at the time, much of the world was talking about how families were being reunited, how important it was that we saw this joy of the reunification of families that had divided since after World War II.

As I sat and watched that, it occurred to me that when the Berlin Wall came down, the Iron Curtain came crashing down with it. The Cold War, the beginning of the end of the Cold War was over. In fact, it was over on that day. It took a little while to clean up the mess, but what happened when that wall was breached by people that yearned for freedom was the echo of freedom. Once they got past that wall, once they got through the Brandenburg Gate, it echoed across Eastern Europe. It echoed across Eastern Europe with a crescendo. And it was almost a blood-free revolution. For practical purposes, it was virtually blood-free.

As country after country yearned for freedom, Romania and Poland and Czechoslovakia, country after country, the Soviet Union collapsed, Madam Speaker and they had a measure of freedom far greater than they had ever seen before, and they still have a measure of freedom greater than they had seen prior to the end of the Cold War.

Hundreds of millions of people breathe free today because the Berlin Wall came down, because Ronald Reagan's vision, "Mr. Gorbachev, tear down this wall." When that happened, when that vision was realized and freedom echoed across Eastern Europe and hundreds of millions of people became free, they stood in the square in Prague and rattled their keys together by the tens of thousands and came to power and later had their velvet revolution and separated those two countries without blood, and they live compatibly today as two separate countries, the Czech Republic and Slovakia.

Those things happened in the blink of a historical eye, and it was a historical miracle. But that miracle that we look back on now from a period of 15 years or so, 17 years, that miracle that took place was the kind of miracle that can be emulated again.

The second George Bush, Bush 43, came to power, and this Nation was attacked. And when this Nation was attacked, it was clear that we had an enemy that was determined to annihilate us. They attack our value system, they attack our culture, they attack Western Civilization itself. And they believe that their path to salvation is in killing people who are not like them. In fact, they kill more Muslims than they do Christians or Jews, it is just that Jews are their preferred targets, Christians are their second preferred targets, but they will kill whatever target is in front of them if they think they can sow some kind of discontent that might breakdown social order, and if the social order gets broke

down, then they think they can somehow emerge into power.

So this is how this thing unfolded from 1989 quickly until today. The Bush doctrine is the vision of freedom echoing across the Arab world the way it echoed across Eastern Europe after the Berlin Wall came down in 1989.

Now, I direct the attention of the Speaker and the public to the vision of what the world looks like today. What has changed in the world since September 11, 2001? How much different is the map of the world today?

If we would paint that map with freedom, you can go to Afghanistan. When we made a decision to go into Afghanistan, people on that side of the aisle said it will be another Vietnam, it will be another quagmire. No nation has ever been able to go into Afghanistan and invade, occupy, liberate, be able to operate in that foreign country in an effective fashion. Everybody has been defeated, everybody has been run out. The British have lost, the Russians have lost. You can go back through history and no one has succeeded in Afghanistan.

Yet a month, actually less than a month after September 11, we had operations beginning in Afghanistan. And just a few months later, the Northern Alliance, coupled with coalition forces, routed the Taliban, surrounded and destroyed many al Qaeda and liberated Afghanistan.

There is a proud National Guard unit from my district that was on the ground in Afghanistan that protected the voting locations, the voting booths and the routes to them, and some of the areas other troops from our coalition forces protected in the rest of the areas, and on that date and that location, the people in Afghanistan went to the polls for the first time in all of history and cast their ballots for a free government and they ratified a Constitution that now directs a free people, and Afghanistan is an up-and-running free country.

This up-and-running free country has its problems, yes. And now that there has been an acceleration in the violence that has taken place in Afghanistan, the people who were afraid to criticize over these last 3 to 4 years or more are now starting to criticize again.

The level of their criticism goes up in direct proportion to the number of casualties that go up in Afghanistan. And it is the same in Iraq. You could index it. If you could listen to the decibels from the other side of the aisle, the decibels of criticism of our Commander-in-Chief, undermining our efforts to free the rest of the world and free this burden of terror off the American people, if you could measure the decibels of objection from your side, you could index that directly to the number of casualties of American and coalition troops, because it is political opportunism that raises the objections.

When the casualties go down, the objections go down, because the credibility diminishes. The casualties go up, the critics get up here, come to the floor and unload more and more. And when they do that, they are undermining our military who are on the line.

But some of these other points that were made. Interesting things. Why does it matter if people like us in the first place? I would ask that question. There is much concern about the rest of the world doesn't like us. We need to do something so people can like us again.

I recall going to the Greenbriar on a weekend that would have been the latter part of February in 2003. We had a bipartisan retreat where we got to know each other. We had breakout sessions and we brought in experts, especially from around the Middle East.

There was an entire handful of experts that had lived in the Middle East and knew the culture and history and had a sense of how they could explain to us what was going on. We hadn't studied the Middle Eastern culture very much as a nation. We know a lot more about it today.

But as these experts sat around and they started up the discussions and we had these sessions, and I didn't know the other colleagues very well, I had only sworn into this job a month earlier. So I spent a lot of time listening. It was important for me to learn what my colleagues didn't know and also to find out what they knew that they could impart to me. But I wanted to make sure that when I shared my viewpoint, that it was going into a place where there was a knowledge void so we could help fill that up. I hope they are doing the same thing with me. That is one of the ways things work.

The author and journalist Tom Friedman gave an address to start that weekend out, and that set the tone for the whole weekend. The question was, well, they don't like us very well, and they are not going to like us any better when we get done with them. If we go into Iraq, and hadn't gone in at that point, if we go in, they are going to start to hate us even more.

So we sat around and spent the weekend agonizing about how to make people like us. Well, how in the world can you decide to go make people like you when they just got finished bombing us, flying four airplanes into America, killing 3,000 Americans and believing that the 19 hijackers that were on those planes are now off in the next life with their 72 virgins each.

That is their belief system. And we are worried about people like that liking us? I will submit that you can't worry about that. You can't negotiate with people like that. The only thing you can do is stall them off with fear or take them out with force. Those are our alternatives.

A statement was made over here tonight, Madam Speaker, that we are in the middle of a civil war and we are being asked to protect the Sunnis from the Shiites. The middle of a civil war. There was a revolution that was introduced here that declared we are in a civil war. The junior Senator from Iowa introduced a resolution in the Senate that declared we are in the middle of a civil war in Iraq. The middle of a civil war.

They have declared that now, oh, since, 3, 4, 5 months ago. I haven't noticed that there has been an acceleration in the Iraqi-on-Iraqi violence in the 3 to 4 to 5 months since they began to talk us about being in a civil war.

Wishing it were so does not make it true. I can define "civil war" so the American public can identify this easily. We go back and look at our own Civil War. That was when brother was fighting against brother. Yes, it was North against South, but sometimes they lined up on opposite sides of the line and they shot at each other, and sometimes brother shot at brother, and I imagine that occasionally brothers actually killed brothers.

□ 2230

Friends that went to the military academy met on the line. I am thinking about General Armistead, and I believe it was General Reynolds on the line at the corner and the angle, at the battle of Gettysburg, facing each other, unit to unit. That was the Civil War. Half of the people in the military, or a number approaching that, took off their blue coats and put on grey coats, and they went to war against each other. They chose up sides and went to war against each other, Madam Speaker.

If there is going to be a civil war in Iraq, it will be when the Iraqis who are in uniform today, 257,000 strong, trained, in action, defending the security of that nation, all wearing the same uniform, some Kurds, some Shiias, some Sunnis all mixed up in their different units.

Unlike the local police that more reflect the ethnicity and the religion of their locality, the military is mixed up with about an even mix and unit by unit of Kurds, Shiias and Sunnis. I ask them, when I go over there, what is most important, the fact that you are a Shia, the fact that you are a Sunni, the fact that you are a Kurd, or the fact that you are an Iraqi?

And they have always answered, Madam Speaker, it is the fact that I am an Iraqi. And these Iraqis, 257,000 strong, defending Iraqis from terrorists who are within their midst, in ever-reducing numbers and ever-reducing resources are standing together shoulder to shoulder, fighting together.

They are not fighting each other. They are fighting together against the terrorists in their midst. This is not a

civil war. A civil war would be when the Iraqis that are in uniform defending Iraqis, 257,000 strong, choose up sides and start to shoot at each other. That is not happening. It has not happened. And if it begins to happen, that does not mean that they are certainly in a civil war, but that would be an indicator to start watching pretty close, Madam Speaker.

So also the argument from the gentleman from Massachusetts, we cannot secure Afghanistan with less than 150,000 more troops than we have, quoting some expert, well, I think the experts that the President has employed in both Afghanistan and Iraq have done pretty well.

In fact, it was essentially the same people that planned Afghanistan, that planned Iraq. They had the right number of troops in Afghanistan. They said it could not be done, but it was done. And it is a magnificent success. The troops that they sent into Iraq were absolutely adequate for the job of liberating Iraq.

Now, the circumstances that follow afterwards apparently are not bad enough for the people on the other side to say, well, I thought you should have had 500,000 troops there, but now I think you ought to have no troops there. And how can you say that we should have more but yet we should not have any? There is not a consensus on the other side of the aisle. I believe we need to follow our Commander in Chief.

The other statement, we do not have an exit strategy in Iraq.

Mr. DELAHUNT. Madam Speaker, will the gentleman yield?

Mr. KING of Iowa. I yield to the gentleman from Massachusetts.

Mr. DELAHUNT. Madam Speaker, I was sitting in the Cloakroom, and I heard my good friend and colleague from Iowa refer to the gentleman from Massachusetts. And I just wanted to clarify for him it was not I that said to stabilize Afghanistan what is needed is 150,000 more troops; that was the defense minister of Afghanistan.

Mr. KING of Iowa. Reclaiming my time. Madam Speaker, I did refer to him as some expert, because I did not pick out how you defined that. But I did attribute it to an expert.

Mr. DELAHUNT. If you continue to yield for just a moment, I do not want to interfere with the gentleman's hour.

But I would suggest to my dear friend that the defense minister of the country in question, Afghanistan, should be considered the ultimate expert. And, again, my good friend earlier indicated that there were Members on this side of the aisle that were reluctant, or were critical before we went into Afghanistan.

Again, with all due respect, I would suggest that the vote in this institution was something along the lines of 430-1. So that that particular author-

ization received unanimous support. And I dare say it was a good decision and a right decision.

The problems that I and I know some of my colleagues on this side, as well as some of your colleagues on the other side, have is that we left there too early and that is why the expert in this case, who is the defense minister of Afghanistan, said that for the country to be stabilized so that democracy, which we both, I think we all want to see for the Afghanistan people can really take hold, five times the security forces that exist today are necessary.

Mr. KING of Iowa. Reclaiming my time. I pose the question to the gentleman from Massachusetts, and that is, Are you advocating that we send 150,000 troops to Afghanistan? I yield.

Mr. DELAHUNT. No. What I am suggesting is that we should participate in training Afghans to meet those particular numbers, because we had set a benchmark of some 70,000. And that benchmark has been revised downward, downward from 70,000 to under 50,000.

And the defense minister in Afghanistan says we need more resources. In fact, I am sure the gentleman is aware of this, but President Bush just recently said that he would take under consideration, Madam Speaker, doubling the \$2 billion that were appropriated so that more training could be provided. My problem is we should have done it 4 or 5 years ago.

Mr. KING of Iowa. Reclaiming my time. I do appreciate the gentleman's sentiment on this. I know that you are right on the vote. I am confident that I can go back through the CONGRESSIONAL RECORD and pick out the rhetoric that supports my remarks.

But I guess it is a balance that there was one vote against the resolution. I do recognize the gentleman's point. I look forward to bringing all of the resources necessary to protect America in the future anywhere we have to in the world.

I thank the gentleman from Massachusetts. Picking up on my next point, it is that the statement made here on the floor that we are not winning the war on terror, "the rest of the world believes we are losing the war on terror."

I do not believe that is true at all. In fact, who would want to trade places with the other side? How would you like to try to conduct or construct an optimistic scenario if you were, say, Zargawi before he was sent to the next life by the United States Air Force?

How would you put together a scenario by which you could possibly win? I would point out that listening to one of our experts, one who is actually under the command of our Commander in Chief, General Casey, who said the last time I was over there, he said the enemy cannot win if the politicians stay in the fight. That is what I am about, Madam Speaker, is seeing to it that the politicians stay in the fight.

Our soldiers and marines deserve it. They deserve everything we have to support them. When they approach me in Iraq and say to me, I am proud to put my life on the line and commit a year out of my life to defend freedom and give the Iraqi people a chance at freedom, but why do I have to fight the United States news media too, why do I have to fight the anti-war detractors, my answer to them has been, you should not have to do that. That is my job. And it is a job of all of us, to stand up together.

But also the criticism that we do not have an exit strategy in Iraq. That is not a criticism that sets on very solid ground from my perspective. I support the President in that. You cannot give people a date that you are going to pull out. And so I would submit to the other side of the aisle that has found some experts to support the position that they are advocating, they should listen to an expert that I would think that they should support, and that would be the expert called former President Bill Clinton, who said, and agreed with President Bush, that we cannot give the enemy an exit date or they will just simply go underground.

He said, you cannot give them a date. Bill Clinton, 2 days ago supporting President Bush and his position not to telegraph when we might be ready to deploy out of Iraq. And so the selective process is going on, pick the people that support your position and then declare them to be experts. And I generally stand with my position. But, let's see. The people who got it right were ignored; the people who got it wrong were rewarded.

□ 2240

I think it is a bit early to declare such a thing. I think historians will make that decision. I think the advisers that got us into Afghanistan successfully and successfully have managed the liberation of Afghanistan got it right.

I think the same advisers were there to put together the strategy for Iraq, and given the military operations that are there, the liberation of Iraq, they got it right. To maintain the safety and security in that country has been difficult, but the strategy, there is not a consistent viewpoint here, to get Americans out is what we hear from people like Mr. MURTHA, because they are targets of the enemy.

If we pull out to the horizon, which we found out, I thought the horizon might be over there where the sun sets or where the sunrise is or up on the hill, the other side of the hill, just some place out of sight would be the horizon. We found out a month ago their horizon is really Okinawa. He said let us redeploy our troops to Okinawa, then if things get bad, we can go back in there.

So the Out of Iraq Caucus, I wonder how large a caucus that is, but their

position doesn't have a futuristic view. What takes place in the Middle East?

I would say this: We need to be looking at the Bush doctrine, we need to be looking at when the Berlin Wall went down, and that echo of freedom that I talked about earlier, we need to be looking at the way a map of the world looks today, and a free Afghanistan, 20, 25 million people and a free Iraq; 25 million people, an Iraq that is far safer than the news media would have us believe, that cameras are trained on the IEDs before they go off, but they are not trained on the happy Iraqi playing children.

We have a new conflagration in the Middle East. We have the circumstances with Israel, an Israel that has been trading land for peace. When there is no rational reason to trade land for peace, there is no historical model of somebody trading off land and getting peace.

We could go back to the prior, to World War II, you would think the focus on that, if that history would be pretty acute, the trade-off for the Sudetenland, to Hitler, to get peace, and finally, the carving up of Poland between the Germans and the Russians, and ultimately war.

It always happens, you can never trade land for peace, and yet the Israelis pulled out of Lebanon, and I understand why. It was costly to be there, but the agreement was that Hezbollah would not be operating in southern Lebanon or in Lebanon at all.

Finally, most of the Syrian troops got out of there, not the Syrian intelligence people, but the Syrian troops. Hezbollah accelerated and built up their forces there, and they smuggled in missiles from Syria, probably from Iran to Syria and into Lebanon. Israel sits there today in a two-front war, being shot at from Gaza and being shot at from Lebanon, missiles raining down from the north, raining up from the south.

I would submit that if they had succeeded in moving the Israeli people, the Jewish people out of the West Bank, moved them up against the fence, or inside the fence, if they had succeeded in allowing an autonomous West Bank, they will be firing missiles from the West Bank as well, and the only area Israel would not be shot at from right now would be from the sea.

The sea, of course, is the place where the neighbors of Israel would like to drive all Israelis, and they don't have very long. They cannot make very many mistakes. I am glad that they have stepped up to defend themselves, and I am glad that they began operations north and in the south.

It is the right thing to do, and talk of negotiating for peace without the eradication of Hezbollah in Lebanon would be a mistake. They must go in, and they must take out Hezbollah, take them out, take out their entire

ability to conduct military operations there, pacify southern Lebanon, before they can come back out of there again. It has got to happen. If it doesn't happen, there will not be peace. The missiles will continue to rain in.

The Syrians, complicit in this, sitting up there, providing military weapons; and Iranians, we believe, were down in Lebanon helping advise and helping to fire off some of the rockets that were fired, especially the one that went to the Israeli ship.

We have acts of war being conducted by Iran against Israel, and I believe acts of war being conducted against Israel by Syrians. The Israelis have to be looking to the south to Gaza, to the north to Lebanon, and over to Syria and on over to Iran.

They have got to look at their sites at four different locations. We must stand with them every step of the way. We have got to do so with a vision, with a vision of how this end game might work. We need to be thinking that the nuclear capability, the growing nuclear capability of Iran in the very belligerent hands of Ahmadinejad is far too dangerous.

We have to believe that if he had the capability to drop a nuclear warhead into Tel Aviv, this would be about the time. We have to understand that Hezbollah is conducting operations and firing missiles into Israel at the direction of Iran.

Iran has been and is providing the supplies. Iran has recruited, founded, recruited and trained Hezbollah. Hezbollah is an arm of Iran. They cannot shake the responsibility that when Hezbollah acts in an act of war against Israel, it is really an act by a surrogate of Iran.

I came to the conclusion in September of 2004 that there was a 95 percent probability that we would have to go in and take out the nuclear capability of Iran. We cannot sit and let a rogue nation have that capability, a nation that deals with, trades with, and probably is able to swap nuclear secrets with North Korea.

These two axes of evil are still out there, and they are still dangerous, and they are getting ever more bold. When we have people here in this Congress, that say we are losing this war on terror, that Iran is a winner, that Hamas is a winner, that Hezbollah is a winner, I don't know how they can be winners when they are being taken out 24 hours a day by the IDF.

But that scenario gives them hope. Members of Congress think they are winning. Then their optimism will be stronger, or they will probably lack the defeatism that we think they are getting.

So we must look at Israel, we must look at this end game with the idea that if we have to take action, then we may have to do it in a more urgent fashion than we might otherwise, because of the war that is breaking out in

the Middle East, the war that is breaking out with Israel.

On that subject matter, I trust our Commander in Chief to be putting an end game in mind. I stand with him in his vision on this safety and this security and on a strategy to get to the end of this global war on terror. I would ask the American people to envision this, envision how freedom echoed across Eastern Europe in 1989.

Country after country after country became free, and today they go to the polls, and they choose their leaders. They direct their national destiny, and they join the European Union, and they join NATO, and they are good allies, and they join the coalition and our operations in Afghanistan and the coalition of our operations in Iraq.

The people who are the newest to freedom are the first to fight for the freedom of others. I stood in a military base in Basra some time back, where a British general was commanding the region down in the southern part of Iraq. In that group, that group of soldiers, if you look at the flags on their shoulders, there were British soldiers, Australians, Romanians, Polish, Danish, Netherlands, I am forgetting one or two, but that was all, just happened to be those in a group. I lined them up and took a picture. That is the true coalition forces. They are there.

Shortly after I came back from Iraq, the Australians doubled their troop involvement in Iraq. They doubled it, just simply doubled their troops. Do you think it made the news in the United States of America? Only one or two news outlets when we did a LexusNexus search, but, you know, al Jazeera picked it up. You know, al Jazeera scooped the major news media in the United States, because they were paying attention.

□ 2250

So, Madam Speaker, we will stand with the Commander in Chief with the vision for freedom, and we will look forward to the day that the Arab world breathes free, and when that day comes, country by country, piece by piece, the people that get up in the mornings there then can turn their outlook from teaching hatred, from making bombs and trying to kill others to try to drag the rest of the world down, they can turn that focus to building their homes, building their families and their communities and their mosques or their churches, building their country into a model of prosperity instead of a model of destruction.

I think in the amount of time that I have, I am going to shift subjects, and we will talk about the security on the other side of the United States. I would point out that we have also a security concern on our southern border; and down there, that 2,000-mile long border that runs from San Diego to Browns-

ville, Texas, that border has, according to the Border Patrol testimony at the Immigration Subcommittee hearing, as many as 4 million people pouring across that southern border annually. That is about 11,000 people a day, 4 million people annually.

In the past year, in 2005, they stopped and turned back 1,188,000 people, most of them run through, identified, put on a bus, taken to the border and sent back through the turnstile into Mexico. The year before, there was 1,159,000. The number has been growing. It has crept up from 900,000 up to now nearly 1.2 million, 1.2 million people caught when we are catching a fourth to a third, by most of the testimony that comes here.

But when I go down on the border and I meet with the Border Patrol officers down there, Madam Speaker, I ask them and I propose that number, are you stopping 25 percent. I found no one down there on a regular basis that told me that they stopped 25 percent of the illegal border crossings. Most of them, they gave me the number of 10 percent, and one, when I submitted the 25 percent number, actually went into hysterics and said, oh, it is not more than 3, perhaps 5, percent; 3 percent of illegal crossers and 5 percent of the illegal drugs that are coming across the border.

Now, when we talk about numbers of those size, it is hard to put it into perspective. So I would put it this way: every time an illegal comes into the United States across the Mexican border, that is an average of one every 8 seconds. In the United States, every 8 seconds, there is a baby born in America, and it might be an anchor baby and a baby born to an illegal mother. That baby will have citizenship here in the United States. I am opposed to that policy, but every time a baby is born, an illegal walks across the border into the United States. As our population grows, half of it is an illegal population.

A bull ride is 8 seconds long. For the length of a bull ride, a baby is born, and an illegal crosses a border. A cowboy rides a bull another 8 seconds, only they are not riding 24 hours a day, we are having babies and having illegals come across every day, 24 hours a day.

How many people are 11,000 daily? To measure 11,000, I would put it this way. Santa Ana's army that entered into Texas that began the great war that ended up in a free Texas and ultimately Texas, a great State in this Union, Santa Ana's army was about 6,000 strong. When they stormed the Alamo, they were 2,500 to 3,000. He had split his forces; 2,500 to 3,000 storming the Alamo, and we think that was a massive armed force, and it was. But Santa Ana gathered all his army up together and he came across the border one time and wreaked havoc across Texas; twice that number marches across that bor-

der every single day. And what does America have to say about that? Hum.

Well, we can find a way. They have absorbed themselves into our society. Somebody needs somebody to do some cheap work, and so we really should not concern ourselves with this. I disagree with that, Madam Speaker. I think that a country that does not control its borders cannot very much longer declare itself to have borders, and a country without borders is not a country, a simply amorphous mass of a North American continent.

We have to have borders and we defend them, and we have to defend those borders for all the reasons that we know, but there are other reasons that most of America does not know, and that is, as we hear the President say, we cannot stop people from coming across the border that just want to come here for a better life. Well, we cannot? Of course, I think we can.

And yet, if he will concede that point, that point that we cannot stop them unless we legalize them so that they can come back and forth in some legal fashion, if that cannot be done, how in the world then does the President or anyone else propose that we can stop the force of \$65 billion worth of illegal drugs coming into America? Ninety percent of the illegal drugs in America cross our southern border and that is according to the DEA. That is \$65 billion worth. That is marijuana, methamphetamine, and heroin that comes in from China and gets funneled up this way. It is cocaine that comes from Colombia.

Colombians used to have a pretty lucrative trade on cocaine until the Mexican methamphetamine brought their market down; and on top of that, when September 11 came, we tightened up the security of our airports, and it is a lot harder for them to smuggle cocaine into the United States. So now they have a transportation route that comes up around the inside of the gulf, along the rail line in Mexico, a lot of it controlled by MS-13, the most brutal gang this continent has ever seen.

But you have Colombian cocaine, you have Mexican methamphetamine, you have Chinese heroin and Mexican marijuana coming into this country, totaled up value, \$65 billion. Now, the force of a \$7- or \$8-an-hour job for someone that wants to come and pick lettuce, tomatoes or apples or whatever it might be, that is one thing. Somebody wanting to walk across the desert to pick apples, it is hard to fathom somebody that wants a better life that much, although we have to sympathize with that and solution-wise in fixing Mexico, not in draining off all of the discontent, and the poor people that are in Mexico and in the United States. But the problem is we can deal with that.

What we have not done is taken steps against the \$65 billion worth of illegal

drugs; and as I go down there, Madam Speaker, and I sit along that border at night and listen to the infiltration of the illegals sneaking through the brush, being unloaded out of the vehicles, picking up their packs and marching off through the brush, when it gets light and I go and look at the tracks and see where they are marching off through the desert and they are carrying a 50-pound pack of marijuana, pack trains of people, 10 or a dozen or 50 or even as high as 100 people, each with 50 pounds of marijuana on their back, marching across the desert because they cannot drive a vehicle across there in some of those locations now because we put in vehicle barriers, well, the vehicle barriers are environmentally friendly. They have let the desert antelope crawl through. And a man with 50 pounds of marijuana can throw his pack through there, crawl through, put on his pack and walk across the desert. That is what is going on.

So we need to force all traffic through the ports of entry. That is my mission. That is why I believe we need to build physical barriers to do that, Madam Speaker.

So I have designed one. I have spent my life in the construction business. We build things, design things, pour structural concrete, make it out of steel. You name it, we have done it. Mostly it is earthwork of all kinds. So I submit that on this desert floor, when I go down there, it lays pretty good for this job.

I would, Madam Speaker, dig a trench like this in the desert floor, dig a trench down through that desert floor, and I will demonstrate another thing. As that trench is dug, we pull a slip form trencher right along behind it. It will be pouring concrete right in the trench. As you move the trench, the concrete would move along like that. You come along in a couple of days when this cures, leave a slot in the middle, and start setting precast panels right up in this slot that I have. These would be already made, already cured. They would be about 10 feet wide or 13½ feet long, and they are designed to be a 12-foot high constructed height.

And we just pick them up with a crane, set them in like that. You can see how easy this is, Madam Speaker. Once you get the trench and the footing poured, it is a simple task to set the precast concrete panels right into the footing and into the slot.

Now, that builds us a 12-foot high concrete wall. I do not submit that this wall be built right on the border because I think it is important for us to be able to do surveillance on both sides of this wall.

□ 2300

I would submit that right on the border, we put up a 10-foot-high chain link fence, a chain link fence with about

four barbs tipped out to the south. I would hang a sign about every quarter of a mile, in Spanish, that tells people go to this Web site or go to the U.S. consulate and here is where you apply to come into the United States legally. That would be my approach.

And then, when they cut through the fence, when they dug under the fence, when they went around it, over it, or through it, whatever they did, that would tell us that is a location where we need to beef it up.

And I would pull back 60 feet. I would put this footing in, and I would drop this concrete fence, and they will have demonstrated that we need it because they have violated the one that was the lighter fence that they didn't respect.

And so, we have this concrete wall. It is about 6 inches thick. It ends up 12 feet high, 10-foot-wide panels, one after another. And our little construction company could toss together about a mile a day of this once we got going. Now, we won't be bidding any project like this, but we have the capability of doing it is my point.

And certainly there would be a little bit of engineering design that would be touched up on it. But this is basically the design that I believe we would be ending up with. It costs about \$1.3 million a mile.

Now we are spending \$8 billion on our southern border, \$8 billion. That is \$4 million a mile every year, and we are paying Border Patrol people to drive back and forth on HUMVEES, to park and look at it and be a deterrent just for being there, and we are paying all the administration that it takes to support the people and, of course, their weapons and all the technology.

And I am for supporting this wall with additional technology. And it is okay with me if they want to fly drones around and let us know when people are approaching the wall. But I will tell you, they will find that this wall doesn't let them cross it.

And people will say, well, if you build a 12-foot wall, I will show you a 12-foot ladder. And that might happen, Madam Speaker. So I have a little bit of a solution for that. And that solution consists of, this is actually a little piece of solder, but just a little nice little concertina wire to put on top of this wall as a deterrent. Easily installed. And you can see that it can provide that deterrent effect.

Now, I also submit that we run a little current through this wire, and that provides also as a deterrent. Now it is up there where you would have to have a ladder to get your hands on it. But that will keep people from putting a ladder up against it. And then we will have our borders respected and protected.

And if we fail to do this, Madam Speaker, we are going to continue to see 11,000 people a day, one every 8 sec-

onds, \$65 billion worth of illegal drugs pouring across this border.

Whenever we built the fence in San Diego they went around the fence. And each time that you do that they will go around it because the money is too great, \$65 billion. We have got to shut it off. And we will build this thing where they don't respect a more modest barrier, and continue to build until such time as all traffic goes through the ports of entry. And that means legal and illegal, through the ports of entry. And then we will beef up our people there. We beef up our technology there.

And if we do that we can then finally say we have control of this border. And if we enforce there, if we end birthright citizenship, and if we enforce employer sanctions, those three things will solve this issue.

And I would ask the President commit to enforcing our immigration laws, commit to controlling the border, spend the next years of your administration establishing that. And when that is done, while the next President is campaigning for the 2008 election to be sworn into office here in 2009, that campaign can be about whether or not we need guest workers in this country and how many we might need and of what skills they might come from.

But we cannot build a guest worker plan on a false foundation, a foundation of the promise of enforcement. And the only way we can ever know that we have enforcement is to actually enforce, prove it can be done. If we prove it can be done, then we will have something solid to build this guest worker plan on. But without that, we are building a guest worker plan on hypotheticals. The hypothetical will be that we will enforce the law. That has not happened. It has diminished over the last 20 years. An employer under Bill Clinton was 19 times more likely to be sanctioned for hiring illegals than under our current President. And so I am asking, let's enforce the law. Let's demonstrate that we can do it. Let's put fixtures on the border, because this \$1.3 million per mile is a one-time investment that will free up other people.

As I asked in the testimony down in Laredo of the sector chief for the Border Patrol there, I said, if you have a wall like this, does it take more or less border patrol officers to protect that border? And his answer, even though it isn't the administration's position to support this, was it takes less border patrol officers to enforce this wall.

So, Madam Speaker, that is my encouragement for the President. That is my encouragement for our Commander in Chief. That is my encouragement for the American people. Stand up and support our military in the Middle East and defend this country, and we will continue to be a great Nation.

30-SOMETHING WORKING GROUP

The SPEAKER pro tempore (Mrs. SCHMIDT). Under the Speaker's announced policy of January 4, 2005, the gentleman from Florida (Mr. MEEK) is recognized for the remaining time until midnight.

Mr. MEEK of Florida. Madam Speaker, it is an honor to address the House. And we would like to also thank the Democratic leadership for allowing us to have the time.

As you know, the 30-something Working Group, we come to the floor daily to share not only with the Members of the House, but also the American people, about plans we have that is in holding or in waiting, not because of the fact that we are not willing to move forth on behalf of the American people, it is because the Republican majority has decided not to govern on the side of the American people.

Mr. Speaker, I feel that this is very, very hard core for everyday Americans, because they are in waiting, not only in the area of minimum wage, but also affordable fuel prices and real solutions as relates to protecting our country and also making sure that our veterans who have allowed us to serve, who have allowed us to salute one flag, will be honored in the area of health care and other areas that we have promised them.

Mr. Speaker, I am going to start off my comments, and I am glad Mr. DELAHUNT is here, and I know others are on their way to the floor, to at least talk about this minimum wage conversation that we are having here on the floor of the House of Representatives. I feel that we should take action. We want to take action on this side of the aisle, Democrats united in making sure that some 6 million-plus Americans are able to get a pay increase, something that Members of Congress have enjoyed over a number of years, but everyday working Americans are not able to receive more minimum wage than what they are receiving right now. They are, right now, making \$5 and some change. And I mean, it is unconscionable, Mr. Speaker, for Members of the House to be able to walk away with an increase, cost-of-living increase; meanwhile, those individuals that are punching in and punching out every day, are still making the same rate that they were making in 1997. It would be an uproar here in this House if Members of Congress had not received a pay raise since 1997.

One thing that I can say here on this side of the aisle, the Democratic leadership and the Democratic Caucus has said we will not stand for an increase for Members of Congress to make more money if we are not going to raise the level of minimum wage for everyday Americans.

And so, again, Mr. Speaker, we come with third-party validators. We come with the facts to share with the Amer-

ican people, and we come to let the American people know, and Members on the majority side, that we have the will and the desire to lead, and we will if we have the opportunity after November.

I just wanted to share a few things because there are a lot of folks that are out there saying that they are fighting on behalf of the everyday American. So I thought I would just bring a couple of visual aids, and also some information. This is the source of the College Board 2005 as it relates to the census and what Americans are dealing with.

I want to start with this next chart here. I want to start with this chart. Minimum wage. And this is real economic change under Bush. Here you have the minimum wage, Mr. Speaker, that is at zero starting in 1997 to now. Since 1997 to now, whole milk has gone up 24 percent. Bread has gone up 25 percent. A 4-year public college education has gone up 77 percent. Health care insurance has gone up 97 percent. Meanwhile, Americans are still making \$5 and change. Regular gas has gone up 136 percent, Mr. Speaker. Still no message from the Republican majority for everyday working Americans that punch in and punch out every day.

□ 2310

Here are some other statistics: still from 1997, no increase in the minimum wage for everyday working Americans. College tuition has gone up in private institutions 40 percent. Gas prices, again, as it relates to the middle class, has gone up 47 percent and 55 percent for prescription drugs. I think it is important that we look at those.

To go further, Mr. Speaker, I think it is important that we share this. The facts are hard, but they are true. In 1998 a Member of Congress received a raise of \$3,100. That was in 1998. In 1998 the minimum wage was zero. Again, in 2000 Members of Congress received a \$4,600 raise. That is more money. Everyday working Americans in 2000, minimum wage, zero, thanks to the Republican majority.

I just said in 2000, Mr. DELAHUNT, Members received a pretty substantial raise. In 2001 Members of Congress received a \$3,800 raise. Of course, we are not minimum-wage workers. The American people in 2001, zero. Nothing. The Republican majority said they are not going to have it. In 2002, again a \$4,900, that is a lot of money, increase for Members of Congress. The American people in 2002, zero.

It pays to have a voting card in Congress. You can give yourself a raise, but the folks that elect you just have to suck it up.

Now, this is like on a roll here in Congress. In 2003, a \$4,700 increase in Members of Congress' pay. The American people, guess what, zero. Nothing at all, thanks to the Republican majority. In 2004, a \$3,400 raise for Members

of Congress. Guess what, Members, American people, minimum wage raises, zero.

These are the facts. I challenge any Member on the Republican side, the majority, to come down and challenge me on these facts.

In 2005 it continues, a \$4,000 raise. Once again, you are a Member of Congress that comes up here, who say they are representing you, it is a wonderful thing. Get a raise in 2005, \$4,000. The American people, zero, Mr. Speaker.

In 2006 Members of Congress' proposed raise, \$3,100, Mr. DELAHUNT. My 9-year-old son and my 11-year-old daughter can guess, the American people to this date, Mr. Speaker, zero.

Now, I want to go back to this chart because I think it is very revealing and very accurate: "I have been in this business for 25 years, and I never voted for an increase in the minimum wage and I am opposed to it, and I think that a vast majority of our conference is opposed to it." That is the leader of the Republican Congress. That is the majority leader.

Now, Mr. DELAHUNT, there are Members that come to this floor and say the Democrats are just demagoguing. There are people who come to this floor and say we are for you; they are not for leading.

I think it is important, Mr. DELAHUNT, that we come to the floor and share with the American people and the Members of Congress that we will not rest even though we are in the minority, that we are still willing to fight for them.

Now, the difference between the Republican majority and the Democratic minority, Mr. Speaker, is the fact that the majority has the power to be able to make things happen here in this House on behalf of the American people as it relates to the minimum wage, and it is fair play. I went through this list. Pay increases year after year, \$4,000 here, \$4,700 there, \$3,100 here, and zero since 1997 on behalf of the American people who punch in and punch out every day.

Meanwhile, health care cost is up. Meanwhile, the cost of bread and milk is up. Meanwhile, gas prices are up by 136 percent. But back at the ranch and here in this House, the Members of Congress are being taken care of. The special interests are being taken care of. But guess what, the individuals who woke up early on a Tuesday morning for representation are being left behind since 1997, and there are Members on the majority side saying over their dead bodies, literally, will they receive an increase because they are so indebted, Mr. DELAHUNT, to their special interests.

So all we can fight with, Mr. Speaker, here is the fact, not fiction but fact, that we have a Republican majority that is willing to govern for the few, for those individuals who have the opportunity to come to Washington and

to be able to gain access through the K Street Project and other programs that allow them to give politically and have gangs here in the House.

A former Member of this House used to boast about the fact that if they were not on the list of contributors, they couldn't come in and see them. That is a former Member of the House, and if anybody wants to challenge me on it from the majority side, I will be happy to reveal that former Member's name. I think we all know, and it was an active program in the House, and I believe there are still some elements of that program now. The fact that special interests do not want an individual making \$5 and some change to receive a couple dollars' increase is very unfortunate. And, Mr. DELAHUNT, I am very concerned about that.

Let me just take 3 more minutes, Mr. DELAHUNT, and then I am going to yield to you because you have some very interesting charts over there.

Let us talk about who is getting what. In the past you have heard me read this, and I want to read it again because, when it comes down to when their constituents want to know whose side they are on, I want the Members to be armed with the facts.

I am proud that I am trying to do everything I can do on behalf of my constituents back in the 17th Congressional District in Dade and Broward County. But by their sending me to Congress and Mr. DELAHUNT to Congress, they federalized us to represent the people of the United States of America, and I think it is our obligation, Mr. Speaker, to share the facts.

Members can follow me. They can go on Washingtonpost.com. This was an article November 16, 2005, on the front page: "A White House document shows that executives from big oil companies met with Vice President DICK CHENEY's energy task force in 2001, something long suspected by environmentalists but denied as recently as" a week ago "by industry officials testifying before Congress. The document, obtained this week by The Washington Post, shows that officials from the ExxonMobil Corporation, Phillips, Shell Oil Company, and BP America Inc. met in the White House complex with the Cheney aids who were developing national energy policy, parts of which became law and parts of which are still being debated" here in the House.

This is an article. It is not from the Democratic Caucus. It is not from my office or Mr. DELAHUNT's office.

Let us see what happened. That meeting, Mr. DELAHUNT and Members, was in 2001. Here are the profit margins of big oil companies since that meeting: in 2002 I think that was a pretty good meeting to go to, \$34 billion in profits, thanks to the Republican majority's passing policy that would allow oil companies to spend the taxpayers' dollars and to be able to have subsidies

and make these profits. In 2003 \$59 billion in profits. I think that meeting was worth going to and whoever recommended and got them into the White House complex to meet with the Cheney aides, I think they got a promotion and possibly a bonus.

□ 2320

In 2004, \$84 billion oil profits up. Guess who is paying for it? The American people. In 2005, \$113 billion in profits. And the numbers are not even in from 2006.

Mr. Speaker, I know that these facts have to have some Members who may be in their offices right now or sitting up in their beds feel uncomfortable. But, unfortunately, that is not happening, because it continues.

Why is this man smiling here? It is nothing against him. I don't have anything personally against oil companies. They are getting what the majority Republican Conference here in this House has allowed them to have. It is one thing for someone to say "I will support you and your political endeavors." It is another thing for you to say "I am with you all the way, even if it costs my constituents more at the pump."

Here is a man that a lot of workers wish they had such a deal. A \$398 million retirement package and a \$2 million tax break ala the Republican majority. An Exxon former executive.

It is almost, Mr. Speaker, unfair. Someone may say that. If I didn't have the third-party validators, the CONGRESSIONAL RECORD and votes by the majority to back up what I am saying, some folks would say that is unfair. I wouldn't even be able to walk the halls of Congress or talk to my colleagues on the Republican side if I wasn't telling the truth.

I think it is important that everyone understands, if you are a Republican, you have to have a problem with what I just presented. You have to. If you are a Democrat, you have to have a problem, the information I am sharing with you that the Republican majority is allowing to happen.

We on this side have called for an increase in the minimum wage. We on this side have called for tough legislation on price gouging. We on this side have talked about making ourselves energy independent; not investing in the Middle East, but investing in the Midwest as it relates to E-85.

So I think it is important that everyone understands when we are in the majority, if the American people see fit, we will put forth policy that will benefit all Americans. I think it is important.

If you are an independent, you have to have a problem with the fact that Members of Congress have received thousands upon thousands of dollars of raises since 1997, and still no response from the Republican majority as it relates to the minimum wage.

Mr. DELAHUNT, those are the facts for now. This book is full of facts. These books are full of action; balancing the budget, real homeland security, where local communities don't have to tax themselves because we have done away with the COPS Program. We made it difficult for local communities to be able to apply for homeland security, home front security, because, guess what, when something goes down in a city, be it small or big, it won't be the Department of Homeland Security showing up, it will be a local police department.

This is my last one here, and it is a real plan, ready to go, Mr. Speaker, on energy. Anyone can go on House Democrats.gov and get all of these plans. They just didn't come up tonight. We have been coming to this floor, and now the American people are going to have an opportunity to be not Democrats, not Republicans, not independents, but voting on behalf of this country, and to make sure that we have representation here in this House.

Mr. DELAHUNT?

Mr. DELAHUNT. Mr. MEEK, I want to commend you on that eloquent exposition of the issues that I know resonate with the American people. Could you do me a favor? Could you hold up that last book once more?

Mr. MEEK of Florida. Which one?

Mr. DELAHUNT. The last one. Hold it up, will you.

Mr. MEEK of Florida. The energy plan. Yes, sir.

Mr. DELAHUNT. Just show it. I hope that those that are watching can see the cover. Except I would expand on the title, "Energy Plan." I would add a dash, and I would add the words "A Blueprint to Win the War Against Terrorism," because therein, in that plan, lies the secret, and it shouldn't be a secret, because I think it is obvious to many of us, that if we can adopt an energy plan, no longer will we find ourselves hostage to governments and societies that disagree with our values. And that is the case now.

Six years into this administration, and gas has gone from \$1.40 a gallon at the pump to now it is over \$3. The Middle East is destabilizing.

But the reality is, and we spoke about this, myself and some other colleagues earlier, today we are losing the war on terror. At least that is the opinion of people, including the American people, in 34 countries out of 35 where a poll commissioned by the BBC was taken. Just recently, a bipartisan group of experts in foreign policy and national security concluded that we are losing the war on terror.

Now, in the previous hour my good friend from Iowa made the observation, why should we care whether people like us or not? Why should we care? Because, again, if you take a look other polls, and not just, by the way, in the Middle East, but on every continent,

the image of the United States is poor. We are reviled. As the GAO said, anti-American sentiment is broadening and deepening. Yet my friend from Iowa says, why should we care?

I think what he meant is why should we care about those who are sympathetic to or are active participants in acts of terror against the United States, and that makes sense.

But we should care, Mr. Speaker. We should care about the rest of the world, because if we are going to have success in the war on terror, we need other people to help us. We cannot do it alone.

If I can just cite one example, Mr. MEEK, in a story just last week in the Washington Times, Secretary Rumsfeld was in Tajikistan, a Central Asian country, and while he was there he expressed concern about what is transpiring in Afghanistan. This is what he had to say, if I can just ask for your indulgence for a minute. I have to put my glasses on, Mr. MEEK. You know I have a birthday coming up.

Mr. MEEK of Florida. It is tomorrow, Mr. DELAHUNT.

Mr. DELAHUNT. I didn't want the world to know that, but you let that secret out.

The story reads, "U.S. forces invaded Afghanistan in October 2001 to oust the radical Taliban regime. Although the country now has a democratically-elected government, the Taliban has been making a comeback."

Now to quote the Secretary. This is Mr. Rumsfeld. "Western Europe ought to have an enormous interest in the success of Afghanistan, and it is going to take a lot more effort on their part for the Karzai government to be successful." He was alluding to the President of Afghanistan, Mr. Karzai.

□ 2330

But what he is saying is Western Europe has got to help us more. So what we are looking for is help from Western Europe to contribute troops, to contribute resources so that that fragile democracy in Afghanistan can survive.

So I would suggest, Mr. Speaker, that it is important what the British people think of the United States. Now, again, if you would bear with me, let me go to an article, Mr. Speaker, that appears in the New York Times dated July 3. Now, let's be really clear. This is not Pakistan, this is not Tajikistan, this is not Mexico, this is not Venezuela, this is not President Putin's Russia, this is the United Kingdom, with whom it is written we have a special relationship, Mr. Speaker.

Where we have had a relationship between our peoples that is extraordinary for decades. Now, according to this poll, it was asked whether the United States is doing a bad job in Iraq, is indifferent to what the rest of the world thinks of it, and whether it is obsessed with money.

Now, according to the pollster, in an analysis by him, this was one of the prominent British papers that commissioned the poll, it indicated that there has never been a time when America was held in such low esteem on this side of the Atlantic.

The special relationship that British leaders have long believed exists between their country and the United States may still live in Downing Street and at Camp David, but it has atrophied among the British public.

Among the responders in the new poll, Mr. MEEK, 77 percent did not see America as a beacon of hope for the world. Asked to rate President Bush as a leader, more than three-quarters described him as either pretty poor or terrible. Seventy-two percent said his foreign policy, instead of being driven by a desire to build democracy, was merely a cover for American interests.

About two-thirds of responders said that they believed that American troops were doing a bad job in trying to win the hearts and minds in Iraq. Eighty-three percent of responders said the United States does not care what the rest of the world thinks.

We should care. To answer the question that was put forth by my friend and our colleague from Iowa, the reason that we have to care is because we live in a world. If we are going to achieve our goals, we have to do them in a multi-lateral way. We need the British people to support us. We need the Irish people, we need people all over this world. We want to reach out and be that beacon of hope.

Ms. WASSERMAN SCHULTZ. Mr. Speaker, you know it would be nice if the American people supported this administration. It would be nice if the administration had a policy that the American people could support, or that in spite of the incredible lack of support for the American people, it would be nice if the administration actually showed that that mattered to them, instead of continuing down the path of "staying the course" and doing exactly as they think is right and to heck with what anyone else in America thinks.

I mean, of course we care about our place in the world, and about the vision that we are viewed through, the lens we are viewed through. But I do not understand why the administration and why this President and this Republican leadership, our colleagues, do not seem to care or understand how the American people are viewing them.

I mean, there are a number of issues I know you have gone over tonight, the minimum wage is one of them. I have been witnessing the hearings that have been taking place around the country on border security and the argument over whether border security or an earned path to citizenship is more important.

And what I think has been extremely humorous is that the Republicans on

the other side, the Members on the other side of the aisle, in the other body, adhering to the rules, Mr. Speaker, have taken to calling the McCain-Hagel, I think there is another Republican that is part of that legislation. It is two or three Republicans that are heading it up. And MARTINEZ, our own Senator from Florida.

But MCCAIN, and HAGEL and MARTINEZ are heading up that legislation. Yet now they seem to be calling it, or attempting to call it the Reid-Kennedy bill or the Reid-Kennedy bill, neither of whom are sponsors of that legislation.

So what they are trying to do is lead the American people, and if they say it enough times so that they believe it, that it is the Democrats that are taking the initiative on this immigration policy when it is clearly Republicans.

Mr. DELAHUNT. Are you aware, and again I know we are changing subjects here, but I do not know if you are aware that there has been a decline in the number of enforcement actions against employers for hiring undocumented workers.

Ms. WASSERMAN SCHULTZ. Not only am I aware of that, Mr. DELAHUNT, thank you for leading me right into that lovely chart that we have here, that graphically depicts the differences between border security and immigration under a Democratic administration versus border security under this Republican Bush administration.

Let us peruse the numbers. The Republicans have been talking a good game about how important border security truly is to them, especially our colleagues here in the House. They have been beating that drum over and over again.

Mr. DELAHUNT. If I can interrupt just once more. Of course you are aware that the Republicans have been in the majority in this chamber for 12 years.

Ms. WASSERMAN SCHULTZ. Well, I am quite aware of that, they have been well within control of this institution for 12 years.

Mr. DELAHUNT. They have controlled the White House.

Ms. WASSERMAN SCHULTZ. For 6 years.

Mr. DELAHUNT. They have controlled the United States Senate I think for 10 out of 12 years.

Ms. WASSERMAN SCHULTZ. So this was entirely theirs.

Mr. DELAHUNT. I think it is important that people understand that and understand who is Washington, D.C.

Ms. WASSERMAN SCHULTZ. Entirely within their control to crack down on border security, to hire more Border Patrol agents, enforcement actions against employers who hire illegal immigrants illegally.

So let's take a look at the numbers. We use third party validators. By the

way, it is a pleasure to join you here once again, my 30 Something colleagues. I apologize for not doing that initially when I began, just jumping in.

But let us look at the average number of new border patrol agents added per year under the Clinton administration from 1993 to 2000, versus the Bush administration between 2001 and 2005. Under President Clinton, 642 per year border patrol agents were added per year. And under President Bush they have added an average of 411.

Now there is some real commitment to border security. How about we look at the INS, which is now CIS. But the INS fines for immigration enforcement, that is fines against employers who hired illegal immigrants illegally and have gotten caught.

Okay. Under the Democratic administration in 1999, President Clinton was in office, there were 417 cases where INS fined employers for hiring, for getting caught hiring illegal immigrants. Guess how many there were in 2004, a year in which President Bush was in office?

□ 2340

Mr. DELAHUNT. That was the year that some started to express concern about border enforcement.

Ms. WASSERMAN SCHULTZ. Yes. That is when you started to hear the drum beginning to beat, and beat very loudly.

Mr. DELAHUNT. Can you tell us what that number is, as compared to the 417 under President Clinton?

Ms. WASSERMAN SCHULTZ. I would be glad to. We went from 417 immigration enforcement actions against employers under President Clinton to 3. Three under President Bush in 2004.

Mr. DELAHUNT. Three, one, two, three.

Ms. WASSERMAN SCHULTZ. If I tried to count to 417, the hour would end, and we wouldn't be able to say anything else. So I will move on to the next one.

How about when we are talking about immigration fraud cases? If the Republicans are so committed to border security and making sure that we crack down on illegal immigrants and prevent the people who don't belong here and who are coming here the wrong way, then you would think that there would be many, many more cases under the Republicans than the Democrats. But in 1995, a year in which we had a Democratic President, there were 6,455 cases pursued against immigration fraud.

Then you fast-forward to 2003 under the Bush administration, the Republican administration, a year in which supposedly you had an entirely Republican-controlled government, and the ability for them to actually pursue more than 6,455 cases. They pursued 1,389, a 78 percent drop.

Mr. DELAHUNT. Could I just submit a hypothesis for a minute?

You know, one of the leaders in the neoconservative movement, a Mr. Grover Norquist, coined an interesting term called shrinking government, until it practically disappears. This neoconservative ideology, I suggest, is responsible for those statistics. Because what we have done in the past 6, 8 years, is reduced government to the point when no longer are we adequately enforcing our laws as well as our border.

So what we see is a real problem that was created by this Republican majority working with a Republican President.

Did you have a chance, by any stretch, to reading the lament of the former Speaker of this House, Mr. Gingrich?

Ms. WASSERMAN SCHULTZ. I did, actually. I think we also have a graphic depiction of that. But really what this comes down to, Mr. DELAHUNT, is a clear indication of who is for immigration enforcement and border security, and who is just kidding; who is in favor of putting action behind the words, and who just speaks the words.

There is one more statistic that was more difficult to graphically depict, so I will go through this last one, which is also important, because the Bush administration has touted that in its first 5 years, it caught and returned 6 million undocumented individuals. That is actually a drop in any 5-year period under the Clinton administration.

So, you know, this is all just a lot of puffery, a whole lot of chest-pounding, which they seem to be really, really good at. But when you scratch below the surface, just a little bit, there is no depth, there is nothing there.

And, clearly, the former House Speaker, Mr. Gingrich, the warrior, arguably the architect of the so-called Republican revolution, he has had a few things to say, as we talked about our 30-something hours on this. As recently as July 14th, which was 4 days ago, this was him commenting on the broken system in Washington.

He said, Congress really has to think about how fundamentally wrong the current system is.

When facing crises at home and abroad, he said, it is important to have an informed, independent legislative branch coming to grips with this reality and not sitting around and waiting for Presidential leadership.

Clearly when it comes to border security and immigration, there hasn't been a whole lot of Presidential leadership, not when it comes to action. He has been real good at talking.

Mr. DELAHUNT. Can you tell me what his solution to the crisis that this country is now facing in terms of its democratic institutions and its relationship between a White House that has acquired incredible power and a Congress that continues to see power

to the point where it has become a rubber stamp for a President that has no restraints whatsoever? What does Newt Gingrich say is that solution?

Ms. WASSERMAN SCHULTZ. That is what has been truly unbelievable. This leadership, our Republican colleagues, have just been totally willing to cede power, just give up the legislative authority that we have, and say, Mr. President, you take it, we are out.

So Mr. Gingrich had something else to say just the other day. He said the correct answer is for the American people to just start firing people.

I don't think he was talking about anything other than this fall during the elections, because they are not, they are clearly, they clearly do not have their priorities straight. They clearly only speak words and don't back them up with action. They clearly only bob their heads up and down like the bobble-head Republicans that they have been and rubber-stamp everything that the President asks them to do.

There it is right there. There is the big old Republican rubber stamp which each of them has essentially wrapped their arms around and agreed to adhere to.

Mr. DELAHUNT. Well, I would suggest that that is a remarkable statement by an individual who led the Republican Party to a majority in this House.

When he says it is time for the American people to start firing everyone, that is to me a demonstration that he recognizes that the government is not functioning as it ought to function. We are allowing this institution, this House, to wither.

Government isn't withering; it is not government, it is Congress that is allowing democracy to wither. That is dangerous.

Unless you have a Congress that stands up and says no, and serves as a true check and balance, then you have a democracy that is at risk.

Mr. MEEK of Florida. Mr. DELAHUNT, I can't help but grab this rubber stamp and help the Members realize that they are making history in all the wrong ways. This rubber-stamp Republican majority has allowed this President to have free rein, not only on everyday American workers, retirees, veterans and the American taxpayer dollars, this President rubber stamped, okayed by this Republican majority, has borrowed \$1.05 trillion from foreign nations. At no other time in the history of this Republic, in 4 years or in 224 years, has that amount of money been borrowed.

The Republican rubber-stamp Congress has allowed that to happen.

Now we have OPEC countries, Japan, China, Korea, Caribbean, Germany, you name it. They are borrowing. Canada, they are buying our debt. We are borrowing from them. The Republican majority allowed the Bush White House to

get what they want as it relates to a rubber stamp.

Like I said, it is not even fair. I mean, Time magazine, freshly minted, the 17th edition, folks can either get it in the mail or buy it, I don't have any stock in Time Warner or anything.

□ 2350

This is where we are because this time right now, when the President and the 109th Congress is history making, not history making being the Congress that did so much for the American people but the Congress that allows the President of the United States to get this country in a position that it is in because the checks and balances that are in the Constitution and how we are supposed to govern and carry out oversight was not adhered to.

Here it is, Time magazine, The End of Cowboy Democracy, what Korea, Iraq and Iran teaches us about the limits of going it alone. And then you go on to page 20, and it talks about how the White House has just now realized that they have a problem.

Now, it would be okay if it was just the White House, and this is not about the President. The President is the President of the United States. He is not running again for reelection, but Members of the House have to run every 2 years, every 6 years in the Senate.

It goes on and it outlines quotes from people that were formerly in the administration, folks that are in the administration now, and they are saying now they realize that they have a problem. Well, it is not them. It is the United States of America. You heard Mr. DELAHUNT talking about the people in the U.K. Guess what, the people in the U.K. have bought \$223.2 billion of our debt. This is what they think about us. Leave alone that. Ms. WASSERMAN SCHULTZ talked about what the American people think about us.

So the alternative, in my opinion, is that we have plans on this side that is being not only demagogued by the Republican majority but not even allowed to come to the floor. HouseDemocrats.gov, okay, energizing America, farmers fueling our energy independence. Here is a little short piece on it, bigger plan.

Real Security, on the Web site once again, ready to go, will not be heard here on the House. Republican majority does not want to hear it because they feel they have the master plan and that everything is in line. You heard Ms. WASSERMAN SCHULTZ talk about enforcement of illegal workers under the Bush administration, the funding of border agents. The facts are the facts.

The Innovation Agenda, CEOs of American companies are saying we are ready to have math and science teachers; we are ready to work on real innovation in turning out the next work-

force that we need. Republican majority talks about it but has not acted on it.

So I think it is important that we continue to share this with the American people. It may be repetitive. We may have to use Mr. Gingrich quotes. We may have to use Time magazine and other national publications and periodicals to drive the point home. It does not matter what your party affiliation is. It should not matter who you voted for in the last election.

What should matter is that you are a citizen of the United States of America and you care about this country. So when your children and grandchildren ask the question, Mama, Granddaddy, Aunt, Uncle, what were you doing when all this was going on; were you just saying I am a Republican and I am voting Republican because I am a Republican? Were you saying I am a Democrat, I was voting for the person that ran the most commercials and sent me stuff through the mail and saying that I am the best? Oh, or I am an Independent, and you know, I just thought it was probably politically correct and cool for me to vote for the people that were in the majority so I can hopefully be on the prevailing side?

One thing I can say is now the American people are saying they would much rather have a Democratic Congress, probably not because that they feel now I am so-called a Democrat. No, they see what is going on. They see the minimum wage not going up. They see the prices going up at the pump. They see what other countries are saying about us, and they see the lack of oversight and enforcement by this Congress.

This Congress, the Republican majority would much rather get an invitation to the White House and have dinner and tea and cookies to be at a party of 200 people than to provide representation on behalf of the American people.

Mr. DELAHUNT. You know what, it is time for Congress to stand up and insist on answers to hard questions.

Let me go back to Iraq for one moment. I heard a rumor that the Iraqi prime minister intends to come to Washington soon. I think we all deserve an answer to a question that was raised by one of our leaders in the Democratic Party, JAN SCHAKOWSKY, who circulated a Dear Colleague today.

Maybe you have not heard this yet, but the Iraqi prime minister, where we have spent close to half a trillion dollars and 2,600 Americans have died, the head of their parliament, Mahmoud al-Mashhadani said these offensive words. He "accused 'Jews' of financing acts of violence in Iraq in order to discredit Islamists who control the parliament and government so they can install their 'agents' in power."

These are his words: "Some people say 'we saw you beheading,

kidnappings and killing. In the end we even started kidnapping women who are our honor.' These acts are not the work of Iraqis. I am sure that he who does this is a Jew and the son of a Jew. I can tell you about these Jewish, Israelis and Zionists who are using Iraqi money and oil to frustrate the Islamic movement in Iraq and come with the agent and cheap project."

This is what my friend from Iowa was earlier talking about democracy? What kind of democracy would tolerate and countenance that kind of virulent, anti-Semitic remark from the Speaker of the parliament? The same Iraqi government that has a bilateral military agreement with Iran. Does this say something about the policy of this administration that has enhanced the power and influence of Iran in the region, Iran by the way, who is the sponsor of Hamas and Hezbollah and we know and the whole world knows what is happening today in Lebanon and the Gaza strip?

Ms. WASSERMAN SCHULTZ. So, instead of changing course and moving us in a new direction, the Republicans want to continue to go in the direction that we are continuing, that Americans are so frustrated with.

This very week they are going to focus on the politics of distraction because, as we shine a light on what is really going on, then the American people would become even more frustrated than they already are.

Mr. Speaker, all of our charts in the 30 Something Working Group and the things we discussed tonight will be up on our Web site. People can log on to www.HouseDemocrats.gov/

30Something. We encourage the Members to take a look at all the things we have got up there, and I yield back to Mr. MEEK to close us out.

Mr. MEEK of Florida. Thank you so very much. I would like to thank Mr. DELAHUNT also and all the Members of the 30 Something Working Group for coming together with an outstanding presentation tonight for the Members of the House.

Mr. DELAHUNT. Where was Mr. RYAN this evening?

Mr. MEEK of Florida. I do not know. We need to see what happened to Mr. RYAN tonight, but I am pretty sure there is a good excuse for him not being here.

Ms. WASSERMAN SCHULTZ talked about a new direction for America. We want to make sure that health care is more affordable for all Americans, and we also want to make sure that we have lower gas prices, helping our working families, also cutting college costs and ensuring dignity in retirement and also requiring fiscal responsibility, pay-as-we-go.

With that, Mr. Speaker, we would like to thank the Democratic leadership for allowing us to have the time, and it was an honor to address the House tonight

LEAVE OF ABSENCE

By unanimous consent, leave of absence was granted to:

Mr. ABERCROMBIE (at the request of Ms. PELOSI) for today on account of official business.

Mr. DAVIS of Illinois (at the request of Ms. PELOSI) for today.

Mr. KIND (at the request of Ms. PELOSI) for today on account of illness.

Ms. MCKINNEY (at the request of Ms. PELOSI) for today.

Mrs. NORTHUP (at the request of Mr. BOEHNER) for today and the balance of the week on account of personal reasons.

SPECIAL ORDERS GRANTED

By unanimous consent, permission to address the House, following the legislative program and any special orders heretofore entered, was granted to:

(The following Members (at the request of Mr. PALLONE) to revise and extend their remarks and include extraneous material:)

Mr. PALLONE, for 5 minutes, today.

Mrs. MCCARTHY, for 5 minutes, today.

Mr. DEFAZIO, for 5 minutes, today.

Mr. GEORGE MILLER of California, for 5 minutes, today.

Mr. EMANUEL, for 5 minutes, today.

Ms. HERSETH, for 5 minutes, today.

Mr. BISHOP of New York, for 5 minutes, today.

Ms. KAPTUR, for 5 minutes, today.

Ms. JACKSON-LEE of Texas, for 5 minutes, today.

Mr. ENGEL, for 5 minutes, today.

Mr. CLAY, for 5 minutes, today.

(The following Members (at the request of Mr. POE) to revise and extend their remarks and include extraneous material:)

Mr. MCHENRY, for 5 minutes, today and July 18, 19, 20, and 21.

Mr. BURTON of Indiana, for 5 minutes, today and July 18, 19, 20, and 21.

Mr. BURGESS, for 5 minutes, July 19.
Mr. SOUDER, for 5 minutes, today and July 18 and 20.

Mr. WELDON of Florida, for 5 minutes, today and July 18.

Mr. OSBORNE, for 5 minutes, today and July 18 and 19.

Mr. GILCHREST, for 5 minutes, today and July 19.

SENATE BILL REFERRED

A bill of the Senate of the following title was taken from the Speaker's table and, under the rule, referred as follows:

S. 3525. An act to amend subpart 2 of part B of title IV of the Social Security Act to improve outcomes for children in families affected by methamphetamine abuse and addiction, to reauthorize the promoting safe and stable families program, and for other purposes to the Committee on Ways and Means.

ENROLLED BILL SIGNED

Mrs. Haas, Clerk of the House, reported and found truly enrolled a bill

of the House of the following title, which was thereupon signed by the Speaker:

H.R. 2872. An act to require the Secretary of the Treasury to mint coins in commemoration of Louis Braille.

SENATE ENROLLED BILL SIGNED

The SPEAKER announced his signature to an enrolled bill of the Senate of the following title:

S. 655. An act to amend the Public Health Service Act with respect to the National Foundation for the Centers for Disease Control and Prevention.

ADJOURNMENT

Mr. MEEK of Florida. Mr. Speaker, I move that the House do now adjourn.

The motion was agreed to; accordingly (at midnight), under its previous order, the House adjourned until today, Tuesday, July 18, 2006, at 9 a.m., for morning hour debate.

EXECUTIVE COMMUNICATIONS,
ETC.

Under clause 8 of rule XII, executive communications were taken from the Speaker's table and referred as follows:

8562. A letter from the Secretary of the Navy, Department of Defense, transmitting notification that the Nunn-McCurdy Unit Cost has breached the "Original" Acquisition Program Baseline (APB) for the enclosed programs, pursuant to 10 U.S.C. 2433(e)(1); to the Committee on Armed Services.

8563. A letter from the Under Secretary for Acquisitions, Technology and Logistics, Department of Defense, transmitting a report on the budgeting of the Department of Defense for the sustainment of key military equipment, pursuant to Public Law 109-163, section 361; to the Committee on Armed Services.

8564. A letter from the Chairman, Board of Governors of the Federal Reserve System, transmitting the sixteenth annual report on the Profitability of Credit Card Operations of Depository Institutions, pursuant to 15 U.S.C. 1637 note, Public Law 100-583, section 8 (102 Stat. 2969); to the Committee on Financial Services.

8565. A letter from the Chairman, Board of Governors of the Federal Reserve System, transmitting the Ninety-Second Annual Report of the Board of Governors of the Federal Reserve System covering operations during calendar year 2005; to the Committee on Financial Services.

8566. A letter from the Assistant Secretary for Legislative Affairs, Department of the Treasury, transmitting the Department's status of the quadrennial report mandated by Section 721 of the Defense Production Act of 1950, pursuant to 50 U.S.C. 2170(k); to the Committee on Financial Services.

8567. A letter from the Acting Chairman and President, Export-Import Bank, transmitting a report on transactions involving U.S. exports to Angola pursuant to Section 2(b)(3) of the Export-Import Bank Act of 1945, as amended; to the Committee on Financial Services.

8568. A letter from the Acting Chairman and President, Export-Import Bank, trans-

mitting a report on transactions involving U.S. exports to Turkey pursuant to Section 2(b)(3) of the Export-Import Bank Act of 1945, as amended; to the Committee on Financial Services.

8569. A letter from the Acting Chairman and President, Export-Import Bank, transmitting a report on transactions involving U.S. exports to Chile pursuant to Section 2(b)(3) of the Export-Import Bank Act of 1945, as amended; to the Committee on Financial Services.

8570. A letter from the Director, Office of Management and Budget, transmitting a supplemental update of the Budget for Fiscal Year 2007, pursuant to 31 U.S.C. 1106; (H. Doc. No. 109-122); to the Committee on the Budget and ordered to be printed.

8571. A letter from the Acting Administrator, National Highway Traffic Safety Administration, Department of Commerce, transmitting the Department's report on the activities to improve coordination and communication with respect to the implementation of E-911 services, pursuant to 47 U.S.C. 942 Public Law 108-494, section 104; to the Committee on Energy and Commerce.

8572. A letter from the Secretary, Department of Health and Human Services, transmitting the Department's report, pursuant to section 101 of the Public Health Security and Bioterrorism Preparedness and Response Act of 2002; to the Committee on Energy and Commerce.

8573. A letter from the Secretary, Department of Education, transmitting the fifty-second Semiannual Report to Congress on management decisions and final actions taken on audit recommendations, covering the period October 1, 2005 through March 31, 2006 in compliance with the Inspector General Act Amendments of 1988, pursuant to 5 U.S.C. app. (Insp. Gen. Act) section 5(b); to the Committee on Government Reform.

8574. A letter from the Chief Administrative Officer, transmitting the quarterly report of receipts and expenditures of appropriations and other funds for the period April 1, 2006 through June 30, 2006 as compiled by the Chief Administrative Officer, pursuant to 2 U.S.C. 104a Public Law 88-454; (H. Doc. No. 109-121); to the Committee on House Administration and ordered to be printed.

8575. A letter from the Secretary, Department of the Interior, transmitting notification of payments to eligible governments in the State of Illinois for Fiscal Year 2006 under the Payments in Lieu of Taxes (PILT) program; to the Committee on Resources.

A letter from the Deputy Assistant Administrator for Operations, NMFS, National Oceanic and Atmospheric Administration, transmitting the Administration's final rule — Fisheries of the Exclusive Economic Zone Off Alaska; Seasonal Closure of Chiniak Gully in the Gulf of Alaska to Trawl Fishing [Docket No. 060307059-6135-02; I.D. 030106B] (RIN: 0648-AU15) received June 9, 2006, pursuant to 5 U.S.C. 801(a)(1)(A); to the Committee on Resources.

8577. A letter from the Deputy Assistant Administrator for Regulatory Programs, NMFS, National Oceanic and Atmospheric Administration, transmitting the Administration's final rule — Fisheries of the Caribbean; Gulf of Mexico, and South Atlantic; Gulf of Mexico Recreational Grouper Fishery Management Measures [Docket No. 060322083-6147-02; I.D. 032006C] (RIN: 0648-AU04) received July 6, 2006, pursuant to 5 U.S.C. 801(a)(1)(A); to the Committee on Resources.

8578. A letter from the Acting Deputy Assistant Administrator for Regulatory Programs, NMFS, National Oceanic and Atmospheric Administration, transmitting the Administration's final rule — Fisheries of the

Exclusive Economic Zone Off Alaska; Allocating Bering Sea and Aleutian Islands King and Tanner Crab Fishery Resources [Docket No. 060227052-6139-02; I.D. 021606B] (RIN: 0648-AU06) received June 16, 2006, pursuant to 5 U.S.C. 801(a)(1)(A); to the Committee on Resources.

8579. A letter from the Acting Deputy Assistant Administrator for Regulatory Programs, NMFS, National Oceanic and Atmospheric Administration, transmitting the Administration's final rule — Fisheries of the Northeastern United States; Atlantic Sea Scallop Fishery; Framework 18 [Docket No. 060314069-6138-002; I.D. 030306B] (RIN: 0648-AT25) received June 16, 2006, pursuant to 5 U.S.C. 801(a)(1)(A); to the Committee on Resources.

8580. A letter from the Acting Deputy Administrator for Regulatory Programs, NMFS, National Oceanic and Atmospheric Administration, transmitting the Administration's final rule — NOAA Information Collection Requirements Under the Paperwork Reduction Act; OMB Control Numbers; Fisheries Off West Coast States; Fisheries in the Western Pacific; Correction [Docket No. 060327086-6130-02; I.D. 032306A] (RIN: 0648-AU21) received June 9, 2006, pursuant to 5 U.S.C. 801(a)(1)(A); to the Committee on Resources.

8581. A letter from the Assistant Administrator for Fisheries, NMFS, National Oceanic and Atmospheric Administration, transmitting the Administration's final rule — Fisheries of the Caribbean, Gulf of Mexico, and South Atlantic; Coastal Migratory Pelagic Resources of the Gulf of Mexico and South Atlantic; Reef Fish Fishery of the Gulf of Mexico; Limited Access Program for Gulf Charter Vessels and Headboats [Docket No. 060216043-6123-02; I.D. 021306C] (RIN: 0648-AS70) received June 16, 2006, pursuant to 5 U.S.C. 801(a)(1)(A); to the Committee on Resources.

8582. A letter from the Assistant Administrator for Fisheries, NMFS, National Oceanic and Atmospheric Administration, transmitting the Administration's final rule — Taking of Marine Mammals Incidental to Commercial Fishing Operations; Bottlenose Dolphin Take Reduction Plan Regulations; Sea Turtle Conservation; Restrictions to Fishing Activities [Docket No. 040903253-5337-02; I.D. 081104H] (RIN: 0648-AR39) received June 8, 2006, pursuant to 5 U.S.C. 801(a)(1)(A); to the Committee on Resources.

8583. A letter from the Assistant Administrator for Fisheries, NMFS, National Oceanic and Atmospheric Administration, transmitting the Administration's final rule — Fisheries of the Northeastern United States; Monkfish Fishery [Docket No. 060315071-6101-02; I.D. 030906C] (RIN: 0648-AT22) received May 3, 2006, pursuant to 5 U.S.C. 801(a)(1)(A); to the Committee on Resources.

8584. A letter from the Assistant Administrator for Fisheries, NMFS, National Oceanic and Atmospheric Administration, transmitting the Administration's final rule — Fisheries of the Northeastern United States; Atlantic Sea Scallop Fishery; Emergency Rule [Docket No. 060608158-6158-01; I.D. 051806E] (RIN: 0648-AU47) received June 26, 2006, pursuant to 5 U.S.C. 801(a)(1)(A); to the Committee on Resources.

8585. A letter from the Director, National Oceanic and Atmospheric Administration, transmitting the Administration's 2005 report to Congress on the "The Status of U.S. Fisheries"; to the Committee on Resources.

8586. A letter from the Acting Director, Office of Sustainable Fisheries, NMFS, National Oceanic and Atmospheric Administra-

tion, transmitting the Administration's final rule — Fisheries of the Exclusive Economic Zone Off Alaska; Yellowfin Sole by Vessels Using Trawl Gear in Bering Sea and Aleutian Islands Management Area [Docket No. 060216045-6045-01; I.D. 041906C] received May 3, 2006, pursuant to 5 U.S.C. 801(a)(1)(A); to the Committee on Resources.

8587. A letter from the Acting Director, Office of Sustainable Fisheries, NMFS, National Oceanic and Atmospheric Administration, transmitting the Administration's final rule — Fisheries of the Northeastern United States; Atlantic Mackerel, Squid, and Butterfish Fisheries; Closure of the Quarter II Fishery for Loligo Squid [Docket No. 051209329-5329-01; I.D. 051806A] received June 7, 2006, pursuant to 5 U.S.C. 801(a)(1)(A); to the Committee on Resources.

8588. A letter from the Acting Director, Office of Sustainable Fisheries, NMFS, National Oceanic and Atmospheric Administration, transmitting the Administration's final rule — Fisheries of the Exclusive Economic Zone Off Alaska; Pacific Cod by Catcher Vessels Less Than 60 ft. (18.3m) LOA Using Pot or Hook-and-Line Gear in the Bering Sea and Aleutian Islands Management Area [Docket No. 060216045-6045-01; I.D. 052206A] received June 9, 2006, pursuant to 5 U.S.C. 801(a)(1)(A); to the Committee on Resources.

8589. A letter from the Acting Director, Office of Sustainable Fisheries, NMFS, National Oceanic and Atmospheric Administration, transmitting the Administration's final rule — Fisheries Off West Coast States; Pacific Coast Groundfish Fishery; Suspension of the Primary Pacific Whiting Season for the Shore-based Sector South of 42 degrees North Latitude [Docket No. 060424110-6110-01; I.D. 052406B] received June 13, 2006, pursuant to 5 U.S.C. 801(a)(1)(A); to the Committee on Resources.

8590. A letter from the Acting Director, Office of Sustainable Fisheries, NMFS, National Oceanic and Atmospheric Administration, transmitting the Administration's final rule — Fisheries of the Northeastern United States; Tilefish Fishery; Quota Harvested for Part-time Category [Docket No. 010319075-1217-02; I.D. 032206A] received July 10, 2006, pursuant to 5 U.S.C. 801(a)(1)(A); to the Committee on Resources.

8591. A letter from the Acting Director, Office of Sustainable Fisheries, NMFS, National Oceanic and Atmospheric Administration, transmitting the Administration's final rule — Fisheries of the Exclusive Economic Zone Off Alaska; Yellowfin Sole in the Bering Sea and Aleutian Islands Management Area [Docket No. 060216045-6045-01; I.D. 061506A] received July 6, 2006, pursuant to 5 U.S.C. 801(a)(1)(A); to the Committee on Resources.

8592. A letter from the Acting Director, Office of Sustainable Fisheries, NMFS, National Oceanic and Atmospheric Administration, transmitting the Administration's final rule — Fisheries of the Northeastern United States; Atlantic Bluefish Fishery; Quota Transfer [Docket No. 051104293-5344-02; I.D. 061206B] received July 6, 2006, pursuant to 5 U.S.C. 801(a)(1)(A); to the Committee on Resources.

8593. A letter from the Acting Director, Office of Sustainable Fisheries, NMFS, National Oceanic and Atmospheric Administration, transmitting the Administration's final rule — Fisheries of the Caribbean, Gulf of Mexico, and South Atlantic; Reef Fish Fishery of the Gulf of Mexico; Closure of the 2006 Deep-Water Grouper Commercial Fishery [I.D. 060806E] received July 6, 2006, pursuant to 5 U.S.C. 801(a)(1)(A); to the Committee on Resources.

8594. A letter from the Acting Director, Office of Sustainable Fisheries, NMFS, National Oceanic and Atmospheric Administration, transmitting the Administration's final rule — Magnuson-Stevens Fishery Conservation and Management Act Provisions; Fisheries of the Northeastern United States; Northeast Multispecies Fishery; Modification of the Gear Restrictions for the U.S./Canada Management Area [Docket No. 040112010-4114-02; I.D. 061306A] received July 6, 2006, pursuant to 5 U.S.C. 801(a)(1)(A); to the Committee on Resources.

8595. A letter from the Acting Director, Office of Sustainable Fisheries, NMFS, National Oceanic and Atmospheric Administration, transmitting the Administration's final rule — Fisheries of the Exclusive Economic Zone Off Alaska; Pacific Cod by Vessels Using Trawl Gear in Bering Sea and Aleutian Islands Management [Docket No. 060216045-6045-01; I.D. 060706B] received June 22, 2006, pursuant to 5 U.S.C. 801(a)(1)(A); to the Committee on Resources.

8596. A letter from the Acting Director, Office of Sustainable Fisheries, NMFS, National Oceanic and Atmospheric Administration, transmitting the Administration's final rule — Fisheries of the Exclusive Economic Zone Off Alaska; Yellowfin Sole by Vessels Using Trawl Gear in Bering Sea and Aleutian Islands Management [Docket No. 060216045-6045-01; I.D. 060706C] received June 22, 2006, pursuant to 5 U.S.C. 801(a)(1)(A); to the Committee on Resources.

8597. A letter from the Acting Director, Office of Sustainable Fisheries, NMFS, National Oceanic and Atmospheric Administration, transmitting the Administration's final rule — Fisheries of the Economic Exclusive Zone Off Alaska; Shallow-Water Species Fishery by Vessels Using Trawl Gear in the Gulf of Alaska [Docket No. 060216044-6044-01; I.D. 060806A] received June 22, 2006, pursuant to 5 U.S.C. 801(a)(1)(A); to the Committee on Resources.

8598. A letter from the Executive Director and Chief Executive Officer, American Chemical Society, transmitting the Society's Annual Report and the Audited Financial Statements for the calendar year 2005, pursuant to 36 U.S.C. 1101(2) and 1103; to the Committee on the Judiciary.

A bill to amend the Railroad Retirement Act of 1974 to provide for continued payment of railroad retirement annuities by the Department of the Treasury, and for other purposes (Rept. 109-569). Referred to the Committee of the Whole House on the State of the Union.

Mr. YOUNG of Alaska: Committee on Transportation and Infrastructure. House Concurrent Resolution 145. Resolution expressing the sense of Congress in support of a national bike month and in appreciation of cyclists and others for promoting bicycle safety and the benefits of cycling (Rept. 109-570 Pt. 1). Referred to the House Calendar.

Mr. OXLEY: Committee on Financial Services. H.R. 3043. A bill to authorize the Secretary of Housing and Urban Development to carry out a pilot program to insure zero-downpayment mortgages for one-unit residences; with an amendment (Rept. 109-571). Referred to the Committee of the Whole House on the State of the Union.

Mr. OXLEY: Committee on Financial Services. H.R. 5527. A bill to extend the authority of the Secretary of Housing and Urban Development to restructure mortgages and rental assistance for certain assisted multifamily housing; with an amendment (Rept. 109-572). Referred to the Committee of the Whole House on the State of the Union.

Mr. GINGREY: Committee on Rules. House Resolution 918. Resolution providing for consideration of the joint resolution (H.J. Res. 88) proposing an amendment to the Constitution of the United States relating to marriage (Rept. 109-573). Referred to the House Calendar.

Mr. THOMAS: Committee on Ways and Means. H.R. 5684. A bill to implement the United States-Oman Free Trade Agreement

(Rept. 109-574). Referred to the Committee of the Whole House on the State of the Union.

Mr. SENSENBRENNER: Committee on the Judiciary. H.R. 1956. A bill to regulate certain State taxation of interstate commerce; and for other purposes; with an amendment (Rept. 109-575). Referred to the Committee of the Whole House on the State of the Union.

Mr. SENSENBRENNER: Committee on the Judiciary. H.R. 5323. A bill to require the Secretary of Homeland Security to provide for ceremonies on or near Independence Day for administering oaths of allegiance to legal immigrants whose applications for naturalization have been approved (Rept. 109-576). Referred to the Committee of the Whole House on the State of the Union.

PUBLIC BILLS AND RESOLUTIONS

Under clause 2 of rule XII, public bills and resolutions were introduced and severally referred, as follows:

By Mr. YOUNG of Alaska (for himself, Mr. OBERSTAR, Mr. PETRI, and Mr. DEFAZIO):

H.R. 5808. A bill to authorize the Secretary of Transportation to make grants to public transportation agencies and over-the-road bus operators to improve security, and for other purposes; to the Committee on Transportation and Infrastructure.

By Ms. HART (for herself and Mr. BAIRD):

H.R. 5809. A bill to amend the Internal Revenue Code of 1986 to increase and extend the energy efficient commercial buildings deduction; to the Committee on Ways and Means.

By Mr. YOUNG of Alaska (for himself, Mr. OBERSTAR, Mr. DUNCAN, and Mr. EDDIE BERNICE JOHNSON of Texas):

H.R. 5810. A bill to amend the Comprehensive Environmental Response, Compensation, and Liability Act of 1980 to authorize funding for brownfields revitalization activities and State response programs, and for other purposes; to the Committee on Energy and Commerce, and in addition to the Committee on Transportation and Infrastructure, for a period to be subsequently determined by the Speaker, in each case for consideration of such provisions as fall within the jurisdiction of the committee concerned.

By Mr. YOUNG of Alaska (for himself, Mr. OBERSTAR, Mr. LOBONDO, and Mr. FILNER):

H.R. 5811. A bill to implement the Protocol of 1997 to the International Convention for the Prevention of Pollution from Ships, 1973, and for other purposes; to the Committee on Transportation and Infrastructure.

By Mr. YOUNG of Alaska (for himself, Mr. OBERSTAR, Mr. SHUSTER, Ms. NORTON, Mr. BACHUS, Mr. BOEHLERT, Mr. CHANDLER, Mr. DAVIS of Tennessee, Mr. DUNCAN, Mr. HIGGINS, Mr. HOLDEN, Mr. KUHL of New York, and Mr. RAHALL):

H.R. 5812. A bill to reauthorize and improve the program authorized by the Appalachian Regional Development Act of 1965; to the Committee on Transportation and Infrastructure.

By Mr. ROGERS of Alabama (for himself and Mr. MEEK of Florida):

H.R. 5813. A bill to amend the Homeland Security Act of 2002 to provide for improvements in the management and operations of the Department of Homeland Security, and for other purposes; to the Committee on Homeland Security, and in addition to the Committee on the Budget, for a period to be subsequently determined by the Speaker, in

each case for consideration of such provisions as fall within the jurisdiction of the committee concerned.

By Mr. KING of New York (for himself, Mr. THOMPSON of Mississippi, Mr. ROGERS of Alabama, and Mr. MEEK of Florida):

H.R. 5814. A bill to authorize appropriations for the Department of Homeland Security, and for other purposes; to the Committee on Homeland Security.

By Mr. BROWN of South Carolina (for himself and Mr. MICHAUD):

H.R. 5815. A bill to authorize major medical facility projects and major medical facility leases for the Department of Veterans Affairs for fiscal years 2006 and 2007, and for other purposes; to the Committee on Veterans' Affairs.

By Mr. FORD:

H.R. 5816. A bill to require budgeting for ongoing military operations; to the Committee on the Budget.

By Mr. INSLEE (for himself and Mr. SIMPSON):

H.R. 5817. A bill to adjust the boundary of the Minidoka Internment National Monument to include the Nidoto Nai Yoni Memorial in Bainbridge Island, Washington, and for other purposes; to the Committee on Resources.

By Mr. KOLBE:

H.R. 5818. A bill to modernize the legal tender of the United States, and for other purposes; to the Committee on Financial Services, and in addition to the Committee on the Budget, for a period to be subsequently determined by the Speaker, in each case for consideration of such provisions as fall within the jurisdiction of the committee concerned.

By Mr. NADLER:

H.R. 5819. A bill to amend the Immigration and Nationality Act to exempt certain elderly persons from demonstrating an understanding of the English language and the history, principles, and form of government of the United States as a requirement for naturalization, and to permit certain other elderly persons to take the history and government examination in a language of their choice; to the Committee on the Judiciary.

By Mr. SWEENEY:

H.R. 5820. A bill to increase the security of sensitive data maintained by the Federal Government; to the Committee on Government Reform.

By Ms. WATSON:

H.R. 5821. A bill to increase community service by students at risk of education failure and thereby reduce youth and gang violence; to the Committee on Ways and Means, and in addition to the Committee on Education and the Workforce, for a period to be subsequently determined by the Speaker, in each case for consideration of such provisions as fall within the jurisdiction of the committee concerned.

By Mr. ACKERMAN (for himself, Ms. ROS-LEHTINEN, Mr. LANTOS, Mr. ROYCE, Ms. WATSON, Mr. MCCOTTER, Mr. FALEOMAVAEGA, Mr. SOUDER, Mrs. MALONEY, Mr. BURTON of Indiana, Mr. BERMAN, Mr. SESSIONS, Mr. HOLT, Mr. SAXTON, Ms. MILLENDER-MCDONALD, Ms. JACKSON-LEE of Texas, Mr. MATHESON, Ms. BERKLEY, Mr. PASCRELL, Mr. ENGEL, Mr. CHANDLER, Mr. DAVIS of Florida, Mr. SMITH of Washington, Mr. UDALL of Colorado, and Mr. BROWN of Ohio):

H. Res. 915. A resolution expressing the condolences of the House of Representatives to the families and friends of the victims of

the July 11, 2006, terrorist bombings in Mumbai, India, and sympathy to the people of India; to the Committee on International Relations.

By Mr. SENSENBRENNER:

By Mr. FILNER:

H. Res. 917. A resolution providing for the consideration of the bill (H.R. 23) to amend title 46, United States Code, and title II of the Social Security Act to provide benefits to certain individuals who served in the United States merchant marine (including the Army Transport Service and the Naval Transport Service) during World War II; to the Committee on Rules.

By Ms. NORTON:

H. Res. 919. A resolution honoring Retired Lieutenant Commander Wesley Anthony Brown for his historic achievement as the first African American graduate of the United States Naval Academy and paying tribute on the occasion of July 4 to Wesley Anthony Brown and other residents of the Nation's capital who have served in the armed forces and have continued to pay taxes, both without representation in Congress; to the Committee on Armed Services, and in addition to the Committees on the Judiciary, and Government Reform, for a period to be subsequently determined by the Speaker, in each case for consideration of such provisions as fall within the jurisdiction of the committee concerned.

EXTENSIONS OF REMARKS

HONORING THE 150TH ANNIVERSARY OF THE CITY OF EUREKA, HUMBOLDT COUNTY, CA

HON. MIKE THOMPSON

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Monday, July 17, 2006

Mr. THOMPSON of California. Mr. Speaker, I rise today to recognize the 150th anniversary of the City of Eureka, Humboldt County, CA.

The search for gold in the nearby Trinity Mountains brought the first settlers to Humboldt Bay in 1850. By 1856, the burgeoning settlement—Eureka, I have found it!—was designated the seat of government for Humboldt County by the California Legislature, and on April 18th of the same year officially became the city of Eureka.

The massive stands of redwoods and abundant salmon did not go unnoticed by early entrepreneurs, and soon Eureka had many lumber mills and fishing boats. This wealth of natural resources set the stage for Eureka to dominate the regional timber and fishing industries for the next 150 years.

Eureka, the heart of the “Redwood Empire,” has been a destination for travelers since it was first discovered. In 1914, the first railroad was constructed that tied the community by land to San Francisco. Roads, and the automobile, followed and brought even greater appreciation of the natural splendor of the city and its surroundings. Tourism remains an important part of the area’s economy.

The preservation of the architectural heritage of the community was acknowledged by the Eureka Heritage Society’s effort in 1987 that identified over 1,200 historically significant and diverse buildings in the city. This unique heritage, and the celebrated Carson Mansion, draw tourists from around the world to enjoy the diversity of architecture, antique shops, art galleries, and fine restaurants.

Eureka’s waterfront harkens back to its reputation as a lively place for timber workers, sailors, fishermen, and miners. A walk along today’s waterfront reflects a 30-year renaissance led by the city to celebrate longstanding traditions and a dynamic future—the Woodley Island Marina, a newly constructed public boardwalk and fisherman’s dock, the Sacco Amphitheater, Adorni Center, Wharfinger Building, Small Boat Basin and the Eureka Main Library.

The citizens of Eureka have always set a high standard for cultural achievement. In 1879, Eureka established the first publicly supported library in the State of California; in 2000 they gathered to celebrate the conversion of the Carnegie Library to house the Morris Graves Museum of the Arts. Eureka is a vibrant cultural center with repertory theater, dance and music, and a celebrated Arts Alive that connects people and art and business. Today the city of Eureka carries on the proud

traditions of its early founders, while incorporating the best of modern life into its historic character.

Mr. Speaker, it is appropriate at this time that we recognize the city of Eureka, one of the finest and most vibrant cities in California, on the occasion of its 150th anniversary.

IN HONOR AND RECOGNITION OF
CHIEF JACK MURPHY

HON. DENNIS J. KUCINICH

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Monday, July 17, 2006

Mr. KUCINICH. Mr. Speaker, I rise today in honor and recognition of Chief Jack Murphy, whose recent retirement as the chief of police with the city of Brooklyn reflects 40 years of excellence in law enforcement, framed by leadership, accomplishment, integrity and an unwavering commitment on behalf of the security and safety of the people of Brooklyn.

Chief Murphy’s illustrious career in law enforcement began in 1966, when he became a police officer with the city of Brooklyn. He honorably served our Nation in Vietnam, and soon thereafter resumed his vocation in law enforcement. Chief Murphy and his wife Marie continue to hold family and community as the foundation of their lives. Together they raised four children: Ann Marie, Matthew, Mary Beth and Maureen. Both Chief Murphy and Marie Murphy followed the call of service to others and instilled the significance of integrity, hard work and giving back to others within their children. Marie has devoted her career to the teaching profession.

Beyond his expertise in law enforcement and exceptional leadership abilities, Chief Murphy is known for his unwavering work ethic, affable nature and personal and professional integrity. Straightforward, fair and honest, Chief Murphy garnered the admiration and respect of everyone around him, and was consistently unfazed by the inevitable ebb and flow of small town politics.

Mr. Speaker and colleagues, please join me in honor, gratitude and recognition of Chief Jack Murphy. His exceptional tenure as police officer and chief with the city of Brooklyn is forever framed in integrity, efficiency and accomplishment, and will continue to strengthen the foundation of safety and security for every resident and business owner of Brooklyn. I wish Chief Murphy, his wife Marie, and their three daughters and son, an abundance of health, peace and happiness as he journeys onward from here.

THE 80TH ANNIVERSARY OF OUR
LADY OF MOUNT CARMEL PARISH

HON. DENNIS J. KUCINICH

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Monday, July 17, 2006

Mr. KUCINICH. Mr. Speaker, rise today in honor and recognition of the leaders and members of Our Lady of Mount Carmel Parish, of Cleveland, Ohio, as they celebrate 80 years of faith, guidance and support, embracing generations of citizens throughout our Westside Cleveland community.

In 1926, Our Lady of Mount Carmel was established to serve the spiritual and cultural needs of the Italian-American residents of this neighborhood. Father Sante Gattuso and Father Martin Compango were selected by then-Cleveland Bishop John Farrelly to assist and guide the needs of the growing population of Italian-American families, including newly arrived immigrants from Italy.

Father Sante slowly garnered the trust and admiration of the people of the West 69th neighborhood and people began gathering on the front porch of the Fascano family home, where services were first conducted. Storefront space was rented for many years until ground was broken on West 70th Street in 1949, the year that the parish and newly built grade school found a permanent home—all of which was made possible by the faith, commitment and devotion of Father Sante Gattuso and the faithful Italian-American community of the Westside.

Mr. Speaker and Colleagues, please join me in honor and recognition of every leader and member of Our Lady of Mount Carmel Parish, as they celebrate 80 years of cultivating faith, hope and heritage for generations of families within our Cleveland community. We also rise in honor and memory of the struggle, sacrifice and triumph of the founding members of this parish, who journeyed to America with few possessions beyond faith, love and hope in their hearts and the grit to survive. Love and faith still shines from Our Lady of Mount Carmel Parish, encircling this neighborhood with light, strength and hope rising on the dawn of every new day.

PERSONAL EXPLANATION

HON. CAROLYN B. MALONEY

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Monday, July 17, 2006

Mrs. MALONEY. Mr. Speaker, on July 10, 2006 I missed rollcall votes Nos. 358 and 359.

Had I been present, I would have voted “yea” on rollcall votes Nos. 358 and 359.

CONGRATULATING II-VI
INCORPORATED**HON. MELISSA A. HART**

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Monday, July 17, 2006

Ms. HART. Mr. Speaker, I would like to take this opportunity to congratulate II-VI Incorporated, one of the leading high tech companies in southwestern Pennsylvania, as they celebrate the 35th anniversary of their founding.

In 1971, II-VI Inc. began by producing materials available for the manufacture of high-powered industrial CO₂ laser optics. II-VI Inc. has grown into a global company with headquarters in Saxonburg, Pennsylvania. Today, CEO Carl Johnson carries on II-VI's tradition of serving the needs of western Pennsylvania.

More than 30 years after its founding, this western Pennsylvania-based company is racing to keep up with record demand for its infrared optics, radiation detection products and crystals used in laser and telecommunications equipment. The company was recently selected as one of Businessweek's Hot Growth Companies.

I ask my colleagues in the United States House of Representatives to join me in congratulating II-VI Incorporated. It is an honor to represent the Fourth Congressional District of Pennsylvania and a pleasure to salute this wonderful company.

ON THE RESOLUTION HONORING
WESLEY BROWN, THE FIRST AF-
RICAN AMERICAN GRADUATE OF
THE U.S. NAVAL ACADEMY**HON. ELEANOR HOLMES NORTON**

OF THE DISTRICT OF COLUMBIA

IN THE HOUSE OF REPRESENTATIVES

Monday, July 17, 2006

Ms. NORTON. Mr. Speaker, I rise to honor the first African American graduate of the U.S. Naval Academy and a venerable District of Columbia resident, Retired Lieutenant Commander Wesley Brown. On the Fourth of July, I urged District residents to commemorate the day by celebrating the service of Wesley Brown as a tribute to his historic achievement and as a way of reminding the nation on this day of liberty that thousands of men like Wesley Brown have served their country in the armed forces without equal representation in Congress and that the pending District of Columbia Fair and Equal House Voting Rights Act affords a way to begin to right this wrong.

Wesley Brown is an alumnus of Dunbar High School, and upon graduation, entered the United States Naval Academy. There, he not only met the tough academic and military requirements to graduate from the Naval Academy in 1949, but also prevailed over racial discrimination and physical and mental abuse at the Academy. Mr. Brown served honorably in World War II, the Korean War, and the Vietnam War. He retired from the Navy at the rank of lieutenant commander. In recognition of his achievement, the Academy named a building after Mr. Brown last year. His re-

markable life story is chronicled in the book "Breaking the Color Barrier: The U.S. Naval Academy's First Black Midshipmen and the Struggle for Racial Equality" by Robert Schneller. I am particularly and personally grateful to Mr. Brown, who chaired my first Service Academy Selection Board, which assists me in nominating D.C. high school students for appointments to the military academies, and remains Chairperson Emeritus.

Wesley Brown has become a historical figure living among us. His graduation was a pivotal moment in the nation's efforts to integrate the armed forces of the United States and to improve racial conditions. His leadership paved the way for over 1,600 African Americans who have since graduated from the Naval Academy. Today, nearly 23 percent of the Academy's students are from minority groups.

Wesley Brown deserves special recognition for this pioneering accomplishment, and the service he rendered to the cause of equal treatment for all Americans by courageously accepting unusually difficult challenges for a young Black man before the armed forces themselves were integrated. He did so as generations of Washingtonians have done for the past 230 years in serving the Armed Forces of the United States, always without equal representation in the Congress of the United States and always paying taxes without representation, notwithstanding that this form of tyranny was one of the major causes of the War for Independence which led to the founding of the United States of America.

In the spirit of another great Washingtonian, Frederick Douglass, who challenged the nation in a July 4th address to live up to its stated ideals of freedom and equality, I recognize and honor other District veterans and remind the nation of the necessity to pass H.R. 5388, the Fair and Equal House Voting Rights Act which would afford the full vote in the House of Representatives for the first time in American history. Passage of this legislation would be the optimal way to recognize the service of Mr. Brown, D.C. residents who are currently serving in Iraq and Afghanistan, and the 44,000 D.C. veterans who have honorably served our nation in the United States Armed Forces.

IN SUPPORT OF MAINTAINING
NEUTRALITY WITH REGARD TO
THE PEACE NEGOTIATIONS BE-
TWEEN AZERBAIJAN AND ARME-
NIA**HON. DAN BURTON**

OF INDIANA

IN THE HOUSE OF REPRESENTATIVES

Monday, July 17, 2006

Mr. BURTON of Indiana. Mr. Speaker, in the weeks leading up to the G-8 summit, there was some speculation that the leaders of Azerbaijan and Armenia might be invited to attend the summit as an incentive to help spur further progress on peace negotiations between the two countries over the Nagorno-Karabakh issue. Unfortunately, it appears that that did not happen; and I am deeply disappointed that the world has missed the op-

portunity this summit offered to help promote peace in a region which has been in conflict for far too long.

Although, in my opinion, a good opportunity to advance peace has been lost, I have not lost hope that, together with other nations, we can help Azerbaijan and Armenia achieve peace, and settle once and for all the issue of Nagorno-Karabakh, which I believe has significantly stunted the development of both nations as well as the broader region.

In 1992, the Commission on Security and Cooperation in Europe—CSCE—now the Organization for Security and Cooperation in Europe—OSCE—created the Minsk Group, a coalition of member states dedicated to facilitating a peaceful resolution of the conflict. The co-chairs of the Minsk Group—Russia, France, and the United States—have served as mediators, trying to work in close and effective cooperation with all parties towards a fair and effective settlement of the issues.

I believe though that our success and credibility as a mediator stems from the policy of never appearing to favor one nation's claims over the other. I believe that even the modest steps towards peace which we have witnessed, are a direct result of this neutrality. According to the United States State Department's 2005 Fact Sheet: "The United States does not recognize Nagorno-Karabakh as an independent country, and its leadership is not recognized internationally or by the United States. The United States supports the territorial integrity of Azerbaijan and holds that the future status of Nagorno-Karabakh is a matter of negotiation between the parties." This has been the policy of the United States towards this issue through both the Clinton and Bush administrations, and it is important in my opinion that it remains the same. Any outside influence, any shift in neutrality can only result in a false peace. That is why I am deeply concerned when I hear some of my colleagues throwing barbs at the Azeris and attempting to lay all the blame for this complicated issue at their doorstep.

For example, one of my colleagues once said, "I have long supported the right of self-determination for the people of Nagorno-Karabakh and greatly admire the efforts of the people of this historically Armenian region to build democracy and a market economy in the face of hostility from Azerbaijan." So far as I know, the Nagorno-Karabakh region has never been a part of Armenia. To suggest otherwise, and to suggest that the problems in Nagorno-Karabakh are caused solely by Azerbaijan seem to me to distort the facts and potentially undermine our good faith efforts to see this conflict resolved; and to see peace and prosperity come to the people of both Azerbaijan and Armenia.

Mr. Speaker, I would encourage all of my colleagues to both maintain our neutrality in policy, and to also realize that choosing one side over the other at this point in time is a setback to peace, especially when the side they appear to be choosing may be distorting the facts for its own benefit.

IN HONOR OF DR. EDGAR B.
MOORE

HON. DENNIS J. KUCINICH

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Monday, July 17, 2006

Mr. KUCINICH. Mr. Speaker, I rise today in honor and recognition of Dr. Edgar B. Moore, beloved husband, father, friend, educator, and spiritual leader. Dr. Moore leaves a legacy at Baldwin-Wallace College that reflects his personal passions and professional accomplishments in his roles as both chaplain and professor.

Dr. Moore began his career at Baldwin-Wallace in August 1962, when he was hired as chaplain. He immediately became involved in various chapel activities while counseling and advising students and teaching in the Religion Department. At the end of his first year, the History Department underwent major changes, and Dr. Moore was asked to take a position as professor of history. He accepted and was named chairman while remaining chaplain. Dr. Moore remained in the History Department until his retirement.

Dr. Moore's involvement at Baldwin-Wallace extended far beyond the History Department. His students became babysitters for his and his wife's three children, Cynthia, Robert, and Mary Louise. He chaperoned spring formals and Greek parties and assisted in the formation of the Cosmopolitan Club, which brought American and international students together to promote greater understanding between cultures.

Dr. Moore continued his own education while teaching at Baldwin-Wallace. In January 1966, he earned his doctorate of philosophy from the University of St. Andrews in Scotland. Through a series of visits, he developed a relationship between the schools, which led to the present Academic Studies Abroad program. Dr. Moore attended Northwestern University in the summer of 1969 for graduate classes in African Studies. His new knowledge and ongoing interest in uniting cultures led to the African Studies program.

Mr. Speaker and colleagues, please join me in honor and gratitude to Dr. Edgar B. Moore, whose outstanding 44-year career was defined by his steadfast commitment to spiritual growth, education, and appreciation of diversified cultures. While his students and colleagues will miss him immensely, his legacy and contributions to the Baldwin-Wallace community will live on for many generations to come.

HONORING THE SOLDIERS OF DETACHMENT 1, 779TH ORDNANCE COMPANY, THE TENNESSEE NATIONAL GUARD

HON. MARSHA BLACKBURN

OF TENNESSEE

IN THE HOUSE OF REPRESENTATIVES

Monday, July 17, 2006

Mrs. BLACKBURN. Mr. Speaker, fellow Members of Congress, please join me today to honor the soldiers of Detachment 1, 779th

Ordnance Company, of the Tennessee National Guard.

The 779th deserves the nation's thanks and praise for serving honorably and contributing mightily to our efforts in the Middle East.

They have served America in such dangerous and strategically vital locations as Ramadi, Habanabi, Al Asad and Al Taqaddum, and they have been absolutely critical in the tactical and operational success of coalition forces.

Without the skilled and dedicated soldiers of the 779th, victory in the Global War on Terrorism would not be possible.

Let us join the rest of Tennessee in saying congratulations, welcome home, and job well done.

PERSONAL EXPLANATION

HON. SAM GRAVES

OF MISSOURI

IN THE HOUSE OF REPRESENTATIVES

Monday, July 17, 2006

Mr. GRAVES. Mr. Speaker, I would like to state for the record my position on the following votes I missed due to reasons beyond my control.

On Thursday July 13, 2006 I had to tend to some family matters and thus missed rollcall votes Nos. 370, 371, 372, 373 and 374. Had I been present, I would have voted "yea" on all votes.

On Monday June 19, 2006 I was unavoidably delayed and thus missed rollcall votes Nos. 289, 290 and 291. Had I been present, I would have voted "yea" on all votes.

On Monday May 22, 2006 I was unavoidably delayed and thus missed rollcall votes Nos. 177 and 178. Had I been present, I would have voted "yea" on both votes.

INTRODUCTION OF H. RES. 916

HON. F. JAMES SENSENBRENNER, JR.

OF WISCONSIN

IN THE HOUSE OF REPRESENTATIVES

Monday, July 17, 2006

Mr. SENSENBRENNER. Mr. Speaker, regrettably, today I am forced to introduce this resolution calling for an inquiry into grounds for the impeachment of U.S. District Court Judge Manuel L. Real, from the Central District of California. This resolution has become necessary due to a breakdown in the judicial branch's enforcement of the judicial discipline statute Congress enacted in 1980. When the judicial branch has failed to address serious allegations of judicial misconduct, as the Ninth Circuit arguably has in this matter, the Constitution provides the Congress only one course of action: opening an impeachment inquiry.

I would caution my colleagues and others not to jump to any conclusions in this matter. Today's resolution merely allows the House Judiciary Committee to open an investigation to determine the facts. Only after the House Judiciary Committee has conducted a fair, thorough, and detailed investigation, will committee members be able to consider whether Articles of Impeachment might be warranted.

The introduced resolution ensures that the investigation will be referred to the House Judiciary Committee. It is modeled after the last three impeachment resolutions that the House used to investigate, respectively, Judge Harry E. Claiborne (1986), Judge Alcee L. Hastings (1988), and Judge Walter L. Nixon (1989). All three were later impeached and removed from office based on the drafting of more detailed articles reported by the committee after the investigations were completed.

According to press reports and legal filings made public, in February 2000 Judge Real allegedly interceded on behalf of a defendant known to him in a joint bankruptcy and California State unlawful-detainer action. The defendant reportedly was going through a messy divorce and was ordered to vacate a home that was held in trust by her husband's family. The defendant filed a bankruptcy petition that automatically stayed eviction proceedings in October 1999, but the stay was eventually lifted. The defendant, represented by counsel, then signed a stipulation that allowed the State court to issue an eviction notice in February 2000, approximately 10 days before Judge Real allegedly interceded.

Judge Real allegedly received ex parte communications from the defendant and through third parties about the matter before he took action. Judge Real was supervising the defendant as part of her probation in a separate criminal case in which she had pled guilty to perjury and loan fraud.

Judge Real withdrew the case from the bankruptcy court and enjoined the State eviction proceeding. He allegedly gave no reasons for his assertion of jurisdiction over the case or his rulings. The defendant was allowed to live rent-free in the home for a period of years. When the trustee appealed by mandamus to the Ninth Circuit, Judge Real transferred the case to another district judge. The trustee reclaimed the property on appeal but reportedly lost at least \$35,000 in rent during the proceedings.

According to news reports, in February 2003 a private citizen filed a complaint against Judge Real for his conduct in the bankruptcy and unlawful-detainer actions. This complaint reportedly was dismissed twice by the Chief Judge of the Ninth Circuit, even though the Judicial Council in the second case reportedly recommended that further investigation take place regarding ex parte communications between Judge Real and the litigant.

Judge Alex Kozinski wrote in his dissenting opinion for the Judicial Council of the Ninth Circuit, "The fact of the matter is that the judge's conduct here caused real harm. It certainly harmed innocent creditors to the tune of \$50,000 or more. Worse, it harmed public confidence in the fair administration of justice in the courts of this circuit. The prohibition against ex parte communications, rules of procedure, principles of law—all of these are not trinkets that judges may discard whenever they become a nuisance. Rather, they are the mainstays of our judicial system, our guarantee to every litigant that we will administer justice, as our oath requires, 'without respect to person'. . . . [T]he majority's exigent order seems far more concerned with not hurting the feelings of the judge in question. But our first duty as members of the Judicial

Council is not to spare the feelings of judges accused of misconduct. It is to maintain public confidence in the judiciary by ensuring that substantial allegations of misconduct are dealt with forthrightly and appropriately. This the majority has failed to do."

Judge Real's actions are under further review by the Ninth Circuit Court of Appeals and have been the subject of numerous news reports by the Los Angeles Times and others.

Based upon these news reports and legal proceedings made public, Judge Real's behavior in the bankruptcy and unlawful-detainer actions may constitute impeachable conduct. Some of the issues that I hope will be reviewed during the Committee investigation include—

His intercession on behalf of a litigant known to him;

His alleged ex parte communications with the litigant known to him;

His assertion of jurisdiction over proceedings in which he lacked jurisdiction;

His alleged failure to explain his assertion of jurisdiction to counsel;

His alleged failure to provide any legal authority for his actions;

His reply, on at least one occasion, to counsel when questioned as to the basis of a ruling ("Just because I said it, Counsel.").

I expect the next step in this process to involve the establishment of a bipartisan impeachment inquiry team in the near future.

CHRONOLOGY OF EVENTS BASED UPON NEWS REPORTS AND LEGAL FILINGS IMPEACHMENT INVESTIGATION OF U.S. DISTRICT JUDGE MANUEL L. REAL, PREPARED BY HOUSE JUDICIARY MAJORITY COMMITTEE STAFF

September 11, 1991: Alan and Elizabeth Canter purchase a Los Angeles home as an investment.

September 25, 1991: Their son, Gary, and his wife, Deborah, take up residence at the home. Gary pays rent thereafter.

1997: Title to the home is transferred to a trust (the "Canter Family Trust").

February 24, 1999: Gary and Deborah Canter separate. Gary moves out and rent payments cease thereafter.

August 13, 1999: Alan Canter files an unlawful-detainer action in California state court, seeking Deborah's eviction from the property and \$5,000 back rent.

October 26, 1999: Deborah Canter files a Chapter 13 bankruptcy petition 24 minutes before her unlawful-detainer trial commences. The trial is stayed.

January 24, 2000: Deborah Canter and Judge Real conduct a probation review meeting in his chambers. (Judge Real was supervising Deborah Canter as part of her probation in a separate criminal case in which she pled guilty to perjury and loan fraud.)

January 26, 2000: The bankruptcy court lifts the stay at the request of the Canter Family Trust, thereby allowing the unlawful-detainer action to proceed. Alan Canter and Deborah Canter subsequently sign a stipulated judgment that Deborah vacate the premises.

February 7, 2000: The California state court enters a judgment pursuant to the stipulation and orders that Alan Canter recover possession of the property from Deborah Canter.

February 17, 2000: Judge Real withdraws the case from the bankruptcy court.

February 29, 2000: Judge Real stays enforcement of the California state court judgment.

Sometime in 2000 or 2001: Judge Real refuses to lift the stay upon motion by the Canter Family Trust.

June 18, 2001: Judge Real again refuses to lift the stay upon motion by the Canter Family Trust. When counsel for the Trust requested a reason, Judge Real replied: "Just because I said it, Counsel."

July 2001: Judge Real transfers the bankruptcy proceeding to a second U.S. district judge. The second judge re-refers the proceeding to the bankruptcy court. (The stay of the unlawful-detainer action remains in effect.)

January 2002: the bankruptcy court grants a motion by the Trust to abandon Deborah Canter's interest in the property.

August 15, 2002: the Ninth Circuit court of appeals vacates Judge Real's order withdrawing the case from the bankruptcy court and the accompanying order staying enforcement of the California state court judgment.

February 2003: A judicial misconduct complaint is filed against Judge Real.

July 14, 2003: The Chief Judge of the Ninth Circuit dismisses the complaint.

December 18, 2003: A Ninth Circuit Judicial Council enters an order recommending that the Chief Judge undertake further investigation into ex parte communications between Judge Real and Deborah Canter.

November 4, 2004: the Chief Judge enters a supplemental order and dismiss the complaint again.

September 29, 2005: A complaint regarding the Chief Judge's November 4, 2004, order is dismissed.

May 23, 2006: Ninth Circuit Chief Judge orders a "special committee" to investigate consolidated complaints against Judge Real.

H. RES. 916

Resolved, That Manuel L. Real, judge of the United States District Court for the Central District of California, is impeached for high crimes and misdemeanors.

IN HONOR AND RECOGNITION OF
DAVID AND REBECCA JEWEL

HON. DENNIS J. KUCINICH

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Monday, July 17, 2006

Mr. KUCINICH. Mr. Speaker, I rise today in honor and recognition of David and Becky Jewel, united in marriage and united in their exceptional service to our Nation's veterans, upon the occasion of their retirement that follows more than 53 years of combined, outstanding service within the medical facilities of the Veterans Administration.

Rebecca Jewel is a registered dietician and has guided veterans in nutrition health, awareness and education at VA facilities across the Nation, including VA medical centers in Hines, IL, Fort Wayne, IN, and in Cleveland and Brecksville, OH. Her medical career also includes work at Parma Community General Hospital in Parma, OH, and Christ Hospital in Cincinnati. Besides serving as the Advanced Systems Dietician, Rebecca provides on-going tech support and training for nutrition employees, and also serves a facilitator for many Goal Sharing teams within her department.

David Jewel, the chief of External Affairs for the Louis Stokes VA in Cleveland, has also served at VA medical centers in Ann Arbor,

MI, and Cincinnati, OH. David has consistently led efforts to ensure that veterans are fully informed about the benefits entitled to them. He has led the effort to upgrade vital areas of communication within the VA, with a focus on minority veteran's affairs, community affairs programs and public relations. David has been the codirector of the Medical Center's Combined Federal Campaign for the past 4 years.

Mr. Speaker and colleagues, please join me in honor, recognition and gratitude to David and Rebecca Jewel, whose individual and united dedication to our Nation's veterans is framed by commitment, compassion, integrity and accomplishment. Their service and leadership has been a significant component that reflects the strength and quality within the VA, and is a brilliant example of service for anyone who will follow. I wish David and Rebecca Jewel an abundance of health, peace and happiness as they journey onward from here.

HONORING GAYE HYDE'S SERVICE
TO CALIFORNIA'S EAST BAY
COMMUNITY

HON. FORTNEY PETE STARK

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Monday, July 17, 2006

Mr. STARK. Mr. Speaker, I rise to honor Gaye Hyde, my lead caseworker in Fremont, CA, district office, who will be retiring on July 31, 2006.

Gaye has worked for me, and more importantly for the people of California's 13th Congressional District, for 31 years. I dare say that her level of commitment is hard—if not impossible—to match. I'm honored that she's stuck with me for so many years. But, it is my constituents who have been the real winners.

Gaye has presided over tens of thousands of cases herself and has trained every caseworker who has come and gone from my staff over the past 30 years.

She started handling constituent casework in the days before computers were used in the office. She had to type initial inquiries to agencies for assistance, have them mailed to Washington, DC for my approval, and then track their progress through written correspondence from various agencies and seldom returned phone calls. Typically, she took piles of letters home and fact checked and typed responses late into the night. She was always pushing to resolve cases and didn't feel there was time in the day to meet her standards or constituents' needs.

How times have changed. Today, many constituents e-mail their requests for assistance. Gaye is able to e-mail constituent liaison offices in a variety of agencies, and much of the work is done via the Internet. The process makes communication faster, provides better accountability, and produces much less paper waste—all of which are great advancements.

What hasn't changed over time is the importance of the role of congressional caseworkers. These staff members get little of the glory, but are the key component for an effective Member of Congress.

Constituents who reach out for help from their Member of Congress usually are in great

need. They are trying to file immigration documents for a loved one, obtain a lost Social Security check upon which their parent depends, or applying for a federal grant which could make or break their organization's ability to continue providing important services to the community.

With Gaye at the helm of my casework operation, I've never had to worry about my constituents being served—and served superbly. Her retirement is well deserved, but those of us lucky enough to work with her, and thousands of East Bay residents she's helped over the years, will miss her tremendously.

A TRIBUTE TO MARTIN RUBIN

HON. ADAM B. SCHIFF

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Monday, July 17, 2006

Mr. SCHIFF. Mr. Speaker, I rise today to honor the late Martin Rubin. Mr. Rubin will be greatly missed. The transportation engineering world lost a legend whose influence in the development of the Los Angeles Metro Rail and the San Francisco Bay Area Rapid Transit, BART, systems, among other critical transportation projects, continues to facilitate the commutes of residents in some of our nations most expansive metropolitan areas.

A native of Brooklyn, New York, Martin Rubin entered into the United States Army following his graduation from City College of New York. In 1956, he joined Parsons Brinckerhoff, a 120-year-old international engineering firm based in New York City. After moving to Southern California in 1981, he worked indefatigably to expand the prestigious representation of Parsons Brinckerhoff to the western United States, and simultaneously managed a wide array of transportation projects.

Mr. Rubin's undeniably selfless dedication earned him the honor of being in charge of the Western region of Parsons Brinckerhoff in the 1980s, followed in 1990 by his selection as the president and chief operating officer of the firm's United States infrastructure arm. Always dedicated to service, he relinquished those titles to assume his duties in the development of the Los Angeles Metro Rail system where he oversaw the engineering and construction for the Blue Line, Green Line, and Red Line, as well as overseeing preliminary efforts on the Pasadena to Los Angeles Gold Line. He was subsequently honored by being named the chairman of Parsons Brinckerhoff in 1994, an honor that he held until 1997. His retirement in 2004 was a fitting end to his 48 years of distinguished service to his firm, and to the citizens of California.

I ask all Members of the House of Representatives to pause to honor a great man, Martin Rubin, who touched so many people through his deeds in life. He will be missed not only by his surviving wife and his four children, but also by all of those who have benefited from the works to which he dedicated his life.

HONORING "MOTHER" RUTH
VILLIA JONES

HON. BARBARA LEE

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Monday, July 17, 2006

Ms. LEE. Mr. Speaker, I rise today to honor the extraordinary life and work of Ruth Villia Jones of Oakland, California. Known to most simply as Mother Ruth, she has been a leader, an activist, and an icon in the Oakland community for decades, providing care and guidance to countless others throughout her life, and on July 16, 2006, the friends and family of Mother Ruth will gather to celebrate this remarkable woman's 100th birthday.

Mother Ruth was born July 12, 1906 in Louisiana, soon after the great quake of San Francisco. She grew up during a time of extreme social and racial segregation, and learned about racial and gender discrimination from her family's experiences. These experiences shaped her resolve to challenge the status quo and begin her quest for social and human rights in the 1930s and as a Red Cross volunteer during World War II in the 1940s.

Throughout the 1950s, 1960s, and 1970s, Mother Ruth combined her deep spiritual commitment with her desire for social justice, becoming active in the civil rights movement and fighting to end racial discrimination in our country. She marched and worked with the Reverend Martin Luther King, Jr., Reverend Jesse Jackson, and the Reverend Cecil Williams. In the 1960s and 1970s Mother Ruth supported the work of a young group of African American activists, known as the Black Panthers, by joining them on picket lines, in the Free Breakfast Programs and Schools, eventually earning her the esteemed honor of "Mother" to these young men.

As "Mother Ruth," through her vision and activism, she has mentored and enriched the lives of many local leaders, such as Oakland Mayor Lionel Wilson, Congressman Ron Dellums, and myself when I was becoming politically active in the 1970s. Working with her helped to instill in me not only a deep sense of community, but also a fundamental commitment to fighting for social equity and social justice throughout my life. She has been a mentor and a friend to me throughout most of my life, and I am deeply thankful to her for sharing with me her wisdom, her compassion, and her support.

Throughout the Bay Area, Mother Ruth is also known for helping to start the meals program at Glide Memorial Church, which continues to this day. In the 1980s and 1990s Ruth Villia Jones turned her energy and expertise to professional organizations, such as the Glide Foundation, the California Legislative Council for Older Americans, the Alameda County Advisory Commission on Aging, the Black Women Organized for Political Action, the Black Women Organized for Educational Development, the National Black Women's Resource Center, the National Association of Negro Business and Professional Women's Clubs to name a few. Through her various roles in these organizations, Mother Ruth has continued the fight for social justice and equal-

ity on numerous fronts, and inspired countless new leaders along the way.

Mother Ruth Villia Jones has been awarded recognition and praise for her activism on many occasions, including being named one of the 2003 Eternal Voices of the Oakland African Museum, the 1984 Ella Hill Hutch Award, the 1980 Glide Community Award, and many others.

Mother Ruth Villia Jones has been a loving sister, mother, wife, a proud grandmother and great grandmother, a friend to many and a "Mother" to us all. On this very special occasion, Oakland and the entire Bay Area community comes together to celebrate Mother Ruth Villia Jones' 100th birthday and honor her for a lifetime of pursuing peace and fighting for social justice. I am honored to add my voice, on behalf of California's 9th U.S. Congressional District, all those gathered here today to thank and salute Mother Ruth for her immeasurable contributions to her community, our country, and our world.

SUBMISSION OF TEXAS SENATE
RESOLUTION 9, URGING THE U.S.
CONGRESS, TO ADDRESS PROBLEMS
IN THE DEPARTMENT OF
VETERANS AFFAIRS

HON. CHARLES A. GONZALEZ

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Monday, July 17, 2006

Mr. GONZALEZ. Mr. Speaker, I rise today in an effort to bring attention to the insufficient policies that this nation has levied toward our veterans. The great sacrifices made by our military personnel should be acknowledged, at the very least, through a secure retirement. Yet time and again, the rhetoric presented by Members of Congress does not match the policies that are created.

It is imperative that we address the needs of veterans through real proposals that will be flexible and hold up against the course of time, as opposed to short-term fixes. I believe that we can provide military retirees with the degree of support that is reasonable in light of the sacrifices that they have made in service to this nation.

This belief is reflected in a measure adopted by the Texas State Senate on May 15, 2006. Texas Senate Resolution No. 9 (S.R. 9), which was authored by Texas State Senator Leticia Van de Putte, urges Congress to address problems in the Department of Veterans Affairs and to enact legislation that assures predictable and adequate funding of the Veterans Health Administration.

I would like to submit the text of S.R. 9 to the CONGRESSIONAL RECORD so that we in the Federal Government might be reminded of our duty to provide appropriate services to the men and women of our military who have served our nation so proudly. I am hopeful that we can make the needs of veterans a greater priority and that we will thusly adopt policies that recognize the profound commitment and steadfast courage our military personnel demonstrate every day.

TEXAS SENATE RESOLUTION NO. 9

Whereas, military veterans who have served their country honorably and who were

promised and have earned health care and benefits from the Federal Government through the Department of Veterans Affairs are now in need of these benefits; and

Whereas, the funding of the health care programs of the Veterans Health Administration of the Department of Veterans Affairs has failed to reflect the admission of newly eligible veterans in the wake of the Veterans' Health Care Eligibility Reform Act of 1996 and has fallen short of the amount needed to counter soaring medical care inflation, resulting in a funding shortfall of at least \$10 billion; and

Whereas, the current discretionary method of funding the health care programs of the Veterans Health Administration is uncertain and is subject annually to the whims and competing priorities of Congress, to the detriment of the veterans being served; and

Whereas, the Vietnam Veterans of America organization supports the adoption of a new funding mechanism for the health care programs of the Veterans Health Administration that is indexed to medical inflation and the per capita use of the administration's health care system; and

Whereas, the substantial delay in adjudicating veterans' claims for service-connected disability compensation is the cause of much anguish and anger among veterans and is the result of a lack of funding of the Veterans Benefits Administration of the Department of Veterans Affairs, which has led to an insufficient number of adjudicators and the inadequate training and supervision of adjudicators; and

Whereas, while the vast majority of Department of Veterans Affairs employees are dedicated to serving veterans, it is necessary to ensure that employee accountability standards be strengthened at senior and junior levels; and

Whereas, while more than five million veterans use the Veterans Health Administration of the Department of Veterans Affairs for their health care needs, tens of thousands more are eligible for benefits of which they are unaware due to inadequate outreach efforts by the department; now, therefore, be it

Resolved, That the Senate of the State of Texas, 79th Legislature, 3rd Called Session, hereby respectfully urge the Congress of the United States to address problems in the Department of Veterans Affairs related to the provision of health care and benefits, the adjudication of claims, accountability, and outreach and to enact legislation that creates an appropriation formula that ensures predictable and adequate funding of the health care programs of the Veterans Health Administration; and, be it further

Resolved, That the Secretary of the Senate forward official copies of this Resolution to the Secretary of Veterans Affairs, the President of the United States, the President of the Senate and Speaker of the House of Representatives of the United States Congress, and all members of the Texas delegation to the Congress with the request that this Resolution be officially entered in the CONGRESSIONAL RECORD as a memorial to the Congress of the United States of America.

HONORING PUBLIC DEFENDER
JAMES J. STEINBERG, HUMBOLDT COUNTY, CALIFORNIA

HON. MIKE THOMPSON

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Monday, July 17, 2006

Mr. THOMPSON of California. Mr. Speaker, I rise today in recognition of Humboldt County Public Defender James J. Steinberg on the occasion of his retirement after nearly 30 years of service to the people of Humboldt County.

James Steinberg began his public service career as a Humboldt County Deputy Public Defender in 1977, shortly after graduating from the University of California Hastings School of Law in 1976. Promoted to Assistant Public Defender in 1989, Mr. Steinberg was then appointed as Public Defender in 1997. During this period, he represented well over 15,000 clients, including Three Strikes and death penalty cases.

In addition to his dedicated performance in the Public Defenders office, Mr. Steinberg has served as the Humboldt County Bar Association President and the President of the Board of Trustees for the Humboldt County Law Library. Mr. Steinberg has also been a member of the North-Coast Co-op Board of Directors, the City of Arcata Budget Advisory Committee, and as a lecturer and instructor at both Humboldt State University and College of the Redwoods. Mr. Steinberg is a founding member of the Teen Court, which conducts trials by peers for first-time juvenile offenders, giving young people a hands-on experience in how our justice system works.

Mr. Steinberg was recognized in 1997 as the Democrat of the Year by the Humboldt County Democratic Central Committee. He graciously accepted the award in an unforgettable address, delivered in rhymed verse. Mr. Steinberg is well-known and highly regarded by his colleagues for his patience, leadership, quick wit, superior intelligence and steadfast commitment to public service.

Mr. Speaker, it is appropriate at this time that we recognize Public Defender James J. Steinberg for his valuable service over three decades to the people of California, and extend our best wishes to him on the occasion of his retirement.

HONORING JOHN F. "RICKY"
GOODRICH

HON. MARSHA BLACKBURN

OF TENNESSEE

IN THE HOUSE OF REPRESENTATIVES

Monday, July 17, 2006

Mrs. BLACKBURN. Mr. Speaker, I would like to take a moment today to honor CW5 John F. "Ricky" Goodrich of the Tennessee Army National Guard.

Recently, Chief Goodrich celebrated his 60th birthday at the Ali ai-Salem Airbase in Kuwait while serving there with the Guard's Operational Support Airlift Detachment 25. While he may be far from home, we're thinking of him and wishing him well as he works to defend America's national security.

This is not the first birthday Ricky Goodrich has spent away from home while serving his county though. Nearly 40 years ago, Chief Goodrich spent his 22nd birthday as a young soldier in Vietnam.

Chief Goodrich, the command chief warrant officer of the Tennessee Army National Guard, volunteered for this most recent deployment. And in addition to his administrative responsibilities, he routinely flies his C-12 aircraft into Iraq and Afghanistan.

I would not only like to extend our birthday wishes, but also thank him for his years of exceptional service to the United States Army and the Tennessee Army National Guard. America's fortunate to have men like Ricky and we honor him today.

HONORING CHERI FLEMING

HON. HOWARD P. "BUCK" McKEON

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Monday, July 17, 2006

Mr. McKEON. Mr. Speaker, I rise today to recognize Cheri Fleming, a lovely lady from Santa Clarita, CA. On May 22, Newsweek presented her with the prestigious 2006 Dealer of the Year Award from the American International Automobile Dealers Association, AIADA.

Founded in 1970, AIADA represents 11,000 American automobile dealerships. The members of the association provide nearly 500,000 American jobs and have a positive economic impact both nationally and in their communities. Every May, in recognition of exceptional community contributions and staunch commitment to the advancement of the industry, the Dealer of the Year program acknowledges 10 finalists from across the Nation. Winning the first time she was nominated, Cheri was the only woman proposed this year for the prestigious award.

Partners in business, philanthropy and in life, Cheri and her husband, Don, purchased Valencia Acura in 1997. Although soon to change, at the time the dealership's national ranking was dead last for sales and also in customer satisfaction. Cheri and Don adopted the philosophy of "friendship" instead of "dealership" and began treating their customers just as they would like to be treated. Today, Valencia Acura is one of the top Acura dealerships in the country and also ranks amongst the highest in customer satisfaction with repeat and referral customers comprising over 75 percent of the business. In a relatively short amount of time, Valencia Acura has won many accolades from Acura and Customer Satisfaction Index awards, including: Acura's Precision Team—2002–2004, Honda's Council of Excellence—2004–2005, "Best New Car Dealership in Santa Clarita"—2003–2005, "Most Community Minded Owners in Santa Clarita"—2003–2005 and Santa Clarita Valley Chamber of Commerce "2001 Business of the Year" for the medium-sized category.

With the success of Valencia Acura, Cheri and Don rapidly became vital forces in the Santa Clarita Valley and have donated nearly \$3 million to community organizations in the past 7 years. Their community involvement

transcends financial support as they can often be found participating in community organizations and generously giving their time, energy and efforts for a variety of causes. For their hard work and dedication, Don and Cheri were selected as Santa Clarita's Man and Woman of the Year for 2004. Never before in the history of the program has a husband and wife received the award in the same year.

Although at the helm of a thriving business, Cheri finds time for her extensive volunteer endeavors. Currently, she is the vice president at-large and a director for the Henry Mayo Newhall Memorial Health Foundation, governor-elect for the Soroptimist International Camino Real Region, member and past-president of the Soroptimist International of Santa Clarita Valley, vice president of Special Events and a director for the Child and Family Center Foundation, a director for the Roar Foundation Advisory Board, chair-elect and a director for the American Cancer Society Unit Council and the Los Angeles Regional Unit Council, vice president of the Sheila R. Veloz Breast Imaging Center Advisory Board, chair of the Arthritis Foundation Walk and with Don as her co-chair, has headed the Boys & Girls Club Auction for the past 3 years. In addition, Cheri just fulfilled her \$100,000 pledge to help with a cardiac-catheter lab and new emergency room for our local hospital. Recently, Cheri chaired the Santa Clarita Valley Arthritis Walk raising over \$60,000 and Don's efforts for the Fleming-Crawford Golf Invitational raised over \$113,000 for the Sheila R. Veloz Breast Imaging Center.

The AIADA acknowledged Cheri Fleming's exceptional community contributions and business acumen with the 2006 Dealer of the Year Award and I would like to commend Cheri for her success as well. Sir Winston Churchill once said, "We make a living by what we get. We make a life by what we give." Supported by Don, there is no one who embodies that statement better than Cheri Fleming. Together, their efforts have made the Santa Clarita Valley a much better place to live and I salute them for their efforts.

RECOGNIZING THOMAS R.
MERRILL OF LAKE COUNTY, FL

HON. GINNY BROWN-WAITE

OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES

Monday, July 17, 2006

Ms. GINNY BROWN-WAITE of Florida. Mr. Speaker, I rise today to recognize Thomas R. Merrill of Groveland, Florida. Recognized as the longest serving police chief in the Nation, Chief Merrill was honored at the Florida Peace Officers Association awards ceremony as the first-ever recipient of their Distinguished Service Award.

For the past 37 years, Chief Merrill has served as Groveland's chief of police and has proved to be an inspiration to his community and area residents. In addition to his high morals and integrity, Chief Merrill's long tenure has demonstrated his great dedication and commitment to his profession, as well as to the city of Groveland.

Born and raised in Umatilla, FL, Chief Merrill joined the military after graduating from col-

lege, serving in the U.S. Air Force from 1959 to 1963 as a nuclear weapons specialist. Chief Merrill later became an officer with the Eustis Police Department, where he remained for 3 years. After taking a brief leave of absence from the force to spend time with his family, Chief Merrill soon thereafter accepted the position as Groveland's police chief. He has been there ever since, serving Groveland with pride and seeing the city through many changes.

After raising his children in Groveland, Chief Merrill is committed to keeping his community safe for future generations. He has enjoyed watching the police department and the city grow during his tenure, and with greater expansion likely for the future, Chief Merrill has no plans to retire anytime soon.

Mr. Speaker, Chief Merrill's career shows that loyalty and dedication to one's community can indeed bring success and accomplishment. I congratulate him on being the first recipient of the Distinguished Service Award and commend him on his commitment and devotion to his career and to Groveland.

"ACTIVISM FOR THE RIGHT,
RESTRAINT FOR THE LEFT"

HON. BARNEY FRANK

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

Monday, July 17, 2006

Mr. FRANK of Massachusetts. Mr. Speaker, one of the great intellectual inconsistencies of our time is the assertion by conservatives that they are opposed to "judicial activism" and wish to have important public policy questions left to elected officials. Of course that is true only in those cases where they agree with what the elected officials have done, and they have shown very little restraint when their ideology calls for judicial invalidation of public policy. Indeed, some of the greatest anger I have heard expressed toward judiciary recently by my conservative colleagues has been against the eminent domain decision, in which the justices are guilty in the eyes of my conservative colleagues of being insufficiently activist—that is, the court majority allowed the actions of elected State and local officials in Connecticut to stand. I agree that eminent domain has been abused, but so is intellectual integrity when people insist that the courts defer to elected bodies on the one hand, and then denounce the Supreme Court precisely for doing that in the Kelo case.

Chief Justice Roberts to date appears to be very much in the mode of this one-sided condemnation of activism, as Adam Cohen cogently points out in the July 10 column in the New York Times—given the importance of consistency in the application of judicial principles, I ask that Mr. Cohen's very thoughtful analysis of the Chief Justice's inconsistency be printed here.

[From the Editorial Observer, July 10, 2006]

WHAT CHIEF JUSTICE ROBERTS FORGOT IN HIS FIRST TERM: JUDICIAL MODESTY

(By Adam Cohen)

At the confirmation hearings for John Roberts, there were two theories about what kind of a chief justice he would be. His crit-

ics maintained that he was an extreme conservative whose politics would drive his legal rulings. Judge Roberts, on the other hand, insisted that he was "not an ideologue," and that his judicial philosophy was to be "modest," which he defined as recognizing that judges should "decide the cases before them" and not try to legislate or "execute the laws."

Judicial modesty is an intriguing idea, with appeal across the political spectrum. For all the talk of liberal activist judges, anyone who is paying attention knows that conservative judges are every bit as activist as liberal ones; they just act for different reasons. A truly modest chief justice could be more deferential to the decisions of the democratically elected branches of government, both liberal and conservative, and perhaps even usher in a new, post-ideological era on the court.

That is not, however, how Chief Justice Roberts voted in his first term. He was modest in some cases, certainly, but generally ones in which criminal defendants, Democrats and other parties conservatives dislike were asking for something. When real estate developers, wealthy campaign contributors and other powerful parties wanted help, he was more inclined to support judicial action, even if it meant trampling on Congress and the states.

The term's major environmental ruling was a striking case in point. A developer sued when the Army Corps of Engineers denied him a permit to build on what it determined to be protected wetlands. The corps is under the Defense Department, ultimately part of an elected branch, and it was interpreting the Clean Water Act, passed by the other elected branch. Courts are supposed to give an enormous amount of deference to agencies' interpretations of the statutes they are charged with enforcing.

But Chief Justice Roberts did not defer. He joined a stridently anti-environmentalist opinion by Justice Antonin Scalia that sided with the developer and mocked the corps's interpretation of the law—an interpretation four justices agreed with as "beyond parody." The opinion also complained that the corps's approach was too costly. Justice John Paul Stevens dryly noted that whether benefits outweighed costs was a policy question that "should not be answered by appointed judges."

In an opinion on assisted suicide, Chief Justice Roberts was again a conservative activist. The case involved Attorney General John Ashcroft's attempt to invoke an irrelevant federal statute to block Oregon's assisted suicide law, which the state's voters had adopted by referendum. Even though it meant overruling the voters, intruding on state sovereignty and mangling the words of a federal statute, Chief Justice Roberts dissented to support Mr. Ashcroft's position.

Chief Justice Roberts voted against another democratically enacted, progressive law when the court struck down Vermont's strict limits on campaign contributions. He joined an opinion that not only held that the law violated the First Amendment, but also engaged in the kind of fine judicial line-drawing—in this case, about the precise dollar limits the Constitution allows states to impose—that is often considered a hallmark of judicial activism.

One of the court's most nakedly activist undertakings in recent years is the series of hoops it has forced Congress to jump through when it passes laws that apply to the states. Judge John Noonan Jr., a federal appeals court judge appointed by President Ronald

Reagan, has complained that the justices have set themselves up as the overseers of Congress. But Chief Justice Roberts voted to put up yet another hoop, requiring Congress to put the states on "clear notice"—whatever that means—before requiring them to pay for expert witnesses in lawsuits involving special education. It is a made-up rule that shows little respect for the people's representatives.

These cases make Chief Justice Roberts seem like a raging judicial activist. But in cases where conservative actions were being challenged, he was quite the opposite. When a whistle-blower in the Los Angeles district attorney's office' claimed he was demoted for speaking out, Chief Justice Roberts could find no First Amendment injury. When Democrats challenged Republicans' partisan gerrymandering of Texas's Congressional districts, he could find no basis for interceding.

The Roberts court's first term was not radically conservative, but only because Justice Anthony Kennedy, the swing justice, steered it on a centrist path. If Chief Justice Roberts—who voted with Justice Scalia a remarkable 88 percent of the time in nonunanimous cases—had commanded a majority, it would have been an ideologically driven court that was both highly conservative and just about as activist as it needed to be to get the results it wanted.

Chief Justice Roberts still probably views himself as judicially modest, and in some ways he may be. He has been reasonably respectful of precedent, notably when he provided a fifth vote to uphold *Buckley v. Valeo*, a critically important campaign finance decision that is under attack from the right. He has also been inclined to decide cases narrowly, rather than to issue sweeping judicial pronouncements. But at his confirmation hearings, he defined judicial modesty as not usurping the legislative and executive roles.

His approach to his new job is no doubt still evolving, which could be a good thing. The respect for the elected branches that he invoked while testifying before the Senate Judiciary Committee is hardly a perfect judicial philosophy especially today, when we need the court to resist the president's dangerous view of his own power. Still, that principled approach would do more for the court and the nation than the predictable arch-conservatism the chief justice's opinions have shown so far.

PAYING TRIBUTE TO CORAL
CHILDS

HON. JON C. PORTER

OF NEVADA

IN THE HOUSE OF REPRESENTATIVES

Monday, July 17, 2006

Mr. PORTER. Mr. Speaker, I rise today to honor Coral Childs for her tireless efforts to enhance technology in the classroom.

Coral Childs has worked tirelessly to further her vision of providing every student in America with access to computers in their schools. Through the Computers for Learning program, CFL, Coral and her team are turning her vision into a reality, matching these "needy" schools with a donor, either a government agency or a member of the private sector, and giving young students access to the tools they need to prepare themselves to compete in the new economy. The CFL program helped bring

to life an executive order that encouraged government agencies to donate computers and equipment to schools.

The General Services Administration took ownership of CFL in late 1999. It was at this time that Coral began her work with the program. Under her leadership over the next 5 years, CFL helped transfer more than 118,000 computers and related equipment to over 12,000 needy schools. Coral played a significant role in both the marketing and outreach for the program, but her active involvement with the CFL's website cannot go unmentioned. Due to her remarkable compassion for the public and her dedication to the cause, the website is a place where agencies can instantly access pertinent information about needy schools. A key innovation to the program that Coral brought to CFL was to expand potential donors from government agencies to donors from the private sector including corporations and individuals.

Coral's achievements with CFL helped propel her to a new position within the General Services Administration. She no longer plays a daily role in the Computers for Learning program, but its success would not exist without the key part she played in the program's initiatives and implementation.

Mr. Speaker, I am proud to honor Coral Childs. Her dedication to distributing computers and related equipment to needy schools has greatly enhanced the educational experience of countless children. I applaud her efforts and wish her the best in her future endeavors.

HONORING THE CITY OF ARLING-
TON, TX, ON ITS 130TH BIRTH-
DAY

HON. JOE BARTON

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Monday, July 17, 2006

Mr. BARTON of Texas. Mr. Speaker, on July 19, 1876, the United States was still celebrating its centennial as Engine No. 20 rolled down the freshly laid tracks of the Texas and Pacific Railroad built to extend rail service west from Dallas. The railroad had hired frontier surveyor and Presbyterian minister Andrew Hayter to locate and lay out a 1-square-mile township as a wood and water stop midway between Dallas and Fort Worth. Entrepreneur James Ditto immediately established a general store in the center of the new town, which had quickly become a shipping point for local cotton farmers and merchants. Hayter and Ditto named the town Arlington in honor of General Robert E. Lee's home in Virginia, and Ditto became the town's first postmaster.

Today, Arlington is the 49th largest city in the United States with a population of more than 360,000 people. It is home to a major General Motors assembly plant, a National Semiconductor wafer plant, a number of Fortune 500 facilities, the fastest growing university in Texas—the University of Texas at Arlington—and an entertainment complex that is one of the top tourist destinations in the country. The original Six Flags amusement park, Hurricane Harbor water park, and the Texas

Rangers Baseball Club are located there. And in 2009, when the new stadium is completed, it will become the new home of the Dallas Cowboys football team.

Arlington is and has always been one of the best places in Texas to live, work, and play, to get a quality education and to start a new business. Recent surveys tell us that Arlington is also one of the fittest cities of its size in the Nation, as well as one of the best educated.

As the representative to Congress from Arlington, TX, I want to join the citizens of this great city in celebrating its 130th birthday, recognize the city for its outstanding achievements over the past 130 years, and pray God's blessings on its people for the next 130 years.

A TRIBUTE TO DEAN DONALD E.
WILSON

HON. BENJAMIN L. CARDIN

OF MARYLAND

IN THE HOUSE OF REPRESENTATIVES

Monday, July 17, 2006

Mr. CARDIN. Mr. Speaker, I rise today to honor Donald E. Wilson, M.D., MACP, who is retiring as dean of the University of Maryland School of Medicine and vice president of Medical Affairs for the University of Maryland.

Dean Donald E. Wilson has transformed the landscape of American medicine and medical education at the University of Maryland. In 1991, when Dr. Wilson was appointed dean of the University of Maryland School of Medicine, he was the first African-American dean of a primarily non-minority medical school, as well as the first African-American dean at the University of Maryland School of Medicine.

Since 1991, Dean Wilson has increased grant and contract awards from \$77 million to \$350 million. Philanthropic support for the school of medicine has risen from \$1.7 million to \$37 million. Dean Wilson has created one of the most diverse student bodies and faculties in the country, with the School of Medicine doubling the number of full-time African-American faculty. Now ranked among the top medical schools in the country, the University of Maryland School of Medicine has benefitted from Dean Wilson's leadership that has promoted the values of cultural and gender diversity and created an all-inclusive atmosphere at the medical school.

Dean Wilson's commitment to the education of minority students in the field of medicine led him to found the Association of Academic Minority Physicians. He continues to serve as editor of the association's journal. For his devotion, Dr. Wilson became the first recipient of the Association of American Medical Colleges' Herbert W. Nickens, MD Award for Diversity.

Dr. Wilson has been a good and trusted adviser to me on health care policy. He has spoken out about the need to expand research into diseases that are more prevalent in the African-American community and among women. His service on the Maryland Health Care Commission has helped to guarantee access to emergency health care for all Marylanders while ensuring that hospitals are able to provide those services.

I hope you will join me in congratulating and thanking Dean Donald E. Wilson for his outstanding contributions to medical education

and his commitment to racial and cultural inclusion.

WELCOMING THE NAACP TO WASHINGTON, DC ON THE OCCASION OF ITS 97TH ANNUAL CONVENTION

HON. BENJAMIN L. CARDIN

OF MARYLAND

IN THE HOUSE OF REPRESENTATIVES

Monday, July 17, 2006

Mr. CARDIN. Mr. Speaker, I rise to welcome the National Association for the Advancement of Colored People to Washington, DC for its 97th Annual Convention. The NAACP has been dedicated to promoting and preserving civil rights since its founding in 1909. This year's theme, "Voting our Values, Valuing our Votes," reflects well the organization's commitment to the causes of equality and full participation in society for each and every American.

I wish to extend a special welcome to NAACP President and CEO Bruce Gordon who is completing his first year at the organization's helm, and to Chairman Julian Bond, who has provided steadfast direction and counsel over the years.

As a native of Baltimore, the NAACP's home, and as a life member of the organization, I am filled with pride to see such a large turnout this week in our nation's capital. I also want to welcome the delegates from Region 7, including my constituents from Maryland, who are participating in the week's events. Many of the other delegates flew for the first time into the Baltimore-Washington International Thurgood Marshall Airport, which was renamed last year in honor of Justice Marshall, a son of Baltimore who served as the NAACP's Chief Counsel prior to his historic tenure on the United States Supreme Court.

The 97th annual convention occurs as the House of Representatives has just overwhelmingly passed—without amendments—a 25-year reauthorization of the 1965 Voting Rights Act, and we look forward to its passage this week by the Senate. I want to express my gratitude to Mr. Gordon and Mr. Bond for their vigorous efforts in support of this crucial legislation.

Mr. Speaker, I urge my colleagues to join me in saluting the NAACP for its extraordinary legacy of commitment and courage and for its outstanding presence at this 97th annual convention. I look forward to working with them to promote and protect civil rights in the years to come.

ON ILLICIT ARMS TRAFFICKING

HON. CHARLES B. RANGEL

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Monday, July 17, 2006

Mr. RANGEL. Mr. Speaker, I rise today to address the issue of illegal trafficking of small arms and light weapons which is responsible for the death of approximately 1,000 people every day worldwide. As U.N. Secretary General Kofi Annan reminded us in the U.N. con-

ference on curtailing small arms and light weapons, "these weapons may be small, but they cause mass destruction."

The United States objects to any international regulation on arms trade and is opposed to a blanket ban on governments selling arms to 'non-state actors,' i.e. rebel groups, on the grounds that the oppressed have the right to defend themselves against tyrannical and genocidal governments. Unfortunately our policy also leaves the door open for terrorists groups to get their hands on weaponry. The U.S. government is loathe to sacrifice the liberty of the oppressed people worldwide in exchange for a possible security risk (terrorist threat) to the United States, but has no qualms in forfeiting the privacy and civil liberties of American citizens in return for security.

Furthermore, the United States is the leading producer of arms in the world, meaning we, more than any other country engage in arms trade with other governments, as well as 'nonstate actors.' We, as the superpower of the global system, must take the leading role in eliminating illicit arms trafficking which supplies armaments to brutal civil wars and organized crime networks and thereby causing massive casualties worldwide, everyday.

The United Nations has adopted a non-binding agreement program of action in its conference on "illicit Trade of Small Arms and Light Weapons In All Its Aspects," held in July 9–20, 2001. It encourages nations to ensure manufacturers use markings on small arms and light weapons make tracing illegal arms easier. It also encourages implementation of procedures to monitor legal sales, transfer and stockpiling of small arms and light weapons and urges governments to make illegal manufacture, trade and possession a criminal offense.

The U.S. policy should be to support the U.N.'s Program of Action and try to make the resolution of the conference binding to the member states. We already have strict regulatory policies in arms trade within our borders. We need to expand those policies internationally with the assistance of the United Nations.

Mr. Speaker, I rise to enter into the RECORD, the article by Warren Hoge, titled With caveats. U.S. Backs Session at U.N. on curtailing Illegal Arms, published in the June 28, 2006 edition of the New York Times, reporting on the U.N. Small Arms & Light Weapons Review Conference 2006.

[From the New York Times, June 28, 2006]

WITH CAVEATS, U.S. BACKS SESSION AT U.N. ON CURTAILING ILLEGAL ARMS

(By Warren Hoge)

United Nations, June 27.—The Bush administration gave its backing on Tuesday to a United Nations conference on curtailing the international flow of illegal arms, but warned delegates against adopting measures that would restrict individual possession of weapons.

"The U.S. Constitution guarantees the rights of our citizens to keep and bear arms, and there will be no infringement of those rights," Robert G. Joseph, under secretary of state for arms control and international security affairs, told the *General Assembly*. "Many millions of American citizens enjoy hunting and the full range of firearms sports,

and our work will not affect their rights," he said.

He also said Washington would object to any steps to establish international regulation of ammunition or to ban governments from selling arms to rebel groups, known in diplomatic jargon as "nonstate actors."

"While we will of course continue to oppose the acquisition of arms by terrorist groups," he said, "we recognize the rights of the oppressed to defend themselves against tyrannical and genocidal regimes and oppose a blanket ban on nonstate actors."

The two-week conference, which began Monday, is intended to improve ways of curbing the \$1 billion black market in the manufacture and distribution of small arms and light weapons that supply brutal civil wars and organized crime networks and end up killing an estimated 1,000 people every day worldwide.

Secretary General Kofi Annan reminded the gathering that "these weapons may be small, but they cause mass destruction." He urged member countries to toughen existing laws governing arms deals.

Steps that Mr. Joseph said the United States would support included the marking and tracing of weapons, controls on transfers, certification of the ultimate recipients, effective management of national stockpiles and destruction of illicit and government-declared surplus weapons.

Mr. Annan said the conference was not contemplating a global ban on gun ownership. "Nor do we wish to deny law-abiding citizens their right to bear arms in accordance with their national laws," he said.

He seemed to be referring to a campaign by the National Rifle Association, which has charged in mass mailings that the United Nations is plotting to take away Americans' guns through a treaty banning ownership.

John R. Bolton, the United States ambassador to the United Nations, confirmed that he had received hundreds of the form letters. Asked why all three citizen delegates from the United States to the conference were prominent members of the gun lobby group, he said he made it a practice not to comment on the activities of nongovernmental organizations.

MEDICARE HOME INFUSION THERAPY CONSOLIDATED COVERAGE ACT OF 2006

HON. ELIOT L. ENGEL

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Monday, July 17, 2006

Mr. ENGEL. Mr. Speaker, I am delighted to join with my colleagues KAY GRANGER, TAMMY BALDWIN, and RANDY KUHL in introducing the Medicare Home Infusion Therapy Consolidated Coverage Act of 2006. This bill would correct long-standing gaps in Medicare coverage for home infusion therapy, and will enable thousands of beneficiaries to obtain these often life-saving therapies in the most convenient and cost-effective setting—their homes.

Under current Medicare coverage rules, beneficiaries who have severe infections, cancer, or congestive heart disease and many other diagnoses, are needlessly admitted into hospitals or nursing homes to receive the care they need. This is most unfortunate, Mr. Speaker, because in many cases, infusion therapy administered in the patient's home is

clearly the preferred alternative. Commercial health plans have long recognized the clinical value and cost-effectiveness of home infusion therapy, and full and proper coverage of home infusion therapy is commonplace among these payers. Medicare stands virtually alone in its antiquated coverage policies that discourage the use of a therapy that in actuality should be promoted for its cost savings, safety, clinical effectiveness, and convenience. At a time when there is a growing awareness of the need to prevent or limit inpatient hospital stays for our Nation's elderly, we believe this legislation is extremely timely.

Our bill is very simple in its approach. Currently, whatever coverage exists for home infusion therapy is divided between part B and part D. Part B coverage is based on the durable medical equipment benefit, because an item of DME—the infusion pump—is sometimes needed to administer home infusion therapy. That coverage, however, is limited to about 23 drugs. Part D, the outpatient prescription drug benefit, covers more infusion drugs than part B, but does not cover the services, supplies and equipment necessary to safely and appropriately administer these therapies in the home. As a result, both part B and part D coverage of home infusion are very limited. Under part B, Medicare beneficiaries do not have access to many of the most common infusion drugs covered by commercial health plans. Under part D, many beneficiaries have to pay for the infusion services, supplies, and equipment with out-of-pocket funds. The clear result is that access to home infusion therapy, despite its potential for cost savings and good clinical outcomes, is needlessly limited.

Our bill would consolidate coverage for home infusion therapy under part B, so that coverage would be centered in one benefit and coverage would be designed to appropriately and accurately reflect what is involved in the safe and effective provision of home infusion therapy. The Secretary of HHS would apply quality standards that are consistent with prevailing community standard of care commonly utilized by commercial health plans. Both beneficiaries and the Medicare program itself would reap the benefits of broader access to these important medical treatments in the home.

I introduced a similar bill in 2001 that would have established a home infusion therapy benefit under part B. Since then Congress enacted the Medicare Modernization Act of 2003 which created the part D prescription drug benefit. While I appreciate the efforts to broaden coverage of the drug portion of home infusion therapy, the problems I have described still persist because CMS believes it does not have the authority to cover anything beyond the drugs. Thus, effective coverage of home infusion therapy has remained elusive. We can fix this now.

Along with my colleagues, I urge early consideration of this long-overdue bill.

THANK YOU, HECTOR BARRETO,
FOR A JOB WELL DONE

HON. DONALD A. MANZULLO

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Monday, July 17, 2006

Mr. MANZULLO. Mr. Speaker, last Monday was the last day in office for Hector Barreto, the second-longest serving SBA Administrator in its 53-year history. Last week, there was a reception in honor of former Administrator Barreto with a broad spectrum of the small business community in Washington in attendance. This reflected well upon Mr. Barreto and his leadership style to bring people together of diverse interests and backgrounds.

I don't know how Mr. Barreto put up with being in Washington for these past 5 years. I'm proud to be associated with Mr. Barreto and where he has taken the SBA to serve more small businesses than ever before in the history of the agency. I'm also proud to say that Mr. Barreto and I have similar backgrounds, growing up in the family restaurant business in the Midwest.

It's amazing to see what has happened during the tenure of Mr. Barreto as Administrator of the SBA. Mr. Barreto was confirmed by the Senate and then sworn into office on July 25, 2001. Several weeks later, our Nation was hit by the awful terrorist attacks on September 11. More Americans were killed in 9/11 than at Pearl Harbor. Mr. Barreto was just getting used to his new job responsibilities and this terrible tragedy struck America. Administrator Barreto rose up to the challenge by extending Economic Injury Disaster loans to small businesses all across America regardless of their proximity to the locations of the actual terrorist attacks. The terrorists sought to devastate our economy by tearing down the World Trade Center and disrupting air travel but they did not count on the resiliency of the small business sector and the American people. More than 10,000 small businesses across the Nation employing 166,000 workers were helped with over \$1 billion in 9/11 SBA disaster loans.

If that wasn't enough, Mr. Barreto achieved great results in other programs of the SBA. Between 2000 and 2005, the SBA more than doubled the number of loans made through its main business loan guarantee programs. The dollar volume also dramatically increased—in 7(a) by nearly 40 percent and in the 504 program by threefold. And after a series of programmatic shut-downs and curtailments, I joined with Mr. Barreto in making the historic decision in late 2004 to finally get the 7(a) program off the rollercoaster of the appropriations process and have it funded entirely through user fees just like the 504 and the SBIC program. Now, the 7(a) program is going like gangbusters, serving record numbers of small businesses throughout all demographic groups, as compared to when it was receiving a loan subsidy.

There has also been a steady increase in the number of individuals receiving technical assistance, education, and counseling through the SBA and its resource partners. Also, as a result of active engagement between the SBA and Federal agencies, Federal procurement dollars going to small businesses are at an all-

time high. All this was accomplished while transforming the SBA into an agency to meet the challenges of the 21st century. Change is hard but Mr. Barreto made the courageous decision to have the SBA operate more like the private sector than a bureaucracy. Doing more with less should be praised, not condemned, particularly in this tough budget environment.

Then, Hurricanes Katrina, Rita, and Wilma violently struck the gulf coast last year. It was as if a swath of complete devastation 100 miles wide ripped through our country from Boston to Chicago. Again, Administrator Barreto and his team in the Office of Disaster Assistance came through despite enormous obstacles placed in their path, including not being able to really get to the areas of deepest destruction until well after a month after Hurricane Katrina ravaged New Orleans. The SBA and Administrator Barreto in particular took many below-the-belt political potshots along the way. I know when a person's integrity has been unfairly questioned, and I had to stand up to defend a decent and honorable man. I was proud to stand with Mr. Barreto last December in the press conference to put some context and additional facts into a very complicated situation.

Just as a side note, it is very interesting to me that the media is not reporting that the SBA thus far has approved a record amount of over \$10 billion in disaster loans to more than 152,000 Gulf States residents, representing an accomplishment 2½ times greater than the Nation's previous largest disaster—and all done at a faster pace. That is something to be proud of.

Mr. Speaker, I want to take this brief opportunity to once again thank Mr. Barreto for his leadership; for his friendship; and for his service to our country. Our Nation's small business community is better for Mr. Barreto's tenure as the second longest serving SBA Administrator in history. The new SBA Administrator, Steve Preston, has some fairly big shoes to fill.

Freda and I wish Hector Barreto and his family all the best in his new endeavor as the new national chairman of the Latino Coalition. I am confident that Mr. Barreto will never forget his small business roots.

PAYING TRIBUTE TO KATHY
AUGUSTINE

HON. JON C. PORTER

OF NEVADA

IN THE HOUSE OF REPRESENTATIVES

Monday, July 17, 2006

Mr. PORTER. Mr. Speaker, I rise today to honor the life of Kathy Augustine, a dedicated Nevada leader, who passed away on Tuesday, July 11, 2006.

Kathy was a devoted and passionate public servant, having served in the Nevada State Assembly from 1993 to 1995, and also in the State Senate from 1995 to 1999, where she chaired the Legislative Affairs and Operations Committee and was Vice Chairman of Taxation and the Human Resources and Facilities Committees. In 1999, Kathy became the first woman to be elected as Nevada State Controller. To add to her impressive résumé, Kathy was also a Trustee for the Center for

Governmental Financial Management, and the National Association of State Auditors, Comptrollers, and Treasurers' representative on the Electronic Benefits and Services Council, where she served as Chair of the Strategic Expansion and Advanced Technology Committee.

Kathy's work on behalf of her constituents earned her a number of honors throughout her years of public service. She was a recipient of the American Legion Achievement Medallion, the Community Partners Family Resource Center 1998 Community Service Award of Excellence, the 1998 National Republican Legislators Association, Legislator of the Year, Nevada Opera Theatre's International Friendship Award (2003), and the Augustus Society's Italian American of the Year (2003).

In addition to her vast public service career, Kathy also had an impressive array of academic achievements. She earned a Bachelor's Degree in Political Science from Occidental College in Los Angeles, and a Master's in Public Administration from California State University, Long Beach. She served as a Delegate to Russia and the Ukraine with the American Council of Young Political Leaders (ACYPL) in 1993 and was selected as an Executive Committee Member to the Biennial Assembly of the Atlantic Association of Young Political Leaders (AAYPL) in Paris, France in 1995. She participated in the Council of State Governments Henry Toll Fellowship Program and was also selected for the Flemming Fellows Leadership Institute's Class of 1996. In 1999, she attended the Governors Center at Duke University Strategic Leadership for State Executives and, in 2000, graduated from the Greater Reno-Sparks Chamber of Commerce Leadership program. In 2001, she completed the Harvard University, John F. Kennedy School of Government, Senior Executives in State and Local Government Program.

Mr. Speaker, I am saddened by the unexpected and sudden loss of such a young and ambitious woman. Kathy will be remembered for her dedication to the State of Nevada, to her family, and to her friends. She will be deeply missed.

SENATE COMMITTEE MEETINGS

Title IV of Senate Resolution 4, agreed to by the Senate on February 4, 1977, calls for establishment of a system for a computerized schedule of all meetings and hearings of Senate committees, subcommittees, joint committees, and committees of conference. This title requires all such committees to notify the Office of the Senate Daily Digest—designated by the Rules Committee—of the time, place, and purpose of the meetings, when scheduled, and any cancellations or changes in the meetings as they occur.

As an additional procedure along with the computerization of this information, the Office of the Senate Daily Digest will prepare this information for printing in the Extensions of Remarks section of the CONGRESSIONAL RECORD on Monday and Wednesday of each week.

Meetings scheduled for Tuesday, July 18, 2006 may be found in the Daily Digest of today's RECORD.

MEETINGS SCHEDULED

JULY 19

- 9 a.m.
Environment and Public Works
To hold hearings to examine the science and risk assessment behind the Environmental Protection Agency's proposed revisions to the particulate matter air quality standards.
SD-628
- 9:30 a.m.
Judiciary
To hold hearings to examine antitrust concerns relating to credit card interchange rates.
SD-226
- 10 a.m.
Banking, Housing, and Urban Affairs
Business meeting to consider the nominations of Frederic S. Mishkin, of New York, to be a Member of the Board of Governors of the Federal Reserve System, Linda Mysliwy Conlin, of New Jersey, to be First Vice President, James Lambright, of Missouri, to be President, and J. Joseph Grandmaison, of New Hampshire, to be a Member of the Board of Directors, all of the Export-Import Bank of the United States, Geoffrey S. Bacino, of Illinois, to be a Director of the Federal Housing Finance Board, Edmund C. Moy, of Wisconsin, to be Director of the Mint, Department of the Treasury; to be followed by a hearing to examine the semiannual Monetary Policy Report to Congress.
SD-106
- Commerce, Science, and Transportation
Business meeting to consider the nominations of Mark V. Rosenker, of Maryland, to be Chairman of the National Transportation Safety Board, R. Hunter Biden, of Delaware, and Donna R. McLean, of the District of Columbia, each to be a Member of the Reform Board (Amtrak), John H. Hill, of Indiana, to be Administrator of the Federal Motor Carrier Safety Administration, Andrew B. Steinberg, of Maryland, to be an Assistant Secretary of Transportation, routine lists in the Coast Guard and NOAA, and other pending calendar business.
SR-253
- Health, Education, Labor, and Pensions
Business meeting to consider proposed Pandemic and All-Hazards Preparedness Act, S. 843, to amend the Public Health Service Act to combat autism through research, screening, intervention and education, and the nominations of Elizabeth Dougherty, of the District of Columbia, Peter W. Tredick, of California, and Harry R. Hoglander, of Massachusetts, each to be a Member of the National Mediation Board.
SD-430
- Homeland Security and Governmental Affairs
To hold hearings to examine Department of Homeland Security purchase cards.
SD-342
- Energy and Natural Resources
Public Lands and Forests Subcommittee
To hold an oversight hearing on the implementation of Public Law 108-148 The Healthy Forests Restoration Act.
SD-366

- 11 a.m.
Commerce, Science, and Transportation
Technology, Innovation, and Competitiveness Subcommittee
To hold hearings to examine high performance computing.
SR-253
- 2 p.m.
Judiciary
Business meeting to consider pending calendar business.
SD-226
- 2:15 p.m.
Judiciary
To hold hearings to examine judicial nominations.
SD-226
- 2:30 p.m.
Foreign Relations
To hold hearings to examine Extradition Treaty Between the United States of America and the United Kingdom of Great Britain and Northern Ireland, and related exchanges of letters, signed at Washington on March 31, 2003 (Treaty Doc. 108-23).
SD-419
- Intelligence
To receive a closed briefing regarding intelligence matters.
SH-219
- JULY 20
- 9:30 a.m.
Armed Services
To receive a closed briefing regarding overhead imagery systems.
S-407, Capitol
- Foreign Relations
To hold hearings to examine U.S. policy options regarding North Korea.
SD-419
- Judiciary
Business meeting to consider pending calendar business.
SD-226
- 10 a.m.
Agriculture, Nutrition, and Forestry
To hold hearings to examine USDA dairy programs.
SR-328A
- Energy and Natural Resources
To hold hearings to examine the nominations of John Ray Correll, of Indiana, to be Director of the Office of Surface Mining Reclamation and Enforcement, and Mark Myers, of Alaska, to be Director of the United States Geological Survey, both of the Department of the Interior, and Drue Pearce, of Alaska, to be Federal Coordinator for Alaska Natural Gas Transportation Projects, Federal Energy Regulatory Commission.
SD-366
- Small Business and Entrepreneurship
Business meeting to mark up an original bill to reauthorize the Small Business Administration.
SR-428A
- Veterans' Affairs
To hold hearings to examine "VA Data Privacy Breach: Twenty-Six Million People Deserve Assurance of Future Security".
SR-418
- Aging
To hold hearings to examine the generic drug maze relating to access to affordable, life saving drugs.
SD-106

11 a.m.
 Homeland Security and Governmental Affairs
 Federal Financial Management, Government Information, and International Security Subcommittee
 To receive a closed briefing regarding Iran.
 S-407, Capitol

1:30 p.m.
 Homeland Security and Governmental Affairs
 Federal Financial Management, Government Information, and International Security Subcommittee
 To hold hearings to examine Iran's nuclear impasse, focusing on the status of Iran's nuclear weapons capabilities, European negotiations and the UN Security Council, and the feasibility of further negotiations, democracy promotion, sanctions, and/or military operations.
 SD-342

2 p.m.
 Appropriations
 Business meeting to mark up H.R. 5631, making appropriations for the Department of Defense for the fiscal year ending September 30, 2007, proposed legislation making appropriations for the Departments of Labor, Health and Human Services, and Education, and Related Agencies for the fiscal year ending September 30, 2007, H.R. 5385, making appropriations for the military quality of life functions of the Department of Defense, military construction, the Department of Veterans Affairs, and related agencies for the fiscal year ending September 30, 2007, and H.R. 5576, making appropriations for the Departments of Transportation, Treasury, and Housing and Urban Development, the Judiciary, District of Columbia, and independent agencies for the fiscal year ending September 30, 2007.
 SD-106

2:30 p.m.
 Intelligence
 To receive a closed briefing regarding intelligence matters.
 SH-219

JULY 25

9:30 a.m.
 Armed Services
 Airland Subcommittee
 To hold hearings to examine the F-22A multiyear procurement proposal in review of the Defense Authorization Request for fiscal year 2007.
 SR-222

JULY 27

10 a.m.
 Veterans' Affairs
 To hold hearings to examine the nominations of Patrick W. Dunne, of New York, to be Assistant Secretary of Veterans Affairs for Policy and Planning, and Thomas E. Harvey, of New York, to be Assistant Secretary of Veterans Affairs for Congressional Affairs.
 SR-418
