United States of America

Congressional Record

PROCEEDINGS AND DEBATES OF THE 110th CONGRESS, FIRST SESSION

SENATE—*Monday, June 18, 2007*

The Senate met at 2 p.m. and was called to order by the Honorable DANIEL K. AKAKA, a Senator from the State of Hawaii.

PRAYER

The Chaplain, Dr. Barry C. Black, offered the following prayer:

Let us pray.

Eternal and dependable Creator of the Universe, we acknowledge You as the giver of every good and perfect gift. You are our solid rock. You arm us with strength. Thank You for the seasons and climates, for sowing and reaping, for color and fragrance. Thank You for the time of harvest when our labors and dreams are rewarded.

Today, bless our lawmakers. Illumine their lives to keep them on the right paths. May the creative power of Your word produce in them a stronger faith and an indomitable hope. Keep them from slipping. Fill them with courage as You show them Your unfailing love. Give them an attitude of openness to receive the fullness of Your grace and truth.

We pray in Your precious Name. Amen.

PLEDGE OF ALLEGIANCE

The Honorable DANIEL K. AKAKA led the Pledge of Allegiance, as follows:

I pledge allegiance to the Flag of the United States of America, and to the Republic for which it stands, one nation under God, indivisible, with liberty and justice for all.

APPOINTMENT OF ACTING PRESIDENT PRO TEMPORE

The PRESIDING OFFICER. The clerk will read a communication to the Senate.

The assistant legislative clerk read the following letter:

U.S. SENATE,
PRESIDENT PRO TEMPORE,
Washington, DC, June 18, 2007.

To the Senate:

Under the provisions of rule I, paragraph 3, of the Standing Rules of the Senate, I hereby appoint the Honorable DANIEL K. AKAKA, a Senator from the State of Hawaii, to perform the duties of the Chair.

ROBERT C. BYRD,
President pro tempore.

Mr. AKAKA thereupon assumed the chair as Acting President pro tempore.

RECOGNITION OF THE MAJORITY LEADER

The ACTING PRESIDENT pro tempore. The majority leader is recognized.

SCHEDULE

Mr. REID. Today the Senate will be in a period of morning business until 3:30 p.m. The time will be equally divided and controlled between the two leaders or their designees. Once morning business has closed, the Senate will resume consideration of the energy legislation. There are no rollcall votes today. There are a number of amendments pending. The managers are going to work on trying to dispose of some of those, and maybe there will be other amendments that will be offered today and debated today.

ENERGY

Mr. REID. Mr. President, it is summertime and school is out and people are planning their vacations. Most all the vacations are ones where people drive. They, of course, go visit relatives, they go to the beaches and the mountains where it is cool, barbecuing with friends, but driving is part of America. If you have traveled in Nevada, which millions of people do by automobile every year, going through Nevada and coming to places such as Las Vegas, Reno, and Lake Tahoe, you find the price of gas is very high. But it is that way all over the country, not just Nevada. The record-high price is no accident. It is a result of America's addiction to oil.

I say again, as I have said many times before, today in America we are going to use 21 million barrels of oil; 65 percent of that oil we will import. We will do it from unstable countries and regions. We have been told with no uncertainty by scientists that we have only 10 to 15 years to do something to dramatically reduce the elements of pollution that cause global warming.

This week we are going to continue our debate on energy legislation. This is a bill on which every Senator should agree, but they do not. This is a bill that comes out of the Energy Committee on a bipartisan basis, a bill that comes out of the Environment and Public Works Committee on a bipartisan basis, a bill that comes out of the Commerce Committee on a bipartisan basis. They were all put together and this is what is before us, a bipartisan energy bill.

The bill addresses both sides of the energy crisis, consumption and supply. That is what it is all about. On the consumption side, this bill raises fuel economy standards for cars and trucks and raises efficiency standards for light, heat, and water.

We now know we have to produce vehicles that get 27 miles to the gallon. For people, including our automobile manufacturers, to say: We can't do it, we can't simply in a decade produce vehicles that will be 35-miles-per-gallon efficient—our country is one of ingenuity, of inventing things—certainly we can do that. We have to do that.

On the supply side, our legislation invests in renewable fuels that can be produced right here in America. It would sure be good for our country if we could include an amendment that would diversify power generation to include at least 15 percent of the energy from renewable sources. This will save consumers tens of billions of dollars every year, cut our oil consumption by more than 4 million barrels a day, reduce our dependence on oil and foreign energy sources, and take a giant step forward in the fight against global warming.

Raising CAFE standards and implementing a renewable portfolio standard are two of the most crucial parts of this legislation. I urge my colleagues to stand on the side of the American people by supporting this legislation: CAFE that is in the bill, and the renewable portfolio standard that was introduced by Senator BINGAMAN.

There are some who say we need to produce more oil. Of course we do. But keep in mind, out of 100 percent of the oil in the world, America controls less

● This "bullet" symbol identifies statements or insertions which are not spoken by a member of the Senate on the floor.

than 3 percent of it. This is the world; here we are. We have that much of the oil. We can't produce our way out of the problems we have. But it appears to me that many are saying more of the same: drill, drill, drill, which is similar to what the administration is saying about the war in Iraq, more of the same. That will not work. Drill, drill, drill will not work either.

It is time for our country to stop stonewalling and start supporting the kind of innovation that is already happening across America with the renewable portfolio standard. In the State of Nevada, there is a renewable portfolio standard. American ingenuity is looking at things, like in California where one professor is working on a new technology that can manufacture fuel out of simple plant material in any industrial park in America. I have eminent scientists who visit with me on this issue. There is wide-ranging support. I had come to my office one day last week—I was surprised—Paul Newman, the famous actor. He came to talk about this plant material. He is a person who is devoted to the environment. He is using his celebrity status to come and tell Members of Congress to do something about it.

So we have eminent scientists, we have people of celebrity status such as Paul Newman, and the rest of Americans who want us to do something about it.

In Pennsylvania, Amish farmers are charging their buggy batteries with solar power. In the State of Nevada, the Southern Nevada Water Authority, which is Las Vegas, is using solar energy at water pumping stations to move water uphill, something that in the past would have required tremendous nonrenewable power. There are things that can be done.

I was listening to public radio this morning. They are having a drought in Australia—I believe it was Sydney. I am not sure what the name of the city was. But they have had a lot of new people come and their water supply has dropped by 21 percent, so they are desalinizing water from the ocean. But the people said: We are not going to do that by burning fossil fuel. So what they have done is they have wind farms 60 miles away—I think that is how far it is; quite a ways away—wind farms, producing all the energy which now supplies 20 percent of the water for that city in Australia which needs millions of gallons of water every day.

It can be done. We need to lessen our dependence on fossil fuel. That kind of innovation is exactly what America does best, and that is what the Government should be investing in, things like I just talked about. The energy crisis will not be solved overnight, but this bill is a crucial first step. So let's take that first step. It is a bipartisan piece of legislation; not divided by our political parties but united, I hope, by our commitment to a cleaner, safer energy future. We are going to finish this bill sometime this week unless something goes haywire.

Then, when we finish that, we are going to move on to everyone's favorite subject, immigration.

I mentioned this last Friday, and I say it again: People who have weekend schedules should understand if they are going to be gone from the Senate, they are likely going to miss votes. We cannot get to immigration until Thursday at the earliest. In an effort to finish by our Fourth of July recess, we have to take up the bill Thursday, probably late in the day, which will mean votes over the weekend. It is always possible by unanimous consent that may not be necessary, but I am telling everybody the odds are tremendous that we will be voting this weekend. And on Monday there will be votes and there will be votes before 5:30. It is our last weekend before the Fourth of July recess. We have work to do. I hope we don't run into the Fourth of July recess, but we may have to if we can't get things done.

I am sorry to be the bearer of bad news regarding the schedule, but we have obligations to complete energy and immigration.

RESERVATION OF LEADER TIME

The ACTING PRESIDENT pro tempore. Under the previous order, the leadership time is reserved.

MORNING BUSINESS

The PRESIDING OFFICER (Mr. WEBB). Under the previous order, there will now be a period of morning business until 3:30 p.m. with Senators permitted to speak therein up to 10 minutes each, with the time equally divided and controlled by the two leaders or their designees.

The majority leader is recognized.

Mr. REID. Mr. President, I suggest the absence of a quorum and ask the time be charged equally against both the majority and minority time.

The PRESIDING OFFICER. Without objection, it is so ordered. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Ms. KLOBUCHAR. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

ENERGY

Ms. KLOBUCHAR. Mr. President, I am in the Chamber to speak to some amendments to the Energy bill which the Senate debated last week and is continuing to debate this week.

The first is an amendment I offered last week, along with Senator SNOWE, where we are joined by many Senators, including Senator BINGAMAN, who is managing the bill on the majority side, as well as Senator COLLINS and Senator COLEMAN, as well as Senators KERRY, BOXER, and CARPER.

There are a number of people supporting this amendment throughout the Senate because they understand if we are going to discuss any kind of climate change policy going forward, we at least need to have accurate information. Other countries are doing this quite successfully.

The idea is to have one gathering place for information, and that would be our EPA. The amendment gives them latitude to set this up as they would like, but the idea is to have one place for a carbon registry or, to make it easier, a carbon counter. I figure if Weight Watchers can have a calorie counter, we can have a carbon counter.

Now, what is interesting about this is the type of business support we have seen for action in this area. Obviously, we have seen action across our States—in places such as my State of Minnesota, in places such as California and Arizona and New Jersey—all over this country.

I have often said the States have taken the lead, that they have been more than the laboratories of democracy, they have been the aggressors. One of our national magazines this week has a picture of Governor Schwarzenegger and Mayor Bloomberg on the front cover, and it says: ''Who Needs Washington?'' Because they are moving so quickly? Well, that cover says it all.

We need to be relevant. We need to lead the national energy policy. We need to at least gather the information we need to make good decisions about climate change policy going forward.

Now, as for the businesses, in January, it made quite a big splash when some American businesses came together to form the U.S. Climate Action Partnership. They actually urged Congress to fast track a greenhouse gas inventory and registry. They asked it be done by the end of this year.

With my short time in the Senate, I realize you cannot wait until September or December to get this idea passed. If you are actually going to get it done by the end of the year, you need to get it passed now.

Now, let me go through some of the companies that are part of this U.S. CAP group that is advocating for change, that is acknowledging climate change is an issue, and is advocating for a national registry. They include Alcoa; American Industry Group, or AIG; Boston Scientific Corporation; BP America; Caterpillar; ConocoPhillips; Deere & Company; the Dow Chemical Company; Duke Energy; DuPont; General Electric; General Motors Corporation; Johnson & Johnson; Marsh, Inc.;

PepsiCo; PG&E Corporation; PNM Resources; Shell; and Siemens Corporation. These are the kinds of companies I am talking about.

Now, there has been some concern expressed over this bill by the National Chamber of Commerce, and I have to tell my colleagues it kind of surprises me. First of all, we have a number of good business Democrats as well as good business Republicans on this bill who understand that you don't want 31 States doing their own national climate registry. I don't have a problem with it because there is no choice. It is the right thing to do. But, in fact, it is much better if we do this on a national basis involving the U.S. Government.

Responding to the challenges these businesses laid out, the Klobuchar-Snowe-Bingaman amendment establishes a national greenhouse gas registry that will gather and consolidate consistent, transparent, and reliable data on greenhouse gas emissions at the facility level. The amendment, as I mentioned, requires the Environmental Protection Agency to consider cost and coordinate with existing Federal and State programs in implementing the registry.

The new registry only covers major emitting facilities and major sources of fossil fuel. Utilities already reporting under the Clean Air Act would not have to report their data twice.

How this is working now is a patchwork of reporting. Some industries are reporting to the Energy Department, some industries are reporting to the EPA, some are reporting every 3 years, some are reporting every year, and it makes it very difficult to get the kind of greenhouse gas emissions data we need to make adequate decisions about climate change legislation.

Let me say this bill, with three Republicans and several Democrats on it, does not in any way dictate what our next step will be for climate change. It puts the data in place as these major companies asked for and fast-tracks it by the end of the year.

I also note that for facilities facing burdensome costs in purchasing advanced monitoring equipment, the EPA would accept basic fossil fuel data, which is collected by businesses for general accounting purposes. The EPA would then calculate emissions based on that fuel data.

The amendment also specifies that confidential business information would not be published; however, we will have a Web site which would at least give the greenhouse gas emissions data to the public.

There was a recent report by National Public Radio which showed that a reporter tried to find out who are some of the larger emitters of greenhouse gases in this country. She was unable to figure it out. She could figure it out in Canada. Because greenhouse gases are invisible, it is very difficult to do by looking at businesses. The registry excludes small businesses as defined by the Small Business Administration, which is less than 500 employees that emit less than 10,000 metric tons of greenhouse gas per year.

This amendment makes a lot of sense. It is a commonsense amendment, and I am going to be urging my colleagues to support it in the next 2 days. If we can't take this simple step when we are looking at an energy bill, as we are looking at a new direction for energy policy and as we are looking at great new ideas for buildings and appliances—as I like to say, I heard somewhere of building a fridge to the 21st century—as we look at the possibility of raising the gas mileage standards and setting standards in a way that will spur investment across this country, we have to put in place at least the building blocks, sensible building blocks toward a new climate change policy.

The other thing I would like to address today on this vital topic of energy security is the role I believe renewable fuels ought to play in meeting our Nation's future energy needs.

The United States today spends more than $200,000 per minute on foreign oil. That is $200,000 per minute. That is $13 million per hour. The money is shipped out of our economy, adding to our enormous trade deficit, and leaving us vulnerable to unstable parts of the world to meet our basic energy needs.

Oil companies would have you believe that energy security is decades away; that we need some new technology, some vehicle of the future before we can break the stranglehold oil has on us. I believe we are going to see this new technology. I believe we are going to see these vehicles of the future. But meanwhile, we can't sit and wait and wait and wait. We have to start now.

Any Minnesota farmer can tell you that one way to go about this is with homegrown renewable fuels. They are here today. Ask someone in Brazil, and they will tell you that with sugarcane, they become energy independent. They moved to homegrown energy. In our State, they are ready to use this homegrown energy, and they believe it will help us to break free from our addiction to oil.

Consider this: In 2006, ethanol offset the need for 170 million barrels of imported oil and kept $11 billion in rural America. Consider this as well: A flexible fuel vehicle driven on about 85 percent ethanol fuel offsets 477 gallons of gas per year. A hybrid electric vehicle saves 94 gallons. That means that flex-fuel vehicles run on high blends of renewable fuels are by far our best near-term opportunity for energy independence. Obviously, the best is to combine these vehicles.

Renewable fuels also have tremendous potential to revitalize our rural economy. Ethanol has been nothing short of a revolution in our State. We have 16 ethanol plants up and running and 5 more under construction. By 2008, Minnesota will be producing 1 billion gallons of ethanol each year, and that will generate $5 billion for the State's economy and support 18,000 jobs.

Last year, my daughter did a report for her sixth grade class on ethanol, and she interviewed a number of farmers throughout Minnesota. She drew a big picture with the State of Minnesota on it. She had two little dots designating Minneapolis and St. Paul. Then she had this huge circle that said Pine City, home of farmer Tom Peterson.

Well, that is the future for rural America. That is what is revitalizing so many of our towns. Of course, we started with corn-based ethanol and soybean-based biodiesel. But now we are moving to a new level with cellulosic ethanol which can involve all kinds of things. We are focusing on switchgrass and prairie grass and doing this in a way that is good for our environment and carbon neutral and creates habitat for wildlife, something our hunters in Minnesota are very interested in. I know the Presiding Officer's brother who lives in Minnesota is especially interested as a hunter in having that habitat that we need.

In spite of the clear advantages of renewable fuels to our economy and our energy security, we face a chicken-and-egg-type problem when it comes to the challenge of making them available to more drivers. The automakers haven't traditionally wanted to sell flex-fuel vehicles in areas where there are no E85 pumps, and the gas stations don't want to put in E85 pumps when there are no flex-fuel vehicles. That is why I am so pleased the amendments that came out of the Commerce Committee, on which I serve, included not only the increase in gas mileage standard but also a requirement that by 2015, 80 percent of the vehicles produced be flex fuel.

In order to ensure that the drivers who purchase the flexible-fuel vehicles know they can use E85, our language requires automakers to put that information on the fuel tank cap and to put a flex-fuel emblem on the back of the vehicle that drivers will be able to recognize.

On the other end of this problem—the ability for consumers to fill up their cars with ethanol and biodiesel—it is crucial that Congress act to provide more American drivers with access to renewable fuel pumps.

Right now, Minnesota ranks first in the country for E85 pumps. We have more than 300—I think the last number I heard was 314—of the 1,200 pumps nationally, far more than any other State. That is great for Minnesota, and it shows the vision of our State government in Minnesota, but it limits the positive impact that renewable fuels

can and should have on the entire Nation's security. If we are serious about finding alternatives to foreign oil, we should ensure that drivers in every State have access to E85 and biodiesel.

That is why I wish to speak to two amendments to the Energy bill aimed at making renewable fuels available across the country. Senator BOND and I have introduced an amendment that would provide grants to promote the installation of E85 biodiesel pumps at gas stations nationwide. I would also like to thank Senator VOINOVICH, Senator HAGEL, and Senator KERRY for their support of this amendment.

In past years, Congress has only provided a small amount of money each year for E85 infrastructure, and last year, even that small amount of funding was cut. As a Nation, we are stuck in a rut. Less than 1 percent of the gas stations sell E85. It is time for the country to make a serious investment in renewable fuels. That is going to mean, as I said, more flex-fuel vehicles. It is also going to mean investment in cellulosic ethanol, acknowledging we are not going to have all this ethanol based on corn and we are not going to have just soybean-based biodiesel; that there are all kinds of possibilities, as we move forward, for how we are going to get our ethanol. We need to be creative about that and we need to put the investments in place and put the standards in place.

But what we need, if we are going to do this, is the pumps on the ground. That is why Senator BOND and I have an amendment to give grants for ethanol and biodiesel pumps. It would be enough for 1,000 to 2,000 new pumps, which would nearly double or triple what we have now.

I am also introducing an amendment that would block oil company tactics to keep renewable fuels out of gas stations. I have heard from gas stations in Minnesota that their franchise contracts make it difficult to sell ethanol and biodiesel, so many of them can't even do it. Here are some examples. Remember, these are just dealing with gas stations in which they have franchise contracts involving the oil companies: They are not allowed to sell renewable fuels under the main canopy that bears the oil company name. They are not allowed to convert the pumps they already have to sell E85 or B20. They can't put up signs to let customers know they have renewable fuel or how much it costs.

That is why I call it the ''Right to Retail Renewable Fuel.'' Look what we have on the other side. We have these oil companies. Last year, Exxon made $29 billion in profit—a record—and the big five oil companies made $120 billion. Now they are blaming ethanol, the small amount—these 1,200 pumps across the country at 170 gas stations—they are blaming that for the reason they can't do anything about their refineries. It is outrageous.

We need to encourage competition. That is what I am trying to do with the right to retail renewable fuel amendment. This amendment would prohibit oil companies from placing restrictions on where and how renewable fuels can be sold to gas stations. This will ensure that franchise owners across the country have the ability to make ethanol and biodiesel available to their customers.

In conclusion, I believe that ethanol and biodiesel have tremendous potential to meet the energy needs of our country. Again, I think of the ethanol industry akin to the beginning of the computer industry when we had the big computers in the room. That is where we are. It is going to become more efficient, it is going to become better for the environment, and it is going to become less costly as we move forward. That is why we are moving into things such as cellulosic ethanol that can be grown on marginal farmland that is carbon neutral and that takes less energy to produce.

I believe these alternative fuels will move us toward energy independence in the immediate term—not decades from now. I believe we ought to use the Energy bill before us as an opportunity to invest in renewable fuels and to make them available to every American driver. I believe we should be investing in the farmers and the workers of middle America and not the Middle East.

Mr. President, I yield the floor, and I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Ms. KLOBUCHAR. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Ms. KLOBUCHAR. Mr. President, I ask unanimous consent that going forward, the time be equally divided between Republicans and Democrats.

The PRESIDING OFFICER. The majority time has expired.

Ms. KLOBUCHAR. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

The PRESIDING OFFICER (Ms. KLOBUCHAR). The senior Senator from New Mexico is recognized.

Mr. DOMENICI. Madam President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

ORDER OF BUSINESS

Mr. DOMENICI. Madam President, I understand Senator BINGAMAN and I are going to each call up an amendment, and I think it is in order that we have agreed that I would go first and he second, and then we will arrange everything with unanimous consent.

CONCLUSION OF MORNING BUSINESS

The PRESIDING OFFICER. Morning business is closed.

CREATING LONG-TERM ENERGY ALTERNATIVES FOR THE NATION ACT OF 2007

The PRESIDING OFFICER. Under the previous order, the Senate will resume consideration of H.R. 6, which the clerk will report by title.

The assistant legislative clerk read as follows:

A bill (H.R. 6) to reduce our Nation's dependency on foreign oil by investing in clean, renewable, and alternative energy resources, promoting new emerging energy technologies, developing greater efficiency, and creating a Strategic Energy Efficiency and Renewables Reserve to invest in alternative energy, and for other purposes.

Pending:

Reid amendment No. 1502, in the nature of a substitute.

Reid (for Bingaman) amendment No. 1537 (to amendment No. 1502), to provide for a renewable portfolio standard.

Klobuchar (for Bingaman) amendment No. 1573 (to amendment No. 1537), to provide for a renewable portfolio standard.

Bingaman (for Klobuchar) amendment No. 1557 (to amendment No. 1502), to establish a national greenhouse gas registry.

Kohl amendment No. 1519 (to amendment No. 1502), to amend the Sherman Act to make oil-producing and exporting cartels illegal.

Kohl (for DeMint) amendment No. 1546 (to amendment No. 1502), to provide that legislation that would increase the national average fuel prices for automobiles is subject to a point of order in the Senate.

Corker amendment No. 1608 (to amendment No. 1502), to allow clean fuels to meet the renewable fuel standard.

Cardin amendment No. 1520 (to amendment No. 1502), to promote the energy independence of the United States.

Domenici (for Thune) amendment No. 1609 (to amendment No. 1502), to provide requirements for the designation of national interest electric transmission corridors.

Cardin amendment No. 1610 (to amendment No. 1502), to provide for the siting, construction, expansion, and operation of liquefied natural gas terminals.

Collins amendment No. 1615 (to amendment No. 1502), to provide for the development and coordination of a comprehensive and integrated U.S. research program that assists the people of the United States and the world to understand, assess, and predict human-induced and natural processes of abrupt climate change.

AMENDMENT NO. 1628 TO AMENDMENT NO. 1502

(Purpose: To provide standards for clean coal-derived fuels)

Mr. DOMENICI. I ask unanimous consent that the pending amendment be set aside so I can propose an amendment numbered 1628.

The PRESIDING OFFICER. Without objection, it is so ordered.

The clerk will report the amendment.

The assistant legislative clerk read as follows:

The Senator from New Mexico [Mr. DOMENICI], for Mr. BUNNING, for himself, Mr. DOMENICI, Mr. THUNE, Mr. ENZI, and Mr. CRAIG, proposes an amendment No. 1628 to amendment No. 1502.

Mr. DOMENICI. Madam President, I ask unanimous consent that the reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

(The amendment is printed in today's RECORD under ''Text of Amendments.'')

Mr. DOMENICI. Madam President, as we resume consideration of the Energy bill, I would note to my colleagues that we have about 120 amendments filed, and we have 10 amendments pending. Additionally, I understand we have a number of Members who wish to offer other amendments. I encourage people to come forward and file amendments if they wish to do so.

I understand the Finance Committee is working on a major energy package over the next couple of days. I have some concerns about what is rumored to be in that package, but I will reserve my comments and judgment until the Senate sees the full product. Additionally, we have a number of large items that I am sure Senator BINGAMAN concurs that we have to resolve over the next few days, including the Bingaman RPS amendment, a potential CAFE amendment to the fuel economy language currently in the base text, as well as the debate on the issue of coal-to-liquids, which received a great deal of attention and debate in the Energy Committee and I am sure will receive the same here.

This bill does some great things in the area of biofuels, and it is important to the Senate that we take action on improving the fuel efficiency of our vehicles. This is a win for the diversification of fuels we use, and it is a win for saving energy, but we must act to increase our domestic energy supply at the same time, especially if we can and especially if we have energy. That is one of the reasons I worked so hard to pass the Gulf of Mexico Energy Security Act, and that is one reason I support the Bunning amendment which I have introduced which will be before the Senate on coal-to-liquids. While Senator BUNNING could not be here this afternoon, we all know of his advocacy on this issue. It is important that the topic of coal-to-liquids be addressed before the Senate. I understand that, provided there is time—and I think there certainly should be—Senator BUNNING will speak on this amendment tomorrow, as I indicated, if at all possible.

We have developed this legislation. This is not the first time the issue of coal-to-liquids has come up. On May 2, we considered an amendment in the Energy and Natural Resources Committee to provide identical treatment of coal-to-liquids as that provided for cellulosic ethanol. Senator Thomas, from Wyoming, and Senator BUNNING offered an amendment to mandate 21 billion gallons of coal-to-liquids by the year 2022. I supported them. But the amendment failed by the slimmest of margins—a 12-to-11 vote in the committee. Since that markup, for over a month there has been an effort to reach out and negotiate a middle ground on the issue of coal-to-liquids. I regret that those discussions ended without agreement.

Let me be clear: I do not support the Tester amendment that may come up before the Senate shortly. I oppose the amendment for a number of reasons we will discuss when these proposals are more fully debated.

The Bunning-Domenici amendment draws wide support from those in the field who will be doing the work necessary to bring those domestic fuels to market. This Bunning-Domenici amendment will establish and mandate for just 6 billion gallons of coal-to-liquid fuel by 2022, a very large difference in terms of the mandated amount, much smaller—22 before and 6 now in the amendment before us. That is a reduction of 15 billion gallons from what we offered in the committee.

This mandate starts in 2016, which is the same year the cellulosic energy mandate begins in the base bill. Importantly, this mandate requires that greenhouse gas emissions from coal-to-liquid fuels be 20 percent better than gasoline—20 percent better than gasoline. Again, that is the same standard as appears in the base bill for cellulosic ethanol. In other words, you can't make the claim that this 6 billion which will be there, this 6 billion gallons, will harm the atmosphere or greenhouse gases any more than cellulosic ethanol, which we are all advocating, and there is so much pressure to get it done and so much almost awe that it is going to get done and how great it will be. It will have the same effect as this is going to have on the air.

There are many ways to provide the incentives for these alternative fuels. One that has been proven to work is to provide a reliable market for the products. We have experience with this approach on ethanol, and I have not been presented with a reason to believe it will not work for other fuels.

In terms of the merits of coal-to-liquid fuels, there are many. Unlike cellulosic ethanol, this has been commercially demonstrated in other countries; now we need to do it here in the United States. Unlike cellulosic ethanol, it can be moved in existing pipes and used in existing vehicles. Coal-to-liquid fuel will reduce the emissions of sulfur dioxide, nitrous oxide, particulate matter, and other pollutants when compared to conventional fuels, and coal-to-liquid fuel will create an investment in rural communities, good-paying jobs for Americans, and cheaper energy for American consumers.

As we move forward with the consideration of coal-to-liquid amendments, there are some points about this particular one I would like to point out.

First, the program is entirely separate and will not compete with the biofuels program.

Second, the mandate is only one-sixth the size of the renewable fuel mandate.

Third, only coal-to-liquid fuel that can meet the same life cycle greenhouse standard as biofuels will be eligible for the program.

There will be much we disagree on as we consider the issue more fully. Many will say: We cannot do coal-to-liquids unless we require carbon sequestration. We should remember that we do not require carbon sequestration for ethanol in this bill. For carbon sequestration, I am concerned about efforts to require it and, after all, we have concluded in the base text of the bill before us that carbon sequestration requires more research and development. That is true.

I will agree that requiring the same greenhouse gas standards for all fuels is a reasonable approach. That is why we have included the same language in our amendment.

The amendment is quite different from the one that was received in the Energy Committee on May 2. It has been written to address the concerns that arose then and have arisen since. This amendment represents an effort to ensure that we provide a stable market for the first coal-to-liquids plants, and if that happens, there is no question that coal, one of Americas most abundant fuels, will be on its way to being a first-rate source of fuel for the automobile and related kinds of activities.

There is broad and growing support for reducing our reliance on foreign sources of energy in affordable and environmentally sound ways. Coal is our most abundant and affordable fossil resource. I do believe that technology will continue to make coal cleaner and that this amendment further establishes the path forward.

Madam President, I ask unanimous consent that Senator MARTINEZ be added as a cosponsor of the Bunning amendment.

The PRESIDING OFFICER. Without objection, it is so ordered.

The Senator from New Mexico.

Mr. BINGAMAN. Madam President, I ask unanimous consent that the amendment Senator DOMENICI just called up be set aside at this point.

The PRESIDING OFFICER. Without objection, it is so ordered.

AMENDMENT NO. 1614 TO AMENDMENT NO. 1502

(Purpose: To establish a program to provide loans for projects to produce syngas from coal and other feedstocks while simultaneously reducing greenhouse gas emissions and reliance of the United States on petroleum and natural gas)

Mr. BINGAMAN. Madam President, I call up amendment 1614 on behalf of Senator TESTER, Senator BYRD, Senator SALAZAR, Senator ROCKEFELLER, Senator BINGAMAN, Senator LANDRIEU, and Senator WEBB.

The PRESIDING OFFICER. The clerk will report the amendment.

The assistant legislative clerk read as follows:

The Senator from New Mexico [Mr. BINGAMAN], for himself, Mr. TESTER, Mr. BYRD, Mr. ROCKEFELLER, Mr. SALAZAR, Ms. LANDRIEU and Mr. WEBB, proposes an amendment numbered 1614 to amendment numbered 1502.

Mr. BINGAMAN. Madam President, I ask unanimous consent that the reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

(The amendment is printed in the RECORD of Friday, June 15, 2007, under ''Text of Amendments.'')

Mr. BINGAMAN. Madam President, I am not going to speak about the amendment at this point or about the Bunning amendment Senator DOMENICI described in general terms. But this is a very important issue. It is one we spent time on in our Energy Committee markup. It is one we clearly need to resolve here on the Senate floor and allow Senators to express their views on the issue.

I know Senator TESTER was hoping to be here to speak on the amendment possibly later today but, if not, then tomorrow. I know he will want to speak both about his amendment and about the Bunning amendment, and I will plan to do the same.

I yield the floor and suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceed to call the roll.

Mr. SANDERS. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER (Mr. WHITEHOUSE). Without objection, it is so ordered.

Mr. SANDERS. Mr. President, I had hoped to call up an amendment that Senator CLINTON filed this afternoon on behalf of herself, myself, Senator LEAHY, and Senator CANTWELL, but I understand that laying aside the pending amendment may not be an option. As such, I ask unanimous consent to be recognized to speak about the amendment we filed.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. SANDERS. Mr. President, as we continue to work our way through the Energy bill, I ask my colleagues for their support in doing everything we possibly can to remove the ridiculous barriers people face when they try to install renewable electricity generation on their homes and businesses. As we all know, there are disagreements about some aspects of our energy policy, but it only seems to make sense to me that we should all rally around giving individuals an opportunity to make a meaningful contribution toward solving our energy challenges. This is exactly what the Clinton-Sanders net metering amendment does. It empowers citizens of our country to help provide for the energy our country needs.

Unfortunately, today, many millions of people want the opportunity to do their part, but they are blocked by unneeded barriers. The language we have authored, which is supported by a wide range of groups, including the Solar Energy Industries Association, Alaska Wilderness League, U.S. PIRG, Greenpeace, Public Citizen, Friends of the Earth, Union of Concerned Scientists, the League of Conservation Voters, and the Center for American Progress Action Fund, would amend the Public Utility Regulatory Policies Act to require utilities to offer net metering to their customers and to require the Federal Energy Regulatory Commission to establish interconnection standards for small electricity generators to connect to the grid.

The amendment would accomplish many of our shared goals all at once. It would help people to lower their electric bills, it would help to stabilize the electricity grid by ensuring less reliance on central generating plants, it would help to address environmental concerns, and it would even be good for the utilities by cutting down on their load during hot summer days—a load that is usually met with increasingly expensive natural gas.

I want to quickly talk about what net metering is before I go any further, and for the sake of my colleagues who would prefer to hear it directly from the Department of Energy's mouth as opposed to mine, I will quote directly from the DOE's Web site:

Net metering programs serve as an important incentive in consumer investment in renewable energy generation. Net metering enables customers to use their own generation to offset their consumption over a billing period by allowing their electric meters to turn backwards when they generate electricity in excess of their demand.

That is, again, from the DOE's Web site. The Department of Energy goes on to note:

Net metering is a low-cost, easily administered method of encouraging customer investment in renewable energy technologies. It increases the value of the electricity produced by renewable generation and allows customers to bank their energy and use it in a different time than it is produced, giving customers more flexibility and allowing them to maximize the value of their production. Providers, i.e. utilities, may also benefit from net metering because when customers are producing electricity during peak periods, the system load factor is improved.

Again, that is a quote from the Department of Energy. To summarize net metering, let me make the following points: Net metering allows an electricity customer to send electricity back to the grid when generating more than she or he is utilizing. So if you are producing more than you need, it goes back into the grid.

Net metering promotes wider use of renewables, especially at the residential level because credit is given for energy produced. In other words, every homeowner in America can become a producer and earn credit for what they produce.

Net metering advances energy security by helping to stabilize the grid.

Net metering empowers Americans to help meet the Nation's energy needs.

Perhaps an example would make it clearer. Imagine a sunny day and a homeowner's solar photovoltaic panels on the roof are generating more electricity than the homeowner needs to power all of her appliances. Where does the excess electricity go? It flows back through the electric meter, spinning it backwards, and out to the wires on the street and down the street to other homes where it is needed to help run the neighbors' air conditioners and other appliances. This provides more power to the grid just when the grid needs it—on sunny days.

The Clinton-Sanders amendment would provide for a very conservative Federal minimum standard for net metering to encourage more electricity generation from renewables, such as solar panels and other distributed generation technologies. More specifically, the amendment specifies, among other things, that customers shall be credited for excess electricity generation from solar, wind, biomass, geothermal, anaerobic digesters, landfill gas, and fuel cells, up to 2 megawatts. Net metering must be offered to customers until the distributed generation capacity is at least 4 percent of a utility's peak load, and States may adopt more aggressive net metering provisions.

As my colleagues know, many States have moved forward on net metering, and as I have mentioned, our amendment would in no way hamper a State's ability to move forward even more aggressively. Today, 41 States have some sort of net metering standards or programs, but a modest national net metering standard would create a level playing field, encourage greater competition, and accelerate the deployment of solar and other distributed generation technologies.

Vermont passed a net metering law in 1998, and as of July 2006, over 200 Vermont solar projects, wind projects, and methane digesters were feeding electricity into the grid. New Mexico has an aggressive net metering standard in place, as does Colorado, New Jersey, and California.

In closing, as we work to wrap things up this week, I hope we can send a clear message that every single household and business across this country should be given the opportunity to be part of solving our energy challenges. Adoption of the Clinton-Sanders net metering amendment will send such a signal.

Mr. President, I ask that the Clinton amendment be set aside, and I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. BINGAMAN. I ask unanimous consent the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BINGAMAN. I ask unanimous consent that on Tuesday, June 19, when the Senate resumes H.R. 6 following morning business, there be up to 2½ hours of debate prior to a vote in relation to Bunning amendment No. 1628 and Tester amendment No. 1614, to run concurrently, with the time equally divided and controlled between Senators Bunning and Tester or their designees; that the Senate recess from 12:30 to 2:15 p.m. for the respective party conferences; that upon reconvening at 2:15 p.m., the Senate resume debate on the above-mentioned amendments; that upon the use or yielding back of time, the Senate proceed to vote in relation to Bunning amendment No. 1628; that upon disposition of that amendment, there be 2 minutes of debate prior to a vote in relation to Tester amendment No. 1614, with no amendment in order to either of the above amendments prior to the vote; that upon disposition of the Tester amendment, the Senate then debate consecutively the following amendments listed below and that the debate time on each be limited to 30 minutes equally divided and controlled in the usual form with no amendment in order to any of the amendments enumerated below; that upon the use or yielding back of all time with respect to the amendments listed below, the Senate proceed to vote in relation to the amendments in the order listed; that there be 2 minutes of debate equally divided and controlled prior to each vote; and that after the first vote in this sequence, the remaining votes be 10 minutes in duration: The listed amendments are Kohl amendment No. 1519, Thune amendment No. 1609, and Cardin amendment No. 1610.

The PRESIDING OFFICER. Without objection, it is so ordered.

MORNING BUSINESS

Mr. BINGAMAN. Mr. President, I ask unanimous consent that there now be a period of morning business with Senators permitted to speak therein for up to 10 minutes each.

The PRESIDING OFFICER. Without objection, it is so ordered.

NOMINATION HOLD

Mr. WYDEN. Mr. President, more than 30 months ago, prior to his confirmation as Secretary of the Department of Homeland Security, Michael Chertoff told me in my office that if confirmed he would move expeditiously to implement the National Emergency Technology Guard—NET Guard—Program. Unfortunately, Secretary Chertoff has failed to honor this pledge.

The idea of NET Guard was born in the aftermath of 9/11, when a number of communications and technology companies told me they wanted to help New York City when it was attacked—and there was no system for using their volunteers. Then-Senator George Allen and I moved on a bipartisan basis to support a program, called NET Guard, that would ensure that volunteers with technology expertise could be fully utilized in future crises. These teams of local volunteers with science and technology expertise would be vital in assisting our communities in responding to attacks on communications networks or recovering from natural disasters. Congress authorized the establishment of NET Guard 5 years ago, in the Homeland Security Act of 2002.

However, DHS has utterly failed to make any visible progress in implementing this critical program. DHS's failure to act in this critical area is inexcusable.

Had the Department followed through and created NET Guard, I believe it could have played a significant role in alleviating the chaos, confusion, and suffering after Hurricane Katrina. Had NET Guard been properly implemented, there would have been teams of volunteers with expertise ready to mobilize instantly to tackle technical challenges in the wake of the storm. Indeed, on an ad hoc basis, companies and individuals with technology expertise did come forward to assist the suffering. I can only imagine how effective these efforts might have been had NET Guard been in place.

Since my meeting with Secretary Chertoff in 2005, my staff and I have been given one excuse after another for delaying implementation of NET Guard. I have been promised briefings that never happen and reports that never materialize. At the outset, I was willing to accept some delay, but that time has passed.

We know that it is only a matter of time before there is another crisis that will put American communities and their critical communication networks at risk. Further delay is unacceptable.

Out of options, I reluctantly feel that I must put a hold on the nomination of Dennis Schrader who has been nominated by President Bush to serve as Deputy Administrator for National Preparedness, until the NET Guard Program is up and running nationwide.

It gives me no pleasure to place this hold and I do so grudgingly.

I recognize the importance of the position of Deputy Administrator for National Preparedness, but the position didn't even exist for the first 4 years after the Department of Homeland Security was created; it was just created in March. Since then, Mr. Corey Grouber has served as Acting Deputy Administrator, so delaying Mr. Schrader's confirmation while the long-overdue Net Guard Program is put in place will not leave the office leaderless. Mr. Corey Grouber has extensive experinace at FEMA, so he can manage for a little longer while the NET Guard Program is established. Unfortunately, I see no evidence that the Secretary intends to uphold his pledge to me, and until he does, I will keep my hold on Mr. Schrader's nomination.

I hope DHS will quickly begin to take action so I can remove this hold and Mr. Schrader's nomination can move through the Senate.

ADDITIONAL STATEMENTS

IN MEMORIAM: DR. RON BANGASSER

• Mrs. BOXER. Mr. President, I ask my colleagues to join me in recognizing the lifetime of achievement and community leadership of Dr. Ron Bangasser. Dr. Bangasser passed away in Redlands on May 2, 2007.

Born on January 25, 1950, in Freeport, IL, Ron Bangasser served the Inland Empire, his State and our Nation as a physician and advocate for health and wellness. After completing medical school at Chicago Medical School, Dr. Bangasser trained at San Bernardino County Medical Center in southern California, later served at St. Luke's Presbyterian Hospital in Milwaukee, and with the Navy Diving Medical Officer's Training School. Most recently, he was a physician with the Beaver Medical Group in Inland Southern California, where he served as medical director and director of external affairs. He also served as the chief of staff at nearby Redlands Community Hospital. In 1986, Dr. Bangasser founded the Paul F. Bangasser Wound Care Center at Redlands Community Hospital, named after and dedicated to his father.

Dr. Bangasser was a tremendous advocate for patients and physicians, serving with a number of medical associations. For 28 years he provided key leadership for the San Bernardino County Medical Society, the California Medical Association, and the American Medical Association. He served as the speaker for the California Medical Association's house of delegates, and as chair for the California delegation to

the American Medical Association. He also served as chair of the California Medical Association's finance committee, and vice chair of the California Medical Association's hospital medical staff section.

Dr. Bangasser was also the recipient of numerous prestigious awards and honors. He received the Nicholas P. Krikes, M.D. Award for Outstanding Contributions to the San Bernardino County Medical Society, the American Medical Association Pride in the Professions Award, Riverside County Medical Association's Outstanding Contribution to Organized Medicine Award, the California Medical Association Young Physician's Joseph Boyle Young at Heart Award, the James C. MacLaggan, M.D. Political Action Award, and the Medical Board of California's Physician Humanitarian Award.

While serving in each of his varied capacities, Dr. Bangasser also found the time to serve as the team physician for the San Bernardino Valley College football team for 22 years. San Bernardino Valley College honored him for these years of service and awarded him its Distinguished Service Award in 1999.

Dr. Ron Bangasser will be remembered for all that he did to make his community and this country a better place to live. His was a life well lived.●

MESSAGES FROM THE PRESIDENT

Messages from the President of the United States were communicated to the Senate by Ms. Evans, one of his secretaries.

EXECUTIVE MESSAGES REFERRED

As in executive session the Presiding Officer laid before the Senate messages from the President of the United States submitting sundry nominations which were referred to the appropriate committees.

(The nominations received today are printed at the end of the Senate proceedings.)

MESSAGE FROM THE HOUSE

At 2:04 p.m., a message from the House of Representatives, delivered by Ms. Niland, one of its reading clerks, announced that the House has passed the following bills, in which it requests the concurrence of the Senate:

H.R. 2638. An act making appropriations for the Department of Homeland Security for the fiscal year ending September 30, 2008, and for other purposes.

H.R. 2642. An act making appropriations for military construction, the Department of Veterans Affairs, and related agencies for the fiscal year ending September 30, 2008, and for other purposes.

The message also announced that pursuant to section 5(a) of the Abraham Lincoln Bicentennial Commission Act (36 U.S.C. 101 note), the Republican Leader re-appoints Mr. LAHOOD of Illinois to the Abraham Lincoln Bicentennial Commission.

The message further announced that pursuant to section 5(a) of the Abraham Lincoln Bicentennial Commission Act (36 U.S.C. 101 note), and the order of the House of January 4, 2007, the Speaker appoints the following Member of the House of Representatives to the Abraham Lincoln Bicentennial Commission: Mr. JACKSON of Illinois.

The message also announced that pursuant to 2 U.S.C. 501(b), and the order of the House of January 4, 2007, the Speaker appoints the following Members of the House of Representatives to the House Commission on Congressional Mailing Standards: Mr. CAPUANO of Massachusetts, Chairman; Mr. SHERMAN of California; Mr. DAVIS of Alabama; Mr. EHLERS of Michigan; Mr. PRICE of Georgia; and Mr. MCCARTHY of California.

MEASURES PLACED ON THE CALENDAR

The following bills were read the first and second times by unanimous consent, and placed on the calendar:

H.R. 2638. An act making appropriations for the Department of Homeland Security for the fiscal year ending September 30, 2008, and for other purposes.

H.R. 2642. An act making appropriations for military construction, the Department of Veterans Affairs, and related agencies for the fiscal year ending September 30, 2008, and for other purposes.

MEASURES READ THE FIRST TIME

The following bill was read the first time:

S. 1639. A bill to provide for comprehensive immigration reform and for other purposes.

EXECUTIVE AND OTHER COMMUNICATIONS

The following communications were laid before the Senate, together with accompanying papers, reports, and documents, and were referred as indicated:

EC–2292. A communication from the Executive Director, Commodity Futures Trading Commission, transmitting, pursuant to law, the report of a rule entitled ''Rules Relating to Permissible Uses of Official Seal'' (72 FR 29246) received on June 13, 2007; to the Committee on Agriculture, Nutrition, and Forestry.

EC–2293. A communication from the Under Secretary of Defense (Acquisition, Technology and Logistics), transmitting, pursuant to law, a report entitled ''Report on Activities and Programs for Countering Proliferation and NBC Terrorism''; to the Committee on Armed Services.

EC–2294. A communication from the Acting Deputy, Office of Legislative Affairs, Department of the Navy, transmitting, pursuant to law, notification of the Navy's decision to conduct a public-private competition for the emergency dispatch management support services at the Naval Post Graduate School in Monterey, California and Naval Support Activity in Culter, Maine; to the Committee on Armed Services.

EC–2295. A communication from the Under Secretary of Defense (Acquisition, Technology and Logistics), transmitting, pursuant to law, a report relative to the Department's inventory of non-inherently governmental activities during fiscal year 2006; to the Committee on Armed Services.

EC–2296. A communication from the Assistant Secretary for Export Administration, Bureau of Industry and Security, Department of Commerce, transmitting, pursuant to law, the report of a rule entitled ''Amendment to General Order No. 3: Expansion of the General Order and Addition of Certain Persons'' (RIN0694–AD99) received on June 14, 2007; to the Committee on Banking, Housing, and Urban Affairs.

EC–2297. A communication from the Secretary of the Treasury, transmitting, pursuant to law, a six-month periodic report on the national emergency with respect to the Western Balkans that was declared in Executive Order 13219 of June 26, 2001; to the Committee on Banking, Housing, and Urban Affairs.

EC–2298. A communication from the Interim President and Chief Executive Officer, Federal Home Loan Bank of Indianapolis, transmitting, pursuant to law, a report entitled ''2006 Statement on System of Internal Controls of the Federal Home Loan Bank of Indianapolis''; to the Committee on Banking, Housing, and Urban Affairs.

EC–2299. A communication from the Chairman, Board of Governors, Federal Reserve System, transmitting, pursuant to law, the Board's Annual Report for calendar year 2006; to the Committee on Banking, Housing, and Urban Affairs.

EC–2300. A communication from the Under Secretary (Industry and Security), Department of Commerce, transmitting, pursuant to law, a report relative to the Department's intent to impose new foreign-policy based export controls; to the Committee on Banking, Housing, and Urban Affairs.

EC–2301. A communication from the Chairman and President, Export-Import Bank of the United States, transmitting, pursuant to law, a report relative to transactions involving U.S. exports to Panama including the sale of six Boeing 737–800 passenger aircraft; to the Committee on Banking, Housing, and Urban Affairs.

EC–2302. A communication from the Director, Office of Sustainable Fisheries, Department of Commerce, transmitting, pursuant to law, the report of a rule entitled ''Atlantic Highly Migratory Species; Atlantic Bluefin Tuna Fisheries; Temporary Rule; Inseason Retention Limit Adjustment'' (RIN0648–XA57) received on June 14, 2007; to the Committee on Commerce, Science, and Transportation.

EC–2303. A communication from the Deputy Assistant Administrator for Regulatory Programs, National Marine Fisheries Service, Department of Commerce, transmitting, pursuant to law, the report of a rule entitled ''Temporary Rule to Extend Interim Measures to Reduce Overfishing of Atlantic Sea Scallops in the 2007 Fishing Year by Modifying the Elephant Trunk Access Area Management Measures'' (RIN0648–AV05) received on June 14, 2007; to the Committee on Commerce, Science, and Transportation.

EC–2304. A communication from the Deputy Assistant Administrator for Regulatory Programs, National Marine Fisheries Service, Department of Commerce, transmitting,

pursuant to law, the report of a rule entitled ''Reporting Requirements and Conservation Measures; Coastal Pelagic Species Fishery Management Plan'' (RIN0648–AU72) received on June 14, 2007; to the Committee on Commerce, Science, and Transportation.

EC–2305. A communication from the Deputy Assistant Administrator for Regulatory Programs, National Marine Fisheries Service, Department of Commerce, transmitting, pursuant to law, the report of a rule entitled ''Closure of the 2007 Gulf of Mexico Deep-Water Grouper Fishery'' (RIN0648–XA46) received on June 14, 2007; to the Committee on Commerce, Science, and Transportation.

EC–2306. A communication from the Regulations Coordinator, Center for Medicare and Medicaid Services, Department of Health and Human Services, transmitting, pursuant to law, the report of a rule entitled ''Section 506 of the Medicare Prescription Drug, Improvement, and Modernization Act of 2003—Limitation on Charges for Services Furnished by Medicare Participating Inpatient Hospitals to Individuals Eligible for Care Purchased by Indian Health Programs'' (RIN0917–AA02) received on June 15, 2007; to the Committee on Finance.

EC–2307. A communication from the Chief of the Publications and Regulations Branch, Internal Revenue Service, Department of Commerce, transmitting, pursuant to law, the report of a rule entitled ''Notice: Guidance to Clarify the Treatment of Certain Distributions Under IRC Section (897)(h)(1)'' (Notice 2007–55) received on June 15, 2007; to the Committee on Finance.

EC–2308. A communication from the Chief of the Publications and Regulations Branch, Internal Revenue Service, Department of Commerce, transmitting, pursuant to law, the report of a rule entitled ''Clarification and Modification of Rev. Proc. 2005–66'' (Notice 2007–44) received on June 15, 2007; to the Committee on Finance.

EC–2309. A communication from the General Counsel, Department of the Treasury, transmitting, the report of a draft bill that intends to modernize the Treasury Tax and Loan statute; to the Committee on Finance.

REPORTS OF COMMITTEES

The following reports of committees were submitted:

By Mr. DORGAN, from the Committee on Indian Affairs, without amendment and with a preamble:

S.J. Res. 4. A joint resolution to acknowledge a long history of official depredations and ill-conceived policies by the United States Government regarding Indian tribes and offer an apology to all Native Peoples on behalf of the United States (Rept. No. 110–83).

By Mr. BYRD, from the Committee on Appropriations, without amendment:

S. 1644. An original bill making appropriations for the Department of Homeland Security for the fiscal year ending September 30, 2008, and for other purposes (Rept. No. 110–84).

By Mr. REED, from the Committee on Appropriations, without amendment:

S. 1645. An original bill making appropriations for military construction, the Department of Veterans Affairs, and related agencies for the fiscal year ending September 30, 2008, and for other purposes (Rept. No. 110–85).

By Mr. LEVIN, from the Committee on Armed Services, with an amendment in the nature of a substitute:

S. 1606. A bill to provide for the establishment of a comprehensive policy on the care and management of wounded warriors in order to facilitate and enhance their care, rehabilitation, physical evaluation, transition from care by the Department of Defense to care by the Department of Veterans Affairs, and transition from military service to civilian life, and for other purposes.

INTRODUCTION OF BILLS AND JOINT RESOLUTIONS

The following bills and joint resolutions were introduced, read the first and second times by unanimous consent, and referred as indicated:

By Mr. KENNEDY (for himself and Mr. SPECTER):

S. 1639. A bill to provide for comprehensive immigration reform and for other purposes; read the first time.

By Mr. LEAHY (for himself, Mr. CORNYN, Mr. KOHL, and Mr. WHITEHOUSE):

S. 1640. A bill to amend chapter 13 of title 17, United States Code (relating to the vessel hull design protection), to clarify the definitions of a hull and a deck; to the Committee on the Judiciary.

By Mr. COLEMAN (for himself and Mr. BAUCUS):

S. 1641. A bill to amend Public Law 87–383 to reauthorize appropriations to promote the conservation of migratory waterfowl and to offset or prevent the serious loss of important wetland and other waterfowl habitat essential to the preservation of migratory waterfowl, and for other purposes; to the Committee on Environment and Public Works.

By Mr. KENNEDY (for himself, Mr. ENZI, Mr. BINGAMAN, Mr. BROWN, Mr. DODD, Mrs. CLINTON, Mrs. MURRAY, Mr. OBAMA, Mr. REED, and Mr. SANDERS):

S. 1642. A bill to extend the authorization of programs under the Higher Education Act of 1965, and for other purposes; to the Committee on Health, Education, Labor, and Pensions.

By Mr. DOMENICI:

S. 1643. A bill to establish the Reclamation Water Settlements Fund, and for other purposes; to the Committee on Indian Affairs.

By Mr. BYRD:

S. 1644. An original bill making appropriations for the Department of Homeland Security for the fiscal year ending September 30, 2008, and for other purposes; from the Committee on Appropriations; placed on the calendar.

By Mr. REED:

S. 1645. An original bill making appropriations for military construction, the Department of Veterans Affairs, and related agencies for the fiscal year ending September 30, 2008, and for other purposes; from the Committee on Appropriations; placed on the calendar.

By Mr. REID (for himself and Mr. ENSIGN):

S. 1646. A bill to amend the Food Security Act of 1985 to require the Secretary of Agriculture to make cost-share and incentive payments for innovative fuels management conservation practices, including prescribed grazing management on private grazing land and practices that complement commensurate public land, to prevent the occurrence and spread of, and damages caused by, wildfires fueled by invasive species; to the Committee on Agriculture, Nutrition, and Forestry.

SUBMISSION OF CONCURRENT AND SENATE RESOLUTIONS

The following concurrent resolutions and Senate resolutions were read, and referred (or acted upon), as indicated:

By Mr. CORNYN:

S. Res. 237. A resolution supporting the goals and ideals of a National Day of Remembrance for Murder Victims; to the Committee on the Judiciary.

By Mr. MCCONNELL (for himself and Mr. REID):

S. Res. 238. A resolution amending Senate Resolution 458 (98th Congress) to allow the Secretary of the Senate to adjust the salaries of employees who are placed on the payroll of the Senate, under the direction of the Secretary, as a result of the death or resignation of a Senator; considered and agreed to.

By Mr. BROWN:

S. Con. Res. 38. A concurrent resolution recognizing that the plight of Kashmiri Pandits has been an ongoing concern since 1989 and that their physical, political, and economic security should be safeguarded by the Government of the Republic of India and the state government of Jammu and Kashmir; to the Committee on Foreign Relations.

ADDITIONAL COSPONSORS

S. 83

At the request of Mr. MCCAIN, the name of the Senator from Ohio (Mr. BROWN) was added as a cosponsor of S. 83, a bill to provide increased rail transportation security.

S. 161

At the request of Mr. THUNE, the name of the Senator from Montana (Mr. TESTER) was added as a cosponsor of S. 161, a bill to amend title 38, United States Code, to provide for annual cost-of-living adjustments to be made automatically by law each year in the rates of disability compensation for veterans with service-connected disabilities and the rates of dependency and indemnity compensation for survivors of certain service-connected disabled veterans.

S. 430

At the request of Mr. BOND, the name of the Senator from Minnesota (Mr. COLEMAN) was added as a cosponsor of S. 430, a bill to amend title 10, United States Code, to enhance the national defense through empowerment of the Chief of the National Guard Bureau and the enhancement of the functions of the National Guard Bureau, and for other purposes.

S. 442

At the request of Mr. DURBIN, the names of the Senator from Illinois (Mr. OBAMA) and the Senator from Oregon (Mr. WYDEN) were added as cosponsors of S. 442, a bill to provide for loan repayment for prosecutors and public defenders.

S. 450

At the request of Mr. ENSIGN, the name of the Senator from Illinois (Mr. DURBIN) was added as a cosponsor of S. 450, a bill to amend title XVIII of the

Social Security Act to repeal the medicare outpatient rehabilitation therapy caps.

S. 557

At the request of Mr. SCHUMER, the name of the Senator from Georgia (Mr. ISAKSON) was added as a cosponsor of S. 557, a bill to amend the Internal Revenue Code of 1986 to make permanent the depreciation classification of motorsports entertainment complexes.

S. 558

At the request of Mr. KENNEDY, the name of the Senator from North Dakota (Mr. DORGAN) was added as a cosponsor of S. 558, a bill to provide parity between health insurance coverage of mental health benefits and benefits for medical and surgical services.

S. 573

At the request of Ms. STABENOW, the name of the Senator from Indiana (Mr. BAYH) was added as a cosponsor of S. 573, a bill to amend the Federal Food, Drug, and Cosmetic Act and the Public Health Service Act to improve the prevention, diagnosis, and treatment of heart disease, stroke, and other cardiovascular diseases in women.

S. 579

At the request of Mr. REID, the name of the Senator from Texas (Mr. CORNYN) was added as a cosponsor of S. 579, a bill to amend the Public Health Service Act to authorize the Director of the National Institute of Environmental Health Sciences to make grants for the development and operation of research centers regarding environmental factors that may be related to the etiology of breast cancer.

S. 593

At the request of Mr. BURR, the name of the Senator from Oregon (Mr. SMITH) was added as a cosponsor of S. 593, a bill to amend the Public Health Service Act to establish a grant program to provide supportive services in permanent supportive housing for chronically homeless individuals, and for other purposes.

S. 625

At the request of Mr. KENNEDY, the name of the Senator from Minnesota (Ms. KLOBUCHAR) was added as a cosponsor of S. 625, a bill to protect the public health by providing the Food and Drug Administration with certain authority to regulate tobacco products.

S. 721

At the request of Mr. ENZI, the name of the Senator from Connecticut (Mr. DODD) was added as a cosponsor of S. 721, a bill to allow travel between the United States and Cuba.

S. 773

At the request of Mr. WARNER, the name of the Senator from Minnesota (Mr. COLEMAN) was added as a cosponsor of S. 773, a bill to amend the Internal Revenue Code of 1986 to allow Federal civilian and military retirees to pay health insurance premiums on a pretax basis and to allow a deduction for TRICARE supplemental premiums.

S. 777

At the request of Mr. CRAIG, the name of the Senator from Pennsylvania (Mr. SPECTER) was added as a cosponsor of S. 777, a bill to repeal the imposition of withholding on certain payments made to vendors by government entities.

S. 803

At the request of Mr. ROCKEFELLER, the name of the Senator from Pennsylvania (Mr. SPECTER) was added as a cosponsor of S. 803, a bill to repeal a provision enacted to end Federal matching of State spending of child support incentive payments.

S. 805

At the request of Mr. DURBIN, the name of the Senator from Maine (Ms. SNOWE) was added as a cosponsor of S. 805, a bill to amend the Foreign Assistance Act of 1961 to assist countries in sub-Saharan Africa in the effort to achieve internationally recognized goals in the treatment and prevention of HIV/AIDS and other major diseases and the reduction of maternal and child mortality by improving human health care capacity and improving retention of medical health professionals in sub-Saharan Africa, and for other purposes.

S. 860

At the request of Mrs. CLINTON, the name of the Senator from California (Mrs. BOXER) was added as a cosponsor of S. 860, a bill to amend title XIX of the Social Security Act to permit States the option to provide Medicaid coverage for low-income individuals infected with HIV.

S. 901

At the request of Mr. KENNEDY, the name of the Senator from Indiana (Mr. BAYH) was added as a cosponsor of S. 901, a bill to amend the Public Health Service Act to provide additional authorizations of appropriations for the health centers program under section 330 of such Act.

S. 903

At the request of Mr. DURBIN, the name of the Senator from New Mexico (Mr. DOMENICI) was added as a cosponsor of S. 903, a bill to award a Congressional Gold Medal to Dr. Muhammad Yunus, in recognition of his contributions to the fight against global poverty.

S. 912

At the request of Mr. ROCKEFELLER, the name of the Senator from South Dakota (Mr. JOHNSON) was added as a cosponsor of S. 912, a bill to amend the Internal Revenue Code of 1986 to expand the incentives for the construction and renovation of public schools.

S. 970

At the request of Mr. SMITH, the name of the Senator from South Carolina (Mr. DEMINT) was added as a cosponsor of S. 970, a bill to impose sanctions on Iran and on other countries for assisting Iran in developing a nuclear program, and for other purposes.

S. 991

At the request of Mr. DURBIN, the name of the Senator from Rhode Island (Mr. WHITEHOUSE) was added as a cosponsor of S. 991, a bill to establish the Senator Paul Simon Study Abroad Foundation under the authorities of the Mutual Educational and Cultural Exchange Act of 1961.

S. 1149

At the request of Mr. KOHL, the name of the Senator from Iowa (Mr. GRASSLEY) was added as a cosponsor of S. 1149, a bill to amend the Federal Meat Inspection Act and the Poultry Products Inspection Act to authorize the interstate distribution of State-inspected meat and poultry if the Secretary of Agriculture determines that the State inspection requirements are at least equal to Federal inspection requirements and to require the Secretary to reimburse State agencies for part of the costs of the inspections.

S. 1239

At the request of Mr. ROCKEFELLER, the name of the Senator from Georgia (Mr. ISAKSON) was added as a cosponsor of S. 1239, a bill to amend the Internal Revenue Code of 1986 to extend the new markets tax credit through 2013, and for other purposes.

S. 1260

At the request of Mr. CARPER, the name of the Senator from Idaho (Mr. CRAPO) was added as a cosponsor of S. 1260, a bill to protect information relating to consumers, to require notice of security breaches, and for other purposes.

S. 1277

At the request of Mr. NELSON of Nebraska, the name of the Senator from Georgia (Mr. ISAKSON) was added as a cosponsor of S. 1277, a bill to amend title XVIII of the Social Security Act to clarify the treatment of payment under the Medicare program for clinical laboratory tests furnished by critical access hospitals.

S. 1295

At the request of Mr. FEINGOLD, the name of the Senator from Oklahoma (Mr. INHOFE) was added as a cosponsor of S. 1295, a bill to amend the African Development Foundation Act to change the name of the Foundation, modify the administrative authorities of the Foundation, and for other purposes.

S. 1382

At the request of Mr. REID, the names of the Senator from Indiana (Mr. BAYH) and the Senator from Nebraska (Mr. HAGEL) were added as cosponsors of S. 1382, a bill to amend the Public Health Service Act to provide the establishment of an Amyotrophic Lateral Sclerosis Registry.

S. 1407

At the request of Mr. PRYOR, the name of the Senator from Idaho (Mr. CRAPO) was withdrawn as a cosponsor of S. 1407, a bill to amend the Internal Revenue Code of 1986 to temporarily provide a shorter recovery period for the depreciation of certain systems installed in nonresidential and residential rental buildings.

At the request of Mr. PRYOR, the name of the Senator from Colorado (Mr. ALLARD) was added as a cosponsor of S. 1407, supra.

S. 1418

At the request of Mr. DODD, the name of the Senator from Massachusetts (Mr. KERRY) was added as a cosponsor of S. 1418, a bill to provide assistance to improve the health of newborns, children, and mothers in developing countries, and for other purposes.

S. 1428

At the request of Mr. HATCH, the name of the Senator from Minnesota (Mr. COLEMAN) was added as a cosponsor of S. 1428, a bill to amend part B of title XVIII of the Social Security Act to assure access to durable medical equipment under the Medicare program.

S. 1451

At the request of Mr. WHITEHOUSE, the names of the Senator from Rhode Island (Mr. REED), the Senator from Pennsylvania (Mr. CASEY) and the Senator from North Dakota (Mr. DORGAN) were added as cosponsors of S. 1451, a bill to encourage the development of coordinated quality reforms to improve health care delivery and reduce the cost of care in the health care system.

S. 1455

At the request of Mr. WHITEHOUSE, the names of the Senator from Rhode Island (Mr. REED) and the Senator from Montana (Mr. TESTER) were added as cosponsors of S. 1455, a bill to provide for the establishment of a health information technology and privacy system.

S. 1500

At the request of Mr. LUGAR, the name of the Senator from North Carolina (Mrs. DOLE) was added as a cosponsor of S. 1500, a bill to support democracy and human rights in Zimbabwe, and for other purposes.

S. 1509

At the request of Mr. MARTINEZ, the name of the Senator from North Carolina (Mrs. DOLE) was added as a cosponsor of S. 1509, a bill to improve United States hurricane forecasting, monitoring, and warning capabilities, and for other purposes.

S. 1535

At the request of Mr. LAUTENBERG, the name of the Senator from New Jersey (Mr. MENENDEZ) was added as a cosponsor of S. 1535, a bill to amend the Internal Revenue Code of 1986 and the Foreign Trade Zones Act to simplify the tax and eliminate the drawback fee on certain distilled spirits used in nonbeverage products manufactured in a United States foreign trade zone for domestic use and export.

S. 1551

At the request of Mr. BROWN, the names of the Senator from New Jersey (Mr. MENENDEZ) and the Senator from Iowa (Mr. HARKIN) were added as cosponsors of S. 1551, a bill to amend the Public Health Service Act with respect to making progress toward the goal of eliminating tuberculosis, and for other purposes.

S. 1618

At the request of Mr. SALAZAR, the name of the Senator from Florida (Mr. NELSON) was added as a cosponsor of S. 1618, a bill to amend the Internal Revenue Code of 1986 to provide a credit for the production of a cellulosic biofuel.

S.J. RES. 16

At the request of Mr. MCCONNELL, the name of the Senator from Arizona (Mr. KYL) was added as a cosponsor of S.J. Res. 16, a joint resolution approving the renewal of import restrictions contained in the Burmese Freedom and Democracy Act of 2003.

S. RES. 178

At the request of Mr. BINGAMAN, the name of the Senator from Vermont (Mr. LEAHY) was added as a cosponsor of S. Res. 178, a resolution expressing the sympathy of the Senate to the families of women and girls murdered in Guatemala, and encouraging the United States to work with Guatemala to bring an end to these crimes.

S. RES. 185

At the request of Mr. SALAZAR, the name of the Senator from Alaska (Mr. STEVENS) was added as a cosponsor of S. Res. 185, a resolution supporting the ideals and values of the Olympic Movement.

S. RES. 197

At the request of Mr. COCHRAN, the name of the Senator from Georgia (Mr. ISAKSON) was added as a cosponsor of S. Res. 197, a resolution honoring the accomplishments of AmeriCorps.

S. RES. 215

At the request of Mr. ALLARD, the names of the Senator from Maine (Ms. SNOWE), the Senator from Ohio (Mr. VOINOVICH) and the Senator from Arkansas (Mr. PRYOR) were added as cosponsors of S. Res. 215, a resolution designating September 25, 2007, as ''National First Responder Appreciation Day''.

S. RES. 231

At the request of Mr. DURBIN, the names of the Senator from Maryland (Mr. CARDIN), the Senator from Connecticut (Mr. LIEBERMAN), the Senator from Missouri (Mrs. MCCASKILL), the Senator from New York (Mrs. CLINTON), the Senator from Vermont (Mr. LEAHY), the Senator from Massachusetts (Mr. KENNEDY), the Senator from Connecticut (Mr. DODD), the Senator from Vermont (Mr. SANDERS), the Senator from New Jersey (Mr. MENENDEZ) and the Senator from Ohio (Mr. BROWN) were added as cosponsors of S. Res. 231, a resolution recognizing the historical significance of Juneteenth Independence Day and expressing the sense of the Senate that history should be regarded as a means for understanding the past and solving the challenges of the future.

S. RES. 236

At the request of Mr. BAYH, the name of the Senator from California (Mrs. BOXER) was added as a cosponsor of S. Res. 236, a resolution supporting the goals and ideals of the National Anthem Project, which has worked to restore America's voice by re-teaching Americans to sing the national anthem.

AMENDMENT NO. 1221

At the request of Mr. CARDIN, the name of the Senator from Wisconsin (Mr. KOHL) was added as a cosponsor of amendment No. 1221 intended to be proposed to S. 1348, a bill to provide for comprehensive immigration reform and for other purposes.

AMENDMENT NO. 1510

At the request of Mr. COCHRAN, the name of the Senator from Indiana (Mr. BAYH) was added as a cosponsor of amendment No. 1510 intended to be proposed to H.R. 6, a bill to reduce our Nation's dependency on foreign oil by investing in clean, renewable, and alternative energy resources, promoting new emerging energy technologies, developing greater efficiency, and creating a Strategic Energy Efficiency and Renewables Reserve to invest in alternative energy, and for other purposes.

AMENDMENT NO. 1544

At the request of Ms. KLOBUCHAR, her name was added as a cosponsor of amendment No. 1544 intended to be proposed to H.R. 6, a bill to reduce our Nation's dependency on foreign oil by investing in clean, renewable, and alternative energy resources, promoting new emerging energy technologies, developing greater efficiency, and creating a Strategic Energy Efficiency and Renewables Reserve to invest in alternative energy, and for other purposes.

AMENDMENT NO. 1557

At the request of Ms. KLOBUCHAR, the name of the Senator from Maine (Ms. COLLINS) was withdrawn as a cosponsor of amendment No. 1557 proposed to H.R. 6, a bill to reduce our Nation's dependency on foreign oil by investing in clean, renewable, and alternative energy resources, promoting new emerging energy technologies, developing greater efficiency, and creating a Strategic Energy Efficiency and Renewables Reserve to invest in alternative energy, and for other purposes.

AMENDMENT NO. 1610

At the request of Mr. CARDIN, the name of the Senator from California

(Mrs. BOXER) was added as a cosponsor of amendment No. 1610 proposed to H.R. 6, a bill to reduce our Nation's dependency on foreign oil by investing in clean, renewable, and alternative energy resources, promoting new emerging energy technologies, developing greater efficiency, and creating a Strategic Energy Efficiency and Renewables Reserve to invest in alternative energy, and for other purposes.

AMENDMENT NO. 1614

At the request of Mr. TESTER, the names of the Senator from Virginia (Mr. WEBB) and the Senator from Louisiana (Ms. LANDRIEU) were added as cosponsors of amendment No. 1614 proposed to H.R. 6, a bill to reduce our Nation's dependency on foreign oil by investing in clean, renewable, and alternative energy resources, promoting new emerging energy technologies, developing greater efficiency, and creating a Strategic Energy Efficiency and Renewables Reserve to invest in alternative energy, and for other purposes.

STATEMENTS ON INTRODUCED BILLS AND JOINT RESOLUTIONS

By Mr. LEAHY (for himself, Mr. CORNYN, Mr. KOHL, and Mr. WHITEHOUSE):

S. 1640. A bill to amend chapter 13 of title 17, United States Code (relating to the vessel hull design protection), to clarify the definitions of a hull and a deck; to the Committee on the Judiciary.

Mr. LEAHY. Mr. President, I am pleased to introduce a small but important piece of intellectual property legislation today with my friends from Texas, Wisconsin, and Rhode Island. Our recent collaborations have been fruitful and important. The OPEN Government Act with Senator CORNYN, NOPEC with Senator KOHL, and patent reform with Senator WHITEHOUSE. Today, we are joining together to reintroduce the Vessel Hull Design Protection Act Amendments of 2007.

Designs of boat vessel hulls are often the result of a great deal of time, effort, and financial investment. They are afforded intellectual property protection under the Vessel Hull Design Protection Act that Congress passed in 1998. This law exists for the same reason that other works enjoy intellectual property rights: to encourage continued innovation, to protect the works that emerge from the creative process, and to reward the creators. Recent courtroom experience has made it clear that the protections Congress passed 7 years ago need some statutory refinement to ensure they meet the purposes we envisioned. The Vessel Hull Design Protection Act Amendments shore up the law, making an important clarification about the scope of the protections available to boat designs.

We continue to be fascinated with, and in so many ways dependent on, bodies of water, both for recreation and commerce. More than 50 percent of Americans live on or near the coastline in this country. We seem always to be drawn to the water, whether it is the beautiful Lake Champlain in my home State of Vermont or the world's large oceans. As anyone who has visited our seaports can attest, much of our commerce involves sea travel. Protecting boat designs and encouraging innovation in those designs are worthy aims, and I hope we can move quickly to pass this bipartisan legislation.

I ask unanimous consent that the text of the bill be printed in the RECORD.

There being no objection, the text of the bill was ordered to be printed in the RECORD, as follows:

S. 1640

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. VESSEL HULL DESIGN PROTECTION.

(a) SHORT TITLE.—This section may be cited as the ''Vessel Hull Design Protection Amendments of 2007''.

(b) DESIGNS PROTECTED.—Section 1301(a) of title 17, United States Code, is amended by striking paragraph (2) and inserting the following:

''(2) VESSEL FEATURES.—The design of a vessel hull, deck, or combination of a hull and deck, including a plug or mold, is subject to protection under this chapter, notwithstanding section 1302(4).''.

(c) DEFINITIONS.—Section 1301(b) of title 17, United States Code, is amended—

(1) in paragraph (2), by striking ''vessel hull, including a plug or mold,'' and inserting ''vessel hull or deck, including a plug or mold,'';

(2) by striking paragraph (4) and inserting the following:

''(4) A 'hull' is the exterior frame or body of a vessel, exclusive of the deck, superstructure, masts, sails, yards, rigging, hardware, fixtures, and other attachments.''; and

(3) by adding at the end the following:

''(7) A 'deck' is the horizontal surface of a vessel that covers the hull, including exterior cabin and cockpit surfaces, and exclusive of masts, sails, yards, rigging, hardware, fixtures, and other attachments.''.

Mr. CORNYN. Mr. President, I rise today along with the senior Senator from Vermont to introduce the Vessel Hull Design Protection Act Amendments of 2007. This is another significant piece of legislation on which I proudly have teamed with Senator LEAHY, the chairman of the Senate Judiciary Committee. Most recently, we have worked together on important reforms to the Freedom of Information Act, and also introduced comprehensive patent reform legislation. I am glad to continue our work by introducing this legislation which, though seemingly technical and minor, offers very important clarifications about the scope of protections available to boat designers.

Boat designs, like any technical designs, are complex and are the result of a great deal of hard work and contribution of intellectual property. Accordingly, Congress enacted the Vessel Hull Design Protection Act in 1998 to provide necessary protections that were not present among copyright statutes prior to that time. The act has been instrumental for the continued development and protection of boat designs but unfortunately recently has encountered a few hurdles.

A recent court decision raised questions about the scope of protections available to various boat designs. Justifiably or not, this interpretation under the VHDPA unfortunately has led many in the boat manufacturing industry to conclude that the act's provisions are not effective at protecting vessel designs. Intellectual property protection of those designs is critical to these manufacturers in order to encourage innovative design, and a clarification of the law is needed.

The legislation we offer will clarify that the protections accorded to a vessel design can be used to separately protect a vessel's hull and/or deck as well as a plug or mold of either the hull or deck. The proposed amendments would make clear that it remains possible for boat designers to seek protection for both the hull and the deck, and plug or mold of both, of a single vessel, and many designers no doubt will continue to do so. However, these amendments are intended to clarify that protection under the VHDPA for these vessel elements may be analyzed separately.

This bipartisan legislation provides the necessary assurance to boat manufacturers that the Vessel Hull Design Protection Act will remain a vital intellectual property protection statute. The bill offers very important clarifications about the scope of protections available to boat designs and will be welcome news to boat makers across the Nation and in Texas. The thousands of miles of coastline in Texas, and all the lakes and rivers in between, provide significant opportunities for recreational and commercial boating throughout the state. This legislation will ensure that there will be continued innovation in the design and manufacture of boats for many years to come.

By Mr. DOMENICI:

S. 1643. A bill to establish the Reclamation Water Settlements Fund, and for other purposes; to the Committee on Indian Affairs.

Mr. DOMENICI. Mr. President, one unresolved issue that is of grave concern to many in the west is unresolved Indian water rights claims. Over the past century, many parties have sought to determine the extent of Indian water rights in the courts. However, litigation to determine Indian water rights has failed in many respects for both Indians and non-Indians. Unresolved Indian water rights claims are of particular concern in New Mexico which has 23 Indian tribes.

As with all litigation, the outcome is uncertain and one party generally loses. If the Indian nations were to receive a large award by the courts and those water rights were exercised, the senior priority date of many Indian water rights claims have the potential to displace existing users. This means that non-Indian towns, farmers, and industry could ultimately have their water supply cut off. However, in many instances, even if an Indian nation were to receive a water windfall from the courts, many of the Indian nations lack the water infrastructure to make use of the water awarded by the courts. Additionally, Indian water rights litigation often takes decades. For example, the Aamodt litigation in New Mexico was filed in 1966 and is the longest standing litigation in the federal judiciary. Finally, the numerous unresolved Indian water rights claims in many western states such as New Mexico impair our ability to effectively undertake water rights planning as we are unsure of the award that the Indian nations will receive.

Over the past two decades, many parties have pursued negotiated settlements in lieu of litigation, an approach beneficial to all parties involved. In negotiated settlements, multiple parties get together and determine how best to allocate water among Indians and non-Indians in a way that does not curtail existing uses. Many of the settlements also contain authorization for the Federal Government to provide funding to the Indian nations so that the Indian nations involved can make use of the water they are awarded under the terms of the settlement, resulting in economic development and health benefits on the Indian nation.

Secretary of the Interior Dirk Kempthorne and his staff deserve a great deal of credit for trying to advance the New Mexico Indian water rights settlements. However, current Federal budgets cannot accommodate the upcoming New Mexico settlements. This is troublesome for several reasons. First, it impairs Congress's ability to resolve Indian water rights claims in a way that keeps all water users whole. Additionally, many of the settlements require the construction of water infrastructure benefiting an Indian nation. Lack of a steady stream of Federal money results in water projects that take far longer to construct, costing taxpayers significantly more money in the long run.

Today I introduce the Reclamation Water Settlements Fund Act of 2007. This bill would establish a reliable source of Federal funding to resolve Indian water rights claims in New Mexico. The bill provides that, over the next 10 years, 30 percent of the revenues generated in New Mexico that would otherwise be deposited in the reclamation fund would instead be used to fund Indian water rights settlements. The amounts deposited in this fund could be used to pay for the Aamodt, Abeyta, and Navajo Indian water rights settlements after the parties resolve outstanding issues and the settlements are signed into law. It is important to note that the fund created by this legislation would allow us to fund New Mexico Indian water rights settlements without compromising the sustainability of the reclamation fund.

The consequences of not settling outstanding Indian water rights claims in New Mexico are dire. The legislation I introduce today would remove the main impediment to the resolution of Indian water rights settlement.

I ask unanimous consent that the text of the bill be printed in the RECORD.

There being no objection, the text of the bill was ordered to be printed in the RECORD, as follows:

S. 1643

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. SHORT TITLE.

This Act may be cited as the ''Reclamation Water Settlements Fund Act of 2007''.

SEC. 2. DEFINITIONS.

In this Act:

(1) FUND.—The term ''Fund'' means the Reclamation Water Settlements Fund established by section 3(a).

(2) SECRETARY.—The term ''Secretary'' means the Secretary of the Interior.

(3) STATE.—The term ''State'' means the State of New Mexico.

SEC. 3. RECLAMATION WATER SETTLEMENTS FUND.

(a) ESTABLISHMENT.—There is established in the Treasury of the United States a fund, to be known as the ''Reclamation Water Settlements Fund'', consisting of—

(1) such amounts as are deposited to the Fund under subsection (b); and

(2) any interest earned on investment of amounts in the Fund under subsection (d).

(b) DEPOSITS TO FUND.—

(1) IN GENERAL.—For each of the 10 years after the date of enactment of this Act, the Secretary of the Treasury shall deposit in the Fund an amount equal to 30 percent of the revenues generated within the external boundaries of the State of New Mexico that would otherwise be deposited for the fiscal year in the fund established by the first section of the Act of June 17, 1902 (32 Stat. 388, chapter 1093).

(2) AVAILABILITY OF AMOUNTS.—On deposit, the amounts in the Fund under subsection (a)(1), and on accrual, any interest earned under subsection (d), shall be available annually, without further appropriation, to carry out subsection (c).

(c) USE.—

(1) IN GENERAL.—On request of the Secretary, the Secretary of the Treasury shall transfer to the Secretary such amounts in the Fund as are necessary to fund any activities of the Bureau of Reclamation relating to Indian water rights settlements in the State that are approved by Congress and are associated with the planning, designing, or construction of—

(A) water supply infrastructure; or

(B) a project to rehabilitate a water delivery system to conserve water.

(2) PRIORITY.—

(A) IN GENERAL.—Except as provided in subparagraph (B), amounts shall be transferred under paragraph (1) in the order in which the Indian water rights settlements are approved by Congress.

(B) EXCEPTION.—Amounts may be made simultaneously available under paragraph (1) to fund activities relating to multiple approved Indian water rights settlements in the State if the Secretary determines that—

(i) sufficient amounts are available in the Fund to carry out activities relating to more than 1 Indian water rights settlement simultaneously; and

(ii) deviation from the priority order required under subparagraph (A) would not adversely affect the timely completion of the activities that would otherwise have priority under that subparagraph.

(d) INVESTMENT OF AMOUNTS.—

(1) IN GENERAL.—The Secretary of the Treasury shall invest such portion of the Fund as is not, in the judgment of the Secretary of the Treasury, required to meet current withdrawals.

(2) INTEREST-BEARING OBLIGATIONS.—Investments may be made only in interest-bearing obligations of the United States.

(3) ACQUISITION OF OBLIGATIONS.—For the purpose of investments under paragraph (1), obligations may be acquired—

(A) on original issue at the issue price; or

(B) by purchase of outstanding obligations at the market price.

(4) SALE OF OBLIGATIONS.—Any obligation acquired by the Fund may be sold by the Secretary of the Treasury at the market price.

(5) CREDITS TO FUND.—The interest on, and the proceeds from the sale or redemption of, any obligations held in the Fund shall be credited to, and form a part of, the Fund.

(e) TRANSFERS OF AMOUNTS.—The amounts required to be transferred to the Fund under this section shall be transferred at least annually.

By Mr. REID (for himself and Mr. ENSIGN):

S. 1646. A bill to amend the Food Security Act of 1985 to require the Secretary of Agriculture to make cost-share and incentive payments for innovative fuels management conservation practices, including prescribed grazing management on private grazing land and practices that complement commensurate public land, to prevent the occurrence and spread of, and damages caused by, wildfires fueled by invasive species; to the Committee on Agriculture, Nutrition, and Forestry.

Mr. REID, Mr. President, today my colleague from Nevada, Senator ENSIGN and I, are introducing The Wildfire Presuppression Fuels Management Act of 2007. This bill establishes a USDA conservation program that helps to prevent the occurrence, spread of, and damages caused by wildfire to rangeland.

Since 1999, approximately 5.8 million acres of Nevada rangeland has been destroyed by wildfire, 3 million of which burned in 2005 and 2006. According to the Nevada Department of Wildlife, prior to the 1980's burned lands averaged less than 25,000 acres per year. Nevada's current acres burned per year

have now climbed to 24 times that to 600,000 acres burned per year.

This legislation would allow private land owners to receive annual incentive payments for implementing innovative conservation practices on rangeland that is vulnerable to wildfire or has suffered the consequences of wildfire. Conservation efforts funded through this program would protect unburned areas rich in plant diversity and high resources from the threat of wildfire and restore areas impacted by wildfire and degraded by invasive weeds through reseeding and establishment of native plants.

By creating incentives for private ranchers to manage strips of land that border public lands, we are acknowledging the importance of private land in restoring rangeland health, acknowledging the costs involved to producers and their businesses and equally important, encouraging partnerships between private land and public lands in our efforts to prevent wildfires and improve the environment.

Nevada, along with other Western States, is facing unprecedented threats to the environmental health of its rangeland. Working hand in hand, wildfires and invasive species, such as cheat grass and red brome, are destroying native ecosystems, such as sagebrush habitat, and severely compromising the value of rangeland for livestock production.

According to USDA's Pacific Northwest Research Station more than 50 percent of existing sagebrush habitat has been invaded by cheat grass. That is more than 10 million acres. They predict that cheat grass will displace existing sagebrush and other native plants in much of Nevada over the next 30 years. That is why this bill has the support and endorsement of the Nevada Cattlemen's Association, The Nevada Association of Counties, and the Coalition for Nevada's Wildlife. They understand the importance and economic value of healthy rangeland and welcome opportunities to partner with the Federal Government on finding solutions to these problems.

This program is one small step forward in addressing these important issues. I intend to work to see this legislation included in the farm bill being considered by Congress this year. It is one step forward in addressing the conservation and environmental concerns of Nevada and the Great Basin.

I ask unanimous consent that the text of the bill and a letter of support be printed in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

S. 1646

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. SHORT TITLE.

This Act may be cited as the ''Wildfire Presuppression Fuels Management Pilot Program Act of 2007''.

SEC. 2. FINDINGS.

Congress finds that—

(1) private grazing land in the United States has experienced dramatic increases in the levels of cheatgrass and other invasive or noxious weed species following wildfires; and

(2) to address the needs of private landowners with respect to the protection and management of grazing land, the Secretary of Agriculture should provide cost-share and incentive payments to the landowners to develop fuels management plans and practices and to promote activities—

(A) to protect areas of grazing land and wildlife habitat that have not been negatively affected by wildfire; and

(B) to manage the risks of wildfires that occur—

(i) on public land and rights-of-way from moving onto private grazing land; and

(ii) on private land from moving onto public land and right-of-way.

SEC. 3. FIRE PRESUPPRESSION CONSERVATION PROGRAM.

(a) IN GENERAL.—Section 1240B of the Food Security Act of 1985 (16 U.S.C. 3839aa–2) is amended—

(1) in subsection (a)—

(A) in paragraph (1), by striking ''2010'' and inserting ''2012''; and

(B) in paragraph (2)—

(i) in subparagraph (A), by striking ''and'' at the end;

(ii) in subparagraph (B), by striking the period at the end and inserting ''; and''; and

(iii) by adding at the end the following:

''(C) a producer that develops a fuels management conservation plan, approved by the Natural Resources Conservation Service, and subsequently implements a structural practice or a land management practice relating to fire presuppression on private grazing land as described in the approved conservation plan, shall be eligible to receive cost-share payments and annual incentive payments in accordance with subsection (i).''; and

(2) by adding at the end the following:

''(i) WILDFIRE PRESUPPRESSION CONSERVATION PROGRAM.—

''(1) IN GENERAL.—For each of fiscal years 2008 through 2012, the Secretary shall provide cost-share payments under subsection (d) and annual incentive payments under subsection (e) to producers that enter into contracts as described in paragraph (2) for activities described in paragraph (3).

''(2) TERM OF CONTRACTS.—Notwithstanding subsection (b)(2)(A), a contract entered into under this subsection shall have a term of—

''(A) not less than 5 years; and

''(B) not more than 10 years.

''(3) ELIGIBLE ACTIVITIES.—In addition to grants under section 1240H, the Secretary may provide cost-share payments and incentive payments under this subsection to producers for planning and carrying out innovative fuels management conservation plans on private grazing land to help prevent the occurrence and spread of, and damages caused by, wildfires fueled by invasive or noxious weed species, including activities relating to—

''(A) managed fuel breaks along a boundary between public and private land to reduce fuel load, including—

''(i) managed grazing practices and the technology required to implement such a practice; and

''(ii) the use of brush strips or mosaic patches;

''(B) restoration of fire-damage areas using adapted plant material, with an emphasis on using native and adapted grasses and forbs to vegetate or revegetate the fire-damaged areas;

''(C) projects that receive expanded conservation innovation grants for technology transfer training programs relating to fuels management techniques;

''(D) protection or restoration of critical wildlife habitat; and

''(E) conservation practices designed to reduce and manage high fuel loads associated with woody plant species.''.

(b) CONFORMING AMENDMENT.—Section 1240H(b) of the Food Security Act of 1985 (16 U.S.C. 3839aa–8(b)) is amended by striking paragraph (2) and inserting the following:

''(2) implement projects or activities, such as—

''(A) market systems for pollution reduction;

''(B) innovative conservation practices, including the storing of carbon in the soil; and

''(C) innovative grazing management activities described in section 1240B(i)(3); and''.

———

NEVADA CATTLEMAN'S ASSOCIATION,
June 18, 2007.

Hon. HARRY REID,
U.S. Senate,
Washington, DC.

DEAR SENATOR REID: The Nevada Cattlemen's Association (NCA) represents public and private land ranchers throughout Nevada. We seek to create a stable business climate for our members in which they can run environmentally sustainable and economically viable operations.

Over the past several years fire has played a large role in the Great Basin. As you know, the State of Nevada can be a harsh environment for those who work the land. Cattlemen are susceptible to wildfire on public and private grazing lands. When fire moves through rangelands across the west vegetation communities change from shrub dominated, to annual cheatgrass dominated landscapes. Not only do the vegetation communities change, but the fire cycle increase, habitat for wildlife is decreased, and forage for both domestic livestock and wildlife is greatly reduced throughout the grazing year.

Reducing fuels before the fire season using prescriptive grazing, brush thinning, green strips, and spring grazing on already cheatgrass dominated areas will help reduce the catastrophic fires that have moved through Nevada over the past few summers. The Nevada Cattlemen's Association would like to Thank You for realizing working on landscapes before the fires start is the best method not only for the landscape but for Ranchers across the state. Fire not only hurts the rancher during the fire, but for the years after when the federal land is closed off. Your recognition of the role that fire plays in these lives of rural Nevadans is greatly appreciated. We hope that you continue to support pre-fire management by ranchers and the federal land agencies. Your support on a national level shows your constituents that you care, and sets a national precedence that fire management should happen just as much before the fire bums as after. We Thank You for your support of pre-suppression fuels reduction on both public and private ground. Your recent legislation shows strong support for ranchers and the landscape they utilize.

The Nevada Cattlemen's Association works to protect ranchers and the landscapes they help to manage. Please help that tradition, value, and future continue.

Best Regards,

BOYD M. SPRATLING,
President.

SUBMITTED RESOLUTIONS

SENATE RESOLUTION 237—SUPPORTING THE GOALS AND IDEALS OF A NATIONAL DAY OF REMEMBRANCE FOR MURDER VICTIMS

Mr. CORNYN submitted the following resolution; which was referred to the Committee on the Judiciary:

S. RES. 237

Whereas the death of a loved one is a devastating experience, and the murder of a loved one is exceptionally difficult;

Whereas the friends and families of murder victims cope with grief through a variety of support services, including counseling, crisis intervention, professional referrals, and assistance in dealing with the criminal justice system; and

Whereas the designation of a National Day of Remembrance For Murder Victims on September 25 of each year provides an opportunity for the people of the United States to honor the memories of murder victims and to recognize the impact on surviving family members: Now, therefore, be it

Resolved, That the Senate—

(1) supports the goals and ideals of a National Day of Remembrance for Murder Victims; and

(2) recognizes the significant benefits offered by the organizations that provide services to the loved ones of murder victims.

SENATE RESOLUTION 238—AMENDING SENATE RESOLUTION 458 (98TH CONGRESS) TO ALLOW THE SECRETARY OF THE SENATE TO ADJUST THE SALARIES OF EMPLOYEES WHO ARE PLACED ON THE PAYROLL OF THE SENATE, UNDER THE DIRECTION OF THE SECRETARY, AS A RESULT OF THE DEATH OR RESIGNATION OF A SENATOR

Mr. MCCONNELL (for himself and Mr. REID) submitted the following resolution; which was considered and agreed to:

S. RES. 238

Resolved, That (a) subsection (a)(1) of the first section of Senate Resolution 458 (98th Congress) is amended by inserting after ''respective salaries'' the following: '', unless adjusted by the Secretary of the Senate with the approval of the Senate Committee on Rules and Administration,''.

(b) The amendment made by subsection (a) shall take effect January 1, 2007.

SENATE CONCURRENT RESOLUTION 38—RECOGNIZING THAT THE PLIGHT OF KASHMIRI PANDITS HAS BEEN AN ONGOING CONCERN SINCE 1989 AND THAT THEIR PHYSICAL, POLITICAL, AND ECONOMIC SECURITY SHOULD BE SAFEGUARDED BY THE GOVERNMENT OF THE REPUBLIC OF INDIA AND THE STATE GOVERNMENT OF JAMMU AND KASHMIR

Mr. BROWN submitted the following concurrent resolution; which was referred to the Committee on Foreign Relations:

S. CON RES. 38

Whereas Jammu and Kashmir has an ancient culture of religious tolerance and pluralism, and Hindus, Muslims, Sikhs, Buddhists, and Christians were able to practice their faith in an atmosphere of mutual respect and peace until 1989;

Whereas Kashmiri Pandits are the original inhabitants of Kashmir, tracing their heritage and culture back several millennia;

Whereas Kashmiri Pandits have been the victims of a sustained ethnic cleansing campaign initiated in 1989 by Pakistan-based terrorist groups, which forced a mass exodus of Pandits from Jammu and Kashmir, many of whom now live in Indian refugee camps;

Whereas the Kashmiri Pandit population has declined from 400,000 in 1989 to a current level of only 8,000;

Whereas international human rights organizations have failed to accurately report the campaign of intimidation and violence directed against Kashmiri Pandits;

Whereas hundreds of Kashmiri Pandit civilians, elected officials, and military personnel have been killed in terrorist attacks; and

Whereas Harakat ul-Mujahidin, Jaish-e-Mohammed, and Lashkar-e Tayyiba, which are Pakistan-based terrorist groups and have been designated by the Department of State as foreign terrorist organizations, are seeking to drive out Kashmiri Pandits from Jammu and Kashmir and fight the security forces of the Government of the Republic of India: Now, therefore, be it

Resolved by the Senate (the House of Representatives concurring), That Congress—

(1) condemns the human rights violations committed against Kashmiri Pandits;

(2) urges the Government of the Islamic Republic of Pakistan to end cross-border terrorism by dismantling the infrastructure for terrorist activities in territory under its control, so that all Kashmiris can live, work, and worship in peace; and

(3) encourages the Government of the Republic of India and the state government of Jammu and Kashmir to ensure that Kashmiri Pandits are treated with respect and dignity and are able to safely return to Kashmir.

AMENDMENTS SUBMITTED AND PROPOSED

SA 1623. Mr. CARPER submitted an amendment intended to be proposed to amendment SA 1502 proposed by Mr. REID to the bill H.R. 6, to reduce our Nation's dependency on foreign oil by investing in clean, renewable, and alternative energy resources, promoting new emerging energy technologies, developing greater efficiency, and creating a Strategic Energy Efficiency and Renewables Reserve to invest in alternative energy, and for other purposes; which was ordered to lie on the table.

SA 1624. Mrs. DOLE (for herself and Mr. CARPER) submitted an amendment intended to be proposed to amendment SA 1502 proposed by Mr. REID to the bill H.R. 6, supra; which was ordered to lie on the table.

SA 1625. Mrs. DOLE submitted an amendment intended to be proposed to amendment SA 1502 proposed by Mr. REID to the bill H.R. 6, supra; which was ordered to lie on the table.

SA 1626. Mrs. DOLE submitted an amendment intended to be proposed to amendment SA 1502 proposed by Mr. REID to the bill H.R. 6, supra; which was ordered to lie on the table.

SA 1627. Mr. KOHL (for himself and Mr. BURR) submitted an amendment intended to be proposed to amendment SA 1502 proposed by Mr. REID to the bill H.R. 6, supra; which was ordered to lie on the table.

SA 1628. Mr. BUNNING (for himself, Mr. DOMENICI, Mr. ENZI, Mr. CRAIG, and Mr. MARTINEZ) submitted an amendment intended to be proposed to amendment SA 1502 proposed by Mr. REID to the bill H.R. 6, supra.

SA 1629. Mr. KYL submitted an amendment intended to be proposed to amendment SA 1502 proposed by Mr. REID to the bill H.R. 6, supra; which was ordered to lie on the table.

SA 1630. Mr. CASEY submitted an amendment intended to be proposed to amendment SA 1502 proposed by Mr. REID to the bill H.R. 6, supra; which was ordered to lie on the table.

SA 1631. Mrs. MCCASKILL submitted an amendment intended to be proposed to amendment SA 1502 proposed by Mr. REID to the bill H.R. 6, supra; which was ordered to lie on the table.

SA 1632. Mr. FEINGOLD submitted an amendment intended to be proposed to amendment SA 1502 proposed by Mr. REID to the bill H.R. 6, supra; which was ordered to lie on the table.

SA 1633. Mr. FEINGOLD submitted an amendment intended to be proposed to amendment SA 1502 proposed by Mr. REID to the bill H.R. 6, supra; which was ordered to lie on the table.

SA 1634. Mr. FEINGOLD submitted an amendment intended to be proposed to amendment SA 1502 proposed by Mr. REID to the bill H.R. 6, supra; which was ordered to lie on the table.

SA 1635. Mr. FEINGOLD submitted an amendment intended to be proposed to amendment SA 1502 proposed by Mr. REID to the bill H.R. 6, supra; which was ordered to lie on the table.

SA 1636. Mr. MENENDEZ submitted an amendment intended to be proposed by him to the bill S. 1419, to move the United States toward greater energy independence and security, to increase the production of clean renewable fuels, to protect consumers from price gouging, to increase the energy efficiency of products, buildings and vehicles, to promote research on and deploy greenhouse gas capture and storage options, and to improve the energy performance of the Federal Government, and for other purposes; which was ordered to lie on the table.

SA 1637. Ms. LANDRIEU submitted an amendment intended to be proposed to amendment SA 1502 proposed by Mr. REID to the bill H.R. 6, to reduce our Nation's dependency on foreign oil by investing in clean, renewable, and alternative energy resources, promoting new emerging energy technologies, developing greater efficiency, and creating a Strategic Energy Efficiency and Renewables Reserve to invest in alternative energy, and for other purposes; which was ordered to lie on the table.

SA 1638. Mrs. FEINSTEIN (for herself and Mr. BENNETT) submitted an amendment intended to be proposed to amendment SA 1502 proposed by Mr. REID to the bill H.R. 6, supra; which was ordered to lie on the table.

SA 1639. Mr. BINGAMAN submitted an amendment intended to be proposed to amendment SA 1502 proposed by Mr. REID to the bill H.R. 6, supra; which was ordered to lie on the table.

SA 1640. Mr. GRAHAM (for himself and Mr. DORGAN) submitted an amendment intended

to be proposed to amendment SA 1502 proposed by Mr. REID to the bill H.R. 6, supra; which was ordered to lie on the table.

SA 1641. Mr. COLEMAN submitted an amendment intended to be proposed to amendment SA 1502 proposed by Mr. REID to the bill H.R. 6, supra; which was ordered to lie on the table.

SA 1642. Ms. CANTWELL submitted an amendment intended to be proposed by her to the bill H.R. 6, supra; which was ordered to lie on the table.

SA 1643. Ms. CANTWELL submitted an amendment intended to be proposed to amendment SA 1502 proposed by Mr. REID to the bill H.R. 6, supra; which was ordered to lie on the table.

SA 1644. Ms. CANTWELL submitted an amendment intended to be proposed to amendment SA 1502 proposed by Mr. REID to the bill H.R. 6, supra; which was ordered to lie on the table.

SA 1645. Ms. CANTWELL submitted an amendment intended to be proposed by her to the bill H.R. 6, supra; which was ordered to lie on the table.

SA 1646. Ms. CANTWELL submitted an amendment intended to be proposed by her to the bill H.R. 6, supra; which was ordered to lie on the table.

SA 1647. Mrs. CLINTON (for herself, Mr. SANDERS, Mr. LEAHY, and Ms. CANTWELL) submitted an amendment intended to be proposed to amendment SA 1502 proposed by Mr. REID to the bill H.R. 6, supra; which was ordered to lie on the table.

SA 1648. Mr. WYDEN (for himself, Mr. HARKIN, Ms. LANDRIEU, and Mr. SALAZAR) submitted an amendment intended to be proposed to amendment SA 1502 proposed by Mr. REID to the bill H .R. 6, supra; which was ordered to lie on the table.

SA 1649. Mr. REED submitted an amendment intended to be proposed to amendment SA 1502 proposed by Mr. REID to the bill H.R. 6, supra; which was ordered to lie on the table.

SA 1650. Mr. REED submitted an amendment intended to be proposed to amendment SA 1502 proposed by Mr. REID to the bill H.R. 6, supra; which was ordered to lie on the table.

SA 1651. Mrs. MCCASKILL submitted an amendment intended to be proposed to amendment SA 1502 proposed by Mr. REID to the bill H.R. 6, supra; which was ordered to lie on the table.

SA 1652. Mr. HAGEL (for himself and Mr. MENENDEZ) submitted an amendment intended to be proposed to amendment SA 1502 proposed by Mr. REID to the bill H.R. 6, supra; which was ordered to lie on the table.

SA 1653. Mr. HAGEL submitted an amendment intended to be proposed to amendment SA 1502 proposed by Mr. REID to the bill H.R. 6, supra; which was ordered to lie on the table.

SA 1654. Mr. HAGEL submitted an amendment intended to be proposed to amendment SA 1502 proposed by Mr. REID to the bill H.R. 6, supra; which was ordered to lie on the table.

TEXT OF AMENDMENTS

SA 1623. Mr. CARPER submitted an amendment intended to be proposed to amendment SA 1502 proposed by Mr. REID to the bill H.R. 6, to reduce our Nation's dependency on foreign oil by investing in clean, renewable, and alternative energy resources, promoting new emerging energy technologies, developing greater efficiency, and creating a Strategic Energy Efficiency and Renewables Reserve to invest in alternative energy, and for other purposes; which was ordered to lie on the table; as follows:

At the appropriate place, insert the following:

SEC. __. FEDERAL FLEET FUEL EFFICIENT VEHICLES.

(a) IN GENERAL.—The Secretary of Energy shall coordinate with the Administrator of General Services to ensure that vehicles procured by Federal agencies are the most fuel efficient in their class.

(b) PURCHASE OF ADVANCED TECHNOLOGY VEHICLES.—

(1) The Secretary of Energy shall coordinate with the Administrator of General Services to ensure that, of the vehicles procured after September 30, 2008—

(A) not less than 5 percent of the total number of such vehicles that are procured in each of fiscal years 2009 and 2010 are advanced technology vehicles;

(B) not less than 10 percent of the total number of such vehicles that are procured in each of fiscal years 2011 and 2012 are advanced technology vehicles; and

(C) not less than 15 percent of the total number of such vehicles that are procured each fiscal year after fiscal year 2012 are advanced technology vehicles.

(2) WAIVER.—The Secretary, in consultation with the Administrator, may waive the requirements of paragraph (1) for any fiscal year to the extent that the Secretary determines necessary to adjust to limitations on the commercial availability of advanced technology vehicles.

(c) REPORT ON PLANS FOR IMPLEMENTATION.—At the same time that the President submits the budget for fiscal year 2009 to Congress under section 1105(a) of title 31, United States Code, the Secretary shall submit to Congress a report summarizing the plans for carrying out subsections (a) and (b).

(d) ADVANCED TECHNOLOGY VEHICLE DEFINED.—The term ''advanced technology vehicle'' means a motor vehicle that draws propulsion energy from onboard sources of stored energy that is—

(1) a new advanced lean burn technology motor vehicle (as defined in section 30B(c)(3) of the Internal Revenue Code of 1986);

(2) a new qualified hybrid motor vehicle (as defined in section 30B(d)(3) of such Code); or

(3) a new qualified fuel cell motor vehicle (as defined in section 30B(e)(4) of such Code).

SA 1624. Mrs. DOLE (for herself and Mr. CARPER) submitted an amendment intended to be proposed to amendment SA 1502 proposed by Mr. REID to the bill H.R. 6, to reduce our Nation's dependency on foreign oil by investing in clean, renewable, and alternative energy resources, promoting new emerging energy technologies, developing greater efficiency, and creating a Strategic Energy Efficiency and Renewables Reserve to invest in alternative energy, and for other purposes; which was ordered to lie on the table; as follows:

On page 127, line 5, insert ''(including flow batteries)'' after ''batteries''.

SA 1625. Mrs. DOLE submitted an amendment intended to be proposed to amendment SA 1502 proposed by Mr. REID to the bill H.R. 6, to reduce our Nation's dependency on foreign oil by investing in clean, renewable, and alternative energy resources, promoting new emerging energy technologies, developing greater efficiency, and creating a Strategic Energy Efficiency and Renewables Reserve to invest in alternative energy, and for other purposes; which was ordered to lie on the table; as follows:

At the appropriate place, insert the following:

SEC. _____. REPORT ON OIL AND GAS OPERATIONS IN SUDAN.

Not later than 30 days after the date of the enactment of this Act, the Secretary of Treasury, in consultation with the Secretary of State and Secretary of Energy, shall report to the Congress and the President regarding persons and entities engaged in oil or gas operations in Sudan with respect to which sanctions are applicable under Executive Order 13400 (71 Fed. Reg. 25483, May 1, 2006).

SA 1626. Mrs. DOLE submitted an amendment intended to be proposed to amendment SA 1502 proposed by Mr. REID to the bill H.R. 6, to reduce our Nation's dependency on foreign oil by investing in clean, renewable, and alternative energy resources, promoting new emerging energy technologies, developing greater efficiency, and creating a Strategic Energy Efficiency and Renewables Reserve to invest in alternative energy, and for other purposes; which was ordered to lie on the table; as follows:

On page 138, line 3, strike ''oil consumption'' and insert ''reliance on foreign sources of oil''.

On page 139, strike lines 5 through 9 and insert the following:

(2) LIMITATIONS.—

(A) ADVERTISING.—In carrying out this section, the Secretary shall allocate not less than 85 percent of funds made available under subsection (e) for each fiscal year for the advertising functions specified under paragraph (1)(A).

(B) PROHIBITION ON CERTAIN USES.—None of the funds made available under subsection (e) shall be used—

(i) for partisan political purposes, or for express advocacy in support of, or to defeat, any clearly identified—

(I) political candidate;

(II) ballot initiative; or

(III) legislative or regulatory proposal;

(ii) to fund advertising that features any elected official, person seeking elected office, cabinet-level official, or other Federal official employed pursuant to section 213 of schedule C of title 5, Code of Federal Regulations (or successor regulations); or

(iii) to fund advertising that does not contain a primary message in accordance with subsection (a).

(3) MATCHING REQUIREMENT.—The amount of funds made available under subsection (e) for the procurement of media time or space for the campaign under this section shall be matched by an equal amount of non-Federal funds, to be provided in cash or in-kind.

SA 1627. Mr. KOHL (for himself and Mr. BURR) submitted an amendment intended to be proposed to amendment

SA 1502 proposed by Mr. REID to the bill H.R. 6, to reduce our Nation's dependency on foreign oil by investing in clean, renewable, and alternative energy resources, promoting new emerging energy technologies, developing greater efficiency, and creating a Strategic Energy Efficiency and Renewables Reserve to invest in alternative energy, and for other purposes; which was ordered to lie on the table; as follows:

On page 161, between lines 2 and 3, insert the following:

SEC. 269. USE OF HIGHLY ENERGY EFFICIENT COMMERCIAL WATER HEATING EQUIPMENT IN FEDERAL BUILDINGS.

(a) IN GENERAL.—Title 40, United States Code is amended—

(1) by redesignating sections 3313 through 3315 as sections 3314 through 3316, respectively; and

(2) by inserting after section 3312 the following:

''SEC. 3313. USE OF HIGHLY ENERGY-EFFICIENT COMMERCIAL WATER HEATING EQUIPMENT IN FEDERAL BUILDINGS.

''(a) DEFINITIONS.—In this section:

''(1) ADMINISTRATOR.—The term 'Administrator' means the Administrator of General Services.

''(2) HIGHLY ENERGY-EFFICIENT COMMERCIAL WATER HEATER.—The term 'highly energy-efficient commercial water heater' means a commercial water heater that—

''(A) meets applicable standards for water heaters under the Energy Star program established by section 324A of the Energy Policy and Conservation Act (42 U.S.C. 6294a); or

''(B) has thermal efficiencies of not less than—

''(i) 90 percent for gas units with inputs of a rate that is not higher than 500,000 British thermal units per hour; or

''(ii) 87 percent for gas units with inputs of a rate that is higher than 500,000 British thermal units per hour.

''(b) MAINTENANCE OF PUBLIC BUILDINGS.—Each commercial water heater that is replaced by the Administrator in the normal course of maintenance, or determined by the Administrator to be replaceable to generate substantial energy savings, shall be replaced, to the maximum extent feasible (as determined by the Administrator) with a highly energy-efficient commercial water heater.

''(c) CONSIDERATIONS.—In making a determination under this section relating to the installation of a highly energy-efficient commercial water heater, the Administrator shall consider—

''(1) the life-cycle cost effectiveness of the highly energy-efficient commercial water heater;

''(2) the compatibility of the highly energy-efficient commercial water heater with equipment that, on the date on which the Administrator makes the determination, is installed in the public building; and

''(3) whether the use of the highly energy-efficient commercial water heater could interfere with the productivity of any activity carried out in the public building.''.

(b) EFFECTIVE DATE.—The amendment made by subsection (a) takes effect on the date that is 180 days after the date of enactment of this Act.

SA 1628. Mr. BUNNING (for himself, Mr. DOMENICI, Mr. ENZI, Mr. CRAIG, and Mr. MARTINEZ) submitted an amendment intended to be proposed to amendment SA 1502 proposed by Mr. REID to the bill H.R. 6, to reduce our Nation's dependency on foreign oil by investing in clean, renewable, and alternative energy resources, promoting new emerging energy technologies, developing greater efficiency, and creating a Strategic Energy Efficiency and Renewables Reserve to invest in alternative energy, and for other purposes; as follows:

Redesignate sections 141 through 150 as sections 151 through 160.

Redesignate subtitle C of title I as subtitle D.

After subtitle B of title I, insert the following:

Subtitle C—Clean Coal-Derived Fuels for Energy Security

SEC. 141. SHORT TITLE.

This subtitle may be cited as the ''Clean Coal-Derived Fuels for Energy Security Act of 2007''.

SEC. 142. DEFINITIONS.

In this subtitle:

(1) CLEAN COAL-DERIVED FUEL.—

(A) IN GENERAL.—The term ''clean coal-derived fuel'' means aviation fuel, motor vehicle fuel, home heating oil, or boiler fuel that is—

(i) substantially derived from the coal resources of the United States; and

(ii) refined or otherwise processed at a facility located in the United States that captures up to 100 percent of the carbon dioxide emissions that would otherwise be released at the facility.

(B) INCLUSIONS.—The term ''clean coal-derived fuel'' may include any other resource that is extracted, grown, produced, or recovered in the United States.

(2) COVERED FUEL.—The term ''covered fuel'' means—

(A) aviation fuel;

(B) motor vehicle fuel;

(C) home heating oil; and

(D) boiler fuel.

(3) SMALL REFINERY.—The term ''small refinery'' means a refinery for which the average aggregate daily crude oil throughput for a calendar year (as determined by dividing the aggregate throughput for the calendar year by the number of days in the calendar year) does not exceed 75,000 barrels.

SEC. 143. CLEAN COAL-DERIVED FUEL PROGRAM.

(a) PROGRAM.—

(1) IN GENERAL.—Not later than 1 year after the date of enactment of this Act, the President shall promulgate regulations to ensure that covered fuel sold or introduced into commerce in the United States (except in noncontiguous States or territories), on an annual average basis, contains the applicable volume of clean coal-derived fuel determined in accordance with paragraph (4).

(2) PROVISIONS OF REGULATIONS.—Regardless of the date of promulgation, the regulations promulgated under paragraph (1)—

(A) shall contain compliance provisions applicable to refineries, blenders, distributors, and importers, as appropriate, to ensure that—

(i) the requirements of this subsection are met; and

(ii) clean coal-derived fuels produced from facilities for the purpose of compliance with this subtitle achieve at least a 20 percent reduction in life cycle greenhouse gas emissions compared to gasoline; but

(B) shall not—

(i) restrict geographic areas in the contiguous United States in which clean coal-derived fuel may be used; or

(ii) impose any per-gallon obligation for the use of clean coal-derived fuel.

(3) RELATIONSHIP TO OTHER REGULATIONS.—Regulations promulgated under this paragraph shall, to the maximum extent practicable, incorporate the program structure, compliance and reporting requirements established under the final regulations promulgated to implement the renewable fuel program established by the amendment made by section 1501(a)(2) of the Energy Policy Act of 2005 (Public Law 109–58; 119 Stat. 1067).

(4) APPLICABLE VOLUME.—

(A) CALENDAR YEARS 2016 THROUGH 2022.—For the purpose of this subsection, the applicable volume for any of calendar years 2016 through 2022 shall be determined in accordance with the following table:

Calendar year:	Applicable volume of clean coal-derived fuel (in billions of gallons):
2016	0.75
2017	1.5
2018	2.25
2019	3.75
2020	4.5
2021	5.25
2022	6.0

(B) CALENDAR YEAR 2023 AND THEREAFTER.—Subject to subparagraph (C), for the purposes of this subsection, the applicable volume for calendar year 2023 and each calendar year thereafter shall be determined by the President, in coordination with the Secretary and the Administrator of the Environmental Protection Agency, based on a review of the implementation of the program during calendar years 2016 through 2022, including a review of—

(i) the impact of clean coal-derived fuels on the energy security of the United States;

(ii) the expected annual rate of future production of clean coal-derived fuels; and

(iii) the impact of the use of clean coal-derived fuels on other factors, including job creation, rural economic development, and the environment.

(C) MINIMUM APPLICABLE VOLUME.—For the purpose of this subsection, the applicable volume for calendar year 2023 and each calendar year thereafter shall be equal to the product obtained by multiplying—

(i) the number of gallons of covered fuel that the President estimates will be sold or introduced into commerce in the calendar year; and

(ii) the ratio that—

(I) 6,000,000,000 gallons of clean coal-derived fuel; bears to

(II) the number of gallons of covered fuel sold or introduced into commerce in calendar year 2022.

(b) APPLICABLE PERCENTAGES.—

(1) PROVISION OF ESTIMATE OF VOLUMES OF CERTAIN FUEL SALES.—Not later than October 31 of each of calendar years 2016 through 2021, the Administrator of the Energy Information Administration shall provide to the President an estimate, with respect to the following calendar year, of the volumes of covered fuel projected to be sold or introduced into commerce in the United States.

(2) DETERMINATION OF APPLICABLE PERCENTAGES.—

(A) IN GENERAL.—Not later than November 30 of each of calendar years 2016 through 2022, based on the estimate provided under paragraph (1), the President shall determine and publish in the Federal Register, with respect

to the following calendar year, the clean coal-derived fuel obligation that ensures that the requirements of subsection (a) are met.

(B) REQUIRED ELEMENTS.—The clean coal-derived fuel obligation determined for a calendar year under subparagraph (A) shall—

(i) be applicable to refineries, blenders, and importers, as appropriate;

(ii) be expressed in terms of a volume percentage of covered fuel sold or introduced into commerce in the United States; and

(iii) subject to paragraph (3)(A), consist of a single applicable percentage that applies to all categories of persons specified in clause (i).

(3) ADJUSTMENTS.—In determining the applicable percentage for a calendar year, the President shall make adjustments—

(A) to prevent the imposition of redundant obligations on any person specified in paragraph (2)(B)(i); and

(B) to account for the use of clean coal-derived fuel during the previous calendar year by small refineries that are exempt under subsection (f).

(c) VOLUME CONVERSION FACTORS FOR CLEAN COAL-DERIVED FUELS BASED ON ENERGY CONTENT.—

(1) IN GENERAL.—For the purpose of subsection (a), the President shall assign values to specific types of clean coal-derived fuel for the purpose of satisfying the fuel volume requirements of subsection (a)(4) in accordance with this subsection.

(2) ENERGY CONTENT RELATIVE TO DIESEL FUEL.—For clean coal-derived fuels, 1 gallon of the clean coal-derived fuel shall be considered to be the equivalent of 1 gallon of diesel fuel multiplied by the ratio that—

(A) the number of British thermal units of energy produced by the combustion of 1 gallon of the clean coal-derived fuel (as measured under conditions determined by the Secretary); bears to

(B) the number of British thermal units of energy produced by the combustion of 1 gallon of diesel fuel (as measured under conditions determined by the Secretary to be comparable to conditions described in subparagraph (A)).

(d) CREDIT PROGRAM.—

(1) IN GENERAL.—The President, in consultation with the Secretary and the clean coal-derived fuel requirement of this section.

(2) MARKET TRANSPARENCY.—In carrying out the credit program under this subsection, the President shall facilitate price transparency in markets for the sale and trade of credits, with due regard for the public interest, the integrity of those markets, fair competition, and the protection of consumers.

(e) WAIVERS.—

(1) IN GENERAL.—The President, in consultation with the Secretary and the Administrator of the Environmental Protection Agency, may waive the requirements of subsection (a) in whole or in part on petition by 1 or more States by reducing the national quantity of clean coal-derived fuel required under subsection (a), based on a determination by the President (after public notice and opportunity for comment), that—

(A) implementation of the requirement would severely harm the economy or environment of a State, a region, or the United States; or

(B) extreme and unusual circumstances exist that prevent distribution of an adequate supply of domestically-produced clean coal-derived fuel to consumers in the United States.

(2) PETITIONS FOR WAIVERS.—The President, in consultation with the Secretary and the Administrator of the Environmental Protection Agency, shall approve or disapprove a State petition for a waiver of the requirements of subsection (a) within 90 days after the date on which the petition is received by the President.

(3) TERMINATION OF WAIVERS.—A waiver granted under paragraph (1) shall terminate after 1 year, but may be renewed by the President after consultation with the Secretary and the Administrator of the Environmental Protection Agency.

(f) SMALL REFINERIES.—

(1) TEMPORARY EXEMPTION.—

(A) IN GENERAL.—The requirements of subsection (a) shall not apply to small refineries until calendar year 2018.

(B) EXTENSION OF EXEMPTION.—

(i) STUDY BY SECRETARY.—Not later than December 31, 2013, the Secretary shall submit to the President and Congress a report describing the results of a study to determine whether compliance with the requirements of subsection (a) would impose a disproportionate economic hardship on small refineries.

(ii) EXTENSION OF EXEMPTION.—In the case of a small refinery that the Secretary determines under clause (i) would be subject to a disproportionate economic hardship if required to comply with subsection (a), the President shall extend the exemption under subparagraph (A) for the small refinery for a period of not less than 2 additional years.

(2) PETITIONS BASED ON DISPROPORTIONATE ECONOMIC HARDSHIP.—

(A) EXTENSION OF EXEMPTION.—A small refinery may at any time petition the President for an extension of the exemption under paragraph (1) for the reason of disproportionate economic hardship.

(B) EVALUATION OF PETITIONS.—In evaluating a petition under subparagraph (A), the President, in consultation with the Secretary, shall consider the findings of the study under paragraph (1)(B) and other economic factors.

(C) DEADLINE FOR ACTION ON PETITIONS.—The President shall act on any petition submitted by a small refinery for a hardship exemption not later than 90 days after the date of receipt of the petition.

(3) OPT-IN FOR SMALL REFINERIES.—A small refinery shall be subject to the requirements of subsection (a) if the small refinery notifies the President that the small refinery waives the exemption under paragraph (1).

(g) PENALTIES AND ENFORCEMENT.—

(1) CIVIL PENALTIES.—

(A) IN GENERAL.—Any person that violates a regulation promulgated under subsection (a), or that fails to furnish any information required under such a regulation, shall be liable to the United States for a civil penalty of not more than the total of—

(i) $25,000 for each day of the violation; and

(ii) the amount of economic benefit or savings received by the person resulting from the violation, as determined by the President.

(B) COLLECTION.—Civil penalties under subparagraph (A) shall be assessed by, and collected in a civil action brought by, the Secretary or such other officer of the United States as is designated by the President.

(2) INJUNCTIVE AUTHORITY.—

(A) IN GENERAL.—The district courts of the United States shall have jurisdiction to—

(i) restrain a violation of a regulation promulgated under subsection (a);

(ii) award other appropriate relief; and

(iii) compel the furnishing of information required under the regulation.

(B) ACTIONS.—An action to restrain such violations and compel such actions shall be brought by and in the name of the United States.

(C) SUBPOENAS.—In the action, a subpoena for a witness who is required to attend a district court in any district may apply in any other district.

(h) EFFECTIVE DATE.—Except as otherwise specifically provided in this section, this section takes effect on January 1, 2016.

SA 1629. Mr. KYL submitted an amendment intended to be proposed to amendment SA 1502 proposed by Mr. REID to the bill H.R. 6, to reduce our Nation's dependency on foreign oil by investing in clean, renewable, and alternative energy resources, promoting new emerging energy technologies, developing greater efficiency, and creating a Strategic Energy Efficiency and Renewables Reserve to invest in alternative energy, and for other purposes; which was ordered to lie on the table; as follows:

At the end of subtitle C of title I, add the following:

SEC. 151. STUDY OF FEASIBILITY AND IMPACT OF RENEWABLE FUEL AND ADVANCED BIOFUEL REQUIREMENTS.

(a) IN GENERAL.—The Secretary, in consultation with the Administrator of the Environmental Protection Agency, the Administrator of the Energy Information Administration, the Secretary of Agriculture, and the Director of the United States Geological Service, shall conduct a study—

(1) to determine the feasibility of meeting the renewable fuel and advanced biofuel requirements of section 111; and

(2) to evaluate the impact of meeting those standards in accordance with the phase-in schedule required under section 111.

(b) SCOPE.—In conducting the study, the Secretary shall consider—

(1) the technological feasibility and economic impact of the renewable fuel and advanced biofuel requirements of section 111;

(2) the environmental impact of the requirements, including the impact on water supply;

(3) the overall costs and benefits of meeting the requirements;

(4) the degree in which the requirements will maintain a level playing field among all biofuel technology alternatives;

(5) the degree to which energy security benefits can be measured and considered, measured in part by how much less oil is imported;

(6) the impact on fuel fungibility;

(7) the impact on price volatility;

(8) the impact on overall energy supply and distribution;

(9) the capability of infrastructure for alternative fuels, including distribution and transportation;

(10) the actual and projected domestic renewable fuel production capability, by type;

(11) actual and projected imports of renewable fuel, by type;

(12) the impact on domestic food prices;

(13) the impact on tallow prices; and

(14) the impact on domestic animal agriculture feedstocks.

(c) PEER REVIEW.—The Secretary shall enter into an arrangement with the National Academy of Sciences under which the Academy shall conduct a peer review of the results of the study.

(d) REPORTS.—

(1) IN GENERAL.—Not later than 3 years after the date of enactment of this Act, the Secretary shall submit to Congress a report

describing the results of the study required under this section.

(2) UPDATES.—Not later than 2 years after the date of submission of the report under paragraph (1), and every 2 years thereafter through December 31, 2022, the Secretary shall submit to Congress an update on the study required under this section.

(e) ADJUSTMENT OF ALTERNATIVE FUEL STANDARD AND SCHEDULE.—

(1) IN GENERAL.—Notwithstanding any other provision of this title, if the study or an update required under this section demonstrates a shortfall in the supply of the actual or projected renewable fuel or advanced biofuel production and imports necessary to meet the phase-in schedule required under section 111, not later than 1 year after the date on which a report or update is submitted to Congress, the Administrator of the Environmental Protection Agency shall promulgate, through notice and comment rulemaking, such regulations as are necessary to make a downward adjustment in the level of renewable fuel or advanced biofuel required under section 111 or adjust the phase-in schedule, or both, to alleviate the shortfall.

(2) EFFECTIVE DATE.—Any adjustment of the phase-in schedule under paragraph (1) shall take effect not earlier than 90 days after the date of publication of the final rule in the Federal Register, as determined by the Administrator of the Environmental Protection Agency.

SA 1630. Mr. CASEY submitted an amendment intended to be proposed to amendment SA 1502 proposed by Mr. REID to the bill H.R. 6, to reduce our Nation's dependency on foreign oil by investing in clean, renewable, and alternative energy resources, promoting new emerging energy technologies, developing greater efficiency, and creating a Strategic Energy Efficiency and Renewables Reserve to invest in alternative energy, and for other purposes; which was ordered to lie on the table; as follows:

On page 161, strike lines 6 though 12 and insert the following:

SEC. 271. WEATHERIZATION ASSISTANCE FOR LOW-INCOME PERSONS.

(a) ENERGY-EFFICIENT APPLIANCE PURCHASE ASSISTANCE FOR LOW-INCOME PERSONS PROGRAM.—Section 413 of the Energy Conservation and Production Act (42 U.S.C. 6863) is amended by adding at the end the following:

''(f) ENERGY-EFFICIENT APPLIANCE PURCHASE ASSISTANCE FOR LOW-INCOME PERSONS PROGRAM.—

''(1) IN GENERAL.—As part of the weatherization program established under this part, the Administrator shall carry out a program, to be called the 'Energy-Efficient Appliance Purchase Assistance for Low-Income Persons Program', under which the Administrator shall provide grants to low-income persons to pay the Federal share of the cost of purchasing eligible home appliances.

''(2) ELIGIBLE HOME APPLIANCE.—A grant provided under this subsection may only be used to purchase a home appliance that is certified under the Energy Star program or is otherwise determined by the Administrator to be energy efficient, including a home heating system, home cooling system, refrigerator, water heater, washer, or dryer.

''(3) COST SHARING.—

''(A) FEDERAL SHARE.—The Federal share of a grant provided under this subsection shall be 95 percent of the cost of purchasing an eligible home appliance.

''(B) SOURCE OF NON-FEDERAL SHARE.—The non-Federal share of a grant provided under this subsection may be derived from funds provided by charitable, State, or local organizations or agencies.

''(4) PREFERENCE.—In providing grants under this subsection, the Administrator shall give preference to low-income persons that are located in States that have implemented programs, including programs in partnership with for-profit and nonprofit organizations, that promote the purchase of energy-efficient appliances, as determined by the Administrator.

''(5) ADMINISTRATION.—The terms and conditions of the weatherization program established under this part shall apply to this subsection to the extent determined appropriate by the Administrator.

''(6) FUNDING.—Of the funds that are made available under section 422, the Secretary shall use to carry out this subsection not less than $4,000,000 for each of fiscal years 2008 through 2012.''.

(b) AUTHORIZATION OF APPROPRIATIONS.—Section 422 of the Energy Conservation and Production Act (42 U.S.C. 6872) is amended by striking ''$700,000,000 for fiscal year 2008'' and inserting ''$750,000,000 for each of fiscal years 2008 through 2012''.

SA 1631. Mrs. MCCASKILL submitted an amendment intended to be proposed to amendment SA 1502 proposed by Mr. REID to the bill H.R. 6, to reduce our Nation's dependency on foreign oil by investing in clean, renewable, and alternative energy resources, promoting new emerging energy technologies, developing greater efficiency, and creating a Strategic Energy Efficiency and Renewables Reserve to invest in alternative energy, and for other purposes; which was ordered to lie on the table; as follows:

On page 161, between lines 2 and 3, insert the following:

SEC. 269. FEDERAL FLEET FUELING CENTERS.

(a) IN GENERAL.—Not later than January 1, 2010, the head of each Federal agency shall install at least 1 renewable fuel pump at each Federal fleet fueling center in the United States under the jurisdiction of the head of the Federal agency.

(b) REPORT.—Not later than October 31 of the first calendar year after the date of enactment of this Act, and each October 31 thereafter, the President shall submit to Congress a report that describes the progress towards complying with subsection (a), including identifying—

(1) the number of Federal fleet fueling centers that contain at least 1 renewable fuel pump; and

(2) the number of Federal fleet fueling centers that do not contain any renewable fuel pumps.

(c) AUTHORIZATION OF APPROPRIATIONS.—There are authorized to be appropriated such sums as are necessary to carry out this section.

SA 1632. Mr. FEINGOLD submitted an amendment intended to be proposed to amendment SA 1502 proposed by Mr. REID to the bill H.R. 6, to reduce our Nation's dependency on foreign oil by investing in clean, renewable, and alternative energy resources, promoting new emerging energy technologies, developing greater efficiency, and creating a Strategic Energy Efficiency and Renewables Reserve to invest in alternative energy, and for other purposes; which was ordered to lie on the table; as follows:

On page 161, strike lines 13 through 17 and insert the following:

SEC. 272. STATE ENERGY CONSERVATION PLANS.

(a) FINDINGS AND PURPOSES.—Section 361 of the Energy Policy and Conservation Act (42 U.S.C. 6321) is amended—

(1) in subsection (a)—

(A) in paragraph (2), by striking ''and'' at the end;

(B) by redesignating paragraph (3) as paragraph (4); and

(C) by inserting after paragraph (2) the following:

''(3) the dependence of the United States on foreign energy sources (especially petroleum products) has long-term security implications that necessitate actions at the local and national levels to increase energy independence, particularly through support of sustainable domestic production of renewable energy; and''; and

(2) in subsection (b)—

(A) by striking ''energy and reduce'' and inserting ''energy, reduce''; and

(B) by inserting '', and increase energy independence through use of local renewable energy'' after ''demand''.

(b) OPTIONAL FEATURES OF PLANS.—Section 362(d) of the Energy Policy and Conservation Act (42 U.S.C. 6322(d)) is amended—

(1) in paragraph (16), by striking ''and'' after the semicolon at the end;

(2) by redesignating paragraph (17) as paragraph (18); and

(3) by inserting after paragraph (16) the following:

''(17) programs to improve energy independence through the production and use of domestic renewable energy, with an emphasis on programs that—

''(A) maximize the benefits for local communities through local, cooperative, or small business ownership; and

''(B) are environmentally sustainable; and''.

(c) SUPPLEMENTAL STATE ENERGY INDEPENDENCE ASSESSMENT AND PLANNING PROGRAMS.—Section 362 of the Energy Policy and Conservation Act (42 U.S.C. 6322) is amended by adding at the end the following:

''(h) SUPPLEMENTAL STATE ENERGY INDEPENDENCE ASSESSMENT AND PLANNING PROGRAMS.—

''(1) IN GENERAL.—As part of a review conducted under subsection (g), each State is encouraged to consider filing a supplement to the energy conservation plan of the State that includes an energy independence assessment and planning program.

''(2) PLAN.—Each State is encouraged to include in the program a plan that includes—

''(A) a comprehensive assessment of the statewide energy demand and renewable energy production capabilities; and

''(B) 1 or more implementation strategies (including regional coordination) for decreasing dependence on foreign energy sources, including petroleum.

''(3) INFORMATIONAL PURPOSES.—The submission of the plan and program shall be for informational purposes only and shall not require approval by the Secretary.

''(4) CONTENTS.—In preparing a program of a State under paragraph (1), each State is encouraged to consider ways to—

''(A) support local and regional sustainable bioenergy use and production (including support of small businesses);

''(B) support and coordinate between other renewable energy, energy efficiency, and conservation activities at the local, State, regional, or Federal level;

''(C) in the case of bioenergy production, support a broad range of farm sizes, crops (including agroforestry), and production techniques, with a particular focus on small- and moderate-sized family farms;

''(D) maximize the public value of developing and using sustainable bioenergy, including activities that—

''(i) manage energy usage through energy efficiency and conservation;

''(ii) develop new energy sources in a manner that is economically viable, ecologically sound, and socially responsible; and

''(iii) grow or produce biomass in a sustainable manner that—

''(I) has net environmental benefits; and

''(II) takes into account factors such as relative water quality, soil quality, air quality, wildlife impacts, net energy balance, crop diversity, and provision of adequate income for agricultural producers; and

''(E) support local and farmer-owned projects in order to retain and maximize local and regional economic benefits.''.

(d) STATE ENERGY EFFICIENCY GOALS.—Section 364 of the Energy Policy and Conservation Act (42 U.S.C. 6324) is amended—

(1) by striking the section heading and all that follows through ''Each'' and inserting the following:

''SEC. 364. STATE ENERGY EFFICIENCY GOALS.

''(a) IN GENERAL.—Each''; and

(2) by adding at the end the following:

''(b) ADDITIONAL GOALS.—Each State is encouraged to consider establishing goals for—

''(1) reducing dependence on foreign energy sources; and

''(2) encouraging local sustainable renewable energy production and use in a manner that maximizes benefits to the State and local communities.''.

(e) AUTHORIZATION OF APPROPRIATIONS.—Section 365(f) of the Energy Policy and Conservation Act (42 U.S.C. 6325(f)) is amended by striking ''fiscal year 2008'' and inserting ''each of fiscal years 2008 through 2012''.

SA 1633. Mr. FEINGOLD submitted an amendment intended to be proposed to amendment SA 1502 proposed by Mr. REID to the bill H.R. 6, to reduce our Nation's dependency on foreign oil by investing in clean, renewable, and alternative energy resources, promoting new emerging energy technologies, developing greater efficiency, and creating a Strategic Energy Efficiency and Renewables Reserve to invest in alternative energy, and for other purposes; which was ordered to lie on the table; as follows:

On page 55, strike lines 3 through 8 and insert the following:

(3) the financial incentives necessary to enhance, to the maximum extent practicable, the biofuels industry of the United States to reduce the dependence of the United States on foreign oil during calendar years 2011 through 2030; and

(4) an evaluation of and recommendations for improvements to current and proposed biofuel and bioenergy incentives, including—

(A) modifications of law (including regulations) and policies to provide or increase incentives for the potential production of bioenergy (at levels greater than in existence as of the date of enactment of this section) to maintain local ownership, control, economic development, and the value-added nature of bioenergy production;

(B) potential limits to prevent excessive payments as the bioenergy industry matures, including variable or countercyclical support or other payment limitations;

(C) an evaluation of incentives at stages in the bioenergy production system (including agricultural production, fuel and energy production, blending, and retail sale), including recommendations regarding the relative cost-effectiveness and benefits to local and regional communities and consumers; and

(D) an assessment of incentives and recommendations to ensure—

(i) the presence and effectiveness of sufficient environmental safeguards; and

(ii) that the use of Federal funds does not contribute to adverse environmental impacts, particularly with respect to the effects on or changes in—

(I) land, air, and water quality; and

(II) land use patterns.

SA 1634. Mr. FEINGOLD submitted an amendment intended to be proposed to amendment SA 1502 proposed by Mr. REID to the bill H.R. 6, to reduce our Nation's dependency on foreign oil by investing in clean, renewable, and alternative energy resources, promoting new emerging energy technologies, developing greater efficiency, and creating a Strategic Energy Efficiency and Renewables Reserve to invest in alternative energy, and for other purposes; which was ordered to lie on the table; as follows:

On page 163, strike line 8 and insert the following:

(b) PROTECTION FOR SMALL BUSINESS.—Section 111(c)(3) of the Public Utility Regulatory Policies Act of 1978 (16 U.S.C. 2621(c)(3)) is amended by striking ''subsection (d)(7) or (8)'' and inserting ''paragraph (7), (8), (16), or (17) of subsection (d)''.

(c) NATURAL GAS UTILITIES.—Section 303(b) of the

SA 1635. Mr. FEINGOLD submitted an amendment intended to be proposed to amendment SA 1502 proposed by Mr. REID to the bill H.R. 6, to reduce our Nation's dependency on foreign oil by investing in clean, renewable, and alternative energy resources, promoting new emerging energy technologies, developing greater efficiency, and creating a Strategic Energy Efficiency and Renewables Reserve to invest in alternative energy, and for other purposes; which was ordered to lie on the table; as follows:

On page 166, line 21, strike ''; and'' and insert a semicolon.

On page 166, line 24, strike the period and insert ''; and''.

On page 166, between lines 24 and 25, insert the following:

''(4) to increase energy independence with an emphasis on sustainable local and regional renewable energy production and use in a way that maximizes benefits for local and regional communities.

SA 1636. Mr. MENENDEZ submitted an amendment intended to be proposed by him to the bill H.R. 1419, to move the United States toward greater energy independence and security, to increase the production of clean renewable fuels, to protect consumers from price gouging, to increase the energy efficiency of products, buildings and vehicles, to promote research on and deploy greenhouse gas capture and storage options, and to improve the energy performance of the Federal Government, and for other purposes; which was ordered to lie on the table; as follows:

At the end, add the following:

TITLE VIII—MISCELLANEOUS

SEC. 801. STUDY OF THE EFFECT OF PRIVATE WIRE LAWS ON THE DEVELOPMENT OF COMBINED HEAT AND POWER FACILITIES.

(a) STUDY.—

(1) IN GENERAL.—The Secretary, in consultation with the States and other appropriate entities, shall conduct a study of the laws (including regulations) affecting the siting of privately owned electric distribution wires on and across public rights-of-way.

(2) REQUIREMENTS.—The study under paragraph (1) shall include—

(A) an evaluation of—

(i) the purposes of the laws; and

(ii) the effect the laws have on the development of combined heat and power facilities;

(B) a determination of whether a change in the laws would have any operating, reliability, cost, or other impacts on electric utilities and the customers of the electric utilities; and

(C) an assessment of—

(i) whether privately owned electric distribution wires would result in duplicative facilities; and

(ii) whether duplicative facilities are necessary or desirable.

(b) REPORT.—Not later than 1 year after the date of enactment of this Act, the Secretary shall submit to Congress a report that describes the results of the study conducted under subsection (a).

SA 1637. Ms. LANDRIEU submitted an amendment intended to be proposed to amendment SA 1502 proposed by Mr. REID to the bill H.R. 6, to reduce our Nation's dependency on foreign oil by investing in clean, renewable, and alternative energy resources, promoting new emerging energy technologies, developing greater efficiency, and creating a Strategic Energy Efficiency and Renewables Reserve to invest in alternative energy, and for other purposes; which was ordered to lie on the table; as follows:

At the appropriate place, insert the following:

SEC. ___. EXTENSION AND MODIFICATION OF CREDIT FOR NEW ENERGY EFFICIENT HOMES.

(a) EXTENSION.—Subsection (g) of section 45L (relating to termination) of the Internal Revenue Code of 1986 is amended by striking ''December 31, 2008'' and inserting ''December 31, 2013''.

(b) USE OF 2006 IECC STANDARDS.—Clause (i) of section 45L(c)(1)(A) of the Internal Revenue Code of 1986 (relating to energy savings requirements) is amended by striking ''the 2003 International Energy Conservation Code'' and inserting ''the 2006 International Energy Conservation Code''.

(c) CREDIT ALLOWED FOR HOMES INCREASING EFFICIENCY BY 30 PERCENT.—

(1) IN GENERAL.—Subsection (c) of section 45L of the Internal Revenue Code of 1986 is amended by striking ''or'' at the end of paragraph (2), by redesignating paragraph (3) as paragraph (4), and by inserting after paragraph (2) the following new paragraph:

''(3) certified—

''(A) to have a level of annual heating and cooling energy consumption which is at least 30 percent below the annual level described in paragraph (1) but less than 50 percent below such level, and

''(B) to have building envelope component improvements account for at least ⅓ of such 30 percent, or''.

(2) AMOUNT OF CREDIT.—Section 45L(a)(2)(B) of such Code is amended by striking ''paragraph (3)'' and inserting ''paragraph (3) or (4)''.

(d) INCREASE IN CREDIT AMOUNT.—

(1) IN GENERAL.—Section 45L(a)(2) of the Internal Revenue Code of 1986, as amended by subsection (c)(2), is amended—

(A) in subparagraph (A), by striking ''$2,000'' and inserting ''$4,000'', and

(B) in subparagraph (B), by striking ''$1,000'' and inserting ''$2,000''.

(2) ADDITIONAL CREDIT AMOUNT FOR HOMES IN STATES ADOPTING 2006 IECC.—Paragraph (2) of section 45L(a) of such Code is amended by adding at the end the following new flush sentence:

''In the case of any dwelling unit which is located in a State which has adopted the 2006 International Energy Conservation Code, the amounts under subparagraphs (A) and (B) shall each be increased by $1,000.''.

(e) CLARIFICATION WITH RESPECT TO RENTAL UNITS.—Subparagraph (B) of section 45L(a)(1) of the Internal Revenue Code of 1986 is amended to read as follows:

''(B) acquired by a person from such eligible contractor and used by any person as a residence (whether as a principal residence, for rental, or otherwise) during the taxable year.''.

(f) EFFECTIVE DATE.—

(1) IN GENERAL.—Except as provided in paragraph (2), the amendments made by this section shall apply to taxable years beginning after the date of the enactment of this Act.

(2) RENTAL UNITS.—The amendment made by subsection (e) shall take effect as if included in section 1332 of the Energy Policy Act of 2005.

SA 1638. Mrs. FEINSTEIN (for herself and Mr. BENNETT) submitted an amendment intended to be proposed to amendment SA 1502 proposed by Mr. REID to the bill H.R. 6, to reduce our Nation's dependency on foreign oil by investing in clean, renewable, and alternative energy resources, promoting new emerging energy technologies, developing greater efficiency, and creating a Strategic Energy Efficiency and Renewables Reserve to invest in alternative energy, and for other purposes; which was ordered to lie on the table; as follows:

On page 152, strike lines 15 through the table and insert the following:

SEC. 264. ENERGY MANAGEMENT REQUIREMENTS FOR FEDERAL BUILDINGS.

Section 543(a) of the National Energy Conservation Policy Act (42 U.S.C. 8253(a)(1)) is amended—

(1) in paragraph (1), by striking the table and inserting the following:

''Fiscal Year	Percentage reduction
2006	2
2007	4
2008	9
2009	12
2010	15
2011	18
2012	21
2013	24
2014	27
2015	30.''; and

(2) by adding at the end the following:

''(4) The Architect of the Capitol shall comply with the requirements of this subsection with respect to the Capitol complex.''.

On page 161, after line 2, insert the following:

SEC. 269. LEGISLATIVE BRANCH ENERGY EFFICIENCY INITIATIVE.

(a) AUDIT.—

(1) IN GENERAL.—Not later than 180 days after the date of enactment of this Act, the Architect of the Capitol shall complete—

(A) comprehensive energy audits of the Capitol complex; and

(B) identify and evaluate energy-efficient and renewable-energy projects.

(2) SUBMISSION.—The audits required by paragraph (1) shall be submitted to the Committee on Rules and Administration.

(b) REPORT ON CARBON DIOXIDE EMISSIONS.—

(1) IN GENERAL.—Not later than 180 days after the date of enactment of this Act, the Architect of the Capitol, in collaboration with Federal agencies with the relevant expertise to judge both the environmental benefits and technical feasibility of applying carbon sequestration technologies to operations of the Capitol Power Plant, shall complete a feasibility study on options for reducing the carbon dioxide emissions associated with providing electricity, steam, and chilled water to the Capitol complex which shall include—

(A) an analysis of the costs, feasibility and ancillary benefits of reducing the current level of carbon dioxide emissions through the installation of a highly efficient combined heat and power plant;

(B) an analysis of various alternatives for reducing, capturing, and storing carbon associated with the Capitol Power Plant, including options for carbon sequestration, coal gasification, and clean-coal technology; and

(C) recommendations for reducing carbon dioxide emissions from the operations of the Capitol complex by 20 percent by 2020.

(2) BASELINE.—The baseline year for reductions under paragraph (1)(C) shall be fiscal year 2006.

(3) SUBMISSION.—The report required by paragraph (1) shall be submitted to the Committee on Rules and Administration.

(c) BIODIESEL.—

(1) IN GENERAL.—Not later than 180 days after the date of enactment of this Act, the Architect of the Capitol shall complete a feasibility study on the technical and economic feasibility of requiring biodiesel in Architect of the Capitol and Senate Sergeant at Arms compatible vehicles.

(2) SUBMISSION.—The report required by paragraph (1) shall be submitted to the Committee on Rules and Administration.

(d) BUILDING INTEGRATED PHOTOVOLTAIC SYSTEM.—

(1) IN GENERAL.—Not later than 180 days after the date of enactment of this Act, the Architect of the Capitol shall complete a study assessing the feasibility of installing a Building Integrated Photovoltaic System on the rooftop of the Hart Senate Office Building.

(2) SUBMISSION.—The report required by paragraph (1) shall be submitted to the Committee on Rules and Administration.

SA 1639. Mr. BINGAMAN submitted an amendment intended to be proposed to amendment SA 1502 proposed by Mr. REID to the bill H.R. 6, to reduce our Nation's dependency on foreign oil by investing in clean, renewable, and alternative energy resources, promoting new emerging energy technologies, developing greater efficiency, and creating a Strategic Energy Efficiency and Renewables Reserve to invest in alternative energy, and for other purposes; which was ordered to lie on the table; as follows:

On page 180, line 7, insert ''and storage'' before ''of carbon''.

On page 180, line 11, strike ''the compression'' and insert ''advanced compression''.

On page 180, line 18, strike ''and''.

Beginning on page 180, strike line 19 and all that follows through page 181, line 9, and insert the following:

''(v) research and development of new and improved technologies for—

''(I) carbon use, including recycling and reuse of carbon dioxide; and

''(II) the containment of carbon dioxide in the form of solid materials or products derived from a gasification technology that does not involve geologic containment or injection; and

''(vi) research and development of new and improved technologies for oxygen separation from air.

On page 181, line 10, strike ''(3)'' and insert ''(2)''.

On page 182, line 2, strike ''and''.

On page182, line 4, strike the period and insert ''; and''.

On page 182, between lines 4 and 5, insert the following:

''(vii) coal-bed methane recovery.

On page 183, line 8, strike ''(4)'' and insert ''(3)''.

On page 183, line 12, insert ''involving at least 1,000,000 tons of carbon dioxide per year'' after ''tests''.

On page 183, line 14, insert ''collect and'' before ''validate''.

On page 184, line 1, strike ''(5)'' and insert ''(4)''.

On page 184, line 7, strike ''(6)'' and insert ''(5)''.

On page 184, line 11, strike ''(7)'' and insert ''(6)''.

On page 186, strike lines 18 through 20 and insert the following:

(6) the work done to develop the Carbon Sequestration Atlas of the United States and Canada that was completed by the Department of Energy.

On page 189, strike lines 14 through 18 and insert the following:

(A) IN GENERAL.—On completion of the assessment, the Secretary of Energy and the Secretary of the Interior shall incorporate the results of the assessment using—

(i) the NatCarb database, to the maximum extent practicable; or

(ii) a new database developed by the Secretary of Energy, as the Secretary of Energy determines to be necessary.

On page 190, line 25, strike ''or''.

On page 191, line 2, strike the period and insert ''; or''.

On page 191, between lines 2 and 3, insert the following:

(G) manufacture biofuels.

On page 191, strike lines 10 through 15 and insert the following:

(2) SCOPE OF AWARD.—An award under this section shall be only for the portion of the project that—

(A) carries out the large-scale capture (including purification and compression) of carbon dioxide;

(B) provides for the cost of transportation and injection of carbon dioxide; and

(C) incorporates a comprehensive measurement, monitoring, and validation program.

On page 192, line 7, insert ''carbon dioxide by volume'' after ''95 percent''.

SA 1640. Mr. GRAHAM (for herself and Mr. DORGAN) submitted an amendment intended to be proposed to amendment SA 1502 proposed by Mr. REID to the bill H.R. 6, to reduce our Nation's dependency on foreign oil by investing in clean, renewable, and alternative energy resources, promoting new emerging energy technologies, developing greater efficiency, and creating a Strategic Energy Efficiency and Renewables Reserve to invest in alternative energy, and for other purposes; which was ordered to lie on the table; as follows:

At the appropriate place, insert the following:

SEC. _____. HYDROGEN INSTALLATION, INFRASTRUCTURE, AND FUEL COSTS.

(a) IN GENERAL.—Subpart B of part IV of subchapter A of chapter 1 of the Internal Revenue Code of 1986 (relating to foreign tax credit, etc.) is amended by adding at the end the following new section:

''SEC. 30D. HYDROGEN INSTALLATION, INFRASTRUCTURE, AND FUEL COSTS.

''(a) ALLOWANCE OF CREDIT.—There shall be allowed as a credit against the tax imposed by this chapter for the taxable year an amount equal to the sum of—

''(1) the hydrogen installation and infrastructure costs credit determined under subsection (b), and

''(2) the hydrogen fuel costs credit determined under subsection (c).

''(b) HYDROGEN INSTALLATION AND INFRASTRUCTURE COSTS CREDIT.—

''(1) IN GENERAL.—For purposes of subsection (a), the hydrogen installation and infrastructure costs credit determined under this subsection with respect to each eligible hydrogen production and distribution facility of the taxpayer is an amount equal to—

''(A) 50 percent of so much of the installation costs which when added to such costs taken into account with respect to such facility for all preceding taxable years under this subparagraph does not exceed $200,000, plus

''(B) 30 percent of so much of the infrastructure costs for the taxable year as does not exceed $200,000 with respect to such facility, and which when added to such costs taken into account with respect to such facility for all preceding taxable years under this subparagraph does not exceed $600,000.

Nothing in this section shall permit the same cost to be taken into account more than once.

''(2) ELIGIBLE HYDROGEN PRODUCTION AND DISTRIBUTION FACILITY.—For purposes of this subsection, the term 'eligible hydrogen production and distribution facility' means a hydrogen production and distribution facility which has received from the Secretary an allocation from the national hydrogen installation, infrastructure, and fuel credit limitation.

''(c) HYDROGEN FUEL COSTS CREDIT.—

''(1) IN GENERAL.—For purposes of subsection (a), the hydrogen fuel costs credit determined under this subsection with respect to each eligible hydrogen device of the taxpayer is an amount equal to the qualified hydrogen expenditure amounts with respect to such device.

''(2) QUALIFIED HYDROGEN EXPENDITURE AMOUNT.—For purposes of this subsection—

''(A) IN GENERAL.—The term 'qualified hydrogen expenditure amount' means, with respect to each eligible hydrogen energy conversion device of the taxpayer with a production capacity of not more than 25 kilowatts of electricity per year, the lesser of—

''(i) 30 percent of the amount paid or incurred by the taxpayer during the taxable year for hydrogen which is consumed by such device, and

''(ii) $2,000.

In the case of any device which is not owned by the taxpayer at all times during the taxable year, the $2,000 amount in subparagraph (B) shall be reduced by an amount which bears the same ratio to $2,000 as the portion of the year which such device is not owned by the taxpayer bears to the entire year.

''(B) HIGHER LIMITATION FOR DEVICES WITH MORE PRODUCTION CAPACITY.—In the case of any eligible hydrogen energy conversion device with a production capacity of—

''(i) more than 25 but less than 100 kilowatts of electricity per year, subparagraph (A) shall be applied by substituting '$4,000' for '$2,000' each place it appears, and

''(ii) not less than 100 kilowatts of electricity per year, subparagraph (A) shall be applied by substituting '$6,000' for '$2,000' each place it appears.

''(3) ELIGIBLE HYDROGEN ENERGY CONVERSION DEVICES.—For purposes of this subsection—

''(A) IN GENERAL.—The term 'eligible hydrogen energy conversion device' means, with respect to any taxpayer, any hydrogen energy conversion device which—

''(i) is placed in service after December 31, 2004,

''(ii) is wholly owned by the taxpayer during the taxable year, and

''(iii) has received from the Secretary an allocation from the national hydrogen installation, infrastructure, and fuel credit limitation.

If an owner of a device (determined without regard to this subparagraph) provides to the primary user of such device a written statement that such user shall be treated as the owner of such device for purposes of this section, then such user (and not such owner) shall be so treated.

''(B) HYDROGEN ENERGY CONVERSION DEVICE.—The term 'hydrogen energy conversion device' means—

''(i) any electrochemical device which converts hydrogen into electricity, and

''(ii) any combustion engine which burns hydrogen as a fuel.

''(d) NATIONAL HYDROGEN INSTALLATION, INFRASTRUCTURE, AND FUEL CREDIT LIMITATION.—

''(1) IN GENERAL.—There is a national hydrogen installation, infrastructure, and fuel credit limitation for each fiscal year. Such limitation is $15,000,000 for fiscal year 2008, $30,000,000 for fiscal year 2009, $40,000,000 for fiscal year 2010, and $50,000,000 for each succeeding fiscal year.

''(2) ALLOCATION.—Not later than 90 days after the date of the enactment of this section, the Secretary, in consultation with the Secretary of Energy, shall establish a hydrogen installation, infrastructure, and fuel credit allocation program.

''(e) REDUCTION IN BASIS.—For purposes of this subtitle, if a credit is allowed under this section for any expenditure with respect to any property, the increase in the basis of such property which would (but for this paragraph) result from such expenditure shall be reduced by the amount of the credit so allowed.

''(f) APPLICATION WITH OTHER CREDITS.—

''(1) BUSINESS CREDIT TREATED AS PART OF GENERAL BUSINESS CREDIT.—So much of the credit which would be allowed under subsection (a) for any taxable year (determined without regard to this subsection) that is attributable to amounts which (but for subsection (g) would be allowed as a deduction under section 162 shall be treated as a credit listed in section 38(b) for such taxable year (and not allowed under subsection (a)).

''(2) PERSONAL CREDIT.—The credit allowed under subsection (a) (after the application of paragraph (1)) for any taxable year shall not exceed the excess (if any) of—

''(A) the regular tax liability (as defined in section 26(b)) reduced by the sum of the credits allowable under subpart A and sections 27, 30, 30B, and 30C, over

''(B) the tentative minimum tax for the taxable year.

''(g) DENIAL OF DOUBLE BENEFIT.—The amount of any deduction or other credit allowable under this chapter for any cost taken into account in determining the amount of the credit under subsection (a) shall be reduced by the amount of such credit attributable to such cost.

''(h) RECAPTURE.—The Secretary shall, by regulations, provided for recapturing the benefit of any credit allowable under subsection (a) with respect to any property which ceases to be property eligible for such credit.

''(i) ELECTION NOT TO TAKE CREDIT.—No credit shall be allowed under subsection (a) for any property if the taxpayer elects not to have this section apply to such property.

''(j) REGULATIONS.—The Secretary shall prescribe such regulations as necessary to carry out the provisions of this section.

''(k) TERMINATION.—This section shall not apply to any costs after the earlier of—

''(1) December 31, 2017, or

''(2) the date on which the Secretary estimates that at least 5 percent of all registered passenger motor vehicles are powered by hydrogen.''.

(b) CONFORMING AMENDMENTS.—

(1) Section 38(b) of such Code is amended by striking ''plus'' at the end of paragraph (30), by striking the period at the end of paragraph (31) and inserting ''plus'', and by adding at the end the following new paragraph:

''(32) the portion of the hydrogen installation, infrastructure, and fuel credit to which section 30D(f)(1) applies.''.

(2) Section 55(c)(3) of such Code is amended by inserting ''30D(f)(2),'' after ''30C(d)(2),''.

(3) Section 1016(a) of such Code is amended by striking ''and'' at the end of paragraph (36), by striking the period at the end of paragraph (37) and inserting '', and'', and by adding at the end the following new paragraph:

''(38) to the extent provided in section 30D(e).''.

(4) Section 6501(m) of such Code is amended by inserting ''30D(i),'' after ''30C(e)(5),''.

(5) The table of sections for subpart B of part IV of subchapter A of chapter 1 of such Code is amended by inserting after the item relating to section 30C the following new item:

''Sec. 30D. Hydrogen installation, infrastructure, and fuel costs.''.

(c) EFFECTIVE DATE.—The amendments made by this section shall apply to amounts paid or incurred after December 31, 2007, in taxable years ending after such date.

SA 1641. Mr. COLEMAN submitted an amendment intended to be proposed to amendment SA 1502 proposed by Mr. REID to the bill H.R. 6, to reduce our Nation's dependency on foreign oil by investing in clean, renewable, and alternative energy resources, promoting new emerging energy technologies, developing greater efficiency, and creating a Strategic Energy Efficiency and Renewables Reserve to invest in alternative energy, and for other purposes; which was ordered to lie on the table; as follows:

On page 44, line 4, strike ''processing'' and insert ''harvest, processing, storage''.

On page 44, line 12, strike ''processing'' and insert ''harvest, processing, storage''.

SA 1642. Ms. CANTWELL submitted an amendment intended to be proposed by her to the bill H.R. 6, to reduce our Nation's dependency on foreign oil by investing in clean, renewable, and alternative energy resources, promoting new emerging energy technologies, developing greater efficiency, and creating a Strategic Energy Efficiency and Renewables Reserve to invest in alternative energy, and for other purposes; which was ordered to lie on the table; as follows:

In section 102(4), strike subparagraph (A) and insert the following:

(A) nonmerchantable materials or precommercial thinnings that—

(i) are byproducts of preventive treatments, such as trees, wood, brush, thinnings, chips, and slash, that are removed—

(I) to reduce hazardous fuels;

(II) to reduce or contain disease or insect infestation; or

(III) to restore forest health;

(ii) would not otherwise be used for higher-value products; and

(iii) are harvested from National Forest System land or public land (as defined in section 103 of the Federal Land Policy and Management Act of 1976 (43 U.S.C. 1702))—

(I) where permitted by law; and

(II) in accordance with—

(aa) applicable land management plans; and

(bb) the requirements for old-growth maintenance and restoration and large-tree retention of subsections (e)(2) and (f) of section 102 of the Healthy Forests Restoration Act of 2003 (16 U.S.C. 6512); or

---

SA 1643. Ms. CANTWELL submitted an amendment intended to be proposed to amendment SA 1502 proposed by Mr. REID to the bill H.R. 6, to reduce our Nation's dependency on foreign oil by investing in clean, renewable, and alternative energy resources, promoting new emerging energy technologies, developing greater efficiency, and creating a Strategic Energy Efficiency and Renewables Reserve to invest in alternative energy, and for other purposes; which was ordered to lie on the table; as follows:

At the end of subtitle C of title I, add the following:

SEC. 151. STUDY OF MARGINAL PRODUCTION COST OF REQUIRING USE OF FLEXIBLE FUEL MIXTURES IN CERTAIN VEHICLES.

(a) DEFINITION OF FLEXIBLE FUEL MIXTURE.—In this section, the term ''flexible fuel mixture'' means—

(1) any mixture of gasoline and ethanol, not more than 85 percent of which is ethanol, as measured by volume;

(2) any mixture of gasoline and methanol, not more than 85 percent of which is methanol, as measured by volume; and

(3) diesel or biodiesel, of which 85 percent is biodiesel, as measured by volume.

(b) STUDY.—The Secretary shall conduct a study of the likely average marginal production cost of requiring that each new passenger vehicle with a weight of less than 10,000 pounds that is sold in the United States shall be capable of using a flexible fuel mixture.

(c) REPORT.—Not later than 90 days after the date of enactment of this Act, using funds made available to the Secretary, the Secretary shall prepare and submit to Congress a report describing the results of the study under subsection (b).

SA 1644. Ms. CANTWELL submitted an amendment intended to be proposed to amendment SA 1502 proposed by Mr. REID to the bill H.R. 6, to reduce our Nation's dependency on foreign oil by investing in clean, renewable, and alternative energy resources, promoting new emerging energy technologies, developing greater efficiency, and creating a Strategic Energy Efficiency and Renewables Reserve to invest in alternative energy, and for other purposes; which was ordered to lie on the table; as follows:

On page 141, after line 23, add the following:

SEC. 255. STUDY OF SMART GRID SYSTEM.

(a) IN GENERAL.—The Secretary, acting through the Director of the Office of Electricity Delivery and Energy Reliability (referred to in this section as the ''Secretary''), shall conduct a study to assess the costs and benefits of modernizing the electric transmission and distribution grid (including investments relating to advanced grid technologies).

(b) INPUT FROM OTHER ENTITIES.—

(1) PARTICIPATION.—In conducting the study under subsection (a), the Secretary shall provide to any interested individual or entity an opportunity to participate in the study, including—

(A) consumers of electricity;

(B) manufacturers of components; and

(C) representatives of—

(i) the government of any State;

(ii) the electric utility industry;

(iii) the smart grid system; and

(iv) any electric utility.

(2) CONSIDERATION OF INPUT.—The Secretary may consider the input of any interested individual or entity described in paragraph (1).

(3) AUTHORITY OF SECRETARY.—In conducting the study under subsection (a), the Secretary may require any electric utility to provide to the Secretary any information relating to the deployment of smart grid systems and technologies.

(c) REPORT.—

(1) IN GENERAL.—Not later than 18 months after the date of enactment of this Act, the Secretary shall submit to Congress and the President a report that—

(A) covers the transmission and distribution components of the electric transmission and distribution grid; and

(B) includes—

(i) an updated inventory of smart grid systems in existence as of the date of enactment of this Act;

(ii) a description of—

(I) procedures for—

(aa) monitoring the condition of grid infrastructure; and

(bb) determining the need for new grid infrastructure; and

(II) any plan developed by any State, electric utility, or other individual or entity to introduce any smart grid system or technology;

(iii) an assessment relating to—

(I) any constraint relating to the deployment of smart grid technology;

(II) the potential benefits resulting from the introduction of smart grid systems, including benefits relating to—

(aa) energy efficiency;

(bb) the improved reliability and security of electricity;

(cc) the reduced price of electricity;

(dd) the ability to facilitate real-time electricity pricing; and

(ee) the improved integration of renewable resources; and

(III) the ancillary benefits for any other economic sector or activity outside of the electricity sector; and

(iv) any recommendations for legislative or regulatory changes to remove barriers and create incentives for the implementation of the smart grid system.

(2) BIANNUAL UPDATES.—Not later that 180 days after the date on which the Secretary submits to Congress and the President the report under paragraph (1), and biannually thereafter, the Secretary shall update the report.

SEC. 256. SMART GRID TECHNOLOGY RESEARCH, DEVELOPMENT, AND DEMONSTRATION.

(a) POWER GRID DIGITAL INFORMATION TECHNOLOGY.—The Secretary, in consultation with electric utilities, the States, and other stakeholders, shall carry out a program—

(1) to develop advanced techniques for measuring peak load reductions and energy-efficiency savings from smart metering, demand response, distributed generation, and electricity storage systems;

(2) to investigate means for demand response, distributed generation, and storage to provide ancillary services;

(3) to conduct research to advance the use of wide-area measurement networks, including data mining, visualization, advanced computing, and secure and dependable communications in a highly-distributed environment;

(4) to test new reliability technologies in a grid control room environment against a representative set of local outage and wide area blackout scenarios;

(5) to propose policies to facilitate the transition to real-time electricity pricing based on marginal generation costs;

(6) to develop high-performance computers and algorithms for use in electric transmission system software applications;

(7) to promote the use of underutilized electricity generation capacity in any substitution of electricity for liquid fuels in the transportation system of the United States; and

(8) in consultation with the Federal Energy Regulatory Commission, to propose interconnection protocols to enable electric utilities to access electricity stored in vehicles to help meet peak demand loads.

(b) SMART GRID REGIONAL DEMONSTRATION INITIATIVE.—

(1) IN GENERAL.—The Secretary may establish a smart grid regional demonstration initiative (referred to in this subsection as the ''Initiative'') composed of demonstration projects specifically focused on advanced technologies for use in power grid sensing, communications, analysis, and power flow control.

(2) GOALS.—The goals of the Initiative shall be—

(A) to demonstrate the potential benefits of concentrated investments in advanced grid technologies on a regional grid;

(B) to facilitate the commercial transition from the current power transmission and distribution system technologies to advanced technologies;

(C) to facilitate the integration of advanced technologies in existing electric networks to improve system performance, power flow control, and reliability;

(D) to demonstrate protocols and standards that allow for the measurement and validation of the energy savings and greenhouse gas emission reductions associated with the installation and use of energy efficiency and demand response technologies and practices; and

(E) to investigate differences in each region and regulatory environment.

(3) DEMONSTRATION PROJECTS.—

(A) IN GENERAL.—In carrying out the Initiative, the Secretary shall carry out smart grid demonstration projects in up to 5 electricity control areas, including at least 1 area in which the majority of generation and transmission assets are controlled by a tax-exempt entity.

(B) COOPERATION.—A demonstration project under subparagraph (A) shall be carried out in cooperation with the electric utility that owns the grid facilities in the electricity control area in which the demonstration project is carried out.

(C) FEDERAL SHARE OF COST OF TECHNOLOGY INVESTMENTS.—The Secretary shall provide to an electric utility described in subparagraph (B) financial assistance for use in paying an amount equal to not more than 50 percent of the cost of qualifying advanced grid technology investments made by the electric utility to carry out a demonstration project.

(4) AUTHORIZATION OF APPROPRIATIONS.—There are authorized to be appropriated—

(A) to carry out subsection (a), such sums as are necessary for each of fiscal years 2008 through 2012; and

(B) to carry out subsection (b), $100,000,000 for each of fiscal years 2008 through 2012.

SEC. 257. SMART GRID INTEROPERABILITY FRAMEWORK.

(a) FINDINGS.—Congress finds that—

(1) each element of a digitally interactive electric system needs to easily connect and operate in a safe, dependable manner that enhances the efficient and reliable operation of the overall electric system;

(2) without a framework for integrating electric system resources, information exchange agreements would emerge in an ad hoc manner with great inconsistency from region to region, organization to organization, and application to application; and

(3) ad hoc development would lead to—

(A) slower adoption rates of smart grid technology and applications;

(B) inefficiencies from uncoordinated efforts; and

(C) potential solutions that would stifle supplier competition and technical evolution.

(b) INTEROPERABILITY FRAMEWORK.—The Federal Energy Regulatory Commission (referred to in this section as the ''Commission''), in cooperation with the Secretary, shall coordinate with smart grid stakeholders to develop protocols for the establishment of a flexible framework for the connection of smart grid devices and systems that would align policy, business, and technology approaches in a manner that would enable all electric resources, including demand-side resources, to contribute to an efficient, reliable electricity network that will not—

(1) prevent appliances or other electric loads from properly functioning; and

(2) endanger the health and safety of any consumer of an appliance.

(c) SCOPE OF FRAMEWORK.—The framework developed under subsection (b) shall be designed—

(1) to accommodate traditional, centralized generation and transmission resources and consumer distributed resources, including distributed generation, renewable generation, energy storage, energy efficiency, and demand response and enabling devices and systems;

(2) to be flexible to incorporate—

(A) regional and organizational differences; and

(B) technological innovations; and

(3) to include voluntary standards for certain classes of new mass-produced electric appliances and equipment for homes and businesses that are manufactured with the ability to respond to electric grid emergencies and demand response signals by curtailing all, or a portion of, the electrical power consumed by the appliances or equipment in response to an emergency or demand response signal, including through—

(A) load reduction to reduce total electrical demand;

(B) adjustment of load to provide grid ancillary services; and

(C) in the event of a reliability crisis that threatens an outage, short-term load shedding to help preserve the stability of the grid.

(d) DEVELOPMENT OF FRAMEWORK.—In developing the framework, the Secretary of Commerce, acting through the Director of the National Institute of Standards and Technology shall—

(1) consult with—

(A) sectors of the electricity industry, including sectors relating to the generation, transmission, and distribution of electricity;

(B) end-users of electricity;

(C) the Gridwise Architecture Council, the Institute of Electrical and Electronics Engineers, the Association of Home Appliance Manufacturers, the National Electrical Manufacturers Association, and other electric industry groups; and

(D) any appropriate Federal and State agencies; and

(2) not later than 1 year after the date of enactment of this Act, make the proposed framework available for public review and comment.

SEC. 258. STATE CONSIDERATION OF SMART GRID.

Section 111(d) of the Public Utility Regulatory Policies Act of 1978 (16 U.S.C. 2621(d)) is amended by adding at the end the following:

''(16) FINANCIAL INCENTIVES FOR SMART GRID DEPLOYMENT.—

''(A) IN GENERAL.—Each State shall consider incentives to encourage the rapid national deployment of a qualified smart grid system, including each incentive described in this paragraph.

''(B) DECOUPLING FROM UTILITY REVENUES.—To improve energy efficiency and use, each State shall consider requiring that a major portion of the profits of each electric utility of the State shall—

''(i) be based on criteria relating to—

''(I) performance;

''(II) achievement of designated goals;

''(III) service reliability; and

''(IV) customer support and assistance; and

''(ii) not be based exclusively on the volume of electricity sales of the electric utility.

''(C) CONSIDERATION OF SMART GRID INVESTMENTS.—Each State shall consider requiring that, prior to undertaking investments in nonadvanced grid technologies, an electric utility of the State demonstrate to the State that the electric utility considered an investment in a qualified smart grid system based on appropriate factors, including—

''(i) cost-effectiveness;

''(ii) improved reliability;

''(iii) security; and

''(iv) system performance.

''(D) RATE RECOVERY.—Each State shall consider authorizing each electric utility of the State to recover from ratepayers any capital, operating expenditure, or other costs of the electric utility relating to the deployment of a qualified smart grid system, including a reasonable rate of return on the capital expenditures of the electric utility for the deployment of the qualified smart grid system.

''(E) ENHANCED RETURN.—Each State shall consider authorizing each electric utility of the State to earn an enhanced return on the capital expenditures of the electric utility for the deployment of a qualified smart grid system, including an amount equal to not less than 130 percent of the maximum return that the electric utility is authorized to earn on other investments and expenditures for the transmission and distribution network of the electric utility.

''(F) OBSOLETE EQUIPMENT.—Each State shall consider authorizing any electric utility or other party of the State to deploy a qualified smart grid system to recover in a timely manner the remaining book-value costs of any equipment rendered obsolete by the deployment of the qualified smart grid system, based on the remaining depreciable life of the obsolete equipment.

''(G) RETAINED SAVINGS.—Each State shall consider authorizing any electric utility or other party deploying a qualified smart grid system to retain an amount equal to not less than 50 percent of the cost savings of the electric utility that are attributable to the use by the electric utility of the qualified smart grid system.

''(17) SMART GRID CONSUMER INFORMATION.—

''(A) IN GENERAL.—Each State shall provide to each electricity consumer located in the State direct access, in written and electronic machine-readable form, information describing—

''(i) the time-based use, price, and source of the electricity delivered to the consumer; and

''(ii) any available optional electricity supplies (including the price and quantity of the optional electricity supplies).

''(B) AVAILABILITY.—In providing to each electricity consumer located in a State the information described in subparagraph (A), the State in which the electricity consumer is located shall—

''(i) update the information on an hourly basis; and

''(ii) ensure that the information is available to each electricity consumer on a daily basis.''.

SA 1645. Ms. CANTWELL submitted an amendment intended to be proposed by her to the bill H.R. 6, to reduce our Nation's dependency on foreign oil by investing in clean, renewable, and alternative energy resources, promoting new emerging energy technologies, developing greater efficiency, and creating a Strategic Energy Efficiency and Renewables Reserve to invest in alternative energy, and for other purposes; which was ordered to lie on the table; as follows:

At the appropriate place, insert the following:

SEC. _____. LIMITATION ON RADIO-FREQUENCY INTERFERENCE LEVELS IN THE 902–928 MEGAHERTZ BAND.

(a) FINDINGS.—Congress finds the following:

(1) Unlicensed radio devices are critical to promoting energy efficiency in the United States. This equipment is used by virtually all of the major companies involved in exploration, production, refining, marketing, and transportation of petroleum, petroleum products, and natural gas. Unlicensed devices carry out myriad functions in the Supervisory Control and Data Acquisition (''SCADA'') systems that ensure effective oil and natural gas industry operations and are critical to safety of life and the protection of property and the environment. Systems that rely on these devices remotely operate large production fields, sometimes comprised of thousands of oil and natural gas wells, collect and transmit critical data regarding well pressures, temperature, and rates of flow that are essential to the coordinated and safe operation, and transmit alarms in the event of a leak or other emergency. Similar devices in petroleum and natural gas transmission pipeline operations measure and report flow rate, temperature, and pressure. Energy utilities nationwide use unlicensed systems for remote meter reading, which facilitates time-of-day pricing to spread load and promote energy efficiency, and for SCADA systems that efficiently manage the hugely complex electric grid and gas distribution networks and minimize disruptive outages.

(2) Unlicensed devices in the hundreds of millions likewise serve other critical societal needs, including transportation, manufacturing, education, health care, entertainment, construction, broadband access, retailing, and data processing.

(3) Unlicensed operation in the 902–928 MHz band is a large and essential component of all the benefits identified in paragraphs (1) and (2).

(4) Increased radio-frequency interference in the 902–928 MHz band would impair many industries, and, in particular, would threaten the integrity and safety of energy production and distribution.

(b) PROTECTION OF UNLICENSED OPERATION.—

(1) IN GENERAL.—In issuing or amending any regulations related to the operation, use, and maintenance of the 902–928 megahertz band, the Federal Communications Commission shall not permit increased levels of radio-frequency interference in such band to unlicensed devices and operations.

(2) EXCEPTION.—The limitation under paragraph (1) shall not apply to any regulations issued by the Federal Communications Commissions that directly govern unlicensed operation in the 902–928 megahertz band.

(3) GOAL.—Consistent with paragraphs (1) and (2), the Federal Communications Commission shall endeavor to maximize efficient use of the 902–928 megahertz band.

(c) DEFINITIONS.—In this section:

(1) UNLICENSED DEVICE.—The term ''unlicensed device'' means an intentional radiator authorized pursuant to part 15 of the Federal Communication Commission's Rules (47 C.F.R. Part 15).

(2) UNLICENSED OPERATION.—The term ''unlicensed operation'' means operation of an unlicensed device.

SA 1646. Ms. CANTWELL submitted an amendment intended to be proposed by her to the bill H.R. 6, to reduce our Nation's dependency on foreign oil by investing in clean, renewable, and alternative energy resources, promoting new emerging energy technologies, developing greater efficiency, and creating a Strategic Energy Efficiency and Renewables Reserve to invest in alternative energy, and for other purposes; which was ordered to lie on the table; as follows:

On page 277, between lines 5 and 6, insert the following:

SEC. 521. ONBOARD FUEL ECONOMY INDICATORS AND DEVICES.

(a) IN GENERAL.—Chapter 329 of title 49, United States Code, is amended by adding at the end the following:

''§ 32920. Fuel economy indicators and devices

''(a) IN GENERAL.—The Secretary of Transportation, in consultation with the Administrator of the Environmental Protection Agency, shall prescribe a fuel economy standard for passenger automobiles and light trucks manufactured by a manufacturer in each model year beginning with model year 2012 that requires each such automobile and light truck to be equipped with—

''(1) an onboard electronic instrument that provides real-time and cumulative fuel economy data; and

''(2) an onboard electronic instrument that signals a driver when inadequate tire pressure may be affecting fuel economy.

''(b) EXCEPTION.—Subsection (a) shall not apply to any vehicle that is not subject to an average fuel economy standard under section 32902(b).

''(c) ENFORCEMENT.—Subchapter IV of chapter 301 shall apply to a fuel economy standard prescribed under subsection (a) to the same extent and in the same manner as if that standard were a motor vehicle safety standard under chapter 301.''.

(b) CONFORMING AMENDMENT.—The chapter analysis for chapter 329 of title 49, United States Code, is amended by inserting after the item relating to section 32919 the following:

''32920. Fuel economy indicators and devices.''.

SA 1647. Mrs. CLINTON (for herself, Mr. SANDERS, Mr. LEAHY, and Ms. CANTWELL) submitted an amendment intended to be proposed to amendment SA 1502 proposed by Mr. REID to the bill H.R. 6, to reduce our Nation's dependency on foreign oil by investing in clean, renewable, and alternative energy resources, promoting new emerging energy technologies, developing greater efficiency, and creating a Strategic Energy Efficiency and Renewables Reserve to invest in alternative energy, and for other purposes; which was ordered to lie on the table; as follows:

At the end of subtitle F of title II, add the following:

SEC. 279. NET METERING AND INTERCONNECTION STANDARDS.

(a) IN GENERAL.—Section 113 of the Public Utility Regulatory Policies Act of 1978 (16 U.S.C. 2623) is amended by adding at the end the following:

''(d) NET METERING.—

''(1) DEFINITIONS.—In this subsection and subsection (e):

''(A) CUSTOMER-GENERATOR.—The term 'customer-generator' means the owner or operator of a qualified generation unit.

''(B) ELECTRIC GENERATION UNIT.—The term 'electric generation unit' means—

''(i) a qualified generation unit; and

''(ii) any electric generation unit that qualifies for net metering under a net metering tariff or rule approved by a State.

''(C) LOCAL DISTRIBUTION SYSTEM.—The term 'local distribution system' means any system for the distribution of electric energy to the ultimate consumer of the electricity, whether or not the owner or operator of the system is a retail electric supplier.

''(D) NET METERING.—The term 'net metering' means the process of—

''(i) measuring the difference between the electricity supplied to a customer-generator and the electricity generated by the customer-generator that is delivered to a local distribution system at the same point of interconnection during an applicable billing period; and

''(ii) providing an energy credit to the customer-generator in the form of a kilowatt-hour credit for each kilowatt-hour of energy produced by the customer-generator from a qualified generation unit.

''(E) QUALIFIED GENERATION UNIT.—The term 'qualified generation unit' means an electric energy generation unit that—

''(i) is a fuel cell or uses as the energy source of the unit solar energy, wind, biomass, geothermal energy, anaerobic digestion, or landfill gas, or a combination of the any of those sources;

''(ii) has a generating capacity of not more than 2,000 kilowatts;

''(iii) is located on premises that are owned, operated, leased, or otherwise controlled by the customer-generator;

''(iv) operates in parallel with the retail electric supplier; and

''(v) is intended primarily to offset all or part of the requirements of the customer-generator for electric energy.

''(F) RETAIL ELECTRIC SUPPLIER.—The term 'retail electric supplier' means any electric utility that sells electric energy to the ultimate consumer of the energy.

''(2) ADOPTION.—Not later than 1 year after the date of enactment of this subsection, each State regulatory authority (with respect to each electric utility for which the State regulatory authority has ratemaking authority), and each nonregulated electric utility, shall—

''(A) provide public notice and conduct a hearing with respect to the standards established under paragraph (3); and

''(B) on the basis of the hearing, adopt the standard.

''(3) ESTABLISHMENT OF NET METERING STANDARD.—

''(A) IN GENERAL.—Each retail electric supplier shall offer to arrange (either directly or

through a local distribution company or other third party) to make net metering available, on a first-come, first-served basis, to each of the retail customers of the retail electric supplier in accordance with the requirements described in subparagraph (B) and other provisions of this subsection.

''(B) REQUIREMENTS.—The requirements referred to in subparagraph (A) are, with respect to a retail electric supplier, that—

''(i) rates and charges and contract terms and conditions for the sale of electric energy to customer-generators shall be the same as the rates and charges and contract terms and conditions that would be applicable if the customer-generator did not own or operate a qualified generation unit and use a net metering system; and

''(ii) each retail electric supplier shall notify all of the retail customers of the retail electric supplier of the standard established under this paragraph as soon as practicable after the adoption of the standard.

''(4) NET ENERGY MEASUREMENT.—

''(A) IN GENERAL.—Each retail electric supplier shall arrange to provide to customer-generators who qualify for net metering under subsection (b) an electrical energy meter capable of net metering and measuring, to the maximum extent practicable, the flow of electricity to or from the customer, using a single meter and single register.

''(B) IMPRACTICABILITY.—In a case in which it is not practicable to provide a meter to a customer-generator under subparagraph (A), a retail electric supplier (either directly or through a local distribution company or other third party) shall, at the expense of the retail electric supplier, install 1 or more of those electric energy meters for the customer-generators concerned.

''(5) BILLING.—

''(A) IN GENERAL.—Each retail electric supplier subject to subsection (b) shall calculate the electric energy consumption for a customer using a net metering system in accordance with subparagraphs (B) through (D).

''(B) MEASUREMENT OF ELECTRICITY.—The retail electric supplier shall measure the net electricity produced or consumed during the billing period using the metering installed in accordance with paragraph (4).

''(C) BILLING AND CREDITING.—

''(i) BILLING.—If the electricity supplied by the retail electric supplier exceeds the electricity generated by the customer-generator during the billing period, the customer-generator shall be billed for the net electric energy supplied by the retail electric supplier in accordance with normal billing practices.

''(ii) CREDITING.—

''(I) IN GENERAL.—If electric energy generated by the customer-generator exceeds the electric energy supplied by the retail electric supplier during the billing period, the customer-generator shall be billed for the appropriate customer charges for that billing period and credited for the excess electric energy generated during the billing period, with the credit appearing as a kilowatt-hour credit on the bill for the following billing period.

''(II) APPLICATION OF CREDITS.—Any kilowatt-hour credits provided to a customer-generator under this clause shall be applied to customer-generator electric energy consumption on the following billing period bill (except for a billing period that ends in the next calendar year).

''(III) CARRYOVER OF UNUSED CREDITS.—At the beginning of each calendar year, any unused kilowatt-hour credits remaining from the preceding year will carry over to the new year.

''(D) USE OF TIME-DIFFERENTIATED RATES.—

''(i) IN GENERAL.—Except as provided in clause (ii), if a customer-generator is using a meter and retail billing arrangement that has time-differentiated rates—

''(I) the kilowatt-hour credit shall be based on the ratio representing the difference in retail rates for each time-of-use rate; or

''(II) the credits shall be reflected on the bill of the customer-generator as a monetary credit reflecting retail rates at the time of generation of the electric energy by the customer-generator.

''(ii) DIFFERENT TARIFFS OR SERVICES.—A retail electric supplier shall offer a customer-generator the choice of a time-differentiated energy tariff rate or a nontime-differentiated energy tariff rate, if the retail electric supplier offers the choice to customers in the same rate class as the customer-generator.

''(6) PERCENT LIMITATIONS.—

''(A) 4 PERCENT LIMITATION.—The standard established under this subsection shall not apply for a calendar year in the case of a customer-generator served by a local distribution company if the total generating capacity of all customer-generators with net metering systems served by the local distribution company in the calendar year is equal to or more than 4 percent of the capacity necessary to meet the average forecasted aggregate customer peak demand of the company for the calendar year.

''(B) 2 PERCENT LIMITATION.—The standard established under this subsection shall not apply for a calendar year in the case of a customer-generator served by a local distribution company if the total generating capacity of all customer-generators with net metering systems served by the local distribution company in the calendar year using a single type of qualified generation units (as described in paragraph (1)(D)(i)) is equal to or more than 2 percent of the capacity necessary to meet the average forecasted aggregate customer peak demand of the company for the calendar year.

''(C) RECORDS AND NOTICE.—

''(i) RECORDS.—Each retail electric supplier shall maintain, and make available to the public, records of—

''(I) the total generating capacity of customer-generators of the system of the retail electric supplier that are using net metering; and

''(II) the type of generating systems and energy source used by the electric generating systems used by the customer-generators.

''(ii) NOTICE.—Each such retail electric supplier shall notify the State regulatory authority and the Commission at each time at which the total generating capacity of the customer-generators of the retail electric supplier reaches a level that equals or exceeds—

''(I) 75 percent of the limitation specified in subparagraph (B); or

''(II) the limitation specified in subparagraph (B).

''(7) OWNERSHIP OF CREDITS.—

''(A) IN GENERAL.—For purposes of Federal and State laws providing renewable energy credits or greenhouse gas credits, a customer-generator with a qualified generation unit and net metering shall be treated as owning and having title to the renewable energy attributes, renewable energy credits and greenhouse gas emission credits relating to any electricity produced by the qualified generation unit.

''(B) RETAIL ELECTRIC SUPPLIERS.—No retail electric supplier shall claim title to or ownership of any renewable energy attributes, renewable energy credits, or greenhouse gas emission credits of a customer-generator as a result of interconnecting the customer-generator or providing or offering the customer-generator net metering.

''(8) SAFETY AND PERFORMANCE STANDARDS.—

''(A) IN GENERAL.—A qualified generation unit and net metering system used by a customer-generator shall meet all applicable safety and performance and reliability standards established by—

''(i) the national electrical code;

''(ii) the Institute of Electrical and Electronics Engineers;

''(iii) Underwriters Laboratories; or

''(iv) the American National Standards Institute.

''(B) ADDITIONAL CHARGES.—The Commission shall, after consultation with State regulatory authorities and nonregulated local distribution systems and after notice and opportunity for comment, prohibit by regulation the imposition of additional charges by retail electric suppliers and local distribution systems for equipment or services for safety or performance that are in addition to those necessary to meet the standards and requirements referred to in subparagraph (A) and subsection (e).

''(9) DETERMINATION OF COMPLIANCE.—

''(A) IN GENERAL.—Any State regulatory authority (with respect to each electric utility for which the authority has ratemaking authority), and each nonregulated electric utility, may apply to the Commission for a determination that any State net metering requirement or regulations complies with this subsection.

''(B) ORDERS.—In the absence of a determination under subparagraph (A), the Commission, on the motion of the Commission or pursuant to the petition of any interested person, may, after notice and opportunity for a hearing on the record, issue an order requiring against any retail electric supplier or local distribution company to require compliance with this subsection.

''(C) PENALTIES.—

''(i) IN GENERAL.—Any person who violates this subsection or any order of the Commission under this subsection shall be subject to a civil penalty in the amount of $10,000 for each day that the violation continues.

''(ii) ASSESSMENT.—The penalty may be assessed by the Commission, after notice and opportunity for hearing, in the same manner as penalties are assessed under section 31(d) of the Federal Power Act (16 U.S.C. 823b(d)).

''(e) INTERCONNECTION STANDARDS.—

''(1) MODEL STANDARDS.—

''(A) IN GENERAL.—Not later than 1 year after the date of enactment of this subsection, the Commission shall publish model standards for the physical connection between local distribution systems and qualified generation units and electric generation units that—

''(i) are qualified generation units (as defined in subsection (d)(1)(D) (other than clause (ii) of subsection (d)(1)(D)); and

''(ii) do not exceed 2,000 kilowatts of capacity.

''(B) PURPOSES.—The model standards shall be designed to—

''(i) encourage the use of qualified generation units; and

''(ii) ensure the safety and reliability of the qualified generation units and the local distribution systems interconnected with the qualified generation units.

''(C) EXPEDITED PROCEDURES.—

''(i) IN GENERAL.—The model standards shall have 2 separate expedited procedures, including—

''(I) a standard for interconnecting qualified generation units of not more than 15 kilowatts; and

''(II) a separate standard that expedites interconnection for qualified generation units of more than 15 kilowatts but not more than 2,000 kilowatts.

''(ii) BEST PRACTICES.—The expedited procedures shall be based on the best practices that have been used in States that have adopted interconnection standards.

''(iii) MODEL RULE.—In designing the expedited procedures, the Commission shall consider Interstate Renewable Energy Council Model Rule MR–I2005.

''(D) ADOPTION OF STANDARDS.—

''(i) IN GENERAL.—Not later than 2 years after the date of enactment of this subsection, each State shall—

''(I) adopt the model standards established under this paragraph, with or without modification; and

''(II) submit the standards to the Commission for approval.

''(ii) APPROVAL OF MODIFICATION.—The Commission shall approve a modification of the model standards only if the Commission determines that the modification is—

''(I) consistent with or superior to the purpose of the standards; and

''(II) required by reason of local conditions.

''(E) NONAPPROVAL OF STANDARDS FOR A STATE.—If standards have not been approved under this paragraph by the Commission for any State during the 2-year period beginning on the date of enactment of this subsection, the Commission shall, by rule or order, enforce the model standards of the Commission in the State until such time as State standards are approved by the Commission.

''(F) UPDATES.—

''(i) IN GENERAL.—Not later than 2 years after the date of enactment of this subsection and after notice and opportunity for comment, the Commission shall publish an update of the model standards, after considering changes in the underlying standards and technologies.

''(ii) AVAILABILITY.—The updates shall be made available to State regulatory authorities for the consideration of the authorities.

''(2) SAFETY, RELIABILITY, PERFORMANCE, AND COST.—

''(A) IN GENERAL.—The standards under this subsection shall establish such measures for the safety and reliability of the affected equipment and local distribution systems as are appropriate.

''(B) ADMINISTRATION.—The standards shall—

''(i) be consistent with all applicable safety and performance standards established by—

''(I) the national electrical code;

''(II) the Institute of Electrical and Electronics Engineers;

''(III) Underwriters Laboratories; or

''(IV) the American National Standards Institute; and

''(ii) impose not more than such minimum cost and technical burdens to the interconnecting customer generator as the Commission determines, by rule, are practicable.

''(3) ADDITIONAL CHARGES.—The model standards under this subsection shall prohibit the imposition of additional charges by local distribution systems for equipment or services for interconnection that are in excess of—

''(A) the charges necessary to meet the standards; and

''(B) the charges and equipment requirements identified in the best practices of States with interconnection standards.

''(4) RELATIONSHIP TO EXISTING LAW REGARDING INTERCONNECTION.—Nothing in this subsection affects the application of section 111(d)(15) relating to interconnection.

''(5) CONSUMER-FRIENDLY CONTRACTS.—

''(A) IN GENERAL.—The Commission shall—

''(i) promulgate regulations that ensure that simplified contracts will be used for the interconnection of electric energy by electric energy transmission or local distribution systems and generating facilities that have a power production capacity of not greater than 2,000 kilowatts; and

''(ii) consider the best practices for consumer-friendly contracts that are used by States or national associations of State regulators.

''(B) LIABILITY OR INSURANCE.—The contracts shall not require liability or other insurance in excess of the liability or insurance that is typically carried by customer-generators for general liability.

''(6) ENFORCEMENT.—

''(A) IN GENERAL.—Any person who violates this subsection shall be subject to a civil penalty in the amount of $10,000 for each day that the violation continues.

''(B) ASSESSMENT.—The penalty may be assessed by the Commission, after notice and opportunity for hearing, in the same manner as penalties are assessed under section 31(d) of the Federal Power Act (16 U.S.C. 823b(d)).''.

(b) CONFORMING AMENDMENT.—Section 1262 of the Public Utility Holding Company Act of 2005 (42 U.S.C. 16451) is amended by striking paragraph (5) and inserting the following:

''(5) ELECTRIC UTILITY COMPANY.—

''(A) IN GENERAL.—The term 'electric utility company' means any company that owns or operates facilities used for the generation, transmission, or distribution of electric energy for sale.

''(B) EXCLUSION.—The term 'electric utility company' does not include an electric generation unit (as defined in section 113(d) of the Public Utility Regulatory Policies Act of 1978).''.

SEC. 280. RELATIONSHIP TO STATE LAW.

Section 117(b) of the Public Utility Regulatory Policies Act of 1978 (16 U.S.C. 2627(b)) is amended—

(1) by striking ''Nothing'' and inserting the following:

''(1) IN GENERAL.—Except as provided in paragraph (2), nothing''; and

(2) by adding at the end the following:

''(2) NET METERING AND INTERCONNECTION STANDARDS.—

''(A) IN GENERAL.—Subject to subparagraph (B), no State or nonregulated utility may adopt or enforce any standard or requirement concerning net metering or interconnection that restricts access to the electric power transmission or local distribution system by qualified generators beyond those standards and requirements established under section 113.

''(B) EQUIVALENT OR GREATER ACCESS.—Nothing in this Act precludes a State from adopting or enforcing incentives or requirements to encourage qualified generation and net metering that—

''(i) are in addition to or equivalent to incentives or requirements under section 113; or

''(ii) afford greater access to the electric power transmission and local distribution systems by qualified generators (as defined in section 113) or afford greater compensation or credit for electricity generated by the qualified generators.''.

SA 1648. Mr. WYDEN (for himself, Mr. HARKIN, Ms. LANDRIEU, and Mr. SALAZAR) submitted an amendment intended to be proposed to amendment SA 1502 proposed by Mr. REID to the bill H.R. 6, to reduce our Nation's dependency on foreign oil by investing in clean, renewable, and alternative energy resources, promoting new emerging energy technologies, developing greater efficiency, and creating a Strategic Energy Efficiency and Renewables Reserve to invest in alternative energy, and for other purposes; which was ordered to lie on the table; as follows:

On page 192, after line 21, add the following:

SEC. 305. ASSESSMENT OF CARBON SEQUESTRATION AND METHANE AND NITROUS OXIDE EMISSIONS FROM TERRESTRIAL ECOSYSTEMS.

(a) DEFINITIONS.—In this section:

(1) ADAPTATION STRATEGY.—The term ''adaptation strategy'' means a land use and management strategy that can be used to increase the sequestration capabilities of any terrestrial ecosystem.

(2) ASSESSMENT.—The term ''assessment'' means the national assessment authorized under subsection (b).

(3) COVERED GREENHOUSE GAS.—The term ''covered greenhouse gas'' means carbon dioxide, nitrous oxide, and methane gas.

(4) NATIVE PLANT SPECIES.—The term ''native plant species'' means any noninvasive, naturally occurring plant species within a terrestrial ecosystem.

(5) SECRETARY.—The term ''Secretary'' means the Secretary of Agriculture.

(6) TERRESTRIAL ECOSYSTEM.—

(A) IN GENERAL.—The term ''terrestrial ecosystem'' means any ecological and surficial geological system on public or private land.

(B) INCLUSIONS.—The term ''terrestrial ecosystem'' includes—

(i) agricultural land;

(ii) forest land;

(iii) grassland;

(iv) freshwater aquatic ecosystems; and

(v) coastal ecosystems (including estuaries).

(b) AUTHORIZATION OF ASSESSMENT.—Not later than 2 years after the date on which the final methodology is published under subsection (f)(3)(D), the Secretary shall complete a national assessment of—

(1) the quantity of carbon stored in and released from terrestrial ecosystems; and

(2) the annual flux of covered greenhouse gases in and out of terrestrial ecosystems.

(c) COMPONENTS.—In conducting the assessment under subsection (b), the Secretary shall—

(1) determine the processes that control the flux of covered greenhouse gases in and out of each terrestrial ecosystem;

(2) estimate the technical and economic potential for increasing carbon sequestration in natural and managed terrestrial ecosystems through management activities or restoration activities in each terrestrial ecosystem;

(3) develop near-term and long-term adaptation strategies or mitigation strategies that can be employed—

(A) to enhance the sequestration of carbon in each terrestrial ecosystem;

(B) to reduce emissions of covered greenhouse gases; and

(C) to adapt to climate change; and

(4) estimate annual carbon sequestration capacity of terrestrial ecosystems under a range of policies in support of management activities to optimize sequestration.

(d) USE OF NATIVE PLANT SPECIES.—In developing restoration activities under subsection (c)(2) and management strategies and adaptation strategies under subsection (c)(3), the Secretary shall emphasize the use of native plant species (including mixtures of many native plant species) for sequestering covered greenhouse gas in each terrestrial ecosystem.

(e) CONSULTATION.—In conducting the assessment under subsection (b) and developing the methodology under subsection (f), the Secretary shall consult with—

(1) the Secretary of Energy;

(2) the Secretary of the Interior;

(3) the Administrator of the Environmental Protection Agency;

(4) the Administrator of the National Oceanic and Atmospheric Administration;

(5) the heads of other relevant agencies;

(6) consortia based at institutions of higher education and with research corporations; and

(7) representatives of agricultural producers and forest and grassland managers.

(f) METHODOLOGY.—

(1) IN GENERAL.—Not later than 1 year after the date of enactment of this Act, the Secretary shall develop a methodology for conducting the assessment.

(2) REQUIREMENTS.—The methodology developed under paragraph (1)—

(A) shall—

(i) determine the method for measuring, monitoring, quantifying, and monetizing covered greenhouse gas emissions and reductions, including methods for allocating and managing offsets or credits; and

(ii) estimate the total capacity of each terrestrial ecosystem to—

(I) sequester carbon; and

(II) reduce emissions of covered greenhouse gases; and

(B) may employ economic and other systems models, analyses, and estimations, to be developed in consultation with each of the individuals described in subsection (e).

(3) EXTERNAL REVIEW AND PUBLICATION.—On completion of a proposed methodology, the Secretary shall—

(A) publish the proposed methodology;

(B) at least 60 days before the date on which the final methodology is published, solicit comments from—

(i) the public; and

(ii) heads of affected Federal and State agencies;

(C) establish a panel to review the proposed methodology published under subparagraph (A) and any comments received under subparagraph (B), to be composed of members—

(i) with expertise in the matters described in subsections (c) and (d); and

(ii) that are, as appropriate, representatives of Federal agencies, institutions of higher education, nongovernmental organizations, State organizations, industry, and international organizations; and

(D) on completion of the review under subparagraph (C), publish in the Federal register the revised final methodology.

(g) ESTIMATE; REVIEW.—The Secretary shall—

(1) based on the assessment, prescribe the data, information, and analysis needed to establish a scientifically sound estimate of—

(A) the carbon sequestration capacity of relevant terrestrial ecosystems;

(B) a national inventory of covered greenhouse gas sources that is consistent with the inventory prepared by the Environmental Protection Agency entitled the ''Inventory of U.S. Greenhouse Gas Emissions and Sinks: 1990–2005''; and

(C) the willingness of covered greenhouse gas emitters to pay to sequester the covered greenhouse gases emitted by the applicable emitters in designated terrestrial ecosystems; and

(2) not later than 180 days after the date on which the assessment is completed, submit to the heads of applicable Federal agencies and the appropriate committees of Congress a report that describes the results of the assessment.

(h) DATA AND REPORT AVAILABILITY.—On completion of the assessment, the Secretary shall incorporate the results of the assessment into a web-accessible database for public use.

(i) AUTHORIZATION OF APPROPRIATIONS.—There is authorized to be appropriated to carry out this section $5,000,000 for each of the 3 years following the date of enactment of this Act.

SA 1649. Mr. REED submitted an amendment intended to be proposed to amendment SA 1502 proposed by Mr. REID to the bill H.R. 6, to reduce our Nation's dependency on foreign oil by investing in clean, renewable, and alternative energy resources, promoting new emerging energy technologies, developing greater efficiency, and creating a Strategic Energy Efficiency and Renewables Reserve to invest in alternative energy, and for other purposes; which was ordered to lie on the table; as follows:

At the end of subtitle B of title I, add the following:

SEC. 131. ENERGY EFFICIENCY RESIDENTIAL GUARANTEES.

Section 1703 of the Energy Policy Act of 2005 (42 U.S.C. 16513) (as amended by section 124(a)) is amended—

(1) in subsection (b), by adding at the end the following:

''(11) Energy efficiency residential financing guarantees provided under subsection (g).''; and

(2) by adding at the end the following:

''(g) ENERGY EFFICIENCY RESIDENTIAL GUARANTEES.—

''(1) IN GENERAL.—The Secretary shall make guarantees under this section for single and multifamily mortgage bonds and related financing for energy efficiency purposes.

''(2) PURPOSES.—The Secretary shall make a guarantee under this subsection only for—

''(A) bonds and related financing issued by State housing and energy agencies; or

''(B) debt financing for energy efficiency measures in new or existing housing supported by Federal financial assistance programs (including the low-income housing credits under section 42 of the Internal Revenue Code of 1986 and project-based rental housing assistance under section 8(o)(13) of the United States Housing Act of 1937 (42 U.S.C. 1437f(o)(13)) under which energy efficiency projects are approved jointly by State housing finance and energy agencies.

''(3) CRITERIA.—Not later than 90 days after the date of enactment of this subsection, the Secretary (in consultation with State housing finance, energy, weatherization and public utility commissioners) shall promulgate regulations establishing criteria for energy efficiency projects eligible for guarantees under this subsection.

''(4) ADMINISTRATION.—Subsections (a)(2) and (d) shall not apply to a guarantee made under this subsection.''.

SA 1650. Mr. REED submitted an amendment intended to be proposed to amendment SA 1502 proposed by Mr. REID to the bill H.R. 6, to reduce our Nation's dependency on foreign oil by investing in clean, renewable, and alternative energy resources, promoting new emerging energy technologies, developing greater efficiency, and creating a Strategic Energy Efficiency and Renewables Reserve to invest in alternative energy, and for other purposes; which was ordered to lie on the table; as follows:

At the appropriate place, insert the following:

SEC. ___. PUBLIC HOUSING CAPITAL FUND.

Section 9(e)(2)(C) of the United States Housing Act of 1937 (42 U.S.C. 1437g(e)(2)(C)) is amended by adding at the end the following:

''(iv) EXISTING CONTRACTS.—The term of a contract described in clause (i) that, as of the date of enactment of this clause, is in repayment and has a term of not more than 12 years, may be extended to a term of not more than 20 years to permit additional energy conservation improvements without requiring the reprocurement of energy performance contractors.''.

SA 1651. Mrs. MCCASKILL submitted an amendment intended to be proposed to amendment SA 1502 proposed by Mr. REID to the bill H.R. 6, to reduce our Nation's dependency on foreign oil by investing in clean, renewable, and alternative energy resources, promoting new emerging energy technologies, developing greater efficiency, and creating a Strategic Energy Efficiency and Renewables Reserve to invest in alternative energy, and for other purposes; which was ordered to lie on the table; as follows:

At the appropriate place, insert the following:

Subtitle ___—Retail Fuel Fairness

SEC. ___1. SHORT TITLE.

This subtitle may be cited as the ''Future Accountability in Retail Fuel Act'' or the ''FAIR Fuel Act''.

SEC. ___2. AUTOMATIC TEMPERATURE COMPENSATION EQUIPMENT.

(a) IN GENERAL.—

(1) NEW MOTOR FUEL DISPENSERS.—Beginning 90 days after the issuance of final regulations under subsection (c), all motor fuel dispensers that are newly installed or upgraded at any retail fuel establishment in the United States shall be equipped with automatic temperature compensation equipment to ensure that any volume of gasoline or diesel fuel measured by such dispenser for retail sale is equal to the volume that such quantity of fuel would equal at the time of such sale if the temperature of the fuel was 60 degrees Fahrenheit.

(2) EXISTING MOTOR FUEL DISPENSERS.—Not later than 5 years after the issuance of final regulations under subsection (c), all motor fuel dispensers at any retail fuel establishment in the United States shall be equipped with the automatic temperature compensation equipment described in paragraph (1).

(b) INSPECTIONS.—

(1) ANNUAL INSPECTION.—Beginning on the date described in subsection (a), State inspectors conducting an initial or annual inspection of motor fuel dispensers are authorized to determine if such dispensers are equipped with the automatic temperature compensation equipment required under subsection (a).

(2) NOTIFICATION.—If the State inspector determines that a motor fuel dispenser does not comply with the requirement under subsection (a), the State inspector is authorized to notify the Secretary of Commerce, through an electronic notification system developed by the Secretary, of such noncompliance.

(3) FOLLOW-UP INSPECTION.—Not earlier than 180 days after a motor fuel dispenser is found to be out of compliance with the requirement under subsection (a), the Secretary shall coordinate a follow-up inspection of such motor fuel dispenser.

(4) FINE.—

(A) IN GENERAL.—The owner or operator of any retail fuel establishment with a motor fuel dispenser subject to the requirement under subsection (a) that is determined to be out of compliance with such requirement shall be subject to a fine equal to $5,000 for each noncompliant motor fuel dispenser.

(B) ADDITIONAL FINE.—If a motor fuel dispenser is determined to be out of compliance during a follow-up inspection, the owner or operator of the retail fuel establishment at which such motor fuel dispenser is located shall be subject to an additional fine equal to $5,000.

(5) USE OF FINES.—Amounts collected under paragraph (4) may be used to carry out section ___3.

(c) RULEMAKING.—

(1) COMMENCEMENT.—Not later than 90 days after the date of the enactment of this Act, the Secretary of Commerce shall commence a rulemaking procedure to implement the requirement under subsection (a).

(2) FINAL REGULATIONS.—Not later than 1 year after the date of the enactment of this Act, the Secretary of Commerce shall issue final regulations to implement the requirement under subsection (a), including specifying which volume correction factor tables shall be used for the range of gasoline and diesel fuel products that are sold to retail customers in the United States.

(d) DEFINED TERM.—In this subtitle, the term ''automatic temperature compensation equipment'' has the meaning given the term in the National Institute of Standards and Technology Handbook 44.

SEC. ___3. AUTOMATIC TEMPERATURE COMPENSATION EQUIPMENT GRANT PROGRAM.

(a) GRANTS AUTHORIZED.—

(1) IN GENERAL.—The Secretary of Commerce is authorized to award grants to owners and operators of retail fuel establishments to offset the costs associated with the installation of automatic temperature compensation equipment on motor fuel dispensers.

(2) MAXIMUM AMOUNT.—The Secretary may not award a grant under this subsection in excess of—

(A) $1,000 per motor fuel dispenser; or

(B) $10,000 per grant recipient.

(3) INELIGIBLE COMPANIES.—A major integrated oil company (as defined in section 167(h)(5) of the Internal Revenue Code of 1986) is ineligible to receive a grant under this subsection.

(4) USE OF GRANT FUNDS.—Grant funds received under this subsection may be used to offset the costs incurred by owners and operators of retail establishments to acquire and install automatic temperature compensation equipment in accordance with the requirement under section ___2(a).

(b) REIMBURSEMENT OF STATE INSPECTION COSTS.—The Secretary of Commerce is authorized to reimburse States for the costs incurred by the States to—

(1) inspect motor fuel dispensers for compliance with the requirement under section ___2(a); and

(2) notify the Secretary of Commerce of any noncompliance with such requirement.

SEC. ___4. SAVINGS PROVISION.

(a) IN GENERAL.—Nothing in this subtitle may be construed to preempt a State from enacting a law that imposes an equivalent standard or a more stringent standard concerning the retail sale of gasoline at certain temperatures.

(b) DEFINED TERM.—In this section, the term ''equivalent standard'' means any standard that prohibits the retail sale of gasoline with energy content per gallon that is different than the energy content of 1 gallon of gasoline stored at 60 degrees Fahrenheit.

SEC. ___5. AUTHORIZATION OF APPROPRIATIONS.

There are authorized to be appropriated such sums as may be necessary to carry out this subtitle.

SA 1652. Mr. HAGEL (for himself and Mr. MENENDEZ) submitted an amendment intended to be proposed to amendment SA 1502 proposed by Mr. REID to the bill H.R. 6, to reduce our Nation's dependency on foreign oil by investing in clean, renewable, and alternative energy resources, promoting new emerging energy technologies, developing greater efficiency, and creating a Strategic Energy Efficiency and Renewables Reserve to invest in alternative energy, and for other purposes; which was ordered to lie on the table; as follows:

At the end of subtitle F of title II, add the following:

SEC. 2___. TRAFFIC SIGNAL COORDINATION.

(a) IN GENERAL.—Of funds made available to carry out this Act, the Secretary shall use not less than $2,000,000 to carry out, through the Clean Cities Program established under sections 404, 409, and 505 of the Energy Policy Act of 1992 (42 U.S.C. 13231, 13235, 13256), a program for traffic signal coordination.

(b) REQUIREMENT.—The Secretary shall ensure that any activity under the program under subsection (a) shall be carried out by a certified civil engineer with experience relating to traffic patterns, signals, and congestion.

(c) ACTION BY STATE AND LOCAL GOVERNMENTS.—

(1) REPORT.—Each unit of State or local government that receives funds from the Secretary to carry out an activity under the program under subsection (a) shall submit to the Secretary a report describing the quantity of fuel savings of the State as a result of the activity—

(A) by not later than 3 years after the date on which the State receives the funds; and

(B) every 3 years thereafter.

(2) TREATMENT OF EMISSION REDUCTIONS.—Any emission reductions due to fuel savings in a State as a result of an activity under the program under subsection (a) shall be taken into account with respect to the State implementation plan of the State under the Clean Air Act (42 U.S.C. 7401 et seq.), regardless of whether the activity is part of a transportation implementation plan of the State.

SA 1653. Mr. HAGEL submitted an amendment intended to be proposed to amendment SA 1502 proposed by Mr. REID to the bill H.R. 6, to reduce our Nation's dependency on foreign oil by investing in clean, renewable, and alternative energy resources, promoting new emerging energy technologies, developing greater efficiency, and creating a Strategic Energy Efficiency and Renewables Reserve to invest in alternative energy, and for other purposes; which was ordered to lie on the table; as follows:

On page 192, after line 21, add the following:

SEC. 305. STUDY OF INDUSTRIAL APPLICATIONS OF CARBON DIOXIDE.

The Secretary shall offer to enter into a contract with the National Academy of Sciences under which the National Academy of Sciences shall conduct a study of uses (including industrial applications) for captured carbon dioxide, other than sequestration, enhanced oil recovery, or carbon trading.

SA 1654. Mr. HAGEL submitted an amendment intended to be proposed to amendment SA 1502 proposed by Mr. REID to the bill H.R. 6, to reduce our Nation's dependency on foreign oil by investing in clean, renewable, and alternative energy resources, promoting new emerging energy technologies, developing greater efficiency, and creating a Strategic Energy Efficiency and Renewables Reserve to invest in alternative energy, and for other purposes; which was ordered to lie on the table; as follows:

On page 47, after line 23, add the following:

SEC. 131. COAL-TO-LIQUID AND GAS-TO-LIQUID TECHNOLOGIES.

(a) FINDINGS.—Congress finds that—

(1) coal-to-liquid and gas-to-liquid technologies are mature, known technologies that are used around the world;

(2) with sizable coal reserves, the United States is ideally suited for the use of coal-to-liquid and gas-to-liquid technologies to produce alternatives for petroleum products; and

(3) it is in the best interest of the national security of the United States to develop and commercialize a synthetic fuels industry.

(b) COAL-TO-LIQUID AND GAS-TO-LIQUID FACILITIES LOAN GUARANTEE PROGRAM.—

(1) AMOUNT.—Section 1702(c) of the Energy Policy Act of 2005 (42 U.S.C. 16512(c)) is amended—

(A) by striking ''Unless'' and inserting the following:

''(1) IN GENERAL.—Except as provided in paragraph (2), unless''; and

(B) by adding at the end the following:

''(2) EXCEPTION.—The amount of a loan guarantee provided under this title for a project described in section 1703(b)(11) shall be not more than the lesser of—

''(A) 50 percent of the project cost of the facility that is the subject of the guarantee, as estimated at the time at which the guarantee is issued; or

''(B) $100,000,000.''.

(2) ELIGIBLE PROJECTS.—Section 1703(b) of the Energy Policy Act of 2005 (42 U.S.C.

16513(b)) is amended by adding at the end the following:

''(11) Coal-to-liquid and gas-to-liquid facilities that produce not less than 150,000,000 gallons of liquid transportation fuel per year.''.

(3) AUTHORIZATION OF APPROPRIATIONS.—Section 1704 of the Energy Policy Act of 2005 (42 U.S.C. 16514) is amended by adding at the end the following:

''(c) COAL-TO-LIQUID AND GAS-TO-LIQUID PROJECTS.—There are authorized to be appropriated such sums as are necessary to provide the cost of guarantees for projects involving coal-to-liquid and gas-to-liquid facilities under section 1703(b)(11).''.

(c) DEPARTMENT OF DEFENSE REQUIREMENTS FOR UTILIZATION OF COAL-TO-LIQUID OR GAS-TO-LIQUID FUEL IN MILITARY AIRCRAFT.—

(1) IN GENERAL.—Subchapter II of chapter 134 of title 10, United States Code, is amended by adding at the end the following new section:

''§ 2263. Fuel: minimum requirements for utilization of coal-to-liquid or gas-to-liquid fuel

''(a) IN GENERAL.—Of the total amount of fuel utilized by the Department of Defense in a calendar year, the percentage of such fuel that is coal-to-liquid fuel, gas-to-liquid fuel, or both shall be the percentage as follows:

''(1) In the first applicable utilization year, 5 percent.

''(2) Except as provided in subsection (c), in any year after the first applicable utilization year, a percentage that is 5 greater than the percentage of utilization in the preceding year under this section.

''(b) FIRST APPLICABLE UTILIZATION YEAR.—For purposes of subsection (a)(1), the first applicable utilization year for coal-to-liquid fuel and gas-to-liquid fuel shall be the earlier of the following:

''(1) The first calendar year after the Secretary Defense certifies to Congress that at least 50 percent of the aircraft fleet of the Department has the proven capability to utilize coal-to-liquid fuel or gas-to-liquid fuel without—

''(A) any adverse effect on the aircraft engines of such fleet;

''(B) any adverse effect on the overall performance of the aircraft; and

''(C) any adverse effect on health and safety of the aircrew, passengers, and maintenance crew.

''(2) 2017.

''(c) EXCEPTION.—If as of December 31 of any year in which subsection (a) is in effect the average price of crude petroleum (as determined by the Secretary of Energy in 2007 constant dollars) is less then $40 per barrel, paragraph (2) of that subsection shall not be operative in the next succeeding year.

''(d) MAXIMUM PERCENTAGE.—

''(1) The maximum percentage of the fuel utilized by the Department that is required by this section to be coal-to-liquid fuel, gas-to-liquid fuel, or both is 50 percent.

''(2) Nothing in paragraph (1) shall be construed to limit the percentage of fuel utilized by the Department that is coal-to-liquid fuel or gas-to-liquid fuel.''.

(2) CLERICAL AMENDMENT.—The table of section at the beginning of subchapter II of such chapter is amended by adding at the end the following new item:

''Sec. 2263. Fuel: minimum requirements for utilization of coal-to-liquid or gas-to-liquid fuel.''.

(d) COMMERCIAL AIRCRAFT STUDY.—

(1) IN GENERAL.—The Secretary of Energy, in consultation with the Administrator of the Federal Aviation Administration, shall conduct a study on commercial style aircraft engines and airframes to determine the quantity of fuel produced using coal-to-liquid or gas-to-liquid technology that may be used without compromising health, safety, or the longevity of the engines and airframes, including an analysis of any environmental benefits from using the fuel.

(2) REPORT.—Not later than 180 days after the date of the completion of the study under paragraph (1), the Secretary of Energy shall submit to the appropriate committees of Congress a report that describes—

(A) the results of the study; and

(B) any recommendations of the Secretary of Energy.

NOTICES OF HEARINGS

COMMITTEE ON INDIAN AFFAIRS

Mr. DORGAN. Mr. President, I would like to announce that the Committee on Indian Affairs will meet on Thursday, June 21, 2007, at 9:30 a.m. in room 485 of the Russell Senate Office Building to conduct an oversight hearing on law enforcement in Indian Country.

Those wishing additional information may contact the Indian Affairs Committee at 224–2251.

COMMITTEE ON RULES AND ADMINISTRATION

Mrs. FEINSTEIN. Mr. President, I wish to announce that the Committee on Rules and Administration will meet on Tuesday, June 26, 2007, at 10 a.m., to conduct a hearing to receive testimony on Smithsonian Institution governance reform and a report by the Smithsonian's Independent Review Committee.

For further information regarding this hearing, please contact Howard Gantman at the Rules and Administration Committee, 224–6352.

COMMITTEE ON SMALL BUSINESS AND ENTREPRENEURSHIP

Mr. KERRY. Mr. President, I would like to inform the Members that the Committee on Small Business and Entrepreneurship will hold a roundtable entitled ''SBA Reauthorization: Small Business Venture Capital Programs,'' on Thursday, June 21, 2007, at 10 a.m., in room 428A of the Russell Senate Office Building.

PERMANENT SUBCOMMITTEE ON INVESTIGATIONS

Mr. LEVIN. Mr. President, I would like to announce for the information of the Senate and the public that the Permanent Subcommittee on Investigations of the Committee on Homeland Security and Governmental Affairs will hold 2 days of hearings entitled ''Excessive Speculation in the Natural Gas Markets.'' The subcommittee's hearing will examine the reasons for the extreme price levels and volatility in the natural gas futures markets in 2006 and how excessive speculation by a single hedge fund, Amaranth LLC, dominated the natural gas market and distorted natural gas futures prices. The hearing also will examine the extent to which excessive speculative trading on unregulated energy exchanges contributed to the price distortions, and the need for statutory and regulatory changes to prevent manipulation and excessive speculation on unregulated exchanges from detrimentally affecting energy prices. Witnesses for the upcoming hearing will include a Counsel to the Permanent Subcommittee on Investigations who will present a report on the subcommittee's year-long investigation, Amaranth, the Commodity Futures Trading Commission, the Intercontinental Exchange, the New York Mercantile Exchange, natural gas users, and academics. A final witness list for the June 25 hearing will be available on Friday, June 22, 2007. A final witness list for the July 9 hearing will be available on Friday, July 6, 2007.

The subcommittee hearings are scheduled for Monday, June 25, 2007, at 11 a.m., in room 106 of the Dirksen Senate Office Building, and Monday, July 9, 2007, at 2:30 p.m., in room 342 of the Dirksen Senate Office Building. For further information, please contact Elise Bean of the Permanent Subcommittee on Investigations at 224–9505.

APPOINTMENTS

The PRESIDING OFFICER. The Chair announces, on behalf of the Republican leader, pursuant to the provisions of S. Res. 105 (adopted April 13, 1989), as amended by S. Res. 149 (adopted October 5, 1993), as amended by Public Law 105–275, further amended by S. Res. 75 (adopted March 25, 1999), amended by S. Res. 383 (adopted October 27, 2000), and amended by S. Res. 355 (adopted November 13, 2002), and further amended by S. Res. 480 (adopted November 20, 2004), the appointment of the following Senators to serve as members of the Senate National Security Working Group for the 110th Congress: Senator RICHARD LUGAR of Indiana, Senator JOHN WARNER of Virginia, Senator JEFF SESSIONS of Alabama, Senator PETE DOMENICI of New Mexico, Senator BOB CORKER of Tennessee.

AMENDING SENATE RESOLUTION 458

Mr. BINGAMAN. Mr. President, I ask unanimous consent that the Senate now proceed to consideration of S. Res. 238, which was submitted earlier today.

The PRESIDING OFFICER. The clerk will report the resolution by title.

The legislative clerk read as follows:

A resolution (S. Res. 238) amending Senate Resolution 458 (98th Congress) to allow the Secretary of the Senate to adjust the salaries of employees who are placed on the payroll of the Senate, under the direction of the Secretary, as a result of the death or resignation of a Senator.

There being no objection, the Senate proceeded to consider the resolution.

Mr. BINGAMAN. I ask unanimous consent that the resolution be agreed to and the motion to reconsider be laid on the table.

The PRESIDING OFFICER. Without objection, it is so ordered.

The resolution (S. Res. 238) was agreed to, as follows:

S. RES. 238

Resolved, That (a) subsection (a)(1) of the first section of Senate Resolution 458 (98th Congress) is amended by inserting after ''respective salaries'' the following: '', unless adjusted by the Secretary of the Senate with the approval of the Senate Committee on Rules and Administration,''.

(b) The amendment made by subsection (a) shall take effect January 1, 2007.

MEASURE READ THE FIRST TIME—S. 1639

Mr. BINGAMAN. Mr. President, I understand that S. 1639, introduced earlier today by Senators KENNEDY and SPECTER, is at the desk, and I ask for its first reading.

The PRESIDING OFFICER. The clerk will report the bill by title.

The legislative clerk read as follows:

A bill (S. 1639) to provide for comprehensive immigration reform and for other purposes.

Mr. BINGAMAN. Mr. President, I now ask for its second reading and object to my own request.

The PRESIDING OFFICER. Objection is heard.

ORDERS FOR TUESDAY, JUNE 19, 2007

Mr. BINGAMAN. Mr. President, I ask unanimous consent that when the Senate completes its business today, it stand adjourned until 10 a.m., Tuesday, June 19; that on Tuesday, following the prayer and pledge, the Journal of proceedings be approved to date, the morning hour be deemed expired, and the time for the two leaders reserved for their use later in the day; that there then be a period of morning business for 60 minutes, with Senators permitted to speak for up to 10 minutes, and with the time equally divided and controlled between the two leaders or their designees, with the Republicans controlling the first half and the majority controlling the final half; that upon the close of morning business, the Senate resume consideration of H.R. 6, as under the previous order.

The PRESIDING OFFICER. Without objection, it is so ordered.

ADJOURNMENT UNTIL 10 A.M. TOMORROW

Mr. BINGAMAN. Mr. President, if there is no further business to come before the Senate today, I now ask unanimous consent that the Senate stand adjourned under the previous order.

There being no objection, the Senate, at 6:41 p.m., adjourned until Tuesday, June 19, 2007, at 10 a.m.

NOMINATIONS

Executive nominations received by the Senate June 18, 2007:

DEPARTMENT OF TRANSPORTATION

PAUL R. BRUBAKER, OF VIRGINIA, TO BE ADMINISTRATOR OF THE RESEARCH AND INNOVATIVE TECHNOLOGY ADMINISTRATION, DEPARTMENT OF TRANSPORTATION, VICE ASHOK G. KAVEESHWAR, RESIGNED.

HOUSE OF REPRESENTATIVES—*Monday, June 18, 2007*

The House met at 12:30 p.m. and was called to order by the Speaker pro tempore (Ms. HIRONO).

DESIGNATION OF SPEAKER PRO TEMPORE

The SPEAKER pro tempore laid before the House the following communication from the Speaker:

WASHINGTON, DC,
June 18, 2007.

I hereby appoint the Honorable MAZIE K. HIRONO to act as Speaker pro tempore on this day.

NANCY PELOSI,
Speaker of the House of Representatives.

MORNING-HOUR DEBATE

The SPEAKER pro tempore. Pursuant to the order of the House of January 4, 2007, the Chair will now recognize Members from lists submitted by the majority and minority leaders for morning-hour debate. The Chair will alternate recognition between the parties, with each party limited to not to exceed 30 minutes, and each Member, except the majority leader, the minority leader, or the minority whip, limited to not to exceed 5 minutes.

The Chair recognizes the gentleman from Florida (Mr. STEARNS) for 5 minutes.

REGRETTABLE REMITTANCES

Mr. STEARNS. Madam Speaker, the immigration problem has been a topic of contentious debate for years now, with few results. The influx, both legal and illegal, of immigrants from Mexico to North America numbers at a minimum about 500,000 people a year. It is clear that the majority of these immigrants are coming to our country for the better wages to provide for their families. And this is the heart of the problem. The Mexican economy is continually stunted in its growth by fiscal mismanagement, corruption, and a perpetual dependence upon foreign aid and remittances. Mexico must make tough decisions and get its economy in shape. Until then, Madam Speaker, we will continue to face massive immigration from the south.

While we are painfully aware of the problems illegal immigration is causing our society, consider what it is doing to Mexico in the long run. The massive immigration is draining many villages across Mexico of their important labor pool. Families are separated while the husbands and fathers choose to cross our borders to get better lives for themselves and for their families. Mexico is slow in reforming their economic policies, in part perhaps because of the influx of money from the remittances from the United States that enables them to continue their unhealthy policies.

Let me explain. The money sent in the form of remittances amounted to about $23 billion in 2006, according to the Bank of Mexico, the country's central bank. That amount is up almost sevenfold in a dozen years. As that number has grown, the fee for remitting money has dropped from an average of about 9.2 percent in 1999 to just about 3 percent this year, according to Bancomer, a Mexican bank.

Sending money back to Mexico has become cheaper partly because the amounts have become bigger. It was about $290 on average 8 years ago, and now is up to over $350. More importantly, according to the Bank of Mexico, over 90 percent of remittances are now sent by electronic wire transfer compared with only 50 percent in 1995. In rural poor communities in Mexico, even the 3 percent transaction fee is a huge chunk cut out of a remittance check. That is why the Bank of Mexico and America's Federal Reserve are running a program called Directo a Mexico, or FedACH International Mexico Service, to cut the cost further for these folks.

In this program, people receive an overnight transfer from an American bank account to a Mexican one. The two central banks act as middlemen, taking a cut of about 67 cents no matter what the size of the transaction. According to Elizabeth McQuerry of the Federal Reserve, banks then typically charge $2.50 to $5 to transfer about $350. In total, this new program cuts the costs of remittances by at least half. In America, 200 banks are now signed up for this service compared with just six that signed up when it was initiated in 2004. So far, the program is just beginning, handling about 27,000 transactions a month. However, another point of serious concern is that about 26,000 of which are Social Security payments made by the American government to beneficiaries in Mexico.

One kink in the program was that most of Mexico's poor, who are often the intended recipients of the funds, do not have bank accounts to pay them into. So to ensure that these funds can still get to Mexico, they developed another program, run by Bansefi, a Mexican government bank, that allows people in America to open bank accounts for their relatives in Mexico. Their relatives can then use these accounts to withdraw the money deposited through the remittance program.

Madam Speaker, another question is, do the legal and illegal immigrants themselves have accounts to send money from? Statistics indicate as many as 70 percent do, according to a recent report by the Bank of Mexico. This is largely because hundreds of American banks, eager for deposits, will happily open accounts for people carrying only a Mexican consular identity card, rather than requiring official United States Government identification. This allows people without officially sanctioned rights to be in this country to send money out of it. As a result, the Mexican bank has seen rapid growth, with 3.4 million accounts now open, compared to just 850,000 in the year 2001.

If this trend continues, Madam Speaker, it will enable the Mexican government to continue to operate as it is today. Their economy will continue to stagnate, immigration will continue to bleed across our border, and the Mexican people will be caught in a downward spiral for generations to come.

Obviously another part of any immigration reform is making sure that U.S. banks only open accounts for persons who have legally sanctioned rights to be in this country and not illegal aliens.

HONORING LIEUTENANT GENERAL KEVIN J. SULLIVAN

The SPEAKER pro tempore. Pursuant to the order of the House of January 4, 2007, the gentleman from Utah (Mr. BISHOP) is recognized during morning-hour debate for 5 minutes.

Mr. BISHOP of Utah. Madam Speaker, it is with great pleasure that I stand to honor Lieutenant General Kevin J. Sullivan upon his promotion to Air Force Deputy Chief of Staff for Installations and Logistics.

Kevin Sullivan was born in Bridgeport, Connecticut, and grew up in an Air Force family. He married the former June Young, also from Connecticut. He is an alumnus of the University of Connecticut, and he and June are Husky fans through and through.

General Sullivan entered the Air Force and was commissioned through the Air Force ROTC program upon graduation. His first assignment took him in 1975 to England Air Force Base,

Louisiana, as a weapons loading officer. He has since had assignments in the Philippines, North Dakota, Nebraska, here in Washington, Alabama, Germany, Utah, Ohio, Florida, and most recently a return engagement to Hill Air Force Base as Commander of the Ogden Air Logistics Center.

General Sullivan is the longest serving commander in the history of the Ogden ALC and he has led with superb application of financial, human and material resources during his tenure.

Despite living the itinerant life that is part and parcel of the Air Force, and despite his affection and affinity to his alma mater, we consider Kevin and June to be true Utahns, and we look forward to their future visits, official and not-so-official.

General Sullivan, please accept my heartfelt thanks for your outstanding leadership and stewardship at Hill Air Force Base during the past 4 years and my very best wishes upon your important new assignment. You exemplify the tradition of ''Integrity first, Service before self, and Excellence in all we do'' that is the hallmark of the United States Air Force.

RECESS

The SPEAKER pro tempore. Pursuant to clause 12(a) of rule I, the Chair declares the House in recess until 2 p.m. today.

Accordingly (at 12 o'clock and 38 minutes p.m.), the House stood in recess until 2 p.m.

□ 1400

AFTER RECESS

The recess having expired, the House was called to order by the Speaker pro tempore (Mr. CARDOZA) at 2 p.m.

PRAYER

The Chaplain, the Reverend Daniel P. Coughlin, offered the following prayer:

Great Creator and Ruler of the universe, every creature of Yours quickens to a new day. Each in proper order gives You glory simply by its being. Every plant, animal and element lives according to its own unique pattern of life as beautiful, irregular or routine as that may be.

Only we, as Your people, with minds and hearts can spontaneously and consciously give You praise and thanks.

Outside our moments of prayer, we become focused on primal responsibilities. In doing so, Lord, we continue to give You glory by simply performing our work with dedication and wholehearted effort, by following Your holy inspiration and by keeping Your commands. Empower us with Your spirit, that we may fulfill Your law today, always trusting in Your promises.

To Your holy name be all honor and praise, forever and ever. Amen.

THE JOURNAL

The SPEAKER pro tempore. The Chair has examined the Journal of the last day's proceedings and announces to the House his approval thereof.

Pursuant to clause 1, rule I, the Journal stands approved.

PLEDGE OF ALLEGIANCE

The SPEAKER pro tempore. Will the gentleman from Texas (Mr. POE) come forward and lead the House in the Pledge of Allegiance.

Mr. POE led the Pledge of Allegiance as follows:

I pledge allegiance to the Flag of the United States of America, and to the Republic for which it stands, one nation under God, indivisible, with liberty and justice for all.

APPOINTMENT OF MEMBERS TO DWIGHT D. EISENHOWER MEMORIAL COMMISSION

The SPEAKER pro tempore. Pursuant to 16 U.S.C. 431 note, and the order of the House of January 4, 2007, the Chair announces the Speaker's appointment of the following Members of the House to the Dwight D. Eisenhower Memorial Commission:

Mr. MOORE, Kansas
Mr. BOSWELL, Iowa
Mr. THORNBERRY, Texas
Mr. MORAN, Kansas

IT'S STILL A BAD DEAL

(Mr. POE asked and was given permission to address the House for 1 minute.)

Mr. POE. Mr. Speaker, the ''Grand Bargain'' is what people are calling the new inclusive, comprehensive give-America-away immigration bill. Since it got nowhere in the Senate last week, Senators have returned to the back room and behind closed doors to come up with a ''Greater Grand Bargain'' than before. In other words, throw in something for the left, more family reunification for illegals, and something for the right, more border security promises, and this all done in an effort to get a deal, any deal, passed quickly. Of course, the underlying principle of this deal is if you are here illegally, you're going to get to stay.

Now, smart people on the left and the right say this is not amnesty. Of course they say it's not amnesty because these smart people know Americans are overwhelmingly opposed to amnesty. So they call it a reform.

Mr. Speaker, if 12 to 20 million people are on our land illegally, and shall I speak politically incorrect and call it trespassing, and if they pay some kickback fees to Uncle Sam but get to stay on our land, it's still amnesty.

So let's be honest. The new ''Greater Grand Bargain'' is a bargain for illegals, but a costly, bad deal for Americans.

And that's just the way it is.

RECOGNIZING ADMIRAL EDMUND GIAMBASTIANI

(Mr. WILSON of South Carolina asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. WILSON of South Carolina. Mr. Speaker, in the coming months, the United States Navy will lose one of its greatest leaders. ADM Edmund P. Giambastiani, Jr., will retire as vice chairman of the Joint Chiefs of Staff in August of this year. Admiral Giambastiani has held this post since August 2005.

A native of Canastota, New York, Admiral Giambastiani graduated from the U.S. Naval Academy with leadership distinction in 1970. Admiral Giambastiani and his wife, Cindy, have two children, Pete and Cathy.

We are grateful to work closely with Pete, who serves as military legislative assistant to Congressman JEFF MILLER of Florida. Pete, an academy graduate and lieutenant in the Navy, followed proudly in his father's footsteps.

I appreciate Admiral Giambastiani, his family, and their service to the people of the United States.

In conclusion, God bless our troops, and we will never forget September 11.

ANNOUNCEMENT BY THE SPEAKER PRO TEMPORE

The SPEAKER pro tempore. Pursuant to clause 8 of rule XX, the Chair will postpone further proceedings today on motions to suspend the rules on which a recorded vote or the yeas and nays are ordered, or on which the vote is objected to under clause 6 of rule XX.

Record votes on postponed questions will be taken after 6:30 p.m. today.

RECOGNIZING STAX RECORDS FOR ENRICHING THE NATION'S CULTURAL LIFE WITH ''50 YEARS OF SOUL''

Mr. GRIJALVA. Mr. Speaker, I move to suspend the rules and agree to the resolution (H. Res. 154) recognizing Stax Records for enriching the Nation's Cultural life with ''50 years of soul,'' as amended.

The Clerk read the title of the resolution.

The text of the resolution is as follows:

H. RES. 154

Whereas the origins of southern soul may be traced back to Memphis, Tennessee;

Whereas soul music integrates elements of gospel music and rhythm and blues;

Whereas soul music became a new genre of American music in the 1950's with Stax Records paving the way for soul recordings;

Whereas Stax Records of Memphis, Tennessee is an icon of the American recording industry;

Whereas Stax Records produced some of the earliest recordings by such soul music legends as Isaac Hayes, Otis Redding, the Staple Singers, Wilson Pickett, Luther Ingram, Albert King, the Bar-Kays, Booker T. and the M.G.'s, Johnnie Taylor, The Mar-Keys, Sam & Dave, B.B. King, Rufus and Carla Thomas, and many other artists whose work continues to exert a profound influence on popular music today;

Whereas Stax Records also produced important recordings by, among others, the Reverend Jesse Jackson, Bill Cosby, and Richard Pryor;

Whereas Memphis, Tennessee, over 5 decades as the epicenter of all genres of soul music, earned the moniker ''Soulsville, USA'';

Whereas the Royal Studio for the Hi Records label served as the birthplace of trailblazing soul artists Aretha Franklin, Al Green, and Maurice White of Earth, Wind, and Fire who also added to the depth of soul Memphis produced for the international music community;

Whereas in 2007 the Memphis Convention and Visitors Bureau, Concord Music Group/Stax Records, and the Soulsville Foundation will celebrate American soul music and the 50th anniversary of the founding of Stax Records through their ''50 Years of Soul'' celebration; and

Whereas the influence of soul music permeates some modern music art forms, including Contemporary R & B, and deepens American music history and the Nation's cultural life: Now, therefore, be it

Resolved, That the House of Representatives—

(1) recognizes the 50th anniversary of the founding of Stax Records and its role in launching the careers of many legendary soul music artists;

(2) recognizes the important role Memphis, Tennessee played in immortalizing soul music; and

(3) recognizes the continuing contributions and influence of soul music to America's music history and cultural life.

The SPEAKER pro tempore. Pursuant to the rule, the gentleman from Arizona (Mr. GRIJALVA) and the gentleman from Utah (Mr. BISHOP) each will control 20 minutes.

The Chair recognizes the gentleman from Arizona.

GENERAL LEAVE

Mr. GRIJALVA. Mr. Speaker, I ask unanimous consent that all Members have 5 legislative days to revise and extend their remarks and include extraneous material on the resolution under consideration.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Arizona?

There was no objection.

Mr. GRIJALVA. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, I rise today to recognize the influence of soul music on this Nation and the contributions of the city of Memphis, Tennessee, and Stax Records for enriching the Nation's cultural life with 50 years of soul.

Soul music became a new genre of American music in the 1950s and incorporates various types of music including gospel and rhythm and blues. The origins of Southern soul music can be traced back to Memphis, Tennessee, the home of Stax Records.

Stax Records produced some of the earliest recordings of soul music legends including Isaac Hayes, Otis Redding, and B.B. King. Over time, other important recordings were produced at their studios, including works from the Reverend Jesse Jackson, Bill Cosby and Richard Pryor.

Throughout 2007, the Memphis Convention and Visitors Bureau, Concord Music Group/Stax Records, and the Soulsville Foundation will celebrate American soul music and the 50th anniversary of the founding of Stax Records with an event titled ''50 Years of Soul.''

Mr. Speaker, soul music has greatly contributed to the music culture in our Nation and has a lasting influence on current art forms, such as contemporary rhythm and blues. I would like to thank the city of Memphis and Stax Records for their commitment to this inspirational music, and I encourage my colleagues to pass this resolution.

Mr. Speaker, I reserve the balance of my time.

Mr. BISHOP of Utah. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, I rise today in support of H. Res. 154, recognizing Stax Records for enriching the Nation's cultural life with its 50 years of soul.

Stax Records is a name which is synonymous with Southern soul music. The record label began as Satellite Records in Memphis, Tennessee, in 1959. Founded by Jim Stewart, a former country fiddler, and Estelle Axton, the company had its first top 10 hit in 1961 with ''Gee Whiz'' by Carla Thomas. During the next few years, Stax developed a branch of music which was to have worldwide repercussions. With its house rhythm section, better known as Booker T. and the MGs, its tight horn section, which later became the Memphis Horns, and its gospel-rooted recording artists such as Otis Redding and Sam and Dave, Stax virtually created contemporary soul music.

The death of Otis Redding in 1967 signaled the end of the first Stax era, but it was soon to be revitalized with a successful new breed of Stax artists, including Isaac Hayes. In his own way, Hayes developed a unique blend, part jazz, part soul, part easy listening. He talked on his records in a mellow, bantering manner, and he used an orchestra in many ways to provide instrumental cushioning. In many ways, Hayes was a founding father of the sweet soul of the 1970s.

Stax's roster ran the gamut of black popular music. Albert King displayed his great personality, playing his guitar with a bluesy sense of urgency. The Staple Singers were at their artistic peak when they recorded for Stax during the late 1960s and early 1970s, turning out records that blended a utopian social vision with rhythmic excitement. The music behind these singers was more varied than in early days, and some of it was recorded outside Memphis, but the spirit of Stax was burning as brightly as ever.

The thing that made Stax go was teamwork; and when artists visited the studio, they could feel it. The halls were always full of people who seemed to be working furiously, dropping in on friends in their offices, or heading down to Studio A to check on the progress of a mixing session. The cooperation between white and black musicians and producers was practically unprecedented. Indeed, it was one of the secrets of the company's across-the-board success.

On August 20, 1972, the Stax label reached a pinnacle of success by representing a major concert, Wattstax, featuring performances by Stax recording artists and the humor of a rising young comedian named Richard Pryor. Known as the ''Black Woodstock,'' Wattstax was hosted by Reverend Jesse Jackson and drew a crowd of over 10,000 attendees, most of them African American. Wattstax was filmed by motion picture director Mel Stuart, and a concert film of the event was released to theaters by Columbia Pictures in February 1973.

The influence of soul music permeates nearly all of today's modern music art forms and has deepened American music history and the Nation's cultural life. Today, we recognize the 50th anniversary of the founding of Stax Records and its role in launching the careers of many legendary soul music artists.

For these reasons, I ask my colleagues to support this resolution.

Mr. Speaker, I reserve the balance of my time.

Mr. GRIJALVA. Mr. Speaker, I yield as much time as he may consume to the gentleman from Tennessee (Mr. COHEN), the sponsor of the resolution.

Mr. COHEN. Mr. Speaker, I appreciate the opportunity to speak on Stax and 50 years of soul music that my hometown, Memphis, Tennessee, has provided this Nation. H. Res. 154 recognizes the rich history of Stax, its 50-year celebration.

Last Saturday in Memphis, we started what's called ''Seven Days of Soul,'' honoring 7 days of soul, and while we're honoring 7 days of soul starting last Saturday, the rest of the year is just as good in Memphis. Every day is good in Memphis, and every day's really good on this Earth.

Soul music is a special part of American music, and I wish to quote from The Commercial Appeal, which did a special feature on Stax and soul this past week by Mr. Bob Negr. He quotes Peter Guralnick, great rock and roll raconteur, and he says, what soul music is is the story of blacks and whites together. It is the story of the complicated intertwinings of dirt-poor

roots and middle-class dreams, aesthetic ambitions and social strivings, the anarchic impulse and the business ethic.

Guralnick, while not a Memphian, has been a great recounter of stories of Memphis music. He's done a lot with Elvis, and he's done a lot with Stax. And Memphis has got the roux that has made music what it's been in America.

At Sun Records, things came together, and Sam Phillips put them together there, and Rufus Thomas, a staple of Stax, recorded at Sun Records. That was a fusion of music, just as Stax and soul music is a fusion of rhythm and blues and gospel music.

Steve Cropper, one of the famous Booker T. and the MGs musicians and song writers, along with Duck Dunn, Booker T. Jones and the late Al Jackson, said, the main reason Stax was so singular and phenomenal was that we had no idea what we were doing. Kind of reminds you of Congress on occasion, like last week, but we had no idea what we were doing. I guess you'd say there was a kind of magic in not knowing, and that made it special.

As Cropper noted, everything that made Stax great was, at its essence, beautifully raw and largely untutored. Certainly, that kind of description makes so many things in America so great.

Mr. Speaker, what made Stax so great was it was a natural energy and it was a coming together of blacks and whites. The House band there was Booker T. and the MGs. Steve Copper and Duck Dunn are Caucasian, and Al Jackson and Booker T. Jones are African American. And they put out the music. They didn't put out white onions, they didn't put out red onions. They didn't put out yellow onions. They put out ''Green Onions,'' and because of ''Green Onions,'' the world rocks to a Memphis beat and Stax soul.

The Memphis Horns were two gentlemen, Andrew Love and Wayne Jackson, one black and one white. That's the story that Memphis had in music, and it's the story that Memphis and this country need to have to come together and move forward.

□ 1415

Stax is an embodiment of the American dream, the promised land, as Dr. King would call it. I am pleased the House considers this bill today, and welcome the gentleman from Arizona's manager's amendment which recognizes the important role that Memphis played in immortalizing the great genre of soul music at large.

Now at the site of the old Stax headquarters and studio on historic McLemore Avenue is the Stax Museum of American Soul Music. It is the world's only soul music museum. No matter what Detroit might say, Memphis has the world's only soul music museum, and you need to come to Memphis and visit the Stax Museum of American Soul Music. The many exhibits there include award-winning documentary film and an authentic 100-year-old Mississippi Delta church that was home to the gospel roots of soul music, original studio equipment, costumes, artwork and memorabilia intended to preserve the legacy of American soul music and its contributions worldwide.

Stax was founded in 1957, not on a specific day with a cornerstone laid by the masons, but generally in 1957. That's the way soul music was. There is not exactly a date for it. It's just kind of a thing that happened. It was Jim Stewart and his sister, Estelle Axton. Jim Stewart's last name, Stewart starts with S-t, and Ms. Axton's, Ax, together S-t-a-x. Stax Records came together with Jim Stewart and Estelle Axton. They put the Stax in Stax music.

Stax Records brought forth so many hits. Otis Redding, ''(Sittin' on) The Dock of the Bay,'' and I have got to parenthetically relate a personal story. I was a freshman at Vanderbilt University one night when Otis Redding performed in the Bar-Kays. The Bar-Kays, a great instrumental group, ''Soul Finger'' was their big hit. Ben Cauley, James Alexander are the surviving members.

Two days after they performed at Vanderbilt, their plane crashed. Just as when the Big Bopper's plane crashed, soul music would have crashed. We lost great, great talents, Otis Redding and the Bar-Kays that night.

Fortunately, Mr. Cauley missed the plane and Mr. Alexander wasn't on it. But it was a night I will remember and all students at Vanderbilt will remember as well. We saw their next-to-last concert.

But Otis came to Memphis to do ''(Sittin' on) The Dock of the Bay,'' the Staple Singers, ''Respect Yourself,'' Sam & Dave, famed for ''Hold On! I'm Comin,'' as well as ''I'm a Soul Man,'' Gene Knight's ''Mr. Big Stuff,'' so many instrumentals by Booker T. & the MGs; Eddie Floyd came to Memphis to do ''Knock on Wood.'' Other great musicians performed there, the Mar-Keys and others.

It is fitting this resolution be considered this month of June, which is Black Music Month. Black Music Month recognizes the outstanding contributions African American singers have made to our Nation.

This Friday, June 22, the Memphis Orpheum Theatre will celebrate this occasion with a concert entitled ''50 Years of Stax: A Concert to Benefit the Stax Museum of American Soul Music.'' Artists scheduled to perform at the event include such legendary talents as Isaac Hayes of ''Shaft'' fame, and one of the nicest human beings you would ever want to meet, and I have had that great fortune; Booker T. & the MGs, Eddie Floyd, William Bell Mavis Staples, the Soul Children and the Reddings will be honoring their father, the late legendary Otis Redding.

I am honored this resolution recognizes their talents, as well as such legendary artists as Aretha Franklin, who was born in Memphis; B.B. King; Albert King, no relation, but just as good at putting hot licks on those guitars; the Memphis Horns, Wayne Jackson & Andrew Love, Sam & Dave, the Mar-Keys; and even though not on Stax Records, Al Green and his legendary producer Willie Mitchell can't not be mentioned for all they did for Memphis music.

David Porter was a great songwriter. He'll be there too in the Stax Days. Stax Records was something special for Memphis and the country. It lives on through the museum, but it also lives on through now the Concord Music Group, which just announced the relaunch of Stax Records as a creative home for present-day soul stars such as Angie Stone, Soulive, Lalah Hathaway and Leon Ware who will be performing as well, and they will be joined along with other heritage artists such as Isaac Hayes to record on this label which has returned to its prominent place in Memphis and hopefully a prominent place in the charts.

It is a great honor and privilege that the House of Representatives would consider this bill today. I am thankful to have the opportunity to sponsor this legislation because of the great impact soul music has had on my life, the lives of my constituents, so many of us here in Congress and so many Americans.

Tomorrow is Juneteenth. Juneteenth is the anniversary of the last free emancipation of slaves. The word got to east Texas that the Emancipation Proclamation had been signed in 1863. It wasn't until 1865, June 19, the news got to Texas and all the slaves were freed. It's appropriate that in Black Music Month, during the celebration of Juneteenth and weekend before last, Middle Passage Weekend, when we celebrate the people who made their passage, and some were so brave that rather than put themselves into slavery as Jews at Masada in the same way gave up their lives rather than be enslaved that we honor Stax Records.

It's going to be a great night Friday night. We will remember our heritage in Memphis. We will remember our heritage in America. And we have a new future with a recording label, with Stax Records. I urge every one to be soulful, to listen to soul music and ask the House of Representatives to pass H. Res. 154.

Mr. BISHOP of Utah. Mr. Speaker, I reserve the balance of my time.

Mr. GRIJALVA. Mr. Speaker, I yield such time as he may consume to the gentleman from Illinois (Mr. DAVIS).

Mr. DAVIS of Illinois. Mr. Speaker, I also want to thank the gentleman for yielding, and I want to commend my

colleague, Representative COHEN, for introducing this resolution that talks about the impact of Stax Records. Although I am not from Memphis, but Memphis is essentially a part of the Delta, and I grew up in the Mississippi Delta, but in the State of Arkansas. So Memphis was always a part of where we were.

Then, of course, Chicago was the beneficiary of a great migration of African Americans who migrated from Mississippi, from Memphis, Memphis being the largest town in the area. Individuals would oftentimes leave their rural communities and first get to Memphis. Then after they got to Memphis and stayed for 2, 3 years, they would make their way to Saint Louis, or they would make their way to Chicago.

So we have a great affinity for the City of Memphis. It's almost like being home.

But also Stax knew where to find talent, and so they came to Chicago and found people like the Staple Singers, whose friends and associates took them out of the church and put them on a stage and a platform far beyond what they otherwise would have been able to do.

In addition to its music, Stax was also always seriously engaged and involved in what we called, especially during the 1960s and 1970s, the Civil Rights Movement, relative to putting on concerts to benefit events, activities, raise money for marches, demonstrations. So they were more than just purveyors of music. They were purveyors of music, but they were also part of the liberation movement, part of what those of us who grew up during the 1960s and 1970s call ''the era of struggle.''

So, again, I simply want to commend my colleague, and, of course, one of the Staple Singers, a young lady named Cynthia, used to actually work in the same organization that I worked in, and she was a member of the Staples family. The rest of the group, Pervis and Mavis and Pops, they were part of our community.

So I commend Stax. I also commend my colleague from Tennessee for taking the time to honor their tremendous contributions.

Mr. BISHOP of Utah. Mr. Speaker, I yield back the balance of my time.

Mr. GRIJALVA. Mr. Speaker, I yield back the balance of my time.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from Arizona (Mr. GRIJALVA) that the House suspend the rules and agree to the resolution, H. Res. 154, as amended.

The question was taken; and (two-thirds being in the affirmative) the rules were suspended and the resolution, as amended, was agreed to.

The title was amended so as to read: ''A resolution recognizing the rich and resounding impact 50 years of Memphis-originating soul music has offered to American music history.''.

A motion to reconsider was laid on the table.

CONGRATULATING THE UNIVERSITY OF ARIZONA WILDCATS FOR WINNING THE 2007 NCAA DIVISION I SOFTBALL CHAMPIONSHIP

Mr. GRIJALVA. Mr. Speaker, I move to suspend the rules and agree to the resolution (H. Res. 475) congratulating the University of Arizona Wildcats for winning the 2007 National Collegiate Athletic Association Division I Softball Championship.

The Clerk read the title of the resolution.

The text of the resolution is as follows:

H. RES. 475

Whereas, on June 6, 2007, the University of Arizona Wildcats defeated the University of Tennessee Lady Volunteers to win the 2007 National Collegiate Athletic Association Division I Women's College World Series Softball Championship, their eighth such title since 1991;

Whereas Wildcats pitcher Taryne Mowatt set a College World Series record for most innings pitched, and was named the Most Valuable Player of the qualifying tournament;

Whereas Wildcats players Kristie Fox, Jenae Leles, and Caitlin Lowe were selected for the all-tournament team;

Whereas the Wildcats, after beginning the 2007 season with a losing record, completed the season with a 50–14–1 record; and

Whereas Wildcats coach Mike Candrea has taken the Wildcats to the College World Series 19 times in the last 20 years, winning eight College World Series titles: Now, therefore, be it

Resolved, That the House of Representatives—

(1) congratulates the University of Arizona Wildcats on their victory in the National Collegiate Athletic Association 2007 Division I Women's College World Series Softball Championship; and

(2) recognizes and commends the efforts of the University of Arizona Wildcats players, coaches, and support staff in achieving their victory.

The SPEAKER pro tempore. Pursuant to the rule, the gentleman from Arizona (Mr. GRIJALVA) and the gentleman from Utah (Mr. BISHOP) each will control 20 minutes.

The Chair recognizes the gentleman from Arizona.

GENERAL LEAVE

Mr. GRIJALVA. Mr. Speaker, I ask that all Members have 5 legislative days to revise and extend their remarks and include extraneous material on the resolution under consideration.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Arizona?

There was no objection.

Mr. GRIJALVA. Mr. Speaker, I rise today to congratulate the University of Arizona Women's Softball Team on their eighth national championship. The Wildcats won their title June 6, 2007, giving them back-to-back championships over the University of Tennessee Lady Volunteers.

The road to the championship was not easy for the Wildcats. The Wildcats climbed out of the loser's bracket turning the tournament to face off in the best of three championship series against the Lady Volunteers of Tennessee. After losing the opener of the series, the Wildcats won the second game 1–0. The final game of the series was the most-viewed women's college game on television and was played in front of a sold-out audience. The game was 0–0 until the fifth inning, when the Wildcats scored five runs. Ms. Mowatt, the pitcher, continued to pitch a no-hitter, leading the Wildcats to their second title in a row.

For those of us that are alumni and have the pleasure of living in the community where the Wildcats Women's Softball Team has brought us great honor and prestige, know that the effort and the victories are due to great team effort. It's about teamwork, but there are individuals that must be acknowledged, and it begins with the head coach, Coach Candrea, who has taken the team to every one of their championship titles, in addition to leading the United States team to a Gold Medal in the 2004 Olympics.

Acknowledgment has to be extended to the pitcher, Ms. Mowatt, who threw 1,035 pitches in eight games in 7 days, setting a new women's college record for pitching 60 innings.

The members of the team that were selected to the all-tournament team due to their performance were the shortstop, Ms. Fox; third basewoman, Ms. Leles; and second basewoman, Ms. Lowe.

In addition to the team and support staff, I would like to recognize the endless support of family, friends and fans who give to the university and support the university throughout the whole season. The victory for U of A Wildcats Women's Softball Team is celebrated throughout my district and by Wildcat alumni across the world.

But I think their victory is more than a championship title. It is a testament of the ability of women and the need and the importance of the continued investment in title IX. The victory reminds us of that importance every time that a women's team at a collegiate level is as successful as the University of Arizona Wildcats and other teams.

My congratulations to the University of Arizona Women's Softball Team for their great victory, for the honor that they bring the State, and for the honor that they bring women athletics across this Nation.

Mr. Speaker, I reserve the balance of my time.

Mr. BISHOP of Utah. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, I rise today in support of House Resolution 475, congratulating the University of Arizona Women's Softball Team for winning the 2007 NCAA Division Women's College World Series Championship.

On June 6 of this year, the University of Arizona Wildcats Women's Softball Team defeated a very strong and successful University of Tennessee Lady Volunteers Team by a score of 5–0 to win the three-game series 2–1 and capture the 2007 National Collegiate Athletic Association Division I Women's Softball Championship.

This is Arizona's second consecutive title. Much of the team's success is due to its coach, Mike Candrea. Over the last 21 seasons, he has compiled a record of 1,131 victories, only 228 defeats and two ties; however, you have a tie in the softball game. He has won 18 Coach of the Year awards and is an inductee in the National Fastpitch Coaches Association Hall of Fame.

In his career as a Wildcat coach, he has taken the team to the College World Series 19 times and has won eight College World Series titles. During the 2007 season, the Wildcats compiled an impressive record of 50 wins, 14 losses and only 1 tie.

□ 1430

The junior, Taryne Mowatt, the 2007 World Series MVP, set a record for the most pitches thrown in the College World Series by throwing 1,000 pitches in a week, pitching every inning of the tournament for the Wildcats. This season she compiled a record of 42 wins and 12 losses.

The University of Arizona should be recognized as an outstanding academic institution as well. Now in its second century of service to the State, the University of Arizona has become one of the Nation's top 20 public research institutions. It is one of only 62 members in the Association of American Universities, a prestigious organization that recognizes universities with exceptionally strong research and academic programs. With a world-class faculty in fields as diverse as astronomy, plant science, biomedical science, business, law, music and dance, the University of Arizona offers a rewarding educational experience to all of its students.

I extend my congratulations to the University's president, Robert Shelton, the athletic director, Jim Livengood, head coach Mike Candrea and his staff, all of the hardworking players, the fans and to the University of Arizona. I am happy to join my friend and colleague, Representative GRIJALVA, in honoring this exceptional team and all of its accomplishments and wish all involved continued success.

I ask my colleagues to support this resolution.

Mr. Speaker, I reserve the balance of my time.

Mr. GRIJALVA. Mr. Speaker, I don't have any other speakers on the subject. And I would like to acknowledge the comments, and I'm very appreciative of the comments of Mr. BISHOP.

Mr. Speaker, I reserve the balance of my time.

Mr. BISHOP of Utah. Mr. Speaker, I would like to yield as much time as he may consume to the gentleman from Tennessee (Mr. DUNCAN).

Mr. DUNCAN. Mr. Speaker, I won't take much time. I'll be very brief.

I just wanted to come over here and congratulate my colleague, Congressman GRIJALVA, and especially congratulate his women's softball team from the University of Arizona. They proved, once again, as they have done several times before, that they really have another great team. I think this was probably, what, their seventh national championship or something like that.

This was the first time that my Lady Vols softball team had gone as far as that team did. The University of Tennessee is my alma matter. It's a school of which I am very proud; and it has not only great academics, but it also has a very rich athletic heritage and history. We've been primarily known for our men's football team and our women's basketball, several national championships by both of those programs. But the Lady Vols softball team this year was one of the greatest sports teams in the history of the University of Tennessee. And, in fact, our great pitcher, Monica Abbott, won more games than any pitcher in women's collegiate softball history. And probably no athlete in the history of the University of Tennessee has ever dominated a sport like Monica Abbott.

So once again I want to say congratulations to my Lady Vols, my Tennessee Lady Vols softball team. But I'm here today to especially offer congratulations to a great women's softball team from the University of Arizona. They won another national championship, and it was a well-deserved championship because they had to fight very hard to get it, and I just wanted to come and say congratulations at this time.

Mr. GRIJALVA. Mr. Speaker, let me thank the gentleman from Tennessee (Mr. DUNCAN), and just indicate to him that both teams presented themselves, not only athletically, but as fine sportsmanship, fine athletes and fine universities. And I appreciate his comments.

Mr. Speaker, I yield back the balance of my time.

Mr. BISHOP of Utah. Mr. Speaker, this resolution may deal with the University of Arizona Wildcats, but it obviously honors all people, all ladies who were involved in softball athletics this year.

Mr. Speaker, I yield back the balance of my time.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from Arizona (Mr. GRIJALVA) that the House suspend the rules and agree to the resolution, H. Res. 475.

The question was taken; and (two-thirds being in the affirmative) the rules were suspended and the resolution was agreed to.

A motion to reconsider was laid on the table.

EXPRESSING APPRECIATION FOR THE PROFOUND PUBLIC SERVICE AND EDUCATIONAL CONTRIBUTIONS OF DONALD JEFFRY HERBERT, FONDLY KNOWN AS ''MR. WIZARD''

Mr. GRIJALVA. Mr. Speaker, I move to suspend the rules and agree to the resolution (H. Res. 485) expressing appreciation for the profound public service and educational contributions of Donald Jeffry Herbert, fondly known as ''Mr. Wizard''.

The Clerk read the title of the resolution.

The text of the resolution is as follows:

H. RES. 485

Whereas many citizens of the United States remember Donald Jeffry Herbert as ''Mr. Wizard'' and mourn his passing;

Whereas Don Herbert was born in Waconia, Minnesota and graduated from the La Crosse State Teacher's College in Wisconsin in 1940 where he trained to be a science teacher;

Whereas Don Herbert volunteered for the U.S. Army Air Corps and served our country in the Atlantic theater and earned the Distinguished Flying Cross and the Air Medal with three oak leaf clusters;

Whereas Don Herbert developed the idea for science programming culminating in ''Watch Mr. Wizard'', a live television show produced from 1951 to 1964 and honored by a Peabody Award in 1954;

Whereas the National Science Foundation and the American Chemical Society lauded Don Herbert and his show for promoting interest in science and his contributions to science education and has since been recognized by numerous awards;

Whereas an additional educational program, ''Mr. Wizard's World'', inspired children from 1983 to 1990 on cable television;

Whereas ''Mr. Wizard'' continued to serve as an ambassador for science education by authoring multiple books and programs, and by traveling to schools and providing classroom demonstrations;

Whereas educational research indicates that young children make decisions about future careers at a very early age and are influenced greatly by positive contacts with science and technology;

Whereas a strong education in science and technology is one of the building blocks of a productive, competitive, and healthy society;

Whereas ''Mr. Wizard'' encouraged children to duplicate his experiments at home, driving independent inquiry into science with simple household equipment;

Whereas ''Mr. Wizard's'' dynamic and energetic science experiments attracted unprecedented numbers of children to educational programming, even those who were disinterested or unmotivated in science;

Whereas Mr. Wizard Science Clubs were started across the United States and had more than 100,000 children enrolled in 5,000 clubs by the mid-1950s; and

Whereas Don Herbert will be remembered as a pioneer of commercial educational programming and instrumental in making science education exciting and approachable for millions of children across the United States: Now, therefore, be it

Resolved, That the House of Representatives—

(1) expresses its appreciation for the profound public service and educational contributions of Donald Jeffry Herbert;

(2) recognizes the profound impact of higher educational institutions that train teachers;

(3) encourages students to honor the heritage of Don Herbert by exploring our world through science, technology, engineering, and mathematics fields; and

(4) tenders its condolences to the family of Don Herbert and thanks them for their strong familial support of him.

The SPEAKER pro tempore. Pursuant to the rule, the gentleman from Arizona (Mr. GRIJALVA) and the gentleman from Utah (Mr. BISHOP) each will control 20 minutes.

The Chair recognizes the gentleman from Arizona.

GENERAL LEAVE

Mr. GRIJALVA. Mr. Speaker, I ask unanimous consent that all Members have 5 legislative days to revise and extend their remarks and include extraneous material on the resolution under consideration.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Arizona?

There was no objection.

Mr. GRIJALVA. Mr. Speaker, I rise today to honor the life of Donald Jeffry Herbert and to express appreciation for his great educational contributions.

Donald Herbert was born in Waconia, Minnesota, on July 10, 1917. He graduated from La Crosse State Teachers College in 1940, where he studied to become a science teacher. Before Don Herbert could make an educational contribution, he first served in the United States Army Air Force in World War II. During his service to our country, he earned the Distinguished Flying Cross and the Air Medal with three oak leaf clusters.

Don Herbert is best known for developing an idea which became ''Watch Mr. Wizard,'' a live television show which introduced many children to science. This show aired from 1951 to 1964. Don Herbert, who came to be known as Mr. Wizard, also produced another children's show from 1983 to 1990 titled ''Mr. Wizard's World.''

Mr. Wizard was able to explain seemingly difficult science to children with visually stunning experiments. Mr. Wizard amazed all of us that watched that show. He could make a Bunsen burner change colors by the elements that he used on there. He could take two colored solutions, pour them into a beaker and it would become clear.

And today, when there is such an emphasis across this country and by this Congress to instill an appreciation and a love for science among our students, and among the children of this country, Mr. Wizard stands as a great example and a wonderful show that did just that, stimulated interest and created appreciation among children for science.

Don Herbert's television programs inspired generations of children to become knowledgeable in science. These educational television programs earned Don Herbert a Peabody Award in 1954. He also won three Thomas Edison National Mass Media Awards and the Robert Millikan Award from the American Association of Physics Teachers.

Don Herbert realized that an education including science and technology is a necessary component in forming a productive and competitive society. While he passed away on June 12, 2007, his great contributions to advancement of the education in the field of science will continue to have effects for many, many years to come.

Mr. Speaker, I urge my colleagues to pass this resolution.

Mr. Speaker, I reserve the balance of my time.

Mr. BISHOP of Utah. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, I rise today in support of House Resolution 485, expressing appreciation for the profound public service and educational contributions of Donald Jeffry Herbert, fondly known to all of us of my generation as ''Mr. Wizard.''

Donald Jeffry Herbert will be remembered as the host of two popular children's television shows about science. A general science and English major at the University of Wisconsin-La Crosse, he showed interest in drama until his career as an actor was interrupted by World War II when he enlisted in the United States Army as a private.

He later joined the United States Air Corps, took pilot training and became a B–24 bomber pilot who flew combat missions with the 15th Air Force, flying out of a base in Italy. As the gentleman from Arizona said, he distinguished himself in combat, winning the Distinguished Flying Cross and the Air Medal with the three oak leaf clusters.

After the war, Herbert worked at a radio station in Chicago where he acted in children's programs such as the documentary health series ''It's Your Life.'' It was during that time that Herbert formulated the idea of Mr. Wizard and a general science experiments show that utilized the new medium of television. Herbert's idea was accepted by a Chicago NBC station, and the series ''Watch Mr. Wizard'' premiered on March 3, 1951. That was even before I was born.

The weekly 30-minute show featured Herbert as Mr. Wizard, with a young assistant who watched while Herbert performed interesting science experiments. The experiments, many of which seemed impossible at first glance, were usually simple enough to be recreated by viewers. The show was very successful, and 547 live episodes were created before it was cancelled in 1965. It was briefly revived by NBC during the 1971–1972 season. In 1953 Herbert won a Peabody Award for his work on this program.

In 1983, Herbert developed ''Mr. Wizard's World,'' a faster-paced version of the show that was shown three times a week on the cable channel Nickelodeon. This show ran until 1990, and reruns were shown until 2000, making it the longest-running show on Nickelodeon.

In 1994, Herbert developed another series of 15-minute spots for Nickelodeon called ''Teacher to Teacher with Mr. Wizard.'' The new show highlighted individual elementary school teachers and their projects and was sponsored by the Daschle Science Foundation.

Mr. Wizard inspired legions of children across the Nation. Kids in every town joined thousands of Mr. Wizard clubs and did some of the same experiments that were seen on television, sometimes even without burning up the house. Many of these young viewers went on to careers in science and all were at least taught the practicalities of science in our daily lives.

On June 12, 2007, Donald Herbert lost his battle with cancer, slightly more than a month shy of his 90th birthday at his home in Bell Canyon, California. For the immeasurable contributions he made in children's lives and to the field of science, I would ask my colleagues to support this resolution recognizing his life and work.

Mr. Speaker, I'd ask the gentleman from Arizona if he has other speakers on this particular topic. I do have one other I'd like to yield time to.

Mr. GRIJALVA. Mr. Speaker, I will continue to reserve.

Mr. BISHOP of Utah. Mr. Speaker, I yield the balance of my time to someone who really understands what he's talking about.

I enjoyed Mr. Wizard shows. They were fascinating. I still hated chemistry, but I enjoyed Mr. Wizard. And with that I'd like to yield to the distinguished gentleman and scientist from the State of Michigan, Mr. EHLERS.

Mr. EHLERS. Mr. Speaker, I thank the gentleman for yielding. And had I been your teacher, you never would have disliked any science course. I would have been delighted to recognize your native ability.

Mr. Speaker, I rise in support of House Resolution 485, which expresses appreciation for the profound public service and educational contributions of Donald Jeffry Herbert, who passed away on June 12, 2007.

Many people fondly remember Donald Herbert as Mr. Wizard, and they mourn his passing. He was born in Waconia, Minnesota, which also happens to be my birth State, and he graduated from the La Crosse State Teachers College in Wisconsin in 1940, where he trained to be a science teacher.

He volunteered for the U.S. Army Air Corps and served our country during World War II in the Atlantic theater and earned the Distinguished Flying Cross and the Air Medal with three oak leaf clusters.

Mr. Wizard will be remembered as a pioneer of commercial educational programming. He made science education and science exciting and approachable for millions of children across the United States. He developed the idea for science programs on radio and television, culminating in ''Watch Mr. Wizard,'' a live television show produced from 1951 to 1964. Another of his shows, ''Mr. Wizard's World,'' inspired children from 1983 to 1990 on cable television. Incidentally, these were precursors to today's Mr. Wizard equivalent, Bill Nye, the Science Guy, who has developed an outstanding reputation on Saturday morning television for educating children about science.

The National Science Foundation and the American Chemical Society lauded Don Herbert and his show for promoting interest in science and his contributions to science education. He has since been recognized by numerous awards.

For the duration of his life, Mr. Wizard served as an ambassador for science education. Outside of his television shows, he promoted science by offering multiple books and programs and by traveling to schools to provide classroom demonstrations. Not surprisingly, Mr. Wizard's dynamic and energetic science experiments attracted unprecedented numbers of children to educational programming, even those who were initially disinterested or unmotivated in science.

Mr. Wizard taught the magic about science by doing science. In fact, Mr. Wizard encouraged children to duplicate his experiments at home, leading children into independent inquiry into science with simple household equipment.

□ 1445

I might add he was a precursor to what is happening in the classrooms today, because teachers have discovered the best way to teach science is to let students do the science themselves.

I also appreciate what he did in leading children into independent inquiry. I grew up before television, and so I did not have the opportunity to watch him. But I developed my interest in science by doing experiments at home. These were experiments that were outlined in Popular Science Magazine, and that gave me my start in science, just as Mr. Wizard gave many other children their start in science.

Certainly, Mr. Wizard's efforts were very important, and are relevant to legislation currently under consideration by our Congress. Evidence indicates that young children make decisions about future careers at an early age and are influenced greatly by positive contacts with science and technology. Recently passed bipartisan bills have focused on the need to improve science education, promote innovation, and ensure our Nation's competitiveness.

This year I introduced several bills related to science education, including the Science Accountability Act, H.R. 35; the Standards to Improve Educational Achievement for Kids, better known as the SPEAK Act, H.R. 325; and the National Science Education Tax Incentive for Teachers Act, H.R. 36.

Through this resolution the House of Representatives expresses its appreciation for the profound public service and educational contributions of Donald Herbert. Also, we should recognize the major impact of higher educational institutions that train teachers who encourage students to honor the heritage of Don Herbert by exploring our world through science, technology, engineering, and mathematics fields.

I offer my condolences to the family of Don Herbert, and we thank them for their strong support of Mr. Wizard's tremendous educational efforts. He has set a path that all of us should follow, and if we are serious about competing with other nations and keeping the jobs on our soil rather than letting them be outsourced, we must follow his example and educate our children in mathematics and science so that we can continue to be ranked number one in the world in the areas of science and mathematics.

Finally, I thank the Members who cosponsored this resolution: Mr. AKIN, Mrs. BIGGERT, Mr. GINGREY, Mr. HALL, Mr. KUHL, Mr. LAMPSON, Mrs. MCCARTHY, Mr. JOHN PETERSON, and Mr. MARK UDALL. Also, I thank the Education and Labor Committee staff for their work on this resolution, especially Chad Miller and Rob Borden, as well as my staff member, Rachel Post, who has contributed invaluably to this.

I urge all Members to vote for this resolution to honor Don Herbert for all his work on science education and to honor his memory by continuing to support science education in the future.

Mr. BISHOP of Utah. Mr. Speaker, I yield back the balance of my time.

Mr. GRIJALVA. Mr. Speaker, I yield back the balance of my time.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from Arizona (Mr. GRIJALVA) that the House suspend the rules and agree to the resolution, H. Res. 485.

The question was taken; and (two-thirds being in the affirmative) the rules were suspended and the resolution was agreed to.

A motion to reconsider was laid on the table.

CELEBRATING THE ACCOMPLISHMENTS OF TITLE IX OF THE EDUCATION AMENDMENTS OF 1972 AND RECOGNIZING THE NEED TO CONTINUE PURSUING EDUCATIONAL OPPORTUNITIES FOR WOMEN AND GIRLS

Ms. HIRONO. Mr. Speaker, I move to suspend the rules and agree to the resolution (H. Res. 406) celebrating the accomplishments of title IX of the Education Amendments of 1972, also known as the Patsy Takemoto Mink Equal Opportunity in Education Act, and recognizing the need to continue pursuing the goal of educational opportunities for women and girls.

The Clerk read the title of the resolution.

The text of the resolution is as follows:

H. RES. 406

Whereas 35 years ago, on June 23, 1972, the Education Amendments of 1972 containing title IX was signed into law by the President;

Whereas Representatives Patsy T. Mink and Edith Green led the successful fight in Congress to pass this legislation;

Whereas title IX prohibits discrimination on the basis of sex in the administration of any education program receiving Federal financial assistance;

Whereas remarkable gains have been made to ensure equal opportunity for women and girls under the inspiration and mandate of title IX;

Whereas title IX serves as the nondiscrimination principle in education;

Whereas title IX has moved this Nation closer to the fulfillment of access and opportunities for women and girls in all aspects of life;

Whereas title IX has increased educational opportunities for women and girls, resulting in improved graduation rates, increased access to professional schools and nontraditional fields of study, and improved employment opportunities;

Whereas title IX has increased opportunities for women and girls in sports, leading to greater access to competitive sports, and building strong values such as teamwork, leadership, discipline, work ethic, self-sacrifice, pride in accomplishment, and strength of character;

Whereas on October 29, 2002, title IX was named the ''Patsy Takemoto Mink Equal Opportunity in Education Act'' in recognition of Representative Mink's heroic, visionary, and tireless leadership in developing and winning passage of title IX; and

Whereas 35 years of progress under title IX is widely acknowledged, but because women continue to earn less for work than men with the same educational background; sexual harassment remains pervasive in schools and on college campuses; women and girls face substantial barriers in pursuing high-wage fields such as science, technology, engineering, and math; and women and girls' sports teams do not receive an equal share of resources, including fewer recruiting and

scholarship dollars at the college level; and athletic participation opportunities still lag behind those provided for men, there is still much work to be done if the promise of title IX is to be fulfilled: Now, therefore, be it

Resolved, That the House of Representatives celebrates—

(1) the accomplishments of title IX of the Education Amendments of 1972, also known as the Patsy Takemoto Mink Equal Opportunity in Education Act, in increasing opportunities for women and girls in all facets of education; and

(2) the magnificent accomplishments of women and girls in sports.

The SPEAKER pro tempore. Pursuant to the rule, the gentlewoman from Hawaii (Ms. HIRONO) and the gentleman from Utah (Mr. BISHOP) each will control 20 minutes.

The Chair recognizes the gentlewoman from Hawaii.

GENERAL LEAVE

Ms. HIRONO. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days to revise and extend their remarks and include extraneous material on the resolution under consideration.

The SPEAKER pro tempore. Is there objection to the request of the gentlewoman from Hawaii?

There was no objection.

Ms. HIRONO. Mr. Speaker, I yield myself such time as I may consume.

I rise in strong support of the resolution.

Thirty-five years ago, a college applicant could be denied admission simply because she was a woman. Title IX of the Education Amendments of 1972 changed that. Led by the late Representative Patsy T. Mink, who had been denied admission to a medical school because of her sex, and Representative Edith Green, Congress established a principle we often take for granted today, the prohibition of sex discrimination in any federally funded educational program.

Title IX requires that ''No person in the United States shall, on the basis of sex, be excluded from participation in, or denied the benefits of, or be subjected to discrimination under any educational program or activity receiving Federal assistance.''

These 35 words over the last 35 years have had a profound impact, and the results are astounding. More women than ever now attend college, which means more women than ever go on to advanced degrees. In 1972 only 9 percent of law degrees were earned by women. In the mid-1970s, when I attended law school, that number had improved. Women then had made up 15 percent of the graduating class. Today women earn almost half of all law degrees. The story is similar for medical degrees and Ph.D.s.

This new generation of highly educated women has made a substantial impact on society. Expectations have changed. Girls expect to grow up and contribute to our country and the world in any way they want, as doctors, lawyers, CEOs, school principals, consultants, just to name a few careers previously underrepresented by women.

Title IX also literally changed the face of athletic programs and colleges throughout the country. In fact, it is through athletics that title IX's impact has seeped into the public's consciousness. In athletics the change from 1972 to 2007 is astounding. Today, college athletic opportunities abound for young women. In the past three decades, title IX has led to a 450 percent increase in the rate of female participation in college sports and a more than 900 percent increase in participation at the high school level. And the recent surge in women's professional sports teams could not have happened without the dramatic increase in women playing college sports.

The thousands of women athletes in basketball, volleyball, soccer, and other sports, where we can see them, root for them, and even play on the team with them, have had a huge impact. Young girls today take it for granted that they can play a sport and aspire to athletic scholarships to college. My own niece started playing volleyball in junior high, continued in high school, and is aiming for a volleyball scholarship to attend college. Women in my generation did not even consider this a possibility. Title IX opened the door to higher education for women in many ways, including through athletic scholarships.

These successes, both academic and athletic, are worth celebrating, as are the women who came before us here on the House floor as leaders of the title IX movement. In 2002, after Representative Patsy T. Mink passed away, Chairman GEORGE MILLER introduced a bill that named title IX the ''Patsy Takemoto Mink Equal Opportunity in Education Act.''

This picture of Patsy hangs in my office. She was my friend and continues to be an inspiration to me. I am proud to represent the congressional district that Patsy represented for so long and so well. I know that if she were here today, she would remind us that our work is not done.

There are many challenges still to be addressed. Women continue to face substantial barriers, especially in high-wage fields such as science, technology, engineering, and math. Women own less than 30 percent of all U.S. firms. Women make up only a third of chief executive officers and less than 20 percent of engineers. Sexual harassment remains pervasive in schools and on college campuses. Women's and girls' sports teams still receive only 33 percent of recruiting dollars and 38 percent of athletic operating dollars.

Title IX is as necessary today as it was in 1972.

I am pleased that over 120 of my colleagues are cosponsors on this resolution, including Speaker PELOSI. I urge all of my colleagues to join me in celebrating title IX's successes and in recognizing the work still to be done in our march towards equal educational opportunities.

Mr. Speaker, I reserve the balance of my time.

Mr. BISHOP of Utah. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, Resolution 406 is a resolution honoring the 35th anniversary of title IX of the Education Amendments of 1972. I would like to recognize my colleague Ms. HIRONO for introducing this resolution. The Education and Labor Committee will continue to celebrate the 35th anniversary of this law with a hearing tomorrow on this subject before the Subcommittee on Higher Education, Lifelong Learning and Competitiveness.

President Nixon signed title IX into law on June 23, 1972. The purpose of title IX was to eliminate discrimination based on gender in the education arena. While title IX applies to all areas of education, it is possibly best known for its role in sports. Thanks to this law, and perhaps more significantly from the growing interest in sports in this country, we have seen a dramatic increase in female athletes.

This law is far from perfect. Institutions continue to struggle with how to comply with title IX, trying to balance the participation rates of men with those of women. We do not want institutions to build up female participation at the expense of men's teams at the schools.

As I stated earlier, title IX is best known for its effect on sports. However, title IX does apply to all areas of education. In a time when we are continually talking about the need to educate America's students in the area of math and science, it is important that we also recognize the increasing numbers of female students pursuing careers in math and science. In 2004 the General Accounting Office issued a report on the participation of women in science. The report found that women's participation in the sciences increased substantially over the past 30 years. However, there is always more that can be done. As Congress looks to reform current programs, we should ensure that the programs being reformed are to encourage all students to enter into the sciences, math, and especially history.

The committee has no stated opposition to this resolution.

Mr. Speaker, I reserve the balance of my time.

Ms. HIRONO. Mr. Speaker, I would like to thank the gentleman from Utah for his remarks in support of the resolution.

Mr. Speaker, I am pleased to yield 3 minutes to the gentleman from Texas (Mr. HINOJOSA).

Mr. HINOJOSA. Mr. Speaker, I rise in strong support of H.R. 406, in celebration of the accomplishments of title IX, the Patsy Takemoto Mink Equal Opportunity in Education Act. I would like to thank my friend and colleague from Hawaii, Ms. Mazie Hirono, for bringing this to the House floor this week as we commemorate the 35th anniversary of this landmark legislation.

Title IX has forever changed the landscape of opportunity for women and girls. Since the enactment of title IX, the number of women participating in intercollegiate athletics has increased fivefold. The number of female high school athletes has grown by almost 900 percent. In 1972, just as title IX was enacted, women earned merely 28 percent of the bachelor's degrees in the fields of science, technology, engineering, and mathematics, better known as the STEM fields.

□ 1500

Today, women earn 49 percent of the bachelor's degrees in these fields.

On a personal point of privilege, I am proud to say that my four daughters, who are considering STEM fields as their professional careers, are proud to see that we remember Patsy Mink.

Despite these successes, we still have work to do to achieve the promises of full equality and freedom from discrimination that is at the heart of title IX. There are still gaps in support for women's athletics, gaps in participation in various disciplines in the STEM fields, and disparities in career and technical education programs. More critically, there is still much to be done to ensure that our educational institutions are free from sexual harassment.

It was a privilege to have served on the Education Committee with Congresswoman Patsy Mink of Hawaii, the original author of title IX. I joined her on the Committee of Education and also on the House floor to defend title IX and its reauthorization, and I am pleased to say we won.

It is up to us to honor her legacy and maintain the integrity of title IX, which simply states: ''No person in the United States shall, on the basis of sex be excluded from participation in, be denied the benefits of, or be subjected to discrimination under any education program or activity receiving Federal financial assistance.''

As the father of four daughters, I reaffirm my commitment to title IX and the legacy of Patsy Mink today with this vote. I urge all my colleagues to support this resolution, H. Res. 406.

Mr. BISHOP of Utah. Mr. Speaker, I reserve the balance of my time.

Ms. HIRONO. Mr. Speaker, I yield 3 minutes to the gentleman from Tennessee (Mr. COHEN).

Mr. COHEN. Mr. Speaker, I want to thank my freshman colleague from Hawaii for bringing this particular resolution. It is appropriate that she honors her predecessor, Congresswoman Mink, who did so much in this Hall. In passing this bill, she did some of the things that were similar to civil rights laws of the 1960s in a continuum, because discrimination, whether it be race or gender or national origin or sexual orientation, is wrong.

There are barriers this country needs to tear down and present a level playing field and an opportunity for all to enjoy the benefits of America. It is what Dr. King did talk about when he looked forward to getting to the Promised Land. That's part of what the Promised Land was, is, and will be. And so I thank the gentlelady for bringing the resolution.

I am going to take an opportunity here to make a mea culpa. Earlier, when I had to address the House on Stax Records, I forgot a few people. And one of the people I forgot was a women, Carla Thomas, who did ''Gee Whiz,'' and her father, Rufus Thomas, who did ''Walking the Dog.'' In music, many of the Stax Record people were men, they were the Staple Singers, but Carla Thomas was a great singer. And there are so many fields that have been opened up.

When I looked at the statistics that were made available to me, before title IX only 9 percent of the graduates from medical school were women. In 2004, there were 46 percent. In law, 7 percent had J.D. degrees for women, now 49 percent. When you think about those numbers, and that was just 35 years ago, Mr. Speaker, it's amazing how far we've come from the discrimination that existed at that time because of gender and what Representative Mink and the United States Congress' work did. It shows what can be positive and good about government.

There is a lot of good things that government can do and does do, and people forget that. If it weren't for civil rights pioneers, there would still be segregation. If it weren't for the work of the Congress in the middle 1960s, there would still be discrimination possibly in housing and public employment and other public facilities. And if it weren't for Congresswoman Mink, there would be discrimination against women. There is much good that comes. Forces within society help, but they propel people in government to act and take action that this Congress has seen has made America a greater place.

So it is my honor to stand and support the passage of this resolution that celebrates the 35th anniversary of title IX. It tells us just how far we've come in 35 years, but how just 35 years ago there were these limits. And the fact is, it was only 87 years ago that women got the right to vote. Mr. Speaker, 87 years ago women could not vote in this country, but this Congress, through a passage of a constitutional amendment, passed eventually by Tennessee as the perfect 36th State, gave women the right to vote in this country. So we've come a long way, but we've got a long way to go. And it is an honor to participate in this 35th anniversary.

I thank the gentlelady for giving me the time.

Mr. BISHOP of Utah. Mr. Speaker, I appreciate this opportunity of sharing this time with the gentlelady from Hawaii on this particular bill that was sponsored by the gentlelady from California (Ms. MATSUI).

Mr. Speaker, I yield back the balance of my time.

Ms. HIRONO. Mr. Speaker, before I yield back the balance of my time, I would just like to clarify that I am the original sponsor of this measure.

Ms. PELOSI. Mr. Speaker, today I join with my colleagues to celebrate the 35th anniversary of title IX of the Higher Education Act, which assured a woman's right to educational equality. And I thank Congresswoman HIRONO for bringing this resolution to the floor and for her leadership on this issue.

By ending gender discrimination in all education programs, title IX has given women the chance to excel and to take their rightful place as leaders and achievers on campuses across the United States. No longer would young women find their educational options limited by years of engrained discrimination. Thanks to title IX, women can now prepare for their future—whether in the halls of power or corporate boardrooms—in the classrooms and on the playing fields of America's colleges and universities.

Today also gives us the opportunity to honor our former colleague, friend, and champion for women's equality—Congresswoman Patsy Mink. As a member of the Education Committee in 1972, Congresswoman Mink helped craft title IX, and engineer its passage.

The day that the title IX legislation came to the floor, Congresswoman Mink was called away on a family emergency. She knew it would be a close vote. And she was right. That time, the bill was defeated by only a single vote. But Patsy fought on. Through sheer force of will, Congresswoman Mink forced another vote, an uncommon occurrence made possible by a woman of uncommon strength. And that time, women won. Congress passed title IX.

For her determination, the women of America will always owe a debt of gratitude to Congresswoman Patsy Mink.

As a mother and a grandmother, I have seen firsthand the results of title IX. Some are more visible, like the growing number of girls on soccer fields and basketball courts, the women of the WNBA, or the famous victory of Mia Hamm and Team USA in the World Cup.

Equally important, though less tangible, is the message that title IX sends to women and girls: Your education is crucial and your future is limitless.

Young women today believe that they can do anything. And they can.

For our children, we must continue to support this belief by fulfilling and sustaining the promise of title IX.

Mr. ABERCROMBIE. Mr. Speaker, I rise today in strong support of H. Res. 406, celebrating the accomplishments of title IX of the

Education Amendments of 1972, also known as the Patsy Takemoto Mink Equal Opportunity in Education Act, and recognizing the need to continue pursuing the goal of educational opportunities for women and girls.

Title IX changed the way the United States educates its women and girls. It states that, ''No person in the United States, shall, on the basis of sex, be excluded from participation in, be denied the benefits of, or be subjected to discrimination under any education program or activity receiving Federal financial assistance.'' This monumental legislation has had far-reaching effects on the women in this country. Title IX may be best known for its changes in athletics, but the academic world has been significantly changed as well. Since 1981, women have received more bachelor's degrees than men, and since 1986, women have received more master's degrees than men. None of this would have been possible without the hard work of Patsy Mink and Edith Green. Generations of women have and will benefit from the work of these women.

I had the honor of serving with Patsy Mink for 12 years, representing the State of Hawaii in the U.S. House of Representatives. She strove to ensure equality and fairness for all Americans. Through her work on title IX, she was able to accomplish just that for every American woman. The renaming of title IX to the Patsy Takemoto Mink Equal Opportunity in Education Act honors her work and reminds us all of her dedication to equality.

We should take this time to reflect on where we have come from and the progress we have made. Millions of women have access to the education to make their dreams come true, and that access was guaranteed 35 years ago by a woman who believed that we should all be able to better our lives.

Ms. SLAUGHTER. Mr. Speaker, I rise today in support of H. Res. 406, a resolution celebrating the accomplishments of Title IX. I would like to thank Congresswoman HIRONO for introducing this legislation addressing what is an important issue for women's equality.

Title IX requires that schools and colleges receiving Federal funds provide female students with athletic opportunities comparable to those of male students.

But as critical as this is, we must all begin to realize that Title IX is about more than civil rights.

For many young athletes, the scholarship opportunities afforded by Title IX might be the only way they can go to college. What is more, female athletes tend to graduate at higher rates, perform better in school, are less likely to use drugs and smoke, and have a more positive body image, more confidence, and better self-esteem than non-athletes.

As a direct result of Title IX, women's participation in intercollegiate sports has skyrocketed, proving that interest follows opportunity. In 1972, about 30,000 women played college sports. Today, that number has increased by more than 450 percent. Similarly, in 1972, about 200,000 girls participated in high school athletics. Today, that number has increased by more than 900 percent.

It would be wrong of me to speak about Title IX without taking time to honor my dear friend and beloved colleague, Patsy Mink. In 1972, Patsy helped to enact Title IX and in honor of her valiant work, Congress renamed Title IX the ''Patsy Takemoto Mink Equal Opportunity in Education Act.'' She struggled for 30 years to protect educational equity for men and women, and if she were with us today, I am certain that she would be proud of our continued fight to promote equality for all young women around the country.

While we celebrate how far we have come, we must also recognize that we still have a way to go. Women remain underrepresented in school sports, with men receiving 1.3 million more high school athletic opportunities and $148 million more athletic scholarship money each year.

In the face of such realities, I am proud to join my colleagues to support this resolution, a statement of our determination to recommit ourselves to the causes of education, opportunity, and equality in our society.

Ms. WATERS. Mr. Speaker, throughout this Nation's history there has been an undeniable struggle to insure that the American dream of liberty and justice for all becomes the American reality. For the current reality is one of a country tainted with prejudice; a country in which discrimination based on race, sex, and class permeates every aspect of our society. Still, throughout history there have been those who have fought with courage and conviction for justice and equity, and it is because of them that we as a Nation have progressed.

The late Congresswoman Patsy Takemoto Mink is one such person. Today I rise in support of H.R. 406 which celebrates the accomplishments of Congresswoman Mink and the passage of Title IX of the 1972 Education Amendments. Title IX, also known as the Equal Opportunity in Education Act, prohibits discrimination on the basis of sex in the administration of education programs.

Congresswoman Mink, a courageous champion of women's rights, once declared, ''All persons regardless of their sex, must have enough opportunities open so that they can contribute as much to their lives and this society as they can.'' Mink served 12 terms in this House representing Hawaii, and throughout those 12 terms, she was steadfast in her commitment to social justice. Due to her stalwart conviction, Title IX and its enactment are responsible for increased educational opportunities for women and girls. As such, among women, high school graduation rates have risen to 85 percent, those earning bachelors degrees has reached 26 percent, and employment opportunities are ever improving. It is because of Title IX that our country's women and girls are able to pursue their dreams without the hindrances of institutionalized oppression. As a result of Title IX, our women are able to learn, grow, and thrive unapologetically.

It must, however, be noted that despite this undeniable progress, there still remains much work to be done. H.R. 406 enumerates the numerous arenas in which women must still battle for fair and equitable treatment. To this day, women are still victims of sexual harassment in the workplace, salary inequality in comparison to their male counterparts, and limited access to career opportunities in the fields of math and science. Let us not become complacent and find solace in the status quo, as true equality has yet to be attained.

The 35 years since enactment of Title IX can be lauded as 35 years of progress. We must continue to commemorate the legislatures and the legislation that propel our country forward. We must continue to work towards a future in which social ills such as bigotry and sex discrimination are of the past. Let us take pride in what has been accomplished by pioneers such as Congresswoman Mink while continuing the fight for equality, justice, and the realization of the American dream.

Mrs. MALONEY of New York. Mr. Speaker, I rise in strong support of H. Res. 406, introduced by our new colleague from Hawaii, MAZIE HIRONO. Following in the long tradition of her fellow Hawaiian, our beloved Congresswoman PATSY MINK, Rep. HIRONO has introduced this important resolution which celebrates the 35th anniversary and accomplishments of Title IX of the Higher Education Act.

Title IX constituted a landmark civil rights victory for equal opportunity. It has created an even playing field for women to obtain crucial scholarships to help defray the rapidly escalating costs of a college education, facilitating the steady rise in the number of female doctors, attorneys, professors and corporate executives who help keep the American economy humming. Title IX has also signaled a sea change in women's athletics, with girls' participation in high school sports skyrocketing by 800 percent and in college by 400 percent since its passage. Because of Title IX, our daughters are healthier, have higher grades, lower pregnancy rates, are less likely to use drugs and are more likely to graduate from college.

Though Title IX has been a huge success, the battle for equality is not yet won. In 2002, women made up 54 percent of college students, but they only comprised 43 percent of college athletes. Meanwhile, men received 36 percent more athletic scholarships than women. Women also receive only 20 percent of computer science and engineering-related technology bachelor's degrees and only 39 percent of all full professors at colleges and universities are women.

Girls and women have benefitted immeasurably from this critical legislation. Now is the time to praise and protect Title IX, not curtail it. I thank Congresswoman HIRONO for recognizing this important anniversary and call on my colleagues to support this resolution.

Ms. LINDA T. SANCHEZ of California. Mr. Speaker, this week, we celebrate the 35th anniversary of the signing of title IX into law. Title IX was enacted on June 23, 1972, and it marked a major milestone for American women.

Title IX is a deceptively simple piece of legislation, requiring that ''no person in the United States shall, on the basis of sex, be excluded from participation in, be denied the benefits of, or be subjected to discrimination under any education program or activity receiving Federal financial assistance.'' Who knew that one unpretentious sentence could accomplish so much? But title IX has provided the framework for an America that finally guaranteed a truly equal education for men and women.

The positive effects of this legislation are evident. Women now have the opportunity to participate in any sport they desire. Before title IX, two-time Olympic gold medalist Donna de Varona was effectively forced to retire from amateur swimming at the age of 17 because

no American colleges were offering women scholarships in swimming or most other competitive sports. But today, just a generation later, NCAA women's sports and professional female sports leagues such as the WNBA are thriving and giving women everywhere chances to be superstars that they've never had before.

But I think the most telling effect of title IX is the fact that today, more women than men are attending college. Equal education for women was rare before 1972, when many law and medical schools allowed a maximum of 15 women in per year, and when women were often shut out of classes such as criminal justice and auto mechanics. Today, well over half of all undergraduate college students are women—and women outnumber men in graduate school enrollment, including high-paying, high-powered professional programs like law.

Title IX was all about opportunities. Title IX gave women new chances that they had never had before, and today, it is easy to see that women around the country are taking full advantage of them. While you might be able to name only a few famous women making news at the turn of the 20th century, it wouldn't take you more than a minute to name dozens—maybe even hundreds—of female news makers at the turn of the 21st century. It's amazing how many outstanding women have carved out careers in journalism, science, law, politics, sports, and the arts—and disheartening to imagine the amazing women of the past who were never given the chance. I am excited to see what today's little girls will do with the opportunities title IX will provide to them.

Ms. WOOLSEY. Mr. Speaker, I rise today in strong support of this resolution honoring Title IX and the woman who played a key role in its passage, Congresswoman Patsy Mink. I was privileged to serve with Patsy on the Education and Labor Committee from the time I started serving in 1993. She took me under her wing and was a true mentor to me, inspiring me with her example.

There has been no stronger voice in Congress for girls, women, and minorities than Patsy's. Her work here has touched countless women's lives. Women today don't have to face the barriers and discrimination that Patsy faced when applying to graduate school.

Her firsthand experience with gender discrimination—being denied admission to medical school as a promising young science student—did not discourage her or break her spirit, but sparked her desire for change.

Most importantly, when she overcame gender and racial barriers to climb the ladder of success, she did not kick that ladder aside for other women; instead, she led the way and supported their upward rise, most importantly, paving the way with legislation such as Title IX. She never gave up the struggle to give every child access to a quality education.

Her memory continues to be an inspiration for me on the Education and Labor committee and in the legislation that I introduce and cosponsor. This Congress, I will again introduce legislation to start a Patsy Mink fellowship program to help more women and minorities earn graduate degrees and become college professors.

A lot more work remains to be done to give women more educational opportunities: women are still underrepresented in math, science, and engineering-related fields.

Thanks in large part to Patsy's work, a majority of people agree that women should be allowed to apply to college and graduate programs without facing discriminatory admissions policies, sexual harassment in schools when they do get in, or even a lack of athletic opportunities. We are well served by Patsy's legacy, a true guiding star.

Mr. HASTINGS of Florida. Mr. Speaker, I rise today in support of H. Res. 406 and the far reaching achievements of Title IX of the Education Amendments of 1972, also known as the Patsy Takemoto Mink Equal Opportunity in Education Act. There is no question that women in this country have come a long way in the past 35 years, and there is little doubt that much of that progress is a result of title IX.

Prior to the passage of title IX, it was commonplace for colleges and universities to refuse admission to women simply on the basis of their gender. Of the handful of female college professors, most taught at all-female colleges, received salaries lower than their male counterparts, and very few were ever awarded tenure. Back then, schools could deny women training in fields deemed ''inappropriate'' such as woodworking or automotive repair, and girls ere discouraged from studying math and science. Only 1 in 27 girls played high school sports, and female college athletes received only 2 percent of overall athletic budgets.

This landmark legislation, passed in 1972, prohibits gender-based discrimination in federally funded education programs and activities. Its effects have been felt far beyond the classroom and athletic field.

Today, women earn undergraduate and graduate degrees at much higher rates, even comprising a majority of undergraduate and graduate school enrollment. Women can no longer be denied access to the vocational courses of their choice, and girls now take upper-level math and science classes at the same rate as boys. Additionally, female participation in intercollegiate athletics has increased by 400 percent over the past 30 years. In high school athletics, female participation has increased by 800 percent.

Title IX's passage has allowed girls and women to see no boundaries to their potential. Today, they can look around and see female doctors, lawyers, astronauts, CEOs of Fortune 500 companies, Nobel laureates and NASCAR drivers. They even have a female Speaker of this House to serve as their role model. Title IX has led to the advancement of women in countless areas of our society. However, the work of title IX is not yet complete.

Still today, women, on average, earn only 75 cents for every $1 a man earns. Even more, women continue to lag behind men in earning doctoral and professional degrees. In academia, women earn less, hold lower ranking positions and are less likely to be awarded tenure than men. Despite comprising over 50 percent of the student population, women make up only 42 percent of high school and college varsity athletes, and male athletes receive $137 million more than female athletes in college athletic scholarships. That does not even take into account the barriers that title IX does not address. Negative stereotypes, subtle discrimination, and workplace practices that indirectly adversely affect women are still pervasive in our society.

Mr. Speaker, even in this great body, which is supposed to be representative of the American people, only 17 percent of our Members are female. Therefore, while we celebrate title IX's accomplishments over the last 35 years, it is necessary to remember that the struggle for gender equity continues.

I proudly commend Congresswoman HIRONO for introducing this resolution which celebrates the far reaching accomplishments of title IX. I look forward to the day that all Americans are able to achieve their promise regardless of their gender.

Mr. SARBANES. Mr. Speaker, title IX of the Education Amendments of 1972 changed everything about our college admissions process. Led by the late Representatives Patsy T. Mink and Edith Green, Congress established a principle we often take for granted today—the prohibition of gender discrimination in any federally funded educational program. The effects of the law have been substantial.

In 1972, only 42 percent of Bachelors of Arts degrees were earned by women; by 2004 that number rose to 57 percent. Only 9 percent of medical degrees were awarded to women; now it's above 45 percent. Not surprisingly, law degrees were the most imbalanced. In 1972, only 7 percent of law degrees were held by women and by 2004 almost 50 percent went to women. Only 15 percent of PhD's went to women before title IX and that number is now close to 50 percent.

This progress is worth celebrating but we have plenty more to do. Title IX has as much utility now as it did in 1972. Women continue to face substantial barriers, especially in high wage fields such as science, technology, engineering and math. Sexual harassment remains pervasive in schools and on college campuses. Women and girls' sports teams still do not receive an equal share of resources.

Ms. HIRONO. Mr. Speaker, I yield back the remainder of my time.

The SPEAKER pro tempore. The question is on the motion offered by the gentlewoman from Hawaii (Ms. HIRONO) that the House suspend the rules and agree to the resolution, H. Res. 406.

The question was taken; and (two-thirds being in the affirmative) the rules were suspended and the resolution was agreed to.

A motion to reconsider was laid on the table.

DR. FRANCIS TOWNSEND POST OFFICE BUILDING

Mr. DAVIS of Illinois. Mr. Speaker, I move to suspend the rules and pass the Senate bill (S. 1352) to designate the facility of the United States Postal Service located at 127 East Locust Street in Fairbury, Illinois, as the ''Dr. Francis Townsend Post Office Building''.

The Clerk read the title of the Senate bill.

The text of the Senate bill is as follows:

S. 1352

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. DR. FRANCIS TOWNSEND POST OFFICE BUILDING.

(a) DESIGNATION.—The facility of the United States Postal Service located at 127 East Locust Street in Fairbury, Illinois, shall be known and designated as the ''Dr. Francis Townsend Post Office Building''.

(b) REFERENCES.—Any reference in a law, map, regulation, document, paper, or other record of the United States to the facility referred to in subsection (a) shall be deemed to be a reference to the ''Dr. Francis Townsend Post Office Building''.

The SPEAKER pro tempore. Pursuant to the rule, the gentleman from Illinois (Mr. DAVIS) and the gentleman from Idaho (Mr. SALI) each will control 20 minutes.

The Chair recognizes the gentleman from Illinois.

GENERAL LEAVE

Mr. DAVIS of Illinois. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Illinois?

There was no objection.

Mr. DAVIS of Illinois. Mr. Speaker, I yield myself as much time as I might consume.

As a member of the House Committee on Oversight and Government Reform, I am pleased to join my colleague in consideration of S. 1352, which names a postal facility in Fairbury, Illinois, after Dr. Francis Townsend.

S. 1352, which was introduced by Senator RICHARD DURBIN on May 10, 2007, was reported from the Oversight Committee on June 12, 2007 by a voice vote.

Dr. Francis Townsend was born in 1867 into an impoverished Illinois farming family. Shortly after he was born, his family moved to Nebraska, where he graduated from high school and began a varied career. He tried farming and selling in Kansas, land speculation in Los Angeles, and worked as a laborer in Colorado.

In 1899, he enrolled in the Omaha Medical College, and graduated in 1903 at the age of 36. He served as an Army doctor in World War I and during the Great Depression, and took a job as the assistant director of the City Health Office in Long Beach, California. At the age of 66, Dr. Townsend lost his job and found himself both poor and out of work.

There were millions of elderly people just like him who were barely making ends meet. One day he had a vision of how to help the elderly and the country as a whole. He wrote a letter to a newspaper outlining his ''old-aged pension plan for seniors.'' This plan created a Federal pension of $200 a month paid to every citizen 60 and older on the condition that the pensioner spend the entire sum within 30 days in order to stimulate the economy. His efforts influenced the passage of President Franklin D. Roosevelt's Social Security Act.

Mr. Speaker, I commend my colleague from Illinois, Senator RICHARD DURBIN, for introducing this legislation, and I urge swift passage.

Mr. Speaker, I reserve the balance of my time.

Mr. SALI. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, I rise today to honor one of Fairbury, Illinois' most famous citizens, and that was Dr. Francis Townsend. He was an American physician best known for creating the Townsend Old-age Revolving Pension plan and for spurring social movement that advocated for benefits for the elderly during the 1930s.

Dr. Townsend, the son of a farmer, grew up in Fairbury, Illinois, and attended Omaha Medical College in 1917. Shortly after becoming a physician, he served in the Army Medical Corps during World War I. After leaving the Army, he began a medical practice in Long Beach, California. When this was not successful, he obtained employment as the assistant city health director. Sadly, due to the Great Depression, he lost that job and was forced into retirement.

In 1933, Dr. Townsend witnessed something extremely heartbreaking but not uncommon during the Great Depression when he saw three old ladies searching through trash cans in his back alley for food. This became a watershed moment for the doctor. In response to what he observed, and his inner drive to help others, he decided to become involved in politics. Later that year he created the Townsend Plan, which proposed creating a Federal pension of $200 a month for every citizen 60 years old and older on the condition that the money would be spent within 30 days in order to stimulate the economy.

By 1934, through his leadership and determination to help the downtrodden, the plan generated a great deal of support and gave rise to the establishment of at least 5,000 ''Townsend clubs'' nationwide. At the height of popularity, membership in the clubs totaled over 2 million people.

By 1935, an additional 25 million Americans signed petitions to Congress and the White House supporting the implementation of Dr. Townsend's plan. He became such a national celebrity by this time that he testified before Congress.

Thanks to Dr. Townsend's efforts, his social crusades sparked a national antipoverty movement in 1933 that likely contributed to the expedited passage of Franklin D. Roosevelt's Social Security Act of 1935, one of the major initiatives of the New Deal.

Dr. Townsend was a steadfast leader and original thinker. His efforts to fight poverty during our Nation's worst economic crisis and his exemplary civic activism are an example for us all.

Naming the Fairbury, Illinois, post office after one of its most famous citizens during the sesquicentennial anniversary of Fairbury is a fitting celebration of both Dr. Townsend's contributions to the city and to this important milestone.

Mr. Speaker, I yield back the balance of my time.

Mr. DAVIS of Illinois. Mr. Speaker, I would just close by noting that here is an excellent example of a citizen with an idea, an idea that was promulgated into legislation, legislation that all of us, if we live to be 65 or somewhat close to, benefit from. And so I think it is indeed appropriate.

Again, I want to thank Senator DURBIN for introducing this legislation.

Mr. Speaker, I yield back the balance of my time.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from Illinois (Mr. DAVIS) that the House suspend the rules and pass the Senate bill, S. 1352.

The question was taken.

The SPEAKER pro tempore. In the opinion of the Chair, two-thirds being in the affirmative, the ayes have it.

Mr. DAVIS of Illinois. Mr. Speaker, on that I demand the yeas and nays.

The yeas and nays were ordered.

The SPEAKER pro tempore. Pursuant to clause 8 of rule XX and the Chair's prior announcement, further proceedings on this question will be postponed.

□ 1515

RECOGNIZING THE SIGNIFICANCE OF JUNETEENTH INDEPENDENCE DAY

Mr. DAVIS of Illinois. Mr. Speaker, I move to suspend the rules and agree to the concurrent resolution (H. Con. Res. 155) recognizing the historical significance of Juneteenth Independence Day, and expressing the sense of Congress that history should be regarded as a means for understanding the past and more effectively facing the challenges of the future.

The Clerk read the title of the concurrent resolution.

The text of the concurrent resolution is as follows:

H. CON. RES. 155

Whereas news of the end of slavery did not reach frontier areas of the United States, and in particular the Southwestern States, for more than 2 years after President Lincoln's Emancipation Proclamation of January 1, 1863, and months after the conclusion of the Civil War;

Whereas on June 19, 1865, Union soldiers led by Major General Gordon Granger arrived in Galveston, Texas, with news that the Civil War had ended and that the enslaved were free;

Whereas African Americans who had been slaves in the Southwest celebrated June 19, commonly known as Juneteenth Independence Day, as the anniversary of their emancipation;

Whereas African Americans from the Southwest continue the tradition of Juneteenth Independence Day as inspiration and encouragement for future generations;

Whereas for more than 135 years, Juneteenth Independence Day celebrations have been held to honor African American freedom while encouraging self-development and respect for all cultures;

Whereas although Juneteenth Independence Day is beginning to be recognized as a national, and even global, event, the history behind the celebration should not be forgotten; and

Whereas the faith and strength of character demonstrated by former slaves remains an example for all people of the United States, regardless of background, religion, or race: Now, therefore, be it

Resolved by the House of Representatives (the Senate concurring), That—

(1) Congress recognizes the historical significance of Juneteenth Independence Day to the Nation;

(2) Congress supports the continued celebration of Juneteenth Independence Day to provide an opportunity for the people of the United States to learn more about the past and to better understand the experiences that have shaped the Nation;

(3) the President is urged to issue a proclamation calling on the people of the United States to observe Juneteenth Independence Day with appropriate ceremonies, activities, and programs; and

(4) it is the sense of Congress that—

(A) history should be regarded as a means for understanding the past and more effectively facing the challenges of the future; and

(B) the celebration of the end of slavery is an important and enriching part of the history and heritage of the United States.

The SPEAKER pro tempore. Pursuant to the rule, the gentleman from Illinois (Mr. DAVIS) and the gentleman from Idaho (Mr. SALI) each will control 20 minutes.

The Chair recognizes the gentleman from Illinois.

GENERAL LEAVE

Mr. DAVIS of Illinois. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Illinois?

There was no objection.

Mr. DAVIS of Illinois. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, this year marks the 142nd anniversary of Juneteenth Independence Day. On June 19, 1865, MG Gordon Granger and Union soldiers arrived in Galveston, Texas, with the news of the Emancipation Proclamation and the end of the Civil War. News of President Abraham Lincoln's Emancipation Proclamation on January 1, 1863, did not reach the frontier areas of the United States, especially the Southwest, for almost 2½ years. General Granger's General Order No. 3 on June 19, 1865, is recognized as the day that all slaves in the United States were finally freed.

Juneteenth has become recognized as a State, regional, and national event that honors the freeing of slaves in the United States. As Americans, we must never forget how precious freedom is. Juneteenth is the day that all Americans of all races, creeds and ethnic backgrounds can celebrate freedom and the end of slavery in the United States. Its historical significance should be regarded as a means of understanding the past and more effectively facing the challenges of the future.

As the sponsor of H. Con. Res. 155, I encourage all of my colleagues to support this legislation and urge President Bush to issue a proclamation observing Juneteenth Independence Day with appropriate ceremonies, activities and programs.

Mr. Speaker, I reserve the balance of my time.

Mr. SALI. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, it is difficult to imagine a time when national news took months and sometimes years to disseminate throughout the country. Today we get immediate news updates through various outlets. But it was over 2 years after President Lincoln gave the historical Emancipation Proclamation that the slaves of Galveston, Texas, learned that their long-deserved freedom had been won. It was on that date, June 19, 1865, when Union soldiers made their way southwest to spread the joyful news of their Civil War victory.

Every year on June 19, commonly known as Juneteenth Independence Day, African Americans in the Southwest and around the Nation celebrate their emancipation, their culture and the historic significance of the civil rights struggles. It is critical that we educate our children not only of American history and the Civil War, but the tradition of Juneteenth Independence Day. By taking time to celebrate these anniversaries, we honor the richness, diversity and heritage of all races that form our great Nation.

June 19th is a time to acknowledge a period of history that helped shape our Nation and continues to influence our society today. It is with great honor that I support the passage of House Concurrent Resolution 155.

Mr. Speaker, I yield back the balance of my time.

Mr. DAVIS of Illinois. Mr. Speaker, I want to thank the gentleman from Idaho for his remarks and comments and for his support of this resolution. I also would just note that I attended a Juneteenth celebration in the neighborhood where I live on Saturday, and, of course, they had speeches, poems, readings and historical proclamations that people did.

To make sure that all Members of the House and of the Senate have an opportunity to participate in an observance, Senator BARACK OBAMA and I are sponsoring an observance on tomorrow in the Gold Room in the House Office Building, and certainly would welcome all to attend.

Mr. Speaker, I urge passage of this concurrent resolution.

Mr. HOYER. Mr. Speaker, I rise today to voice my strong support for H. Con. Res. 155, "Recognizing the Historical Significance of Juneteenth Independence Day."

As someone who has spent more than a quarter of a century serving the people of Maryland's Fifth Congressional District in the House of Representatives, I have developed a profound appreciation for the hard work that goes into creating the laws of our land. However, it is not the passage of legislation or signing ceremonies with the President that I will remember most when my time here is done. Rather, it is seeing the way that our work positively impacts the lives of those we serve out in the real world.

This is why Juneteenth Independence Day holds such special significance for me. Because Juneteenth isn't a celebration of the Emancipation Proclamation itself, it is a commemoration of the day that Abraham Lincoln's historic decree finally accomplished what it was designed to do—abolish slavery in the United States forever.

When the Emancipation Proclamation took effect on January 1, 1863, it ended slavery in the Union states, but did nothing to outlaw the cruel and barbaric practice in the states loyal to the Confederacy. It wasn't until 2½ years later—when Major General Gordon Granger landed at Galveston, Texas, with news that the Civil War was over, the United States was whole once again, and that all slaves in every part of our nation were now free—that the spirit of abolition was finally fulfilled.

That day was June 19, 1865—and today, we mark the 142nd anniversary of the moment that freedom, equality and the unabated pursuit of happiness were extended to all citizens of the United States, regardless of race, religion or ethnicity.

It gives me great pride to join my colleagues in Congress—as well as Americans from all walks of life—in commemorating our country's oldest celebration of the abolishment of slavery, and in honoring all of the achievements and contributions of African Americans throughout our nation's history.

Mr. PAUL. Mr. Speaker, I am pleased to support H. Con. Res. 155, legislation commemorating a monumental day in the history of liberty, Juneteenth Independence Day. Juneteenth marks the events of June 19, 1865, when slaves in Galveston, TX, learned that they were at last free men and women. The slaves of Galveston were the last group of slaves to learn of the end of slavery. Thus, Juneteenth represents the end of slavery in America.

I hope all Americans will take the time to commemorate Juneteenth. Friends of human liberty should celebrate the end of slavery in any country. The end of American slavery is particularly worthy of recognition since there are few more blatant violations of America's

founding principles, as expressed in the Declaration of Independence, than slavery. I am particularly pleased to join the recognition of Juneteenth because I have the privilege of representing Galveston.

I thank the gentleman from Illinois for introducing this resolution, which I am proud to cosponsor. I thank the House leadership for bringing this resolution to the floor, and I urge all of my colleagues to honor the end of slavery by voting for H. Con. Res. 155.

Ms. JACKSON-LEE of Texas. Mr. Speaker, I rise today in support of H. Con. Res. 155, which recognizes the historical significance of Juneteenth Independence Day, and expresses the sense of Congress that history should be regarded as a means for understanding the past and more effectively facing the challenges of the future.

June 19th also known as Juneteenth, is the oldest nationally celebrated commemoration of the ending of slavery in the United States. From its Galveston, Texas origin in 1865, the observance of June 19th as the African American Emancipation Day has spread across the United States and beyond, yet it is still not a nationally recognized holiday.

On January 1, 1980, Juneteenth became an official Texas state holiday through the efforts of Al Edwards, an African American state legislator. The successful passage of this bill marked Juneteenth as the first emancipation celebration granted official state recognition. Representative Edwards has since actively sought to spread the observance of Juneteenth all across America.

Today, Juneteenth commemorates African-American freedom. This special day emphasizes education and achievement. It is a day, a week, and in some areas, a month marked with celebrations, guest speakers, picnics and family gatherings. It is a time for reflection and rejoicing. It is a time for assessment, self-improvement and for planning the future. Its growing popularity signifies a level of maturity and dignity in America long overdue. In cities across the country, people of all races, nationalities and religions are joining hands to truthfully acknowledge a period in our history that shaped and continues to influence our society today. Sensitized to the conditions and experiences of others, only then can we make significant and lasting improvements in our society.

The Civil Rights movement of the 50's and 60's yielded both positive and negative results for the Juneteenth celebrations. While it pulled many of the African American youth away and into the struggle for racial equality, many linked these struggles to the historical struggles of their ancestors. This was evidenced by student demonstrators involved in the Atlanta civil rights campaign in the early 1960's, who wore Juneteenth freedom buttons.

Again in 1968, Juneteenth received another strong resurgence through the Poor People's March to Washington, DC, Rev. Ralph Abernathy's call for people of all races, creeds, economic levels and professions to come to Washington to show support for the poor. Many of these attendees returned home and initiated Juneteenth celebrations in areas previously absent of such activity. In fact, two of the largest Juneteenth celebrations founded after this march are now held in Milwaukee and Minneapolis.

Throughout the 80's and 90's Juneteenth has continued to enjoy a growing and healthy interest from communities and organizations throughout the country. Institutions such as the Smithsonian, the Henry Ford Museum and others have begun sponsoring Juneteenth-centered activities. In recent years, a number of National Juneteenth Organizations have risen to take their place alongside older organizations—all with the mission to promote and cultivate knowledge and appreciation of African American history and culture.

Juneteenth today celebrates African American freedom while encouraging self-development and respect for all cultures. As it takes on a more national and even global perspective, the events of 1865 in Texas are not forgotten. The future of Juneteenth looks bright as the number of cities and states come on board and form local committees and organizations to coordinate the activities.

Now in 2007, I push forward with the hope that my colleagues will remember with compassion the African American citizens who helped build this country, but were still held in illegal bondage due to the hatred, bigotry and cruelty of others. I ask that my colleagues help support this resolution and its efforts in making Juneteenth a nationally recognized holiday.

Mr. HASTINGS of Florida. Mr. Speaker, I rise today to commemorate the passage of House Concurrent Resolution 155. This resolution recognizes Juneteenth's significance in crafting a rich African American legacy. Juneteenth, also known as Freedom or Emancipation Day, is an informal observance in fourteen states in the United States. It marked the beginning of a new phase in African-American history, when emancipated slaves along with their former owners began, slowly and haltingly, to travel the long road to equality and integration.

Celebrated on June 19th, Juneteenth is the name given to emancipation day by African Americans in Texas. On that day in 1865, Union Major General Gordon Granger read General Order #3, officially proclaiming freedom for slaves in that state. Granger's ride through Galveston culminated a two-and a half-year trek through America's deep south to liberate the enslaved.

Juneteenth is an expression and extension of American freedom, and like the Fourth of July, is a time for all Americans to celebrate our independence, human rights, civil rights and freedom. It is an occasion where time, history and culture conspire to celebrate such a symbolic event.

The celebration of June 19th as emancipation day spread from Texas to the neighboring states of Louisiana, Arkansas, and Oklahoma. It has also appeared in Alabama, Florida, and California as African American Texans migrated to those regions. Juneteenth's commemoration did not only extend its geographic reach but it also embraced participants from all political and civic segments of the black community.

Unfortunately, my home state does not officially recognize Juneteenth but has an unofficial commemoration on May 20th in the capital, Tallahassee. Even as we acknowledge the evils of slavery and the ravages it wrought upon our society while paying tribute to those who suffered with no recompense, Juneteenth challenges us to strengthen our bonds of unity and to offer support to one another.

Even more importantly, Juneteenth does not polarize black and white Americans. Rather, it has become an annual cultural observance primarily devoted to civic affairs because it encourages us to be sensitive to others' conditions and experiences, so that we can make significant and lasting improvements in our society. Like the African Sankofa, we must acknowledge and honor our past. But we must always fervently forge to solidify a hopeful future.

Regrettably, the African American community continues to confront many challenges in mitigating and eventually eliminating institutional racism. Emancipation did not bring equality. We still live in a society plagued by prejudices and stereotypes. I find it unfathomable that such a momentous occasion is seldom acknowledged, much less celebrated. We must not let our past dictate our present. After all, we owe it to the thousands of lives that were mercilessly destroyed by an elitist society designed to subject and suppress them. Let us take the initiative to finally tend to a gashing wound that has crippled the African American community. Let us honor our ancestors and build a future noteworthy of their legacy.

Mr. Speaker, Juneteenth is a significant event that addresses the paradoxical race relations in our nation! It recognizes the impediments faced by the black community yet continues to inspire us to strive for an egalitarian society. We should set precedence on addressing past atrocities and present disparities so that we can truly embody democracy. I am honored to support this resolution.

Mr. DAVIS of Illinois. Mr. Speaker, I yield back the balance of my time.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from Illinois (Mr. DAVIS) that the House suspend the rules and agree to the concurrent resolution, H. Con. Res. 155.

The question was taken; and (two-thirds being in the affirmative) the rules were suspended and the concurrent resolution was agreed to.

A motion to reconsider was laid on the table.

RECOGNIZING THE SIGNIFICANCE OF NATIONAL CARIBBEAN-AMERICAN HERITAGE MONTH

Mr. DAVIS of Illinois. Mr. Speaker, I move to suspend the rules and agree to the concurrent resolution (H. Con. Res. 148) recognizing the significance of National Caribbean-American Heritage Month.

The Clerk read the title of the concurrent resolution.

The text of the concurrent resolution is as follows:

H. CON. RES. 148

Whereas people of Caribbean heritage are found in every State of the Union;

Whereas emigration from the Caribbean region to the American Colonies began as early as 1619 with the arrival of indentured workers in Jamestown, Virginia;

Whereas during the 17th, 18th, and 19th centuries, a significant number of slaves from the Caribbean region were brought to the United States;

Whereas since 1820, millions of people have emigrated from the Caribbean region to the United States;

Whereas much like the United States, the countries of the Caribbean faced obstacles of slavery and colonialism and struggled for independence;

Whereas also like the United States, the people of the Caribbean region have diverse racial, cultural, and religious backgrounds;

Whereas the independence movements in many countries in the Caribbean region during the 1960s and the consequential establishment of independent democratic countries in the Caribbean strengthened ties between the region and the United States;

Whereas Alexander Hamilton, a founding father of the United States and the first Secretary of the Treasury, was born in the Caribbean;

Whereas there have been many influential Caribbean-Americans in the history of the United States, including Jean Baptiste Point du Sable, the pioneer settler of Chicago; Claude McKay, a poet of the Harlem Renaissance; James Weldon Johnson, the writer of the Black National Anthem; Shirley Chisolm, the first African-American Congresswoman and first African-American woman candidate for President; and Celia Cruz, the world-renowned queen of Salsa music;

Whereas the many influential Caribbean-Americans in the history of the United States also include Colin Powell, the first African-American Secretary of State; Sidney Poitier, the first African-American actor to receive the Academy Award for best actor in a leading role; Harry Belafonte, a musician, actor, and activist; Marion Jones, an Olympic gold medalist; Roberto Clemente, the first Latino inducted into the baseball hall of fame; and Al Roker, a meteorologist and television personality;

Whereas Caribbean-Americans have played an active role in the civil rights movement and other social and political movements in the United States;

Whereas Caribbean-Americans have contributed greatly to education, fine arts, business, literature, journalism, sports, fashion, politics, government, the military, music, science, technology, and other areas in the United States;

Whereas Caribbean-Americans share their culture through carnivals, festivals, music, dance, film, and literature that enrich the cultural landscape of the United States;

Whereas the countries of the Caribbean are important economic partners of the United States;

Whereas the countries of the Caribbean represent the United States third border;

Whereas the people of the Caribbean region share the hopes and aspirations of the people of the United States for peace and prosperity throughout the Western Hemisphere and the rest of the world;

Whereas in June 2006, President George W. Bush issued a proclamation declaring June National Caribbean-American Heritage Month after the passage of H. Con. Res 71 in the 109th Congress by both the Senate and the House of Representatives; and

Whereas June is an appropriate month to establish a Caribbean-American Heritage Month: Now, therefore, be it

Resolved by the House of Representatives (the Senate concurring), That Congress—

(1) supports the goals and ideals of Caribbean-American Heritage Month;

(2) encourages the people of the United States to observe Caribbean-American Heritage Month with appropriate ceremonies, celebrations, and activities; and

(3) affirms that—

(A) the contributions of Caribbean-Americans are a significant part of the history, progress, and heritage of the United States; and

(B) the ethnic and racial diversity of the United States enriches and strengthens the Nation.

The SPEAKER pro tempore. Pursuant to the rule, the gentleman from Illinois (Mr. DAVIS) and the gentleman from Idaho (Mr. SALI) each will control 20 minutes.

The Chair recognizes the gentleman from Illinois.

GENERAL LEAVE

Mr. DAVIS of Illinois. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Illinois?

There was no objection.

Mr. DAVIS of Illinois. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, as a member of the House Committee on Oversight and Government Reform, I am pleased to join my colleagues in the consideration of H. Con. Res. 148, a bill that recognizes the significance of National Caribbean-American Heritage Month.

H. Res. 148, which has 53 cosponsors, was introduced by Representative BARBARA LEE of California on May 14, 2007. H. Con. Res. 148 was reported from the Oversight Committee on June 12, 2007, by a voice vote.

National Caribbean-American Heritage Month was established to recognize the historical relationship between people of the Caribbean and the United States of America. Caribbean Americans present a rich diversity of countries, cultures and colloquialisms which are dispersed throughout communities in the United States. Caribbean immigration to the United States reached its peak in the last 5 years, with approximately 6 percent of the more than 7 million immigrants coming from the Caribbean.

Since the founding of the United States, Caribbeans have had a significant role in shaping the conscience of America and are among our great leaders, entrepreneurs and entertainers, including such individuals as Sidney Poitier, Harry Belafonte, Colin Powell, James Weldon Johnson, Shirley Chisholm, Marion Jones, Juan Carlos Finlay, Oscar de la Renta, Malcolm X, Jean Baptiste Point du Sable, the founder of Chicago, Marcus Garvey, and many others.

Mr. Speaker, I commend my colleague for introducing this legislation and I urge its passage.

Mr. Speaker, I reserve the balance of my time.

Mr. SALI. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, each year in June, we celebrate our strong relationship with the Caribbean nations and appreciate the value and diversity they bring to the United States. We value National Caribbean-American Heritage Month and encourage people from across the country to join with those of Caribbean-American roots in these celebrations. From as far back as the 17th century, citizens from the Caribbean have immigrated to the U.S. Many were slaves, who faced the same obstacles struggling for equality and independence.

We are a Nation of immigrants, and this bill emphasizes the many contributions of Caribbean immigrants to our society. Over 5 million Americans proudly share the Caribbean heritage in promoting and attending Caribbean-style festivals around the country. These festivals appreciate the rich culture, history and diversity brought forth through the joining of these two nations.

I urge all my colleagues to join me in supporting passage of House Concurrent Resolution 148.

Mr. Speaker, I have no further requests for time, and I yield back the balance of my time.

Ms. LEE. Mr. Speaker, I am pleased that the House is considering today, my resolution H. Con. Res. 148, recognizing the significance of Caribbean-American Heritage month. This resolution acknowledges the contributions of Caribbean-Americans from the inception of our country to the present and it is my hope that my colleagues in the House and the Senate will join me in celebrating this strong, rich history.

Alexander Hamilton, Hazel Scott, Sidney Poitier, Jean Michel Basquiat, Eric Holder, Colin Powell, Edwidge Danticat, Jean Baptiste Point du Sable, Sidney Ponson, Maryse Condé, Harry Belafonte, Sidney Poitier, Roberto Clemente, Celia Cruz, and former Congressman Mervyn Dymally, are just a few of the many Caribbean-Americans who helped shape American government, politics, business, arts, education, science, and culture, and are joined by modern day figures like Alicia Keys, Lenny Kravitz, Bobby Cannavale, Cameron Diaz, Wyclef Jean, Elizabeth Vargas, Esmeralda Santiago, and Miguel Piñero.

One outstanding Caribbean-American was former Congresswoman Shirley Anita Chisholm. My political career began as a volunteer in her historic Presidential campaign in 1972. Chisholm was the first African-American woman to serve in Congress, the first African-American and the first woman to campaign on a major party ticket, an advocate for civil rights and equal rights, and a daughter of the Caribbean. Her tenacity and principled nature are inspirations to us all.

While we've been fortunate to have Caribbean Americans serve in Congress, it's important for us to realize that Caribbean Americans reside throughout our Nation.

Oftentimes, Congress will focus on "hot spots" in the Caribbean—such as Cuba and

Haiti, and forget that we have many constituents with roots from Jamaica to Trinidad and Tobago and from the Dominican Republic to Guyana. As a member of the House Appropriations Committee's subcommittee on Foreign Operations and the bi-partisan Caribbean Caucus, I believe it is of vital importance to monitor and shape policies to improve relations with our Caribbean neighbors throughout the region.

I'd like to thank my colleagues who brought this legislation forward, particularly Congressman John Tierney, and his staff Kevin McDermott, who helped move the resolution through the House Oversight and Government Reform Committee. On that note, I'd also like to thank Chairman Henry Waxman and the rest of the Oversight and Government Reform Committee for expeditious consideration of this resolution.

I'd like to close by mentioning that this resolution could not have come to the floor of this House at a better time, as members of the Caribbean Community, or CARICOM, are gathering here in Washington, DC, for their conference, which will run through the rest of the week. Heads of State and other leaders of the many nations that are part of CARICOM, representing the nations of Antigua and Barbuda, the Bahamas, Barbados, Belize, Dominica, Grenada, Guyana, Haiti, Jamaica, Montserrat, Saint Kitts and Nevis, Saint Lucia, Saint Vincent and the Grenadines, Suriname, and Trinidad and Tobago, as well as nations that are Associate Members and Observers of CARICOM. It is my hope that this conference will not only allow these nations to help move the Caribbean as a whole, forward, but also provide the opportunity for us to meet with and discuss issues important to growing the relationship between the U.S. and the nations along our Third Border.

I ask all of my colleagues on both sides of the aisle to join me in supporting this measure to honor the Caribbean-American community.

Mr. HASTINGS of Florida. Mr. Speaker, I rise today to commemorate the passage of House Concurrent Resolution 148 which declares June as National Caribbean American Heritage Month. I am honored to be a cosponsor of this bill because it recognizes the contributions of Caribbean Americans to the social, economic and cultural landscape to the United States of America. The West Indies represents a diverse melting pot with each island bringing its own unique enriching element to this country's background. With approximately 34 million people and 16 independent nations sharing an African ethnic heritage, the Caribbean is a cosmopolitan region.

Some may wonder, what are we really celebrating during Caribbean Heritage Month? What makes these dynamic groups of people so distinct? Since the 17th century, West Indian slaves were shipped to the Americas. The Caribbean region continued to suffer slavery's wrath long after its abolition. Colonialism continued to strangle the region's independence, creating fragmented and dependent economies. However, in just over 40 years of independence, the region has established democratic governments and strengthened ties with the United States. Despite extenuating circumstances, these former colonies are now rising states which continue to infuse American mainstream culture.

According to the 2005 American Community Survey, some 2.2 million American residents have a West Indian background. Moreover, approximately 32 percent of the Caribbean-American population is currently enrolled in college or graduate school, and 33 percent of the West Indian population is employed in educational, health care, and social services. In my home state of Florida, there is an estimated 649,000 Caribbean Americans. Approximately 30 percent of this population is currently enrolled in college or graduate school and 25 percent are employed in educational, health care, and social services.

Large, dynamic and remarkable communities with Caribbean ancestry exhibit this diversity in Florida's 23rd Congressional District. I am so privileged to represent people of virtually every single Caribbean heritage. From Lauderhill to Miramar to West Palm Beach to Oakland Park, I am honored to work on behalf of all of these communities and many more. There are approximately 153,000 Caribbean Americans currently residing in Florida's 23rd District. The Haitian community is one of the largest in the United States. In Broward County, Puerto Ricans comprise the largest Caribbean group at more than 50,000.

Furthermore, the second largest concentration of Cubans in the United States is in Broward County, with approximately 50,000 Cuban-American residents. Palm Beach County has the sixth largest concentration of Cuban-American residents in the United States, with more than 25,000 Cuban-American residents. Moreover, about 25,000 Palm Beach County residents are of Puerto Rican descent, and more than 7,500 are of Dominican descent.

Mr. Speaker, the National Caribbean American Heritage Month's declaration attests to the United States' reception to Caribbean influence in our country's history and its present socio-economic structure. Undeniably, the educational, political, and artistic influences of Caribbean Americans continue to permeate several facets of our society. The American spirit is a tapestry that weaves cultures together, one in which people of all traditions and walks of life convene to better protect and educate one another. The Caribbean-American people are an invaluable part of this tapestry.

Mr. DAVIS of Illinois. Mr. Speaker, I yield back the balance of my time.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from Illinois (Mr. DAVIS) that the House suspend the rules and agree to the concurrent resolution, H. Con. Res. 148.

The question was taken; and (two-thirds being in the affirmative) the rules were suspended and the concurrent resolution was agreed to.

A motion to reconsider was laid on the table.

MAJOR SCOTT NISELY POST OFFICE

Mr. DAVIS of Illinois. Mr. Speaker, I move to suspend the rules and pass the bill (H.R. 2563) to designate the facility of the United States Postal Service located at 309 East Linn Street in Marshalltown, Iowa, as the ''Major Scott Nisely Post Office''.

The Clerk read the title of the bill.

The text of the bill is as follows:

H.R. 2563

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. MAJOR SCOTT NISELY POST OFFICE.

(a) DESIGNATION.—The facility of the United States Postal Service located at 309 East Linn Street in Marshalltown, Iowa, shall be known and designated as the ''Major Scott Nisely Post Office''.

(b) REFERENCES.—Any reference in a law, map, regulation, document, paper, or other record of the United States to the facility referred to in subsection (a) shall be deemed to be a reference to the ''Major Scott Nisely Post Office''.

The SPEAKER pro tempore. Pursuant to the rule, the gentleman from Illinois (Mr. DAVIS) and the gentleman from Idaho (Mr. SALI) each will control 20 minutes.

The Chair recognizes the gentleman from Illinois.

GENERAL LEAVE

Mr. DAVIS of Illinois. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days to revise and extend their remarks.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Illinois?

There was no objection.

Mr. DAVIS of Illinois. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, as a Member of the House Committee on Oversight and Government Reform, I am pleased to join my colleagues in the consideration of H.R. 2563, which names the postal facility in Marshalltown, Iowa after Major Scott Nisely.

H.R. 2563, which was introduced by Representative TOM LATHAM on June 5, 2007, was reported from the Oversight Committee on June 12, 2007, by voice vote. This measure has the support of the entire Iowa congressional delegation.

Major Scott Nisely was killed in combat near Al Asad, Iraq on September 20, 2006. He served in the Marines as an officer on Active Duty and as a reservist with the 133rd Infantry Battalion Charlie Company.

He worked 12 years for the U.S. Postal Service in Marshalltown, Iowa. Due to his strong desire to serve his country, he accepted an enlisted rank in order to fill a vacancy in the Iowa Army National Guard. Major Scott had served a tour of duty during Operation Desert Storm as a marine, in addition to Operation Iraqi Freedom as a guardsman. He will be fondly remembered for his patriotism and love of family.

Mr. Speaker, I commend my colleague, Representative TOM LATHAM, for introducing this legislation, and urge its passage.

Mr. Speaker, I reserve the balance of my time.

Mr. SALI. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, Major Scott Nisely, a father, athlete and musician, made the ultimate sacrifice for his country on the field of battle and deserves the honor of having his name on the post office in Marshalltown, Iowa, where he worked for 12 years.

Scott was born in Syracuse, Nebraska in 1958, and excelled in track and cross country. He attended Doane College on a track scholarship and pursued a degree in biology.

He showed a passion for his country and did not shy away from the duty of serving his Nation. While in college, he enlisted in the United States Marine Corps ROTC, and after completing his Bachelor's degree in 1981, he was commissioned an Infantry Second Lieutenant in the U.S. Marine Corps.

□ 1530

He rose to the rank of captain and commanded an infantry company during Operation Desert Storm. After his tour in Kuwait and Iraq, he returned to the Reserves, where he was promoted to the rank of major.

Scott continued to serve his community even when out of the military. In 1994 he began working for the U.S. Postal Service in Marshalltown. He participated in his church's music ministry program and was active at the local tae kwon do. Above all, he worked tirelessly to serve others.

Even with such an impressive record of service under his belt, he could not ignore the call of duty. When his country went to war again, he enlisted in the Iowa Army National Guard and accepted the rank of staff sergeant in order to do so. In 2005, he returned to Iraq with C Company of the Iowa National Guard's 133rd battalion.

On September 30, 2006, he was providing security for a convoy in Al Anbar Province, Iraq, when his company came under insurgent small arms fire. He and a fellow member of the Guard were killed.

His decorations include the Combat Infantryman Badge, the Bronze Star Medal, the Oak Leaf Cluster, the Purple Heart, the Army Achievement Medal, and a dozen others.

Let us pay our respect to Major Scott E. Nisely and remember his commitment to serving this Nation by naming the Marshalltown post office in his honor.

Mr. Speaker, I reserve the balance of my time.

Mr. DAVIS of Illinois. Mr. Speaker, I continue to reserve the balance of my time.

Mr. SALI. Mr. Speaker, I yield such time as he may consume to the gentleman from Iowa (Mr. LATHAM).

Mr. LATHAM. Mr. Speaker, I thank the gentleman for yielding me this time.

First of all, I would like to thank the committee and the gentleman from Illinois, Chairman DAVIS, for moving this piece of legislation as quickly as they have through the committee and for the opportunity to bring this I think most appropriate legislation to the floor today.

Mr. Speaker, I rise today to encourage my colleagues to support legislation that I introduced to honor Major Scott E. Nisely of Marshalltown, Iowa, one of America's heroes who was killed in combat on September 30, 2006, while serving our country in Iraq.

Scott Nisely served 22 years in the Marines as an officer on active duty and as a Reservist, retiring with the rank of major. During his time in the Marines, he served as an infantry company commander in Operation Desert Storm. And following his active duty, Scott worked 12 years for the U.S. Postal Service in Marshalltown, Iowa.

Due to Scott's strong desire to serve his country, he accepted an enlisted rank in order to fill a vacancy in the Iowa Army National Guard in 2002.

According to letters I have received from soldiers in Scott's unit, he did not broadcast the fact that he was a former Marine major, but humbly served his fellow soldiers. One officer also said he was a ''natural born leader of soldiers.''

Scott served with the Iowa National Guard on the Multinational Forces Observer mission in the Sinai, and finally in Operation Iraqi Freedom.

Scott's friends, family, coworkers, fellow soldiers and marines attest to the positive and lasting impact he had on their lives. Numerous letters from these individuals were sent to me, and I include them for the RECORD.

Scott's life was a shining example of dedication to service, a strong commitment certainly to his family, his faith, and his country. This legislation will name the post office located at 309 East Linn Street in Marshalltown, Iowa, the Major Scott Nisely Post Office.

I want to thank Scott's co-workers at the Marshalltown post office who initiated this proposal, and I am proud to help them make this timely and appropriate honor a reality. I also want to thank my colleagues from Iowa, LEONARD BOSWELL, STEVE KING, BRUCE BRALEY and DAVE LOEBSACK for their support in moving this legislation forward. I strongly urge all Members to pass H.R. 2563.

DEPARTMENT OF THE ARMY,
HEADQUARTERS, 1ST BATTALION 133D INFANTRY,
Al Asad Ab, Iraq, June 8, 2007.

Congressman TOM LATHAM,
Ames, Iowa.

DEAR MR. LATHAM: I am responding to an inquiry to determine if my unit would support the consideration of naming the United States Post Office in Marshalltown, Iowa after one of my soldiers, Scott Nisely.

The bottom line on this is yes, I, and my entire unit fully support this effort, and see this as a fitting tribute to this fallen citizen soldier.

As a Battalion Commander, I have many soldiers that are under my command. I have deployed in the service of our country 3 times since September of 2000, I have been entrusted with some of the finest young people that our State and our Nation have to offer. Let me share with you a little bit about Scott Nisely from my perspective.

Scott joined the Iowa National Guard after completing a full military career in the Marine Corps, retiring from the Marine Corps as a Field Grade Officer. He then joined the National Guard as an enlisted soldier in the rank of a Buck Sergeant, because this was what was offered to him. On my second deployment, and my first with Scott Nisely, I asked him what motivated him to do this; his reply was that he felt he could make a difference in the lives of these young men, and he still felt a strong desire to serve his country in whatever capacity he could. He didn't care about the rank, he didn't care about the job, as long as he was working with young soldiers, and serving our country. To me this was evident during our OEF deployment, and in our current mission in Iraq.

Scott was a man that was respected by all those around him, not because of the words he said, but because of the way that he lived his life and by the example he set for others. We all lost something the day we lost SFC Nisely and SGT Sourivong. We cannot change the events that happened on that day, but we can honor these men, and the sacrifice that they have made. I believe by naming the Marshalltown Post Office in honor of Scott Nisely, we will always have a visible reminder of this sacrifice, and are honoring a great American who lived his life in a manner that we should all strive to pattern. He lived his life with honor and integrity, love for his family, and love for his country.

Sincerely,

BENJAMIN J. CORELL,
Lieutenant Colonel, Infantry,
Commanding.

DON DOUGLAS,
Marshalltown, IA, June 12, 2007.

To: Representative TOM LATHAM, R–IA.

I did not know Maj. Scott Nisely. But I am a veteran of the Vietnam era, who served my country in the Navy during the Vietnam era, 1961 to 1966. But my outfit anti subsquadron 25 North Island San Diego, CA served aboard USS Aircraft Carrier, USS Yorktown, CVS–10 off coast of Vietnam a couple of tours to that area. I am also a member of VFW Post 839 Marshalltown a life member, and I support our troops. Like I said I didn't personally know Maj. Nisely. But have heard his wife talk about him at hospice meetings I attend since my wife passed away in Feb. 07. It would be a great tribute to him and his family if legislation could be passed as soon as possible renaming Marshalltown Post Office after him.

Since Maj. Nisely put his life on line serving his country defending freedom and doing something he believed in this would be the right thing to do to honor him.

Thank you,

DON DOUGLAS.

LETTER FOR THE RECORD, IN SUPPORT OF H.R. 2563 (06/18/07):

I support naming the Marshalltown Post Office after Major Scott Nisely. He is a true American hero. I had the privilege of serving with him in the 1–133 Infantry in Iraq. He was a very dedicated soldier, always caring for his soldiers and everyone around him. I really looked up to him as a man.

He is a soldier that was dedicated to public service, serving our great nation in 2 wars, both in the Marine Corps and the U.S. Army. He also worked as a Postal Worker, which is a hard job for any American. I appreciate the sacrifices that he has made for our country, especially giving the ultimate sacrifice.

I feel that naming the Marshalltown Post Office in his honor is the least we can do to honor this great American. Please name the Marshalltown Post Office to the Major Scott Nisely Post Office. It will be a great memorial of a great American and great Iowan.

FIRST LIEUTENANT KYLE W. OBRECHT,
1–133 Infantry, Iowa Army National Guard.

I had the honor of working directly with ''SSG'' Nisely during our deployment to Iraq. I am sending this message of support from Iraq as we are still in theater performing our mission. As a squad leader and leader of men SSG Nisely always ensured the vehicles in his command were mission ready and that his soldiers were constantly on top of the readiness of their equipment.

As former NCO turned officer, I understood his role and his rank in the troop leading arena. SSG Nisely was one of the best NCOs I have ever had the experience of serving with. The funny part, and oftentimes told, part of his exemplary service is the fact that he was a former Marine Major before becoming a NCO in the Iowa National Guard. Not once did this fact ever come from him. He was always humble and loved serving his country and even more he honored our country by serving his men.

As a field grade officer in any service one trends to wane away from direct troop leading duties. SSG Nisely was a natural born leader of soldiers. I hope I can take this example and use it in my career.

Scott's sacrifice will never be forgotten by me or any soldier he served with in this war on terrorism. I hope the resolution will pass so that all Americans that come to use the facility being recommended for the name change will know that an American hero is honored and forever remembered.

FIRST LIEUTENANT (P)
MARCUS A. SMOOT, OD,
1–133 Infantry, Iowa Army National Guard.

I strongly support naming the Marshalltown Post Office after my friend Major Scott Nisely. This would be a nice reminder to patrons of the post office that Scott dedicated his life to serving the people. He did that through his selfless service in the Marine Corps, the Iowa National Guard, and his civilian career at the postal service. Scott was a great man; this has been a great loss to his family, to the military and to the Marshalltown community. Please support the initiative to name the Marshalltown post office in memory of Major Scott Nisely.

CAPTAIN JEFFREY STAKER,
1–133 Infantry, Iowa Army National Guard.

I strongly endorse the naming of a Post Office in Marshalltown, Iowa after Major Scott Nisely. I knew him from deployments to Sinai, Egypt and Iraq. I had several conversations with him and they were always pleasant. He was one of the friendliest guys I have ever met—always positive. Scott was a dedicated family man and a fine soldier. This would be a great way to honor him and his family. He deserves it—he was a hero. Thank you for addressing this.

MICHAEL SMITH,
1–133 Infantry, Iowa Army National Guard.

My husband is currently serving in Iraq and was there with Sgt. Nisely. What a hero this man was! I fully support the post office being named after this brave, wonderful man.

MRS. DOUG (BARB) KRAUSE,
Waverly, Iowa.

He was there for his soldiers, always doing something for people.

JOHN FORTUNE,
Specialist, Army National Guard.

I think that this would be a fitting remembrance for a great man and urge you to accept this proposal (H.R. 2563).

SPECIALIST CURTIS OLSON,
134th Brigade Support Battalion, Minnesota Army National Guard.

Mr. SALI. Mr. Speaker, I yield back the balance of my time.

Mr. DAVIS of Illinois. Mr. Speaker, I yield back the balance of my time.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from Illinois (Mr. DAVIS) that the House suspend the rules and pass the bill, H.R. 2563.

The question was taken.

The SPEAKER pro tempore. In the opinion of the Chair, two-thirds being in the affirmative, the ayes have it.

Mr. DAVIS of Illinois. Mr. Speaker, on that I demand the yeas and nays.

The yeas and nays were ordered.

The SPEAKER pro tempore. Pursuant to clause 8 of rule XX and the Chair's prior announcement, further proceedings on this question will be postponed.

CLEM ROGERS MCSPADDEN POST OFFICE BUILDING

Mr. DAVIS of Illinois. Mr. Speaker, I move to suspend the rules and pass the bill (H.R. 2127) to designate the facility of the United States Postal Service located at 408 West 6th Street in Chelsea, Oklahoma, as the ''Clem Rogers McSpadden Post Office Building''.

The Clerk read the title of the bill.

The text of the bill is as follows:

H.R. 2127

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. CLEM ROGERS MCSPADDEN POST OFFICE BUILDING.

(a) DESIGNATION.—The facility of the United States Postal Service located at 408 West 6th Street in Chelsea, Oklahoma, shall be known and designated as the ''Clem Rogers McSpadden Post Office Building''.

(b) REFERENCES.—Any reference in a law, map, regulation, document, paper, or other record of the United States to the facility referred to in subsection (a) shall be deemed to be a reference to the ''Clem Rogers McSpadden Post Office Building''.

The SPEAKER pro tempore. Pursuant to the rule, the gentleman from Illinois (Mr. DAVIS) and the gentleman from Idaho (Mr. SALI) each will control 20 minutes.

The Chair recognizes the gentleman from Illinois.

GENERAL LEAVE

Mr. DAVIS of Illinois. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks on H.R. 2127.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Illinois?

There was no objection.

Mr. DAVIS of Illinois. Mr. Speaker, I yield such time as he may consume to the author of this bill, the gentleman from Oklahoma (Mr. BOREN).

Mr. BOREN. Mr. Speaker, I rise today in support of H.R. 2127. This bill will designate the Chelsea, Oklahoma, post office as the Clem Rogers McSpadden United States Post Office.

Mr. Speaker, I am extremely proud to be the author of this bill. Today we have the opportunity to honor not just one of Oklahoma's finest individuals, but in any opinion one of America's finest. As many of you know, Clem McSpadden served as a Member of this body from 1973 until 1975. His colleagues will agree that Clem was a highly respected Member of this Chamber. In fact, Clem was honored with being the first freshman Member ever to be appointed to the Rules Committee. He also helped create the Rural Caucus, which I am a proud member of today.

Those are big shoes to fill for anyone, and that is why it is an honor for me to say I represent a portion of his former congressional district.

Mr. Speaker, I am also proud to mention that Clem isn't just known as being a former Member of Congress. As those of us from Oklahoma know, Clem has readily served in all aspects of life, ranging from politics to family to military service to rodeo announcer. If you asked people in Oklahoma about Clem, you will surely be met with warm stories about how he helped them during his time in the State Senate, how they remember him introducing legendary bull rider Freckles Brown, or how he just gave them some good advice.

Very few people, Mr. Speaker, would make such a great role model for us all. For this reason, I am proud to say I know Clem McSpadden and that he is a friend. More importantly, though, I am proud to say I am one of the many Oklahomans that he has had a positive influence on.

Mr. Speaker, Clem is the nephew of Oklahoma's favorite son, Will Rogers. In keeping with the family legacy, Clem, like his uncle, is fully a part of the fabric that makes Oklahomans the people we are today. We are a people who care about our fellow Oklahomans and who pay their dues through hard work. Clem represents these values on a daily basis and has done so his whole life. This, I venture to say, also makes him one of Oklahoma's favorite sons. For this reason, I find it fitting that we honor an individual like Clem Rogers McSpadden for his selflessness and dedication to our State and country.

Mr. Speaker, in 1974 my father ran for Governor and Clem McSpadden ran

for Governor the same year; and even though they were opponents in the election of 1974, they were friends after that election. I am also proud to say that when I was a member of the State legislature in my first term, Clem McSpadden took me aside and mentored me as a member of the legislature. He is a good man and I want to thank him for being a mentor to so many young people. I also want to thank his wife, Donna, for all that she does in the community of Chelsea and the State of Oklahoma.

Mr. Speaker, I encourage my colleagues to join me in supporting H.R. 2127.

Mr. SALI. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, to most residents of Rogers County, Oklahoma, and rodeo fanatics, the name Clem Rogers McSpadden is well recognized and much appreciated. Known as a ''son of Oklahoma,'' Clem Rogers McSpadden was born into the well-known Rogers family of which his home county is named. His great uncle is none other than the famous Will Rogers. But it is not his historical family background that we are here to speak about today.

We rise to honor the achievements of Clem McSpadden during his life in politics, his military service, community leadership, and successful career in rodeo broadcasting.

Clem McSpadden was raised on his two family ranches, Bushyhead Ranch near Chelsea, Oklahoma, and another in nearby Oologah. During his first year in Oklahoma Agricultural and Mechanical College, he left to join the U.S. Navy.

He served during World War II, and upon returning completed his education at Oklahoma A&M with a degree in animal husbandry. While at college, he and some friends formed a rodeo team.

His strong interest in roping began at an early age, and over time he served as general manager for the National Finals Rodeo, the Old Timers Rodeo and the Indian National Finals Rodeo. He has been announcing for over 60 years and estimates he has announced over 1,400 rodeos.

His esteemed career in politics came in 1954 when he was elected to the Oklahoma State senate, where he served until 1972. He went on to serve in the U.S. House of Representatives one term in the 93rd Congress. In 1983, he formed a consulting and lobbying firm McSpadden & Associates, which lobbies the Oklahoma Statehouse on a variety of issues. His powerful presence and influence continue to drive politics of his beloved Oklahoma.

Nowadays, he spends his time more quietly at home on his vast cattle ranch enjoying retirement with his family.

I urge Members to join me, Mr. Speaker, in passing H.R. 2127 to name this post office for Clem Rogers McSpadden.

Mr. Speaker, I reserve the balance of my time.

Mr. DAVIS of Illinois. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, as a member of the House Committee on Oversight and Government Reform, I am pleased to join my colleague in the consideration of H.R. 2127, which names a postal facility in Chelsea, Oklahoma, after Clem Rogers McSpadden. H.R. 2127, which was introduced by the gentleman from Oklahoma, Dan Boren, on May 3, 2007, was reported from the Oversight Committee on June 12, 2007, by a voice vote. This measure has the support of the entire Oklahoma congressional delegation.

Clem Rogers McSpadden was born on November 9, 1925, on a ranch near the small town of Bushyhead in Rogers County, Oklahoma. He served in the United States Navy during World War II from 1944 to 1946.

He was first elected to public office in November of 1954 to the Oklahoma State senate. In November of 1972, he was elected to the 93rd Congress and served one term from 1973 to 1975. Mr. McSpadden ran for Governor of Oklahoma in 1974 and lost the Democratic nomination. Presently, Mr. McSpadden is retired and living in Chelsea, Oklahoma.

Mr. Speaker, I commend my colleague, Representative DAN BOREN, for introducing this legislation and urge its swift passage.

Mr. Speaker, I reserve the balance of my time.

Mr. SALI. Mr. Speaker, we have no other speakers, so I yield back the balance of my time.

Mr. DAVIS of Illinois. Mr. Speaker, to simply close, let me again commend DAN BOREN for his introduction of this legislation.

□ 1545

I guess Representative McSpadden was kind of a chip off the block, and I asked if he could also make people laugh, and Dan said that he could indeed, as well as do any number of other things. So he is indeed a tribute to the Rogers and McSpadden families. I would urge passage of this bill.

Mr. Speaker, I yield back the balance of my time.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from Illinois (Mr. DAVIS) that the House suspend the rules and pass the bill, H.R. 2127.

The question was taken; and (two-thirds being in the affirmative) the rules were suspended and the bill was passed.

A motion to reconsider was laid on the table.

INTERNATIONAL NUCLEAR FUEL FOR PEACE AND NONPROLIFERATION ACT OF 2007

Mr. LANTOS. Mr. Speaker, I move to suspend the rules and pass the bill (H.R. 885) to support the establishment of an international regime for the assured supply of nuclear fuel for peaceful means and to authorize voluntary contributions to the International Atomic Energy Agency to support the establishment of an international nuclear fuel bank, as amended.

The Clerk read the title of the bill.

The text of the bill is as follows:

H.R. 885

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. SHORT TITLE AND TABLE OF CONTENTS.

(a) SHORT TITLE.—This Act may be cited as the ''International Nuclear Fuel for Peace and Nonproliferation Act of 2007''.

(b) TABLE OF CONTENTS.—The table of contents for this Act is as follows:

TITLE I—INTERNATIONAL REGIME FOR THE ASSURED SUPPLY OF NUCLEAR FUEL FOR PEACEFUL MEANS

SEC. 101. FINDINGS.

Congress makes the following findings:

(1) Since the United States Baruch Plan of 1946, the United States has believed that an increase in the number of countries that possess nuclear weapons and the means to create such weapons makes the world less secure and stable by increasing the chances that nuclear weapons would be used. A world in which nuclear weapons are used again is less secure for all concerned, and could well trigger a global arms race, as more countries will be tempted to arm themselves with nuclear weapons to prevent attacks by countries that possess nuclear weapons.

(2) It is therefore in the general security interest of all countries, and in the vital national security interest of the United States, that the number of countries that possess a nuclear weapons capability necessarily be kept to a minimum and ultimately reduced.

(3) Uranium enrichment and spent-fuel reprocessing facilities produce nuclear material that can either be used for peaceful purposes in electricity-generating reactors, or can be used to produce uranium and plutonium for nuclear weapons. As such, these facilities are inherently a proliferation risk, allowing their possessor to be just months away from the production of a nuclear explosive device.

(4) It is also therefore in the general security interest of all countries that the number of countries that operate uranium enrichment and spent-fuel reprocessing facilities also be kept to a minimum, consistent with the global demand for nuclear power reactor fuel.

(5) The financing and construction of additional uranium enrichment and spent-fuel reprocessing facilities in additional states around the world is indefensible on economic grounds alone, given current and future supplies of uranium and existing providers of uranium enrichment and spent-fuel reprocessing services to the world market.

(6) The desire to construct uranium enrichment and spent-fuel reprocessing facilities by additional countries, therefore, is often based upon considerations other than economic calculations. The possession of such facilities is often elevated to a matter of national pride—a demonstration to the world that the country that possesses this technology has arrived at a level of technological development comparable to that of the United States and other countries with advanced civil nuclear power programs.

(7) Furthermore, the acquisition of uranium enrichment and spent-fuel reprocessing facilities can be perceived as a demonstration of the developing world's independence from technological domination by the more developed states. Article IV of the Treaty on the Nonproliferation of Nuclear Weapons (21 UST 483; commonly referred to as the ''Nuclear Non-Proliferation Treaty'' or the ''NPT'') recognizes that State Parties have an ''inalienable right . . . to develop research, production and use of nuclear energy for peaceful purposes without discrimination.''. However, this is a qualified right conditioned by a State Party acting in conformity with the NPT's obligation for such countries not to acquire, possess, or develop nuclear weapons or nuclear explosive devices.

(8) It has been long recognized that the proliferation of national uranium enrichment and spent-fuel reprocessing facilities would increase the likelihood of the emergence of new nuclear weapon states. Concerned governments, nongovernmental organizations, and individual experts have for decades recognized the need to address this problem through multilateral assurances of the uninterrupted supply of nuclear fuel, the sharing of peaceful application of nuclear energy, an international fuel bank to provide fuel if the fuel supply to a country is disrupted, and even multilateral participation in international uranium enrichment and spent-fuel reprocessing facilities, as a means of reducing incentives of countries to develop and construct such facilities themselves.

(9) Until recently, such efforts have produced little more than reports. However, the revelations of a nuclear black-market in uranium enrichment technology and equipment, combined with the attempt by North Korea and Iran to possess such technology and equipment to provide the basis for nuclear weapons programs, have rekindled this debate with a new urgency.

(10) Iran has used the specter of a potentially unreliable international supply of nuclear reactor fuel as a pretext for developing its own uranium enrichment and spent-fuel reprocessing capability, which would enable Iran to also produce weapons-grade uranium and plutonium for nuclear weapons.

(11) Several initiatives have been proposed over the last year to address these concerns. The United States has proposed the Global Nuclear Energy Partnership (GNEP), which envisions a consortium of countries with advanced nuclear capabilities providing nuclear fuel services—fresh fuel and recovery of used fuel—to other countries that agree to employ nuclear energy only for power generation purposes, without possessing national uranium enrichment and spent-fuel reprocessing facilities.

(12) The United States also joined France, the Russian Federation, Germany, the United Kingdom, and the Netherlands on May 31, 2006, in proposing a ''Concept for a Multilateral Mechanism for Reliable Access to Nuclear Fuel'' that would facilitate or create new arrangements between suppliers and recipients to provide fuel to countries with good nonproliferation credentials in case of market failure.

(13) Any assurance of the supply of nuclear fuel should meet the condition outlined by President George W. Bush on February 11, 2004, that ''The world's leading nuclear exporters should ensure that states have reliable access at reasonable cost to fuel for civilian reactors, so long as those states renounce enrichment and reprocessing.''.

(14) The Russian Federation has proposed that one of its uranium enrichment facilities be placed under international management and oversight, as part of a ''Global Nuclear Power Infrastructure'' proposal to create international nuclear fuel cycle centers.

(15) In conclusion, the creation of a multitiered system to assure the supply of nuclear reactor fuel at current market prices, under appropriate safeguards and conditions, could reassure countries that are dependent upon or will construct nuclear power reactors that they will have an assured supply of nuclear fuel at current market prices, so long as such countries forgo national uranium enrichment and spent-fuel reprocessing facilities and are committed to the nonproliferation of nuclear weapons.

SEC. 102. SENSE OF CONGRESS.

It is the sense of Congress that—

(1) the ''Concept for a Multilateral Mechanism for Reliable Access to Nuclear Fuel'', proposed by the United States, France, the Russian Federation, Germany, the United Kingdom, and the Netherlands on May 31, 2006, is welcomed and should be expanded upon at the earliest possible opportunity;

(2) the proposal by the Government of the Russian Federation to bring one of its uranium enrichment facilities under international management and oversight is also a welcome development and should be encouraged by the United States;

(3) the offer by the Nuclear Threat Institute (NTI) of $50,000,000 in funds to support the creation of an international nuclear fuel bank by the International Atomic Energy Agency (IAEA) is also welcomed, and the United States and other member states of the IAEA should pledge collectively at least an additional $100,000,000 in matching funds to fulfill the NTI proposal; and

(4) the governments, organizations, and experts currently engaged in developing the initiatives described in paragraphs (1) through (3) and other initiatives should seek to identify additional incentives to be included in an international regime for the assured supply of nuclear fuel for peaceful means at current market prices, including participation in non-weapons-relevant technology development and fuel leasing to further persuade countries that participation in such a multilateral arrangement far outweighs the temptation and expense of developing national uranium enrichment and plutonium reprocessing facilities.

SEC. 103. STATEMENTS OF POLICY.

(a) GENERAL STATEMENT OF POLICY.—It is the policy of the United States to support the establishment of an international regime for the assured supply of nuclear fuel for peaceful means under multilateral authority, such as the International Atomic Energy Agency.

(b) ADDITIONAL STATEMENT OF POLICY.—It is further the policy of the United States to—

(1) oppose the development of a capability to produce nuclear weapons by any non-nuclear weapon state, within or outside of the NPT;

(2) encourage states party to the NPT to interpret the right to ''develop research, production and use of nuclear energy for peaceful purposes,'' as described in Article IV of the NPT, as being a qualified right that is conditioned by the overall purpose of the NPT to prevent the spread of nuclear weapons and nuclear weapons capability, including by refraining from all nuclear cooperation with any state party that has not demonstrated that it is in full compliance with its NPT obligations, as determined by the International Atomic Energy Agency; and

(3) strengthen the Nuclear Suppliers Group guidelines concerning consultation by members regarding violations of supplier and recipient understandings by instituting the practice of a timely and coordinated response by Nuclear Suppliers Group members to all such violations, including termination of nuclear transfers to an involved recipient, that discourage individual Nuclear Suppliers Group members from continuing cooperation with such recipient until such time as a consensus regarding a coordinated response has been achieved.

SEC. 104. REPORT.

Not later than 180 days after the date of the enactment of this Act, the President shall transmit to the Committee on Foreign Affairs of the House of Representatives and the Committee on Foreign Relations of the Senate a report on the activities of the United States to support the establishment of an international regime for the assured supply of nuclear fuel for peaceful means at current market prices under multilateral authority, such as the International Atomic Energy Agency. The report shall include an assessment of the feasibility of establishing an international fuel services center within the United States.

TITLE II—INTERNATIONAL NUCLEAR FUEL BANK

SEC. 201. VOLUNTARY CONTRIBUTIONS TO THE INTERNATIONAL ATOMIC ENERGY AGENCY.

(a) VOLUNTARY CONTRIBUTIONS AUTHORIZED.—The President is authorized to make voluntary contributions on a grant basis to the International Atomic Energy Agency (hereinafter in this section referred to as the ''IAEA'') for the purpose of supporting the establishment of an international nuclear fuel bank to maintain a reserve of low-enriched uranium for reactor fuel to provide to eligible countries in the case of a disruption in the supply of reactor fuel by normal market mechanisms.

(b) REQUIREMENTS.—Voluntary contributions under subsection (a) may be provided only if the President certifies to the Committee on Foreign Affairs of the House of Representatives and the Committee on Foreign Relations of the Senate that—

(1) the IAEA has received pledges in a total amount of not less than $100,000,000 and is in receipt of not less than $75,000,000 of such pledges for the purpose of supporting the establishment of the international nuclear fuel bank referred to in subsection (a);

(2) the international nuclear fuel bank referred to in subsection (a) will be established within the territory of a non-nuclear weapon state, and will be under the oversight of the IAEA, only if—

(A) the non-nuclear weapon state, among other things—

(i) has a full scope safeguards agreement with the IAEA and an additional protocol for safeguards in force;

(ii) has never been determined by the IAEA Board of Governors to be in noncompliance with its IAEA full scope safeguards agreement and its additional protocol for safeguards; and

(iii) has effective enforceable export controls regarding nuclear and dual-use nuclear technology and other sensitive materials comparable to those maintained by the United States; and

(B) the Secretary of State has never determined, for purposes of section 6(j) of the Export Administration Act of 1979, section 620A of the Foreign Assistance Act of 1961, section 40 of the Arms Export Control Act, or any other provision of law, that the government of the non-nuclear weapon state has repeatedly provided support for acts of international terrorism;

(3) the international nuclear fuel bank referred to in subsection (a) will provide nuclear reactor fuel to a country only if, at the time of the request for nuclear reactor fuel—

(A) the country is in full compliance with its IAEA safeguards agreement and has an additional protocol for safeguards in force;

(B) in the case of a country that at any time prior to the request for nuclear reactor fuel has been determined to be in noncompliance with its IAEA safeguards agreement, the IAEA Board of Governors determines that the country has taken all necessary actions to satisfy any concerns of the IAEA Director General regarding the activities that led to the prior determination of noncompliance;

(C) the country agrees to use the nuclear reactor fuel in accordance with its IAEA safeguards agreement;

(D) the country has effective and enforceable export controls regarding nuclear and dual-use nuclear technology and other sensitive materials comparable to those maintained by the United States;

(E) the country does not possess uranium enrichment or spent-fuel reprocessing facilities of any scale; and

(F) the government of the country is not a state sponsor of terrorism for purposes of section 6(j) of the Export Administration Act of 1979, section 620A of the Foreign Assistance Act of 1961, section 40 of the Arms Export Control Act, or any other provision of law;

(4) the international nuclear fuel bank referred to in subsection (a) will not contain uranium enrichment or spent-fuel reprocessing facilities; and

(5) the nuclear reactor fuel referred to in paragraph (3) will be provided to a country referred to in such paragraph only at current market prices.

(c) WAIVER.—The President may waive the requirement of subparagraph (F) of subsection (b)(3) if the President—

(1) determines that it is important to the national security interests of the United States to do so; and

(2) transmits to the Committee on Foreign Affairs of the House of Representatives and the Committee on Foreign Relations of the Senate a report that contains the basis of the determination under paragraph (1).

(d) RULE OF CONSTRUCTION.—Nothing in this section shall be construed to authorize voluntary contributions under subsection (a) to support subsidization of the price of nuclear reactor fuel whose supply would be assured by the United States, the IAEA, or any other state or international entity covered by this section.

SEC. 202. AUTHORIZATION OF APPROPRIATIONS.

(a) IN GENERAL.—To carry out section 201, there is authorized to be appropriated to the President $50,000,000 for fiscal year 2008.

(b) AVAILABILITY OF APPROPRIATIONS.—Amounts appropriated pursuant to the authorization of appropriations under subsection (a) are authorized to remain available until September 30, 2010.

The SPEAKER pro tempore. Pursuant to the rule, the gentleman from California (Mr. LANTOS) and the gentlewoman from Florida (Ms. ROS-LEHTINEN) each will control 20 minutes.

The Chair recognizes the gentleman from California.

GENERAL LEAVE

Mr. LANTOS. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days to revise and extend their remarks and include extraneous material on the bill under consideration.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from California?

There was no objection.

Mr. LANTOS. Mr. Speaker, I rise in strong support of our resolution, and I yield myself such time as I might consume.

Mr. Speaker, this bill is a dramatic step forward in the epic struggle to contain the spread of nuclear arms around the globe. Our bill provides a safe, efficient and collaborative means of getting nuclear fuel to any country that pledges not to develop nuclear arms and delivers on that promise. It will help ensure stability and expose the subterfuge that we know Iran is perpetrating in order to further its nuclear weapons pursuit.

We know full well, Mr. Speaker, that Tehran is actively pursuing a nuclear weapons program. But many are persuaded by Iran's argument that it needs access to a reliable nuclear fuel supply to meet its civilian power needs.

Now, of course we know that Iran's argument is bogus, but Tehran has used the illusory threat of a global breakdown in the supply of nuclear reactor fuel to argue that it must have its own facilities to guarantee that its reactors are forever supplied with fuel. At the moment, Iran is going to have two of these reactors.

We know that the Iranian pretext has been long recognized as a gap in the global nuclear non-proliferation regime. A state can exploit the non-proliferation treaty's recognition of its good standing to develop peaceful uses of the atom and acquire potentially dangerous technology such as uranium enrichment. It could then turn around and use the technology to support a nuclear weapons program.

Our legislation, the International Nuclear Fuel for Peace and Non-proliferation Act, addresses this gap in the nuclear non-proliferation regime and removes Iran's pretext for its so-called peaceful enrichment plan. It does so by promoting the development of an international regime of assured supply of peaceful nuclear power fuel to countries in good standing on their nuclear non-proliferation commitments.

Our legislation, Mr. Speaker, authorizes $50 million to support the establishment of an international nuclear fuel bank supervised by the International Atomic Energy Agency. This money will match the $50 million offered by Mr. Warren Buffett to the Sam Nunn Nuclear Threat Initiative.

The Sam Nunn program support is crucial to the realization of this initiative, but so is the political will of countries around the globe capable of cooperating in such a regime. So after this bill's passage today, I intend to work with key nations to establish the international nuclear fuel bank.

I am very pleased, Mr. Speaker, that our Secretary of State, Dr. Condoleezza Rice, and our former distinguished colleague Senator Sam Nunn, who has perhaps done more to advance the cause of nuclear non-proliferation than anyone else, have fully embraced this bill, and the administration is on record supporting it.

Ours is a broadly supported, bipartisan bill. It would not have come to fruition without the enthusiastic support of my good friend, the ranking member of the Foreign Affairs Committee, our colleague ILEANA ROS-LEHTINEN. It was approved by our committee unanimously, a rare phenomenon in this era of divisive partisanship.

It is imperative that we keep nuclear weapons out of the hands of Iran and provide a source of peaceful nuclear fuel to all countries that are currently flirting with nuclear development programs. I, therefore, urge all of my colleagues to support this most important measure.

Mr. Speaker, I reserve the balance of my time.

Ms. ROS-LEHTINEN. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, again, it's a joy to bring another truly bipartisan bill to the floor, thanks to the very able and skilled leadership of Chairman LANTOS of our Foreign Affairs Committee.

This bill, as amended, Mr. Speaker, is a version of the original introduced by our esteemed Chairman LANTOS and contains several new and important provisions that I would like to explain today.

The first of these addresses the supposed right of all countries to manufacture their own nuclear fuel through enrichment or repossessing.

The central problem of this assertion, Mr. Speaker, is that there's very little difference, as we know, in the technology that is used for civilian or for military purposes. So countries

such as Iran, which are undoubtedly trying to acquire nuclear weapons, can innocently claim to be establishing a legitimate civilian nuclear program, a claim which can be virtually impossible for the outside world to disprove. For this reason, the acquisition of a similar capability by more and more countries, for whatever reason, means that the technology and the infrastructure needed to manufacture nuclear weapons will expand as well.

The continued spread of this deadly capacity poses an existential threat to the United States and, indeed, the entire world. We cannot allow this to continue. Unfortunately, efforts to stop this growing danger are undermined by a common but erroneous interpretation of the Nuclear Non-Proliferation Treaty, or NPT, specifically article IV, which some assert gives every signatory country an absolute right to enrich and to reprocess.

It is both surprising and disappointing that many of the most ardent opponents of continued proliferation throughout the globe are also strong advocates of this supposed unrestricted right. In fact, Mr. Speaker, the treaty clearly states that the right to nuclear technology is conditioned by articles I and II, which are aimed at preventing the spread of nuclear weapons, including the capacity to manufacture them.

As such, it is the responsibility of countries seeking this capability to go beyond mere assertion and adopt measures that will conclusively demonstrate that it can be used only for peaceful purposes. It should not be the responsibility of the rest of the world to prove that the opposite is true. Iran has taught us the deadly foolishness of that approach.

I believe that it is profoundly wrong to hold the security of American people hostage to this flawed interpretation. Therefore, we have a responsibility to the people whom we represent to openly state the truth, that the NPT does not grant to all signatories an absolute right to enrich and reprocess. And the U.S. must work with our allies and others, as Mr. LANTOS has pointed out, to ensure that this position becomes an integral element in the global non-proliferation effort.

A second set of changes to the original legislation places conditions on any country seeking to host a nuclear fuel bank, as well as on states that wish to receive fuel from the bank. The most important of these conditions, Mr. Speaker, is that state sponsors of terrorism would be prohibited from hosting a nuclear fuel bank and also from receiving fuel from it. This provision is essential to ensure that terrorist states, such as Iran, especially in their nuclear programs, do not benefit from the establishment of such a bank.

A further provision mandates that both host and recipient states have an effective and enforceable export control program regarding nuclear and dual-use technology comparable to that of the United States.

In addition, there is a stipulation that countries seeking assistance from a fuel bank cannot possess enrichment and reprocessing facilities.

A final set of changes, Mr. Speaker, would ensure that any fuel made available by the bank would be at the current market price, thereby sparing U.S. taxpayers from the open-ended burden of subsidizing the nuclear programs of other countries.

With the inclusion of these measures, Mr. Speaker, I am proud to cosponsor Mr. LANTOS' legislation, and I believe that it will prove to be a significant addition to the global non-proliferation effort.

I strongly urge my colleagues to support it.

Mr. Speaker, I have no other speakers, and I yield back the balance of our time.

Mr. LANTOS. Mr. Speaker, we have no additional requests for time, and we yield back the balance of our time.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from California (Mr. LANTOS) that the House suspend the rules and pass the bill, H.R. 885, as amended.

The question was taken; and (two-thirds being in the affirmative) the rules were suspended and the bill, as amended, was passed.

A motion to reconsider was laid on the table.

□ 1600

CALLING ON UNITED NATIONS SECURITY COUNCIL TO CHARGE IRANIAN PRESIDENT WITH CERTAIN VIOLATIONS BECAUSE OF HIS CALLS FOR DESTRUCTION OF ISRAEL

Ms. WATSON. Mr. Speaker, I move to suspend the rules and agree to the concurrent resolution (H. Con. Res. 21) calling on the United Nations Security Council to charge Iranian President Mahmoud Ahmadinejad with violating the 1948 Convention on the Prevention and Punishment of the Crime of Genocide and the United Nations Charter because of his calls for the destruction of the State of Israel, as amended.

The Clerk read the title of the concurrent resolution.

The text of the concurrent resolution is as follows:

H. CON. RES. 21

Whereas the 1948 Convention on the Prevention and Punishment of the Crime of Genocide (commonly referred to as the ''Genocide Convention'') defines genocide as, among other things, the act of killing members of a national, ethnic, racial, or religious group with the intent to destroy, in whole or in part, the targeted group, and it also prohibits conspiracy to commit genocide, as well as ''direct and public incitement to commit genocide'';

Whereas Article 4 of the Genocide Convention provides that individuals committing any of the listed genocidal crimes shall be punished ''whether they are constitutionally responsible rulers, public officials or private individuals'';

Whereas 133 Member States of the United Nations have ratified the Genocide Convention and thereby pledged to prosecute those individuals who violate its criteria for incitement to commit genocide, as well as those individuals who commit genocide directly;

Whereas 62 years ago the United Nations was founded in the wake of the Holocaust, the Nazi genocide carried out during World War II that resulted in the slaughter of 6 million Jews in Europe, in order to ''save succeeding generations from the scourge of war'' and uphold and protect the ''dignity and worth of the human person'';

Whereas Article 2, Section 4, of the United Nations Charter, to which Iran has agreed as a Member State of the United Nations, requires all Member States of the United Nations to ''refrain in their international relations from the threat or use of force against the territorial integrity or political independence of any state'';

Whereas on October 26, 2005, at the World Without Zionism Conference in Tehran, Iran, Iranian leader Mahmoud Ahmadinejad called for Israel to be ''wiped off the map'', described Israel as ''a disgraceful blot [on] the face of the Islamic world'', and declared that ''[a]nybody who recognizes Israel will burn in the fire of the Islamic nation's fury'';

Whereas on December 12, 2006, Iranian leader Mahmoud Ahmadinejad addressed a conference in Tehran questioning the historical veracity of the Holocaust and said that Israel would ''soon be wiped out'';

Whereas on December 15, 2000, Iranian Supreme Leader Ali Khamene'i stated to thousands of Muslim worshippers in Tehran that ''Iran's stance has always been clear on this ugly phenomenon (Israel). We have repeatedly said that this cancerous tumor of a state should be removed from the region'';

Whereas other Iranian leaders have made similar statements and the Government of Iran has displayed inflammatory symbols that express similar intent;

Whereas on December 14, 2006, incoming United Nations Secretary General Ban Ki-moon said that Iran's calls for Israel's destruction and its dismissal of the Holocaust are ''unacceptable'', and expressed concern about the regional and global security implications of Tehran's nuclear program;

Whereas on August 3, 2006, in a speech during an emergency meeting of Muslim leaders, Iranian leader Mahmoud Ahmadinejad stated that the Middle East would be better off ''without the existence of the Zionist regime'', called Israel an ''illegitimate regime'' with ''no legal basis for its existence'', and accused the United States of using Israel as a proxy to control the region and its oil resources;

Whereas Iran funds, trains, and openly supports terrorist groups, including Hamas, Hezbollah, and Islamic Jihad among many others, all of which have murdered Americans, Israelis, and non-Israeli Jews and are determined to destroy Israel;

Whereas on December 14, 2001, former leader of Iran and current leader of Iran's influential Expediency Council Ali Akbar Hashemi-Rafsanjani threatened Israel with destruction by nuclear attack, saying, ''[i]f one day, the Islamic world is also equipped

with weapons like those that Israel possesses now, then the imperialists' strategy will reach a standstill because the use of even one nuclear bomb inside Israel will destroy everything [in Israel], while it will merely harm the Islamic world'';

Whereas Iran has aggressively pursued a clandestine effort to arm itself with nuclear weapons; and

Whereas the longstanding policy of the Iranian regime is aimed at destroying the democratic State of Israel, a vital United States ally and longstanding friend, which is confirmed by statements such as those made by Iranian leader Ahmadinejad, Supreme Leader Khamene'i, and Expediency Council leader Rafsanjani, demonstrating the threat of a nuclear-armed Iran: Now, therefore, be it

Resolved by the House of Representatives (the Senate concurring), That Congress—

(1) condemns, in the strongest terms, Iranian leader Mahmoud Ahmadinejad's offensive remarks, contemptible statements, and reprehensible policies aimed at the destruction of the State of Israel;

(2) calls on the United Nations Security Council to take up charges against Iranian leader Mahmoud Ahmadinejad for violating the 1948 Convention on the Prevention and Punishment of the Crime of Genocide and Article 2, Section 4, of the United Nations Charter;

(3) further calls on the United Nations Security Council and all Member States of the United Nations to consider stronger measures to prevent Iran from obtaining nuclear weapons, which would be both a dangerous violation of the Nuclear Non-Proliferation Treaty and a potential means to the end of carrying out Mahmoud Ahmadinejad's threats against Israel; and

(4) reaffirms the unwavering strategic partnership and close friendship between the United States and Israel and reasserts the steadfast commitment of the United States to defend the right of Israel to exist as a free and democratic state.

The SPEAKER pro tempore. Pursuant to the rule, the gentlewoman from California (Ms. WATSON) and the gentlewoman from Florida (Ms. ROS-LEHTINEN) each will control 20 minutes.

The Chair recognizes the gentlewoman from California.

GENERAL LEAVE

Ms. WATSON. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days to revise and extend their remarks and include extraneous material on the resolution under consideration.

The SPEAKER pro tempore. Is there objection to the request of the gentlewoman from California?

There was no objection.

Ms. WATSON. Mr. Speaker, I yield myself as much time as I may consume.

Mr. Speaker, I rise in strong support of this resolution.

Every Member of Congress is disturbed by the offensive comments that regularly emanate from the mouth of the Iranian President. His pledge to wipe Israel off the map and his denial of the Holocaust have shocked the civilized world.

I am among those who feel it is no longer enough simply to shake our heads disapprovingly and go about our business. Context is everything.

We are talking about a Jewish majority nation, Israel, whose very existence is threatened by another nation developing a nuclear bomb. Less than three-quarters of a century ago, Hitler and Nazi Germany wiped out more than a third of the world's Jewish population. We cannot stand by and watch if the Iranian President has similar designs.

When Ahmadinejad says that Israel is a legitimate regime with no basis for its existence, our sense of justice tells us we cannot simply ignore it. When he describes Israel as ''a disgraceful blot [on] the face of the Islamic world'' and declares that ''anybody who recognizes Israel will burn in the fire of the Islamic nation's fury,'' we can't, as people of conscience, dismiss these words as mere rhetoric.

That is the premise of this resolution. This resolution urges us not to shrug, but to take action. It calls on the United Nations Security Council to charge Iranian President Mahmoud Ahmadinejad with Article 2, section 4, of the United Nations Charter, which requires all member states of the United Nations to refrain in their international relations from the threat or use of force against the territorial integrity or political independence of any state. Even more poignantly, it calls for the Security Council to charge Ahmadinejad with violating the 1948 Convention on the Prevention and Punishment of the Crime of Genocide, which forbids direct and public incitement of genocide.

I strongly endorse the premise of this resolution, that we should take seriously Ahmadinejad's venomous rhetoric and respond in a serious fashion that will demonstrate our fortitude in stopping him. With this measure, we also set an example by serving notice to other bigoted world leaders that we will not tolerate racism and thinly veiled threats.

We should be more than happy to set aside any notion of prosecuting President Ahmadinejad under the Genocide Convention were the President to renounce his previous positions on the Holocaust and on Israel. In the absence of such apologies, however, the administration should initiate action that would result in the prosecution of President Ahmadinejad for crimes under the genocide convention and to do so without delay.

I strongly support this resolution. I urge all my colleagues to do likewise to send a message to Iran.

Mr. Speaker, I reserve the balance of my time.

Ms. ROS-LEHTINEN. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, I rise in strong support of H. Con. Res. 21, which denounces the Iranian regime, its belligerent rhetoric and behavior, and urges the international community to hold it accountable and prevent it from achieving its horrific goals.

As the U.S. and our allies attempt to prevent the radical Islamic regime in Iran from developing nuclear capabilities, we should reflect on that regime's vision of the future. While most people desire to live in a world of freedom, of liberty, of prosperity and of peace, Iran's rulers actively seek a world of oppression, of destruction, of war, a world without Israel and without a United States of America.

The Iranian leader Ahmadinejad frequently pushes for Israel's destruction, saying that this sovereign state should be wiped off the map, calling it a disgraceful blot on the face of the Islamic world, as Ambassador Watson pointed out, and proclaiming that anybody who recognized Israel will burn in the fire of the Islamic Nation's fury.

On June 3, Ahmadinejad stated, ''With God's help, the countdown button for the destruction of [Israel] has been pushed.'' When Ahmadinejad calls for the destruction of the Jewish state, let us be clear, he is calling for the genocide of Jews. That is why he has continued to cast doubt on the veracity of the Holocaust, calling it a ''myth.''

His despicable comments cheapen the suffering of millions of Jews, desecrate their memory and pave the way for another Holocaust to occur at the hands of Tehran. The Iranian leader does not threaten Jews and Israel, he explicitly threatens our very own existence.

In October of 2005, he asked, ''Is it possible for us to witness a world without America and Zionism. . . . You had best know that this slogan and this goal are attainable, and, surely, can be achieved.''

Mr. Speaker, his words and actions do not merely reflect his own views or those of a few powerless extremists. Iran's Supreme Leader, for example, said, ''This cancerous tumor of a state should be removed from the region.''

Rafsanjani, the former Iranian leader who continues to hold significant influence, and who some mistakenly call a moderate, has threatened Israel with destruction by nuclear weapons, saying that the use of even one nuclear bomb inside Israel will destroy everything, while it will merely harm the Islamic world.

These are no idle threats, those are not just mere words and rhetoric. Iran continues to sponsor terrorist groups like Hamas and Hezbollah who have murdered scores of Israelis, they have murdered Americans as well, as well as Jews who live outside of Israel, and they have violated Israel's territory, and they continue to hold Israeli soldiers hostage.

The existence of our Nation and Israel are not subject to compromise and the lives of Americans and Israelis are not negotiable.

Indeed, in the wake of the Holocaust, the United Nations was founded to save

succeeding generations from the scourge of war and to protect the dignity and the worth of every person. The words and deeds of Ahmadinejad and his cohorts violate Article 2, section 4 of the U.N. Charter, which require all U.N. member states to ''refrain . . . from the threat or use of force against the territorial integrity or political independence of any state.''

Their implicit demands for the death of Jews violates the Genocide Convention, which states that those who commit or incite genocide shall be punished, whether they are rulers, government officials or private citizens.

This resolution, offered by my friend and distinguished colleague, Mr. ROTHMAN of New Jersey, and Mr. KIRK of Illinois, calls for the U.N. Security Council to charge Ahmadinejad with violating those binding documents and for the Council to consider stronger measures to prevent Iran from obtaining the nuclear weapons that it could use to threaten and to attack Israel and the world.

Therefore, I strongly urge my colleagues to adopt this very serious resolution and reaffirm our resolve to end the Iranian threat.

Mr. Speaker, I reserve the balance of my time.

Ms. WATSON. Mr. Speaker, how much time do we have left?

The SPEAKER pro tempore. The gentlewoman from California has 16 minutes left. The gentlewoman from Florida has 15 minutes left.

Ms. WATSON. Mr. Speaker, I yield 8 minutes to the author of the concurrent resolution, the gentleman from New Jersey (Mr. ROTHMAN).

Mr. ROTHMAN. I thank the distinguished gentlelady from California, who was also a former Ambassador to the Federated States of Micronesia. Thank you for your leadership on this issue and on so many other issues.

To my dear friend, the ranking member of the International Relations Committee, the gentlewoman from California (Ms. ROS-LEHTINEN), thank you for your strong support for this resolution and for countless other measures of importance to the world as well as to the United States of America.

Mr. Speaker, I rise in support of House Concurrent Resolution 21, a resolution that I was proud to author, along with Congressman MARK KIRK from Illinois.

Mr. Speaker, what do you do when you see injustice? What do you do when you see injustice? Well, as I told my children, you only have two choices when you see injustice. You do nothing, you walk away in the face of genocide, or someone else's torment or unjust, unfair treatment, do nothing, wear blinders like most of the world, or you do something, do something in the face of injustice.

Here we have the President of a sovereign nation, a Member of the U.N., Ahmadinejad from Iran, who says that a fellow nation in the world, a member of the U.N., the state of Israel, should be wiped off the face of the Earth, the people killed. Not only is that a violation of the U.N. Charter, which, not surprisingly, says one cannot, as a member nation, advocate the death and destruction of another member nation, it also violates the Geneva Convention rules against incitement to genocide.

Lest one think that Mr. Ahmadinejad, a twisted, backward, lunatic, be some nonthreatening individual crazy man who happens to talk about the death of millions of innocent people, this is the head of a nation, a sovereign nation with oil wealth and an army and with a stated goal of acquiring nuclear weapons to use to carry out his homicidal, genocidal, lunatic delusions of wiping out the State of Israel.

So we must take his threats seriously. Just as so many say in the history of the 20th century as we review it, we should have taken Hitler's threats more seriously and not just disregarded him as some lunatic who couldn't do anything about his threats.

So we have asked the United Nations, we are asking them through this resolution to enforce its own rules against the incitement of the destruction of a member nation of the U.N.

What is happening at the U.N.? Today you have Indonesia, unbelievably, standing in the way of a simple resolution, simple statement of condemnation against Ahmadinejad's genocidal statement to destroy Israel.

Why would Indonesia not support the rules of the United Nations? Why would not they not even stand silent, they are stopping the U.N. from announcing its resolution against Ahmadinejad's genocidal statements.

Why would Indonesia do that? Whatever the reason, my friends, it's wrong.

Unless Indonesia understands clearly that it will pay a price in world opinion and in economic matters and in political relations with the rest of the world, perhaps it won't move. But let Indonesia know that this United States House of Representatives, these Representatives of the 320 million American people, know what is wrong and what is right.

□ 1615

It is wrong to call for the death and destruction of a nation. It is wrong to call for the genocide of a people, and it is wrong for any other nation to stand in the way of justice, and we won't forget who helped us stop injustice and who prevented us from calling for the trial of Ahmadinejad before the international criminal court and sanctions upon Iran at the U.N.

Why is it important for the United States House of Representatives to speak? Because we will not be silent in the face of this lunatic madman who threatens us and threatens our allies.

By the way, if you read the history of the United States of America, we've been standing up for Israel since its founding. And in our founding, in the 1700s, if you read the history of all of our founders, they supported a Jewish homeland in Palestine. From the 1700s in America up until today, long before the Holocaust of the mid-20th century, back in the 1700s, Americans believed that the Jews should be returned to their homeland. And now this lunatic in Iran wants to wipe out this nation.

And Israel is not just a sentimental favorite. Israel happens to be America's number one strategic military, economic ally in the entire Middle East. People say, well, you know Iraq, and we won't get into that debacle at the moment, what it's costing us in troops and our military, 150,000 troops. If the state of Israel did not exist with its powerful, pro-Western military, freedom of speech, freedom of religion, tolerating all peoples in the region, how many more troops would we have to have in the Middle East if Israel didn't exist? Another 100,000, 200,000 Americans? We don't have to.

Our ally, the state of Israel, is there for America, as it has been ever since its founding: military, intelligence, economic.

So for so many reasons, legal, moral, military, national security for the United States, we cannot let this madman Ahmadinejad threaten America's greatest ally, the only Western democracy in the entire Middle East.

I urge my colleagues to support this resolution, and I urge Indonesia to do what is right and join with us.

Ms. ROS-LEHTINEN. Mr. Speaker, I congratulate Mr. ROTHMAN for a very eloquent statement stating the purpose of this resolution.

And with that, I'd like to yield such time as he may consume to the ranking member of our Middle East Subcommittee, Mr. PENCE of Indiana.

(Mr. PENCE asked and was given permission to revise and extend his remarks.)

Mr. PENCE. Mr. Speaker, I thank the distinguished ranking member for yielding and for her extraordinary leadership on that area of the world about which I have some responsibilities as the ranking Republican on the Middle East Subcommittee.

And like the gentlelady from Florida (Ms. ROS-LEHTINEN), I too wish to congratulate the principal author of H. Con. Res. 21. There is no greater or more eloquent advocate for that precious relationship between the free peoples of the United States of America and Israel than Congressman STEVE ROTHMAN of New Jersey. And I commend the gentleman for his leadership on this measure and would echo the gentlelady's remarks about the force and eloquence of his presentation. And I will not seek to emulate that today, nor compete with it.

But I will take a moment, Mr. Speaker, to reflect on the importance of this resolution and the facts and the wisdom underpinning the need for Congress to be heard on the issue of calling on the United Nations Security Council to charge Iranian President Mahmoud Ahmadinejad with violating the 1948 Convention on the Prevention and Punishment of the Crime of Genocide and the U.N. charter because of his calls for the destruction of the state of Israel.

The United Nations, in a very real sense, was formed when history failed. History and the international institutions on the planet failed to prevent barbaric action by fascist Nazi and Axis powers against the free world. And in every sense, genocide, the genocide that we saw perpetrated by the Germans against indigenous Jewish people and other ethnic populations, the genocide perpetrated by certain Japanese forces on mainland China, was part and parcel of the reason for the formation of the United Nations. And therefore the United Nations charter and the aforementioned Treaty on the Prevention and Punishment of the Crime of Genocide are all tied up one with another.

And so for this Congress, as the legislature of that nation which sits on the Security Council, to call on the United Nations to live up to its historic commitment to prevent and confront genocide is, as we say in Indiana, not a stretch. This is at the very essence of what the United Nations was created to do, and the need for action by the United Nations Security Council when one considers the facts in this case truly speak for themselves. And let me lay those facts out.

The 1948 Convention on the Prevention and Punishment of the Crime of Genocide, commonly known as the Genocide Convention, defines genocide as, among other things, ''the act of killing members of a national, ethnic, racial or religious group with the intent to destroy in whole or in part the targeted group.''

Now, let's see if some of the statements by the leadership of the nation of Iran against the people of Israel qualify as calling upon the act of killing members of a national, ethnic, racial or religious group with the intent to destroy in whole or in part that group.

Also, the Genocide Convention bans the conspiracy or incitement to commit genocide and states that violators shall be punished ''whether constitutionally responsible rulers, public officials or private individuals.''

133 member states of the U.N. have ratified the Genocide Convention, including Iran.

Article II, section 4 of the U.N. charter, also to which Iran has agreed, requires all member states of the United Nations ''to refrain in their international relations from the threat or use of force against the territorial integrity or political independence of any state.''

Now, let's get to the facts because that's what the U.N. requires, that's what the treaty requires, that's what the Genocide Convention requires, that's what the U.N. charter requires.

Well, let's start with October 26, 2005. Iranian leader Mahmoud Ahmadinejad called for Israel to be ''wiped off the map,'' and described Israel as a ''disgraceful blot on the face of the Islamic world,'' and declared that ''anybody who recognizes Israel will burn in the fire of the Islamic nation's fury.''

12 December 2006, that same leader, Iranian leader Mahmoud Ahmadinejad, addressed a Holocaust Denial Conference in Tehran and said that Israel would ''soon be wiped out.''

15 December 2000, Iranian Supreme Leader Ali Khamene'i stated that ''Iran's stance has always been clear on this ugly phenomenon'' referring to Israel as the ugly phenomenon. He went on to say, ''We have repeatedly said that this cancerous tumor of a state should be removed from the region.''

Iran, as we know, has aggressively pursued a clandestine effort to arm itself with nuclear weapons. Iran funds, trains and supports terrorist groups, including Hamas and Hezbollah, which have murdered Americans, Israelis and non-Israeli Jews, and seeks to destroy Israel.

14 December 2001, the President of Iran's Expediency Council and former leader of Iran, Ali Rafsanjani, threatened Israel with nuclear destruction saying, and I quote, ''if one day the Islamic world is also equipped with weapons like those that Israel now possesses, then the imperialist strategy will reach a standstill because the use of even one nuclear bomb inside Israel will destroy everything, while it will merely harm the Islamic world.''

Men and women, these are comments made by the leaders of a sovereign nation that is in a headlong pursuit to obtain nuclear weapons, and has, by international consensus, already obtained missile technology that could deliver such weapons within the theater of the Middle East.

History teaches no truth more clearly than this: nations should take tyrants at their word. For the United States of America to fail to call on the institution of the United Nations to take the tyrants in Iran at their word would be a grievous historical error and one for which future generations of Americans like those injured soldiers that I toured through the Capitol earlier this afternoon will likely have to pay.

This resolution, authored by Mr. ROTHMAN from New Jersey and Mr. KIRK from Illinois, strongly condemns Iranian leader Mahmoud Ahmadinejad's offensive remarks, contemptible statements, and reprehensible policies directed at the destruction of Israel; calls on the United Nation's Security Council to take up charges against Ahmadinejad for violating the 1948 Convention on the Prevention and Punishment of the Crime of Genocide and article II, section 4 of the United Nations charter.

It also calls on the Security Council and all member states of the United Nations to consider stronger measures to prevent Iran from obtaining nuclear weapons, which would both be in violation of nuclear non-proliferation treaties and give them the potential to eliminate Israel.

And it reaffirms, of course, the unwavering strategic partnership and close friendship between the United States and Israel, and reasserts the steadfast commitment of the United States to defend the right of Israel to exist as a free and democratic and Jewish state.

The time for this resolution has come. I commend the gentleman from New Jersey (Mr. ROTHMAN) for his bold leadership, and I pledge my strong support and urge all of my colleagues to make this strong and deafening statement that this Congress and this Nation will take tyrants at their word, and we will call on the United Nations today to live up to their charter.

Ms. ROS-LEHTINEN. Mr. Speaker, I would like to yield the balance of our time to Ambassador Watson. And I thank Mr. PENCE for his eloquent statement.

Ms. WATSON. Mr. Speaker, I will yield then the rest of my time to the gentleman from Ohio, Mr. DENNIS KUCINICH.

Mr. KUCINICH. Mr. Speaker, I want to thank the gentlelady from California (Ms. WATSON) and Ms. ROS-LEHTINEN.

And I want to begin by stating that the sponsor of this resolution, Mr. ROTHMAN, is a person of great heart and compassion, someone who I admire and am proud to serve with in this Congress. His dedication to peace and to justice is something that is admirable. I share his dedication to the survival and the security of the State of Israel.

At this time, Mr. Speaker, I would like to ask unanimous consent to include a New York Times translation of the text of President Ahmadinejad's speech, a translation by the Middle East Media Research Institute of his speech, articles relating to an analysis of the speech, and the words that were used by Virginia Tilley of Johannesburg, South Africa and by Erash Narsi written on the 18th of January 2007.

□ 1630

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Ohio?

Ms. ROS-LEHTINEN. Mr. Speaker, reserving the right to object, I would

inquire, is the gentleman inserting into the CONGRESSIONAL RECORD a speech by Ahmadinejad?

Mr. KUCINICH. If the gentlewoman will yield, as part of this debate, that is correct.

Ms. ROS-LEHTINEN. I was just asking if you are putting in the CONGRESSIONAL RECORD a speech by Ahmadinejad.

Mr. KUCINICH. Yes. The text from the New York Times, a translation.

Ms. ROS-LEHTINEN. Mr. Speaker, this resolution is calling Ahmadinejad's comments akin to genocide, calling for the destruction of the State of Israel, and calling for the wiping out of millions of people because they are Jews. And I object to having this person's words be placed in the CONGRESSIONAL RECORD, the record of the United States of America, of the people's House, and I object.

With all due respect to the gentleman, he may object to the resolution and speak against it, but I object to having Ahmadinejad's speech being inserted into the RECORD at the same time that the gentleman is speaking against this resolution.

So I do object.

The SPEAKER pro tempore. Objection is heard.

The gentleman from Ohio is recognized.

Mr. KUCINICH. Mr. Speaker, the purpose of this insertion, which is from the New York Times, printed in a newspaper of general circulation, is to be able to clarify that the quotes that are cited in the resolution are either mistranslated or out of context, and I think that should be something that would be of interest.

Ms. ROS-LEHTINEN. Mr. Speaker, if the gentleman would further yield, I understand if that is what you would like to use to make the connection.

Mr. KUCINICH. Reclaiming my time, Mr. Speaker, this is not my translation. This is a translation from the New York Times Tehran Bureau of this speech, and that is what I wanted to submit in the RECORD, because this debate, even if unintentional, could be used as still another cause for a U.S. attack on Iran, and because the International Atomic Energy Agency has not established that Iran is developing nuclear weapons and because we went to war against Iraq on the basis of misinformation, disinformation, and because I stand for peaceful resolution of all international disputes in the Middle East, in the region, and because I do share the concern that Israel would be in peril, which is why I did the research. I did the research. That is the basis of my wanting to submit a translation.

Now, there is an old saying ''much is lost in translation,'' and if there is so much riding on this resolution, it would appear to me that the prudent approach to take would be to read a translation from Farsi to English. And I have two such translations to offer this Congress if anyone is interested.

Mr. ROTHMAN. Mr. Speaker, will the gentleman yield?

Mr. KUCINICH. Of course, I will yield to my friend from New Jersey.

Mr. ROTHMAN. My friend, you referred to a translation of a speech. The offenses of Ahmadinejad are many. And three separate remarks on three separate occasions calling for the destruction of the state of Israel, does the gentleman have translations of each of those three separate remarks calling for the genocidal destruction of the state of Israel?

Mr. KUCINICH. Reclaiming my time, Mr. Speaker, I have pretty thorough translations that I would like to proceed to speak to.

Mr. ROTHMAN. Do you have them, of all three?

Mr. KUCINICH. I am going to proceed specifically with the comments, if I may. Everything that I have relates to this resolution, my good friend. And I am going to proceed now, and then I will yield again, certainly. I just want to make sure we can continue this.

I want to proceed with quotes from this resolution. I am just going to stay very closely to this resolution because this is what we are debating, a resolution before the House that calls on the Security Council to charge Iranian President Ahmadinejad with violating the 1948 Convention on the Prevention and Punishment of the Crime of Genocide and the United Nations Charter because of his calls for the destruction of the State of Israel, something that I obviously would find abhorrent and repugnant if he said that. And I started to do research on this, and I am just calling it to your attention.

With respect to the quote that he said that Israel should be wiped off the map, that is what the quote was, I have seen, from translations in the New York Times and the Middle East Research Institute that this speech that Ahmadinejad gave on October 26, 2005, does not call for Israel to be wiped off the map.

Now, H. Con. Res. 21 states that he has called for Israel to be wiped off the map. But according to the Middle East Research Institute, it is more correctly translated as ''eliminated from the pages of history.'' And when taken in full context, here is what the quote says: ''This regime that is occupying Qods,'' or Jerusalem, ''must be eliminated from the pages of history.'' He is talking about the regime.

Now, H. Con. Resolution 21 accuses President Ahmadinejad of saying that Israel, and these are awful quotes if he said it, it is horrible, that Israel is a ''disgraceful blot on the face of the Islamic world.'' However, the New York Times translates this section of the speech as saying, ''Our dear Imam targeted the heart of the world oppressor in his struggle, meaning the occupying regime. I have no doubt that the new wave that has started in Palestine, and we witness it in the Islamic world too, will eliminate this disgraceful stain from the Islamic world.''

Now, I object to anyone's putting the word ''disgraceful'' in connection with Israel. However, he did not say, he wasn't talking about the people of Israel, the nation, he was talking about the regime.

Here again is the quote that is included in this resolution: ''Anybody who recognizes Israel will burn in the fire of the Islamic nation's fury.''

Look, I recognize Israel and I am not interested in that kind of condemnation. But H. Con. Res. 21 accuses President Ahmadinejad of declaring that anybody who recognized Israel will burn in the fire of the Islamic nations' fury. However, in two separate translations, it is clear that Ahmadinejad is referring to the Israeli regime.

The New York Times translation: ''Anyone who recognizes this regime because of the pressure of the world oppressor, or because of naivete or selfishness, will be eternally disgraced and will burn in the fury of the Islamic nations.''

The Middle East Media Research Institute translation reads: If someone is under the pressure of hegemonic power,'' the West, ''and understands that something is wrong, or he is naive, or he is an egotist and his hedonism leads him to recognize the Zionist regime, he should know that he will burn in the fire of Islamic Ummah,'' nation . . .

So what he is calling for is regime change, according to these translations. According to these translations, he is calling for regime change. He is not calling for the destruction of Israel. Now, I am just going on the basis of a New York Times translation.

Mr. NADLER. Mr. Speaker, will the gentleman yield?

Mr. KUCINICH. I will yield to my friend.

Mr. NADLER. Mr. Speaker, is the gentleman aware that it is standard usage in the Government of Iran and in many of the Arab regimes that since they will not say the word ''Israel,'' they refer to Israel as the Zionist entity or the Zionist regime so that when they say the ''Zionist regime,'' they are not necessarily calling for regime change? When they say the ''Zionist regime'' or the ''Zionist entity'' must be abolished, they are usually referring to the country of Israel?

Mr. KUCINICH. Mr. Speaker, to respond to my friend, if that is what he meant, then we have cause for great concern. However, in one of the articles I wanted to submit so that Congress could see it, it says, and I quote, ''What did Ahmadinejad actually say? To quote his exact words in Farsi,'' and then they give the quote, ''that passage

will mean nothing to most people but one word might ring a bell: 'regime.' It is the word 'regime' pronounced just like the English word with an extra e-h sound at the end. Ahmadinejad did not refer to Israel the country or Israel the land mass but the Israeli regime. That is a vastly significant distinction as one cannot wipe a regime off the map.''

Mr. NADLER. Mr. Speaker, will the gentleman yield?

Mr. KUCINICH. I would be glad to have my friend respond and also for Mr. ROTHMAN to respond.

Mr. NADLER. Mr. Speaker, I will respond again. It proves nothing because the fact is that if you are just looking at etymology, it may make sense. But if you look at usage in the Middle East, the Arab and Iranian people who wish the State of Israel eliminated have, since 1947 or 1948, referred to Israel either as the ''Zionist regime'' or the ''Zionist entity.'' And you can look back at the rhetoric of 1967 when they lined up the troops and they said all the Jews will be killed. They talked about the Zionist regime or the Zionist entity being eliminated. They weren't talking about regime change; they were talking about genocide.

Mr. ROTHMAN. Will the gentleman yield?

Mr. KUCINICH. Yes.

Mr. ROTHMAN. First of all, a lot of these statements occurred in the capital of Iran during the World Without Zionism Conference. Zionism is a historic movement of returning the Jews to their Biblical homeland where they were expelled for thousands of years. So when they have a conference for a world without Zionism and in that conference say that the Zionist regime will be wiped off the map, one could reasonably understand that there would be no more Zionism, no Jewish state, because that is what Zionism is, no Jewish state in the Middle East. By the way, the Middle East, which is a sea of Islamic regimes. A sea of Islamic regimes. Israel's offense is having the nerve to exist as a non-Islamic regime.

But I ask the gentleman for translations of the other matters that came before the U.N. Namely, on December 12 of 2006, during a conference in Iran denying the Holocaust, Ahmadinejad said Israel would soon be wiped out. Not the Labor Government of Israel or the Likud Government of Israel, but Israel would be wiped out. And then again just a few weeks ago on Sunday, June 2, Ahmadinejad said the world would soon see the destruction of Israel. And I say to my friend from Ohio, I know you have the best intentions.

The SPEAKER pro tempore. The time of the gentleman from Ohio has expired.

Mr. KUCINICH. Mr. Speaker, I ask unanimous consent for an additional 3 minutes to be divided equally between Ms. ROS-LEHTINEN, Mr. ROTHMAN and myself, and I would yield to Mr. ROTHMAN, then Ms. ROS-LEHTINEN, then I will close.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Ohio?

Hearing none, we will have 3 additional minutes of debate, divided equally between the gentleman from Ohio and the gentlewoman from Florida.

Ms. ROS-LEHTINEN. Mr. Speaker, I thank the gentleman for asking for this time.

I want to be clear about my objection of putting Ahmadinejad's statements in the RECORD. Mr. KUCINICH has an opportunity, as a Member of this House, to clear up the record, as he has pointed out in his statements, and put in those remarks on his own. I would hate to have Ahmadinejad's statements be included as a part of the record in this part of the debate where we are saying that he is a despot. He is a person who denies the Holocaust existence, who has called for Israel's destruction, and to be mincing about with words and translations, I know the gentleman from Ohio's motives are clear. He is not saying that he is calling for Israel's destruction, but I think that any interpretation of Ahmadinejad's words and deeds would clearly say that that is Ahmadinejad's motives.

□ 1645

So I would not like his statements to be made a part of the record in this part of the discussion, but he, as a Member of Congress, is free to clear the record, as he points out, and put Ahmadinejad's words on his own time in the CONGRESSIONAL RECORD.

With that, Mr. Speaker, I would be glad to yield my remaining time to Mr. ROTHMAN.

The SPEAKER pro tempore. The time of the gentlewoman from Florida has previously expired.

Mr. ROTHMAN. I thank the Speaker, the gentlelady from Florida, and the gentleman from Ohio.

The SPEAKER pro tempore. The gentleman will suspend.

The gentleman from Ohio actually has the time.

Mr. KUCINICH. What I had said in my unanimous consent was Ms. ROS-LEHTINEN and Mr. ROTHMAN, then I was going to be last. That was the UC.

The SPEAKER pro tempore. The Chair interpreted the gentleman's request such that he would have 1½ minutes and the gentlewoman from Florida would have 1½ minutes. That is the order of the House.

Mr. KUCINICH. Then I yield 30 seconds to my friend from New Jersey (Mr. ROTHMAN).

Mr. ROTHMAN. Mr. Speaker, the gentleman is afraid that because at an anti-Zionism ''World without Zionism'' conference, Ahmadinejad said, ''Wipe Israel off the map.'' We are quibbling over whether he said on another occasion, wipe the Israel regime, Zionist regime off the map and on a third occasion said, the world would soon see the destruction of Israel. The gentleman thinks there is ambiguity there.

This is a regime in Iran sending troops and equipment, killing our soldiers in Iraq, building nuclear weapons, threatening to kill our number one ally, the State of Israel, and he doesn't want the U.N. to look into it to condemn them? I think the gentleman is wrong.

Mr. KUCINICH. If, in fact, that's what he said, then of course the U.N. should look into it. But I think we should look into whether or not he said that. And again, I offered to submit, but was denied a unanimous consent, the text of his speech, and a translation by Nazila Fathi in the New York Times Tehran Bureau of the speech. This is from the New York Times. And they certainly have never been accused of any kind of propaganda against Israel.

So I would say that it is important for us to look at this. And I don't think it is an unreasonable request that we should look at exactly what this person said so we will know what the appropriate course of action is to take.

I stand for peace. I stood before this Congress and challenged the war against Iraq when very few people were willing to do that because I questioned whether or not Iraq did have weapons of mass destruction. I am questioning whether or not this person is trying to destroy Israel. If he is, then I certainly support my friend's concerns.

Mr. GARRETT of New Jersey. Mr. Speaker, I am a proud cosponsor of to day's resolution which calls for the United Nations to take action to uphold one of its most important conventions—the Convention of Genocide. With the violence of the Holocaust just a few years behind them, the members of the United Nations in 1948 established a convention to prevent such atrocities from ever happening again.

There is much talk at the U.N. about preventing war and genocide but unfortunately there is little action. The Iranian President has called for a U.N. member nation to be ''wiped off the map.'' Do we have any doubt that the U.N. would sanction the Israeli Prime Minister if the positions were reversed?

The Iranian president and the Ayatollahs' supreme wish is the destruction of Israel and all her people. They have not tried to mask this goal—they doubt the holocaust of the past and make plans for a holocaust of the future.

Ahmadinejad has even gone as far as speculating that the collateral damage of attacking Israel with nuclear weapons would be worth the cost to the Muslim world. For a regime that is developing nuclear capabilities, these are truly dangerous words. In the 1930s fascist dictators made bold claims of impending violence and we ignored them to our own peril.

The world should not ignore these words of aggression. Today, we call on U.N. member

nations to call out Ahmadinejad, to condemn these statements, and to work together to prevent Iran from obtaining nuclear weapons.

Mr. EMANUEL. Mr. Speaker, I rise today in support of H. Con. Res. 21, a resolution calling on the United Nations Security Council to charge Iranian President e.g. Mahmoud Ahmadinejad with violating the 1948 Convention on the Prevention and Punishment of the Crime of Genocide and the United Nations Charter because of his calls for the destruction of the State of Israel.

The 1948 Convention on the Prevention and Punishment of the Crime of Genocide defines genocide as, among other things, the act of killing members of a national, ethnic, racial, or religious group with the intent to destroy the targeted group.

Iranian President Mahmoud Ahmadinejad has repeatedly made inflammatory and hateful comments regarding Israel, including direct statements calling for the destruction of Israel, an act of genocide. In 2005, he called for Israel to be 'wiped off the map' and led a group of students in chants of 'death to Israel'. Furthermore, the Iranian president has questioned the history of the Holocaust, an insult to the millions of men and women who perished as a result of that genocide.

These comments are not only hateful and unacceptable, but his comments threaten the security of Israel. As Iran funds, trains, and openly supports terrorist groups, including Hamas, Hezbollah, and Islamic Jihad, that are determined to destroy Israel, Ahmadinejad's words raise concern on Iran's intentions. We must send a clear message to Iran and its President: we condemn your dangerous and reckless remarks.

As a member of the United Nations, the President of Iran's comments violate U.N. rules and must be dealt with decisively by the United Nations leadership and all those in the Security Council.

I want to thank the gentleman from New York, Mr. Rothman, for his hard work on this resolution, and I urge my colleagues to join me in supporting this resolution to call on the United Nations Security Council to hold Iranian President Mahmoud Ahmadinejad accountable for his intolerable words that call for the destruction of the State of Israel.

Mr. BLUMENAUER. Mr. Speaker, I voted ''present'' on H. Con. Res. 21 because I believe it dilutes the definition of genocide and would ratchet up tensions with Iran without any likelihood of actually doing anything about Mahmoud Ahmadinejad's dangerous anti-Semitism and Iran's ability to inflict harm on Israel. Instead, we need a new framework for relations with Iran that advances our interests and values through engagement and support for the Iranian people. At a time when we haven't dealt meaningfully with the serious and ongoing genocide in Darfur, I am not convinced it advances our long-term interest in strengthening the international legal regime against mass killing by defining another Muslim leader's call for Israel's destruction as genocide.

Mr. PAUL. Mr. Speaker, I rise in strong opposition to this resolution. This resolution is an exercise in propaganda that serves one purpose: to move us closer to initiating a war against Iran. Citing various controversial statements by Iranian President Mahmoud Ahmadinejad, this legislation demands that the United Nations Security Council charge Ahmadinejad with violating the 1948 Convention on the Prevention and Punishment of the Crime of Genocide.

Having already initiated a disastrous war against Iraq citing U.N. resolutions as justification, this resolution is like deja-vu. Have we forgotten 2003 already? Do we really want to go to war again for U.N. resolutions? That is where this resolution, and the many others we have passed over the last several years on Iran, is leading us. I hope my colleagues understand that a vote for this bill is a vote to move us closer to war with Iran.

Clearly, language threatening to wipe a nation or a group of people off the map is to be condemned by all civilized people. And I do condemn any such language. But why does threatening Iran with a pre-emptive nuclear strike, as many here have done, not also deserve the same kind of condemnation? Does anyone believe that dropping nuclear weapons on Iran will not wipe a people off the map? When it is said that nothing, including a nuclear strike, is off the table on Iran, are those who say it not also threatening genocide? And we wonder why the rest of the world accuses us of behaving hypocritically, of telling the rest of the world ''do as we say, not as we do.''

I strongly urge my colleagues to consider a different approach to Iran, and to foreign policy in general. GEN William Odom, President Reagan's director of the National Security Agency, outlined a much more sensible approach in a recent article titled ''Exit From Iraq Should Be Through Iran.'' General Odom wrote: ''Increasingly bogged down in the sands of Iraq, the US thrashes about looking for an honorable exit. Restoring cooperation between Washington and Tehran is the single most important step that could be taken to rescue the U.S. from its predicament in Iraq.'' General Odom makes good sense. We need to engage the rest of the world, including Iran and Syria, through diplomacy, trade, and travel rather than pass threatening legislation like this that paves the way to war. We have seen the limitations of force as a tool of U.S. foreign policy. It is time to try a more traditional and conservative approach. I urge a ''no'' vote on this resolution.

The SPEAKER pro tempore. The question is on the motion offered by the gentlewoman from California (Ms. WATSON) that the House suspend the rules and agree to the concurrent resolution, H. Con. Res. 21, as amended.

The question was taken.

The SPEAKER pro tempore. In the opinion of the Chair, two-thirds being in the affirmative, the ayes have it.

Ms. ROS-LEHTINEN. Mr. Speaker, on that I demand the yeas and nays.

The yeas and nays were ordered.

The SPEAKER pro tempore. Pursuant to clause 8 of rule XX and the Chair's prior announcement, further proceedings on this question will be postponed.

HONORING THE LIFE OF JACOB BIRNBAUM

Ms. WATSON. Mr. Speaker, I move to suspend the rules and agree to the resolution (H. Res. 137) honoring the life and six decades of public service of Jacob Birnbaum and especially his commitment freeing Soviet Jews from religious, cultural, and communal extinction, as amended.

The Clerk read the title of the resolution.

The text of the resolution is as follows:

H. RES. 137

Whereas Jacob Birnbaum was born on December 10, 1926, and December 10 is International Human Rights Day;

Whereas Birnbaum performed relief work with victims of Nazi and Soviet totalitarianism from 1946 through 1951, then worked with the disintegrating Jewish communities of North Africa in the mid-1950s and early 1960s;

Whereas, in 1964, Birnbaum moved to New York and founded the Student Struggle for Soviet Jewry (SSSJ) on April 27 of that year;

Whereas four days later Birnbaum organized approximately 1,000 students who marched for four hours in front of the Mission to the United Nations of the Soviet Union on May 1, 1964, to begin the direct action public struggle for Soviet Jewry;

Whereas the SSSJ utilized nonviolent methods, including marches, rallies, publication of extensive educational materials, and meetings with government officials, to organize and activate students to take direct action in the cause of freeing Soviet Jews trapped behind the Iron Curtain, utilizing the slogan ''Let My People Go'';

Whereas, on April 4, 1965, Birnbaum organized the Jericho March, in which students encircled the Soviet Mission and sounded shofars from all around the building and proceeded to rally at the United Nations;

Whereas, on April 12, 1965, petitions were presented at the United Nations's Isaiah Wall;

Whereas Birnbaum organized a Jericho Ride to Washington, DC, on May 20, 1965, where he and the first SSSJ chairman Rabbi Shlomo Riskin met with senior Soviet diplomat Anatoly Myshkov, and thereafter the students circled the Embassy of the Soviet Union to the sound of shofars, then moved on to the Department of State for a vigorous discussion, and finally arrived in Lafayette Park in front of the White House for a rally addressed by Members of Congress and the reading of an Appeal to Conscience;

Whereas Birnbaum and his student steering committee organized approximately thirty events in SSSJ's first two years to awaken the Jewish community in New York and beyond to the plight of Soviet Jews;

Whereas Birnbaum's important New York marches and rallies in the 1960s were the instrumental precursors of the great Solidarity events of the 1970s organized by the Greater New York Conference on Soviet Jewry under the direction of Malcolm Hoenlein, the founding director;

Whereas Birnbaum has testified before committees of the House of Representatives and the Senate and the Helsinki Commission;

Whereas Birnbaum advocated utilizing economic leverage at a Congressional hearing as early as May 1965;

Whereas Birnbaum worked closely in the early 1970s with Senator Henry Jackson, who introduced legislation linking United States trade benefits and capital flow to the Soviet Union with increased Soviet emigration;

Whereas Birnbaum was one of the most persistent of those individuals who fought

for passage of the Jackson-Vanik amendment to allow Soviet Jews and other East European Jews to escape oppression and religious, cultural, and communal extinction in the Soviet bloc;

Whereas Birnbaum conducted a number of campaigns with Presidents and Congress for the protection of Soviet Jewish underground self-education groups and organized a delegation of the Synagogue Council of America to meet with the Deputy Secretary of State in 1985;

Whereas Birnbaum received the Prophet in Our Time Award in 1974 on the tenth anniversary of the SSSJ;

Whereas Birnbaum received the Yeshiva University Community Service Award in 1988 and the Freedom Award in 2004 from the Manhattan Beach Jewish Center;

Whereas Birnbaum was honored in 2004 by the Conference of Presidents of Major American Jewish Organizations on the 40th anniversary of the initiation of the Soviet Jewry movement;

Whereas during the 1990s Birnbaum was engaged in a number of interventions in the former Soviet republics of Central Asia, especially Uzbekistan; and

Whereas Birnbaum continues to assist institutions for the Jewish education of former Soviet Jews as part of his ''Let My People Know'' campaign: Now, therefore, be it

Resolved, That the House of Representatives honors the life and six decades of public service of Jacob Birnbaum and especially his commitment to freeing Soviet Jews from religious, cultural, and communal extinction.

The SPEAKER pro tempore. Pursuant to the rule, the gentlewoman from California (Ms. WATSON) and the gentlewoman from Florida (Ms. ROS-LEHTINEN) each will control 20 minutes.

The Chair recognizes the gentlewoman from California.

GENERAL LEAVE

Ms. WATSON. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days to revise and extend their remarks and include extraneous material on the resolution under consideration.

The SPEAKER pro tempore. Is there objection to the request of the gentlewoman from California?

There was no objection.

Ms. WATSON. Mr. Speaker, I rise in strong support of this resolution. I yield myself as much time as I may consume.

I would first like to commend our distinguished colleague, Mr. NADLER of New York, for introducing this resolution. The resolution before the House honors one man, but it also honors all that he symbolizes in the name of human rights and freedom of worship.

Before the Holocaust, the Jewish population of the Soviet Union numbered 5 million. After the war, only 2 million remained. The pain of these Holocaust survivors was compounded. They became the targets of a ruthless and systematic campaign to strip them of their communal rights and Jewish identity.

This resolution pays tribute to a remarkable man who stood up for these victims of brutality. Jacob Birnbaum launched an effort, which turned into a groundswell, to protest the Soviet Union's abhorrent efforts to extinguish the religious, cultural and communal identity of the Jewish people.

His movement began in 1964 as a humble yet bold student group organized to march on the Soviet Mission to the United Nations. Over the years, the group conducted rallies in New York and Washington, circulated petitions, and used every possible means to keep world attention on the plight of the Soviet Jews. This social activism snowballed into the solidarity marches of the 1970s that gathered millions of individuals to fight for the cause.

Birnbaum also worked with the authors of the historic Jackson-Vanik amendment to help free Soviet Jews looking to emigrate. In this way, he helped to elevate the movement so that the U.S. Federal Government had to pay attention and to act. But his dogged and determined work continued, even as the Soviet bloc crumbled and anti-Semitism flared in incidents across the region. Mr. Birmbaum continues to work with educational institutions for former Jews as part of the ''Let My People Know'' campaign.

Through the years, Jacob Birnbaum has received numerous honors for his services to mankind. He deserves this further accolade on behalf of a grateful Congress for engaging so energetically in a cause that we have long supported, helping to free Soviet Jews from oppression and to help them thrive.

To Jews in Russia and the former Soviet Republic, the name Jacob Birnbaum refers not only to one dedicated man but to the very cause of freedom itself.

I support this resolution and urge my colleagues to do the same.

Mr. Speaker, I reserve the balance of my time.

Ms. ROS-LEHTINEN. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, I rise today in support of Mr. NADLER's resolution, House Resolution 137, honoring the life and public service of Jacob Birnbaum and especially his commitment to freeing Soviet Jews from religious, cultural and communal extinction.

For decades, Mr. Birnbaum has been at the forefront of the nonviolent struggle for Soviet Jewry, establishing the Student Struggle for Soviet Jewry, and organizing marches, rallies and publication of educational materials aimed at freeing Jews trapped in the Soviet Union.

Mr. Birnbaum worked closely with Members of the United States Congress, testified at congressional hearings and consistently pushed for the United States to use our economic leverage against the Soviet Union to pressure that country so they could allow Soviet Jews and other East European Jews to escape the oppression of a religious and cultural nature in the Soviet Union. Throughout the decades, Mr. Birnbaum's persistence and commitment to human rights and religious freedom have been invaluable in freeing Soviet Jews and preserving their religious and cultural heritage.

Mr. Birnbaum's commitment to this cause has not diminished to this day. He continues to help Jewish educational institutions and former Soviet Jews even today. And Mr. NADLER's resolution before us honors Mr. Birnbaum and his years of public service. I urge Members to support this important resolution.

With that, Mr. Speaker, I reserve the balance of my time.

Ms. WATSON. Mr. Speaker, I yield 10 minutes to the gentleman from New York (Mr. NADLER).

Mr. NADLER. I thank the gentlelady for her support, and I thank Ms. ROS-LEHTINEN for her support.

Mr. Speaker, I rise today to urge my colleagues to join me in supporting House Resolution 137, a resolution to honor the life and six decades of public service of Yaakov Birnbaum, known more familiarly as Jacob Birnbaum, especially his commitment freeing Soviet Jews from religious, cultural and communal extinction.

It is fitting that Jacob Birnbaum was born on December 10, which is also International Human Rights Day. This past December, Mr. Birnbaum celebrated his 80th birthday. It is time for this body to honor the life and work, the 60 years of public service of this remarkable human rights activist. I am very proud to call him a fellow New Yorker.

Jacob Birnbaum was born in Germany, and during World War II, his family fled the Nazis and settled in the United Kingdom. Throughout the war, the Birnbaum family knew the plight of Jews, especially their own relatives, under the Nazis. His personal experience with the horrors of evil sparked the activism of Jacob Birnbaum.

Beginning in 1946, following the end of the war, 19-year-old Jacob Birnbaum devoted several years to providing relief for younger survivors of the Nazi and Soviet totalitarian systems. Through his work with young Polish Jews who managed to leave the USSR after the war, he became familiar with the iniquities of the Soviet system. These earlier experiences fueled his later passion to mobilize American Jewry in the drive to rescue Jews from oppression in the Soviet Union.

In the mid 1950s and early 1960s, he became involved in assisting people from the disintegrating Jewish communities of North Africa caught up in the struggles of the host countries for independence from France and in the persecution of the Jews of North Africa after the independence of Israel.

His activism did not end then. After traveling to the United States, he decided to create a national student organization to activate the grass roots of

the American Jewish community. Settling in New York, in 1964, he set up his first student committee. Then he concentrated on building a student core at Yeshiva University. Mr. Birnbaum named the new organization the Student Struggle for Soviet Jewry, known familiarly as the SSSJ.

Finally, he called a national founding meeting at Columbia University on April 27, 1964, followed by a large student demonstration 4 days later on the Soviet holiday May Day in front of the Soviet United Nations Mission. The authoritative Center for Jewish History has listed the demonstration as the beginning of the public struggle for the freedom of Soviet Jews.

Many consider this action as the reason to consider Mr. Birnbaum the father of the movement to liberate Soviet Jewry. Indeed, the evidence supports this notion. Throughout the rest of the 1960s, under his direction, the Student Struggle continued working full time in response to the oppression of Soviet Jews.

As we know, the Bolshevik Resolution in Russia led to the imprisonment of Soviet Jews behind the Iron Curtain. Jewish culture, Jewish religion and Jewish communal life were forcibly extinguished under the Soviet regime, which also indulged in numerous anti-Semitic actions.

Even after Stalin's death, the Soviet kingdom of fear abated only slightly. The Cold War effectively continued to cut off the Jews of Russia and Eastern Europe from their fellow Jews in the West, and almost all expressions of Jewish religion and culture continued to be prohibited.

Nevertheless, expressions of outrage began to accumulate in the early 1960s, with a few pioneers leading the way. Shortly after the initial organizing by Jacob Birnbaum, the major Jewish organizations met in Washington, DC, and established the American Conference on Soviet Jewry. The SSSJ that Mr. Birnbaum had established functioned as its handbook said, ''to mobilize a tidal wave of public opinion.''

After the mass arrests of young Jewish dissidents on June 15, 1970, and the death sentences handed down to them in the Leningrad trial of December 1970, the National Conference on Soviet Jewry was created.

□ 1700

The Greater New York Conference, under the direction of the then young activist Malcolm Hoenlein, initiated the profoundly important Solidarity Day marches, modeled after Jacob Birnbaum's Jericho, Redemption, and Exodus marches and rallies of the 1960s. Mr. Hoenlein is now the Executive Vice Chairman of the Conference of Presidents of Major American Jewish Organizations. Of great significance was the creation in 1970 of the Union of Councils for Soviet Jews, a coalition of non-establishment regional groups, under the chairmanship of Dr. Louis Rosenblum, with whom Jacob Birnbaum worked for many years.

Mr. Hoenlein has publicly stated that he considers Mr. Birnbaum ''the father of the Soviet Jewry movement.'' Similar statements have been made by other major public figures such as Dr. Meir Rosenne, who worked closely with Mr. Birnbaum in the early formative period of 1964 to 1967. Dr. Rosenne later became Israel's Ambassador to France and then to the United States. Sir Martin Gilbert, the official British historian of Winston Churchill and his times, has made a similar statement.

In May, 1965, Mr. Birnbaum was the first person to testify before a congressional committee on the importance of utilizing economic leverage on the Kremlin to secure the liberation of Soviet Jews. When the late Senator Henry Jackson initiated the legislation which finally resulted in the passage of the Jackson-Vanik Amendment in 1974, Mr. Birnbaum worked closely with the director of Senator Jackson's office, Dorothy Fosdick, and, of course, with his other aide, Richard Perle, who played a major role in the initiation and development of the legislation.

The idea of placing economic pressure on Communist states to increase emigration played a key role in softening up the Kremlin regimes to make possible the Soviet Jewry demand of ''Let My People Go.'' For the first time, there was legislation to put teeth into the previous congressional humanitarian resolutions.

From 1976 to 1986, Jacob Birnbaum conducted annual Most Favored Nation campaigns, based on Jackson-Vanik, to pressure various countries, including Romania, to increase emigration and to release prisoners. He testified annually before both Senate and House Committees.

In the latter 1970s, Mr. Birnbaum enlarged his Soviet Jewry strategy. He expanded the slogan ''Let My People Go'' by adding ''Let My People Know.'' Let them know their heritage. The Kremlin had pulverized Jewish religious, cultural and community life, and, in the 1960s, the Soviet Jewish resistance underground began to generate Jewish self-education, cultural, religious and Hebrew-speaking groups in the Soviet Union.

Mr. Birnbaum conducted numerous campaigns for their protection, enlisting the aid of many Christian religious denominations. These efforts reached a high point when he organized and led a delegation of the Synagogue Council of America to meet with the Deputy Secretary of State and the Department's Human Rights Director, Warren Zimmermann, in September 1985.

Mr. Birnbaum's vision was partially realized with Malcolm Hoenlein's Solidarity Rallies in New York, and, finally, by the great national rally in Washington on December 7, 1987, on the eve of President Gorbachev's meeting with President Reagan.

Finally, in 1990, the Kremlin conceded to all the pressure and permitted a mass emigration, which has now totaled more than 2 million people, about 1 million to Israel and 1 million elsewhere, mostly to the United States. This was no small accomplishment. And many people played a role in making it happen.

In addition to the courageous work of Mr. Birnbaum, tribute ought to be paid to the pioneers and the other national organizations which fought so strenuously for the liberation of Soviet Jews:

Morris Abram, U.S. Human Rights Commissioner; Dr. Moshe Decter, the scholar whose research fueled the early movement; former Justice Arthur Goldberg; the distinguished theologian, Rabbi Dr. Abraham J. Heschel; Senator Jacob Javits; NASA scientist Dr. Louis Rosenblum of the Cleveland Committee on Soviet Anti-Semitism; and Elie Wiesel, whose book, ''The Jews of Silence'' was so influential.

Many organizations also played an important role, and I will name them in my extended remarks.

Following the collapse of the Soviet regime, Mr. Birnbaum spent a substantial part of the 1990s in combating anti-Semitic manifestations in former Soviet Central Asia, mostly in Uzbekistan, intervening through the State Department and enlisting Malcolm Hoenlein's aid in engaging the Uzbek Ambassador in Washington.

In his 81st year, Mr. Birnbaum continues to support groups engaged in the Jewish education of former Soviet Jews and their children. His dedication to his beliefs remains as strong as ever.

For all these reasons, Mr. Speaker, the House of Representatives ought to honor the life and six decades of public service of Jacob Birnbaum and especially his successful commitment to freeing Soviet Jews from religious, cultural, and communal extinction. He is a true hero.

I want to thank the gentleman from California (Mr. LANTOS), chairman of the Foreign Affairs Committee, for moving this resolution quickly through his committee. I would also like to thank the gentlewoman from California (Ms. WATSON) for managing the consideration of this resolution today, and the gentlewoman from Florida (Ms. ROS-LEHTINEN) for her leadership on this.

Again, I urge all my colleagues to join me in passing this resolution to honor this work of this unique hero of this century.

Ms. ROS-LEHTINEN. Mr. Speaker, I have no further requests for time, and I yield back the balance of my time.

Ms. WATSON. Mr. Speaker, I have no further requests for time, and I yield back the balance of my time.

The SPEAKER pro tempore. The question is on the motion offered by the gentlewoman from California (Ms. WATSON) that the House suspend the rules and agree to the resolution, H. Res. 137, as amended.

The question was taken; and (two-thirds being in the affirmative) the rules were suspended and the resolution, as amended, was agreed to.

A motion to reconsider was laid on the table.

CALLING ON GOVERNMENT OF UGANDA AND LORD'S RESISTANCE ARMY TO RECOMMIT TO POLITICAL SOLUTION IN NORTHERN UGANDA

Ms. WATSON. Mr. Speaker, I move to suspend the rules and agree to the concurrent resolution (H. Con. Res. 80) calling on the Government of Uganda and the Lord's Resistance Army (LRA) to recommit to a political solution to the conflict in northern Uganda and to recommence vital peace talks, and urging immediate and substantial support for the ongoing peace process from the United States and the international community, as amended.

The Clerk read the title of the concurrent resolution.

The text of the concurrent resolution is as follows:

H. CON. RES. 80

Whereas for over two decades, the Government of Uganda has been engaged in an armed conflict with the Lord's Resistance Army (LRA) that has resulted in up to 200,000 deaths from violence and disease and the displacement of more than 1,600,000 civilians from eastern and northern Uganda;

Whereas former United Nations Undersecretary-General for Humanitarian Affairs and Emergency Relief Coordinator Jan Egeland called the crisis in northern Uganda ''the biggest forgotten, neglected humanitarian emergency in the world today'';

Whereas Joseph Kony, the leader of the LRA, and several of his associates have been indicted by the International Criminal Court for war crimes and crimes against humanity, including rape, murder, enslavement, sexual enslavement, and the forced recruitment of an estimated 66,000 children;

Whereas the LRA is a severe and repeat violator of human rights and has continued to attack civilians and humanitarian aid workers despite a succession of ceasefire agreements;

Whereas the Secretary of State has labeled the LRA ''vicious and cult-like'' and designates it as a terrorist organization under the Immigration and Nationality Act;

Whereas the 2006 Department of State report on the human rights record of the Government of Uganda found that ''security forces committed unlawful killings . . . and were responsible for deaths as a result of torture'' along with other ''serious problems'', including repression of political opposition, official impunity, and violence against women and children;

Whereas in the 2004 Northern Uganda Crisis Response Act (Public Law 108–283; 118 Stat. 912), Congress declared its support for a peaceful resolution of the conflict in northern and eastern Uganda and called for the United States and the international community to assist in rehabilitation, reconstruction, and demobilization efforts;

Whereas the Cessation of Hostilities Agreement, which was mediated by the Government of Southern Sudan and signed by representatives of the Government of Uganda and the LRA on August 20, 2006, and extended on November 1, 2006, requires both parties to cease all hostile military and media offensives and asks the Sudan People's Liberation Army to facilitate the safe assembly of LRA fighters in designated areas for the duration of the peace talks;

Whereas the Cessation of Hostilities Agreement expired on February 28, 2007, without ever having been fully implemented, and though the parties resumed peace talks on April 26, 2007, and signed a preliminary agreement on May 2, 2007, they have not yet arrived at a sustainable negotiated settlement and observers remain concerned that hostilities between rebel and government forces could resume;

Whereas a return to civil war would yield disastrous results for the people of northern Uganda and for regional stability, while peace in Uganda will bolster the fragile Comprehensive Peace Agreement in Sudan and de-escalate tensions in the Democratic Republic of the Congo; and

Whereas continuing violence and instability obstruct the delivery of humanitarian assistance to the people of northern Uganda and impede national and regional trade, development and democratization efforts, and counter-terrorism initiatives: Now, therefore, be it

Resolved by the House of Representatives (the Senate concurring), That Congress—

(1) disapproves of the Lord's Resistance Army (LRA) leadership's inconsistent commitment to resolving the conflict in Uganda peacefully;

(2) urges the LRA and the Government of Uganda to engage in good-faith negotiations to pursue a political solution to this conflict;

(3) encourages all parties in the region to immediately cease human rights violations and address, within the context of a broader national reconciliation process in Uganda, issues of accountability and impunity for those crimes against humanity already committed;

(4) urges leaders on both sides of the conflict in Uganda to renounce any intentions and halt any preparations to resume violence and to ensure that this message is clearly conveyed to armed elements under their control; and

(5) calls on the Secretary of State, the Administrator of the United States Agency for International Development, and the heads of other similar governmental agencies and nongovernmental organizations within the international community to continue to augment efforts to alleviate the humanitarian crisis in northern Uganda and to support a peaceful resolution to this crisis by publicly and forcefully reiterating the preceding demands.

The SPEAKER pro tempore. Pursuant to the rule, the gentlewoman from California (Ms. WATSON) and the gentlewoman from Florida (Ms. ROS-LEHTINEN) each will control 20 minutes.

The Chair recognizes the gentlewoman from California.

GENERAL LEAVE

Ms. WATSON. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days to revise and extend their remarks and include extraneous material on the resolution under consideration.

The SPEAKER pro tempore. Is there objection to the request of the gentlewoman from California?

There was no objection.

Ms. WATSON. Mr. Speaker, I rise in strong support of this resolution, and I yield myself such time as I may consume.

Mr. Speaker, I first want to thank the distinguished gentleman from Georgia, Mr. HANK JOHNSON, for sponsoring this important and timely resolution on the nightmarish conflict in northern Uganda.

Two decades of horrific battle between the Lord's Resistance Army and the Ugandan government have taken up to 200,000 lives and displaced nearly 2 million civilians from their homes. But the human tragedy in Uganda cannot be simply represented but numbers and statistics. It is about the daily pain and terror of victims and their families.

Like other rebel forces that have fought the tragic civil wars of Africa, the Lord's Resistance Army built its ranks with child soldiers, both girls and boys, and used vicious and unspeakable methods to alienate these children from their families and their villages. Time and again, Uganda child victims have been forced to commit unthinkable acts, to kill their parents and other relatives before being abducted themselves.

Over two decades of war, more than 30,000 children have been kidnapped and faced a horrible fate, becoming absorbed into the LRA. Meanwhile, tens of thousands of terrified children leave their home villages each evening at dusk and walk to distant towns to avoid being kidnapped by the LRA and pressed into service. They are known in Uganda as the ''night commuters.''

Mr. Speaker, every parent in the United States labors to reassure their young children that they are safe at home when sleeping in their own beds. The greatest crime of the Lord's Resistance Army is to take even this basic right away from children and families of northern Uganda.

While the LRA is responsible for the overwhelming majority of violence and abuse of children and their families, the government of Uganda also has been cited time and again for human rights violations. In August of last year, South Sudan's President brokered a cessation of hostilities agreement between the government and the rebel forces, but the accord broke down and only last month did the 10-month effort resume.

I believe the Uganda people deserve both peace and justice. It is incumbent upon the international community to work with Uganda people, particularly the people of northern Uganda, along with the International Criminal Court and the Ugandan judiciary, to make

sure both a lasting peace and real justice are achieved.

The healing and the recovery of the Uganda people, particularly the children, from this tragic war, requires that we make their personal peace the priority right now. It is the only path to lasting stability for northern Uganda. That is why I urge the passage of this legislation, to put Uganda on a path to peace once again.

Mr. Speaker, I reserve the balance of my time.

Ms. ROS-LEHTINEN. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, I rise in strong support of H. Con. Res. 80, which calls on the government of Uganda and the Lord's Resistance Army, the LRA, to recommit to a political solution to the conflict in northern Uganda by engaging in good faith negotiations, and it urges support for the ongoing peace process from the United States and the international community.

As my good friend from California, Ambassador Watson, has pointed out, since 1986, northern Uganda has been embroiled in a vicious conflict which pits the forces of Uganda President Museveni against the rebel Lord's Resistance Army, LRA, of Joseph Kony. Kony claims to hold mystical powers and asserts that he has been guided by God to protect the Acholi people of northern Uganda who have been marginalized by Museveni's government. However, it is the Acholi themselves who have suffered disproportionately at the hands of the LRA.

The LRA, which has been designated as a terrorist group subject to the State Department Terrorist Exclusion List, moves in small, well-coordinated groups from bases in southern Sudan and more recently in eastern Congo. They hold no clear political agenda and make no attempt to hold territory, but they mutilate, torture, murder, rape and loot with impunity.

The LRA has abducted more than 20,000 people, mostly children, Mr. Speaker, to work as laborers, soldiers and sex slaves. Children are forced to the front lines, and those who do manage to escape from the LRA find it difficult, if not impossible, to return to their villages after having been forced to commit atrocities in front of their families.

One of the most visible signs of the collective trauma suffered by the people of northern Uganda was pointed out by Ambassador Watson, and this is the ''night commuter'' phenomenon. At the peak of the conflict, over 20,000 children would walk up to 15 kilometers from their village to the relative safety of the towns each and every night. They would spend the night under grossly overcrowded tents, sleeping on concrete floors, before getting up at dawn to make the return journey to their villages. It was not for food, nor for the promise of social services that drew these children to these towns, but it was fear of abduction by the LRA.

While security conditions in northern Uganda have improved and the number of ''night commuters'' has decreased over the past years, roughly 90 percent, 90 percent, Mr. Speaker, of the local population remains homeless.

□ 1715

These 1.4 million people have been forced from their homes and herded by the Government of Uganda into camps for internally displaced persons. Despite attempts to ''decongest,'' the conditions in these camps are abysmal.

A health survey conducted by the Ugandan Ministry of Health in 2005 asserts that up to 1,000 people have died in the camps each week due to treatable illnesses such as diarrhea and malaria. The HIV/AIDS rate in the camps is more than double the national average. Sexual violence and domestic violence against women has increased dramatically, and the IDPs complain that camp life has all but destroyed the social fabric of the region.

For its own part, the Ugandan Government has failed in its efforts to defeat the LRA militarily, and to provide adequate protection for the citizens of northern Uganda. Instead, the government has embraced a highly questionable three-pronged approach towards resolving the conflict, and this includes: number one, pursuing a military campaign against the LRA; two, supporting indictments by the International Criminal Court, the ICC, against the LRA's top leaders; while, three, participating in peace talks while offering amnesty to LRA rebels.

It should come as no surprise that these mutually incompatible efforts have complicated matters and have failed to yield lasting results. Ill-timed military campaigns have undermined numerous mediation efforts, and the ICC indictments have led the LRA to question the sincerity of the amnesty deal offered by the government leaders.

Further, both the Government of Sudan and the LRA have routinely violated the agreement that is called the Cessation of Hostilities Agreement which has now expired without ever having been fully implemented. These actions have prompted skeptics to warn that both sides may be using the pretext of talks to rearm and replenish their forces.

If this is in fact the case, both the LRA and the Ugandan Government should be reminded of the fact that a military solution has alluded them for over 20 years. It is unlikely that a military solution will be any more viable now.

Thankfully, peace talks between the Government of Uganda and the LRA have resumed in Juba, Southern Sudan, and appear to be gaining momentum. Despite numerous challenges, not the least of which is the fact that delegations allegedly representing the two parties have questionable credibility, the Juba process is being hailed as the best chance yet to ending the conflict by political means.

H. Con. Res. 80 serves as an expression of support for this political dialogue. It expresses disapproval of the LRA leadership and its inconsistent commitment to resolving the conflict and it urges both the LRA and the Government of Uganda to engage in good-faith negotiations. It encourages all parties to immediately stop human rights violations and address the issues of accountability, and it calls on both the LRA and the Government of Uganda to renounce any intentions and halt any preparations to resume this violence.

Finally, Mr. Speaker, the resolution calls on the State Department, on the United States Agency for International Development, and other similar government and nongovernment organizations within the international community to continue and to augment efforts to alleviate the humanitarian crisis in northern Uganda and to support a peaceful resolution to this humanitarian crisis.

According to the U.N. Office of Humanitarian Affairs, the conflict of northern Uganda is characterized by a level of cruelty seldom seen, and few conflicts rival it for its sheer brutality.

Despite all of this, Mr. Speaker, it remains one of the most overlooked humanitarian and human rights crises in the world today. H. Con. Res. 80 seeks to shed some well-deserved attention on the crisis in northern Uganda. It affirms the resolve of this Congress that the victims of this atrocious conflict shall not be forgotten.

Mr. Speaker, I thank you for bringing this important resolution to the floor. I urge support by all of our Members.

Mr. Speaker, I reserve the balance of my time.

Ms. WATSON. Mr. Speaker, I yield 5 minutes to the gentleman from Georgia (Mr. JOHNSON).

Mr. JOHNSON of Georgia. Mr. Speaker, I thank the distinguished gentlewoman from California and also the honorable gentlewoman from Florida for their support for this resolution.

Mr. Speaker, I rise today in strong support of H. Con. Res. 80, a resolution that I introduced which calls on the Government of Uganda and the Lord's Resistance Army, or the LRA, to recommit to a political solution to the conflict now raging in northern Uganda, and to recommence and sustain vital peace talks.

It also urges immediate and substantial support for the ongoing peace process from the United States and the international community.

When it comes to international affairs, Mr. Speaker, the Congress is

somewhat limited in the action that it can take to address issues of concern. As we all know, it is primarily and rightfully a function of the executive branch. However, we do have the right and the ability to use this platform to focus attention on human suffering around the globe, if only for a moment.

So now is our moment to put a spotlight on the situation in northern Uganda. The situation has been explained by both the gentlewoman from California and the gentlewoman from Florida so I will not duplicate what they have said.

My sincere hope is that H. Con. Res. 80 will help bring peace to the ravaged region of northern Uganda. Specifically, this bill calls on the Government of Uganda and the LRA to recommit to a political solution to the conflict in northern Uganda and to sustain the vital peace talks that are now ongoing. It also urges immediate and substantial support for the ongoing peace process from the United States and the international community.

Mr. Speaker, the tragedy in Darfur rightfully has been receiving a great deal of attention as of late, but to the southeast of that region, another tragedy has been developing for nearly two decades. More than 200,000 Ugandans have died from the violence and disease brought about by the conflict between the Ugandan Government and the LRA.

Almost 2 million people have been displaced from their homes and villages, having been forced to flee the violence. What is particularly disgusting about this conflict is the forced recruitment of children by the LRA. As many as 38,000 children have been abducted. The boys are turned into killing machines and the girls into sex slaves.

Former U.N. Under Secretary General Jan Egeland has called the crisis in northern Uganda ''the biggest forgotten, neglected humanitarian emergency in the world today.''

Today, with the passage of H. Con. Res. 80, I hope to take a small step toward changing this unfortunate truth, and I respectfully ask that my colleagues support the resolution.

Ms. ROS-LEHTINEN. Mr. Speaker, I yield such time as he may consume to the gentleman from New Jersey (Mr. SMITH).

Mr. SMITH of New Jersey. I thank the gentlewoman for yielding.

Mr. Speaker, having personally visited Uganda in April 2006, I chaired a hearing on the endangered children of northern Uganda for the Subcommittee on Africa, Global Human Rights and International Operations. We heard from a number of witnesses and we raised it and continue to raise it with the administration.

But one of our witnesses was a particularly noteworthy person, Grace Akallo. Grace is, or was, a child soldier, an abducted young girl, who was totally mistreated by the Lord's Resistance Army. She was turned into a child soldier. And just a couple of days ago, announced her new book called ''Girl Soldier'' which makes chilling reading for anybody who wants to know what really goes on in northern Uganda, and how crazed Joseph Kony and his people are; and how, as the distinguished gentleman said just a moment ago, they turn girls into sex slaves and killers and the young men into killing machines. It is a terrible, horrible indictment on how low the individual can sink to.

And Joseph Kony, as we all know, has been indicted by the International Criminal Court for serious crimes against humanity. And, regrettably, this killing continues to go on.

I urge Members to read the book. It is an awakening not just on how she suffered, but also how a person when surrounded by people who love her and give her the kind of support that any individual like herself needs to get, how they can come back, the resiliency of the human spirit. She is a soft-spoken, poised, gentle, lovely young woman who has a great future, but she has been through a nightmare. We ought to keep her and her friends in our prayers.

She also pointed out just last week in a meeting that we had announcing her book that she cries out and prays every day for her friends, many of whom she does not know what happened to them. They are still there, she thinks. They may be dead. But she has no idea. I think that puts additional impetus on us to do more, to save these children, this lost generation.

Mr. Speaker, over the last 20 years as many as 1.5 million persons, an estimated 90 percent of the population of the Acholi area in northern Uganda have been forced into internally displaced camps as a result of the violence between the Lord's Resistance Army and the Government of Uganda. Nearly half of these internally displaced persons are children under the age of 15, people like Grace Akallo.

One quarter of the children in northern Uganda over 10 years of age have lost one or more parents. About a quarter of a million children receive no education at all. The fact that 60 percent of the schools in northern Uganda no longer function is directly attributable to the war. I point out that those that do function do so in a very meager way.

Because of the war in the north, Uganda has developed a lost generation that has grown up in dire circumstances with fear and deprivation as their constant companions. Nearly half of the children in one town are stunted from malnutrition. They are likely to never recover.

The latest 2006 Country Reports on Human Rights Practices summarized in a chilling fashion the horror that has been perpetrated on the people of northern Uganda, particularly by the head of the Lord's Resistance Army, Joseph Kony. It states that ''at the height of the war, the LRA, led by Joseph Kony, committed serious abuses and atrocities, including abduction, rape and the killing of civilians. The LRA used children as soldiers, held children and others in slave-like conditions, and subjected female captives to rape and other forms of severe sexual exploitation.''

This resolution tries to put additional focus, additional girth, behind the effort to finally find a negotiated solution to this ongoing killing fields, and we all hope and pray this will have at least a happier ending than thus far.

Again, I urge Members to read the book by Grace Akallo, ''Girl Soldier.''

Ms. ROS-LEHTINEN. Mr. Speaker, I yield back the balance of my time.

Ms. WATSON. Mr. Speaker, I yield back the balance of my time.

The SPEAKER pro tempore. The question is on the motion offered by the gentlewoman from California (Ms. WATSON) that the House suspend the rules and agree to the concurrent resolution, H. Con. Res. 80, as amended.

The question was taken; and (two-thirds being in the affirmative) the rules were suspended and the concurrent resolution, as amended, was agreed to.

The title was amended so as to read: ''Concurrent resolution calling on the Government of Uganda and the Lord's Resistance Army (LRA) to recommit to a political solution to the conflict in northern Uganda by engaging in good-faith negotiations, and urging immediate and substantial support for the ongoing peace process from the United States and the international community.''.

A motion to reconsider was laid on the table.

NOTING KILLINGS OF DOZENS OF INDEPENDENT JOURNALISTS IN RUSSIA AND CALLING ON RUSSIAN PRESIDENT TO AUTHORIZE COOPERATION WITH OUTSIDE INVESTIGATORS

Ms. WATSON. Mr. Speaker, I move to suspend the rules and agree to the concurrent resolution (H. Con. Res. 151) noting the disturbing pattern of killings of dozens of independent journalists in Russia over the last decade, and calling on Russian President Vladimir Putin to authorize cooperation with outside investigators in solving those murders, as amended.

The Clerk read the title of the concurrent resolution.

The text of the concurrent resolution is as follows:

H. CON. RES. 151

Whereas Paul Klebnikov, the editor of the Russian version of Forbes Magazine, who was investigating suspect business dealings and

corruption cases in Russia, was shot to death in Moscow on July 9, 2004;

Whereas Mr. Klebnikov's murder remains unsolved;

Whereas Anna Politkovskaya, an acclaimed Russian journalist and human rights activist who wrote numerous articles critical of Russia's prosecution of the war in Chechnya, of human rights abuses by the Russian government and of Russian President Vladimir Putin was shot to death in Moscow on October 7, 2006;

Whereas Ms. Politkovskaya's murder remains unsolved;

Whereas Ivan Safronov, a military affairs reporter for the Russian newspaper ''Kommersant'' who wrote articles criticizing the failure of Russian military programs and who was planning to report on potential Russian arms sales to Middle Eastern countries, including to state sponsors of terrorism Iran and Syria, died in mysterious circumstances, falling five stories from a window in the stairwell of his apartment building in Moscow on March 2, 2007;

Whereas, Russian prosecutors subsequently suggested that Mr. Safronov may have committed suicide, although he left no suicide note and the circumstances surrounding his death raised unanswered questions;

Whereas the cause of Mr. Safronov's death remains undetermined;

Whereas, according to Reporters Without Borders, twenty-one reporters have been murdered in Russia since March 2000 and many of those murders remain unsolved;

Whereas, according to Reporters Without Borders, Russia was one of the six most dangerous countries for journalists to work in during 2006;

Whereas a number of those reporters who were murdered had reported on alleged corruption, malfeasance and other controversies at the federal, provincial and local levels of government in Russia;

Whereas a number of those murdered had reported on alleged human rights abuses by the Russian Government;

Whereas a number of those murdered had reported on the Russian government's conduct of the war in Chechnya, which has involved numerous allegations of gross human rights violations and corruption;

Whereas, if journalists are killed or silenced through undue pressure with impunity, a vibrant and participatory civil society sector cannot emerge and democratic developments are stalled; and

Whereas, according to the President of the International News Safety Institute, ''murder has become the easiest, cheapest and most effective way of silencing troublesome reporting, and the more the killers get away with it the more the spiral of death is forced upwards'': Now, therefore, be it

Resolved by the House of Representatives (the Senate concurring), That Congress—

(1) recalls the essential role that transparency and the free flow of information play in creating and preserving democratic institutions and civil society in any country;

(2) recognizes the vital contribution made by independent journalists in Russia in bringing transparency and a free flow of information to readers after decades of Communist censorship and repression;

(3) notes the disturbing trend of murders of independent journalists in Russia over the last decade;

(4) encourages the President of the United States to formally offer Russian President Vladimir Putin and other officials of the Russian Government United States Government law enforcement investigative assistance to help identify and bring to justice those responsible for the many unsolved murders of journalists in Russia during the past decade; and

(5) urges President Putin to seek out competent, outside law enforcement assistance in the investigation of the unsolved murders of numerous independent journalists in Russia.

The SPEAKER pro tempore. Pursuant to the rule, the gentlewoman from California (Ms. WATSON) and the gentlewoman from Florida (Ms. ROS-LEHTINEN) each will control 20 minutes.

The Chair recognizes the gentlewoman from California.

□ 1730

GENERAL LEAVE

Ms. WATSON. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days to revise and extend their remarks and include extraneous material on the resolution under consideration.

The SPEAKER pro tempore. Is there objection to the request of the gentlewoman from California?

There was no objection.

Ms. WATSON. Mr. Speaker, I rise in strong support of this resolution and yield myself as much time as I may consume.

I would like to commend our distinguished colleague Mr. CHRIS SMITH of New Jersey for introducing this important resolution that emphasizes the vital necessity of free speech in a democratic state. Often people consider freedom of speech as just icing on the cake of a society that treats its citizenry well. It's a nice touch but not the most essential component.

But let me be clear, freedom of the press is not just a bourgeois middle class concern. It is not just an American concern. It is the essential component of democracy, as much as in Russia as anywhere else.

Freedom of the press sharpens the tools of democracy and holds a government's feet to the fire. It is the only real way to inform the people about their own country and mobilizing them around crucial issues.

Nowhere is this more important than in Russia, where nascent independent press formed in the early 1990s had suddenly dissipated under fear of government reprisal. It is no mistake that this decline has been accompanied by a simultaneous acquiescence of democratic opposition in the country.

The threat to reporters writing about government decisions and engaging in investigative journalism is immediate and real. It has reached the point that journalists in Russia that dare to criticize the government are constantly looking over their shoulders in fear.

According to Reporters Without Borders, 21 reporters have been murdered under mysterious circumstances since Putin took office in March of 2000. Almost all of those mysteries remain unsolved because the Putin government refuses to investigate fully and honestly.

In the case that has led to perhaps the greatest outcry, Anna Politkovskaya was shot to death in the elevator bank of her apartment building in Moscow. She and her family had feared for her life ever since she emerged as an acclaimed journalist and human rights activist. She wrote numerous articles critical of Kremlin human rights abuses and misdeeds in Chechnya, and she paid the highest price for it.

Paul Klebnikov, the editor of the Russian version of Forbes magazine, investigated suspect business dealings and was subsequently shot to death in Moscow.

Ivan Safronov, a military affairs reporter who criticized the failure of Russian military programs, died in mysterious circumstances after falling five stories from a window in his apartment building.

These three deaths, as well as the tragic loss of many of their brave colleagues, remain unresolved. It appears that the Russian government, which is led by a former KGB colonel, somehow no longer knows how to investigate such crimes. I find that awfully curious.

We cannot allow this repression, this silencing of an independent media, to continue, especially in a country with a nascent democracy and starved for objective information.

There was a fleeting moment in Russia in the early 1990s when an independent media flourished and new publications cropped up overnight. Now, the brave critical journalists who remain cower in fear.

So I urge my colleagues to support this resolution, which highlights the disturbing trend of these suspicious deaths in Russia. It stresses the importance of a free flow of information to a democratic society, and praises the courageous men and women who seek to bring transparency to the Russian people after so many years of Communist secrecy.

Finally, it calls on President Putin to seek outside help in investigating these unsolved crimes and on the United States Government to formally offer such assistance.

Mr. Speaker, I reserve the balance of my time.

Ms. ROS-LEHTINEN. Mr. Speaker, I yield myself as much time as I may consume.

I rise in strong support of House Concurrent Resolution 151, introduced by my distinguished colleague from New Jersey (Mr. SMITH).

As the gentlewoman from California has pointed out, Mr. Speaker, this important resolution deals with a strange and quite troubling pattern of the killing of independent journalists in Russia over the past decade. We have different estimates, but one places the

number of murdered reporters at 21 over the past 7 years, that estimate coming from the esteemed organization, Reporters Without Borders. Another estimate from the International News Safety Institute puts the number at close to 90 reporters killed in Russia over the past 11 years.

Now what is truly strange is that most of these murders remain unsolved. Many of the murdered journalists have made it their personal cause to investigate corruption and the abuse of power at all levels of the Russian government.

Perhaps many of our colleagues will recall how just a few weeks ago a brave Russian reporter was shot in the head on a street in Moscow. She had written articles criticizing the Russian government for its human rights abuses. Her murder remains unsolved.

Perhaps our colleagues will recall the more recent death of a reporter who died in March of this year, as the gentlewoman pointed out, falling five stories from a window in the stairway of his apartment building. He was a military affairs reporter who had criticized the Russian Government in his articles, and he had been planning to publish a report on the arms sales of Russia to the state sponsors of terror, Iran and Syria.

All of these seekers of truth did not deserve to die for their journalistic efforts. Bringing to justice the murderers of these reporters does deserve the strongest possible support of their government, their police, their prosecutors, and yet it appears to be strangely absent.

Mr. Speaker, a free and democratic society requires freedom of the press, freedom of the media and respect for the safety of those who at times risk their lives to uncover the truth. Russia will not be a free and democratic society until that is the case in their country.

We can and we should ask the Russian government to stand up in defense of its independent media and the safety of its reporters, but the unwillingness of the Russian government to solve so many of these murders and the successful efforts of the Kremlin to use state-owned or influenced companies to buy up and sensor the Russian media shows that our voices may be falling on willingly deaf ears.

Nevertheless, that is what we should do. We should call on the Russian government to respect human rights and the rule of law by investigating these crimes with vigor and with sincerity. And that is the message, Mr. Speaker, of the resolution before us.

This resolution also calls on our President to specifically offer our assistance to help the Russian government investigate those crimes.

We should also ask the Russian president to seek out and accept competent outside law enforcement assistance to investigate these crimes, and this resolution calls for that.

Mr. Speaker, it is critical that we recognize the tremendous contributions made by independent journalists in Russia, most especially those who suffer a bitter death as an unjust reward for their efforts. It is critical that we condemn in the strongest possible form the brutal murders of those who died trying to bring accurate and honest information to the Russian people about what is happening in their country.

I urge my colleagues to support Mr. SMITH's resolution to honor these intrepid reporters whose murders cry out for justice.

Mr. Speaker, I reserve the balance of my time.

Ms. WATSON. Mr. Speaker, I have no further requests for time, and I yield back the balance of my time.

Ms. ROS-LEHTINEN. Mr. Speaker, I yield such time as he may consume to the author of this resolution, the gentleman from New Jersey (Mr. SMITH).

Mr. SMITH of New Jersey. Mr. Speaker, I thank my good friend for yielding, and I want to thank Ambassador WATSON for being one of the cosponsors of this resolution, as well as all of those who join us today in making this collective statement to the Russians that there needs to be significant change, a reform, as to how they treat journalists.

Mr. Speaker, today I rise in strong support of H. Con. Res. 151, a resolution which calls upon Russian President Putin to seek outside law enforcement assistance in investigating the unsolved murders of dozens of Russian journalists over the past decade. We also encourage President Bush to formally offer President Putin law enforcement assistance from the United States.

Most observers think, Mr. Speaker, that some Russian officials have ordered or at least connived at these murders since most of the murdered journalists were investigating government corruption or involvement in human rights abuses. There is good reason to think that people in high places are still protecting the murderers.

Mr. Speaker, Russia holds the second worst position in the world in the number of journalists killed in the last 10 years, according to the International News Safety Institute. Reporters Without Borders counts 21 murdered journalists since March of 2000. This is a conservative number. It does not include the death under extremely suspicious circumstances of Ivan Safronov. It does include the murders of Paul Klebnikov and Anna Politkovskaya.

Mr. Speaker, any Member can do this, do a Google search, put in Russian journalists and murders, and you come up with one headline after another and one news story after another, usually in the Western press, of individuals being killed.

On June 15, there was a headline, ''Russian Journalist Attacked in Moscow''; May of 2005, ''Radio Journalist Badly Beaten Up''; April 21, ''Russian Reporters Get Beaten Despite Wearing Special Jackets''; April 20, ''Russian Activists Skeptical About Special Clothing For Journalists At Protests,'' they've got to wear special clothing, protective gear, to protect them from the police; April 9, ''Television Journalist Found Dead''; April 9, again, ''Critical Television Journalist Fears For His Life''; ''Photo Journalist Beaten, Injured'', on April 5; ''Journalist Assaulted During Demonstration''; and the list goes on and on and on. Sorry, Mr. Speaker, but I see a pattern, and I think other Members do as well.

Let me just say a brief word about the three journalists that all three of us are mentioning today, also delineated in the resolution, whose deaths are sadly illustrative of so many others.

Paul Klebnikov was the editor of the Russian edition of Forbes Magazine. In July 2004, he was shot to death in Moscow while investigating suspect business dealings and corruption cases.

Anna Politkovskaya was an award-winning Russian journalist and human rights activist. She wrote many articles criticizing Russian atrocities committed during the war in Chechnya. In October 2006, she was shot to death in Moscow.

Ivan Savronov reported for the Russian newspaper, Kommersant. He wrote articles criticizing the failure of Russian military programs and was planning to report on potential Russian arms sales to Iran and Syria, state sponsors of terrorism. In March of 2007, he died under suspicious circumstances, as has been recounted by both of my colleagues. He fell five stories from a window in the stairwell of his Moscow apartment building. That was no accident, Mr. Speaker. That was a murder.

None of these cases have been solved, and very few of the less famous cases have been even looked at in a meaningful way.

Many of my colleagues in this House have other concerns about human rights problems in Russia. Xenophobic violence continues throughout the Russian Federation.

□ 1745

People continue to disappear in Chechnya. Local officials still discriminate against non-Orthodox religion, and the rule of just law remains shaky. Of course we all care about these. But I would point out to you that a situation in which journalists can be killed with impunity is a human rights problem of a different order.

It is a human rights problem that mitigates the resolution of other

human rights problems. When journalists investigating a corruption case or a human rights abuse can be killed without their killers being brought to justice, or without a convincing effort being made to do so, this intimidates and has a chilling effect on other journalists. It marks off the borders of what others know they must not investigate.

As a result, the Russian press cannot properly fulfill its function of holding officials to account. This is exactly what the killers intend.

I raised this issue recently at a hearing of the Commission on Security and Cooperation in Europe. I was glad when Daniel Freed, Assistant Secretary of State for European and Eurasian Affairs, acknowledged the nature of the problem and said, ''attacks on journalists, including the brutal and still unsolved murders of Paul Klebnikov and Anna Politkovskaya, among others, chill and deter the fourth estate.''

Mr. Speaker, journalists fulfill an essential role in every society, and none more than those who uncover the theft of a country's assets by its elected officials or commit human rights outrages in its name. Journalists who do this at risk of their lives fully deserve to be called heroes. Make no mistake about it. These journalists knew what they were risking as they wrote and wrote and used the power of the pen to expose.

We owe it to them to raise our voice to bring the killers to justice. Mr. Putin, sadly, does not seem to be making any serious efforts to do so. Unfortunately, we have the situation as it exists today in Russia.

Only when journalists can work without fear of intimidation and death will we be able to say that we have a truly democratic Russian Government. Russian journalists, they are the watch dogs, just as they are in this country and every other country.

Alexander Solzhenitsyn, the great conscience of Russia, said in his Nobel Peace Prize speech in 1970, ''Any man who has once proclaimed violence as his method is inevitably forced to take the lie as his principle.''

My resolution addresses the violence of the murder of independent journalists, and the lie in the claim that their murders have been seriously investigated. Solzhenitsyn said of Communist Russia, in our country, the lie has become not just a moral category, but a killer of the state. We have to ask ourselves and ask Mr. Putin, was this terrible statement also true of post-Communist Russia?

I think we send a clear message today, and I hope Members in a bipartisan way will support this.

Finally, I just want to thank Mark Milosch and Mark Gauge for their work in helping to put this resolution together.

Ms. ROS-LEHTINEN. Mr. Speaker, I yield back the balance of my time.

The SPEAKER pro tempore. The question is on the motion offered by the gentlewoman from California (Ms. WATSON) that the House suspend the rules and agree to the concurrent resolution, H. Con. Res. 151, as amended.

The question was taken.

The SPEAKER pro tempore. In the opinion of the Chair, two-thirds being in the affirmative, the ayes have it.

Mr. SMITH of New Jersey. Mr. Speaker, on that I demand the yeas and nays.

The yeas and nays were ordered.

The SPEAKER pro tempore. Pursuant to clause 8 of rule XX and the Chair's prior announcement, further proceedings on this question will be postponed.

RECOGNIZING OVER 200 YEARS OF SOVEREIGNTY OF THE PRINCIPALITY OF LIECHTENSTEIN

Ms. WATSON. Mr. Speaker, I move to suspend the rules and agree to the resolution (H. Res. 233) recognizing over 200 years of sovereignty of the Principality of Liechtenstein, and expressing support for efforts by the United States to continue to strengthen its relationship with that country, as amended.

The Clerk read the title of the resolution.

The text of the resolution is as follows:

H. RES. 233

Whereas in 1806, Napoleon dissolved the Holy Roman Empire and Liechtenstein became a sovereign country;

Whereas Liechtenstein is nestled between Switzerland and Austria in the Upper Rhine valley of the European Alps, and is one of only two doubly landlocked countries in the world;

Whereas Liechtenstein has approximately 35,000 inhabitants, primarily Roman Catholics of German ethnicity;

Whereas Liechtenstein maintains a strong system of checks and balances between the legislative, executive, and judicial branches of government;

Whereas Liechtenstein is a constitutional hereditary monarchy, whose powers were expanded through a popular referendum in March 2004 in which 64 percent of citizens approved a new constitution;

Whereas the parliament of Liechtenstein, the ''Landtag'', consists of 25 representatives elected for four year terms by proportional representation in two multi-seat constituencies, 10 representing the lowland area and 15 representing the highland area;

Whereas after World War II, on the basis of Liechtenstein's advantageous corporate tax laws and its Customs Union with Switzerland, an industrial upswing transformed Liechtenstein from a poor agricultural state to a modern society;

Whereas despite its small geographic area and limited natural resources, Liechtenstein has a prosperous, highly industrialized, free-enterprise economy with manufacturing as its leading economic sector, complemented by a robust financial sector;

Whereas Liechtenstein has been a member of the European Economic Area since May 1995 and is working to harmonize its economic policies more closely with the European Union;

Whereas Liechtenstein companies have a considerable manufacturing, sales and service presence in the United States, which has resulted in the creation of over 4500 jobs;

Whereas since 1999, the United States has been the most important export market for members of the Liechtenstein Chamber of Commerce and Industry, totaling $521,000,000 in 2005;

Whereas the Mutual Legal Assistance Treaty between the United States and the Principality of Liechtenstein, which entered into force in August of 2003, has resulted in an enhanced pursuit of criminals and terrorists;

Whereas in cooperation with the United States-led coalition after the fall of Saddam Hussein in 2003, Liechtenstein froze assets of the former Iraqi regime, which resulted, among other things, in the return of a Falcon Jet 50 to the Iraqi people;

Whereas in collaboration with experts from the United States, the Liechtenstein Institute on Self-Determination at Princeton University seeks to raise awareness about issues pertaining to self-determination, self-governance and sovereignty through teaching, research and publications;

Whereas Liechtenstein abolished its military in 1868 and has exercised neutrality in its foreign affairs; and

Whereas Liechtenstein is an active member in international organizations such as the United Nations, the World Trade Organization, and the Organization for Security and Cooperation in Europe: Now, therefore, be it

Resolved, That the House of Representatives—

(1) recognizes over 200 years of sovereignty of the Principality of Liechtenstein; and

(2) expresses its support for efforts by the United States to continue to strengthen its relationship with that country.

The SPEAKER pro tempore. Pursuant to the rule, the gentlewoman from California (Ms. WATSON) and the gentlewoman from Florida (Ms. ROS-LEHTINEN) each will control 20 minutes.

The Chair recognizes the gentlewoman from California.

GENERAL LEAVE

Ms. WATSON. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days to revise and extend their remarks and include extraneous material on the resolution under consideration.

The SPEAKER pro tempore. Is there objection to the request of the gentlewoman from California?

There was no objection.

Ms. WATSON. Mr. Speaker, I yield myself as much time as I may consume.

I would first like to commend our distinguished colleague, Mr. CLIFF STEARNS of Florida, for introducing this important resolution.

Mr. Speaker, it is my great pleasure to rise today in strong support for this measure, which recognizes over 200 years of sovereignty of Liechtenstein and supports efforts by the United States to strengthen and further its relationships with this country. Liechtenstein may be small in size, but it is big in stature.

Just square 62 miles and nestled in the heart of Europe between Switzerland and Austria, it boasts 35,000 inhabitants, a strong democratic government and a constitutional heredity monarchy. Its mountain landscapes have made it renowned as one of the most beautiful countries in Europe. The country punches well above its weight in its contributions to the global banking and financial sectors.

In just the last 60 years, it has developed from a mainly agrarian society to one of the most highly industrialized countries in the world. Indeed, its economic growth should serve as the model for the potential of all small countries. It has become a strong economic partner for the United States, which has been the largest export market for Liechtenstein over the past 10 years.

In addition, Liechtenstein-based companies have created over 4,500 jobs in the United States, mainly in manufacturing, sales and service. Given the celebration last year of Liechtenstein's 200 years of sovereignty, it is fitting that the House pass this resolution to pay tribute to the country's democratic tradition and prosperity.

Furthermore, in recognition of the important partnership between the United States and Liechtenstein in the areas of politics, economics and security, this resolution calls on the United States to strengthen and further its relationship with Liechtenstein.

I strongly support this resolution and urge my colleagues to do the same.

Mr. Speaker, I reserve the balance of my time.

Ms. ROS-LEHTINEN. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, I am pleased to take this opportunity to rise in support of House Resolution 233 authored by my good friend from Florida (Mr. STEARNS) that recognizes the more than 200 years of sovereignty of Liechtenstein. With the dissolution of the Holy Roman Empire 200 years ago, Liechtenstein became an independent state.

Since then, it has evolved as both a constitutional monarchy and a parliamentary democracy. With a population of only about 34,000 people, we cannot expect Liechtenstein to take a leading role in international affairs, but it is an important ally in the cause of supporting and promoting democracy and, despite its small size, it has an importance for the United States that exceeds its geographical reach.

Exports are a major factor in the success of Liechtenstein's economy, and that outward-looking approach to commerce with the rest of the world has made it an important economic partner for the United States, creating almost 5,000 jobs here in the United States and achieving over half a billion dollars in exports to the American market in the year 2005 alone.

At home, in Europe, while it is not a member of the European Union, Liechtenstein is very closely aligned with the economic policies of that important organization and works to harmonize its economic policy very closely with it.

In the international arena, this small nation participates as a full partner in the United Nations, as well as in various critical international forums such as the World Trade Organization and the International Court of Justice.

Mr. Speaker, I encourage my colleagues to vote for this resolution by Mr. STEARNS of Florida, which expresses our support for a continued strengthening of our relationships with Liechtenstein.

Mr. Speaker, I reserve the balance of my time.

Ms. WATSON. Mr. Speaker, I yield back the balance of my time.

Ms. ROS-LEHTINEN. Mr. Speaker, I am pleased to yield such time as he may consume to the author of this resolution, Mr. STEARNS of Florida.

Mr. STEARNS. I thank my distinguished ranking member and my good friend from Florida and also the chairwoman of the subcommittee. I appreciate your words that you said earlier, and I think you succinctly outlined why this resolution is so important, and I compliment you on your speech.

Mr. Speaker, my colleagues, if you heard the word ''Liechtenstein,'' and you didn't know anything about this resolution, and you were out on the street and you were talking to people, and you said to them, what does the word Liechtenstein mean to you, there would probably be a number of things they would say. But I'll bet you one of the things they would say is it sounds like a word of integrity. It sounds like a word of independence. It sounds like a word of idealism. It sounds like a word of responsibility, and it sounds like a word of charm.

I have been there. It's a very charming country, it's a very responsible country, it's an independent country, and it's a country that represents idealism, much as the gentlelady from California has talked about when she mentioned that this country had been very responsible.

As mentioned, it's 34,000 people. It's a small nation, and accomplishes far more as mentioned earlier in social, political and financial influence than its small size would indicate. Nestled between Switzerland and Austria in the European Alps, Liechtenstein has established a stable and growing democracy, the type of government that we can all be proud of.

For over 200 years it has maintained a constitutional monarchy with a vibrant Parliament that employs a strong system, and this is what we believe in in a republic system of government checks and balances. Along with myself and other colleagues, we have had the privilege of visiting Liechtenstein. On several occasions I was introduced to its fascinating history and the people and its commitment to freedom during the last centuries.

The Liechtenstein family of Austria was given the rights to the land in 1713, and the area gained the status of an independent principality of the Holy Roman Empire in 1719 under the name Liechtenstein. When, in 1806, Napoleon defeated the Holy Roman Empire, the conquered Emperor made Liechtenstein a sovereign country.

Now, my colleagues, unfortunately, the people of Liechtenstein were not granted the full rights and liberties that come with this sovereignty. As under Napoleon, the French occupied the country for the next several years. However, in 1815, within the new German Confederation, Liechtenstein regained its full independence.

This country has a long history of diplomacy and peaceful relationships with its neighbors. In 1868, after the Confederation dissolved, Liechtenstein disbanded its army of 80 men and declared its permanent neutrality which, amazingly, was respected throughout both World War I and World War II. That is a feat of diplomacy.

In 1989, Prince Hans Adam II succeeded his father to the throne. Then 10 years ago, Prince Adam accomplished a diplomatic feat by settling a 60-year long dispute with Russia over the Liechtenstein's family archives, which had been confiscated during the Soviet occupation of Vienna in 1945 and later moved all to Russia, more specifically, to Moscow.

After World War II, Liechtenstein became increasingly important as a financial center. In 1978, this country became a member of the Council of Europe and joined the European Free Trade Association, the EFTA, in 1991. Liechtenstein has been a member of the European Economic Area since May of 1995, and is continuing to work to harmonize its economic policies more closely with the European Union every day.

One of Liechtenstein's most industrious resources is its people. It invested much effort in education, and this is something we can all be proud of and respect, they boast a literacy rate of 100 percent.

□ 1800

The United States and Liechtenstein have enjoyed a positive relationship for many, many years. In 2002, Liechtenstein and the U.S. signed a mutual legal assistance treaty which focused largely on jointly combating money laundering and other illegal banking activities. In addition, from the beginning of the global war on terror, this country took the initiative and has been a valuable and proactive partner in tracking down the finances of international terrorist groups.

Mr. Speaker, we are all aware of the dangerous world we live in today. In the years following the dreadful attack of September 11, we have been honored by the support and compassion of our friends around the world. We appreciate that.

While it is necessary and just to condemn countries for the threat they pose, I believe it is equally important and vital to honor countries for the support that they provide to us. Liechtenstein is one of those countries whose contribution should be recognized. For these reasons, I encourage my colleagues to take a closer look at the unique nation of Liechtenstein and join with me this afternoon in honoring this wonderful country. And my hat's off to them, and I urge passage of the resolution.

Mr. POE. Mr. Speaker, the tiny principality of Liechtenstein has survived and thrived as an independent and sovereign nation for over 200 years, ever since Napoleon dissolved the Holy Roman Empire in 1806. And I rise today in support of a resolution commemorating their independence and their friendship toward the United States.

Like my home state of Texas, Liechtenstein has worked hard to diversify its economy, keeping its important agricultural markets intact while embracing the industrial and financial services sectors, clearly for its immeasurable good.

Small in territory, Liechtenstein boasts an unemployment rate of only 1.3 percent and some of the lowest tax rates in Europe. Every day, the country's population swells to double its normal size, as citizens from the surrounding countries of Austria, Switzerland and Germany join the hardworking natives at work. And those that live and work in Liechtenstein enjoy one of the highest standards of living in the world.

Liechtenstein is also, of course, a great friend to the United States and to democracy. I have invited the Ambassador of Liechtenstein, Ms. Fristche, to visit my district and observe for herself the pride Texans have in their own country and of course, the unique balance of our own economy—the rice fields planted right up against the oil refineries.

I hope she takes me up on the offer.

That's just the way it is.

Mr. STEARNS. Mr. Speaker, the sovereign nation of Liechtenstein is home to 34,000 people and is the size of Washington, DC. Yet this tiny nation accomplishes far more in social, political and financial influence than its size would indicate. Nestled between Switzerland and Austria in the European Alps, Liechtenstein has established a stable and growing democratic government. For over 200 years it has maintained a constitutional monarchy with a vibrant parliament that employs a strong system of checks and balances.

I, along with many of my colleagues, have had the privilege of visiting Liechtenstein on several occasions, and I was intrigued by its fascinating history and the people's commitment to freedom that has lasted for centuries. The Liechtenstein family of Austria were given the rights to the land in 1713, and the area gained the status of an independent principality of the Holy Roman Empire in 1719 under the name Liechtenstein. When, in 1806, Napoleon defeated the Holy Roman Empire, the conquered Emperor made Liechtenstein a sovereign country. Unfortunately, the people of Liechtenstein were not granted the full rights and liberties that come with sovereignty, as under Napoleon, the French occupied the country for the next few years. However, in 1815 within the new German Confederation, Liechtenstein regained its full independence.

Liechtenstein has a long history in diplomacy and peaceful relations with their neighbors. In 1868, after the Confederation dissolved, Liechtenstein disbanded its army of 80 men and declared its permanent neutrality, which amazingly was respected through both world wars. In 1989, Prince Hans Adam II succeeded his father to the throne. Ten years ago, Prince Adam accomplished a diplomatic feat by settling a 60-year-long dispute with Russia over the Liechtenstein family's archives, which had been confiscated during the Soviet occupation of Vienna in 1945 and later moved to Moscow.

After World War II, Liechtenstein became increasingly important as a financial center. In 1978, Liechtenstein became a member of the Council of Europe and joined the European Free Trade Association (EFTA) in 1991. Liechtenstein has been a member of the European Economic Area since May 1995 and is continuing to work to harmonize its economic policies more closely with the European Union. One of Liechtenstein's most industrious resources is its people. Liechtenstein has invested much effort in education, and now boasts a literacy rate of 100 percent.

The United States and Liechtenstein have enjoyed a positive relationship for many years. In 2002, Liechtenstein and the U.S. signed a mutual legal assistance treaty, which focused largely on jointly combating money laundering and other illegal banking activities. In addition, from the beginning of the global war on terror, Liechtenstein took the initiative and has been a valuable and proactive partner in tracking down the finances of international terrorist groups.

Mr. Speaker, we are all aware of the dangerous world we live in. In the years following the dreadful attacks of September 11, we have been honored by the support and compassion of our friends around the world. While it is necessary and just to condemn countries for the threat they pose, I believe it is equally vital to honor countries for the support they provide. Liechtenstein is one of these countries whose contribution should be recognized. For these reasons, I encourage my colleagues to take a closer look at the unique nation of Liechtenstein and join me in honoring their great accomplishments.

Ms. ROS-LEHTINEN. Mr. Speaker, I thank Mr. STEARNS from Florida for offering the resolution before us. I hope our colleagues support it.

Mr. Speaker, I yield back the balance of our time.

The SPEAKER pro tempore. The question is on the motion offered by the gentlewoman from California (Ms. WATSON) that the House suspend the rules and agree to the resolution, H. Res. 233, as amended.

The question was taken.

The SPEAKER pro tempore. In the opinion of the Chair, two-thirds being in the affirmative, the ayes have it.

Mr. STEARNS. Mr. Speaker, on that I demand the yeas and nays.

The yeas and nays were ordered.

The SPEAKER pro tempore. Pursuant to clause 8 of rule XX and the Chair's prior announcement, further proceedings on this question will be postponed.

SBA ENTREPRENEURIAL DEVELOPMENT PROGRAMS ACT OF 2007

Ms. VELÁZQUEZ. Mr. Speaker, I move to suspend the rules and pass the bill (H.R. 2359) to reauthorize programs to assist small business concerns, and for other purposes.

The Clerk read the title of the bill.

The text of the bill is as follows:

H.R. 2359

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. SHORT TITLE; TABLE OF CONTENTS.

(a) SHORT TITLE.—This Act may be cited as the ''SBA Entrepreneurial Development Programs Act of 2007''.

(b) TABLE OF CONTENTS.—The table of contents for this Act is as follows:

TITLE I—REVISIONS TO SMALL BUSINESS DEVELOPMENT CENTERS

SEC. 101. SMALL BUSINESS DEVELOPMENT CENTERS OPERATIONAL CHANGES.

(a) ACCREDITATION REQUIREMENT.—Section 21(a)(1) of the Small Business Act (15 U.S.C. 648(a)(1)) is amended—

(1) in the proviso, by inserting before ''institution'' the following: ''accredited'';

(2) in the sentence beginning ''The Administration shall'', by inserting before ''institutions'' the following: ''accredited''; and

(3) by adding at the end the following new sentence: ''As used in this paragraph, the term 'accredited institution of higher education' means an institution that is accredited as described in section 101(a)(5) of the

Higher Education Act of 1965 (20 U.S.C. 1001(a)(5)).''

(b) PROGRAM NEGOTIATIONS.—Section 21(a)(3) of the Small Business Act (15 U.S.C. 648(a)(3)) is amended, in the matter before subparagraph (A), by inserting before ''agreed'' the following: ''mutually''.

(c) CONTRACT NEGOTIATIONS.—Section 21(a)(3)(A) of the Small Business Act (15 U.S.C. 648(a)(3)(A)) is amended by inserting after ''uniform negotiated'' the following: ''mutually agreed to''.

(d) NO SBA INTERFERENCE IN SBDC HIRING.—Section 21(c)(2)(A) of that Act (15 U.S.C. 648(c)(2)(A)) is amended by inserting after ''full-time staff'' the following: '', the hiring of which is carried out by the center without interference from, and without influence by, any officer or employee of the Administration,''.

(e) CONTENT OF CONSULTATIONS COVERED BY PRIVACY REQUIREMENTS.—Section 21(a)(7)(A) of that Act (15 U.S.C. 648(a)(7)(A)) is amended by inserting after ''under this section'' the following: '', or the content of any consultation with such an individual or small business concern,''.

(f) REPEAL OF AUTHORITY TO USE AUTHORIZED AMOUNTS FOR ADMINISTRATIVE EXPENSES.—Section 21(a)(4)(C)(v) of that Act (15 U.S.C. 648(a)(4)(C)(v)) is amended by amending subclause (I) to read as follows:

''(I) IN GENERAL.—Of the amounts made available in any fiscal year to carry out this section, not more than $500,000 may be used by the Administration to pay expenses enumerated in subparagraphs (B) through (D) of section 20(a)(1).''.

(g) NO CAP ON NON-MATCHING PORTABILITY GRANTS IN THE EVENT OF A DISASTER.—Section 21(a)(4)(C)(viii) of that Act (15 U.S.C. 648(a)(4)(C)(viii)) is amended by adding at the end the following: ''However, in the event of a disaster, the dollar limitation in the preceding sentence does not apply.''.

(h) DEFINITION OF SBDC.—Section 21(a) of that Act (15 U.S.C. 648(a)) is amended by adding at the end the following:

''(8) DEFINITION.—For the purposes of this section, a Small Business Development Center is—

''(A) the entity selected by the Administrator to receive funds pursuant to the funding formula set forth in paragraph (4); or

''(B) the site at which the services specified by this section are delivered.''.

(i) LIMITATION ON DISTRIBUTION TO SBDCS.—Section 21(b) of that Act (15 U.S.C. 648(b)) is amended by adding at the end the following:

''(4) LIMITATION ON DISTRIBUTION TO SMALL BUSINESS DEVELOPMENT CENTERS.—

''(A) IN GENERAL.—Except as provided in this paragraph, the Administrator shall not distribute funds to a Small Business Development Center if the State in which the Small Business Development Center is located is served by more than one Small Business Development Center. For purposes of this limitation, the term Small Business Development Center shall have the meaning set forth in subsection (a)(8).

''(B) UNAVAILABILITY EXCEPTION.—The Administrator may distribute funds to two Small Business Development Centers, as that term is defined in subsection (a)(8)(A), if no applicant has applied to serve the entire State. Except as provided in subparagraph (C), the Administrator is prohibited from distributing funds to more than two Small Business Development Centers.

''(C) GRANDFATHER CLAUSE.—The limitations in this paragraph shall not apply for any State in which more than one Small Business Development Center received funding prior to January 1, 2007.''.

(j) REPORTING OF BROADBAND SERVICE PURCHASES.—Section 21(c) of that Act (15 U.S.C. 648(c)) is amended by adding at the end the following:

''(9) REPORTING OF BROADBAND SERVICE PURCHASES.—

''(A) IN GENERAL.—Pursuant to policies adopted by the Administrator, Small Business Development Centers shall report information to the Administrator by nine-digit zip code—

''(i) whether the individual seeking counseling purchases broadband service at the address reported to the Small Business Development Center;

''(ii) if the reported address is different than the business address, whether broadband service is purchased at the business address; and

''(iii) if broadband service is not purchased at the addresses set forth in clauses (i) and (ii).

''(B) REPORTING.—The Administrator shall aggregate data by nine-digit zip code reporting such information to the Federal Communications Commission and the National Telecommunication and Information Administration.''.

TITLE II—GRANT INITIATIVES

SEC. 201. CAPITAL ACCESS INITIATIVE.

Section 21 of the Small Business Act (15 U.S.C. 648) is amended by adding at the end the following:

''(n) CAPITAL ACCESS INITIATIVE.—

''(1) IN GENERAL.—A lead Small Business Development Center may apply for an additional grant to carry out a capital access initiative program.

''(2) ELEMENTS OF PROGRAM.—Under a program under paragraph (1), the Center shall—

''(A) provide capital education by creating a model template to assist individuals in preparing for a broad range of capital offerings;

''(B) assess company potential by conducting company assessments, which shall include, at a minimum, risk analysis and mapping of best capital opportunities;

''(C) prepare individuals to request capital by advising on the various aspects of such a request, including the business plan, the financials, the projections, the presentation, and the approach;

''(D) provide education on the rules of access engagement, organizations involved and available, and approaches that maximize successful requests; and

''(E) deliver ongoing assistance once capital is secured.

''(3) SUPPORT.—In carrying out this subsection, the Administrator shall obtain support from national associations and from organizations such as regional development groups and 'angel' groups founded by Small Business Development Centers.

''(4) MINIMUM AMOUNT.—Each grant under this subsection shall be for at least $100,000.

''(5) MAXIMUM AMOUNT.—No applicant may receive more than $300,000 in grants under this subsection in a fiscal year.

''(6) FUNDING.—Subject to amounts approved in advance in appropriations Acts and separate from amounts approved to carry out section 21(a)(1), the Administrator may make grants or enter into cooperative agreements to carry out this subsection.''.

SEC. 202. DISASTER RECOVERY PROGRAM.

Section 21 of the Small Business Act (15 U.S.C. 648), as amended by this Act, is further amended by adding at the end the following:

''(o) DISASTER RECOVERY PROGRAM.—

''(1) IN GENERAL.—A lead Small Business Development Center may apply for an additional grant to carry out a disaster recovery program.

''(2) ELEMENTS OF PROGRAM.—Under a program under paragraph (1), the Center shall—

''(A) serve, in partnership with the Administration's disaster center response teams, as a locally based resource for first responders by—

''(i) rotating personnel into a disaster area for immediate response on the ground, processing applications, developing an evaluating recovery business models, and distributing accurate information; and

''(ii) providing continued interaction, over time, with businesses that are recovering from a disaster;

''(B) participate in ongoing national disaster training;

''(C) develop specific State-level disaster response plans; and

''(D) form a network with other Centers to serve as a platform for sharing disaster expertise, training, and human resources.

''(3) MINIMUM AMOUNT.—Each grant under this subsection shall be for at least $50,000.

''(4) FUNDING.—Subject to amounts approved in advance in appropriations Acts and separate from amounts approved to carry out section 21(a)(1), the Administrator may make grants or enter into cooperative agreements to carry out this subsection.''.

SEC. 203. INNOVATION AND COMPETITIVENESS SERVICES TO MANUFACTURERS INITIATIVE.

Section 21 of the Small Business Act (15 U.S.C. 648), as amended by this Act, is amended by adding at the end the following:

''(p) INNOVATION AND COMPETITIVENESS SERVICES TO MANUFACTURERS INITIATIVE.—

''(1) IN GENERAL.—A lead Small Business Development Center may apply for an additional grant to carry out an innovation and competitiveness services to manufacturers initiative program.

''(2) ELEMENTS OF PROGRAM.—Under a program under paragraph (1), the Center shall—

''(A) participate in national training institutes to provide training to all programs of the Center to assist those programs to qualify for technology accreditation designation;

''(B) develop, disseminate, and regularly update best practices 'toolkits' that include best practices for resources, training programs, consultative approaches, and support services;

''(C) recruit and engage significant local assets and resources (such as colleges, universities, economic development organizations, and trade associations) in each State;

''(D) launch nationally a locally based but common themed marketing program, targeted at small manufacturers;

''(E) undertake aggressive outreach to increase the levels of innovation and competitiveness, focusing on business advisement and training for manufacturers;

''(F) provide ongoing professional development to personnel of the Center and of other resource partners; and

''(G) develop and report performance, using common evaluation metrics and outcome measurements.

''(3) MINIMUM AMOUNT.—Each grant under this subsection shall be for at least $150,000.

''(4) MAXIMUM AMOUNT.—A grant under this subsection may not exceed $500,000.

''(5) FUNDING.—Subject to amounts approved in advance in appropriations Acts and separate from amounts approved to carry out section 21(a)(1), the Administrator may make grants or enter into cooperative agreements to carry out this subsection.''.

SEC. 204. MATURE ENTREPRENEURS ASSISTANCE PROGRAM.

Section 21 of the Small Business Act (15 U.S.C. 648), as amended by this Act, is amended by adding at the end the following:

''(q) MATURE ENTREPRENEURS ASSISTANCE PROGRAM.—

''(1) IN GENERAL.—A lead Small Business Development Center may apply for an additional grant to carry out a mature entrepreneurs assistance program.

''(2) ELEMENTS OF PROGRAM.—Under a program under paragraph (1), the Center shall—

''(A) provide advisors and training resources to assist business owners in recognizing and developing transition plans, including by—

''(i) providing training and educational screening processes on the potential benefits and hazards of self-employment; and

''(ii) developing courses, consulting processes, and highly targeted resource materials, and deploying them throughout the Small Business Development Center network;

''(B) link business owners with additional resource service providers to prepare businesses for transition, including by increasing partnership opportunities, particularly with the Service Corps of Retired Executives (SCORE);

''(C) identify business opportunities for those interested in acquiring businesses;

''(D) help individuals identify and acquire financing for acquisition; and

''(E) provide continuing support once transition has occurred.

''(3) MINIMUM AMOUNT.—Each grant under this subsection shall be for at least $175,000.

''(4) MAXIMUM AMOUNT.—A grant under this subsection may not exceed $350,000.

''(5) FUNDING.—Subject to amounts approved in advance in appropriations Acts and separate from amounts approved to carry out section 21(a)(1), the Administrator may make grants or enter into cooperative agreements to carry out this subsection.''.

SEC. 205. SMALL BUSINESS SUSTAINABILITY INITIATIVE.

Section 21 of the Small Business Act (15 U.S.C. 648), as amended by this Act, is amended by adding at the end the following:

''(r) SMALL BUSINESS SUSTAINABILITY INITIATIVE.—

''(1) IN GENERAL.—A lead Small Business Development Center may apply for an additional grant to carry out a small business sustainability initiative program.

''(2) ELEMENTS OF PROGRAM.—Under a program under paragraph (1), the Center shall—

''(A) provide necessary support to smaller and medium-sized businesses to—

''(i) evaluate energy efficiency and green building opportunities;

''(ii) understand the cost benefits of energy efficiency and green building opportunities;

''(iii) secure financing to achieve energy efficiency or to construct green buildings; and

''(iv) empower management to implement energy efficiency projects;

''(B) assist entrepreneurs with clean technology development and technology commercialization through—

''(i) technology assessment;

''(ii) intellectual property;

''(iii) Small Business Innovation Research submissions;

''(iv) strategic alliances;

''(v) business model development; and

''(vi) preparation for investors; and

''(C) help small business improve environmental performance by shifting to less hazardous materials and reducing waste and emissions at the source, including by providing assistance for businesses to adapt the materials they use, the processes they operate, and the products and services they produce.

''(3) MINIMUM AMOUNT.—Each grant under this subsection shall be for at least $150,000.

''(4) MAXIMUM AMOUNT.—A grant under this subsection may not exceed $300,000.

''(5) FUNDING.—Subject to amounts approved in advance in appropriations Acts and separate from amounts approved to carry out section 21(a)(1), the Administrator may make grants or enter into cooperative agreements to carry out this subsection.''.

SEC. 206. GRANTS TO SMALL BUSINESS DEVELOPMENT CENTERS TO PROVIDE ASSISTANCE IN SECURING AFFORDABLE HEALTH INSURANCE.

(a) GRANT AUTHORITY.—The Administrator of the Small Business Administration (hereafter in this section referred to as the Administrator) may award a grant under this section to a lead small business development center (as described under section 21 of the Small Business Act (15 U.S.C. 648)).

(b) USE OF FUNDS.—A recipient of a grant under this section shall use the grant only for the purpose of providing to the owner of a small business concern assistance in identifying and securing affordable health insurance for their business and employees. A recipient of such a grant shall identify Federal, State, and local initiatives designed to assist small businesses and provide such education information to small business concerns seeking assistance on obtaining health insurance. A recipient of such a grant shall also work with health insurance providers in the area to identify premiums charged on health insurance for small business. A recipient of such a grant shall also attempt to negotiate lower health insurance premiums for small business concerns that seek the assistance of the recipient.

(c) MINIMUM GRANT AMOUNT.—A grant under this section may not be in an amount less than $200,000.

(d) APPLICATION.—Each applicant for a grant under this section shall submit to the Administrator an application in such form as the Administrator may require. The application shall include information regarding the applicant's goals and objectives for helping address entrepreneur's concerns with health insurance costs.

(e) REPORT TO ADMINISTRATOR.—As a condition of receiving a grant under this section, the Administrator shall require the recipient of a grant to submit to the Administrator, not later than 18 months after the date on which the grant is received, a report describing how the grant funds were used.

(f) COOPERATIVE AGREEMENTS AND CONTRACTS.—The Administrator may enter into a cooperative agreement or contract with the recipient of a grant under this section to provide additional assistance that furthers the purposes of this section.

(g) APPLICABILITY OF GRANT REQUIREMENTS.—An applicant for a grant under this section shall comply with all of the requirements applicable to a grantee under section 21 of the Small Business Act, except that the matching funds requirements of such section shall not apply.

(h) EVALUATION OF PROGRAM.—Not later than March 31, 2009, the Administrator shall submit to Congress a report that contains an evaluation of the grant program under this section.

(i) FUNDING.—Subject to amounts approved in advance in appropriations Acts and separate from amounts approved to carry out section 21(a)(1), the Administrator may make grants or enter into cooperative agreements to carry out this subsection.

SEC. 207. NATIONAL REGULATORY ASSISTANCE.

The Small Business Act is amended by inserting after section 21 (15 U.S.C. 648) the following:

''SEC. 21A. SMALL BUSINESS REGULATORY ASSISTANCE.

''(a) DEFINITIONS.—In this section, the following definitions apply:

''(1) ASSOCIATION.—The term 'Association' means the association recognized by the Administrator of the Small Business Administration under section 21(a)(3)(A).

''(2) PARTICIPATING SMALL BUSINESS DEVELOPMENT CENTER.—The term 'participating Small Business Development Center' means a Small Business Development Center participating in the program.

''(3) PROGRAM.—The term 'program' means the regulatory assistance program established under this section.

''(4) REGULATORY COMPLIANCE ASSISTANCE.—The term 'regulatory compliance assistance' means assistance provided by a Small Business Development Center to a small business concern to enable the concern to comply with Federal regulatory requirements.

''(5) SMALL BUSINESS DEVELOPMENT CENTER.—The term 'Small Business Development Center' means a lead Small Business Development Center described in section 21.

''(6) STATE.—The term 'State' means each of the several States, the District of Columbia, the Commonwealth of Puerto Rico, the Virgin Islands, Guam, and American Samoa.

''(b) AUTHORITY.—In accordance with this section, the Administrator shall establish a program to provide regulatory compliance assistance to small business concerns through selected Small Business Development Centers, the Association of Small Business Development Centers, and Federal compliance partnership programs.

''(c) SMALL BUSINESS DEVELOPMENT CENTERS.—

''(1) IN GENERAL.—In carrying out the program, the Administrator shall enter into arrangements with selected Small Business Development Centers under which such Centers shall provide—

''(A) access to information and resources, including current Federal and State nonpunitive compliance and technical assistance programs similar to those established under section 507 of the Clean Air Act (42 U.S.C. 7661f);

''(B) training and educational activities;

''(C) confidential, free-of-charge, one-on-one, in-depth counseling to the owners and operators of small business concerns regarding compliance with Federal and State regulations, as long as such counseling is not considered to be the practice of law in a State in which a Small Business Development Center is located or in which such counseling is conducted;

''(D) technical assistance;

''(E) referrals to experts and other providers of compliance assistance who meet such standards for educational, technical, and professional competency as are established by the Administrator; and

''(F) access to the Internet and training on Internet use, including the use of the Internet website established by the Administrator under subsection (d)(1)(C).

''(2) REPORTS.—

''(A) IN GENERAL.—Each selected Small Business Development Center shall transmit to the Administrator a quarterly report that includes—

''(i) a summary of the regulatory compliance assistance provided by the center under the program; and

''(ii) any data and information obtained by the center from a Federal agency regarding regulatory compliance that the agency intends to be disseminated to small business concerns.

''(B) ELECTRONIC FORM.—Each report required under subparagraph (A) shall be transmitted in electronic form.

''(C) INTERIM REPORTS.—A participating Small Business Development Center may transmit to the Administrator such interim reports as the Center considers appropriate.

''(D) LIMITATION ON DISCLOSURE REQUIREMENTS.—The Administrator shall not require a Small Business Development Center to disclose the name or address of any small business concern that received or is receiving assistance under the program, except that the Administrator shall require such a disclosure if ordered to do so by a court in any civil or criminal action.

''(d) DATA REPOSITORY AND CLEARINGHOUSE.—

''(1) IN GENERAL.—In carrying out the program, the Administrator shall—

''(A) act as the repository of and clearinghouse for data and information submitted by Small Business Development Centers;

''(B) submit to the President, the Committee on Small Business and Entrepreneurship of the Senate, and the Committee on Small Business of the House of Representatives an annual report that includes—

''(i) a description of the types of assistance provided by participating Small Business Development Centers under the program;

''(ii) data regarding the number of small business concerns that contacted participating Small Business Development Centers regarding assistance under the program;

''(iii) data regarding the number of small business concerns assisted by participating Small Business Development Centers under the program;

''(iv) data and information regarding outreach activities conducted by participating Small Business Development Centers under the program, including any activities conducted in partnership with Federal agencies;

''(v) data and information regarding each case known to the Administrator in which one or more Small Business Development Centers offered conflicting advice or information regarding compliance with a Federal or State regulation to one or more small business concerns;

''(vi) any recommendations for improvements in the regulation of small business concerns; and

''(vii) a list of regulations identified by the Administrator, after consultation with the Chief Counsel for Advocacy of the Administration, who shall review such list, and the Small Business and Agriculture Regulatory Enforcement Ombudsman, as being most burdensome to small business concerns, and recommendations to reduce or eliminate the burdens of such regulations; and

''(C) establish an Internet website that—

''(i) provides access to Federal, State, academic, and industry association Internet websites containing industry-specific regulatory compliance information that the Administrator deems potentially useful to small businesses attempting to comply with Federal regulations; and

''(ii) arranges such Internet websites in industry-specific categories.

''(e) REVIEW OF BURDENSOME REGULATIONS AND PETITION FOR AGENCY REVIEW.—

''(1) TRANSMISSION OF LIST OF REGULATIONS TO CHIEF COUNSEL FOR ADVOCACY.—The Administrator shall transmit to the Chief Counsel for Advocacy of the Administration a copy of the list of regulations submitted under subsection (d)(1)(B) as part of the annual report required by that subsection.

''(2) REVIEW OF LIST OF REGULATIONS.—The Chief Counsel for Advocacy shall review the list of regulations transmitted under paragraph (1) and identify any regulation that—

''(A) is eligible for review in accordance with section 610 of title 5, United States Code;

''(B) has a significant impact on a substantial number of small business concerns that is substantially different from the impact indicated in the final regulatory flexibility analysis for that regulation, as published with the final regulation in the Federal Register; or

''(C) has a significant impact on a substantial number of small business concerns and for which no final regulatory flexibility analysis was ever performed.

''(3) NOTIFICATION AND AGENCY REVIEW.—With respect to any regulation identified under paragraph (2) the Chief Counsel for Advocacy shall—

''(A) notify the appropriate Federal rulemaking agency and the Office of Information and Regulatory Affairs of the Office of Management of the identification of such rule or regulation; and

''(B) request the review of such regulation—

''(i) in accordance with section 610 of title 5, United States Code; or

''(ii) for any impact it has on small business concerns.

''(4) ANNUAL REPORT.—The Chief Counsel for Advocacy shall publish an annual report containing a list of any regulation identified under paragraph (2) and the disposition by the appropriate agency.

''(f) ELIGIBILITY.—

''(1) IN GENERAL.—A Small Business Development Center shall be eligible to receive assistance under the program only if the center is certified under section 21(k)(2).

''(2) WAIVER.—With respect to a Small Business Development Center seeking assistance under the program, the Administrator may waive the certification requirement set forth in paragraph (1) if the Administrator determines that the center is making a good faith effort to obtain such certification.

''(g) SELECTION OF PARTICIPATING STATE PROGRAMS.—

''(1) ESTABLISHMENT OF PROGRAM.—In consultation with the Association and giving substantial weight to the Association's recommendations, the Administrator shall select the Small Business Development Center programs of 2 States from each of the following groups of States to participate in the program:

''(A) Group 1: Maine, Massachusetts, New Hampshire, Connecticut, Vermont, and Rhode Island.

''(B) Group 2: New York, New Jersey, Puerto Rico, and the Virgin Islands.

''(C) Group 3: Pennsylvania, Maryland, West Virginia, Virginia, the District of Columbia, and Delaware.

''(D) Group 4: Georgia, Alabama, North Carolina, South Carolina, Mississippi, Florida, Kentucky, and Tennessee.

''(E) Group 5: Illinois, Ohio, Michigan, Indiana, Wisconsin, and Minnesota.

''(F) Group 6: Texas, New Mexico, Arkansas, Oklahoma, and Louisiana.

''(G) Group 7: Missouri, Iowa, Nebraska, and Kansas.

''(H) Group 8: Colorado, Wyoming, North Dakota, South Dakota, Montana, and Utah.

''(I) Group 9: California, Guam, Hawaii, Nevada, and Arizona.

''(J) Group 10: Washington, Alaska, Idaho, and Oregon.

''(2) DEADLINE FOR INITIAL SELECTIONS.—The Administrator shall make selections under paragraph (1) not later than 60 days after promulgation of regulations under subsection (k).

''(3) ADDITIONAL SELECTIONS.—Not earlier than the date 3 years after the date of the enactment of this paragraph, the Administrator may select Small Business Development Center programs of States in addition to those selected under paragraph (1). The Administrator shall consider the effect on the programs selected under paragraph (1) before selecting additional programs under this paragraph.

''(4) COORDINATION TO AVOID DUPLICATION WITH OTHER PROGRAMS.—In selecting programs under this subsection, the Administrator shall give a preference to Small Business Development Center programs that have a plan for consulting with Federal and State agencies to ensure that any assistance provided under this section is not duplicated by an existing Federal or State program.

''(h) MATCHING NOT REQUIRED.—Subparagraphs (A) and (B) of section 21(a)(4) shall not apply to assistance made available under the program.

''(i) DISTRIBUTION OF GRANTS.—

''(1) IN GENERAL.—Except as provided in paragraph (2), each State program selected to receive a grant under subsection (g) in a fiscal year shall be eligible to receive a grant in an amount not to exceed the product obtained by multiplying—

''(A) the amount made available for grants under this section for the fiscal year; and

''(B) the ratio that the population of the State bears to the population of all the States with programs selected to receive grants under subsection (g) for the fiscal year.

''(2) MINIMUM AMOUNT.—The minimum amount that a State program selected to receive a grant under subsection (g) shall be eligible to receive under this section for any fiscal year shall be $200,000. The Administrator shall reduce the amount described in paragraph (1) as appropriate to carry out the purposes of this paragraph and subsection (j)(2).

''(j) EVALUATION AND REPORT.—Not later than 3 years after the establishment of the program, the Comptroller General of the United States shall conduct an evaluation of the program and shall transmit to the Administrator, the Committee on Small Business and Entrepreneurship of the Senate, and the Committee on Small Business of the House of Representatives a report containing the results of the evaluation along with any recommendations as to whether the program, with or without modification, should be extended to include the participation of all Small Business Development Centers.

''(k) PROMULGATION OF REGULATIONS.—After providing notice and an opportunity for comment and after consulting with the Association (but not later than 180 days after the date of the enactment of this section), the Administrator shall promulgate final regulations to carry out this section, including regulations that establish—

''(1) priorities for the types of assistance to be provided under the program;

''(2) standards relating to educational, technical, and support services to be provided by participating Small Business Development Centers;

''(3) standards relating to any national service delivery and support function to be provided by the Association under the program;

''(4) standards relating to any work plan that the Administrator may require a participating Small Business Development Center to develop; and

''(5) standards relating to the educational, technical, and professional competency of any expert or other assistance provider to whom a small business concern may be referred for compliance assistance under the program.

''(l) FUNDING.—Subject to amounts approved in advance in appropriations Acts and separate from amounts approved to carry out section 21(a)(1), the Administrator may make grants or enter into cooperative agreements to carry out this section.''.

SEC. 208. REPORT.

Not later than 18 months after the date of the enactment of this Act, the Administrator of the Small Business Administration shall submit to Congress a report evaluating the effectiveness of the new Small Business Development Center programs added by the amendments made by this title.

TITLE III—SCORE

SEC. 301. REPEAL OF ACTIVE CORPORATION OF EXECUTIVES.

Section 8(b)(1)(B) of the Small Business Act (15 U.S.C. 637(b)(1)(B)) is amended by striking ''and an Active Corps of Executive (ACE)''.

SEC. 302. INCREASING THE PROPORTION OF SCORE VOLUNTEERS FROM SOCIALLY AND ECONOMICALLY DISADVANTAGED BACKGROUNDS.

Section 8(b)(1) of the Small Business Act (15 U.S.C. 637(b)(1)) is amended by adding at the end the following:

''(H) The Service Corps of Retired Executives (SCORE) established under subparagraph (B) shall carry out a plan to increase the proportion of mentors who are from socially or economically disadvantaged backgrounds. SCORE shall, on an annual basis, report to the Administrator on the implementation of this subparagraph.''.

SEC. 303. BENCHMARK REPORTING.

Section 8(b)(1) of the Small Business Act (15 U.S.C. 637(b)(1)), as amended by section 202, is further amended by adding at the end the following:

''(I) The Service Corps of Retired Executives (SCORE) established under subparagraph (B) shall, in consultation with the Administrator, establish benchmarks for use in evaluating the performance of its activities and the performance of its volunteers. The benchmarks shall include benchmarks relating to the demographic characteristics and the geographic characteristics of persons assisted by SCORE, benchmarks relating to the hours spent mentoring by volunteers, and benchmarks relating to the performance of the persons assisted by SCORE. SCORE shall, on an annual basis, report to the Administrator on the extent to which the benchmarks established under this subparagraph are being attained.''.

The SPEAKER pro tempore. Pursuant to the rule, the gentlewoman from New York (Ms. VELÁZQUEZ) and the gentleman from Tennessee (Mr. DAVID DAVIS) each will control 20 minutes.

The Chair recognizes the gentlewoman from New York.

GENERAL LEAVE

Ms. VELÁZQUEZ. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative to revise and extend their remarks and include extraneous material on the bill under consideration.

The SPEAKER pro tempore. Is there objection to the request of the gentlewoman from New York?

There was no objection.

Ms. VELÁZQUEZ. Mr. Speaker, I yield myself as much time as I may consume.

Mr. Speaker, small businesses play a critical role in our economy. As the leading job creators and generators of nearly half of private sector gross domestic product, their impact is felt throughout the country.

Today, entrepreneurs are confronted with intense competition from foreign and corporate counterparts. They must continually update their products and processes, as well as adapt to change quickly.

Traditionally, the SBA's entrepreneurial development programs were created to provide direction and assistance to small business owners, helping them remain competitive and armed with the tools to maintain successful ventures. While providing critical assistance, these programs were created many years ago to address general business development issues faced by typical small businesses of the time.

There is no question the needs of entrepreneurs change as the environment does. The challenges facing entrepreneurs today are different from those even 5 years ago. SBA's entrepreneurial development programs must evolve to provide small businesses with the ability to deal with the economic conditions of today.

The Small Business Entrepreneurial Development Programs Act of 2007 introduced by Congressman SESTAK not only modernizes this program to adjust the current concerns of small businesses but also enhances them. Today, the leading issues for small firms are the rising health and energy costs and complying with regulations. This legislation will help small business owners identify and secure affordable health care. With less than half of small business owners providing health care, the need for legislation that helps alleviate this is clear.

Considering the current price of gasoline, there's no question why the number one concern for entrepreneurs is the cost of energy. Gasoline is more than $3 a gallon. This price represents a 28 percent increase over a period of just 2 months ago and a 52 percent increase since the end of January. Due to small businesses' limited resources, as production costs are driven up, they become less competitive with their counterparts.

While the costs of energy and health care have risen, so has the regulatory burden for small businesses. In 2006, just seven major rules added over $3.7 billion to the overall regulatory costs. That does not even account for the thousands of other regulations that were added last year. Small firms today require affordable access to information and counseling to address these new rules.

H.R. 2359, with its increased capacities, ensures that the SBDCs located in communities across the Nation have the ability to assist entrepreneurs in facing these challenges. For this reason, the SBA Entrepreneurial Development Act of 2007 has the support of the National Federation of Independent Businesses. They are not only supporting but will key vote this legislation. By tailoring SBA's economic development programs to the economic demands and changing composition of small businesses, they will better promote business development this our communities.

H.R. 2359 will make sure small firms remain a driving force in our economy. I urge support of this legislation.

Mr. Speaker, I reserve the balance of my time.

Mr. DAVID DAVIS of Tennessee. Mr. Speaker, I yield myself such time as I may consume.

Today, Mr. Speaker, I rise in support of the request to suspend the rules and pass H.R. 2359, the SBA Entrepreneurial Development Programs Act of 2007.

I would like to thank Chairwoman VELÁZQUEZ for working in a cooperative and bipartisan manner to bring this bill to the floor. This bill makes modest yet necessary changes in the core entrepreneurial technical assistance programs of the SBA, the Small Business Development Center Program.

Small business development centers, on a relatively modest appropriation, provide free training sessions which last at least 1 hour and free individual one-on-one counseling. The centers met a total of 700,000 individual business owners and prospective owners in fiscal year 2007.

Changes are necessary to clarify the statutory mandate and ensure that small business development centers are appropriately responding to the new challenges facing America's entrepreneurs. These alterations are reflected in title I of the bill.

Even though the program is more than 25 years old, there is no definition of the term ''small business development center,'' which substantially adds to the confusion interpreting the statutory language. I would like to thank the chairwoman for including the definition in the term.

Another key change demonstrates the need to update the mission of the small business development centers as technology and business practices change. Broadband access is no longer a luxury for many, if not most, small businesses; yet the only reliable data on broadband access in America comes from providers that make the reports to the Federal Communications Commission.

Congressman FORTENBERRY, the ranking member of the Committee's

Subcommittee on Rural and Urban Entrepreneurship, had the idea that rather than relying on these providers, a more accurate picture might come from actually asking individuals whether they had access to broadband services. Mr. FORTENBERRY thought it would make sense to have the center survey their clients when they come in the door on the availability of broadband service. The survey might prove a valuable addition to supplement the existing data from broadband providers. And without appropriate information on broadband access and penetration, it is impossible to develop policies that ensure small businesses will have affordable access to broadband.

Title II also includes a mechanism to increase the capacity of small business development centers to offer regulatory compliance assistance to small businesses disproportionately affected by erroneous regulatory burdens. It is an idea supported by the House in the previous four Congresses and by the National Federation of Independent Business. I would like to thank the chairwoman and Mr. SESTAK for including this critical assistance to small business owners.

Ultimately, H.R. 2359 is designed to help small businesses get the advice and assistance they need to continue their ever-increasing importance in maintaining America's prime place in the global economy.

Mr. Speaker, I reserve the balance of my time.

Ms. VELÁZQUEZ. Mr. Speaker, I recognize Mr. SESTAK, the sponsor of the legislation, for as much time as he may consume.

Mr. SESTAK. Mr. Speaker, I would like to thank the distinguished chairwoman from New York for yielding.

Mr. Speaker, I rise today to urge my colleagues to support a piece of legislation to enhance two critical Small Business Administration entrepreneurial development programs, the Small Business Development Centers and the Service Corps for Retired Executives.

Serving as the Representative in a district that has been historically driven economically by vibrant local small businesses, I greatly appreciate and support the entrepreneurial development assistance that the SBA provides.

We know that entrepreneurial development programs work. Businesses who receive SBA entrepreneurial assistance are twice as likely to succeed. And for every Federal dollar spent on entrepreneurial development, $7 are generated in increased tax revenue.

But in the past 3 years, due to changes in our ever-changing globalizing economy, my district has lost 607 small businesses and one out of five manufacturing establishments. This is a trend that I am committed to reversing through fostering entrepreneurial development and creating the right set of conditions to help businesses flourish, stay and be attracted to my district, and I believe that supporting effective small business entrepreneurial development programs is a key part of that strategy.

In 1980, Congress established the SBDC program to foster economic development by providing management, technical and research assistance to current and prospective small businesses. As you know, SBDCs provide services which include assisting small businesses with financial, marketing, production, organizational, engineering and technical problems and feasibility studies.

SBDCs serve Americans with a desire to start their own venture but who lack the technical expertise associated with starting and running a successful business, and in the past decades, SBDCs have provided assistance to millions of entrepreneurs across America.

The SBDC program also represents the effective and efficient use of allocated Federal moneys through public/private collaboration. To that end, SBDCs are funded by matching moneys provided by State legislatures, foundations, State and local chambers of commerce, public and private universities, vocational and technical schools and community colleges. In fact, sponsors' contributions have been increasingly exceeding the minimum 50 percent matching share, signifying greater participation among such groups and institutions.

This is why I feel especially fortunate to have several Small Business Development Sub-Centers located at local universities, such as Widener University and the University of Pennsylvania, which provide critical business resources and technical assistance to small businesses in and around my district.

I would like to stress that the core SBDC program has been extremely effective, but there are certain operational improvements that can be implemented to increase the flexibility of SBDCs.

To that end, changes proposed in this legislation will ensure the quality of grant recipients to host SBDCs; help SBDCs maintain their autonomy from undue SBA interference; protect the confidentiality of SBDC clients; ensure that taxpayer dollars are being spent as efficiently as possible by not using SBDC funds except for the sole purpose of business development; and allowing exemptions to the current cap on nonmatching portability grants in the event of federally designated natural or human caused disasters.

□ 1815

In addition to these operational changes, it is important to strengthen the SBDC core program, which successfully navigates entrepreneurs in managing their business, by establishing specific grant programs that will allow SBDCs to tailor their services.

For instance, the Capital Access Initiative would establish grants to assist entrepreneurs in processing loan applications and obtaining private equity. An Innovation and Competitiveness Initiative would establish grants to allow SBDCs to become technology centers, to help market technologies and advanced projects to manufacturers. A disaster recovery program would establish grants to allow SBDCs to assist and coordinate the Federal response for small business disaster victims.

The older entrepreneurial assistance program will target older Americans interested in transitioning to become business owners, while the Small Business Sustainability Initiative will promote the development and implementation of energy-efficient and clean energy improvements and technology. And an Affordable Health Care Initiative will help small business owners provide affordable health care insurance options to their employees, as the chairwoman mentioned.

As I also spoke about, a second program which this legislation will address is SCORE, which provides entrepreneurs with free counseling assistance by former executives. SCORE provides a valuable service to small businesses, and I believe it will be even stronger with a provision to actively recruit volunteer mentors who will then provide a greater reflection of the social and economic diversity of those who will utilize SBA services, such as women and underrepresented minorities.

I urge all my colleagues to support this important bill, which will greatly enhance the business development resources available to America's small business owners and aspiring entrepreneurs.

Mr. DAVID DAVIS of Tennessee. Mr. Speaker, I would like to yield such time as he may consume to my good friend Mr. LATHAM.

Mr. LATHAM. Mr. Speaker, I thank the gentleman from Tennessee for yielding me time, and I congratulate the committee and the chairman for bringing this piece of legislation forward.

Mr. Speaker, I rise today in support of H.R. 2359, the Small Business Administration Entrepreneurial Development Programs Act.

I am especially pleased that the Small Business Committee included legislation that I introduced earlier this Congress, H.R. 731, the National Small Business Regulatory Assistance Act, into this broad legislative package. This National Small Business Regulatory Assistance Act utilizes one of SBA's most effective programs, the Small Business Development Center program. Generally the SBDCs support

small businesses with financial, management, and marketing activities. My legislation, included in section 207 of H.R. 2359, creates a pilot program through the SBDCs that will provide free confidential counseling on regulatory compliance and help small businesses gain access to regulatory information and resources.

The research done by the Small Business Administration demonstrates that small businesses with less than 20 employees pay more than $7,600 per employee to comply with Federal regulations each year, while large firms pay 45 percent less per employee. Adjusted for inflation, the annual cost of Federal regulations faced by America's small businesses in 2004 was over $875 billion.

The fact of the matter is many small business owners have neither the time nor the expertise to sort through hundreds of pages of regulations in the Federal Register. Small business owners often learn of their failure to comply with Federal regulations or even that new Federal regulations have been imposed only after a penalty has been assessed. The current system denies small businesses access to regulatory compliance assistance and further weakens the opportunity for America's small businesses to compete with larger firms both domestically and internationally.

The Small Business Regulatory Assistance Act represents a win-win for America's small businesses. Not only will the SBDCs help small business owners understand what they must do to comply with Federal regulations but also how they may do so in a most cost-effective manner.

Again, I would like to thank the committee for including this legislation in the bill, and I urge my colleagues to support the overall bill.

Ms. VELAZQUEZ. Mr. Speaker, I yield myself the balance of my time.

Today's entrepreneurs are facing countless challenges. SBA's entrepreneurial development programs must be modernized to provide small businesses with the ability to deal with the economic conditions of today.

Mr. SESTAK's legislation, the SBA Entreprenurial Development Programs Act of 2007, makes much-needed updates to the agency's programs so that they are better able to assist entrepreneurs and enable small firms to remain a driving force in our economy.

H.R. 2359 has the support of the NFIB, who, in addition to supporting it, has made it one of their key votes for the 110th Congress.

Again I want to thank Mr. SESTAK and also Mr. CHABOT, the ranking minority member, for working in a bipartisan manner to move this legislation and other bills that will be moved today. I want to thank the staff that worked on this bill. From the majority staff, Michael Day, Adam Minehardt, Nicole Witenstein; from Representative SESTAK's staff, Clarence Tong; and from the minority staff, Barry Pineles.

I strongly urge my colleagues to vote for H.R. 2359.

Ms. BORDALLO. Mr. Speaker, I rise today in strong support of H.R. 2359, the SBA Entrepreneurial Development Programs Act of 2007. I commend our colleague from Pennsylvania (Mr. SESTAK) for sponsoring this legislation. I also commend our colleague from New York (Ms. VELÁZQUEZ), Chairwoman of the Committee on Small Business, and the members of the Committee on Small Business for their initiatives to strengthen America's small businesses and for bringing to the House chamber today four important bills aimed at improving programs and services administered by the U.S. Small Business Administration.

H.R. 2359 would reauthorize certain entrepreneurial development programs and aid small businesses across our country in receiving enhanced assistance from Small Business Development Centers (SBDCs). H.R. 2359 would also expand the services available through SBDCs to include assistance aimed to help businesses prepare for and respond to economic disruptions caused by natural and manmade disasters, regulatory burdens, and increased costs. By ensuring that the SBDC core programs remain robust and authorizing new programs that are designed specifically to meet evolving needs of small business owners and operators, this bill will help SBDCs sustain a reputation as trusted and valued sources of technical assistance for our country's entrepreneurs.

This legislation would further make important changes to the Small Business Administration Service Corps of Retired Executives (SCORE) Program. These changes will help ensure that SBA clients from socially and economically disadvantaged backgrounds can benefit from advice, counseling and mentoring from executives from similar, disadvantaged backgrounds. This bill would require the SBA to increase its efforts to recruit such executives to participate in the SCORE Program.

The SBDC and SCORE programs have been remarkably successful. This bill will help ensure that those excellent programs are as responsive as possible to the evolving needs of our country's small businesses. I urge my colleagues' support for this bill.

Mr. SESTAK. Mr. Speaker, Congressman ALBERT WYNN (D–MD) reached out to my office regarding becoming a co-sponsor of H.R. 2359, The SBA Entrepreneurial Development Programs Act of 2007. While we are unable to list Congressman WYNN as a co-sponsor since H.R. 2359 has already been placed on the Union Calendar, please know I consider Mr. WYNN a strong supporter and a co-sponsor of my legislation.

Mr. MANZULLO. Mr. Speaker, I rise in reluctant opposition to the SBA Entrepreneurial Development Programs Act of 2007. I am a strong supporter of Small Business Development Centers (SBDCs). These centers continue to do a lot of good work to promote job creation and small business development throughout our nation. There are three SBDCs that serve constituents in the 16th District of Illinois and they do phenomenal work in oftentimes a difficult local economic climate with limited resources. But I fear that the various SBDC bills we debate this week may kill the program with kindness.

The bills all taken together proposes to create nine new grant initiatives within the SBDC program. According to the non-partisan Congressional Budget Office (CBO), the bills would add $122 million in additional spending in Fiscal Year 2008 alone and $365 million over the next five fiscal years. When you consider that the Democrat-controlled House Appropriations Financial Services Subcommittee recently provided a generous increase of $11 million for the regular SBDC program to reach $100 million for Fiscal Year 2008, these bills taken together proposes to more than double the size of the SBDC program. In an era of tight budgets, I don't think any program deserves a 122 percent increase.

I am sympathetic to many of these initiatives. I am particularly supportive of making sure that Small Business Administration (SBA) employees do not interfere in hiring decisions of local SBDCs. I also support provisions in Section 207 to require more information, primarily through Internet Web-based technologies, about regulatory compliance to small business owners.

But there are still significant outstanding budgetary issues. Throughout my tenure as the former Chairman of the House Small Business Committee, I tried numerous times to see the National Regulatory Assistance and the Native American Entrepreneurial Assistance SBDC initiatives, among others, become law. Last year, we reached a common-sense consensus that in order to get these new initiatives into law, the high $135 million authorization level for the overall SBDC program should be proportionally reduced. However, that consensus is not in these bills that we are debating this week. I find it odd that the ''pay-go'' fiscal conservative rhetoric of the Democrats is not met by reality. There are no spending offsets in these bills.

Some of these initiatives also are duplicative of existing Federal programs. For example, the Manufacturing Extension Partnership (MEP) program administered by the Department of Commerce through local centers across the nation offers the very same services that are outlined in Section 203 of H.R. 2359. The National Veterans Business Development Corporation (or Vets Corp) offers the same services as those being proposed in H.R. 2366.

I also have concern that some of the provisions in H.R. 2359 go beyond the mission of SBDCs, which historically has been primarily targeted at helping new or struggling small businesses. For example, Section 206 requires that SBDC grant recipients ''shall also attempt to negotiate lower health insurance premiums for small business concerns that seek the assistance of the recipient.'' In my view, it is not the role of SBDCs to get involved in the pricing health insurance premiums. Section 204 of H.R. 2359 establishes a new program to help transition so-called ''mature'' small businesses even though there is no definition of what the authors of this legislation mean by ''transition'' or ''mature'' small business. Again, I don't think it is the role of SBDCs to be involved in initiatives that could result in the closure of small businesses.

I also fear that creating these nine new initiatives all at once will give false hope to SBDCs seeking to receive these grants. These initiatives will not start until a specific amount separate from the regular SBDC appropriation is allocated from the Appropriations Committee. In principle, this is a good policy to help insure that the money to run the regular SBDC program is not raided to fund these new initiatives. However, noting that the Democrat-controlled House Appropriations Financial Services Subcommittee just provided a long-overdue increase for the regular SBDC program, I seriously doubt that any of these specific SBDC initiatives will be funded at a significant level in the near future, further diminishing the expectations behind this legislation.

Finally, these nine new initiatives create many hoops for local SBDCs to jump through in order to qualify for these grants. These bills will create a paperwork and accounting nightmare for SBDCs to keep track of various grants, particularly if they apply and receive multiple awards under different initiatives, for the programs they administer. In retrospect, it is probably best that Congress provides an overall increase in the appropriation for the regular SBDC program and then require that all SBDCs provide some services (even if it is to network with another specialized SBDC or another Federal partner such as a local MEP center or the Vets Corp) in the nine issue areas outlined in H.R. 2359, H.R. 2366, and H.R. 2284 as opposed to the micro-management approach as contained in these bills.

Mr. Speaker, last year, I predicted that if Democrats took over control of Congress, spending on the Small Business Administration (SBA) would dramatically increase. Never in my wildest dreams did I think they would be so brazen. Elections do matter. Thus far this year, the CBO estimates that the Democrat-controlled House Small Business Committee has authorized $5.4 billion in new spending over the next 5 years—$1.379 billion in fiscal year 2008 alone. With these bills on the suspension calendar this week, proposed spending on the SBA will grow once again. All totaled, the CBO estimates that spending on the SBA will increase by nearly $5.8 billion over 4 years and $1.525 billion in fiscal year 2008 alone. To put this massive spending increase in perspective, the House Appropriations Financial Services Subcommittee recommends providing $582 million in total spending on the SBA in fiscal year 2008. I urge my colleagues to stand up for fiscal responsibility and to prevent mission-creep within the SBDC network by voting against these bills.

Ms. VELÁZQUEZ. Mr. Speaker, I yield back the balance of my time.

Mr. DAVID DAVIS of Tennessee. Mr. Speaker, I have no further requests for time, and I yield back the balance of my time.

The SPEAKER pro tempore. The question is on the motion offered by the gentlewoman from New York (Ms. VELÁZQUEZ) that the House suspend the rules and pass the bill, H.R. 2359.

The question was taken.

The SPEAKER pro tempore. In the opinion of the Chair, two-thirds being in the affirmative, the ayes have it.

Ms. VELÁZQUEZ. Mr. Speaker, on that I demand the yeas and nays.

The yeas and nays were ordered.

The SPEAKER pro tempore. Pursuant to clause 8 of rule XX and the Chair's prior announcement, further proceedings on this question will be postponed.

SBA VETERANS' PROGRAMS ACT OF 2007

Ms. VELÁZQUEZ. Mr. Speaker, I move to suspend the rules and pass the bill (H.R. 2366) to reauthorize the veterans entreprenurial development programs of the Small Business Administration, and for other purposes.

The Clerk read the title of the bill.

The text of the bill is as follows:

H.R. 2366

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. SHORT TITLE; TABLE OF CONTENTS.

(a) SHORT TITLE.—This Act may be cited as the ''SBA Veterans' Programs Act of 2007''.

(b) TABLE OF CONTENTS.—The table of contents for this Act is as follows:

TITLE I—OFFICE OF VETERANS BUSINESS DEVELOPMENT

SEC. 101. OFFICE OF VETERANS BUSINESS DEVELOPMENT.

Section 32 of the Small Business Act (15 U.S.C. 657b) is amended—

(1) by redesignating subsection (c) as subsection (e); and

(2) by inserting after subsection (b) the following:

''(c) PARTICIPATION IN TAP WORKSHOPS.—

''(1) IN GENERAL.—The Associate Administrator shall increase veteran outreach by ensuring that Veteran Business Outreach Centers regularly participate, on a nationwide basis, in the workshops of the Transition Assistance Program of the Department of Labor.

''(2) PRESENTATIONS.—In carrying out paragraph (1), a Center may provide grants to eligible entities located in Transition Assistance Program locations to make presentations on the opportunities available from the Administration for recently separating veterans. Each such presentation must include, at a minimum, the entrepreneurial and business training resources available from the Administration.

''(3) REPORTS.—The Associate Administrator shall submit to Congress progress reports on the implementation of this subsection.

''(d) WOMEN VETERANS BUSINESS TRAINING RESOURCE PROGRAM.—The Associate Administrator shall establish a Women Veterans Business Training Resource Program. The program shall—

''(1) compile information on resources available to women veterans for business training, including resources for—

''(A) vocational and technical education;

''(B) general business skills, such as marketing and accounting; and

''(C) business assistance programs targeted to women veterans; and

''(2) disseminate the information through Veteran Business Outreach Centers and women's business centers.''.

TITLE II—VETERANS ASSISTANCE AND SERVICES

SEC. 201. VETERANS ASSISTANCE AND SERVICES PROGRAM.

Section 21 of the Small Business Act (15 U.S.C. 648) is amended by adding at the end the following:

''(n) VETERANS ASSISTANCE AND SERVICES PROGRAM.—

''(1) IN GENERAL.—A Small Business Development Center may apply for an additional grant to carry out a veterans assistance and services program.

''(2) ELEMENTS OF PROGRAM.—Under a program under paragraph (1), the Center shall—

''(A) create a marketing campaign to promote awareness and education of the services of the Center that are available to veterans, and to target the campaign toward veterans, disabled veterans, military units, Federal agencies, and veterans organizations;

''(B) use technology-assisted online counseling and distance learning technology to overcome the impediments to entrepreneurship faced by veterans and members of the Armed Forces; and

''(C) increase coordination among organizations that assist veterans, including by establishing virtual integration of service providers and offerings for a one-stop point of contact for veterans who are entrepreneurs or small business owners.

''(3) MINIMUM AMOUNT.—Each grant under this subsection shall be for at least $75,000.

''(4) MAXIMUM AMOUNT.—A grant under this subsection may not exceed $250,000.

''(5) FUNDING.—Subject to amounts approved in advance in appropriations Acts, the Administration may make grants or enter into cooperative agreements to carry out the provisions of this subsection.''.

TITLE III—EXPANDING VETERANS BUSINESS OUTREACH CENTERS

SEC. 301. INCREASING THE NUMBER OF OUTREACH CENTERS.

The Administrator of the Small Business Administration shall use the authority in section 8(b)(17) of the Small Business Act (15 U.S.C. 647(b)) to ensure that the number of Veterans Business Outreach Centers throughout the United States increases—

(1) by at least 2, for each of fiscal years 2008 and 2009; and

(2) by the number that the Administrator considers appropriate, based on existing need, for each fiscal year thereafter.

SEC. 302. INDEPENDENT STUDY ON GAPS IN AVAILABILITY OF OUTREACH CENTERS.

The Administrator of the Small Business Administration shall sponsor an independent study on gaps in the availability of Veterans Business Outreach Centers across the United States. The purpose of the study shall be to identify the gaps that do exist so as to inform decisions on funding and on the allocation and coordination of resources. Not later than 6 months after the date of the enactment of this Act, the Administrator shall

submit to Congress a report on the results of the study.

The SPEAKER pro tempore. Pursuant to the rule, the gentlewoman from New York (Ms. VELÁZQUEZ) and the gentleman from Tennessee (Mr. DAVID DAVIS) each will control 20 minutes.

The Chair recognizes the gentlewoman from New York.

GENERAL LEAVE

Ms. VELÁZQUEZ. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days to revise and extend their remarks and include extraneous material on the bill under consideration.

The SPEAKER pro tempore. Is there objection to the request of the gentlewoman from New York?

There was no objection.

Ms. VELÁZQUEZ. Mr. Speaker, I yield myself such time as I may consume.

There is no question our Nation's veterans have made great sacrifices for this country. Many traveled long distances, spent lengthy amounts of time away from their families, and have been in harm's way to ensure our safety.

To date, more than 135,000 troops have come home from Iraq and Afghanistan. These men and women are increasingly turning toward small business ownership. Congressman BUCHANAN's legislation, the Small Business Administration Veterans Programs Act of 2007, ensures that service men and women will not only have the opportunity to pursue entrepreneurship but to succeed at starting their own firms.

While many have the American dream of owning a business, veterans face unique challenges when working to start or maintain their firms. For this sector of the population to be successful in their small business endeavors, there needs to be assistance available in local communities. They cannot be expected to return home knowing all of the necessary and available tools to start a business. Outreach efforts to these aspiring entrepreneurs need to be increased and information must be accessible. The Small Business Administration Veterans Programs Act of 2007 makes these resources available.

Service men and women contributing to economic growth is not a new trend. After World War II, the GI bill provided the opportunity of a college education to this Nation's veterans. By 1956 there were 7.8 million World War II veterans that had participated in an education or training program. The impact that that single piece of legislation had on this Nation's economy was great.

Much like ensuring the right to a college education, as the GI bill did, H.R. 2366 expands business ownership. It provides specific assistance for aspiring business owners. Starting a business after leaving military service provides an opportunity for returning veterans to not only begin a new career but to secure their livelihood. Enabling this to be a viable option for some of the most dedicated individuals in our country spurs economic development in local economies, demonstrates our commitment to their aspirations of entrepreneurship, and represents true patriotism.

I strongly urge support of this legislation.

Mr. Speaker, I reserve the balance of my time.

Mr. DAVID DAVIS of Tennessee. Mr. Speaker, I yield myself such time as I may consume.

Today, Mr. Speaker, I rise in support of the request to suspend the rules and pass H.R. 2366, the SBA Veterans Programs Act of 2007. I would like to thank Chairwoman VELÁZQUEZ for working in a cooperative, bipartisan manner to bring this bill, authored by Mr. BUCHANAN, a freshman member of the committee, to the House floor.

No one can debate the sacrifice that America's veterans have made and continue to make in defense of our country. While the repayment of that debt may never occur, we can certainly provide them with the needed assistance to prosper in civilian life. H.R. 2366 is a modest contribution to repaying the debt and helping them make a smooth transition into civilian life.

The bill recognizes that veterans learn a variety of critical skills. Recruitment advertisements for the armed services highlight the various technical skills that they can obtain through the military. These skills clearly are valued in civilian companies. In addition, the military inculcates its members with other important skills such as leadership, decisionmaking, teamwork, and the drive to win. All of these are critical to success as a small business owner.

The military does not teach its members how to take these skills and transfer them to starting a business. They require additional training to understand the key components of operating their own business without first having to serve a sort of ''apprenticeship'' working with others.

In 1999 Congress recognized that more services should be directed to help the 25 million veterans start and grow their small businesses. Those efforts succeeded because a number of small businesses owned by veterans have grown to 14 percent of all small businesses.

Despite this success more must be done to assist our veterans in the startup and operation of their businesses. Outreach must improve to ensure that veterans wishing to start their own businesses will have the training and advice needed to transfer their skills to entrepreneurship.

The technical advice and assistance are not limited to veterans leaving the service. Reservists who operate their own small businesses have their own unique set of operational problems associated with their call-up to duty. They may not know how long their call-up will last, and they may need assistance in ensuring that they have in place a plan to operate their businesses while they are on Active Duty.

□ 1830

H.R. 2366 represents an effort to expand the focus of the SBA entrepreneurial assistance programs to our veterans. Of most significant importance is the need to create more Veteran Business Outreach Centers. These centers operate as cooperative agreements between the Small Business Administration and the non-profit entities. These centers provide entrepreneurial development services, such as business training, counseling, mentoring and referrals. They also conduct entrepreneurial business development workshops focusing on self-development and self-employment. Counseling services may range from development of business plans to identifying government procurement opportunities.

There are only four Veteran Business Outreach Centers. To serve our military men and women, more are obviously needed, and title III requires the establishment of two more centers in each of the next two fiscal years.

Another important element of the bill is the recognition of the changing nature of the military with a greater involvement of women. Title I of the bill requires the administrator to establish within the Office of Veterans Business Development a program to provide assistance to women veterans. Given the rapid expansion and success of women-owned businesses, it makes sense to ensure that the needs of women veterans are met when they seek to start and operate small businesses.

Our fighting men and women are the best in the world. Let us help them become the best entrepreneurs in the world by enacting H.R. 2366.

With that, Mr. Speaker, I reserve the balance of my time.

Ms. VELÁZQUEZ. Mr. Chairman, I yield 1 minute to the gentleman from Georgia (Mr. JOHNSON), a member of the Small Business Committee.

Mr. JOHNSON of Georgia. Mr. Speaker, I rise in support of H.R. 2366.

By now, every American should know who our Greatest Generation is. Our Greatest Generation was made up of the returning heroes of the Second World War. This generation was responsible for one of the greatest periods of economic growth in our Nation's history, leading to the creation of the lone superpower which now has become the world's leader in almost every conceivable category. But it is because we empowered our returning veterans with educational, business and social opportunities which helped create an environment in which success was attainable for those who wanted it. The

Greatest Generation went on to become small business owners and operators, driving the very engine which is critical for the sustained economic growth of our Nation.

We are now witnessing the emergence of another great generation, a generation of volunteer warriors who have sacrificed so much in defense of our Nation's interest. We would be negligent if we did not grant to this generation the same opportunities to succeed as we have done with past generations. That is why I support H.R. 2366, and I move for its passage.

Mr. DAVID DAVIS of Tennessee. I would like to yield to the gentleman from Florida (Mr. BUCHANAN) as much time as he may consume.

Mr. BUCHANAN. I would like to thank my colleague, the gentleman from Tennessee, for yielding, and also the gentleman from Georgia (Mr. JOHNSON).

I would also like to commend Chairwoman VELÁZQUEZ and Ranking Member CHABOT for their proving that leadership and bipartisanship is alive and well in the United States Congress. The Madam Chair has worked very hard on this bill, and I appreciate her effort.

Mr. Speaker, my bill, H.R. 2366, would create an important program within the Small Business Administration that gives our veterans not just a chance in a business enterprise but provides them with all the help and assistance a grateful Nation can offer.

This legislation is intended to help veterans through grants, information services and contacts with professionals in their field of endeavor. This Federal program will enhance the ability of a veteran to become an entrepreneur in his or her own right.

My bill puts an emphasis on providing veterans with market research, financial options and technological training important to become a successful small business owner.

H.R. 2366 not only expands the number and the scope of Veteran Outreach Centers, it ensures the opening of more doors and opportunities for our women veterans. Assisting our veterans returning from combat has been an area long overlooked, and it is high time we did something about it.

I am encouraged by the unanimous consent that this bill received in the committee and by the spirit of bipartisanship that is symbolic of its passage. Today, the House will pass a bill that will help individuals make an important transition from a veteran to a small business entrepreneur.

I urge my colleagues to support H.R. 2366.

Ms. VELÁZQUEZ. Mr. Speaker, I ask unanimous consent to withdraw the motion.

The SPEAKER pro tempore. Without objection, the motion is withdrawn.

There was no objection.

PROVIDING FOR EARMARK REFORM

Ms. SLAUGHTER. Madam Speaker, I ask unanimous consent that the Committee on Rules be discharged from further consideration of the resolution (H. Res. 491) providing for earmark reform, and ask for its immediate consideration in the House.

The Clerk read the title of the resolution.

The SPEAKER pro tempore (Mrs. TAUSCHER). Is there objection to the request of the gentlewoman from New York?

Mr. DREIER. Madam Speaker, reserving the right to object, I would simply ask my very distinguished Chair for an explanation of exactly what it is that we're doing here.

I am happy to yield to the distinguished Chair of the Committee on Rules under my reservation, Madam Speaker.

Ms. SLAUGHTER. I thank the gentleman for yielding.

What this measure does is absolutely guarantee that any earmark in a conference report that has not been passed in the House will be subject to a point of order even though the Rules Committee may have protected against all points of order.

Mr. DREIER. If I may, under my reservation, Madam Speaker, I would just like to make sure that we have in place a provision now, as was agreed on last week, that will ensure that the rights of Members, when it comes to raising a point of order, are maintained when it comes to appropriations bills.

I would say, Madam Speaker, that I believe this is a very good start. My personal preference would have been that we could have gone back to the provision that we had last year to allow the same kind of protection for earmarks when it comes to both authorization and tax bills. And I hope very much, Madam Speaker, that we are going to have an opportunity to work together. I look forward to working with the distinguished Chair of the Committee on Rules and the leadership teams on both sides of the aisle to ensure that we can in fact pursue further transparency, openness, accountability and enforceability when it comes to the issue of earmarks.

With that, I withdraw my reservation, Madam Speaker.

The SPEAKER pro tempore. Is there objection to the request of the gentlewoman from New York?

There was no objection.

The Clerk read the resolution, as follows:

H. RES. 491

Resolved, That during the remainder of the 110th Congress it shall not be in order to consider a conference report to accompany a regular general appropriation bill unless the joint explanatory statement prepared by the managers on the part of the House and the managers on the part of the Senate includes a list of congressional earmarks (as that term is used in clause 9(d) of rule XXI) in the conference report or joint statement (and the name of any Member, Delegate, Resident Commissioner, or Senator who submitted a request to the respective House or Senate committee for each respective item included on such list) that were not committed to the conference committee by either House, not in a report on such bill, and not in a report of a committee of the Senate on a companion measure.

SEC. 2. It shall not be in order to consider a rule or order that waives the application of the first section of this resolution.

SEC. 3. A point of order under this resolution shall be disposed of by the question of consideration under the same terms as specified in clause 9(b) of rule XXI.

The resolution was agreed to.

A motion to reconsider was laid on the table.

ANNOUNCEMENT CONCERNING AMENDMENT PROCESS FOR RULES COMMITTEE CONSIDERATION OF LEGISLATIVE BRANCH APPROPRIATIONS ACT, 2008

Ms. SLAUGHTER. Madam Speaker, the Rules Committee is expected to meet Wednesday, June 20, to grant a rule which may structure the amendment process for floor consideration of the Legislative Branch Appropriations Act, 2008.

Members who wish to offer an amendment to this bill should submit 30 copies of the amendment and a brief description of the amendment to the Rules Committee in H–312 in the Capitol no later than 10 a.m. on Wednesday, June 20. Members are strongly advised to adhere to the amendment deadlines to ensure the amendments receive consideration.

Amendments should be drafted to the bill as ordered reported by the Committee on Appropriations. A copy of that bill is expected to be posted on the Web site of the Rules Committee on Tuesday afternoon.

Amendments should be drafted by Legislative Counsel and also should be reviewed by the Office of the Parliamentarian to be sure that the amendments comply with the Rules of the House. Members are also strongly encouraged to submit their amendments to the Congressional Budget Office for analysis regarding possible PAYGO violations.

SBA VETERANS' PROGRAMS ACT OF 2007

Ms. VELÁZQUEZ. Madam Speaker, I move to suspend the rules and pass the bill (H.R. 2366) to reauthorize the veterans entrepreneurial development programs of the Small Business Administration, and for other purposes.

The Clerk read the title of the bill.

The text of the bill is as follows:

H.R. 2366

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. SHORT TITLE; TABLE OF CONTENTS.

(a) SHORT TITLE.—This Act may be cited as the ''SBA Veterans' Programs Act of 2007''.

(b) TABLE OF CONTENTS.—The table of contents for this Act is as follows:

TITLE I—OFFICE OF VETERANS BUSINESS DEVELOPMENT

SEC. 101. OFFICE OF VETERANS BUSINESS DEVELOPMENT.

Section 32 of the Small Business Act (15 U.S.C. 657b) is amended—

(1) by redesignating subsection (c) as subsection (e); and

(2) by inserting after subsection (b) the following:

''(c) PARTICIPATION IN TAP WORKSHOPS.—

''(1) IN GENERAL.—The Associate Administrator shall increase veteran outreach by ensuring that Veteran Business Outreach Centers regularly participate, on a nationwide basis, in the workshops of the Transition Assistance Program of the Department of Labor.

''(2) PRESENTATIONS.—In carrying out paragraph (1), a Center may provide grants to eligible entities located in Transition Assistance Program locations to make presentations on the opportunities available from the Administration for recently separating veterans. Each such presentation must include, at a minimum, the entrepreneurial and business training resources available from the Administration.

''(3) REPORTS.—The Associate Administrator shall submit to Congress progress reports on the implementation of this subsection.

''(d) WOMEN VETERANS BUSINESS TRAINING RESOURCE PROGRAM.—The Associate Administrator shall establish a Women Veterans Business Training Resource Program. The program shall—

''(1) compile information on resources available to women veterans for business training, including resources for—

''(A) vocational and technical education;

''(B) general business skills, such as marketing and accounting; and

''(C) business assistance programs targeted to women veterans; and

''(2) disseminate the information through Veteran Business Outreach Centers and women's business centers.''.

TITLE II—VETERANS ASSISTANCE AND SERVICES

SEC. 201. VETERANS ASSISTANCE AND SERVICES PROGRAM.

Section 21 of the Small Business Act (15 U.S.C. 648) is amended by adding at the end the following:

''(n) VETERANS ASSISTANCE AND SERVICES PROGRAM.—

''(1) IN GENERAL.—A Small Business Development Center may apply for an additional grant to carry out a veterans assistance and services program.

''(2) ELEMENTS OF PROGRAM.—Under a program under paragraph (1), the Center shall—

''(A) create a marketing campaign to promote awareness and education of the services of the Center that are available to veterans, and to target the campaign toward veterans, disabled veterans, military units, Federal agencies, and veterans organizations;

''(B) use technology-assisted online counseling and distance learning technology to overcome the impediments to entrepreneurship faced by veterans and members of the Armed Forces; and

''(C) increase coordination among organizations that assist veterans, including by establishing virtual integration of service providers and offerings for a one-stop point of contact for veterans who are entrepreneurs or small business owners.

''(3) MINIMUM AMOUNT.—Each grant under this subsection shall be for at least $75,000.

''(4) MAXIMUM AMOUNT.—A grant under this subsection may not exceed $250,000.

''(5) FUNDING.—Subject to amounts approved in advance in appropriations Acts, the Administration may make grants or enter into cooperative agreements to carry out the provisions of this subsection.''.

TITLE III—EXPANDING VETERANS BUSINESS OUTREACH CENTERS

SEC. 301. INCREASING THE NUMBER OF OUTREACH CENTERS.

The Administrator of the Small Business Administration shall use the authority in section 8(b)(17) of the Small Business Act (15 U.S.C. 647(b)) to ensure that the number of Veterans Business Outreach Centers throughout the United States increases—

(1) by at least 2, for each of fiscal years 2008 and 2009; and

(2) by the number that the Administrator considers appropriate, based on existing need, for each fiscal year thereafter.

SEC. 302. INDEPENDENT STUDY ON GAPS IN AVAILABILITY OF OUTREACH CENTERS.

The Administrator of the Small Business Administration shall sponsor an independent study on gaps in the availability of Veterans Business Outreach Centers across the United States. The purpose of the study shall be to identify the gaps that do exist so as to inform decisions on funding and on the allocation and coordination of resources. Not later than 6 months after the date of the enactment of this Act, the Administrator shall submit to Congress a report on the results of the study.

The SPEAKER pro tempore. Pursuant to the rule, the gentlewoman from New York (Ms. VELÁZQUEZ) and the gentleman from Tennessee (Mr. DAVID DAVIS) each will control 20 minutes.

The Chair recognizes the gentlewoman from New York.

Ms. VELÁZQUEZ. Madam Speaker, I yield 1 minute to the gentleman from Iowa (Mr. LOEBSACK).

Mr. LOEBSACK. I thank the gentlewoman from New York for yielding, and I thank the gentleman from Florida for introducing this legislation.

I rise today to voice my strong support for the SBA's Veterans' Programs Act.

The SBA's Veterans' Business Outreach Initiative was established to facilitate business ownership among disabled veterans by providing one-stop assistance and counseling. Today's legislation will expand the success of this initiative.

As an exemplary public/private partnership, Veterans' Business Outreach Centers represent the comprehensive, cooperative and effective support that our Nation can and should provide our country's veterans.

This program provides greater opportunity to returning servicemembers and encourages economic development in communities across the country. Our troops fight for our country abroad, and we have a responsibility to provide for their future at home. Their sacrifice warrants our support. And they deserve every opportunity to succeed in business after their dedicated service to our country.

This bill provides veterans with the community and government support necessary to ensure their success, and I support its passage.

Mr. DAVID DAVIS of Tennessee. Mr. Speaker, I yield back the balance of my time.

Ms. VELÁZQUEZ. Mr. Speaker, veterans have not only been critical to the defense of our Nation, but with the increasing number of service men and women engaging in entrepreneurship, they have also been invaluable in helping our economy grow. These men and women have dedicated their lives to preserving our freedom. It is crucial that we show our appreciation for their service. The SBA Veterans' Programs Act of 2007 does just that.

I strongly urge my colleagues to vote for H.R. 2366, the SBA Veterans' Program Act of 2007. I urge its adoption.

Mr. WELLER of Illinois. Mr. Speaker, I rise in support of H.R. 2366, the SBA Veterans' Programs Act of 2007. This legislation will assist our soldiers when then return home with opportunities and information about starting a small business.

More than a million and a half (1,502,125) men and women have answered the call to serve their country since 2001. They interrupted their careers, put their families economic security at risk, and face big personal challenges upon returning home.

I recently visited Iraq and Afghanistan. That trip gave me an even greater appreciation for the significant sacrifices our soldiers must make and must cope with for the rest of their lives. If our soldiers faced mortal danger every day abroad, let us help them have economic security when they return home.

It isn't just the veteran who makes the sacrifice, their families do as well: their parents, their spouses, their children, girlfriends and boyfriends and siblings. They give up so much in defense of our country.

It is our job, as Members of Congress, to make sure that our Nation lives up to its commitment to our veterans. It is a simple pact we have made with our troops—and one we are obligated to fulfill: after they have sacrificed to serve our country on the battlefield, we must do all we can to serve them here at home. The cost of any war must include caring for the warrior.

This legislation helps our veterans get started with business opportunities in their communities. It does so by providing grants, information services, and personal assistance to help

veterans evaluate business opportunities; increasing the number of veteran business outreach centers around the country, and encouraging further assistance to women veterans.

Countless soldiers are returning from their tours of duty with new confidence and skills developed during their time in the military. This SBA program will help to ensure that those new abilities are put to good use when they return to civilian life.

This bill is the right thing to do for those who have given so much and it will directly impact Vermont and every State around the country. 97 percent of all Vermont firms are small businesses. My office has been involved in helping the Vermont Small Business Development Centers (SBDC) run business readiness classes for veterans. The Vermont SBDC is the primary small business assistance resource sought out by small business clients, lenders, government agencies and other economic development partners. The Vermont SBDC is the keystone in a statewide business assistance infrastructure tying together all appropriate resources and serving as a ''one-stop'' gateway and clearing house to serve small businesses' needs. Drawing on collaborative relationships among service providers, Vermont SBDC leverages economic development resources of all kinds for advancement of small businesses, growing the local economy.

Roughly 6 percent of deployed soldiers have small businesses depending on them. Veterans face a number of unique challenges, from increasing lengths and number of deployments overseas, to translating their military experience into business ventures. Yet, there is a lack of substantive programs to help these businesses survive through deployment, and to assist veterans returning home. This program is designed to meet current, real-time needs of people on active duty in business who now need to leave for protracted periods, or for those who have just come back and really ''need'' to do something new with their lives.

I urge all of my colleagues to support H.R. 2366.

Ms. BORDALLO. Mr. Speaker, I rise today in support of H.R. 2366, the Small Business Administration Veterans' Programs Act of 2007. I commend my colleague from Florida (Mr. BUCHANAN) for introducing this legislation.

This bill would authorize the Small Business Administration (SBA) to award grants to Small Business Development Centers (SBDCs) for the establishment of programs that would improve outreach to veterans and veterans service organizations. Specifically, this bill would authorize SBDCs to use such grant funds to create a marketing campaign to promote awareness of the services made available to veterans through that SBDC, and to target the campaign toward veterans, disabled veterans, military units, federal agencies, and veterans service organizations. The bill would also authorize SBDCs to utilize grant funds to develop and expand technology-assisted counseling and distance learning services designed to help veterans and members of the United States Armed Forces overcome barriers to entrepreneurship. This bill would further authorize SBDCs to facilitate and increase coordination among organizations that assist veterans, including through the integration of service providers and offerings into a one-stop point of contact for veterans who are entrepreneurs or small business owners.

This bill would further require that Veterans Business Outreach Centers (VBOCs) participate in the U.S. Department of Labor Technical Assistance Program (TAP). The Technical Assistance Program is offered in 173 locations throughout the United States and 53 locations internationally. H.R. 2366 would authorize VBOCs to provide grants to eligible entities located in TAP locations to make presentations on the opportunities available from the SBA for recently separated veterans. According to this bill such presentations must include, at a minimum, the entrepreneurial and business training resources available from the SBA. This bill would increase the number of authorized VBOCs by two in each of fiscal years 2008 and 2009.

Additionally, H.R. 2366 would direct the SBA to establish a Women Veterans Business Training Resource Program. This program would compile information on resources available to women veterans for business training, including resources for vocational and technical education, the development of general business skills, and business assistance programs. H.R. 2366 would direct that the SBA disseminate such information through VBOCs and women business centers.

Support for this legislation will help Congress fulfill its commitment to ensuring that our veterans and servicemembers receive the support they need upon separation from service. I support this legislation on behalf of all veterans and servicemembers, in particular those veterans and servicemembers from Guam. I urge my colleagues to support H.R. 2366.

Mr. WELCH of Vermont. Mr. Speaker, I rise in support of H.R. 2366, the SBA Veterans' Programs Act of 2007. This legislation will assist our soldiers when they return home with opportunities and information about starting a small business.

More than a million and a half men and women have answered the call to serve their country since 2001. They interrupted their careers, put their families economic security at risk, and face big personal challenges upon returning home.

I recently visited Iraq and Afghanistan. That trip gave me an even greater appreciation for the significant sacrifices our soldiers must make and must cope with for the rest of their lives. If our soldiers faced mortal danger every day abroad, let us help them have economic security when they return home.

It isn't just the veteran who makes the sacrifice, their families do as well: their parents, their spouses, their children, girlfriends and boyfriends and siblings. They give up so much in defense of our country.

It is our job, as Members of Congress, to make sure that our Nation lives up to its commitment to our veterans. It is a simple pact we have made with our troops—and one we are obligated to fulfill: after they have sacrificed to serve our country on the battlefield, we must do all we can to serve them here at home. The cost of any war must include caring for the warrior.

This legislation helps our veterans get started with business opportunities in their communities. It does so by providing grants, information services, and personal assistance to help veterans evaluate business opportunities; increasing the number of veteran business outreach centers around the country, and encouraging further assistance to women veterans.

Countless soldiers are returning from their tours of duty with new confidence and skills developed during their time in the military. This SBA program will help to ensure that those new abilities are put to good use when they return to civilian life.

This bill because it is the right thing to do for those who have given so much but also because it will directly impact Vermont and every state around the country. Ninety-seven percent of all Vermont firms are small businesses. My office has been involved in helping the Vermont Small Business Development Centers (SBDC) run business readiness classes for veterans. The Vermont SBDC is the primary small business assistance resource sought out by small business clients, lenders, government agencies and other economic development partners. The Vermont SBDC is the keystone in a statewide business assistance infrastructure tying together all appropriate resources and serving as a ''one-stop'' gateway and clearinghouse to serve small businesses' '' needs. Drawing on collaborative relationships among service providers, Vermont SBDC leverages economic development resources of all kinds for advancement of small businesses, growing the local economy.

Roughly 6 percent of deployed soldiers have small businesses depending on them. Veterans face a number of unique challenges, from increasing lengths and number of deployments overseas, to translating their military experience into business ventures. Yet, there is a lack of substantive programs to help these businesses survive through deployment, and to assist veterans returning home. This program is designed to meet current, real-time needs of people on active duty in business who now need to leave for protracted periods, or for those who have just come back and really ''need'' to do something new with their lives.

I urge all of my colleagues to support H.R. 2366.

Mr. RANGEL. Mr. Speaker, I rise in support of the H.R. 2366, Small Business Administration (SBA) Veterans' Programs Act of 2007, an act to reauthorize and invest in the veterans entrepreneurial development programs of the Small Business Administration.

As a Korean War veteran, I appreciate the sacrifices the brave men and women who defend our country make and how great a challenge it can be to return successfully to civilian life. I can relate to their struggle to obtain employment and start businesses after their service. I am supporting this act not only because it reminds me of the sacrifices of these veterans, but because legislation like this sends America a message that Congress believes in supporting and giving the necessary tools to our veterans to help them in their transition when they return from war. With this act, veterans will have the means and information to compete and participate in our economy. It is imperative that Congress let them know that we care about the sacrifices they have made and hardships that they have endured for this Nation.

Further, this act will benefit healthy veterans, disabled veterans, military units, federal agencies and veterans organizations by providing them the information required through an advertising campaign to promote awareness and education of the services available at the centers. Providing knowledge through the use of technology-assisted online counseling and distance learning technology to overcome impediments that veterans and Armed Forces service members can face enables veterans to access vital information.

Finally, it is up to Congress to do everything it can to ensure the most comprehensive service is given to all our service members. We will be taking one more step to accomplish that by supporting this act. We have the best military in the world. The best soldiers in the world. Let's have the best benefits for our soldiers. They deserve no less. Like General Douglas MacArthur said, ''the soldier who is called upon to offer his life for his country, is the noblest development of mankind.''

Ms. VELÁZQUEZ. Mr. Speaker, I yield back the balance of my time.

The SPEAKER pro tempore (Mr. CARDOZA). The question is on the motion offered by the gentlewoman from New York (Ms. VELÁZQUEZ) that the House suspend the rules and pass the bill, H.R. 2366.

The question was taken; and (two-thirds being in the affirmative) the rules were suspended and the bill was passed.

A motion to reconsider was laid on the table.

EXPANDING AND IMPROVING ASSISTANCE PROVIDED BY SMALL BUSINESS DEVELOPMENT CENTERS

Ms. VELÁZQUEZ. Mr. Speaker, I move to suspend the rules and pass the bill (H.R. 2284) to amend the Small Business Act to expand and improve the assistance provided by Small Business Development Centers to Indian tribe members, Alaska Natives, and Native Hawaiians.

The Clerk read the title of the bill.

The text of the bill is as follows:

H.R. 2284

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. FINDINGS AND PURPOSES.

(a) FINDINGS.—Congress finds the following:

(1) The rate for American Indians and Alaskan Natives living below 50 percent the poverty level is 11.2 percent, nearly double the rate of the general population.

(2) The unemployment rate for American Indians and Alaskan Natives 16 years and over is 13.6 percent, nearly double the rate of the general population.

(3) Indian tribe members and Alaska Natives own more than 201,000 businesses and generate more than $26,000,000,000 in revenues. The construction industry accounted for 16 percent of these businesses and 22.5 percent of their total receipts. The next largest was the service industry (13.2 percent and 3.4 percent, respectively). The third largest was the health care and social assistance industry (12.1 percent and 4.6 percent, respectively).

(4) The Small Business Development Center program is cost effective. Clients receiving long-term counseling under the program in 2005 generated additional tax revenues of $248,000,000, nearly 2.8 times the cost of the program to the Federal Government.

(5) Using the existing infrastructure of the Small Business Development Center program, small businesses owned by Indian tribe members, Alaska Natives, and Native Hawaiians receiving services under the program will have a higher survival rate than the average small business not receiving such services.

(6) Business counseling and technical assistance is critical on Indian lands where similar services are scarce and expensive.

(7) Increased assistance through counseling under the Small Business Development Center program has been shown to reduce the default rate associated with lending programs of the Small Business Administration.

(b) PURPOSES.—The purposes of this Act are as follows:

(1) To stimulate economies on Indian lands.

(2) To foster economic development on Indian lands.

(3) To assist in the creation of new small businesses owned by Indian tribe members, Alaska Natives, and Native Hawaiians and expand existing ones.

(4) To provide management, technical, and research assistance to small businesses owned by Indian tribe members, Alaska Natives, and Native Hawaiians.

(5) To seek the advice of local Tribal Councils on where small business development assistance is most needed.

(6) To ensure that Indian tribe members, Alaska Natives, and Native Hawaiians have full access to existing business counseling and technical assistance available through the Small Business Development Center program.

SEC. 2. SMALL BUSINESS DEVELOPMENT CENTER ASSISTANCE TO INDIAN TRIBE MEMBERS, ALASKA NATIVES, AND NATIVE HAWAIIANS.

(a) IN GENERAL.—Section 21(a) of the Small Business Act (15 U.S.C. 648(a)) is amended by adding at the end the following:

''(8) ADDITIONAL GRANT TO ASSIST INDIAN TRIBE MEMBERS, ALASKA NATIVES, AND NATIVE HAWAIIANS.—

''(A) IN GENERAL.—Any applicant in an eligible State that is funded by the Administration as a Small Business Development Center may apply for an additional grant to be used solely to provide services described in subsection (c)(3) to assist with outreach, development, and enhancement on Indian lands of small business startups and expansions owned by Indian tribe members, Alaska Natives, and Native Hawaiians.

''(B) ELIGIBLE STATES.—For purposes of subparagraph (A), an eligible State is a State that has a combined population of Indian tribe members, Alaska Natives, and Native Hawaiians that comprises at least 1 percent of the State's total population, as shown by the latest available census.

''(C) GRANT APPLICATIONS.—An applicant for a grant under subparagraph (A) shall submit to the Administration an application that is in such form as the Administration may require. The application shall include information regarding the applicant's goals and objectives for the services to be provided using the grant, including—

''(i) the capability of the applicant to provide training and services to a representative number of Indian tribe members, Alaska Natives, and Native Hawaiians;

''(ii) the location of the Small Business Development Center site proposed by the applicant;

''(iii) the required amount of grant funding needed by the applicant to implement the program; and

''(iv) the extent to which the applicant has consulted with local Tribal Councils.

''(D) APPLICABILITY OF GRANT REQUIREMENTS.—An applicant for a grant under subparagraph (A) shall comply with all of the requirements of this section, except that the matching funds requirements under paragraph (4)(A) shall not apply.

''(E) MAXIMUM AMOUNT OF GRANTS.—No applicant may receive more than $300,000 in grants under this paragraph for one fiscal year.

''(F) REGULATIONS.—After providing notice and an opportunity for comment and after consulting with the Association recognized by the Administration pursuant to paragraph (3)(A) (but not later than 180 days after the date of enactment of this paragraph), the Administration shall issue final regulations to carry out this paragraph, including regulations that establish—

''(i) standards relating to educational, technical, and support services to be provided by Small Business Development Centers receiving assistance under this paragraph; and

''(ii) standards relating to any work plan that the Administration may require a Small Business Development Center receiving assistance under this paragraph to develop.

''(G) DEFINITIONS.—In this section, the following definitions apply:

''(i) INDIAN LANDS.—The term 'Indian lands' has the meaning given the term 'Indian country' in section 1151 of title 18, United States Code, the meaning given the term 'Indian reservation' in section 151.2 of title 25, Code of Federal Regulations (as in effect on the date of enactment of this paragraph), and the meaning given the term 'reservation' in section 4 of the Indian Child Welfare Act of 1978 (25 U.S.C. 1903).

''(ii) INDIAN TRIBE.—The term 'Indian tribe' means any band, nation, or organized group or community of Indians located in the contiguous United States, and the Metlakatla Indian Community, whose members are recognized as eligible for the services provided to Indians by the Secretary of the Interior because of their status as Indians.

''(iii) INDIAN TRIBE MEMBER.—The term 'Indian tribe member' means a member of an Indian tribe (other than a Alaska Native).

''(iv) ALASKA NATIVE.—The term 'Alaska Native' has the meaning given the term 'Native' in section 3(b) of the Alaska Native Claims Settlement Act (43 U.S.C. 1602(b)).

''(v) NATIVE HAWAIIAN.—The term 'Native Hawaiian' means any individual who is—

''(I) a citizen of the United States; and

''(II) a descendant of the aboriginal people, who prior to 1778, occupied and exercised sovereignty in the area that now constitutes the State of Hawaii.

''(vi) TRIBAL ORGANIZATION.—The term 'tribal organization' has the meaning given that term in section 4(l) of the Indian Self-Determination and Education Assistance Act (25 U.S.C. 450b(l)).

''(H) AUTHORIZATION OF APPROPRIATIONS.—There is authorized to be appropriated to carry out this paragraph $7,000,000 for each of fiscal years 2008 through 2010.

''(I) FUNDING LIMITATIONS.—

''(i) NONAPPLICABILITY OF CERTAIN LIMITATIONS.—Funding under this paragraph shall

be in addition to the dollar program limitations specified in paragraph (4).

''(ii) LIMITATION ON USE OF FUNDS.—The Administration may carry out this paragraph only with amounts appropriated in advance specifically to carry out this paragraph.''.

SEC. 3. STATE CONSULTATION WITH TRIBAL ORGANIZATIONS.

Section 21(c) of the Small Business Act (15 U.S.C. 648(c)) is amended by adding at the end the following:

''(9) ADVICE OF LOCAL TRIBAL ORGANIZATIONS.—A Small Business Development Center receiving a grant under this section shall request the advice of tribal organization on how best to provide assistance to Indian tribe members, Alaska Natives, and Native Hawaiians and where to locate satellite centers to provide such assistance.''.

The SPEAKER pro tempore. Pursuant to the rule, the gentlewoman from New York (Ms. VELÁZQUEZ) and the gentleman from Tennessee (Mr. DAVID DAVIS) each will control 20 minutes.

The Chair recognizes the gentlewoman from New York.

GENERAL LEAVE

Ms. VELÁZQUEZ. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days to revise and extend their remarks and include extraneous material on the bill under consideration.

The SPEAKER pro tempore. Is there objection to the request of the gentlewoman from New York?

There was no objection.

Ms. VELÁZQUEZ. Mr. Speaker, I yield myself as much time as I may consume.

Mr. Speaker, small businesses are responsible for creating three out of every four new jobs and account for almost half of all sales in this country. There is no question the impact they have on economic growth and the development and revitalization of countless neighbors.

Currently, the Native American population is one of the most impoverished. Their unemployment rate is nearly double that of the general population, with almost half of all residents living on a reservation unemployed.

Providing opportunities for business growth within the Native American sector will create jobs, generate revenue and ultimately benefit local economies across the country. The Native American Small Business Development Act of 2007, introduced by Representative UDALL, works to increase prospects for Native Americans through small business ownership.

While many in the Native American population are struggling, there is strong interest to engage in entrepreneurship. For these communities to have a growing small business sector, resources must be available locally and be culturally sensitive.

This legislation has enjoyed bipartisan support in the past and has passed the House in previous Congresses. It is designed to provide culturally tailored assistance for entrepreneurial development in some of the most disadvantaged areas of this country.

□ 1845

Not only will this bill help combat poverty and unemployment, but it will bring new services and opportunities to Native American communities. It is my hope that in the 110th Congress, H.R. 2284 can finally become law and expand the right to business ownership. I urge support of this legislation.

Mr. Speaker, I reserve the balance of my time.

Mr. DAVID DAVIS of Tennessee. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, today I rise in support of the request to suspend the rules and pass H.R. 2284, a bill to provide additional Small Business Development Center resources focused on Native Americans, Alaskan Natives and Native Hawaiians. The bill, the product and dedicated effort of the author, Congressman TOM UDALL, former Small Business Committee member, was passed without objection by voice vote.

I would like to thank Chairwoman VELÁZQUEZ for working in a cooperative and bipartisan manner to bring this matter to the House floor.

Mr. Speaker, I reserve the balance of my time.

Ms. VELÁZQUEZ. Mr. Speaker, I yield such time as he may consume to the gentleman from New Mexico (Mr. UDALL), the sponsor of the legislation.

Mr. UDALL of New Mexico. Mr. Speaker, before I begin, I would like to thank the gentlewoman from New York (Ms. VELÁZQUEZ) and the gentleman from Ohio (Mr. CHABOT) for their work and commitment to expanding small business opportunities. I am especially grateful for their efforts to bring this bill to the floor today. I would also like to thank all my colleagues who supported this bill by joining me as cosponsors.

This important legislation before us today, H.R. 2284, allows Small Business Development Centers to apply for an additional SBA grant to provide specified services assisting small business start-ups and expansions owned by Indian Tribal Members, Alaskan Natives or Native Hawaiians. My bill ensures those seeking to create, develop and expand small businesses have full access to the counseling and technical assistance available through SBDCs. The tools offered by the SBDCs can assist these entrepreneurs with the information and opportunity to build sustainable businesses in their communities.

H.R. 2284 also ensures participation of governing bodies of Indian tribes, Alaskan Native entities and Native Hawaiian organizations by requiring grant recipients to request their advice on how best to provide assistance. Our intent is to ensure that these business development tools are provided in a culturally sensitive way.

Small businesses create 75 percent of all new employment opportunities and make up 99 percent of all employers. They anchor our neighborhoods, provide jobs and contribute to the overall economic development of many communities. That is why it is so imperative that we take steps to help ensure that small business development reaches the places in this country where economic prosperity has yet to be fully realized.

I have the great honor of representing 14 Pueblos, the Jicarilla Apache Nation and a portion of the Navajo Nation. Many of these communities would greatly benefit by more economic development. It is clear we can do more to aid Native American entrepreneurs in my district and throughout the country. I hope to help rectify this situation with the passage of this legislation.

Mr. DAVID DAVIS of Tennessee. Mr. Speaker, I have no further speakers, and I yield back the balance of my time.

Ms. VELÁZQUEZ. Mr. Speaker, in closing, with unemployment rampant on Native American reservations, legislation that not only fights poverty but fosters the development of job creation is critical. I strongly urge my colleagues to vote for H.R. 2284.

Ms. BORDALLO. Mr. Speaker, I rise today in support of H.R. 2284, a bill to amend the Small Business Act to expand and improve the assistance provided by Small Business Development Centers to Indian tribe members, Alaska Natives, and Native Hawaiians. I commend the gentleman from New Mexico (Mr. UDALL) for introducing this important legislation to address poverty and unemployment amongst these disadvantaged and underserved communities. I also thank my colleague from New York (Ms. VELÁZQUEZ), Chairwoman of the Committee on Small Business, and the members of the Committee on Small Business for their continued leadership toward helping strengthen our country's small businesses and in addressing the socio-economic challenges faced by our indigenous communities.

H.R. 2284 will enable small business development centers to assist Native American communities in the areas of job creation and economic growth. This bill helps individuals to utilize their own valuable business skills so that their small businesses, and in turn their community, may prosper.

This is a strong bill. But I believe that it can strengthened by expanding the eligible grant recipients to include small business development centers that work with the indigenous populations of the territories, particularly in Guam, the Commonwealth of the Northern Mariana Islands, and American Samoa. Pacific Islanders from the territories endure economic adversity similar to that experienced by Native Americans, Alaska Natives, and Native Hawaiians. I look forward to working with my colleagues to ensure that either in conference on this legislation, or on a similar proposal, that we take action to address the small business development needs of the indigenous peoples of the U.S. territories.

This bill, if enacted, would provide for valuable federal assistance for Native Americans, and I urge my colleagues to support its passage and to support economic development for all indigenous communities throughout the United States.

Ms. HIRONO. Mr. Speaker, I rise in support of H.R. 2284, which will amend the Small Business Act to improve the assistance provided by Small Business Development Centers to Indian tribe members, Alaska Natives and Native Hawaiians.

This bill will provide management, technical and research assistance to small businesses owned by Indian tribe members, Alaska Natives and Native Hawaiians and ensure them full access to existing business counseling and technical assistance available through the Small Business Development Center program.

Mr. Speaker, in a recent report by the distinguished Visiting Senior Fellow at the East-West Center and Emeritus Professor at the University Hawaii, Dr. Seiji Naya, the poverty rate for Native Hawaiians was 15 percent in 2005 while the state average was 9.8 percent. Native Hawaiians accounted for 27 percent of the total State population in poverty. The per capita income for Native Hawaiians was only 67 percent of the state average. In terms of per capita income, 32 percent of Native Hawaiians earned less than $10,000 in 2005 compared to only 18 percent for Non-Native Hawaiians.

Native Hawaiians are committed to changing these statistics through innovative educational and entrepreneurial programs. One of the most promising government programs that will enable them to do this is the Small Business Act, particularly Section 8(a) which has given Native Americans an opportunity to participate in the economy of this country by providing a fair chance to obtain federal contracts. As a result, hundreds of Native American, Alaska Native and Native Hawaiian entrepreneurs have been given the opportunity to demonstrate their business capabilities, while providing valuable services and products to the government and the private sector.

The Native Hawaiian organizations that have taken advantage of the 8(a) program have provided hundreds of new well-paying jobs for Native Hawaiians and Non-Native Hawaiians alike. Many Native Hawaiians have received training in new marketable skills. The profits from these enterprises have been plowed back into the Native Hawaiian communities to provide essential social, health and cultural benefits traditionally funded by government or not at all.

H.R. 2284 will provide the necessary assistance to help make sure that these worthy programs continue to grow and expand as much as possible by providing needed assistance and business expertise. I urge unanimous approval of this measure.

Ms. VELAZQUEZ. Mr. Speaker, I yield back the balance of my time, and encourage adoption of the resolution.

The SPEAKER pro tempore. The question is on the motion offered by the gentlewoman from New York (Ms. VELÁZQUEZ) that the House suspend the rules and pass the bill, H.R. 2284.

The question was taken.

The SPEAKER pro tempore. In the opinion of the Chair, two-thirds being in the affirmative, the ayes have it.

Mr. GOHMERT. Mr. Speaker, on that I demand the yeas and nays.

The yeas and nays were ordered.

The SPEAKER pro tempore. Pursuant to clause 8 of rule XX and the Chair's prior announcement, further proceedings on this question will be postponed.

SBA WOMEN'S BUSINESS PROGRAMS ACT OF 2007

Ms. VELÁZQUEZ. Mr. Speaker, I move to suspend the rules and pass the bill (H.R. 2397) to reauthorize the women's entrepreneurial development programs of the Small Business Administration, and for other purposes.

The Clerk read the title of the bill.

The text of the bill is as follows:

H.R. 2397

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. SHORT TITLE; TABLE OF CONTENTS.

(a) SHORT TITLE.—This Act may be cited as the ''SBA Women's Business Programs Act of 2007''.

(b) TABLE OF CONTENTS.—The table of contents for this Act is as follows:

TITLE I—NATIONAL WOMEN'S BUSINESS COUNCIL

SEC. 101. ANNUAL STUDIES ON PROBLEMS HINDERING THE SUCCESS OF WOMEN ENTREPRENEURS.

Section 409 of the Women's Business Ownership Act of 1988 (15 U.S.C. 7109) is amended—

(1) by redesignating subsection (b) as subsection (c); and

(2) by inserting after subsection (a) the following:

''(b) PROBLEMS HINDERING THE SUCCESS OF WOMEN ENTREPRENEURS.—The Council shall conduct at least one study per year that evaluates the problems hindering the success of women entrepreneurs. The Council shall select the topic for the study in consultation with the Committee on Small Business of the House of Representatives and the Committee on Small Business and Entrepreneurship of the Senate.''.

SEC. 102. ADDITIONAL PROGRESS REPORTS.

Section 406(d)(4) of the Women's Business Ownership Act of 1988 (15 U.S.C. 7106(d)(4)) is amended by inserting before the semicolon at the end the following: '', and on a biannual basis (notwithstanding paragraph (6)) submit to the President and to the Committee on Small Business and Entrepreneurship of the Senate and the Committee on Small Business of the House of Representatives a report containing a description of, and the status of, such initiatives, policies, programs, and plans''.

TITLE II—WOMEN'S BUSINESS CENTERS

SEC. 201. REVISED FUNDING FORMULA.

Section 29(b) of the Small Business Act (15 U.S.C. 656(b)) is amended to read as follows:

''(b) AUTHORITY.—

''(1) IN GENERAL.—The Administrator may provide financial assistance to private nonprofit organizations to conduct projects for the benefit of small business concerns owned and controlled by women. The projects shall provide—

''(A) financial assistance, including training and counseling in how to apply for and secure business credit and investment capital, preparing and presenting financial statements, and managing cash flow and other financial operations of a business concern;

''(B) management assistance, including training and counseling in how to plan, organize, staff, direct, and control each major activity and function of a small business concern; and

''(C) marketing assistance, including training and counseling in identifying and segmenting domestic and international market opportunities, preparing and executing marketing plans, developing pricing strategies, locating contract opportunities, negotiating contracts, and utilizing varying public relations and advertising techniques.

''(2) TIERS.—The Administrator shall provide assistance under paragraph (1) in three tiers of assistance as follows:

''(A) The first tier shall be to conduct a 5-year project in a situation where a project has not previously been conducted. Such a project shall be in a total amount of not more than $150,000 per year.

''(B) The second tier shall be to conduct a 3-year project in a situation where a first-tier project is being completed. Such a project shall be in a total amount of not more than $100,000 per year.

''(C) The third tier shall be to conduct a 3-year project in a situation where a second-tier project is being completed. Such a project shall be in a total amount of not more than $100,000 per year. Third-tier grants are renewable subject to established eligibility criteria as well as criteria in subsection (b)(4).

''(3) ALLOCATION OF FUNDS.—Of the amounts made available for assistance under this subsection, the Administrator shall allocate—

''(A) at least 40 percent for first-tier projects under paragraph (2)(A);

''(B) 20 percent for second-tier projects under paragraph (2)(B); and

''(C) the remainder for third-tier projects under paragraph (2)(C).

''(4) BENCHMARKS FOR THIRD-TIER PROJECTS.—In awarding third-tier projects under paragraph (2)(C), the Administrator shall use benchmarks based on socio-economic factors in the community and on the performance of the applicant. The benchmarks shall include—

''(A) the total number of women served by the project;

''(B) the proportion of low income women and socio-economic distribution of clients served by the project;

''(C) the proportion of individuals in the community that are socially or economically disadvantaged (based on median income);

''(D) the future fundraising and service coordination plans;

''(E) the diversity of services provided; and

''(F) regional distribution within the 10 districts of the Administration.''.

SEC. 202. MATCHMAKING FORMULA CHANGE.

Section 29(c)(1) of the Small Business Act (15 U.S.C. 656(c)(1)) is amended—

(1) by striking subparagraphs (A) and (B); and

(2) by adding at the end the following:

''(A) For the first and second years of the project, 1 non-Federal dollar for each 2 Federal dollars.

''(B) Each year after the second year of the project—

''(i) 1 non-Federal dollar for each Federal dollar; or

''(ii) if the center is in a community at least 50 percent of the population of which is below the median income, 1 non-Federal dollar for each 2 Federal dollars.''.

SEC. 203. TERMINATION OF FUNDING.

Section 29(c) of the Small Business Act (15 U.S.C. 656(c)) is amended by adding at the end the following:

''(5) TERMINATION.—An organization that has conducted a project under this subsection—

''(A) is not eligible to conduct another such project; and

''(B) may continue thereafter to use the women's business center logo only with the consent of the Administrator.''.

SEC. 204. WOMEN'S BUSINESS CENTER AWARDS TO BE MADE PUBLIC.

Section 29(g)(2)(B)(ii)(V) of the Small Business Act (15 U.S.C. 656(g)(2)(B)(ii)(V)) is amended by inserting before the semicolon at the end the following: '', and make available to the public the award made to each applicant so selected''.

The SPEAKER pro tempore. Pursuant to the rule, the gentlewoman from New York (Ms. VELÁZQUEZ) and the gentleman from Tennessee (Mr. DAVID DAVIS) each will control 20 minutes.

The Chair recognizes the gentlewoman from New York.

GENERAL LEAVE

Ms. VELÁZQUEZ. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days to revise and extend their remarks and include extraneous material on the bill under consideration.

The SPEAKER pro tempore. Is there objection to the request of the gentlewoman from New York?

There was no objection.

Ms. VELÁZQUEZ. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, there is no question that the face of small business is changing in this country. Women entrepreneurs now account for 50 percent of all small business owners and are growing at a phenomenal rate. The SBA Women's Program Act of 2007, sponsored by Congresswoman FALLIN, works to enhance opportunities for women by increasing access to in-depth outcome-oriented counseling and training. It strengthens SBA's Women's Business Centers to ensure that they continue to serve the important role of assisting small business owners.

While many have taken advantage of the services Women's Business Centers offer, not all budding entrepreneurs are getting the resources they need to successfully start and own a business. A significant gap exists between the number of women in our country and those involved in entrepreneurship, particularly in certain industry sectors.

Representative FALLIN's legislation will increase the reach of Women's Business Centers to help develop entrepreneurship, particularly in underprivileged areas. By setting standards, it ensures that those who want to start their own firms have quality support and training resources available. The increased research that this bill requires will make sure that challenges currently impacting women are identified and addressed.

The SBA Women's Procurement Act of 2007 builds on the strong track record of Women's Business Centers. The expansion of these centers has the potential to spur economic growth in disadvantaged communities and to even move impoverished women from welfare to entrepreneurship.

I strongly support this legislation.

Mr. Speaker, I reserve the balance of my time.

Mr. DAVID DAVIS of Tennessee. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, I rise in support of the request to suspend the rules and pass H.R. 2397, the SBA Women's Business Programs Act of 2007. I would like to thank Chairwoman VELÁZQUEZ for working in a cooperative and bipartisan manner to bring this bill, authored by Ms. FALLIN, a freshman member of the committee, to the House floor.

Mr. Speaker, I yield such time as she may consume to the gentlewoman from Oklahoma (Ms. FALLIN).

Ms. FALLIN. Mr. Speaker, I would like to begin by thanking Chairwoman VELÁZQUEZ and Ranking Member CHABOT for their support for this legislation and also in helping to build a strong bipartisan coalition in the Small Business Committee.

This bill, the SBA Women's Business Act of 2007, will strengthen the Women Business Centers program that was established in 1997 by making it more efficient and more accountable. The Women's Business Centers are a very important part of the grant programs that are funded by the Small Business Administration. Today, Women's Business Centers all across the country are providing women entrepreneurs with much-needed technical assistance in starting and operating their own small businesses.

In the mid-1990s, the Federal Government began awarding grants to Women's Business Centers that were operating as nonprofit organizations in conjunction with institutions of higher learning. Originally, these grants were intended to be awarded to business centers in their first 5 years with the understanding that after the first 5-year period had ended, the center would be financially self-sustaining.

Although many Women's Business Centers did meet this goal, some have not for a variety of reasons. As a result, a greater percentage of the funding for this program has been consumed by the operating costs of potentially unviable centers rather than the intended purposes of establishing new business centers. The result is a drag on the system and viable business centers that are not truly serving an unmet need in their communities. This jeopardizes the effectiveness in the viability of the entire program.

The SBA Women's Business Programs Act of 2007 will restore the original priorities held by the Federal Government when this program was created. By offering a three-tiered system of funding and lower caps on spending for older business centers, we can ensure a balanced percentage of funding is used to support both new and existing business centers.

The first tier requires that at least 40 percent of the total funds be reserved for the purpose of establishing and supporting new Women's Business Centers during their first 5 years of existence. The second tier will use 20 percent of the total funds to help sustain the centers that have successfully existed during their first 5 years.

Lastly, the third tier will use a maximum of 40 percent of the funds to continue supporting centers that have existed for 8 years or more and have met the necessary benchmarks set forth by the SBA to receive this funding. This three-tiered system will offer a helping hand to newly established centers while slowly weaning the older centers off the dependency of the Federal grants.

It is important to realize that this legislation does not affect the overall funding level of this program. Rather, it rearranges the distribution of funds to reflect the original intention of these grants, an offer of temporary assistance rather than one of permanent dependency on the Federal Government.

This legislation will ultimately restore accountability and efficiency to a program that, while well intentioned, has become weighed down by inefficiency. These are goals that every Member of Congress can all support. The SBA Women's Business Programs Act of 2007 has passed in the Small Business Committee with overwhelming bipartisan support, and I want to encourage all my colleagues on both sides of the aisle to vote in favor of this today.

Mr. DAVID DAVIS of Tennessee. Mr. Speaker, I have no further speakers, and I yield back the balance of my time.

Ms. VELÁZQUEZ. Mr. Speaker, the small business face in America is changing. We have more and more women who would like to get involved in opening and starting their businesses, and the bill that we have before us as sponsored by Representative FALLIN does just that.

It promotes opportunity for women by increasing access to business counseling and training through the development of the Women's Business Center. This will better enable women to have flourishing enterprises and help to spur job creation and economic development across this Nation. I urge adoption of this bill.

Mr. SESTAK. Mr. Speaker, as a husband, a father of a young daughter, the proud brother to 6 sisters, and having served alongside dedicated women in the military, I have seen firsthand the role that women play in economically strengthening American society. And this is why I rise today to support H.R. 2397, the SBA Women's Business Programs Act of 2007.

Despite their significant contributions, women who work full time, year round, still only make 77 cents for every dollar made by their male counterparts, and women business owners, particularly those from socially and economically disadvantaged backgrounds, face significant challenges resulting from inadequate community resources. Such resources include lack of access to capital, training resources, and networks of assistance.

Today, women-owned firms are one of the fastest growing, successful small business sectors. The number of women-owned firms has increased at nearly double the rate of all firms, and those with socially and economically disadvantaged backgrounds have grown at twice the rate of their counterparts and 6 times the rate of all U.S. firms. As the number of women entrepreneurs grows, particularly those from underserved communities, I believe it is critical that women have adequate and appropriate resources to prepare them for success in the marketplace. To that end, H.R. 2397 proposes to expand the agency's commitment to the Women's Business Centers (WBCs).

WBCs provide in-depth, substantive, and outcome-oriented counseling, training and mentoring, resulting in substantial economic impact as measured by successful business start-ups, job creation and retention, and increased company revenues. They also provide financial, management, and marketing assistance to women small business owners.

H.R. 2397 supports the growth of women small business owners by expanding entrepreneurial development assistance, particularly in low-income areas. The legislation dedicates funding to the opening of new WBCs in underserved areas, while implementing new benchmarks to ensure centers that continually receive funds are meeting performance requirements. These metrics, which include information on clients served and fundraising plans, will help to preserve resources for centers that have demonstrated success helping women entrepreneurs while promoting the expansion of assistance centers into underserved areas.

H.R. 2397 is important legislation which promotes economic security for America's women, and I urge all my colleagues to support this bill.

Ms. BORDALLO. Mr. Speaker, I rise today in strong support of H.R. 2397, the Small Business Administration Women's Business Programs Act of 2007. I commend my colleague from Oklahoma (Ms. FALLIN) for introducing this important legislation to reauthorize the women's entrepreneurial development programs of the Small Business Administration (SBA).

Most notably H.R. 2397 would authorize the SBA Administrator to provide financial assistance to private nonprofit organizations to conduct projects for the benefit of small businesses owned and operated by women. The bill notes that such projects shall provide, among other things, financial assistance, including training and counseling on how to apply for and secure business credit and investment capital, preparing and presenting financial statements, and managing cash flow and other financial operations of a business concern; management assistance, including training and counseling in how to plan, organize, staff, direct, and control each major activity and function of a small business; and marketing assistance, including training and counseling in identifying and segmenting domestic and international market opportunities, preparing and executing marketing plans, developing pricing strategies, locating contract opportunities, negotiating contracts, and utilizing varying public relations and advertising techniques.

H.R. 2397 would also direct that the National Women's Business Council (NWBC) conduct at least one study per year that evaluates the challenges hindering the success of women entrepreneurs, and mandates that NWBC select the topic for the study in consultation with the Committee on Small Business of the House of Representatives and the Committee on Small Business and Entrepreneurship of the Senate.

Support for this legislation will help Congress fulfill its commitment to ensuring that women owned and operated small businesses are able to access the resources and training they may require in order to achieve success. I urge my colleagues to support H.R. 2397.

Ms. JACKSON-LEE of Texas. Mr. Speaker, I rise today in strong support of H.R. 2397, to reauthorize the women's entrepreneurial development programs of the Small Business Administration, and for other purposes.

I would first begin by applauding my esteemed colleague from Oklahoma, Congresswoman MARY FALLIN, for her work on, and undertaking of this important piece of legislation. The SBA Women's Business Programs Act of 2007 will help to restore the goal of the Federal Government to award grants to Women's Business Centers, originally operating as a non-profit organizations in conjunction with institutions of higher learning. This bill will also restore the balance of funding between new and existing Women's Business Centers, originally envisioned at the start of the program.

Women Business Centers (WBCs) are community-based projects that are funded by the U.S. Small Business Administration through grants that require matching funds. They provide long-term business skills training, counseling, and mentoring to benefit emerging and existing small businesses that are owned and controlled by women, especially those who are socially or economically disadvantaged. Its goal is to continually ensure that those WBC's that are indeed serving an unmet need in their underserved communities remain sustained. They also work to provide valuable technical assistance to women entrepreneurs.

The SBA's Women's Business Programs Act of 2007 authorizes the National Women's Business Council to conduct annual studies on problems hindering the success of women entrepreneurs and to submit reports to the President and the House and Senate Small Business committees. By offering a three-tiered system of funding and lower caps on spending for older business centers, SBA hopes to make certain that a balanced percentage of the funding is used to support both new and existing business centers. This system will offer assistance to newly established centers, while slowly reducing the older centers dependency on federal grant funds.

Grants awarded to these business centers in their first 5 years were awarded with the intention that after this 5-year period had ended, the center would be financially self-sustaining. These grants were not intended to be a source of permanent funding. With that said, one of the main objectives of the SBA has been to provide direction and resources to those desiring to start and expand their small business firms.

As once stated by the House Small Business Committee Chairwoman NYDIA M. VELÁZQUEZ, ''today's small business owners are leading the way when it comes to job creation and economic development in communities nationwide. [H.R. 2397] will ensure that the needs of the drivers of our economy—small businesses—are met.'' This legislation dedicates resources to strengthen centers and ensure stability in the program.

I rise today to support, as well as to encourage my other colleagues to join Representative FALLIN and myself in helping to increase the effectiveness of Women's Business Centers nationwide by supporting the SBA Women's Programs Act of 2007, H.R. 2397. I thank you once again, Representative FALLIN, for introducing this important piece of legislation. I am looking forward to witnessing the tremendous effects and positive results that this bill has to offer.

Ms. VELÁZQUEZ. Mr. Speaker, I yield back the balance of my time.

The SPEAKER pro tempore. The question is on the motion offered by the gentlewoman from New York (Ms. VELÁZQUEZ) that the House suspend the rules and pass the bill, H.R. 2397.

The question was taken; and (two-thirds being in the affirmative) the rules were suspended and the bill was passed.

A motion to reconsider was laid on the table.

□ 1900

ANNOUNCEMENT BY THE SPEAKER PRO TEMPORE

The SPEAKER pro tempore. Pursuant to clause 8 of rule XX, proceedings will resume on motions to suspend the rules previously postponed.

Votes will be taken in the following order:

H.R. 2563, by the yeas and nays;

H. Con. Res. 151, by the yeas and nays;

H. Res. 233, by the yeas and nays.

The postponed votes on S. 1352, H. Con. Res. 21, H.R. 2359 and H.R. 2284 will be taken tomorrow.

The first electronic vote will be conducted as a 15-minute vote. Remaining electronic votes will be conducted as 5-minute votes.

MAJOR SCOTT NISELY POST OFFICE

The SPEAKER pro tempore. The unfinished business is the vote on the motion to suspend the rules and pass the bill, H.R. 2563, on which the yeas and nays were ordered.

The Clerk read the title of the bill.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from Illinois (Mr. DAVIS) that the House suspend the rules and pass the bill, H.R. 2563.

The vote was taken by electronic device, and there were—yeas 386, nays 0, not voting 46, as follows:

ANNOUNCEMENT BY THE SPEAKER PRO TEMPORE

The SPEAKER pro tempore (during the vote). There are 2 minutes remaining on this vote.

□ 1922

Mr. MCNERNEY and Ms. LINDA T. SÁNCHEZ of California changed their vote from ''nay'' to ''yea.''

So (two-thirds being in the affirmative) the rules were suspended and the bill was passed.

The result of the vote was announced as above recorded.

A motion to reconsider was laid on the table.

NOTING KILLINGS OF DOZENS OF INDEPENDENT JOURNALISTS IN RUSSIA AND CALLING ON RUSSIAN PRESIDENT TO AUTHORIZE COOPERATION WITH OUTSIDE INVESTIGATORS

The SPEAKER pro tempore. The unfinished business is the vote on the motion to suspend the rules and agree to the concurrent resolution, H. Con. Res. 151, as amended, on which the yeas and nays were ordered.

The Clerk read the title of the concurrent resolution.

The SPEAKER pro tempore. The question is on the motion offered by the gentlewoman from California (Ms. WATSON) that the House suspend the rules and agree to the concurrent resolution, H. Con. Res. 151, as amended.

This will be a 5-minute vote.

The vote was taken by electronic device, and there were—yeas 388, nays 1, not voting 43, as follows:

ANNOUNCEMENT BY THE SPEAKER PRO TEMPORE

The SPEAKER pro tempore (during the vote). There are 2 minutes remaining on this vote.

□ 1930

So (two-thirds being in the affirmative) the rules were suspended and the concurrent resolution, as amended, was agreed to.

The result of the vote was announced as above recorded.

The title was amended so as to read: ''Concurrent resolution noting the disturbing pattern of killings of numerous independent journalists in Russia since 2000, and urging Russian President Vladimir Putin to authorize cooperation with outside investigators in solving those murders.''.

A motion to reconsider was laid on the table.

RECOGNIZING OVER 200 YEARS OF SOVEREIGNTY OF THE PRINCIPALITY OF LIECHTENSTEIN

The SPEAKER pro tempore. The unfinished business is the vote on the motion to suspend the rules and agree to the resolution, H. Res. 233, as amended, on which the yeas and nays were ordered.

The Clerk read the title of the resolution.

The SPEAKER pro tempore. The question is on the motion offered by the gentlewoman from California (Ms. WATSON) that the House suspend the rules and agree to the resolution, H. Res. 233, as amended.

This will be a 5-minute vote.

ANNOUNCEMENT BY THE SPEAKER PRO TEMPORE

The SPEAKER pro tempore (during the vote). There are 2 minutes remaining on this vote.

□ 1937

So (two-thirds being in the affirmative) the rules were suspended and the resolution, as amended, was agreed to.

The result of the vote was announced as above recorded.

A motion to reconsider was laid on the table.

REPORT ON H.R. 2764, DEPARTMENT OF STATE, FOREIGN OPERATIONS, AND RELATED PROGRAMS APPROPRIATIONS BILL, 2008

Mrs. LOWEY, from the Committee on Appropriations, submitted a privileged report (Rept. No. 110–197) on the bill (H.R. 2764) making appropriations for the Department of State, foreign operations, and related programs for the fiscal year ending September 30, 2008, and for other purposes, which was referred to the Union Calendar and ordered to be printed.

The SPEAKER pro tempore. Pursuant to clause 1, rule XXI, all points of order are reserved on the bill.

FAST TRACK TRADE AUTHORITY

(Ms. SCHAKOWSKY asked and was given permission to address the House for 1 minute and to revise and extend her remarks.)

Ms. SCHAKOWSKY. Mr. Speaker, on June 30, 2007, Fast Track trade authority will expire. Now is the time for Congress to replace an outdated system that removes congressional authority, as set out in the Constitution, ''to regulate commerce with foreign nations.''

As it stands with Fast Track in place, Congress has no control over the content of trade agreements. We can vote on trade agreements only after they have been negotiated and signed, but we are responsible for trade agreements negative effects. Over 3 million American manufacturing jobs have been lost.

American wages have stagnated. We have lost our family farms, and we have failed to encourage income equality in the developing nations with which we have trade agreements. That's after Fast Track.

Let's replace Fast Track with a better system. Congress should be able to decide with whom we negotiate trade agreements and what goes into those agreements. Let's restore the balance of powers on trade established in the Constitution.

RECOGNIZING SEVERAL OUTSTANDING STUDENTS FROM ROBERTS WESLEYAN COLLEGE

(Mr. KUHL of New York asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. KUHL of New York. Mr. Speaker, I rise today to recognize several outstanding students from the Roberts Wesleyan College, which is located in my congressional district.

In today's world, if we needed an innovative cutting-edge solution to a challenge, we look to our institutions of higher education. Each year, the Motion Picture Association of America partners with Students in Free Enterprise to host a national competition to produce a public service announcement regarding the importance of intellectual property rights. For the second year in a row, Roberts Wesleyan College placed among the top 3 of over 40 competitors.

These talented Roberts Wesleyan students won a cash award, and their broadcast now has a chance to achieve national exposure. Their outstanding accomplishment will have an impact on both the local and the national level.

I commend the efforts of these students.

ALMOST 4,000 DEAD IN IRAQ

(Ms. JACKSON-LEE of Texas asked and was given permission to address the House for 1 minute and to revise and extend her remarks.)

Ms. JACKSON-LEE of Texas. Mr. Speaker, sadly, we are moving toward almost 4,000 dead in Iraq. I don't believe there are enough times that we can recount for the American people how many have already died; 25,000 are injured.

I am grateful to the Democratic leadership for providing enhanced funding for the veterans hospitals and the Veterans Affairs Department to break the backlog of those veterans' wait for services and to help those in outpatient centers who need care.

But the real issue is when is the Iraqi Government going to stand up?

Just this past weekend, bombing occurred in Afghanistan where we need to turn our attention, but we understand that there is a possibility that the Iraqi Parliament will end its work and go off on a vacation for July and August while our soldiers are dying.

It is time now for this administration to understand the misdirection of this mission, to cause the Iraqi Government to stand up so that we can stand down. How many more lives, how many more families for these brave and wonderful men and women on the front lines of Iraq? They are our heroes, they are the patriots. We salute them.

It is time now for the administration to stand up for them and make the Iraqi Government stand up and take care of the Iraqi people.

□ 1945

SPECIAL ORDERS

The SPEAKER pro tempore (Mr. KLEIN of Florida). Under the Speaker's announced policy of January 18, 2007, and under a previous order of the House, the following Members will be recognized for 5 minutes each.

BOO WHO?

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Texas (Mr. POE) is recognized for 5 minutes.

Mr. POE. Mr. Speaker, when Ms. USA recently appeared in Mexico City, she was repeatedly booed every time she was onstage. Apparently, the host and hostess and the ''Politically Correct Police'' missed it or just ignored it.

The pro-amnesty crowd is moving right along in its efforts to convince the American public that illegal immigration exists because people would do anything to be an American; interesting logic considering recent events. But I've never understood the logic in rewarding 12 to 20 million law breakers with amnesty for any reason.

In America, we seem to do things a little bit different. We cheer for our country. We wave our flag. We invest in our country, and we respect our neighbors. And by respecting neighbors, I don't mean we invade somebody else's country, demand benefits and protest brazenly in the streets waving foreign flags. And where I come from, we never boo a lady.

The booing incident of Americans doesn't come as a big shock to most of us. It has happened before in U.S.-Mexico sporting events. The Mexican team and the Mexican fans booed the U.S. players. It is the disappointment in the lack of reaction from some of our leaders to realize that they are not welcoming future Americans into our

country with their amnesty giveaway; they are just giving away the country.

A pathway to citizenship, or earned citizenship, or any other giveaway program they want to call it only works if people really want to become Americans. If you want to be an American, then there are some responsibilities to that. You just don't get to take all you can and leave when you are done.

I don't agree that this amnesty nonsense is what's best for America, and I know, without a doubt, that the uncontrolled border is a natural disaster. Sure, it's great for Mexico. Their struggling economy depends on our citizens; or rather, their citizens' loyalty to their country, not loyalty to our country.

But the argument is that we have to allow those living in our country illegally the opportunity to come out of the shadows and be a part of our country and our culture. That simply is not going to happen, because their loyalty lies with their former nation. And an amnesty giveaway is going to legalize their loyalty to their home country, not make them Americans.

Mexico and other countries promote illegal immigration to the United States with one understanding: You send your money back home to Mexico. And America is not home. Billions headed south last year to Mexico alone. Remittances from the United States were the second highest revenue for Mexico, right behind the sale of crude oil, beating out tourism.

So when the United States gets booed, people that don't understand this are a bit taken aback. Is it irony or arrogance? Most people don't bite the hands that feed them, especially when you have them eating out of your hand.

The administration recently said, ''Those determined to find fault with this bill will always be able to look at a narrow slice of it and find something they don't like. If you want to kill this bill, if you don't want to do what's right for America, you can pick out one little aspect of it.''

Although I respect the President greatly, I respectfully suggest he is in error. We cannot accept the narrow slice or the whole amnesty pie. We are not that much of a glutton for this pie in the sky.

Americans deserve better. They deserve real immigration reform that secures the borders with the utmost of urgency and an end to political preference policy for illegals, a policy that discriminates against American citizens and legal immigrants.

We need to end employment opportunities and social benefits intended and entitled to Americans and have legislation that puts the needs and benefits of Americans first.

Kowtowing to Mexico, the country that takes and takes from America but booed Ms. USA off the stage, is exactly what's wrong with this new Senate amnesty bill and this administration's position.

And that's just the way it is.

WAITING FOR THE NEXT BIG EVENT

The SPEAKER pro tempore. Under a previous order of the House, the gentlewoman from California (Ms. WOOLSEY) is recognized for 5 minutes.

Ms. WOOLSEY. Mr. Speaker, last month, despite my objections and many of my colleagues, Congress passed a bill to continue funding the occupation of Iraq. Now everyone is waiting for the next big event in the war, General Petraeus's report on whether the escalation, the surge, is succeeding. This report is due in September.

But with our brave American troops and innocent Iraqis continuing to die, we are remiss if we twiddle our thumbs and wait for September. We need to hold this administration accountable for its actions in Iraq, and we need to do it today, not 3 months from now.

So I want to go back to January 10 of this year, the night that the President announced his new surge policy in a speech to the Nation, to see if he is delivering on what he promised. On that night, he said, ''America will hold the Iraqi government to the benchmarks it has announced.''

But here we are, Mr. Speaker, 6 months later, and the Iraqi government has made virtually no progress on any of it's benchmarks. Even Lieutenant General Douglas Lute, our new war czar, expressed frustration about this in his Senate confirmation hearing. General Lute said, ''My assessment would be that the Iraqis have shown very little progress.''

Mr. Speaker, back on January 10, we were told that the surge would help the Iraqis carry out their campaign to put down sectarian violence. But the Pentagon's own report on the current situation, which was released last Wednesday, said that the violence continues to be driven by sectarianism. In other words, we've sent our troops to fight a civil war that has nothing to do with protecting America from terrorism.

Also, back on January 10, the escalation speech included these words: ''Our military forces in Anbar are killing and capturing al Qaeda leaders.''

Yet, Mr. Speaker, in the Senate hearing I mentioned a moment ago, Senator EVAN BAYH quoted a top CIA expert in saying that the American presence in Iraq is creating more members of al Qaeda than we are killing.

The President claims that he has the power to grab people off the streets of America, declare them enemy combatants and order the military to hold them indefinitely. But last week, a Federal Appeals Court ruled that, ''to sanction such authority would have disastrous consequences for the Constitution and for the country.''

The President says that he is a strict constructionist when it comes to the Constitution. But he has shown that he is not a strict constructionist, not a loose constructionist, but a non constructionist who simply ignores the Constitution.

It is time, Mr. Speaker, for a new policy in Iraq. We must fully fund the safe redeployment of our troops. We must guarantee the very best health care for our veterans. We must work with the Iraqi people and the international community to provide for the reconstruction of Iraq. We must look to diplomacy, not preemptive war, to help Iraq and its neighbors to achieve political solutions to the region's problems, and there must be no permanent American military bases in Iraq.

And America must rely, once again, on our most powerful weapons in the fight against terrorism, our Constitution and our democratic values.

And, Mr. Speaker, we must bring our troops home.

PROSECUTION OF FORMER U.S. BORDER PATROL AGENTS

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from North Carolina (Mr. JONES) is recognized for 5 minutes.

Mr. JONES of North Carolina. Mr. Speaker, as the Members of this House well know, in February 2006, U.S. Border Patrol Agents Ramos and Compean were convicted in a U.S. District Court in Texas for shooting a Mexican drug smuggler. They were sentenced to 11 and 12 years imprisonment, respectively, and today is the 153rd day since the two agents entered Federal prison.

What Members of this House may not know is that 10 years of each of their sentences were based on an indictment and conviction for a Federal crime that does not exist. The Federal crime they were convicted of does not exist.

The law that they were charged with violating has never been enacted by the United States Congress but rather was fashioned by the Office of the United States Attorney for the Western District of Texas, Johnny Sutton.

The law that the agents were charged with, 18 United States Code section 924(c)(1)(a) as enacted by Congress, requires a defendant to be indicted and convicted either of using or carrying a firearm during and in relation to the commission of a crime of violence or possessing a firearm in furtherance of a crime of violence.

However, neither Mr. Ramos nor Mr. Compean was ever charged with the specific elements of the crime. Instead, Mr. Sutton's office extracted from the United States Criminal Code a sentencing factor, discharging a firearm, and substituted that sentencing factor for the congressionally defined elements of the offense.

In this case, I can imagine how difficult it would be to obtain an indictment and conviction for ''using,'' ''possessing'' or ''carrying'' a firearm when the Border Agents were required to carry firearms as part of their job. That difficulty may well, very well, explain why this United States Attorney's Office unilaterally changed Congress's definition of a crime to a definition that would be easier to prove by the prosecution.

Any change in the elements of a crime amounts to the seizure of legislative authority by a Federal prosecutor. When this encroachment upon the legislative power of Congress was brought to my attention and to the attention of my colleagues, Congressmen VIRGIL GOODE and former Texas State judge, Congressman TED POE, we joined forces with the Gun Owners Foundation, U.S. Border Control, U.S. Border Control Foundation and the Conservative Legal Defense and Education Fund to file a friend of the court brief in the United States Court of Appeals for the Fifth Circuit Court.

The brief urges reversal of these unjust convictions and 10 year mandatory minimum sentences by spelling out how changes contained in two counts of the indictment against the agents are ''fatally defective'' because they fail to charge an offense as defined by the statute.

Mr. Speaker, many of my colleagues and the American people have been greatly concerned about the denial of due process of law to Agents Ramos and Compean. The American people must be confident that prosecutors will not tailor the law to make it easier to convict in a particular case. Federal prosecutors take an oath to enforce the law, not to make the law.

It is my understanding that the House Judiciary Committee will soon hold hearings to examine the prosecution of this case, and I want to thank Chairman JOHN CONYERS for his interest in investigating the injustice committed against these two Border agents.

I encourage the chairman and the committee to take a thorough look into the actions of the Office of U.S. Attorney for the Western District of Texas and its pattern of aggressively prosecuting law enforcement officers, including Ramos and Compean, former Border Patrol Agent Aleman and Deputy Sheriff Gilmer Hernandez. These are legitimate legal questions and concerns about this prosecutor's office, and they need to be answered.

And again, I thank the chairman of the Judiciary Committee for his interest and concern about justice to right an injustice.

□ 2000

HIGHLIGHTING THE COBB COUNTY SHERIFF'S OFFICE

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Georgia (Mr. GINGREY) is recognized for 5 minutes.

Mr. GINGREY. Mr. Speaker, I rise today to highlight the exemplary important work of the Cobb County Sheriff's Office. This Georgia agency has been screening County Jail inmates to identify and deport illegal immigrants. This is a hugely important effort. After these criminals serve their time, we need to deport them.

Many jailed illegal immigrants are incarcerated for crimes like rape, armed robbery and drug trafficking. We want to do more than simply get these criminals off our streets. We want, Mr. Speaker, to get them out of our country.

Six deputies with the Cobb County Sheriff's Office recently underwent specialized training with Immigration and Customs Enforcement to identify illegal immigrants in our jails. Cobb County is the first department in Georgia and indeed one of the first in the Nation to work with ICE on this initiative. They are setting a fine example for communities across America, and our cities will undoubtedly benefit from the widespread adoption of this program.

After all, our State and local law enforcement officials are our first responders in the fight against illegal immigration. They play a critical role in stopping criminal aliens from harming our citizens.

Here's how this new program works. Local law enforcement officials travel to Herndon, Virginia, to train with Immigration and Customs Enforcement. They get experience in immigration law, criminal law, document examination, alien processing, and cross-cultural communication.

These trained deputies then return home to their communities where they work with ICE agents to identify illegal immigrants in local jails by comparing fingerprints with ICE and FBI databases and interviewing prisoners.

The program may be new but it is already working. In the Cobb County jail alone, which holds nearly 2,200 inmates, law enforcement officials have identified 63 people of interest to Federal immigration authorities. That is 63 rapists, robbers, and drug lords that we can get off of our streets and out of our country.

Mr. Speaker, we know local law enforcement officials are often our front line of defense when it comes to identifying and removing illegal immigrants from our communities. As we look for solutions to the current illegal immigration crisis, we must empower our State and local officials and help them coordinate with Federal agents. And that is why I proudly supported an amendment last week to the Homeland Security appropriations bill. We passed that on the floor to support this new and promising ICE program so that we don't just provide funding to communities located within 100 miles of the southern border; otherwise Cobb County, Georgia won't have qualified.

Last summer I examined border security efforts along the United States-Mexican border, and during that trip I observed our Border Patrol agents loading up buses and planes with criminal illegal immigrants being deported back to their home countries. Now Cobb County is playing a vital role in this process, and I am incredibly proud of their efforts. The sheriff's office is helping rid our society of dangerous criminals who have no business being here in the United States.

Especially, Mr. Speaker, I want to recognize Cobb County Sheriff Neil Warren, Cobb County Police Chief George Hatfield, and the six Cobb deputies who went through the specialized training: Paul Harrison, Claudia Cross, Marco Cabrera, Olanda Palmer, and Paul Diaz. Their effort to uphold the rule of law is commendable, and I urge more local agencies to consider participating in this critical program.

Mr. Speaker, I ask my colleagues to join me in thanking the Cobb County sheriff's office for its commitment to getting dangerous, criminal, illegal immigrants out of our community.

THE IRAQ WAR

The SPEAKER pro tempore (Mr. KLEIN of Florida). Under a previous order of the House, the gentlewoman from California (Ms. WATERS) is recognized for 5 minutes.

Ms. WATERS. Mr. Speaker, last week President Bush defended his war in Iraq saying it would be a disaster if we left. Well, if the President doesn't know it by now, we already have a disaster on our hands.

Allow me to read a few headlines from the past week to give everyone a sense of how well the war is progressing:

The Washington Post, June 18, 2007, General Petraeus: ''Iraq 'Challenges' to Last for Years.''

New York Times, June 16, 2007, ''In Iraq Secretary Gates Says Progress Toward Peace is Lagging.''

New York Times, June 13, 2007, ''Violence Rising in Much of Iraq, Pentagon Says.''

MSNBC.com, March 17, 2006, ''Cost of Iraq War could surpass $1 trillion. Of course, the estimates vary but all agree price is far higher than initially expected.''

A Pentagon report released last week gave a grim outlook of the situation in Iraq. While the number of U.S. troops on the ground reached a record high as a result of the President's so-called

troop surge, violence in Iraq has continued to increase. In fact, since the surge was announced, 500 American troops have been killed. According to the report, much of the violence that plagues Iraq is attributable to ''sectarian friction and each faction is driven by its own political and economic power relationships.''

Further, ''Illegally armed groups are engaged in a cycle of sectarian and politically motivated violence, using tactics that include indiscriminate bombing, murder, executions and indirect fire to intimidate and provoke sectarian conflict.''

Simply put, Iraq is a full-fledged civil war.

The number of suicide attacks in Iraq has increased from 26 in January to 58 in March and April. Remember IEDs, that is, improvised explosive devices? Now insurgents are increasingly using a more advanced type of IED called EFPs, or explosively formed projectiles, to kill our soldiers. These new bombs are being used in rapidly increasing numbers and are extremely effective at piercing the armor of our Humvees, tanks, and troop transports, causing mass casualties. As of today, there have been 3,526 U.S. deaths; there have been 26,000 Americans wounded, some very serious; 60,000 to 100,000 Iraqi civilians have died; and there are over 1,000 attacks per week, on average, and steadily growing.

We have spent over $435 billion of taxpayer money. The total cost to our economy could be upwards of $1 trillion to $2 trillion.

It is time to face the facts. Bombs and bullets have not and will not bring us peace in Iraq.

In January, I, along with my colleagues BARBARA LEE and LYNN WOOLSEY, introduced H.R. 508, the ''Bring the Troops Home and Iraq Sovereignty Restoration Act of 2007.'' This bill repeals the authorization of force in Iraq, requires a complete withdrawal of troops within 6 months, and puts Iraq on a path to sovereignty and peace. This bill seeks to end the cycle of violence that has plagued Iraq since we began this occupation.

There is bipartisan opposition to the war in Iraq, and a majority of Americans not only think President Bush is doing a poor job handling the situation in Iraq, but a majority also support setting a timetable for withdrawal. Our constituents sent us a strong message in November and continue to demand an end to this war.

Mr. Speaker, I hope that we in Congress have the courage to bring this war in Iraq to an end.

DR. AL SIMONE

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from New York (Mr. KUHL) is recognized for 5 minutes.

Mr. KUHL of New York. Mr. Speaker, I rise today to speak about Dr. Al Simone, an outstanding individual in the community of Rochester, New York. Dr. Simone retires this month from the presidency of the Rochester Institute of Technology. He was RIT's eighth president, the eighth in 177 years.

Dr. Simone came to Rochester from a place where the weather is a little bit more predictable. He was the president of the University of Hawaii system and chancellor of the University of Hawaii at Manoa for 9 years.

Dr. Simone has led RIT to become the one of the Nation's leading career-oriented universities with 15,500 students from all 50 States and more than 100 foreign countries, 2,800 faculty and staff, and an annual operating budget of more than $490 million. RIT is now the tenth largest private university in the Nation in terms of full-time undergraduate enrollment. The endowment has climbed to more than $570 million during his tenancy.

Dr. Simone is a prolific writer and has written several books and numerous journal publications on the application of mathematics, statistics, and computers to economics and business. In fact, Dr. Simone is collecting data and information for a book right now on higher education, which he expects to write within the next few years during his retirement on the sunny shores of Keuka Lake.

Dr. Simone is a real trailblazer. He was the first American university president, for instance, to officially visit North Korea, Vietnam, and Vladivostock when these areas were closed to the United States except for cultural and educational exchange.

A native of Boston, Dr. Simone received his B.A. in economics from Tufts University and his Ph.D. in economics from the Massachusetts Institute of Technology. He has taught at Tufts, MIT, Northeastern University, Boston College, Boston University, University of Cincinnati, and the University of Hawaii.

The community will certainly miss Al's leadership and I know I will miss working with him.

Mr. Speaker, I hope you will join me in wishing him and his wife, Carolie, a long, happy, healthy retirement with their children and their grandchildren.

THE RED INK KEEPS GETTING DEEPER

The SPEAKER pro tempore. Under a previous order of the House, the gentlewoman from Ohio (Ms. KAPTUR) is recognized for 5 minutes.

Ms. KAPTUR. Mr. Speaker, the topic of my remarks tonight will be ''The Red Ink Keeps Getting Deeper.''

If we look at the trade procedure the Bush administration wants Congress to pass called Fast Track, we should know that it is shorthand for Congress blindly signing away its constitutionally granted duty to regulate commerce with foreign nations. That is right in the Constitution. Under Fast Track procedure, Congress loses any opportunity to negotiate, amend, or improve the Bush administration's misguided trade policy.

We have seen what happens when Congress hands the reins over to the executive branch. When we look at our soaring trade deficit and our ravaged middle-class communities, we see how Congress could have improved each one of the trade agreements we were forced to consider as a whole under what was called Fast Track. It is like a fast ball through here that you can't even amend.

The Commerce Department just released an example of the Bush administration's horrendous leadership on this issue. The first quarter account for 2007 is another $193 billion deficit in the red, which totals 5.7 percent of GDP, a total drag on economic growth in this country. And, in fact, this quarter's debt is larger than the last quarter of 2006. The red ink keeps getting deeper every single quarter.

Our national security is forced to take a back seat to foreign investment while workers lose their pensions and their health benefits or their jobs, and illegal immigrants scramble across our borders attempting to flee the destruction caused by our failed trade policies in those countries. This should not be happening.

When Congress reclaims our power to amend trade agreements, we can use trade policy in a manner to level the playing field, to help people and not just fan the flames of more corporate greed in the global marketplace.

Congress cannot accept Fast Track in any form. We must demand and create a new model for trade that has not just a logic but also an ethic. We must bring people back into the trade equation, not just investors.

Our trade policy touches people around the world, from middle-class Americans in the heart of this country to Mexican corn and bean farmers facing extinction come next January as some of NAFTA's provisions phase out for them. Our trade policy touches factory workers in China toiling for starvation wages.

We, as most powerful Nation in the world, must accept our responsibility to protect people from corporate greed and our own people from security risks. We cannot trust President Bush to defend our jobs. We have seen he has not been able to do that. And we cannot watch him dictate trade policies that Congress is blocked from amending. We have to take the responsibility given to us in our Constitution.

Instead of approving more lopsided trade agreements, Congress should fix our current situation. Trade should

create jobs in America. It should not exploit Third World workers. It should elevate, not reduce, America's image abroad. Congress should fund the North American Development Bank to support job creation in communities where jobs have been offshored and outsourced. And we should require our trade competitors to adhere to environmental standards. We should abolish child labor worldwide. We should stop labor trafficking. And we should fix our broken immigration system that is so tied to failed trade policies. A new trade model must be created that meets America's most principled values, democratic rights and justice for all.

Under Fast Track authority, however, Congress cannot even control our own floor schedule. President Bush will decide what policy we consider and when we vote on it. We simply can't accept that. Congress must reclaim its own power. Democrats must lead the way to a more sensible and ethical trade policy that brings prosperity to people here at home as well as around the world, restores our reputation abroad, and advances democratic principles, that's with a small ''d,'' respect for people.

The world has suffered at the hands of Bush administration trade policies for too long. I urge my colleagues to join me in opposing any more blank checks for this President or any President who tries to move a trade agreement through here on renewing Fast Track. Congress ought to reject Fast Track and we should stop making the red ink deeper.

□ 2015

GENERAL PETER PACE

The SPEAKER pro tempore. Under the Speaker's announced policy of January 18, 2007, the gentleman from Minnesota (Mr. KLINE) is recognized for 60 minutes as the designee of the minority leader.

Mr. KLINE of Minnesota. This evening, we have heard some talk about the war that we're engaged in, the fighting in Iraq, the fighting in Afghanistan, this long war against Islamist extremists that we're engaged in. And tonight I am very pleased I am joined by a number of my colleagues here this evening to talk a little bit about that military action, to talk about that war and to talk about the military leaders that we are so blessed to have in this country.

I think sometimes we sort of forget that there are people who have devoted their entire lives to serving this country and to providing exemplary leadership to our young men and women as they fight for us in Iraq and Afghanistan and around the world. We have some new officers in the lineup, and we will talk very briefly about those tonight, I suppose. We have a new commander of Central Command, Admiral William Fallon. We have, of course, General David Petraeus, named by the President to be the senior U.S. commander of the multinational forces in Iraq and confirmed unanimously, I might add, by the Members of the Senate. Lieutenant General Raymond Odierno, and other fine officers that are leading our young men and women.

I know some of my colleagues would like to talk about one of the officers who is going to be leaving that chain of command, the very fine Chairman of the Joint Chiefs of Staff, the first Marine Corps officer ever to hold that position, my good friend and a great American, General Peter Pace.

I would like to afford a few minutes to my friend and colleague from South Carolina who I know has some words he wants to say about my friend, Pete, and give us a little idea of what his biography is.

I yield to the gentleman.

Mr. WILSON of South Carolina. Congressman KLINE, thank you for your leadership tonight. And particularly I want to thank you for your family service, your service in the Marine Corps, your son's service, who is in the central front himself, having served in Iraq. We are very grateful for your family's service.

I am here tonight really indeed to point out the extraordinary service, 40 years of service, of General Peter Pace. I think it's extraordinary, and I hope the American people indeed look at this record of service.

The perspective that I am here is that I served 31 years myself in the Army National Guard, the Army Reserves. Really, the reason I served so long is because I have such great appreciation for the confidence and capabilities and the patriotism of the military of our country.

Additionally, I have the perspective of being a parent. I have four sons who are currently serving in the military of the United States. In particular, I am very grateful my oldest son served for 1 year in Iraq. I know firsthand of the bravery of our troops, the success of our troops in protecting America by keeping the terrorists and stopping them overseas. I am also grateful, I have a son who is a doctor in the Navy. We are very proud of his service, and his wife, and what they mean to our country.

Additionally, I've got a third son who is a signal officer who has served in Egypt with the Army National Guard, and a fourth son who has just joined the Army ROTC. He will be participating in the simultaneous drill program of the National Guard.

I give all my credit to my wife, Roxanne, for training these four guys. But I will point out that a reason that we have such faith in their service is because I have such faith in people like General Pace. I have entrusted my four sons to the leadership of the American military, which by every poll, every time it is done, I am afraid lawyers don't come out too well, politicians don't come out too well by standards, even the media suffers when it comes time to judge the level of perception of a profession, even ahead of the clergy is the military of the United States, and I believe they deserve it.

The final perspective I have as a Member of Congress. I have been here 5 years. I serve on the Armed Services Committee. The communities I represent, Fort Jackson, Paris Island, the Marine Air Station in Beaufort, the Beaufort Naval Hospital, but the greatest highlight that I've had is to visit with our troops overseas.

I have been to Iraq seven times. I have been to Afghanistan three times. I've visited probably 30 different countries. When we visit, we visit with the generals; we visit with the diplomats; we visit with the top American and foreign officials. But one of the real highlights is that we have the opportunity to go into a dining facility. And of course, they make it pretty simple for Members of Congress; they have a little flag identifying our home State. And we will go and we will find junior officers and enlisted personnel. And that's where you find out the extraordinary quality of the young people serving our country. Indeed, I believe it is the new Greatest Generation, people who don't whine, who understand that our Nation has been attacked. On 9/11, it was attacked. Beginning back in 1979, with the seizure of our embassy in Tehran, we have had multiple attacks until we came to 9/11/01. And we've learned a lesson. And these young people are protecting our country.

Indeed, it was just three weeks ago today that I was in Baghdad and had the great opportunity to meet again with General David Petraeus. I have great faith in his leadership and what he's doing, protecting American families by creating a level of stability in Iraq.

Additionally, I had the privilege of visiting with the 218th Mechanized Infantry Brigade in Kabul, Afghanistan. This is the Army National Guard of South Carolina being very ably led by General Bob Livingston.

I was in that unit, Congressman, for 25 years, so I know firsthand of the capabilities of the person serving that unit as they are training the Afghan police and training the Afghan Army. A sad reminder today with the heinous homicide attack on the Afghan police; 35 policemen were killed yesterday. It is a chilling but a sad reminder that, indeed, the police that are being trained in Afghanistan and being trained in Iraq, the armies being trained in both of those countries, they have been the primary focus of attack of the terrorists because we are making

progress in training people to provide stability in their own country.

Now, when I think of General Pace, it's really incredible that he has had a 40-year record of service. He graduated from the Naval Academy in 1967. He was sworn in as the Chairman of the Joint Chiefs of Staff on September 30, 2005. And what is particularly meaningful is that he is the first Marine to serve in this position and also the first Marine to serve as Vice Chairman——

Mr. KLINE of Minnesota. Will the gentleman yield? Could you say that again?

Mr. WILSON of South Carolina. And I knew this would get your interest, being the Marine, Congressman KLINE, that you are, and indeed, I want to commend you. If anyone ever doubts, I want to point out that you wear a U.S. and Marine flag everywhere you go, without fail, with your congressional pin. And if anyone mistakes the pin as the People's Republic of China, I want them to know that indeed it is the Marine Corps of the United States of America.

Mr. KLINE of Minnesota. I thank the gentleman.

Mr. WILSON of South Carolina. General Pace was born in Brooklyn, New York. He grew up in Teaneck, New Jersey. He holds masters degrees in business administration from George Washington University, attended Harvard University for the Senior Executives Course in International Security. He also is a graduate of the Infantry Officer's Advanced Course at Fort Benning, Georgia; the Marine Corps Command and General Staff College at Quantico, Virginia; and the National War College at Fort McNair in Washington.

In 1968, upon completion of The Basic School at Quantico, General Pace was assigned to the Second Battalion, Fifth Marines, First Marine Division in the Republic of Vietnam, serving first as a rifle platoon leader, and subsequently as assistant operations officer. He was later assigned to the Marine Barracks in Washington, DC, where he served a number of billets, to include Security Detachment Commander at Camp David, White House Aide, platoon leader and Special Ceremonial Platoon.

General Pace has held command at virtually every level and served in overseas billets in Nam Phong, Thailand; Seoul, Korea; and Yokota, Japan.

While serving as president of the Marine Corps University, then Brigadier General Pace also served as Deputy Commander of Marine Forces, Somalia, from December 1992 to February 1993, and as the Deputy Commander, Joint Task Force, Somalia, from October 1993 to March 1994.

After his assignment as the Director of Operations, (J–3) Joint Staff, Washington, DC, then Lieutenant General Pace served as the Commander, U.S. Marine Corps Forces Atlantic/Europe/South. He was promoted to General and assumed duties as the Commander in Chief, United States Southern Command in September 2000.

As the Vice Chairman from October 2001 to August 2005, General Pace served as the Chairman of the Joint Requirements Oversight Council, Vice Chairman of the Defense Acquisition Board, and as a member of the National Security Council Deputies Committee and the Nuclear Weapons Council.

General Pace's personal decorations include: Defense Distinguished Service Medal, with two oak leaf clusters, Defense Superior Service Medal, the Legion of Merit, Bronze Star Medal with Combat V, the Defense Meritorious Service Medal, Meritorious Service Medal with gold star, Navy Commendation Medal with Combat V, Navy Achievement Medal with gold star, and the Combat Action Ribbon.

General Pace and his wife, Lynne, have a son, Peter; a daughter, Tiffany Marie; and a daughter-in-law, Lynsey Olczak Pace.

Colonel Congressman KLINE, again, I want to thank you for bringing many of us together tonight to pay tribute to a great hero, an American hero who has served our country for 40 years, who has served the last 2 years as Chairman of the Joint Chiefs of Staff, General Peter Pace, a person that I know and respect; I know that the military respects. I just want to thank you again for your efforts this evening.

I yield the balance of my time.

Mr. KLINE of Minnesota. I thank the gentleman. I thank him for his comments, and certainly for his service and for the service of our sons. I know that the South Carolina National Guard is held up by the Wilson family, and we are grateful. I know that all the people of South Carolina are grateful to their service to the National Guard, and for your service in the Guard and here in Congress. And I know that General Pace appreciates your kind remarks.

Pete and Lynne Pace were next-door neighbors for Vicky and I when I retired from active duty in the Marines in 1994. He is not only a fine man and a fine officer, but a good neighbor.

I understand that we are joined now by my colleague from Missouri, who had some words that he wanted to share with us concerning General Pace's forthrightness; is that right? I yield to the gentleman.

Mr. AKIN. Thank you, Congressman KLINE. And thank you for providing this opportunity for a number of us to make several points.

The first that I would make would be to show a respect for General Pace for his 40 years of service. I have two sons who are graduates of the Naval Academy, one who is returning from his second visit to the Middle East as an officer and as a Marine, and another who is just going off to his basic school this July. And I have a third son at the Naval Academy who hopefully will be graduating in another couple of years, and he might also choose the Marines as well. So I have a respect for the Marines just from what I have learned from my own sons, and particularly as a Congressman, having watched and had a chance to observe General Pace's leadership.

We are here partly this evening, in talking on this subject, because General Pace is not being renominated by Secretary Gates and the President. And he is not being renominated primarily because of concerns about his political correctness. In fact, a certain prominent Democrat in the other body has criticized Pace because he is ''not in touch.'' Now, that is a significant concern to me.

My own personal background, while I was in the Army some, has been more in the business world. But any organization can atrophy if the organization makes an effort to fill the organization with yes-men, with people who don't have the courage to speak up and to speak their opinions.

Now, throughout America's history, we have had generals, some who don't even speak up very delicately, but do express their opinion and have had to pay a political price. And I think that history in many cases has shown that while what these men may have said may not have been popular in their day, yet it was accurate. I think particularly of people like General Patton, who, when he had finished his business of crushing Naziism, said, Let me after the communists and the Russians and the Soviets because they are no different than the Nazis. Well, looking back historically, we realize what he said was absolutely right, but he was not politically correct. He wasn't a yes-man.

But it's my opinion that the reason the First Amendment is the first amendment is because Americans appreciate somebody who will speak in a forthright, straightforward manner and can give their opinion respectfully, but still with some level of force.

□ 2030

I think that General Pace has done that and is now going to pay the price politically for not being a ''yes'' man or lining up with somebody's preconceived political notions. I think it is a sad day in America's history where we don't have more respect for the first amendment and have way too much respect for political correctness and trying to go along and get along and just be a ''yes'' man and keep everybody happy.

I think that one of the great things about our generals is that they do take a look at the details, they analyze the situation, and they say what is right, what is wrong, and what their opinion is. I think it is a shame that this general should be penalized for that particular situation.

I would be happy to yield back to my good friend, Congressman KLINE. I appreciate your giving me a chance to say that I think that our organizations need to have room for people who don't always necessarily agree. I think we are better Americans, we are stronger Americans, when we can look each other in the eye and say, I love you, brother, but this is my opinion on this subject.

Mr. KLINE of Minnesota. Again, I thank the gentleman for his service and his son's service and obviously the good parenting job that you have done, having your sons go into the Marine Corps. My son went into the Army. I have got to tell you, I am so proud of him sometimes I just bust out, but occasionally I wonder where I may have gone wrong in that upbringing thing. But I know you are proud of your sons and I of mine and JOE of his and all of our sons and daughters who are serving so well and so bravely in this war and in wars past.

I want to just remind my colleagues and those who may be following this discussion tonight what is at the core of the fine men and women who are leading our men and women into combat, and I go back to the very, very famous words of General Douglas MacArthur after he retired and he went back to West Point, his alma mater, and gave a speech. In that speech, I am just going to read a paragraph of it here, he said some words that strike to the core of these men and women that we are talking about tonight. This was back on May 12, 1962.

General MacArthur said, ''For all eyes and for all time, it is an expression of the ethics of the American soldier. That I should be integrated in this way with so noble an ideal arouses a sense of pride and yet of humility which will be with me always.

'' 'Duty,' 'Honor,' 'Country,' those three hallowed words reverently dictate what you want to be, what you can be, what you will be. They are your rallying point to build courage when courage seems to fail, to regain faith when there seems to be little cause for faith, to create hope when hope becomes forlorn.''

I think it is important for us to understand, and a little bit later this evening I am going to talk about some of those values and some of the fine young men and women who go to these service academies and provide the outstanding leadership that we have.

Of course, tonight we are talking about that leadership and quite a bit about General Peter Pace, the first Marine Corps Chairman of the Joint Chiefs of Staff and the man who is going to be retiring here in the coming months after he has served us so well in so many years.

I am joined now by my friend and colleague and classmate, I guess, we came to Congress together in the 108th Congress, Dr. PHIL GINGREY.

I yield to the gentleman.

Mr. GINGREY. Mr. Speaker, I thank the gentleman for yielding, my friend from Minnesota, not just Representative JOHN KLINE, but Colonel JOHN KLINE of the United States Marine Corps. Representative KLINE, you mentioned a number of great leaders. I consider you among them.

It is fitting that we do this during this hour tonight to pay a special tribute to General Peter Pace and General Petraeus, Admiral Fallon and General Odierno, all of those you have mentioned. This is our chain of command. These are the brave men and women that we talk about, as you just referenced, when we go to those service academy days and we look at those youngsters in the 10th or 11th grade and they are with their parents and thinking about a service academy. And I am saying to them, as I am sure my colleagues tonight in this colloquy have done, you say, ''You know, young man, young lady, you could be the next Chairman of the Joint Chiefs of Staff or you can be the Central Commander.''

It is just when you look and you say that, you want to feel that they know that they are going to be respected, and that Members of Congress are not going to denigrate them in a public way.

I think that is a very, very disappointing thing that has been occurring, Mr. Speaker. In fact, a Member recently was quoted as saying that this Member felt that General Pace was guilty of dereliction of duty because of his support for the Bush's Iraq policy.

Now, President Bush, like him or not, is the Commander in Chief, and if General Pace did not support the Commander in Chief, then that, I think, Colonel KLINE, you can explain it better than I can, you talk about a dereliction of duty, but I am proud to be here tonight.

I thank the gentleman for giving me a little bit of time. I know we have other Members who are colleagues on the Armed Services Committee. We have already heard from a couple of them who are veterans and who have sons that are serving. I wish I could say that I was a veteran.

So I am very proud of my colleagues. I am proud of these leaders of our military. Especially I want to say to General Pace, Mr. Speaker, you know, one of my favorite country songs by Garth Brooks is ''Some of God's Greatest Gifts Are Unanswered Prayers.'' If the General was praying to get reconfirmed as Chairman of the Joint Chiefs of Staff, maybe this will be God's answer to him: ''General, you have served 40 years. You are a four-star general. You have done a great job for this country, and we salute you.'' Tonight I want to salute General Peter Pace.

I yield back to the gentleman from Minnesota.

Mr. KLINE of Minnesota. Mr. Speaker, I thank the gentleman for his kind remarks and for his service here. You have been a great colleague and a great champion for our men and women who are serving so bravely and so well all around the globe. It is not just Iraq, as my friend knows, and here shortly I will be recognizing another colleague to talk about this threat that we face. But first, I want to recognize my friend and colleague on the Armed Services Committee and a great American himself, the gentleman from North Carolina, Mr. HAYES.

Mr. HAYES. Mr. Speaker, I thank the colonel for yielding. I appreciate Congressman KLINE for his diligence in bringing this important matter to the floor. You and I have been friends for years. I have been here a little longer, but I say without reservation that probably the main motivation that you and I serve, aside from our specific constituents in our own districts, is our love for the military and our desire to do anything and everything we can to support them at all levels of service.

I represent Fort Bragg, Pope Air Force Base, Joint Special Operations Command, U.S. Army Special Operations Command at the epicenter of the universe in Fayetteville, North Carolina. And as I have spent time with these young men and women in all parts of the world, I am continuously astounded, amazed, and incredibly appreciative for what they do every day and every night of the year to keep us free. I say that simply as a little bit of a background to pick up on what Colonel Wilson and Dr. GINGREY have said in tribute to General Peter Pace.

For 40 years, Pete Pace has absolutely signified, has identified, has personified, the greatest qualities of the American citizen-soldier-marine that anybody could absolutely personify. He served in virtually every theater for 40 years. He has exemplified Semper Fi. He has been faithful beyond belief to our country. He would still be serving, were it not for political correctness and cheap-shot politics, that has unfortunately become a part of what we do.

I think General Pace said it better than anyone. When given the opportunity to resign, he said, ''Why would I leave my men on the battlefield? If you tell me my job is done, then my job is done.''

General Pace, your job has never been done. It will never be over, because the memory of your service will be extremely strong in all of our minds.

Colonel, I would like to add a few more remarks. I feel it is highly inappropriate that the Senate majority leader would make disparaging remarks about General Pace and General Petraeus, the commander of our troops in Iraq and the Chairman of the Joint Chiefs of Staff.

Mr. Speaker, General Petraeus and General Pace have had a tough job, and now they should not be fodder for political gain with a group of left-wing liberal activists, or anyone else for that matter. Gentlemen, scholars and warriors, they have devoted their lives to serving our Nation, and have done it well.

What is most puzzling is that the Senate majority leader put his endorsement behind General Petraeus and trusted him to carry out our objectives in Iraq when he was confirmed on January 26 of this year. Obviously he felt General Petraeus was more than competent when he voted to confirm him.

Mr. Speaker, I don't think anyone is content with the existing situation in Iraq, neither General Petraeus nor General Pace. General Petraeus, the commanding general, has cautioned it is too early to judge the success of Baghdad's security and stability. He informs us that the new security effort is just beginning to reach the full number on the ground, because they still have an additional brigade just coming into Iraq, General Petraeus is now in his third tour of duty in Iraq.

Mr. Speaker, the majority leader and others have visited troops serving as part of Operation Iraqi Freedom. I have been there. I think it is good that lawmakers see the situation firsthand. But there is real arrogance in saying that someone with a commander's-level experience and General Pace's experience is out of touch with the situation in Iraq.

As I said, I have visited Iraq many times and recognize General Petraeus as a military commander and as the expert he is on this issue. As he makes determinations regarding the security situation in Iraq, I will ask tough questions. If you are going to declare that he is out of touch or incompetent, then you have already made up your mind. You have already determined the outcome is going to be labeled a failure.

Mr. Speaker, what message are we sending our troops when the leadership of the other body has already declared that their effort in this new security strategy is a failure before they have really begun?

The 82nd Airborne from Fort Bragg in my home district is currently deployed to Iraq as part of the troop surge. These servicemembers and others are there at the tip of the spear. It is time for everyone to put partisan politics aside and stand together in solid support of our men and women in uniform.

General Pace has had an incredible, distinguished career, serving in every capacity, and he deserves much better. His record merits thanks and a second term as chairman. Instead, he becomes another victim of the campaign of personal destruction.

General Pace, thank you for Semper Fi. You have always been faithful.

Nobody wants their troops to return home sooner or more safely than I do. They should not stay in Iraq one day longer than necessary. While we have soldiers on the ground fighting the war on terror for us over there, we should have no patience for cheap-shot political gamesmanship on this critical national security issue here at home.

Colonel Kline, again, thank you. General Pace, thank you, and Lynn, and your family. We are ever grateful for your service.

Mr. KLINE of Minnesota. Mr. Speaker, I thank the gentleman for his words and for his strong support of our men and women in uniform. I know the people down in North Carolina are very proud to have you serve. There is no greater champion for our Special Operations Forces than you are and for all those fine soldiers down there, and I know that General Pace appreciates your support. So I thank the gentleman for joining us this evening.

Mr. Speaker, I was thinking about the kind words that have been said tonight about General Pace. I certainly add to those.

I mentioned earlier that I thought that General Pace was a fine man and a fine marine and a fine commander and a great neighbor when he and Lynn lived next door to Vicky and I down at the Marine Base at Quantico. I just have to share another story with my colleagues standing here.

There was another time when General Pace and I were neighbors, and it was not such a nice location as the Marine Base at Quantico and the fine quarters there up on the hill.

We were serving together in Mogadishu in 1992 and 1993 in the rubble of that country, in some pretty tough times and bad weather and bad conditions and starving people. We had some folks who were intent on shooting each other and shooting us.

□ 2045

I remember going into the building one time and General Pace was sitting there, sort of an old, bombed-out room of the Embassy.

I said, ''General, how is it going?''

He said, ''We are here, we are serving our country and we are in the Marines.''

He was a fine friend and fine neighbor, whether he was in the idyllic hillside down in Prince William County or bombed-out rubble in Mogadishu. You couldn't have a finer man with you. I am very proud to have known him and served with him, and I am very grateful for his many years of distinguished service, living by those ideals we discussed earlier.

There are some more commanders that we want to refer to later tonight, but we want to put this in the context of this terrible war we are fighting. We are fighting an evil and adaptive enemy, and I yield to the gentleman from Tennessee (Mr. WAMP).

Mr. WAMP. Colonel, it is an honor to join you tonight and my colleagues on the floor. Anytime I have the privilege to stand and honor our men and women in uniform, I try to begin with what John Stuart Mill said about war. He said, ''War is an ugly thing, but not the ugliest of things. The decayed and degraded state of moral and patriotic feeling which thinks that nothing is worth war is much worse. The person who has nothing for which they are willing to fight, nothing which is more important than his own personal safety, is a miserable creature and who has no chance of being free unless made and kept so by the exertions of better men than himself.''

Those better persons that Stuart Mill referred to are the people we rise tonight to honor, the men and women in uniform of our Armed Forces.

They understand from time to time it is necessary for people to put themselves between a threat and our civilian population, and they know that freedom, every time it has been extended from one generation to the next, it has been by those people who have been willing to put themselves and their lives, everything they have, their whole measure, between the threat and our civilian population.

Tonight, Colonel, I come to the floor to talk briefly about this threat because, unfortunately, the conversation revolves around one theater in this war and that is Iraq. We know mistakes have been made. We know it has not gone as well as we would have liked. Wars are that way. Stuart Mill said it is an ugly thing.

I don't know of a war that has been perfectly executed. I know that the march to Baghdad was perfectly executed, but I know that intentionally the insurgents have wreaked havoc wherever they could, from bombing the Samarra mosque which initiated the last 16 months of internal strife within Iraq, by design, knowing that that would test our will to see if we were a ''paper tiger'' or if we were the strong and determined United States of America.

I think a lot of people forget who it is that threatens freedom-loving people all around the world. They are called the jihadists, the Islamists, the radicals within Islam. The problem here is this is not just a religious issue, it is a political agenda. The call is for a Shariah, global Islamic rule. That's the truth. Read. I would encourage people to read ''Hatred's Kingdom.'' Read ''America Alone.'' Read ''Looming Towers.'' Read ''While Europe Slept.'' Read ''Londonistan.'' Read ''Epicenter.'' Read ''Knowing the Enemy.'' You will understand the history of how we got where we are.

One slice, the Wahhabi movement, the most radical out of the Saudi Arabia Sunni sect. A man named Sayyid Qutb came to the United States about

the time I was born in the late 1950s, was educated at Northern Colorado State University, and went back and began to indoctrinate the Wahhabi sect that western liberalism, self-determination, freedom, would create apostasy and ungodliness and it must be stopped.

One of his lieutenants was Osama bin Laden. One of the people that he taught at university was Osama bin Laden. These things didn't happen by accident. For years this has been brewing. It is a real threat.

Unfortunately, the left has a propaganda campaign in this country to cause people to believe this is all just Iraq, if we would just leave Iraq, if we had never gone we wouldn't have a problem, or that life would just return to normal or that everything would just be okay. It is just simply not the case. We were not in Iraq before September 11. We weren't in Iraq before 1993. They hit us over 40 times since 1979. You have to study the history of it all.

When the Wahhabis took Mecca in the late seventies, the Saudi Arabia Kingdom made a deal with them that they would start spending money in this country.

Mr. KLINE of Minnesota. I couldn't agree with you more in your explanation of what we are up against; but it strikes me the differences we hear on the floor of this House. This evening some of our colleagues were saying we have to get out of Iraq now. We have to end the war. If we bring our troops tomorrow, say they, we will end this war. And presumably, then, everything will be fine. And that simply doesn't track with the history that the gentleman is describing. It does not describe the enemy that was willing to hijack planes and fly them into buildings and kill women and children. Every day we see the stories in Baghdad of people blowing up women and children. Our just bringing our troops home doesn't, wouldn't, couldn't, signal the end of this war and of the determination of that enemy. It strikes me the difference that we see in this body.

Mr. WAMP. The words we hear in Washington run almost in denial of the words of our enemy, of Zarqawi when he was still alive, of Zawahiri about expanding the caliphate, reestablishing the caliphate, from Morocco to Indonesia, this huge part of the world, to come back with Islamic rule. And this is dangerous because they don't believe in a theocracy as we do. They don't believe in pluralism. They don't believe in the freedom of religion. We believe everyone should have the right to worship as they please. This is a Shariah. This is Islamic law they are calling for. This is Islamic rule they are calling for, and this is where politics, the military and religion all come together. And we didn't do that, they are doing it. That's the truth.

Frankly, the left has misled and twisted and distorted and run a PR campaign that is driven by politics, denying even the weapons of mass destruction realities. Hans Blitz said, Where did the 8,500 liters of anthrax that we knew were in Iraq go? Two tractor-trailer loads. Probably Syria.

I have news for you, those are weapons of mass destruction. For people to say over and over again there weren't weapons of mass destruction in Iraq is one of the greatest lies ever told in this country.

He gassed his own people. They came running out with their eyes bleeding out of their face. Weapons of mass destruction were in Iraq. The threats were real. Over half the Democrats of the United States Senate voted to remove Saddam Hussein by force, almost half the Democrats in the House voted, and now it is convenient to say we should retreat, we never should have gone. This was a misguided war.

These men and women in uniform, they know that these threats are real and we have to stand up and face these threats. I pay tribute tonight to the Guard and Reserve from my State, the 181st where my nephew is at Fort Bliss training to go to Iraq right now. And the 278th that just came back, the might battery of the Marine Corps Reserve; Colonel Brett Hale who just commanded the Dragonslayers in Iraq for a year, my constituent, my patriot, my hero, who says in the public square in Chattanooga, Tennessee: I have been there and I have seen what we are doing. I know that it is important.

These are the people who have been. These are not the people at home saying things about the ones who have gone.

Eight brave men from my district have given their life in defense of our freedom; and when some people say they have died in vain, it makes me angry because they didn't die in vain, nor has any patriot who has ever given their life in defense of freedom for this country died in vain. Freedom comes with a huge price, and these men and women are willing to put their life on the line for us, and we come to the floor tonight to honor them so they know we stand behind them.

And there is widespread bipartisan support for our troops. But our troops are in harm's way on our behalf. You can't say they shouldn't be there, we are not for them; and then say, oh, we are for them. It is a paradox. It is just wrong-headed sometimes for the leader of the United States Senate to say the war is lost while they are in harm's way fighting for what they believe in. They know these threats are real.

We can leave Iraq tomorrow and this threat is not going away. This threat is a greater threat to freedom in the world than Nazi Germany ever was. It is growing all over the world. Read these books. If you haven't read to understand the threat, there is no way you could be there to know what is happening in Europe and all across the country. The radical elements of Islam have infiltrated through the mosque and trained people up all over the world. That is the truth. And they are in this country. Nobody wants to hear it because it is not politically correct, but that is the truth. I hope, I hope that God showers us with his grace so we don't get hit hard again like we did on September 11, but the threats are real.

I come to the floor tonight and say ''thank you'' to the men and women in uniform on our behalf. All of them. We came to honor General Pace tonight, but every one of those Guardsmen and Reservists whose families didn't know that they were going to have one or two or even three deployments, thank you families for allowing your son or daughter or husband to go, or wife to go, on our behalf.

Mr. KLINE of Minnesota. I thank the gentleman very much for his insight and certainly his passion on this issue. I, too, want to thank all of the men and women in uniform. And certainly we are here tonight talking some about the Chairman of the Joint Chiefs of Staff, Peter Pace, who will be retiring this fall, but we are also here to talk about the other leaders and the values that are at their core.

Minnesota is like other States in the Union. We have members of our National Guard who have deployed, and deployed again in some cases. We have 2,600 members of the Minnesota National Guard serving in Iraq now as members of the Red Bulls, and we are so proud of them and looking forward to them coming back this summer. The sooner the better.

That is an issue that has been mentioned by Members on both sides of the aisle that there have been mistakes made, and there certainly have. One of the early mistakes was not building up the size of the active forces and relying so heavily on these men and women in the reserve component, the reserves that the gentleman from Tennessee mentioned, and the members of the National Guard from all over having to go, having to leave their civilian jobs and leave their families and go and serve, and they do so willingly and bravely and well. And then they come back and have to resume their civilian lives, and we have to do a better job of reintegrating them in this body. We need to not let up.

But I want to thank you, Mr. WAMP, for coming down here and helping us understand what it is that we are fighting. You put it so well.

I know the gentleman remembers way back when the 9/11 Commission came out, and in that report they said we are fighting Islamist extremists. They didn't say we were just fighting al Qaeda. Certainly we are fighting al

Qaeda. And it seems so long ago now, and as you pointed out, it is even clearer now that this enemy that we are fighting is very, very determined. It is the jihadists in that moment that are at the core of this, and they are not going to quit.

□ 2100

America's a great country, greatest in the world with great people. But we're an impatient people, and it's difficult; no, it is impossible for us to understand what's in the minds of people who are not only willing but apparently eager to strap bombs to children and blow them up and kill innocent, innocent men, women, and children in the name of their cause and reestablishing that sharia law and that caliphate and then moving on to the world.

And so like you, I am just grateful for the men and women in uniform and for all they have done and for their leaders. And before we wrap up here this evening, I want to mention briefly some of the other leaders that we don't sometimes talk so much about, but they are part of this fight, and they're an integral part.

We just got a new commander of Central Command, Admiral William Fallon, a new leader, will bring new ideas and a new face. We've been ably led in the past, but it's important sometimes that we get a change of face and a new idea, get a new team sometimes. And Admiral Fallon is bringing some new insights into this fight.

He was a naval aviator, a graduate of Villanova University in 1967, came through the Naval ROTC program, as I did. I have a lot of good things to say about the service academies. I think they do a terrific job, but there is no question that we get fine officers, men and women, who come through our other commissioning programs like the Naval ROTC program.

Admiral Fallon served as an aviator in Vietnam, has had a very distinguished career. He is going on now to take overall command of everything in Central Command which, of course, includes all of Iraq and the surrounding countries, and we're glad to have him.

General David Petraeus has been mentioned this evening, a really fine officer, graduate of the West Point Military Academy, has a PhD., very distinguished career. I've had the pleasure of sitting and talking with General Petraeus on two previous trips to Iraq. He was the commander of the 101st Airborne Division and Operation Iraqi Freedom One, and when I went over there, my first trip to Iraq, he was the commanding general up in Mosul. I had a chance to go and talk to him, and I was impressed then with his intelligence and his determination and his leadership.

What a fine job the 101st did, not only in winning the initial combat but in starting to establish some local government and progress amongst the people of Mosul. And I thought at the time, what a fine officer, and all my colleagues who traveled over there, Republicans and Democrats, came back with glowing reports of General David Petraeus.

It was later my son became a member of the 101st under a different commander and has gone to Iraq and served for a year and come back and served well, and General Petraeus left that division in good shape.

General Petraeus went back to Iraq and served as the man in charge of training the Iraqi security forces, and so he was able to see firsthand what the difficulties were and what we needed to do there. And then he went on to become probably the Nation's foremost authority in unconventional warfare, ideally suited to his job. And so when the President nominated him to be the senior American commander in Iraq, he was unanimously confirmed by the United States Senate.

And under him is Lieutenant General Raymond Odierno, another fine officer with previous service in Iraq and a graduate of the United States Military Academy. All of these officers, too many awards and decorations to name.

My point this evening is that we are ably led by fine men who hew to an ethic of, as General Douglas MacArthur said, ''Duty, Honor, Country,'' but the core values seen at the Naval Academy and the United States Marine Corps of honor, courage, commitment, all of these men exemplify those core values, and they provide firm, steady, well-informed leadership to the men and women who serve us so well in all the corners of the world. And they're doing a good job.

I just want to share with you a couple of quotes that I've got here about things that are going on in Iraq. Goodness knows we see plenty of bad news, and there is certainly some to share. And every time there's an explosion and our soldiers are killed or wounded, it pains us deeply. And when civilians are killed, it's a tragedy. But we're fighting against an enemy that is fierce and determined, as my colleague Mr. WAMP from Tennessee outlined so well.

This is a tough enemy and we need tough soldiers to fight them, and all of us recognize that you cannot win this only militarily, that you need economics and you need politics and you need diplomacy. And I would say that these leaders that we've talked about tonight, Admiral Fallon, General Petraeus, General Odierno and certainly the Chairman of the Joint Chiefs of Staff, General Peter Pace, understand that very well. But they're attending to the first order of business first. They want to make sure that our men and women are well-led. They're fighting to win. We in this body, my colleagues, need to make sure that we're giving them every chance to win.

And I just notice some quotes that have just been in the news in the last couple of days. U.S. Ambassador Ryan Crocker says, ''It is noteworthy that violence is down in the two areas where the surge is focused, Anbar and Baghdad.''

And our friend from the other side of the Capitol, Senator JOE LIEBERMAN says, ''Our troops have succeeded in improving security conditions in precisely those parts of Iraq where the surge has focused.''

We can't win it all in a day. It's going to be a long fight. The men and women serving and fighting understand this. We need to understand this and make sure that we are, in fact, being true to ourselves and true to them.

I want to share just a brief story about the fine leadership that we have, not just these men that we've talked about tonight, but the fine young men and women who are stepping up to lead our Armed Forces today.

One of the great things we get to do as Members of Congress is nominate these fine young students to go forward to the academy. We're always thrilled when one is selected to go, and the joy that they have and the pride that their families feel is certainly moving.

In my first year here as a Member of this body, my niece graduated from the U.S. Military Academy at West Point. Vicky and I went up for several days of ceremonies and to share with my sister and brother-in-law and nieces their joy and pride in my niece's accomplishment.

She, by the way, now Captain Stroecker, is serving in the United States Army. She served a year over in Kuwait. She served in Germany, and she's the kind of officer that makes us proud.

But while we were there at West Point, we were surrounded by these young cadets, some of them just getting ready to be commissioned. And we were there when the second lieutenants' bars were pinned on, but I remember sitting with Vicky in the audience and witnessing a ceremony that I found to be very moving. It was a very impressive thing to watch.

This is a ceremony where the graduating class turns over command, turns over command to the brigade, to the rising seniors, the juniors rising to be seniors, and you see the long gray line march out in that ceremony. Movies are made about the long gray line, stories written, and it's moving to watch it, and they march out, and they pass command from one class to the next.

And I remember thinking as that ceremony was going on and looking at those fine, fine young men and women, I remember thinking, no wonder, no wonder that the United States has the finest Armed Forces in the world and no wonder that we're the best we've ever been, with all apologies to the

Greatest Generation, my father's generation, an Army World War II veteran, but today's Army and today's Marine Corps and Navy and Air Force and Coast Guard are the best they have ever been, all volunteer, all eager, all determined. They understand that enemy that my colleague, the gentleman from Tennessee, was describing. They know that what they're doing is important, that without their success we are in great danger.

But as you look at those fine young men and women and when you are there, when they move on to become second lieutenants, you just can't help but notice that that's the reason why our men and women in uniform today are led by very, very fine leaders.

Well, I see that we're nearing the end of the time for this Special Order. I'm sure there is more to be said about the fine men and women who are leading our military, and that's what we were about this evening, to talk a little bit about the conflict we're involved in, the importance of that leadership and the people who are leading and certainly to talk about General Peter Pace, Chairman of the Joint Chiefs of Staff.

Pete, I think it was my colleague, ROBIN HAYES, who said, we love you, and we thank you, and we wish you all the best. And I know that sometimes you thought about these words, I certainly have over the years, President Ronald Reagan said way back in 1985; he said, some people spend an entire lifetime wondering if they made a difference in the world, but the Marines don't have that problem. And Pete Pace has never had that problem. He has been a great leader. He is a great leader. We're looking forward to his leadership in the closing months of his tour as the Chairman of the Joint Chiefs of Staff. We thank him for everything that he has done, that he is doing and that he is going to do.

TRIBUTE TO RUTH BELL GRAHAM

The SPEAKER pro tempore. Under a previous order of the House, the gentlewoman from North Carolina (Ms. FOXX) is recognized for 5 minutes.

Ms. FOXX. Mr. Speaker, I rise today in remembrance of Ruth Bell Graham, wife and confidante of the Reverend Billy Graham. Ruth Graham died last week at the age of 87, having lived a rich and selfless life of service.

She epitomized the faithful wife and mother and was a close spiritual adviser who probably did more than any other human being to make possible the global ministry of Billy Graham. I doubt whether we exaggerate when we say that Billy Graham could not have been the man he is known as today without the unwavering support of his wife.

While she may not have claimed much of the spotlight in his life, she raised a family that to this day is having a tremendous impact on the world.

Reverend Graham paid her the best tribute. He said that Ruth Graham was ''the most incredible woman I have ever known.'' And when asked to name the finest Christian he had ever met, Billy Graham would always say, ''My wife, Ruth.''

In tribute to her, he said that, ''She was a spiritual giant, whose unparalleled knowledge of the Bible and commitment to prayer were a challenge and inspiration to everyone who knew her. No one else could have borne the load that she carried. She was a vital and integral part of our ministry, and my work through the years would have been impossible without her encouragement and support.''

Despite her declining health in recent years, she always placed her husband and family before herself. She gladly accepted a role in the Graham family that involved offering support, prayer and encouragement. Never one to clamor for the public eye, Ruth nonetheless was a vital part of Billy Graham's ministry. She was a bulwark against the demands of the endless public involvement of Billy Graham's many responsibilities as a worldwide evangelist.

Ruth Bell Graham was born in China in 1920 to her medical missionary parents at a Presbyterian Hospital far north of Shanghai. She spent her childhood on the mission field, and sensed a calling to serve God and give her life to spread the gospel.

Ruth connected with her eventual home in North Carolina when she completed high school in Montreat, North Carolina, while her parents were home from China on furlough. She would later enroll in Wheaton College where she met her future husband, the fervent evangelist hailing from Charlotte, North Carolina.

After no small internal struggle over her desire to become a missionary, Ruth decided to invest her life in the mission of evangelism that so captivated Billy, and they were married in Montreat on August 13, 1943.

As Billy Graham's responsibilities as an evangelist continued to grow, Ruth and Billy moved to Montreat near her parents. Here, Ruth would raise a family of five children strong and stand behind the man who was preaching to millions of people across the world.

Ruth was a woman who lived the written word and treasured the Bible. She enjoyed assisting her husband as he wrote sermons and was an accomplished author herself. Over the course of her life, she would author or coauthor more than a dozen books.

She also did not hesitate to start ministries of her own. Always concerned with reaching out to those in need, whether her local community or the global community, Ruth Graham created the Ruth Bell Graham International Children's Health Fund to help the world's neediest children and helped create the Ruth and Billy Graham Children's Health Center in Asheville.

Franklin, their son, founded Samaritan's Purse Ministry which is based in Boone, North Carolina.

Ruth enabled and freed her husband to concentrate on his evangelistic calling. When he needed someone to turn to, Billy Graham knew that he could turn to her for counsel, encouragement and an intellect steeped in learning the scripture.

Our thoughts and prayers are with the Graham family today as they mourn the passing of a peerless wife, sacrificial mother and faithful friend. May her memories serve to remind us of the profound meaning of a life given in service to God and family.

□ 2115

FAST TRACK TRADE

The SPEAKER pro tempore. Under the Speaker's announced policy of January 18, 2007, the gentleman from Maine (Mr. MICHAUD) is recognized for 60 minutes as the designee of the majority leader.

Mr. MICHAUD. Mr. Speaker, I come to the floor this evening to talk about trade, Fast Track, and what it's doing to this country.

As a former millworker that worked over 28 years at Great Northern Paper Company, I know firsthand that the trade deals are crippling manufacturing in the State of Maine. We have lost over 23 percent of our manufacturing base alone since NAFTA came into effect.

But it's more than just losing jobs. You're losing the identity and the community as well. We had certain labor market areas in the State of Maine that had over 33 percent unemployment rate. A lot of small businesses went under because the anchor of the community went under, it filed bankruptcy. The high school, senior class, was not sure whether they would be able to graduate from high school because the mill paid about 80 percent of the tax base. They hadn't paid their taxes, and the accreditation was in jeopardy. Alcoholism, divorce rates, people were filing bankruptcy because of trade.

You can go anywhere pretty much in the Second Congressional District in the State of Maine, and you'll see a lot of empty factories that are no longer there. You'll see factories but you will not see the number of vehicles in the mill yard because of machines being shut down.

It's because of our failed trade policy. We have to change the trade policy. We have to make sure that when Fast Track is up at the end of this month, that we not renew Fast Track. I think

it's incumbent on each Member of Congress to look at these trade deals and have the ability to amend the trade deals. I don't think we should be a rubber stamp to the United States trade representatives, and that's what we are, rubber stamps: Either vote ''yes'' or ''no,'' and that's wrong.

I have two colleagues here this evening who have really taken on this trade issue. They know firsthand from their own district what trade means to their constituencies. They know what it's done to the United States of America, as a whole. We have lost over 3 million jobs. We have to do better. We must do better.

I think the last election, when a lot of candidates were talking about trade, they are ready, the American people are ready for a new direction. It's my hope that this Congress will give a new direction, will change that flawed trade policy, the flawed trade model.

I would like to recognize Congresswoman LINDA T. SÁNCHEZ from the west coast of California, who has started the House Trade Working Group that also Congresswoman BETTY SUTTON has been very active on, and it's an issue that is very important to all of us here in our constituency.

I recognize the Congresswoman from California.

Ms. LINDA T. SÁNCHEZ of California. Thank you, Congressman MICHAUD, and I also thank BETTY SUTTON for being here this evening to talk about the President's Trade Promotion Authority and its effect on working families. Mr. MICHAUD and I cochair the House working group, and we have been working very hard this year to emphasize the impact that our current failed policy has on average households.

We are here because we believe that our trade policies should ensure a fair shake for American working families, not just for those who sit in corporate board rooms. We have already spoken many times in this House about the flaws in the new trade deal recently announced by the administration. This new deal, which applies to the Bush negotiated Free Trade Agreements with Peru and Panama, is an improvement over past FTAs, but it still doesn't give American families much to be excited about, quite honestly.

Despite additional labor and environmental provisions, these agreements are based on the NAFTA trade model, the same failed NAFTA model that has hurt the American family for the past decade, the same NAFTA trade model that didn't bring about the jobs or the prosperity that we were promised, the same NAFTA model that didn't stop the immigration flow from Mexico, the same NAFTA model that hasn't been able to assure that our trading partners uphold the strong labor and environmental standards that we do here in the United States, thus putting our workers at a competitive disadvantage.

If the long-sought-after labor and environmental protections the administration promises to include in the Peru and Panama FTAs are no stronger than those that we were promised in NAFTA or its cousin CAFTA, they are little more than hollow promises. Yet the Free-Trade-At-All-Costs lobby asks the American people to have faith that the administration has really turned over a new leaf. They are asking us to trust that enforceable labor and environmental standards will be included in the text of the Peru and Panama agreements. But even if these agreements are the best written, fairest trade agreements possible, so long as they rely on this administration to enforce the labor and environmental standards they contain, they are not worth the paper that they are written on.

This administration has failed to protect workers here in the U.S. The BP Texas City explosion, the Sago mine disaster and the 9/11 first responders and cleanup workers who have developed serious breathing ailments, these are just the most notorious examples of this administration's lack of dedication to provide even the most basic protection to workers: the right to work in a safe environment. Even the U.S. Chamber of Commerce says these new worker and environmental protections can't be enforced.

Now, if that isn't telling, I don't know what it is. They flatly came out and said they are not enforceable. This President has lost our trust, and with it any argument that he has to renew his trade promotion authority. The administration's track record does not demonstrate a commitment to the working families of America.

Free trade was supposed to create economic opportunity for everyone, for big businesses, as well as small businesses, working families at home and abroad, but that, quite frankly, hasn't been the case. The truth of the matter is that the NAFTA free trade model favors the wealthiest at the expense of small businesses, workers, families, and ultimately communities, like the communities Mr. MICHAUD was talking about that are dependent upon millwork for their life blood.

More than a decade after NAFTA and NAFTA-styled replicas, it's clear that the promise of economic prosperity has yet to arrive. Our trade deficit has ballooned into the tens of millions of dollars. Real wages for American families are down, and our manufacturing base is falling apart.

We need an administration committed to protecting the rights of workers, and until we get one we cannot grant this administration an extension of Fast Track authority. The American people deserve better. They deserve a commitment to trade that expands their opportunities rather than diminishes them.

I urge all my colleagues on both sides of the aisle to help our working families get back on track to economic prosperity.

I urge them to oppose the Fast Track renewal, and I want to thank, again, my two colleagues for their leadership on this issue, because they have been trying to carry this message to those who have been unwilling to hear it.

Mr. MICHAUD. Thank you very much. I appreciate your comments, and I hope that the American people are listening, because this is extremely important. We are heading into what I call a perfect storm. We have the largest budgetary deficit in our history, with over 45 percent owned by foreigners. We have the largest trade deficit in our history, almost 7 percent of the GDP.

We cannot sustain those types of deficits and maintain our Superpower status here in this country.

With that, I recognize the gentlewoman from Ohio, who is a freshman Member, who is very, very knowledgeable on trade issues, a labor attorney, and has done a phenomenal job working with the freshman class, bringing the freshman class the materials that they need to talk about trade for those who needed the materials.

I really appreciate your willingness to step out there your freshman year to really talk about trade. You understand the problems that trade has caused your State in Ohio, and we look forward to hearing your remarks this evening, Congresswoman SUTTON.

Ms. SUTTON. Thank you so much, Mr. MICHAUD, and Ms. SÁNCHEZ. Both of you, your leadership is a shining example for all of us. As you point out, this is a moment of supreme importance when it comes to the trade policy of this country.

Last November, the American people cast their votes for new leaders with the hope that we would replace our broken trade system with one that will truly allow for fair competition, because we know that if given a fair playing field, we will excel in the global marketplace.

The first step, as both of you so rightfully point out, has to be that Congress must stop ceding its constitutional authority and responsibility over trade to the President. The lack of oversight and accountability, giving the President what's been called Fast Track authority, the damage that Fast Track authority has wrought on the United States trade policy has led to devastating consequences, some of which you have already heard about throughout this country. It certainly has had a devastating impact on the area that I represent. We have lost over 200,000 manufacturing jobs in Ohio since 2000.

That means that people's futures have been seriously put at risk. There are kids out there today who won't be able to go to college because of the jobs that their parents lost due to Fast

Track, and the bad trade deals that resulted under Fast Track. There are people out there who won't have health care for their families because of the bad policy that has resulted under Fast Track.

For them and for every American who has been hurt by the Bush administration's harmful trade policies, we must, we must let Fast Track expire permanently at the end of this month. Now, we all know that the United States' Constitution gives responsibility for trade to the Congress, and there was a reason for that.

Our forefathers knew that they needed to keep that issue and control over that issue at a level that is closely connected to the people who are being represented. That's why Congress had that authority.

Unfortunately, with Fast Track, the problem is the administration negotiates the deals, signs them, determines all the terms, and then weighs it before Congress, and you have to vote ''yes'' or ''no.'' You have no input on what the constraints are. You have no say or ability to fix what is wrong with the deals as they come through. That is just not a path we should continue down.

As has been mentioned, Fast Track has enabled the passage of trade deals like NAFTA and CAFTA, and of course the WTO, the World Trade Organization, all of that has accelerated as our leader here has pointed out, it's all accelerated a trade in jobs crisis. It's marked by an $800 billion trade deficit, and more and more people are feeling this across the country.

In fact, I actually have a letter here that was sent to our leaders in both the House and the Senate from organizations, organizations like American Medical Students Association, The Change to Win Coalition, Communication Workers of America, Defenders of Wildlife, Friends of the Earth, hundreds, hundreds of organizations, national, State organizations; a wide variety of people, church organizations, all who oppose us extending Fast Track authority to the administration, because they know that the resulting trade deals are devastating to our communities, our businesses, our workers, our farmers and our country.

So it is with honor that I stand beside my two esteemed colleagues here tonight to talk a little bit about this with them and with all of you at home who care, I know, deeply about us changing the direction on our trade policy.

The good news is there are things that we could be doing, and that we should be doing to stop leaving our companies and our workers at a disadvantage.

□ 2130

And so I'm looking forward to exploring that with you both tonight.

And at this point, Mr. MICHAUD, I yield back.

Mr. MICHAUD. Thank you very much. You're absolutely right when you talk about Fast Track, and we'll get into that a little bit more, because I know Congresswoman SÁNCHEZ has to go to another meeting, and I know she's been to Colombia a couple of times, so I'll be interested in hearing what she has to say about her trips to Colombia.

But before she does, before I yield time, I'd actually like to give a quote. And it's not very often I quote Pat Buchanan. But I saw this quote and I thought it was worth quoting. It says, ''The trade deficit is a malignant tumor in the intestines of the U.S. economy.'' That's absolutely right. We have to start dealing with our trade deficit. And one way, one of the issues we have got to deal with is, as you mentioned Congresswoman SUTTON, is not to renew Fast Track, which is extremely important. Let Congress do our job that we're elected to do, representing our constituents.

I did have a chance to actually meet the President of Colombia a couple of weeks ago. I had an interesting conversation and asked several questions about the brutality and the murders that are happening in Colombia with trade unionists, and I'm looking forward to his response to some of the questions that I have.

But right now, I'd like to yield to the Congresswoman from California, who actually had a couple of trips over to Colombia. If you'd kindly let us know what happened and what we can do.

Ms. LINDA T. SÁNCHEZ of California. Sure. About 2 weeks ago I returned from Colombia, and it was my second visit in just 7 months. Colombia is one of the countries that President Bush negotiated a free trade agreement with without really seeking the advice of those Members of Congress who have been vocal opponents to the NAFTA trade model which he based this agreement on.

And I have to say at the outset, Colombia is a beautiful country. It's people are a warm people. We were well received there. And so I want to be very clear that I am for expanding trade with countries around the world, but in a way that is fair and balanced to both our workers here in the United States and also the workers in the countries that we seek to engage in trade with.

Just for the record, Colombia has a horrible record on human rights and labor rights violations. In Colombia, more trade labor unionists were killed there last year than in all the countries of the world combined. So it has an abysmal record with respect to violence towards people who try to organize workers to help lift them out of poverty. And nobody really wants to talk about that dirty little secret of Colombia's, because they want to talk about how much better things are in the first 6 months of this year.

The statistics do show that there is an improvement. I will grant them that, and I applaud that. But it still means that about 99 percent of the murders that happened last year have gone unsolved, and nobody has been brought to justice for that.

And the reason why trade labor unionists are targeted is because they speak out on behalf of people who are living in poverty, who are earning wages that don't allow them to support themselves or a family. They're working in dangerous working conditions.

And I have to say, on the trip that I just most recently returned from, we really weren't given a lot of time to go and actually talk to the workers themselves about their experience. We were basically told by the government that things are getting better and things were improving.

Interestingly enough, the first trip that I took to Colombia last November, I met with labor organizations, civil rights groups and advocates, and I met with the workers themselves who told me, ''don't be fooled by the rosy picture that our government has painted. It's very dangerous here in Colombia to speak up if you are working in dangerous working conditions. It's very dangerous in Colombia to speak up if you'd like to see your wages rise so that you can support yourself.''

And, in fact, there is a very big informal labor sector in Colombia which isn't even subject to basic standards like a minimum wage. There's no minimum wage for these folks. There are no contributions made on behalf of them for the hours that they work into any kind of Social Security or pension system. And there are no workplace safety standards. A lot of these workers work in some of the biggest industries that they're pushing the free trade agreement because they say that they need to expand these industries, one of which being the textile industry, which is notorious for their workers that are part of the informal sector that don't have contracts, that don't have any basic rights.

And basically, in Colombia, when I bring up the point that there's this promise made to lift all these people out of poverty, but when they have to compete against U.S. goods, some of which will be subsidized, like many of our agricultural products, who is going to suffer the most? Who's going to bear the cost? Because they tell me, oh, yes, there are some transitional costs associated with moving towards this new free trade agreement, but they're transitional costs; they won't be forever, and not everybody's going to be affected.

But let me tell you who will be affected by those transitional costs: rural, poor, indigenous people and

largely women who are heads of households. They are the ones that will suffer the most, not to mention American workers who will have to compete in industry with Colombia, where they have no minimum wage, no minimum work day, so they can work workers 16 hours a day if they want, and no safe working conditions.

And there's just, quite frankly, no way that American workers, who demand a certain level of respect and dignity at the workplace, are going to be able to compete in industries where those are the conditions that Colombian workers are working in.

Knowing all of this, did President Bush negotiate with Colombia a free trade agreement that would try to address those very basic labor standards? No. He based the Colombian free trade on the NAFTA model. They didn't even put in basic rights that are respected around the world as international standards for human and labor rights. He just said, hey, the marketplace is going to take care of it. We're going to move forward. This is the trade agreement, and Congress, because of Fast Track authority, you can't change it; you can't make it better; you can't amend it. It's either yes or no; you vote in favor of this. And if that's the choice that I'm given, my vote is no because it doesn't even try to address the problem with the labor standards and the violence in Colombia.

I say, hey, I'm willing to give Colombia the benefit of the doubt. If you can show to me over a certain length of time, minimum of 2 years, that, yeah, you've gone after these people that have targeted labor unionists, and yeah, you've moved people out of the informal sector into the formal sector where people have basic standards, I'm willing to give Colombia an opportunity. But I'm not willing to enter into a trade agreement with them based on empty promises of how much better things are going to be.

All we heard when we were there, 90 percent of what we heard was how much better Colombia was at human rights and how much better they were at trying to find those responsible for killing trade labor unionists. But while we were there, one of the biggest scandals that has hit Colombia in recent months is the scandal of paramilitary groups that are linked to elected members of their congress, elected governors, some of whom were hand picked, and cabinet members, some of whom were handpicked by President Uribe himself. And these paramilitary groups have been responsible for killing people, for massacres of villages of people. And currently, 14 elected officials sit in jail because they've been tied to these paramilitary groups. And there are as many as two dozen more that are under investigation.

But we're supposed to trust President Uribe that they're going to bring these people to justice and that labor rights and human rights are going to be better in Colombia. I say, show me, and then we'll sit down and negotiate. But I thought it might be interesting to just inform you guys a little bit about what the flavor of that trip was.

And like I said, I think the Colombian people are wonderful people. I think we need to open up new markets. But we need to do it in a way that's fair and balanced for our workers here, so we don't continue to hemorrhage manufacturing jobs, and for the workers in these countries, which corporations will exploit.

And with that, I will yield back to Mr. MICHAUD.

Mr. MICHAUD. Thank you very much, Congresswoman SÁNCHEZ. You're absolutely right, and that's one of the problems with Fast Track and why this Congress should not renew Fast Track. Even if we did have a say in these trade deals, as you mentioned, particularly with Colombia, I'm not sure that even if we had the ILO standards in the agreement that that would help as far as the murders and the assassinations that are going on in Colombia. I've met with several elected officials on different occasions from Colombia, and they're scared for their lives. There's one senator that actually sleeps no more than two nights in a row in the same bed because he's been threatened with his life.

And we've been told, or I've been told in those meetings that they want to set an example, the paramilitary, and they force some of the other labor folks to go out there with actually, they told me that they actually beheaded a trade unionist. And that's wrong. So no matter what we do on trade deals, like you, Congresswoman, I want to see results before I agree with any trade deal with Colombia at all. We have to get back to changing that model.

I'm very pleased actually to see another colleague from the great State of Ohio who has taken a great leadership role since he's been here on trade but also has introduced major legislation that will help deal with one of the components when you look at the flawed trade model. And he's also a member of the 30-plus caucus now, I guess, something caucus, congressman TIM RYAN.

Mr. RYAN of Ohio. I thank the gentleman. And I appreciate, I caught bits and pieces of the debate here, and I think you all have illustrated points that need to be made, and we need to keep making them here if we're going to have any headway.

And I remember sitting in the meeting with the gentleman from Maine (Mr. MICHAUD) where the politicians were talking about this trade unionist who was trying to organize a plant, and the next day or two days later, he's beheaded. Now, we think labor politics are tough in the United States, which they are, but I don't think they come anywhere close to that level.

And it is a pleasure for me to be here with my partner in Summit County, Ohio, Akron, Ms. SUTTON.

I just want to make a broad point and then talk a little bit about a bill that I have introduced with DUNCAN HUNTER on currency. And the first point I want to make, and I think everything that you were talking about is saying, we need to represent our values here in the United States of America, not just here when we hear about family values, and we need to have values and we all agree with that. But put it in our actions. And I think that's what we want to do, and the trade agreements that we sign consistently, I think, go against it. And when you look at what the results are, and Sojourners had a great magazine; I may have sent it to some of you.

Two percent of the world owns more wealth than the other 98 percent. Now, that's unbelievable. Two percent of the world own more wealth than the other 98 percent combined. That signals to us that the models that you were talking about, Mr. Speaker, are not sufficient for shared growth for all people.

And we're not saying that if you go out and you start a company and you take a risk and you take out a loan, that you shouldn't be able to make money. God bless you. Make all you want. But recognize that you're a part of a bigger system here that we're all a part of that, investments in education, the minimum wage which we finally were able to get passed, college tuition; all of these things matter, health care in the grand scheme of things. And what we want to do is start exporting some of these values that we hold dear.

And when you say, well, you can make something in China and there are no labor laws, no environmental laws, no this, well, what's the alternative? We go back to those days? And I've been to China. You may have, too. Dumping waste in the rivers, like we had a problem up in Cleveland a few decades ago where the Cuyahoga River caught on fire. Now we don't want to go back to those days, where thousands and thousands of kids got asthma because we didn't have clean air regulations. We don't want to go back to those days.

So we are now in a unique period in history, because in the United States, we're the consumer. We're the ones buying right now. Now, that may not be the case 10 years from now, but we are now, and so let's leverage our power as consumers to make some of these changes.

And I hope that what we're doing here tonight, and Mr. MICHAUD and Ms. SÁNCHEZ and Ms. SUTTON, what we're doing here tonight is going to help push those things along.

The China currency bill that we have introduced here basically tries to get China to comply with international law. And international law says you're not allowed to subsidize your goods.

Well, China is subsidizing their currency, which is kind of a little more complicated than a government saying, okay, you make this widget, we're going to fund you; we're going to subsidize you so you can sell it cheaper in another country.

What China's doing with their currency is basically subsidizing it so that every product that they send the United States is between 25 and 40 percent cheaper.

I have a company in my district called Wheatland Tube. And it's also in Mr. ALTMIRE's district in Western Pennsylvania. They make tubing. The final product that arrives on the shores of the United States from China is the same price as Wheatland Tube's raw materials before they even start the process. That's the kind of advantage China's getting with their currency.

And I know you all are supportive of this bill, and I think it's something that we can, not talking just about trade, but this is something that I think free traders and fair traders and Democrats and Republicans and people from all over the country are agreeing on. And I know Mr. LEVIN and Mr. RANGEL want to move on a bill that does something with China, and I hope that this is a component of that, and I'm confident it will be.

□ 2145

But those are the kind of things that we need to stand up and talk about. And if we don't, no one will, because there is a certain amount of people that will benefit from the current system, and they are the ones who want to keep it just the way it is. But it is important for us to come here, 700,000 constituents, 700,000 constituents, 700,000 constituents, it adds up if we unify and organize and do what I think made all the great social movements in the country great, was organization, traditionally the Democratic Party, the unions, the churches.

And I will make one final point that I know I have made to you guys already. It is so important for us to bring in the church communities. I am Catholic, and I think the Catholic Church has an obligation. They speak out on so many issues that I think have less relevance than this issue on average people's day-to-day lives. And I hope that they step up and talk about this issue with the same passion that we hear them speak out on a lot, and the evangelicals we just need to pull.

Sojourners Magazine with Jim Wallace did a terrific job a couple of issues ago. But if this does not become a moral, value-centered movement, we are going to continue to struggle. We have the environmentalists and we have the trade unionists, and we have some of us in the Democratic Party. But if we don't pull in the church community, I think we are going to continue to fail.

I appreciate the opportunity to be here with you.

Mr. MICHAUD. Thank you very much, Mr. RYAN. And you are absolutely right. This is more than jobs and the economy. It is a moral issue. And as I mentioned earlier about some of the problems that I have even seen in my district, my hometown, when the mills shut down because of unfair trade deals, it is a moral issue. And I hope that the churches do get involved in this issue.

Mr. RYAN of Ohio. Will the gentleman yield?

Mr. MICHAUD. I yield to the gentleman.

Mr. RYAN of Ohio. I know that our friend from Minnesota is here, but I just want to tell one story because I heard it a few weeks ago from my cousin who worked for Delphi Packard.

The plant used to be 15,000 and now they are down to maybe 1,000 because of the global economy, trade deals, China, the whole nine yards. He worked there for probably 10 years, and many people worked there for 30 and made a great living. He is now taking the machines off the ground, taking the bolts out of the ground, helping move these machines, and they are shipping them to China. Now, let's talk about some dignity. This guy is taking out the machines and shipping the machines and his job off to China.

That is where we are at. And we have got some work to do. We are not saying build fences and don't compete. But investments in education, what we talked about early on with stem cells and alternative energy, let's create the new wave of jobs that need to be created for our people to work. It is not just trade and exporting. It is making investments in the U.S. and creating new jobs.

Mr. MICHAUD. Thank you very much. That is a very good point that you mentioned because the very mill that I worked at, we had six paper machines. Four are no longer there. They were unbolted and shipped overseas. So that is absolutely right. People might not think they are going to unpack the machinery and move them overseas. It has happened. I have seen it happen, and it will continue to happen unless we change the flawed trade model that we have been operating. And part of that component that is absolutely right is the currency manipulation with China that we have to address.

And as Mr. RYAN had mentioned, we have Mr. ELLISON here, who is also another freshman Member of the freshman class who is very interested in the trade issue. So I yield to Mr. ELLISON.

Mr. ELLISON. Mr. Speaker, I want to thank Congressman MICHAUD, Congresswoman SUTTON, Congressman RYAN, and also Congresswoman SÁNCHEZ, who left us, because you all have been carrying the banner of trade all night, fair trade.

And I think that before I jump into my remarks that I pulled together for tonight, I just want to say this: We are talking about trade, Mr. Speaker, within the context of two decades of flat wages for working people. When you look at real wages, Mr. Speaker, we are talking about flat real wages for working people. We are talking about a system of health care where we leave 47 million people out of it and so many other people carrying an increasing burden on their jobs just to be able to afford the health care that their job does provide. It is within this context that I want to talk about trade tonight within flat wages, within increasing health care costs, within the context of increasing and mounting consumer debt.

The average American, when you take their mortgage out of the equation, has about $13,000 worth of consumer debt to carry around. And that is talking about your credit cards and everything else. So we have got consumer debt, increasing health care costs, and flat wages. And now we are going to talk about trade, trade that has sapped our jobs.

If you look at NAFTA, NAFTA alone I want to talk about tonight. NAFTA was sold as a way to make sure that workers both in Mexico and in America would benefit. But has that really happened? Has that really happened?

What has really happened is the opposite. We have seen 3 million jobs lost, 30,000 in Minnesota alone. NAFTA, by permitting its heavily subsidized U.S. corn and other agricultural business products to compete with the small Mexican farmers, has driven the Mexican farmer off the land due to low price imports of U.S. corn and other agricultural products. Some 2 million Mexicans have been forced out of agriculture, and many of those that remain are living in desperate poverty. These people are among those who cross the border to feed their families.

NAFTA service sector rules allow big firms like Wal-Mart to enter the Mexican market and begin selling low price goods made by ultra-cheap labor in China to displace locally based shoe, toy, and candy firms. These estimated 28,000 small- and medium-sized Mexican businesses have been eliminated. Wages along the Mexican border have actually been driven down by about 25 percent since NAFTA. The Mexican border has actually been driven down since NAFTA, reported a Carnegie Endowment study. An oversupply of workers, combined with a crushing of union-organized drives as government policy, has resulted in sweatshop pay, running sweatshops along the border, where wages typically run 60 cents to $1 an hour.

Mr. Speaker, I mentioned what is going on with Mexico because I think it is so important from the standpoint of the American worker, the American

worker who is trying to put food on the table, hold jobs here in our country, it is critically important. We are talking about, as I said, flat wages, rising health care costs, increasing consumer debt. And it is so important to understand that this immigration debate we are having is heavily informed by what? Trade. Our trade policy is increasing the pain not only on American workers but on workers abroad. As we fight back and forth, to and fro, about what we should we do, more border security, higher walls, fences. We have all these raging debates around here around these issues. What we have literally done through this NAFTA trade policy and other trade policies like it is wiped out an economy in another country and not just pulled people here through higher wages but pushed them here by elimination of their economies in Mexico.

So, Mr. Speaker, I bring these points to the floor tonight so that we can have more informed debate so that when people say, hey, look, why are these folks making such a big deal about fair trade policy, it is important to know that the middle class is being pinched and squeezed. And so often even here in Congress, we are being told that the problem is some immigrant, when in reality the problem, I believe, is heavily subsidized agri-businesses and our trade policy, which allows us to dump cheap, low-cost corn into countries like Mexico, which wipes out their farm economy and drives workers there over here so that they can make a living.

Mr. Speaker, it is critically important that we understand these issues and we get these issues on the table as we debate them because it is hypocritical, in my opinion, to talk about spending $700 million, or however much we are going to spend on a fence, and not adjust our trade policies. We can't build a fence high enough if we keep on destroying the farm economy in Mexico and dumping cheap commodity prices there. We have to fix our trade policy. We have to fix a trade policy that benefits American workers and workers around the world too, Mr. Speaker.

So I didn't come here to say a whole lot more than that, Mr. Speaker. I want to get this issue of trade policy in the debate as we talk about immigration policy, and I want to talk about trade policy within the context of the squeeze the middle-class people are feeling every day.

Mr. MICHAUD. Mr. Speaker, Mr. ELLISON brought up a very good point. There has been a lot of discussion over the past month about immigration, particularly in the Senate. We will be having our discussions here in the House. And that is part of the component when you look at trade. It is not a simple issue. And Mr. ELLISON hit the nail right on head. If you look at immigration, what is happening, they are coming across the border because they want a job. They want a good job so they can provide for their family like any one of us would be doing for our family, provide for our family.

I was reading an article, actually, ''Since NAFTA, Winners and Losers.'' I will just read a part of this article. It says: ''As a bonus,'' talking about NAFTA, ''the predicted increase in jobs and prosperity in Mexico under NAFTA was expected to reduce illegal immigration. In 1994, when NAFTA was put into effect, then-Attorney General Janet Reno predicted that illegal immigration would fall by two-thirds within 6 years.''

And I want to quote the former Attorney General Janet Reno: ''NAFTA is our best hope for reducing illegal immigration in the long haul. If it fails, effective immigration control will become impossible.''

I want to repeat that again. This is the former Attorney General Janet Reno: ''NAFTA is our best hope for reducing illegal immigration in the long haul. If it fails, effective immigration control will become impossible.''

And that is absolutely right. We have seen what is happening since NAFTA. The same flawed model is in existence. It is going to take a real active role of the freshmen class and Members of this Congress on both sides of the aisle who really want to make a difference. A new direction, that is what we need, a new direction.

We need a new trade model. Part of that trade model will go to what Congressman RYAN had mentioned when you look at the China currency manipulation, when you look at the value-added taxes, legislation that has just been introduced, bipartisan legislation dealing with a value-added tax that we have to look at that accounts for a big portion of our trade deficit. In the United States, 94 percent of all U.S. exports and imports with trade deal with countries that have a value-added tax. That is hurting this country.

And for those of you who do not know what the value-added tax is, actually, for the countries who export their products to the United States, they actually have been rebating those companies the value-added tax to a tune of $217 billion in 2006. Plus if the United States wants to export their product over there, they are actually taxed to a tune of $110 billion. This has to change. This has to change.

And when you talk about Fast Track, actually during the several discussions about reauthorizing Fast Track in 1974, 1988, and 2002, Congress actually encouraged the USTR to change the value-added tax so we can be put on a level playing field. We have got to change the rules. This is one of the components that we can deal with in changing that rule.

I yield to Congresswoman SUTTON.

Ms. SUTTON. Mr. Speaker, I thank the gentleman for yielding.

Mr. MICHAUD, again, your leadership is inspiring.

And, Mr. ELLISON, thank you for being down here. You have been a tremendous leader on these issues, and your points about immigration and the complexity and the links between these subjects is well taken and important to recognize because, as you point out, Mr. MICHAUD, with the numbers about the value-added tax, the VAT tax, there is nothing free about that. When they call it ''free trade,'' you kind of think you are going to get something good back in return, and it just hasn't been working.

And the reality is when you read the quote by the former Attorney General, at that point the issue was theoretical. It was hypothetical. We didn't know for a fact actually what would happen. We thought. We had our ideas. We had our suspicions. But it is no longer theoretical. We know how this trade model has failed, and it doesn't make sense for us to continue down that same path.

□ 2200

You know, we had some talk here this evening about some of the trade deals that are still pending under the Fast Track authority that the administration still maintains. And a couple of those were mentioned in passing, including the pending deals with Peru and Panama, and of course Colombia and Korea. And recently, the administration and some congressional leaders actually announced that the labor and environmental standards were going to be included in the Peru and Panama agreements. However, right after that announcement, reports indicated that those standards may be put into side letters, where we've seen them go and not be enforced. And we also heard those who represent the multinational interests who are benefitting under our current broken trade policy boast that the standards will not be enforceable. Those are concerning developments.

And I guess it is also important to note that, even if the standards are ultimately in the core of the FTAs, experience tells us that they will not be enforced. In 2000, Congress passed the Free Trade Agreement with Jordan, and it had those labor and environmental standards in it. As a result, it received broad support. Actually, some of those who believe in fair trade and are committed to it voted for it because of those standards. But you know, alas, despite documented violation upon documented violation, those standards have not been enforced.

So getting back to sort of the points that you have all been making, rather than continuing to pass more free trade agreements that won't be enforced and will result in the consequences we've seen under the broken

trade system, which means more lost jobs, a bigger trade deficit, more of the negative consequences, not just in this country, but it's out of whack all over; rather than doing that, it makes sense for us to focus on things like that of Mr. RYAN's bill that will help to fix our broken system.

You know, Congress should focus on replacing policies that reward businesses for outsourcing jobs with incentives and should focus on sensible tax policies and would help businesses and workers make it in America.

Mr. ELLISON. Will the gentlewoman yield?

Ms. SUTTON. Absolutely.

Mr. ELLISON. Under the current model that we have, who is the entity responsible for enforcing trade provisions such as labor or environmental standards? Whose job is it to police those standards?

Ms. SUTTON. Well, the greatest level of enforcement actually begins and rests most directly with the administration.

Mr. ELLISON. So has the administration been an advocate, protector of the rights of workers in America, much less right around the world?

Ms. SUTTON. The gentleman asks a good question. No. No. The answer is no. And I think that that's an important point. And our colleague, Ms. SÁNCHEZ, made a very important point, too, about how this administration feels about human rights and workers' rights because she talked about the fact that they negotiated, this administration, an agreement with Colombia, where the murder of labor organizers and human rights violations are routine. And I think the fact that they are willing to enter into that agreement without being extremely diligent on correcting that tells us all we need to know about what this administration thinks about the need to enforce and deal with labor rights, labor standards and human rights. So I think that is very concerning.

If we deal with things, though, like currency manipulation and we deal with things like making sure that products that are produced elsewhere are safe for consumption here, because again, there are costs associated with safety. We have seen a lot of bad repercussions in recent days about products coming from outside of this country here. In fact, today, just today in USA Today was an article that dealt with lead in children's jewelry and how it was hurting our kids, and China refusing to agree to changing that practice.

I yield back to the gentleman from Maine.

Mr. MICHAUD. Actually, I would like to follow up, Mr. ELLISON, if I might, because I have in front of me, actually, testimony of the Assistant U.S. Trade Representative, Ms. Moore, who attended our hearing in the Small Business Committee on June 13. And I will paraphrase. It says, ''Our work aims to increase exports by expanding market access for American goods, creating a level playing field.'' She also mentions, and it gets right to your point, ''In addition, we enforce agreements and resolve trade problems using a wide variety of tools.'' That is clearly not what's happening.

Mr. ELLISON. Will the gentleman yield?

Mr. MICHAUD. Yes.

Mr. ELLISON. A wide variety of tools. I would be curious to know what some of those tools might be. Are we talking about tickling somebody with a feather, or what kind of tools are we talking about? Are we dragging somebody into a tribunal and getting sanctions on them, or are we just talking about something else?

Mr. MICHAUD. Well, if you are tickling them with a feather, it's probably a feather made in China.

And I can tell you, the Trade Working Group has worked very closely with a variety of different groups, environmental groups, religious organizations, labor, business organizations, the United States Business and Industry Council, associations, small manufacturing businesses here in this country. And the United States Business and Industry Council has told me directly that the United States Trade Representative has turned away businesses when they've brought complaints to the USTR primarily because the dollar amount wasn't enough. And I can tell you personally that, as you know, I worked at the Great Northern Paper Company for a number of years, and when the company I worked for, when I was talking to the public relations before they filed bankruptcy, they actually went to the Department of Commerce and talked about trade and what it's doing, and the response that they got: Yup, you've got a great argument, but go spend over a million dollars and come back to us later on. Well, we couldn't hold on. They filed bankruptcy. They closed the doors at the time, and it is devastating. So they are not enforcing those agreements, and we continue to see a huge disparity in our trade policy.

Mr. ELLISON. Will the gentleman yield?

Mr. MICHAUD. Yes.

Mr. ELLISON. Well, if we already start out with what is a trade policy that is lax, a trade policy with a model that is not inclined toward saving American jobs, and then they won't even enforce the rules that they do have, what will happen if we vote for a trade policy for Peru and Panama that supposedly has these provisions in it, but they don't enforce them?

The fact is, I would like to ask the gentleman from Maine and the gentlelady from Ohio what they think about a trade model which would give labor organizations, for example, the right to charge an infraction of a labor standard and to bring a country into court for violating a labor standard? What if the sole power for enforcing the labor agreement was not in the hands of a trade representative that was favorably inclined to multinational trade but not so much for American workers, but actually in the hands of a labor organization; how might that play out?

Ms. SUTTON. Well, the gentleman asks a good question. He makes, actually, a great point, because the reality here is that we clearly don't have an enforceable system. First of all, the rules aren't good to start with. They're inadequate, and we have talked a lot about how they're inadequate. But the reality is, this Congress could do a myriad of things, actually, to shape the roles. And they shouldn't be left up to just sort of an, oh, maybe if it's a certain dollar amount, maybe if it affects something I care about. No, it really should be guided by the infraction itself, the infraction of the law, the infraction of the rule.

So, one way would be possibly to go down the path that you're talking about. And there are other avenues that we might pursue also. But the point is, we really need to fix it because you heard our esteemed colleague from Ohio (Mr. RYAN) talking about how we are investing in new technologies. And we all agree with that, we are all supporters of innovation. But when you have a company that is subsidizing and giving a 40 percent advantage from the start, all of the new technology, all of the education and workforce training in the world, all the increased productivity will never allow us to overcome that 40 percent head start.

So, again, the points are well taken. Rather than focusing on trade deals that are going to just take us down the same path to lost jobs, why don't we fix those things and then create a system in which trade can flourish? Because I believe in trade.

Mr. ELLISON. Will the gentlewoman yield?

Ms. SUTTON. Absolutely.

Mr. ELLISON. Should our trade model be driven by promotion of American economic activity, including jobs? Or should it be driven by profit margins of huge multinational companies that really have no allegiance other than the profit margin each quarter?

Mr. MICHAUD. Well, I think a trade model definitely should look at jobs and putting us on a fair level playing field.

If you look at this Congress, particularly with the freshman class that we currently have who has been out there, very aggressively, talking about a new direction, we do need a new direction; we have to pause with all these trade deals that are currently going on. Even the former President, Bill Clinton, said

we ought to pause on these trade deals to see what's happening.

Mr. ELLISON. Will the gentleman yield?

Mr. MICHAUD. I would yield.

Mr. ELLISON. He ought to know.

Mr. MICHAUD. That's true. He's the one that brought us NAFTA. But these issues aren't Democratic issues or Republican issues. These are issues that are important to the United States, important to our long-term future, and we have to look at changing that model. And it can be done in a bipartisan manner. Congressman TIM RYAN, who was on the floor, is sponsoring legislation with a Republican Member of this body, DUNCAN HUNTER, on the currency manipulation. I am glad to see that a Presidential candidate is out there talking about trade, along with DENNIS KUCINICH, who is also talking about trade. We have the value-added tax, which is another piece of legislation which has strong bipartisan support, once again, Congressman DUNCAN HUNTER, Congressman WALTER JONES, myself and Congressman BILL PASCRELL.

So these issues are not Democratic issues or Republican issues. These issues are American issues. And we definitely have to be more aggressive. We have to change that trade model. And we have to sit down and pause, and sit down in a bipartisan manner, no backroom deals. We've seen what these backroom deals have done in the past, and they don't work. We have to work open so the public can see what is going on and the real effect that we currently are seeing with trade deals.

Ms. SUTTON. Will the gentleman yield?

Mr. MICHAUD. Yes.

Ms. SUTTON. You know, and to my colleague, Mr. ELLISON, your question, I think it bears sort of repeating. It is inexplicable, but the United States seems to be the only nation that does not find it acceptable to help our companies, to protect them, workers and communities, against unfair trade practices. And as a result, we are left at a disadvantage. All we are really asking for is that they have a fair shake. That's all we are asking for.

Mr. ELLISON. Will the gentlelady yield? I agree. American workers are some of the best in the world, innovative, hard-working, no doubt about it, and given a fair chance, can compete with any workers or anyone around the world, but we just need a fair opportunity. So I think we need a new model, a new way of doing business that will protect American workers and also protect American small businesses, and other businesses that actually are in the business of helping America prosper and do well.

And before we wrap up, because I think we are probably getting close, I just want to say briefly that I hope that people who feel so passionately about immigration will incorporate into their arguments the impact of trade policy on immigration.

Mr. MICHAUD. You are absolutely right. And I would like to close by once again quoting former Attorney General Janet Reno, and I quote, ''NAFTA is our best hope for reducing illegal immigration in the long haul. If it fails, effective immigration control will become impossible.''

With that, Mr. Speaker, I yield back the balance of my time.

NATIONAL SECURITY

The SPEAKER pro tempore. Under the Speaker's announced policy of January 18, 2007, the gentleman from Iowa (Mr. KING) is recognized for half the remaining time until midnight.

Mr. KING of Iowa. Thank you, Mr. Speaker. I appreciate the privilege to address you on the floor of the House on the House of Representatives. It is always a privilege.

And this time in our history reflects I think one of the most pivotal times that we've had. We are at war for one thing, and it is a pivotal moment within that war. And we are watching terrorists from overseas that have attacked the United States. And as we are watching our national security on that hand and as we are debating how we proceed to victory over al Qaeda and those terrorists on that end, at the same time our southern border is being flooded with just masses of illegal immigrants on a nightly basis. And to give, Mr. Speaker, some perspective on the scope of that problem, we have this testimony before the Immigration Subcommittee, of which I am the ranking member, and I sat intensively through hearings and engaged in questions and actually testified myself for the better part of 5 years at this point, Mr. Speaker.

□ 2215

Mr. Speaker, the testimony that we get from the Border Patrol, as far as the Border Patrol representatives for the profession and the Government, identifies that 2 years ago on the southern border, our Border Patrol and other immigration officers interdicted 1,155,000, I believe, illegal immigrants attempting to come across our border. Last year, it was 1,188,000. The number increases.

Now, one might argue that the effectiveness of our Border Patrol is reflected in the increase in the number of interdictions from about 1,155,000 to 1,188,000. But, Mr. Speaker, I would submit also that that could very well be a reflection of increased numbers coming across our border. It is not possible to identify whether the Border Patrol is more effective or whether they simply have a larger mass of people.

But in any case, when questioned before Committee in testimony before Congress as to what percentage of the illegal border crossers they were interdicting, the number fell between 25 percent and 33 percent. I believe the quote in the testimony was, ''We think we catch between a fourth and a third of those who attempt to cross.'' Now, that is not a very good record when you consider that there are 1,188,000 illegals, and that could potentially represent a third of those that tried or a fourth of those who tried.

So, I simply take that math and put that number at 25 percent, which is the lower part of the number, and then round it up to put it into a perspective in between the 25 and 33 percent. If you take that number and do the calculation, you come to about 4.6 million, let me see, about 4.6 million attempts. If you look at the interdiction numbers it amounts to and round it down, 4 million coming across our southern border on an annual basis, and that divides out to be about 11,000 a night coming across our southern border; 11,000, Mr. Speaker, every night on average. I say ''night,'' because during the day, the activity slows down. It doesn't stop. But at night it speeds up.

I have gone down and sat on the border in the dark, and without night vision goggles and without the aid that we have of our security personnel down there, but I just sat there and listened, sitting next to that cattle fence, that is not a very good cattle fence, about 5 barbed wires and steel posts that are stretched out to where the wires are separated in the middle so that the illegal traffic can simply bend down and step over through the fence.

I sat there and listened maybe 3 hours at a crack with a retired Border Patrol officer. I could see the shadows filtering through. I could hear the cars coming down on the Mexican side of the border. I could hear one of them dragging its muffler rattling as it drove down there. I could hear it stop by a big mesquite tree. I could hear the doors open. You hear people get out. You hear them drop their packs on the ground and the doors close kind of quietly, but the doors close. You can hear them pick things up in a hushed whisper and talk. Then they line up in single file, and they walk through the mesquite brush in the desert that 100 or 150 yards on down to our border and then file through the fence single file and go on up through the brush into the United States.

Some of them, I will concede, are coming here because they would like to find a job and they would like to find a better life. Some of them will send money back to their family. Some of them, that pack they drop on the ground and pick up again is the pack of illegal drugs that they will be carrying into the United States and delivering to a predetermined location, perhaps 25 miles up into the United States across the desert along the highway where a

vehicle is scheduled to pull off on a turnoff and have those packs of illegal drugs tossed into the back of that truck. Maybe some of the illegals get in the truck and go on up into the United States. Some of them turn around, walk back across the desert that 20 or 25 miles and go down and get another load.

This goes on every single night on our southern border, Mr. Speaker, every single night. That isn't all the drugs that come across our border, but that is one of the methods that they use. If we put a vehicle barrier in place, in some places we have them, that amounts to a 5-by-5 steel tubing that is welded on our steel posts, and these are a 5-by-5 steel piling that are set in the ground, and a 5-by-5 steel tubing that is welded on there at about bumper height of a vehicle, that vehicle barrier will slow down and actually stop vehicles from driving across the border, but it doesn't stop individuals from walking right through there and carrying their packs of illegal drugs.

The number that is most commonly represented by the Drug Enforcement Agency is $65 billion worth of illegal drugs coming across our southern border on an annual basis. That $65 billion is, I believe, a street value. I don't know what it is worth at the border specifically. In fact, they don't know either. They have got some representations of the breakdown of who gets what share of the profit as it flows through the illegal drug cartels. But $65 billion worth on the street is no small number.

That value in illegal drugs consumed by Americans destroys untold numbers of lives, an incalculable amount of human potential, and an innumerable number of children suffer because their father or mother or both are hooked on illegal drugs, methamphetamines, marijuana, heroin, cocaine, you name it, that comes across that border. Especially the methamphetamine that comes up into my part of the country, up the NAFTA Highway, as I heard some of my colleagues talking earlier, and the pain and the suffering and the death that has been dealt out by those illegal drugs, but pushed by $65 billion worth, the street value in the United States.

First, Mr. Speaker, I want to make the statement that we have a responsibility here in the United States to address the illegal drug consumption in this country. As long as we have the kind of demand that demands $65 billion worth of illegal drugs on the streets, in noses and in the veins and in the systems of our American drug abusers, illegal drug abusers, there is always going to be somebody that seeks to meet that demand.

Right now, the most efficient system that is set up, the most competitive system that is set up, the system that has the distribution wired in, is the illegal drug lords that control our southern border and the families that control their segments, the drug cartel families that control the segments of our southern border.

Mr. Speaker, we can't solve this problem by addressing the border alone. We have to solve this problem by reducing and eliminating the demand here in the United States for illegal drugs. I am not going to spend a lot of time on this, but I want to go on record, Mr. Speaker, and let you and let the rest of the body know that there are three ways that we can address illegal drugs.

One of them is through interdiction. We currently do that. We try to stop all the drug pushers we can. We try to take all the drugs out of their hands we can. We try to take them off the street. We put them in prison. We put mandatory sentences on some of them, and some of them have faced those mandatory sentences. We are doing a lot of what we can do with interdiction.

The only other two places we can address the drugs is rehab, and we have invested some money in rehab and we have gotten some pretty good results from those who have hit bottom, from those, Mr. Speaker, who want to. But the rehabilitation isn't going to solve the problem with the demand.

So the third place is how do you reduce and eliminate the demand, and I will submit that the way to address this, if we want to dry up the demand of illegal drugs in the United States, we are going to have to provide random testing in the workplace and also in the educational field and also in the welfare rolls.

Now, we have a drug testing law in Iowa that I worked intensively to get passed and drafted a lot of the components and worked those pieces through. I spent 2 years doing not exclusively that, but focusing a lot of my time getting that legislation passed, Mr. Speaker.

What it provides for is preemployment testing, post-accident testing, reasonable suspicion testing and random testing. If you have those four categories of drug testing and you provide that for that in the workplace, in our educational institutions so our students are being tested, and in our welfare rolls, you will be able to, and we could as a society, if we determined we wanted to dramatically reduce the demand for illegal drugs, if we would put a drug testing system in place, we could dramatically reduce the demand.

By doing so in the workplace under those four methods that I said, preemployment, post-accident, reasonable suspicion and random testing, we can provide and essentially guarantee a drug-free workplace.

I first brought my focus on this when as in the contracting business I had a Federal contract. The Federal contract required me to sign a document that I would guarantee a drug-free workplace. Now, I take those contracts seriously. When I sign my name to something, I intend to follow through. That is my commitment and that has been my record.

But it disturbed me that Iowa law didn't allow me to truly guarantee a drug-free workplace. I could watch out for it, I could check for it as much as I could, I could educate my employees, but I couldn't legally test my employees. So I did what I could to meet a drug-free workplace. I think I provided a drug-free workplace, but I don't know that. But it set me down the path of working on the drug testing side of it.

We essentially don't have a conversation going on in America about how to eliminate drug abuse in America. That conversation doesn't exist in a meaningful fashion. We talk about all kinds of things, but $65 billion worth of illegal drugs representing 95 percent of the overall drug consumption in America coming across our southern border and the attendant violence that comes with that and the drug cartels that comes with that, the smuggling of drugs and people and human slaves that are put into the sex slavery business, and that violence and the crime that is naturally associated with illegal drugs, we are not addressing the demand.

We are not particularly concerned about the abuse of drugs in the workplace. And I believe we have got to raise that issue. I believe that we need to bring the focus of America's society on dramatically reducing the demand for illegal drugs in this society so that we can provide a lot better culture for our children to grow up in than perhaps we grew up in. That is not being addressed, Mr. Speaker, and I want to raise this issue.

But on the other side of this, the flip side of this issue is U.S. demand, $65 billion coming across our southern border representing 90 percent of the illegal drugs. The other side is on that side of the border, they are delivering that amount of drugs to us.

They are producing many of them in Mexico and Central America and the northern part of South America. Also there is heroin and other drugs coming in from China that flow into Mexico. And that distribution network is the magnet that draws those illegal drugs into Mexico. The marijuana that comes in, the methamphetamines that are manufactured there. The pseudoephedrines that come in from China to Mexico to be processed into methamphetamine, that spells a society that doesn't have the rule of law.

I will argue that we are deficient in our own rule of law here because we are not reducing the demand in the United States. But they are pouring across the southern border. And as much rhetoric as we have had about people that want to come here for a better life, we need to have a lot of rhetoric about what

has happened to the lives of the people who have been sucked into this drug smuggling, who have been sucked into the drug consumption and become drug addicts? What about the lives of the American people who have been sacrificed on this alter of permissiveness that we don't have the will to shut down the abuse of illegal drugs in American and we don't have the will to shut down the flow of those illegal drugs across the border?

As I watch that and I look at the violence, and here two years ago, Mr. Speaker, actually it was more than 3 years ago, I commissioned a GAO study, a Government Accountability Study, and asking this question, and that is, we saw the testimony of how many people didn't make it across the desert to come into the United States illegally. That number has grown in the years that I have been in this Congress from perhaps a little more than 200, to now over 450, and perhaps as many as 500 people dying coming across the southern border.

That is a human tragedy. It is an agonizing human tragedy. The images of that easily come to mind to the American people, because we have seen a lot of news on it, we have seen film on it, we have seen pictures.

The other side of that tragedy is of those that make it across the border, those 11,000 a night that try, the 66 to 75 percent of those that make it, or more, and I will add that when I talk to the Border Patrol officers on the border and I ask them what percentage of effectiveness do you have, what percentage of them are you catching that are trying to come across the border, 25 percent, 33 percent? They laugh at me. They say, no, that number is more like 10 percent.

That is the most consistent number I get when I am speaking confidentially with the people that are boots on the ground, facing this enemy to our society, eye-to-eye, face-to-face. Perhaps 10 percent. I get numbers that go down as low as 3 percent. But it is the testimony here that is the highest that I hear, that perhaps a quarter to a third of those are interdicted.

□ 2230

But of those that come across the border and get across the border, and we are losing 450 or 500 trying to come into the United States that don't make it across the desert, how many Americans die at the hands of those who do make it across the border? Those involved in the crime, and there is plenty of it, do commit crimes against American citizens.

The measure of that crime falls into this category: 27 percent of the inmates in our Federal penitentiaries are criminal aliens. Some of them came into the United States legally and overstayed their visa. But most of them came into the United States illegally and committed crimes. That is 27 percent.

If you look at the State penitentiaries, the same Government Accountability Office report has in there that they are only funding 25 percent through SCAAP, the State Criminal Alien Assistance Program, that funds our States, our counties, our local prisons, reimburses them for the trouble of having to incarcerate criminal aliens here in the United States because the United States isn't able to control our borders, and the burden of enforcing that crime falls upon the local governments and the cities, increasingly. But the Federal Government is to reimburse them for incarcerating the inmates.

In the GAO study, it shows that we are only reimbursing for 25 percent of the cost of the incarceration of criminal aliens in the local prisons, State and local. When you do the math, that 25 percent comes to about $22,000 a year by their numbers. That is a pretty typical number for the cost of incarcerating someone in a penitentiary.

So if they are paying 25 percent and it is costing $22,000 a year for those that we do pay for, it is not $88,000 a year, so the only other conclusion one can draw is, at least in our State penitentiaries, that at least 25 percent of the inmates are criminal aliens.

Now one comes to the conclusion that more than 25 percent of the inmates that are in our Federal and State penitentiaries are criminal aliens. They commit crimes against Americans. If they are committing crimes against Americans in the proportion that they are represented in our penitentiaries, that means more than 25 percent of the murders, more than 25 percent of the assaults, more than 25 percent of the rapes and more than 25 percent of the grand larceny, and the list goes on and on and on.

We have few in our Federal penitentiaries that are in there just because they violated immigration law. They may be there under that charge, but if they are and that is the charge that they are under, it is most likely that they simply could not make another charge stick and the prosecutors chose to use immigration charges rather than something else.

But just think, we are sitting here now with 16,400 murders a year in America. And if a fourth of those are attributable to criminal aliens, you are at 4,000 Americans a year. We crossed that sad threshold of those killed in action in Iraq, total, in addition to those killed in accidents in Iraq, over 3,000, a while back, Mr. Speaker.

But that number compared to the number of over 3,000 a year, in fact the almost 4,000 a year that die at the hands of criminal aliens here in the United States, and that is every single year. So, each year, we have had more Americans die at the hands of criminal aliens in this country than we have cumulative total of all of the soldiers, sailors, airmen and Marines that have been killed in Iraq since the operations began in March of 2003. We have more Americans dying at the hands of criminal aliens on the streets and the roads and in the back alleys and homes of America each year than died on September 11, 2001. This total accumulates over and over again.

In addition to that number, there also is a slightly larger number of Americans who die at the hands of criminal aliens who have committed negligent homicide, generally in the form of drunk driving, although not always. If you add these numbers up, my numbers show 12 Americans a day murdered at the hands of criminal aliens, and 13 die every day at the hands of criminal aliens who have committed negligent homicide, generally victims of drunk drivers. And I am not counting the criminal aliens who have been killed because of their own drunk driving, Mr. Speaker.

So you add that number up, and it comes to 25 a day, 25 Americans a day. If the news media focused on that instead of some of their other priorities, I think we would have come to a conclusion on this illegal immigration issue that we are facing. But what is coming across that border and the violence that flows with it, and again, I will stipulate that most are good people. When they are our neighbors we like them. And when they go to work, we like them. And when they go to church, we like them. And when they raise their children and educate their children and when they assimilate into the American culture, we love everybody that comes to America to do that. We love those who come here legally. Those who come illegally subvert the rule of law.

But the violence that is part of the society that they come from is significant. I have to talk a little bit about the levels of violence here in the United States compared to the countries that many of our immigrants come from.

That is, our violent death rate here in the United States is 4.28 per 100,000. And the violent death rate in Mexico is 13.2 per 100,000. That is actually one of the safer countries in South and Central America. I was in Sao Paolo, Brazil, a little over a year ago. They told us to be careful where we go because in that city, they have over 10,000 murders a year.

I don't know the violent death rate in Brazil, but I do know what it is in Honduras. It is nine times that of the United States. In El Salvador, they don't publish the violent death rate, and one can only presume what it might be and why they don't.

But in Colombia, the violent death rate in Colombia is 15.4 times higher than the violent death rate here in the United States.

So it stands to reason that if you draw young men, some of whom are involved in the illegal drug trade, from a society that is far more violent than that of the United States, anywhere from 3 times to 15 times more violent, you are going to see more violent crimes. You are going to see more murders, assaults and rapes. There are going to be more victims in the United States and more deaths. One couldn't expect anything else.

That doesn't mean that we indict an entire country and all of their nationals because some of the citizens are violent. But that means we have more crime here because we are drawing a young men concentration from a more violent society, and a significant portion of those who are involved coming into the United States are those who are dealing in illegal drugs because the demand here for $65 billion worth of illegal drugs draws that in from those countries, and necessarily it has to come across our southern border.

Mr. Speaker, I hope I have laid the foundation for my passionate belief that we need to reinforce our southern border by building a double fence/wall on our southern border because I don't believe that a virtual fence is going to deter $65 billion worth of illegal drugs.

I have an understanding how powerful a magnet a $65 billion illegal drug market magnet is that draws those drugs into the United States with that kind of powerful profit incentive. They are going to be pushing against our southern border.

When you go down there, and I sit there at night, and it is five barbed-wire strands, five strands of barbed wire, kind of a poor cattle fence, and they are going through one after another. And I can't quite count them all because it is pitch black, and I can only see the shadows, and I can hear the footsteps and the fence creak. And I can put my ear down to the post and listen to the fence stretch as they go through and kind of count.

That is just one place, one location, one night, Mr. Speaker. But 11,000 a night on average every night. The numbers of people pouring across and the illegal drugs that are a part of that, America's economy is paying a tremendous price. Our society is paying a tremendous price. The potential, the human potential of our young people is slowly being undermined and destroyed by the illegal drugs that are coming in.

But the force of those drugs cannot be eliminated simply because we want to put in a virtual fence. We want to argue that we are going to put in ground-based radar and we are going to fly the unmanned aerial vehicles over the top. We will put some cameras in place, but some of that doesn't work in bad weather. Sometimes you can't get down there in bad weather to enforce.

Each time I asked the Border Patrol, does it help to build a double fence/wall, their answer is generally, nothing you can do will reduce the need for the number of boots on the ground. That is an interesting response, Mr. Speaker.

How is it that if we build physical barriers on the border, follow through and complete the commitment of the congressional mandate that the President signed, the Secure Fence Act, and build 854 miles of a double fence and roads, and tie that together with the technology that is necessary to supplement those physical barriers, how is it, if we build those barriers, we need more boots on the grounds, not less?

I am going to say, good physical barriers reduce the numbers of Border Patrol that we need. I am suggesting that we reduce those numbers; I am suggesting that we can invest our money more efficiently on the southern border than we are. And the wisdom of a double fence and wall on that southern border, if analyzed economically, holds up, and it holds up this way.

We are spending $8 billion on the 2,000 mile southern border from San Diego to Brownsville. That is $8 billion every year, and that money goes to pay Border Patrol, buy Humvees, depreciate the Humvees and support them, and pay for the retirement benefits, training and equipment and helicopters, fuel, gas for our Humvees, the whole network that is necessary to keep the Border Patrol up and running. That is where the $8 billion goes. That is $4 million per mile.

Now, me being a contractor who spent my life building things and pricing things and sometimes designing construction projects, I bring this down to unit price. I have to calculate things in unit price.

Mr. Speaker, what would I do? Say, for example, I live in the country in Iowa on a gravel road and the four corners come together right by my house. If I had a border on my west road that ran from my house, a mile west right down the middle of that gravel road, I don't care how far it went east or west, but if it was my job to contain that one mile, and if Michael Chertoff, the Secretary of Homeland Security came to me and said, STEVE, we think you ought to control this border, would you bid that for us? It is costing us $4 million a mile and two-thirds or three-quarters of everybody who is trying to get across the border goes across and goes off into the United States. Can you give us a price to give us more efficiency, a lot more than a fourth to a third efficiency? Give us something close to 100 percent efficiency.

So if you are a stopping a fourth of the people at $4 million a mile, one would think, to get 100 percent of them, if we spent $16 million a mile, maybe just maybe that linear equation would work out. I don't think it will, but that is one way of thinking about it.

So I would look at it and say, Mr. Secretary, $4 million a mile, how about giving me a 10-year contract, and I can control the illegal traffic on this border.

Now I have $40 million to work with; $4 million for that mile, 1 year, times 10 years, a 10-year contract, $40 million. I would look at that and think, I am going to hire myself a bunch of Border Patrol and buy myself a bunch of Humvees, and I am going to drive them up and down that road and hope that they come across the people coming across the border at night. I wouldn't do that.

I would have some people to guard the borders, yes; some people to be quick reaction responders, I certainly would. But I would look at that and say, if I make an early capital investment, if I built a wall on that border and a fence inside there a hundred feet, maybe another chain link fence inside that, I would set up some cameras and sensors, and it would be monitor-able from inside an air-conditioned office. Then I would have some Border Patrol to deploy if I needed them.

But for $1.3 million, I could build this wall that I am about to build. And for the balance of another million dollars a mile, I could put in another fence and we could have a solid wall, double fencing, and we could have probably an access road to run along there, and we could shut off more than 90 percent of the illegal traffic, more than 95 percent of the illegal traffic. In fact, I believe that we could tighten that down so tight there wouldn't be anybody coming across.

I say that because, not only does it make sense, I have seen the effectiveness of it. I went to Israel, and I took a look at the fence they have constructed in Israel. They were being bombed on a regular basis by suicide bombers from the West Bank.

□ 2245

They'd blow themselves up and blow up some women and children and men, too, didn't matter to them so long as they could take somebody with them. And so for the Israelis to protect themselves from those kind of attacks, they put a fence in place. And some places it's doubled; some places it's a little more than that. There are some watch towers and guard towers. They have some wire on top. They have sensors. Some of the sensors that they have are classified so they don't let the enemy understand how to defeat it.

But the fence structure that they put in place in Israel has been nearly 100 percent effective, and so I hear people here in this Congress will say, why do you want to build a fence and how tall do you want it to be? And I say, well, I'd put mine up 12 feet tall here, and then I'd put a wire mesh fence inside that's taller yet. Oh, 12 feet tall; if you do that, somebody's just going to build a 12-foot ladder and they'll climb over the top.

That is what you call a red herring, Mr. Speaker, and in fact, there have been very, very rare anyone could defeat the fence in Israel, and however tall you make the fence, yes, you can make a longer ladder. But there's always another way to defeat the people who think that's the easy way. It's one of the reasons to make it double because we can interdict them in between. And the sensors pick up the efforts, but if you don't slow them down, they charge across the border and scatter out across the desert. You can chase some of them down, but you cannot chase them all down, Mr. Speaker. And so fences and walls are effective. They have been proven to be effective, and they're cost-effective as well.

So let me just submit that that $40 million contract for that 1 mile for 10 years, the $4 million a year, for less than $3 million I can put in a concrete wall and a wire fence and I can put in sensors. And then I'd sit back and monitor that mile from my office with little warning devices on it and I'd have somebody on 24 hours a day. I'd have people on call and maybe somebody patrolling it in intermittent cycles, but we'd shut that mile down, and we could shut that mile down for an early capital investment of less than $3 million. And you'd only have $37 million left over for the balance of the 10 years to pay yourself a minimum number of border patrol and somebody to monitor the sensor devices that you have.

We can put this together, but what we're doing is burning up a tremendous amount of taxpayer dollars at $8 billion a year to get a fourth to a third efficiency when we can get 95, 96, 98 percent efficiency by investing in a structure instead.

Now, if we do that, we put a barrier in place that's very, very difficult to defeat, not impossible but difficult, and so the drug smugglers that are trying to get here, they are going to decide they don't want to try to go through there. They're likely to try by air again or by sea or some other method. In any case, we'll dramatically reduce the amount of illegal drugs on the streets of America, at least for a time, until they find another way to defeat us.

We have our choice. We can either work to defeat the illegal drug smugglers and try to keep those drugs off the street or we can capitulate. I'm not willing to capitulate, and I'm not hearing anybody in this Congress stand up and say that they want to legalize the illegal drugs.

And so I think we need to fight them, and I think this is the place to draw the line. This is the battle line, and it's on our southern border. I've talked to the Mexican senators about it. I believe they understand, and they're doing some things on their side to help out.

That's one of the battles that we have. We have a number of other battles, Mr. Speaker, and so it takes us, though, to this idea that legalize illegal drugs and then you don't have an illegal drug problem. That makes sense, doesn't it? But I'm not willing to go there, and we aren't in this Congress either. But the President and the open borders lobby have taken the stand that they think that we can't control our border, our southern border in particular, unless we legalize the 12 to 20 million people who come in here illegally.

Now, I continually ask the question of the representatives from the administration as they march forward before the Immigration Subcommittee, explain this to me, how is it that you can't enforce the law until we give amnesty to 12 to 20 million? How is it that if we do grant this amnesty or grant a legal status to 12 to 20 million people, how is America safer? If you want to bring people out of the shadows, and never mind they came here to live in the shadows, that's a function of sneaking into the United States and getting jobs illegally. When they were in hiding, that's living in the shadows. When you try to bring them out of the shadows, why would they come out? What kind of people would come out of the shadows? It would be those that are guaranteed amnesty. Those undesirables are not going to come out of the shadows, Mr. Speaker. They're going to stay back there and they're going to run their drug trade and they're going to push their wives and their kids to go to work, and they're going to sit back and work in the black market. They're not going to come forward. We will not get people to come forward that are afraid that they will not be granted some kind of amnesty.

But the President's idea on this and the open border lobby's idea on this is somehow, if we grant amnesty to the 12 to 20 million people, then we can focus our law enforcement resources on the bad apples, a huge human haystack of humanity, 4 million strong pouring across our southern border every year. And in that haystack of humanity are the needles called terrorists and criminals, drug dealers, undesirable elements, people that no society wants in them. And if we legalize that huge human haystack of humanity, somehow it makes it easier to find the needles that are in it.

But I'll submit, Mr. Speaker, that those needles are not going to come out into the open unless they can be guaranteed some legal path, and those who will be legalized, and I reject that concept of destroying the rule of law and legalizing people that have broken our laws, but those who would be legalized would then get themselves a card where they could travel back and forth across the border at will.

Now, I would ask, does the administration and the open borders lobby expect to see more or less border crossings if you legalize people that are here illegally? Are they going to go back and forth more? Are they going to go back and forth less? I'll submit they'll go back and forth more because they have their illegal passage that they do now; they will still have that option. Of course, they will have the option of the card that says now you can go back and forth at will.

So we'll have more crossings across the border rather than less. When you have more crossings across the border, there are more opportunities to bring contraband across the border, more opportunities for terrorists to smuggle through, more opportunities for criminals to take advantage of the situation.

And so I can't believe that there's a rationale in this argument that if you legalize 12 to 20 million people, if you legalize them, somehow America is safer. They're not any different people than they were before. They're the same people. They're just travelling back and forth more than they were. They're still hiding the drug smugglers within them. The crime will still take place, and the rationale that you won't have as much illegal smuggling going on or we can solve a big portion of the illegal problem, the rationale is the same rationale that says legalize illegal drugs, then you don't have an illegal drug problem. Legalize illegal aliens, then you don't have an illegal alien problem.

That's as far as the rationale goes, but it surely does not solve the law enforcement problem, and no one in the administration can explain that to me, at least to the point where I could understand it, and I honestly tried, Mr. Speaker.

So the rule of law is at stake. To grant amnesty is to grant a pardon to immigration law-breakers and reward them with the objective of their crime. That's the fairest, most balanced definition of amnesty. It's one that holds up against the criticism.

The rule of law is the most essential element of American exceptionalism. If we didn't have the rule of law in America who would come here? They're leaving the other countries because they don't have the rule of law and they don't have the right to property and they can't be treated equally under the law and are not equal under the eyes of the law.

But the rule of law says that everyone, every man and every woman, is equal under the eyes of the law, and that if you're going to be held accountable for a crime, you're innocent until proven guilty; and justice for a poor man is the same as justice for a rich man. That's the rule of law. And that's one of the essential pillars and the most essential pillar of American exceptionalism.

But I don't know how many of those who are beneficiaries of the 1986 amnesty plan I've talked to who say I'm

for this amnesty, you need to grant a path to citizenship for people who came here illegally, and I ask them why, and they say, well, it was good for me; it was good for me, it was good for my family.

But just that fact alone is surely not justification enough to tear the rule of law asunder and throw it over the side, Mr. Speaker. This rule of law is a precious commodity, a precious pillar of American exceptionalism, and if it's destroyed, we will never reach a glorious destiny in this country.

It's essential that we preserve the rule of law, and if we grant amnesty to 12 to 20 million or more, that will attract another 12 to 20 million, but regardless, the family, the friends, the progeny of the recipients of amnesty will be strong advocates for amnesty in coming years. If they get a path to citizenship, they will run for office. They will advocate for it. They will support candidates who advocate for amnesty, and they will continue to destroy this rule of law. America will never be the Nation that we have been again and never become the Nation that we can become because we will have almost knowingly and willfully sacrificed the rule of law on the alter of open borders because some businesses want cheap labor and they see an advantage in that. And some people want cheap labor and cheap votes, cheap votes on the left side, cheap labor more on the right than on the left but it's on both sides, and you put that coalition together, and the squeeze that comes on American society and culture is the squeeze on the middle class. That's another pillar of American exceptionalism is the middle class.

We have been building this Nation on an ever broadening and an ever more prosperous middle class. An opportunity if you're an uneducated person with some ambition, maybe you get out of high school and you decide I don't want to go to college, it's not for me, but I want to go punch a clock and work my way up at the factory or at the meat plant or whatever it is, I want to make a good enough living that if I don't even move up the ladder, if I don't ever do that, I can still buy a modest home and I can still raise my family and send my kids off to school with expectation of a better life. That's been a foundation of the American dream, an ever broadening and ever more prosperous middle class.

Today, cheap labor has destroyed the opportunities for the undereducated, the high school graduate or the high school dropout that's an American citizen. They can no longer go punch a clock and feed their family and pay for a modest home because wages have been driven down so cheap. The people that are at the top of the scale believe that they will never have to compete and neither will their children ever have to compete with the cheap labor that's been poured into this country. They will live in gated communities, and they will send their children off to Ivy League schools and they believe they'll always have that foundation and that capital base to make their gated communities, and the guarded society will be the destiny for all of their progeny.

But the middle class can't hope for that. The middle class has been diminished in its numbers, and it is a percentage of society, and the relative prosperity has been diminished significantly. And the unemployment among the underskilled Americans has grown in direct proportion to the amount of unskilled labor that's coming here illegally to take on the jobs.

Mr. Speaker, I'm for the rule of law. I'm for the middle class in America. I'm for opportunity for everyone, no matter what their education level is. We simply have to have a policy here in the United States that favors Americans. And the rationale that says that we are going to be a Nation that is somehow or another the relief valve for all the poverty in the world needs to take into account that there's a limit to the number of people that can live in the United States.

And those who advocate for open borders, I ask the question, how many are too many? Where would you draw the line? They will never engage in that debate because they know they lose the minute they try to put a number down. They will say that it should be on supply and demand, this economy. And so if there's a demand for more labor, we ought to bring in more labor.

If we're going to be the relief valve for poverty in the world, Mr. Speaker, there are at least 4.6 billion people on the planet with a lower standard of living than the citizens in Mexico, at least 4.6 billion. Are we going to open our gates up at our ports of entry and bring the people in, any willing traveler, might be the way the President would phrase it? And the answer to that should be no.

We can have compassion in a lot of ways, and one of them is to promote the American way of life around the globe. Be proud of who we are, be proud of our culture, be proud of our civilization, be proud of our history, be proud of the sacrifice of our Fore Fathers, be proud of the sacrifice of our current generation that's so proudly defended us around the world in the last 5 years.

But we needed to preserve our destiny. We need to reject amnesty, Mr. Speaker, and so I think that it's essential that we build the wall and we hold together the rule of law and we preserve the middle class and remember who we're about and what we are as a people.

By popular demand, I have occasionally demonstrated the construction of a wall so the people can understand, Mr. Speaker, how it can be done. I sat down and created a design for a concrete wall because I believe that it's harder to breach a concrete wall than it is a steel fence, and I think it's cost-effective.

□ 2300

But I want to describe what I have designed here.

Whenever we build for a fence or a wall, we need to have a foundation underneath it. There will be people that will try to dig underneath it, so I designed a slip-form concrete form.

This would go in a trench. You would set a trencher in here with a specially made grading machine that would trim this out and pour this concrete footing with a notch in it, trench and pour the footing as you go, so the hole didn't have a chance to cave in. As we poured this we would just drive the machine along and it would be trenching and pouring concrete, so there would be a cured foundation for the wall that would be completed as the trench and slip-form machine moved on.

This is what it looks like from the end. This would be what it looks like from the top, the notch in the top, and that groove there, it will be obvious where I put that. So as that trench is moved along, and the foundation of this wall sets like this, then I would bring in precast concrete panels. These panels would be about 13½ feet tall, and they could be about any width, but proportionately it looks like 6 to 8 feet. We could go wider, we could go 10 feet.

Perhaps once this was cured, even the next day, come along with truckloads of precast concrete panels. They would sit on the truck like this, pick those up with a crane, swing them into place, set them down right into the notch of the foundation. Just this simple.

It would take a little bit longer, but not appreciably longer to throw this all together in this fashion. It would be constructed 12-foot high precast panel, slip-form concrete wall. It would look a lot like that. I would set that down within about 3 feet inside the border. I put some wire on top here, stabilize this thing and provide it as a deterrent.

With concrete, you can mount anything on top for sensors. You can do cameras, vibration, motion detectors, you could mount any kind of new technology on top of this concrete. It wouldn't be possible to take a cutting torch through here. If you brought a concrete saw in to cut a notch through it, the noise and the vibration would be transferred down the wall, and our sensor devices would likely pick it up, or we could deploy some Border Patrol to that location.

But as you could see, I would go inside also another 100 feet, and I would put a mesh fence up, even taller than this, so that there will be essentially a no man's land in between the wall and the fence.

There are a lot of designs that would work. This is only one design, but I designed this and put the structure of this together, and I can put the estimate together too. This can be installed for about $1.3 million a mile.

Now, somebody was complaining about the cost of this. What is it, gold plated? Well, you can build a four-lane Interstate for about $4 million a mile, but that's what we are paying the Border Patrol to watch the border right now.

Now, I appreciate the work that they do, and I respect the work that they do, and I support them. They need better tools to work with. This is one of them that can be helpful. This is one of the components, or a version of fence and wall is one of the components to the Secure Fence Act.

This Congress has mandated that that fence be built, and we appropriated money to it last week to the tune of $1 billion. The year before, we appropriated $1,187,565,000 just to round it out to even dollars. We appropriated about $2.2 billion to building the Secure Fence Act, and that includes money for technology, for virtual fence, as well as real fence.

We need to stop the flood at our southern border. We need to dramatically slow the flow of illegal drugs across that border. It will reduce the amount of crime perpetrated and committed against Americans. It will save lives. It will save at least hundreds of lives. It will probably save thousands of lives.

It will be cost effective, and it will send a message that America is a sovereign Nation that will protect its borders, and that we will direct traffic, human traffic and contraband, through the ports of entry. We will need to beef up our ports of entry. We need to have more Customs and Border Patrol people there, and more sophisticated devices there.

But if we can't stop the bleeding at our border, there is no amount of enforcement that we can do in the interior that will be effective. The best description I have heard is the description by Dr. PHIL GINGREY, a Congressman from Georgia, who has worked the emergency room. His description is if you have a patient come in the emergency room when they are bleeding all over the place, and they are bleeding from multiple wounds, and they are bleeding all over the floor, the first thing you don't do is grab the mop and the bucket and start to clean it up. You stop the bleeding. That's what you do.

We have a tremendous amount of bleeding on our southern border. We have got to stop the bleeding, stabilize the patient, and then we can have a debate on how to clean up the mess. It is a tremendous mess here in the United States, because the Federal Government hasn't enforced the immigration laws to the level it needs to, and that has been an open permission slip that has been granted now to a number of the employers who have taken advantage of it. They have hired the cheap labor.

The third thing is birthright citizenship, automatic citizenship that is a magnet for 350,000 pregnant mothers every year who come here to have their children in the United States. It's not a constitutional right, it's a practice to grant them citizenship here because they are born in the United States. Those things work against our sovereignty. Those things work against the middle class, those things would be against the rule of law.

I am going to continue to advocate that we construct this double fence of wall on the southern border, that we complete it and we follow through on the congressional mandate, and we insist that the administration follow through. We need to do border enforcement first, employer enforcement second. When we get those things done, we will have stopped the bleeding and shut off birthright citizenship as the other bleed. Then we could have a debate in this Congress about how to clean up the mess, and it is one, one tremendous mess.

That's my advocacy, that's my policy, that's where I stand.

I appreciate the privilege to address you tonight.

30-SOMETHING WORKING GROUP

The SPEAKER pro tempore. Under the Speaker's announced policy of January 18, 2007, the gentleman from Florida (Mr. MEEK) is recognized for the remainder of the time until midnight.

Mr. MEEK of Florida. Mr. Speaker, it's an honor to come before the House once again. I am glad to be here with my good friend Mr. ALTMIRE.

As you know the 30-Something Working Group, we come to the floor weekly, talk about issues that are facing the Nation, and also give a report on what's happening and what's not happening. We are hoping to do good things on behalf of the American people, and we hope that we can build a relationship with our colleagues on the other side of the aisle, the Republican side of the aisle, to help pass the American agenda.

Mr. ALTMIRE and I usually have some opening comments, and then we usually get into a conversation about some of the issues that we are facing this week, about some of the ongoing issues.

Over the weekend, I took the opportunity, because Mr. ALTMIRE, Mr. RYAN, Ms. WASSERMAN SCHULTZ and Mr. MURPHY, who are part of the 30-something Working Group, we do meet, and we talk about issues that we want to bring before the Members.

I can tell you there are 47 major measures that have passed this floor with a bipartisan vote of 79 percent, so that means that 75 percent of the issues that have passed this floor have had bipartisan support.

I see that we have one of our charts here to show, under the Democratic Congress, that Republicans all along, we were saying in the 109th, 108th Congress, some of them really wanted to vote for the priorities of America and move this in a new direction.

But obviously the Republican leadership in the 109th, 108th, going back even further, did not want to bring those issues to the floor. But when they were brought to the floor, the 9/11 Commission Recommendations, H.R. 1, passed with 299 votes with 68 Republicans voting affirmative; raising the minimum wage, H.R. 2, again, passed 315, passed with 315 votes here with 82 Republicans voting along with Democrats.

The funding to enhance stem cell research, H.R. 3, 257 and 37 Republicans; making prescription drugs more affordable, H.R. 4, 24 Republicans joined the majority of Democrats, passing that measure by 255; cutting student loan interest rates in half, H.R. 5, 356 votes in favor, passed the House with 124 Republicans joining the Democratic leadership on that vote.

□ 2310

And creating long-term energy initiatives, H.R. 6, 264, with 36 Republicans.

And Mr. Speaker, I think it's also important to be able to outline the fact that we want to move in a new direction. And so far, the President has signed the following: The first increase in the minimum wage in almost a decade, which will take effect on July 24 of this year. This is not fiction; it's fact. And it will be fully phased in. It will mean a raise of $4,400.

And also, we passed tax incentives to be able to help small businesses; $3.7 billion in additional emergency funding for veteran and military health care. This is $3.4 billion in additional funds for military readiness also, including armored vehicles and also to meet the National Guard shortfalls that they have been experiencing over some time.

Emergency funding to keep hundreds and thousands of children in 11 States from losing their health care. That's very significant.

Overdue funding to repair and complete flood areas of Louisiana and Mississippi, and also, assisting other gulf coast communities, schools and universities to rebuild and recover from Hurricane Katrina Rita and also Wilma.

Overdue disaster aid to American families and ranchers, more than 80 percent of the funding that they were looking for they were able to receive through this Democratic Congress.

Emergency wildfire funding, to be able to assist communities that have

been waiting on Federal response, and also benchmarks for the Iraqi government and requiring the President to report the progress of the war to the Congress more than two times.

I think it's important to also state the many of the things that we've done here in the House, Mr. Speaker, without needing Presidential approval. We restored pay-as-you-go budget discipline for the first time in 6 years in Washington and received praise from major fiscal watchdog groups.

Also, passed a budget balanced by 2010 with no more deficit spending and no taxes after 2 years of Republican leadership failure to agree on a budget.

I think it's also important that we outline that we've imposed very strict ethics rules in the history of the House; also guaranteed that the House will operate as a green Capitol. I'm glad we have the chair of the Appropriations Committee that deals with the House, House Administration with us, the chairwoman.

Also, the Speaker has convened a National Summit on America's Children, and we're beginning to link Federal policy and law and cutting-edge research as relates to bring development; and also restored Congressional oversight, saving tens of millions of dollars that are being wasted here.

I think it's important that we also outline that stem cell research bill, supported by two out of three Americans, which offers hope for many, many families, is sitting on the President's desk right now waiting for action, Mr. Speaker.

And also, a bill ending the politicizing of the appointments of U.S. attorneys.

I can go on and on, but I think, as it relates to an opening, I think we're off to a great start, Mr. Speaker. And I think it's also important for the Members to realize that, for us to not only end the war in Iraq, but for us to be able to fulfill the dreams and the needs of the American people and those that are in harm's way, that we have to move in a bipartisan way. And when we can't move in a bipartisan way, then we have to take the majority of this Democratic majority that we have now to be able to get 218 votes to be able to carry out the will of the people.

Later on, since Ms. WASSERMAN SCHULTZ has joined us, and I know Mr. ALTMIRE has something to add, too, I want to talk a little bit about the President's address, the President's radio address, because I think it's important that we address these issues as they come up. We should not allow any statement or any speech to go unchallenged because I think the American people, it's time for them to be leveled with. And I can't wait until this thing rolls around again, when we get into open discussion, because this is the good part about the 30-Something Working Group is that we do get an opportunity to kind of volley the ball around.

Mr. ALTMIRE, Happy Father's Day, belated Father's day, sir.

Mr. ALTMIRE. Thank you. Same to you. I had a wonderful Father's Day with my two children, and I'm happy to be back on this Monday night. And I did want to add some levity to the evening, because people watch late night television. We're here; it's after 11:00. And the gentleman perfectly set me up by talking about the President's radio address. So I wanted to read a quote from the President's radio address that, for those that know history and for those that don't, I'm going to remind them of some of the history. They're going to find this quote to be quite entertaining. And this is the President's radio address.

''In the weeks ahead, my administration will continue pushing for earmark reform and holding the line on Federal spending. The American people do not want a return to the days of tax and spend policies. They expect accountability and fiscal discipline in Washington, DC.''

Now, certainly, we don't disagree with that statement, but for those that understand the history of this administration, they can understand why some of us might be amused to hear the President saying such a thing, because I would remind my colleagues, if they need reminding, that prior to President Bush taking office, the 4 years immediately before his term, his first term, we had had 4 consecutive years of budget surplus, surpluses that were forecast as far as the eye can see.

In fact, the Congressional Budget Office scored the 10-year projection of surplus at over $5 trillion of surplus.

So President Bush comes into office, there's every reason to expect these surpluses are going to continue.

Well, what have we seen in the 6-plus years that this President has been this office? Well, we've seen six consecutive budget deficits, deficits that before the Democrats retook control of Congress, were forecast as far as the eye can see. And this has been the biggest spending administration in over the past 6 years before this year, the biggest spending Congresses in the history of this country.

So for the President to get on the radio and come before audiences and lecture the Democrats on fiscal responsibility, and I would re-read that last statement on what he says the American people expect, ''They expect accountability and fiscal discipline in Washington, DC.''

Well, over the course of that 6 years, the President added $3.5 trillion to the national debt. Now, keep in mind what I said earlier, that the projection before he took office was, over the 10-year period, we would have over $5 trillion in surplus. But, instead, in just 6 years, he had an $8 trillion turnaround, from $5 trillion on the plus side to $3 trillion on the deficit side.

And I would suggest, if you had said to an economist going into that term, figure out a way that this is possible, how can a President, using economic policy, working with the Republican-controlled Congress, have a $8 trillion swing from surplus to deficit, most economists would have said, oh, that's impossible. You can't possibly mismanage the economy in such a way that you could have that poor of an outcome. Well, unfortunately, we have.

So here, again, to have this President lecture this Congress on fiscal responsibility is simply inconsistent with the facts.

He also references earmarks in the appropriations process. And we do have Ms. WASSERMAN SCHULTZ here, a member of the Appropriations Committee. And I know she will have something to say about this as well.

But I wanted to remind my colleagues about the history of the 12 years that the Republicans were in control of this House, from 1995 through 2006. Well, for that 12-year period, the 12 budget cycles that we had, I don't know if any of my colleagues would like to venture a guess, how many times in those 12 years do you think the Republican Congress finished the appropriations process on time? How many times were all the appropriations bills completed by October 1, which, under statute, is the beginning of the fiscal year?

The gentlewoman from Florida.

Ms. WASSERMAN SCHULTZ. Would it be none?

Mr. ALTMIRE. Zero. That is correct.

Ms. WASSERMAN SCHULTZ. That would be none

Mr. ALTMIRE. Zero times in 12 years. Now, interestingly, you'd say, well, it must be difficult to do then. Maybe it's not often that we're able to do this. Does the gentlewoman from Florida wish to venture a guess on the last time that the budgets were all completed on time and the appropriations were completed by October 1 in their entirety?

Ms. WASSERMAN SCHULTZ. Mr. ALTMIRE, at the risk of being the little girl who shoots her hand up in the first row of the classroom, that would be the last time Democrats were in control right before the 1994 switch from majority to minority.

□ 2320

Mr. ALTMIRE. Right. In the 1994 year, the Democratic Congress, the last year the Democrats controlled Congress, the Democrats were able to complete all the budget bills, all the appropriations bills on time. The last time it has happened. Then we had 12 years of Republican rule in this Congress, in this House, and we had 12 consecutive years where the appropriations bills were not completed on time.

So it should be no surprise to any of my colleagues and other outside observers that the Republicans are not anxious to see the Democrats come back into power and right away pass all 12 appropriations bills in a timely fashion. So I was not surprised, and I suspect others were not surprised, to see the extraordinary delaying tactics that we saw take place in this House last week, with continual and repeated procedural motions, motions to rise.

And those of us that sat here at 2 o'clock in the morning on that night, we realized that this was not about substance. This was not about policy. This was merely about denying the Democrats a legislative victory because the last thing those on the other side would want is for us to come in and right away pass the appropriations bills on time, which hasn't happened since 12 years ago when we last controlled Congress.

And, lastly, the President mentions earmarks. His quote again: ''In the weeks ahead, my administration will continue pushing for earmark reform.''

Well, what has been the history of earmarks under the Republican Congress? Let's go back to that 12-year period, and I know the gentlewoman knows the answer; so I will spare you the question this time. In 1994, that last year that the Democrats controlled Congress, there were 4,000 earmarks, approximately, in all the spending bills combined for $26 billion. That is what they represented. Now, that sounds like a lot and it is a lot. It is a lot of earmarks and it is a lot of money.

Well, let's compare that to last year, the last year the Republicans controlled Congress. These were the people, you recall, that last week were decrying the use of earmarks and talking about how unfair it was how the Democrats were approaching it, and we have a President now who says he is going to continue pushing for earmark reform, ''continue'' being the operative word there. Well, when you hear the word ''continue,'' let's thing think about what happened last year. Now, recall in 1994, 4,000 earmarks, $26 billion. Last year, 2006, 16,000 earmarks, unprecedented, the highest in the history of the country, $64 billion of earmarks, compared to $26 billion in 1994.

So here again, please spare us the lecture about fiscal responsibility and accountability in the appropriations process and certainly as it pertains to earmarks. We have had, over the past 6 years of this administration and over the past 12 years of Republican leadership in this Congress, the biggest-spending Congress and administration in the history of the country. They spent more money, they ran up bigger deficits, they used more earmarks for more money than any Congress and any administration in the history of the country. So please forgive me if I view with skepticism some of the President's comments over the weekend.

And at this time I will now turn it over to the gentlewoman from Florida.

Ms. WASSERMAN SCHULTZ. Thank you, Mr. ALTMIRE.

And I am going to maybe abbreviate my view on what happened last week and just call it what it is: hypocrisy.

Where were our good friend on the other side of the aisle when they controlled this process for 12 years? And I am not going to spend a lot of time on the process because that is all they have because if they allow the debate to turn to the substance of the legislation, the substance of the appropriations bills that we are moving forward and will pass off this floor, with the vast majority of them supporting it because they have to, because when they admit that the substance of the legislation that we are putting forward in the Homeland Security bill, in the military construction bill, in the other bills that will be coming forward to this floor, they have to admit that not only are they good bills but they go much further and do a much better job of providing for the needs of this country than they ever did.

On the floor last week, I took an opportunity to spend a few minutes debating the process with them. One of the things that I had an opportunity to engage in debate on was where was their outrage on the other side when they controlled this process? Where were the reformers, leaping to their feet, urging and pounding on their leadership to adopt transparency and to adopt a process in which they could have the maximum amount of input into earmark reform?

The answer is it was nonexistent because they didn't care about it. It didn't matter to them. They were very happy fat and happy to take all the earmarks they could get, bring them home, tied up with their lobbyists and their friends and their culture of corruption, all twisted up and intertwined, and that is what their process was like. And our process is clear and transparent and participatory and inclusive, and they can't stand it. So what they have to do is they have to try to muck up the perception of what we are doing here because if they acknowledge what is really going on, not only have we adopted a more inclusive, more transparent process when it comes to earmark reform, but the substance of our legislation they have to support because they know that we are going much further than they did.

I want to go beyond process, though, to President Bush's veto threat of the Homeland Security appropriations bill. He actually has threatened to veto this bill, which is just absolutely astonishing. And one of the things that I have heard him articulate, Mr. MEEK and Mr. ALTMIRE, is that if the Congress proposes to spend $1 over what he proposed in his administration's budget that he would veto any of that legislation. And that includes the Homeland Security bill, which provides for the homeland security needs for our border protection, for our first responders, for the 9/11 Commission recommendations that we passed in the first bill out of this Chamber during our 100-hour push for the Six in 06 agenda, and the President is actually proposing to veto a bill that would ensure that we spend more money on protecting our homeland domestically.

You know, you can argue process and earmarks and reform and all that. But at the end of the day, that is the stark contrast that people of this country have to choose from. When they go to the polls next November and when they evaluate how they think a Democratic Congress is doing versus how a Republican Congress did, at the end of the day, we are passing a Homeland Security appropriations bill that will really provide for the domestic homeland security needs, as opposed to continuing to twist us up and mire us in the war in Iraq with an endless, open-ended commitment that never proposes to get us out of there.

On top of that, we have a President who has been critical of a military construction bill that will provide for the largest single increase in veterans' health care in history. I mean this is how backwards their priorities are. Under the Republican control, their goal was to help lobbyists, was to make sure that they brought home as many earmarks that were pushed by lobbyists as they could. And, instead, what we are doing here is we have transparency, where people will know, anyone can know, who is sponsoring an earmark, where any Member can offer an amendment to strike an earmark, where any Member can offer to sponsor an earmark. Members will be able to participate in the conference process, which you would think that that would be a normal thing, but it wasn't normal under the Republicans because you couldn't even participate as the minority in the conference process.

□ 2330

But at the end of the day, all of that has been a deliberate distraction because they can't argue with the content of our appropriations bills because they are much stronger and go much further and do more for the country than they did. They don't win that debate. They don't win a head-to-head, toe-to-toe debate on the substance, so they have to try to distract people with the process. And that is what I am hopeful that we can get into in this 30–Something hour and future special order hours that we participate in, because what we need to make sure we focus on is the substance of our legislation, because they would like nothing

better than to twist us up in debate on process.

Mr. MEEK.

Mr. MEEK of Florida. Well, Ms. WASSERMAN SCHULTZ, what they say and what we do are two different things. And the good thing about it is that right is on our side and the American people are on our side, be it Republican, Democrat, independent, those that are thinking about voting, those that may be voting for the first time in the 2008 elections. I think it is very important to lay the facts out, and that's what we are doing here tonight.

Mr. Speaker, we go through a great deal of work to make sure that we actually give facts, not fiction. And we know that there is a lot of fiction on this floor. That's what I would call it. And there is another word to call it, but I would just call it ''fiction'' to be honorable in this Chamber. But I think it is also important for us to just take the President's words for what they are. I am reading from his radio address, and this week, the President said the tax-and-spend approach is endangering the economic growth. And balanced budget efforts, mark ''efforts,'' balanced budget efforts, that's what he's calling it, that's what the President is calling it, as it relates to the budget, saying they have passed a budget that would mean higher taxes; put another line under ''higher taxes'' because I want to come back to that; for American families and job creators, put a line under that.

I think it's important, just in that paragraph alone, Mr. Speaker, for me to just dissect that for a moment. Let me just work on that paragraph just for a moment. It's just a paragraph within many, but it's at the beginning of the President's speech. I think it's important, as we start looking at fact versus fiction, I mean, we need to have a segment in the 30–Something group, fact versus fiction, because I think it's important that we do away with the fiction, because we have two wars going on. We have a country that's begging for health care. We have children that we were about to lose their health care if it wasn't for the action of the Democratic majority here to be able to push that effort along and put it on the President's desk for him to sign.

Now, let's just start with the whole piece of endangering and taxes. Listen, I'm on the Ways and Means Committee, and unless there is a meeting that I missed or several days that I missed from Congress, I haven't seen anything that dealt with a tax increase. And I would challenge anyone from the White House or from the minority side of this Chamber to point out somewhere, anywhere, where taxes are being increased. Okay. That's what I thought. I think it is very, very important that we pay very close attention to what's being said here on this floor.

I think it's also important for us to underline ''budget balancing efforts.'' People, Mr. ALTMIRE, they don't want an effort; they want it to happen. Okay? One of the first things we did without the President's approval, thank God we didn't need it, to say that we're going to move pay-as-you-go rules and that we are no longer going to borrow from foreign nations. As soon as I can get my chart over here, I will pull it over, of how much money we have borrowed from foreign nations, Mr. Speaker, more than ever before in the history of the republic. As a matter of fact, I have my old chart here. I will use this one, Ms. WASSERMAN SCHULTZ. For folks here in the Chamber, you know that this is an old chart. And I am really fond of this chart. The rubber stamp is in my office under lock and key because somehow my velcro chart somehow grew legs and it went somewhere. And I don't know where it is, Mr. ALTMIRE, but I think it's important that we find that chart. I'm going to put pictures around the Capitol. Have you seen the out-of-control borrowing that the Bush Administration and Republican Congress were able to do in the past?

Remember this chart here? And it talked about, it went all the way through 2005? Well, I am going to draw a line through that right now. And I know that we are going to have a new chart here on the floor, because our good people that work with us here, the new number that comes at the end of the 109th Congress and the Republican Congress, this number is no longer 1.50; it is now $1.0019 trillion that the President Bush and the old Republican Congress passed under the rubber stamp policy of the Congress of the past, but not now; $1.01 trillion, 42 Presidents before this President and the past Republican Congress, and between the two, they were able to borrow from foreign nations, these are foreign nations who I have outlined on the next chart, $1.0019 trillion. Historical. Never happened before. No one can point to World War I and World War II.

Who are we borrowing from that we are putting a stop to here in this Democratic Congress? Let's just start with Japan at $644.3 billion. Let's look over at China, Red China of all places, at $349.6 billion. These numbers are old. Many other countries are involved in this. And, you know, that is just one sentence.

Then we move on, ''They have passed a budget that will mean higher taxes for American families and job creators.'' Now, I have already addressed the issue of higher taxes. Taxes have not been raised.

So for the President to say this means that it's fiction. That's the word I choose. Job creators. Who's he talking about? Must be talking about Big Oil. I guess they're creating all kinds of jobs. I know there are a lot of people that are trying to figure out how they are going to get to their job, paying the high prices.

And look at the profits. Wow. And it's funny, remember that little thing I talked about, the meeting at the White House, and Vice President CHENEY with the executives, and then all of a sudden the energy bill was written? And it was almost like every oil executive, somehow they figured out the six numbers to the Lotto. That Lotto happened to be the payoff by the American people. And their stock went skyrocketing up. In 2002, the profits were $6.5 billion in profits. And look, 2007, $30.2 billion, and you're paying almost $3 at the pump. I wonder who the job creators are. And we took some of these incentives and give-aways away, or so-called incentives, that were just tax give-aways of the taxpayers' money back into finding alternative fuels.

Ms. WASSERMAN SCHULTZ. Will the gentleman yield on that point?

Mr. MEEK of Florida. I will yield, yes.

Ms. WASSERMAN SCHULTZ. Let's zero in specifically on what we did compared to what they did. If you recall, that was the energy bill that they held open for 40 minutes longer than our normal time limit so they could twist enough arms to get the votes to ensure that they could give the oil companies $14 billion in subsidies, give them those subsidies in the face of world record profits. Now, you know, we support profit. Profit is a good thing. Profit is not a bad word; it's a good thing. But when you are doing what they did, which was forgive the royalties that the oil industry would have been required to pay the Federal Government; they are supposed to pay the Federal Government to use the land that they drill on in exchange for the oil that they pull out and make a profit on. And the Republican majority gave away the $14 billion and said, no, no, no, very profitable oil industry, that's okay, you don't have to pay us. Just put that in your pocket, no problem. And what we did, as part of our 100-hour agenda in the Six in '06 bills that we passed when we first became the majority is we passed a bill that repealed those $14 billion in give-aways and said, what we are going to do with that money is we are going to use it to fund alternative energy research so that we can make sure that we truly make a commitment to wean ourselves off of our addiction to foreign oil, which were nice words that the President said in the State of the Union last year, but then promptly he signed that energy bill that gave $14 billion in subsidies away to the oil industry. So I just wanted to jump off that poster because it really needed to be zeroed in on.

Mr. MEEK of Florida. You know, Ms. WASSERMAN SCHULTZ, and thank you for yielding back.

Mr. ALTMIRE, this is why we come to work, this is why we, Members of Congress, Mr. Speaker, to be able to point out, and I love this whole fact versus fiction. You know, this is probably going to be my new top ten because I think it's important that we outline these issues. Because the American people, hopefully what we are sharing with them, it's fact. Now, folks start writing speeches and start saying, well, what sounds better or using words like efforts, you know ''efforts'' is open-ended.

□ 2340

Well, you know, I make a great effort to do some things around the house. But eventually I will get around to them. Well, we are dealing with the Federal Treasury, and it is not some sort of slush fund. That is the way it has been treated. We are talking about accountability.

I also want to point out Mr. Bob Novak, I don't think I am on his Kwanzaa list and he is not on mine, but he is one of the most conservative writers here in this town and well-known, and I appreciate his work, and we see him moving around on Sunday talk shows.

This is interesting. ''Bush veto strategy.'' This is in the Washington Post. Just in case, we like third-party validators. We want you to go on, we want Members to be able to go on WashingtonPost.com. And this was June 18. It was actually on A–17, if you have an old copy of the Washington Post.

I will go down to paragraph three, where it talks about Bush was the first President since John Quincy Adams not to exercise his veto power during the complete 4-year term, even though the Republican-controlled Congress was on a spending spree.

All right, we have heard of shopping sprees. You look in the dictionary, let's just do it. Let's do it because we can. Let's do it because we can borrow from foreign nations and put this country in a posture that it has never been in before.

He has two bills in his second term, rejecting only the Iraq war bill, since the Democrats took control.

Let me just say this. One of them was that. Let me just point that out, Ms. WASSERMAN SCHULTZ, Mr. ALTMIRE. It is important that we outline that, that we outline the fact that the President has had a rubber-stamp Congress, and that even the conservative writers are saying, wait a minute. All of a sudden now you want to be Mr. Veto. You want to send a letter to the Speaker of the House saying if you go $1 over my projected budget and I am going to veto the bill, even if it means healthcare for children, Ms. WASSERMAN SCHULTZ, even if it means better healthcare for our veterans that are coming back and that are here and that are waiting in line 8 or 9 weeks to see the ophthalmologist, which is not what they signed up for and not the promise that we gave them. Even if it means that school districts will not have the money that they deserve as it relates to the Federal dollar.

The bottom line is I wish the President and I wish the Republican side had the kind of courage to stand up to corporate America when they were giving away all of the taxpayers' money during their spending spree. This is now what I am saying. This is what Bob Novak is saying.

I think it is also important to note that one of our Republican colleagues took enough time to get 147 votes against the Homeland Security bill, an appropriations bill, and also it is important that we point this out, because this was done to be able to say that we can withstand a veto. I think it is 146 that is needed to make sure that we can override the President if we need to override him.

The last point I want to make on this topic, you know I always have a number of points, but after we passed the bill that the American people wanted, date on redeployment of when troops will be redeployed out of the field and letting the Iraqi government know we will not be in the middle of a civil war forever and ever and ever, and passed this House and it passed the Senate. And before the President could even get to it, Republicans marched down to the White House, had lunch, and came out and said, ''We stand with the President in not overriding his veto. We say that we stand with the President.''

That is what the Republicans said. Not one Democrat was at the White House. I want to know how many more times that Republicans are going to go down to the White House and stand with the President. Are they going to stand in front of VA Healthcare? Are they going to stand in front of universal healthcare for children? Are they going to stand in front of everything that we came to Congress to do? And I talking about Democrats and Republicans?

And I am just going to say it, not every Republican went to the White House, but enough to be able to stop us from doing the business of the people of this country. And I think it is important that we outline these issues. Go to WashingtonPost.com.

There is an old saying out there, if I am lying, I am flying. The bottom line is this: It is right here. I didn't write it. Mr. Novak wrote it.

Ms. WASSERMAN SCHULTZ. If the gentleman will yield, I am so pleased. We are all pleased that we have been joined by Mr. ALTMIRE and the 40 other Democratic freshmen in his class who are majority makers who came to Congress to help us move this country in a new direction and make it possible to move this country in a new direction.

The stark contrast you are talking about, where you have tired old, same old, do business as shall Republicans standing with the Republican standing with the President, supporting his veto, his suggestion that he would veto the Homeland Security appropriations bill.

Now, I sit on the Appropriation Committee so I know what is in that bill and had an opportunity to comment on it and participate in it, and I am proud to have supported it.

But I would like Mr. ALTMIRE, given that he is part of the new direction Democrats and our freshmen class who brought us to this point, to outline for us, let's talk just exactly what the President is talking about vetoing. Let's outline that for folks.

Mr. ALTMIRE. I appreciate the gentleman and Ms. WASSERMAN SCHULTZ.

I did want to make clear, just for anyone who is watching this debate, that all of these bills that the President is threatening to veto over spending are compliant with pay-as-you-go policy. That is critical.

Mr. MEEK of Florida. You are not borrowing and you are not taxing, am I correct?

Mr. ALTMIRE. It means we as the Congress are doing the same thing the American people have to do in their own home. Checkbooks, you have to have money on one side of the ledger if you want to spend it on another. That is something this Congress has not done.

Ms. WASSERMAN SCHULTZ. Were PAYGO rules, in other words, not spending more than you are taking in, were those in place before Democrats took over the Congress?

Mr. ALTMIRE. They came into place in the 1990 budget agreement.

Ms. WASSERMAN SCHULTZ. I mean just a few months ago, before November 7, in the 109th Congress.

Mr. ALTMIRE. They were allowed to expire, and that led to the record deficits of the past 6 years that I talked about earlier.

Ms. WASSERMAN SCHULTZ. And who reinstated the PAYGO rules to make sure that we didn't spend more money than we took in?

Mr. ALTMIRE. On our very first day in Congress, it was this Congress that reinstated the pay-as-you-go. As a result, all of these appropriations bills that the President is threatening to veto, for the first time in 6 years, these appropriations bills are compliant with PAYGO. They say simply, as I said, you have to have money on one side to pay for it on the other. If you want to increase spending, or decrease revenue, for that matter, you have to find an offset to pay for it on the other side of the ledger. That is what the President is talking about vetoing.

Specific to the Homeland Security appropriations bill, which we passed last week, I just wanted to talk a little

bit about immigration. Boy, we hear a lot about immigration, around the country on talk radio. I am sure each of you in your Florida districts hear about it. I can promise you in my Western Pennsylvania district, I hear more about immigration than I hear about any other issue, and there is not even a close second.

It is an important issue. It is an issue for a lot of people that we have illegal immigrants coming across the border. And for anyone who is talking about this Homeland Security bill that is concerned about that issue, I want to tell you that in this bill we have money for fencing.

The speaker before us had his prop out where he was showing about building a fence along the border. This bill has money to build the fence.

This bill has money for new technologies for detection of immigrants, illegal immigrants coming across the borders.

This bill has increased border agents and security agents that are able to enforce our laws, 3,000 new border agents along our southern border with Mexico.

It has new detention beds. We have a catch-and-release program where we don't have the capacity to hold on to folks that we are catching on the southern border, so we simply release them. This bill has money to stop that practice with new border agents and new detention beds.

So for anyone that is watching this debate that is concerned about immigration and thinks we need to secure the boarders, we agree, and we passed a bill to make that happen. That is the bill the President is threatening to veto.

We also have port and aviation security measures. We have a situation where as a result of 9/11 we have to be very concerned about our aviation security, certainly, and our port security. We have money in this bill to increase our security on both of those. That is what the President is threatening to veto.

We have increased the money available for first responders. The President cut by 55 percent firefighter funding. So anyone who is concerned about firefighters, can you think of a more worthy commitment for our Federal spending priorities than the brave men and women who put their lives on the line every single day here at home to keep us safe and are doing it on a voluntary basis through the fire department?

The President cut that funding by 55 percent in his budget. Well, we restored that, because our priorities say that we should find that money, and through pay-as-you-go we did find the money to pay for that. But we put that money back in for our firefighters and our police, our first responders.

Lastly, before I turn it over to Ms. WASSERMAN SCHULTZ, who can speak as a member of the Appropriations Committee, this is so important. This bill ensures our tax dollars are spent wisely with the requirement for competitive bidding on contracts.

Now, anyone who has followed what happened in the Homeland Security arena over the past several years, and certainly that includes Katrina and the fiasco that took place with the no-bid contracts thereafter along the Gulf Coast, knows how important it is to ensure that our tax dollars are spent in a responsible and fiscally rational way.

□ 2350

We do that through the requirement that we do competitive bidding on contracts which has been in very short supply over the past 6 years.

So that is what is in this bill. We secure our borders. We put money into detection and prevention and detention of illegal immigrants. We secure our aviation, our airplanes and our airports. We secure our ports. We put money in for first responders. That is what the Homeland Security bill does, and that is what the President is threatening to veto.

Ms. WASSERMAN SCHULTZ. Mr. Speaker, I appreciate the gentleman outlining what the President has been threatening to veto.

I want to take it a step beyond the Homeland Security appropriations bill and outline a few of the other bills all related to homeland security that the President has also threatened to veto. Tonight what we aim to show, fact versus fiction, is basically who is for homeland security and who is just kidding, who is just talk, who is just a lot of hot air, versus who is supportive of putting forward substance.

The only thing I can think of in terms of a reason that you have these veto threats and suddenly the President discovers ink in his pen, never having threatened a veto in his first 6 years, instead of an ''R'' next to the idea there is a ''D'' next to the idea. Now this is from a person who has talked a really nice story about being bipartisan and working with the Democratic Congress. This is how he has been proposing to work with the Democratic Congress: proposing to veto the Homeland Security appropriations bill which has a lot of very important issues that went unaddressed by the Republican Congress.

Also, threatening to veto the 9/11 Commission recommendations which was his own 9/11 Commission. We just passed that bill in our Six in 06 agenda with a vote of 299–128. And that would fully implement the 9/11 Commission recommendations.

The Homeland Security authorization bill which is the statutory provisions in Homeland Security that go with the appropriations bill, he has threatened to veto that. That authorizes $40 billion for the activities of the Department of Homeland Security and includes strong accountability measures which were nonexistent under the Republican majority.

He has threatened to veto the rail and transit security bill, H.R. 1401, which requires the Department of Homeland Security to develop plans to protect rail and mass transit and authorizes $6 billion over 4 years in grants to protect those systems. We don't have a system in place to protect rail and mass transit.

In south Florida, we don't have a really strong mass transit system. You do in the major populations across the country. How many times have you been on a train and been checked or gone through security? There are no security measures around our rail system. We proposed legislation to do that, and the President is threatening to veto that.

The Dubai Ports bill, maybe people have forgotten about the proposal that the administration was completely supportive of and allowed to sail through their FISA process that would have allowed essentially a state foreign-owned company to own port terminals in America. I mean, that just sailed through the administration's process. They basically ignored Federal law and allowed it to happen. We passed a law to tighten that. That passed 423–0. No threat to veto there. We weren't going to allow that situation to continue. We need to ensure foreign countries do not own our port terminals and further undermining our security in America.

Now we have passed the military construction appropriations bill that would ensure that we have the largest single increase in veterans health care in American history, in addition to the Wounded Warrior Assistance Act which responds to the Walter Reed scandal, also ignored by the Republicans. That passed 426–0, but it took Democrats to pass that legislation.

Really what this is about is who is for homeland security and who is just talk; who is for homeland security and who is just kidding. At the end of the day, actions are what speak louder than words. It is what you learned in kindergarten: Follow what people do, don't just listen to them talk, talk, talk. We have to show the American people what the Democrats are trying to accomplish that Republicans and this President is trying to block.

Mr. ALTMIRE. I just want to remind our colleagues who are with us tonight and watching us tonight that this is about preventing the Democrats from a legislative victory. It is not about the budget because this is compliant with pay-as-you-go rules.

I was amused in listening to the gentlewoman from Florida when I thought about what one of the major Republican Presidential candidates said recently, ''The Democrats don't understand terrorism.'' The gentlewoman

went through a very lengthy list of things that we have done here in the first 6 months on homeland security and on terrorism, and the fact that the President is threatening to veto many of those initiatives.

I would ask the question rhetorically, who among us, the Democrats or Republicans, don't understand terrorism? I think we are the ones putting forward initiative after initiative after initiative compliant with PAYGO rules to prevent terrorist attacks, as much as it is possible to do that, and to address these issues in a way that has not been done. It has languished for years.

The 9/11 Commission recommendations were put forward in 2003. Here we are 4 years later. September 11 took place nearly 6 years ago. We still have not implemented the recommendations of the 9/11 Commission, and that is indefensible.

I would just say to anyone who says it is the Democrats who don't understand terrorism to take a look at the list that the gentlewoman has put forward that we have done in only 6 months after these initiatives have languished year after year.

Mr. Speaker, I tell my colleagues, for more information, if they would like to learn, of course you can go to Speaker.gov/30something, or there is now a link on the Speaker's Web site to the 30-Something Working Group of which the three of us are members as well as Mr. MURPHY and Mr. RYAN and others. So that site is www.speaker.gov, click on the 30-Something icon and you can learn more about the issues and see the charts, even the gentleman's Velcro chart which is now missing.

Ms. WASSERMAN SCHULTZ. And you can e-mail us as well.

Mr. ALTMIRE. That is 30somethingDems@mail.house.gov.

Mr. MEEK of Florida. I would like to thank Mr. ALTMIRE and Ms. WASSERMAN SCHULTZ.

Mr. Speaker, we have to remember that $2 billion-plus a week are being spent in Iraq as we are here trying to resolve issues that we don't have money to resolve them.

Also I think it is important, at the top of the hour I meant to give this report, but as of this morning, June 18, 2007, at 10 a.m. the death total in Iraq is 3,517. Wounded in action and returned to duty is 14,283. Wounded in action and not returning to duty is 11,667. I think it is important that we share that with the Members constantly.

Mr. Speaker, I am also asking Members, I am trying to find a picture and I have been looking high and low for somebody to e-mail us a picture of this great White House meeting that the President had with the Republicans standing behind him saying they won't participate in overriding his veto of accountability in Iraq. I need that picture because we need that to be a chart so that we can discourage our friends on the other side of the aisle from going down and standing in the schoolhouse door on behalf of the majority of Americans' priorities.

Mr. Speaker, it was an honor to address the House once again.

LEAVE OF ABSENCE

By unanimous consent, leave of absence was granted to:

Mr. ABERCROMBIE (at the request of Mr. HOYER) for today and June 19 until 6:00 p.m.

Mr. BISHOP of Georgia (at the request of Mr. HOYER) for today.

Mr. CONYERS (at the request of Mr. HOYER) for today.

Ms. ESHOO (at the request of Mr. HOYER) for June 7 after 3 p.m. and June 15 after 4 p.m.

Mr. REYES (at the request of Mr. HOYER) for today on account of travel delays due to weather.

Mr. LUCAS (at the request of Mr. BOEHNER) for today on account of travel delays.

Mr. SULLIVAN (at the request of Mr. BOEHNER) for today on account of longstanding family obligations.

SPECIAL ORDERS GRANTED

By unanimous consent, permission to address the House, following the legislative program and any special orders heretofore entered, was granted to:

(The following Members (at the request of Ms. WOOLSEY) to revise and extend their remarks and include extraneous material:)

Mr. DEFAZIO, for 5 minutes, today.

Ms. WOOLSEY, for 5 minutes, today.

Ms. WATERS, for 5 minutes, today.

(The following Members (at the request of Mr. POE) to revise and extend their remarks and include extraneous material:)

Mr. POE, for 5 minutes, June 25.

Mr. JONES of North Carolina, for 5 minutes, June 25.

Mr. GARRETT of New Jersey, for 5 minutes, June 19 and 20.

Mr. BURTON of Indiana, for 5 minutes, today, June 19, 20, 21 and 22.

Ms. GINNY BROWN-WAITE of Florida, for 5 minutes, today.

Mr. GINGREY, for 5 minutes, today.

Mr. KUHL of New York, for 5 minutes, today.

(The following Member (at her own request) to revise and extend her remarks and include extraneous material:)

Ms. FOXX, for 5 minutes, today.

ADJOURNMENT

Mr. MEEK of Florida. Mr. Speaker, I move that the House do now adjourn.

The motion was agreed to; accordingly (at 11 o'clock and 59 minutes p.m.), under its previous order, the House adjourned until tomorrow, Tuesday, June 19, 2007, at 9 a.m., for morning-hour debate.

EXECUTIVE COMMUNICATIONS, ETC.

Under clause 8 of rule XII, executive communications were taken from the Speaker's table and referred as follows:

2236. A letter from the Chairman and President, Export-Import Bank, transmitting a report on a transaction involving U.S. exports to Israel pursuant to Section 2(b)(3) of the Export-Import Bank Act of 1945, as amended; to the Committee on Financial Services.

2237. A letter from the Principal Deputy Associate Administrator, Environmental Protection Agency, transmitting the Agency's final rule — Revisions to the Nevada State Implementation Plan, Washoe County District Health Department [EPA-R09-OAR-2006-0619; FRL-8327-3] received June 12, 2007, pursuant to 5 U.S.C. 801(a)(1)(A); to the Committee on Energy and Commerce.

2238. A letter from the Principal Deputy Associate Administrator, Environmental Protection Agency, transmitting the Agency's final rule — Protection of Stratospheric Ozone: Allocation of Essential Use Allowances for Calendar Year 2007. [EPA-HQ-OAR-2006-0159; FRL-8325-5] (RIN: 2060-AN81) received June 12, 2007, pursuant to 5 U.S.C. 801(a)(1)(A); to the Committee on Energy and Commerce.

2239. A letter from the Principal Deputy Associate Administrator, Environmental Protection Agency, transmitting the Agency's final rule — Approval and Promulgation of Implementation Plans; Revisions to the Nevada State Implementation Plan; Request for Rescission [EPA-R09-OAR-2006-0590; FRL-8325-8] received June 12, 2007, pursuant to 5 U.S.C. 801(a)(1)(A); to the Committee on Energy and Commerce.

2240. A letter from the Principal Deputy Associate Administrator, Environmental Protection Agency, transmitting the Agency's final rule — Approval and Promulgation of Air Quality Implementation Plans; Indiana; NSR Reform Regulations [EPA-R05-OAR-2004-IN-0006; FRL-8327-1] received June 12, 2007, pursuant to 5 U.S.C. 801(a)(1)(A); to the Committee on Energy and Commerce.

2241. A letter from the Principal Deputy Associate Administrator, Environmental Protection Agency, transmitting the Agency's final rule — Approval and Promulgation of Air Quality Implementation Plans; Indiana; Exemption from VOC Requirements for Sources Subject to the National Emission Standards for Hazardous Air Pollutants for Boat Manufacturing or Reinforced Plastics Composites Manufacturing [EPA-R05-OAR-2006-0716; FRL-8319-8] received June 12, 2007, pursuant to 5 U.S.C. 801(a)(1)(A); to the Committee on Energy and Commerce.

2242. A letter from the Assistant Secretary, Department of Education, transmitting the Department's report on the use of the Category Rating System for the period from June 2006 through May 2007, pursuant to 5 U.S.C. 3319(d); to the Committee on Oversight and Government Reform.

2243. A letter from the Inspector General, Department of Homeland Security, transmitting notice of the initiation of an audit of the Department's consolidated balance sheet and statement of custodial activity as of and for the year ending September 30, 2007; to the Committee on Oversight and Government Reform.

2244. A letter from the Assistant Secretary for Administration and Mgmt., Department

of Labor, transmitting a report pursuant to the Federal Vacancies Reform Act of 1998; to the Committee on Oversight and Government Reform.

2245. A letter from the Administrator, Environmental Protection Agency, transmitting the semiannual report on activities of the Inspector General for the period October 1, 2006, through March 31, 2007, pursuant to 5 U.S.C. app. (Insp. Gen. Act) section 5(b); to the Committee on Oversight and Government Reform.

2246. A letter from the Interim President and Chief Executive Officer, Federal Home Loan Bank of Indianapolis, transmitting the 2006 Statements on System of Internal Controls of the Federal Home Loan Bank of Indianapolis, pursuant to 31 U.S.C. 9106; to the Committee on Oversight and Government Reform.

2247. A letter from the Director, Office of Personnel Management, transmitting a copy of a legislative proposal entitled, ''the Locality Pay Extension Act of 2007''; to the Committee on Oversight and Government Reform.

2248. A letter from the Director, Office of Personnel Management, transmitting a copy of a legislative proposal entitled, ''the Federal Employees Health Benefits Improvements Act of 2007''; to the Committee on Oversight and Government Reform.

2249. A letter from the Inspector General, Railroad Retirement Board, transmitting the semiannual report on activities of the Office of Inspector General for the period October 1, 2006 through March 31, 2007, pursuant to 5 U.S.C. app. (Insp. Gen. Act) section 5(d); to the Committee on Oversight and Government Reform.

2250. A letter from the Staff Director, Commission on Civil Rights, transmitting notification that the Commission recently appointed members to the Virginia Advisory Committee; to the Committee on the Judiciary.

2251. A letter from the Staff Director, Commission on Civil Rights, transmitting notification that the Commission recently appointed members to the Michigan Advisory Committee; to the Committee on the Judiciary.

2252. A letter from the Principal Deputy Assistant Attorney General, Department of Justice, transmitting the Department's report to Congress on stalking and domestic violence, 2005 through 2006, as required by Section 40610 of the Violence Against Women Act of 1994; to the Committee on the Judiciary.

2253. A letter from the Branch Chief, Publications and Regulations, Internal Revenue Service, transmitting the Service's final rule — Safe Harbor for Valuation Under Section 475. [TD 9328] (RIN: 1545-BB90) received June 12, 2007, pursuant to 5 U.S.C. 801(a)(1)(A); to the Committee on Ways and Means.

REPORTS OF COMMITTEES ON PUBLIC BILLS AND RESOLUTIONS

Under clause 2 of rule XIII, reports of committees were delivered to the Clerk for printing and reference to the proper calendar, as follows:

Mr. LANTOS: Committee on Foreign Affairs. H.R. 885. A bill to support the establishment of an international regime for the assured supply of nuclear fuel for peaceful means and to authorize voluntary contributions to the International Atomic Energy Agency to support the establishment of an international nuclear fuel bank; with an amendment (Rept. 110–196). Referred to the Committee of the Whole House of the State of the Union.

Mrs. LOWEY: Committee on Appropriations. H.R. 2764. A bill making appropriations for the Department of State, foreign operations, and related programs for the fiscal year ending September 30, 2008, and for other purposes (Rept. 110–197). Referred to the Committee of the Whole House on the State of the Union.

PUBLIC BILLS AND RESOLUTIONS

Under clause 2 of rule XII, public bills and resolutions were introduced and severally referred, as follows:

By Mr. CAPUANO (for himself, Mrs. MALONEY of New York, Mr. ACKERMAN, Mr. MEEKS of New York, Mrs. MCCARTHY of New York, Mr. CROWLEY, Mr. ISRAEL, Mr. KING of New York, Mr. GUTIERREZ, Mr. WATT, Mr. SHERMAN, Mr. LYNCH, Mr. SCOTT of Georgia, Mr. AL GREEN of Texas, Mr. CLEAVER, Mr. LINCOLN DAVIS of Tennessee, Mr. SIRES, Mr. MAHONEY of Florida, Mr. MURPHY of Connecticut, Mr. WEXLER, Mr. BOREN, Mr. FRANK of Massachusetts, Mr. HODES, and Mr. SHAYS):

H.R. 2761. A bill to extend the Terrorism Insurance Program of the Department of the Treasury, and for other purposes; to the Committee on Financial Services.

By Ms. DEGETTE (for herself, Mr. KILDEE, Mr. CASTLE, and Mr. RENZI):

H.R. 2762. A bill to amend the Public Health Service Act to reauthorize the special diabetes programs for Type I diabetes and Indians under that Act; to the Committee on Energy and Commerce.

By Mr. LAMPSON:

H.R. 2763. A bill to enhance research, development, demonstration, and commercial application of biofuels related technologies, and for other purposes; to the Committee on Science and Technology, and in addition to the Committee on Energy and Commerce, for a period to be subsequently determined by the Speaker, in each case for consideration of such provisions as fall within the jurisdiction of the committee concerned.

By Mr. CARNEY:

H.R. 2765. A bill to designate the facility of the United States Postal Service located at 44 North Main Street in Hughesville, Pennsylvania, as the ''Master Sergeant Sean Michael Thomas Post Office''; to the Committee on Oversight and Government Reform.

By Mr. REYNOLDS (for himself, Mr. MCHUGH, and Mrs. GILLIBRAND):

H.R. 2766. A bill to establish regional dairy marketing areas to stabilize the price of milk and support the income of dairy producers; to the Committee on Agriculture.

By Mr. WELLER:

H.R. 2767. A bill to amend the Internal Revenue Code of 1986 to provide a nonrefundable credit for the purchase of energy efficient tires; to the Committee on Ways and Means, and in addition to the Committee on Energy and Commerce, for a period to be subsequently determined by the Speaker, in each case for consideration of such provisions as fall within the jurisdiction of the committee concerned.

By Mr. HOYER (for himself and Mr. BOEHNER):

H. Res. 491. A resolution providing for earmark reform; considered and agreed to.

By Ms. CASTOR:

H. Res. 492. A resolution honoring William ''Bill'' Clifton France, the former president, chief executive officer, and chairman of NASCAR, for his lifetime of contributions and dedication to motorsports; to the Committee on Oversight and Government Reform.

By Mr. LEWIS of California:

H. Res. 493. A resolution congratulating the women's water polo team of the University of California, Los Angeles, for winning the 2007 NCAA Division I Women's Water Polo National Championship, and congratulating UCLA on its 100th NCAA sports national title, making it the most accomplished athletic program in NCAA history; to the Committee on Education and Labor.

By Mrs. MALONEY of New York (for herself, Mrs. LOWEY, Mr. MCGOVERN, Mr. ROSS, Mr. WAXMAN, Mr. CROWLEY, Ms. JACKSON-LEE of Texas, Mr. CUELLAR, Mr. ISRAEL, Mr. ENGEL, Mr. FATTAH, Mr. LANTOS, Ms. EDDIE BERNICE JOHNSON of Texas, Mr. JOHNSON of Georgia, Mr. SERRANO, Mr. TOWNS, Ms. WASSERMAN SCHULTZ, Ms. MCCOLLUM of Minnesota, Mr. HILL, Mr. DICKS, Ms. CARSON, Mr. KLEIN of Florida, Mr. WEINER, Mr. HONDA, Mr. HASTINGS of Florida, Mr. BACA, Mr. DINGELL, Mrs. TAUSCHER, Mr. MORAN of Virginia, Mr. SIRES, Mr. PAYNE, Ms. MATSUI, Mr. STARK, Mr. BISHOP of New York, Ms. NORTON, Mr. COHEN, Mr. DAVIS of Illinois, Mr. BERRY, Mr. KENNEDY, Mr. GEORGE MILLER of California, Mr. ACKERMAN, Mr. EMANUEL, Mr. SNYDER, Mr. BERMAN, Mr. LINCOLN DAVIS of Tennessee, Mr. CONYERS, Mr. KIND, Mr. CUMMINGS, Mrs. JONES of Ohio, Mr. KANJORSKI, Mr. SCOTT of Virginia, Ms. ZOE LOFGREN of California, and Ms. CLARKE):

H. Res. 494. A resolution honoring the esteemed former President William Jefferson Clinton on the occasion of his 61st birthday; to the Committee on Oversight and Government Reform.

By Ms. WATSON (for herself and Mr. BUTTERFIELD):

H. Res. 495. A resolution honoring the life and achievements of Dame Lois Browne Evans, Bermuda's first female barrister, Attorney General, and Opposition Leader in the British Commonwealth; to the Committee on Foreign Affairs.

ADDITIONAL SPONSORS TO PUBLIC BILLS AND RESOLUTIONS

Under clause 7 of rule XII, sponsors were added to public bills and resolutions as follows:

H.R. 25: Mr. WAMP.

H.R. 156: Mr. SCOTT of Virginia and Mr. COHEN.

H.R. 322: Mr. GOODLATTE.

H.R. 380: Ms. SHEA-PORTER.

H.R. 543: Mr. BLUMENAUER.

H.R. 690: Mr. PASTOR, Ms. GIFFORDS, Mr. EDWARDS, and Mr. MICHAUD.

H.R. 693: Ms. WATERS, Mr. BUTTERFIELD, Mr. HASTINGS of Florida, Ms. PRYCE of Ohio, Ms. CORRINE BROWN of Florida, and Ms. CASTOR.

H.R. 695: Mr. SESTAK.

H.R. 704: Mr. DAVID DAVIS of Tennessee.

H.R. 728: Mr. LINCOLN DAVIS of Tennessee.

H.R. 776: Mr. BLUMENAUER.

H.R. 821: Mr. JINDAL.

H.R. 864: Mr. WALDEN of Oregon.

H.R. 938: Mr. BILBRAY.

H.R. 962: Mr. JACKSON of Illinois.

H.R. 980: Mr. HINCHEY, Mr. RANGEL, and Mr. REHBERG.

H.R. 1078: Mr. WOLF.
H.R. 1125: Ms. HIRONO, Mr. CARTER, and Mr. GRIJALVA.
H.R. 1174: Mr. ARCURI.

AMENDMENTS

Under clause 8 of rule XVIII, proposed amendments were submitted as follows:

H.R. 2641

OFFERED BY: MR. GARRETT OF NEW JERSEY

AMENDMENT NO. 8: At the end of the bill, before the short title, insert the following new section:

SEC. 503. None of the funds made available in this Act may be used to send or otherwise pay for the attendance of more than 50 employees from a Federal department or agency at any single conference occurring outside the United States.

H.R. 2641

OFFERED BY: MRS. MUSGRAVE

AMENDMENT NO. 9: At the end of the bill (before the short title), insert the following new section:

SEC. 503. Each amount appropriated or otherwise made available by this Act that is not required to be appropriated or otherwise made available by a provision of law is hereby reduced by 0.5 percent.

H.R. 2641

OFFERED BY: MR. UPTON

AMENDMENT NO. 10: Page 24, line 20, after the dollar amount, insert ''(increased by $4,000,000,000)''.

Page 24, after line 22, insert ''$4,000,000,000 shall be available for advanced nuclear energy facilities,''.

H.R. 2641

OFFERED BY: MR. UPTON

AMENDMENT NO. 11: At the end of the bill (before the short title), insert the following:

SEC. 503. None of the funds made available in this Act may be used to purchase light bulbs unless the light bulbs have the ''ENERGY STAR'' designation.

H.R. 2641

OFFERED BY: MR. PRICE of Georgia

AMENDMENT NO. 12: At the end of the bill, before the short title, insert the following new section:

SEC. 503. Each amount appropriated or otherwise made available by this Act that is not required to be appropriated or otherwise made available by a provision of law is reduced by 1 percent.

H.R. 2641

OFFERED BY: MR. GOHMERT

AMENDMENT NO. 13: At the end of the bill, before the short title, insert the following:

SEC. 503. NO FUNDS FOR CERTAIN SETTLEMENT.

None of the funds made available in this Act may be used to implement the Stipulation of Settlement dated September 13, 2006, in the litigation captioned Natural Resources Defense Council, et al. v. Kirk Rodgers, et al., United States District Court, Eastern District of California, No. CIV. S-88-1658–LKK–GGH.

H.R. 2641

OFFERED BY: MR. CAMPBELL OF CALIFORNIA

AMENDMENT NO. 14: At the end of the bill (before the short title), insert the following:

SEC. 503. Appropriations made in this Act are hereby reduced in the amount of $1,305,000,000.

H.R. 2641

OFFERED BY: MR. CAMPBELL OF CALIFORNIA

AMENDMENT NO. 15: At the end of the bill (before the short title), insert the following:

SEC. 503. Appropriations made in this Act are hereby reduced in the amount of $1,130,000,000.

H.R. 2641

OFFERED BY: MR. HENSARLING

AMENDMENT NO. 16: Page 38, strike lines 7 through 13.

H.R. 2641

OFFERED BY: MR. NEUGEBAUER

AMENDMENT NO. 17: Page 37, strike lines 9 through 19.

H.R. 2641

OFFERED BY: MR. HENSARLING

AMENDMENT NO. 18: Page 25, line 14, after the second dollar amount, insert ''(reduced by $27,950,000)''.

H.R. 2641

OFFERED BY: MR. KLINE OF MINNESOTA

AMENDMENT NO. 19: Page 18, line 10, after the dollar amount insert ''(reduced by $142,000,000)''.

H.R. 2641

OFFERED BY: MR. HENSARLING

AMENDMENT NO. 20: Page 17, line 3, after the dollar amount insert ''(reduced by $19,224,000)''.

H.R. 2641

OFFERED BY: MR. CAMPBELL OF CALIFORNIA

AMENDMENT NO. 21: Page 16, line 19, after the dollar amount insert ''(reduced by $101,550,000)''.

H.R. 2641

OFFERED BY: MR. HENSARLING

AMENDMENT NO. 22: Page 11, line 21, after the dollar amount, insert ''(reduced by $55,000,000)''.

H.R. 2641

OFFERED BY: MR. HENSARLING

AMENDMENT NO. 23: Strike Section 105.

H.R. 2641

OFFERED BY: MR. WESTMORELAND

AMENDMENT NO. 24: Page 4, line 9, after the dollar amount, insert ''(reduced by $18,000,000)''.

H.R. 2641

OFFERED BY: MR. WESTMORELAND

AMENDMENT NO. 25: Page 5, line 8, after the dollar amount, insert ''(reduced by $184,241,000)''.

H.R. 2641

OFFERED BY: MR. WESTMORELAND

AMENDMENT NO. 26: Page 3, line 8, after the dollar amount, insert ''(reduced by $481,186,000)''.

H.R. 2641

OFFERED BY: MR. WYNN OF MARYLAND

AMENDMENT NO. 27: At the end of the bill, before the short title, insert the following:

SEC. 503. Of the amount made available for Energy Efficiency and Renewable Energy for the Department of Energy, $213,000,000 shall be made available for hydrogen technologies as authorized by section 974 of the Energy Policy Act of 2005 (42 U.S.C. 16314).

H.R. 2764

OFFERED BY: MR. CULBERSON

AMENDMENT NO. 1: In the item relating to ''DEVELOPMENT ASSISTANCE'', insert before the period at the end the following: ''*Provided further*, That, of the funds made available under this heading, not less than $20,000,000 shall be made available for rural water and sanitation projects in East Africa''.

EXTENSIONS OF REMARKS

COMMEMORATING THE 25TH ANNIVERSARY OF THE VIETNAM MEMORIAL WALL

HON. RICHARD E. NEAL
OF MASSACHUSETTS
IN THE HOUSE OF REPRESENTATIVES

Monday, June 18, 2007

Mr. NEAL of Massachusetts. Madam Speaker, I would like to take a moment to reflect upon the events of 25 years ago and to remember the tremendous sacrifice a generation of veterans and their families made for our country at that time.

58,256 names are engraved on the black granite walls of the Vietnam Memorial Wall here in Washington, DC to honor America's war dead of a generation ago. The stories of these individuals and their families make our hearts ache today and will never be forgotten.

Jo-Ann Moriarty, a reporter from The Republican newspaper in Springfield, MA, compiled a series of stories this Memorial Day about Vietnam veterans from Western Massachusetts that touches upon their experience while serving our country. Their stories are remarkably similar to those being told by the brave men and women serving in Iraq and Afghanistan today. Sharing this history is critically important so that we never forget the serious impact of war.

I would like to submit the first two pieces of Jo-Ann Moriarty's series into the CONGRESSIONAL RECORD today for others to enjoy, and to thank veterans from Massachusetts and across America for their service to our country.

[From the Republican, May 27, 2007]

RAW EMOTIONS SURFACE AT VIETNAM MEMORIAL

(By Jo-Ann Moriarty)

At each end of the Vietnam Memorial Wall, the black granite rises only 8 inches above the earth—ankle high.

But, with each step forward, visitors find themselves sinking deeper and deeper into a well of names—tens of thousands of names of America's young men—engraved on a stone wall that, at its center, towers 10 feet.

For many veterans of the Vietnam War, it feels as if they are descending into an abyss. It can be suffocating.

All those names etched into the wall take one's breath away. They find themselves drowning in memories and images of buddies and brothers they loved and lost.

Marine Corps Capt. Daniel M. Walsh III, now the director of veteran affairs for the city of Springfield, had his sergeant, Leonard A. Hultquist, die in his arms during combat just moments before he, himself, was struck by a bullet.

Under fire, Army Cpl. Heriberto Flores, who is today the head of the New England Farm Workers Council in Springfield, was a door gunner aboard a UH–1 Huey helicopter when he saw his friend from Springfield, Army Spc. Paul E. Bonnette, hit by enemy fire. He was 21.

This marks the 25th anniversary year of ''the wall,'' a long, thin line of black granite that stretches 246.9 feet along the National Mall. Nestled into the landscape below the lofty monuments that honor George Washington and Abraham Lincoln, it is the nation's memorial to its war dead in Vietnam.

It was designed by Maya Lin, an Asian-American, at the age of 21 while she was still an undergraduate at Yale University.

It bears 58,256 names.

It took a decade after its building before Walsh, Flores or Springfield attorney Frederick A. Hurst could make their visits. Hurst's youngest brother, Army Spc. Ronald C. Hurst, was killed April 12, 1967, when the Jeep he was driving struck a landmine in Vietnam.

''It was emotional,'' said Flores, who ultimately first visited the monument with his wife, Grace.

Hurst stenciled his brother's name during his visit. ''It was tough,'' he recalled recently.

Walsh only went because he was engineered there by three of his young sons, one of whom became a Marine and all of whom wanted to know their father's history.

''I never had any intention of going to see it,'' Walsh said. ''We lost a lot of people. A lot of people were hurt. A lot of bad things happened.''

The wall holds the names of guys with whom Walsh shared foxholes and who were friends from Holy Name School—like Army Sgt. Walter ''Buddy'' J. Fitzpatrick, of Springfield, killed in combat in South Vietnam on March 3, 1967, and Army Lt. Bernard J. Lovett Jr., also of Springfield, whose tour of duty in Vietnam began on July 22, 1970 and ended when he was killed in action on Oct. 16, 1970 in Hua Nghia.

Walsh knew and admired another Springfield friend, Marine Capt. Ralph E. Hines, who was killed in combat on Feb. 19, 1967. He was 28.

Oddly, when Walsh finally made it to the wall, he found the unexpected.

''It was peaceful,'' Walsh said. ''The memories kept flowing back, a lot were good, with the troops.''

In Vietnam, Flores saw duty aboard Huey helicopters, dropping infantrymen in the field in the morning and collecting them in the afternoon. He would notice fresh faces among the troops and pray they would make it back on the helicopter by the end of the day. Some were waiting in body bags.

To Flores, the wall is validation.

''I think it is closing the circle,'' Flores said. ''Certain lessons we've learned. The nation has honored us. For so many years, we were losers. And now, people realize we were soldiers.''

Those soldiers were in a no-win situation as Vietnam devolved into a civil war where the enemy and the innocent were hard to distinguish. Army infantrymen and Marines snaked through the jungles, going from hilltop to hilltop, moving constantly while the Navy patrolled seemingly endless rivers and the Air Force and Army flight crews performed missions from above. Vietnam was a place of guerilla warfare and underground tunnels, where everyone—man, woman or child—could be the enemy, or not.

There was the My Lai massacre, in which American soldiers killed hundreds of innocents, and back home anti-war protestors chanted outside of President Lyndon B. Johnson's White House, ''Hey, hey LBJ, how many kids did you kill today.''

''Anyone there was a loser,'' said Westfield native Benjamin Sadowski Jr., the son of a survivor of the famed World War II Battle of the Bulge, who survived his own combat tour in Vietnam.

Up north in the tiny Franklin County town of Shelburne Falls, which had a population of about 2,600 at the time, families grieved the loss of four of their sons in Vietnam.

Altogether, from the four counties of Western Massachusetts, the Vietnam War claimed 200 casualties, 50 in the city of Springfield alone.

''Two of my best buddies, plus my brother,'' said John E. ''Jack'' Palmeri, whose brother James E. ''Jimmy'' Palmeri died 11 days after being hit by mortar fire on Feb. 26, 1967. He was 20.

Jack Palmeri, who enlisted in the Army and was sent to Germany, had advised his younger brother to do the same. ''But Jimmy said, 'I can't stand the military for three years. I'll take my chances.' ''

While others shed their uniforms when returning home from services, Jack Palmeri wore his home in honor of his brother and his friends, Army Spc. Ronald E. Wissman, killed at age 20 in action on May 21, 1967, and Marine Capt. Paul T. Looney, a helicopter pilot shot down on May 10, 1967.

For those who returned home, he said, ''We were not welcomed. The country was divided and Vietnam divided it.''

In those days, there was sometimes no distinction between the hatred of the Vietnam War and the U.S. troops who fought there.

The nation was torn apart by race riots. Anti-war protesting students were caught up in the homefront violence seen in the assassinations of Martin Luther King Jr. and Robert F. Kennedy in 1968.

Kennedy, running a presidential campaign on the promise of getting out of Vietnam, was shot dead in June. Months after his killing, the 1968 Democratic Convention in Chicago was engulfed in violence in the streets—the Chicago cops beating the long-haired protesters who had gathered to demonstrate against the war in Vietnam.

There were the killings of four students at Kent State University as they protested the U.S. invasion of Cambodia in 1970, shot dead by Ohio National Guardsmen.

There was Vietnam veteran and future U.S. senator John F. Kerry in 1971 in combat fatigues testifying against the war before the Senate Foreign Relations committee.

And, the U.S. troops, fighting in a divided country half-way round the world, wound up returning home to another divided country.

It was a time of tumult and change, verging, at times on chaos.

Rock star Jimi Hendrix sang to the rage, pain, passion and confusion of the nation's youth: ''Purple haze all in my brain. Lately things just don't seem the same.''

In Vietnam, New York banker Henry ''Hank'' Trickey was a sergeant in ''Alpha'' Company of the Army's 101st Airborne Division and was steps behind Springfield native

Spc. Peter F. Nolan when Nolan was hit by ambush fire, dead on May 8, 1970, at the age of 21.

''There was no front line,'' Trickey recalled recently. ''Constant movement. You never knew what was in front of you. You never knew if you would make it through the day.''

Flores flew infantrymen in and out of battle zones every day. Sometimes the drop was bad—sending the soldiers off to a set-up by the enemy. Sometimes, the helicopters were under intense fire, and one would go down or an American B–52 bomber would appear and drop napalm.

''It was organized insanity,'' Flores said. ''People you are defending are shooting at you.''

A lot of the guys, like Flores, were high school drop-outs. But blacks, whites and Latinos discovered among the rag-tag, chain-smoking, beer-drinking fearless ranks a brotherhood free from racism and filled with pure faith, courage and valor.

''When we see each other, we say, 'I love you, brother,' and we really mean that,'' Flores said. ''I was proud to be there. We did not choose the war; they sent us.''

The wall which memorializes the dead from a war that once divided the nation has become a source of comfort, a place for mending.

''It is a healing thing,'' Palmeri said.

Hurst, who views his brother's death as a waste of a life that had so much promise, said he has found a peace at the monument.

''My personal comfort came from the reaction the country had to the wall,'' Hurst said. ''The wall brought a resolution to the whole Vietnam thing.''

Oklahoma resident Tommy Kellogg was steps behind Springfield teenager Army Pfc. James A. Messer when Messer was caught in an ambush.

Messer, 18, a parachuter, had been recently recruited from B Company of the 1st 327 Infantry Battalion of the 101st Airborne to join Tiger Force. It was a fierce band of 45 soldiers on a new assignment with loose orders concerning search and destroy missions in the jungle.

Kellogg has not seen the wall. Nor has Hank Trickey.

James Austreng, of Wisconsin, also hasn't been able to make a visit to the wall. Yet, after all these years, he still holds the memory of a 21-year-old from Westfield, James D. Zebert.

It was Zebert who provided cover for his squad—including Austreng—only to be shot dead minutes later in Tay Ninh, South Vietnam, on June 27, 1979. His tour had begun just 18 days earlier.

The Army private who served under Capt. Steven J. Popkin, of Springfield, still can visualize the Mohawk helicopter pilot wearing his hat slightly askew.

''Capt. Popkin was one of the nicest guys all around. He was a damn fine aviator,'' said Bruce Gaylord, who grew up in Michigan. ''He didn't lord his rank over anyone. He would never make a joke about someone else. He had a rich sense of humor and a wonderful laugh.''

''He was a good officer, the kind of guy you would follow into hell,'' Gaylord said.

But not to the nation's capital.

''I could never bring myself to it,'' Gaylord said.

[From the Republican, May 28, 2007]

VIETNAM GREEN BERET MADE CHICOPEE PROUD

(By Jo-Ann Moriarty)

What can you say about a 24-year-old man whose name is among 58,256 on the Vietnam War Memorial?

That he was the platoon leader in Bravo Company.

That every day he assigned someone from the squad to watch over ''Mouse.''

That he and his grunts, strapped with M–16s, trailed a jungle maze for weeks and fought for their lives as the young lieutenant tried to pick their battles.

Mark C. Rivest, of Chicopee, was an officer and gentleman.

He was one of the famed ''Green Berets'' in the Army's Special Forces, and he completed two tours in Vietnam as the leader of a platoon which, for the most part, was composed draftees, many of whom were high-school dropouts.

A couple of guys in the band of 30 men should probably have never been in the Army, let alone assigned into the deadly terrain around Hue, a battle-scarred city just below the North Vietnam border.

''He is a very hard person to forget,'' recalled Manhattan businessman Anthony Loiero, who turned 21 in Vietnam and served under Rivest between 1969 and 1970.

''One of the things I remember the most about him was that he tried to keep us out of trouble,'' Loiero said. And, when they went in for the fight, ''he would make sure that we were all protected. He was concerned about the guys he was responsible for. The jobs we were doing, he wanted to make sure we were there to do them the next day.''

The year before Rivest and most of his men arrived in country, the Tet Offensive in 1968 ramped up the carnage and particularly bloody was the battle for Hue.

When Communist forces seized the city, they held the city for 25 days ''committing ghastly atrocities during the initial phase of their occupation,'' wrote Stanley Karnow in his Pulitzer Prize-winning book: ''Vietnam. A History.''

Back home, America was violent, too. Robert F. Kennedy and Martin Luther King Jr. were assassinated within months of each other. America was at war with itself. That summer, anti-war protesters were beaten by Chicago police as they stormed the Democratic Convention.

By 1969, when Rivest, who left behind his parents, Paul and Catherine, two brothers and a sister in the Aldenville section of Chicopee, and Loiero, an only child, who grew up in the Italian enclave of West New York, N.J., where he still lives, got to Vietnam, the death toll of American soldiers and civilians—both in the North and South—was staggering.

Before they met, Rivest had completed a six-month tour as platoon leader and, instead of alternating to the rear, ''he transferred into the field again at his request,'' Loiero said.

Rivest earned the confidence of the soldiers in his new platoon almost immediately. Even-tempered, without bluster, he was approachable and ruled by a shot from his dark eyes.

He was college educated. He smoked Chesterfields, played the piano and had something about him that Loiero still associates with Louis Armstrong's song, ''What a Wonderful World.''

It took Loiero 13 years before he went to ''the wall'' in Washington, D.C., to take in the full measure of the Vietnam War's toll and tragedy, his delay mostly attributable to seeing the actual engraving of his platoon leader's name.

Now, middle-aged, Rivest's covenant to keep the men in his platoon safe with his good judgment and keen skills is even more precious to Loiero who came home, got a college degree, has a successful graphic arts business and is happily married with two children.

''We were a rag-tag bunch of good guys living every day hoping that every one of us would live to go home that day.'' Loiero said, adding that he still thinks ''about the way he treated us. How he protected us. How his main objective was to watch his gaggle of geese and to make sure we did the right thing.''

''If we were in harm's way, he would be the first one out there clearing the path,'' he added.

Rivest made his platoon a band of brothers. And, he did it in many ways, Loiero said.

There were, for instance, specific orders that someone in the squad watch over a guy nicknamed ''Mouse,'' and a couple of other grunts, who Loiero said, ''should never have been in the Army. Should never had been sent to Vietnam. And never should have been in the infantry with the rest of us.''

Rivest instilled a discipline for constant movement.

The checklist was drilled into his men: Rifles cleaned. Gear together. Who's got the gun flares. Teeth brushed. Boots tied up. Who's watching ''Mouse'' today? Who's sleeping first.

''Then you'd start all over,'' Loiero said. ''You make a commitment to the guys next to you and they make it to you. It is a brotherhood.''

After their tour ended, Loiero went home. And Rivest, from what Loiero has been able to piece together, returned to Special Forces duty. The next assignment he accepted took him into Laos where he was killed in ground combat on June 4, 1970.

These days, Palmer resident Josh R. Morin, who once lived across from the Rivest home on McKinstry Avenue in Chicopee, carries the green beret of his boyhood friend to schools in Western Massachusetts as he talks to students about U.S. history and the Vietnam War.

As boys, they played Army together with their younger brothers.

Morin had been to Vietnam and back before Rivest went, and he warned his buddy against going because the terrain had gotten so dangerous. Morin's combat buddy had been shot dead inches from him.

When Rivest was killed, Morin, married at the time but living on the same street, said he couldn't go to the funeral.

''I couldn't go to his funeral and face his mother and father, the idea that I made it and he hadn't. I couldn't deal with it and now I regret that,'' Morin said. ''I never saw them again.''

Someone in the family later entrusted Morin with Rivest's green beret and his medals.

PERSONAL EXPLANATION

HON. LUIS V. GUTIERREZ

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Monday, June 18, 2007

Mr. GUTIERREZ. Madam Speaker, I was on official leave of absence due to a health matter in my family. Had I been present, I would have voted "yea" on rollcall votes 483, 491, 497, and 498 and "no" on rollcall votes 466, 467, 468, 469, 470, 471, 472, 473, 474, 475, 476, 477, 478, 479, 480, 481, 482, 484, 485, 486, 487, 488, 489, 490, 492, 493, 494, 495, and 496.

RECOGNIZING THE ACCOMPLISHMENTS OF BILL DEARMAN

HON. JAMES P. MORAN

OF VIRGINIA

IN THE HOUSE OF REPRESENTATIVES

Monday, June 18, 2007

Mr. MORAN of Virginia. Madam Speaker, I rise today to honor the accomplishments of Bill Dearman of Alexandria, Virginia. Bill Dearman's retirement will mark the conclusion of 10 years of extraordinary and dedicated leadership and service to the Alexandria Redevelopment and Housing Authority.

Mr. Dearman's skilled leadership and devotion to Alexandria have led to a number of great accomplishments. Among these as the challenge of redeveloping the Samuel Madden Housing Project into what is now the nationally recognized award-winning Chatham Square. In addition he oversaw the development of various site replacements at Braddock Road, and the rehabilitation and refinancing of Jefferson Village, Quaker Hill and Cameron Valley projects.

Through his dedication to the Citizens of Alexandria, he helped ensure housing needed to Alexandria's neediest. His creativity led to effective reorganization of the authority and expansion of services to residents. Through is tireless efforts, Mr. Dearman has improved the general appearance and maintenance of all Alexandria Redevelopment and Housing Authority properties.

In closing I wish to commend Mr. Dearman for his years of service to the City of Alexandria. I wish all the best to him on his retirement with his family in Atlanta.

INTRODUCTION OF BIRTHDAY RESOLUTION FOR WILLIAM JEFFERSON CLINTON

HON. CAROLYN B. MALONEY

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Monday, June 18, 2007

Mrs. MALONEY of New York. Madam Speaker, today, along with my friend and colleague from New York, Representative NITA LOWEY, I am introducing a resolution to recognize President Clinton's 61st birthday, which we will celebrate this August 19th. President Clinton has had a long and distinguished career in public service including serving as Governor of Arkansas and President of the United States. During Clinton's two terms in the White House, this country experienced unprecedented economic expansion including the creation of 22 million jobs. He worked with our NATO allies to end the ethnic cleansing in the Balkans, and played a fundamental role in bringing peace to Northern Ireland. Since leaving office in 2001, President Clinton has continued to dedicate his life to public service through the Clinton Foundation, which serves to strengthen the capacity of people throughout the world to meet the challenges of global interdependence. Notably, the Clinton Foundation has worked to make HIV/AIDS medication more accessible in poor and middle income countries and develop sustainable economic growth in Africa. Most recently, President Clinton launched the Clinton Climate Initiative (CCI) to help in the fight against global climate change.

I am honored today to recognize President Clinton's birthday as he has dedicated and continues to dedicate his life to serving the American people and noble causes around the world. I urge my colleagues to support this resolution.

TRIBUTE TO DR. WARREN F. WITZIG

HON. JOHN E. PETERSON

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Monday, June 18, 2007

Mr. PETERSON of Pennsylvania. Madam Speaker, I rise today to honor the life of Dr. Warren F. Witzig, of State College, PA, who died on June 13, 2007. Dr. Witzig, who was born on March 26, 1921, was one of the pioneers of nuclear power. Indeed, the Penn State Nuclear Engineering Society recently honored him as a ''visionary and innovator in the establishment of the United States nuclear power industry.'' The Penn State community, his friends and colleagues, and most importantly, his family, will miss him.

Dr. Witzig received a B.S. in electrical engineering in 1942, from Rensselaer Polytechnic Institute, in Troy, NY; an M.S. in electrical engineering in 1944, from the University of Pittsburgh, and a Ph.D. in physics from the University of Pittsburgh. From 1942 to 1960, Dr. Witzig was employed at the Westinghouse Research Laboratories and Bettis Plant in Pittsburgh, PA.

During World War II, he worked on the Manhattan District program on high vacuum systems, heat transfer, mass spectroscopy, and ionic centrifuge. He served as the first experimenter in the Materials Testing Reaction and later as engineering manager of in-pile tests for the naval reaction program in Hanford, Chalk River, and the MTR–ETR complex.

Dr. Witzig took the reactor of USS *Nautilus*, the world's first nuclear-powered ship, critical for the first time in 1954 while serving as senior engineer. He was integral in the development of nuclear submarines used by the U.S. Navy, developing engineering that was vital to the *Skipjack* and *George Washington* series of nuclear submarines, which have been the backbone of the U.S. nuclear navy.

After leaving government service, he traveled worldwide in his consulting practice, NUS Corp., which grew into one of the country's largest independent groups of nuclear consultants. He became professor and department head of Nuclear Engineering at the Pennsylvania State University in 1967. While at Penn State, Dr. Witzig was responsible for one of the earliest student programs in nuclear engineering in the United States. He established the undergraduate and associate degree programs and initiated the continuing education Program on Radiation, Nuclear Safety and Environmental Effects for Public Education. Dr. Witzig conducted research in areas of reactor design and safety, fuel cycle, nuclear safeguards, rad-waste disposal, emergency planning and radiation monitoring.

Retiring from the university in 1986, he served on multiple public and private nuclear safety and oversight boards. Dr. Witzig chaired the Westinghouse GoCo Sites Nuclear Safety and Environmental Institute board of directors from 1988 to 1993. In 1979, Governor Richard Thornburgh called him into the service of the Commonwealth of Pennsylvania during the emergency shutdown of Three Mile Island II.

In June 1992, Witzig presented the paper, ''The Value of a Nuclear Safety and Environmental Committee,'' at the Ukraine Academy of Science at Chelyabinski State University. He toured the site of the explosion at the Chernobyl nuclear power plant. Dr. Witzig had been a life-long advocate of nuclear energy as a clean, safe, and efficient source of energy and also for the training, accreditation, and oversight of nuclear operators.

Among Dr. Witzig's honors are Fellow, American Nuclear Society; Fellow, American Association for the Advancement of Science; Sigma Xi, Sigma Pi Sigma, and Eta Kappa Nu honor societies; Special Citation for an Engineering educator in Excellence in Engineering Education, EEI Power Engineering; Who's Who in Engineering and America; and Penn State's Outstanding Service Award for retirees.

He was also a leader in his community, serving Ferguson Township as a financial auditor and working 6 years on the Planning Commission, establishing the township's first comprehensive zoning ordinance. A member of the State College Presbyterian Church, Dr. Witzig was an ordained elder of the Presbyterian Church U.S.A. He served on the Christian Education committee, and was a Sunday School teacher.

Madam Speaker, I ask my colleagues to join me in extending our deepest sympathy to Dr. Witzig's family, especially his beloved wife Bernadette, his children Eric, Leah, Marc, and Lisa, his grandchildren Heather, Sean, Christie, Monica, Mallory, and Alicia, and his great grandchildren Madeline, Ava, and Miles. Our Nation owes a debt of gratitude to Dr. Witzig for his contributions to nuclear engineering. His leadership and ingenuity have saved lives, developed new technology, and advanced our knowledge of nuclear science.

TRIBUTE TO GARY GOSS

HON. BILL SHUSTER

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Monday, June 18, 2007

Mr. SHUSTER. Madam Speaker, I rise today to honor Gary Goss, owner of Structural Fiberglass in Bedford, PA, who has been named the 2007 Citizen of the Year by the Bedford Rotary Club. The Club annually recognizes a local individual who epitomizes the Rotary Motto of ''Service Above Self.''

Gary has been a dedicated leader in the Bedford community, giving his time to various community organizations. He has served as president of the Bedford Rotary Club and the Bedford County Development Association and currently chairs the local Adopt-a-Highway organization, as well as the Salvation Army Bell

Ringing Project. Gary has served as an assistant Scout Master for the Boy Scouts of America for 11 years, in addition to contributing to many other community organizations, nonprofits and his church. The Rotary International has previously recognized Gary as a Paul Harris Fellow.

While I could go on listing the countless organizations to which Gary has given his time and energy, it is reasonable to say that his contributions to the Bedford community are endless. There is no doubt that Gary has touched the lives of thousands, surely impacting each one of them in a tremendous and beneficial way. Gary serves as a role model for many, and it is my hope that those that have the opportunity to meet and work with Gary will take away some of his enthusiasm for bettering the community and the lives of those around him.

Gary's wife Peggy, to whom he has been married for 30 years, and his two children, Michael and Nicole, are certainly proud and honored by his remarkable work and devotion to improving the lives of others. The thousands of people who know Gary Goss—and who have benefited from his hard work and dedication—would join me in thanking Gary for his contributions to the Bedford community, as well as for serving as a great inspiration, demonstrating that selflessness and hard work go far in enhancing not only their own lives, but the lives of many.

HONORING THE ACHIEVEMENTS OF SUSAN TIEGER

HON. JAMES P. MORAN

OF VIRGINIA

IN THE HOUSE OF REPRESENTATIVES

Monday, June 18, 2007

Mr. MORAN of Virginia. Madam Speaker, I rise today to honor the achievements of Ms. Susan Tieger, of Arlington, Virginia. After thirty-five years of teaching in Arlington County Public Schools, Ms. Tieger will be retiring, leaving behind a legacy of dedication, care and hard work.

Ms. Tieger graduated with honors from Queens College in 1971. After receiving her Bachelor of Arts degree in Elementary Education with the distinction of Cum Laude, she was awarded a fellowship in Special Education by the University of Virginia in Charlottesville and was awarded her Master of Education degree in June, 1972.

Ms. Tieger has taught in the Arlington County Public School system from September 1972 until the present. From 1972–1994, she taught multi-categorical self-contained classes consisting of students with learning disabilities, emotional disturbances and mental retardation at Francis Scott Key Elementary School. She has been the Special Education lead teacher at Barcroft Elementary School since 1994.

In June 2006, she earned the Educational Testing Service Recognition of Excellence for her outstanding performance in the Praxis II test in which she achieved one of the highest possible scores.

During her thirty-five years with Arlington schools, Ms. Tieger has touched and improved the lives of hundreds of children and their parents. She was able to assist and teach children with a variety of learning disabilities, including those with mental retardation and emotional problems. In addition, Ms. Tieger was able to help countless children to read, write, socialize, and most important, to achieve their highest potential.

Susan Tieger is the epitome of a dedicated, caring and hard-working public school teacher. The fact that Arlington County has one of the best school systems in the country is directly attributable to the talents, hard work and dedication of teachers like Ms. Tieger.

I commend Ms. Tieger on her dedicated career in education, and wish her and her family health and happiness in her well-earned, much deserved retirement.

RECOGNIZING THE IMPORTANCE OF CARIBBEAN-AMERICAN HERITAGE MONTH

HON. CHARLES B. RANGEL

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Monday, June 18, 2007

Mr. RANGEL. Madam Speaker, I rise today in recognition of Caribbean American Heritage Month. The imprint of Caribbean-Americans on the foundation of the United States is indispensable. This June, we Americans have the opportunity to celebrate the history, accomplishments, culture and global influence of people of Caribbean descent past and present.

Caribbean-Americans have significantly contributed to the ethnic diversity that strengthens and enhances our stature in the international community. From the platform of St. Mark's Church in New York City to the halls of Congress, Caribbean-Americans such as Marcus Garvey and Congresswoman BARBARA LEE have effected the civil rights and federal legislation that serve as building blocks in American history.

Even in times of war, Caribbean-Americans support our efforts at home and abroad by serving in the U.S. Armed Forces. Today, thousands of Caribbean-Americans are fighting to achieve stability in Iraq.

In a wide variety of fields, people of Caribbean descent have transformed the Nation we live in today. I urge my colleagues to join me in support of H. Con. Res. 148, recognizing the significance of National Caribbean-American Heritage Month.

TRIBUTE TO BRIGADIER GENERAL JOHN F. KELLY

HON. IKE SKELTON

OF MISSOURI

IN THE HOUSE OF REPRESENTATIVES

Monday, June 18, 2007

Mr. SKELTON. Madam Speaker, let me take this opportunity to recognize Brigadier General John F. Kelly, United States Marine Corps. From August 2004 to June 2007, Brigadier General Kelly admirably served as the Legislative Assistant to the Commandant of the Marine Corps.

During his time in this position, Brigadier General Kelly created numerous successes for the Marine Corps mission. His keen knowledge and experience in Congressional affairs, combined with an increased emphasis on Congressional relationships, propelled the Commandant's strategy and vision. His leadership has enabled the Marine Corps to make tremendous progress during a period of sustained high operational tempo and unprecedented interest in Marine Corps activities.

Brigadier General Kelly is a graduate of the University of Massachusetts, the Marine Corps Command and Staff College, the School for Advanced Warfare, and the National War College. He has served in numerous command and staff positions over his 31 years as an officer in the Marine Corps and is a veteran of Operation Iraqi Freedom.

I wish Brigadier General Kelly and his family the best as he continues his distinguished service to our Nation in his next assignment as the Deputy Commanding General of the 1st Marine Expeditionary Force. I am confident he will continue to exemplify the best that the Marine Corps has to offer and will superbly command our troops in the field.

NDEA

HON. JOHN M. McHUGH

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Monday, June 18, 2007

Mr. McHUGH. Madam Speaker, under the NDEA, when the Class I milk price in the Boston market falls below the established minimum price, processors would pay an over-order premium—the difference between the minimum price set by the applicable Regional Dairy Board and the Boston Class I price—into a national fund. The U.S. Secretary of Agriculture would then distribute the monies in the fund back to the Boards according to a formula whereby each region would get back the greater of what they pay into the fund or the amount of the over-order payments a region would have generated if it had a Class I utilization rate of 50 percent. In the event of a shortfall, the Secretary would supplement the money in the fund from savings from the MILC program to ensure that the Regional Dairy Boards, and subsequently the dairy farmers themselves, would receive the full payments.

The Regional Dairy Boards would be comprised of three members from each participating state in a particular region. The U.S. Secretary of Agriculture would make the nominations to the Boards after receiving nominees put forward by governors or elected state agricultural commissioner after consultation with the dairy industry. Each state delegation to the Regional Dairy Boards would consist of three representatives, with at least one producer and one consumer.

In addition to the responsibility to establish minimum prices and distribute payments to dairy farmers, the Regional Dairy Boards would have the authority to conduct supply management programs when necessary, including the development of incentive-based programs. Moreover, in order to prevent overproduction, regions in which the growth in milk

production is higher than the national average would be required to reimburse the U.S. Secretary of Treasury for the cost of government dairy surplus purchases up to the amount that the region is receiving under the NDEA.

It is important to note that the NDEA would not establish national pooling. Rather, it would create an equalization fund whereby processor paid funds would go to a central account at the U.S. Department of Agriculture; government funds would be added to that fund and then payments would be made to the various regions according to a formula, which would permit regions with low Class I utilization to receive the same benefit as those regions with higher utilization.

Also of significance, the NDEA would be entirely optional for the states and individual farmers. Thus, those states that do not wish to participate in the NDEA program could simply choose to continue to participate in the MILC program, which the NDEA would extend to 2012, and individual farmers in states participating in the new NDEA program could instead opt to merely continue receiving payments under their current MILC contract rather than under the NDEA. However, those individuals would not be eligible to extend their MILC contract beyond September 2008 and would lose all future eligibility to participate in the NDEA program.

Madam Speaker, the NDEA would create a market-orientated, counter-cyclical program to help all of our Nation's dairy farmers while simultaneously saving taxpayers money. Accordingly, I ask my colleagues to join with me to enact this important legislation.

HONORING BISHOP P.A. BROOKS

HON. JOHN CONYERS, JR.

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Monday, June 18, 2007

Mr. CONYERS. Madam Speaker,

Whereas, Honoring Bishop Aquilla Brooks has served his community as a Local pastor for 50 years and as a jurisdictional bishop for more than 30 years; and

Whereas, Bishop Brooks, is a man of keen spiritual insight, integrity and has dedicated his life to serving the spiritual needs of the community; and

Whereas, Bishop P.A. Brooks, is a widely respected church and community Leader. Brooks has received numerous awards for his outstanding service to the community including the: FBI Outstanding Community Service Award. In 1979 the Michigan Chronicle recognized him as one of Detroit's outstanding men of the year; and

Whereas, Bishop Brooks, is the third-longest serving Church of God in Christ Bishop in the history of the State of Michigan. During his tenure he has implemented programs and initiatives that have benefited laity and clergy alike. Due to his influence the Church of God in Christ launched their first credit union in the State of Michigan in Fall 2004; and

Whereas, Bishop Brooks is a man of God standing firmly on the past, Established in the present, and important to the future of The Church of God in Christ. Therefore be it now *Resolved*, That Bishop P.A. Brooks be commended on the occasion of the Inaugural Salute Banquet recognizing his elevation to the office of Second Assistance Presiding Bishop at the Church of God in Christ Inc.

Madam Speaker, I rise to commend and congratulate Bishop Phillip Aquilla Brooks on the occasion of his appointment as Second Assisting Presiding Bishop of the Church of God in Christ (C.O.G.I.C).

The third-longest serving Bishop of the Church of God in Christ in the history of Michigan, Bishop Brooks has served his community as a local pastor for 50 years and as a jurisdictional bishop for more than 30 years.

During this time, he has undertaken a number of initiatives to further the church's mission and strengthen it as an institution. Bishop Brooks organized the first Regional Council of Bishops, which unites the 12 jurisdictions of Michigan and Canada and allows them to work together to develop programs that benefit the church. He instituted the First Interactive Ministerial Alliance Meetings, which allow local pastors to plan and implement their own agendas, including workshops, praise and worship, and resource sharing. Bishop Brooks is responsible for the purchase and renovation of Northeast Michigan's Jurisdictional Cathedral Center. He also helped establish the nation's first Blue Cross/Blue Shield program for local pastors and C.O.G.I.C's first Credit Union.

Bishop Brooks has rightly been described as a man of prayerful reflection, honest discussion, humility, and mutual respect for all who have known him. I take great pleasure in knowing that the members of his church as well as the citizens of Michigan have benefited greatly by his guidance. I am confident that Bishop Brooks will serve the Church of God in Christ with passion, love, and dedication in this new capacity.

Madam Speaker, I ask my colleagues to join me in congratulating Bishop Brooks as he takes on this new role of leadership. Bishop Brooks is truly deserving of this high honor, as well as our respect and admiration.

S. 5, THE STEM CELL RESEARCH ENHANCEMENT ACT

HON. BETTY McCOLLUM

OF MINNESOTA

IN THE HOUSE OF REPRESENTATIVES

Monday, June 18, 2007

Ms. MCCOLLUM of Minnesota. Madam Speaker, I rise today in strong support of S. 5, the Stem Cell Research Enhancement Act and commend Congresswoman DIANA DEGETTE and Congressman MICHAEL CASTLE for their leadership on this important issue.

Today, once again, Congress responds to the priorities and needs of the American people, in bringing forward a bill to expand federally-funded embryonic stem cell research.

S. 5 is supported by 72 percent of the American public, including over 200 patient groups, universities, and scientific societies. It has also been endorsed by more than 75 national and local newspapers, and 80 Nobel Laureates.

This bipartisan legislation will provide hope and opportunity for millions of Americans suffering from chronic and life-threatening health conditions. I have voted to expand this critical research 4 times. It is time for the President to listen to the American people and the majority of Congress and to sign this bill into law.

Recent research has shown that scientists have been able to create pluripotent stem cells from mouse skin cells. This is an exciting development, and should be pursued in conjunction with embryonic stem cell research. We should support and pursue all ethical, life-saving research.

The expansion of funding to stem cell research has the power to make a real difference in the lives of Americans. I urge my colleagues to join me in supporting S. 5.

HONORING THE ACHIEVEMENTS OF MYROSLAVA GONGADZE

HON. JAMES P. MORAN

OF VIRGINIA

IN THE HOUSE OF REPRESENTATIVES

Monday, June 18, 2007

Mr. MORAN of Virginia. Madam Speaker, I rise today to honor the accomplishment of Myroslava Gongadze of Arlington, Virginia and a proud member of our civil service. Ms. Gongadze serves as the leading spokesperson for American values in Ukraine, helping to move the nation in a more pro-western direction.

A native Ukrainian who was granted political asylum in the United States in 2001 and began working for Voice of America in 2004, Myroslava Gongadze is one of the most recognized journalists and human rights advocates in Europe. This episode during the 2004 elections is just one chapter in her long-running fight for justice in her homeland and across the globe.

For 17 days in November 2004, with temperatures below freezing in the central square in Kiev, Ukraine, a million people stood in a sea of orange color, protesting fraudulent presidential elections. Two huge screens flanked the makeshift stage hooked into Ukraine's only independent source of information, Channel5 TV. The broadcast they received was from the Voice of America's Washington studio, and the face they saw was Myroslava Gongadze. When Ms. Gongadze reported U.S. Secretary of State Colin Powell's statement that the United States refused to recognize the falsified election results, it was one of the watershed moments of Ukraine's ''Orange Revolution,'' which resulted in the election and peaceful installation of Viktor Yuschenko as Ukraine's new President.

While her story is inspirational, the circumstances that drove Ms. Gongadze to become a political activist are tragic. Her husband Georgy Gongadze was a renowned investigative journalist who exposed corruption and cronyism in the administration of the former Ukrainian President. In 2000, he was murdered by government police. Since his death, she has made it her mission to promote freedom of speech, the rights of journalists and the need to bring corrupt officials to justice.

She has pursued her agenda by working with many different organizations, including

the European Court for Human Rights, the Organization for Security and Cooperation in Europe and the Committee to Protect Journalists. She even created the Gongadze Foundation, a nongovernmental organization working to protect journalists' rights and political freedom. However, the organization that has given her the platform to make her biggest impact has been the Voice of America.

Madam Speaker, I commend Ms. Gongadze for her leadership, and I am proud to have her live in Virginia's 8th Congressional District as she contributes to the greatest civil service in the world. I wish her all the best in her future endeavors.

TRIBUTE REGARDING THE 65TH ANNIVERSARY OF THE BATTLE OF MIDWAY

HON. IKE SKELTON

OF MISSOURI

IN THE HOUSE OF REPRESENTATIVES

Monday, June 18, 2007

Mr. SKELTON. Madam Speaker, our Nation recently commemorated the 65th Anniversary of the Battle of Midway. Let me take this opportunity to reiterate the importance of that battle and remember the Americans who lost their lives in the defense of a small island northwest of Hawaii.

Between June 4 and June 7, 1942, the United States Navy defeated a Japanese attack against the Midway Atoll in what has come to be called the Battle of Midway. The battle was a decisive victory for Americans and is widely regarded as the most important naval engagement of World War II and a critical turning point in the Pacific Theater.

During the battle, 307 Americans lost their lives. We remember the sacrifices made by those men. They gave their lives for the cause of freedom. Through their actions, the war was won and peace preserved. We will not soon forget them.

At this time, it is also important to pause to remember the contributions of the many thousands of American sailors who participated in the Battle of Midway and survived. They—like so many of their generation—were touched by the ravages of war and continue to wear their scars. We owe them a debt of gratitude we cannot soon repay except by remembering their struggle, honoring their sacrifice, and continuing to keep in our thoughts those Americans who maintain our Nation's tradition of military excellence by serving with valor and distinction today.

INTRODUCTION OF THE NATIONAL DAIRY EQUITY ACT OF 2007

HON. JOHN M. McHUGH

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Monday, June 18, 2007

Mr. MCHUGH. Madam Speaker, I rise today with my colleague from New York, Mr. REYNOLDS, to introduce the National Dairy Equity Act of 2007 (NDEA), which is designed to establish a minimum price for fluid milk and create a market-based safety net for dairy farmers.

I greatly appreciate the men and women who work the extremely hard and long hours needed to produce milk, butter, cheese, ice cream, non-fat dry milk, and yogurt. Thus, I would like to begin by noting that June is Dairy Month. It is hard to overstate how important dairy is to the United States economy, nor for that matter, how important dairy is to the economies of New York and its 23rd Congressional District, which I represent. In fact, in 2006, New York was the Nation's third largest dairy state; it accounted for about 7 percent (638,000 head) of the Nation's milk cows, 6.7 percent (12.04 billion pounds) of total milk production, and 6.9 percent ($1.6 billion) of total cash receipts from milk marketing. The importance of dairy to New York's 23rd District is readily apparent when one considers that the 2002 Census of Agriculture reported there were 1,989 dairy farms with 188,305 milk cows in the 11 counties that comprise the District.

I also appreciate the fact that the Milk Income Loss Contract (MILC) has provided about $230 million in much-needed support to New York dairy farmers over the past 5 fiscal years and I know my constituent farmers do as well. Moreover, it is critical that the 2007 Farm Bill continue to provide dairy farmers with some form of income support. While I appreciate the support provided through MILC, the NDEA is an alternative that could help to provide additional support to American farmers with greater stability and at less cost to the taxpayer.

The NDEA would establish 5 Regional Dairy Marketing Areas (RDMA); the Intermountain, Midwest, Northeast, Pacific, and Southern. The Midwest, Northeast, and Southern regions would automatically be included as participating regions while the Intermountain and Pacific regions would have the ability to opt into the program.

In each region, a Regional Dairy Board would establish the minimum or over-order price for Class I (fluid) milk; that price would then have to be approved by farmers through a referendum. In the first year, the maximum price that a Board could establish is capped at $17.50 per hundredweight (cwt.), but thereafter the price could rise based on the Consumer Price Index (CPI).

PERSONAL EXPLANATION

HON. JOHN CONYERS, JR.

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Monday, June 18, 2007

Mr. CONYERS. Madam Speaker, I took a leave of absence on June 18, 2007, as I was attending to personal business. The following list describes how I would have voted had I been in attendance today.

''Aye''—H. Con. Res. 21, calling on the United Nations Security Council to charge Iranian President Mahmoud Ahmadinejad with violating the 1948 Convention on the Prevention and Punishment of the Crime of Genocide and the United Nations Charter because of his calls for the destruction of the State of Israel.

''Aye''—H. Con. Res. 151, noting the disturbing pattern of killings of dozens of independent journalists in Russia over the last decade, and calling on Russian President Vladimir Putin to authorize cooperation with outside investigators in solving those murders.

''Aye''—H. Res. 233, recognizing over 200 years of sovereignty of the Principality of Liechtenstein, and expressing support for efforts by the United States to continue to strengthen its relationship with that country.

REMEMBERING MINNESOTA'S ''GREATEST GENERATION'' AS MINNESOTA COMMEMORATES STATE WORLD WAR II MEMORIAL

HON. BETTY McCOLLUM

OF MINNESOTA

IN THE HOUSE OF REPRESENTATIVES

Monday, June 18, 2007

Ms. MCCOLLUM of Minnesota. Madam Speaker, it is my distinct honor to rise in tribute to the ''Greatest Generation'' of Minnesotans. On June 9, 2007, an estimated 12,000 Minnesotans gathered on the state capitol grounds to offer this long-overdue commemoration for our State's World War II veterans.

The Minnesota World War II Memorial has an honored place, reflecting the sacrifices of those who served and those who died to protect our freedom. It provides a solemn reminder of past great sacrifices on behalf of our nation, but also gives us an important opportunity to properly thank the brave men and women in uniform fighting every day around the world.

Six decades ago, 16 million fought for freedom in the war, and more than 400,000 died. Although fought ''over there,'' World War II had immense local impact. Approximately 326,000 Minnesota men and women enlisted in the military, leaving school, jobs and families behind. Nearly 6000 Minnesotans died. The war touched every life in some way as countless more men, women and children supported the war from the home front.

On May 29, 2004, I had the great honor of joining many of Minnesota's World War II veterans and their families in Washington, DC for the dedication of the National World War II Memorial. These veterans exemplify the spirit and sacrifice of America's Greatest Generation. My father served in the Armed Services during World War II, so this dedication is especially meaningful to me. As an auxiliary member of the Veterans of Foreign Wars and the American Legion, I remain committed to ensuring that all our veterans receive the benefits and honor that they have earned.

Madam Speaker, please join with me and all Minnesotans in paying tribute to the Greatest Generation. They deserve our highest respect, gratitude and the support they were promised.

RECOGNIZING THE ACCOMPLISHMENTS OF EDWARD MESSMER

HON. JAMES P. MORAN

OF VIRGINIA

IN THE HOUSE OF REPRESENTATIVES

Monday, June 18, 2007

Mr. MORAN of Virginia. Madam Speaker, I rise today to honor the accomplishment of Edward Messmer of Alexandria, Virginia for his service to the U.S. Department of State as Special Assistant to the Ambassador of Lebanon. In his official duties he was directly responsible for his efforts in providing fuel reserves into Lebanon during the 2006 conflict, which kept major power plants open, averting a health catastrophe.

In July and August of 2006, the staff of the U.S. Embassy in Beirut found itself at the center of a major conflict when war broke out between Hizbollah fighters and Israeli forces. The embassy received a great deal of attention for its work to mitigate the damage inflicted by the war. None was more important than the work done by Mr. Messmer to help move vital fuel past blockades and into Lebanon, maintaining power across the country.

Once the war began, a naval blockade was established around Lebanon to prevent the import of weapons, fuel and other support for the citizens of Lebanon. As a result, fuel stocks quickly plummeted at the country's three primary power plants. The plants were soon left with only a few days' worth of reserves. A continued interruption would have meant no water for essential services, hospitals and schools. Serving as the acting chief of the political section at the embassy, Mr. Messmer made it his personal mission to avert the developing crisis.

Mr. Messmer had to address multiple logistical and political challenges to get fuel past the blockade. The ship owners who carried the fuel didn't want to risk running the naval blockade, the Israeli forces wanted assurances that the fuel stocks would not be diverted to Hizbollah. Additionally, funding for the fuel needed to be secured from the weakening government of Lebanon. For three straight weeks, Mr. Messmer coordinated, persuaded and guided all of these disparate parties to a solution. He was in constant contact with the Lebanese government, U.S. embassies in Cyprus and Israel, ship owners, insurers and various offices in the Pentagon and the State Department.

Mr. Messmer's efforts paid off with the initial shipment of 56,000 tons of fuel to the about-to-close power facility just north of Beirut. His hard work enabled the country's entire electrical grid to remain operational until additional deliveries were sent over the next several weeks. Not only did Mr. Messmer's work help avert a humanitarian crisis; it also took away a potential propaganda tool from Hizbollah, which could have blamed the fuel crisis on the United States and its allies. For his contribution, Mr. Messmer was nominated for the Partnership for Public Service's International Affairs Medal.

Madam Speaker, I commend Mr. Messmer for his leadership, and I am proud to have him live in Virginia's 8th Congressional District and contributing to the greatest civil service in the world. I wish him all the best in his future endeavors.

TRIBUTE TO MAJOR BRIAN SHARP

HON. IKE SKELTON

OF MISSOURI

IN THE HOUSE OF REPRESENTATIVES

Monday, June 18, 2007

Mr. SKELTON. Madam Speaker, it has come to my attention that Major Brian P. Sharp will be leaving his position as Assistant Marine Corps Liaison to the House of Representatives and will be continuing his military education at the Command and Staff College in Quantico, Virginia.

Major Sharp has been a valuable asset to the Marines since his enlistment in the Marine Corps Reserve in 1991. He attended the School of Infantry, Camp Geiger, MCB Camp Lejeune where he received the MOS of 0341 mortar man. He was assigned to Company G, 2nd Battalion, 25th Marines for 4 years and was accepted into Officer's Candidate School in 1995. He has also received a B.A. in History from Ramapo College in New Jersey and was selected for Career Level School through which he attended United States Army Field Artillery School, Captain's Career Course in April of 2002.

Upon graduation from the Basic School, Major Sharp reported to the United States Army Field Artillery School and was designated a Field Artillery Officer. In his first tour, he reported to Battery E, 2nd Battalion, 11th Marines and served as forward observer, Guns Platoon Commander, and Executive Officer. During this tour, he was deployed to Okinawa, Japan in support of the 31st MEU (SOC). Major Sharp has also served as S–3A/Battalion Fire Direction Officer following the completion of his tour at 2nd Battalion, Target Information Officer for the 15th MEU Command Element, MEU Liaison to the United Nations for conducting operations to stabilize the new nation of East Timor in the spring of 2000, and Fire Support Officer following September 11, in which he assisted in the planning and execution of the seizure of Forward Operation Base Rhino, Afghanistan, to include combat operations.

Upon his graduation from Career Level School, Major Sharp was assigned to Battery B, 1st Battalion, 10th Marine Regiment and served as Commanding Officer. While he served this position, Major Sharp and Battery B were deployed with Regimental Combat Team 2, Task Force Tarawa, in support of Operation Iraqi Freedom and participated in the Battle of An Nasiriyah. Upon his return to CONUS, Major Sharp assumed the duties of the Battalion Logistics Officer, and then Battalion Operations Officer.

Major Sharp's decorations include the Navy-Marine Corps Achievement Medal with Combat ''V'' and two stars and the Navy Marine Corps Achievement Medal.

Madam Speaker, I know that the Members of the House will join me in thanking and honoring Major Sharp for his exceptional commitment to the United States Marine Corps and wishing him luck in his future endeavors.

RECOGNIZING PROJECT TRANSITION

HON. PATRICK J. MURPHY

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Monday, June 18, 2007

Mr. PATRICK J. MURPHY of Pennsylvania. Madam Speaker, I rise today to thank Project Transition for 25 years of service and support to people suffering from mental illness. By providing the necessary care and assistance, Project Transition has paved the way for adults with psychiatric problems to recover and contribute to society.

Project Transition's unique communities offer not only medical treatment, but also diverse opportunities for healing of the mind, body and spirit. Throughout their stays, residents learn to rebuild hope and trust. Patients are exposed to treatment and instruction that cultivates the skills necessary to live a normal life as a member of our community.

The Project Transition team is made up of professionals with the right experience and know-how in psychiatric and psychological treatment. They work to teach social skills, management of psychiatric conditions and help reintegrate patients back into the community. Their innovative approach has earned them both national acclaim and sincere gratitude from the many families they have helped.

Madam Speaker, this year Project Transition celebrates its 25th anniversary as an organization serving Bucks County adults with psychiatric disorders. Project Transition has earned the appreciation of the hundreds of adults now able to live a full and healthy life. I join them in thanking this wonderful organization for their efforts, commend them on their work and wish them a future of continued success.

CONGRATULATING COLONEL JOHN P. SWIFT ON HIS RETIREMENT FROM THE CONNECTICUT AIR NATIONAL GUARD

HON. JOE COURTNEY

OF CONNECTICUT

IN THE HOUSE OF REPRESENTATIVES

Monday, June 18, 2007

Mr. COURTNEY. Madam Speaker, I rise today to honor Colonel John P. Swift of Enfield, Connecticut, who retires from the Connecticut Air National Guard on Sunday, June 24, 2007, after nearly 26 years of service to our Nation.

Since graduating from the United States Air Force Academy in 1981, Colonel Swift has worked closely with the A–10 Thunderbolt or, as it is more commonly known, the ''Warthog.'' His post-academy education and service took him to Oklahoma, New Mexico, Arizona, Louisiana and even the United Kingdom before he landed back in Connecticut. In 1989, he began his career with the Connecticut Air National Guard as the Operations Plan Officer for the 103rd Fighter Group at Bradley International Airport in East Granby, Connecticut.

From there, he worked his way through the ranks until reaching his current position as

Commander of the 103rd Fighter Wing in February 2006. As Commander, Colonel Swift has lead more than 1000 men and women of the 103rd Fighter Wing and overseen all aspects of base operations, including aviation, maintenance and support operations for the Wing's A–10 aircraft. In his most recent roles, he has worked closely with his colleagues in the Connecticut National Guard and the Connecticut congressional delegation to help see the 103rd Fighter Wing through a period of change and transformation.

His leadership, his passion for his job and his dedication to the mission of the Connecticut Air National Guard will be greatly missed. I ask all my colleagues to join with me, the men and women of the Connecticut National Guard, and the people of Connecticut in thanking Colonel Swift for his service and wishing him the best in his new endeavors.

IN HONOR OF SPECIALIST ZACHARY GRASS

HON. RALPH REGULA

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Monday, June 18, 2007

Mr. REGULA. Madam Speaker, with great sorrow I rise today to recognize Specialist Zachary Grass, an Ohio citizen from my district, who gave his life fighting for our country. On Saturday, June 16, 2007 in Iraq, Army soldier Zachary Grass was killed by a roadside bomb.

As a 2003 graduate of Fairless High School, he was a member of both the varsity basketball and baseball teams. From his athletic involvement in high school to becoming a soldier in the Army he showed great leadership. More importantly he was happy to be serving his country.

This outstanding young man showed courage and dedication during his tour of duty. Zachary is a true hero and reminds us of the dedication evidenced by all the men and women all over the world fighting the war on terror. We must reflect on this great life and the sacrifice he made to defend our freedom and security.

Zachary Grass and his family will be forever in our hearts and prayers. May we keep them in mind as they struggle through this difficult period of mourning.

RECOGNIZING THE ACCOMPLISHMENT OF CAROL DUMAINE

HON. JAMES P. MORAN

OF VIRGINIA

IN THE HOUSE OF REPRESENTATIVES

Monday, June 18, 2007

Mr. MORAN of Virginia. Madam Speaker, I rise today to honor the accomplishment of Ms. Carol Dumaine, of Reston, Virginia, and a proud member of our civil service. Ms. Dumaine, an employee of the Central Intelligence Agency, has contributed to our Nation's future security through the establishment of the Global Futures Forum (GFF), a highly innovative think tank which coordinates international expertise to enhance intelligence analysis.

As the 9/11 Commission confirmed, intelligence and law enforcement officials had uncovered a number of warning signs that a terrorist attack on U.S. soil was imminent, but the failure to recognize the links between the intelligence precluded authorities from stopping the attacks. Ms. Dumaine has created a forum which allows for more thorough intelligence analysis from a cadre of outside experts. Global Futures Forum (GFF) unites intelligence experts from different nations with professionals from diverse fields so that emerging issues can be recognized quickly and collectively addressed. The GFF reviews intelligence in the public domain and promotes open, interactive linkages to knowledge and insight that exists outside of traditional security organizations.

GFF delegates represent the wide spectrum of intelligence and security organizations, multilateral institutions, academia and non-government personnel from more than 30 nations. A series of forums in 2005 and 2006 brought these experts together to work face-to-face, providing them with an opportunity to strengthen international partnerships and to share knowledge about global security challenges. To ensure that partners would have opportunities to collaborate outside of the conferences, Ms. Dumaine created the GFF website to provide a constant means of collaboration, allowing GFF partners to share their latest thoughts, research and analysis through their own interactive blogs or chats with other participants. Her work ensures that the dialogue fostered by the GFF never really ends.

Ms. Dumaine created a global community that increases exposure to diverse perspectives and catalyzes discussion on adapting intelligence organizations to address nontraditional challenges. These partnerships created through Ms. Dumaine's effort will help ensure that potential security threats will be handled properly, allowing for the best response possible. For her great contribution to the intelligence community, she has been selected as a finalist for the Partnership for Public Service's ''National Security Medal''.

Madam Speaker, I commend Ms. Dumaine for her leadership, and I am proud to have her live in Virginia's 8th Congressional District as she contributes to the greatest civil service in the world. I wish her all the best in her future endeavors.

RECOGNIZING 2007 BENTON CARDINALS BOYS' HIGH SCHOOL BASEBALL TEAM

HON. SAM GRAVES

OF MISSOURI

IN THE HOUSE OF REPRESENTATIVES

Monday, June 18, 2007

Mr. GRAVES. Madam Speaker, I proudly pause to recognize the outstanding achievement of the Benton Cardinals boys' High School baseball team on defeating the Sullivan Knights, by a score of 2–0, to win the school's first ever baseball championship.

The Cardinals finished their championship season by posting an incredible record of 24–3 in Class 3 boys' baseball and an overall amazing record of 61–7 over the past three seasons.

The Cardinals consist of 21 tremendous young men, including Kyle Becerra, Tim Brown, Zack Colwell, Tom Contreras, Johnny Coy, Cory Eckert, Austin Garton, Colton Garton, Scott Hedden, Cody Kirschner, Jake Kretzer, Kyle Mason, Justin Mattice, Trevor Moss, Ryan Pinson, Marcus Pritchett, Eli Reynolds, Josh Reynolds, Craig Wilburn, Ryan Winger and Josh Zuptich.

Also, I want to recognize the great leadership of the team including Head Coach Mike Musser, who was assisted by Greg Reynolds, Stephen Thatcher, Justin McCarthy and Ray Brown. I also want to acknowledge the work of school administrators, Superintendent Melody Smith, Principals Jeanette Westfall and Jeff Modis, and Athletic Director Mike Ziesel, as additional keys to success.

Madam Speaker, I ask you to join me in congratulating the achievement of the Benton Cardinals boys' High School baseball team on their terrific season and state championship. It is an honor to represent this team in the United States Congress.

HAPPY 80TH BIRTHDAY TO MR. M. BLOUKE CARUS

HON. JERRY WELLER

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Monday, June 18, 2007

Mr. WELLER of Illinois. Madam Speaker, I rise today to offer congratulations to Mr. M. Blouke Carus of Peru, Illinois on the occasion of his 80th birthday.

A captain of industry, publisher, inventor, veteran, engineer, educator, linquist, preservationist and community servant, Mr. Carus is undoubtedly one of the most accomplished persons I have the privilege of representing in the Congress of the United States.

As Chairman of Carus Corporation, Mr. Carus oversees this privately held holding company which includes the Carus Chemical Company, the world leader in the fields of water treatment and air purification through the manufacturing and application of potassium permanganate and a variety of manganese compounds.

Mr. Carus is also Vice-Chairman of Carus Publishing Company which includes Open Court General Books and 14 children's magazines including such well-known publications as Cricket, Ladybug and Spider. This high quality children's literature has educated and entertained young people for more than three decades.

Mr. Carus has also demonstrated a lifelong interest in education. His educational achievements include the development of textbooks and teaching programs in the areas of reading, language arts and mathematics. By Presidential appointment, Mr. Carus has served as a member of the National Council on Education Research which established research policy for the United States Department of Education. He played an important role in establishing Illinois Valley Community College (IVCC) by chairing the Citizens Committee

which led the effort to create IVCC. Today, 40 years after its creation, IVCC enables thousands of students to obtain post-secondary educations in many fields while serving as a catalyst for economic development and greater employment throughout the Illinois Valley.

Mr. Carus has long been a champion of both enhanced school to work educational programs as well as the need for strong systems of educational accountability. He has pursued these critically important goals as chairman of the Education Committee of the Illinois Manufacturers' Association and as a member of the Illinois Governor's Task Force on School-to-Work Transition.

It gives me special pleasure to note the leadership role of Mr. Carus in restoring and reopening the historic Hotel Kaskaskia in downtown LaSalle, Illinois. The accomplishment of this goal will not only save a structure deemed to have national historic significance but will also spark the economic revitalization of the downtown business area of the City of LaSalle.

In closing, I urge my colleagues to seek out and highlight the contributions and achievements of the leading citizens of their own congressional districts across our Nation.

TRIBUTE TO ONCOLOGY NURSES

HON. JULIA CARSON

OF INDIANA

IN THE HOUSE OF REPRESENTATIVES

Monday, June 18, 2007

Ms. CARSON. Madam Speaker, I rise today to call attention to the important and essential role that oncology nurses play in providing quality cancer care. These nurses are principally involved in the administration and monitoring of chemotherapy and the associated side-effects patients experience. As anyone ever treated for cancer will tell you, oncology nurses are intelligent, well-trained, highly skilled, kind-hearted angels who provide quality clinical, psychosocial, and supportive care to patients and their families. In short, they are integral to our Nation's cancer care delivery system.

On behalf of the people with cancer and their families in Indiana's 7th Congressional District, I would like to specifically acknowledge Julie Painter from Indianapolis, Indiana, for her service on the Oncology Nursing Society Board of Directors, as a Director-at-Large, and her role as a Clinical Nurse Specialist at the Community Health Network. Julie has served on the ONS Board of Directors for the past 3 years; and prior to that, she served as Congress Chairperson in 1996, the Nominating Committee in 1996–1999, and on the Oncology Nursing Certification Corporation Nominating Committee in 2000–2002. She received her Master's degree and post-Master's Nurse Practitioner degree from Indiana University.

The Oncology Nursing Society has four chapters in my home state of Indiana, including one in my hometown of Indianapolis. These chapters serve the oncology nurses in the state and support them in their efforts to provide high-quality cancer care to patients and their families throughout Indiana. Julie has been a member of ONS for 20 years and has served as President, Vice President, Newsletter Editor, and more of the Central Indiana Chapter based in Indianapolis.

Since 1975, the Oncology Nursing Society has been dedicated to excellence in patient care, teaching, research, administration, and education in the field of oncology. The Oncology Nursing Society is the largest organization of oncology health professionals in the world, with more than 35,000 registered nurses and other health care professionals. The Society's mission is to promote excellence in oncology nursing and quality cancer care. I commend Julie and her organization for all that they do in the field of oncology.

Cancer is a complex, multifaceted, and chronic disease, and people with cancer are best served by a multidisciplinary health care team specialized in oncology care, including nurses who are certified in that specialty. According to the American Cancer Society, one in three women and one in two men will receive a diagnosis of cancer at some point in their lives, and one out of every four deaths in the United States results from cancer. This year, approximately 30,040 people in Indiana will be diagnosed with cancer, and another 12,730 will lose their battles with this terrible disease. Every day, oncology nurses see the pain and suffering caused by cancer and understand the physical, emotional, and financial challenges that people with cancer face throughout their diagnosis and treatment.

Today, more than two-thirds of cancer cases strike people over the age of 65, and the number of cancer cases diagnosed among senior citizens is projected to double by 2030. At the same time, many of the community-based cancer centers are facing significant barriers in hiring the specialized oncology nurses they need to treat cancer patients. We are on the verge of a major national nursing shortage, and it is estimated that there will be a shortage of 1,016,900 nurses in the year 2020. The Health Resources and Services Administration (HRSA) estimates that in 2005, the state of Indiana had a shortage of 5,295 nurses. HRSA estimates that number will reach 8,211 by 2010.

I would like to once again acknowledge and thank Julie Painter for her hard work and leadership on the Oncology Nursing Society Board of Directors. As a nurse and leader in the field, Julie has made it her life's mission to help others, and she should be applauded for all she has done.

I commend the Oncology Nursing Society for all of its efforts and leadership over the last 32 years and thank the Society and its members for their ongoing commitment to improving and assuring access to quality cancer care for all cancer patients and their families. I would like to remind my colleagues that May is Oncology Nursing Month, and I urge my colleagues to support them in their important endeavors.

TRIBUTE TO ARMY SERGEANT ANDREW HIGGINS

HON. FORTNEY PETE STARK

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Monday, June 18, 2007

Mr. STARK. Madam Speaker, I rise to pay tribute to Army SGT Andrew Higgins, a Hayward, California soldier who was killed on June 5, 2007, in Baqubah, during his second tour in Iraq as part of an elite Stryker Brigade. He was a member of the 5th Battalion, 20th Infantry Regiment, 3rd Brigade, 2nd Infantry Division from Fort Lewis, Washington.

At a very young age, Sergeant Higgins wanted to join the military. During the summer between his junior and senior years at Kennedy High School in Fremont, he took Army basic training.

After graduating from high school, he spent 2 years in the Army Reserve, signed up for the regular Army, and was assigned several times to an Army Ranger unit as a fire support specialist. Sergeant Higgins was deployed to Afghanistan with the first contingent of troops sent to fight the Taliban.

While in the Army, he received awards and decorations including two Army Good Conduct Medals, National Defense Service Medal, Iraq Campaign Medal, Global War on Terror Expeditionary Medal, Global War on Terror Service Medal and the Combat Action Badge. He was posthumously awarded the Bronze Star, the Purple Heart and the Army Commendation Medal.

Sergeant Higgins came from a long line of early American settlers. The first descendant of his family landed in New England in 1693. He was next in line to carry on the family name, as he was the third generation of Higginses who were only sons.

Sergeant Higgins is remembered as a courageous soldier with a sharp wit and a kind heart. When he finished his military service, he had planned to go back to school and study fish and habitat conservation.

I join the community in expressing deepest sympathy to SGT Andrew Higgins' family members on his tragic death. Our country owes a debt of gratitude to Sergeant Higgins and his family for the ultimate sacrifice he made in service to his country.

PERSONAL EXPLANATION

HON. WALLY HERGER

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Monday, June 18, 2007

Mr. HERGER. Madam Speaker, on rollcall vote No. 485 to H. Amdt. 294, I was recorded as a ''no,'' but it was my strong intention to vote ''aye'' on this amendment.

GENERAL OF GENOCIDE—MAHMOUD AHMADENIJAD

HON. TED POE

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Monday, June 18, 2007

Mr. POE. Mr. Speaker, ''genocide'' is a fancy term for state-sponsored murder or extermination of a group of people. And that is exactly what President Ahmadenijad of Iran is trying to incite against the state of Israel.

The president of Iran has a one-size-fits-all foreign policy. His response, Madam Speaker, to all conflicts in the Middle East is to ''get rid of Israel.''

Ironically, while claiming that the Holocaust never happened, Ahmadenijad regularly pontificates on goals that could easily have been taken right out of the Nazi playbook of the 1930s and 40s.

''The real cure,'' he has said, ''for the (Lebanon) conflict is elimination of the Zionist regime.''

And not only does he propose the ''elimination'' of the entire state of Israel, he definitively predicts that end. Israel, he said, ''will be gone, definitely.'' And, Madam Speaker, he predicts revenge against the West for standing by its greatest ally in the Middle East, saying that we ''will not see any result but the hatred of the people.''

Well, it should come as no surprise to the devil of the desert, Mr. Ahmadenijad, that the United States will not leave one of its greatest allies alone in the desert. We in America have the courage, Madam Speaker, to call Ahmadenijad a threat to world peace and an outlaw to Israel.

I believe in the freedom of speech, Madam Speaker. It is one of the foundations of democracy. But speech by a head of state that urges the annihilation of an entire nation mocks and dishonors the very notion of free speech, and it is the prelude to open aggression.

And that is why I have cosponsored this resolution calling on the U.N. Security Council to charge Iranian President Mahmoud Ahmadenijad with violating the 1948 Genocide Convention. He must be held accountable for his actions.

That's just the way it is.

TRIBUTE TO SANTA ROSA, CALIFORNIA

HON. LYNN C. WOOLSEY

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Monday, June 18, 2007

Ms. WOOLSEY. Madam Speaker, it is with great pride that I rise today to share with my colleagues the recent selection of Santa Rosa, California, the largest city in my district, as a 2007 All-America City. The honor was recently bestowed upon Santa Rosa by the National Civic League, and is considered to be the most prestigious community recognition competition in the United States today. Santa Rosa was honored for its exemplary community vision, collaborative problem-solving and the ability to meet local challenges. I have represented Santa Rosa for the past 14 years and these characteristics are just the beginning.

In order to win this prestigious award, a broad and diverse delegation of Santa Rosa public officials and business and community leaders represented Santa Rosa against 20 other community finalists from across the country. The delegation presented not only their innovative programs, but the local solutions they have implemented, before to a jury of their peers from across the United States. The delegation from Santa Rosa included the following members of the community:

Bob Blanchard, Mayor, City of Santa Rosa; Jane Bender, Councilmember, City of Santa Rosa; Jeff Kolin, City Manager, City of Santa Rosa; Michael Frank, Assistant City Manager/Administrative Services, City of Santa Rosa; Patricia Fruiht, Assistant to the City Manager, City of Santa Rosa; Mark Ihde, Retired Sonoma County Sheriff & President and CEO of Goodwill Industries—Redwood Empire; Rhuenette Alums, Area Director, AT&T; Roberta Atha, Administrative Technician, City of Santa Rosa; Neil Brady, Senior Maintenance Worker, City of Santa Rosa; Judy Daugherty, Risk Management Analyst, City of Santa Rosa; Michael Friedenberg, President, Arts Council of Sonoma County; Jesse Guerrero, Artstart Apprentice; Vince Harper, Director, Youth & Neighborhood Services, Community Action Partnership; Mo McElroy, Director, Santa Rosa Convention & Visitors Bureau; Juan Meza, After-School Program Participant; Ernesto Olivares, Police Lieutenant and Manager, Gang Prevention & Intervention Services, City of Santa Rosa; Rosie Rojas, After-School Program Participant; Crystal Tsutsui, After-School Programs Volunteer/Chaperone; Mario Uribe, Creative Director, Artstart; Steve Velasquez, Program Director, Hope Works Santa Rosa; Patricia Wilburn, Production Specialist, Community Media Center Chandra Woodworth, Artstart Apprentice; Donna Zapata, Operations Manager, Hispanic Chamber of Commerce.

During their presentation the delegation was able to share the achievements of three Santa Rosa's programs that serve as outstanding examples of public-private partnership to solve address community concerns:

SANTA ROSA DOWNTOWN ARTS PROGRAM

The Santa Rosa Downtown Arts Program brings a wide range of arts and cultural programming into the downtown area to strengthen the community's image and sense of place, increase cultural unity and stimulate economic development. The program creates an arts hub that draws people downtown to live, work, and play, which encourages development and increases downtown business. The Downtown Arts Program has a three-prong approach: (1) Physical Environment—Artists design sculptures, informational kiosks, benches, light poles and news racks. Art facilities, studios, galleries, and exhibition spaces are a priority. (2) Cultural Programming includes diverse music, dance, theater, film, and literary arts. (3) Sustainable Resources—Leadership and funding from public and private sector guarantee the program's strength and growth.

MEASURE O PUBLIC SAFETY QUARTER-CENT SALES TAX MEASURE

A quarter-cent public safety sales tax measure was placed on the November 2004 ballot, which came to be known as Measure O. The measure generates approximately $7 million per year for Police, Fire, and Gang Prevention and Intervention efforts. The ordinance set up a citizen oversight committee and has strict rules preventing any ''supplanting'' of existing services or funding in the General Fund. This project has allowed significant progress to be made in vital areas at a time when core public safety was threatened.

MAYOR'S GANG PREVENTION TASK FORCE

Four years ago, the city of Santa Rosa took aggressive steps to address the rise of local gangs. The city began with a public outreach campaign to educate the community on the growing threat, and followed that up with trips to other cities where staff and policy leaders were able to learn from their programs. In addition, the Mayor became actively involved by establishing the Gang Prevention Task Force in order to confront the issues and the risk to youth. The Task Force consists of policy leaders from throughout Sonoma County, school officials, law enforcement and officials from non-profit and social service organizations. In addition the move was not a drain on existing public resources, and was primarily funded by a quarter-cent sales tax measure that dedicates 20 percent to gang prevention and intervention measures.

While the Santa Rosa delegation brought home the top honors, every member of the delegation was able to learn from the other finalists. As a result they have returned to Santa Rosa, not only energized, but armed with fresh ideas to improve their community. I am very proud of their achievement, Madam Speaker, and invite all of my colleagues to visit this lovely community in the Sonoma County wine country just north of San Francisco.

HONORING STAFF SERGEANT MICHAEL BECHERT

HON. MIKE PENCE

OF INDIANA

IN THE HOUSE OF REPRESENTATIVES

Monday, June 18, 2007

Mr. PENCE. Madam Speaker, I rise today to pay tribute to one of Indiana's native sons who served his country honorably in support of Operation Iraqi Freedom. I was deeply saddened to learn that Staff Sergeant Michael Bechert of New Castle had succumbed to wounds he suffered in Baghdad last month when his vehicle was hit by an improvised explosive device.

Staff Sergeant Bechert served in the 1st Battalion, 18th Infantry Division, 1st Infantry Division since 2001. He received numerous meritorious citations during 2 enlistments and 6 years in the Army, all stationed in Germany where he lived with his wife and young son. He was serving his second tour in Iraq.

The infantry is the oldest of the combat arms. From the dawn of time, wars have been predominantly fought by men on foot. Staff Sergeant Bechert continued that proud tradition as an expert soldier who had mastered

the skills of an infantryman and served bravely in combat.

Staff Sergeant Bechert was the recipient of the Expert Infantryman Badge and Combat Infantryman Badge, highly regarded decorations in the U.S. Army that certify his elite skills and service to his country in combat. His other medals include an Army Commendation Medal for heroism and a Purple Heart for a previous injury. He will be awarded posthumously with a Bronze Star and a second Purple Heart because he died in the line of duty.

We all owe a debt that can never be repaid to Staff Sergeant Bechert's family and friends for the tragic loss of husband, father, son, friend, citizen, soldier and hero.

Madam Speaker, I wish to express my profound sadness to the community at the loss of this talented young Hoosier who made the ultimate sacrifice to preserve and protect these United States. Let us remember Staff Sergeant Bechert, his family and friends in our thoughts and prayers.

RESOLUTION IN HONOR OF THE RIGHT REVEREND PHILIP AQUILLA BROOKS II

HON. CAROLYN C. KILPATRICK

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Monday, June 18, 2007

Ms. KILPATRICK. Madam Speaker, I respectfully submit the following resolution, this 18th Day of June, in the Year of Our Lord, Two Thousand and Seven.

Whereas, Bishop Philip Aquilla Brooks II has rendered a lifetime of devoted service to his ministry in Detroit, Michigan. He is the founding Pastor of New St. Paul Tabernacle Church of God in Christ in Detroit, Michigan, where he has served for over 54 years. Since 1975, Bishop Brooks has been the presiding prelate of the Historic First Ecclesiastical Jurisdiction of Michigan, which is also known as the Northeast Michigan Jurisdiction. In 1984, and each quadrennial since, the Lord has honored Bishop Brooks' dedication and loyalty to His work through the favor of men, by elevating him to the presidium of the Church of God in Christ, Inc., and the largest African-American Pentecostal Denomination with an estimated 6.5 million members in over 59 countries. He now serves the Church as the Second Assistant Presiding Bishop;

Whereas, Bishop Philip Aquilla Brooks II is an individual with great vision and focus. Bishop Brooks established the March of Faith Telecast and Radio Ministry, which has ministered to countless millions across the nation in their homes, hospital rooms and behind prison bars for nearly three consecutive decades. Always the innovator, Bishop Brooks was the first among his peers on the General Board to establish a presence for his local church and Jurisdiction on the World Wide Web. He was among the first to broadcast his Sunday morning worship services via the Internet in a live Web cast every Sunday morning;

Whereas, Bishop Philip Aquilla Brooks II compassion for all of God's children has caused him to expand his local church ministry into the areas of education, senior housing, food programs and other community outreach programs. He is the founder of the Grandmont-Rosedale Christian School and Day Care. He is the president of the New St. Paul Non-Profit Housing Corporation. This is a Community Development Corporation responsible for the building of Faith Manor Senior Citizens Apartments on the campus of New St. Paul Tabernacle. Under Bishop Brooks' visionary leadership, New St. Paul Tabernacle distributes hundreds of Thanksgiving baskets to needy families each year, offers tutorial services to students, and provides business incubator programs to foster entrepreneurship;

Whereas, Bishop Philip Aquilla Brooks II is the third-longest serving Church of God in Christ bishop in the 93-year history of the church's influence in the State of Michigan, and is the senior Bishop in the mid-west region, including Michigan, Ohio, Illinois, Indiana and Ontario, Canada. He was consecrated Jurisdictional Prelate of Northeast Michigan Jurisdiction in 1975 by the late Presiding Bishop J.O. Patterson, Sr. During his tenure, Bishop Brooks' programs and initiatives have benefited all citizens of the State of Michigan. His latest contribution is the formation of the first black-owned Mortgage Company in the Church of God in Christ—Faith Community Mortgage LLC;

Whereas, Bishop Philip Aquilla Brooks II established the nation's first Blue Cross/Blue Shield Program for local pastors, life insurance for local pastors and a Compensation Program for widows of local pastors. He lead the Jurisdiction in purchasing and renovating Northeast Michigan's jurisdictional headquarters, Cathedral Conference Center. He is directly or indirectly responsible for purchasing, financing, renovating, or building new churches for over 50 pastors within the jurisdiction;

Whereas, Bishop Philip Aquilla Brooks II has served for almost a quarter of a century, as a member of the Presidium of the Church of God in Christ, Inc. First elected in 1984, Bishop Brooks is now serving in his sixth term. In addition to these duties, Bishop Brooks served for 12 years as a member of the board of directors of First Independence Bank; and serves on the board of directors for the famed Museum of African American History based in Detroit, Michigan;

Whereas, Bishop Philip Aquilla Brooks II was inducted into the International Gospel Music Hall of Fame and Museum as a result of his contributions to the field of music in years past as a musician, and Music Department President, and presently, a worshiper; and

Whereas, Bishop Philip Aquilla Brooks II, on April 11, 2007, was elevated to the Office of Second Assistant Presiding Bishop of the Church of God in Christ, Inc. by Presiding Bishop Charles E. Blake, Sr.

Whereas, we the Members of the Congressional Black Caucus extend our sincere appreciation and highest respect to Bishop Philip Aquilla Brooks II and the entire COGIC Denomination.

Therefore, be it resolved, that we celebrate and honor the elevation of Bishop Philip Aquilla Brooks II for his lifetime of devotion, dedication, dignity and honor; his faithful service to all human beings, and for being a worldwide spiritual leader, especially within the Church of God in Christ.

Be it finally resolved that a copy of this resolution be presented to Bishop Philip Aquilla Brooks II, the family and that a copy be placed in the records of the Church.

RECOGNIZING THE ACCOMPLISHMENT OF DAVID WILLIAMS

HON. JAMES P. MORAN

OF VIRGINIA

IN THE HOUSE OF REPRESENTATIVES

Monday, June 18, 2007

Mr. MORAN of Virginia. Madam Speaker, I rise today to honor the accomplishment of Mr. David Williams of Arlington, Virginia and a proud member of our civil service. Mr. Williams revamped outreach efforts for the Earned Income Tax Credit, helping hundreds of thousands of additional Americans receive vital benefits, and oversaw the Telephone Excise Tax Refund—the largest one-time tax refund in history.

The Earned Income Tax Credit (EITC) is widely recognized as our Federal government's most effective anti-poverty program. Despite the program's overall success, studies revealed an erroneous payment rate of roughly 25 percent, and millions of eligible workers were not claiming the credit. David Williams, who heads the EITC office at the Internal Revenue Service, led the effort to revamp the program. Thanks to his leadership, as many as 500,000 more people each year are receiving vital benefits.

Today, under Mr. Williams' leadership, the IRS works with more than 150 nonprofit and community-based organizations to host EITC awareness events in more than 50 cities, creating volunteer tax assistance sites at banks, businesses and community centers. He also used news conferences and local media to help drive people to seek out this assistance.

In just 1 year, more than 2 million tax returns were prepared at these volunteer tax assistance sites. The tax credits low-income working Americans receive help them cover the essential costs they face every day—from child care to fixing the car. One person who attended a workshop reported that the tax credit helped her go from being an apartment renter to a homeowner. Since David Williams launched these new outreach efforts, the number of eligible taxpayers receiving the credit has increased by 500,000 people a year, and last year, more than 22 million people received $41 billion in EITC payments.

As a senior official at the IRS, it would be easy to think of David Williams as a numbers guy. But his people skills, strategic approach and ability to lead diverse groups to achieve shared public policy goals have distinguished him as one of our government's most outstanding employees and have helped him positively affect the lives of millions of Americans.

Madam Speaker, I commend Mr. Williams for his leadership, and I am proud to have him live in Virginia's 8th Congressional District as he contributes to the greatest civil service in the world. I wish him all the best in his future endeavors.

HONORING WILLIAM ''BILL'' CLIFTON FRANCE, FORMER PRESIDENT, CEO AND CHAIRMAN OF NASCAR

HON. KATHY CASTOR

OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES

Monday, June 18, 2007

Ms. CASTOR. Madam Speaker, I am pleased today to introduce a resolution honoring the esteemed former President, CEO, and Chairman of NASCAR, William ''Bill'' Clifton France, Jr. Sadly, Bill France passed away June 4 after an extended illness. Bill was well known in Florida, leading NASCAR for 31 years before retiring in 2003. He was, like his father, ''Big Bill,'' a giant in the racing world. He was also a super citizen whose interests and influence went well beyond the racing world. Bill lived life to the fullest and will be remembered with both admiration and fondness.

Today, the Daytona International Speedway is a landmark in the international motorsports community. However, when the France family settled in Daytona Beach, Florida, in 1934, the track was nothing but packed sand. Bill's father, William H.G. France, was known for his innovative perspectives and entrepreneurial skills in building the legacy that is the Daytona International Speedway. Bill Jr. took the same business savvy his father exhibited, and made NASCAR the legend it is today.

As President, CEO, and Chairman of NASCAR, Bill France transformed the International Speedway Corporation (ISC) into the third ranked professional sports entity on television. His leadership led the ISC to promote more than 100 annual racing events, own and/or operate thirteen of the Nation's major motorsports entertainment facilities, and own and operate MRN Radio, the Nation's largest independent sports radio network. In addition to his business achievements, the philanthropic initiative of Bill France and the France family founded the NASCAR Foundation Family of Charities, a group of more than 30 organizations that supports children's programs, animal welfare and conservation.

I know his wife, Betty Jane, and his children Brian and Lesa and their children, will miss him terribly. I know, also, that they are proud of the contributions Bill made to make motorsports not only a successful venture in Florida, but around the world. I am proud to pay tribute to Bill France, his numerous accomplishments, and his dedication to the Florida community and the motorsports industry.

PAYING TRIBUTE TO BRIGADIER GENERAL JAMES C. HALL

HON. JON C. PORTER

OF NEVADA

IN THE HOUSE OF REPRESENTATIVES

Monday, June 18, 2007

Mr. PORTER. Madam Speaker, I rise today to honor the life of Brigadier General James C. Hall, Colorado National Guard (Retired).

James C. Hall was born into a coal mining family with 10 children in Wilkinsburg, Pennsylvania on April 14, 1926. He is the youngest son and followed in the footsteps of 5 of his older brothers when he joined the Army during World War II at age 17. He served as an airborne radio operator and later a flight engineer throughout his service in the Pacific theater. After returning from World War II, Mr. Hall reenlisted in the Army Air Corps and was awarded a direct commission into the new United States Air Force. Mr. Hall received his Bachelor's degree from the University of New Mexico and is a graduate of the Army Parachute School at Fort Benning, GA, the Advanced School at Fort Bragg, NC, and U.S. Forest Service Smoke Jumper's School.

Throughout 36 years of military service and the rest of his civilian life, he became a pioneer in parachuting. Mr. Hall is a Master Parachutist with more than 1800 jumps. He started the parachuting program at the United States Air Force Academy which is the safest program of all similar service schools. In 1959 Mr. Hall and a partner organized the first professional parachuting firm in the world which led to many innovative advances in its field. His hit television show ''Ripcord'' has been noted as starting the modern conception of parachuting as a sport. He pioneered the ''Buddy System'' for free falling and the ''4-line-cut'' for emergencies in parachuting. Mr. Hall has been honored and cited numerous times. He has received such accolades as the AFA Medal of Merit, the Citation of Honor for his MIA/POW program, the Exceptional Service Plaque, the AFA Presidential citation, the Colorado Man of the Year, Leo Stevens Parachute medal, and the Colorado Meritorious Service Medal. As a founding member of Colorado's Wright Brothers Memorial foundation, he was inducted into the Colorado Aviation Hall of Fame in 1985.

Madam Speaker, I am proud to honor Brigadier General James C. Hall. I thank him for his honorable service to our country.

SENATE COMMITTEE MEETINGS

Title IV of Senate Resolution 4, agreed to by the Senate on February 4, 1977, calls for establishment of a system for a computerized schedule of all meetings and hearings of Senate committees, subcommittees, joint committees, and committees of conference. This title requires all such committees to notify the Office of the Senate Daily Digest—designated by the Rules Committee—of the time, place, and purpose of the meetings, when scheduled, and any cancellations or changes in the meetings as they occur.

As an additional procedure along with the computerization of this information, the Office of the Senate Daily Digest will prepare this information for printing in the Extensions of Remarks section of the CONGRESSIONAL RECORD on Monday and Wednesday of each week.

Meetings scheduled for Tuesday, June 19, 2007 may be found in the Daily Digest of today's RECORD.

MEETINGS SCHEDULED

JUNE 20

9:30 a.m.

Health, Education, Labor, and Pensions

Business meeting to consider original bills entitled, ''The Higher Education Access Reconciliation Act'', ''The Higher Education Amendments of 2007'', and the nominations of Jerome F. Kever, of Illinois, Michael Schwartz, of Illinois, and Virgil M. Speakman, Jr., of Ohio, all to be Members of the Railroad Retirement Board, Marylyn Andrea Howe, of Massachusetts, and Lonnie C. Moore, of Kansas, both to be Members of the National Council on Disability, and Kerri Layne Briggs, of Virginia, to be Assistant Secretary for Elementary and Secondary Education, Department of Education.

SD–628

10 a.m.

Foreign Relations

JULY 25

9:30 a.m.
Veterans' Affairs
To hold hearings to examine Veterans Affairs and the Department of Defense education issues.
SD–562

HOUSE OF REPRESENTATIVES—*Tuesday, June 19, 2007*

The House met at 9 a.m. and was called to order by the Speaker pro tempore (Mr. COSTA).

DESIGNATION OF SPEAKER PRO TEMPORE

The SPEAKER pro tempore laid before the House the following communication from the Speaker:

WASHINGTON, DC,
June 19, 2007.

I hereby appoint the Honorable JIM COSTA to act as Speaker pro tempore on this day.

NANCY PELOSI,
Speaker of the House of Representatives.

MORNING-HOUR DEBATE

The SPEAKER pro tempore. Pursuant to the order of the House of January 4, 2007, the Chair will now recognize Members from lists submitted by the majority and minority leaders for morning-hour debate. The Chair will alternate recognition between the parties, with each party limited to not to exceed 25 minutes, and each Member, except the majority leader, the minority leader, or the minority whip, limited to not to exceed 5 minutes, but in no event shall debate extend beyond 9:50 a.m.

The Chair recognizes the gentleman from Texas (Mr. LAMPSON) for 5 minutes.

RECOGNIZING THE SOCIETY OF IRANIAN-AMERICAN WOMEN FOR EDUCATION

Mr. LAMPSON. Mr. Speaker, I am honored to recognize the great work and contribution of the Society of Iranian-American Women for Education, a scholarship fund in southeast Texas that serves the greater academic community. The Society's mission is to promote Iranian culture through educational seminars, films, lectures, and exhibitions, but their most important goal is to provide educational support and assistance through scholarships for hardworking students. To date, more than 170 such scholarships have been awarded to students attending schools in Texas. The Society is also dedicated to strengthening relationships and deepening the understanding between Iranians and Americans, and has hosted many esteemed speakers, including Nobel Laureate Dr. Shirin Ebadi and Anousheh Ansari, who recently completed her own space flight. I salute the Society for their dedication to academics and achievement, and wish them future success in all their wonderful endeavors.

RECESS

The SPEAKER pro tempore. Pursuant to clause 12(a) of rule I, the Chair declares the House in recess until 10 a.m. today.

Accordingly (at 9 o'clock and 6 minutes a.m.), the House stood in recess until 10 a.m.

□ 1000

AFTER RECESS

The recess having expired, the House was called to order at 10 a.m.

PRAYER

The Chaplain, the Reverend Daniel P. Coughlin, offered the following prayer:

Lord God, in the days of Gideon, out of fear of the Midianites, Your people established fire signals on the mountains, caves for refuge and strongholds. Today, Lord, bless and strengthen all efforts to build homeland security in places around the world like Darfur, as well as here in the United States. To protect one's home or homeland seems paramount in the Hebrew, Christian and Muslim scriptures. But, Lord, You seem to ask even more of Your people.

Let Congress learn from Gideon's interaction with You, Lord.

When Gideon asks ''if the Lord is with us, why has all this happened to us?'' the Lord turns to him and said, ''Go with the strength you have and save Israel from the power of Midian.''

The Scriptures seem to ask for moral authority in a person as a prerequisite to being a leader in defense of what is good and just. Gideon is exhorted to look first to his personal strength. As he proves his own moral integrity, piety and ability, the Lord's promise is realized, ''I am with you.''

May this Congress and the leaders of all nations move and act with deeper faith, knowing the extent and limitations of their strength, both now and forever. Amen.

THE JOURNAL

The SPEAKER. The Chair has examined the Journal of the last day's proceedings and announces to the House her approval thereof.

Pursuant to clause 1, rule I, the Journal stands approved.

PLEDGE OF ALLEGIANCE

The SPEAKER. Will the gentleman from New York (Mr. HALL) come forward and lead the House in the Pledge of Allegiance.

Mr. HALL of New York led the Pledge of Allegiance as follows:

I pledge allegiance to the Flag of the United States of America, and to the Republic for which it stands, one nation under God, indivisible, with liberty and justice for all.

ENERGY AND WATER DEVELOPMENT APPROPRIATIONS BILL

(Mr. HALL of New York asked and was given permission to address the House for 1 minute.)

Mr. HALL of New York. Madam Speaker, later today, we will begin work on important legislation to finally help America end its dependence on foreign oil and pursue newer, cleaner forms of energy.

I'm excited that the Energy and Water appropriations bill that we will pass this week will take the long overdue step of setting a new course for our energy future by making significant investments in renewables and efficiency.

For too many years, working families have felt the sting of high gas prices at the gas pump and rising home energy costs. Our economy has been made vulnerable to the whims of OPEC, and our reliance on fossil fuels has polluted our air and exacerbated climate change.

All the while, State and local governments have been forced to try to fill the leadership vacuum left by the Congress and this President.

No more. The new Congress is prepared to meet our Nation's energy challenges head-on, and to do so, this bill provides almost $2 billion for renewables and efficiency, significantly more than the President requested.

I am concerned that it continues to provide unwarranted taxpayer subsidies for nuclear power that hide the true consumer costs of this power source, but I support this bill, and I urge my colleagues to ratify it.

AMERICANS ARE MORE THAN QUALIFIED TO BREAK THEIR ADDICTION TO OIL

(Mrs. BLACKBURN asked and was given permission to address the House for 1 minute and to revise and extend her remarks.)

Mrs. BLACKBURN. Mr. Speaker, I read in the Charlotte Observer about a

gentleman who decided to retrofit his 1981 diesel Mercedes with vegetable oil and got a knock on his door by the tax man. His crime was choosing to take a stand against the rising cost of gasoline, OPEC, and other international energy cartels by converting his car into clean-running alternative energy. His punishment was a $1,000 fine by the North Carolina State Government and $1,000 notice from the Feds. So much for innovation and alternative fuel research.

The predicament was chronicled in the Charlotte Observer on June 15, and what we're finding out is he's not alone. Many innovators around the country are creating unique ways to exercise energy independence. In so doing, they're demonstrating to the Federal Government that the American people are more than qualified to break their addiction to foreign oil. Good old American ingenuity always comes through.

As we take up consideration on the Energy Approps Act for 2008, it's instructive to consider what they know. If you want to get more innovation, incentivize it. If you want less of it, tax it.

TAKING CARE OF OUR VETERANS

(Mr. CARNAHAN asked and was given permission to address the House for 1 minute.)

Mr. CARNAHAN. Mr. Speaker, I stand to honor our Nation's veterans and one special veteran. Today, we mourn the passing of Jeff Smart, a Vietnam veteran, constituent and friend. Not only was Jeff a tireless advocate for veterans rights, he was a valuable member of my Veterans Advisory Committee in Missouri.

I know that Jeff would be proud to know that last week the House came together in a bipartisan way to pass the 2008 Military Construction and Veterans Affairs appropriations bill that contained a historic increase in the VA budget. This bill included the largest single funding increase in the 77-year history of the Veterans Administration.

This funding increase ensures that our veterans are given the support, benefits and resources they need and deserve. I applaud this Congress's commitment to countless veterans like Jeff Smart who will always inspire us in the years to come.

HAPPY BIRTHDAY, JERRY BAKER, AMERICA'S MASTER GARDENER

(Ms. FOXX asked and was given permission to address the House for 1 minute and to revise and extend her remarks.)

Ms. FOXX. Mr. Speaker, I rise today to salute Jerry Baker, America's master gardener, as he celebrates his birthday. As a former owner of a nursery business, I've come to appreciate the wit and wisdom that Jerry has given to gardeners across the country for more than three decades.

Jerry has been offering tips for almost as long as I can remember. His folksy and down-to-earth advice has been helping everyone from city dwellers trying to master a finicky herb garden in a window box to longtime gardeners across rural America who produce those ubiquitous wheelbarrows full of zucchini.

Thanks to Jerry, our gardens have been producing more with less. Today, with dozens of books full of garden advice in print and a weekly nationwide radio show where he solves the gardening problems of people across the country, Jerry is well-established as America's go-to guy on all things gardening.

As he marks one more year on his calendar, I rise to wish him many more years of garden mastering. Happy birthday, Jerry.

PRESIDENT BLOCKING THE DEMOCRATIC NEW DIRECTION AGENDA

(Mr. PERLMUTTER asked and was given permission to address the House for 1 minute.)

Mr. PERLMUTTER. Mr. Speaker, the new Democratic-led House has been listening to the American people and working to take our Nation in a new direction. We've passed a wide range of measures to strengthen our military, grow our economy and support working families, many with bipartisan support.

For example, so far this year, we've passed legislation implementing the 9/11 Commission recommendations, approved a budget that achieves a balance in 5 years, passed sweeping congressional ethics reform, repealed big oil subsidies, invested funds in renewable energy and increased the minimum wage.

But the President continues his stubborn opposition to this new direction that we are providing on Iraq and on key domestic measures. He does not support or has threatened to veto about two-thirds of the important work we've already provided.

Mr. Speaker, our priorities are America's priorities. It's time the President stops obstructing our agenda and begins working with us to improve the lives of all Americans.

PROTECTING OUR KIDS FROM CONTAMINATED PRODUCTS

(Mr. KIRK asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. KIRK. Mr. Speaker, yesterday the Consumer Product Safety Commission and toy company RC2 announced a recall of 1.5 million Thomas & Friends railway toys because they might contain dangerous amounts of lead.

Lead poisoning causes vomiting and diarrhea, convulsions, anemia, a loss of appetite, abdominal pain, irritability, fatigue and coma. It can even be fatal.

The toys were made in China and were retailed throughout the United States. First, it was pet food, then toothpaste, now Thomas the Tank Engine. Just about every family with kids in my district has a Thomas the Tank Engine.

We need to send a clear notice to importers that goods that threaten the safety of kids should be left on America's docks.

That's why I'm introducing legislation this week that prohibits the importation of any product from an importer of processed food or retail goods that the Secretary of Health and Human Services has determined contains unsafe levels of contaminants.

Mr. Speaker, we need to do this to defend America's families, especially its children.

DIFFERENT PRIORITIES ON FEDERAL SPENDING

(Mr. ALTMIRE asked and was given permission to address the House for 1 minute.)

Mr. ALTMIRE. Mr. Speaker, President Bush said this week that there are important differences between Republicans and Democrats when it comes to spending, and he's right, because for 6 years, President Bush joined with Republicans that led this Congress on the most fiscally irresponsible budget policies in the history of the Nation. They turned the record surpluses of the 1990s into the record deficits we face today, and while they ran up those record deficits, inconceivably they cut medical research. They cut Head Start, they cut clean water programs, and they cut health care for our Nation's veterans.

Mr. Speaker, the Democratic budget balances the budget within 5 years, and our appropriations bills comply with pay-as-you-go scoring. We passed Homeland Security and Military Construction and Veterans appropriations bills last week, and this week we'll pass an Energy and Water bill that includes renewable fuel and reduces our dependence on foreign oil.

So you see, Mr. Speaker, the President's right; we do have different priorities on Federal spending.

IN APPRECIATION OF THE NRA

(Mr. WILSON of South Carolina asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. WILSON of South Carolina. Mr. Speaker, nearly 2 months after the horrifying events at Virginia Tech took the lives of 32 innocent people, I am

grateful the House last week acted to improve State reporting to the National Instant Criminal Background Check System. Sadly, had this legislation been in place sooner, that tragic day at Virginia Tech might never have occurred.

I'm especially pleased that the National Rifle Association, of which I'm a proud member, was active in supporting this effort. I'm also thankful John Goodwin, previously with former Congressman Rob Simmons, has recently joined their able team. The NRA plays a vital role in promoting second amendment rights, and I appreciate their work.

Our thoughts and prayers remain with the families affected by the Virginia Tech shootings. I urge the Senate to quickly consider H.R. 2640 to ensure guns are available to law-abiding citizens and kept from the hands of criminals

In conclusion, God bless our troops and we will never forget September 11. Our sympathy to the people of Charleston due to the tragic deaths of courageous firemen.

DEMOCRATS MAKE GLOBAL WARMING A PRIORITY THIS WEEK AS PART OF ENERGY AND WATER BILL

(Mr. WILSON of Ohio asked and was given permission to address the House for 1 minute.)

Mr. WILSON of Ohio. Mr. Speaker, this week the new Democratic House addresses two of our Nation's most important issues, global warming and energy independence.

This new Democratic Congress recognizes that we must take wide-ranging action to lessen our dependence on foreign oil and to cut our greenhouse gas emissions to protect our planet, to reduce energy prices, and to boost our economy while strengthening our national security.

This week we will bring an Energy and Water funding bill to the floor that makes a significant investment in energy efficiency and renewable energy programs.

We invest $51 million more than the President has asked for in our solar energy and more affordable, $70 million more for the development of biofuels, and $59 million more to develop technologies to improve our fuel efficiency.

Mr. Speaker, this new Democratic Congress is serious about addressing the issues that have been ignored for far too long. I would hope our energy bill would receive strong bipartisan support this week.

□ 1015

FEDERAL FUNDING FOR PLANNED PARENTHOOD

(Mr. PITTS asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. PITTS. Mr. Speaker, President Bush has been very clear. If Congress sends him appropriations bills that weaken current pro-life provisions, he will veto the bills. But don't be surprised if the new Democratic majority is trying to do so anyway. When they do, I am sure they will have countless reasons for why they should weaken protections for the unborn.

But as this debate goes forward, it's important to keep in mind how much Uncle Sam already gives to abortion providers. Planned Parenthood reported record profits in 2005–2006 fiscal year. Guess who helped them achieve these profits? That's right, the American taxpayer.

In 2005–2006, Planned Parenthood received over $305 million in taxpayer funding, the most ever in a year. They also performed nearly 265,000 abortions, another record. Keep this in mind as we hear the other side's arguments for giving even more money to abortion providers. The fact is, these groups are milking the American taxpayers.

President Bush is right to stand up for current pro-life provisions, and House Republicans will stand with him on the issue.

GENERAL PETRAEUS ADMITS THAT CONDITIONS WILL NOT IMPROVE IN IRAQ BY SEPTEMBER

(Mr. SIRES asked and was given permission to address the House for 1 minute.)

Mr. SIRES. Mr. Speaker, through a congressional debate on the Iraq supplemental funding bill, Senate and House Republican leaders said that significant improvements will be needed to be seen by September in Iraq, otherwise a serious course correction might be needed.

We'll see if Republican leaders will continue to back those words and will finally join us in moving the Iraq war in a new direction, or will they move the deadline to a later date like they have done in the past. It will be interesting to see if they stand by their statements in light of General David Petraeus' acknowledgment over the weekend that conditions in Iraq were not improved by September. The general also indicated that stabilizing Iraq will take as long as 10 years.

Mr. Speaker, Democrats remain committed to forging a new direction in Iraq. In the coming months, Democrats will continue to hold President Bush accountable to fight to ensure that the Iraqi people take control of the country. A 10-year commitment is simply unacceptable to us. Now we will see if the Republicans will stand by their past statements and join us in the efforts in September.

CHILD CRUSADERS

(Mr. POE asked and was given permission to address the House for 1 minute.)

Mr. POE. Mr. Speaker, in the days of the recent past, when a child was sexually assaulted, the criminal justice system continued to victimize the child, because the victim was bounced all over town relating the story to numerous strangers.

Sometimes a child, when interviewed at the police station, actually came in direct contact with the offender. Also, the child could wait for hours in the same county emergency rooms as other victims of stabbings, car wrecks and overdoses.

But times have changed. There are over 680 child advocacy centers in the United States, including one in Houston, where victims go when assaulted. At the center are trained police, therapists, doctors and lawyers that are experts in dealing with children. Here the child is helped before the trial, during the trial, and, yes, after trial.

The National Children's Alliance, led by Nancy Chandler, is the umbrella organization that helps these 600-plus centers throughout the Nation. All these child crusaders are in Washington this week working to make our land safer for kids.

America is grateful to these members of the victims' posse that help protect our greatest resource, children. After all, it shouldn't hurt to be a kid in the United States.

And that's just the way it is.

MAKE GLOBAL WARMING A PRIORITY THIS WEEK AS PART OF ENERGY AND WATER BILL

(Ms. SHEA-PORTER asked and was given permission to address the House for 1 minute and to revise and extend her remarks.)

Ms. SHEA-PORTER. Mr. Speaker, energy independence and fighting global warming are essential, and they are the challenges of our day. Years of inaction, even disbelief on the part of the White House and the Republicans, have delayed any real work being done.

This week the Democratic Congress will bring a bill to the floor to change this. There will be an Energy and Water appropriations bill that will provide substantial funding to fight global warming. Overall, the bill appropriates $3 billion for researching the effects of global warming. This funding will allow us to monitor radiation in the atmosphere, to use state-of-the-art computer technology to conduct climate change modeling and to conduct long-term experiments on the impact of increased carbon dioxide levels on forests and other ecosystems.

This research will finally allow us to have the science that we need to fight this battle. We have delayed it for years because of the Republican administration's inactivity. I hope that this

week the Republican leadership will join with the Democrats in Congress to finally move this forward.

TRUE IMMIGRATION REFORM NEEDED

(Mr. STEARNS asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. STEARNS. Mr. Speaker, past experiences in the United States and Europe clearly shows that amnesty legislation only encourages further illegal immigration. The Immigration Reform and Control Act of 1986 required a criminal background check, payment of application fees, acquisition of English-language skills, and a civics requirement. Now, despite all those measures, the law failed to curb the influx of illegal immigration.

The Senate's immigration reform legislation embodies the same flawed strategy as the 1986 law. Any measures to enhance border security or to improve immigration services would be overwhelmed by a continued flow of both illegal border crossing and individuals who entered legally, but remain in this country past the period authorized by their visa.

To stop further illegal immigration, Congress should not grant these illegal immigrants in the United States any form of legal status that does not require them to leave the United States voluntarily and undergo adequate criminal national security and health checks before seeking to return.

JUNETEENTH

(Mr. COHEN asked and was given permission to address the House for 1 minute.)

Mr. COHEN. Mr. Speaker, today is June 19. June 19 is an important day in history. To African Americans, and to all Americans it should be, but to African Americans in particular, it is known as Juneteenth.

Juneteenth is the first day I got involved in politics and learned about it. I didn't know much about it. I thought, why is Juneteenth a holiday to African Americans, and I learned. It's a holiday because that's the day in 1865 that the slaves in east Texas learned that they were free.

The news of the Emancipation Proclamation did not get to Texas for 2 years, and that was the day that all slaves in America were free. The idea of our country having slavery as an institution was wrong. It was a crime against humanity.

There is nothing more valuable to any of us than freedom, the opportunity to go where we want, to do what we want, and to associate with whom we want. That's what makes America great. Unfortunately, we had that institution, and later we had Jim Crow for 100 years.

That's why I have introduced H. Res. 194 to apologize for slavery and Jim Crow, a crime against humanity that this government and this House permitted and allowed to occur. We must apologize for our errors.

THE DRIVE ACT

(Mr. KINGSTON asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. KINGSTON. Mr. Speaker, in 2004, we spent $103 billion buying oil from nondemocratic countries, countries such as Iran, Venezuela and Russia, and the list goes on and on. Indeed, we are funding both sides in the war on terrorism, because every time we send money to these folks, the money winds up in the hands of somebody, some group, who doesn't stand for what we stand for and often is overtly anti-American.

That's why we should pass the DRIVE Act, which I have co-sponsored with Democrat Congressman ELIOT ENGEL. The DRIVE Act seeks to reduce our oil consumption by 20 percent, which is roughly the amount of oil we buy from the Middle East.

We do this through tax incentives, putting people in hybrids and flex-fuel vehicles, getting gas stations to convert to flex-fuel stations so that they can sell ethanol and biodiesel and giving a tax incentive for automobile manufacturers so that they can work with lightweight material to make cars more fuel efficient.

Please co-sponsor the DRIVE Act.

PROVIDING FOR CONSIDERATION OF H.R. 2641, ENERGY AND WATER DEVELOPMENT AND RELATED AGENCIES APPROPRIATIONS ACT, 2008

Ms. MATSUI. Mr. Speaker, by direction of the Committee on Rules, I call up House Resolution 481 and ask for its immediate consideration.

The Clerk read the resolution, as follows:

H. RES. 481

Resolved, That at any time after the adoption of this resolution the Speaker may, pursuant to clause 2(b) of rule XVIII, declare the House resolved into the Committee of the Whole House on the state of the Union for consideration of the bill (H.R. 2641) making appropriations for energy and water development and related agencies for the fiscal year ending September 30, 2008, and for other purposes. The first reading of the bill shall be dispensed with. All points of order against consideration of the bill are waived except those arising under clause 9 or 10 of rule XXI. General debate shall be confined to the bill and shall not exceed one hour equally divided and controlled by the chairman and ranking minority member of the Committee on Appropriations. After general debate the bill shall be considered for amendment under the five-minute rule. Points of order against provisions in the bill for failure to comply with clause 2 of rule XXI are waived. During consideration of the bill for amendment, the Chairman of the Committee of the Whole may accord priority in recognition on the basis of whether the Member offering an amendment has caused it to be printed in the portion of the Congressional Record designated for that purpose in clause 8 of rule XVIII. Amendments so printed shall be considered as read. When the committee rises and reports the bill back to the House with a recommendation that the bill do pass, the previous question shall be considered as ordered on the bill and amendments thereto to final passage without intervening motion except one motion to recommit with or without instructions.

SEC. 2. During consideration in the House of H.R. 2641 pursuant to this resolution, notwithstanding the operation of the previous question, the Chair may postpone further consideration of the bill to such time as may be designated by the Speaker.

The SPEAKER pro tempore (Mr. SNYDER). The gentlewoman from California (Ms. MATSUI) is recognized for 1 hour.

Ms. MATSUI. Mr. Speaker, for purpose of debate only, I yield the customary 30 minutes to the gentleman from Washington (Mr. HASTINGS) pending which I yield myself such time as I may consume. During consideration of this resolution, all time yielded is for purpose of debate only.

GENERAL LEAVE

Ms. MATSUI. Mr. Speaker, I ask unanimous consent that all Members have 5 legislative days within which to revise and extend their remarks and insert extraneous materials into the RECORD.

The SPEAKER pro tempore. Is there objection to the request of the gentlewoman from California?

There was no objection.

Ms. MATSUI. Mr. Speaker, this rule permits the House to consider the Energy and Water Development Appropriations Act of 2008. The bill today is being considered under an open rule. The issues of energy and water are always important, but this year these issues are the very center of our national dialogue.

I applaud Chairman VISCLOSKY and Ranking Member HOBSON for their continued commitment to provide the resources for our water infrastructure. This investment protects communities and saves lives.

I feel I could speak directly to this because in my home, Sacramento, this bill is arguably more important to the everyday life and safety of our population than nearly any bill this Congress will pass. Sacramento is the most at-risk river city for catastrophic flooding in this country.

My district serves as the seat of government for California, the sixth largest economy in the world, as well as the hub of a six-county regional economy that provides 800,000 jobs for 1.5 million people. A major flood along the American and Sacramento rivers would have catastrophic ripple effects regionally and nationally, cause upwards of

$35 billion in direct property damage, and likely result in significant loss of life to our families, our friends, and neighbors.

Sacramento needs this bill, but so do countless other communities across the Nation. I remember all too well on New Year's Eve of 2005 when the headline in our local paper said: ''North State braces as rains' onslaught arrives.'' My district and I sat on the edge of our seats and held our breath to see how the storm would unfold.

Flooding did occur, and for those that endured it, it was tragic. But the majority of Sacramento was spared. Our flood system performed as it should, but it was definitely put to the test. Bolstering our system, working through this bill, and with the Army Corps of Engineers made our survival during that storm possible.

Locally, on a daily basis, we are working closely with the Army Corps of Engineers, the Bureau of Reclamation, the State of California and the Sacramento Area Flood Control Agency, our local partner, to achieve greater flood protection. We have achieved impressive results by integrating an approach that combines flood protection and dam safety with partners that can share resources. But what makes an approach like this possible are strong partnerships between the Federal Government, the States, and local entities.

I am pleased that this bill strengthens and supports this and other similar partnerships. Another key component of this bill is funding for the Army Corps of Engineers operation and maintenance funding account. This important increase will begin to address billions of dollars in Army Corps maintenance backlogs.

□ 1030

This bill takes on the responsibility of not only building but also maintaining our infrastructure and makes an investment in securing our communities, property and, most important, lives.

As our country witnessed in the devastation in New Orleans, maintaining our infrastructure is an important function of the Corps that we cannot afford to overlook.

It is vital that the Federal Government continue to be a strong partner for these ongoing water infrastructure and flood protection investments. This will allow at-risk communities across the country to strengthen their vulnerable points. It will protect jobs and it will protect lives. There are few investments as worthwhile as this.

Just as we must invest in our country's water infrastructure, we must also implement a clean energy economy. This starts with weaning ourselves off of fossil fuels.

Mr. Speaker, the rising price of gas is well documented. In many communities gas prices are monitored more closely than the stock prices. Mr. Speaker, I stood here 1 year ago to manage the rule for last year's Energy and Water appropriations bill. During last year's debate I noted that the average cost of a gallon of gasoline was $2.93. Last year, there appeared to be no end in sight to rising prices.

Unfortunately, we have not seen much improvement at the pump. In fact what has changed has done so for the worst. According to AAA, the average price of a gallon of gas today is $3.06. In my hometown of Sacramento, it's $3.19. Many of us are probably asking, has energy policy improved?

To begin with, Chairman VISCLOSKY has recentered our priorities with this appropriations bill. We are now investing in renewable energy research. We are finally reducing our dependence on foreign oil and cutting greenhouse gas emissions. We are finally protecting our national energy security. Chairman VISCLOSKY and Chairman OBEY should be commended for these improvements.

These investments are long overdue, Mr. Speaker. They support our States and cities. For example, in my home State of California, we have plans to create a 20 percent renewable portfolio standard within the next decade.

These increased investments in energy programs contrast greatly with the President's priorities. Incredibly, the President's total request for renewable energy and energy efficiency is the same as it was in 2001.

During this President's entire administration, his goals and priorities have not changed. This is in spite of the everyday reminders of rising gas prices and the constant stream of evidence that our world is warming.

I applaud Chairman VISCLOSKY and Ranking Member HOBSON for their leadership in this area. They have set a responsible and innovative course with these priorities.

Finally, as I mentioned at the outset of this debate, this bill is being made in order under an open rule, which is our tradition. I hope that all Members will give that tradition the respect it deserves.

The American people want action on energy policy, climate change, flood protection and a number of issues that this bill funds. Let's let the process work, and let's support this responsible bill.

I strongly urge my colleagues to support this rule and final passage of the underlying Energy and Water appropriations bill.

Mr. Speaker, I reserve the balance of my time.

Mr. HASTINGS of Washington. Mr. Speaker, I want to thank the gentlelady from California (Ms. MATSUI) for yielding me the customary 30 minutes. I yield myself as much time as I may consume.

Mr. Speaker, at the beginning of this Congress, the Democrat majority chose to gut the earmark transparency and enforceability rules that the Republicans enacted just last year. They then decided to bring the spending bills to the floor that did not include earmarks so no Member could challenge, discuss, and call for a vote on the House floor.

Fortunately, the Republicans were successful in forcing the Democrat majority to restore earmark transparency and enforceability rules and bring spending bills to the floor with earmarks where they can be discussed, debated, and voted upon.

But, Mr. Speaker, let me be clear that the Fiscal Year 2008 Energy and Water appropriations bill before us today does not contain earmarks. However, Republican and Democrat leaders have reached an agreement that Members will have an opportunity to debate and vote on earmarks to be included in this bill before this bill is sent to the Senate, and I, along with my colleagues, will work to ensure that this promise is kept.

Mr. Speaker, I also wish to point out that the underlying bill is of tremendous importance to the central Washington congressional district that I represent. I am pleased by the funding provided for Hanford cleanup and the efforts to ensure that the Richland Operations Office can meet legal cleanup milestones along the River Corridor and in transuranic waste retrievals.

However, I must say, Mr. Speaker, the funding level for the waste treatment plant at Hanford is of a concern to me. It is important for this House and the Congress to recognize that while the bill provides sufficient funds for construction in this fiscal year, this bill's funding level will require a significant boost in funding in just 2 years to keep the project on its new independently verified budget and schedule. We must acknowledge that the choices made on funding for the waste treatment plant in this bill require balancing with a substantial increase in the very near future.

I also, Mr. Speaker, support the funds vital to the operation of Pacific Northwest National Lab, particularly the DOE Office of Science and NNSA plan to transition scientists' work in the 300 area to replacement lab facilities. This initiative is critical to our country's national security. And this bill provides a solid endorsement and boost to that project.

So, Mr. Speaker, when the Democrat majority keeps its promise to include earmarks and detail spending in this bill, we will know far more about the multibillion-dollar budgets of the Army Corps of Engineers and the Bureau of Reclamation. These are also of great importance to the irrigators, farmers and ports of Washington State and the Pacific Northwest.

Originally, as we know, the Democrat majority would have had this House consider the Energy and Water appropriations bill with a report that included page after page of blanks where dollar amounts should have been in the Army Corps and Reclamation budgets. But due to the demands of the Republicans, they will now fill in the blanks before and not after the House votes and sends this bill to the Senate. This will ensure that all Members will have an opportunity to review earmarks on the House floor and not just see them added months from now when they would have been beyond the scrutiny of a House vote.

We Republicans have secured a rules change to ensure this House and the American taxpayers can scrutinize earmarks, and that earmarks are subject to a vote of the House. This is the right thing to do, Mr. Speaker, and I'm pleased that the Democrat majority has agreed to Republican demands to restore transparency and openness on earmarks.

Mr. Speaker, I reserve the balance of my time.

Ms. MATSUI. Mr. Speaker, I yield 3 minutes to the gentleman from Vermont, a member of the Rules Committee, Mr. WELCH.

Mr. WELCH of Vermont. Mr. Speaker, I thank the gentlelady from California (Ms. MATSUI) for her excellent work on this legislation.

Mr. Speaker, in November Vermonters and the American people demanded a change in direction in Washington and a change in priorities. The past 5 months have been an important down payment on our commitment to change.

Today the House takes up the third of 12 appropriation bills where we will continue making this progress of taking America in a new direction. This is a balanced bill adopting the pay-as-you-go principle enacted by this House of Representatives.

This Energy and Water Appropriation bill represents a bipartisan approach to our response to a growing energy crisis. We're making real changes by focusing on commonsense priorities.

We know we must reduce our dependence on foreign oil and cut our greenhouse gas emissions. This legislation invests $3 billion in addressing global climate change. It does so by researching effects of greenhouse gases and then working on the technologies that will make a new energy future. It also focuses on the growing renewable energy industry, making an investment in energy programs that both reduce greenhouse gases and help our Nation meet its energy needs.

This Energy and Water bill provides a 50 percent increase in energy efficiency, renewable energy and important water projects, including $200 million towards solar, $235 million in vehicle technology to increase mileage efficiency, $146 million in energy-efficient buildings, $117 million in enhancing hydropower.

In addition, it invests over $5 billion, as the gentlelady from California said, in construction operations and the management of critical water projects around the entire country, including in the State of Vermont.

These programs are important not only when talking about the need to reduce America's dependence on foreign oil and greenhouse gas emissions, but to make critical investments in new industries that can be seen across the country. If we make this commitment now, we can have a pro-growth, pro-high tech, pro-environment economy of the future.

In my district of Vermont, we have dozens of thriving, renewable energy companies rooted in our community and creating goods jobs. Efficiency Vermont, GroSolar, Agrefresh and NRG Systems, to name a few.

This is a timely bill. It invests in our energy independence and makes a down payment on the necessary progress to address climate change in our energy future. This Congress is committed to taking our country in a new direction, working in a bipartisan manner and in a fiscally responsible way. We're committed to making this an energy-independent country.

Mr. HASTINGS of Washington. Mr. Speaker, I would ask my friend from California if she has any more requests. I have no more requests for time and I'm prepared to yield back if she is.

Ms. MATSUI. I have no additional speakers.

Mr. HASTINGS of Washington. Mr. Speaker, I yield myself as much time as I may consume.

And this is a truly open rule that continues the longstanding tradition of providing open rules for appropriation bills. So therefore, Mr. Speaker, I support House Resolution 481, and urge my colleagues to do the same.

Mr. Speaker, I yield back the balance of my time.

Ms. MATSUI. Mr. Speaker, I thank the gentleman from Washington. I yield myself the balance of my time.

Mr. Speaker, this is a good bill that puts our energy policy on line with the people's priorities by investing. It also raises our investment in our water infrastructure.

I urge a ''yes'' vote on the previous question and on the rule.

Mrs. BIGGERT. Mr. Speaker, I rise today in support of this open rule and the fiscal year 2008 Energy and Water Appropriations bill.

Mr. Speaker, I want to commend Chairman VISCLOSKY, Ranking Member HOBSON, and their subcommittee for putting together a strong bill that clearly recognizes the importance of scientific research and energy security to our national competitiveness. In particular, I want to commend them for more than meeting the President's request for the DOE Office of Science.

Mr. Speaker, we face a world in which our economic competitors in Asia and Europe are making significant new investments in their own research capabilities. These investments are beginning to payoff, as Asian and European countries challenge U.S. leadership in the sciences, no matter how it is measured—by number of patents won, articles submitted to scientific journals, degrees awarded, or Nobel prizes won.

Report after report has called on Congress and the President to invest in U.S. research capabilities. The benefits of such an investment to the U.S. economy and U.S. competitiveness are well known. Economic experts have concluded that science-driven technology has accounted for more than 50 percent of the growth of the U.S. economy during the last half-century.

That's why President Bush and Congressional Democrats and Republicans have proposed doubling federal funding for basic research in the physical sciences over the next 5 to 10 years as part of their innovation and competitiveness initiatives.

Supporting over 40 percent of total federal funding for basic research in the physical sciences—more than any other Federal agency—the DOE Office of Science is the Nation's primary supporter of research in the physical sciences.

Mr. Speaker, U.S. scientists are as bright as any in the world, but they traditionally have had better tools than everyone else. Under the President's budget, 21,500 researchers would have access to the DOE's unique system of large-scale, specialized user facilities. Nearly half of those users will be university faculty and students, many will be from other federal agencies, and a significant number will be from U.S. industry.

And the Office of Science is using those facilities and its expertise to address our energy challenges. It supports basic research related to: The production of cellulosic biofuels; the development of advanced materials for the safe storage of hydrogen; more durable and efficient solar panels and wind turbines; and advanced nuclear systems, not to mention fusion power.

Mr. Speaker, the Office of Science has developed a balanced investment strategy to ensure the U.S. retains its dominance in such key scientific fields as biotechnology, nanotechnology, materials science, and supercomputing well into the next century. I again commend my colleagues on the Energy and Water Appropriations Subcommittee for recognizing the great contributions that basic research in general—and the DOE Office of Science in particular—make to our energy security and our national competitiveness.

Ms. MATSUI. I yield back the balance of my time, and I move the previous question on the resolution.

The previous question was ordered.

The resolution was agreed to.

A motion to reconsider was laid on the table.

ELECTION OF MEMBER TO COMMITTEE ON ENERGY AND COMMERCE

Mr. HASTINGS of Washington. Mr. Speaker, by direction of the House Republican Conference, I send to the desk

a privileged resolution (H. Res. 496) and ask for its immediate consideration in the House.

The Clerk read the resolution, as follows:

H. RES. 496

Resolved, That the following member be, and is hereby, elected to the following standing committee of the House of Representatives.

COMMITTEE ON ENERGY AND COMMERCE.—Mr. Gillmor, to rank after Mr. Stearns.

The resolution was agreed to.

A motion to reconsider was laid on the table.

VACATING ORDERING OF YEAS AND NAYS ON S. 1352, DR. FRANCIS TOWNSEND POST OFFICE BUILDING

Mr. VISCLOSKY. Mr. Speaker, I ask unanimous consent that the ordering of the yeas and nays be vacated with respect to the motion to suspend the rules and pass S. 1352 to the end that the Chair put the question de novo.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Indiana?

There was no objection.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from Illinois (Mr. DAVIS) that the House suspend the rules and pass the Senate bill, S. 1352.

The question was taken; and (two-thirds being in the affirmative) the rules were suspended and the Senate bill was passed.

A motion to reconsider was laid on the table.

PERMISSION TO REDUCE TIME FOR ELECTRONIC VOTING DURING CONSIDERATION OF H.R. 2641, ENERGY AND WATER DEVELOPMENT AND RELATED AGENCIES APPROPRIATIONS ACT, 2008

Mr. VISCLOSKY. Mr. Speaker, I ask unanimous consent that, during consideration of H.R. 2641 pursuant to House Resolution 481, the Chair may reduce to 2 minutes the minimum time for electronic voting under clause 6 of rule XVIII.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Indiana?

There was no objection.

GENERAL LEAVE

Mr. VISCLOSKY. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks and include extraneous material on H.R. 2641, and that I may include tabular material on the same.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Indiana?

There was no objection.

ENERGY AND WATER DEVELOPMENT AND RELATED AGENCIES APPROPRIATIONS ACT, 2008

The SPEAKER pro tempore. Pursuant to House Resolution 481 and rule XVIII, the Chair declares the House in the Committee of the Whole House on the state of the Union for the consideration of the bill, H.R. 2641.

□ 1045

IN THE COMMITTEE OF THE WHOLE

Accordingly, the House resolved itself into the Committee of the Whole House on the state of the Union for the consideration of the bill (H.R. 2641) making appropriations for energy and water development and related agencies for the fiscal year ending September 30, 2008, and for other purposes, with Mr. DAVIS of Alabama in the chair.

The Clerk read the title of the bill.

The CHAIRMAN. Pursuant to the rule, the bill is considered read the first time.

The gentleman from Indiana (Mr. VISCLOSKY) and the gentleman from Ohio (Mr. HOBSON) each will control 30 minutes.

The Chair recognizes the gentleman from Indiana.

Mr. VISCLOSKY. Mr. Chairman, I yield myself such time as I may consume.

Mr. Chairman, it is my privilege to submit to the House for its consideration H.R. 2641, the Energy and Water Development Appropriations bill for fiscal year 2008.

I want to first thank all the members of the Energy and Water Development Subcommittee for their help in bringing this bill to the floor today. I particularly want to thank my partner and ranking member, Mr. HOBSON of Ohio, for his extraordinary friendship and cooperation this year.

I would parenthetically point out that for the last 8 years, Mr. HOBSON has come to this floor as chairman of an appropriations subcommittee to manage a bill. I am wiser and richer because of the advice and counsel of Mr. HOBSON throughout the development of this bill, and I thank my friend deeply.

This is a truly bipartisan bill that represents a fair and balanced compromise. I believe this is the way our constituents expect Representatives to work together, and I am proud of our bipartisan process. I also want to thank the chairman of the Appropriations Committee, Mr. OBEY, and the ranking minority member, Mr. LEWIS, for their support.

And I deeply want to thank all of the staff of the subcommittee, Dixon Butler, Scott Burnison, Terry Tyborowski, Taunja Berquam, Lori Maes, Kevin Cook, Rob Blair, and Ben Nicholson, for their very hard work on this bill. I want to also thank both Shari Davenport of my office and Kenny Kraft of Mr. HOBSON's office. And I would also acknowledge our agency detailee, Chris Frabotta from the Corps of Engineers, for his assistance in putting this bill and report together. These people form a great team and their work has been invaluable. I would also note for the membership that Chris has served two tours of duty in Iraq as part of the Army Corps of Engineers and Taunja has also served our country in Iraq on one tour also with the Army Corps of Engineers.

Total funding for the Energy and Water Development in fiscal year 2008 is $31.603 billion. This bill cuts lower priority programs. These spending cuts include 37 programs in weapons under the Department of Energy, totaling $632 million below the President's request, and 20 other programs, totaling $280 million below the President's request.

On the other hand, this bill funds the most worthwhile projects and programs at or above the requested level. It reduces some programs that are less valuable or less urgent and redirects funding from previous years that has not been obligated or spent.

All our constituents are in shock at the high price of gas. There is nearly half a billion dollars provided in this bill for research, development, and demonstration efforts in biofuels and vehicle technologies. I would also note that this subcommittee has been working to provide additional funding for this critical area for 3 years, first of all, under the leadership of Mr. HOBSON and, more recently, myself. We are today funding above the President's request for biofuels and vehicle technologies over fiscal year 2006. Together we again increase funding in 2007, and this subcommittee this year made additional investments in vehicle technologies and biofuels for fiscal year 2008. Compared to the President's 2006 request, the subcommittee has worked in a bipartisan fashion to address the energy crisis by increasing funding for these areas by over 100 percent.

These efforts will not bring down the price of gas immediately, but they will help put us on a path to decrease dependence on imported oil and greater fuel efficiency. These are critical steps we must take today.

One of the reasons for our current energy price crisis is the past lack of investment in energy. In fiscal year 2006, adjusted for inflation, government funding for energy research, development, and demonstration had fallen to less than one-quarter of its 1980 levels. In the fiscal year 2007 year-long continuing resolution, Congress began to address this by increasing funding for energy efficiency and renewable energy activities at the Department of Energy by $300 million. For example, in fiscal year 2006, adjusted for inflation, government funding for conservation R&D was 49.2 percent of where it was in 1980. This year it will be 68.7 percent. The

bill provides increased funding for energy efficiency and renewable energy that is $400 million above 2007 levels.

Energy consumption can be cut in the near term through increased funding for weatherization assistance. This bill provides $245 million in weatherization grants and is an increase of $100 million from the President's request. In addition, the bill redirects fossil energy funding to emphasize carbon capture and sequestration.

Increased funding is included for nuclear energy as well, balancing support for licensing new light water nuclear reactors, the kind that currently provide 20 percent of our electricity, for demonstrating the safer Gen IV helium-cooled nuclear reactor technology and for research and development, particularly on the nuclear fuel cycle.

Nuclear weapons or weapons material in the hands of terrorists is acknowledged by the President and others to be the number one terrorist threat to the United States. The Department of Energy takes the lead in combating this threat by advancing international efforts to prevent nuclear proliferation with an $878 million, or 74 percent, increase to the President's proposed operating level for legitimate nuclear nonproliferation programs.

Testimony before our committee has made clear that there are significant opportunities for protecting such nuclear material where it exists, enhancing monitoring systems that detect it should it be moved illegitimately, and transferring it to safer locations. This bill also redirects funding provided in 1999 but never spent to initiate a nuclear fuel bank under the auspices of the International Atomic Energy Agency. This fuel bank, conceived originally by former Senator Nunn and others, is intended to remove the motivation for countries that wish to rely on nuclear energy to develop their own uranium enrichment capabilities. This is the precise concern that the U.S. and many other nations have today with the country of Iran.

Nuclear nonproliferation activities have included parallel efforts for the United States and Russia to dispose of surplus weapons-origin plutonium. The U.S. has pursued fabrication of mixed oxide fuels, so-called MOX, for use in commercial nuclear reactors followed by disposal in Yucca Mountain as its strategy. It is assumed that Russia will eventually agree to follow a similar path. Russia prefers a different path to dispose of its weapons-origin plutonium by using it to fuel breeder reactors. This approach would result in more plutonium, not less. The administration and the defense authorizers ended a direct linkage between the U.S. and Russian programs last year. Therefore, with no expectation of any Russian plutonium disposition occurring under this program, the U.S. MOX facility is no longer a nuclear nonproliferation activity. And very importantly, and I would emphasize this, the subcommittee transfers the project to the nuclear energy program along with enough funding to allow construction to proceed. This funding for MOX will be accompanied by continuous oversight. This subcommittee will closely monitor the progress of the MOX facility. If mistakes continue to be made, the Department of Energy will find it very difficult to make a successful case for any further support.

Without question, Mr. Chairman, there is a need for a comprehensive nuclear defense strategy and stockpile plan to guide transformation and downsizing of the stockpile nuclear weapons complex; and until progress is made on this crucial issue, there will be no new facilities or Reliable Replacement Warhead. Only when a future nuclear weapons strategy is established can the Department of Energy determine the requirements for the future of nuclear weapons stockpile and nuclear weapons complex.

Further, testimony before this subcommittee has pointed to the potential for the international community to misunderstand development by the United States of a new nuclear weapon. Moreover, for the last decade, the administration has said that stockpile stewardship was a path to maintain the safety, security, and reliability of the nuclear stockpile. Now, with three major facilities that we were told were needed for stockpile stewardship all overbudget, all over their deadlines, and all not completed, we are told ''let's do something else.''

Given the serious international and domestic consequences of the U.S. initiating a new nuclear weapons production activity, it is critical that the administration lay out a comprehensive course of action before funding is appropriated. Major transformation of the weapons complex can only be produced with significant bipartisan support, lasting over multiple sections of Congress and multiple administrations. Given the track record of mismanagement at the agency for projects that have a plan, I don't think it is asking too much for a comprehensive nuclear strategy before we build a new nuclear weapon.

People work hard for their money before they pay their Federal taxes. The Department of Energy has squandered vast sums of this money. Project management at the Department of Energy must be reformed. The Department of Energy is the largest civilian contracting agency of the Federal Government and spends over 90 percent of its annual budget on contracts. In 1990 the Government Accountability Office, the GAO, began an annual assessment resulting in a list of programs that are at high risk for waste, abuse, and mismanagement. DOE contract management has been on that list year in and year out for 17-long miserable years. GAO has found that since October 2002, alone, DOE has achieved its performance goal of implementing projects within 10 percent of cost and schedule baselines only about one-third of the time.

One of the management failures is the waste treatment plant at Hanford, Washington, where the construction cost overrun now exceeds $8 billion. This is just one example of inexcusable, ineffective, and wasteful project management at the Department of Energy. DOE's inability to effectively manage critical projects has real consequences for our Nation and calls into question their ability to ensure that we are prepared to meet important challenges.

In the bill, DOE is directed to work with the GAO to develop a concrete plan to get off the GAO high-risk list.

There are also elements in this bill, important ones, dedicated to the environmental cleanup responsibilities of the Department and for the Army Corps of Engineers, as well as the Bureau of Reclamation.

I do believe, Mr. Chairman, this is a very good bill and would recommend it to my colleagues' attention and would request their support.

Mr. Chairman I reserve the balance of my time.

Mr. HOBSON. Mr. Chairman, I yield myself such time as I may consume.

First of all, let me thank Mr. OBEY, the chairman of the committee, for his good work with us on this bill. And I want to add my support to Chairman VISCLOSKY on doing a good job on his first bill, and I will talk about that a little bit further.

This is the first Energy and Water appropriation bill that my colleague from Indiana has developed and brought to the floor. The first one, I found out, is always the hardest one, but he has done a great job and it is a good bill; and I have certainly enjoyed working with him this year in a new position for me also as the ranking member on this bill.

It certainly helps to have an allocation that is $1.1 billion over the administration's request. However, I do not disagree with the major funding decision that the chairman has made in this bill.

This bill is a very thoughtful approach to some very difficult issues, including investing in our Nation's water infrastructure, developing domestic energy sources with less impact on global climate, and fostering our national security through rational efforts on nuclear nonproliferation and nuclear weapons.

I want to comment briefly on a couple of specific programs and projects, including several that Chairman VISCLOSKY has just recently discussed. I fully support the increased spending for water resources infrastructure. We

have chronically underinvested in this infrastructure in recent years both in this administration and, frankly, in the previous administration.

□ 1100

And the hurricanes of 2005 taught us some very hard lessons about the consequences of such underinvestment.

The Corps already has a significant backlog of construction projects, a backlog that, frankly, is only going to get larger with the next Water Resources Development Act, which we don't have the money to fund that.

I'm very pleased that the chairman maintains the continuing contracts and financial management reforms for the Army Civil Works program. These reforms are critical if the Corps is to get its house in order, and if it is to make responsible use of the $5.5 billion we provide in this bill. And let me say that not fixing the Corps' problems has cost us a lot of money, because when we don't complete projects on time or don't complete parts of projects, those projects grow in cost and it makes the problem even worse. And therefore, the underfunding of this by the administration, and not just this administration, but previous administrations, has not been helpful.

I generally agree with the majority's priorities for the Department of Energy. It is essential that we develop advanced energy technologies that increase our energy security by reducing greenhouse gas emissions and lessening our dependence on foreign oil. However, I will caution that increased spending on these technologies is no guarantee of increased results, especially at the Department of Energy.

I want to briefly talk on this subject of loan guarantees. I will state up front that I have no confidence whatsoever that the Department of Energy is capable of managing this program in a responsible manner. That said, I recognize the congressional and industry pressure in favor of loan guarantees.

You may hear two complaints about our bill, that we do not provide the full administration request of $9 billion for loan guarantees, and that we did not include nuclear power plants in the $7 billion. Those criticisms miss one essential fact: that Congress already provided DOE with $4 billion for loan guarantees in the fiscal year 2007 continuing resolution that was not restricted to any particular energy technologies. The Department could apply all $4 billion to nuclear power plants if they so choose. But let me tell you, they don't have any expertise over there on this, and it's going to be a mess because they don't know how to handle it and they don't know how to underwrite these loans. But they're going ahead with the program because Congress is pushing them into it.

Now I want to talk about nuclear weapons.

I share the majority's concerns on the reliable replacement warhead. The concept of RRW has merit if it allows us to have a smaller stockpile of more reliable weapons that will not require nuclear testing. But all we have right now is a vague promise. What we need to see is a significant stockpile plan from the administration that shows how developing the RRW will actually get us to a much smaller future stockpile. Such a stockpile plan is also essential before we invest significant resources in modernizing the DOE's nuclear weapons complex. For that reason our bill does not fund RRW, and makes roughly a 10 percent reduction in the weapons account activities.

We should not be spending billions to modernize a Cold War footprint of the weapons complex until the Department of Defense defines what kind of future stockpile DOE will have to support. I don't think most people are really aware of how this all works, but the Defense Department is the customer, DOE is the provider.

I am aware that there are Members' and administration concerns about the effect these cuts may have on weapons facilities. I will address these concerns later in my discussions.

Now let me talk about one that really gets me going.

There is really only one place in this bill, and I see the chairman smiling, where I have a really significant difference of opinion with the majority, and that is funding for the MOX plant. For those Members who are not familiar with this project, let me do a little quick review.

In early 2000, the United States and Russia agreed for each country to dispose of 34 metric tons of excess weapons-usable plutonium. Each country had a preferred technology for plutonium disposition. The U.S. wanted immobilization, and Russia wanted fast reactors. So, they reached a compromise to convert the plutonium into mixed oxide fuel to be burned in existing commercial lightwater reactors. The U.S. and Russia were supposed to proceed in parallel with their respective MOX projects. Well, guess what? The Russians are coming. Last year, Sergey Kiriyenko, the head of ROSATOM in Russia, told the chairman and myself that MOX is an obsolete and expensive technology, and Russia has no intention of building a MOX plant unless the international community pays 100 percent of the cost. If Russia has to spend any of its own money for plutonium disposition, then it will use fast reactors. He couldn't believe that we were dumb enough to still want to build a MOX plant in the United States. Well, guess what? We are going to build one because we are that dumb, I guess, because DOE and some in Congress still think we should proceed with construction of this plant.

The project was sold to Congress as costing only $1 billion. That's where it started out. The latest estimate, and they haven't broken ground yet, is $4.7 billion. And that's before construction actually starts. Given DOE's dismal track record of controlling costs, the final price tag will certainly be much higher. The total set of facilities and operations that must be completed to dispose of the 34 metric tons of U.S. plutonium has an estimated life-cycle cost of $11 billion. And the project is now a mere 11 years behind schedule.

So, what has been the response of this cost growth and schedule slipping and the Russian abandonment of the MOX approach? The authorizers delinked the U.S. and Russia project, meaning they want the U.S. MOX project to go forward with or without any Russian progress. The U.S. material, frankly, is not at risk. What we really wanted to do was to eliminate the 34 metric tons of the Russians. So now, what is the incentive for the Russians to go forward and eliminate theirs? So, we lost all our leverage.

This is not about nonprolifieration, it's all about jobs and economic development in South Carolina. Without any competition, DOE picked the Savannah Rivers site as the place for the MOX project. Some claim that South Carolina only accepted this mission with great reluctance, and insisted on DOE building a MOX plant so that plutonium would have an assured path out of the State. Well, that argument is bogus for two reasons.

First, the 34 metric tons of plutonium is not presently at Savannah River. The vast majority of it is stored at the Pantex plant in Texas. The government does not have an obligation to get this material out of South Carolina because this material isn't in South Carolina.

Second, some folks assume that construction operation of the MOX plant somehow guarantees this plutonium material will leave their State. Well, it doesn't. We have testimony on the record from DOE making very clear that Yucca Mountain will be full to its authorized capacity by the year 2010. Any material generated after that date, whether spent MOX reactor fuel or even vitrified plutonium, will remain in storage onsite until Yucca is expanded or a second repository is built. That means this plutonium material will remain in South Carolina for a long time. And during that time, they're going to be able to sue us for $100 million a year because we haven't moved it. Does this sound dumb? Does this sound like smart business? Not to this Member.

I had high hopes that the Secretary of Energy had the background and skills to make a real difference at DOE, and certainly on this project he could have made a difference. But I have lost confidence in him, and it

started over his unwillingness to change course on the MOX project when circumstances changed.

There is plenty of blame to go around. Not only has the administration stubbornly insisted on ''staying the course'' on this troubled project, but the authorizing committees with jurisdiction have failed to exercise oversight and taken action on MOX. Even the fiscal conservatives in my own party, who were so anxious to criticize every earmark, miss the fact that this project will waste $11 billion of taxpayer dollars. I want you to know under my watch, when I was chairman of this, we gave it zero funding. And I would have liked to have done that. But I understand the pressures on the chairmen on both the committee and the subcommittee. And frankly, they have reduced the level significantly from the requested amount.

I really appreciate the fact that the chairman of the full committee and Mr. VISCLOSKY made a statement, the statement was actually by Mr. VISCLOSKY and supported by Chairman OBEY. And the chairman said, ''The MOX plant is one of only a few construction activities supported in the bill. And DOE is put on notice that the first sign of significant cost growth, schedule slip or requirements change, the committee will shut this project down.'' In future years, maybe this project will run off the rails, and I want Members to see what happens here.

I offered to the administration and to others not to build this plant the way they're building it. I think it's silly to build 34 metric ton capacity and then have to tear the plant down and send it out to Utah and put it underground. What I really wanted to do, and offered to do, was build a plant that we could design up front to where we could do other types of fuels in this, rather than the weapons-grade plutonium, but nobody seems to be listening anywhere at this point. But I do appreciate the full chairman and the chairman of the subcommittee and their comments.

I want to talk about the policy on earmarks. I think we've got that straightened out now. I wish it had been in this bill, but I think it's going to move forward. And I think we fail in our responsibility if we don't do oversight. I think it's good to take out both the President's earmarks and our earmarks. I did that before. Any new starts that were in the bill, I took them out when I was chairman, and I want to congratulate the chairman now for doing the same thing. We need to provide more oversight.

I really get upset that the way the Corps of Engineers is done today is we get no real input into that. It's all basically done by an agency within the White House and by some people that we don't even meet with and we don't even know. They are saying what's going to go forward in somebody's community or not going forth in somebody's community; and frankly, we're here and know our communities better than somebody in some agency that we can't find.

I want to just conclude by saying I am pleased that Chairman VISCLOSKY has continued the bipartisan cooperation in this bill. I am proud to be a part of a subcommittee that focuses on getting the job done efficiently and does not let partisanship get in the way of doing the right thing for the American people.

This subcommittee could not get the job done so well without exceptional staff. I want to thank Dixon Butler, Taunja Berquam, Scott Burnison, Terry Tyborowski and Lori Maes on the majority side for their hard work and dedication. I might say, many of those people worked when I was the chairman before, and I thank the majority for keeping them, and for the good work that all of them have done.

I also want to thank Chris Frabotta, our Corps detailee this year, who comes from the Corps' Wilmington District and has served in Iraq. I also want to thank Kevin Cook, Ben Nicholson and Rob Blair on our minority subcommittee staff, and Shari Davenport on the chairman's personal staff and Kenny Kraft on my staff for a great job. We have all worked together on this bill for a number of years, and we are continuing to do that.

I just really want to thank my chairman, my partner on this bill. I frankly intend to be as good a partner to the chairman as he was to me when I was the chairman. And the only way we can solve some of the problems of the Corps of Engineers and the Department of Energy is, frankly, for us to continue working together.

Despite my concerns about the level of spending without congressional direction, I intend to support this bill to the full. And I encourage the other members of the committee to do so as well.

Once again, I thank the chairman for his courtesy, and I look forward to working with him for a number of years.

Mr. Chairman, I reserve the balance of my time.

Mr. VISCLOSKY. Mr. Chairman, I would just make a few comments. One is, I do not believe that Mr. HOBSON was on the floor when I thanked him for his sage advice.

As he mentioned in his opening remarks, as I did in mine, he has chaired eight times and has brought bills to the floor eight times on appropriation subcommittees. He has been a great friend and a great teacher. I would suggest that the mistakes I make are my own and not a failure of Mr. HOBSON or the ably trained staff on the committee.

I would also simply point out in all seriousness that the differences, so to speak, between Mr. HOBSON and myself on MOX are marginal and at a matter of degrees. We are agreed as far as the failure of the Department of Energy and their management practices. We are agreed that they are forewarned that they had better not make one mistake in South Carolina on this project. And I would very strongly emphasize that the moneys for MOX are where they should be and where I certainly want them to remain, and that is within the energy programs of the Department of Energy because MOX no longer has anything to do with proliferation, and if left in that account, would have eaten half of that very important program alive from a monetary standpoint.

□ 1115

I would emphasize this is not simply an issue of money, but keeping that money in its appropriate account, and that is in the energy account at the Department of Energy. Again I would thank the gentleman for his words on this project on this House floor.

Mr. Chairman, I yield such time as he may consume to the gentleman from Wisconsin (Mr. OBEY), the chairman of the full committee.

Mr. OBEY. Mr. Chairman, I thank the gentleman for the time, and I want to congratulate the gentleman from Indiana and the gentleman from Ohio for doing a first-rate piece of work on this legislation. They know their business, they work with each other well, and I am proud of both of them. I would like to discuss two matters. The first is the question of congressional earmarks, and the second is the actual substance of this bill.

We have seen much attention paid over the past several months to the practice of Congress earmarking certain projects.

This bill is a project-oriented bill, and so there will be quite a lot of that going on before the bill is finished. But I would like to put that in context. The fact is that the administration has requested far more dollars for earmark projects for this bill than the Congress traditionally provides.

Example: In fiscal year 2006, which is the last year we had a completed bill, the President asked for 987 specific earmark projects in the budget for the Army Corps of Engineers, costing $3.8 billion. The Congress appropriated $1.1 billion for projects that it ranked as high priority.

The result: 77 percent of the Army Corps budget went for projects earmarked by the administration; 23 percent went for projects earmarked by the Congress of the United States.

In fact, this is a copy of the report for that 2006 bill. The list of administration project earmark requests goes on for 46 pages, and I would submit that if the administration had been Democratic, it would have been the same result.

Now, how does the administration decide how to allocate money to specific projects? Here is what the instruction sheet reads for the Corps of Engineers: ''To be included in the recommended program and considered for the ceiling program for fiscal 2008, a construction project or separate element must be consistent with policy.''

Well, guess what? That is the same policy that Congress provides. Projects have to be consistent with policy in order to be included.

The document from the Army Corps of Engineers also says it must have a decision document for which executive branch review has been completed. And then it goes on to say, each project or separable element must meet at least one of nine criteria, which are listed. But then it goes on to say, ''however, the agency may propose to relax those criteria, to use additional criteria, or to include special cases.''

Guess what? That is exactly what the Congress does in determining which projects it feels are high priority.

Now, let's turn to 2008. This year, the administration has requested some 991 projects. If you string them end to end, that is how long their project list is for this year. I would submit, in the end, this will be a longer list than the project list provided by the Congress in this bill.

So let me simply state that whether projects are funded because of directed spending on the part of the administration or directed spending on the part of the Congress, the result is the same: public money is expended on projects that either the executive branch or the legislative branch thinks represent high priority needs. So much for earmarks in this bill.

Now, let me simply discuss the substance. There are three major areas of funding critical to our country's future in the bill: climate change, the energy crisis, and nuclear policy.

This bill includes more than $1 billion above the President's request for climate change. Funding goes to energy research, for development and demonstration of energy technologies that don't release greenhouse gases. They include conservation, research and development, and demonstration to reduce energy consumption in buildings, vehicles and energy-intensive industries. They include deployment of conservation measures in Federal buildings. They include demonstration of capture and sequestration of carbon dioxide.

In the 1970s, the United States responded to the energy crisis in those days with substantially increased funding for energy research, for development and demonstration. But with the collapse of oil prices in the eighties, the interests of the administrations and the interests of Congress, unfortunately, subsided. So the result is that by fiscal 2006, after adjusting for inflation, research budgets for renewable energy were only 20 percent of what they were in real terms in 1980. Research budgets for fossil energy were only 25 percent of 1980 levels. Funding for conservation research was only 49 percent of 1980 levels.

In the year-long continuing resolution which we passed just 3 months ago, we raised those percentages considerably. So 2007 funding for renewable energy was boosted up to 38 percent of 1980 levels, and 2007 funding for conservation was boosted to 54 percent of 1980 levels.

This bill continues that effort: 2008 funding for renewable energy will now under this bill be upped to 47 percent of 1980 levels, 2008 funding for fossil energy will be upped to 31 percent of 1980 levels, and 2008 funding for conservation will be up to 67 percent of 1980 levels.

This bill also provides for a $2 billion operating level for the nuclear nonproliferation activities of the Department of Energy.

This bill does not fund new nuclear weapons nor major new weapons facilities, because the administration has not developed a strategy for strategic nuclear weapons in the post-Cold War era.

So let me simply say in conclusion that this bill reverses a quarter century of decline in energy research. It increases critical funding to prevent nuclear weapons or material from falling into the hands of terrorists. It represents a responsibly balanced bill. I congratulate both gentlemen for producing this, and I would urge strong support for its passage.

Mr. HOBSON. Mr. Chairman, I yield 3 minutes to the gentleman from Tennessee (Mr. WAMP), a member of the committee.

Mr. WAMP. Mr. Chairman, I thank the distinguished ranking member.

Mr. Chairman, I want to talk for a minute about process, because I have been on the Appropriations Committee 11 years and on this subcommittee for 9 years. I have served on half a dozen subcommittees of appropriations, and I have seen no subcommittees exert more or better oversight to the programs that they are responsible for than this committee.

First under Chairman HOBSON, now under Chairman VISCLOSKY, the two have worked as brothers very effectively to hold accountable these agencies. You heard them both express consternation with the Department of Energy. In my 12½ years here, the first 6 years it was Democratic leadership of that Department, and now Republican leadership of that Department. Both could improve, and both must improve. But these gentlemen are trying to hold these programs accountable.

There are two issues here on responsibility. One is just holding the line on spending. The other is exerting the Congress' responsibility to make sure these programs work and that we get the bang for the buck, spend the money and get the return. Oftentimes, the bureaucracy and the waste and the mismanagement are more important than the dollars that are being spent. They are doing something about it, and doing it extremely well.

Now, I am also for holding the line on spending in a big way. But if you ask the American people right now which one of these appropriations bills should you be spending more money in, they would say energy independence first. It is the biggest national security issue we have now. It is the confluence of the natural environment, our energy independence, and national security.

So all I would say is, let's be careful we are not penny-wise and pound-foolish. We should be spending more money on renewables and energy efficiency and energy research. We should be trying to encourage biomass and new fuels and new vehicles. So let's be careful, okay?

I definitely want to hold the line on spending. There are going to be some vetoes, and rightly so. But I want to make sure that this particular bill at the end of the day better funds these programs that we are all for.

Remember, ''conservative'' means conserve energy, save energy, more efficient energy. These are important programs. They can be managed better.

This is also the bill that funds nuclear nonproliferation, a big issue right now. We have got weapons activities. HEATHER WILSON of New Mexico spoke at our conference this morning about things that actually are not in this bill and should be in this bill.

So this is the beginning of the process. I know Senator DOMENICI is going to weigh in. I love it, because these House leaders have given the House a better position to negotiate this bill from than we have ever had in my tenure here, because we need that leverage. Frankly, the Senate has rolled us on this bill for many years. Not any more. We get fair treatment. We can go in there and negotiate our priorities and come away with a good product.

So I am not going to say this bill is perfect, but I have to tell you, they have done a great job putting it together. We are going to end up with a great bill in the final analysis. Congratulations to all, and thanks to the staff.

Mr. VISCLOSKY. Mr. Chairman, I yield 2 minutes to the gentleman from Colorado (Mr. PERLMUTTER).

Mr. PERLMUTTER. Mr. Chairman, I thank Mr. VISCLOSKY for yielding me time.

Mr. Chairman, this bill really, I think Mr. WAMP said it is best, is one about efficiency and it is about how we spend our money when it comes to energy independence. There is no question that the people of this country understand it very well, that this bill is

good for national security, it is good for the climate and it is good for jobs, because it promotes energy efficiency, it promotes renewable energy and alternative sources of energy, and it adds sufficient funding to the Department of Energy so that it can really boost its Office of Science and its Office of Energy Efficiency.

I am fortunate to have in the Seventh Congressional District of Colorado the National Renewable Energy Lab, which is the finest laboratory of its kind in the world, to promote renewable energy and energy efficiency. This bill will help the Department of Energy continue to support the National Renewable Energy Lab as it works with the private sector to come up with new ways to power America and the rest of the globe.

This is a fine bill. I thank the committee for developing this. I support it, and I ask wholehearted support from the Congress, because this, as I said, is good for national security, it is good for the climate, and it is good for jobs.

Mr. HOBSON. Mr. Chairman, I yield 3 minutes to the gentleman from Michigan (Mr. KNOLLENBERG) for a colloquy with the chairman of the subcommittee.

Mr. KNOLLENBERG. Mr. Chairman, I thank the gentleman for yielding. I do want to enter into a colloquy with Chairman VISCLOSKY.

Today I rise to highlight the importance of research of advanced battery technology and our efforts to reduce our country's dependence on Mideast oil, also increase energy efficiency, cut emissions and strengthen the manufacturing sectors, all of which is all so vital to our economy. The U.S. automotive industry understands these goals and is currently working to meet them. I believe Congress should continue to assist The Big Three in reaching these goals.

□ 1130

There are many ideas that show promise of accomplishing these critical goals; but alternative and renewable fuels are an essential part of the equation and many promising technologies are being developed. Ethanol and biofuels are encouraging, but the technology and infrastructure simply are not there to make them viable solutions right away.

Hybrid-electric technology has already shown its capability to dramatically increase fuel efficiency and has proven to be acceptable to the American car consumer. However, gas-electric hybrid vehicles do not represent the end of this avenue. If we invest valuable research and development dollars into leap-ahead technology such as advanced batteries, we can move past the tailpipe entirely with fully electric automobiles.

The Japanese Government invests heavily in advanced battery research which benefits Toyota directly. The American auto companies asked President Bush and Congress for a modest investment of $500 million over the next 5 years for advanced battery technology research and development. This research, which would be conducted by USCAR, is critical to making the plug-in hybrids a reality.

While I understand the limitations that you face with your allocation, Mr. Chairman, it is my hope we will be able to work together to increase funding for advanced battery research and the development that goes with it as this bill works its way to conference.

I yield to the chairman.

Mr. VISCLOSKY. I appreciate the gentleman's comments, and I thank the gentleman for his concern about this important topic.

I agree with him that advanced battery research and development is essential in our goals to increase energy efficiency and reduce emissions. That is why we have included an additional $10 million over the President's request in this bill for advanced battery R&D.

Mr. KNOLLENBERG. I thank the chairman for his support and am greatly appreciative of his commitment to such an important endeavor. However, the U.S. automotive industry believes that a significant increase of Federal investment in the development of advanced batteries will not only improve fuel efficiency and reduce the emissions, but it will also help them compete with foreign automakers whose countries have already committed to provide significant funding for advanced battery R&D. The U.S. automakers believe that an additional $100 million this year for advanced battery R&D would considerably promote current efforts to develop the technology and become a leader in the production of advanced lithium ion batteries.

Mr. VISCLOSKY. I thank the gentleman for his passionate support of the domestic automotive industry and appreciate the industry's effect on the national economy because I have a strong manufacturing presence in my district. Technology development is vital to the success of the manufacturing sector, and Congress should continue its support of R&D.

I also thank the gentleman for his acknowledgment of our budget constraints. The subcommittee will be happy to work with him and the rest of our colleagues as we work our way through conference.

Mr. KNOLLENBERG. I thank the gentleman.

Mr. VISCLOSKY. Mr. Chairman, I reserve the balance of my time.

Mr. HOBSON. Mr. Chairman, I yield 3 minutes to the gentlewoman from Illinois (Mrs. BIGGERT).

Mrs. BIGGERT. I want to thank the ranking member of the subcommittee for yielding me the time.

I know that both the chairman and the ranking member share my great frustration that again this year the Department of Energy failed to request funding for the university reactor infrastructure and education assistance program. That is why I was extremely concerned to learn that this bill included no funding for this program.

At the same time I recognize that the subcommittee has provided $15 million in funding for the Nuclear Regulatory Commission to support university programs, but that spending will be limited to scholarships and fellowships and ''human infrastructure'' programs. And I understand that Assistant Secretary Spurgeon has indicated publicly that DOE plans to support universities, faculty and students with over $60 million in funding from its core research programs.

I would ask this of the ranking member: Does the subcommittee expect the DOE to fulfill this commitment? And, furthermore, is the $15 million in NRC funding in this bill in addition to DOE's commitment?

I yield to Mr. HOBSON.

Mr. HOBSON. I thank the gentlewoman from Illinois (Mrs. BIGGERT) for her interest in this area. She is correct; the committee fully expects DOE to fulfill its commitment, recognizing the exact amount will change because the core research funding in this bill deviates from the President's request. And this DOE funding is in addition to the $15 million the subcommittee is providing NRC to support university programs.

Mrs. BIGGERT. To ensure that the DOE fulfills this commitment, would the ranking member be willing to request that DOE submit a detailed report on how much the DOE would spend on university nuclear programs within the funding levels provided in this bill?

Mr. HOBSON. In reply, yes, we will make that request. And should the subcommittee find the DOE's response unacceptable or not receive a response by the deadline stipulated, I commit to working in conference to direct the DOE to support university nuclear programs using core research program funding.

Mrs. BIGGERT. I thank the gentleman. I am also concerned that the bill does not provide sufficient funding for research reactor infrastructure support and upgrades. Would the ranking member be willing to work with me and other interested Members to ensure that the needs of our Nation's research reactor infrastructure are met in fiscal year 2008?

Mr. HOBSON. I would be happy to work with my colleague on this issue. The subcommittee recognizes support for university-based research reactors is an important part of the Federal stewardship role for the U.S. nuclear science and engineering enterprise.

Mrs. BIGGERT. I thank the gentleman.

Finally on a separate and unrelated issue, I remain concerned that there is no funding in this bill for the Army Corps' dispersal barrier on the Chicago Ship and Sanitary Canal, which is designed to keep aquatic invasive species like the Asian carp from reaching the Great Lakes and devastating the ecosystem.

I recognize the bill contains no funding for the barriers because the bill identifies no projects, and because additional authority included in WRDA is required for the Corps to complete and operate the barriers. If for some reason WRDA isn't enacted before conference begins on this bill, will the ranking member agree to help address the outstanding authorization issues and appropriate the necessary funds for these barriers in conference?

Mr. HOBSON. I am committed to addressing any outstanding issues related to the barriers in conference, if necessary.

Mrs. BIGGERT. And then, Mr. Chairman, do you share these concerns about both the barriers and DOE's university nuclear programs, and will you support the approach the ranking member and I are proposing to take to address these concerns?

I yield to Mr. VISCLOSKY.

Mr. VISCLOSKY. I will assure the gentlewoman that I do, and I will.

Mrs. BIGGERT. I thank the chairman and the ranking member for their efforts in this area.

Mr. VISCLOSKY. How much time remains on both sides?

The CHAIRMAN. Both sides have 6 minutes remaining in debate.

Mr. VISCLOSKY. Mr. Chairman, I recognize the gentlewoman from Texas (Ms. JACKSON-LEE) for a unanimous consent request.

Ms. JACKSON-LEE of Texas. Mr. Chairman, because of the flood mapping crisis in Houston, Texas, and the need for flood control, let me add my appreciation and submit my statement for the RECORD in support of this legislation.

Thank you, Mr. Chairman. I rise to speak in strong support of H.R. 2641, the ''Energy and Water Appropriations Act of 2007.'' I also rise to express my sincere appreciation to Mr. VISCLOSKY, the chairman of the Energy and Water Subcommittee and his ranking member, Mr. HOBSON of Ohio, for working together in a constructive effort to renew America's dependence on foreign oil and cutting greenhouse gas emissions.

Moreover, this bill merits our support because it increases the Nation's commitment to long-term basic research by increasing the Federal investment that is so critical to developing the next generation of scientific breakthroughs. Federal funding for research and development has declined steadily over the last decade, and sound science has been compromised by political interference. This legislation takes a giant step toward reversing this disturbing trend.

Mr. Chairman, in the 1970s, our Nation faced an energy crisis unlike any we had ever experienced before. The OPEC oil embargo of 1973 led to skyrocketing prices, long gas lines, gas sales only every other day, and shortages where gas was simply unavailable. We experienced another oil shock in the late 1970s and under the leadership of President Jimmy Carter, America responded with unprecedented initiatives for energy research. But over the years, gas prices came down, incentive was lost, and these efforts fell by the wayside.

Today, we again face an energy crisis, only this time it is coupled with the enormous challenge of addressing the reality of global climate change. H.R. 2641 attempts to face these twin crises with over three billion dollars to address global climate change—researching its effects and working on technologies to slow it down—and investment in renewable energy programs that both reduce greenhouse gases and help our nation meet its energy needs.

The bill cuts funding for poorly thought-out plans for nuclear weapons recognizing that because of the enormous cost and the importance to our national security they require smart strategies not blank checks. Instead it works to keep Americans safe with a 75 percent increase in funding for nuclear nonproliferation efforts. It also funds the Army Corps of Engineers, strengthening our Nation's navigation infrastructure and improving flood control programs.

Before I highlight some of the more attractive provisions of this legislation, which by the way contains no earmarks, let me explain briefly why this energy and water legislation is so near and dear to the people I represent in the Eighteenth Congressional District of Texas.

In the past 2 years, Houston, the center of my district, has experienced some of the most devastating acts of nature in its history.

Six years ago this month, in June 2001, Tropical Storm Allison hit southeast Texas. Until Hurricane Katrina, this storm would become the costliest tropical storm in United States history. Flash flooding initiated quite rapidly during Houston's rush hour late Friday afternoon and on into the evening hours. Widespread street flooding was the initial threat, but the high rainfall amounts forced almost all the major Houston area bayou systems into severe flooding, with some to record levels. All major freeways in the Houston area were severely flooded in at least one location during this event. During this single event alone, rainfall in Harris County ranged from just 2 inches in the extreme west to in excess of 20 inches over Green's Bayou in the east. Countywide, the average rainfall was 8 inches with over two-thirds of the county receiving over 10 inches.

The total damage across southeast Texas approached $5 billion, $4.88 billion in Harris County alone. Twenty-two deaths were caused by Allison, with each of these fatalities occurring in Harris County. At this time, thunderstorms began to train and merge across the Houston metro area, and the system evolved into a powerful complex right over the most populated portion of our CWA that evening. This complex progressed south and east into the early morning hours of Saturday, June 9. Very heavy rainfall was observed for up to 10 hours in some locations, and rainfall rates of 4 inches or more per hour were observed throughout the night. A station in northeast Houston recorded over 26 inches of rain in almost 10 hours.

In response, the Tropical Storm Allison Recovery Project was launched. TSARP is a joint study effort by the Federal Emergency Management Agency, FEMA, and the Harris County Flood Control District, the District. The purpose of the TSARP project is to develop technical products that will assist the local community in recovery from the devastating flooding, and provide the community with a greater understanding of flooding and flood risks. The end product of the study is new flood insurance rate maps.

TSARP mission statement is: to assist residents of Harris County in recovery from Tropical Storm Allison and minimize damages from future floods by investigating the flood event and by developing current, accurate, and timely flood hazard information.

TSARP uses state-of-the-art technology. TSARP has yielded many products that will help us better understand our flood risk. These products will assist citizens in making important decisions, and will assist public agencies in infrastructure planning. The hoped for end result of TSARP is a more informed and disaster resistant community and one that is better prepared.

Purchasing flood insurance before June 18 allowed people to ''grandfather'' their existing floodplain status and pay lower premiums for flood insurance. Once the maps became official on June 18 residents and business owners whose properties are categorized in higher-risk flood zones on the new maps may pay higher rates.

According to FEMA, a ''Regulatory Floodway'' means the channel of a river or other watercourse and the adjacent land areas that must be reserved in order to discharge the base flood without cumulatively increasing the water surface elevation more than a designated height. Communities must regulate development in these floodways to ensure that there are no increases in upstream flood elevations. For streams and other watercourses where FEMA has provided Base Flood Elevations, BFEs, but no floodway has been designated, the community must review floodplain development on a case-by-case basis to ensure that increases in water surface elevations do not occur, or identify the need to adopt a floodway if adequate information is available.

FEMA regulations say ''Communities must regulate development in these floodways to ensure that there are no increases in upstream flood elevations.'' The city of Houston interprets that as no development within the floodway. This is not necessarily correct. Construction can take place but it cannot obstruct the water. Elevating the structure gets the same effect but the city denies this as they said debris may collect under the structure. They will only allow a remodeling permit if the improvements do not exceed 50 percent of the structures value.

There is one neighborhood along White Oak Bayou that is greatly affected. The homes are of higher value than most of the district. Alternatives to resolve their issue include widening the bayou or diverting floodwater.

The Harris County Flood District is now investigating these alternatives. Otherwise the only solution would be a change in the city's ordinance allowing construction in the floodway.

I am looking forward to working with colleagues on the Energy and Water Appropriations Subcommittee to explore ways and means of resolving this problem so that Houstonians will not be forced out of their homes and unable to afford flood insurance.

Mr. Chairman, let me provide this partial listing of some of the many good provisions in this legislation. First, H.R. 2641 will improve U.S. waterways and flood protection by increasing funding for the Army Corps of Engineers by $713.4 million above the President's request to address a $1 billion backlog of operations and needed maintenance. This backlog needs to be addressed to sustain the coastal and inland navigation infrastructure critical to the U.S. economy, and the gaps in flood protection highlighted in Hurricane Katrina.

Second, the legislation will help reduce dependence on foreign oil and cut greenhouse gas emissions. Renewable energy and energy efficiency programs are funded at $1.9 billion—a 50 percent increase in energy efficiency and renewable energy above the President's request for energy efficiency and renewable energy programs. This is in addition to the additional $300 million added in the FY 2007 joint resolution. In contrast, the President's FY 2008 request for renewable energy and energy efficiency research is the same as it was in 2001 in real terms.

Funding for research and development of alternative fuels such as corn based and cellulosic ethanol and biodiesel is increased by 40 percent above the President's request. Solar Energy demonstration projects receive a 34 percent increase above the President's request. There is also $22 million to research new ways of generating power from water flow, and $44.3 million for geothermal energy, neither of which were funded in the President's request. This is on top of the $95 million for upgrades to existing hydropower dams funded under the Army Corps.

I could go on and on. This thoughtful legislation provides funding to invest in new vehicle technology; energy efficient buildings; weatherization; carbon capture and sequestration; and climate change science. And it cuts wasteful spending as well.

For example, H.R. 2641 directs the Energy Department to develop a concrete plan to improve its contract management. The Energy Department has been on the GAO list of programs that are at high-risk for waste, fraud, abuse and mismanagement for 17 years in a row.

The bill also cuts Global Nuclear Energy Partnership, GNEP, funding by $285 million below the President's request and $47.5 million below 2007 for this initiative to reprocess spent nuclear fuel and burn long-lived radioactive materials. There are concerns that this project is unsafe, will cost tens of billions of dollars, and could make it far easier for terrorists to obtain plutonium to make nuclear weapons.

The bill also secures substantial savings by cutting wasteful and unnecessary nuclear weapons programs by $5.9 billion, $632 million below the President's request and $396 million below 2007. It cuts 37 specific weapons program accounts, including the Reliable Replacement Warhead program. The existing stockpile will continue to provide the Nation's nuclear deterrent for the next two decades, and certainly until the President develops a strategic nuclear weapons plan to transform the nuclear weapons complex away from its expensive cold war configuration to a more affordable, sustainable structure.

Mr. Chairman, I strongly support H.R. 2641 and urge my colleagues to join me. I thank Chairman VISCLOSKY for his fine work in bringing this exceptional legislation to the House floor where it should receive an overwhelmingly favorable vote.

Mr. VISCLOSKY. Mr. Chairman, I yield to the gentleman from Massachusetts (Mr. OLVER), a member of the subcommittee, for 3 minutes.

Mr. OLVER. Mr. Chairman, I thank the gentleman for yielding me the time.

First of all, I want to commend the chairman and the ranking member and all of the staff on both sides of the aisle for this excellent bill. I hope that all of the Members on both sides will find it is something that they can support. Particularly I want to commend the chairman, this chairman and his ranking member, for the very amicable and nonpartisan way that they have conducted the work of the subcommittee. I think that is a wonderful picture for all of us as chairs and ranking members for the way that they have done this.

A great deal has been said about energy independence for this country, and I would say, I would assert that it is truly a matter of national security that we maximize the efficiency and conservation of energy in this country. We use 100 quads of energy; 100 quads is 100 quadrillion Btus of energy in this country for 5 percent of the world's population. The world as a whole uses about 400 quads of energy. So we, for 5 percent of the population, are using 25 percent of the whole world's energy usage.

Early in our hearings process this year we had a series of theme hearings, and we had many expert witnesses. The most dramatic testimony that I heard there that is easily conveyable is that we could save of our energy usage some 50 percent; all across all of our uses of energy, 50 percent of what we presently use. That same testimony indicated that since 1973 when the first oil crisis hit, we had saved already some 47 quads of energy in that roughly 40 years since the first energy crisis, a little less than 40 years. So we could save a huge amount more.

I just want to make three points about this very good bill. The bill recognizes that energy efficiency is one of the Nation's largest underutilized energy sources. It provides $146 million more for building technologies which is an increase of $60 million above the President's request; this, in an area where 40 percent of all of the energy we use is related to our buildings, our industrial, our commercial and our residential buildings. So there alone we can save a huge amount of energy, and the bill recognizes that and puts money where it will do the most good to try to improve our energy efficiency in our buildings.

But it also provides $23 million to address the backlog of equipment standards and analysis, $10 million above the President's request, which goes to accelerate the approval and the updating of appliance and equipment efficiency standards which we know that the Department of Energy is very much behind on. They are behind on at least 20 different standards related to appliance and equipment that we could be saving a lot more energy if those standards were brought up to date. And the Lawrence Berkeley National Laboratories estimates that the administration's negligence will cost an estimated $28 billion in foregone savings.

Mr. HOBSON. Mr. Chairman, I yield 3 minutes to the gentlewoman from New Mexico (Mrs. WILSON).

Mrs. WILSON of New Mexico. Mr. Chairman, I want to bring to the attention of the House something that is being done in this bill that I think has received insufficient discussion and debate.

This Energy and Water appropriations bill includes in it the most radical shift in U.S. policy on nuclear weapons that I have seen at least since the mid-1990s, that will lead us either to be forced to return to nuclear testing or to abandon nuclear deterrence because we stop maintaining the stockpile.

Without any debate, we have made this drastic change in this bill that is devastating to American nuclear weapons capabilities and will significantly change our policy on nuclear weapons without any discussion at all of any substance.

In 1992, the United States stopped nuclear testing. In 1996 we joined the moratorium on nuclear testing and said we will continue to maintain the stockpile through something called science-based stockpile stewardship. It is kind of like if you had a car that was a 1980s car and you said okay, we are never going to turn the key, but every year through science and engineering we are going to be able to tell the President, if we turned the key we believe it would be safe, secure and reliable.

The car would go on. It won't be turned on unless we turn the key; and, Mr. President, we are confident of that.

□ 1145

This bill devastates that capability with respect to our nuclear weapons. It has a 20-percent reduction in 1 year in

the engineering laboratory that is solely responsible for over 6,000 parts in our nuclear weapons. It has a 40-percent reduction at Los Alamos National Lab's nuclear weapons program. And 80 percent of the existing stockpile is designed by Los Alamos. They are responsible for being able to tell us if these weapons are safe, secure and reliable.

What does this mean? It means we will not be able to achieve the stockpile reductions we're trying to achieve because the labs will not have the sense of reliability of the stockpile. Your percentage of reliability determines how low you can bring the stockpile.

Second, we are increasing the likelihood of the need to go back to underground testing, because at some point in the future, the lab directors will not be able to certify the reliability of the stockpile. There will be a problem, as there is every year; and they won't have the tools to be able to assess that problem without nuclear testing.

And, third, you are undermining allied confidence in the American nuclear umbrella. Mr. OBEY, my colleague, said they're devastating this program because there's been no strategy for post-Cold War nuclear weapons. That is a complete fallacy. It is rubbish. We signed the Moscow treaty to reduce the size of our deployed stockpile. We have gone to a policy of no underground testing. We have gone to a policy of science-based stockpile stewardship and the majority in this House is moving toward a nuclear freeze and unilateral disarmament without any debate whatsoever.

I would urge my colleagues to oppose this bill.

Mr. VISCLOSKY. Mr. Chairman, I would recognize the gentleman from Massachusetts (Mr. MARKEY) for 1½ minutes.

Mr. MARKEY. Mr. Chairman, I rise to commend Chairman VISCLOSKY and Ranking Member HOBSON for their clear vision and their courage in producing this bill. This bill represents an historic shift in policy, and that is why this bill deserves such strong support.

This bill almost doubles the funding for real nuclear nonproliferation programs, both in the former Soviet Union and around the world, adding close to $1 billion for the most effective programs. The bill provides dramatic increases over the President's request for the program, and I commend Mr. VISCLOSKY and Mr. HOBSON for their crucial, long overdue investment in the security of the United States. We are here only because of their leadership.

Secondly, while the President wants to build thousands of new warheads at a price tag of up to $100 billion, this bill puts a brake on the Reliable Replacement Warhead program and it demands an explanation of why the United States needs to build thousands of new nuclear weapons even as we are, with agreements with the Russians, trying to reduce the number of nuclear weapons in this world.

I commend the chairman and the ranking member of the subcommittee for dramatically realigning our nuclear priorities in such a positive manner. I urge adoption of this historic measure.

Mr. HOBSON. Mr. Chairman, I yield 1 minute to the gentleman from Virginia (Mr. WOLF).

Mr. WOLF. I thank the gentleman.

There will be a vote on the Hinchey amendment later on today. It doesn't repeal section 1221, but it slows it down. There was never a hearing on this. There was never a vote on this in the Congress. This whole power line issue in corridors, which in this area will go through Antietam, will include Gettysburg and First Manassas, will be coming to your area.

So when given the opportunity if you look at all the groups that support the Hinchey amendment, we strongly urge you to support the Hinchey amendment. On the current language, no environmental impact statement, no consideration of energy efficiency, no consideration of historic lands.

The Hinchey amendment is good for the country.

Mr. HOBSON. Mr. Chairman, might I ask the time left on each side.

The CHAIRMAN. The gentleman from Ohio has 2 minutes remaining. The gentleman from Indiana has 1½ minutes remaining.

Mr. VISCLOSKY. I assume the majority has the right to close general debate?

The CHAIRMAN. The gentleman is correct.

Mr. VISCLOSKY. Mr. Chairman, I reserve the balance of my time.

Mr. HOBSON. I have 2 minutes left. I yield it to a member of the subcommittee, the gentleman from Idaho (Mr. SIMPSON).

Mr. SIMPSON. I thank the gentleman for yielding.

Once again this year, the bill before us is the result of a bipartisan atmosphere in the Energy and Water Subcommittee that has been fostered by Chairman VISCLOSKY and Ranking Member HOBSON. I want to thank both of them for the manner in which they approached the many issues before this committee and for producing a bill that will pass today, I believe, with little opposition.

First, the Energy and Water bill enjoyed unanimous support in the subcommittee and near unanimous support in the full committee for the balanced and thoughtful way in which it addresses the complex energy and water challenges facing this Nation.

Second, the bill makes tremendous investments in our Nation's critical science and energy-related programs. Third, the bill promotes two areas that I believe are critical to address the energy supply challenges we face, nuclear and alternative fuels, by employing the vast knowledge and expertise of our national labs that includes the Idaho National Laboratory which is in my district.

Finally, the bill continues its pressure on DOE to improve project management, contain costs and stick to schedules which are among DOE's most chronic and persistent problems.

In closing, I want to again recognize the bipartisan manner in which this bill was written and acknowledge the tremendous work of all the professional staff on this subcommittee.

I urge my colleagues to support this bill, and I thank the chairman and the ranking member for their work on this bill.

The CHAIRMAN. The gentleman from Ohio has 45 seconds remaining. The gentleman from Indiana has 1½ minutes remaining.

Mr. VISCLOSKY. Mr. Chairman, I only have one more speaker and I would close with that speaker, Mr. SPRATT from South Carolina, if there are no further speakers on Mr. HOBSON's side.

The CHAIRMAN. Does the gentleman from Ohio have additional speakers?

Mr. HOBSON. No, but I will yield my extra 45 seconds to the gentleman from South Carolina.

The CHAIRMAN. The gentleman from South Carolina is recognized for the balance of the time.

Mr. SPRATT. Let me thank both the chairman and the ranking member for this gracious yielding of time but, in addition, for the excellent work they have done on this bill. As they know, there is a bone of contention in the bill where we have had a disagreement. It is called MOX fuel. I think it's a good idea. For some time we've had an understanding with the Russians that they and we would build MOX fuel disposition plants so that we could take weapons grade plutonium and convert it into reactor fuel, burn it and dispose of it so it would no longer be usable for weapons. This bill took the President's request of $333 million and basically cut it in half to 167. But when I sat down with the chairman, he pointed out to me that there were prior-year balances that would augment that amount of money and, all in all, there was a total of $698 million available which would be enough to move the project forward in the next fiscal year. Unfortunately, when we explored those unspent balances, we found that the numbers were a bit out of date, according to the Department of Energy, and that the available funds would add up to only about $326 million, which is about half of what is needed for the project next year.

So I rise simply to say that in conference or somewhere along the way before this finally becomes law, we would like to reengage about the

amount of money that is available for the MOX plant. I'm not offering an amendment today. I know it would be defeated. It would also be ingratitude for the work that the chairman and the ranking member have already committed to work with us on this project.

But I do say, number one, I appreciate your efforts and, number two, we'll visit this number in conference with the conferees if at all possible.

There are some other issues here, the H Canyon, there's $85 million taken out of it. It's the only plutonium processing line of its kind we have operative in the country today. That money may render it difficult to operate it through the rest of the year. And there is also a question of where the pit disassembly process will be located. I understand that has been resolved and will be resolved with an amendment offered by the gentlewoman from California (Mrs. TAUSCHER).

Let me thank the chairman and the ranking member for their assistance in this matter and say that we still have some work to do on the adequate amount of money for the MOX fuel plant before the bill is ready.

Mr. HALL. Mr. Chairman, later today we begin work on important legislation to finally help America end its dependence on foreign oil and pursue newer, cleaner forms of energy.

I'm excited that the Energy and Water Appropriations bill that we will pass this week will take the long-overdue step of setting a new course for our energy future by making significant investments in renewab1es and efficiency.

For too many years, working families have felt the sting of high prices at the gas pump and rising home energy costs. Our economy has been made vulnerable to the whims of OPEC, and our reliance on fossil fuels has polluted our air and exacerbated climate change.

All the while state and local governments have been forced to try to fill the leadership vacuum left by the previous Congress and this President.

No more. The new Congress is prepared to meet our nation's energy challenges head on. To do so, this bill provides almost $2 billion for renewables and efficiency, significantly more than the President requested.

This funding includes $200 million to get more solar projects on the market, $250 million to help develop domestically produced biofuels and over $235 million for new vehicle technologies to alleviate our demand for foreign oil, about $390 million for efficiency and weatherization grants to cut energy use in buildings, and over $110 million to expand and develop hydropower across the United States.

This funding is an investment in America's future prosperity. By supporting these technologies, we will be able to produce energy sources here at home that do not rely on fossil fuels and do not emit greenhouse gases, particulate matter, and other pollutants that threaten our environment and health.

However, if there is one area where I feel the bill strays off course it is in its continued financial support for nuclear power. I am deeply concerned that the bill continues to provide unwarranted taxpayer subsidies for nuclear power that hide the true consumer costs of this power source and obscure the safety and environmental threats posed by nuclear energy. I am specifically troubled by the provision of $120 million for the Global Nuclear Energy Partnership and almost $200 million for new reactor construction and technology development through the Nuclear Power 2010 and Generation IV programs. I believe that we need to curtail these subsidies to make the nuclear industry stand on its own and to make its true costs transparent to the public.

Although I have reservations about the spending on nuclear power in the bill, I am pleased that it does not include funding for the Reliable Replacement Warhead, and requires the President to come forward with a plan to adapt to the realities of a post-Cold War world by transforming and reducing our nuclear arsenal.

Overall, the Energy appropriations bill contains significant investments for solar, wind, hydropower, biofuels, efficiency, and other technologies that will help America's families gain cleaner, more secure, more affordable energy. This bill is a significant accomplishment and I urge my colleagues to support it.

Mr. LANGEVIN. Mr. Chairman, I rise in support of H.R. 2641, the Energy and Water Appropriations Act for fiscal year 2008. I commend Chairman VISCLOSKY for his efforts on this measure and for investing in the needs of our Nation's future.

As a former member of the House Armed Services Committee and as chair of the Homeland Security Subcommittee on Emerging Threats, Cybersecurity and Science and Technology, I am particularly pleased that this bill recognizes the importance of nuclear nonproliferation efforts. I have become convinced that the nuclear terrorist threat is real, requiring the full and urgent attention of our government. We have learned about the relative ease with which a terrorist can build a crude nuclear device, and we need to do all we can to prevent the nightmare scenario in which someone smuggles a device onto U.S. soil and detonates it in a city.

We must pursue a three-pronged approach of prevention, detection, and response. I have supported efforts to increase our radiation detection capabilities at our ports of entry, as well as to improve our government response efforts if our nation is ever attacked with a nuclear or radiological device.

This bill addresses the third component of that strategy—securing nuclear material at its source. This measure increases funds for the National Nuclear Security Administration to secure nuclear weapons and materials in the former Soviet Republic. The NNSA's efforts are vital to improving the security of nuclear materials at civilian, naval, and nuclear weapons complex facilities, and helping Russia dispose of plutonium removed from nuclear weapons.

However, the challenge of fissile material security goes far beyond Russia and the former Soviet Union and will require our government to expand its non-proliferation programs outside of the former Soviet Union. The revelations of A.Q. Khan's black market proliferation network, for example, provided a striking wake-up call that we must focus on other nuclear states if we are going to be successful in deterring nuclear terrorism. Consequently, the bill more than doubles funding—providing $251 million—for the Global Threat Reduction Initiative, which aims to identify, secure, remove, and facilitate the disposition of high-risk, vulnerable nuclear and radiological materials and equipment around the world.

Again, I thank Chairman VISCLOSKY for his leadership on nuclear non-proliferation programs and for his fine work in crafting this bill.

The CHAIRMAN. All time for general debate has expired.

Pursuant to the rule, the bill shall be considered for amendment under the 5-minute rule.

During consideration of the bill for amendment, the Chair may accord priority in recognition to a Member offering an amendment that he or she has printed in the designated place in the CONGRESSIONAL RECORD. Those amendments will be considered read.

The Clerk will read.

The Clerk read as follows:

H.R. 2641

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That the following sums are appropriated, out of any money in the Treasury not otherwise appropriated, for energy and water development and related agencies for the fiscal year ending September 30, 2008, and for other purposes, namely:

Mr. ISRAEL. Mr. Chairman, I move to strike the last word.

Mr. Chairman, I want to thank Chairman VISCLOSKY and Ranking Member HOBSON for a very strong bill that reflects wonderful bipartisan consensus. I especially want to thank them as a new member of this subcommittee for allowing all of the members to have more input into this bill than I thought was possible.

Mr. Chairman, I am a new member of this subcommittee, and I joined this subcommittee to fight for sensible and critical investments in renewable energy and energy efficiency. Before joining this subcommittee, I served for 4 years on the House Armed Services Committee and came to the conclusion that every military challenge that we confront as a Nation is exacerbated by one fact and, that is, that we have to rely on our adversaries to sell us the fuel to power our military to protect us from our adversaries.

Now, this has been a 30-year problem. Thirty years ago, President Carter addressed the Nation, declared the moral equivalent of war on foreign oil, and the only thing we've been able to do in the past 30 years since then is to double the amount of our oil imports from the Middle East and cut renewable energy investments by 80 percent. We've had 30 years of missteps, backsteps, and half steps.

This bill is the most important step forward in correcting that course that we have seen in 30 years. It puts us

back on course. It increases investments in energy efficiency and renewable energy by $638 million over the administration request. It inserts language that I requested to create a new Federal advisory council on investment and finance so that we can unleash the entrepreneurial spirit of the investment community in helping us to solve this problem. It invests an additional $70 million in biomass and biorefinery. It invests an additional $51.6 million in solar. Mr. Chairman, we are now behind Germany and Japan in solar. This will help us leap ahead. It invests an additional $17 million in wind. Mr. Chairman, of the top 10 wind manufacturers in the world, only one is American. This will push us ahead.

It invests an additional $59.7 million in vehicle technologies. Mr. Chairman, we are now falling behind Japan in the development and manufacturing of an advanced battery capable of deploying plug-in hybrids. This will give us an important boost. It provides $60 million in new investments in green buildings. We are now falling behind China in the development of green-building technologies. This will put us ahead. It invests an additional $101 million in weatherization, a critically important program for energy efficiency.

This solves a fundamental military problem that we have confronted and that problem is this: we are now borrowing money from China to fund our military, to buy oil from the Persian Gulf, to fuel our Air Force to protect us from China and the Persian Gulf. This is not just an environmental or an energy problem. This is a fundamental national security problem. This bill puts us where we need to be, not only protecting ourselves from our adversaries, not only strengthening our military capabilities which need strengthening but creating the next generation of green jobs, creating a new generation of manufacturing jobs that will put us ahead of our economic competitors in these new and critically growing technologies.

So I want to again thank Mr. VISCLOSKY and Mr. HOBSON for their bipartisan leadership, thank them for involving all of their members in this debate, and urge my colleagues to support this bill which is one of the most important investments that we can make and will change that 30-year record of half steps, missteps and backsteps into a giant leap forward for humankind.

□ 1200

Mr. SHIMKUS. Mr. Chairman, I move to strike the last word.

I ask Chairman VISCLOSKY to enter into a colloquy with myself and Congressman COSTELLO.

As Chairman VISCLOSKY is aware, our home State of Illinois has two sites currently being reviewed by the Department of Energy and the FutureGen Alliance as potential locations for the final selection of the FutureGen project.

FutureGen is President Bush's initiative to design, build and operate the first near-zero emissions coal-fueled power plant. It is recognized worldwide as one of the most significant projects in the world to address climate change concerns.

We appreciate Chairman VISCLOSKY's support of the FutureGen project by fully funding it in this year's Energy and Water appropriations bill. However, Congressman COSTELLO and I have two points of clarification with the report language as currently written, and we appreciate your willingness to address these two points.

I yield to my colleague and friend, Congressman COSTELLO.

Mr. COSTELLO. Mr. Chairman, I thank my friend from Illinois (Mr. SHIMKUS) for yielding, and I also thank Chairman VISCLOSKY for his support of the FutureGen project.

FutureGen is on a fast track to break ground by 2009 and be on line by 2012. I would ask the chairman of the committee if he can assure us that it is the intent of the committee not to delay the FutureGen project.

Mr. VISCLOSKY. Mr. Chairman, will the gentleman yield?

Mr. SHIMKUS. I yield to the gentleman from Indiana.

Mr. VISCLOSKY. Mr. Chairman, to both Mr. SHIMKUS, as well as my friend Mr. COSTELLO, I can assure the gentlemen from Illinois that it is the intention of the committee not to delay FutureGen.

And I would add parenthetically that the changes made by the committee are to ensure that this project does proceed.

Mr. COSTELLO. I thank the chairman for his response, and I seek clarification from the chairman as to the committee's intentions with regard to the nature of FutureGen as a research and demonstration project. FutureGen is focused as an integrated gasification combined-cycle plant with carbon capture and sequestration. Is it the intention of the committee to alter the nature of the project?

Mr. VISCLOSKY. It is the committee's intention not to change or alter the focus of the project as described by the gentleman. The committee is concerned with the ability of the Department of Energy to complete construction projects of all kinds on time and within budget, and that's why the actions were taken.

Mr. COSTELLO. I thank Chairman VISCLOSKY for this colloquy, for his response, and for his support for FutureGen.

Mr. SHIMKUS. Mr. Chairman, I thank my friend. We look forward to working with Chairman VISCLOSKY as the appropriations process moves forward to ensure we continue to use coal, which provides half of our Nation's electricity, in an efficient and environmentally friendly way.

Mr. VISCLOSKY. For both yourself and Mr. COSTELLO, as I tell people, I grew up in Gary, Indiana, with about four integrated steel facilities. I'm a carbon guy. We have a significant issue as far as the use of carbon in this country, and one of the ways to solve it is to proceed with FutureGen. So I do look forward to working with both of you as we proceed.

Mr. SHIMKUS. I thank the chairman. He's been very gracious in walking us through this process.

Mr. INSLEE. Mr. Chairman, I move to strike the last word.

Mr. Chairman, I'd like to engage in a colloquy with Chairman VISCLOSKY and my colleague RUSH HOLT. I'd like to thank the chairman for including $22 million in funding for hydropower energy at the Department of Energy.

As the chairman well knows, U.S. wave and current energy resource potential that could be credibly harnessed is about 400 TerraWatt hours per year. That's about 10 percent of our total national energy demand. Just like the wind, coal, gas, oil, geothermal, conventional hydropower, and nuclear power industries have been nurtured through Federal research and development and other industry incentives, this new renewable energy source needs support from our government to get started.

The U.S. stands poised to take advantage of many of the technological opportunities available to ocean, wave and tidal power. While the Europeans profited in the early years of wind energy development, we're poised to lead the world in marine renewable energy technology development.

Early successes will lead to continued investment. Success begets success. The investor community is carefully watching and waiting to see what the government is going to do to help this industry, just like the research and development funding and tax subsidies we provided to all of the other renewable energy industries.

With that, I'd like to yield to my colleague Mr. HOLT, who's been a leader on energy issues.

Mr. HOLT. Mr. Chairman, I thank my friend Mr. INSLEE from the State of Washington, and I would add that we believe that the Department of Energy should consider both conventional hydropower energy provided through dams, as well as hydropower through the movement of waves, tides, and currents in the oceans and free flowing rivers, lakes and streams. Each of these forms of hydropower holds the potential to improve greatly the way we generate energy.

We're pleased that the Appropriations Committee has recommended that the Department of Energy use some of this funding for nonimpounded

marine renewable technologies, and we think it's important for the subcommittee to continue to provide oversight of the Department of Energy in support of this form of sustainable energy research.

Will the chairman and the committee continue to investigate the potential of this energy source by working with and providing oversight of the Department of Energy and look for increased opportunities for funding in the future?

I yield back to my colleague from Washington to obtain a response from the chairman.

Mr. INSLEE. Mr. Chairman, I yield to the chairman.

Mr. VISCLOSKY. I can assure the gentlemen from both Washington and New Jersey that the committee is aware of this sustainable energy source and will continue to work with and provide oversight of the Department of Energy to ensure that renewable marine and hydroenergy development, both from the oceans, waves, tides and streams, as well as for energy from hydroelectric dams is a priority of the agency. It is the committees's intention to fund these new technologies for $6 million for research, development, and demonstration for new waterpower technologies.

Part of our approach to the energy crisis is the support of a broad range of energy and conservation technologies so that we have the best chance of meeting the challenge before us. A diverse energy supply for portfolio is key to providing reliable electricity for all of America's homes and businesses.

And I deeply appreciate the gentleman raising this important issue.

Mr. INSLEE. Mr. Chairman, thank you. We look forward to working with you. We think the tide is coming in on marine renewables. Thank you very much.

The CHAIRMAN. The Clerk will read.

The Clerk read as follows:

TITLE I—CORPS OF ENGINEERS—CIVIL

DEPARTMENT OF THE ARMY

CORPS OF ENGINEERS—CIVIL

The following appropriations shall be expended under the direction of the Secretary of the Army and the supervision of the Chief of Engineers for authorized civil functions of the Department of the Army pertaining to rivers and harbors, flood and storm damage reduction, aquatic ecosystem restoration, and related purposes.

INVESTIGATIONS

(INCLUDING RESCISSION OF FUNDS)

For expenses necessary for the collection and study of basic information pertaining to river and harbor, flood and storm damage reduction, aquatic ecosystem restoration, and related projects; restudy of authorized projects, miscellaneous investigations; and, when authorized by law, surveys and detailed studies, and plans and specifications, of proposed projects, $120,100,000, to remain available until expended: *Provided*, That of the funds provided under this heading of Public Law 106–554, $100,000 are rescinded.

AMENDMENT OFFERED BY MR. WESTMORELAND

Mr. WESTMORELAND. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. WESTMORELAND:

Page 2, line 18, after the dollar amount, insert ''(reduced by $30,000,000)''.

Mr. WESTMORELAND. Mr. Chairman, I almost feel like rather than offering an amendment that I need to ask everybody to stand up and we'll hold hands and sing Kumbaya, but I guess it's easy and people are in a good mood and very agreeable when you're talking about spending other people's money.

And in this case, we're talking about spending taxpayers' hard-earned dollars where we have very little control over how hard it is for them to make their money, but we spend it pretty easily.

This amendment takes $30 million out of the Corps of Engineers' investigation budget. It brings it down to the spending level that the President has requested in his budget request.

The Energy and Water appropriations bill is $1.1 billion over the President's request, and this amendment would reduce the funding for the investigation account under the Corps of Engineers by the $30 million, bringing it back down to the President's original request.

The investigations and construction funding is used to collect and study the basic information pertaining to local water projects such as flood and storm damage reduction. The funding is also used to restudy projects already authorized by Congress which can lead to additional Federal spending on local projects that have already received Federal funds.

Let me say that on some of these projects that we've heard about today from the delays, and Ranking Member HOBSON mentioned the MOX project which has been delayed for a number of years, probably that's not only due to funding but in these additional restudies that the Corps of Engineers has had to do on the project. The Corps of Engineers has greatly expanded over the last decade.

In addition, according to the administration, the Corps already has a large backlog of ongoing construction work, and the President's budget limits funding for the study and design of additional projects. So, in other words, by limiting new Corps investigations, this amendment would ensure that the current Corps projects move forward at a pace to bring them to completion without further delays.

So far there has been at least a $105.5 billion in new Federal spending over the next 5 years that has been authorized by this new leadership, the democratically controlled Congress this year, in enacting the largest tax increase in American history, the Democrat budget allows for $23 billion in spending over the President's budget's request.

This amendment is designed to save the taxpayers $30 million, only a small amount, just a small dent, in the unnecessary increase in Federal spending this year, and this again is fueled by the largest tax increase in the history of this country.

So, Mr. Chairman, I ask that all Members support this amendment. It is a small dent in the large increase in Federal spending.

The CHAIRMAN. Does any Member seek time in opposition to the amendment of the gentleman from Georgia?

Mr. VISCLOSKY. I would rise in opposition, Mr. Chairman.

The CHAIRMAN. Does the gentleman move to strike the last word?

Mr. VISCLOSKY. Then I would move to strike the last word.

The CHAIRMAN. The gentleman is recognized for 5 minutes.

PARLIAMENTARY INQUIRY

Mr. VISCLOSKY. Mr. Chairman, can I ask a parliamentary inquiry, please.

The CHAIRMAN. The gentleman would state his inquiry.

Mr. VISCLOSKY. It would be my understanding that on this particular amendment, because I have moved to strike the last word per the Chair's suggestion, that I can only speak once on the amendment?

The CHAIRMAN. The gentleman's correct.

Mr. VISCLOSKY. As opposed to rising in opposition to the amendment.

The CHAIRMAN. Either way, the gentleman may speak but once on this amendment. The gentleman is recognized for 5 minutes.

Mr. VISCLOSKY. Mr. Chairman, I rise in opposition to the amendment offered by Mr. WESTMORELAND.

First of all, he did indicate that he was concerned about reinvestigations. I would simply indicate to my colleagues that the world changes every day, and there are times when we need to reassess the circumstances so that we can spend the taxpayers' dollars as wisely as possible.

The fact is that the Nation's investment in our water resources infrastructure has declined over the last three decades, from $6 billion per year to less than $4 billion in constant dollars.

If the tragedy in New Orleans has taught us anything, I hope it is that we have neglected our infrastructure. If the suffering of the residents in the gulf doesn't illustrate the point, simple fiscal prudence should. The cost of recovery in New Orleans will far exceed what it would have cost to provide additional flood and storm protection.

There are large cities that face high and increasing risk of catastrophic flooding. Sacramento is just one example.

We have high-hazard dams with safety issues. There are countless communities that do not have flood protection commensurate with the risk to those communities.

Much of our infrastructure is reaching its design life. Over 50 percent of the locks and dams owned by the Corps of Engineers are in this category. Aging infrastructure brings increasing costs, yet the funding for accounts at the Army Corps for this particular function have been flat over the last 30 years.

Circumstances have changed from the time much of our infrastructure has been designed, development patterns have changed, transportation networks and requirements have evolved. Yet we are not investing enough today to maintain what we already own or complete projects that are in progress today, much less plan for the future needs for the safety of our citizens and economic viability of our transportation system.

Due to insufficient funding, schedules are slipping and costs are growing, as we piecemeal these projects, if we do not act in a timely fashion.

There is a significant and growing backlog of civil works projects. Current estimates are as high as $60 billion. Funding for studies and investigations must be adequately funded so that we can proceed with these very important projects. And given the backlog in construction projects, the funding for investigations account is less than the current year.

The bill focuses funding on completing ongoing projects and maintaining existing infrastructure. However, it is very important, obviously, to plan for the future.

I would ask that my colleagues oppose the amendment.

□ 1215

Mr. HENSARLING. Mr. Chairman, I move to strike the last word, and I yield to the gentleman from Georgia.

Mr. WESTMORELAND. I thank the gentleman from Texas for yielding.

Mr. Chairman, I would just like to comment on the chairman's comment about rules change every day. They do change every day, but when someone has based a project on the prior rules and regulations of the Corps, and they have based their whole project, and proceeded with that project, when the rules change and they come back to reinvestigate, that's no way to do business.

Mr. HENSARLING. I was happy to yield to the gentleman, and I want to thank him for his leadership.

Mr. Chairman, I want to encourage the House to adopt this amendment.

Right now on the heels of our Democrat colleagues enacting the single largest increase in history, we should leave no stone unturned in trying to find more ways that we can help the poor beleaguered taxpayer, who actually pays for all of these programs.

Now, I have no doubt that there are many good things in this legislation, and I know we in Congress are only limited by our imagination on how we can spend the taxpayers' money.

Already, just with the programs that are already on the books with the Federal Government before people create new programs, we're on a collision course. We're on a collision course to either, one, have taxes doubled on the next generation, just to pay for government we have, or within one generation there is only going to be, for all intents and purposes, a Federal Government consisting of Medicare, Medicaid, and Social Security.

Now, many people don't understand how the institution works, but already so much of the Federal spending is on automatic pilot, so-called entitlement spending. This is actually one of the few opportunities that Members have to come to the floor of the House and actually try to save taxpayers' money.

Now, we know that the President has issued a veto threat, and there is a $23 billion savings that he's trying to achieve.

For many of us, we believe the President is trying to spend too much money. But the President is the President, and the President is the one who has the veto pen.

If we would adopt the gentleman's amendment, the gentleman from Georgia, we would at least take one small step towards the pathway of saving that $23 billion and maybe, maybe take one small step towards saving the next generation from that nasty fiscal fork in the road to where either, one, they are going to have their taxes doubled, right on the heels, again, of the single largest tax increase in American history that the Democrats have brought to us, or we are going to see a Federal Government consisting of little more than Medicare, Medicaid, and Social Security.

What's ironic about this, Mr. Chairman, is if we don't start taking steps to save money today, and this amendment would save $30 million, if we don't start taking these steps today, tomorrow there might not be an Energy and Water appropriations bill. All the money would go somewhere else, and we continue as an institution to kick the can down the road.

Now, some in this body say fiscal responsibility simply means balancing the budget no matter what the cost. Well, for those who are going to have to have their taxes doubled in the next generation, they may differ with that assessment of what fiscal responsibility is.

Again, as the gentleman from Georgia has said, the Corps already has a large background of ongoing construction work. We know that; all Members know that. By limiting the Corps investigations, this amendment would help ensure that current Corps projects are completed.

Again, it's one very, very small step; but we cannot send this country again under Democrat leadership into some kind of tax-and-spend economic death spiral. We have to take every step possible to save the American people from, number one, the single largest tax increase in American history that threatens to impose over a 5-year period up to $3,000 of taxes per family. We have to save them from that. Then we have to save them from the other spending.

So this is a very modest amendment that would put us on a pathway to ensure that the President doesn't veto this bill and that we achieve some level of fiscal responsibility.

I urge the House to adopt the amendment of the gentleman from Georgia.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Georgia (Mr. WESTMORELAND).

The question was taken; and the Chairman announced that the noes appeared to have it.

Mr. WESTMORELAND. Mr. Chairman, I demand a recorded vote.

The CHAIRMAN. Pursuant to clause 6 of rule XVIII, further proceedings on the amendment offered by the gentleman from Georgia will be postponed.

The Clerk will read.

The Clerk read as follows:

CONSTRUCTION

(INCLUDING RESCISSIONS OF FUNDS)

For expenses necessary for the construction of river and harbor, flood and storm damage reduction, aquatic ecosystem restoration, and related projects authorized by law, including a portion of the expenses for the modifications authorized by section 104 of the Everglades National Park Protection and Expansion Act of 1989; for conducting detailed studies, and plans and specifications, of such projects authorized or made eligible for selection by law (but such detailed studies, and plans and specifications, shall not constitute a Federal commitment to construction); $2,008,874,000, to remain available until expended, of which such sums as are necessary to cover one-half of the costs of construction, replacement, and expansion of inland waterways projects shall be derived from the Inland Waterways Trust Fund; and of which $8,000,000 shall be exclusively for projects and activities authorized under section 107 of the River and Harbor Act of 1960; and of which $45,000,000 shall be exclusively available for projects and activities authorized under section 205 of the Flood Control Act of 1948; and of which $10,000,000 shall be exclusively for projects and activities authorized under section 14 of the Flood Control Act of 1946; and of which $25,000,000 shall be exclusively for projects and activities authorized under section 1135 of the Water Resources Development Act of 1986; and of which $25,000,000 shall be exclusively for projects and activities authorized under section 206 of the Water Resources Development Act of 1996: *Provided*, That of the funds provided under this heading the following amounts are rescinded: from Public Law 101–101, $435,000; from Public Law 102–377, $1,740,000; from Public Law 103–126, $797,000; from Public Law 105–245, $1,716,000.

Mr. KLEIN of Florida. Mr. Chairman, I move to strike the last word.

I rise for the purpose of engaging in a brief colloquy with the subcommittee

chairman and the ranking member regarding the Corps' regulatory program.

As you are aware, shore protection is a concern not only to residents along the coast but to all residents, all Americans who come to our beaches to relax, fish, boat, and dive. But our coasts are facing a real crisis. They have become seriously eroded, endangering both the personal property and personal safety of countless residents.

This is not a crisis limited to my constituents in south Florida. In my conversations with other Members representing coastal communities, I know that shore protection is a major issue facing our great country.

Mr. Chairman, among its many duties, the U.S. Army Corps of Engineers is entrusted to regulate the permitting of projects affecting U.S. waters. Comprised of many honorable and hardworking civil servants and military officers, the Army Corps has a long history of dedicated service towards the preservation of our natural resources.

I reluctantly rise today to voice my grave concern that the regulatory process under the Army Corps is simply taking too long. Critical erosion control projects that local communities wish to undertake to protect their people from the very real dangers posed by hurricanes or other deadly storms are languishing under the inertia of bureaucracy.

Mr. Chairman, the residents of Singer Island in Palm Beach County where I reside cannot wait 2 years for the Army Corps to complete their environmental impact statement. That means two more hurricane seasons and two more chances to have their lives literally washed away.

Singer Island isn't alone. Up and down the coast, local communities are in the same dire situation waiting for the Army Corps to act upon the regulatory authority. I know that you have heard the identical concerns during the many lengthy hearings that the committee has held. I understand that the chairman is willing to work with me to bring transparency and efficiency to the Army Corps regulatory process when you go to conference.

I want to thank you for your leadership on this issue, Mr. Chairman, and I look forward to our working together.

Mr. Chairman, I yield to the distinguished gentleman from Indiana.

Mr. VISCLOSKY. I want to thank the distinguished gentleman for bringing this to the attention of the committee. He is correct, it has been a subject of our hearing process as well. For some time now the committee has been concerned that the Corps' regulatory process is not being undertaken in an expeditious manner.

I want to assure the gentleman and all of my colleagues that we on the subcommittee have every intention of helping him bring greater transparency and efficiency to the Army Corps' regulatory process, both in terms of your particular concerns, as well as those nationwide.

Mr. KLEIN of Florida. I appreciate the chairman's attention to this issue.

Mr. HOBSON, would you also agree with the need to address these concerns? Would you also help us with the regulatory process?

Mr. HOBSON. Absolutely.

Mr. KLEIN of Florida. I thank the distinguished chairman and the ranking member.

Mr. BROWN of South Carolina. Mr. Chairman, I move to strike the last word.

I rise to engage in a brief colloquy with the subcommittee chairman and ranking member regarding the Corps' regulatory program.

On June 19, 2006, the United States Supreme Court issued a decision regarding the scope of the Federal Government's jurisdictions over wetlands and other water bodies under the Clean Water Act. Just last week, almost a year after the Rapanos decision was issued, the Army Corps and EPA issued joint field guidance interpreting the decision.

Because this guidance took almost a year to develop and issue, Corps districts around the country have thousands of backlog applications and projects seeking jurisdictional determinations and permits. Unfortunately, while the newly issued guidance sets targets for the Corps to complete and review applications, it did not review any plan for dealing with the current backlog. It also neglects to provide Congress and the American people with the work plan showing how Corps resources should be allocated to ensure that the application deadlines contained in the guidance of already existing statutes are met.

I thank you for the substantial increase in regulatory funding that is contained in this bill. These funds will go a long way towards ensuring that the Corps has the resources to meet the requirements as outlined in the June 5 guidance.

However, we need to ensure that the Corps focuses those resources where they are most needed, toward ending the backlog of over 20,000 outstanding applications and making certain it does not happen again.

I hope that you and the committee, Mr. Chairman, will recognize the importance of this issue and work in conference to include language requiring the Corps to show Congress that it is addressing the wetlands permit backlog and has the plan in place to meet the additional review requirements under the newly issued guidance.

Mr. VISCLOSKY. I appreciate the gentleman raising the issue. There is a theme in the last two colloquies, and it's a regulatory process. I certainly agree with the gentleman that the Corps' regulatory program needs to do a better job meeting its deadlines, especially with regard to section 404 permits under the newly issued guidance.

The gentleman's concerns are very timely, and they are warranted. I assure him that the subcommittee will work hard to address this issue as the bill moves to conference.

Mr. BROWN of South Carolina. I appreciate the chairman's attention to this issue.

Mr. HOBSON, would you agree with the need to address these concerns with the regulatory program?

Mr. SIMPSON. In the place of the ranking member, absolutely.

AMENDMENT NO. 26 OFFERED BY MR. WESTMORELAND

Mr. WESTMORELAND. Mr. Chairman, I offer an amendment.

The CHAIRMAN. The Clerk will designate the amendment.

The text of the amendment is as follows:

Amendment No. 26 offered by Mr. WESTMORELAND:

Page 3, line 8, after the dollar amount, insert ''(reduced by $481,186,000)''.

Mr. WESTMORELAND. Mr. Speaker, this amendment would reduce the amount by $481,186,000. It's in the area of construction.

Last year, $2.37 billion was spent. The President requested $1.5 billion, and the proposed budget is a little over $2 billion.

Mr. Chairman, we have talked about the overspending, and we have just heard about the 404 permitting process and the regulatory process. Let me say that the Corps of Engineers is a great organization. They do a wonderful job.

The problem is that they have a general or colonel, depending on what area of the country it is, that rotates in or out, and what we are left with are lifelong bureaucrats that control the Corps of Engineers. I appreciate listening to the chairman of the subcommittee and the ranking member and others as they have promised to get into speeding up the process and going through these regulations and making sure that these projects that are so important to our citizens move along at a pace and not impaired by just red tape and bureaucracy.

This construction area is somewhere that we have spent a lot of dollars.

The President came back, and as we mentioned in the last amendment that we had, and said, look, we have got such a backlog of projects already, why don't we make sure and get those out of the way before we go on to spending more money.

Let me say this, even though we may look at this as a construction, when you put more money into these agencies, it does nothing but build a bureaucracy and broaden the red tape that our citizens have to go through to deal with these agencies.

As I made the last comment on the last amendment, there has been at

least $105 billion in new Federal spending over the next 5 years that has been authorized, and will be authorized by this new Democratic Congress, the leadership of this House. In enacting the largest tax increase in American history, this Democratic budget will allow for $23 billion in spending over what the President's budget request was.

□ 1230

We, as a party, as a former majority party, the Republican Party, understood that people got tired of their government growing at a rate so much faster than the population of this country and the excessive spending that we did. It's time for us to try to get back the confidence of the American people, not just Republicans, or the minority party, but Congress in general. The ratings of this Congress is at a record low, record low.

The majority seems to think that they've heard the voice last November of the American people. Well, I hope that they're listening to the voice now because their rating is even lower than what the Republican rating was last November.

But this amendment is designed to save the taxpayers about $480 million, and although, there again, the last amendment was just for $30 million, this one's for $481 million, it's just a small dent in the amount of money that we're spending here. But I think it is a small indication to the people of this country that we're willing to be wise stewards of their money.

So I ask all of the Members here today if they would support this amendment to reduce the construction in the Corps of Engineers by $481 million.

Mr. VISCLOSKY. Mr. Chairman, I rise in opposition to the gentleman's amendment, but I don't disagree with everything he has enunciated in his defense of his position.

The two previous speakers before the gentleman talked about red tape and delay in the regulatory process with Army Corps. I would assume that every member of this subcommittee has had those meetings with the Corps, and we are certainly trying to rectify that problem on the theory that the sooner projects can be completed, the more benefit will enure to the taxpayers of this country and its citizens.

The gentleman's also right to enumerate the large backlog that we have on construction and other Corps facilities in this country, and that is one of the things that we are trying to address in this bill.

I would point out that the approach that we have taken, not just for the fiscal year 2008 bill, but in the last several years under the leadership of then-Chairman HOBSON, was to make sure that we face the challenges of the future in a very disciplined and rigorous approach that encompasses a broader context.

The bill continues the financial management contractor reforms to ensure that the Corps manages its budget to the best interest of the taxpayers. The recommendations include direction that the Corps continues to take action in considering additional factors as they proceed in the planning process.

And again, it has been the custom of this subcommittee in designing and structuring bills for the last several years to look at projects and marshal our resources so that some are completed, as opposed to bumbling on forever. And I wouldn't argue with the gentleman about that concern.

We have, again, done that in this bill to make sure that those additional construction dollars that the gentleman seeks to remove from the bill are put to good and rigorous use. And I would point out that this is not an abstraction. This goes to the core of people's health and safety.

Two floods ago, on the little Calumet River in Northwest Indiana, we had a gentleman in Highland, Indiana, lose his life. He was only one life in one flood. But for that man, and for his family, and for that community, it was a tragedy. We are constructing a flood control project that insures that that never happens again.

That's why we have flood control programs in the city of Dallas and its vicinities, to make sure that when you have significant events, as we have had this week in the State of Texas, that you do not have loss of life and, hopefully, you can diminish the loss of property.

We have huge commercial centers, ports like Long Beach, ports like the city of New York, ports like Baltimore, up and down our coast. We want to make sure that the commerce of this country moves as efficiently as possible, so that our economy grows and we can provide good paying jobs for all of our residents.

We have a State capitol in the most populous State in this country, Sacramento, California, one dike a way from a catastrophic event as far as the loss of human life and the destruction of properties.

Those are the types of projects, and those are the types of priorities that we are attempting to get at in this bill. And that's why these moneys are set aside, and would be opposed to their removal from this bill.

Mr. HOBSON. Mr. Chairman, I move to strike the last word.

Mr. Chairman, I rise in opposition of the amendment to reduce funding for the Corps of Engineers construction account. And let me give you some perspective on this.

This account is already chronically underfunded by the administration, and it has been in the past. And there's already a backlog of several billion dollars of Corps construction projects.

Projects already underway, I'm going to talk about one here, just to give you an example of what happens, such as the Olmsted Lock and Dam, wind up costing far more and taking far longer to complete because of funding constraints in this account.

The subcommittee is trying to do the responsible thing by dedicating sufficient funds to address this backlog. Our priority is on completing projects that are already underway and limiting new starts. And I can tell you there were a lot of Members when I was chairman that got really ticked off at me, especially new Members, because they had new starts and we wouldn't do them because we said we've got to finish what we've got before we go on to other things.

The Olmsted Dam, an example. It was supposed to be completed in 20 years and for a cost of $700 million. Because we didn't do it and fund it right, and money was taken and put into other accounts, that's now grown to $1.5 billion to finish this very needed dam on the Ohio River. And the project still isn't done. We don't have the money to fund all that they could use on this project in any one year.

Part of the problem is that this Congress, over the years, keeps adding projects to our account, and then we don't fund them, or we fund them partially, and the cost goes up.

I think it would be irresponsible, at this point, with the things that we've put into effect, to stop new starts, to complete projects and get them finished and stop this cost growth, to take this money out now. Frankly, this is one account where I think we could have used more money over the years and we could have done a better job.

He is right when we talk about Sacramento. Sacramento, those levees were built years ago, some of them by farmers, some of them by we don't know who. And they haven't been maintained to the degree they should be maintained. And it's a problem waiting to happen.

We're trying to take responsible steps, but we've run into the red tape and stuff. The Corps is trying. We've tried to do some things with the Corps. We're continuing to improve the Corps.

Frankly, 4 years ago when I became chairman, there were a lot of things wrong with the Corps that we've made right. I think the Corps is doing a much better job today. They've got a lot of new management techniques that we're using that they weren't doing in the past.

I'll give you an example. When I became chairman I asked to see their vision for this country and the waterways. They didn't have one. We asked them, What is your 5-year development plan for the waterways of this country? They didn't have one. But they do now.

Now is not the time to stop them, because under Chairman VISCLOSKY, and

previously, we've started to do the right thing to stop this cost increase and to get this under control. And frankly, if we would take this amendment, we would do great damage to the infrastructure or the future infrastructure of this country.

So I would urge a ''no'' vote on this amendment.

Mr. HENSARLING. Mr. Chairman, I move to strike the last word. I yield to the gentleman from Georgia (Mr. WESTMORELAND).

Mr. WESTMORELAND. Mr. Chairman, I just wanted to point out to the ranking member that he's exactly right. And if you look at the bill, I think it will talk about that specific amounts of this money has been itemized to go to section 107 of the River Harbor Act of 1960; $45 million to go to the Flood Control Act of 1948; $10 million to go to the Flood Control Act of 1946; $25 million to go exclusively for projects of the Water Resource Development Act of 1986; $25 million for the Water Resource Act of 1996. This is all because we have continued to put money into construction, and I hope that what the ranking member was saying is that there's no new projects in here. And maybe this is to finish up some of the projects. Maybe we can go back and finish some of the projects of the 1946 act or the 1986 act.

Mr. HOBSON. Mr. Chairman, will the gentleman yield?

Mr. HENSARLING. I yield to the gentleman from Ohio.

Mr. HOBSON. There are no new projects in this bill because there are no new projects proposed in the bill at this point. There could be later. I would hope not.

And I want to tell you, we also in the past took out the President's new starts too, not just the Congress's. We took out the President's.

Mr. WESTMORELAND. I'm glad to hear that from the ranking member.

But let's have a start. Let's prioritize. Let's tell the Corps with this amendment that we're going to cut this money, and that we need to see a prioritization schedule from them on how we're going to spend it; that we're going to be responsible for taxpayers' money.

Mr. HENSARLING. Again, I thank the gentleman from Georgia for his leadership and trying to bring some level of fiscal sanity and fiscal accountability back to this body.

And I'm not unsympathetic to what I just heard our ranking member say. But I guess I get somewhat frustrated when I see spending bill after spending bill after spending bill, and I see the largest single tax increase in American history enacted by the new majority.

I see absolutely no effort on the part of the new majority to do anything to rein in out-of-control entitlement spending. Unfortunately, there are few opportunities to try to save the poor, beleaguered, American taxpayer some of his funds.

And again, I'm not sure that this bill is being shortchanged. It does exceed the President's request. It does provide funding above last year, in this case, increasing funding by roughly twice the rate of inflation.

There are many American families who don't have the luxury of seeing their incomes go up by twice the rate of inflation. Why are we expecting families to do with less so that government can do with more?

And again, I'm not unsympathetic to what the ranking member had to say. But there are so few opportunities.

And I understand good things can be done with these funds. But occasionally, Mr. Chairman, we have to stop and we have to take a look at where this funding is coming from. And I talk about the poor, beleaguered, American taxpayer who, if the Democrats have their way and the largest single tax increase in American history is allowed to be imposed upon the American people, will see their taxes go up by roughly $3,000 a year.

And I hear from some of those taxpayers from around the country. I heard from Debbie in Lake Zurich, Illinois. She writes, ''I cannot survive a $3,000 tax hike. I am a single, 53-year old woman living in Lake Zurich who is drowning in taxes. Because of taxes I've been forced to put my house on the market. Any more tax increases will create a huge financial burden.''

I heard from Rose in Turnersville, New Jersey. ''As an older adult still in the work force, I'm living paycheck to paycheck. Between property taxes and all the other taxes I pay, I will soon give up my home. Just affording gas to get to work in my car is now a trial. Please keep the tax cuts we already have.''

As we talk about things we're going to do to safeguard people's homes, how ironic it is, with the largest tax increase in history we're going to spend the money and help take their homes away.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Georgia (Mr. WESTMORELAND).

The question was taken; and the Chairman announced that the noes appeared to have it.

Mr. WESTMORELAND. Mr. Chairman, I demand a recorded vote.

The CHAIRMAN. Pursuant to clause 6 of rule XVIII, further proceedings on the amendment offered by the gentleman from Georgia will be postponed.

□ 1245

Ms. BERKLEY. Mr. Chairman, I rise to strike the last word.

Mr. Chairman, 20 years ago Congress declared that my home State of Nevada would become this Nation's nuclear garbage dump. The legislation is known in the State of Nevada as the ''Screw Nevada Bill.''

Two decades later, the families I represent remain overwhelmingly opposed to having toxic nuclear waste buried 90 minutes from their homes, businesses, and where their children play. They have seen the mismanagement at Yucca Mountain, the lack of quality assurance and recent scandals where workers admitted to having falsified work on the site.

Nevada families know that there is currently no canister capable of storing nuclear waste for thousands of years and that, once inside of Yucca Mountain, corrosive elements will cause the canisters that do exist to rapidly fail, corrode, releasing radioactivity into nearby water supplies. Moms and dads fear thousands of truckloads of nuclear waste barreling down the highways of southern Nevada, home to more than 2 million families and a destination that attracts more than 40 million visitors a year. They have seen over the past 25 years how promises for ''fair treatment'' and ''sound science'' have been trumped by raw politics. And in 2002 they watched as Congress ignored Nevada's objections and declared that Yucca Mountain should go forward in spite of serious unresolved scientific issues that linger to this very day.

The circuit court of appeals decision that threw out the 10,000-year EPA radiation standards, there is a reason that they threw it out. Currently, no radiation standards exist for Yucca Mountain because they would have to find radiation standards for a 300,000-year time, leaving most of us to wonder if the financial status of the nuclear industry is more important than protecting the public safety and lives of American citizens.

Fortunately, Nevadans are not alone in opposing Yucca Mountain. Across this Nation, communities that face decades of nuclear waste shipments have raised their voices in opposition to Yucca Mountain. They share our concerns about terrorist attacks or an accident involving this lethal cargo. One nuclear waste spill could threaten thousands of lives, shut down rail lines and highways, and cost millions of dollars to clean up. Who is going to pay for that cleanup?

Post-9/11 we know all too well that there are those who will stop at nothing to strike at this Nation. Terrorists seeking to release radioactive materials or to secure a dirty bomb could target these waste shipments for attack, making each train or truckload a disaster waiting to happen. Our communities do not have the resources and our first responders simply do not have the training to deal with this threat.

Mr. Chairman, there are more reasons to oppose Yucca Mountain. This literal hole in the Nevada desert has already cost taxpayers $12 billion, and

the sky is the limit when it comes to future spending: $100 billion, $200 billion, $300 billion? Nobody can tell us and nobody knows. The last time the DOE updated the cost analysis for Yucca Mountain was 2001. The Department of Energy said in 2006, and again this year, they will provide updated cost analysis. They haven't yet done that because they don't know. The DOE's failure to provide us with an up-to-date life-cycle cost analysis for this project is just one more reason to oppose this multibillion dollar boondoggle.

And here is another: Yucca Mountain is even further away today than it was 20 years ago when we first started down this path. After $12 billion in spending, Yucca Mountain is now so far behind schedule that it will not even open until 2020 or beyond. Remember, it was supposed to be 1998. Meanwhile, the last shipments will not even leave the nuclear reactor sites until 2047. That is 40 years from today.

Mr. Chairman, we have a better solution. The first step is to keep nuclear waste where it is now in hardened dry-cask storage containers that can be secured for the next 100 years. End Yucca Mountain before we waste another $200 billion to $300 billion. And then, finally, find a real solution to securing this Nation's nuclear waste.

I urge you to vote to cut wasteful spending at Yucca Mountain, protect 50 million Americans in the communities all across our Nation who will be in danger from nuclear waste shipments and the families who oppose plans to turn Nevada into a radioactive garbage dump.

Before I yield back, I want to thank both Mr. HOBSON and Mr. VISCLOSKY for yielding me this time. I appreciate their courtesy that is of monumental importance to the people I represent, the citizens of Nevada, and those who are living on these very dangerous transportation routes.

The CHAIRMAN. The Clerk will read.

The Clerk read as follows:

MISSISSIPPI RIVER AND TRIBUTARIES

For expenses necessary for flood damage reduction projects and related efforts in the Mississippi River alluvial valley below Cape Girardeau, Missouri, as authorized by law, $278,000,000, to remain available until expended, of which such sums as are necessary to cover the Federal share of operation and maintenance costs for inland harbors shall be derived from the Harbor Maintenance Trust Fund.

AMENDMENT NO. 24 OFFERED BY MR. WESTMORELAND

Mr. WESTMORELAND. Mr. Chairman, I offer an amendment.

The CHAIRMAN. The Clerk will designate the amendment.

The text of the amendment is as follows:

Amendment No. 24 offered by Mr. WESTMORELAND:

Page 4, line 9, after the dollar amount, insert ''(reduced by $18,000,000)''.

Mr. WESTMORELAND. Mr. Chairman, what this amendment does is it cuts $18 million from the $278 million authorized under this bill. It is a small cut. Although $278 million is already authorized in current law, it is what the President's request was; and even though we have looked at other amendments and, hopefully, the whole House will see to do some cuts, this appropriations bill is $1.1 billion over the President's request. So this $18 million simply brings back the President's request for the Mississippi River and Tributaries program.

The Mississippi River and Tributaries last year was $396.6 million in 2007. There has been plenty of money there, I think, to look at these harbors, look at the flood damage, look at the things that should be done there; and this is a mild decrease of the $18 million.

But let me again reiterate, as I did on the previous two amendments, that this is in addition to $105 billion in new Federal spending over the next 5 years that has been authorized by the new leadership in this House. It has been done by enacting the largest tax increase in American history. And this budget that we are looking at for 2008 allows $23 billion in new spending that will be funded by the largest tax increase in American history. This amendment, while being only $18 million, is a small dent. I can't believe that I have been in Congress long enough to say ''only $18 million,'' because that is more money than most American families will see in one lifetime or two lifetimes. It is just a small dent in this year's budget. And, Mr. Chairman, I hope that all Members will see their way to cut this amount of money out of this particular appropriations bill.

Mr. VISCLOSKY. Mr. Chairman, I rise in opposition to the gentleman's amendment.

I again would reference some of his words where he indicated that $18 million is no small sum of money. It is a very significant sum of money, and I would agree with him. It is a significant sum of money, and it is very important to the programs that comprise the Mississippi River and Tributaries Program. And my concern is, if you would, carving out a particular geographic region for this particular cut and would emphasize that while it is but one geographic region and water system within our country, there are consequences of the amendments because channel improvement programs in Arkansas, Illinois, Kentucky, Louisiana, Mississippi, Missouri, and Tennessee would be affected. There are levees for the Mississippi River in States like Arkansas, Illinois, Kentucky, Louisiana, Mississippi, Missouri, and Tennessee. There is a flood waste system in the State of Louisiana, and there are operation and maintenance costs.

These are all significant and important programs dealing, again, with the priority of people's health and safety, the movement of commerce, and the protection of property.

I strongly oppose the gentleman's amendment.

Mr. HENSARLING. Mr. Chairman, I move to strike the last word.

Again I want to commend the gentleman from Georgia for his amendment in this series of amendments, which, as I understand it, would bring the funding to the President's level, which, in most cases for many of us, is still too much.

As I stated earlier in the debate, Mr. Chairman, I am still concerned that although clearly good cases are made for how these funds can be used, I look at the larger picture. We still have a bill before us that is growing this part of government at over twice the rate of inflation. Again, we are asking American families to somehow do more with less, and sometimes you wonder if government isn't doing less with more.

This is on top of the pressure that has been put on the family budget by the new Democrat majority's enacting the largest single tax increase in American history in their budget. This is on top of the Democrat majority that is trying to increase what we call nondefense discretionary spending by $23 billion above the level of last year. This is in addition to the $6 billion, Mr. Chairman, that they added to the omnibus spending bill at the first of the Congress and the $17 billion in nonemergency spending that they tried to put into the emergency supplemental to support our troops that somehow we all know ended up with funding for peanuts and spinach and many other items that many Americans would consider being part of a pork-barrel spending effort.

So, again, I would have more sympathy with those who oppose the bill if I saw any indication whatsoever that the new Democrat majority was trying to save the family budget from the Federal budget. And, instead, I see this explosion of spending, and I haven't even included what the gentleman from Georgia aptly observed, that we hadn't even completed 6 months of the year but already the new Democrat majority, on top of all the old spending, has now authorized over the next 5-year budget window an additional $105 billion of new spending. And you wonder where does it all end? Where does it all end?

I said earlier that I wish we could be debating on this floor opportunities to actually reform entitlement spending. We are dealing with a smaller portion of the Federal budget now, but we know that the longest journey starts with the first step. And, Mr. Chairman, we need to observe, and don't take my word for it, about what is going to happen to the American family and the American economy if we don't take some small steps to try to reduce the rate of growth of government.

□ 1300

Let's listen to our Federal Reserve Chairman, Ben Bernanke, who was quoted in a House Budget Committee. Without ''early and meaningful action'' to address the growth in entitlement spending, ''the U.S. economy could be seriously weakened, with future generations bearing much of the cost.''

Let's listen to the Comptroller General, our chief fiduciary officer in the United States. He said, ''The rising costs of government entitlements are a fiscal cancer that threatens catastrophic consequences for our country and could bankrupt America.'' Instead, this body kicks the can down the road.

And now we have a bill before us which, although it does many worthy things, is increasing the rate of spending of this part of government twice the rate of inflation; again, taking money away from American families after the single largest tax increase in history, threatening to double taxes on their children.

And so, we've had three amendments here in a row that would take incredibly modest steps to try to reduce the rate of growth of government. You don't even have to cut government, you just have to reduce the rate of growth to bring some fiscal sanity from this new spending and tax economic debt spiral that the Democrats seem to want to foist us into.

So, I would urge the House to adopt the amendment of the gentleman from Georgia. I wish we could do more, but it is a modest start on a very, very long journey.

Mr. RYAN of Ohio. I move to strike the last word, Mr. Chairman.

First, I would like to lend my support to my chairman of this subcommittee, and also Mr. HOBSON, for their great work on this bill. I think it's a great bill. I think you have really shown the rest of us in Congress how a committee can and should work together for the good of the country.

I would like to address a few issues that have been brought up, not necessarily related to the bill at hand, with regard to spending. And I am glad to see a couple of my friends on the Republican side have found some religion over the past few months. These were the same Members who were here over the past 6 years, Republican control of the House, Republican control of the Senate, Republican White House, and ran up $4 trillion in debt for the United States of America. We didn't hear boo from them while all this was going on. And the biggest problem has been most of that money was borrowed from foreign countries, Japan, China, OPEC countries; $4 trillion mostly borrowed from foreign countries by the Republican Party.

They've also mentioned that there has been stress on families. Well, I'm glad they finally came around to understand that, too. And some of the things that we have already done, Mr. Chairman, have addressed those issues: $700 increase in the Pell Grant, that will relieve some pressure for families; student loans rates being cut in half, that will reduce pressure on families; increase in the minimum wage, which begins this summer; increased SCHIP coverage; increased coverage for women's health care needs. These are issues that are going to relieve the pressure that most American families are feeling, and it took a Democratic Congress to implement that.

Now, to the heart and soul of this bill. I think this bill does two things, Mr. Chairman. One, this is a national security issue. What Mr. HOBSON and Mr. VISCLOSKY have done here is increase the security of this country by reducing our dependence on foreign oil, by increasing our funding for the ''loose nukes'' program so that we can be safer. And this dovetails perfectly into what we've already been doing here with the Homeland Security bill, where we're going to have 3,000 more Border Patrol agents, where we are going to have technology for our ports so we are making sure we cover the cargo in. This bill fits directly in with that. Money for our first responders, COPS program. This all fits together as a piece of a national security bill.

And this bill also, I think equal to the national security provisions, this is a bill about economic development. The problems we have been having over the last 30 years is that wages have been stagnant. And Rose in Illinois and some of the other people that my friend from Texas have mentioned have had stagnant wages for 30 years. This bill makes the kind of investments that the study from the National Academy of Sciences recommended, ''Rising Above the Gathering Storm.'' The head of that study was the former CEO of Lockheed Martin. And he noted, along with a very distinguished panel, that the connection between research and development and growth cannot be understated, especially research in the physical sciences. And when you look at what this bill does, 3,500 researchers are funded through this bill; $93 million for research with hybrid cars, $49 million for advanced combustion research, $48 million for materials research for fuel efficient cars, $23 million for fuels technology, $708 million for coal energy research.

This is an economic development bill. When we began to fund NASA, that created thousands and thousands and thousands of jobs in science and engineering. This bill will do the same thing. It will give Rose in Illinois and all of those other folks who have had stagnant wages an opportunity to go into a field that is growing with public research and private research. This is a jobs bill, this is an economic development bill for a lot of the regions who have suffered under the global economy.

I appreciate what the chairman has done, I appreciate what the ranking member from the great State of Ohio has done with this bill. This is a jobs bill and this is a national security bill. I urge its passage, and I urge that this amendment go down.

Mr. VISCLOSKY. Mr. Chairman, I move that the Committee do now rise.

The motion was agreed to.

Accordingly, the Committee rose; and the Speaker pro tempore (Mr. GENE GREEN of Texas) having assumed the chair, Mr. DAVIS of Alabama, Chairman of the Committee of the Whole House on the State of the Union, reported that that Committee, having had under consideration the bill (H.R. 2641) making appropriations for energy and water development and related agencies for the fiscal year ending September 30, 2008, and for other purposes, had come to no resolution thereon.

REPORT ON H.R. 2771, LEGISLATIVE BRANCH APPROPRIATIONS ACT, 2008

Ms. WASSERMAN SCHULTZ, from the Committee on Appropriations, submitted a privileged report (Rept. No. 110–198) on the bill (H.R. 2771) making appropriations for the legislative branch for the fiscal year ending September 30, 2008, and for other purposes, which was referred to the Union Calendar and ordered to be printed.

The SPEAKER pro tempore. Pursuant to clause 1, rule XXI, all points of order are reserved on the bill.

ENERGY AND WATER DEVELOPMENT AND RELATED AGENCIES APPROPRIATIONS ACT, 2008

The SPEAKER pro tempore. Pursuant to House Resolution 481 and rule XVIII, the Chair declares the House in the Committee of the Whole House on the state of the Union for the further consideration of the bill, H.R. 2641.

□ 1307

IN THE COMMITTEE OF THE WHOLE

Accordingly, the House resolved itself into the Committee of the Whole House on the state of the Union for the further consideration of the bill (H.R. 2641) making appropriations for energy and water development and related agencies for the fiscal year ending September 30, 2008, and for other purposes, with Mr. DAVIS of Alabama in the chair.

The Clerk read the title of the bill.

The CHAIRMAN. When the Committee of the Whole rose earlier today, pending was amendment No. 24 by the gentleman from Georgia (Mr. WESTMORELAND).

Mr. SESSIONS. Mr. Chairman, I move to strike the last word, and I yield to the gentleman from Georgia.

Mr. WESTMORELAND. I want to thank my friend from Texas for yielding.

I just wanted to make a few comments about my friend Mr. RYAN, who I listened to many nights, Mr. Chairman, while I was up in the chair where you're at. Many nights, I listened to the 30-something Group get up and rail and talk about all the wasteful spending and about how much money we were spending and about how we had gone into debt and about what the debt was. And I hear Mr. RYAN stand up and talk about economic development. I'm going to tell you the best bills this country has ever had for economic development was the Bush tax cuts. Those were the best economic bills we've had for economic development in this country. Look at where the Dow is today at 13,000-plus. I haven't been keeping up with it, I don't really have a lot of money in the market. But we have busted records continually, and it has been because of those economic growth tax cut bills that we have had and the economic policies of this White House.

And as my gentleman friend from Texas (Mr. HENSARLING) said, we don't necessarily agree with the President's recommendation. We feel like that's probably more money than we need to spend. But at least it is a recommendation that we need to go back to from the proposal of what the Democratic leadership has proposed.

And you know, if you talk about striking any money from an agency's budget, I think you get their attention. The ranking member was telling me that when he was the chairman 2 years ago, he asked for the Corps to send 10 of their most important projects that need to be completed. He hasn't heard from them yet. And so we need to send a message to some of these agencies and say look, you are going to give us the information we want, you are going to be accountable, and you are going to be under some authority.

So, I think we need to send that message loud and clear. And although some of these cuts are mighty small, I think they will do a good job in getting some attention. I'm glad to see that the 30-something Group is now, and that the Blue Dogs, or whatever kind of dogs they are, that I listened to also, Mr. Chairman, when I was up there late at night, listened to them for hours at a time talk about wasteful spending, I hope that they will join me in an hour, in Special Orders, when we talk about the largest tax increase in the history of this country and the runaway spending that we now have, even larger spending than it was when we were in charge. I hope they will join me in that hour and we can get up and talk about being good stewards of the taxpayers' dollars.

Mr. SESSIONS. Mr. Chairman, this Republican minority is intensely interested in making sure that we do the right thing for the country, but it should be noted that these bills should not be about economic development, they should be about solving water problems that we have with the dollars that are generated by the taxpayer to solve problems with water, with flooding and with the various elements of ensuring we have clean and better water that is available.

This should not be an economic development spending bill. I disagree with the gentleman from Ohio, and it is my hope that this body will recognize this economic development spending bill for what it is, as opposed to a water resources bill. I am disappointed to hear that it's characterized that way. And that is why we support the gentleman from Georgia with his amendment.

Mr. GENE GREEN of Texas. Mr. Chairman, I move to strike the last word.

I wish to engage Subcommittee Chairman Mr. VISCLOSKY in a colloquy for purposes of underscoring the strategic role of petroleum coke gasification to reduce dependence on the foreign supply of energy, and illustrating the technological feasibility of petroleum coke gasification projects to sequester carbon.

Mr. Chairman, the Energy and Policy Act of 2005, Public Law 109–58, has a specific provision, section 415, 42 U.S.C. 15975, authorizing the Secretary of Energy to provide loan guarantees for at least five petroleum coke gasification projects. Petroleum coke gasification projects are also qualified under title 17, the Innovative Technology Loan Guarantee Program under 1703 (c) 2 and (c) 3 as an industrial gasification project and pet coke gasification project, respectively. This provision of the law recognizes the critical importance of these projects in promoting efficient management of energy sources within the United States.

Domestic gasification of ''petcoke,'' as it is also called in the U.S. refining industry, will reduce foreign exports of this product. Reducing exports of petcoke will result in reduced emissions of hydrocarbons, carbon dioxide and other gases resulting from production, transportation and burning of fossil fuels associated with energy sources currently being used instead of petcoke. Globally, it would also result in lower emissions from petcoke since this product often is not being burned in clean processes when it is exported.

Technology exists today to sequester carbon dioxide byproduct from the petcoke gasification process, pressurize the gas, and inject it underground as a petroleum recovery enhancement technique.

□ 1315

Carbon sequestration can be a viable and compatible technology with petcoke gasification where the geology, ongoing field production, and relative distance to the location of a reliable source of carbon dioxide gas coexist.

Petcoke gasification and carbon sequestration technologies would be in use more widely in key regions in our country if market-entry costs were not so high.

Mr. Chairman, reducing the cost of capital to place petcoke gasification technology into service is the very objective Congress recognized and set out to implement in the Energy Policy Act of 2005. The Department of Energy has not allocated sufficient funds for loan guarantees to demonstrate commercial readiness of the petcoke gasification technology, which will reduce dependence on foreign sources of energy. Adding carbon sequestration will require further allocation of Federal funds to implement this important technology.

Mr. Chairman, I urge your consideration to expand the types of projects that receive funding under title XVII of the Energy and Water appropriations bill to include already authorized petcoke projects that will enhance U.S. energy independence. I also urge your support for appropriating sufficient resources for one to two petcoke gasification projects in the fiscal year 2008 funding bill for the Department of Energy and hope you can take this into consideration when negotiating in conference committee with the Senate.

Mr. VISCLOSKY. Mr. Chairman, if the gentleman will yield, I want to thank Mr. GREEN for bringing to the committees's attention and my attention the need for adequate funding of these invaluable technologies.

Mr. GENE GREEN of Texas. Mr. Chairman, I want to thank my colleague, my good friend from Indiana and Chair of the subcommittee, for bringing up this important piece of legislation.

I rise in strong support of H.R. 2641. I am particularly pleased the committee has provided the Army Corps of Engineers with $5.6 billion, which is $713 million more than the President's request and $246 million more than last year's appropriations. These funds will help strengthen our Nation's flood control programs and navigation infrastructure, which is particularly important to my district.

Along the Houston Ship Channel, we have requested $35 million for operations and maintenance on the deepening and widening project. This continued O&M funding would be used to keep the channel at its authorized depth, which is critical to keeping the channel navigable for the tankers that bring in crude oil to our refineries. We also have submitted a request for the environmental mitigation required as a result of the deepening and widening project and would hope that the committee will give that request its full consideration in conference.

Our area relies heavily on Corps of Engineers' funding, since we're not only an energy-producing area but also a low-lying area in the middle of a flood plain. I am hopeful that a portion of the increased funding for the Army Corps of Engineers can be directed to Greens Bayou, Hunting Bayou and Halls Bayou, which

were flooded during Tropical Storm Allison in 2001. These authorized projects are located in blue-collar residential areas in my district, where the threat of future flooding is all too real. We dodged Hurricane Rita in 2005, but we need to step up our flood control efforts on these projects to give our residents adequate protection when the next storm hits. I appreciate the committee's continued understanding of the pressing flood control needs in our area.

I am also hopeful funding can be provided for other meritorious projects in our district, including the University of Houston's Center for Clean Fuels and Power Generation, the Very High Differential Pressure Sub-sea Multiphase Pumping System, and the Texas Hydrogen Highway.

This bill also makes a significant investment in researching and developing alternative energy sources which will lead us away from our dependence on fossil fuels. The bill provides $1.6 billion for research into solar energy, biomass and bio-refinery systems, technologies to reduce vehicle emissions, and technologies to make buildings more energy efficient. It also provides much needed resources for weatherization assistance grants which will weatherproof the homes of low-income disabled and elderly individuals.

An investment in new sources of energy is critical to meeting our future energy needs, but in the interim we must continue to improve on the conventional sources of energy we use today. That is why I am pleased this bill funds the demonstration of technology that captures carbon exhaust, and researches how to make fossil fuels more efficient and sustainable.

These investments in both conventional and renewable energy research will help meet America's future energy needs and diversify our energy portfolio. The University of Houston's Center for Clean Fuels and Power Generation is contributing to this effort, and I have requested funding for the center's expansion. The center's work to conduct cross-disciplinary research and develop technology to spur the discovery and commercialization of new fuels to provide the Nation's transportation and construction sectors with low-cost, reliable and sustainable power sources. I hope the committee will work with us to include funding for this important project in conference.

I commend the Chairman, and also my good friend from Texas, Congressman CHET EDWARDS, for their hard work on this legislation, and urge my colleagues to support the bill.

Mr. LAMBORN. Mr. Chairman, I move to strike the last word.

Mr. Chairman, I rise in support of the Westmoreland amendment. I would like to point out that the President's budget request came in at $1.1 billion more than what the majority party has requested in the bill that is before us today. Also, the bill before us today is $1.3 billion over last year's bill.

Now, $1 billion, that goes to the $23 billion or so that the combination of the 12 appropriations bills will be over what the President has set forward. And even what the President set forward, I might say, is a little on the high side. But when you look at $23 billion in excess spending, $1.1 billion just in this bill, Mr. Chairman, we have to start somewhere with fiscal restraint and fiscal discipline.

I am a new Member in Congress, and I heard a lot of talk during the campaign, especially by some of my colleagues on the other side of the aisle, that we were going to have a new day of fiscal discipline. Well, I am still waiting for that day to dawn, and I certainly don't see it today.

This bill is higher than what the President has asked, and that means that the President has pledged to veto this bill. If this goes through the House and then through the Senate and comes out in anything like the form that it is in right now, it's going to be vetoed; and then we are going to come back, and we will go through this whole exercise all over again.

So I think the way we should avoid that brain damage and that waste of time and waste of expense is just to bite the bullet right now. Let's stick to the amount that the President has requested. That is still over last year's budget.

So I think we should support the Westmoreland amendment. He has offered several good amendments. This is one of them. We have to start somewhere, or we are going to be back later this year.

So let's have some of the fiscal discipline that I thought we were going to be in store for, and this would be a good place to start. This is as good a place as any. And I urge adoption of this amendment.

Mr. BARROW. Mr. Chairman, I move to strike the last word.

Mr. Chairman, as Congress works to expand domestic energy production alternatives, one area of renewed focus is nuclear power production. For those of us who support nuclear energy, it is essential that there be adequate oversight and independent research to make sure that nuclear technology is safe and sustainable.

For the past 50 years, Mr. Chairman, that independent research has been the primary objective of Savannah River Ecology Lab. In fact, the ecology lab was founded to give the public confidence that the Energy Department's works at Savannah River Site would not sacrifice public safety or the environment.

That work continues today. In fact, the lab is the only lab in the Nation funded by the Department of Energy that conducts independent research into the long-term effects of low-level radiation and nuclear energy production.

Unfortunately, the Department of Energy doesn't seem to want independent oversight, and they have zeroed out the $4 million in funding for the lab. It seems to me that $4 million a year is a small price to pay to make sure that the ongoing work at the SRS, and nuclear energy production in general, is being done in a manner that promotes public safety and protects our land, our air, and our waterways.

Mr. VISCLOSKY. Mr. Chairman, if the gentleman will yield, I thank the gentleman for bringing the work of this lab to the attention of the House and to the committee. I certainly will want to work with the gentleman on his concerns.

Mr. BARROW. Mr. Chairman, I look forward to continuing to work with him and our colleagues in the other body to make sure that the Nation has the adequate oversight and the independent research that is needed to safely promote nuclear technology.

Mr. RYAN of Wisconsin. Mr. Chairman, I move to strike the last word.

Mr. Chairman, I rise in support of the Westmoreland amendment and in opposition of the underlying bill.

Let's just review the numbers for a moment. This Energy and Water appropriation bill not only exceeds the President's request; it also increases spending by twice the rate of inflation. Under the Democrat budget resolution, nonemergency spending will increase by $81.4 billion compared to 2007, growing more than 9 percent, or triple the rate of inflation. That is triple the rate of our constituents', the American taxpayers', ability to pay for these bills. This is on top of the $6 billion that was already spent in the current year omnibus, and the $17 billion in non-war emergency spending that was added to the Iraq war supplemental.

But with this particular bill, here are my concerns: number one, it further opens the spigot on new spending. This is $1.1 billion above the President's request and $1.3 billion above the 2007 enacted levels. Again, far in excess of the rate of inflation.

Number two, it adds a lot of green for uncertain returns. The President requested $1.2 billion for renewable and energy efficiency under the Advanced Energy Initiative and the Reducing U.S. Dependence on Imported Energy Sources. This bill increases spending by 50 percent, yet it is extremely unclear whether this enormous boost in spending will actually do anything to achieve energy independence.

This bill also exploits the Democrats' pre-funding maneuver. This was wrong when Republicans did it. It is wrong when Democrats do it. Both parties have been doing these pre-funding maneuvers. This is basically taking from next year's bill.

I think the fact that they have already pre-funded $1.6 billion for FY 2008 Corps of Engineers spending frees up room under the cap so they can spend more money. So you have about a $1.8 billion smoke-and-mirrors pre-funding mechanism that allows them to spend even more money. That brings the total on top of the $1.3 billion to almost $3 billion over last year's enacted levels.

Now, $3 billion in an almost $3 trillion budget, people ask why should it matter. Why should we talk about these things. Here is why, Mr. Chairman, this matters: it starts one step at a time.

If you want to be fiscally conservative, if you want to be fiscally disciplined and watch the way we spend taxpayer dollars, we have to do it at every stage in the process. We will have to watch how we spend our taxpayer dollars.

The big problem I have with this budget resolution that is guiding this process, the current budget resolution leads to the largest tax increase in American history. Why on Earth would we want to pass the largest tax increase in American history at a time when our economy needs more jobs?

The tax cuts that occurred in 2003 created an unprecedented 7.9 million new jobs. It gave us 3 years of double-digit revenue growth, which helped us cut the deficit by more than 50 percent. And the key to reducing the deficit further is not increasing taxes or increasing spending. It is controlling spending.

That is the different vision between our two parties. We believe we need to balance the budget. The Democrat budget, the Democratic Party budget, does that too. They propose a balanced budget as well. They propose a balanced budget at this level of taxing and spending, whereas we propose a balanced budget at this lower level of taxing and spending, because we fundamentally believe that people ought to be able to keep more of their own money in their own pocket.

We don't measure success of a nation by measuring how much more money we spend in Washington. We measure success of a nation by how free people are in their own lives and how they have an ability to prosper and grow and how jobs and opportunities are being created in America. That is what we believe measures success.

So if we pass budgets that simply call for all this new spending, if we pass budgets which call for 23 reserve funds to spend $190 billion, in addition to what this budget right here does, what we are simply doing is saying we are going to tax people more, and then we are going to tax them more again, and we are going to spend that money.

That takes freedom and liberty away from taxpayers, away from individuals. That starves prosperity in America; it doesn't preserve prosperity in America. And that is why at every stage in this appropriations process, at every stage in this budget process we have to be mindful on how much money we are spending.

We are spending more than twice the rate of inflation in this bill. We are spending three times the rate of inflation on all of these appropriations bills. And that is far too much, Mr. Chairman. That is why I urge passage of the Westmoreland amendment and defeat of the underlying bill.

Ms. FOXX. Mr. Chairman, I move to strike the last word.

Mr. Chairman, I also rise to support the amendment of my colleague from Georgia, Mr. WESTMORELAND. I want to reiterate some of the comments that have already been made.

We simply have to start exercising fiscal discipline in this House. I often talk about how the Republicans missed the mark by overspending in the last few years and I talk about they, not we, because I came here as a fiscal conservative. I am even more of a fiscal conservative than I was when I first came to Congress, and I think most Members of my party have gotten up and admitted that we have spent too much money in the last few years. But most people now have seen the error of our ways, and we know that we have to start cutting, and we need to start right here. We talked about this last week, but we need to continue to talk about it.

We are on track for pretty soon 70 cents out of every dollar of Federal money going in to Social Security, Medicare and Medicaid, in the very, very near future. We do not need to take our country in that direction. We have got to start trimming budgets, and this is the place to start now.

If we do not do that, we are not only going to see a repeat of what the Democrats are bringing to us, the biggest tax increase in American history this year, we are going to continue to see that to the point where we are going to be taxing most of the money that Americans make, and we are going to destroy this country with that kind of an attitude.

Our economy is doing great because of the tax cuts that were instituted in 2001 and 2003, and the only way we can maintain that type of economy is for us to control spending. We don't have a revenue problem in this country. We have a spending problem. We need serious fundamental reform of our spending. We need fiscal discipline.

As my colleagues have said, we are dealing with spending at twice the rate of inflation. American families cannot stand that. They do not want us to continue spending at the level that we are spending. It is on track to be the largest spending increase that we have seen in a long, long time in this country.

We heard over and over again last year on the floor from the party that is now the majority party, then the minority party, that we were spending too much money. Here they are, expanding what was spent last year, and expanding it at a rate that is simply unsustainable. They obviously did not mean what they said last year when they said we were spending too much money.

It is a small cut. Again, I reiterate what my colleagues have said. We have been in Washington too long when we think of $18 million as a small cut. But as Everett Dirksen said many, many years ago, ''A million here and a million there, and pretty soon you are talking about real money.'' That is what we are doing.

Let me put Federal spending into some context for the American people. The United States Federal Government is on track to spend more money next year than Germany's entire economy in the year 2005. Germany is and has been the third largest economy in the world for a long, long time. There are only two countries in the world with entire economies that are larger than the U.S. Government budget, the United States itself and Japan.

So it is important that we start cutting back, and we have to do it a little bit at a time. If there is anybody in this country who believes that throwing more money at a problem from the Federal Government's level solves problems, then they haven't looked at the statistics on our education system, they haven't looked at the statistics on what has happened with control of disasters. We know that simply throwing money at a problem does not solve the problem.

We need accountability, we need efficiency, and we really need to focus on those issues before we spend additional dollars.

I think that we do need more oversight of how Federal Government programs are run. But simply throwing more money at the problem won't create that oversight for us. We have to get down in the trenches, examine programs, see how money is being spent, and say what effect did you get from this money you are currently spending.

□ 1330

In most cases we can probably cut budgets and come out far ahead.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Georgia (Mr. WESTMORELAND).

The question was taken; and the Chairman announced that the noes appeared to have it.

Mr. WESTMORELAND. Mr. Chairman, I demand a recorded vote.

The CHAIRMAN. Pursuant to clause 6 of rule XVIII, further proceedings on the amendment offered by the gentleman from Georgia will be postponed.

Mr. BURGESS. Mr. Chairman, I move to strike the last word.

Mr. Chairman, on Monday morning my constituents in Gainesville, Texas, woke up to a terrible sight. They woke up to discover their homes, businesses and city awash in water. Heavy rain in north Texas over the weekend and early into Monday morning overwhelmed Pecan Creek and other area streams. There have been several confirmed fatalities, 420 flooded homes, untold millions of dollars' worth of damage in the north Texas area.

The first responders, the fire people, the swift water rescue teams, are still in the process of rescue recovery and evaluating the damage and helping people whose homes and businesses have been destroyed.

This photograph was taken yesterday morning. It is reminiscent of photographs that were taken during the 1990s, during the 1980s, during the 1970s, during the 1960s, literally as far back as I can remember. That is why I have requested funds for a section 205 flood control project in Gainesville, Texas, and I have every year for the last 3 years.

Progress has been made. Funds have been allocated to the project in fiscal year 2007, to the Corps' work plan to complete studies in engineering; but realistically, the time for study has long since passed. We need construction dollars.

Funding for Pecan Creek was my number one request in the Energy and Water appropriations bill this year, last year and the year prior. I hope that the chairman and the ranking member will help by providing the funding for the construction projects that are so desperately needed by the citizens of north Texas.

Mr. ENGLISH of Pennsylvania. Mr. Chairman, I move to strike the last word.

Mr. Chairman, I rise to enter into a colloquy with Chairman VISCLOSKY about a critical issue relating to my district, and I appreciate the gentleman's leadership and the minority ranking member's leadership on the issue before us.

If I could direct this to Chairman VISCLOSKY, as you know, being from the Great Lakes region, there is an ever-constant threat of shoreline erosion on the coast of the Great Lakes. My district is home to Pennsylvania's only shoreline on the Great Lakes on Lake Erie. Each year it is of vital importance that sand, displaced by winter storms, be renourished and redistributed on that shoreline.

Without annual nourishment, the shoreline would erode to the point where natural resources and habitats are jeopardized or even lost. Perhaps the most vivid example of this is Presque Isle. Presque Isle is a unique ecosystem and truly a natural gem. Every year as a State park it receives over 3.4 million visitors and it receives more visitors annually than any national park other than Yosemite.

Every year since 1975, the shoreline of this unique feature has received truckloads of replacement sand. This sand has kept the bird sanctuary at Gull Point effectively from eroding away. Birds that have been sighted here or call the sanctuary home include federally endangered species such as the piping plover. Without sand, however, Gull Point and other areas of Presque Isle's shoreline will be washed away, leaving these vulnerable species with even less habitat for recovery.

While there are no specific project allocations in this bill at this time, I encourage the subcommittee to allocate sufficient funds to the Army Corps of Engineers' construction account and make every effort to afford the beach nourishment project at Presque Isle at Erie, Pennsylvania, the resources required to be able to restore the sand lost from winter storms. And also, as part of an ongoing Federal commitment, a Federal-State partnership which has existed since the Reagan administration. I thank the gentleman and welcome his consideration.

I yield to the chairman.

Mr. VISCLOSKY. I want to thank the gentleman from Pennsylvania who serves as my partner on the Congressional Steel Caucus, we have other things in common, including my district abutting the Great Lakes, in my case Lake Michigan, for rising on this issue on the floor today. It is an important one.

The gentleman has my commitment that, especially knowing the challenges facing the Great Lakes region firsthand, that the subcommittee will make every effort to provide adequate resources to the Army Corps of Engineers for construction projects and also help the gentleman provide sufficient resources to the beach nourishment at Presque Isle.

Mr. ENGLISH. I thank the gentleman.

The CHAIRMAN. The Clerk will read.

The Clerk read as follows:

OPERATION AND MAINTENANCE

For expenses necessary for the operation, maintenance, and care of existing river and harbor, flood and storm damage reduction, aquatic ecosystem restoration, and related projects authorized by law, including the construction of facilities, projects, or features (including islands and wetlands) to use materials dredged during Federal navigation maintenance activities; the mitigation of impacts on shorelines resulting from Federal navigation operation and maintenance activities; to address the effects of civil works projects owned or operated by the Corps on federally listed species; to provide security for infrastructure operated by the Corps, or operated on its behalf, including administrative buildings and facilities, and laboratories; to maintain harbor channels provided by a State, municipality, or other public agency that serve essential navigation needs of general commerce where authorized by law; and to conduct surveys and chart northern and northwestern lakes and connecting waters, clear channels, and remove obstructions to commercial navigation, $2,655,241,000, to remain available until expended, of which $53,585,000 shall be for projects and activities in Region 1 New England; of which $179,814,000 shall be for projects and activities in Region 2 Mid Atlantic; of which $367,101,000 shall be for projects and activities in Region 3 South Atlantic Gulf; of which $126,907,000 shall be for projects and activities in Region 4 Great Lakes; of which $342,354,000 shall be for projects and activities in Region 5 Ohio; of which $25,721,000 shall be for projects and activities in Region 6 Tennessee; of which $251,630,000 shall be for projects and activities in Region 7 Upper Mississippi; of which $166,946,000 shall be for projects and activities in Region 8 Lower Mississippi; of which $3,159,000 shall be for projects and activities in Region 9 Souris-Red-Rainy; of which $162,352,000 shall be for projects and activities in Region 10 Missouri; of which $213,500,000 shall be for projects and activities in Region 11 Arkansas-White-Red; of which $185,668,000 shall be for projects and activities in Region 12 Texas-Gulf; of which $30,812,000 shall be for projects and activities in Region 13 Rio Grande; of which $57,000 shall be for projects and activities in Region 14 Upper Colorado; of which $3,967,000 shall be for projects and activities in Region 15 Lower Colorado; of which $819,000 shall be for projects and activities in Region 16 Great Basin; of which $286,031,000 shall be for projects and activities in Region 17 Pacific Northwest; of which $125,998,000 shall be for projects and activities in Region 18 California; of which $26,811,000 shall be for projects and activities in Region 19 Alaska; of which $872,000 shall be for projects and activities in Region 20 Hawaii; of which such sums as are necessary to cover the Federal share of eligible operations and maintenance shall be derived from the Harbor Maintenance Trust Fund; of which such sums as become available in the special account for the Corps established by the Land and Water Conservation Fund Act of 1965 (16 U.S.C. 460l–6a(i)), shall be used for resource protection, research, interpretation, and maintenance activities under this heading related to resource projection in areas operated by the Corps at which outdoor recreation is available; and of which such sums as become available pursuant to section 217 of the Water Resources Development Act of 1996, shall be used to cover the cost of operation and maintenance of the dredged material disposal facilities for which such fees have been collected.

AMENDMENT NO. 25 OFFERED BY MR. WESTMORELAND

Mr. WESTMORELAND. Mr. Chairman, I offer an amendment.

The CHAIRMAN. The Clerk will designate the amendment.

The text of the amendment is as follows:

Amendment No. 25 offered by Mr. WESTMORELAND:

Page 5, line 8, after the dollar amount, insert ''(reduced by $184,241,000)''.

Mr. WESTMORELAND. Mr. Chairman, this amendment simply strikes $184,241,000 from operations and maintenance to the Corps.

The amendment would save $184 million, reducing the account from $2.655 billion to $2.471 billion. The account was funded at $1.97 billion in fiscal year 2007. The bill increases this amount by 34 percent over last year's funding level and the amendment would limit this increase to 25 percent. While I may feel this is still too much money, it at least brings some type of accountance that we would want to increase this 34 percent in 1 year.

Mr. Chairman, I think as already testified today by many Members in talking about the bureaucracy, the red tape, the problems in prioritized spending, the lack of accountability, where

better to make a difference and to make a change and to spend something than in the maintenance and operation of this agency.

We heard from the gentleman from Florida, Mr. KLEIN, talk about the problems that he had with regulations, and I know that Florida has a lot of different water problems and a lot of different Corps' interests down there.

I was pleased to hear Chairman VISCLOSKY in his comments about bringing accountability to the Corps and bringing about accountability on this spending that seems to be run away. I really enjoyed talking to the ranking member about some of these problems that he has been addressing over the past years as chairman of this committee and how accountability needs to be brought to the attention of Members.

I don't know if I have mentioned it before, but this appropriations bill is $1.1 billion over the President's request. I don't know if I have mentioned it before, but there has been at least $105 billion in new Federal spending over the next 5 years that has been authorized by the new majority in this House, the Democratic leadership. And I don't know if I have mentioned it or not, but we have enacted the largest tax increase in American history.

This Democratic budget, and I don't know if I have mentioned this before or not, allows for $23 billion in new spending over that of the President's request.

And I want to just make a couple of other comments. Mr. RYAN had mentioned economic development. I just want to say that 6 years ago the Dow was at 10,690. Today it is at 13,632. That is a pretty nice increase, seeing how it came on the heels of 9/11, and I think and I believe Mr. RYAN quoted the fact that 7.8 million new jobs since this economic development tax cut legislation has gone into effect. That's more than Europe and Japan combined.

The President's policies, economic policies, have been working. And whether we agree with the amount of money that he has spent or not, the economic policies are working and tax cuts do work.

And so I would ask that we would send a message to the American taxpayers that we want to cut $184 million out of this bill that is already bloated, over $1.1 billion. And I think we also want to send a message to some of these departments that we are going to hold you accountable and we are going to make sure that you are responsible for the way you spend money and that you are accountable to this Congress, because we are directly accountable to the people who elect us to this position.

So I ask Members to support this amendment and keep in mind that last year it was $1.9 billion, that this year the President's request was $2.4 billion, and the proposal is for $2.6 billion.

Mr. RYAN of Wisconsin. Mr. Chairman, I move to strike the last word.

I wish to speak in support of the Westmoreland amendment. I think it does a good job of bringing spending to more reasonable levels.

But I would like to speak about the broader issue. Not only does this particular appropriation bill increase spending by $1.1 billion above the President's request, which is in excess of last year by double the rate of inflation, it is part of a broader appropriations effort to spend $23 billion above the President's request and 9 percent increase from this year versus last year, triple the rate of inflation.

Here is the problem with all these bills that spend all this extra money: This puts the taxpayer on a collision course with higher taxes. Because the budget resolution which we are now operating under leads to the largest tax increase in American history, by passing these large appropriations bills, $23 billion above the President's request, it puts us on a course for higher taxes.

Why is this a bad thing, Mr. Chairman? The reason this is such a bad thing is because these tax cuts, the tax relief gave us the economic prosperity we are enjoying today. It gave us the higher economic revenues that give us the ability to lower the deficit.

When we saw this problem in the economy in 2001 and 2003, consider all those problems America was facing, the Enron scandals, the dot-com bubble had burst, 9/11 happened, and we went into a recession.

What did Congress do at that time? Congress moved aggressively and swiftly to cut taxes, to cut tax rates on entrepreneurs, on small businesses, on corporations investing back in their businesses, on families and on taxpayers and working families.

What happened after that? Well, we created 7.9 million new jobs. Think of the fact that the eight quarters before tax cuts occurred, we had eight quarters of negative business investment. After that, we have had unprecedented business investment.

Think of the fact that we have averaged a job loss of 219,000 jobs per month before those tax cuts and now we are averaging almost 165,000 new jobs per month since those tax cuts.

□ 1345

Think of the fact, Mr. Chairman, that when the Enron bubble came and the dot-com bubble burst, people lost a lot of their savings when the market went down. Well, now the market is at an all-time high, and it is because of these tax cuts.

And so when we bring bills to the floor that promise all of this new spending, when we bring bills to the floor that spend $23 billion above the President's request, when we pass a budget that proposes 23 new slush funds to spend 190 billion more dollars in spending on top of those tax increases, this is a recipe for higher taxes.

So, you see, Mr. Chairman, what is coming through here on the floor, bill after bill, appropriation bill after appropriation bill, is more spending, higher spending, which leads to higher taxes. The fact is in just the month of July, this majority is proposing to bring two reserve funds that will alone promise to spend $70 billion, $20 billion in the farm bill and $50 billion on the SCHIP reauthorization. Where are they going to get that money from? Higher taxes.

So it's important that amendments like the Westmoreland amendment pass so that we can bring restraint to our spending levels. It is important that we don't pass these bloated appropriation bills that spend two to three times the rate of inflation, because that's two to three times the rate of our taxpayers', our constituents', ability to pay for these bills. And when we go on this collision course with all this new spending, $110 billion of more spending this year alone in just discretionary spending versus last year, $190 billion in new spending proposals, in mandatory spending on these reserve funds, that puts the taxpayer on a collision course with higher taxes and that brings true this promise of the largest tax increase in American history which was passed by this majority in their budget resolution.

That is why we should not be passing these overinflated appropriation bills, and that is why we should be voting ''aye'' in favor of this Westmoreland amendment.

Mr. HENSARLING. Mr. Chairman, I move to strike the last word.

I would like to associate myself with the comments of the ranking member of the Budget Committee. What is of great concern here and why once again I want to thank the gentleman from Georgia (Mr. WESTMORELAND) for these series of amendments to at a minimum look at various spending levels and try to at least keep to the President's level, which so many of us already consider to be overinflated, particularly when we look at the fact of how much more the Federal budget has grown over the family budget. Since I have been on the face of the planet, the Federal budget has outgrown the family budget by a factor of about five to one. This cannot continue.

And so the gentleman from Georgia offers several amendments, all that would at least put us on the path to avoid the Presidential veto and spend less than what the new Democrat majority, tax-and-spend majority, wants to do.

Again, I think it's very important that we focus on the fact that this is part of a larger plan that we see unveiled in the budget resolution. This is our third appropriations bill that puts us on the course to spend the funds

that will arise from this single largest tax increase in American history.

Mr. Chairman, for all those who are watching the proceedings of the House today, it might be interesting to note for them that the last time the Democrats had the majority, they enacted the single largest tax increase in American history. So they are at least consistent in what they are trying to do. The big debate in Washington is whether you want to tax more and spend more or whether you want to try to constrain the growth of the Federal budget to where the family budget can actually afford it.

I have heard other speakers rise and somehow point the finger at Republicans for fiscal irresponsibility. I must admit on occasion that perhaps is correct, but, Mr. Chairman, since I have been here and since I look in the rearview mirror, every time the Republicans have brought a budget to the floor, the Democrats have brought even a larger budget to the floor. They have decried the prescription drug benefit program of the Republicans for being overly expensive, but their alternative cost even more. And now already in just the first 6 months of this 110th Congress, we have the Democrats wanting to increase nondefense appropriations by $23 billion of taxpayer money, we should never forget that it's the taxpayers' money, above what we spent in 2007. They already added $6 billion to the omnibus spending bill at the first of this Congress. They added $17 billion in nonemergency supplemental spending to the bill that would support our troops in harm's way; but as we notice, as we read the fine print, we discovered it included spinach and peanuts and shrimp and everything else. And now we also understand that the Democrat majority has provided new spending on top of the old spending, $105 billion over 5 years.

What the Republicans are trying to do is keep the tax relief that Americans have already been provided, keep it alive, make it permanent. Democrats say that we're not trying to increase taxes on the American people, although in their budget they have the single largest tax increase in American history, they just say, well, we're just going to let this tax relief expire. Well, Mr. Chairman, if you're a hardworking individual in the Fifth District of Texas and you make the same amount of money this year that you made last year and your tax bill goes up, now, that may be called in Washington, DC. letting tax relief expire, I can assure you that is a tax increase on hardworking people in the Fifth District of Texas and all over America.

That's why when this bill comes to the floor, and I know there are many worthy programs in this bill, but we can never forget the worthy energy bills that are in the family budget and the worthy water bills that are in the family budget, and you cannot fund the Federal budget without taking money from the family budget. That's why again one modest step would be to vote for this amendment from the gentleman from Georgia, and I once again want to commend him for his leadership on fiscal responsibility in this body.

Mr. VISCLOSKY. Mr. Chairman, I move to strike the last word.

Mr. Chairman, I do rise in opposition to the gentleman's amendment and would note that the gentleman from Wisconsin in his earlier remarks used the term ''slush fund.'' I would note that a slush fund connotes a fund raised by a group for corrupt practices as bribery or graft. I'm certain that the gentleman didn't mean to imply that.

Slush fund can also mean money once raised by the sale of garbage from a warship to buy small items of luxury for the crew. I'm sure the gentleman didn't mean that, either.

A slush fund can also mean a fund used by a group of office workers for entertainment, but I don't think the gentleman meant that.

A slush fund could also be a fund raised for undesignated purposes. I would not be so presumptuous as to speak for the gentleman from Wisconsin, but I assume that was the import of his remarks, and in this case that would also be an incorrect assertion.

The subcommittee worked very hard for the first 6 months of this year to assess what the investment needs are for the United States of America, its citizens and its economic future. As I have mentioned earlier, and we had graphics to support the assertion, we have an aging infrastructure in the United States of America. Anyone who is on the roads, anyone who travels by air, anyone who travels by rail, anyone who travels on water understands that. And today we are particularly concerned about the aging water infrastructure.

I for one, and I believe all of the members of the subcommittee, am very concerned that much of the infrastructure in place as far as operation and maintenance is past its designed life. That pertains to almost half of the locks and dams in this country. We have not dredged many of our harbors, whether they be for recreation, which is an economic purpose as well, or for commerce to their authorized depths, let alone to the depths needed to ensure that they can operate effectively and cost efficiently, and this work must be done.

What we have created here is an investment fund for operation and maintenance, and I for one am proud that we have increased in that account more moneys to invest in the economic prosperity of our country, whether it pertain to navigation channels, locks and dams, or other water infrastructure.

I would ask my colleagues to oppose the amendment.

Mr. HOBSON. Mr. Chairman, I move to strike the last word.

I rise in opposition to the amendment to reduce funding for the Corps of Engineers operation and maintenance account. I confess that I don't understand this amendment beyond its superficial attempt to reduce bottom-line spending. This country has already expended billions of dollars in our water resources infrastructure. Much of that infrastructure is quite old and needs major rehab. I would invite any of the Members around that want to go and look, go look at the dams and the locks and the rivers that we have and look at the aging infrastructure that is there.

As any responsible homeowner knows, much of critical maintenance is penny-wise and pound-foolish if you put it off. The same maxim applies to our Nation's water resources infrastructure, though with a much larger role at stake.

And if we get it wrong, much more than just dollars are at stake. A large part of the failures that caused such a devastating loss of life and property in New Orleans came from inadequately maintained flood control projects. We cannot afford to make this mistake again.

Even the President said we have got to increase O&M. The President dramatically increased O&M. What I hear from everybody here is, well, they're always right down there. Well, they're not always right down there. They have never put the right amounts in this bill to begin with when it comes to energy and water, especially the water side.

So I oppose this amendment. Cutting funding for operation and maintenance for the Corps of Engineers is foolish and irresponsible at this time.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Georgia (Mr. WESTMORELAND).

The question was taken; and the Chairman announced that the noes appeared to have it.

Mr. WESTMORELAND. Mr. Chairman, I demand a recorded vote.

The CHAIRMAN. Pursuant to clause 6 of rule XVIII, further proceedings on the amendment offered by the gentleman from Georgia will be postponed.

The Clerk will read.

The Clerk read as follows:

REGULATORY PROGRAM

For expenses necessary for the administration of laws pertaining to the regulation of navigable waters and wetlands, $180,000,000, to remain available until expended.

FORMERLY UTILIZED SITES REMEDIAL ACTION PROGRAM

For expenses necessary to clean up contamination from sites resulting from work performed as part of the Nation's early atomic energy program, $130,000,000, to remain available until expended.

FLOOD CONTROL AND COASTAL EMERGENCIES

For expenses necessary to prepare for flood, hurricane, and other natural disasters and support emergency operations, repairs, and other activities in response to such natural disasters, as authorized by law, $40,000,000, to remain available until expended.

EXPENSES

For expenses necessary for general administration and related functions of the civil works program in the headquarters of the Corps, the offices of the Division Engineers, the Humphreys Engineer Center Support Activity, the Institute for Water Resources, the Engineering Research and Development Center, and the Finance Center, $171,000,000, to remain available until expended: *Provided*, That no part of any other appropriation provided in this title shall be available to fund the civil works activities of the Office of the Chief of Engineers or the civil works executive direction and management activities of the offices of the Division Engineers.

OFFICE OF ASSISTANT SECRETARY OF THE ARMY (CIVIL WORKS)

For expenses necessary for the Office of Assistant Secretary of the Army (Civil Works), as authorized by 10 U.S.C. 3016(b)(3), $6,000,000.

ADMINISTRATIVE PROVISION

Appropriations in this title shall be available for official reception and representation expenses (not to exceed $5,000); and during the current fiscal year the Revolving Fund, Corps of Engineers, shall be available for purchase (not to exceed 100 for replacement only) and hire of passenger motor vehicles.

GENERAL PROVISIONS, CORPS OF ENGINEERS—CIVIL

SEC. 101. (a) Except as provided under subsection (b), none of the funds provided under this title shall be available for obligation or expenditure through a reprogramming of funds that—

(1) creates or initiates a new program, project, or activity;

(2) eliminates a program, project, or activity;

(3) increases funds for any program, project, or activity for which funds have been denied or restricted by this Act;

(4) reduces funds that are directed to be used for a specific program, project, or activity by this Act; or

(5) increases or reduces funds for any program, project, or activity by more than $2,000,000 or 25 percent, whichever is less;

(b) Subsection (a)(1) shall not apply to any project or activity authorized under section 205 of the Flood Control Act of 1948; section 14 of the Flood Control Act of 1946; section 208 of the Flood Control Act of 1954; section 107 of the River and Harbor Act of 1960; section 103 of the River and Harbor Act of 1962; section 111 of the River and Harbor Act of 1968; section 1135 of the Water Resources Development Act of 1986; section 206 of the Water Resources Development Act of 1996; sections 204 and 207 of the Water Resources Development Act of 1992; or section 933 of the Water Resources Development Act of 1986.

SEC. 102. None of the funds made available in this title may be used to award any continuing contract or make modifications to any existing continuing contract that commits an amount for a project in excess of the amounts appropriated for that project that remain unobligated, except that such amounts may include any funds that have been made available through reprogramming to that project pursuant to section 101 of this Act.

SEC. 103. (a) None of the funds provided in this Act shall be available for operation and maritime maintenance of the hopper dredge McFarland.

(b) Subsection (a) shall not apply to funds required for the decommissioning of the vessel.

SEC. 104. The Secretary of the Army, acting through the Chief of Engineers, is directed to reduce by 35 percent the full-time employees at the Sacramento District Regulatory Division office of the Corps of Engineers.

SEC. 105. None of the funds appropriated in this Act or any other Act may be used to conduct a public-private competition or direct conversion under the OMB Circular A–76 or any other administrative regulation, directive, or policy for any Corps of Engineers program, project or activity.

AMENDMENT NO. 23 OFFERED BY MR. SESSIONS

Mr. SESSIONS. Mr. Chairman, I offer an amendment.

The CHAIRMAN. The Clerk will designate the amendment.

The text of the amendment is as follows:

Amendment No. 23 offered by Mr. SESSIONS:

Strike section 105.

Mr. SESSIONS. Mr. Chairman, my amendment would strike section 105 of this legislation which as drafted would prevent the funds spent by this bill from being used to conduct public-private competitions or to direct A–76 conversions for any Army Corps of Engineers program, project, or activity.

This underlying language would present an enormous setback for competition in government sourcing, costing the Federal Government millions of dollars a year by preventing private sector contracting in the Army Corps of Engineers for everything from janitorial and food services to the engineering and design of locks and dams which private sector contractors have done competitively for years at the Federal, State, and local levels.

□ 1400

While this policy may be good for increasing dues payments to public sector union bosses, it is unquestionably bad for taxpayers and for Federal agencies because these agencies will have less money to spend on their core missions if the opportunity to use competition and private sector efficiencies is taken away from them.

In 2006, Federal agencies competed only 1.7 percent of their commercial workforce, which makes up less than one-half of 1 percent of the entire civilian workforce. This very small use of competition for services is expected to generate savings of $1.3 billion over the next 5–10 years.

Competitions completed since 2003 are expected to produce almost $7 billion in savings for taxpayers over the next 5–10 years. This means that taxpayers will receive a return of about $31 for every dollar spent on competition, with an annualized expected savings of more than $1 billion.

At the Corps, in 2006 three public/private competitions were competed, involving IT support, financial services, and public works.

The largest of these, dealing with IT support services, has a projected savings of $960 million over a 6-year period. By introducing competition and leveraging the government's size to reduce equipment maintenance and replacement, the government will now be able to save almost $1 billion, but without my amendment, similar future efforts will be impossible.

Mr. Chairman, in this time of stretched budgets and bloated Federal spending, Congress should be looking to use all of the tools it can to find taxpayer savings and to reduce the cost of services that very easily can be found in the Yellow Pages.

I insert into the RECORD at this point a letter of support for this amendment from the American Society of Civil Engineers and a letter of support for the amendment from the Council on Federal Procurement of Architectural and Engineering Services.

AMERICAN SOCIETY OF CIVIL ENGINEERS,
Washington, DC, June 19, 2007.

Hon. PETE SESSIONS,
Longworth House Office Building, Washington, DC.

DEAR CONGRESSMAN SESSIONS: The American Society of Civil Engineers (ASCE) is writing to support your amendment to H.R. 2641 that would strike language prohibiting the U.S. Army Corps of engineers from conducting any public-private competition or direct conversion under OMB Circular A–76.

ASCE believes that section 105 of the bill as reported effectively would stop the USACE from employing engineers in the private sector. Such a provision is contrary to sound public policy. We think federal, state, and local government agencies responsible for major civil engineering works must maintain professional engineering expertise within their organizations by employing civil engineers and providing for their professional development. Nevertheless, public sector engineering projects that can be accomplished more efficiently by private engineering firms should be contracted out with proper oversight by the public agency. The ratio of in-house engineering to contracted engineering services should be based upon an assessment of the agency's continuing project and policy requirements rather than on rigid rules or percentages fixed by legislation or regulation. We urge all Members to vote ''yes'' on the Sessions amendment to strike section 105 from H.R. 2641.

If ASCE can be of further assistance, please do not hesitate to contact me or Michael Charles.

Sincerely yours,

BRIAN PALLASCH,
Director of Government Relations.

RESTON, VA,
June 19, 2007.

Hon. PETE SESSIONS,
House of Representatives, Washington, DC.

DEAR REPRESENTATIVE SESSIONS: The Council on Federal Procurement of Architectural and Engineering Services (COFPAES) is a coalition of the nation's design professionals. Our combined membership of over

1,000,000 individual practitioners from the private sector and public service are part of our member organizations—American Congress on Surveying and Mapping, American Institute of Architects, American Society of Civil Engineers, Management Association for Private Photogrammetric Surveyors (MAPPS), and National Society of Professional Engineers.

COFPAES strongly supports your amendment to H.R. 2641 the Energy and Water Appropriations Act for fiscal year 2008. We oppose the language currently in the bill that would effectively prohibit the U.S. Army Corps of Engineers from contracting with the private sector.

COFPAES has long advocated a balance between the in-house capabilities of the Corps of Engineers and contracting with firms in the private sector. We believe the language in H.R. 2641 would prohibit achieving such a balance. We believe there is the need for a core, in-house capability in the Corps, and utilization of the professional expertise in the private AlE community.

Current law, 33 U.S.C. 622 and 33 U.S.C. 624, already protect both the taxpayer and Corps employees. Further restrictions on use of the private sector are not necessary, and indeed, would inhibit the ability of the Corps to utilize private sector capabilities that the Corps needs.

We urge the House to approve your amendment and we thank you for your leadership on this important issue.

Sincerely,

JOHN M. PALATIELLO,
COFPAES Administrator.

Mr. Chairman, I urge all of my colleagues to support this commonsense taxpayer-first amendment and to oppose the underlying provisions to benefit public sector union bosses by keeping cost-saving competition in the Army Corps of Engineers.

The CHAIRMAN. Does any Member seek time in opposition to the amendment of the gentleman from Texas?

Does a Member seek time regarding the amendment of the gentleman from Texas?

Mr. HENSARLING. Mr. Chairman, I move to strike the last word.

First I'm heartened that nobody has risen to oppose the amendment. I've heard many of our colleagues on the other side of the aisle in a different context criticize the administration for not always having what they considered to be a sufficient competitive bidding process on contracts, and so I'm a little curious how this language ended up in the bill in the first place. But why wouldn't we want more competition?

Again, after our colleagues on the other side of the aisle helped put in place the single largest tax increase in American history, and then start to spend that money in our third appropriations bill that will again grow government way beyond the rate of inflation, we had better look for savings everyplace we can find it.

How can you criticize the administration for no-bid contracts, and then here's an opportunity here for competitive bidding, to somehow turn it down? So I don't know why this language is in the bill in the first place, but I want to congratulate and commend the gentleman from Texas for his amendment.

It has, I think, the potential to save the poor, beleaguered taxpayer millions, if not billions, of dollars. Is there anything not more ingrained in the American character than competition? We ought to try to make these contracts as competitive as possible.

Again, we have to put this whole piece of legislation in context. It's the third appropriations bill arising from a budget resolution that calls for the single largest tax increase in American history, approximately $3,000 of increased taxes for hardworking American families as they try to meet their education needs, as they try to meet their health care needs, as they try to meet their housing needs.

So I know there's a number of good programs that are contained within this legislation. In many respects, we're not having a debate today about how much money we're going to spend. We are debating who's going to do the spending, and there are many of us on the floor today who want to make sure that American families get to do more of that spending.

We continue to kick this can down the road. It's simply unfair to place such a tax burden on the American people. The average American family already pays $22,000 a year combined in Federal taxes, and now as the Democrat majority is promising to impose an additional $3,000 a year in taxes, and then, even worse, because their budget resolution from which this appropriation bill follows is silent on the issue of what to do with out-of-control entitlement spending, which is putting our sons and daughters, our grandchildren, on automatic pilot to have their taxes doubled so they will never be able to afford their own homes, send their kids to college, start their own business. As the Comptroller General said, and I paraphrase, we are on the verge of being the first generation in American history to leave the next generation with a lower standard of living.

Now, I wish there was a lot more that we could do today within this piece of legislation, but at least by adopting the amendment of the gentleman from Texas, we will take a few small steps in doing what every other American considers to be common sense, and that is to ensure a maximum of competitive bidding, we would take at least a few small steps towards trying to save the American people from this increased tax burden that, again, subtracts from their dreams of their first home, their dreams of launching a small business.

This is all part, again, of a budget that imposes the single largest tax increase on the American people in history. After trying to spend an additional $23 billion over the level spent last year, $6 billion that was added to the omnibus, $17 billion added to the war supplemental in nonemergency spending, the Democrat majority now is going to allow unlimited emergency spending, giving Members practically the ability to rubber-stamp anything with ''emergency.'' And not only does their budget not do anything to reform entitlement spending, it creates reserve funds that promises more entitlement spending, Mr. Chairman, to make the problem even worse.

So we should all adopt the amendment of the gentleman from Texas. I applaud his leadership. It's a small step, a commonsense step to try to save the family budget from the Federal budget.

Mr. VISCLOSKY. Mr. Chairman, I move to strike the last word.

I rise in opposition to the gentleman's amendment because I believe the actions we have taken in the subcommittee will save the American taxpayers' money.

I would first note that all A–76 studies performed by the Corps of Engineers have been won by Corps employees. So the first question is: Why do it?

The Corps is working under also an arbitrary numerical quota to review certain numbers of jobs in certain time periods without research and analysis. It would suggest that this is an arbitrary requirement put into place by the Office of Management and Budget, and there is a doubt, at least in this Member's mind, that it has been subjected to analysis at OMB.

I also believe that historically there has been opposition in this body to privatization. That has been bipartisan. I would point out that from a monetary standpoint, that the cost of these studies often exceeds the benefits; and of those functions that are easily contracted out, the remainder are difficult to separate into contractible and governmental function groups.

The fact is that the committee recommendation allows the Corps to continue with high-performing organization studies which follow the same study process, with similar results, without incurring the additional time and costs associated with contracting competitions.

So what we would want to do is to use those high-performing organization studies, apply less cost to the taxpayers and to move this process along. I am opposed to the gentleman's amendment.

Mr. PRICE of Georgia. Mr. Chairman, I move to strike the last word.

I was compelled to come and talk just a little bit about this amendment, which I commend my friend from Texas for offering, because I've been surprised at the rapidity with which the new majority has regained their old stripes that they lost 12-plus years ago.

We were sitting in committee the other day and marking or finishing the prospects of a bill that we're passing out of the Education Committee, and it

turns out that there was more estimated revenue that came into the Federal Government and was eligible for appropriation by the committee. And so the majority party, within very short order, stated that they had found hundreds of millions of new dollars and they were offering an amendment to recognize that, in fact, they had found hundreds of millions of new dollars; and then, within seconds, appropriated or authorized the spending of the hundreds of millions of new dollars.

So I was somewhat bemused by that and made the comment at the time that I was pleased that they had found the hundreds of millions of new dollars; I was somewhat surprised that they had spent it so rapidly.

And so I would draw your attention, Mr. Chairman, to the fact that an issue, a process by which the Federal Government has been utilizing to save hundreds of millions of dollars and, yes, billions of dollars, as stated by the gentleman from Texas, that of providing for competitive bidding, is an appropriate process. It's an appropriate process for our Federal Government to use. It's a responsible process so that we may spend hard-earned taxpayer dollars wisely. And so I'm distressed that this bill would include a section that would preclude competitive bidding.

As everyone knows and understands kind of inherently, there are many, many things that the private sector can do much more reasonably and responsibly and efficiently and without significant expenditure of resources than can the public sector. And so it just makes no sense to me, and certainly no sense to my constituents back in the Sixth District of Georgia, that we would adopt a new measure that would provide that we ought not have competitive bidding.

But I think it points out a significant distinction, a difference between the two parties. The minority party believes that it's appropriate to have competitive bidding, that it's appropriate to utilize the full robust nature of the private sector whenever possible, in some instances it's not possible, but whenever possible in order to save hard-earned taxpayer money.

The majority party apparently believes, given that this is included in the bill, that that's not an appropriate concern of the Federal Government, that we ought not be looking for all efficiencies possible, and I think that's an appropriate distinction to draw.

I think it's a conclusion that, obviously, Mr. Chairman, the American people will draw given this provision in the bill. It's a distinction that I would suggest the American people weren't aware of when they went to the polls last November. It's a distinction I do believe, however, they will be paying attention to as future elections arise.

But I just want to commend my friend from Texas for this remarkably commonsense amendment, for appropriately reviewing the legislation and identifying those areas where, in fact, savings could occur; and part of our responsibility certainly is providing money for the necessary activities of the Federal Government, but it's also part of our responsibility to be as prudent as we can with hard-earned taxpayer money.

I also want to commend my other friend from Texas, who was here just before me, talking about the importance of providing the distinction in the majority party already passing a budget that has the largest tax increase in the history of our Nation.

□ 1415

That, again, is evidence of their return to the previous stripes that they had 12-plus years ago.

I am pleased to join my colleague from Texas in this commonsense, wise, fiscally prudent, and fiscally responsible amendment.

I urge my colleagues to adopt the amendment.

Mr. GARRETT of New Jersey. Mr. Chairman, I move to strike the last word.

Mr. Chairman, I come to the floor to speak in favor of this very important amendment.

Serving on the Budget Committee, as I have the honor and privilege of doing, I see the relevance of addressing such an amendment as this, that goes to the very heart of the principles that Republicans bring to the handling of the budget.

As the previous gentleman just ended his remarks, I will begin mine. What we have seen in the last several weeks with regard to the legislation that is coming down, what I have seen as a member of the Budget Committee, gives us, this House, the largest tax increase in U.S. history, a breaking of the promises under rules that have been made during the past campaign, the establishment, which we were able to defeat this past week, of the creation of slush funds to hide some of those dollars going forward.

Why is all of that relevant to the amendment that is here before us? From a very practical purpose, when a family or a small business sets about to handle its daily budget, how do they do so? They do so from a logical perspective in deciding what is in the best interest of that family as far as the purchases they make, or when a business sets out to create its budget for the year ahead and the purchases that it will be required to make.

How does it do so? It does so on a logical, regional basis. It looks out at all the purviews and the parameters of the opportunities before them, and then decides what is best for their family or for their business.

You can say a family does a competitive bidding process, although the average family probably doesn't think of it that way. When they do their shopping from grocery store to grocery store, or from Wal-Mart to Target or to Kmart or wherever else, they are, in fact, engaging in a competitive business process, business nature, if you will.

When a business does it, a small business, which is the backbone of the American economy, they engage in a competitive business bidding process as well. They know what they need in order for their business to survive in this year and this quarter and the years ahead. They know what the parameters are and the order that they must meet. They will go out and about and engage in a competition, if you will, between the options that are out there before them and decide which one works best for them, which is at the best price, which is the most economical and which is the most efficient.

If the family budget can make these decisions, if the small businesses of this country can make those decisions, then I think it's incumbent upon us here in this House, this House of the people, to make, likewise, those decisions in the same manner as well. As the gentleman from Texas often says, the focus should be on the family budget and not on the Federal budget.

Likewise, when it comes to the way we handle the taxpayers' dollars, the focus should be on the same way the family and the small business handle their budget and their procurement, instead of the role and the methods we have done in the past.

That's why I come to the floor this afternoon in support of the other gentleman from Texas (Mr. SESSIONS), his amendment today. Because that's simply what this amendment will do, will strike section 105 from the bill and that is the section which prohibits funds from being used under OMB's circular 876, which is basically the outsourcing proposed process: ''to process or approve a competition with regard to the Army Corps of Engineers.''

By striking this provision, OMB would be allowed to use a competitive process in conducting private-public competition to determine who, the government agency or a private business, performs certain activities. Just think for a moment, if we were to engage in such activities, how much further the hard-earned tax dollar of the American public could go in this House, in this American economy that we have. Just think how many more of these necessary programs that we are called upon to support could be engaged in and provided.

Now, I come from the great State of New Jersey, a State that oftentimes has to look to the core and to the Federal Government for various programs to provide for the health and safety of the citizens of not only my district but my State as well.

Think for a moment how much further we would be able to go in providing these services to the State in my district and my county, and through the State of New Jersey as well. Think of how much further we could go if we could be able to provide these services in a more economical and efficient basis.

The amendment before us does that. It will allow for the operation of the Federal Government to engage itself the same way as a small business does, the same way as a family budget does.

Closing then, bringing this all back to my opening comments with regard to what we have seen at the beginning of the process with the Democrat budget and what we have seen in the past several weeks with regard to the largest tax increase for the American family in U.S. history, what this amendment will do is drive down the pressure on this government to raise taxes on the backs of American families.

Mr. CAMPBELL of California. Mr. Chairman, I move to strike the last word.

Mr. Chairman, I was not going to speak on this amendment. I was somewhat encouraged by the silence on the other side of the aisle when it originally came out.

But then when the majority party indicated that they are going to oppose this amendment, I have to stand up and say just, at least, one thing. We are going to have some amendment debates later today about how much money to spend on various programs and how much to spend on various things and how much to spend overall on this bill, whether we should be spending more of the taxpayers' money on things or less of the taxpayers' money on things.

We are going to have that debate today and tomorrow and the next day, and there are certainly disagreements between the majority side and the minority side on those issues as to whether we should tax people more and spend their money or tax people less and let them spend their own money.

But, interestingly, this amendment isn't about that. This amendment doesn't change the funding in the bill. It simply says we ought to have a mechanism to make the money that's there go farther.

I really don't understand why my Democratic colleagues would have some ideological objection to that. If we are going to spend a certain amount of money on a program, regardless of what that program does, couldn't we all agree that we would like it to do as much as it can with that amount of money?

Certainly, if we allow private contractors, or contractors, the opportunity to say, hey, we can do this thing for less money, and we can do the same thing, and the agency determines that it's the same thing for less money, wouldn't we want them to do that?

This, actually, is not about spending less money. We will get to that later. But this is about having the money we spend go farther.

I mean, it's just like for people, Mr. Chairman, that are watching at home, imagining that, well, I am going to go out and, you know, get dry cleaning today, but I don't care how much it costs, and I don't care if the place next door does it cheaper, and they are every bit as good or better. I don't care, I am going to use the more expensive place because we are not going to make competition.

Mr. VISCLOSKY. Would the gentleman yield? I have an inquiry of the Chair.

The Acting CHAIRMAN (Mr. POMEROY). Does the gentleman from California yield to the gentleman?

Mr. CAMPBELL of California. I will yield.

The Acting CHAIRMAN. The gentleman from Indiana is recognized.

Mr. VISCLOSKY. Is it correct to reference people watching House proceedings on television, or are we not supposed to do that?

Mr. CAMPBELL of California. Mr. Chairman, I believe that I clearly said, ''Mr. Chairman, people who see this may wonder.''

The Acting CHAIRMAN. The gentleman will address his remarks to the Chair.

Mr. CAMPBELL of California. I did, I believe. Thank you.

Mr. Chairman, whether it's you, or anyone in this room or whoever, we have money that we spend on things, and we like to shop to see if we are getting the best price, getting the same product or as good a product or a better product for the best price. That's what this amendment says, is that we're going to allow people to shop or get the better product for the best price.

Mr. Chairman, it is beyond me why the majority party would object to something so sensible, so reasonable in being a steward of the taxpayers' dollars.

The Acting CHAIRMAN. The question is on the amendment offered by the gentleman from Texas (Mr. SESSIONS).

The question was taken; and the Acting Chairman announced that the noes appeared to have it.

Mr. SESSIONS. Mr. Chairman, I demand a recorded vote.

The Acting CHAIRMAN. Pursuant to clause 6 of rule XVIII, further proceedings on the amendment offered by the gentleman from Texas will be postponed.

The Committee will rise informally.

The Speaker pro tempore (Mr. SERRANO) assumed the chair.

MESSAGE FROM THE PRESIDENT

A message in writing from the President of the United States was communicated to the House by Ms. Wanda Evans, one of his secretaries.

The SPEAKER pro tempore. The Committee will resume its sitting.

ENERGY AND WATER DEVELOPMENT AND RELATED AGENCIES APPROPRIATIONS ACT, 2008

The Committee resumed its sitting.

The Acting CHAIRMAN. The Clerk will read.

The Clerk read as follows:

TITLE II—DEPARTMENT OF THE INTERIOR

CENTRAL UTAH PROJECT

CENTRAL UTAH PROJECT COMPLETION ACCOUNT

For carrying out activities authorized by the Central Utah Project Completion Act (titles II through VI of Public Law 102–575), $41,380,000, to remain available until expended, of which $976,000 shall be deposited into the Utah Reclamation Mitigation and Conservation Account for use by the Utah Reclamation Mitigation and Conservation Commission.

In addition, for necessary expenses incurred in carrying out related responsibilities of the Secretary of the Interior, $1,620,000, to remain available until expended.

BUREAU OF RECLAMATION

The following appropriations shall be expended to execute authorized functions of the Bureau of Reclamation:

WATER AND RELATED RESOURCES

(INCLUDING TRANSFERS OF FUNDS)

For management, development, and restoration of water and related natural resources and for related activities, including the operation, maintenance, and rehabilitation of reclamation and other facilities, participation in fulfilling related Federal responsibilities to Native Americans, and related grants to, and cooperative and other agreements with, State and local governments, federally recognized Indian tribes, and others, $871,197,000, to remain available until expended, of which $57,615,000 shall be available for transfer to the Upper Colorado River Basin Fund and $26,825,000 shall be available for transfer to the Lower Colorado River Basin Development Fund; of which such amounts as may be necessary may be advanced to the Colorado River Dam Fund; of which not more than $500,000 is for high priority projects which shall be carried out by the Youth Conservation Corps, as authorized by section 106 of Public Law 91–378 (16 U.S.C. 1706): *Provided*, That such transfers may be increased or decreased within the overall appropriation under this heading: *Provided further*, That of the total appropriated, the amount for program activities that can be financed by the Reclamation Fund or the Bureau of Reclamation special fee account established by section 4(i) of the Land and Water Conservation Fund Act of 1965 (16 U.S.C. 4601–6a(i)) shall be derived from that Fund or account: *Provided further*, That funds contributed under the Act of March 4, 1921 (43 U.S.C. 395) are available until expended for the purposes for which contributed: *Provided further*, That funds advanced under the Act of January 12, 1927 (43 U.S.C. 397a) shall be credited to this account and are available until expended for the same purposes as the sums appropriated under this heading.

AMENDMENT NO. 22 OFFERED BY MR. HENSARLING

Mr. HENSARLING. Mr. Chairman, I offer an amendment.

The Acting CHAIRMAN. The Clerk will designate the amendment.

The text of the amendment is as follows:

Amendment No. 22 offered by Mr. HENSARLING:

Page 11, line 21, after the dollar amount, insert ''(reduced by $55,000,000)''.

Mr. HENSARLING. Mr. Chairman, again, this amendment, as some previous amendments have, attempts to make a very, very modest step towards saving the family budget from the single largest tax increase in American history.

Specifically, over the requested level or the level in the bill, this would reduce funding for Interior's Water and Related Resources account to the President's request from roughly $871 million to $816 million, representing a $55 million savings to the American taxpayer. This account has been a traditionally earmarked account for certain water restoration activities in 17 Western States.

The bill's current funding level represents a 6.7 percent increase over the President's request. Again, I am sure this account funds many worthy projects.

But we need, I believe, a number of us believe we need a road map to try to bring fiscal sanity to the House in an appropriations bill that is already increasing spending twice the rate of inflation. So now we are having a debate over $816 million, as proposed by the administration, which I am sure many in this body might think is an overly large number when we recognize that money is coming from hardworking American taxpayers, but a difference of $816 million versus $871 million.

Again, as the majority in their budget resolution enacts the single largest tax increase in American history, they are asking American families to somehow do more with less. Don't we believe that the Federal Government ought to try to do more with less, and, in this case, we still have an increase, 6.7 percent increase over the President's request.

As I have taken to the floor on other occasions during this debate, we should never, ever forget that although something good can be done with the taxpayers' dollars in this account, I have no doubt, we have to remember the hardworking American families back home and how the single largest tax increase in history, which is funding this third appropriation bill, still twice the rate of inflation, we have to remember, we have to remember how this bill impacts them.

I sent out a letter to my constituents asking them how this tax increase of the Democrat majority would impact them.

□ 1430

I heard from Bruce in Garland. Garland's a city in my district. He said, ''In my particular case, an additional $2,200 in taxes would cut into the finances I used to pay for my son's college education. A control and reduction of spending is what is needed.''

Again, Mr. Chairman, what we realize is as we plus-up some Federal account, we are downsizing some family account. In this case, we're affecting a family's education account.

I heard from Joy in the city of Dallas. I represent the eastern part of the city of Dallas. She writes, ''I could not pay for a semester of college for my daughter if I had to send more money to the government.''

So as this account's getting plussed up by twice the rate of inflation, here are two individual families, just two out of millions across America, who are having their education accounts gutted by the plus-up in this particular bill.

I heard from Linda, also from the city of Garland. ''If we had to pay an additional $2,200 each year, it would make us have to decide between food or medicine.''

I've got a whole host of these letters, Mr. Chairman, to remind every Member in this body that as we talk about all the noble purposes we have for the American taxpayers' money, they too have noble purposes. They have health care programs in their family, they have education programs in their family, they have energy bills and programs in their family, paying their heating bills, their cooling bills, filling up their automobile. So certainly we could take one modest step in saving the taxpayer $55 million and plus-up the water and related resources account, a traditionally earmarked account. And we had a very vigorous debate over earmarks here recently, their transparency, their accountability.

But surely we could agree to hold to the President's level and try to save the family budget from the onslaught of the Federal budget.

Mr. VISCLOSKY. Mr. Chairman, I move to strike the last word.

I rise in opposition to the gentleman's amendment. Mr. Chairman, the water and related resources account funds Reclamation's core missions of delivering water to citizens of this country, to those who till the soil in our country, and for generating hydropower.

Given the growing need for water supplies in the 17 Western States of this country, I certainly believe it is critical that the Nation invest now in water reclamation and reuse projects for the future.

This account also provides very important funds for rural water supply projects for tribal and rural communities, contributing to meeting the United States' trust responsibilities to Indian reservations through the delivery of safe drinking water.

I share the gentleman's concern about health programs in the United States, and I can't think of anything more important than ensuring that people in 17 different States of this country have clean water to drink. And how shortsighted it would be to cut programs that provide clean drinking water for human health, so that we can spend untold sums of money on their health care after they get sick. If you want to talk about something that is penny-wise and pound-foolish, we have found it this afternoon.

This is a health amendment. If we take these moneys away, we will do a disservice to the health of the people who live in these regions. As with the Corps of Engineers, Reclamation's infrastructure is aging, and it has increasing requirements for proper and adequate maintenance of its infrastructure.

But 17 States cover a large area and swath of the continent. But I'm just wondering which citizens in which communities are we going to tell we just can't help you this year because we might have accepted the gentleman's amendment. Are we going to tell people in Wichita, Kansas, the Wichita Cheney program that maybe they're not going to get all of their money?

Are we going to tell people at Lakehead, Nevada that well, we had to make a cut of $55 million, and you're just not going to have the resources you need?

Or people in Oregon for the Crooked River project, are we going to tell them well, there's just not enough money now?

Are we going to, in the State of Colorado, tell people in Pine River that we had to make a cut?

In Texas, are we going to tell people for the Canadian River project that there just wasn't enough money to go around, or at Moon Lake in the State of Utah that we're sorry, Congress dropped the ball? Or for the Colombia River Basin project, that somehow there was a shortfall in us meeting our responsibilities?

The gentleman's correct. This is a health amendment. This is clean drinking water for people who live in 17 States in the United States of America provided through infrastructure that is aging. We have a responsibility to invest in that, and that is why I'm strongly opposed to the gentleman's amendment.

Mr. GARRETT of New Jersey. Mr. Chairman, I move to strike the last word.

Mr. Chairman, I rise in support of the gentleman from Texas for this amendment. And let me begin where the gentleman from the other side of the aisle concluded when he asked the question? What if there is not enough money to go around?

That is a question that we ask here in Congress in the House all the time. What if there's not enough money for my pet project to go around?

What if there's not enough money for this earmark to go around?

What if there's not enough money for this brand-new program to go around?

But let me suggest to you that there's another variation of that question that we would be mindful of, and that is the families back at home that we represent. When the mom and dad sits at their dining room table at the end of each week with their checkbook out, paying their bills, be it for the electric bill, some other utility or heating bill, their rent or their mortgage, their food bill, their health or education bill for their children, or any other vital bill that that family has, and the husband looks over to the wife, and they realize that they have all these stacks of bills in front of them, and they have more bills than they have money in their checking account, and the wife asks the husband, what now, because there's not enough money to go around, what does that family do?

Who does that family turn to when there's not enough money to go around?

I can tell you where this Congress turns to when we say there's not enough money to go around. When we say there's not enough money to go around, what this House has done, or at least in the new budget that was presented in the Budget Committee which I serve on, by the other side of the aisle, what the Democrats propose to do is to simply raise taxes. And as we have seen in the proposed budget from the other side of the aisle, it is now the largest tax increase in U.S. history, on the backs of America's families, on the backs of that very same husband and wife who is sitting there saying to themselves, there's not enough money to go around to pay our bills, to pay our mortgage, to pay our health care bills, to send our kids to go to school.

They can't raise taxes on anybody else. They can't go out to their neighbors and say, we can't afford food this week, we can't afford our rent this week. We can't afford to send our kids to the colleges we want to, so we're going to raise taxes on you. They can't do that. But somehow or other, Members of Congress think when they get elected around here, that we can do that by raising taxes, the largest tax increase in U.S. history, that somehow or other that we're entrusted to do such things and create slush funds and the like.

Well, I stand before you and say that no, that the American public has sent a message to us, to both sides of the aisle, to Republicans and Democrats alike. Yes, the Democrats are now in charge, Mr. Chairman, of this House. And they are so because the American public spoke this last November, quite candidly, because perhaps the Republicans weren't listening well enough during that period of time.

But I can tell you this, and those who listen to us on this floor today, the Republicans are listening very well right now, and the Democrats are not listening very well. The voters sent us a message in November and said enough is enough. We have to be concerned about the family budget sometimes instead of the Federal budget. We have to put the focus on the moms and dads out there being able to pay their bills for their kids' health care and the like, instead of always worrying about ever-increasing budgets on the Federal level.

Now the proposal that is before us to look at would simply look to save a few million dollars out of a several trillion dollar budget, something that most Americans, myself included, can't really get our arms around when you think about how large this budget is. In a way, it's just a drop in the bucket when it comes to the budgets back here. But to the budget of the family at home, that's still a lot of money.

The proposal that the good gentleman from Texas proposes here right now would simply try to rein in spending in such the smallest of ways, but it would be a good step in the right direction. It would be saying to the voters from last November, we heard you; we have to put the focus on the family budget, we're going to try to live within our means.

And even when we are dealing with important issues, such as the gentleman from the other side of the aisle raised, whether it's water resources or the like, we're going to fund those programs. We're going to take care of those programs, but we're going to do it in an efficient and a manageable manner, and we're going to do so in a way that is not a burden on the American family budget any longer because we have heard you, and we realize that there will never be enough dollars for every single program that every single Member of Congress and the Senate come up with. But we are going to prioritize them, put them in order of importance, put them in an order that are most significant to the American family, fund those programs to the levels that are necessary. And the rest, we are going to do just as every family in America has to do, set limits on what we are going to spend on, set limits on how much we are going to spend, and live within our means.

So to the good gentleman, Mr. HENSARLING from Texas, I commend you for your work in trying to have this House live within its means.

Mr. SERRANO. Mr. Chairman, I move to strike the last word.

Mr. Chairman, I'd like to yield to our distinguished chairman.

Mr. VISCLOSKY. I appreciate the gentleman from New York yielding, and would simply reference the last speaker's assertion about pet projects and referencing those to the projects that I enumerated in my remarks.

The fact is, I was enumerating projects on page 42 of the committee report, and 43 on the committee report, and page 44 on the committee report, and page 45 on the committee report that were submitted by the President of the United States.

Mr. PRICE of Georgia. Mr. Chairman, I move to strike the last word.

Mr. Chairman, I find the most recent comment of our good friend on the other side rather amusing, as the President is charged with executing the policies that this Congress puts in place; and heaven forbid, that he or whoever might occupy that office, might have certain priorities that they would want to bring about to, in fact, execute the policies that have been passed by this Congress.

But be that as it may, I want to commend my good friend from Texas for bringing this amendment forward. I think that the amendment itself highlights truly the fallacy of the process that we're under. And that is, as my good friend from New Jersey just mentioned, that we fail in this Congress, at least the majority party fails in this Congress to prioritize spending in a way that passes a test that I believe the American people would be proud of or be pleased with.

The point isn't, as my good friend from Indiana has stated, the specifics of the project that he identified. That is not the point of the debate that we would rise to engage in. The point is that when is enough enough? When is it that we, as a Federal Government, take hard-earned tax money out of the pocketbooks and the back pockets of Americans and say, okay, that's all we need.

Clearly, this new majority has said that we can't get enough. We can't get enough. And consequently, they have adopted, in this past 6 months, a budget that includes the largest tax increase in the history of our Nation, the largest tax increase in the history of America.

And I have friends at home who say, well, that wouldn't be so bad if, in fact, they were solving real problems. But, Mr. Chairman, as you well know, the challenge of the Federal spending, the challenge of the budgetary process is the automatic programs, the entitlement programs, the mandatory programs, Social Security, Medicare and Medicaid, which comprise 54, 55 percent of our Federal budget.

And the budget that this new majority passed that included the largest tax increase in the history of our Nation did nothing, said nothing about how to reform those programs; how to make certain that Social Security, which is a program that is challenged to be charitable, challenged from a process standpoint, to be able to provide a safety net

for those young citizens across our Nation who are in their 20s and 30s.

□ 1445

It is a program that will not have those kinds of resources without structural change, and so the majority party passes a budget with the largest tax increase in the history of our Nation and says nothing, it is mute, as it relates to Social Security reform. Mr. Chairman, I don't think that is what the American people sent us to Washington to do. I think they sent us to Washington to solve real problems.

As a physician prior to coming to Congress, one of the huge challenges that we face is the provision of health care and health insurance for our citizens. And, consequently, the other two limbs of the budgetary challenge that we have, Medicare and Medicaid, huge problems, huge challenges from a financial standpoint. They require structural change. However, this majority passed in their budget, again the largest tax increase in the history of our Nation, nearly $400 billion, and said nothing, nothing about structural reform to those programs that are imperative for the healthiness of our Nation.

So when we talk about our concern regarding spending, it is not necessarily the specifics of a given paragraph within a spending bill. The specifics are the overall amount of money that we are spending as a Federal Government and the fact that we are ignoring, this Congress is ignoring, the true financial challenges that face us as a Nation.

So I rise to commend my friend from Texas for offering an amendment that I think brings focus to where the debate ought to be, and that is to challenge each and every Member of this body and each and every Member of the Senate to make certain that before we end our time here this fiscal year, to make certain that the budget for fiscal year 2008 is as responsible as it can be, that we address appropriately those huge financial challenges that we have as a Nation and be much more responsible with taxpayer money and make certain that we allow Americans to keep their hard-earned taxpayer money in their back pocket and in their pocketbooks.

The Acting CHAIRMAN. The question is on the amendment offered by the gentleman from Texas (Mr. HENSARLING).

The question was taken; and the Acting Chairman announced that the noes appeared to have it.

Mr. HENSARLING. Mr. Chairman, I demand a recorded vote.

The Acting CHAIRMAN. Pursuant to clause 6 of rule XVIII, further proceedings on the amendment offered by the gentleman from Texas will be postponed.

The Clerk will read.

The Clerk read as follows:

CENTRAL VALLEY PROJECT RESTORATION FUND

For carrying out the programs, projects, plans, and habitat restoration, improvement, and acquisition provisions of the Central Valley Project Improvement Act (title XXXIV of Public Law 102–575), $59,122,000, to be derived from such sums as may be collected in the Central Valley Project Restoration Fund pursuant to sections 3404(c)(3), 3405(f), and 3407(d) of the Central Valley Project Improvement Act (Public Law 102–575), to remain available until expended: *Provided*, That the Bureau of Reclamation is directed to assess and collect the full amount of the additional mitigation and restoration payments authorized by section 3407(d) of the Central Valley Project Improvement Act: *Provided further*, That none of the funds made available under this heading may be used for the acquisition or leasing of water for in-stream purposes if the water is already committed to in-stream purposes by a court adopted decree or order.

CALIFORNIA BAY-DELTA RESTORATION

(INCLUDING TRANSFER OF FUNDS)

For carrying out activities authorized by the Water Supply, Reliability, and Environmental Improvement Act (Public Law 108–361), consistent with plans to be approved by the Secretary of the Interior, $40,750,000, to remain available until expended, of which such amounts as may be necessary to carry out such activities may be transferred to appropriate accounts of other participating Federal agencies to carry out authorized purposes: *Provided*, That funds appropriated herein may be used for the Federal share of the costs of CALFED Program management: *Provided further*, That the use of any funds provided to the California Bay-Delta Authority for program-wide management and oversight activities shall be subject to the approval of the Secretary of the Interior: *Provided further*, That CALFED implementation shall be carried out in a balanced manner with clear performance measures demonstrating concurrent progress in achieving the goals and objectives of the Program: *Provided further*, That $5,000,000 shall be transferred to the Army Corps of Engineers to carry out further study and implementation of projects that contribute to the stability of the levee projects authorized under section 103(f)(3) of the Water Supply, Reliability, Environmental Improvement Act (Public Law 108–361).

POLICY AND ADMINISTRATION

(INCLUDING TRANSFER OF FUNDS)

For necessary expenses of policy, administration, and related functions in the office of the Commissioner, the Denver office, and offices in the five regions of the Bureau of Reclamation, to remain available until expended, $58,811,000, to be derived from the Reclamation Fund and be nonreimbursable as provided in 43 U.S.C. 377: *Provided*, That no part of any other appropriation in this Act shall be available for activities or functions budgeted as policy and administration expenses: *Provided further*, That, of the funds provided under this heading, $10,000,000 shall be transferred to ''Water and Related Resources'' upon the expiration of the 60-day period following the date of enactment of this Act if, during such period, the Secretary of the Interior has not submitted to the Committees on Appropriations of the House of Representatives and the Senate the Bureau of Reclamation's five-year budget plan.

AMENDMENT OFFERED BY MR. LAMBORN

Mr. LAMBORN. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. LAMBORN:

Page 14, line 18, after the dollar amount insert ''(reduced by $1,236,000)''.

Mr. LAMBORN. Mr. Chairman, as we continue to wade through these massive and costly spending bills, my commitment to the American taxpayer remains strong. I signed a pledge to uphold a Presidential veto of any spending bill that exceeds the President's requested level of funding. Hopefully, we can contain some of this out-of-control spending and pass fiscally responsible legislation; but if not, I intend to honor that pledge.

This appropriations bill would increase spending for energy and water projects by $1.1 billion more than the President's budget request and seeks to increase spending by more than $1.3 billion over last year's fiscal 2007 Energy and Water appropriations bill.

We have an opportunity to demonstrate restraint by reducing the amount that the government spends, not increasing it. At a time when the Federal Government faces an $8.8 trillion national debt, we have a real opportunity to show the American people that we can be fiscally disciplined and that we will reduce this deficit. Increasing the size of government or bureaucracy will not help this reduction effort.

My commonsense amendment would simply maintain the Policy and Administration account under the Bureau of Reclamation at fiscal year 2007 levels, representing a $1.2 million reduction from $58.8 million to $57.6 million. That is the same as last year's budget. Given that this funding level was appropriate for last year's budget and our Nation needs to reduce Federal spending, this commonsense restraint should be acceptable.

This amendment is not critical of the Bureau of Reclamation or its employees, who actually help deliver water to parts of my district and are important to the State of Colorado and to the entire West. It would simply require the Federal Government to operate the way any deficit-laden business would. A private sector company experiencing the same deficits the Federal Government is facing would not increase its deficit. It would simply cut spending or go out of business. A family on a tight budget finds ways to go without, and we should explore every opportunity to be fiscally responsible as well.

This amendment is the first step of many necessary steps enforcing fiscal discipline and sanity upon the Federal Government and out-of-control Federal deficit spending. We must restore fiscal discipline and assure the American people that we are doing whatever is necessary to reduce our national debt. To do this, we must find commonsense and innovative new ways to do more with less.

The American people have asked Congress to rein in Federal spending and tighten its belt. This reasonable amendment does just that, and I urge its adoption.

Mr. GARRETT of New Jersey. Mr. Chairman, I move to strike the last word.

Mr. Chairman, I come to the floor in support of yet another good and commonsense amendment. Good and common sense because it asks of this Congress to do the very same thing that any family in America and any small business in America would do under similar circumstances.

The American public right now is looking at, as we have already seen, the largest tax increase in U.S. history. And let me just take a moment, though, before I go into the particulars on this amendment to explain how that impacts upon the average American family.

There was an article in the New York Times several months ago after the Democrats proposed their budget, which is inclusive of what we have here before us, to say how would this, the largest tax increase in American history, impact a family of four, the average American family of four maybe in the Fifth Congressional District, maybe in Bergen County, which is one of the great counties of New Jersey that I represent, an average family of four, four individuals, making around $70,000, which I should point out by no means in the great State of New Jersey would be considered by most people an affluent family. That family would see their taxes, because of this underlying legislation combined with the overall budget, go up by upwards to $1,500, $1,600 year. That would mean $1,500 or $1,600 more coming to the Federal Treasury into the Federal checkbook as opposed to being able to stay in the family checkbook. That means $1,500 or $1,600 more coming down to the Washington bureaucrats as opposed to being able to remain in the family checkbook on the kitchen table where Mom and Dad are able to decide should those dollars be spent on their son's college education, on their daughter's health care expenses, on their in-laws' necessary expenses that they must share with, whatever else, to Washington as opposed to the family budget.

Now, the good gentleman from Colorado comes up with an amendment to try to address that. If we are able to hold the line on overall spending just as an average family would have to do, we would not see the need for this, the largest tax increase in American history. And what does the good gentleman from Colorado (Mr. LAMBORN) do? Well, he simply says hold the line on spending for, let us say, the bureaucrats, if you will, all good men and women, I am sure, the people in the policy and administration account under this bill, under the Bureau of Reclamation, hold the spending at 2007 levels. By doing so, we will be saving some money. That will represent a $1.236 million reduction, from $58.8 million to $57.57 million.

Some of you may say in this grand scheme of things when we are looking at our Federal budget upwards of almost $3 trillion, saving $1.2 million is not that much. But the flip side of that argument is if it really isn't that much of a cut, then it really shouldn't be that much to bear for the Federal Government. If we are not really not cutting that much, then the bureaucrats and the rest who have such a huge budget as it is should not feel the squeeze that much. But all we are asking them to do, like any other family does, is to live on their budget for this year.

I ask how many Americans saw their income rise last year by one, two, two-½ times the rate of inflation? I can tell you quite candidly most of the people that I talk to in my district, unfortunately, did not see their incomes rise that much, but yet that is what we are asking them to do in the sense of higher taxes to pay for the increase in spending for the overall budget that we have here.

Let me just conclude in the same way that the gentleman from Colorado (Mr. LAMBORN) does in his letter. He says, and I think these are the most poignant words: ''We must restore fiscal discipline and assure the American people that we are doing whatever is necessary to reduce our national debt. To do this, we must find both commonsense and innovative ways to do more with less. The American people have asked Congress to rein in Federal spending and to tighten its belt. This reasonable amendment does just that.'' And he asks us all from both sides of the aisle, Republican and Democrat alike, to join with the gentleman from Colorado to work to make sure that we do not have the largest tax increase in American history, to work to make sure that we have a system that is common sense, efficient, and appropriate on the Federal level, just as we have asked for the American family at home.

Mr. SERRANO. Mr. Chairman, I move to strike the last word.

Mr. Chairman, it is amazing. If folks on the other side keep saying tax increase, they are actually going to believe that there is a tax increase.

What I notice is that they very rarely mention deficit because when they do, they leave themselves open for discussion on the deficit. Yes, there is a deficit and the American people are quickly finding that out. The deficit was not created in the last less than 6 months that Democrats have had control of this House. The deficit was created by taking us into a war that we shouldn't have been involved in where close to $600 billion has been spent, not to mention the loss of life, not to mention the fact that when our troops come home over the next 10, 15, 20 years, we will be paying in deficit spending to make up for medical care and all the needs that I certainly will be supporting for them.

□ 1500

Now, it's interesting, Mr. Chairman, how the other side mentions that this bill spends money. Well, in a way that's redundant because that's what the Constitution says the Appropriations Committee is supposed to do. It is supposed to come to the Congress every year and spend dollars. How much we spend, that's a discussion.

But if there was ever a place where you can justify a modest increase, it would be when you deal with the energy issues in our country. There are dollars here, no one is mentioning, for research. There are dollars here to deal with the energy issue.

Now, every American knows that probably at the center of issues in this country is the high cost of fuel in this country, whether for driving or heating our homes. So when you take some of those tax dollars and you spend them, a very modest amount, on research to see if there is a way that in the future we can cut out our dependency on foreign oil, that is a great investment. That is no different than investing in a college or education for the children. It is the same kind. But again, we are not going to hear that. What we are going to hear is this repetition about how money is being spent, and that there is a tax increase.

I don't remember a tax increase in the 6 months that we have been here as Democrats. What I do remember that caused a deficit was, one, the war; and two, that we did have a tax decrease in this country, a tax cut, we did. But it wasn't for anybody that we know, certainly no one I know. It was for millionaires and zillionaires, including some of them who told us that they didn't even want a tax cut. Those are the people.

So if indeed those tax cuts reach their sunset and die, I guess you could play with words and say that taxes will go up. Yeah, for somebody who has $100 million, he or she might pay more taxes later on. But the working class, the people who are getting help for their education, the folks that are getting a better deal on energy propositions in the future, those are the facts, the people that we are looking for. Now, you want to cut the deficit down? You want to create a situation where we will spend less money in this country? Stop the war now. Stop spending another dollar on the war in Iraq.

But it has been forgotten. It's all about tax-and-spend Democrats. My God, when you hear this, Mr. Chairman, you would think we were in control for the last 14 years. No, it's 12, 14 years against less than 6 months. And in those 6 months we have spoken to parents about their kids' education. In those 6 months we've made attempts to

bring down the cost of gasoline. In those 6 months, yes, we gave a minimum wage increase to the lowest earners in this country. That's what we've done. And we will be proud of that. You want to cut the deficit that you created over 12 years? Stop the war now. That's the best way to do it.

Mr. CAMPBELL of California. Mr. Chairman, I move to strike the last word.

There were so many inaccuracies in that last speech, but there are at least a couple that I would like to correct relative to taxes, one of them being that in the last 6 years, the tax reductions that have been put in place actually reduce taxes for every single American who pays income taxes, and actually took some people that were paying income taxes and took them off the tax rolls. And that the Democrats' budget, which has in fact been passed, unlike the minimum wage increase which is not actually in the law at this point, but the Democrats' budget which has in fact been passed has proposed potentially to roll back all of those tax increases and thereby increase taxes on every single taxpayer in America.

With that, I would like to yield to the gentleman from Colorado.

Mr. LAMBORN. I thank the gentleman from California.

To put things in perspective for my colleague from New York, it's true that the war in Iraq has cost $600 billion. That is 7 percent of the $8.8 trillion total national debt that we have. So we have to also address the remaining 93 percent of the debt, because the war is 7 percent out of that $8.8 trillion.

So, getting back to this amendment that is before us, I would differ with my colleague from New York. We are not cutting any research into energy development. We are cutting the bureaucracy expense. We are cutting the policy and administration portion of the Bureau of Reclamation. We are just keeping it to last year's dollar amount. So the bureaucracy, the administration of the Bureau of Reclamation is what is being kept to last year's figures. There is no cut going on for any research development program whatsoever. So I just wanted to make that correction.

Apparently I haven't won over my colleague from New York yet, but I would urge everyone else here to adopt this amendment.

Mr. CAMPBELL of California. I thank the gentleman, and I would just like to amplify what he said, that if in fact what this amendment does is take spending to last year, then it's not a cut at all. It's not even a cut of the bureaucracy that you're talking about, it is in fact making this line or this area of expenditure the same as last year.

Mr. PRICE of Georgia. Mr. Chairman, I move to strike the last word.

Mr. Chairman, I was compelled to come down to just comment about some of the information that we've heard from the other side regarding issues not necessarily related to this amendment, because they broadened the debate significantly to talk about the deficit. And Mr. Chairman, as you well know, the deficit has been decreasing significantly for reasons that I would like to touch on a little bit.

They also talked about the issue of the work that they had accomplished, that this majority had accomplished. And they talk about decreasing gas prices. Well, in fact, what their gas bill did, Mr. Chairman, as you recall is to increase taxes on United States oil companies. Sounds good maybe in some districts, I don't know; mine is not terribly interested in anybody paying more taxes. But they increased taxes on United States oil companies. Now that bill sits in the Senate, thank goodness, because hopefully the Senate will be able to resolve it and correct it so that the actual policy of this Congress on gas prices will indeed be to bring them down. It takes greater responsibility to do that.

If in fact that were to become law, then what we would do under the direction of this majority party is to decrease the ability for American oil companies to produce American oil, and we would increase our reliance and our dependency on foreign oil; not the greatest energy plan, Mr. Chairman, I would suggest.

They also talked about assisting kids' education, college education. We have that as a goal, certainly. We think it's appropriate to provide for greater resources for American citizens to attend higher education. What does their bill do, though, Mr. Chairman? Again, it sits in the Senate, so hopefully we will have the Senate correct that.

But what their bill does is to ratchet down very gradually the interest rate that students pay on loans to go to college and keeps them at half their current rate for 6 months, Mr. Chairman, and then, boom, right back up to where they were. Well, Mr. Chairman, that isn't leadership either.

Now, this chart right here, Mr. Chairman, talks about the increasing Federal revenue. But this red line here could be jobs, it could be increasing Federal revenue, it could be economic development. And there was a remarkable thing that occurred in 2003 that made it so that that line goes up appropriately. Thank goodness, the American people say. Appropriately, Federal revenues increase, economic development increases, jobs increase. And what happened in 2003 was the culmination of appropriate tax reductions for the American people. And what does this majority want to do? It wants to take that line back down. Because what they've done is passed a budget that reverses every single tax reduction, appropriate tax reduction, for the American people. Mr. Chairman, that is not the kind of leadership, I don't think, the American people deserve, nor is it the type of leadership that they desire.

So, when we broaden this debate, it's appropriate, because the American people, Mr. Chairman, the American people are watching, and what they see is a majority party that is terribly interested in making certain that the American people are taxed to a greater degree so that they ostensibly have more money to be able to spend on their pet programs.

My good friend says that it's only folks who make hundreds of millions of dollars who will have their taxes go up. Well, Mr. Chairman, that is not the case, as you well know. Taxes will increase for virtually every single American. Anybody who pays taxes now, under this new majority if they get their way, will have increased taxes. That's not the kind of leadership I believe the American people voted for in November, it is not the kind of leadership that we would provide, it is not the kind of leadership that the American people deserve.

So, I am pleased that my good friends on the other side have broadened the debate because it results in the opportunity to bring into focus greater clarity to these budget bills, greater clarity to these appropriations bills, and makes certain that the American people are paying attention to the kind of leadership that this new majority is offering, or the lack of leadership they're offering.

Mr. GARRETT of New Jersey. Will the gentleman yield?

Mr. PRICE of Georgia. I am pleased to yield to my friend from New Jersey.

Mr. GARRETT of New Jersey. I think it is a significant point that you raise with regard to what level of American taxpayers will be subjected to these taxes.

I come from the great State of New Jersey, where we had similar rhetoric, if you will, from the other side of the aisle on the State level. And we actually heard the exact same arguments being made: Don't worry, they're going to come up with what they call the millionaires' tax; and if you're not a millionaire, don't worry about it. Well, truth be told, after all the dust was scattered away from the bills, after all the hearings were held, after all the press conferences and everything else was done by the Democrats in the State of New Jersey, we found that that level went from $1 million to $900,000 to $800,000 to $700,000 to $600,000 to $500,000, $400,000, $300,000, 250-some-odd thousand dollars at the end of the day. Now, you still say they may be a large income? Well, in the State of New Jersey, if you're a two-income family making a hundred-some-odd thousand dollars, you found that you would still be subject to tax on that.

Mr. VISCLOSKY. Mr. Chairman, I move to strike the last word.

I would like to actually talk about the bill, and I would like to talk about the underlying merits of what Mr. HOBSON and I and the members of the subcommittee and the full Appropriations Committee have tried to do.

In this particular title, we are talking about the Bureau of Reclamation, and we are talking about people's health and well-being. Part of that does include the wise stewardship of the moneys that are provided. From the debate that has taken place today, you would think that the only thing we are worried about is spending money and worried about the quantity of the money that we are spending as opposed to the quality of the underlying act and the work that the agencies do. And I would draw, Mr. Chairman, my colleague's attention to page 48 of the report that goes into great detail, and I am going to read it.

The gentleman has an amendment before us to cut $1.236 million from the bill. And the fact is, over the last several years our subcommittee, under the leadership of then-Chairman HOBSON, as well as myself, have done everything possible to make sure that the moneys being spent by the Bureau of Reclamation are being spent wisely.

And I read from the report. ''In fiscal year 2006, the Committee directed the Department of Interior to submit, with its fiscal year 2007 budget request, a detailed 5-year budget plan for each of the major budget components, including water and related resources, California Bay Delta Restoration program, Central Valley Project Restoration Fund, and Central Utah Project Completion.''

Because the concern of the subcommittee then, and as it is as of this moment, is that the public's moneys are being spent with quality as well.

''The Department subsequently informed the Committee that it would be unable to provide a 5-year plan for fiscal year 2007 and intended to make the initial submission with the fiscal year 2008 request. The Bureau failed to make that submission either, and now informs the Committee that the 5-year plan will be submitted at some undefined time in the future.''

The patience of the subcommittee, the patience of the Appropriations Committee is not without limit. And as a result, in the report language we note the Committee's extreme frustration with the Bureau's inability to provide a 5-year budget plan, the act contains a provision that transfers $10 million, not $1.236 million, but $10 million from policy and administration to water and related resources if the 5-year plan is not submitted within 60 days of date of enactment. We are certainly not afraid to move moneys around, and in this case, to the tune of $10 million, if the good judgment of this committee is not abided by.

So I would emphasize that this is not just a matter of quantity of money, it is quality of money. And that is what we are about. That is why I am adamantly opposed to the gentleman's amendment.

□ 1515

The Acting CHAIRMAN. The question is on the amendment offered by the gentleman from Colorado (Mr. LAMBORN).

The question was taken; and the Acting Chairman announced that the noes appeared to have it.

Mr. LAMBORN. Mr. Chairman, I demand a recorded vote.

The Acting CHAIRMAN. Pursuant to clause 6 of rule XVIII, further proceedings on the amendment offered by the gentleman from Colorado will be postponed.

The Clerk will read.

The Clerk read as follows:

ADMINISTRATIVE PROVISIONS

Appropriations for the Bureau of Reclamation shall be available for purchase of not to exceed 14 passenger motor vehicles, which are for replacement only.

GENERAL PROVISIONS, DEPARTMENT OF THE INTERIOR

SEC. 201. (a) None of the funds appropriated or otherwise made available by this Act may be used to determine the final point of discharge for the interceptor drain for the San Luis Unit until development by the Secretary of the Interior and the State of California of a plan, which shall conform to the water quality standards of the State of California as approved by the Administrator of the Environmental Protection Agency, to minimize any detrimental effect of the San Luis drainage waters.

(b) The costs of the Kesterson Reservoir Cleanup Program and the costs of the San Joaquin Valley Drainage Program shall be classified by the Secretary of the Interior as reimbursable or nonreimbursable and collected until fully repaid pursuant to the ''Cleanup Program-Alternative Repayment Plan'' and the ''SJVDP-Alternative Repayment Plan'' described in the report entitled ''Repayment Report, Kesterson Reservoir Cleanup Program and San Joaquin Valley Drainage Program, February 1995'', prepared by the Department of the Interior, Bureau of Reclamation. Any future obligations of funds by the United States relating to, or providing for, drainage service or drainage studies for the San Luis Unit shall be fully reimbursable by San Luis Unit beneficiaries of such service or studies pursuant to Federal reclamation law.

TITLE III—DEPARTMENT OF ENERGY

ENERGY PROGRAMS

ENERGY EFFICIENCY AND RENEWABLE ENERGY

For Department of Energy expenses including the purchase, construction, and acquisition of plant and capital equipment, and other expenses necessary for energy efficiency and renewable energy activities in carrying out the purposes of the Department of Energy Organization Act (42 U.S.C. 7101 et seq.), including the acquisition or condemnation of any real property or any facility or for plant or facility acquisition, construction, or expansion, $1,873,844,000, to remain available until expended.

AMENDMENT NO. 21 OFFERED BY MR. CAMPBELL OF CALIFORNIA

Mr. CAMPBELL of California. Mr. Chairman, I offer an amendment.

The Acting CHAIRMAN. The Clerk will designate the amendment.

The text of the amendment is as follows:

Amendment No. 21 offered by Mr. CAMPBELL of California:

Page 16, line 19, after the dollar amount insert ''(reduced by $101,550,000)''.

Mr. CAMPBELL of California. Mr Chairman, one of the last speakers on the other side of the aisle mentioned that he wasn't quite sure why we kept talking about taxes and tax increases, because inevitably if you head toward the balanced budget, that is what all spending turns into: it turns into taxes.

In fact, the Democratic budget, which, to the majority party's credit, is heading toward a balanced budget in 5 years, as were I believe virtually all of the budgets that were presented this year, but it does so by saying, in its own terms, that they will raise taxes as much as they need to at the end of that 5 years in order to achieve a balanced budget.

So when we are talking today about things that are increasing in spending, this isn't something that is abstract. This isn't $20 million here, $40 million here, $100 billion there of just sort of faceless, nameless money. That is money in figures that are so large that most people, Mr. Chairman, have a hard time even comprehending how much that is and how it can relate to the things that we are doing.

But it makes it a little more down-to-earth, brings it a little more home, when you look at each one of these, which is the way we should look at them, Mr. Chairman, each one of these spending increases on each program, on each bill, on each thing here, and realize that every dollar of increase there is a dollar that the majority party wants to go get out of the pockets of taxpayers at home. That is what we are really talking about. That is why, Mr. Chairman, I propose this amendment.

Now, this amendment refers to just one of the many, many projects and many, many programs in this appropriations bill. This one is something that deals with weatherization assistance, and the bill that is before us proposes to increase weatherization assistance spending by 20 percent over last year.

Now, what is interesting is that in the President's budget, which this amendment proposes to reduce the spending to, the President has actually proposed to reduce this to almost half. Why is that? Because in something that is called energy efficiency and renewable energy, this program is actually not at all efficient.

I actually had some personal experience with this program, not personal in the sense that I was dealing with the

program from a recipient standpoint, but when I was in the State legislature with this program in California. By the time that you deal with the Federal bureaucracy and then you get the money to the State and there is the State bureaucracy, and then you put this money out, very little of this money was actually going to anything toward the goal that was accomplished. And what is interesting is it is also creating a subsidy for something that already pays for itself.

The reason people weatherize their homes or seal leaks and so forth or cracks in windows and doors is because it saves you money on your energy bill over time.

So this is a program that has been shown to be inefficient, has been shown to not be effective, that subsidizes something that doesn't need subsidization, and which in this bill is proposed to increase by 20 percent.

Now, the President's budget proposed to reduce this. It is one of those things on that list of programs that a number of people have that are saying these are some of the most inefficient programs in the Federal Government today, and this is one of them that certainly should be reduced or perhaps eliminated.

But instead, this bill proposes to increase it by nearly $40 million. And, again, $40 million, I guess sometimes this is the difference between government and not government. When things don't work in government, it seems that there is always a group of people saying the reason they are not working is because they don't have enough money, and we need to spend more money on them. Whereas, normally in the real world, Mr. Chairman, when something isn't working, that is when people take money from it, make it become more efficient, or not fund it anymore if it is not working.

So, Mr. Chairman, this amendment, just this one area of this one Department, proposes to reduce this to the President's proposed budget.

Mr. EDWARDS. Mr. Chairman, I move to strike the last word.

Mr. Chairman, of all the work Congress does, few things could be more important than to protect our Nation from the threat of nuclear terrorism. It is hard to imagine that in one instant a nuclear bomb detonating in a major American city could kill more of our citizens than we have lost in combat in every war in our Nation's history. Osama bin Laden has told his followers that it is their religious duty to secure loose nuclear materials for a bomb to be set off in the United States. It is our sacrosanct duty to ensure that that never happens.

That is why I want to salute Chairman VISCLOSKY for making homeland security against nuclear terrorism the highest of priorities in this bill. He is right to do so.

This bill provides $2.1 billion to protect the American family from a nuclear holocaust, a level that is nearly $400 million above the administration's budget request. Specifically, it provides $832 million for international nuclear materials protection and cooperation activities, a $359 million increase to the budget request. With these funds, we will expand cooperative programs with Russia and other nations with vast inventories of nuclear material.

In this bill, the Global Threat Reduction Initiative is increased by $132 million to a total of $251 million. This will assist us in identifying, securing, removing, and disposing of nuclear material throughout the world.

The Megaports Initiative is funded at $25.8 million. This program installs radiation detectors at major seaports around the world so nuclear weapons and materials can be intercepted before they are smuggled into a major American city. This additional funding will allow the Department of Energy to install sensors at several key seaports this year, rather than waiting for several years to do so.

I wanted to take a moment of my time to also compliment the hardworking, dedicated citizens who work at the Department of Energy on these nuclear nonproliferation programs. They work extraordinarily long hours, many spending long periods of time away from their families in the harsh Russian climate working to secure these materials and to protect us and our families from the threat of nuclear terrorism.

Let me point out some of DOE's successes because of that hard work and because of the work of this subcommittee, chaired formerly by Chairman HOBSON, who also made homeland security against nuclear terrorism a top priority:

DOE in recent years has completed work securing nuclear materials at 91 of 125 Russian nuclear weapons material and warhead sites, with the remainder in progress.

We have secured more than 520 vulnerable radiological sites overseas, containing enough nuclear material to build approximately 7,700 dirty bombs.

We have recovered over 14,000 radiological sources domestically, containing enough material for approximately 1,400 dirty bombs.

We have equipped 88 land border crossings in Russia with radiation detection equipment, with work complete or under way in eight other countries.

We have installed Megaports radiation detection equipment at eight ports, with operational testing and evaluation under way at one additional port.

Mr. Chairman, 2 years ago, President Bush said that protecting our Nation from nuclear terrorism should be our Nation's number one national security priority. I agree. With the strong leadership of Chairman VISCLOSKY and now Ranking Member HOBSON, this bill takes a significant step forward in protecting our communities, our families and our Nation from the threat of nuclear terrorism.

That is why I urge bipartisan support for this important legislation.

Mr. OLVER. Mr. Chairman, I move to strike the last word.

Mr. Chairman, I rise in opposition to the amendment offered by the gentleman from California. I note that this amendment is offered to the section of the bill on energy efficiency and renewable energy, and I would note first that the President's request for this year is more than 10 percent below on every one of the renewable energy accounts in the budget. Those are cuts below the 2007 enacted amount, and it covers biomass, which leads to the biomass accounts, which include biodiesel, corn ethanol and cellulosic ethanol, which, of course, is the area that so many people believe is going to be a major saver in the future.

It includes solar energy, wind energy, geothermal technology, hydropower, vehicle technologies, where 30 percent of all of our energy is used, building technologies, where 40 percent of all of our energy is used, industrial technologies, where 20 percent of all of our energy is used. And the President proposes in those areas 10 percent reductions below the enacted, whereas the subcommittee, in its wisdom, and apparently agreed to certainly by me and certainly apparently agreed by the gentleman from California, the committee has added moneys over the enacted number for 2007. So we apparently agree on that.

But then, oddly enough, the gentleman from California chooses to attack the one program that gives direct help to low-income households in this country. It is the one program, the weatherization program, where low-income households can get assistance to install energy-saving technologies and measures in their homes.

Well, it turns out there are something like 14 million households in this country that have incomes of less than 50 percent of the median income in various areas around the country. Half of them live in homes. Most of those homes are very inefficient users of energy. So the Low Income Weatherization Program is a program that would help those homes be more efficient in the use of energy.

The President's request for this year is in fact below the enacted 2007 number actually by more than 30 percent below what the enacted 2007 number was. Enacted 2006 number was even higher than the 2007 number. So the committee, in its wisdom, has instead recommended raising the number to the 2006 level, to the levels expended in fiscal year 2006, and the gentleman

from California wants to take it back from the committee's number by this time 45 percent or something like that, the exact number I haven't quite calculated.

□ 1530

Those moneys are well invested in those homes which low-income households are using, where energy is so inefficiently used, where we can save a substantial amount of energy every year, thereby reducing greenhouse gases that are produced in the production of the energy that would otherwise be wasted in those homes. And where one would say far beyond the cost of the energy-saving measures that would be part of the weatherization program, far beyond the cost. In such situations, you are saving the amount of the cost within a 3 or 4 or 5-year period when the savings go on long into the future, year after year after year, saving energy and reducing greenhouse gases and saving dollars. Perhaps most important for those people, it is the savings of the dollars that they otherwise would spend in those low-income households where the amount of money spent on housing per se in low-income households tends to be up in the two-thirds to three-quarters of the total household income.

So I think the weatherization program is a very useful program, a very effective program for saving money for people at the lowest levels of income. I hope we will soundly defeat this amendment by the gentleman from California.

Mr. GARRETT of New Jersey. Mr. Chairman, I move to strike the last word.

Mr. Chairman, first of all before I begin, let me commend a prior speaker, the gentleman from Texas, with his references to homeland security and the efforts that need to be made. I completely concur with the majority of the points that he makes.

This House, as you know, just dealt with those issues the other day on homeland security and how it relates to my congressional district is one of the forefront issues that I deal with. I commend the points he is making there.

Tied to homeland security is energy security as well. We will not be a secure country if we are not secure with regard to our energy needs. Much in this underlying legislation and what the administration is calling for is working towards that laudable goal, energy efficiency and renewable energies as well. And I concur with the previous speaker with his remarks as well, that we must move in that direction.

I guess the rub is how you get to some of these things. When you talk to your local constituents back at home. When we have the opportunity to go back to our districts and talk to them and they see just how Washington spends their very hard-earned dollars, they must think we are literally burning their dollars down here and wasting them on inefficient programs. Some of them of course are important. Others need to be prioritized down the line to put them in the proper perspective.

The legislation we have before us, more specifically the amendment, goes to that ultimate goal, setting priorities. Now the gentleman who is proposing this amendment is from the great State of California, a very warm State. I have come from the great Northeast where weatherization is a critical matter, especially for the low-income individuals who need to do something in order to make sure that their limited dollars go as far as they possibly can.

They are called upon in their daily lives to be as efficient as they can with their limited dollars, whether it is spending on food or rent costs, or in this case, their energy costs.

But they are asking us the very same thing in Washington. They are asking us to be efficient and effective with their dollars because they want to tell us these dollars are limited as well. Because it comes out of the American taxpayers' pocketbook.

What we are looking at here is the largest tax increase in U.S. history, and this is going to be a negative impact on the average American family of $1,500 or $2,000 more that comes out of their wallets and is sent to Washington. They are asking to make sure that the dollars spent are done effectively.

I am a Member of the 108th Congress. I came in with the gentleman from Texas (Mr. HENSARLING) and a few others, I believe, that started a group called WWW, Washington Waste Watchers. They would come to the floor each week and talk about areas of concern to them and this entire Congress to make sure that Washington moves in the right direction, to be stopping this wasteful spending of dollars.

So before we take a program that is already in existence, that we know as the testimony here earlier from the gentleman from California may be a laudable program in some sense in terms of providing assistance to those who need it, but it is wasting the dollars in another sense because it is not really getting to those individuals who desperately need it, and it is going elsewhere and being done in an inefficient manner.

Before we simply up the dollars and not make sure that those dollars get to those low- and moderate-income people to get the job done, as the gentleman from California pointed out, let's make sure that we have something, something to make sure that we do so in an efficient and effective manner. That is what the WWW, Washington Waste Watchers, is trying to do. That is what the Republican side of the aisle is trying to do.

Let's implement programs to say we will operate this House of Representatives the same as a family's budget would; that we will operate just as stringently with our dollars here as if they were our very own. We will make sure that there are systems in place, accountability in place to make sure that the dollars really get to the places they need to get to. And before we get those mechanisms set up and established, we are not going to waste any more taxpayer dollars by going to them and saying we are going to raise tax dollars or raise tax rates, and simply up the spending on a program until we can certify that program is being run effectively and efficiently.

I commend the gentleman from California for trying to move in the right direction to make sure that we don't have the largest tax increase in history, and to make sure that programs like this are run efficiently and effectively.

Mr. NEUGEBAUER. Mr. Chairman, I move to strike the last word, and I yield to the gentleman from California (Mr. CAMPBELL).

Mr. CAMPBELL of California. Mr. Chairman, I thank the gentleman from Texas.

I want to make a last couple of comments relative to the comments made by the gentleman from Massachusetts. A lot of what the gentleman from Massachusetts said I agree with. I think we differ in three basic areas.

One is that the gentleman from Massachusetts believes this program has been effective. My involvement with it in California and things that I have seen statistically here say otherwise. Certainly the administration agrees this program has not been a cost-effective program.

Second is talking about how this thing might save money here. But where does this money come from? It is $245 million. This money does not come from the sky. It does not come from the air. It comes from taxpayers. And the question is not does it save anybody any money or anybody anything; is it cost effective in what it does? And I think the answer is ''no.''

The third comment I would like to make is that the gentleman pointed out a number of programs in this bill which have all been increased in this proposed bill. That is fine, but I guess I would ask this: Are there no programs here which are not effective? Are there no programs that deserve some reduction in spending or perhaps even elimination?

Ronald Reagan said that the closest thing to eternal life is a government program, and I believe we are seeing with programs like this that those words Ronald Reagan made some time ago ring true.

Mr. RYAN of Ohio. Mr. Chairman, will the gentleman yield?

Mr. NEUGEBAUER. I yield to the gentleman from Ohio.

Mr. RYAN of Ohio. I just want to share, when asked what programs have been cut or not cut, I want to share with you, 37 cuts to Department of Energy weapons programs; 57 programs have been cut overall; 20 cuts to other programs, 2 in the Corps of Engineers, 2 in the Bureau of Reclamation, 3 independent agencies, and 13 in the Department of Energy. There have been 16 of 37 weapons cuts that were requested by the administration.

The Acting CHAIRMAN. The question is on the amendment offered by the gentleman from California (Mr. CAMPBELL).

The question was taken; and the Acting Chairman announced that the noes appeared to have it.

Mr. CAMPBELL of California. Mr. Chairman, I demand a recorded vote.

The Acting CHAIRMAN. Pursuant to clause 6 of rule XVIII, further proceedings on the amendment offered by the gentleman from California will be postponed.

The Clerk will read.

The Clerk read as follows:

ELECTRICITY DELIVERY AND ENERGY RELIABILITY

For Department of Energy expenses including the purchase, construction, and acquisition of plant and capital equipment, and other expenses necessary for electricity delivery and energy reliability activities in carrying out the purposes of the Department of Energy Organization Act (42 U.S.C. 7101 et seq.), including the acquisition or condemnation of any real property or any facility or for plant or facility acquisition, construction, or expansion, $134,161,000, to remain available until expended.

NUCLEAR ENERGY

For Department of Energy expenses including the purchase, construction, and acquisition of plant and capital equipment, and other expenses necessary for nuclear energy activities in carrying out the purposes of the Department of Energy Organization Act (42 U.S.C. 7101 et seq.), including the acquisition or condemnation of any real property or any facility or for plant or facility acquisition, construction, or expansion, and the purchase of not to exceed 20 passenger motor vehicles for replacement only, including one ambulance, $759,227,000, to remain available until expended.

AMENDMENT OFFERED BY MR. STEARNS

Mr. STEARNS. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. STEARNS:

Page 17, line 14, after the dollar amount insert ''(reduced by $20,000,000)(increased by $20,000,000)''.

Mr. STEARNS. Mr. Chairman and my colleagues, this is a very simple amendment and perhaps the majority might want to just accept it, so let me just explain.

The generation IV nuclear energy systems program is the next far, far generation program. We have been waiting and working for the generation III program. This is about the generation IV after that, which is 2030. There is a lot of money in this that is going to be used to develop energy far into the future, and yet we have in the present nuclear power program of 2010, we have need for this money here and today.

I point this out to my colleagues, particularly on that side of the aisle, that if we don't get enough money to the nuclear power 2010 program, power plants across this country will be forced to build gas and coal-burning power plants to meet the ever-growing energy demands of this Nation.

So if you really want to reduce greenhouse gases, I think you should support my amendment because you are basically taking this money, $20 million, from the generation IV nuclear systems energy account which has been funded at almost $80 million above the President's budget request, and you are simply transferring it to the nuclear power 2010 account which is funded almost $34 million below the President's budget request.

If the other side is willing to accept my amendment, I am willing to stop talking and we can proceed. If you are concerned about global warming and coal- and gas-burning, this will help our Nation move forward by helping the nuclear power plants in the near, near future instead of the far, far future.

Let me talk about the nuclear power 2010 program. It is intended simply to encourage near-term orders for advanced versions of existing commercial nuclear plants. Frankly, it is an integral part of the goal of constructing new plants in the next decade.

Approximately two-thirds of the new reactors use a reactor technology that depends on nuclear power 2010. Nuclear power plants generate electricity without producing or emitting any greenhouse gases, including carbon dioxide. Nuclear power plants generate 73 percent of all carbon-free electricity in America and are an essential mitigation tool for reducing greenhouse gases.

If we are serious about addressing the issue of global climate change, then nuclear power must be a critical component of any future energy and environmental strategy we have in this country.

With the additional funds in this amendment, the program for 2010, we could focus more on reducing the technical, regulatory and institutional barriers to the deployment of new nuclear power plants in the near term while still allowing a generous increase in funds for the generation IV program. So the money is already there for generation IV. So I am just asking a very modicum amount, taking from the generation IV and moving it to the near term, so that we can build these nuclear power plants.

I conclude by saying failure to meet the goals of the nuclear 2010 program could result in delays 1 year, 2 years, possibly 3 years, and create the possibility of an indefinite delay as companies attempt to meet the demand with other types of generation, including coal and natural gases.

I conclude and thank my colleagues for listening, but I think when you realize it is not very complicated, we are just taking $20 million from a generation IV nuclear research program that we have no results from and don't know anything about and moving them to a current program in 2010 and saying let's let the nuclear industry have this special advantage so we can combat global warming and we can make sure that we move forward with nuclear power generation in this country as soon as possible.

□ 1545

Mr. VISCLOSKY. Mr. Chairman, I rise in opposition to the gentleman's amendment.

I appreciate what the gentleman wants to do. We certainly share a concern about global warming. We also share a desire to ensure that we have a viable nuclear industry in the near term as well as the long term. Where there would be a difference of opinion is the balance that needs to be struck in this legislation to accomplish both of those goals.

I would point out that the legislation that has been reported to the House has done everything possible to ensure that the nuclear industry can move forward. For example, we have fully funded the President's request for $494 million for Yucca Mountain to make sure that they can meet their deadline for the submission of a license for the waste repository in June of 2008. The industry clearly needs the repository.

The House bill includes $167.8 million for the Nuclear Regulatory Commission, something that I think the gentleman would agree is critically necessary as far as the licensing procedures in the shorter term. This is a $17.1 million increase over the administration's request, more than 10 percent more. And I would point out that in the continuing resolution for fiscal year 2007, this was one of the few accounts that this subcommittee specifically also increased. We also include $15 million within the Nuclear Regulatory Commission for nuclear engineering scholarships that were proposed for termination by the administration, because if we do not have new, bright talent in those educational facilities under scholarship, we are not going to have a future.

And we did include moneys for Nuclear Power 2010. It is the same level as the current fiscal year. I would point out, Mr. Chairman, that this is a direct payment to utilities undergoing the NRC license process and no other sector of the energy portion of this country receives this type of Federal assistance.

The gentleman would take the money from Generation IV nuclear energy systems by having the moneys reduced. I would point out that the subcommittee went to great lengths to increase moneys for Generation IV. We are supportive of the light water reactors that are going to be coming online in the near term. We want to make sure we have that next generation of reactors online as well for the future, one that can not only provide electrical industry to our Nation that is needed but also potentially produce the hydrogen for the new economy we are looking for. We have provided those moneys and would not want to see them cut.

Additionally, we had a debate and conversation earlier today about the mixed oxide program that previously had been designated a nonproliferation item. We have correctly moved it into the Energy Department as far as their accounts and would point out that $689 million between unobligated balances, between the spending for '07 and between what is included in this bill, is included for MOX.

So we have been more than generous, and I also think we have struck the right balance to ensure that we do have an industry starting up in the near term and one that has a long-term, safe future for the generation of energy in this country.

Mr. HOBSON. Mr. Chairman, I move to strike the last word.

Mr. Chairman, I rise in opposition to this amendment. The bill includes a $33 million cut to Nuclear Power 2010. While that level may be difficult for some to accept, I fully support it.

Nuclear Power 2010 was designed to facilitate industry decisions to build and operate new nuclear power plants in the U.S. And that would be great for America. We need a dramatic increase in reliable, safe baseload energy; and I would much rather see it come from nuclear energy than from coal plants.

Unfortunately, most of the funding that we have provided for Nuclear Power 2010 doesn't go to help industry figure out our untested regulatory process or to identify new sites for plants. Most of the funding in this account has been provided to support the work of reactor designers. There is little uncertainty about reactor design. It doesn't need our support through this program. And there's really no such thing as struggling mom-and-pop reactor design teams. But I do know that we must continue to support design for the next generation of reactors. This bill does just that. It increases our support to the Gen IV nuclear design program by $79 million. That's where nuclear R&D should be funded, not from Nuclear Power 2010.

I ask my colleagues to join me in voting against this amendment.

I yield additional time to the gentleman from Florida.

Mr. STEARNS. Mr. Chairman, how much time do I have that the distinguished gentleman from Ohio gave me?

The Acting CHAIRMAN. The gentleman has 4 minutes on the gentleman from Ohio's time.

Mr. STEARNS. If I might address the chairman of the subcommittee, Mr. Chairman, I have here the Energy and Water Development appropriations bill. On page 68, it indicates that the Nuclear Power 2010, you provide about $80 million, a decrease of $34 million. So the question I have for you, if you support this program so much, why would you cut it $34 million, which is basically a huge percentage?

Mr. HOBSON. I yield to the gentleman from Indiana to answer the question.

Mr. VISCLOSKY. I appreciate the gentleman from Ohio yielding.

Mr. Chairman, I would be happy to respond to the question raised. First of all I would point out that the funds that are provided are at this year's fiscal level. It is not a cut. It is a cut from the President's request.

The other observation I would make is I believe that the Department should be in the business of science research and development and not exclusively be paying for companies to license new reactors, so that would certainly do justification.

Mr. STEARNS. Then the other question is, in Generation IV, the nuclear energy system by which you increased it $80 million, it seems to me, and you might want to answer this question, here you have a program that is a fourth generation of nuclear research. We don't even have the results from the second and third generation nuclear research, yet you're increasing a huge amount of money for something well into the future when you have a system, the 2010 energy system, which could use this money today and would go towards improving global warming and put less demand on all these nuclear energy companies because they certainly can't meet the demand in the next 2 years without burning coal and gas.

So I ask the gentleman, why would he want to increase something that's a fourth generation when the second and third generation have not even been successful in providing anything for us?

Mr. VISCLOSKY. And if the gentleman from Ohio would yield, I would be happy to respond.

Mr. HOBSON. I yield.

Mr. VISCLOSKY. I would point out that there was a $70 million increase, and I would not want to engage in quibbling as to whether it is a second, third or fourth generation, but do believe there is a strong public purpose for demonstrating the commercial viability of the thermal-neutron gas reactor for the very purposes that the gentleman is concerned about and that I share his concern, that is, climate change and global warming and energy sources, where we can generate the electricity in this country as well as potentially produce hydrogen. We ought to start down that road sooner rather than later, and again in a balanced fashion along with 2010.

Mr. HOBSON. Taking back my time, I would point out to the gentleman from Florida that we do have the capability, and we do understand Generation 3, 3½. Where we need to go is beyond that and look at Gen IV. That's what we're trying to do in the bill now, and that's why we oppose the gentleman's amendment.

The Acting CHAIRMAN. The question is on the amendment offered by the gentleman from Florida (Mr. STEARNS).

The question was taken; and the Acting Chairman announced that the noes appeared to have it.

Mr. STEARNS. Mr. Chairman, I demand a recorded vote.

The Acting CHAIRMAN. Pursuant to clause 6 of rule XVIII, further proceedings on the amendment offered by the gentleman from Florida will be postponed.

AMENDMENT OFFERED BY MRS. SCHMIDT

Mrs. SCHMIDT. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mrs. SCHMIDT:

Page 17, line 14, after the dollar amount insert ''(increased by $80,000,000)''.

Page 21, line 21, after the dollar amount insert ''(reduced by $80,000,000)''.

Mrs. SCHMIDT. Mr. Chairman, I have tremendous respect for our chairman and ranking member and realize the very difficult undertaking they have had in putting this bill together and balancing the number of important priorities within it. Unfortunately, the bill before us would drastically cut the President's request to $405 million for the Global Nuclear Energy Partnership, GNEP, initiative to $120 million. This amounts to a $285 million reduction from the President's request for GNEP.

At the same time, this bill goes well above the President's request for the Department of Energy science account. The President's request for the science account was already a 15.8 percent increase above the fiscal 2007 level. On top of this, the House bill provides another $116 million above the administration's request. My amendment would provide an additional $80 million for the GNEP initiative, offset by an $80 million decrease in the science account.

If we are going to be serious about reducing greenhouse gas emissions, addressing climate change and reducing our dependence on foreign oil, we need to allow GNEP to proceed in a meaningful capacity. To accomplish these

objectives, we need to diversify our energy supply and increase energy efficiency and conservation. Nuclear energy is a vital component to diversifying our energy supply and reducing greenhouse gas emissions. And in order for the nuclear renaissance to become a reality, we must address the spent fuel issue, which is what GNEP is all about.

Recycling spent nuclear fuel is a way to reduce by about 95 percent the volume of waste that would have to be disposed of at the Yucca Mountain repository. Recycling would also enable us to reduce the radioactive life of this material from millions of years to thousands. Whether you support nuclear energy or not, these two points should be very positive if we are going to take better care of our environment.

Since the 1970s, the United States has been falling behind the world in nuclear technology. It is vital that we fund this program at a sufficient level that allows the United States to reestablish itself as a leader in the field.

I appreciate the chairman and ranking member's work on this important issue. I would hope for some favorable comments from them. But I am going to at the end of this discussion ask for unanimous consent to withdraw my amendment in hopes that we can work it out at a later date.

Mr. VISCLOSKY. Mr. Chairman, I move to strike the last word.

Mr. Chairman, I appreciate the gentlelady's concern about research for nuclear energy in the future. I also appreciate the courtesy as far as her willingness to withdraw the amendment.

The concern that the committee had is that the administration came in originally with a $405 million request. During hearings, the administration also suggested that all $405 million was for just research. The concern we have, and I mentioned it in my opening remarks during general debate, is contract management at the Department of Energy. And certainly it's not the fault of the gentlelady's, and I know she shares our concern, but there is a very bad track record at the Department of Energy; and the fact is they have been on a high-risk watch list for the General Accountability Office since the year 1990.

□ 1600

I would point out that the committee learned that the Department of Energy's use of technology readiness levels in the global nuclear energy partnership technology development plan does not apply readiness in the manner consistent with the recommendations in the General Accountability Office report of March of this year.

So, looking ahead as far as potentially incurring huge long-term costs on behalf of the taxpayers, we have suggested that the administration take a step back, continue to do very necessary and very vital research, but let us take all deliberate speed as opposed to a rush to judgment and oppose her amendment, and I appreciate her consideration in withdrawing it.

Mrs. SCHMIDT. Mr. Chairman, I ask unanimous consent to withdraw the amendment, and I thank the chairman for his time and consideration of this and hope that we can work together to make GNEP a reality in a meaningful, bipartisan way so that the United States can continue to be a world leader, not just in nuclear energy but in energy independence from foreign oil.

The Acting CHAIRMAN. Without objection, the amendment is withdrawn.

There was no objection.

The Acting CHAIRMAN. The Clerk will read.

The Clerk read as follows:

CLEAN COAL TECHNOLOGY

(INCLUDING RESCISSION OF FUNDS)

Of the funds made available under this heading for obligation in prior years, $149,000,000 are rescinded.

FOSSIL ENERGY RESEARCH AND DEVELOPMENT

(INCLUDING TRANSFER OF FUNDS)

For necessary expenses in carrying out fossil energy research and development activities, under the authority of the Department of Energy Organization Act (Public Law 95–91), including the acquisition of interest, including defeasible and equitable interests in any real property or any facility or for plant or facility acquisition or expansion, and for the hire of passenger motor vehicles, the hire, maintenance, and operation of aircraft, the purchase, repair, and cleaning of uniforms, the reimbursement to the General Services Administration for security guard services, and for conducting inquiries, technological investigations and research concerning the extraction, processing, use, and disposal of mineral substances without objectionable social and environmental costs (30 U.S.C. 3, 1602, and 1603), $708,801,000 to remain available until expended of which $166,000,000 shall be derived by transfer from ''Clean Coal Technology'', and of which transferred amounts $108,000,000 is available to continue a multi-year project coordinated with the private sector for FutureGen, without regard to the terms and conditions applicable to clean coal technological projects, and of which the remaining $58,000,000 is available for carbon sequestration research and development: *Provided further*, That no part of the sums herein made available shall be used for the field testing of nuclear explosives in the recovery of oil and gas: *Provided further*, That the Secretary of Energy is authorized to accept fees and contributions from public and private sources, to be deposited in a contributed funds account, and prosecute projects using such fees and contributions in cooperation with other Federal, State, or private agencies or concerns: *Provided further*, That revenues and other moneys received by or for the account of the Department of Energy or otherwise generated by sale of products in connection with projects of the Department appropriated under the Fossil Energy Research and Development account may be retained by the the Secretary of Energy, to be available until expended, and used only for plant construction, operation, costs, and payments to cost-sharing entities as provided in appropriate cost-sharing contracts or agreements.

AMENDMENT NO. 19 OFFERED BY MR. KLINE OF MINNESOTA

Mr. KLINE of Minnesota. Mr. Chairman, I offer an amendment.

The Acting CHAIRMAN. The Clerk will designate the amendment.

The text of the amendment is as follows:

Amendment No. 19 offered by Mr. KLINE of Minnesota:

Page 18, line 10, after the dollar amount insert ''(reduced by $142,000,000)''.

Mr. KLINE of Minnesota. Mr. Chairman, my amendment would reduce funding for the fossil energy research and development account in this bill by $142 million. These funds appropriated in this account go toward research of oil, gasoline, coal and natural gas.

Funding this account at $709 million, as in this bill, would be a 19½ percent increase over last year's appropriation amount and 20 percent higher than what was requested by the administration.

This massive increase in spending is aimed at research of oil, coal and natural gas. With energy prices rising, our research dollars are better spent by going toward alternative and diversified energy sources like nuclear, wind, solar, geothermal, hydropower and others.

You may be interested to know that some of the research projects funded by this account include: a submersible-deployed micro-drill for sampling of shallow gas deposits, ultra-lightweight cement, and an oil and gas resource assessment of the Russian Arctic.

Given the record profits being made by oil, gas and coal companies, the research of oil and gas resources of the Russian Arctic should be done and paid for by those oil companies, not by American taxpayers who have already paid for it at the pump.

A half a billion dollars in Federal funds appropriated to this account, as was the case last year, should be more than enough for the government's share of this research.

Any additional funding, and I'm talking about funding over the half a billion dollar plus what's already in last year's bill, any additional funding should be borne by the private sector.

My amendment would save the taxpayers $142 million and remove that 20 percent increase in spending on fossil fuel research.

Solutions to our rising energy prices are not found in a massive increase in deficit spending, and we've been talking a lot about deficit spending today.

Not only does this bill have a 20 percent increase in spending for fossil fuel research, it contains a $1.3 billion increase over last year's Energy and Water appropriation.

It seems that this appropriation bill is another example of ballooning Federal spending and increasing Federal deficits to be paid for by ever-higher taxes.

We know it's been discussed today that the Federal budget that was passed by House Democrats earlier this year does indeed include the largest tax increase in American history. It would raise taxes by at least $217 billion. We're looking for ways to reduce spending, modest ways. That's all that these appropriation bills allow us. We can't address the massive spending that comes from entitlement spending, but we can get at sensible ways to control the spending in these discretionary funds.

My amendment is a step in the right direction. Let's save the taxpayers $142 million and remove this huge 20 percent increase in spending for fossil fuel research.

There have been proposals to put price controls on oil companies. I vehemently oppose those, but I don't think it's unreasonable to ask them to put some of those profits back into this essential research and development, take the burden off the taxpayers. Let's in a bipartisan way support this amendment.

Mr. VISCLOSKY. Mr. Chairman, I move to strike the last word.

Mr. Chairman, I rise in opposition to the gentleman's amendment, and would observe for the House that, again, I am not in total disagreement with some of the assertions and points that he has made.

The fact is, there is no silver bullet as far as solving the energy problems we face today and in the future. He is absolutely correct. That is why the subcommittee has significantly increased funding for biofuels. That's why the subcommittee significantly increased funding for vehicle technology. That's why the subcommittee increased funding for other types of renewables. The gentleman references solar and wind, for example. That's why there's an increase in the hydrogen account. That's why there's an increase as far as maximization of power produced with hydroelectric facilities.

And so what we're trying to do is to strike a balance, and again getting back to my earlier comments about quantity and quality, we are concerned and spoke about it in the bill language, as well as the report language, about the fossil fuel program. I certainly, for one, absolutely believe that we need to do more on the issue of capturing CO_2, and we have done that in this bill. We need to do more as far as in sequestration of that particular gas, but we have to do it intelligently.

The fact is, a FutureGen program that has been initiated under the Department of Energy, from my perspective, took a very bad turn in the road as people continue to look at adding bells and whistles, and we had a colloquy on that particular issue earlier in the day as well.

I would point out that FutureGen, according to the committee report, needs to be refocused as an integrated gasification combined cycle plant with carbon capture and sequestration and drop the ambiguity of other, less critical research components. The committee believes that by streamlining the design to demonstrate these factors, critical goals can be reached in a more timely and fiscally prudent fashion.

So what we're trying to do in the bill is to have a broad range of new energy sources accelerated through increased funding. We have done that with fossil but have not done so blindly. We want to make sure that that money is spent wisely, given the fact that nearly 50 percent of this country's electricity is generated today by coal-powered plants. I absolutely believe that we should pursue this research and would reluctantly oppose the gentleman's amendment.

Mr. HOBSON. Mr. Chairman, I move to strike the last word, and I yield to the gentleman from Pennsylvania (Mr. TIM MURPHY).

Mr. TIM MURPHY of Pennsylvania. Mr. Chairman, I thank the gentleman.

I rise in opposition to this amendment, although I believe it is of value in making sure we question how we spend our money.

I'm concerned that coal provides over 50 percent of our energy source in America. In this bill, there's $108 million for FutureGen which is creating energy from coal without emissions; $73 million for the other clean coal power initiative; and some $376 million has been recommended for the core research and development program, much of that done at the National Energy Technology Research labs, some of which are in my district, and others in West Virginia and Oregon and around the country.

We have a 250-year supply of coal under our Nation's soil. Conversely, other parts of the world that have oil will run out long before we are out of coal.

We have to crack the code in understanding how to create electrical energy out of coal without emissions. It is a monumental and perhaps one of the greatest scientific challenges of our time.

If we're able to do this, we'll be able to create the electrical energy and the power we need to power our factories, to light our homes and run our office buildings. Without this, we will continue to be subject to the whims of countries involved with OPEC who manipulate the price of our energy every day.

A report done this year through MIT called the Future of Coal stated that we need perhaps billions to deal with this issue of finding out how to create energy out of clean coal. It is an important investment and one that we cannot lag on, one that we have to continue to work on.

I certainly encourage all of us to look at ways we can watch for any waste involved with how this money is spent on every level in appropriations; however, I ask that this be one area, where America has abundant supplies of coal, we make sure that we continue to mine our coal because it's one of the few ways that we can do so and create energy without having to worry about the whims of terrorists and OPEC states.

Mr. HOBSON. Mr. Chairman, most of the $142 million proposed as an increase in the account would support research and development of carbon capture and sequestration technology. No matter what energy future one believes in, fossil fuels will play a significant role. This increase would fund the R&D that we've simply got to do to isolate the carbon and store it to reduce emissions.

Mr. NEUGEBAUER. Mr. Chairman, I move to strike the last word.

One of the things that we have to understand that we're talking about today on this floor, we're talking about a lot of different kinds of security. We're talking about energy security. We're also talking about economic security. But really the bottom line we're talking about is jobs in America.

No doubt that energy is a major issue in our country. Our energy dependence becomes a problem, is continuing to be a problem, but what we have to do is go about this in a way that makes sense.

And when we look at, yes, we need to look at additional research in certain areas and additional expenditures in other areas and nuclear, and the gentleman from Florida brought that point forward, the gentleman brings forward the fact that we're increasing things like that by 20 percent. That would be really good if we were spending surpluses, but in fact we're not spending from surpluses, and what we're talking about is deficit spending and what we're talking about is an economic future for our young men and women.

Because you see what we're on the floor here today trying to do. My colleagues and I are trying to save the American taxpayers some money, because we have a leadership on the other side of the aisle that's on a spending spree. They think they have surpluses that they're spending, and in fact we're not.

In fact, we've got a $23 billion increase. We have got these ''funny money'' accounts where we're going to come up with the money from someplace. We all know where that money is coming from. That money is going to come from the American taxpayers because they've already gone on record to say that we're going to pass the largest tax increase in American history. And the way they're going to do that is they're going to tax the rich people.

Well, let's talk about the tax structure in this country today. For example, who are the rich people? We've got 1 percent of the top wage earners in this country already paying 33 percent of the taxes. Now, the next level up, the top 5 percent, they get to pay 54 percent of the taxes, and the top 10 percent get to pay 68 percent of the taxes.

Recently, the Tax Foundation brought forth a point that I think most of us knew, and that is, that three out of every five, that's 60 percent, of America's highest income-bracket payers are small business people. Let me repeat that. Three out of every five of the people who are in the upper bracket, which is the bracket that they want to tax, are small business people.

And what do small business people do? Well, they just do something that's extraordinarily great for America. They create jobs. In fact, they're the largest creator of jobs in this country. And what we did is back in 2003 we said, you know what, we want small businesses to create more jobs, make more economic security for our young people, and so we lowered the taxes.

And what happened? Well, something wonderful. We created 7.8 million new jobs in America. And you know what creating 7.8 million new jobs in America did for us? Well, number one, we have the highest home ownership rate in the history of this country.

□ 1615

More people own a home today than any other time in the history of this Nation. Guess what, more people are employed than any other time in the history of our Nation.

What we have to do, the Speaker of this House stood up on the day that she was sworn in and said, we listened to the people. I don't think they were listening. If they thought the American people were saying we want more spending and more taxes, I think they misunderstood.

If the American people said anything, it is they want a government that's less, that takes less of their money, spends less of their money, lives, spends their money like government spends their money like the American people have to, they have to spend within their limits.

Yes, I will like a 2 percent increase in this and a 2 percent increase in that, but the truth of the matter is, we can't afford it. If we continue on this trend of higher taxes, bigger spending, we are going to see these job numbers begin to talk.

So when you talk about we want more energy-efficient cars, let me tell you, if we don't have anybody that can afford cars in America because they don't have jobs, then what do we need energy-efficient cars for?

Let's be sensible about our policy here. We are making a sufficient amount of commitments to many of these initiatives, but we have to do it in a commonsense way. We have to do it in a way that says, you know what, a 2 percent increase or 3 percent, maybe this program should be eliminated, because this program is not providing any dividends for the American taxpayers.

We measure, around here, what we are doing about our problem by how much money we spend on it. Quite honestly, that's how we got in the situation of these large deficits is because we keep throwing money at problems instead of standing up here on the floor of this House and debating these issues and talking about what is in the best interest of the taxpayers.

I commend the gentleman from Minnesota on his amendment and urge passage.

Mr. GOHMERT. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I read a sign almost every day, they are out in hallways all over, from the Blue Dog Coalition, and as of today, it says today's U.S. national debt, $8.807 trillion; your share, $29,000. There's some of us all the time we have been in the House been trying to do something about that. We have been trying to bring down the deficit. We have been trying to with our own party, the Republicans, with the Democrats now in the majority, get spending reined in.

Also, in our Natural Resources Committee, as well as other committees around, we have been trying to find answers to our energy problem, because, let's face it, we're funding our enemies, people that want to see us, have damage done to our way of life, if not destroyed.

So how do we get around this energy debacle where we keep using fossil fuels that keep funding our enemies? I heard a chairman say a moment ago, there is no silver bullet. I couldn't agree more. We need every single aspect of energy, all of the alternative energies, all of the energy sources we have, that includes drilling the Outer Continental Shelf and areas where it would be safe to do so. It includes drilling in ANWR, the Arctic National Wildlife Reserve in Alaska, and here we've got $142 million that is in issue here.

As the saying goes, $142 million here, $142 million there, before long, we are talking about real money. People in our hometowns, they understand, this is a lot of money, may not be to some of us up here in Washington, but, as we have seen recently, as we have seen recently the last couple of weeks in Natural Resources, people keep wanting to study things, let's study this.

We were ready to go on a biomass program. In the energy bill marked up last week, we are going to back up 10 years and have another study on that. We have these programs ready to go, and we keep wanting to back up and have more studies done.

What we really need to do is just move forward. Some of these studies, when left to the private sector, they are going to recoup their money and their profits. Let them pay for these things. They are making all these profits. Why should we use taxpayer dollars to do that?

So we have coal that if the bill becomes law that was passed out of Resources, it's going to make it harder to utilize the coal we have. All these different alternative energy sources are available, and we keep wanting to use money to study them.

What occurs to me, when I hear there is no silver bullet, is not only do I agree that there is no silver bullet solution, but I keep feeling like, because we keep appointing studies and keep wanting to spend taxpayers' hard-earned money to study things, instead of just going ahead and producing, that the silver bullet may be in the Chamber that's pointed to our Nation's collective head here.

It's time to quit studying. It's time to move forward, it's time to use money for purposes that are not those that should be done by the private sector, and then we can get back to money.

Then, lo and behold, all those folks have been saying we really don't want to raise taxes even though it looks like it's going to be the largest tax increase in American history. All those who say we don't want to raise taxes, it's this $142 million here, $142 million there. Before you know it, we may even be able to lower taxes even further.

So I will encourage my colleagues, let's quit studying, let's quit spending money that could be going back to taxpayers if we are not going to need it for something more pressing, quit studying, start producing and then that silver bullet won't be aimed at our head.

Mr. WALZ of Minnesota. Mr. Chairman, I move to strike the last word.

Mr. Chairman, thank you to the chairman and the ranking member of this committee as we debate a very important piece of legislation in the Energy and Water appropriations bill.

I would like to talk specifically about an issue that is vitally important to literally hundreds of thousands of people in Minnesota, South Dakota, and Iowa. The Lewis and Clark Rural Water System is a unique water project that I am hopeful will receive the appropriate funding as the Energy and Water appropriations bill moves forward.

This Lewis and Clark water project, when completed, will provide safe, reliable drinking water to over 300,000 people in roughly 5,000 square miles of South Dakota, Iowa, and Minnesota. The project will move water from the Missouri River into those areas to provide safe drinking water and the ability of those communities to grow economically.

Minnesota is called the Land of 10,000 lakes. Unfortunately, they are not equally distributed. For example, in Rock County there is not a single natural lake. The lack of water has a profound impact on economic development. Businesses are reluctant to locate or expand because of the lack of reliable water.

I literally have communities that I represent that cannot permit a single new home to be built until someone moves out because their water shortages are that severe. Seventeen of the 20 local municipalities that are participating in this project, and I repeat on this and say it very carefully, have prepaid $87 million of their local share of the expenses in order to keep inflationary costs at a minimum. Additionally, all three States involved, Minnesota, South Dakota and Iowa, have committed to prepay on the project as well.

Unfortunately, the Federal Government is the partner that's lacking. My constituents, the people of South Dakota and Iowa, clearly understand expenditures of Federal dollars for investments are not necessarily wasteful. If the Lewis and Clark Rural Water System receives its full $35 million in requests this year, this project will be completed by 2018. However, if we are funded at the level President Bush has requested in his 2008 budget, we will not see completion until past 2051.

The 300,000 people of Minnesota, South Dakota, and Iowa can't wait that long. Previous Congresses have created a significant budget crisis. I hear my colleagues mentioning that, and they're absolutely right. We spent at deficit records. We created a national debt that is staggering, but we cannot be penny-wise and pound-foolish.

The longer we take to provide appropriate Federal funds, the more this project is going to cost, and it is already being built. It is already being prepaid, and it will produce significant economic gains for us.

I look forward to working with the chairman and ranking member to make sure this project is appropriately funded.

Mr. GARRETT of New Jersey. Mr. Chairman, I move to strike the last word.

Before I begin, let me just say I concur with the gentleman from Minnesota on his priorities that he is setting forth, and I cannot honestly say that I am familiar with each and every aspect of the provisions that he is raising there; but from his testimony before the House right now, they seem to at least rise to the level of significance, especially when you go to the concern of making sure that people need to have adequate drinking supply. So I appreciate him coming to the floor and making that point.

I think the gentleman's point coincides with the point that I wish to make right now in support of the gentleman's amendment that is on the floor before us right now, and that is that it's incumbent upon this House and this body to set priorities. The American public asks no less of us, inasmuch as we are spending their hard-earned tax dollars. The American public has seen the misapplication of setting of priorities of this House in past administrations and past Houses in the past.

The American public has been outspoken when they saw, with regard to what happened with Katrina, and the infamous case of buying of FEMA trailers, literally thousands of them, that were then set on land and never used for their rightful purposes. The American public was outraged when they said the priorities were not appropriately spent with their tax dollars in that instance.

Likewise we were outraged when they heard about the proverbial ''bridge to nowhere.'' Again they asked were not priorities set as to where their tax dollars go when it comes to transportation purposes.

Again, finally in the area of earmarks, and the latter point raises the earmarks. When the American public hears about the litany of earmarks that come out of both this House and Senate as well, the Cowgirl Hall of Fame and other such things, again the American public asks are priorities not set on these matters, again, with their hard-earned tax dollars.

Well, the American public spoke this last November and at least this side of the aisle heard them loud and clear. We must set appropriate priorities when it comes to the American tax dollars.

Unfortunately, unfortunately, the priorities that seem to be coming from the other side of the aisle in the majority of cases are not the appropriate priorities that the American public would set for themselves. Priority number one from the other side of the aisle is a budget which raises taxes, the largest tax increase in U.S. history upon the American family.

Priority number two from the other side of the aisle appears to be an increase in spending with little or no regard to accountability or cutting spending in any areas. We see that in this case.

When I hear the arguments made, both pro and con in this bill, I am taken aback. All this amendment simply does is to say that the American taxpayer dollars should not be there and spent to subsidize Big Oil.

We had similar language in legislation last year. I know I supported it saying that the American taxpayer, in light of oil now being sold at over $60 a barrel, should not be forced into a situation anymore to support Big Oil in coal industries when it comes to these things through tax credits and tax cuts. I supported those, saying the American public in that regard.

But, now, today, when we have a Member, Congressman KLINE, saying let's at least rein in, let's at least set some priorities as to where our energy dollars should go, let's go to those areas, as the gentleman here said, perhaps some who support carbon capture issues; let's have some of those dollars, as a Member from the other side of the aisle says, go to renewable energy resources, whether it be wind, water or geothermal or et cetera. Let those dollars go to those areas, but let's set the priorities of those dollars to go specifically to those areas and not on extraneous purposes, as we saw in this bill.

Congressman KLINE gave a couple of examples that really just threw me when I heard them once again. The American public must really scratch their head, as I did, when they say, should we be giving, as Congressman KLINE said, given the record profits being made by oil, gas and coal, the research of oil and gas resources of the Russian Arctic should be done and paid for by those oil companies and not by American taxpayers. This amendment simply goes to make sure that occurs.

Likewise, again in the Arctic area, submersible deployed microdrill sampling, ultralight cement and oil and gas resource assessments in that area. Who should be paying for that? The American public?

We already pay for that when we go to the pump each time. Shouldn't it be the oil companies who should make it a private investment and not the American tax borrowers? This amendment simply says let's set those priorities, let's reduce spending on those areas and make sure that we have the dollars from the American public to spend on those other areas, be they renewable energy or otherwise.

□ 1630

The Acting CHAIRMAN. The question is on the amendment offered by the gentleman from Minnesota (Mr. KLINE).

The question was taken; and the Acting Chairman announced that the noes appeared to have it.

Mr. KLINE of Minnesota. Mr. Chairman, I demand a recorded vote.

The Acting CHAIRMAN. Pursuant to clause 6 of rule XVIII, further proceedings on the amendment offered by the gentleman from Minnesota will be postponed.

Mr. VISCLOSKY. Mr. Chairman, I move that the Committee do now rise.

The motion was agreed to.

Accordingly, the Committee rose; and the Speaker pro tempore (Mrs. JONES of Ohio) having assumed the chair, Mr. POMEROY, Acting Chairman of the Committee of the Whole House on the state of the Union, reported that that Committee, having had under consideration the bill (H.R. 2641) making appropriations for energy and water development and related agencies for the

fiscal year ending September 30, 2008, and for other purposes, had come to no resolution thereon.

REPORT ON RESOLUTION PROVIDING FOR CONSIDERATION OF H.R. 2764, THE DEPARTMENT OF STATE, FOREIGN OPERATIONS AND RELATED PROGRAMS APPROPRIATIONS ACT, 2008

Ms. SLAUGHTER, from the Committee on Rules, submitted a privileged report (Rept. No. 110–199) on the resolution (H. Res. 498) providing for consideration of the bill (H.R. 2764) making appropriations for the Department of State, foreign operations, and related programs for the fiscal year ending September 30, 2008, and for other purposes, which was referred to the House Calendar and ordered to be printed.

PROVIDING FOR FURTHER CONSIDERATION OF H.R. 2641, ENERGY AND WATER DEVELOPMENT AND RELATED AGENCIES APPROPRIATIONS ACT, 2008

Mr. VISCLOSKY. Madam Speaker, I ask unanimous consent that during further consideration of H.R. 2641 in the Committee of the Whole pursuant to House Resolution 481, notwithstanding clause 11 of rule XVIII, no amendment to the bill may be offered except:

Pro forma amendments offered at any point in the reading by the chairman or ranking minority member of the Committee on Appropriations or their designees for the purpose of debate;

An amendment by Mr. FORBES regarding a study of certain river basins;

An amendment by Mr. WYNN regarding hydrogen research;

An amendment by Mr. HENSARLING regarding funding for DOE Electricity Delivery and Energy Reliability;

An amendment by Mr. SHADEGG regarding funding for hydropower incentives;

An amendment by Mr. PORTER regarding Yucca Mountain;

An amendment by Mr. PRICE of Georgia regarding funding for the Advanced Fuel Cycle Initiative;

An amendment by Mr. BURGESS regarding funding for fossil energy;

An amendment by Mrs. WILSON of New Mexico regarding funding for medical imaging;

An amendment by Mr. UPTON or Mr. TOWNS regarding funding for nuclear energy loan guarantees;

An amendment by Mr. HENSARLING regarding funding for DOE Departmental Administration;

An amendment by Mr. MATHESON regarding funding for contract oversight;

An amendment by Mrs. TAUSCHER regarding weapons dismantlement activities;

An amendment by Mr. UDALL of New Mexico regarding funding for weapons activities;

An amendment by Mrs. SCHMIDT regarding a prohibition on Global Nuclear Energy Partnership funds for certain nuclear waste storage;

An amendment by Mr. SPACE regarding funding for the Appalachian Regional Commission;

An amendment by Mr. NEUGEBAUER regarding funding for the Appalachian Regional Commission;

An amendment by Mr. HENSARLING regarding funding for the Denali Commission;

An amendment by Ms. BERKLEY limiting use of funds for the Yucca Mountain Youth Website educational campaign;

An amendment by Mr. BISHOP of New York, Mr. COURTNEY, or Ms. DELAURO limiting use of Federal Energy Regulatory Commission funds to review a particular application;

An amendment by Mr. CONAWAY regarding use of reductions made through amendments for deficit reduction;

An amendment by Mr. KING of Iowa regarding actions to mitigate global warming;

An amendment by Mr. MURPHY of Connecticut limiting use of Federal Energy Regulatory Commission funds for certain permit actions;

An amendment by Mrs. MUSGRAVE regarding an across-the-board reduction in funding;

An amendment by Mr. PRICE of Georgia regarding an across-the-board reduction in funding, which shall be debatable for 30 minutes;

An amendment by Mr. UPTON or Ms. HARMAN regarding use of Energy Star certified light bulbs;

An amendment by Mr. SHADEGG limiting use of funds to breach or remove hydropower dams;

An amendment by Mr. HINCHEY or Mr. WOLF limiting use of funds for designation of transmission corridors, which shall be debatable for 20 minutes;

An amendment by Mr. GOHMERT limiting use of funds for a certain settlement regarding the National Resources Defense Council;

An amendment by Mr. CAMPBELL of California reducing funds in the bill, which shall be debatable for 30 minutes;

An amendment by Mr. CAMPBELL of California reducing funds in the bill, which shall be debatable for 30 minutes;

An amendment by Mr. OBEY regarding earmarks;

An amendment by Mr. GARRETT of New Jersey limiting the use of funds for international conferences;

An amendment by Mr. HOBSON limiting use of funds for the Mental Illness and Neuroscience Discovery Institute in New Mexico; and

An amendment or amendments by Mr. VISCLOSKY regarding funding levels.

Each such amendment may be offered only by the Member named in this request or a designee, shall be considered as read, shall not be subject to amendment except that the chairman and ranking minority member of the Committee on Appropriations and the Subcommittee on Energy and Water Development each may offer one pro forma amendment for the purpose of debate; and shall not be subject to a demand for division of the question in the House or in the Committee of the Whole.

Except as otherwise specified, each amendment shall be debatable for 10 minutes equally divided and controlled by the proponent and an opponent. An amendment shall be considered to fit the description stated in this request if it addresses in whole or in part the object described.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Indiana?

Mr. HOBSON. Madam Speaker, reserving the right to object, I need a point of clarification on the amendment here on the UC. It's my understanding that this says that no amendment to the bill will be offered except the following; but that there will be another UC later that will come forward that will allow the additional supplemental, to allow that to come into the bill at a later date. Am I correct on that?

Mr. VISCLOSKY. My understanding is there would be an additional UC, a unanimous consent request, or a new rule for the supplemental report that would come up.

Mr. HOBSON. Well, I don't think they want a new rule. I think they just want the understanding that there will be the provision that comes forth with the supplemental material coming into the bill. That was the understanding I thought was reached in the UC. Am I correct?

Mr. VISCLOSKY. My understanding is that we would agree to a UC.

Mr. HOBSON. I don't think they want a new rule. I think the point is they don't want to go back to Rules again to bring the supplemental material back into the bill at the later date, and that is basically the earmark provision of the bill. Am I correct?

Mr. VISCLOSKY. That's fine. Yes, sir.

Mr. HOBSON. Madam Speaker, I withdraw my reservation based on that understanding.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Indiana?

There was no objection.

ENERGY AND WATER DEVELOPMENT AND RELATED AGENCIES APPROPRIATIONS ACT, 2008

The SPEAKER pro tempore. Pursuant to House Resolution 481 and rule XVIII, the Chair declares the House in the Committee of the Whole House on the state of the Union for the further consideration of the bill, H.R. 2641.

□ 1640

IN THE COMMITTEE OF THE WHOLE

Accordingly, the House resolved itself into the Committee of the Whole House on the state of the Union for the further consideration of the bill (H.R. 2641) making appropriations for energy and water development and related agencies for the fiscal year ending September 30, 2008, and for other purposes, with Mr. POMEROY (Acting Chairman) in the chair.

The Clerk read the title of the bill.

The Acting CHAIRMAN. When the Committee of the Whole rose earlier today, a request for a recorded vote on amendment No. 19 by the gentleman from Minnesota (Mr. KLINE) had been postponed.

Pursuant to the order of the House of today, no further amendment to the bill may be offered except those specified in the previous order of the House of today, which is at the desk.

The Clerk will read.

The Clerk read as follows:

NAVAL PETROLEUM AND OIL SHALE RESERVES

For expenses necessary to carry out naval petroleum and oil shale reserve activities, including the hire of passenger motor vehicles, $17,301,000, to remain available until expended: *Provided*, That, notwithstanding any other provision of law, unobligated funds remaining from prior years shall be available for all naval petroleum and oil shale reserve activities.

STRATEGIC PETROLEUM RESERVE

For necessary expenses for Strategic Petroleum Reserve facility development and operations and program management activities pursuant to the Energy Policy and Conservation Act (42 U.S.C. 6201 et seq.), including the hire of passenger motor vehicles, the hire, maintenance, and operation of aircraft, the purchase, repair, and cleaning of uniforms, the reimbursement to the General Services Administration for security guard services, $163,472,000, to remain available until expended.

NORTHEAST HOME HEATING OIL RESERVE

For necessary expenses for Northeast Home Heating Oil Reserve storage, operation, and management activities pursuant to the Energy Policy and Conservation Act, $5,325,000, to remain available until expended.

ENERGY INFORMATION ADMINISTRATION

For necessary expenses in carrying out the activities of the Energy Information Administration, $105,095,000, to remain available until expended.

NON-DEFENSE ENVIRONMENTAL CLEANUP

For Department of Energy expenses, including the purchase, construction, and acquisition of plant and capital equipment and other expenses necessary for non-defense environmental cleanup activities in carrying out the purposes of the Department of Energy Organization Act (42 U.S.C. 7101 et seq.), including the acquisition or condemnation of any real property or any facility or for plant or facility acquisition, construction, or expansion, and the purchase of not to exceed three passenger motor vehicles for replacement only, $286,041,000, to remain available until expended, of which $250,937,000 is for non-defense environmental cleanup and $35,104,000 is for non-defense legacy management.

URANIUM ENRICHMENT DECONTAMINATION AND DECOMMISSIONING FUND

For necessary expenses in carrying out uranium enrichment facility decontamination and decommissioning, remedial actions, and other activities of title II of the Atomic Energy Act of 1954 and title X, subtitle A, of the Energy Policy Act of 1992, $618,759,000, to be derived from the Fund, to remain available until expended, of which $20,000,000 shall be available in accordance with title X, subtitle A, of the Energy Policy Act of 1992.

SCIENCE

For Department of Energy expenses including the purchase, construction and acquisition of plant and capital equipment, and other expenses necessary for science activities in carrying out the purposes of the Department of Energy Organization Act (42 U.S.C. 7101 et seq.), including the acquisition or condemnation of any real property or facility or for plant or facility acquisition, construction, or expansion, and purchase of not to exceed 30 passenger motor vehicles for replacement only, $4,514,082,000, to remain available until expended.

NUCLEAR WASTE DISPOSAL

For nuclear waste disposal activities to carry out the purposes of the Nuclear Waste Policy Act of 1982, Public Law 97–425, as amended (the ''Act''), including the acquisition of real property or facility construction or expansion, $202,454,000, to remain available until expended, and to be derived from the Nuclear Waste Fund: *Provided*, That of the funds made available in this Act for Nuclear Waste Disposal, $2,500,000 shall be provided to the State of Nevada solely for expenditures, other than salaries and expenses of State employees, to conduct scientific oversight responsibilities and participate in licensing activities pursuant to the Act: *Provided further*, That notwithstanding the lack of a written agreement with the State of Nevada under section 117(c) of the Nuclear Waste Policy Act of 1982, Public Law 97–425, as amended, not less than $1,200,000 shall be provided to Nye County, Nevada, for on-site oversight activities under section 117(d) of that Act: *Provided further*, That $4,000,000 shall be provided to affected units of local government, as defined in the Act, to conduct appropriate activities and participate in licensing activities: *Provided further*, That 7.5 percent of the funds provided shall be made available to affected units of local government in California with the balance made available to affected units of local government in Nevada for distribution as determined by the Nevada units of local government: *Provided further*, That notwithstanding the provisions of chapters 65 and 75 of title 31, United States Code, the Department of Energy shall have no monitoring, auditing or other oversight rights or responsibilities over amounts provided to affected units of local government under this heading: *Provided further*, That the funds for the State of Nevada shall be made available solely to the Nevada Division of Emergency Management by direct payment and units of local government by direct payment: *Provided further*, That within 90 days of the completion of each Federal fiscal year, the Nevada Division of Emergency Management and the Governor of the State of Nevada shall provide certification to the Department of Energy that all funds expended from such payments have been expended for activities authorized by the Act and this Act: *Provided further*, That failure to provide such certification shall cause such entity to be prohibited from any further funding provided for similar activities: *Provided further*, That none of the funds herein appropriated may be: (1) used directly or indirectly to influence legislative action, except for normal and recognized executive-legislative communications, on any matter pending before Congress or a State legislature or for lobbying activity as provided in 18 U.S.C. 1913; (2) used for litigation expenses; or (3) used to support multi-State efforts or other coalition building activities inconsistent with the restrictions contained in this Act: *Provided further*, That all proceeds and recoveries realized by the Secretary of Energy in carrying out activities authorized by the Act, including but not limited to, any proceeds from the sale of assets, shall be available without further appropriation and shall remain available until expended: *Provided further*, That no funds provided in this Act may be used to pursue repayment or collection of funds provided in any fiscal year to affected units of local government for oversight activities that had been previously approved by the Department of Energy, or to withhold payment of any such funds.

AMENDMENT OFFERED BY MR. PORTER

Mr. PORTER. Mr. Chairman, I offer an amendment.

The Acting CHAIRMAN. The Clerk will designate the amendment.

The text of the amendment is as follows:

Amendment offered by Mr. PORTER:

Page 21, strike line 22 and all that follows through page 24, line 9.

The Acting CHAIRMAN. Pursuant to the order of the House of today, the gentleman from Nevada (Mr. PORTER) and a Member opposed each will control 5 minutes.

The Chair recognizes the gentleman from Nevada.

Mr. PORTER. Mr. Chairman, I appreciate this opportunity. I'd like to thank my colleagues, Congresswoman SHELLEY BERKLEY from Nevada and Congressman DEAN HELLER for being cosponsors.

I'd like to talk for a moment about the infamous Yucca Mountain project, probably the most studied piece of real estate on the planet as we know it today. That is because the Department of Energy and Members of this Congress are trying to prove to the American people that the Yucca Mountain project is safe.

Unfortunately, in the last budget of last year, 60 percent of that budget was spent redoing problems with a broken project at Yucca Mountain.

Mr. Chairman, it's broken. Study after study after study have proven that it's a broken project; not only broken, but it's a colossal waste of taxpayers' dollars. Thousands, if not millions of millions of dollars have been

spent on investigating the Yucca Mountain project to look at their flaws.

My committee last year alone, we looked at thousands of e-mails where the science had been falsified. They've spent over $20 million fixing the project from the research that we had done in my committee.

Mr. Chairman, if it was Wall Street that was looking at this project, they would shut it down. Most every senior management personnel at Yucca Mountain and the Department of Energy regarding the disposal of nuclear waste have either quit or left the project.

Terrorism is another issue. We're trying to put millions and millions of tons of nuclear waste in one spot. It creates an additional terrorist target.

It's an unproven science, but yet we're going to roll this nuclear waste through communities across our country.

Mr. Chairman, the bottom line, even if I supported the project, which I don't, even if I was a nuclear industry, which I'm not, I would say it's the biggest waste of taxpayers' dollars. It's literally a hole in the ground.

I would encourage that Members of this Congress visit Yucca Mountain. It is a $12 billion waste of money. If I were the nuclear industry, if I were this Congress, I would find another site. I would store it on site or find some other location.

The science is broken. Time and time again, we have found that it's a flawed project, it's flawed science. If it were another project, if it was a school bus, if was a space shuttle, with this many errors and this many problems we would stop the project.

I encourage this Congress to support my amendment striking $202 million from this very flawed project.

□ 1645

Mr. Chairman, I reserve the balance of my time.

Mr. VISCLOSKY. Mr. Chairman, I rise in opposition to the amendment.

The Acting CHAIRMAN. The gentleman from Indiana is recognized for 5 minutes.

Mr. VISCLOSKY. Mr. Chairman, the gentleman's amendment would eliminate all nondefense funding for Yucca Mountain. High-level radioactive waste exists in over 38 States. I believe it is irresponsible to leave it where it is forever, and it is essential to have a repository where it can be safely left for up to a million years while the radioactivity decays away.

This waste comes from maintaining our nuclear weapons stockpile and from spent fuel from civilian nuclear reactors that generate 20 percent of all electricity in the United States.

Yucca was chosen by Congress in 1982 as a permanent geological repository for high-level waste and billions have been spent to characterize the site and prepare for licensing and construction.

Failure to open Yucca Mountain and take custody of commercial spent nuclear fuel will cost the taxpayers over $7 billion by 2017 when the repository could open. Cutting funding and delaying the filing of a license application by only a year will simply exacerbate the problem and increase this cost by more than a half billion dollars.

Failure to proceed with a reasonable approach to disposing of spent nuclear fuel will cause the Nuclear Regulatory Commission to stop licensing new nuclear reactors and extending the licenses of existing plants. Every new and extended license must satisfy the waste confidence clause. So this amendment will constrain our ability to grow our economy without emitting any more greenhouse gasses. In the coming years, it will choke off nearly 20 percent of U.S. electricity generated by nuclear power plants.

And, again, we have tried to strike a very reasoned balance in this bill as far as funding for the repository and other programs to initiate a sound nuclear industry in the short term, and I am opposed to the gentleman's amendment.

Mr. Chairman, I reserve the balance of my time.

Mr. PORTER. Mr. Chairman, I yield 2 minutes to my friend and an adamant opponent of Yucca Mountain, SHELLEY BERKLEY from Nevada.

Ms. BERKLEY. Mr. Chairman, I want to thank my colleague for this very thoughtful amendment.

The Yucca Mountain project is a failure. Twenty years after Nevada was unfairly singled out as the proposed dumpsite for this Nation's radioactive garbage, the only waste at Yucca Mountain is the $12 million that has now been wasted on this ridiculous proposal.

Plans for Yucca Mountain threaten the safety of the families I represent and the lives of 50 million Americans who will be at risk from shipments of toxic radioactive garbage headed to Yucca Mountain. One spill involving this deadly nuclear waste could make people sick, die, and shut down our roads and railways, and cost millions to clean up.

Nuclear waste shipments are also prime targets for terrorists looking to unleash radiation on unsuspecting communities or to steal material needed to make a dirty bomb. Current plans call for thousands of nuke waste shipments on America's roads and railways, each one vulnerable to a handheld missile or 9/11-style suicide attack, the results of which could be devastating.

Decades of ''mobile Chernobyls'' passing by homes, schools, hospitals, houses of worship, each an accident waiting to happen. And believe me, Mr. Chairman, our first responders have no training and no resources needed to deal with incidents involving these nuclear waste shipments.

We talk about money and saving money by putting more money into Yucca Mountain? We have absolutely no idea how much Yucca Mountain is going to cost because there is no cost estimate. We have no time estimates. We have no radiation standards. We don't have canisters that currently exist that can store this nuclear waste and not have the nuclear material leach into the groundwater that is going to pollute all of the Southwestern United States water supplies.

Now, if we want to do something for the American people, let's end this ridiculous folly before it costs us any more money. We have the power to do it in Congress. It is time that we stop this ridiculous proposal.

Mr. VISCLOSKY. Mr. Chairman, I yield such time as he may consume to the ranking member, Mr. HOBSON, in opposition to the amendment.

Mr. HOBSON. Mr. Chairman, I rise in opposition to the gentleman from Nevada's amendment, as he might expect and as his colleague might expect.

At some point we all have to go beyond parochial politics and do the right thing for the entire Nation. This is a NIMBY approach: ''Not in my backyard.'' Under any scenario you might imagine, from the construction of new nuclear power plants to shutting down all existing plants tomorrow, from continuing with the once-through fuel to cycle to beginning to recycle our spent nuclear fuel, we will need the first repository at Yucca Mountain. If we pursue recycling, we can avoid the need to build eight more Yucca Mountains, but we still need that first repository.

The Federal Government has a statutory and contractual obligation, already adjudicated in the courts. It is costing us money by not getting it operational on Yucca Mountain.

But this is not solely a question about what to do with commercial spent fuel. One-tenth of Yucca's capacity by weight, and up to one-third of its capacity by volume, is dedicated to defense spent fuel and high-level waste.

Without Yucca Mountain this material will stay put in places like Hanford, Idaho, Savannah River, and West Valley. Many of these sites already have enforceable cleanup agreements requiring these materials to be shipped off to the geologic repository.

I would like to think we don't need a repository, but we do need a repository. We need it now, not 100 years. We need to move forward with this. And my real desire is that we won't have to build eight of them someplace and certainly not in Nevada. But we have got to finish this one off. It is a waste of taxpayers' money not to do it.

I urge opposition to this amendment.

Mr. PORTER. Mr. Chairman, I appreciate the comments of my colleague from Ohio. But I believe there are Members of Congress that are in a rush

to find a place. They have spent 20 years in a rush. And in the midst of that time, we have created a project that is a colossal waste of taxpayers' dollars. We need to find a site that is safe.

I support nuclear energy. I do not support the waste being in Nevada because it is absolutely broken.

Mr. Chairman, I appreciate this time and encourage this Congress to stop the funding of this very flawed project and find a site that is safe for the American people.

Mr. HELLER of Nevada. Mr. Chairman, I rise today in strong support of the Porter-Heller-Berkley amendment to the Energy and Water Appropriations Act for fiscal year 2008. This amendment would strike the funding for the proposed Yucca Mountain site, and help end this enormous financial disaster for the taxpayers and for Nevada.

Colleagues, Yucca Mountain is in my district, Nevada's Second District.

Our State has been dealing with this issue for literally decades, the Federal Government has spent billions of dollars, and we are frankly almost no closer today to opening this site than we were years ago.

As has been stated by my Nevada colleagues, over the past 20 years the proposed site has suffered from gross mismanagement, faulty science and research, and contract mismanagement.

But we aren't just opposed to this site in an arbitrary manner. In fact, a number of solutions exist that are acceptable and safer, like dry-cask storage for example.

If you're opposed to nuclear waste traveling through your communities, creating safety and security hazards in your neighborhoods, then you should support this amendment.

If you're concerned about the taxpayers, wasting their funds, and the wise stewardship of Federal tax dollars, then support this amendment.

Both Senators, the Governor and the House delegation are united in opposition to Yucca Mountain. That should send a very clear message to us here in the House about the opposition in Nevada.

Support the Porter-Heller-Berkley amendment.

Mr. PORTER. Mr. Chairman, I yield back the balance of my time.

Mr. VISCLOSKY. Mr. Chairman, I yield back the balance of my time.

The Acting CHAIRMAN. The question is on the amendment offered by the gentleman from Nevada (Mr. PORTER).

The question was taken; and the Acting Chairman announced that the noes appeared to have it.

Mr. PORTER. Mr. Chairman, I demand a recorded vote.

The Acting CHAIRMAN. Pursuant to clause 6 of rule XVIII, further proceedings on the amendment offered by the gentleman from Nevada will be postponed.

The Clerk will read.

The Clerk read as follows:

ENVIRONMENT, SAFETY AND HEALTH

For Department of Energy expenses for Environment, Safety, and Health activities, $31,625,000, to remain available until expended.

TITLE 17 INNOVATIVE TECHNOLOGY LOAN GUARANTEE LOAN PROGRAM

Subject to the Federal Credit Reform Act of 1990, as amended, during fiscal year 2008 commitments to guarantee loans under title XVII of the Energy Policy Act of 2005 shall not exceed a total principal amount, any part of which is to be guaranteed, of $7,000,000,000: *Provided*, That of that amount, $2,000,000,000 shall be available for carbon sequestration optimized coal power plants, $4,000,000,000 shall be available for projects that promote biofuels and clean transportation fuels, and $1,000,000,000 shall be available for electric transmission facilities or renewable power generation systems: *Provided further*, That pursuant to section 1702(b)(2) of the Act, no appropriations are available to pay the subsidy cost of such guarantees: *Provided further*, That the source of payments received from borrowers for the subsidy cost shall not be a loan or other debt obligation that is made or guaranteed by the Federal Government.

AMENDMENT NO. 10 OFFERED BY MR. UPTON

Mr. UPTON. Mr. Chairman, I offer an amendment.

The Acting CHAIRMAN. The Clerk will designate the amendment.

The text of the amendment is as follows:

Amendment No. 10 offered by Mr. UPTON:

Page 24, line 20, after the dollar amount, insert ''(increased by $4,000,000,000)''.

Page 24, after line 22, insert ''$4,000,000,000 shall be available for advanced nuclear energy facilities,''.

The Acting CHAIRMAN. Pursuant to the order of the House of today, the gentleman from Michigan (Mr. UPTON) and a Member opposed each will control 5 minutes.

The Chair recognizes the gentleman from Michigan.

Mr. UPTON. Mr. Chairman this amendment that I am introducing, which I will subsequently withdraw, expresses my concern about the committee's action to cap loan guarantees at $7 billion for new energy projects designed to reduce carbon emissions.

And before I ask unanimous consent to withdraw the amendment, I am going to ask the chairman to enter into a colloquy with myself, and I will also submit remarks from Mr. TOWNS, coauthor with me; as well as my ranking member of the Energy and Commerce Committee, Mr. BARTON.

Mr. Chairman, under the Energy Policy Act of 2005, the Congress authorized funding to provide loan guarantees for any technology which reduces carbon emissions. That was designed to help a vast array of technologies such as wind, solar, clean coal, ethanol, and nuclear. Your committee excluded new nuclear plants as one of the technologies eligible for loan guarantees under the 2005 Energy Policy Act. And as a supporter of nuclear power, I oppose that exclusion. I am concerned that this may delay new projects that are being planned, and I am hopeful that these concerns can be addressed when you reach a conference with the Senate.

I would also note that the authorization in the energy appropriation bill is just that, an authorization. No appropriation is required. It is a standard practice that Federal loan guarantee programs have an annual loan volume authorization in an appropriations bill and that the program which is authorized in title 17 of the Energy Policy Act is unique. We must remember that it is self-financing and requires no taxpayer funds. Utilities that are building these plants will pay all of the costs associated with the program, including administrative costs of processing the loan guarantee applications and the credit subsidy cost of issuing the loan guarantee itself.

So, Mr. Chairman, I would like you to help us if you can address these concerns.

Mr. VISCLOSKY. Mr. Chairman, will the gentleman yield?

Mr. UPTON. I yield to the chairman of the subcommittee, my good friend, Mr. VISCLOSKY.

Mr. VISCLOSKY. Mr. Chairman, I appreciate the gentleman's yielding.

And I want to acknowledge that we in Congress authorized the loan guarantee program for advanced technology that addresses clean air and climate concerns. The Federal Credit Reform Act explicitly states that loan obligations can only be made to the extent there is an affirmative action on the part of the Appropriations Committee.

The Federal Credit Reform Act provides that new direct loan obligations may be incurred and new loan guarantee commitments may be made for fiscal year 1992 and thereafter only to the extent that, one, new budget authority is provided in an appropriations act; and, two, a limitation on the use of funds for the cost of a loan guarantee has been ''provided in an appropriations act''; or, three, ''authority is otherwise provided in appropriations acts.''

However, it is the implementation of this program that has raised the concerns of the committee. Our fiscal year 2008 bill does not provide loan guarantees for the nuclear industry. The request for guaranteed loans from the Nuclear Energy Association, subsidized by the Federal Government, is very large. It overwhelms what the bill provides for the entire energy community. The administration had asked for a total of $4 billion for the nuclear energy industry and the coal industry. This does not come close to what the Nuclear Energy Association has indicated they need. The Nuclear Energy Association indicates a need for $25 billion in Federal guaranteed loans for fiscal year 2008 and more than that in fiscal year 2009. The ''system,'' meaning the DOE loan guarantee infrastructure, cannot accommodate a request of this size at this time.

I would also point out that the fiscal year 2006 joint continuing resolution

included $4 billion in Incentives For Innovative Technology loan guarantees for the Department of Energy to execute, without defining which technologies to target. The Congress did not limit the use of this initial $4 billion for nuclear projects. The administration chose not to make these loans available to the nuclear community.

□ 1700

I believe in the ''go slow approach.'' We should take all deliberate speed for the new DOE programs. I recommend this approach to the Congress on this one based on my continuing concerns about how DOE has managed it to date. I am, however, open to new information about the industry's plan for innovative technology deployment and discussion about how DOE can implement the program. I pledge to work with the gentleman to see if we can come to an agreeable solution.

Mr. UPTON. I thank the gentleman for the helpful understanding. I look forward to working with you and Mr. HOBSON.

Mr. BARTON of Texas. Mr. Chairman, I thank the Gentleman. I rise to associate myself with the remarks of my good friends from Michigan and New York in support of this amendment. Nuclear power must be a part of our future energy supply. Companies that are planning to build new nuclear plants estimate that they will request a loan of $20 to $25 billion in FY '08. The companies expect to complete loan guarantee agreements in FY '08 because they must have financing in place in order to maintain their current schedules. Without loan guarantees for new nuclear plants, we risk a delay in bringing more safe and emission free nuclear plants online at a time when we are trying to diversify our supplies of power as quickly as possible. I thank the Gentleman for yielding me this time and I yield back.

Mr. TOWNS. Mr. Chairman, I thank the Gentleman. Mr. Chairman, I rise in support of this amendment which also goes to the heart of my concerns that certain technologies were excluded from receiving loan guarantees. Nuclear power emits no greenhouse gases and needs to be part of the solution towards addressing the concerns of climate change. In some cases, companies have stated that without loan guarantees, plans for new nuclear plants will be abandoned in favor of other forms of generating capacity to meet the growing demand for baseload electricity. This will not serve our nation's energy security and environmental interests. The Export-Import Bank has billions of dollars of loan guarantees available for financing these types of projects overseas. Some people joke that it would be easier to build a nuclear plant in Mexico rather than in New Mexico. Mr. Chairman, I ask if I could work with you to address these concerns as we move towards a conference with the Senate and I yield back to the Gentleman from Michigan.

Mr. UPTON. Mr. Chairman, at this point I would ask unanimous consent to withdraw my amendment.

The Acting CHAIRMAN. Without objection, the amendment is withdrawn.

There was no objection.

Mr. VISCLOSKY. Mr. Chairman, I ask unanimous consent that the gentlewoman from California (Mrs. TAUSCHER) be allowed to offer her amendment at this time.

The Acting CHAIRMAN. Is there objection to the request of the gentleman from Indiana?

There was no objection.

AMENDMENT NO. 6 OFFERED BY MRS. TAUSCHER

Mrs. TAUSCHER. Mr. Chairman, I offer an amendment.

The Acting CHAIRMAN. The Clerk will designate the amendment.

The text of the amendment is as follows:

Amendment No. 6 offered by Mrs. TAUSCHER:

Page 27, line 4, after ''expended'' insert the following: '': *Provided*, That $173,250,000 of the amounts provided are available for nuclear weapons dismantlement activities at Department of Energy facilities authorized for such activities, of which $91,000,000 is for the Pit Disassembly and Conversion Facility Project at the Savannah River Site, South Carolina''.

The Acting CHAIRMAN. Pursuant to the order of the House of today, the gentlewoman from California (Mrs. TAUSCHER) and a Member opposed each will control 5 minutes.

The Chair recognizes the gentlewoman from California.

Mrs. TAUSCHER. Mr. Chairman, this amendment has been discussed with the Energy and Water Development Subcommittee, and I understand it is acceptable to the chairman and the ranking member.

Before explaining my amendment, I want to congratulate Chairman VISCLOSKY and Ranking Member HOBSON for the bill before the House today. It is a strong testament to their talents. Among its achievements, the bill provides substantial increases for two broad national priorities that I have long championed, nuclear nonproliferation activities to prevent the spread of weapons of mass destruction and the materials and technologies that be can used to create such weapons, and scientific research on technologies to reduce our dependence on foreign sources of energy and on fossil fuels in general.

The committee report takes a series of bold actions involving the Nation's nuclear weapons program, including directing the Department of Energy to reevaluate its plans for modernizing the nuclear weapons complex and demanding rapid consolidation of weapons-usable nuclear material. I want to commend the Energy and Water Subcommittee for their fine work.

The bill also provides critical funding increases to a lesser known national priority, the National Ignition Campaign, which is being carried out at the Lawrence Livermore National Lab in my district. When the NIF is completed in fiscal year 2009, it will be a scientific tool unlike anything the world has ever seen.

The National Ignition Facility will give U.S. scientists unprecedented insight into nuclear weapons phenomena, without nuclear explosions, and thus play a crucial role in the science-based stockpile stewardship program, which ensures the safety and reliability of our nuclear deterrent without nuclear testing. I commend the committee for its support of this critically important program.

I do need to mention, however, that the report accompanying the bill includes a few instances where I believe the Appropriations Committee ventured beyond what was authorized in the weapons activities account by the House Armed Services Committee, where I serve as chairman of the Subcommittee on Strategic Forces.

Directing the relocation of the long-planned Pit Disassembly and Conversion Facility, commencing weapons disassembly activities at the Nevada Test site without a feasibility assessment, and initiating a major new construction project at the Idaho National Lab are all examples of actions that would be more appropriately dealt with by the authorizing committee.

Separately, by cutting the funds for the mixed oxide fuel facility while demanding improved execution on the project, I believe it sets up an unfair task for the Energy Department. Having said that, Chairman VISCLOSKY and Ranking Member HOBSON, as well as our staff, have been very open to dialogue on these issues, and I truly, truly appreciate that.

My amendment modifies the bill to address two actions recommended by the committee report. First, the amendment confirms that the pit facility will be located at the Savannah River site. The site was selected by a former record of decision that was issued in 2000, which was in turn based on the environmental impact statement completed in 1999.

And second, the amendment directs that weapons dismantlement activities funded by the bill to be conducted at sites authorized to conduct such activity.

I want to sincerely thank the chairman and ranking member for agreeing to accept this amendment. We are very grateful for the spirit of cooperation in which this amendment was achieved. I believe this cooperation is possible because at the end of the day we are in fundamental agreement on most of these issues.

I trust that going forward we can continue discussing these projects, as well as others, and work together moving the country forward concerning the future of a nuclear weapons complex.

I urge adoption of this amendment.

Mr. Chairman, I reserve the balance of my time.

Mr. VISCLOSKY. Mr. Chairman, I move to strike the last word.

The Acting CHAIRMAN. The gentleman is recognized for 5 minutes.

Mr. VISCLOSKY. Mr. Chairman, I appreciate the recognition, and simply rise to accept the gentlelady's amendment.

This has been a collaborative effort. And I would want to also congratulate the gentlewoman from California and all of her subcommittee members for their very good and strong leadership in rationalizing the nuclear weapons complex and bolstering the nuclear nonproliferation programs at the National Nuclear Security Administration.

The fact is, the gentlelady in particular has exercised great leadership in the issues of nonproliferation, making sure we have an appropriate and rationalized weapons complex, and that again, we are very deliberative as far as what the long-term nuclear policy of this country is. And again, I also appreciate her very early interjection into the work of this subcommittee, and her cooperation as well as her staff's cooperation. And again, it is my pleasure, on behalf of the subcommittee, to accept her amendment.

Mrs. TAUSCHER. Mr. Chairman, I am very excited to continue to work with the chairman and the ranking member of the Energy and Water Development Appropriations Committee.

As I said earlier, our two staffs have worked very closely together to achieve what I think is some very good work on the National Nuclear Weapons Complex and other issues. I appreciate his accepting of this amendment.

Mr. Chairman, I yield back the balance of my time.

The Acting CHAIRMAN. The question is on the amendment offered by the gentlewoman from California (Mrs. TAUSCHER).

The amendment was agreed to.

ANNOUNCEMENT BY THE CHAIRMAN

The Acting CHAIRMAN. Pursuant to clause 6 of rule XVIII, proceedings will now resume on those amendments on which further proceedings were postponed, in the following order:

An amendment by Mr. WESTMORELAND of Georgia.

Amendment No. 26 by Mr. WESTMORELAND of Georgia.

Amendment No. 24 by Mr. WESTMORELAND of Georgia.

Amendment No. 25 by Mr. WESTMORELAND of Georgia.

Amendment No. 23 by Mr. SESSIONS of Texas.

Amendment No. 22 by Mr. HENSARLING of Texas.

Amendment by Mr. LAMBORN of Colorado.

Amendment No. 21 by Mr. CAMPBELL of California.

An amendment by Mr. STEARNS of Florida.

Amendment No. 19 by Mr. KLINE of Minnesota.

The amendment by the gentleman from Nevada (Mr. PORTER) will be taken at a later time.

The Chair will reduce to 2 minutes the time for any electronic vote after the first vote in this series.

AMENDMENT OFFERED BY MR. WESTMORELAND

The Acting CHAIRMAN. The unfinished business is the demand for a recorded vote on the amendment offered by the gentleman from Georgia (Mr. WESTMORELAND) on which further proceedings were postponed and on which the noes prevailed by voice vote.

The Clerk will redesignate the amendment.

The Clerk redesignated the amendment.

RECORDED VOTE

The Acting CHAIRMAN. A recorded vote has been demanded.

A recorded vote was ordered.

The vote was taken by electronic device, and there were—ayes 84, noes 341, not voting 12, as follows:

Ms. CLARKE and Messrs. YARMUTH, SAXTON, POE, and

HERGER changed their vote from ''aye'' to ''no.''

Messrs. LEWIS Of Kentucky, TERRY, and HALL of Texas changed their vote from ''no'' to ''aye.''

So the amendment was rejected.

The result of the vote was announced as above recorded.

(By unanimous consent, Mr. BROWN of South Carolina was allowed to speak out of order.)

MOMENT OF SILENCE IN MEMORY OF NINE SOUTH CAROLINA FIREFIGHTERS WHO PERISHED IN LINE OF DUTY

Mr. BROWN of South Carolina. Mr. Chairman, last night, nine brave firefighters from my district lost their lives in the line of duty. Responding to a fire in the West Ashley area of Charleston, these men made the ultimate sacrifice in service to our community in what was the single worst loss of firefighters since 9/11. This tragedy is a somber reminder of the dangers our first responders face on a daily basis as they serve to protect us and our property. We are forever grateful for their service and deeply sadden by their loss.

Our hearts and prayers go out to the families of these courageous men: Captain William ''Billy'' Hutchinson, Captain Mike Benke, Captain Louis Mulkey, Engineer Mark Kelsey, Engineer Bradford ''Brad'' Baity, Assistant Engineer Michael French, Firefighter James ''Earl'' Drayton, Firefighter Brandon Thompson and Firefighter Melven Champaign.

These men, who had over 100 years of service among them, gave their lives doing a job they loved.

I now yield to my good friend, Mr. CLYBURN.

Mr. CLYBURN. I thank my friend, Mr. BROWN, for yielding me this time. Not since 9/11 have we been reminded so poignantly of the sacrifice our first responders make to protect our safety. These nine firefighters gave the ultimate sacrifice last night doing the jobs they loved. As Charlestonians, South Carolinians and Americans, we are grateful for their service and deeply saddened by their loss.

Our hearts go out to their families and their colleagues. This devastating loss is one that touched the hearts of our entire Nation, and we grieve with them.

Dr. Martin Luther King, Jr., once said, ''Everybody can be great because anybody can serve. You only need a heart full of grace, a soul generate by love and you can be that servant.''

These firefighters were public servants in the truest sense. They answered the call to serve their community, and today Charleston and South Carolina are better places for their service.

Among the nine that perished was a combined 123 years of service to the Charleston Fire Department. This is a remarkable testament to their dedication and selflessness. Their experience and service cannot be replaced, and their contributions will not be forgotten.

Mr. Chairman, I ask my colleagues to rise and join me in a moment of silence.

ANNOUNCEMENT BY THE ACTING CHAIRMAN

The Acting CHAIRMAN. Without objection, 2-minute voting will continue.

There was no objection.

AMENDMENT NO. 26 OFFERED BY MR. WESTMORELAND

The Acting CHAIRMAN. The unfinished business is the demand for a recorded vote on the amendment offered by the gentleman from Georgia (Mr. WESTMORELAND) on which further proceedings were postponed and on which the noes prevailed by voice vote.

The Clerk will redesignate the amendment.

The Clerk redesignated the amendment.

RECORDED VOTE

The Acting CHAIRMAN. A recorded vote has been demanded.

A recorded vote was ordered.

The Acting CHAIRMAN. This will be a 2-minute vote.

The vote was taken by electronic device, and there were—ayes 76, noes 351, not voting 10, as follows:

ANNOUNCEMENT BY THE ACTING CHAIRMAN

The Acting CHAIRMAN (during the vote). There is 1 minute remaining in this vote.

□ 1814

Mr. MARKEY changed his vote from ''no'' to ''aye.''

So the amendment was rejected.

The result of the vote was announced as above recorded.

Mr. OLVER. Mr. Chairman, I move that the Committee do now rise.

The motion was agreed to.

Accordingly, the Committee rose; and the Speaker pro tempore (Mr. WALZ of Minnesota) having assumed the chair, Mr. POMEROY, Acting Chairman of the Committee of the Whole House on the state of the Union, reported that that Committee, having had under consideration the bill (H.R. 2641) making appropriations for energy and water development and related agencies for the fiscal year ending September 30, 2008, and for other purposes, had come to no resolution thereon.

ANNOUNCEMENT BY THE SPEAKER PRO TEMPORE

The SPEAKER pro tempore. Pursuant to clause 8 of rule XX, further proceedings on motions to suspend the rules with regard to House Concurrent Resolution 21, H.R. 2359, and H.R. 2284 will be postponed until tomorrow.

CONTINUATION OF NATIONAL EMERGENCY WITH RESPECT TO THE RISK OF NUCLEAR PROLIFERATION IN THE TERRITORY OF THE RUSSIAN FEDERATION—MESSAGE FROM THE PRESIDENT OF THE UNITED STATES (H. DOC. NO. 110–41)

The SPEAKER pro tempore laid before the House the following message from the President of the United States; which was read and, together with the accompanying papers, without objection, referred to the Committee on Foreign Affairs and ordered to be printed:

To the Congress of the United States:

Section 202(d) of the National Emergencies Act (50 U.S.C. 1622(d) provides for the automatic termination of a national emergency unless, prior to the anniversary date of its declaration, the President publishes in the *Federal Register* and transmits to the Congress a notice stating that the emergency is to continue in effect beyond the anniversary date. In accordance with this provision, I have sent the enclosed notice to the *Federal Register* for publication, stating that the emergency declared with respect to the accumulation of a large volume of weapons-usable fissile material in the territory of the Russian Federation is to continue beyond June 21, 2007.

It remains a major national security goal of the United States to ensure that fissile material removed from Russian nuclear weapons pursuant to various arms control and disarmament

agreements is dedicated to peaceful uses, subject to transparency measures, and protected from diversion to activities of proliferation concern. The accumulation of a large volume of weapons-usable fissile material in the territory of the Russian Federation continues to pose an unusual and extraordinary threat to the national security and foreign policy of the United States. For this reason, I have determined that it is necessary to continue the national emergency declared with respect to the accumulation of a large volume of weapons-usable fissile material in the territory of the Russian Federation and maintain in force these emergency authorities to respond to this threat.

GEORGE W. BUSH.
THE WHITE HOUSE, *June 19, 2007*.

PERSONAL EXPLANATION

Mr. ETHERIDGE. Mr. Speaker, on Friday of last week, the House took up 26 sequential votes on amendments to the 2008 Department of Homeland Security Appropriations Act, H.R. 2638. The fourth of these votes was on an amendment by the gentlelady from Virginia, Representative DRAKE, which increased funding for the Immigration and Customs Enforcement's 287(g) program. This program funds training and activity of State and local law enforcement personnel to carry out Federal immigration law. I believe that immigration law is and should be the responsibility of Federal border and Customs officials, and not delegated to the States and local authorities who are already burdened with protecting their communities. I, therefore, do not support the Drake amendment.

On roll number 469 when I cast my vote on this amendment, however, an ''aye'' vote was recorded when a ''no'' vote should have been recorded.

ENERGY AND WATER

(Ms. JACKSON-LEE of Texas asked and was given permission to address the House for 1 minute and to revise and extend her remarks.)

Ms. JACKSON-LEE of Texas. Mr. Speaker, we have been engaging in discussion on the appropriations regarding the Energy and Water bill. Much of our attention has been on the gas prices, which is clearly a key element of need for the American people. I believe that when we finish this bill, we will have a strong and positive response.

But at the same time, water is a concern for the American people as well. Flooding is a concern for the American people as well. I use as an example the City of Houston, Texas, that has just received the flood mapping that goes on under the process of FEMA, meaning that they have described areas of residential housing where the maps are changing what is a flooding area and what is not.

The tragedy for Houston is that these are older neighborhoods where Members of the community have invested in one of their major assets. Unfortunately, based upon FEMA's maps and the lack of infrastructure as it relates to water and flooding, these individuals are finding themselves without the opportunity to protect their property. We have got to change that. We have got to make a difference. I look forward to working with my constituents to do so.

SPECIAL ORDERS

The SPEAKER pro tempore (Mr. WALZ of Minnesota). Under the Speaker's announced policy of January 18, 2007, and under a previous order of the House, the following Members will be recognized for 5 minutes each.

EDUCATION

The SPEAKER pro tempore. Under a previous order of the House, the gentlewoman from Ohio (Mrs. JONES of Ohio) is recognized for 5 minutes.

Mrs. JONES of Ohio. Mr. Speaker, I am glad to join my colleagues from the Congressional Black Caucus this evening in a special order around education. Today, we celebrate Juneteenth, also known as Freedom Day or Emancipation Day. This holiday, celebrated in 14 states, commemorates the announcement of the abolition of slavery in Texas.

This day was a great milestone in American history. Since that time, African-Americans have made great strides in this country. However, even with those great accomplishments, we still find ourselves dealing with glaring disparities in our educational system in this country. It is time that we stop ignoring this issue and bring it to the forefront of our policy discussions.

As our world becomes increasingly interdependent, we as a Federal Government have a responsibility to provide all of our citizens with an education that will allow them to compete and excel in the global market.

Sadly, this is not the case. Too many of our minority and economically disadvantaged students are not equipped with the kind of education that will allow them to earn a decent living in order to enjoy American prosperity.

In a free society like ours, we justify the unequal distribution of wealth by equal opportunity. However, any reasonable person will tell you that opportunities are certainly not equal. Therefore, I hold a strong belief that it is the responsibility of Congress to make policy that provides the most underprivileged along us with an opportunity to succeed.

We can do this by promoting policies that ensure a strong public education system does not leave any child behind. We need to make a strong commitment to our educational system. Our posterity is depending on it.

My home is Cleveland, Ohio, and unfortunately it has been rated as one of the poorest cities, where almost half of the children live below the poverty line. It has been proven again and again that there is a direct correlation between economic prosperity and education. It has also proven that good teachers make good schools. But it's so difficult to attract qualified teachers to impoverished areas.

No Child Left Behind requires that every State and school district ensure that low-income students have their fair share of qualified and experienced teachers. In high poverty districts in Ohio, 42 percent of the teachers teach classes outside of their expertise. This is problematic, because studies have shown that multiple bad experiences with teachers can negatively impact their students' education. We need to work hard to get quality teachers to high-risk schools so we do not let many teachers slip through the cracks.

Another disturbing fact is that only 51 percent of African-American students graduate from high school on time in Ohio. This last year, Cleveland municipal schools only graduated 40 percent of their senior class. This is a blatant failure of our education policy. This problem has no simple solution.

We are talking about inner-city schools with a lack of resources and crumbling infrastructure. We are talking about environments where juvenile delinquency is the norm and some students fear attending class, where budgets are stretched so thin and there is no money available for arts and education and extracurricular activities.

These are schools where classes are overcrowded and the teachers are overwhelmed and forced to teach from outdated text books, and the list goes on. This is not what we intended for our students. We have an obligation to correct this wrong. We need to do more to assist these schools in securing resources that will allow them to lift these students up and provide them with an education that will allow them to continue on to college and to a good-paying job.

It is so easy for Members of Congress to demagog ''No Child Left Behind.'' But many of us have supported the policy, and its intention is benevolent. We as a country need to strive for academic excellence and opportunity in our country. It has been a tremendously difficult policy to implement and administer, but we cannot give up on it.

We have a complicated primary and secondary education system with responsibility spread through all levels of government. To reach a high level of educational opportunity nationally is a paramount task, but we must persevere. The system already works for

haves, and we have an obligation to see it work for the have-nots.

□ 1830

RENAMING THE DEPARTMENT OF THE NAVY

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from North Carolina (Mr. JONES) is recognized for 5 minutes.

Mr. JONES of North Carolina. Mr. Speaker, as of today, H.R. 346, my legislation to designate the Department of Navy as the Department of Navy and Marine Corps, has 60 cosponsors.

The language of this bill has already passed the full House of Representatives last month as part of the 2008 National Defense Authorization Act. This is the sixth year in a row that the House has voted to support this change.

As a Member of Congress, I have heard for 14 years that the Navy and Marine Corps are one fighting team. If this is true, should not the team carry the name of both the Navy and the Marine Corps? The Marines do not serve beneath the Navy, they are coequal partners.

I was very pleased to read a comment by the new Senate Armed Services Committee chairman, CARL LEVIN, in an article by The Hill newspaper last month, May 24, 2007, and I quote, ''When asked, LEVIN said he would 'keep an open mind' on whether to support [language in the House bill to change the name of the Navy to the Department of Navy and Marine Corps].''

Mr. Speaker, there is no cost to this change. Renaming the Department is a symbolic gesture, but is very important to the team. It is the right thing to do for the team.

Let me quote the Honorable Wade Sanders, Deputy Assistant Secretary of the Navy for Reserve Affairs between the years 1993 and 1998. He voiced his support for this change, and I quote, ''As a combat veteran and former Naval officer, I understand the importance of the team dynamic, and the importance of recognizing the contributions of team components.

''The Navy and Marine Corps team is just that, a dynamic partnership, and it is important to symbolically recognize the balance of that partnership.''

I will also quote Admiral Stansfield Turner, United States Navy, Retired, former Director of Central Intelligence, who said, and I quote, ''I think this change in title enhances the prestige and pride of the people in the Marine Corps. And it does not necessarily take away anything from the Navy in that process.''

Mr. Speaker, last year, an editorial in the Chicago Tribune on April 21 of 2006 also supported the change stating, and I quote, ''No service branch shows more respect for tradition than the United States Marine Corps does, which makes it all the more ironic that tradition denies the Corps an important show of respect: Equal billing with the other service branches.''

That again, Mr. Speaker, is from the Chicago Tribune.

Mr. Speaker, to further state the importance of this, I have beside me an enlargement of the orders for the Silver Star for a Marine from Camp Lejeune who was killed in Iraq. It says, ''The Secretary of the Navy Washington, DC., Navy flag, the President of the United States take pleasure in presenting the Silver Star to the family.'' I will not read in its entirety.

But Mr. Speaker, I'd like to show you what, if the Senate will accept the House position, what this does. With the same orders for the Silver Star for this brave Marine who gave his life for this country, it says, ''The Secretary of the Navy and Marine Corps, Washington, DC.,'' with the zip code. It still has the Navy flag on one side and the Marine flag.

Mr. Speaker, it is time that the Senate accept the House position. This is the right thing to do for the fighting team. The team is the Navy and Marine Corps fighting team. And I hope that the Senate, and I'm very encouraged by Chairman LEVIN that he said, ''I'm open to the thought of this possibility.''

So with that, Mr. Speaker, I ask God to please bless our men and women in uniform and to please bless the United States of America.

EDUCATION IS CRITICAL FOR TODAY'S YOUTH

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Virginia (Mr. SCOTT) is recognized for 5 minutes.

Mr. SCOTT of Virginia. Mr. Speaker, I join my colleagues in the Congressional Black Caucus to discuss the important issue of education. Obtaining an education is critical for today's youth. An individual's prosperity and quality of life will be directly affected by the education they receive.

We all know the phrase, ''The more you learn, the more you earn.'' In addition to increased earnings, individuals with higher levels of education are less likely to be unemployed, less likely to need public assistance, and less likely to become involved in the criminal justice system.

Mr. Speaker, today's communities will also benefit by increased education. Those communities will suffer lower crime rates, have fewer people on welfare, and will benefit from a better economy.

In fact, we have found that in this global economy, our competitive advantage is in education because we can't compete on wages. There are people in countries around the world who work for pennies and a few dollars a day. We're not going to compete with that.

We can't compete because people don't have to be in the United States to work. If you can work with your coworkers from across the hall, you can work with your coworkers across the globe. All you need is a cell phone, a computer and a modem, a fax machine, you can work anywhere in the world.

You don't need to be close to your customers. You can manufacture your goods anywhere and send them anywhere else in the world almost overnight.

And you don't need to be in the United States to finance a new plant. Used to be you had to be here to finance a plant. With worldwide banking you can have that plant located anywhere in the world.

The competitive advantage we have is the fact that businesses know that they can get well-educated and well-trained workers if they locate in the United States. But unfortunately, we're losing that competitive advantage.

In a recent measure of high school achievement, we found that students in the United States ranked below dozens of other countries in math and science. And so we're losing that competitive advantage. And the Education and Labor Committee is, therefore, focused on improving our international standing.

Earlier this year, the House passed the bill to renew the Head Start program with renewed emphasis on early Head Start. These programs are critical to getting our children on the right path early in life and the earlier, the better. At the K–12 level, the committee is also working towards renewing the No Child Left Behind Act. We will be addressing issues in that bill, for example, finding ways to meaningfully measure and reduce the achievement gap; ensuring that all students have access to high-quality teachers, and to effectively improve those schools which fail to make adequate yearly progress.

One of the most critical issues that must be addressed in No Child Left Behind is the fact that approximately one-third of all high school students in the United States fail to graduate with their peers. And in some communities, as many as half of the students fail to graduate and find themselves on the path to hopelessness.

The Education and Labor Committee will also consider renewing the Higher Education Act, which is primarily focused on access to college. Last year, approximately 1 million qualified students did not go to college because they could not afford the cost. Since the 2001/2002 school year, tuition at a public 4-year college has risen 55 percent. But during that same period the

maximum Pell Grant only went up about 8 percent, and in the last 4 years didn't go up at all.

Unfortunately, this means that many of today's students, unlike previous generations, are being denied the opportunity to live to their fullest potential because they were denied the opportunity of a college education.

This year, the Education and Labor Committee is leading legislation that will significantly improve access to college with improved Pell Grants and cuts in student loans.

So, Mr. Speaker, education affects many issues that we deal with: economic competitiveness, crime and welfare. And so I'd like to thank the gentlelady from Michigan, the chairman of the Congressional Black Caucus, Ms. KILPATRICK, for organizing the effort to focus on education tonight.

THE TRUE GOAL OF OUR EDUCATION SYSTEM

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Illinois (Mr. DAVIS) is recognized for 5 minutes.

Mr. DAVIS of Illinois. Mr. Speaker, Dr. Martin Luther King, Jr. described the end result of education as a person having the ability to think intensively and critically. He embraced the idea that intelligence plus character should be the true goal of our education system. This truly is the goal that we must strive and work towards.

Helping our children to think is crucial; however, the blocks to build to that point are difficult to create. It takes support, resources, confidence and opportunity, but most importantly, these pieces must be available for each individual no matter who or where they come from.

Today we find our public school systems throughout America in many places in disarray, underfunded, overpopulated, and, in many districts, underattended. As a Nation, we have moved forward, and then there are times when it looks as though we're doing the Watusi, that is, two steps forward, and two steps back.

I can remember a time when, in almost any community that you went, people realized and recognized that education was the absolute key to progress.

According to the Abecedarian study, the importance of early childhood education is critical. The report shows that children who receive a formal early childhood education overwhelmingly do better in school.

Unfortunately, 55 percent of children whose families are below the poverty line do not receive a formal early childhood education. An overwhelming number of these children, whose mothers are unemployed, do not have access to early childhood education. These numbers are astonishing, especially given what we already know.

We are engaged in competitiveness, not just in communities and neighborhoods or States, but from a global perspective, and unless children get an early beginning, they find themselves continuously behind and finding it difficult to catch up.

And finally, Mr. Speaker, one of the areas that I have a tremendous amount of concern about is the fact that African American males are graduating from high school at a rate of less than 50 percent. As a matter of fact, many of them drop out as early as third or fourth grade.

And it's my contention that they drop out because, for many of them, they have never seen a male figure with a book in his hand. They've never had a male teacher who looked like them. They've never seen a male at home with a book. And so they contend that education is a female or woman or girl kind of thing.

And we must find ways to get more male teachers in the classroom, more male teachers involved in Head Start. And we must get communities totally engaged and totally involved, so that as children grow up, they will know that education has been and will continue to be the great equalizer, and without it they don't have a chance.

So I thank you, Mr. Speaker. I thank the Congressional Black Caucus, our chairman, Representative KILPATRICK, for setting aside this time to address education issues, especially affecting African American communities.

□ 1845

INEQUITIES IN EDUCATION

The SPEAKER pro tempore. Under a previous order of the House, the gentlewoman from the Virgin Islands (Mrs. CHRISTENSEN) is recognized for 5 minutes.

Mrs. CHRISTENSEN. Mr. Speaker, today we members of the Congressional Black Caucus, under the leadership of our chairwoman, CAROLYN CHEEKS KILPATRICK, are taking time to commemorate Juneteenth and reflect on this historical event in 1865 when the news of their emancipation was finally received by 250,000 enslaved in Texas, 2 years late. And as we do so, it seems appropriate that we reflect on the inequities that continue to plague the African American community, the remedies for which are also too late.

And so, as we take the floor of the seat of government in our country, we say the time is now. Again, better later than never for this 110th Congress to bring another message of freedom to African Americans, freedom from economic blight, from lack of access to quality and comprehensive health care, from substandard housing, and from the issue that is the subject of our discussion tonight: rundown, poorly equipped, and understaffed schools and the overall inequities in our Nation's educational system.

June also marks the celebration of graduation season across the Nation. And as we cheer millions of high school graduates, we must not forget the 1.2 million students who left school this year without a high school diploma.

Dropouts are twice as likely to be unemployed. Even those who work, for those who work the pay is low. Opportunity for advancement is limited, and health insurance is essentially unavailable.

This is a particular problem in communities of color. For African Americans and Latinos, the dropout rate approaches an astonishing and alarming 50 percent and affects all communities, large or small, rural or urban, including our territories. This high rate of high school dropout and the consequent unemployment disproportionately affect African American males. According to the last U.S. Census, the fraction of black men with a high school education or less is about 50 percent, nearly half of the black male population.

A report published by the Congressional Black Caucus Foundation last year indicated that the employment for what they call less educated black men has been in decline during the last decade, and this, despite the fact that opportunities exist to reverse this because of discrimination in hiring.

The racial difference in the labor force participation rates are sharpest for those without a high school degree. Only half of prime-age black men without a high school degree are in the labor force.

Mr. Speaker, education is everyone's issue. However, the current administration seems to have an opposing view as they propose to completely cut funding for the Dropout Prevention Program. The Youth Activities Program, under their fiscal year 2008 budget proposal, would lose $100 million of funding compared to 2006, and Safe and Drug-Free Schools and Communities grant program would almost be cut by $150 million. This funding needs to be restored. These programs are part of the solution to the dropout problem.

So we in the Congressional Black Caucus are issuing a call to action across our Nation to reduce the dropout rate and raise the graduation rate above its current level of 70 percent. Keeping our people in improved schools must be a part of the debate and be addressed as we move to reauthorize and fund an amended and improved No Child Left Behind.

Today the Campaign for High School Equity met on the Hill to address and help us address this very issue. Among the reasons cited as causes of the persistent dropout rates are lack of parental involvement and one I heard in focus groups of young men in my own district: poorly devised and presented

curricula that don't keep or stimulate our students' interests.

We urge the appropriators to include incentives to address this issue, to improve graduation rates and to ensure an increase in funding for key programs like Upward Bound in the 2008 appropriation. This program also helps to reverse our Nation's dropout rate.

Another factor that is indirectly related is one that was the subject of Bob Herbert's column last Saturday, lack of employment for teens during the high school year and in the summer. We are at the lowest national teen employment rate in the past 60 years at 33.1 percent, according to one study from Northeastern University. Again, this bleak outlook is primarily affecting Black teens.

As Mr. Herbert said: ''This is the flip side of the American dream. Kids who grow up poor and never work at a regular job tend not to think in terms of post-graduate degrees, marriages, careers, and the cost of educating the next generation. A steady job could make all the difference. Along with the paycheck comes a sense of the possibilities. Kids develop a clearer understanding of the value of education and are more likely to stay in school.''

No Child Left Behind created widespread pressure to improve academic achievement. While many districts have struggled to meet benchmarks set by this legislation, far too many of our children, especially African American children, are still being left behind.

We need to apply the same pressure, focus, and funding to improve the educational environment and experience and to provide the tools that are needed for education success in all of our schools.

The enslaved Africans in Texas waited 2 years to finally hear the word that they were free. Let us not have our young children and people wait one minute longer for the education they need and the future they deserve.

EDUCATION

The SPEAKER pro tempore. Under a previous order of the House, the gentlewoman from California (Ms. LEE) is recognized for 5 minutes.

Ms. LEE. Mr. Speaker, forty years ago, the U.S. was number one in the world in high school graduation rates. Today it ranks 17th.

About 1/3 of the students who enter 9th grade each fall will not graduate from high school with four years, if at all.

High school students living in low-income families drop out of school at six times the rate of their peers from high-income families.

Drop out rates are especially high in communities of color: Only about 55 percent of African American students and 52 percent of Hispanic students graduate on time from high school with a regular diploma, compared to 78 percent of white students.

In my district, in Oakland, the graduation rates for African American males is 26 percent, compared to 57 percent is the graduation rate for white males.

In this country, there are about 2,000 high schools that produce the majority of dropouts.

Six million students throughout America are currently at risk of dropping out of school. Students who fail to graduate from high school are more likely to participate in criminal activity than students who do graduate. Likewise, students with low levels of achievement in high school are more likely to engage in crime than students with high levels of achievement.

For example, The Harvard University Civil Rights Project and the Urban Institute Education Policy Center conducted a study on K–12 schools in California. The Center estimated that Oakland's 52 percent dropout rate costs the state $14 billion in lost wages, crime and jail time.

Investing in education would save millions of dollars in crime related expenditures annually.

The statistics are staggering and tell the story. Approximately 75 percent of state prison inmates did not complete high school. High school dropouts are 3.5 times more likely than high school graduates to be arrested in their lifetimes. And a mere one percent increase in high school graduation rates would save approximately $1.4 billion in costs associated with incarceration costs, or about $2,100 for each male high school graduate.

We must do better by our children. Nothing less than the future of this country is at stake. That is why I am committed to effective reform that can transform high schools and keep students at the greatest risk of dropping out on the path to graduation.

I'm proud to support authorizing legislation that will soon be introduced which will help address some of the reforms that are needed and that is why I'm proud to be an advocate on the Labor, Health and Human Services and Education subcommittee working to appropriate funding to address the crisis in dropouts that our country is facing.

Clearly, we need increased investments in programs that keep kids in school and learning.

SCHOOL COUNSELING BILL

On the Labor, Health and Human Services subcommittee, I worked with my colleagues to include $61.5 million for elementary and secondary school counseling in the FY08 bill that is currently working its way through our committee. This is a 77.5 percent increase in a program that the President would have eliminated. These funds enable school districts to hire academic counselors, psychologists, and social workers. The additional resources will be targeted to improving and expanding academic and mental health counseling to middle and high school adolescents. This significant increase is a tremendous step toward addressing the crisis in counseling in our schools.

AFTER SCHOOL PROGRAMS

Another critical tool we have in our arsenal to fight drop out and to keep kids off the street and for preventing youth violence is our nation's after school programs.

The fact of the matter is that between 3–6 pm the rate of juvenile crime triples.

On LHHS subcommittee, we were able to provide a $125 million increase over FY07 levels for a total of over a billion dollars for the 21st century community learning centers. This program is a formula grant to states which in turn distribute 95 percent of the funds on a competitive basis to local school districts, community based organizations and other organizations is for after school activities that make sure that young people have alternatives to getting into trouble.

UPWARD BOUND / TRIO AND GEAR UP

I want to echo the comments of my colleagues here tonight about the problems we are fighting as it relates to the Absolute Priority regulation and the concerns over the loss of funding for numerous previously funded grantees including 30 percent of our HBCU's and Mills College in my district. I know that working together we will resolve these critical issues and I want to specifically thank BOBBY SCOTT and GWEN MOORE for their leadership on the Education Committee and on this issue.

We all understand just how critical these programs are that provide a variety of outreach and support services to encourage low-income students to enter an complete college. That is why I'm pleased our L–HHS subcommittee was able to provide a $40 million increase in funding for the TRIO programs and a $20 million increase for the GEAR UP program.

COMMEMORATING JUNETEENTH

The SPEAKER pro tempore. Under a previous order of the House, the gentlewoman from Texas (Ms. JACKSON-LEE) is recognized for 5 minutes.

Ms. JACKSON-LEE of Texas. Mr. Speaker, I am very humbled to be able to join my colleagues of the Congressional Black Caucus to celebrate and commemorate Juneteenth and to celebrate it on the very day that we have commemorated it over the years.

June 19 is a special time for Texans. And I would like to, in this very brief time that I have, weave in and out of the history of the meaning of Juneteenth as we reflect upon where we are in 2007 in the education of our young people.

The failures of this administration are stark, shocking, and extensive. And it is hopefully on this day that maybe a morsel of what many of us have been saying will be caught by someone in the administration to be able to reassess and to be able to think about the remaining time of their tenure in the White House and create a new and different legacy of the educational process of minorities in the United States of America.

With that, let me thank DANNY DAVIS for the celebration that we were able to participate in and his leadership on the issue of Juneteenth. I would also like to thank Curtis Faulkner of Fort Worth, who is involved in Juneteenth Heritage and Jazz Festival. I would also like to be able to thank Dr. Ronald Myers, who has been working for years with the National Juneteenth Observance. I would also like to be able to remind my fellow Texans and

Houstonians of Reverend C. Anderson Davis, who brought to us the Emancipation Day celebration in Texas. We lost Reverend Davis just a few weeks ago, and it is my special privilege to acknowledge him for he came as the regional leader of the NAACP more than four decades ago to Houston, Texas, and he never forgot the routing and the importance of educating our young people about the emancipation.

So I stand today to be able to chronicle the history and to thank those who are now fighting the battle to preserve Freedman's Town in Houston, Texas, a town that was formulated by freed slaves right after the Emancipation Proclamation that is now under siege by those who would desire to disrupt the few remaining historic buildings and blocks and, if you will, bricks that make up the street, cobblestone bricks. I pray that the energy of those remaining, Reverend Samuel Smith, Captain Roberts, Reverend Robertson, will hold on, and the number of churches that are in that area, that we will fight for the establishment of a Freedman's Town corridor in the name and in tribute of Juneteenth and the emancipation of our people.

Let me cite for those a depictive picture that shows both celebration and shock as Major Gordon Granger came into Galveston to be able to announce that these yet humble servants, these slaves, were yet free.

Let me quickly go to the language that was offered to me in remarks made by Curtis Faulkner. I want to read, first of all, just a few brief words from the message of Abraham Lincoln during the emancipation: ''Fellow citizens, we cannot escape history. We of this Congress and this administration will be remembered in spite of ourselves. No personal significance, or insignificance, can spare one or another of us. The fiery trial through which we pass will light us down, in honor or dishonor, to the latest generation. We say we are for the union. The world will not forget that we say this.''

So he spoke of saving the union, but he also laid the ground work for the Emancipation Proclamation.

He continued: ''Other means may succeed; this could not fail. The way is plain, peaceful, generous, just—a way which, if followed, the world will forever applaud and God must forever bless.''

This was the genesis of the emancipation of slaves, but yet we are still wracked by discrimination and disparity. So when I speak of education and No Child Left Behind, I use Houston as an additional laboratory, testing the fear of children and not the learning of children. We want to reform so that all of our children can learn. Poor funding for underperforming schools, a failure of this administration that never decided to fund. Closing schools, lack of pay for teachers, all of that is meaningful.

I close, Mr. Speaker, by saying this. Freedom is not enough and you do not wipe away the scars of centuries by saying now you are free. We want the emancipation to be known in our hearts. We want a national holiday for the Juneteenth. And I look forward to working with my colleagues to commemorate, celebrate, and be reminded of the sweat and blood and tears of those who stand here today.

JUNETEENTH/BLAIR'S BILL

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Illinois (Mr. RUSH) is recognized for 5 minutes.

Mr. RUSH. Mr. Speaker, I stand here today, along with my congressional Black Caucus colleagues, in recognition of Juneteenth Day. It is fitting for us to not only acknowledge where we have been in the past but also to evaluate where we are today as a people.

Mr. Speaker, one of the most pressing issues in the African American community remains the issue of education. Many of my colleagues have outlined the progress and the challenges that many African American students face as they strive to acquire the educational benefits that every American should receive.

In the words of the great African American leader Malcolm X: ''Education is the passport to the future, for tomorrow belongs to those who prepare for it today.''

Education is, of course, the key to a bright future. And it is the vital ingredient in finding success and achieving the American Dream. While African Americans have come very far, educationally, there is still much work to do at the Federal, at the State, at the local, and at the family level to ensure that all of our students are learning and are being given the chance to succeed.

Today, Mr. Speaker, African American females, in particular, are achieving gains in education that were previously unheard of. Black females are graduating from college, graduate school, and post-graduate school at record levels. And this is something we can all be proud of and take comfort in.

However, Mr. Speaker, there are still many problems. Today, our Nation has more African American men in prison than in college. In many urban cities, Black males are dropping out of high school at a rate of 50 percent and even less are going to college.

One problem that many of our young students face is the issue of gun violence that pervades our community. Mr. Speaker, we have to make the schools and the neighborhoods that we live in safe for our students. We must address the gun violence that is plaguing so many of our communities.

African American males under age 30 are nearly nine times more likely to be murdered than a white male under age 30. African Americans make up only 13 percent of the population of our Nation but in 2001 suffered almost 25 percent of all firearms deaths, and 52 percent of all firearm homicides.

Mr. Speaker, just days ago, on May 10, a student, Blair Holt, was riding home from school on a public bus and was fatally shot while trying to shield a young female friend from a gunman's bullet. Blair Holt was an honor student with plans to attend college, and instead, his young life was prematurely taken for no reason at all. Mr. Speaker, this school year alone, 31 Chicago public school students have been murdered; 31 students have lost their lives; 31 students have not given their talents, their skills, and their abilities to make this world a better place.

While this statistic is true for the schools in my district, gun violence is all around. Gun violence is prevalent in so many of the communities all around this Nation. And we must put an end to this domestic terrorism that is destroying communities and making our constituents live in fear. As elected officials, it is incumbent upon us to enact legislation that would help reduce the flow of guns into our communities and help our struggling and frustrated law enforcement departments all across this Nation to keep track of those who possess guns and where those guns are.

I have introduced H.R. 2666, Blair's bill, which would implement a Federal gun licensing and registry program. This bill will help law enforcement track over 200 million guns that are too often ending up in the hands of criminals, young people, and gang members.

Mr. Speaker, H.R. 2666 is a step in the right direction. We must do all that we can for our Nation's children.

□ 1900

GETTING SMART ABOUT IRAQ

The SPEAKER pro tempore. Under a previous order of the House, the gentlewoman from California (Ms. WOOLSEY) is recognized for 5 minutes.

Ms. WOOLSEY. Mr. Speaker, I have come down to this floor more than 200 times to hold the administration accountable for its actions in Iraq. Since then, we have seen it all, from freedom fries to ''the surge.'' During these dog days of summer, however, we can't relent. We have to join together as never before because this administration is moving in new and even more dangerous directions in foreign policy. Let me give you an example.

Several weeks ago, the administration confirmed what I had been saying for the last 3 or 4 years; namely, that they are determined to maintain tens of thousands of American troops on permanent military bases in Iraq for

many decades to come. To support this position, they draw an absurd comparison between the situation in Iraq and the situation in South Korea. South Korea, where U.S. troops have been stationed for more than 50 years. And then White House spokesman Tony Snow said U.S. troops may have to stay in Iraq indefinitely to perform what he called an over-the-horizon support role. Over-the-horizon support role. George Orwell couldn't have said it any better. Call it what it really is, Tony: Occupation.

Ever since the administration took us into Iraq, I have tried to get at the heart of what is wrong with this foreign policy, and I believe the answer is this: The administration's foreign policy has failed. It has failed because it sells America short. The administration believes that the only weapon we have to fight terrorism is military power, but by relying on military power alone and ignoring our many other strengths, they have made America much weaker, not stronger.

There is another answer: A much different look at diplomacy and foreign policy. First, we must reestablish our moral leadership and regain our standing in the global community by using diplomacy as our first and best resort, and war only as our last resort. President Roosevelt said that the Presidency is preeminently a place of moral leadership, and that is something this administration must learn.

Second, we must rebuild our international alliances. We may be a Superpower, but we don't have super powers like Spiderman. So, we need the help of other nations. International cooperation is by far the best way to dismantle terrorist networks, manage globalization, stop the spread of disease and global warming, and fight the poverty that is the breeding ground of terrorism.

Third, Mr. Speaker, we must stop using fear as an excuse to justify immoral wars, or as a bludgeon to crush dissent and trash our Constitution. Again, quoting President Roosevelt, the only thing we have to fear, he said, is fear itself. Well, this administration believes that without fear, they can't move their agenda.

Fourth, we must end our addiction to foreign oil that pumps billions of dollars into autocratic regimes and props them up. Let's get serious about sustainable energy. And let's export green technology instead of war.

Next, we must renew our commitment to nuclear nonproliferation. It is sheer hypocrisy to demand that Iran and North Korea halt their nuclear programs while we talk about developing new nuclear weapons of our very own.

And finally, we must take the money we are investing in war and reinvest it in what makes us truly strong: education, health care, jobs, child care, the environment, and nonviolent problem solving.

I have offered a national security plan myself which rests on these broad principles. It's called SMART, which stands for Sensible Multilateral American Response to Terrorism. SMART, H. Res. 227, is deadly serious about stopping acts of terrorism. It would beef-up our intelligence capabilities. It would enhance our efforts to cut off financing for terrorist organizations.

REDEPLOY FOR A SECURE AMERICA

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Pennsylvania (Mr. SESTAK) is recognized for 5 minutes.

Mr. SESTAK. Mr. Speaker, a little over 5 years ago, I was in the war in Afghanistan, first on the ground for a very short period of time, and then I returned in charge of an aircraft carrier battle group. I saw a just war.

Eighteen months later, I went back to Afghanistan, on the ground again, and saw what we had not accomplished because we had diverted our attention and our resources, our Special Forces, our Psychological Operation Forces, our Civil Affairs Forces, those and our attention were diverted to the tragic misadventure in Iraq.

To me, Afghanistan is a poster child for what we have failed to do, and that is to remain engaged throughout this world, to be ready here at home in order to provide for a strong defense in support of our diplomacy of engagement.

I am not antiwar. I am pro-security. And that is my concern, that Iraq is every day seriously degrading the strategic security of America. It is why I believe that there is a different strategy to redeploy from Iraq with a date that is certain, one that is out there in order to change the behavior of those nations in that region, give them a different incentive to work towards stability so that as we redeploy over a fixed timetable, we will leave behind a state that is fairly stable and that is not failing.

I believe, having been in Iraq with Senator HAGEL and having traveled throughout that country, that my belief is only reinforced that we can no longer provide the political and the military cover for the Iraqi leadership that has failed to step up to the plate, that has failed, being in control of 32 ministries in Baghdad, to stop pursuing personal ambition, establishing personal fiefdom as our soldiers provide them not only the military, but the political cover, not to take the challenging decisions that they must take.

But I also believe, beyond that it is wrong to double-down on a bad bet by putting more troops into what is a civil war and that our military cannot resolve, the best military in the world, I believe a date certain also changes the incentives, the structure of incentives to change the behavior of Iran and Syria.

Everywhere Senator HAGEL and I went in Iraq we heard that Iran has undue influence. Yes, they do. We're bleeding, bleeding profusely. But when I asked our senior political leader there, if we were to redeploy, does Iran want a failed state? The answer was, no, they don't. With a date certain and the confidence the United States should have, having dealt with the Soviet Union, having dealt with the People's Republic of China, bringing it into the world's community, we should have the confidence to deal with Iran and Syria. Bring them together to work, with a date certain as their incentive toward working on the extreme elements in Iraq as we work in the center to bring about an unfailed state that can only be brought about by a date that is certain to redeploy.

It took us 6 months to redeploy from Somalia, a much smaller contingency of forces. We have over 100,000 civilians in Iraq, in addition to our troops. I believe that the Democratic leadership, working with the Republicans, should work towards what the President said. We will not have an open-ended commitment. With a date certain, working together, we can, on an authorization bill, a bill that establishes a date beyond which no funding would be permitted for troops within Iraq, while we use appropriations bills to continue to fund our forces so that we do not ever again, as we did in the last month, place those forces, those whom we serve with, wearing the cloth of our Nation that we sent to war, that we never again play a game of chicken between us and the President.

Being in the military is a dangerous business. It has, as someone said, the dignity of danger. It does not, however, have to be unsafe. Fund them fully with a date that is certain in our authorization bill by which we must redeploy, with enough timeline that the nations there can be brought together under U.S. leadership to bring about, by the only possible means that it can be done, diplomacy, strong diplomacy, as we remain in the region on our bases in Amman, Qatar, Bahrain, carrier battle groups, disengage, reengage in Afghanistan as well as here at home and elsewhere around this world in order to bring about a stronger security for America.

THE BUSH-KENNEDY AMNESTY BILL

The SPEAKER pro tempore. Under the Speaker's announced policy of January 18, 2007, the gentleman from California (Mr. ROHRABACHER) is recognized for 60 minutes as the designee of the minority leader.

Mr. ROHRABACHER. Mr. Speaker, it was a great victory for the American

people when the Bush-Kennedy amnesty bill was withdrawn from consideration in the Senate 2 weeks ago with such a stinging rebuke from the voters, because we understand that the voters had contacted their elected Representatives in such number that the bill was no longer tenable. After that rebuke from the voters, one would think that the White House and the congressional leadership would have listened to the American people and concentrated on securing our borders and moving forward with those activities to secure our country, and forget about legalizing the status of 15 to 20 million people who are in our country illegally. Well, how wrong we were. Like a bad horror movie, the monster you thought had been killed is somehow being brought back to life. It's rearing its ugly head again in the sequel. Well, here it is, Nightmare on North Capitol Street, part two, starring the Bush-Kennedy amnesty bill. This time we need to drive a stake into the heart of this monstrous threat to the American people.

And what threat am I talking about? It is about time that the Washington elite and the elite of America's business community understand what impact this massive flow of immigration into our society has had on the life of the American people.

What we face in California and now throughout the country is a disintegration of our education system. Our schools, for which our children are dependent on their education and the future of their lives, are being diminished in terms of their capability of educating our children because there is a massive influx of children into our school systems, children who should not even be in this country.

We have a health care system that is in crisis. Today, we see in California and we see in other States as well the closing of emergency rooms. So American citizens whose children are out on the highways, if there is an accident, may now not be able to go to emergency rooms to get treated, to have their lives saved, where only a few short years ago, maybe 10 or 15 years ago, there was an emergency room to service that.

Why are these emergency rooms closing? Why is the health care system in our country breaking down? This massive influx of immigrants, illegal immigrants, into our society. In fact, many people today are not able to pay for their health care insurance. And why is health care so high? One of the major reasons health care insurance is so high is when American citizens go to hospitals in order to be treated, their health care policy, which is massively expensive, also has to take care of those people who have no health care insurance, many of whom, a large number of whom are of course illegal immigrants.

And what about our criminal justice system? Our criminal justice system in California is breaking down. It's being crowded to the point where if someone does commit a misdemeanor or a crime, even a violent crime at times, they are let out on bond or sometimes they are let out on their own recognizance because there is no place to put them. These criminals, many of whom have come here illegally into our country, end up coming here because they know the punishment here is nothing as compared to the countries from which they are coming from.

Our criminal justice system is not protecting our citizens. If someone in your family is raped or murdered or robbed or run down by a drunk driver, well, now it is highly likely that, or I should say that the chances are very good that the person who is victimizing our family is here illegally and should never be in the country in the first place.

And what about the wages of ordinary Americans? Ordinary Americans now find that, yes, when they get out of school, they expect to get good jobs and good paying jobs. But, no. What we have is, with the massive influx of people into our country who will work far below the wages that Americans will work for, they have bid down the wages of our people. Now, that may not mean too much to the top 10 percent or the elite of the business community, but that means everything, everything, to ordinary Americans who are struggling to make ends meet. Our elite has not been hurt, our elite has not been victimized, but ordinary Americans find themselves not being able to get the paying jobs that will help them pay what is necessary to be in a middle-class existence in this country.

□ 1915

At the same time, unfortunately, we see an unfortunate trend among corporate executives, especially among the CEOs of companies, in paying themselves 10, 20, 30, even $100 million in compensation at the same time that the wage level of average Americans is under attack by a massive influx of illegals which is supported by the business elite.

Whose side is our government on? Is it on the side of the business elite that is willing to lay their own workers off, giving themselves huge salaries, and then bringing on illegals or sending their manufacturing to China so that slave labor can do the job and then giving themselves huge corporate salaries? Are we on the side of people who are coming here from other countries who, yes, they are benefited by coming here at the expense of ordinary Americans?

It is no mistake that this is happening. All of these dire consequences that are going on is not something that just happened. It was not something that was unavoidable. What is happening is a product of bad policy, policy that is not something that has been a mistake in policy, but an intentional policy that has been in place for 20 years.

We now have 15 to 20 million illegal immigrants in our country. And that is not just something that happened. It happened because it was planned by those people who are making the policy in the last 20 years, people who were paying attention to the corporate elite, who want to bid down wages, and also to the liberal left wing of the Democratic Party which controls the Democratic Party who think that with huge numbers of immigrants coming into our country, they can change America.

Neither one of those two groups of people who have such enormous influence in the Capitol of the United States are representing or watching out for the American people.

Well, what we have done is given rewards to those people who have come here illegally. And then we wonder why they come here. They say, ''Give it and they will come.'' Well, there is no doubt about it; we give a reward to people who live in poverty, abject poverty, in different countries. If we let them know they can have education benefits that should be going to Americans, but they now can get them for their children; if they know their children and their families will be given health care and health treatment with money that should be going to Americans; if they know that if they break the law that the penalties they face here are actually much lower than in the countries they are in; and if they know even if they are caught crossing our border and caught here illegally, they will not be punished, why wouldn't they come here?

This is not something that was unpredictable. We have 15 to 20 million people bidding down our wages, destroying our education system, destroying our health care system, making our streets and our communities not safe for our own families; and their presence here was not a mistake. It was planned out. Because people knew that if we give the benefits of jobs, good jobs, and the benefits that I just described that should be going to Americans, that people will come here from other countries.

No border protection will stop the massive flow of illegal immigrants into our country if we continue to give huge rewards, a treasure house of rewards, to those people who are coming here. Don't say that you want to strengthen the border because you really are serious about trying to stop illegal immigration if you are unwilling to cut off the benefits that are the lure, which are the magnet that bring people here.

Of course, there are those who claim that, who would like to say, well, yes, we really are concerned about this, and

we're going to strengthen the Border Patrol. Let's just note that the Kennedy-Bush amnesty bill that was in the Senate suggested that they were going to strengthen the Border Patrol enforcement and enforcement mechanisms. Yet, everything in that bill that dealt with enforcement; strengthening the Border Patrol, strengthening the fence, strengthening the ability of employers to be held accountable if they hire illegals; all of those things are already law but have not been enforced.

In fact, it is even worse that they haven't been enforced. This administration has actually undermined the effort to try to enforce the laws against illegal immigration, and they have done everything they can. While the bill suggests they want to strengthen them, and the President has had his picture taken many times on the border with Border Patrol agents saying how important they are, yet there has been no other administration that has so demoralized and attacks our Border Patrol agents in doing their duty.

By now, most Americans understand that there are two Border Patrol agents that are languishing in prison as I give this speech. But there are many such Border Patrol agents, there are many such law enforcement officers, who this administration has thrown the book at in order to send a message to those law enforcement officers and those Border Patrol agents who are there on the border trying to deflect this massive invasion from our southern border, and this administration has thrown the book at them if they make any mistake. A police officer who makes a mistake, a Border Patrol officer who makes a mistake, now understands that he or she will be prosecuted to the extent of the law, and the benefit of the doubt will be given to the illegal alien, even if the illegal alien is a criminal involved in such things as drug smuggling.

What of course is brought to mind is the case of Ramos and Compean. As I speak today, Ramos and Compean languish in Federal penitentiaries, where they have been held for 133 days in solitary confinement.

Mr. and Mrs. America, do you understand that the people who went out there to protect our families have been prosecuted to the fullest extent of the law, while a drug dealer who they were trying to stop was given immunity in order to convict them of mistakes? And those mistakes were turned into what? Into felonies by this administration.

Johnny Sutton, who is the U.S. attorney, has a long-time relationship with our President. One might even call him a crony, or some might call him a member of the Bush family in that sense, that he has been with him for a long time. He is a protege of our President. This man determined that Ramos and Compean would be prosecuted to the fullest extent of the law and that the drug dealer that they stopped on the Mexican-American border would be granted immunity and that his word would be taken over the word of the Border Patrol agents.

What happened was that 2 years ago, these two Border Patrol agents who have unblemished records, these two Border Patrol agents who have 15 years of experience at the Border Patrol between them and a pristine on-the-job record, both of them U.S. military veterans, one of them a 10-year veteran of the Naval Reserves, these men were on the job and they saw a truck that had clearly come across the border. They tried to stop it. The man in the truck ran out. They intercepted him. A scuffle ensued. The man then, after being involved in a physical altercation with a police officer, began to run toward the border.

His version is they immediately shot him in the back. Of course, the U.S. attorney has repeated over and over again the lie that two U.S. Border Patrol agents shot a man in the back as he was running away. How many times have we heard Mr. Sutton say that? And then he also insinuated that the two Border Patrol agents are corrupt, using the word ''corrupt.''

This administration has backed up their prosecutor who used that rhetoric, who threw the book at the Border Patrol agents, even though the Border Patrol agents suggested there had been a physical altercation; that the man who was actually involved with them at that moment trying to smuggle $1 million worth of drugs into our country was turning, and the two Border Patrol agents suggested they thought they saw him turning with an object in his hand. The seconds were passing just like this. What do you think when you see someone who is trying to smuggle things across the border? You assume they are armed.

The Border Patrol agents, Ramos and Compean, shot at him, thinking that he was armed, and he got away. They didn't know if they had hit him or not. Well, the U.S. attorney took the word of the drug dealer that he didn't have a gun.

Now, first of all, how do we know that the drug dealer didn't have a gun? He had $1 million worth of drugs. Was he thus trying to smuggle all those very expensive drugs, was he trying to do this unarmed? Is that what the drug cartel does? No. If you have got a valuable shipment, generally the Border Patrol agents understand that people who are smuggling drugs are armed because they have something of great value. Their drugs were worth $1 million in this case. Should we assume that this man had a gun? I think that was a logical assumption.

What is more important is the only word that we have that he didn't have a gun was that the drug smuggler himself made that claim. Should we believe the drug smuggler over the two Border Patrol agents? That is what our prosecutor did.

That is the policy of this administration. This administration gave total immunity to the drug dealer and threw the book at the Border Patrol agents, who have risked their lives to protect our families. If they had been stopping a terrorist who had a truckload of nuclear material, a dirty bomb aimed at El Paso or some other city, these two Border Patrol agents would have been heralded as heroes. Instead, it was a Mexican, instead of an Arab terrorist, and the Mexican drug dealer was given immunity, and the Border Patrol agents are now languishing in prison, having been charged with attempted murder.

The jury in that trial, by the way, was lied to. They were told that the drug dealer had never done this before, even though newspaper accounts suggest that his family said he had been hauling drugs for a long time, since he was 14 years old, and that he indeed carried a gun many times when he was smuggling drugs.

This administration decided that they were going to prosecute not only the Border Patrol agents, but they were going to lie to the jury and portray the drug dealer as this is the only time he ever did it, and, guess what? He only did it because he needed to make money for his sick mother's medicine. That type of tripe was allowed to be told to the jury.

And let us note that three of the jurors after this was over broke down in tears when they were told that they could have actually voted not guilty, the foreman of their jury told them that if the majority voted guilty, they had to vote guilty.

Johnny Sutton, our U.S. Attorney, claims that he didn't have a choice. He did have a choice, and it reflects on this administration, and that choice was to prosecute our defenders and give the benefit of the doubt and immunity to a Mexican drug dealer. He had a choice of who to prosecute.

They also had a choice of whether they were going to tell the jury that this same drug dealer had been fingered for a second drug shipment, even after the Ramos-Compean incident, before they went to trial. But that was kept from the jury as well.

The U.S. attorney claims that Ramos and Compean were corrupt. Now he defends that saying, well, anybody who would shoot an unarmed man is corrupt. Well, let me tell you this, another bit of lawyer-like legalese that the American people can understand: The Border Patrol agents have no corruption in their background whatsoever. Yet the U.S. attorney is calling them corrupt.

□ 1930

Department of Homeland Security briefers who briefed Members of Congress on these two Border Patrol

agents claimed they said ''we are going to go out today and shoot some Mexicans.'' And kept that up for months and then had to admit it was a total lie.

Something is dreadfully wrong here. What is dreadfully wrong is we have a President who is trying to send a message to the Border Patrol agents that they should not use their weapons or they are going to be prosecuted. Well, if you can't use your weapons on the border, how are we going to protect the border? No drug dealer or smuggler or terrorist is going to stop. If a Border Patrol agent says stop, but I can't use my weapon, you have lost control of the borders over a nonsensical policy and it has resulted in two of our heroes languishing in solitary confinement.

This administration is so mean-spirited and so nasty that when one of the Border Patrol agents was beaten up by a Mexican gang in prison, they refused to even consider asking the judge to let them out on appeal, which even common criminals are let out on appeal. No, they went into solitary confinement, quote, ''for their own protection.''

My staff visited Agent Ramos who has been in solitary confinement for 133 days. He has lost 25–35 pounds. They are not giving him proper medical care. This man, who was part of the Naval Reserve for 10 years, who risked his life for us, put his life on the border trying to stop drug dealers from bringing drugs into our communities, and this President refused to even consider asking the judge to let them out on bond until their appeal is heard.

Why is that? My guess is the President has made an agreement with the Mexican Government that there will be no use of weapons on our border, and this is part of a bigger picture, bigger understanding, bigger vision of our President, that we should have an open border with Mexico so we can have a country sort of like the border between Belgium and France in the future.

How do we know that the President has bigger visions that he doesn't let us know about? He made an agreement with the Mexican Government to provide Social Security benefits to illegals who have worked here if we indeed ever legalize the status of those people who are illegally working in our country. So yes, we are going to provide Social Security. That is part of the totalization agreement. And for 2 years we couldn't get that information about that secret understanding between our President and Mexico until Freedom of Information Act lawsuits forced them to disclose that.

What other agreements do we have? One must be that we are not going to use our weapons on the border unless our people are shot at first. What does that do to control of the border? That means we have lost total control. The Border Patrol agents understand this. They have never been more demoralized. And you tell me that we should believe that the President is serious about this issue and that Senator KENNEDY and President Bush will indeed strengthen the Border Patrol when they have done everything in their power to demoralize the Border Patrol?

The bill that was being proposed in the Senate, that was withdrawn, had one purpose and one purpose only. It was not to strengthen enforcement or strengthen the Border Patrol or increase the number of beds for detention for illegal immigrants. All of those things were already done by law. And the bill that was being proposed actually decreased the amount of enforcement already mandated by law.

There was one purpose and that purpose was to legalize the status of 15–20 million people who are in our country illegally. The enhancement provisions of that bill were fraudulent because those provisions were already mandated by laws that have already passed and are not being enforced by this administration.

So the American people when they heard this and understood what was being presented to them, and we kept hearing we have to have a comprehensive bill. A ''comprehensive bill'' only means legalization. Enhancement is there to cover up the fact that legalization is what is going on.

The American people when they finally understood that, and thank God we have people on talk radio shows around this country who alerted the American people to the legislative threat that was coming down the pike, the American people rose up in a righteous rage and made sure that their Members of Congress and Members of the Senate were alerted to the fact they would not put up with this betrayal of their interests.

But the American people are up against an incredibly powerful adversary in Washington. It is an unholy alliance between business and the liberal left that controls the Democratic Party. The business community wants lower wages. The business community wants to bid down not only the wages of the illegal immigrants that are coming over, and not only will they pay fewer wages to them, but they actually can pay lower wages to the American people because having the presence of 20 million people here actually brings down the wage level that they have to pay to get the job done.

So you have the business community pushing for policies that will not inhibit the massive flow of immigrants into our society, and you have the liberal left who really believe that they want to change the fundamentals of America and that a massive flow of illegals into our country, or at least a presence of a large number of immigrants, is going to help them change America.

Well, the businessmen of course don't say that. That is not what officially is the reason. That is not officially how they can claim that they want to bring in people from other countries. They are claiming that they can't find Americans to do jobs. Before it was there are no Americans who will work at these jobs, and now they have changed the word that there aren't Americans who are working at these jobs.

Let me note that I believe the American people will work on any job as long as the pay is right. We have 60 million Americans of working age who are not working in this country. But we are being told by the business community we can't find anybody to do these jobs. The hotel industry, for example, tells us they can't find people to change the sheets and clean up the rooms at hotels. What we need to do is take a picture in our mind of these big hotels and how many people they employ and realize where these hotels are located. They are located mainly in urban areas. There are millions upon millions of American women, and also men, I might add, who would love to have a job that would permit them to drop their kids off at school at 8:00 or 9:00 in the morning and come back at 3:00 in the afternoon and pick them up. That just happens to be the time when you need people to work in those hotels.

But you know what, those American people who would love to take care of their children and increase the take-home pay of their family, they are not going to work for a pittance. What happens with the illegals that come in, they work for a pittance. The hotels don't have to give them health insurance, and the American people are taxed or their health insurance has to pay for those illegals and they won't take the jobs because the jobs are paying so little.

Yes, I believe we have plenty of people to clean those hotel rooms. Let's pay them a decent wage. There is nothing wrong in believing that people who clean hotel rooms should have a middle-class income.

We are told that we can't find people to work on the farms. The farmers say there is not enough labor. There is a large number of people who labor on farms, but there is, yes, a component of people that we have brought in from other countries. We don't need to bring in these people from other countries. But every time I mention there is an alternative, people scream and yell. There is a big smoke screen that comes up because everybody refuses to look at an idea honestly. Instead, they want to negate the argument without actually confronting the idea because there are millions of young men in particular who are able to work on the farms; and millions, by the way, are in prison.

I look to see where the prisons are located in this country, and they are almost all in farm areas. Is there any reason in the world that we should just have prisoners beefing up at the gymnasium and watching TV, that we can't also have them earning money that otherwise would be going to foreigners, let them earn the money. Let them pay half of it to pay for their keep so it brings down the cost to the taxpayers, and let them walk out of prison 5 years later with half of the money that they have made being paid a market value for helping pick fruits and vegetables.

I have talked to prisoners and people who work in the prisons. They all love this idea, but every time you bring it up in the Congress, no, you don't hear a logical argument against it. You just hear no, no, no, we can't do that.

I'm sorry, just raising your voice and saying that can't be considered is not good enough. The American people understand that prisoners can work. And we don't have to bring in millions of people from overseas to take those jobs.

Also, we, of course, understand that it is not just low-level jobs with massive numbers of immigrants coming into our society. The business community also tells us these are the jobs people won't take, supposedly. We need to bring in hundreds of thousands of people with H–1B visas to run computer systems and to be technical people. What's the matter, Americans won't do those jobs?

I went to a function a few years ago and I will never forget it. A middle-aged person stopped me, and said, Congressman, I came here because I wanted to talk to you. I wanted to thank you because you were the only one who really stood up and argued against the H–1B visas which brought in hundreds of thousands of people from the Indian subcontinent to do these computer jobs. He said, you said it is going to bring down the wages of the American people, and I have the newspaper quote. And he said, you know what, I was a computer operator in Orange County earning $80,000 a year. They laid me off and a year later when they called me back to the company, they said they were going to pay me $50,000. He said, I had the same job and I was earning $80,000. And they said take the job because we can get an H–1B visa person from India to take this job for $40,000 if you won't take it for $50,000. He said, I took the job.

And he said, Do you know, Congressman, what the difference between earning $50,000 and $80,000 is? When you earn $50,000 a year in Orange County, you never dream of owning your own home.

Why are we betraying people like this? Why are we bringing in hundreds of thousands of people from overseas rather than have the industry pay more money? No, no, they are keeping the wages down, bringing in people who will work for a pittance while the CEOs of these companies are paying themselves tens of millions of dollars a year. There is nothing wrong with paying a CEO a good salary, but you are doing that by destroying the middle class of our country by taking it out of the mouths of working people, honest Americans who are willing to work, but now you want them to work as if they are peons and people of lower income are coming from all over the world?

Well, I was just confronted by this again in the health care industry. People want me to agree to bring in 100,000 Filipino nurses or 100,000 Indian or Pakistani nurses into our country. Nurses make $65,000–$70,000 a year. Our junior college system in California, you know, how many nurses are we graduating from there? No, in my own city we have a junior college that has 25,000 students and they graduate 185 people from their nursing program a year, and they think that is a great thing. What about those other thousands of kids? They are getting prepared to do what, sell clothes at Nordstrom's, so they can be an assistant manager at a 7–Eleven store and earn $35,000?

We need to remold our educational efforts to make sure that our kids are equipped to do these jobs, whether it is in computers or whether it is health care, rather than bringing in hundreds of thousands of people from overseas. It is our kids who should be getting the jobs for $65,000 a year when they start. But no, our system would prefer, because the people in our system are lazy. They don't want to go through the heartache of trying to reform the structure because a lot of college professors, by the way, who teach sociology in junior colleges, refuse to let the people who are teaching health care to our nurses to make more money than they make, and of course a nurse makes more money than a sociology professor, but they can't do it in our schools. So instead of reforming our education system so we can have more nursing people, rather than going overseas, instead we are just going to go overseas and bring hundreds of thousands of Filipinos and Pakistanis and Indians in.

This is horrible. H–1B visas are nothing more than an excuse by big business to keep wages down and give these opportunities to foreigners rather than our own American people.

□ 1945

Our American people, especially the young people, are being betrayed by this type of policy and this type of thinking.

There is a war that is being waged on the middle class in this country. It's a war that's being waged, yes, by people on the liberal left who have a radical agenda, never believed in the American way of life in the first place, and yes, in the business community that has no loyalty to their American workers whatsoever.

We see it in the China policy, where businesses will go overseas and basically participate in slave labor in order to make a 20 percent profit rather than a 5 or 6 percent profit here in the United States paying people decent wages.

We end up having a government policy that subsidizes these businessmen to go overseas, especially in China. There are loan guarantee programs for people who invest in manufacturing facilities in China. This is outrageous. We transfer our technology and our skills to the Chinese people when their government is a dictatorship that is opposed to everything we believe in and represses their own people, especially the religious people.

But yet, we let our American business community ship our jobs and our technology over there at what? The businessmen make a lot of money. The business elite make their money for a few years, and in the end, the American people suffer. Their high-paying manufacturing jobs are gone, again, subsidized by the American taxpayer.

We can see it in the China policy. We can see it in our immigration policy. There is a war being conducted on the American middle class. And what do we have here? Our people work hard, and they have fought the battles for freedom, and they have fought the battles to make sure that the businessmen in this country have a right to private property. Yet, those people who send the jobs to China are bringing illegal immigrants to bring down wages. They do not care about the American people.

It is our job, supposedly our job, to watch out for the American people. However, we have various powerful interests at play right here in the Congress that are stirring us away from watching out for their interests. As I've said, we've got our health care system and our education system and our legal system are all under attack. Our Social Security system is under attack, and we are called bigots and hate mongers because we want to watch out for the American people.

There was some suggestions by very high government officials and high political people here that those of us who were opposed to this comprehensive amnesty bill that, in some way, we're not for doing right for America or that our hearts are filled with hate. Well, let me note this. It is not selfish for the American people to demand that the resources that we have in our country be used for their benefit and the benefit of their families. That's not selfishness.

If being an American citizen means nothing, it means nothing, how can we ever expect the people to go and defend

our country? How can we expect the American people to think that there's something special about being an American if we give every benefit that belongs to them to someone who's come here illegally?

And let us note this. We don't hate the people who come here illegally. In fact, we have to note, yes, there are criminals that come here illegally. There are drug dealers, but 90 percent of the people who come here are probably very wonderful people. We would come here, too, but it is the job of the United States Government not to help good people who need help and would come here from all over the world. Our job is to watch out for the interests of the American people, and if that doesn't mean anything, why should the American people be loyal to us if we're not being loyal to them?

We're not saying that illegals are bad people. We just know that if they drain the education system, the health care system, if they come in and they're poor, they're going to take $100,000 in their lifetime more out of Social Security than they put in. It's going to bankrupt Social Security. Is there anything wrong with saying that we're going to watch out for our people first, our people being the people who are citizens of the United States and people who have come here legally?

And again, let me note this. Not only do we not think poorly of illegals, because we have to protect ourselves against diseases that are coming in, criminals that are coming in, yes, but by and large, illegal immigrants are trying to come here to better their families, but they're doing it at the expense of the American people.

However, let us note that the people who are the worst hurt on this are the legal immigrants. I had a telephonic town hall meeting last night, and the number of the people who called in to complain about illegal immigration are the people who came here legally, who are in this country legally, most of whom have become citizens.

This flood of illegals into our society is the worst threat to people who have come here legally, and once we legalize the status of the 15 to 20 million who have come here illegally, it is an insult and a slap at the legal people, also the people who are waiting overseas by the tens of millions to come here legally.

Now, we are not being bigoted. We're not being selfish. We're watching out for the interests of the American people, and there's nothing wrong with that, and the legal immigrants who are here fully understand, and we are not in any way anti-legal immigrant.

Well, what's happening, of course, the Americans who are worst hit are at the bottom end of the scale. Those people who are struggling in the black community to get these jobs and would like good paying jobs are being edged out by illegals. American citizens who happen to be black should pay attention to how their elected officials are voting on this illegal immigration issue. There's nothing more damaging to the black community than illegal immigration that denies benefits and jobs to our own citizens.

Also, the Mexican American community, proud Americans who happen to be of Mexican descent, they are being hurt because they're being stigmatized by a massive influx of illegals into our country from Mexico. It is wrong and they know that. Americans of Mexican descent are proud and patriotic people. They have earned more medals in defending our country than any other ethnic group in the United States. They are being hard hit. These are the people who would be the hardest hit by the Bush-Kennedy so-called comprehensive immigration reform bill.

What it is, of course, again is an immigration bill that the enforcement part is just a facade and a fraud, but the real purpose is to immediately legalize the status of 15 to 20 million people who are in our country illegally.

Let's note, in that bill what was proposed, and we have no idea what they're going to bring back at us, a Z visa would have had to have been issued to any illegal immigrant who was applying to get this visa that would give them a temporary status, but the temporary status would be a legal status, and they could renew that visa as many times as they want. There's no limit on how long they could stay here on a ''temporary'' visa, but the legal status permitted them to get all these benefits that legal citizens would get except for voting.

And what would happen? The people of our government were going to give only 24 hours to give a person who had applied to give them Z visas. How many tens of thousands of criminals, of people who are ill with communicable diseases, of terrorists would have been allowed to come into our country on a temporary status but renewably forever, had that happened, thank God that bill was held back. But that bill will come back again and is coming back again unless we rise up again and make our voices heard, because they are trying to bring back the illegal immigration bill that would have given amnesty to those 15 to 20 million illegals.

Now, let me note that there has been a bill that has been submitted by LAMAR SMITH, BRIAN BILBRAY and others that is a bill here in the House that is an example of the type of immigration reform that is real reform, which is aimed at enforcement, which is aimed at trying to make sure that employers can verify whether or not someone who's applying for a job is an illegal immigrant or not, and strengthening the border patrol and the agents and building a fence. This is in LAMAR SMITH's bill. That is a real bill. That is a bill we need.

And I would hope that the American people say we don't need a comprehensive bill, we need an enforcement bill. As I say, unless the American people are paying attention, and becoming involved in the process, those powerful interest works that are at play here, working against their well-being, will carry the day. That bill will come back. Unless we express our anger and our outrage over this betrayal of the interests of average Americans, it will pass, just as it was on line to pass before. Yet another attempt to try to get a bill through without the American people understanding what is in that bill and how threatening it is.

There is, of course, a lot of examples where the interests of our people are not being watched here in this Congress, and there's no doubt that there are interests at work. Unless the American people pay attention, those special interests will succeed.

One of the powerful influences in Washington right now is based on the concept of globalism. That's why we're trying to build up the economy of China, because this strategy is that we're going to have a global system of government and of trade and of economics. And that global system is a dream that is a driving force behind many of the policies that are so detrimental to our American people. Because if you watch out for the globe, that means that you're going to be taking from the American people.

By definition, our people, being in the richest country of the world, are going to be the targets that are selected to try to extract benefits from them and the wealth from them in order to have a better globe, a better world. Well, I want there to be a better world, but I'm not going to do it by taking away from the rights and the well-being of the American people.

What we've got here in the immigration bill and our China policies is a fight between those with a globalist approach versus a patriotic approach. It's the patriots versus the globalists. Now, we care about the other people in the world. Because we want to protect the interests of the American people doesn't mean that we are nasty and that we hate people.

But the people of the United States of America have a very special role to play in this world. We're people who come here from every race and every religion, every part of the world, and we have come here. We are living together, trying to live together in peace and harmony, trying to say to the world, as our Founding Fathers meant us to say in the Declaration of Independence, that people have rights of life, liberty and the pursuit of happiness and that we are here to show a better way.

If we diminish the well-being of the people of the United States of America, we take away from their opportunity

in order to build up others. In order to build a vision of the globe, it will be a great disservice not only to the American people but to the people of the world.

It has been the American people that set the standard. It's been the American people who stepped out and defeated Japanese militarism and Nazism when it threatened the world. It's been the American people who have stepped out and defeated communism and deterred the communist expansion until that evil atheistic system had a chance to disintegrate. It is the American people now who bear the brunt of the war on radical Islam that would create Islamic dictatorships and treat women all over the world as cattle.

We are the ones who are protecting the world against these evils, and if the American people ever come to the point where they lose faith in our system because we have not been watching out for their interests, yes, it will be a horrible, a horrible outcome, not only for the people, not only for our country, but for the entire planet because the planet, the good and decent people of this planet, depend on us to show the way.

We cannot just forget that the Social Security benefits of our people will be damaged and be put in jeopardy if we allow poverty stricken people to flood into our country. We can't forget what it's going to do to the American people, what it will do to the United States. What is the United States? The United States is us, U.S.

In 1986, we, us, the United States, the people of the United States, were told that by granting amnesty to 3 million illegals, that would end the problem because there would be enforcement on employers and that would then stop this problem, and there was an irritation of having 3 million people here illegally.

□ 2000

Well, today, we are told there are 11 million. Most of us believe it is more like 15 to 20 million illegals who live among us. What that means is that if we end up now, giving them legal status, we will have 50 million to 60 million illegals here win 10 years. We will have lost our country. America will be lost to people who have come here illegally from other countries.

Wake up, America. We are losing our country, and it is not just a mistake. There have been policies that have encouraged this invasion.

Now, we are told that those who are opposing this invasion of illegals into this country have no alternative. Oh, you are saying, well, you were opposed to legalization status.

Well, what's your option? There is an option. The most dishonest argument that has been presented is that we have to either legalize the status with amnesty, or we have to have massive deportation. That was the most dishonest approach that I have heard, except for someone who is trying to claim that the word ''amnesty'' doesn't mean what amnesty means.

Well, there is an alternative to mass deportation or just giving amnesty or legalization. It's called attrition. It means that when people come here, we should not provide them free education, free health care, free services. If their child is born here, they shouldn't become a U.S. citizen automatically, because, by the way when they do, automatically they get housing subsidies and everything else based on the idea that they have got a U.S. citizen in their household.

No, if you deny them those things and you deny them jobs, first of all, people will hear that overseas and they will quit coming. Those who are already here illegally will find it hard to get by, and eventually, slowly but surely they will eventually go home. It's called attrition. There is nothing wrong with that approach. It is not massive deportation, it is not legalization. It is the one thing that will work. It is an alternative.

Those people who present the so-called comprehensive plan have only one thing in mind, legalizing the status of those who are already here illegally, and that will result in 50 to 100 million more illegals coming to work for our country. Thus, what is the alternative? The only alternative is to strengthen our border, yes, strengthen our border, strengthen our visa system.

Most people don't understand that 40 percent of all illegals don't come from our southern border, 40 percent of them are coming in with visa ands just overstaying their visa. Again it was a conscious decision not to reform our visa system so we would know if someone who had come in has left.

Our system, right now, we don't know if they have left and gone home or not. We could have reformed that. But, instead, we did not because it was policy to bring in these illegals. Those who are talking about comprehensive approach, they are the ones who back that policy.

Now, we have an alternative. The alternative, attrition, the alternative is making sure that we strengthen the border, but then we deny benefits and jobs to those who are here. We can do this. This is a job that is not beyond our ability in this Congress to do. We could certainly build a fence, and we can certainly have enforcement mechanisms done right away, which is what the bill LAMAR SMITH has recently placed in the hopper.

Now, Americans need to pay attention to what's going on. They need to know the arguments. They need to know people, the arguments that people are making, who are trying to fool them, and they need to speak up. There needs to be the same kind of outcry that we heard about a month ago, because that's when the powers that be were back down on the Senate side with that amnesty, with the Bush-Kennedy amnesty legalization bill.

It's time to step up. We cannot count on the government to protect our interest, the elected officials. We all have to participate.

This is the United States of America versus those people who do not have the interests of the American people at heart. It's time for the patriots to be heard. We will lose this fight unless the patriots are heard.

I would now like to thank the Chair for permitting me this time and would call on the American people to be active, be patriots, and I am proud to serve them here in the United States Congress.

LEAVE OF ABSENCE

By unanimous consent, leave of absence was granted to:

Mr. LARSON of Connecticut (at the request of Mr. HOYER) for today.

SPECIAL ORDERS GRANTED

By unanimous consent, permission to address the House, following the legislative program and any special orders heretofore entered, was granted to:

(The following Members (at the request of Mrs. CHRISTENSEN) to revise and extend their remarks and include extraneous material:)

Ms. KILPATRICK, for 5 minutes, today.

Ms. WATERS, for 5 minutes, today.

Mr. SCOTT of Virginia, for 5 minutes, today.

Mr. DAVIS of Illinois, for 5 minutes, today.

Ms. LEE, for 5 minutes, today.

Mrs. CHRISTENSEN, for 5 minutes, today.

Mrs. JONES of Ohio, for 5 minutes, today.

Ms. CORRINE BROWN of Florida, for 5 minutes, today.

Ms. JACKSON-LEE of Texas for 5 minutes, today.

Ms. CLARKE, for 5 minutes, today.

Mr. RUSH, for 5 minutes, today.

Mr. DEFAZIO, for 5 minutes, today.

Ms. WOOLSEY, for 5 minutes, today.

(The following Members (at the request of Mr. JONES of North Carolina) to revise and extend their remarks and include extraneous material:)

Mr. POE, for 5 minutes, June 26.

Mr. BURGESS, for 5 minutes, June 20.

Mr. JONES of North Carolina, for 5 minutes, June 26.

The following Member (at his own request) to revise and extend his remarks and include extraneous material:)

Mr. SESTAK, for 5 minutes, today.

ENROLLED BILLS SIGNED

Ms. Lorraine C. Miller, Clerk of the House, reported and found truly enrolled bills of the House of the following titles, which were thereupon signed by the Speaker:

H.R. 57. An act to repeal certain sections of the Act of May 26, 1936, pertaining to the Virgin Islands.

H.R. 692. An act to amend title 4, United States Code, to authorize the Governor of a State, territory, or possession of the United States to order that the National flag be flown at half-staff in that State, territory, or possession in the event of the death of a member of the Armed Forces from that State, territory, or possession who dies while serving on active duty.

ADJOURNMENT

Mr. ROHRABACHER. Mr. Speaker, I move that the House do now adjourn.

The motion was agreed to; accordingly (at 8 o'clock and 5 minutes p.m.), the House adjourned until tomorrow, Wednesday, June 20, 2007, at 10:00 a.m.

EXECUTIVE COMMUNICATIONS, ETC.

Under clause 8 of rule XII, executive communications were taken from the Speaker's table and referred as follows:

2254. A letter from the Principal Deputy Under Secretary for Personnel and Readiness, Department of Defense, transmitting a report to Congress on the use of Aviation Continuation Pay (ACP) for Fiscal Year 2006, pursuant to 37 U.S.C. 301b(i); to the Committee on Armed Services.

2255. A letter from the Chairman, Federal Energy Regulatory Commission, transmitting the Commission's annual report, covering the fiscal year from October 1, 2005, through September 30, 2006, pursuant to 16 U.S.C. 797(d); to the Committee on Energy and Commerce.

2256. A letter from the Assistant Legal Adviser for Treaty Affairs, Department of State, transmitting Copies of international agreements, other than treaties, entered into by the United States, pursuant to 1 U.S.C. 112b; to the Committee on Foreign Affairs.

2257. A letter from the Under Secretary for Industry and Security, Department of Commerce, transmitting a report that the Department intends to impose new foreign policy-based export controls on exports of certain items under the authority of Section 6 of the Export Administration Act of 1979, as amended, and continued by Executive Order 13222 of August 17, 2001, as extended by the Notice of August 3, 2006; to the Committee on Foreign Affairs.

2258. A letter from the Assistant Secretary for Legislative Affairs, Department of State, transmitting the seventh annual Trafficking in Persons Report, pursuant to Public Law 106-386, section 110; to the Committee on Foreign Affairs.

2259. A letter from the Assistant Secretary for Legislative Affairs, Department of State, transmitting pursuant to section 36(c) of the Arms Export Control Act, certification regarding the proposed technical assistance agreement for the export of technical data, defense services and defense articles to the Government of Canada (Transmittal No. DDTC 061-07); to the Committee on Foreign Affairs.

2260. A letter from the Chief, Regulations and Administrative Law, Department of Homeland Security, transmitting the Department's final rule — Security Zone: Coast Guard Academy Commencement, New London, CT [CGD01-01-049] (RIN: 1625-AA87) received June 13, 2007, pursuant to 5 U.S.C. 801(a)(1)(A); to the Committee on Transportation and Infrastructure.

2261. A letter from the Chief, Regulations and Administrative Law, Department of Homeland Security, transmitting the Department's final rule — Regulated Navigation Area; Atchafalaya River, Berwick Bay, Berwick Bay, LA. [CGD08-06-023] (RIN: 1625-AA11) received June 13, 2007, pursuant to 5 U.S.C. 801(a)(1)(A); to the Committee on Transportation and Infrastructure.

2262. A letter from the Chief, Regulations and Administrative Law, Department of Homeland Security, transmitting the Department's final rule — Special Local Regulation: ULHRA Hydroplane Races, Howard Amon Park, Richland, Washington. [CGD13-07-013] (RIN: 1625-AA00) received June 13, 2007, pursuant to 5 U.S.C. 801(a)(1)(A); to the Committee on Transportation and Infrastructure.

2263. A letter from the Chief, Regulations and Administrative Law, Department of Homeland Security, transmitting the Department's final rule — Drawbridge Operation Regulations; Intracoastal Waterway (ICW); Manasquan River, Brielle, NJ [CGD05-07-056] (RIN: 1625-AA-09) received June 13, 2007, pursuant to 5 U.S.C. 801(a)(1)(A); to the Committee on Transportation and Infrastructure.

2264. A letter from the Chief, Regulations and Administrative Law, Department of Homeland Security, transmitting the Department's final rule — Vessels Carrying Oil, Noxious Liquid Substances, Garbage, Municipal or Commercial Waste, and Ballast Water; Technical, Organizational and Conforming Amendment [USCG-2007-28201] (RIN: 1625-ZA13) received June 13, 2007, pursuant to 5 U.S.C. 801(a)(1)(A); to the Committee on Transportation and Infrastructure.

2265. A letter from the Adjutant General, Veterans of Foreign Wars of the U.S., transmitting proceedings of the 107th National Convention of the Veterans of Foreign Wars of the United States, held in Reno, Nevada, August 26-August 31, 2006, pursuant to 36 U.S.C. 118 and 44 U.S.C. 1332; (H. Doc. No. 110–40); to the Committee on Veterans' Affairs and ordered to be printed.

2266. A letter from the Commissioner, Social Security Administration, transmitting a copy of a draft bill to make amendments to the Old-Age, Survivors, and Disability Insurance program and the Supplemental Security Income program.; to the Committee on Ways and Means.

2267. A letter from the Under Secretary for Acquisition, Technology and Logistics, Department of Defense, transmitting the Department's assessment of the FY 2008 President's Budget Request for science and technology, as required by Section 217 of the John Warner National Defense Authorization Act for Fiscal Year 2007; jointly to the Committees on Armed Services and Science and Technology.

2268. A letter from the Secretary, Department of Health and Human Services, transmitting the Department's FY 2004 report on the Low Income Home Energy Assistance Program (LIHEAP), pursuant to 42 U.S.C. 8629(b); jointly to the Committees on Energy and Commerce and Education and Labor.

2269. A letter from the Deputy Director, Defense Security Cooperation Agency, transmitting the Department's notification of its intention to use unobligated International Military Education and Training (IMET) funds appropriated for Montenegro, pursuant to Public Law 108-447; jointly to the Committees on Foreign Affairs and Appropriations.

REPORTS OF COMMITTEES ON PUBLIC BILLS AND RESOLUTIONS

Under clause 2 of rule XIII, reports of committees were delivered to the Clerk for printing and reference to the proper calendar, as follows:

Ms. WASSERMAN SCHULTZ: Committee on Appropriations. H.R. 2771. A bill making appropriations for the Legislative Branch for the fiscal year ending September 30, 2008, and for other purposes (Rept. 110–198). Referred to the Committee of the Whole House on the State of the Union.

Mr. HASTINGS (FL): Committee on Rules. House Resolution 498. Resolution providing for consideration of the bill (H.R. 2764) making appropriations for the Department of State, foreign operations, and related programs for the fiscal year ending September 30, 2008, and for other purposes (Rept. 110–199). Referred to the House Calendar.

Mr. CONYERS: Committee on the Judiciary. H.R. 923. A bill to establish an Unsolved Crimes Section in the Civil Rights Division of the Department of Justice, and an Unsolved Civil Rights Crime Investigative Office in the Civil Rights Unit of the Federal Bureau of Investigation, and for other purposes; with an amendment (Rept. 110–200). Referred to the Committee of the Whole House on the State of the Union.

PUBLIC BILLS AND RESOLUTIONS

Under clause 2 of rule XII, public bills and resolutions were introduced and severally referred, as follows:

By Mr. GEORGE MILLER of California (for himself, Mr. RAHALL, Ms. WOOLSEY, Mr. MURTHA, Mr. KUCINICH, Mr. CHANDLER, Mr. HARE, Mr. BISHOP of New York, Mr. MOLLOHAN, Mr. PAYNE, Mr. HOLT, Mr. SARBANES, and Mr. YARMUTH):

H.R. 2768. A bill to establish improved mandatory standards to protect miners during emergencies, and for other purposes; to the Committee on Education and Labor.

By Mr. GEORGE MILLER of California (for himself, Mr. RAHALL, Ms. WOOLSEY, Mr. MURTHA, Mr. KUCINICH, Mr. CHANDLER, Mr. HARE, Mr. BISHOP of New York, Mr. MOLLOHAN, Mr. PAYNE, Mr. HOLT, Mr. SARBANES, and Mr. YARMUTH):

H.R. 2769. A bill to establish improved mandatory standards to protect and enhance the health of miners; to the Committee on Education and Labor.

By Mr. TOWNS (for himself and Mr. WHITFIELD):

H.R. 2770. A bill to amend title XVIII of the Social Security Act to ensure more appropriate payment amounts for drugs and biologicals under part B of the Medicare Program by excluding customary prompt pay discounts extended to wholesalers from the manufacturer's average sales price; to the Committee on Energy and Commerce, and in addition to the Committee on Ways and Means, for a period to be subsequently determined by the Speaker, in each case for consideration of such provisions as fall within the jurisdiction of the committee concerned.

By Mr. BRADY of Texas (for himself, Mr. SAM JOHNSON of Texas, Mr. CULBERSON, Mr. PAUL, Mr. HALL of Texas, Ms. GRANGER, Mr. MCCAUL of Texas, Mr. MEEK of Florida, Mr. BURGESS, Mr. POE, Mr. EDWARDS, Mr. MARCHANT, Mr. MCGOVERN, Mr. DELAHUNT, and Mr. HINOJOSA):

H.R. 2772. A bill to amend title II of the Social Security Act to repeal the windfall elimination provision and protect the retirement of public servants; to the Committee on Ways and Means.

By Mr. LAMPSON:

H.R. 2773. A bill to enhance research, development, demonstration, and commercial application of biofuels related technologies, and for other purposes; to the Committee on Science and Technology.

By Ms. GIFFORDS:

H.R. 2774. A bill to support the research, development, and commercial application of solar energy technologies, and for other purposes; to the Committee on Science and Technology.

By Mr. OBERSTAR (for himself and Ms. NORTON):

H.R. 2775. A bill to amend the Robert T. Stafford Disaster Relief and Emergency Assistance Act to authorize funding for emergency management performance grants, and for other purposes; to the Committee on Transportation and Infrastructure.

By Mr. RANGEL (for himself, Mr. LEVIN, Mr. MCDERMOTT, Mr. LEWIS of Georgia, Mr. NEAL of Massachusetts, Mr. MCNULTY, Mr. TANNER, Mr. BECERRA, Mr. DOGGETT, Mr. POMEROY, Mrs. JONES of Ohio, Mr. THOMPSON of California, Mr. LARSON of Connecticut, Mr. EMANUEL, Mr. BLUMENAUER, Mr. KIND, Mr. PASCRELL, Ms. BERKLEY, Mr. CROWLEY, Mr. VAN HOLLEN, Ms. SCHWARTZ, and Mr. DAVIS of Alabama):

H.R. 2776. A bill to amend the Internal Revenue Code of 1986 to provide tax incentives for the production of renewable energy and energy conservation; to the Committee on Ways and Means.

By Mr. BISHOP of Utah (for himself, Mr. CANNON, and Mr. MATHESON):

H.R. 2777. A bill to provide for the acquisition of five isolated parcels of land owned by the State of Utah, under the control of the Utah National Guard, and withdrawn for military use as part of Camp Williams, Utah, in exchange for a consolidated parcel of public land of approximate equal value, also within the boundaries of Camp Williams, necessary for future military mission training; to the Committee on Natural Resources.

By Mrs. LOWEY (for herself, Mrs. MALONEY of New York, Mr. HIGGINS, Mr. TOWNS, Mr. CROWLEY, Mr. KUHL of New York, Mr. MCHUGH, Mr. HALL of New York, Mr. ACKERMAN, Mr. NADLER, Mr. FOSSELLA, Mr. BISHOP of New York, Mr. ENGEL, Ms. CLARKE, and Mrs. GILLIBRAND):

H.R. 2778. A bill to designate the facility of the United States Postal Service located at 3 Quaker Ridge Road in New Rochelle, New York, as the ''Robert Merrill Postal Station''; to the Committee on Oversight and Government Reform.

By Mr. MAHONEY of Florida (for himself, Mr. HASTINGS of Florida, Ms. CASTOR, Mr. BOYD of Florida, Mrs. DRAKE, Mrs. DAVIS of California, and Mr. CALVERT):

H.R. 2779. A bill to recognize the Navy UDT-SEAL Museum in Fort Pierce, Florida, as the official national museum of Navy SEALS and their predecessors; to the Committee on Armed Services.

By Mr. MORAN of Virginia:

H.R. 2780. A bill to amend section 8339(p) of title 5, United States Code, to clarify the method for computing certain annuities under the Civil Service Retirement System which are based on part-time service, and for other purposes; to the Committee on Oversight and Government Reform.

By Mr. RANGEL:

H.R. 2781. A bill to award a congressional gold medal to Ray Charles in recognition of his many contributions to the Nation; to the Committee on Financial Services.

By Mr. REHBERG:

H.R. 2782. A bill to amend the Internal Revenue Code of 1986 to extend the deduction for qualified tuition and related expenses; to the Committee on Ways and Means.

By Mrs. TAUSCHER (for herself, Ms. LEE, Ms. MATSUI, Mr. MCNERNEY, Mrs. NAPOLITANO, Mr. FILNER, Mr. STARK, Mr. GEORGE MILLER of California, Mr. LANTOS, Ms. ESHOO, Ms. ZOE LOFGREN of California, Ms. WOOLSEY, Mr. THOMPSON of California, Mrs. CAPPS, Ms. LINDA T. SÁNCHEZ of California, Ms. WATSON, and Mr. FARR):

H.R. 2783. A bill to amend title 23, United States Code, to provide for mass transportation services that provide temporary substitute highway traffic service as a result of an emergency; to the Committee on Transportation and Infrastructure.

By Ms. ROS-LEHTINEN (for herself, Mr. LANTOS, Mr. BURTON of Indiana, Mr. ROHRABACHER, Mr. CHABOT, Mr. PENCE, Mr. TANCREDO, Mr. PITTS, and Mr. HONDA):

H. Res. 497. A resolution expressing the sense of the House of Representatives that the Government of the People's Republic of China should immediately release from custody the children of Rebiya Kadeer and Canadian citizen Huseyin Celil and should refrain from further engaging in acts of cultural, linguistic, and religious suppression directed against the Uyghur people, and for other purposes; to the Committee on Foreign Affairs.

By Mr. SMITH of Texas (for himself and Mr. KING of New York):

H. Res. 499. A resolution expressing the sense of the House of Representatives that the Administration should rigorously enforce the laws of the United States to substantially reduce illegal immigration and greatly improve border security; to the Committee on the Judiciary, and in addition to the Committees on Financial Services, and Homeland Security, for a period to be subsequently determined by the Speaker, in each case for consideration of such provisions as fall within the jurisdiction of the committee concerned.

MEMORIALS

Under clause 3 of rule XII, memorials were presented and referred as follows:

81. The SPEAKER presented a memorial of the Legislature of the State of Louisiana, relative to House Concurrent Resolution No. 83 memorializing the Congress of the United States to take such actions as are necessary to continue the current United States sugar program in the 2007 Farm Bill; to the Committee on Agriculture.

82. Also, a memorial of the Senate of the Commonwealth of Pennsylvania, relative to Senate Resolution No. 115 urging the President of the United States and the Congress of the United States to enact legislation to provide additional funding for ALS research; to the Committee on Education and Labor.

83. Also, a memorial of the Senate of the Commonwealth of Pennsylvania, relative to Senate Resolution No. 91 urging the President of the United States and the Congress of the United States to fulfill the commitment of the Individuals with Disabilities Education Act to provide resources equal to forty percent of the national average per pupil expenditure for special education students for each Pennsylvania student with special needs; to the Committee on Education and Labor.

ADDITIONAL SPONSORS

Under clause 7 of rule XII, sponsors were added to public bills and resolutions as follows:

H.R. 241: Mr. ENGLISH of Pennsylvania and Mr. JORDAN.

H.R. 293: Mr. CUMMINGS.

H.R. 435: Ms. BERKLEY.

H.R. 550: Mr. PAUL, Ms. HIRONO, Mr. WAXMAN, Mr. MARIO DIAZ-BALART of Florida, Mr. MEEHAN, Mrs. MALONEY of New York, Mrs. GILLIBRAND, and Ms. WOOLSEY.

H.R. 601: Ms. KAPTUR.

H.R. 624: Mr. BLUMENAUER, Mr. ABERCROMBIE, and Ms. SCHAKOWSKY.

H.R. 690: Mr. EVERETT.

H.R. 695: Mrs. MALONEY of New York.

H.R. 715: Mr. LANTOS, Mr. RANGEL, and Mr. MORAN of Virginia.

H.R. 741: Mr. HONDA.

H.R. 767: Mr. FARR.

H.R. 772: Mr. COHEN.

H.R. 777: Mr. HASTINGS of Florida and Mr. STARK.

H.R. 782: Mr. TIM MURPHY of Pennsylvania and Mr. SHULER.

H.R. 822: Mr. KUCINICH.

H.R. 873: Mr. CLEAVER.

H.R. 954: Mr. FOSSELLA and Mr. REYNOLDS.

H.R. 971: Mr. BARROW and Mr. CROWLEY.

H.R. 980: Ms. MOORE of Wisconsin, Mr. SCOTT of Virginia, Mr. KELLER, MR. JACKSON of Illinois, Mr. NEAL of Massachusetts, Mrs. LOWEY, MR. HUNTER, Mr. LANGEVIN, Mr. BECERRA, and Mr. LYNCH.

H.R. 983: Mr. BAIRD.

H.R. 989: Mr. SOUDER.

H.R. 1023: Mr. SPACE, Mr. DAVIS of Kentucky, and Mr. BILBRAY.

H.R. 1032: Mr. SALAZAR.

H.R. 1049: Mr. MCCOTTER.

H.R. 1055: Mr. MEEHAN.

H.R. 1105: Mr. SNYDER.

H.R. 1108: Ms. KILPATRICK.

H.R. 1110: Mr. MCDERMOTT.

H.R. 1125: Mr. PICKERING, Mr. HERGER, Mr. DAVIS of Alabama, and Mr. STEARNS.

H.R. 1188: Mr. HONDA.

H.R. 1192: Mr. RAHALL, Mrs. NAPOLITANO, and Mr. BOUCHER.

H.R. 1224: Mr. RAHALL.

H.R. 1245: Mr. BRADY of Pennsylvania.

H.R. 1264: Mr. STUPAK, and Ms. VELÃZQUEZ.

H.R. 1302: Mr. WAXMAN, Mrs. CAPPS, Mr. SHULER, Ms. LEE, Mr. FATTAH, and Ms. NORTON.

H.R. 1418: Mr. HAYES, Mr. BISHOP of Georgia, Mr. CAPUANO, and Mr. SESSIONS.

H.R. 1422: Ms. GINNY BROWN-WAITE of Florida.

H.R. 1428: Mr. DAVIS of Illinois.

H.R. 1439: Mrs. CAPITO.

H.R. 1459: Mr. SALI, Mr. SNYDER, and Mr. MOLLOHAN.

H.R. 1481: Mr. BRADY of Texas and Mr. FORBES.

H.R. 1498: Mr. HONDA.

H.R. 1527: Mr. PETERSON of Minnesota.

H.R. 1537: Mr. BILIRAKIS.

H.R. 1589: Mr. JOHNSON of Georgia, Mr. CALVERT, and Mr. FILNER.

H.R. 1687: Mr. RYAN of Ohio.
H.R. 1707: Mr. BISHOP of New York and Mr. HILL.
H.R. 1718: Ms. WATSON.
H.R. 1742: Mr. JOHNSON of Illinois.
H.R. 1748: Mr. CARNEY, Mr. PORTER, Ms. ROS-LEHTINEN, Mr. MCGOVERN, and Mr. BRADY of Pennsylvania.
H.R. 1754: Mr. LAMPSON.
H.R. 1818: Mr. LEWIS of Georgia.
H.R. 1823: Ms. NORTON, Mr. JINDAL, and Ms. SLAUGHTER.
H.R. 1845: Mr. WELCH of Vermont, Ms. GINNY BROWN-WAITE of Florida, Mr. SOUDER, Mr. COURTNEY, Mrs. BLACKBURN, Mr. PORTER, Mr. ABERCROMBIE, Mr. ALTMIRE, Mr. RAHALL, Mr. GONZALEZ, Mr. BOUCHER, Mr. CARNEY, Mr. DAVIS of Kentucky, Ms. BERKLEY, and Ms. SUTTON.
H.R. 1852: Mr. ETHERIDGE.
H.R. 1876: Mr. BROWN of South Carolina and Mrs. CHRISTENSEN.
H.R. 1889: Mr. HINCHEY.
H.R. 1924: Mr. BOUSTANY.
H.R. 1926: Mr. COHEN and Mr. BRADY of Pennsylvania.
H.R. 1938: Mr. ELLISON and Mr. SCHIFF.
H.R. 1969: Mr. FEENEY.
H.R. 1971: Mr. PLATTS.
H.R. 1983: Mr. ROTHMAN and Mr. BRALEY of Iowa.
H.R. 2003: Mr. WU.
H.R. 2049: Mr. LEVIN.
H.R. 2052: Mr. GORDON, Mrs. CAPITO, Mr. DAVIS of Illinois, Mr. ISRAEL, Mrs. CAPPS, and Mrs. GILLIBRAND.
H.R. 2060: Mr. HASTINGS of Florida.
H.R. 2063: Mrs. CAPPS, Mr. NEAL of Massachusetts, and Ms. DEGETTE.
H.R. 2108: Mr. RANGEL.
H.R. 2116: Mr. REGULA and Mr. CARNAHAN.
H.R. 2129: Mr. COURTNEY, Mr. WU, and Mr. BISHOP of Georgia.
H.R. 2139: Mr. JONES of North Carolina and Mr. ETHERIDGE.
H.R. 2161: Mr. TIBERI.
H.R. 2165: Mr. ETHERIDGE.
H.R. 2169: Mr. LEVIN.
H.R. 2183: Mr. GOODE, Mr. LAMBORN, Mr. CANTOR, Mr. BURGESS, and Mr. SOUDER.
H.R. 2211: Mr. FARR and Mr. DAVIS of Illinois.
H.R. 2225: Mr. BERMAN.
H.R. 2234: Ms. CARSON, Mr. BISHOP of New York, Mr. KAGEN, and Mr. YOUNG of Alaska.
H.R. 2236: Mr. MORAN of Virginia.

OFFERED BY: MR. TANCREDO

AMENDMENT NO. 11: At the end of the bill, before the short title, insert the following new section:

SEC. ____. None of the funds made available in this Act may be used to carry out the diversity visa program under section 203(c) of the Immigration and Nationality Act (8 U.S.C. 1153(c)).

H.R. 2764

OFFERED BY: MR. TANCREDO

AMENDMENT NO. 12: At the end of the bill, before the short title, insert the following new section:

SEC. ____. None of the funds made available in this Act may be expended in violation of section 243(d) of the Immigration and Nationality Act (8 U.S.C. 1253(d)) (relating to discontinuing granting visas to nationals of countries denying or delaying accepting aliens removed from the United States).

H.R. 2764

OFFERED BY: MR. WEINER

AMENDMENT NO. 13: At the end of the bill (before the short title), insert the following:

SEC. ____. None of the funds made available in this Act may be used to provide assistance for the West Bank and Gaza. The limitation on assistance under this section shall not apply with respect to humanitarian assistance, including assistance to the United Nations Relief and Works Agency for Palestine Refugees in the Near East (UNRWA).

H.R. 2764

OFFERED BY: MR. WEINER

AMENDMENT NO. 14: At the end of the bill (before the short title), insert the following new section:

LIMITATION ON ASSISTANCE FOR THE WEST BANK AND GAZA

SEC. 6xx. None of the funds appropriated under titles II through V of this Act may be obligated or expended to provide any assistance for the West Bank and Gaza.

H.R. 2764

OFFERED BY: MR. WOLF

AMENDMENT NO. 15: Page 2, line 22, after the dollar amount, insert ''(reduced by $108,000,000)''.

Page 9, line 23, after the dollar amount, insert ''(reduced by $50,000,000)''.

Page 40, line 26, after the dollar amount, insert ''(increased by $140,000,000)''.

Page 58, line 18, after the dollar amount, insert ''(increased by $16,000,000)''.

Page 63, line 23, after the dollar amount, insert ''(increased by $2,000,000)''.

H.R. 2764

OFFERED BY: MR. GARRETT OF NEW JERSEY

AMENDMENT NO. 16: Page 10, line 17, insert before the semicolon the following: '', including the prosecution in their home countries of such individuals in connection with such acts''.

H.R. 2764

OFFERED BY: MR. BLUMENAUER

AMENDMENT NO. 17: At the end of the bill (before the short title), insert the following:

SEC. ____. (a) LIMITATION ON USE OF FUNDS.—Of the funds appropriated in this Act under the heading ''Foreign Military Financing Program'', not more than $250,000,000 may be made available for Pakistan.

(b) CORRESPONDING TRANSFER OF FUNDS.—The amounts otherwise provided by this Act are revised by increasing the amount made available for ''United States Emergency Refugee and Migration Assistance Fund'', and reducing the amount made available for ''Foreign Military Financing Program'', by $50,000,000.

H.R. 2764

OFFERED BY: MR. HENSARLING

AMENDMENT NO. 18: Page 5, line 20, after the dollar amount, insert ''(reduced by $55,729,000)''.

H.R. 2764

OFFERED BY: MR. HENSARLING

AMENDMENT NO. 19: Page 52, line 7, after the dollar amount, insert ''(reduced by $1,203,480,000)''.

H.R. 2764

OFFERED BY: MR. HENSARLING

AMENDMENT NO. 20: Page 8, line 11, after the dollar amount, insert ''(reduced by $203,082,000)''.

H.R. 2764

OFFERED BY: MR. HENSARLING

AMENDMENT NO. 21: Page 50, line 9, after the dollar amount, insert ''(reduced by $13,860,000)''.

H.R. 2764

OFFERED BY: MR. HENSARLING

AMENDMENT NO. 22: Page 70, line 24, after the dollar amount, insert ''(reduced by $27,563,000)''.

H.R. 2764

OFFERED BY: MR. HENSARLING

AMENDMENT NO. 23: Page 50, line 20, after the dollar amount, insert ''(reduced by $47,700,000)''.

H.R. 2764

OFFERED BY: MR. HENSARLING

AMENDMENT NO. 24: Page 9, line 17, after the dollar amount, insert ''(reduced by $195,000,000)''.

H.R. 2764

OFFERED BY: MR. HENSARLING

AMENDMENT NO. 25: At the end of the bill (before the short title), insert the following:

None of the funds in this act may be used to provide engineering services to water and sanitation programs in India, to enhance its relationship with the University of Belgrade and to enhance its relationship with the Mongolia University of Science and Technology.

H.R. 2764

OFFERED BY: MR. JORDAN

AMENDMENT NO. 26: At the end of the bill (before the short title), insert the following:

SEC. ____. Appropriations made in this Act are hereby reduced in the amount of $2,956,000,000.

H.R. 2764

OFFERED BY: MS. HERSETH SANDLIN

AMENDMENT NO. 27: At the end of the bill, before the short title, insert the following new section:

SEC. ____. None of the funds made available in this Act may be used to carry out the diversity visa program under sections 201(e), 203(c), or 204(a)(1)(I) of the Immigration and Nationality Act (8 U.S.C. 1151(e), 1153(c), and 1154(a)(1)(I)).

SENATE—*Tuesday, June 19, 2007*

The Senate met at 10 a.m. and was called to order by the Honorable MARY L. LANDRIEU, a Senator from the State of Louisiana.

PRAYER

The Chaplain, Dr. Barry C. Black, offered the following prayer:

Let us pray.

Eternal Father, the heavens proclaim Your glory, and the skies display Your craftsmanship. We thank You today for those who positively touch our lives. Thank You for mothers and fathers who make good homes and guide us to ethical maturity. Thank You for friends who help to make life beautiful as they inspire us to show great love. Thank You also for loved ones who through personal sacrifices have given us a great heritage. Thank You for our Senators who labor diligently to keep our country strong. May the words they speak this day and the thoughts they think be pleasing to you, Oh, Lord, our Rock, and our Redeemer. Amen.

PLEDGE OF ALLEGIANCE

The Honorable MARY L. LANDRIEU, a Senator from the State of Louisiana, led the Pledge of Allegiance, as follows:

I pledge allegiance to the Flag of the United States of America, and to the Republic for which it stands, one nation under God, indivisible, with liberty and justice for all.

APPOINTMENT OF ACTING PRESIDENT PRO TEMPORE

The PRESIDING OFFICER. The clerk will please read a communication to the Senate from the President pro tempore (Mr. BYRD).

The assistant legislative clerk read the following letter:

U.S. SENATE,
PRESIDENT PRO TEMPORE,
Washington, DC, June 19, 2007.

To the Senate:

Under the provisions of rule I, paragraph 3, of the Standing Rules of the Senate, I hereby appoint the Honorable MARY L. LANDRIEU, a Senator from the State of Louisiana, to perform the duties of the Chair.

ROBERT C. BYRD,
President pro tempore.

Ms. LANDRIEU thereupon assumed the chair as Acting President pro tempore.

RECOGNITION OF THE MAJORITY LEADER

The ACTING PRESIDENT pro tempore. The majority leader is recognized.

SCHEDULE

Mr. REID. Madam President, this morning the Senate will be in a period of morning business for an hour, the time equally divided and controlled between the two leaders. Republicans will control the first half and the majority controls the final 30 minutes.

The reason we did not go immediately to the bill at this time is there is a very important markup taking place in the Finance Committee dealing with the Energy bill, particularly the tax portions of the Energy bill. It is my understanding that Senators BOXER and GRASSLEY, with other members of the committee, have worked out a bipartisan measure they will bring to the floor as an amendment in the immediate future and it will be done today.

Once morning business closes, the Senate will then immediately resume consideration of the Energy bill about which I referred. Under our order of yesterday, the Senate will debate the Bunning and Tester amendments for a total of 2½ hours.

ORDER OF PROCEDURE

I ask unanimous consent that the time for debate for these two amendments this morning be equally divided and controlled as previously ordered until 1 p.m., and that the Senate then recess until 2:15; that at 2:15, the remaining debate time also be equally divided and controlled, with the other provisions of the previous order remaining in effect.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

Mr. REID. The agreement just entered now delays the conference recess period until 1 p.m. Following disposition of those two amendments this afternoon, the Senate will then debate three more amendments with the total debate time up to 90 minutes. Votes on these amendments will occur upon the use or yielding back of that time, so Members should expect two votes around 3 to 3:15, and then three more votes around 5:30.

I have conferred in detail with the distinguished Republican leader going over the schedule. I have told Democratic Senators, and I will repeat this at the caucus, we have a lot to accomplish before this work period ends. We have to complete the energy legislation, we have to complete work on the immigration bill, and we have to start defense authorization in some manner, recognizing that we will not have a lot of time on that.

It is up to the individual Senators as to how much time we take. If all time is used—as I said, I have gone over this in detail with the Republican leader and our staffs—we will not be able to finish until Saturday, a week from this Saturday, sometime in the evening. That would mean we would have to be in session this weekend. Maybe we have some people who may not object to one or two things. That being the case, we may not have to be in on Sunday this week. But everyone should understand, we have a lot of important votes. We have people running for President on both sides of the aisle. They should plan on being here, because their votes could make the difference. The energy legislation is extremely important. There are three issues that are the main focus of this legislation, by the business community, the environmental community, and the press. That is coal to liquids—that matter is going to be resolved this afternoon, hopefully; CAFE, which hopefully will be resolved in the next 24 hours; and then we have the renewable portfolio standards we are always working on. We hope we can get that done in some manner. There are other important amendments, but I mentioned the top three. We have what we have to complete prior to the July 4 recess. It is up to us how much time we take. If we happen to finish this conglomeration of legislation earlier, it would be to the good of the order, but if we aren't able to do that, we are going to have to stay here, which would be sometime Saturday evening.

MEASURE PLACED ON THE CALENDAR—S. 1639

Mr. REID. Madam President, I understand that S. 1639 is at the desk and is due for a second reading.

The ACTING PRESIDENT pro tempore. The clerk will report the bill by title.

The assistant legislative clerk read as follows:

A bill (S. 1639) to provide for comprehensive immigration reform and for other purposes.

Mr. REID. I would object to further proceedings at this time.

The ACTING PRESIDENT pro tempore. Objection is heard. Under rule XIV, the bill will be placed on the calendar.

RESERVATION OF LEADER TIME

The ACTING PRESIDENT pro tempore. Under the previous order, the leadership time is reserved.

MORNING BUSINESS

The ACTING PRESIDENT pro tempore. Under the previous order, there will now be a period for the transaction of morning business for 60 minutes, with Senators permitted to speak up to 10 minutes each, with the time equally divided and controlled by the two leaders or their designees, with the first half of the time under the control of the Republican leader or his designee, and the second half of the hour controlled by the majority leader or his designee.

Who seeks recognition?

The Senator from Georgia.

EMPLOYEE FREE CHOICE ACT

Mr. ISAKSON. Madam President, it is my understanding that at some point in time in the near future we will have a bill brought to the floor known as the Employee Free Choice Act. I thought this morning I would take a few minutes to discuss the Employee Free Choice Act, what I think it means, why I think it is here, but why we are where we are today in America in terms of labor and management relations.

At the beginning of the last century, the Industrial Revolution began in full force. As a byproduct of it, America went to a manufacturing society, a creative society. Business flourished—textiles, automobile production, manufacturing of all types.

Out of that came huge employment opportunities. Out of it came large companies, and out of it, unfortunately, came abuse of workers. In the 1920s it became obvious something had to be done. In 1935, this Congress and the President then signed the Wagner Act, which created the National Labor Relations Board, and for 72 years since then, our country has flourished under the rules and regulations of the National Labor Relations Board, and addressing the rights of workers.

It also created the opportunity for workers to join together, to unionize, to collectively bargain, and to negotiate. It has served America well. What has happened over those 72 years is the creation of a plethora of worker benefit programs backed by the U.S. Government. Prior to 1935, there was little if any federal worker protection laws. Out of that grew the demand for organization and ultimately unions, and out of that came the Wagner Act. Since then have come the following: OSHA, the Occupational Safety and Health Administration; the National Labor Relations Board; the Equal Employment Opportunity Commission; a new minimum wage, recently raised on the signature of the President here; the adverse effect wage rate, to protect those who come to this country and work as immigrants, to ensure they are not taken advantage of; workers compensation, a universal plan to make sure that workers in high-risk jobs have compensation for injuries they incur in the workplace; not to mention the Mine Safety & Health Administration, the Nuclear Regulatory Commission, and literally hundreds of agencies in the American Government today, created since 1935, for the protection of workers. Those all came about because workers deserved that protection in terms of their health, their safety, their compensation, and other benefits that arise.

Now, why did those laws come to pass? They came to pass because the union movement began to organize businesses and got management's attention, and management responded, and where it did not, the Government responded.

Now, how did the union system work under the Wagner Act? It was very simple. It said: If 30 percent of the employees of a company decide they want to sign off on a card saying they want a vote as to whether that company should unionize, they get the chance to have that vote, that vote, as sought by labor, and as was demanded in fact by the organizers, a secret ballot. It was a secret ballot because, in large measure, workers did not trust management. They thought company ownership would intimidate a worker, threaten a worker, try and prohibit them from making their own free choice, so they insisted on the secret ballot, just as our Founding Fathers did, and just as we today protect the secret ballot for those who vote for or against us, and for or against amendments to our Constitution or any referendum that comes before them.

So the secret ballot allowed brave people to vote, in privacy, as to whether they wanted to be organized. If they were organized, if they voted 50 percent plus one to organize, they could form a union. If they formed that union, they then had the right to collectively bargain, use the strength of their numbers with management, negotiate contracts to protect themselves and their interests, and bargain for benefits.

That is not a bad system. It is a neutral system. It is a fair system. When you got the 30-percent signatures, you then had a neutral system where management had the opportunity to tell you all the reasons why they were going to be better and you did not need to organize; and labor had all the opportunity they needed to tell you why not to believe that and that you needed to organize.

Out of that came a vote, a private vote, a secret ballot vote. If 50 percent plus one voted for it, the union got to organize.

Now, what does the Employee Free Choice Act say? It says: Well, you are no longer going to have the opportunity of avoiding intimidation because we are going to take away the secret ballot. We are going to say: If union leaders decide they want to come in and organize a company that is not unionized, they can get 50 percent plus one to sign off on a card chit and you have a union. There is no vote. There is just the card sign-off, but it is not signed off in secret. You no longer have the neutrality to have the opportunity of management getting the chance to make its case. You have a negative environment of worker against company and, worst of all, as I read the legislation, as I understand it, it would then say: The first contract with the company is not negotiated, it is written by Federal mediators.

Give me a break. We are going from a system that has improved America to the safest, most productive, most opportunistic country in the world, where we have no child labor, we have minimum wages, we have hourly standards, we have worker protections, we have overtime, we have comp time, we have OSHA, we have regulatory commissions of every type to ensure, and we have good union management relationships in most places in this country.

Why is this before us? It is before us because there has been a decline in union membership. It is before us because the problems that gave way to the union movement have been solved in large measure, and we have responded with the laws necessary to protect people and their rights regardless of age or sex or disability. We have done that.

But the union movement has not changed with the times. There are exceptions. There are many great relationships today. One of them is SMACNA, the Sheet Metal and Air Conditioning Contractors' National Association. I happen to know a little bit about these folks because of my work in development and construction. They have a partnership with their union. It is not an adversarial relationship. They have taken advantage of the Wagner Act.

We must preserve a system that protects workers. Ours is a neutral system, a level playing field for those who wished to be organized and those who wished for organization not to take place. They have a level platform.

I don't know why it is coming to the floor. I don't know why it is not going through the committee system. I don't know why it is going to be a quick 1-day vote, which is my understanding of the way it will be.

I will stake my claim on 72 years of success under the Wagner Act, under the right to protect and continue to protect the secret ballot, and of my desire to see to it that we honor those things we have created in response to the bad things that happened in the early part of the 20th century. Why change a good thing? Yes, we have a decline now in the union movement. Buy why do you all of a sudden create

a situation of intimidation, an unbalanced situation, an uneven playing field, all for the sake of trying to save a movement that won't save itself?

I submit there is today, has been in the past, and will be in the future a viable place for the collective bargaining of workers and for unions but not if it is an unlevel playing field, not if the company and management don't have the same equal rights as do those workers, and not, most importantly, if those workers don't have protection of the secret ballot.

As I understand it, the vast majority, over 70 percent of union members, like the secret ballot. Over 70 percent of Republicans and Democrats—far more than that—like the secret ballot and think card check is crazy. To date, the only thing I have seen endorsing card check in print was the 2005 Communist Party convention in the United States which endorsed card check and the Employee Free Choice Act. Give me a break. This is one time where we ought to ratify what is right with America, ratify the success we have had in the past, honor the ills we corrected, honor the employees who make America work, continue to see to it that the employees do have a free choice, a private choice, a secret ballot, and continue to work in the greatest country on the face of this Earth with the greatest worker protection of any nation in the world.

I yield the floor.

The ACTING PRESIDENT pro tempore. The Senator from Utah.

Mr. HATCH. Madam President, later today a great injustice is going to be hoisted upon the American people, and a great shame about this injustice is that a great many Americans won't even hear about it. If our friends on the other side—if their plans hold, later today they will call up H.R. 800, the horribly misnamed Employee Free Choice Act, which would deny workers all over this great country their right to cast a private ballot when choosing whether to join a union. I find it pathetic that at a time when our Nation is at war, every day additional illegal immigrants enter our borders, and energy prices are at their peak, our friends on the other side are turning away from the important business the American people sent us here to do and are instead insisting on spending the next couple of days paying back their union cronies.

If I am not mistaken, I recall reading that the energy package is the ''second highest legislative priority'' for our friends on the other side in the Senate. I guess that means that because we are interrupting that ''high'' priority, paying back the unions must be their very first priority.

Much has already been said about the denial of a National Labor Relations Board-supervised and protected secret ballot election, a private vote on whether employees want to be represented by a union. It seems to me that the Democrats' and the unions' real objection to private ballot elections is not the form of vote, a secret ballot versus card check; their real objection is ever since the 1947 Taft-Hartley amendments, the law allows employers to communicate with their employees about union organization. What unions really want is to silence the employer during a union organizing campaign through a card check process. Then the union would be able to persuade or even intimidate the employees so the union can be certified based on a card check as soon as the union gets to a majority, no matter how ephemeral that support really is.

What that means is that if the union gets 50 percent plus one talking to the employees, then that company automatically becomes unionized without a secret ballot election. But it is even worse than that. The way they have drafted this bill, it will lead to mandatory arbitration, which will result in the Government setting the terms and conditions of employment, even pension plans. That is even worse than the card check aspect, which is about as bad as it gets. The real key for the unions is that the process be within the union's control and before the employer has an opportunity to communicate with the employees. In effect, the unions want to force employer neutrality based on the employer's inability to respond to a union organizing campaign.

How quick must the quick certification process be to satisfy unions? NLRB statistics reveal that in 2006, 94.2 percent of all initial representation elections were conducted within 56 days of the filing of the petition with the NLRB and that the median time was 39 days. Apparently for union organizers, a little over a month is too long for them to maintain majority support, although it is important to note that under the current secret ballot election procedures, unions still win about 60 percent of all elections. That is fine as long as there is a balance in these programs, as long as both sides are treated fairly.

Also union authorization cards make it virtually impossible for employees to change their minds, which can happen in the privacy of the voting booth. Revoking a signed union authorization card is virtually impossible today, when cards are used to trigger NLRB-supervised elections. You can imagine how hard it would be for an employee to revoke a signed card under a card check process.

The U.S. Supreme Court has said that union authorization cards are ''inherently unreliable'' indicators of employee support. Even unions themselves have stated that union authorization cards are less reliable than NLRB-protected private ballot elections. But the real reason unions seek card check is not because it is more reliable but because it can be controlled entirely by the union before the employer can address the union campaign propaganda. What that really means is that employees will be denied an informed choice.

Under current law, to convince employees to vote for a union, the union may use the pressures of the employee polls and interrogation. Unions may make predictions. They may promise benefits, whether achievable or not, and they may make false statements about the employer. It may well be that the labor leaders have never been able to negotiate the wages and benefits they promise will result from the formation of a new union. It may be that the union, in fact, has negotiated contracts with other employers in the same industry and geographic area that are less generous than the employees currently receive at the location being organized. The union's claims about the employer's safety record, its compliance with employment laws, its business practices, its executive compensation, its future business plans, and so forth are grossly exaggerated. If we silence employers, who is going to inform the employees of these facts? Certainly not the union.

Of course, employees may know well that in general their employer would prefer not deal with a union, but if, as a result of card check, employers are prevented from responding to a union's campaign misstatements, who will?

That is not a license for an employer to threaten, intimidate, or coerce employees during an organizing campaign. Under current law, employers are not permitted to threaten, coerce, or promise new benefits or threaten withdrawal of existing benefits. But under current law, the employer can respond factually to the campaign-puffing of the union so that the choice made by the employees is an informed choice. Through a quickie card check process, that ability will effectively be denied.

So let's be clear: When down the road the union lobby offers to compromise by preserving secret ballot elections supported by a majority, even a supermajority, of signed union authorization cards but only where such secret ballot elections are conducted by the NLRB in a week or two from the date the union files an election petition, it will be no compromise. There are still a few of us around who remember the quickie election provision of the so-called labor law reform bill in 1977 and 1978. The unions then, just as today, were seeking to in effect silence employers during union organizing campaigns. Today, they are seeking that result by denying workers secret ballot elections. If they thought they could get away with it, unions would have Congress repeal employer free speech rights entirely.

Denial of employee secret ballot elections and denial of free speech vital to ensure an informed choice doesn't sound very much like employee free choice to me. It sure doesn't sound very democratic with a small ''d'' or even a large ''D.'' That is only part of it. If you get into the mandatory arbitration that will inevitably occur because they won't be able to negotiate, in fairness, union contracts, you are going to have the wonderful people here in the Federal Government telling not only the unions but especially the businesses what they can and cannot do. They will set the terms and conditions of employment by mandatory arbitration and, in the end, they will also basically determine things such as pension plans. This isn't right.

We believe in secret ballot elections in this country. We believe in fair processes. As I have said, the process works pretty well because unions win 60 percent of these elections. When they win fairly, that is the right thing. That may be a good thing. The fact is, under this bill, it stacks the whole labor process in favor of one side—the unions—and takes away the rights of employers to be able to inform their employees of the truth if there are misrepresentations by the union and, even if there aren't, to inform their employees how much better off they may be without a union so that they can make truly an informed choice. There are decent provisions in the labor laws that permit a reasonable, decent, honorable process.

What really interests me is that the trade union movement is demanding a secret ballot election process in other countries. Why would they demand it in other countries and yet deny it here for both employers and employees in these very important decisions that have to be made by employees under our current very fair laws?

Right now, the balance is a little bit in favor of unions. That is maybe as it should be. But at least it is a balance. Both sides have basically an equal chance of keeping unions, accepting unions, or denying unions.

Frankly, one of the reasons my friends in the trade union movement want this type of an unfair process is because they have been losing members. It is easy to see why. We are on an energy bill right now that may be the death knell of our automobile industry if we don't handle it exactly right. The fact is, we could lose the American automobile industry, run by Ford, General Motors, and Chrysler, if we don't handle it properly. We will go to foreign-made cars. That would be disastrous, in my opinion. But part of the reason is the unions have negotiated contracts that are so expensive that a lot of the companies just can't produce the high-quality cars at reasonable prices that they used to be able to do.

There are good reasons for unionization. I am one of the few people here who actually held an AFL–CIO union card. I came up through the trade union movement, learned a trade through a formal apprenticeship, became a journeyman, a skilled tradesman. I believe in unions. I believe in a fair collective bargaining process. But it ought to be fair. One of the ways you make it fair is by having secret ballot elections. In this particular case, this hoax which is going to be brought up on the floor and done in a very quickie way is not the way to go.

I suggest the absence of a quorum.

The ACTING PRESIDENT pro tempore. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. DOMENICI. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER (Mr. TESTER). Without objection, it is so ordered.

OUR NUCLEAR DETERRENT

Mr. DOMENICI. Mr. President, for more than six decades, the bedrock of American national security has been a strong, reliable, and cutting-edge nuclear deterrent. Literally thousands of the best scientists and engineers in the world have dedicated themselves to ending World War II, winning the Cold War, and protecting the free world.

Each year, the Directors of the three national nuclear weapons laboratories must certify to the President, and through him to the rest of the United States, that our nuclear weapons systems are reliable. That certification process assures Americans, and warns our adversaries, that the Nation's nuclear stockpile will be able to continue to perform its basic mission—prevention of a nuclear weapons exchange.

During these six decades, discussion of the nature and size of our nuclear deterrent has been literally constant. Each year, hundreds of scientists, engineers, and global strategists devote innumerable hours and days to intense discussions of the proper strategy for the Nation and the proper nuclear stockpile to implement that strategy.

Each year, Presidents have recommendations based upon the work of specialists inside and outside the Federal Government. Since the end of physical testing of our nuclear weapons stockpile—a big event; and, in fact, a major event in American nuclear weapons evolution, the idea we would no longer test our weapons—America has relied on a concept called stockpile stewardship to try to keep our nuclear weapons resources certifiably reliable.

This Nation has already embarked upon, and through three different Presidents has reaffirmed, a commitment to physical testing-free testing that has cost billions of dollars. Our strategy has been simple: the most reliable weapons without physical testing, upgraded as strategy dictates.

At the same time, the United States has embarked on a major reduction in the size of our stockpile and in the nuclear stores of other nations. We have done this through programs this Senator has supported and authored during the past 20 years. I salute Senator RICHARD LUGAR, my colleague from Indiana, and former Senator Sam Nunn of Georgia, for their groundbreaking work in forging these programs, and I am proud I have been able to work with them in these critical efforts.

Because of these initiatives—the Nunn-Lugar, Nunn-Lugar-Domenici, the Nuclear Cities Initiative, the Global Initiative for Proliferation Prevention, the Nuclear Nonproliferation Research and Development Program, and others—our world is safer.

In total, under Nunn-Lugar, we have deactivated 6,982 warheads, 644 ICBMs, 485 ICBM silos, 100 mobile ICBM launchers, 155 bombers, 906 air-launched cruise missiles, 436 submarine-launched ballistic missile launchers, 611 submarine-launched ballistic missiles, 30 strategic missile submarines, and 194 nuclear test tunnels. Indeed, nine more warheads were deactivated in the last month.

We have offered thousands of Russian nuclear scientists alternative pay and occupations, in hopes they will be less susceptible to blandishments from other parties. We are sharing nonproliferation efforts with other nations beyond the former Soviet Union states.

In more stark terms, under the Washington-Moscow Treaty, ratified by the Senate and signed by the President, we will have in our nuclear stockpile, by 2013, fewer weapons than at any time since the era of President Eisenhower. We will have fewer nuclear weapons than we had, in other words, before the Cold War began in earnest.

So this two-pronged approach—international cooperation against proliferation and for elimination of weapons, coupled with the inception of Science-Based Stockpile Stewardship—has been America's strong response to the need to reduce the danger of both nuclear weapon stockpiles and physical nuclear testing.

Almost a decade ago, in a speech at Harvard University, I outlined what I called a new nuclear paradigm. That paradigm envisioned, among other things, a cut in American nuclear weapons to what I then called a threat-based nuclear stockpile; that is, a stockpile commensurate with the anticipated international threat to our Nation.

Critical to that concept was, and remains, the principle of reliability and the continuous battle against degradation of our present stockpile. No serious expert advocated simply keeping the very same physical weapons we had

20 or 25 years ago, with no upgrading or improvements. At some point, the degradation of components in those weapons would mean the certification necessary from the three weapons labs Directors to the President could not be honestly made.

In short, without upgrades and continuous nonphysical monitoring, our nuclear weapons deterrence could be put in serious doubt. Yet at this very time, the youngest nuclear weapons designs in our arsenal are 20 to 25 years old. Age-related component degradation could impact several different systems at the same time, calling into question reliability.

For the past several years, this Senate has supported, on a bipartisan basis, spending the money necessary to protect our stockpile from degradation. At the same time, we have recognized some of our systems are too complicated, pose risks to workers, and need substantial upgrading.

This background brings me to the present Energy and Water Development Appropriations bill for fiscal year 2008 proposed by the House Appropriations Committee and scheduled for House floor action this week.

That bill, if enacted without substantial change, would send American nuclear deterrence strategy in a new, unknown, direction. Think about that. More than 20 years of intensive study, by some of the best minds in the world, could begin to be overturned by enactment of a single appropriations bill. The new direction wouldn't be enacted as the result of 3 to 4 years of intensive study and hearings by all of the relevant committees of Congress. It wouldn't result from a convocation of the best minds at our disposal. It wouldn't result from the kind of painstaking analysis of future risks that any prudent American would demand from its government. No, that new path would begin by a single appropriations bill, devised by a small group with the best of intentions, but far from public view and analysis. In that regard, I ask unanimous consent that an article from the Washington Post, ''Congress seeks new direction for Nuclear Strategy,'' by Walter Pincus, be printed in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

[From the Washington Post, June 18, 2007]

CONGRESS SEEKS NEW DIRECTION FOR NUCLEAR STRATEGY

(By Walter Pincus)

Congress is moving to change the direction of the Bush administration's nuclear weapons program by demanding the development of a comprehensive post-Sept. 11, 2001 nuclear strategy before it approves funding a new generation of warheads.

''Currently there exists no convincing rationale for maintaining the large number of existing Cold War nuclear weapons, much less producing additional warheads,'' the House Appropriations Committee said in its report, released last week, on the fiscal 2008 Energy and Water Development Appropriations Bill. The full House is expected to vote on the measure this week.

The Bush administration had sought $88 million for the Reliable Replacement Warhead program next year so that cost and engineering studies could be completed and a decision could be reached on congressional approval to build the first RRW model, with the first new warheads ready by 2012.

The House already passed the fiscal 2008 Defense Authorization Bill, which reduced RRW funding and called for development of a new nuclear weapons strategy before steps are taken to produce new warheads.

While the Senate has yet to act on the authorization or appropriations measure, the Senate Armed Services and Appropriations committees are expected to follow the House's example by reducing proposed RRW spending and demanding development of a new nuclear weapons policy.

Rep, Ellen O. Tauscher (D–Calif.), chairman of the House Armed Services subcommittee that handles strategic weapons, said in an interview last week that she expects that the question of future U.S. nuclear weapons policy will be passed to the next administration, since the Bush White House is preoccupied with other subjects.

The House appropriations bill eliminates RRW funding and directs the Energy and Defense departments and the intelligence agencies to develop a ''comprehensive nuclear defense strategy based on current and projected global threats.'' And it slows down funding of the Bush administration's program to modernize the facilities where nuclear weapons are built, stored and dismantled.

''These multi-billion dollar initiatives are being proposed in a policy vacuum without any administration statement on the national security environment that the future nuclear deterrent is designed to address,'' the report said. ''[I]t is premature to proceed with further development of the RRW or a significant nuclear complex modernization plan.''

The committee pointed out that neither the Pentagon's Quadrennial Defense Review last year nor the administration's 2001 Nuclear Posture Review ''provided a long term nuclear weapons strategy or the defined total nuclear stockpile requirements for the 21st century.''

The House bill more than triples the amount the Bush administration is asking for dismantlement of old warheads and adds $30 million to modify a facility at the Nevada nuclear test site so it can be used for dismantling weapons. At present, the only facility that does that work is the Pantex plant near Amarillo, Tex., which also refurbishes currently deployed weapons.

Sen. Byron L. Dorgan (D–N.D.), chairman of the Appropriations subcommittee handling the nuclear program, has indicated he is thinking along the same lines, according to a senior Democratic staffer familiar with his views. ''The Tauscher approach makes sense,'' the staff member said.

He noted that senior Bush administration officials had not publicly supported the RRW program despite a request by Sen. Pete V. Domenici (R–N.M.), a former Appropriations subcommittee chairman and a proponent of the new warheads. The Senate subcommittee is expected to provide limited funds for the program ''so we have a couple of years to gather information while the next administration lays out future requirements.''

Mr. DOMENICI. Note an important point in this story. The funding cuts are proposed now; a new strategic direction will be forged later in this decade. Such an approach is absolutely backwards. We should forge the new direction, if one is believed appropriate in a world of increasing threats to our security, after great study. We should fund our present strategy, 20 years in the making, now.

The House Bill and the Post story focus on the so-called RRW, the Reliable Replacement Warhead. The RRW is a proposed new element of administration policy. The intent of the RRW, to enable increased reliability and design simplification in weapons of comparable explosive yield is, in my view, a very appropriate consideration, which may well result in the ability to maintain still smaller future stockpiles supported by a still smaller future weapons complex. But, as other legislators have suggested and as I noted in the last paragraph, I agree that a study of the complete role of the RRW in the Nation's nuclear deterrent is appropriate. That study must involve far greater resources than those involved in the House report language. Furthermore, Congress will have many opportunities to review and finalize any decision for actual deployment of the RRW, but the funds proposed for investment in the RRW now should provide the detailed data to underpin any future congressional decision to shift portions of our deterrent to that design.

But far beyond the RRW debate, with or without any RRW, stockpile stewardship is absolutely vital to our national security. As long as this Nation requires a nuclear deterrent in our defense or in support of our allies, we must maintain the skills and infrastructure that support the viability of that stockpile. That must include both trained people and the facilities to enable their work to proceed. Th House bill does harm to the Stockpile Stewardship Program. It cuts all funding for the new CMRR facility, which would replace the present facility, which will be inoperable after 2010. Without a new facility, our Nation will not be able to support the pit mission, which is a single point failure in the complex. Without a viable pit capability, the U.S. nuclear deterrent is vulnerable. The House bill cuts the Nuclear Material Safeguard and Security Upgrade, required to meet the Design Basis Threat around the key nuclear facilities that contain special nuclear material; it would cut stockpile services, the foundation of the production capability for our Nation; it would cut almost in half our pit mission, the critical component of our nuclear deterrent systems; it would cut funding for the repair and elimination of old and unused facilities that now drain funds from required new facilities; it would cripple advanced computing, the key to science-based stockpile stewardship; force the

shutdown of LANSCE, the accelerator needed for a variety of research; and, cut the Z machine, another component of our nonphysical testing regime.

I urge all my colleagues to attend to this debate as it moves through the House and to markup in subcommittee next week on the Senate side. Implementing and funding a new strategic policy after extensive debate is intelligent; defunding critical parts of our present strategy without a clear new path in view poses serious risks to our national security.

Mr. President, I yield the floor.

The PRESIDING OFFICER. The time controlled by the minority has expired.

The Senator from Massachusetts.

Mr. KENNEDY. Mr. President, I believe we are in a period of morning business.

The PRESIDING OFFICER. That is correct.

Mr. KENNEDY. Mr. President, I yield myself 12 minutes.

The PRESIDING OFFICER. Without objection, it is so ordered.

DEATH OF THE CHARLESTON FIREFIGHTERS

Mr. KENNEDY. Mr. President, my heart goes out this morning to the families of the nine fallen firefighters in Charleston, to my colleagues Senators GRAHAM and DEMINT, and to the people of Charleston. These fallen heroes made the ultimate sacrifice to protect their fellow citizens. Today we remember them and all firefighters and their families for whom courageous service is a part of their everyday lives.

My home State of Massachusetts endured a similar disaster several years ago when six firefighters died in Worcester, MA. I read a poem at the funeral of those fallen heroes, and I would like to read it again now. I hope it brings some small measure of comfort to those whose hearts are aching today for their brave husbands, fathers, brothers, and friends who perished so tragically.

The poem is called ''May They Not Be Forgotten.''

Brother when you weep for me,
Remember that it was meant to be.
Lay me down and when you leave,
Remember I'll be at your sleeve.
In every dark and choking hall,
I'll be there as you slowly crawl.
On every roof in driving snow,
I'll hold your coat and you will know.
In cellars hot with searing heat,
At windows where a gate you meet,
In closets where young children hide,
You know I'll be there at your side.
The house from which I now respond
Is overstaffed with heroes gone.
Men who answered one last bell
Did the job and did it well.
As firemen, we understand
That death's a card dealt in our hand,
A card we hope we never play,
But one we hold there anyway.
That card is something we ignore,
As we crawl across a weakened floor.
For we know that we're the only prayer
For anyone that might be there.
So remember, as you wipe your tears,
The joy I knew throughout the years
As I did the job I loved to do.
I pray that thought will see you through.

EMPLOYEE FREE CHOICE ACT

Mr. KENNEDY. Mr. President, I wish to address the Senate on a matter we will have an opportunity to vote on as this week goes on; and that is the Employee Free Choice Act. I think to understand this issue, we have to understand what has been happening to the middle class, the working families in this country over the period of these last 30 years and what happened to the middle class in the 20 or 30 years before that and what happened at the turn of the century as we came into the 20th century.

In my own State of Massachusetts, at the turn of the century, coming into the 1900s, we had the most extraordinary and excessive exploitation of American workers. They were not just American workers, they were children.

All one has to do is travel up to Lowell, MA, where we have a national park, and travel through the areas that are preserved—some of the old textile mills—and you will read, encased in many of those wonderful viewing stands, these letters of children who were 8 or 9 or 10 years old who worked 15 hours a day. They were paid very minimum salaries, and they were required to work. We had the exploitation of women in those conditions. The conditions were extraordinarily dangerous. We had the wages that were completely inadequate to provide a decent wage for people who were working long and hard.

Then we saw the changes that took place in the 1940s as workers came together and demanded economic and social justice. We saw the changes that took place in the workplace in terms of fairness and equity. Interestingly, we saw the vast increase in productivity. The American economy grew stronger. The middle class were the ones who brought us out of the Great Depression, the ones who fought in World War II, the ones who put us back on track after we had 16 million Americans who served in World War II and brought us back to a strong and expanding economy, where everyone moved along together. Everyone moved along together.

We made enormous progress during the 1950s and the 1960s and in the early 1970s. We made economic progress for workers and working families, and we made social progress too. We passed Medicare and Medicaid. We passed the higher education bill. We passed legislation to stop child labor. We passed a whole range of different kinds of programs to make this a more fair and a more just country with strong opposition, but I don't hear any effort to try and repeal those marks of progress we made in terms of economic and social justice. And, the courts obviously filled an enormous responsibility.

So what happened during this period of time? I am putting up a chart that shows the number of abuses of workers. This part of the chart shows from 1941 to 1966. During this period of time, we had what we are talking about—majority sign-up. We had it in effect during this period of time, interestingly enough. Card checkoffs were in effect during this period of time, from 1941 all the way up to 1966 and then the National Labor Relations Board and the Supreme Court gradually eliminated of that protection. Then we found an increase in the various abuses we had during this period of time; that is, firing workers who were interested in trying to form a union. The refusal to accept the outcome of an election. We find a series of different kinds of abuses to make it more and more difficult for people to be able to join the unions.

But what we had here is the fact that we had labor and management agreements and we had progress and economic prosperity during this period of time.

This chart shows during that same period of time, where we talked about actually peak union membership, wages and productivity rise together. Look at from 1947 to 1964. We see an increase in productivity and an increase in wages and America moved along together. There was economic progress that moved along.

Then, as we find the unions beginning to decline, we find that workers are falling further and further and further behind. Wages now have flattened, basically, and often, in terms of their purchasing power, have actually gone down. We see that since the loss of card check, productivity grew 206 percent more than wages.

So we had the idea that workers were able to get together and represent their views, and we had the increase in productivity. Then we saw the country making very important progress.

Well, how is that reflected in the Nation? This chart shows what was happening in that same period of time, from 1947 to 1973. Growing together. Here it is in 1947, 1957, 1967, up to 1973: The lowest, 20 percent; the second, 20 percent; the 20 percent in the middle; and then, fourth and fifth, virtually all the same in terms of real economic growth during the same period I just pointed out where we had maximum union activity, increasing productivity, and the Nation, the United States of America, all growing, growing, and growing together. That was going on from 1947 through 1973.

I see my friend from the State of Washington. How much time—I can make this long or short. How much time do I have?

The PRESIDING OFFICER. The Senator has 2½ minutes.

Mr. KENNEDY. If we divide a half hour between us, I would then have how many minutes?

The PRESIDING OFFICER. Let me back up. There is 20 minutes remaining in morning business for the majority.

Mr. KENNEDY. All right. Well, then I yield myself 5 minutes, which would be a total of 15 minutes, if that is agreeable.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. KENNEDY. If the Chair would let me know when I have 1 minute.

We have just seen what has happened from 1947 to 1973 through the course of the middle class. Now let's take a look at the years 1973 to 2000. We have the beginning of America growing apart. Look what is happening. The lowest, the second lowest, the middle, the fourth. Look at what is happening at the top: 20 percent, growing higher during this period of time. This was the beginning of the Reagan revolution that was taking place, extraordinary tax programs that were taking place, reflecting itself in how America is growing. Are we growing more together, or are we growing more apart?

Look what has happened now in the most recent times. The lowest 20 percent, because of the rates of inflation, are actually going down. Then the second 20 percent, the middle 20 percent—and the top 1 percent is the one that was growing during this period of time.

What has happened at the same time is that we see the corporate profits have now gone up 63 percent more compared to workers' wages and benefits, which have now basically stabilized. This country, the United States, grows together, works together. We are a united people. We see what has been happening as a result of the fact that unions have been effectively attacked and diminished in this country.

Before I conclude, this past Sunday was Father's Day. Look at the difference between fathers and sons in 1964 and 1994. From 1964 to 1994, what we have seen is the sons did better. The middle class was expanding. The sons did better than their fathers over this period of time. There was growth. Look what is happening from 1974 to 2004: a decline of 12 percent. The son is doing poorer than the father for the first time in the history of this country—the first time in the history of this country.

We know the corresponding difference. We had workers who were able to get together, and we find out there is a corresponding increase. When you diminish the unions, you diminish the power of working men and women. That happens to be the fact.

What is the trade union movement asking for? All they want is what we had years ago. All they are asking for is what we had during the period from 1947 to 1966, and it worked then. Look at the wages and productivity and what happened in the United States of America. We all grew together. We all grew together. So why this emotional reaction and response from the other side: My God, the Employee Free Choice Act. This is some crazy idea that we can't possibly even think about or even tolerate.

This is an idea that has been tried and tested. How few the times are in the Senate when we are trying to do something that has been tried and tested and successful. We had the measure which was effectively the card checkoff during the period when wages and productivity grew together and we had the fact that America, the United States of America grew together.

That is the choice we have in the Employee Free Choice Act. Are we going to go back to this period of time when we as a country and a society grow together, or are we going to continue to grow apart? That is the heart of the question, and the Employee Free Choice Act is really the resolution and the solution.

So I look forward to more time. I see my friend. I have taken time now. I am thankful that my good colleague and friend from the State of Washington wishes to address this issue. This is very basic and fundamental about our country and about the kind of America we want.

I come from a State that takes pride in the fact that the *Mayflower* arrived on the coast off of Massachusetts, and the captain and the crew came together after 6 weeks and they signed the Mayflower Compact. And that is the compact that made Massachusetts a commonwealth. What is a commonwealth? It is a common interest in all of the families saying we are going to work together to make a better State, a better country, a better nation, a better world. That is what is at the base of this legislation and what it is all about, and I hope the Senate will give us a chance to vote in favor of it.

Mr. President, I yield the floor.

The PRESIDING OFFICER. The Senator from Washington is recognized.

Mrs. MURRAY. Mr. President, I come to the floor this morning to join my colleague from Massachusetts and thank him for his work. I rise today to voice my support for workers, for their families, and for their right to share in the prosperity the Senator from Massachusetts talked about that they helped create for this country.

As chairwoman of the Employment and Workplace Safety Subcommittee, protecting workers' rights is a critical priority for me.

In last year's election, we all heard the voice of America's voters calling for change. I am very proud to say that Democrats have been working very hard to help working Americans and their families secure a better future, and we are making progress. We recently, in fact, passed legislation to increase the minimum wage—the first increase in a decade. For the first time in 10 years, many Americans now have the opportunity to begin to lift themselves out of poverty. So we are moving in the right direction.

But our work doesn't end there. Now it is time to help workers by ensuring that their voices are heard in the workplace—voices for better benefits, voices for better wages, voices for better health care, and voices for better pensions. As we all know, unfortunately, today in too many of our workplaces workers who do try to exercise their legal rights are blocked by an unbalanced system that can trap them in unacceptable working conditions. I think it is time for Congress to stand with our Nation's workers and give them their voice back by strengthening protections for our workers so they can freely choose to join a union.

The Employee Free Choice Act will make the promise of employee choice a reality, and it will restore the balance of the relationship between our employers and our employees. I am very proud to be a cosponsor of this important and balanced legislation.

So why is this bill necessary? Well, because workers should be able to share in the prosperity they helped to create. This bill is an important step in helping millions of working families get their fair share of the economic pie.

Our Nation's greatest asset is our people. American workers drive our economy. Their determination for a better future bolsters our Nation's prosperity. That is why I was so concerned to learn that workers believe the American dream is slipping away from them today. In fact, according to a poll conducted earlier this year by the Change to Win Federation, 82 percent of those surveyed said they believe working families are falling behind. I find that troubling, given that worker productivity has increased 3.1 percent each year between 2000 and 2004, and that corporate profits have more than doubled since 2001.

To me, it doesn't add up that American workers and American families are the ones who are losing. They are working very hard to help our country prosper, but they are not reaping their fair share of the benefits.

Unions can make a very positive difference. They allow our workers to collectively express their voices to employers on working conditions, health care, pensions, and other benefits, and the benefits we are talking about lead to better lives for Americans. Women who belong to a union earn 31 percent more than women workers who are not union members. That is an extra $179 a week and $9,300 more a year in income. Think about it. An extra $179 could help working moms put more food on the table for their family or help to pay for the education of a son or daughter. It could help her put a little

more away for retirement, making she and her family less dependent on Social Security.

Workers who are union members are twice as likely to have employer health care coverage. Union families who pay insurance premiums for their coverage pay 36 percent less than their counterparts, saving them almost $1,300 a year.

With the enactment of the Employee Free Choice Act, it is estimated that up to a quarter of a million workers and their families in my home State of Washington alone would participate in their employer's health insurance plan. That is a step in the right direction for the 866,000 Washington State residents who were uninsured in 2005. They are also more likely to have guaranteed pensions. Sixty-eight percent of unionized workers are covered compared to only 14 percent of nonunion workers—68 percent compared to 14 percent.

The AFL–CIO estimates that up to 250,000 Washington State workers would participate in their employer's defined benefit pension plan with the passage of the bill we are talking about today.

Workers recognize the benefits that unions offer them. In fact, 53 percent of U.S. workers say they would join a union if they could.

Clearly unions empower their members to access better benefits and provide a better life for their families.

But what about other workers, those who don't belong to a union? Are unions beneficial for the rest of us? The answer is an emphatic yes.

Unions have forged the way for millions of working families—union and nonunion—to share in the prosperity they helped create.

Progressive employment policies such as the minimum wage, the 8-hour work day, the 40-hour work week, employer-provided health care and pension plans emerged from the labor movement and have become the standard in today's workplace.

I think we can all agree that unions benefit our society as a whole. I am sure the 60 million U.S. workers who say they would join a union if they could think so, too.

Why is union membership declining when so many workers want to join and unions clearly benefit all of us. As it turns out, exercising your right to organize with other workers isn't an easy task under our current system.

The system is broken. We all know that a fair labor market can only exist when employers and employees have a respected voice in the system. I am sorry to say that is not the case today.

Some unscrupulous employers are silencing employees who try to join a union to better their economic situation for their families, and that is not fair.

Under current law, workers who want to join a union use the majority sign up method to let the union know they are interested.

Then, employers have the power to make a choice.

They can choose to recognize their employees' wishes, and many progressive employers do, or they can demand a NLRB election, stalling the process and silencing the voices of their employees.

During the election process, employers have unlimited access to workers in the workplace. They can require workers to attend mass meetings to hear antiunion messages and even require one-on-one meetings between supervisors and employees. And, under our country's labor laws, these practices are perfectly legal.

I think we can all understand how intimidating these tactics can be. More often than not, employers create an unfriendly work environment where employees don't feel comfortable discussing unions or their benefits. In many cases they fear for their livelihood, and rightfully so.

Unlike the peer relationship between coworkers, employers hold a special position of power over their employees. Employers have power over a worker's wages and benefits and, ultimately, they can fire an employee.

A recent analysis from the National Labor Relations Board shows that one in five union supporters are illegally fired for union activity during the organizing campaign.

Too often, workers who clearly voice their desire for representation have been silenced by their employers.

On the other hand unions do not have access to workers while on the job. They are not allowed to enter the workplace at any time to meet with employees. Employees interested in learning about union membership must meet with representatives and employees on their own time.

The Employee Free Choice Act does nothing to change this relationship. It does not limit the access employers have to workers. And, it doesn't expand the union's access to employees on the job.

If employees make it through this obstacle and elect to form a union, the ordeal is not over yet. Bad faith employers can drag out the initial negotiations process, often for years, using the time and their unlimited access to employees on the job to convince them that unions are a bad idea.

It is easy to see who holds most of the cards in this relationship. Workers shouldn't have to risk their livelihoods to exercise their right to form a union. But it happens all the time.

Hardworking Americans shouldn't have to go through such an ordeal to form a union. The Employee Free Choice Act can help eliminate some of the unfair barriers that workers face and make it easier for them to organize.

How does this bill address the problem?

The Employee Free Choice Act can make a difference. It can help workers gain a respected voice in the conversation with employers, and it can penalize bad faith actors who break the law.

First, the bill ensures that employees who want to organize can do so without interference. By allowing employees to choose majority sign up, the Employee Free Choice Act gives workers their voice back.

Second, this bill ensures there's time for reasonable negotiations, but it does not allow one side to act in bad faith and string employees along in a never-ending process that is designed to block their ability to self-organize.

Third, this bill will hold bad actors accountable if they break the law. According to ''American Rights at Work,'' every 23 minutes in America, an employer fires or retaliates against a worker for their union activity.

We shouldn't tolerate illegal discrimination and retaliation against workers who are just trying to exercise their rights. If an employer violates the rights of its employees and is charged by the National Labor Relations Board, this bill will impose stricter penalties.

It balances the playing field by requiring that the NLRB stop bad faith employers from interfering in a union campaign or contract negotiations.

It puts teeth in the current law by making employers who break the law pay three times back pay and imposes civil penalties for unfairly discriminating against pro-union workers.

This will ensure that breaking the law doesn't just become part of ''the cost of doing business.''

Some would have us believe that the Employee Free Choice Act radically changes the rules of the game or takes away employers' rights. Nothing could be further from the truth.

First, it does not eliminate the secret ballot. I am pleased that this bill gives employees the opportunity to vote by secret ballot if they so choose. For too long, some employers have had control over the balloting process, and this bill gets the balance right by making sure employees have the free choice to use a secret ballot or majority sign up.

Second, it does not create a new process. Some would have us believe this bill upsets the current system by creating a new process for forming a union. But majority sign up has always been allowable under the law. Today, some progressive employers voluntarily recognize their employees' choice to organize.

Third, it does not trap employees into union membership. Opponents of this bill would also have us believe that allowing employees to choose majority sign up as their preferred method for choosing a union would lead to union coercion or would trap other

workers into union contracts against their will. That is not true.

Let's look at the facts about coercion and intimidation.

American Rights at Work found that antiunion behavior is widespread among some employers. Among those employers faced with a union campaign, 30 percent of employers fire prounion workers; 49 percent of employers threaten to close a worksite when workers attempt to form a union, although only 2 percent actually do; 51 percent of employers coerce workers into opposing unions with bribery or favoritism—both are illegal; 82 percent of employers faced with an organizing campaign hire union-busting consultants to stop union campaigns; 91 percent of employers force employees to attend one-on-one antiunion meetings with their supervisors.

Some would have us believe that unions can be just as bad, but the data doesn't back that up.

In her testimony before a House committee earlier this year, Nancy Schiffer, an attorney with AFL–CIO, told that they had reviewed 113 cases cited by the HR Policy Association as ''involving'' fraud coercion.

It found that only 42 decisions actually identified coercion, fraud or misrepresentation in the signing of union authorization forms—and that's since the passage of the National Labor Relations Act in 1935. That is less than one case per year.

Compare that 1 case a year with the more than 31,000 cases filed in 2005 alone of employers engaging in illegal firings and other discrimination against workers for exercising their right to form a union. Clearly, unions have proven to be good faith actors in this process.

Fourth, it does not change an employer's free speech or property rights. One thing this bill does not change is the access to employees that exists today. Currently, employers have full access to employees during the workday. Unions do not. This bill leaves that relationship unchanged.

Finally, it does not bankrupt or harm businesses. Opponents to this bill would also have us believe allowing workers the free choice of forming a union would be bad for business or would bankrupt employers. Again nothing could be further from the truth.

We know that majority sign up can work for employers and employees because it is already happening for some progressive employers. Take Cingular Wireless, now known as AT&T, for example.

In my home State of Washington, we have seen proof that companies can remain competitive and profitable and still follow the law and respect worker rights.

Cingular Wireless gave its workers in Bothell, WA, the free choice they are entitled to. As a result, nearly 1,000 workers in my hometown decided to organize, and Cingular won praise for its responsible, respectful approach to employee choice.

Today, the company continues to be one of the top wireless providers in the country. Choosing to respect their employees' choice to unionize did not bankrupt them or make them any less competitive.

This bill helps us find the right balance in relationship between workers and management. I hope that my colleagues will join with me in raising our voices in support of workers and their families by voting yes on this bill.

Thank you Mr. President,

I wish to speak to amendment No. 1614 sponsored by Senators BYRD, LANDRIEU, WEBB, ROCKEFELLER, SALAZAR, and TESTER.

The energy bill we have been debating this week is going to bring us greater energy independence and clean up our energy supply to help combat climate change.

The bill is clean and green and will make great strides in developing clean energy sources, and increasing efficiency.

But we must admit that we have done little in this bill to address America's largest energy resource and also one of our largest polluters—coal.

Coal supplies over half of our electricity generation, it drives our industry and manufacturing and can be turned into a liquid transportation fuel to replace foreign oil.

Coal is relatively cheap and easily accessible.

We have enough coal for 250 years if we keep using it at the same rate that we are now.

Not only are we going to keep using coal, but most energy experts predict we are going to use more of it in the future.

But we have to start doing better when it comes to greenhouse gas emissions from coal.

I do not believe that government has been providing the right incentives to move the coal industry in the right direction.

RECOGNIZING THE HISTORICAL SIGNIFICANCE OF JUNETEENTH INDEPENDENCE DAY

Mrs. MURRAY. Mr. President, I ask unanimous consent that the Judiciary Committee be discharged from further consideration of S. Res. 231 and the Senate then proceed to its consideration.

The PRESIDING OFFICER. The clerk will state the resolution by title.

The legislative clerk read as follows:

A resolution (S. Res. 231) recognizing the historical significance of Juneteenth Independence Day and expressing the sense of the Senate that history should be regarded as a means for understanding the past and solving the challenges of the future.

There being no objection, the Senate proceeded to consider the resolution.

Mr. CARDIN. Mr. President, today is the 142nd anniversary of Juneteenth, a day when our Nation celebrates the complete abolition of slavery. The Emancipation Proclamation freed slaves beginning January 1, 1863, and brought to an end what Abraham Lincoln called ''two hundred and fifty years of unrequited toil.'' America's Civil War had ended at Appomattox, VA, in April 1865, but it was not until June 19, 1865, 2 months later, and a full 2½ years after the Emancipation Proclamation that the news finally reached Galveston, TX. That day has become known throughout our Nation as ''Juneteenth.''

In communities across the country, Juneteenth is an occasion for all Americans to reflect on a tragic period that shaped our Nation and continues to influence us yet today. For Marylanders, Juneteenth is a time to reflect upon our own history. Slavery existed in Maryland from the State's inception as an English colony. In 1664, slavery was officially sanctioned by law, and it thrived until 1864 when it was abolished with ratification of a new State constitution.

In 1820, Maryland's population was approximately 400,000, less than one-tenth our current size. The slightly more than 100,000 slaves in Maryland accounted for one-quarter of Maryland's population, while the 39,000 free Black Marylanders accounted for nearly 10 percent. By 1860, the State's overall population had grown considerably, while the number of slaves had declined to about 87,000, or 13 percent, while the number of slaves had free Blacks numbered about 83,000 or 12 percent.

Although Maryland was a slave State, it did not secede from the Union. And the contributions of Marylanders to the Union cause and the abolitionist movement did much to tilt the national balance in favor of freedom. Antislavery activists—Black and White, free and enslaved—took tremendous risks for the cause of freedom. Harriet Tubman, who was born Araminta Ross in Dorchester County, and Frederick Douglass, who was born Frederick Augustus Washington Bailey in Talbot County, were both born into slavery, put their own lives on the line as courageous crusaders for freedom. Having escaped their own captors, they dedicated their lives to fighting for the emancipation of all slaves. They are true American heroes.

This year, the Maryland General Assembly passed a resolution that I will quote here in part:

Resolved by the General Assembly of Maryland, That the State of Maryland expresses profound regret for the role that Maryland played in instituting and maintaining slavery and for the discrimination that was slavery's legacy; and be it further

Resolved, That the State of Maryland commits itself to the formation of a more perfect

union among its citizens regardless of color, creed, or race; and be it further

Resolved, That the State of Maryland recommits itself to the principle that all people are equal and equally endowed with inalienable rights to life, liberty, and the pursuit of happiness.

Today, on the 142nd anniversary of Juneteenth, I wish to commend my former colleagues in the Maryland General Assembly for this resolution, and I urge all my colleagues in the Senate to join me in celebrating Juneteenth and honoring those who made that day possible.

Mr. LEVIN. Mr. President, today we celebrate Juneteenth Independence Day in observance of the date upon which slavery finally came to an end in the United States, June 19, 1865. It was on this date that slaves in the Southwest finally learned of the end of slavery. Although passage of the 13th amendment in January 1865 legally abolished slavery, many African Americans remained in servitude due to the slow dissemination of this news across the country. Since that time, 143 years ago, the descendants of slaves have observed this anniversary of emancipation as a remembrance of one of the most tragic periods of our Nation's history. The suffering, degradation, and brutality of slavery cannot be repaired, but the memory can serve to ensure that no such inhumanity is ever perpetrated again on American soil.

Throughout the Nation, we also celebrate the many important achievements of former slaves and their descendants. We do so because in 1926 Dr. Carter G. Woodson, son of former slaves, proposed such a recognition as a way of preserving the history of African Americans and recognizing the enormous contributions of a people of great strength, dignity, faith, and conviction—a people who rendered their achievements for the betterment and advancement of a Nation once lacking in humanity towards them. Every February, nationwide, we celebrate African American History Month. And, every year on June 19 we celebrate Juneteenth Independence Day.

I am happy to join with my colleagues, Senators DURBIN, REID, OBAMA, STABENOW, BROWNBACK, KERRY, LANDRIEU, CARDIN, LIEBERMAN, MCCASKILL, CLINTON, LEAHY, KENNEDY, DODD, SANDERS, MENENDEZ, BROWN, PRYOR, and LAUTENBERG, in commemorating Juneteenth Independence Day with the submission of S. Res. 231, which the Senate has just adopted, in recognition of the end of slavery and to never forget even the worst aspects of our Nation's history.

Mr. DURBIN. Mr. President, today I am pleased that, S. Res. 231, a resolution recognizing historic Juneteenth Independence Day, has passed the Senate.

June 19 is an ordinary day for many Americans, is a significant day for those who know its history. Juneteenth Independence Day celebrates June 19, 1865, when Union soldiers led by MG Gordon Granger arrived in Galveston, TX, with news that the Civil War had ended and that the enslaved were free.

Americans across the United States continue the tradition of celebrating Juneteenth Independence Day as inspiration and encouragement for future generations.

The legislation recognizes the significance of Juneteenth Independence Day and supports its continued celebration as an opportunity for the people of the United States to learn more about the past and to understand more fully the experiences that have shaped our nation.

As Americans, we must remember the lessons learned from slavery. Juneteenth is a day that all Americans, of all races, creeds, and ethnic backgrounds, can celebrate freedom and the end of slavery in the United States.

I am pleased to recognize historic Juneteenth Independence Day and proud that the Senate has passed this important resolution.

Mrs. MURRAY. Mr. President, I ask unanimous consent that the resolution be agreed to, the preamble be agreed to, the motion to reconsider be laid upon the table, and that any statements relating thereto be printed in the RECORD.

The PRESIDING OFFICER. Without objection, it is so ordered.

The resolution (S. Res. 231) was agreed to.

The preamble was agreed to.

The resolution, with its preamble, reads as follows:

S. RES. 231

Whereas news of the end of slavery did not reach frontier areas of the United States, and in particular the Southwestern States, for more than 2 years after President Lincoln's Emancipation Proclamation of January 1, 1863, and months after the conclusion of the Civil War;

Whereas, on June 19, 1865, Union soldiers led by Major General Gordon Granger arrived in Galveston, Texas, with news that the Civil War had ended and that the enslaved were free;

Whereas African Americans who had been slaves in the Southwest celebrated June 19, commonly known as ''Juneteenth Independence Day'', as the anniversary of their emancipation;

Whereas African Americans from the Southwest continue the tradition of celebrating Juneteenth Independence Day as inspiration and encouragement for future generations;

Whereas, for more than 140 years, Juneteenth Independence Day celebrations have been held to honor African American freedom while encouraging self-development and respect for all cultures;

Whereas, although Juneteenth Independence Day is beginning to be recognized as a national, and even global, event, the history behind the celebration should not be forgotten; and

Whereas the faith and strength of character demonstrated by former slaves remains an example for all people of the United States, regardless of background, religion, or race: Now, therefore, be it

Resolved, That—

(1) the Senate—

(A) recognizes the historical significance of Juneteenth Independence Day to the Nation;

(B) supports the continued celebration of Juneteenth Independence Day to provide an opportunity for the people of the United States to learn more about the past and to understand better the experiences that have shaped the Nation; and

(C) encourages the people of the United States to observe Juneteenth Independence Day with appropriate ceremonies, activities, and programs; and

(2) it is the sense of the Senate that—

(A) history should be regarded as a means for understanding the past and solving the challenges of the future; and

(B) the celebration of the end of slavery is an important and enriching part of the history and heritage of the United States.

Mrs. MURRAY. Mr. President, I yield the floor.

CONCLUSION OF MORNING BUSINESS

The PRESIDING OFFICER (Mr. CASEY). Morning business is closed.

CREATING LONG-TERM ENERGY ALTERNATIVES FOR THE NATION ACT OF 2007

The PRESIDING OFFICER. Under the previous order, the Senate will resume consideration of H.R. 6, which the clerk will report.

The legislative clerk read as follows:

A bill (H.R. 6) to reduce our Nation's dependence on foreign oil by investing in clean, renewable, and alternative energy resources, promoting new emerging energy technologies, developing greater efficiency, and creating a Strategic Energy Efficiency and Renewables Reserve to invest in alternative energy, and for other purposes?

Pending:

Reid amendment No. 1502, in the nature of a substitute.

Reid (for Bingaman) amendment No. 1537 (to Amendment No. 1502), to provide for a renewable portfolio standard.

Klobuchar (for Bingaman) amendment No. 1573 (to Amendment No. 1537), to provide for a renewable portfolio standard.

Bingaman (for Klobuchar) amendment No. 1557 (to Amendment No. 1502), to establish a national greenhouse gas registry.

Kohl amendment No. 1519 (to Amendment No. 1502), to amend the Sherman Act to make oil-producing and exporting cartels illegal.

Kohl (for DeMint) amendment No. 1546 (to amendment No. 1502), to provide that legislation that would increase the national average fuel prices for automobiles is subject to a point of order in the Senate.

Corker amendment No. 1608 (to amendment No. 1502), to allow clean fuels to meet the renewable fuel standard.

Cardin amendment No. 1520 (to amendment No. 1502), to promote the energy independence of the United States.

Domenici (for Thune) amendment No. 1609 (to amendment No. 1502), to provide requirements for the designation of national interest electric transmission corridors.

Cardin amendment No. 1610 (to amendment No. 1502), to provide for the siting, construction, expansion, and operation of liquefied natural gas terminals.

Collins amendment No. 1615 (to amendment No. 1502), to provide for the development and coordination of a comprehensive and integrated U.S. research program that assists the people of the United States and the world to understand, assess, and predict human-induced and natural processes of abrupt climate change.

Domenici (for Bunning-Domenici) amendment No. 1628 (to Amendment No. 1502), to provide standards for clean coal-derived fuels.

Bingaman (for Tester) amendment No. 1614 (to amendment No. 1502), to establish a program to provide loans for projects to produce syngas from coal and other feedstocks while simultaneously reducing greenhouse gas emissions and reliance of the United States on petroleum and natural gas.

The PRESIDING OFFICER. Under the previous order, there will be up to 2½ hours of debate with respect to amendment No. 1628, offered by the Senator from Kentucky, Mr. BUNNING, and amendment No. 1614, offered by the Senator from Montana, Mr. TESTER, with the time equally divided and controlled between Senator BUNNING, Senator TESTER or their designees.

The Senator from Montana is recognized.

Mr. TESTER. Mr. President, I wish to speak to amendment No. 1614, sponsored by Senators BYRD, ROCKEFELLER, LANDRIEU, SALAZAR, WEBB, and myself.

The Energy bill we have been debating is going to bring us greater energy independence and clean up our energy supply to help combat climate change.

This bill is clean and green and it will make great strides in developing clean energy sources and increasing efficiency. But we must admit we have done little in the bill to address America's largest energy resource and also one of our largest polluters—coal.

Coal supplies over half of our electricity generation, it drives our economy and manufacturing and can be turned into a liquid transportation fuel to replace foreign oil. Coal is relatively cheap and easily accessible. We now have enough coal for 250 years if we keep using it at the same rate we are using it now.

Not only are we going to keep using coal, but most energy experts predict we are going to use more of it into the future. We have to start doing better when it comes to greenhouse gas emissions from coal.

I do not believe the Government has been providing the right incentives to move the coal industry in the right direction. The amendment that I—and others I spoke of earlier—am offering today will provide Government grants for engineering and design of coal to liquid and coal gasification facilities.

It will authorize direct loans for facilities if they reduce their greenhouse gas emissions by 20 percent over the petroleum equivalent, which, by the way, is the same requirement we use for biofuels. To qualify, a facility must show that it can and will both capture and store 75 percent of its carbon dioxide. We need these parameters because we need to start doing things better than we have done in the past if Government is going to be supporting these projects.

There has been a lot of discussion in the last couple of days about coal to liquid fuels. I would rather get our energy from States such as Montana, Ohio, West Virginia, or Colorado than from the oil cartels in the Middle East. Unfortunately, the production of coal to liquids without capturing carbon dioxide emits over twice the amount of carbon dioxide than does petroleum, and climate change is as big a threat as the unstable countries where we buy our oil. When carbon is captured and safely stored, coal to liquid facilities and coal gasification plants can achieve carbon dioxide levels that are closer or better than a petroleum equivalent. If you combine the coal with biomass at the same facilities, you can reach emission levels that are far less than petroleum.

The National Mining Association recently ran an editorial in the New York Times identifying the benefits of clean coal technologies and its implications for national security. The editorial is on this chart. In a nutshell, what Kraig Naasz, president and chief executive of the National Mining Association, said was that a coal to liquid facility with carbon capture and sequestration combined with the use of biomass could achieve life-cycle greenhouse gas emissions 46 percent below a petroleum equivalent. That is good news indeed.

I believe our fuel sources are a national security concern, and we need to explore all safe and clean energy options to help break our addiction to foreign oil. Coal-to-liquid fuel is a part of that equation, and this amendment makes coal cleaner than petroleum when it comes to greenhouse gas emissions.

Climate change is an issue I take very seriously. I want to leave this world for my children and grandchildren in as good of shape or better than my parents left it for me.

Climate change is real. Our oceans are rising, our glaciers are melting, and wildly shifting weather patterns are causing more frequent hurricanes, dramatic snowstorms, and prolonged drought. I am a dryland farmer, and I have spent my entire life on the same piece of ground in Big Sandy, MT. As a farmer, you notice every little detail about the weather—moisture, temperature, when the plants bud, when they are ready for harvest. In recent years, something hasn't been right. The climate we have today is not the one that was there when I was a kid. We plant earlier than we used to, we harvest earlier, rain comes at different times, and the summers have become so hot and dry in Montana that the sky is filled with smoke from forest fires hundreds of miles away.

Steps can be taken to reverse the effects of climate change and improve the energy options we have available. Coal is cheap, we have a lot of it, and I think we should use it. But we must learn lessons from how we have developed coal in the past. The Department of Energy says that there are 151 new or proposed coal powerplants on the way by 2030, and some of those are coal gasification facilities. I am committed to finding ways to make the next generation of coal plants better than the last.

This bill encourages research and development of carbon capture and storage technologies. Carbon capture and storage may be our best option to reduce carbon emissions from coal. We even include a cost-share provision for carbon capture equipment that I sponsored with Senator BINGAMAN in the Energy Committee.

But we have done little to give industry the incentives to employ these technologies on a large scale. Wall Street really has no interest in loaning money for clean coal facilities because there is no economic incentive to reduce emissions. This amendment provides direct loans for 100 percent of the equipment used to reduce greenhouse gas emissions and up to 50 percent of the total project cost.

Coal gasification technology is our best opportunity to prove the capture of CO_2 on a massive scale and safely store it through an industrial process that gives us the products we need, such as fertilizers, plastics, electricity, and fuel. Carbon dioxide can be captured at a gasification facility, then compressed, piped away, and stored in geological formations, including oil and gas fields where they can increase the production of petroleum or CO_2 can be used in products that facilities produce, such as fertilizers, chemicals, plastics, and fuel.

The Syntroleum plant in North Dakota has been capturing their CO_2 for 20 years and piping it 205 miles into Canada for enhanced oil recovery. They capture 5,000 tons of CO_2 a day and sell the carbon to produce more oil. In Colorado, one company actually mines CO_2 from carbon deposits in the ground and pipes it to Texas for enhanced oil recovery, and, I should add, this is done for profit.

The amendment being offered today is a technology driver to move this industry into the next phase and help get the first few new generation facilities on the ground.

Government should only provide backing to the best technologies to help spur a clean industry that can demonstrate an overall societal benefit.

To be clear, industry will move forward with coal gasification projects and coal to liquid projects regardless of congressional actions, and plants have already been announced. But this is our opportunity to encourage these facilities to be clean and push the development of carbon capture and storage on a commercial and industrial scale.

Coal-to-liquid projects have been proposed for Illinois, Ohio, Wyoming, Montana, North Dakota, West Virginia, and the list goes on. These companies have proposed these projects without Government financing, but the emissions from these facilities are yet to be determined.

The timing of this Energy bill and this amendment is critical because designs could be modified to fit the parameters of this amendment, and we can be assured that these projects move forward with the cleanest technology available. Industry will benefit if we set clear guidelines as to the standards we expect to be met for Government backing.

Luckily, we have the science to back up our goals. A recent study from the Idaho National Labs proves that coal to liquids, when produced with carbon capture and biomass, can achieve lifecycle greenhouse gas reductions of over 40 percent from a petroleum equivalent. We see the bar graph with petroleum diesel being the baseline. If we look across at the fourth column, if we combine coal with 30 percent biomass to perform coal to liquids, we can see a tremendous reduction in CO_2.

Coal gasification with carbon capture and biomass is a vast improvement over our current use of coal. Congress is at a crucial point where we can help drive these facilities toward the best technology available. This amendment is a challenge to industry, but it is a challenge that is technologically available and can and should be met.

Rentech, one of the strongest advocates of coal to liquid technology, proved my point in front of the Senate Finance Committee last April when they showed the members of the committee the potential of the technology on which they are working. What they said was that they agree that as carbon capture reaches the levels we spell out in this bill, combined with biomass, coal to liquids is far better than what we are doing currently.

I believe this amendment will drive a new, clean, and green coal to liquids industry toward startup and help offset our foreign dependence on imported oil. Besides fuel, it will make cheaper fertilizers, chemicals, and plastics.

Adopting this amendment will be a technology driver that is good for industry and is good for this country. I urge this body to support clean and green coal development.

Mr. President, I yield the floor to Senator BYRD.

Mr. DOMENICI. Mr. President, if it is in order or appropriate, I ask unanimous consent, to establish my position following Senator BYRD, when he is finished, that the Senator from New Mexico will be recognized for his comments.

The PRESIDING OFFICER. Without objection, it is so ordered.

The senior Senator from West Virginia.

Mr. BYRD. Mr. President, during my half century of service in this great body, I have seen too many energy shortages and too many half-hearted efforts by the Federal Government to respond. A geopolitical crisis erupts and oil prices rise. All too quickly, our economy is destabilized. Our national security is undermined. Americans become alarmed. Politicians promise solutions. Once the crisis passes, oil prices decline, public attention fades, and nothing happens to cushion the Nation from the next energy shock. All the while, our dependence on foreign oil grows with ever-worsening implications for our economic and national security.

About 40 percent of the energy we use in the United States comes from petroleum. The majority of this oil is imported from chronically unstable countries. It is shocking to think that our transportation system and so many sectors of our economy are dependent on a constant flow of energy from these dangerous and politically unstable lands. The very security of this great and powerful Nation is vulnerable to the whims of fanatical despots. The well-being of our country is always in threat of a government coup in Nigeria, a typhoon in the Persian Gulf, or a terrorist attack on oil shipments in the Middle East.

We must reduce our dependence on foreign oil. In a speech I made more than two decades ago in this Chamber, I warned the Reagan administration against cutting back on our energy programs. I pointed out that there is no national security without energy security and that we have neither as long as we are dependent on foreign oil. It seems as though some things never change. As we should have learned too many times during the past quarter century, leaving the security of our country so dependent on the vagaries of the free market is too simplistic, too unrealistic, and too dangerous.

Our dependency on foreign oil strikes at the very heart of our national security. Indeed, oil dependence is the Achilles' heel of our Armed Forces. The Pentagon itself has pointed out that our military's ever-increasing reliance on oil makes its ability to respond to crises around the world ''unsustainable in the long term.'' The Air Force pays about $5 billion per year for its fuel, with the Army and Navy close behind. Even more troubling, the United States now spends an estimated $44 billion per year safeguarding oil supplies in the Persian Gulf.

The money we spend on foreign oil too often finds its way into the pockets of terrorists determined to attack the United States. As former CIA Director James Woolsey put it, in buying foreign oil, ''we are funding the rope for the hanging of ourselves.'' Saudi Arabia, Iran, and Sudan have experienced a boom in oil revenues as the price per barrel of oil has gone through the roof. Reports are that some of these profits have been used to finance training centers for terrorists, pay bounties to the families of suicide bombers, and buy weapons and explosives for the groups attacking U.S. soldiers and marines. For years now, we have spent hundreds of billions of dollars fighting terrorists while at the same time we have provided countless sums of money to our enemies through our foreign oil purchases. This is sheer madness. It must end.

It is no longer acceptable for Congress to seek piecemeal, short-term solutions that become irrelevant as soon as the price of oil declines. We need a long-term strategic commitment to the development of clean, domestic-based energy technologies. We must dedicate ourselves to the developing of sources of energy that will move us away from oil dependence and provide better energy options. Chief among those must be coal, our Nation's most abundant source of energy. The United States has 27 percent of the world's coal reserves. We are the Saudi Arabia of coal, and then some. Thirty-three States have recoverable coal reserves. This means 66 Senators have a vested interest in promoting the use of coal. Our coal supplies are large enough to last for generations, fueling the electricity needs of our homes and our businesses. We don't have to ask someone else for this cheaper and abundant energy source; it is right here, like acres of diamonds, under our feet. It is there, there in the ground, for the taking. Coal can be burned cleaner and coal can be more efficiently burned today than at any time in our previous history. With the right kind of investments in clean coal technology, coal can become our lifeline. Coal can save us from foreign oil, from OPEC, from volatile summer gas prices, and from a disastrous foreign policy that revolves around protecting our oil interests abroad.

Through Federal funding, Federal research and development projects, and tax incentives, we have made great strides—great strides—both in increasing the efficiency of our coal-fired powerplants and reducing their emissions. Even with our currently underfunded clean coal technology programs, we will continue to make progress.

I know that a vocal minority would have us believe differently. They are the oil and natural gas producers who try to convince the American public that coal is not the answer. Don't believe it. No, don't believe it. They want

Americans buying their more expensive oil and gas, not cheaper coal. They are interested in their profits and not the prices you and I pay at the pump or for our home energy bills.

The vast majority of Americans already use the cheap electricity provided by coal. They demand it. But with the proper support, coal could be providing other forms of cheap energy. The American military recognizes the hope that coal offers, which is why the Air Force is experimenting with using coal to liquids technology to fuel their aircraft. Coal has to be part, coal must be part of our energy strategy if we are ever, ever, ever to break our dependence on foreign oil. The American military recognizes it, the American people recognize it, and it is time that the Congress recognized it.

For several months now, I have been engaged in serious discussions with a bipartisan group of Senators to develop a program to promote the use of coal for transportation fuels and as a feedstock for our chemical industry. I thank those Senators and their staffs for their hard work in an attempt to reach our own version of a grand compromise on the future use of coal in this country. I particularly thank Senator BINGAMAN and the majority leader for their assistance with this proposal.

Even though there are significant challenges to the development of a coal to liquids industry in the United States, our dependence on foreign oil and the resulting cost to the country have created an economic environment that is favorable—favorable—for the industry to blossom. With a combination of tax incentives, loan guarantees, and regulatory support, along with technology-driven advances in environmental protection, we can reduce the risks associated with the construction of coal to liquid plants and stimulate private investment. We can and we must create a vibrant domestic marketplace for alternative fuels.

The added advantage of this proposal would be that the production of this clean-burning fuel would provide opportunities to commercialize carbon capture and storage technologies. I believe that carbon capture and storage can help advance clean coal technologies, but we must provide both considerable funding and the key Federal guidance to hasten the arrival—in the ground—of carbon capture and storage projects that begin to implement the technology.

I hope my fellow Senators will stop, stop, stop and give serious thought to this proposal. I hope we have finally learned the lessons from the past, and that we will now seize the moment by the forelock.

Our Nation confronts an enormous challenge in breaking our dependence on foreign oil. For all too many years, we have denied—we have denied—the problem. We have delayed taking action. We have conducted endless studies—endless studies—and largely kicked the problem on down the road. We have separated it along regional and political lines and done and said everything but solve the problem.

Of course, the Senate is performing its constitutional function by debating these issues, and making sure the interests of the people and the States we represent are being protected. When the debate is over, however, it is also the responsibility of the Senate to find a workable solution. It is here that regional interests must blend into the national interest.

We have studied the matter, we have debated the issues, we have talked about the solutions, and now we must act. Now we must act. True energy independence at a time when our Nation no longer is dependent on the energy resources of unstable areas and rogue regimes will require give and take from all sides. In fact, in this most significant national quest, there can be no single winner, whether it be coal, whether it be oil, whether it be natural gas, or any environmental interest. If any one special interest wins, then the American people will lose. The American people will win if, and only if, we put aside our parochial interests, our partisan politics, and our petty differences and work together and compromise together for the national good. The time for bold action is here. Let us start to put American ingenuity to work for the benefit of America's future.

Mr. President, I yield the floor.

Mr. DOMENICI. Mr. President, is it appropriate for the Senator from New Mexico to speak now?

The PRESIDING OFFICER. The Senator may proceed.

AMENDMENT NO. 1628

Mr. DOMENICI. Mr. President, I have a few remarks as ranking member of the committee. I am going to speak first in favor of amendment 1628, the Bunning amendment, with reference to coal to liquids. Later on today—later on today, Senator BYRD—and I don't say this because you need to be on the floor or anything like that, but later in the day, when some other people have finished speaking in favor of this amendment, I will speak against your amendment and be very specific and precise as to why.

I do say to you and your very excellent staff that I think you will be interested in my reasoning, because I am not trying to be vindictive or pick one over another, but I think your amendment, when we finish talking about it, you ought to be worried about whether you have set standards in it that will never commit coal to be turned to liquids.

Mr. BYRD. I hope not.

Mr. DOMENICI. I think you have done that, by mistake or otherwise. The environmental requirements are too high for it to be achieved.

So the money can be used for things other than coal to liquid. That is what it will go for over time, because you cannot achieve the environmental standards. I don't know how I can do it later, but I will talk with you seriously about it.

For now I am going to speak to the Bunning amendment, and later I will do that other one, and if I have to do it in writing, because of my great admiration for Senator BYRD, I will write it up and show it to you, because I do not think you are going to get coal to liquid the way someone has drawn the standards for you. I do not know who drew those.

I rise today, in the absence of Senator BUNNING—I hope everyone in the Senate and those who are wondering why this distinguished Senator, who is so strongly in favor of this coal to liquids, is not here, let's make sure everybody knows that what is going on right now is a very important aspect of this energy bill. It is the tax portion, and Senator BUNNING is on the Finance Committee. They are writing the tax portion, Senator BYRD. So Senator BUNNING can't be here because he is there writing this giant tax provision that is going to be affixed to this bill.

First, I ask unanimous consent that the letter Senator BUNNING and I received this morning in support of this amendment that we have be printed in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

HEADWATERS INCORPORATED,
South Jordan, UT, June 19, 2007.

Hon. PETE DOMENICI,
U.S. Senate,
Washington, DC.
Hon. JIM BUNNING,
U.S. Senate,
Washington, DC.

DEAR SENATORS DOMENICI AND BUNNING: Headwaters Incorporated supports adding your coal-to-liquid (CTL) transportation fuel amendment to energy legislation currently being debated on the Senate floor (H.R. 6).

Headwaters is a New York Stock Exchange company with deep roots in CTL technologies. Our company has licensed direct coal liquefaction technology to facilities currently under construction in China and we are conducting feasibility and engineering studies in The Philippines and India. In the United States, we are actively developing a project in North Dakota in concert with North American Coal Company and Great River Energy. We are also conducting feasibility studies with CONSOL Energy Inc. in several other states.

Your amendment strikes the appropriate balance between enhancing our nation's energy security and advancing technologies to deal with climate change. To accomplish the greenhouse gas emissions standards required in your amendment, CTL providers will utilize carbon capture and storage technologies at a scale not previously deployed. This will do much to develop capabilities that will be used by many industries in the years to come.

It is time for America to keep more of its energy dollars at home, creating jobs making clean fuels from America's most abundant energy resource—coal. These fuels will

work in our existing distribution systems and vehicles and will create a more secure bridge to the next generation of transportation fuels.

Sincerely,

JOHN N. WARD,
Vice President,
Marketing & Government Affairs.

Mr. DOMENICI. Now I would look to repeat once again my opposition to the Tester-Bingaman amendment on coal to liquid fuels. I believe it does little to advance the domestic coal to liquid fuels industry, and could, in fact, harm that effort. But I will return to the floor later today and speak to it in more detail.

I wish to provide some context for my colleagues as we move forward to vote this afternoon on the issue of coal to liquids, because it is so important for our country that we create a situation which will generate incentives so those who will invest money and try innovative technologies will do so for coal to liquid.

We have an abundance of coal. We have an abundance of need for liquefied coal. We have a lot of people who do not want to see this happen because they are fearful of the environmental consequences of this transition.

First, we must increase our national energy security by decreasing our reliance on foreign resources of crude oil. Second, we must ensure that the fuels available to American consumers are affordable. Third, we must seek to improve the environmental performance of the energy resources we consume.

I believe coal to liquid fuels will allow us to accomplish all three goals, and that the Bunning amendment puts us on the right path to get there. In terms of the opportunities for increased energy security that are created by coal to liquids, the case to be made is a convincing one. Our country accounts for 26 percent of the world's proven reserves, 26 percent of the coal.

We have enough coal right here in America to meet our needs for more than 200 years. In every authoritative forecast of domestic and world energy consumption, coal use is projected to increase, not decrease. No matter what people say, you know they don't want coal because it is not clean, every projection says there will be more coal used, not less, in the next 10, 20, 30 years.

What we have to do is be sure that since we have so much in America, we are pushing that and pursuing that with a hand on the accelerator, that makes sure what we come out with is a fuel that is clean enough to sustain itself among the fuels we are permitted to use, where it is as good as any we are promoting for the American people for their future.

Here in the Energy and Natural Resources Committee, we often talk about our Nation's increasing reliance on foreign sources of crude oil. We have included provisions in this bill that represent significant progress toward reversing this trend. I believe we should go further, however, and make better use of coal as our most abundant, secure, and affordable resource.

The facts in support of coal to liquid as a path to greater energy security don't only rely on the sheer abundance of this resource within our borders. It is because of this secure supply, but also due to the characteristics of coal to liquids as a fuel that the Department of Defense has undertaken an aggressive program to test, certify, and ultimately transition to meeting much of their demand with coal to liquid alternatives.

I want to repeat what I have just said about the fact that we are so abundantly blessed, and it is here and it is ours, and it is to be used by us. Because of this, the Department of Defense has undertaken an aggressive program to certify, ultimately to test and certify, to meet much of their demand with coal to liquid alternatives.

Last year the Air Force went through over 3 billion gallons of aviation fuel. That amount represents more than half of the fossil fuels consumed by the Federal Government. That is amazing. Half of all the fossil fuels consumed by the Federal Government was the 3 billion gallons of aviation fuel.

The goal of the Air Force is to certify their entire fleet by 2010, with a 50–50 mix of jet fuel with coal to liquid fuels and meet 50 percent of their demand for fuels with coal to liquids by the year 2016.

We must be encouraging progress along these lines, and the Bunning amendment is a step in the right direction. Coal is affordable. If we consider historic price trends, based on nominal dollars per million Btu's between 1980 and 2005, the cost of petroleum fluctuated between $6 and $16; natural gas fluctuated between $2 and $10; retail electricity fluctuated between $14 and $24; and coal between $1 and $3.

Is that not incredible? Now, if we can find a way through our technological advances and technological genius to make more coal usable, think of that, we will inject into this stream of usable resources that are used in the place of energy a fuel that is the cheapest and most stable fuel we have. I told it to you in incredible numbers. These are accurate. Coal, between $1 and $3 during the same period that retail electricity has been $14 to $24. You got that, my good friend from Montana? Incredible.

Petroleum fluctuated from $6 to $16, and here is that good old coal, $1 to $3. The problem is, we haven't figured out ways to use it for enough of the uses for which these energies I ticked off are used. Coal is secure. But it represents one of our most stable and affordable energy sources.

It should be our policy to ensure that this feedstock shares an equal footing with others that are available for production of alternative fuels. Of course, we must ensure that we continue to reduce the environmental impacts associated with energy resources we consume. Here, too, the ability of coal to liquid fuel to achieve this significant improvement is impressive. By virtue of the process coal must undergo in producing a liquid fuel, nearly all of the criteria pollutants are removed by virtue of the processes coal must undergo in the process of liquid fuel. I am repeating it. Nearly all the criteria pollutants are removed.

This represents a significant improvement relative to conventional diesel and includes a reduction in unburned hydrocarbons, carbon monoxide, nitrous oxide, particulate matter, and others.

I wish to direct the attention of my colleagues to the chart behind me which represents an average of the findings on the national renewable energy laboratories and other Government entities. It shows the percentage reductions achieved in the categories I have mentioned, by using coal to liquid fuels instead of conventional diesel.

Fuels are virtually sulfur free and dramatically reduced the emissions of other harmful pollutants. There it shows it to you right on the chart. Environmentally, what remains is a concern about the emissions of greenhouse gases. This too can be effectively addressed by coal-feeding biomass, utilizing a plant's carbon dioxide for enhanced oil recovery or through future efforts to achieve reliable and safe geological sequestration.

Those seeking to build coal to liquid fuel plants believe they can meet the same standard of 20 percent better than gasoline that is included in the underlying bill for ethanol. I believe no single one of the priorities I laid out as important to the consideration of the fuels legislation should overshadow the other. Coal to liquid meets all three priorities.

On this basis alone, I believe the Bunning amendment is the right approach. Now, some may ask, if this alternative fuel is such a good idea, why have we not already begun to produce it? The Department of Energy has testified that as long as the price of oil remains above roughly $50 to $60 a barrel, the first few gallons of coal to liquid operations will be economically viable. So as long as energy remains at that high price, from there, commercialization will further improve the competitiveness of coal to liquid fuels. It is a concern that oil-producing nations will increase production to lower oil prices, thereby undercutting the viability of alternative fuel production. That has created an unwillingness in the private sector to finance these plans.

I believe the most proven approach to addressing concerns of alternative fuel developers is to provide a guaranteed

market and assurances that the market for these fuels will remain present. This is what the Bunning amendment does. This is all it does. This is all we need to do. Specifically, and starting in the year 2016, it will require that three-quarters of a billion gallons—that is all, three-quarters of a billion gallons—are produced a year. That gets us to a level of 6 billion gallons by 2022. Now, I would remind my colleagues that biofuels are mandated at a level of 36 billion gallons that same year under the base bill. We have required that coal to liquid fuels have lifecycle greenhouse gas emissions that are at least 20 percent better than gasoline. That is how we make sure that greenhouse implications are not something we need to worry about.

This is the same standard required of biofuels in the base text of the legislation that is currently before the Senate. We have seen the utility of a mandate in the current success of ethanol. In fact, currently the use of ethanol has even exceeded the mandates set forth in the Energy Policy Act of 2005. I believe the time has come to embark upon a similar success story in coal to liquid fuels.

If the environmental obligations are the same as the mandate for biofuels—and the coal to liquids mandate is one-sixth the size of a biofuel mandate—there is no reasonable basis to vote no on the Bunning amendment. The choice given by the amendment is coal from Wyoming, West Virginia, Connecticut, and North Dakota versus oil from the Middle East or Venezuela. The choice is an easy one. I encourage colleagues to vote for amendment No. 1628. It is not a huge amount of production we are going to assure the use of, but it will push producers and inventors, technocrats and people with money that they will all be working toward a new way to do it because by that point in time, they want to be able to say: Ours is ready. Please buy it. That is what the law says you are supposed to do.

I yield the floor.

The PRESIDING OFFICER. The Senator from Wyoming.

Mr. ENZI. Mr. President, I rise to speak on the two amendments before us. I have some grave concerns. I am afraid this Energy bill could easily turn into an antienergy bill. If it does, we will have decreasing supplies of fuel and ever-increasing prices. I don't think that is where we intend to go.

I rise to give strong support to amendment No. 1628 offered by my colleagues, Senator JIM BUNNING and ranking member PETE DOMENICI. The amendment establishes a fuel mandate program for coal to liquid fuel that is identical to the renewable fuel standard we are implementing with this legislation. I know originally the two amendments had some similarities and were being worked on as one with a bipartisan group. That is what we ought to do. But somehow it got polarized and shifted into two separate amendments. One could have phased into the other and wound up with much stronger requirements. That was where I was hoping it would go, on a phased-in basis, so that we could actually have coal to liquid technology and that infant industry could then grow into one that would meet the strict standards that technologically cannot be met at the present time.

If we discourage all development of coal to liquids, we will not have clean coal to liquids. We will not have an adequate fuel supply or we will have a fuel supply that is very expensive, and that will curtail the economy.

I ask unanimous consent to have printed in the RECORD a letter from the Governor of my State, Dave Freudenthal, who talks about a glidepath we need to get the infant industry started and into place.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

THE STATE OF WYOMING,
OFFICE OF THE GOVERNOR,
Cheyenne, WY, June 18, 2007.

Hon. JEFF BINGAMAN,
Chairman, Energy and Natural Resources Committee, Hart Senate Office Building, Washington, DC.

DEAR SENATOR BINGAMAN: I want to commend you and your committee for taking up the matter of Coal-to-Liquids technology as part of the consideration of national energy policy. As you know, if we can construct the proper policy framework for this technology, the benefits are many. The country will be able to make use of an abundant fuel source to begin to mitigate our dependence on imported fuels. Capital investment and job creation will also be a significant benefit for America.

My view is that with the exception of operations in South Africa, CTL is an emerging technology. Clearly not all the design, engineering and performance issues are determined as would be expected in the case of a mature industry. There is much work to be done with respect to environmental behavior and operational efficiency.

Given the emerging nature of this promising technology, it seems prudent and appropriate to set goals that stretch the technology, represent a step forward and would result in a better environment. However, setting requirements that are likely not achievable in the near term with the first plants may only serve to discourage the kind of technical and financial investment required to bring the CTL technology forward to commercialization.

A 'glide path' that would require continuous improvement of environmental performance with a starting point better than existing alternatives seems a reasonable position for the first CTL plants. This would allow policy makers to keep the ultimate targets intact but acknowledge the evolving nature of the technology. It seems this would be a much better signal to send to the country. This should serve to stimulate rather than discourage the kind of market behavior on the part of cleaner energy entrepreneurs and technologists we need to help us solve these complex energy and environmental challenges.

Thank you for your consideration.

Best regards,

DAVE FREUDENTHAL,
Governor.

Mr. ENZI. I have listened for the past week as my colleagues have discussed the importance of domestic fuels. They argue that it is essential for us to reduce our dependence on foreign energy barons and that the mandate that this bill lays out for 36 billion gallons of biofuels is an important step in being energy independent. I agree with my colleagues and their assessment that we need to produce more domestic fuel, and the amendment I am speaking in support of does just that. By mandating that we use 6 billion gallons of fuel derived from coal, we will use our Nation's most abundant energy source to help break America's addiction to oil.

Coal to liquids technologies are not new. The technology has been around since the 1940s. There is no question that it can be used today in transportation markets that currently exist. It can be transported in pipelines that currently exist. Because it comes from coal, our Nation's most abundant energy source, it can be produced at home by American workers without some of the international interference. Coal to liquid plants are being developed in China. They understand the need for the economy to have the fuel to operate on. They are buying up resources. In Canada, they tried to buy resources in the United States. They know the future of their country depends on having sufficient fuel, particularly for transportation.

Coal to liquid plants are already being developed in China. They are being developed in other major industrialized nations. But they are not being developed in the United States. I am concerned that as we sit on the sidelines, other nations will take advantage of our inaction, and our economy will suffer. That is why I am speaking in support of the amendment offered by my colleagues from Kentucky and New Mexico. The amendment they have introduced is the right approach to moving this issue forward in a way that will truly help the coal to liquids industry. In doing so, it will truly benefit the American people.

There is a competing proposal from my colleague from Montana that I will discuss in a moment, but I first want to discuss why this is the right approach, if we are to spur investment in the coal to liquids industry. Simply put, if our goal is to create a market for a new energy source, mandates work. We have seen it with other current renewable standards. Since passage of the RFS as part of the Energy Policy Act of 2005, we have seen a dramatic rise in the number of ethanol plants that exist, and there is no sign that industry is slowing down. That was the mandate we placed. It is being

met. We have an opportunity to do so today for coal to liquids. However, we will do so on a smaller scale, requiring just 6 billion gallons of coal-derived fuel as opposed to 36 billion gallons mandated for biofuels in the bill. We will do so with additional environmental standards.

Like the underlying legislation, we require the 20-percent life cycle greenhouse gas reduction language. However, unlike the underlying bill, the amendment requires coal to liquid plants to operate with technology to capture carbon dioxide emissions. In general, I am not a fan of mandates. I have struggled with this issue. However, if our goal is to reduce our Nation's dependence on foreign energy sources and to produce more fuel domestically, the current renewable fuels mandate has proven that it is an approach that works. In direct contrast to the success of a mandate is the failure of the loan guarantee programs which have issued exactly zero loans almost 2 years after the program was created in the Energy Policy Act. The approach of the Senator from Montana of a direct loan program is different than the approach taken in the Energy Policy Act. Although that is the case, I am concerned that his legislation will simply create another loan program that never happens. A direct loan program requires that the Federal Government loan taxpayer money to private companies to move forward. In the very tight appropriations climate we are currently experiencing, my colleagues are kidding themselves if they think we will spend the kind of money it takes to build one of these plants through a direct loan.

How do I know about that? There is one proposed in southern Wyoming. The company is a coalition of companies to put the money together for one of these plants. It is a huge refinery. That is what a coal to liquids plant is. It changes our low-sulfur coal into diesel, and that is what we are requiring trucks to use now, diesel without coal. It is going to be between the little town of Hannah and Medicine Bow. Hannah was a coal mining town. The coal was deeper so it wasn't useful or economical for them to mine it anymore. It shut down. People are there with houses they can't sell and jobs they don't have. They are retired. But this plant is coming into that area.

The reason it is coming to that area is, first, there is the coal resource but, more importantly, there is a pipeline there. This is one of the fuels, unlike ethanol, that can be put into a pipeline and transported. They have already sold all of the fuel they can build. They put $2 or $3 billion worth of money together to build what will be the first refinery built in the United States in 30 years. It will solve a huge economic problem in that part of the State. I have to say, the requirements in the amendment of the Senator from Montana will probably stop this because the technology isn't there. People aren't going to venture $2.3 billion on the possibility that the technology might be there. I would hope we would put some research money into technology on carbon sequestration and carbon capture. I have encouraged the University of Wyoming to do that with some of the abandoned mine land money. But that is down the road and should be phased in so that plants like this can be built.

In addition to my concerns about the loan program, I am also concerned that the amendment of the Senator from Montana sets forth environmental standards that are technologically unachievable. We have devoted an entire title of this bill—title III—to the research and development of carbon sequestration technologies. I have faith that this research will help us to advance carbon sequestration efforts, but I don't believe we are there yet. As such, the Tester amendment's requirement for 75 percent sequestration—and it is not phased in—seems unreasonable. I am not a technical expert. I have spoken to the people who are planning the coal to liquids facilities. None of the developers I have questioned have suggested they can achieve the 75 percent mandated by the Tester amendment. Both of the Democratic and Republican proposals will reduce greenhouse gases in a major way. Both of these amendments require a 20-percent improvement, but the Democratic proposal goes too far and sets standards that aren't technologically achievable.

My colleagues are faced with a choice. The amendment offered by Senators BUNNING and DOMENICI takes a proven approach of mandating that we use a domestic fuel. It adds responsible and reasonable environmental standards, and it will work to spur development of a domestic coal to liquids industry. I wish the bipartisan group could have gotten together and actually worked out something, but there are some other things playing in this whole process. Sometimes we get so wrapped up in making a political point that we wipe out progress for the United States. I hope that something can be done on that yet, but we will vote on two different amendments. The Bunning-Domenici one has the potential for actually providing some facilities and additional fuels. If we truly want to see coal to liquids plants built in the United States, only one of the approaches before the Senate works. That approach is the one offered by Senators BUNNING and DOMENICI. I hope all of us will support that amendment and see that coal to liquids and fuel independence happens.

I yield the floor and suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The bill clerk proceeded to call the roll.

Mr. BOND. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BOND. Mr. President, I rise today to speak on behalf of the Bunning coal to liquid fuel amendment. This was an amendment cosponsored and championed by our dear late friend, Senator Craig Thomas. If we could adopt this amendment and pass it into law, I think it would be a fitting tribute to the memory of this very fine servant of the people of Wyoming and of the United States.

We have plenty of Members of the Senate who would like to reduce our involvement in the Middle East. Maybe they supported our gulf and Iraq wars; maybe they did not, but they would sure like us to reduce our current involvement, and they certainly would like us not to have to go over there every time there is trouble. Count me in as one of that broader group.

There is another group of Senators, and I would be included in those as well, that would like us to improve the environment by reducing greenhouse gases. They support reducing the lifecycle greenhouse gases emitted during the production of fuels. Indeed, we are considering provisions to require biofuels produce 20 percent less lifecycle greenhouse gases during their production.

So I ask those Senators—all of you who support reducing our dependence on Middle Eastern oil, all of you who support requiring fuels to produce less greenhouse gases—please support the Bunning-Domenici coal to liquid fuel amendment that will do both.

Domestically produced fuel made from coal will reduce our dependence on Middle Eastern oil. Every barrel of oil we produce from America is a barrel of oil we do not need to import from Saudi Arabia, Kuwait, Iraq or Venezuela. Every barrel of oil we produce from America will reduce our need by that much to intervene in local Middle Eastern disputes.

Domestically produced fuel made from coal will improve the environment. Coal to liquid fuel, with its sequestration of pollutants, will be lower in acid rain-causing sulfur and soot-producing particulate matter. The Bunning amendment will also cut greenhouse gas emissions compared to gasoline production by mandating 20 percent less lifecycle greenhouse gas emissions. No coal to liquid plant will receive a cent of Government money unless it can meet this greenhouse gas reduction requirement.

Domestically produced fuel from coal will improve our health. Too many children and elderly suffer from asthma, an acute condition caused by air pollution. Coal to liquid fuel is lower in

ozone-causing nitrogen oxides, soot-producing particulate matter, as I mentioned, and toxic emissions from volatile organic compounds.

Domestically produced fuel made from coal will improve the performance of our military. Coal to liquid fuel provides significant performance advantages for military jets and aircraft. The Air Force is most interested in signing long-term supply contracts that will enable them to provide a market for the clean coal to liquid fuel which is envisioned in this amendment. CTL fuel burns at a lower temperature, burns cleaner, and performs better at both lower and higher temperatures. That is good for our war fighters who need every advantage they can get.

Domestically produced fuel made from coal is good for our existing infrastructure. Coal to liquid fuel can go right into our existing pipelines, gas tanks, and engines without any cause of problems. We will not need new pipelines, new storage or new pumps as with biofuels.

Domestically produced fuel made from coal is also good for consumers. Coal to liquids offer long-term supply guarantees without the fear of supply shocks from external forces in other countries. Do you ever wonder why gas prices jump up every time some Middle Eastern radical shoots off a rocket in his neighbor's territory? That would not happen to the fuel we are producing from coal to liquids.

Domestically produced fuel made from coal is also good for taxpayers. Coal to liquids offers the ability to lock in long-term price cut guarantees. I think all of us realize that Southwest Airlines used this long-term fuel supply hedging to save billions of dollars and avoid bankruptcy. Other airlines lost millions and fell into bankruptcy paying for high-priced fuel on the spot market. At the same time, Southwest produced profits in part from the savings from their long-term contracts to buy fuel. We can use this same strategy to benefit all Americans with coal to liquids and specifically by supplying that fuel to the Air Force and other Government users. I would hope the other users of fuel would realize the advantage, but we can do something now to start that market and to assure that technology goes into production.

So I urge my colleagues to give a hard look to the Bunning-Domenici coal to liquid fuel standard amendment. I would say, I would add Craig Thomas's name to that list as well. Sponsors have trimmed back the amendment to require more modest and realistic amounts of CTL fuel. Sponsors have also included the same 20-percent lifecycle greenhouse gas reduction mandate and a requirement for coal to liquid plants to operate with technology to capture carbon dioxide emissions.

We can use the carbon dioxide, so captured, to pump into previously depleted oil wells to generate more production or we can pump it into substructures, geological formations, which will capture and keep that CO_2 sequestered.

I urge my colleagues to support the Bunning-Domenici amendment. Our future in terms of energy independence, our future in terms of a cleaner environment depends on it.

I thank the Chair and yield the floor.

The PRESIDING OFFICER. The Senator from North Dakota.

Mr. DORGAN. Mr. President, I ask unanimous consent to use 12 minutes of Senator TESTER's allotted time.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. DORGAN. Mr. President, this is the right subject, this issue of alternative fuels. I commend all my colleagues for being here to talk about this important issue.

I have mentioned often on the floor of the Senate, we live on this little planet of ours, and on this planet we circle the Sun, and we happen to live on a little patch on this planet called the United States of America. A substantial amount of oil is used here. We use one-fourth of all the oil that is pulled out of this planet every single day. About 84 million gallons of fuel is pulled out of this planet every day, and we use one-fourth of it in this country.

Unfortunately, much of the resources—the oil resources—exist elsewhere. Over 60 percent of that which we use in oil comes from off our shores, much of it from very troubled parts of the world: Saudi Arabia, Kuwait, Venezuela, Iraq, Iran, and so on. In a circumstance where we have such a prodigious appetite for energy—oil in this case—and so much of it exists off our shores, it makes us very vulnerable—extraordinarily vulnerable.

If tomorrow, God forbid, terrorists should somehow interfere with the pipeline of oil to the United States of America, we would be flat on our back. Our economy would be flat on its back because we get up every single morning in this country and we pull the switch, we start the engine, we do all these things that heat the water for the shower and air-condition our home. We have such an unbelievable appetite for energy.

With respect to oil itself, we are held hostage by having so much of it coming from off our shores. Therefore, the question is, how do we become less dependent or how do we become independent of the Saudis or the Kuwaitis or others who have so much oil?

Is it a good thing for us to try to become independent? I think it is. So how do you do that? Well, you do that in a lot of ways, one of which—an important ''one of which''—is to develop renewable alternative fuels.

So we are talking about the biofuels. We are talking about ethanol. We are talking about a lot of different issues—cellulosic ethanol. Today on the floor of the Senate, we now talk about coal to liquid. Coal to liquid means taking coal and producing from it diesel fuel. That coal to diesel is another way of producing alternative fuels.

It is very important, however, for us, as we proceed down this road, to do this the right way. There is, perhaps, an easy way and a harder way to do it or a right way and a wrong way to do it, but all of us who come here talking about alternative fuels, I think, are talking about the right subject.

This issue of coal is very important. Coal is the most abundant resource that exists in this country. It is our most abundant. It is our most secure. It is here. It is the lowest cost American resource. It is estimated we have over 600 billion barrels of oil equivalent in coal. Compare that, for example, to the largest oil reserves in the world, which are held by the Saudis, estimated at about 260 billion barrels of oil. Again, the Saudis have the largest repository of oil we know of, estimated at about 260 billion barrels. Our coal has an oil equivalent of about 600 billion barrels.

Well, the question is: How do we use coal? Because coal has a carbon footprint, it has an impact on our environment. I am chairing the Energy and Water Subcommittee on Appropriations. In the accounts I am now working on with my colleagues, I am going to put a great deal of money into clean power and into clean coal technology so we can unlock the mysteries and find ways to continue to use our coal, our most abundant resource, without in any way injuring our environment. I believe we can do that. I am going to tell you in a minute an example in North Dakota that is occurring that holds great promise, in my judgment.

But we have a lot of experience in burning coal for electric generation to produce electricity. We have a good understanding of the challenges we face as a result of that with respect to carbon reduction in those plants, the coal-fired electric generating plants. We also have some experience turning coal into synthetic natural gas. The only plant in the United States in which lignite coal is taken out of the ground—coal is extracted from the ground and put in a processing plant to turn coal into synthetic natural gas the only circumstance in the country where that occurs is on the prairies of North Dakota. It is interesting that the coal gasification facility is really a technical marvel—a technological marvel, I should say. It is producing synthetic gas in a way that is exceeding expectations. It produces very valuable by-products, and it does, in fact, produce CO_2.

So in this coal gasification plant, with the production of CO_2, which we don't want to admit in great quantities into the atmosphere because of climate

change, we have done something that is really pretty interesting. We capture 5,500 tons a day of CO_2 in that plant, put it in a pipe, and in that pipeline it is transported 205 miles north into Canada, where it is invested into the ground in Canadian oil wells to make marginal oil wells more productive. So we have beneficial use of sequestration of CO_2 by piping it to Canada and investing it into the ground to essentially make their oil wells more productive. It has sequestered about 7 million tons of CO_2 into the Weyburn Field since the start of the project in the year 2000. It has doubled the field's oil recovery rate and extended the life of the oilfield by 15 to 20 years. So you talk about beneficial use of CO_2—first of all, capturing it, keeping it from escaping into the atmosphere, and second, using it for beneficial use. I think this is the largest example—the largest demonstration of that—in the entire world.

Now, the question before us today will be a couple of different presentations on coal to liquid. I support coal to liquid. I believe it is part of an alternative fuel strategy that makes sense for this country. But we come to an intersection with energy and climate change, energy and the environment. It is an intersection a lot of people would prefer not to approach, but nonetheless we are there. We can't pretend one doesn't exist. They both exist. They coexist. They have an impact on each other. The question of how we do coal to liquids is a very important question in the context of how we continue to use our abundant coal resource.

Some say the most beneficial use of coal is coal to synthetic natural gas. I have just described how that is being done. Some say another beneficial use of coal is coal to plastics. There are many ways and many approaches to use coal for beneficial use at the same time as we protect the environment.

We have examples in amendments being offered today of the requirement of not only life-cycle reductions in emissions—and I believe both of the amendments have equivalent life-cycle reductions in emissions, but only one has a carbon capture requirement, which I think, frankly, is going to be required as we move forward with coal to liquids. We might debate about where that carbon capture requirement ought to be established, under what conditions can it be met, but I don't think there is much choice that we, as we proceed with coal to liquids, establish a carbon capture standard. I believe the Tester amendment does that in a way that says, I think for many of us, we fully support coal to liquids. We also support all of the other technologies that provide for the beneficial use of coal, which includes, as I have just described, coal to plastics and coal to synthetic natural gas, and so on. But as we proceed with coal to liquids, it is very important that we capture and sequester CO_2, just as we do in North Dakota with this synthetic natural gas plant.

Let me also point out that we have other ways of using coal—biomass cofed with coal to produce liquids. We can actually take CO_2 out of the atmosphere with that process. The plants would capture the CO_2 as they grow, and that CO_2 would be captured in the gasification process, along with the CO_2 from the coal. So it could be permanently sequestered in that circumstance. As a result, the overall carbon footprint for coal biomass to liquids would be better, for example, than with petroleum.

So there are so many different applications and different ways that I believe coal can play a very important role in this country's future. As I indicated, I am going to be adding substantial funding with respect to clean coal technology and the research that is necessary to unlock the capability, the scientific capability, and technology to be able to continue to use our abundant coal resources long into the future.

It makes little difference if we have the equivalent of 600 billion barrels of oil in coal resources if we can't use them. To say we have reserves equivalent to 600 billion barrels of oil, if you can't use that coal, it means very little to this country's future. I believe, when you take a look at the most abundant resource, we need to be able to use it, but I also understand and believe we need to be able to use it in circumstances where we can produce in the future a coal-fired electric generating plant that is a zero-emission plant. I believe that is possible. Now, can we do it tomorrow? Probably not. But I believe that through technology, we can accomplish these things.

The same is true with respect to coal to liquids. I don't believe the debate among those of us who have spoken on this subject today is whether coal to liquids makes sense. It will contribute as a part of our alternative fuels to make us less dependent on foreign sources of oil, and that is something we should all aspire to have happen. But it will also, as we proceed in this direction, require us to have carbon capture and sequestration in a manner that is meaningful.

One of the amendments today will establish a 6-billion-gallon requirement. I believe essentially the same amendment a couple of weeks ago said it should be 21 billion barrels as a mandate or requirement. I don't know where those numbers come from. I just believe, as I think most who have spoken believe, that we have to move in the direction of making coal to liquid work in a way that is compatible with this country's environmental needs.

So I am going to support the Tester amendment. I hope that at the end of the day, we will have received a message here from the debate in this Congress that says: Yes, alternative fuels make sense; coal to liquids makes sense; so, too, do carbon sequestration and carbon capture.

Mr. President, I yield the floor.

The PRESIDING OFFICER. The Senator from Ohio is recognized.

Mr. BROWN. Mr. President, I ask unanimous consent to use Senator TESTER's time for up to 5 minutes.

The PRESIDING OFFICER. Without objection, it is so ordered.

EMPLOYEE FREE CHOICE ACT

Mr. BROWN. Mr. President, I rise to speak for a moment on the Employee Free Choice Act, the legislation we will be considering this week and legislation which will, frankly, help to build the middle class. That is something I know the Presiding Officer spoke about in Pennsylvania often in the last year, as I did in Ohio.

We know what has happened to manufacturing jobs in this country, many of them good-paying union jobs. In my State, we have lost literally hundreds of thousands of them—more than 3 million in the last 5 years nationally. We know what has happened as profits and wages have gone up in this country—excuse me—as profits and top executive salaries have gone up. We know that for most Americans, their wages have been stagnant. Part of that is the decline of unionization. Poll after poll after poll shows that most people in this country, if presented with the opportunity, would like to join a union, but most are denied that opportunity because of the kind of workplace they are in oftentimes but oftentimes simply because management—employers—is able to beat back any kind of unionization effort.

That is the importance of the Employee Free Choice Act. Let me illustrate by an example. The Presiding Officer and I sit on the Agriculture Committee together and one day back in February, our first month on the job—roughly the first month—we heard from a woman from southwest Ohio who came and testified on food stamps. The food stamp benefit in this country on the average is $1 per person per meal. She and her son, as a result, get about $6 a day in food stamps. She works full time. She is a single parent with a 9-year-old son. She is the president of the local PTA of her son's school. She teaches Sunday school, and she volunteers for the Cub Scouts for her son. She works full time making about $9 an hour. She is a food stamp beneficiary. She occasionally makes her son pork chops, which he likes to eat once or twice at the beginning of the month. During the first couple of weeks, she takes him to a fast-food restaurant once or twice. Almost invariably, the last couple of days of the month, she sits at the kitchen table with her son, just the two of them, and she says she doesn't eat.

He says: Mom, what is wrong?

She says: I am just not feeling well today, son.

She has run out of money. It happens almost every month. She is playing by the rules. She works hard. She is doing almost everything we ask. She is involved in the community.

My belief is that, through talking to people like her, if she had the opportunity to join a union, she would see several things happen. She would see a higher wage. She would be more likely to have health insurance to build toward a pension. All the things everybody in this institution has, everyone who sits in the U.S. Senate—everyone who works in this institution, on that side of the Capitol or on this side of the Capitol, has health care, has a decent wage, and has a decent pension.

The single force that gives people an opportunity for health care, a decent wage, and a decent pension is unionization. We know that. If you trace the numbers of people joining unions and you draw a graph about wages in this country, the lines are almost parallel. We are a more productive workforce than we have ever been. Yet wages have not kept up with productivity. When you measure, for decades and decades in our country, as productivity went up, wages went up. But during the last few years, as productivity has gone up sharply, wages have continued to remain stagnant. That is in large part because of the decline of unionization.

That is the importance of the Employee Free Choice Act. That is why it matters to our country. That is why it matters for building a strong middle class. That is why the Senate this week should pass the Employee Free Choice Act.

Mr. President, I ask unanimous consent that at 2:15 today, there be 60 minutes remaining for debate with respect to the Bunning and Tester amendments, that the time be equally divided and controlled, and that the remaining provisions of the previous order remain in effect.

The PRESIDING OFFICER. Without objection, it is so ordered.

RECESS

Mr. BROWN. Mr. President, I ask unanimous consent that the Senate stand in recess under the previous order.

There being no objection, the Senate, at 12:41 p.m, recessed until 2:15 p.m. and reassembled when called to order by the Presiding Officer (Mr. CARPER).

CREATING LONG-TERM ENERGY ALTERNATIVES FOR THE NATION ACT OF 2007—Continued

The PRESIDING OFFICER. There are 60 minutes equally divided under the Bunning and Tester amendments.

Who seeks time?

The Senator from Kentucky is recognized.

AMENDMENT NO. 1628

Mr. BUNNING. Mr. President, I rise to talk about the Bunning, et al., fuel amendment No. 1628. Senator HATCH has asked to be listed as a cosponsor. I ask unanimous consent that he be added as a cosponsor.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BUNNING. Mr. President, for too long America has ignored its energy security. Many of us can remember the energy crisis in the 1970s. We were held ransom by a monopolistic oil cartel and forced to endure shortages, gas lines, and high prices. In the early 1980s, just as America began to invest in alternative fuels, the oil-producing states of the world crashed prices to make new technology uncompetitive. During most of the last 25 years, we have enjoyed low prices and plentiful supplies. But we have had to pay a price. Today, we find that America is addicted to oil.

September 11, 2001, and the hurricanes in the gulf region have shown the fragile state of our energy markets. Domestic disasters and terrorism can send energy prices spiraling out of control. Our energy resources are stretched to the limit and small supply disruptions ripple throughout the entire economy. I believe all Americans, as they see continued instability in the Middle East, China, and India, and sustained gasoline prices around $3.50, $4 a gallon, can see an energy crisis on the horizon.

As you can see from the chart I have here, our production of energy has almost stayed completely flat and will stay completely flat until about 2025, unless we do something about it. On the other side, our consumption continues to escalate. So the difference between the two is the crisis at which we are now looking.

This year alone, we will send about $250 billion to foreign countries—mostly in the Middle East—to buy oil, adding to the $7 trillion we have already spent in the last few decades. America has become complacent and overdependent on imported oil. No matter what energy prices are, we need to take responsibility for our reliance on imported energy and develop a secure, domestic fuel source.

I believe part of that effort should be developing coal to liquid fuels. America happens to be blessed with significant coal reserves. Coal powers our homes and businesses. Fifty-two percent of our electricity is derived from coal. It has long been America's most abundant fuel resource and has driven our economic growth since the Industrial Revolution. Coal to liquid technology lets America capitalize on a domestic resource. Every dollar invested in coal to liquid production will stay in America, grow our economy, and create jobs. By displacing payments to foreign oil companies with domestic investment, we will actually increase the amount of funding available for other alternative fuels. It will lower energy prices for American families, improve the environment, create thousands of jobs, and bring billions of dollars in new investment to our local communities.

Many of you may be asking one question right now: If this technology is so great and could replace expensive imports from the Middle East, why hasn't it been done already?

The answer is simple: Costs and market uncertainty. A typical size coal to liquid plant costs between $3 billion and $5 billion to construct. With complicated plans and environmental permits, a new plant could take 5 to 8 years to build. This is a challenge for even the biggest risk takers on Wall Street. Raising the capital needed to develop a new technology is always difficult, but the multibillion dollar investment scale of a coal to liquid plant has made it nearly impossible.

On top of this is the uncertainty of the price of oil. Yesterday, oil hit $69.09 cents a barrel—an all-time high. Soon we will be seeing $70 prices on a barrel of oil. We have seen this dramatic rise in the last few years. But investors are concerned that oil prices could drop to the low levels of the 1980s and make coal to liquid plants uncompetitive again.

But even if oil prices were to drop that low in the next few decades, I believe CTL would more than pay for itself by insulating us from supply shocks and providing a secure domestic fuel source for our military, businesses such as airlines and trucking, and the average American car.

The challenge for America is to leverage the private investment required for these large, expensive plants. U.S. investors remember the last time synthetic fuels were promoted in the 1970s, and remember the losses they took as oil prices collapsed in the 1980s. The scale of investment, uncertainty of oil prices, and a complicated environmental permitting process have prevented the industry from taking root in the United States.

We need to take aggressive steps now to ensure that America does not continue to face high heating and gasoline costs and rely so heavily on unstable and dangerous parts of the world for our energy. I believe the answer is to provide Government support to get coal to liquid technology off the ground. At least it is one of the things we must consider.

With modest initial investments, we can kick-start the industry and then the Government will get out of the way and let the marketplace take over. I would rather the Government not have any involvement in coal to liquids, but this industry needs assistance because

of the threat of OPEC, oil tyrants like Hugo Chavez, and technology challenges.

While these are legitimate challenges facing coal to liquid, another issue has become more and more prominent during this debate. In the last few weeks, the environmental rhetoric has been strongly against coal fuels. Unfortunately, too many people have repeated it without checking the facts. The picture opponents of coal paint is far from the truth about our fight for energy independence. It shows the same misinformed biases found in anti-coal advertisements and environmental newsletters.

I want to tell you clearly and without reservation that coal to liquid fuel will be a clean part of our energy future.

I want to show you another chart. While some may remember urban diesel pollution problems, coal to liquid will be significantly cleaner than existing fuels in terms of air pollutants such as sulfur, particulate matter, nitrogen, and aromatics. Air Force tests, laboratory tests, and environmental reports all show that coal to liquid fuels will reduce the air pollutants that pose a threat to human health.

As you can see when you compare diesel and well-to-wheel urban emissions, compared to low-sulfur, petroleum-based diesels, you can see organic compounds, carbon monoxide, pollutants, particulate matter, and SO_X, all decreasing in the coal to liquid area. But all of these improvements and the promise of energy security are wiped away by misleading claims that coal to liquid would produce twice as many carbon emissions as conventional fuel. That is not true.

The production of coal to liquid fuels does release carbon twice—once during gasification and another when burned like conventional fuels in engines. But that does not mean coal to liquid plants have to release twice as much carbon emissions.

My amendment requires carbon capture—listen to this. I hope some people in their offices are listening to this. My amendment requires carbon capture, but recognizes that there are limits to this technology today. Carbon capture is only part of the emissions model. Nearly all of the developers we have worked with want to use biomass coal-blended feedstock to achieve emissions reductions.

Believe me, I have studied coal to liquid extensively. Reports from the EPA, DOE, Princeton University, and the Idaho National Laboratories has shown the coal to liquids lifecycle greenhouse gas emissions rate will vary dramatically based on the technology, feedstocks, and process used. These researchers have shown that the coal to liquid process could one day produce a fuel that is carbon neutral. I will repeat that. These researchers have shown that the coal to liquid process could one day produce a fuel that is carbon neutral—no carbon emissions. This is not pie-in-the-sky research. Using some of the same ideas, a planned plant in Ohio—one that will need some Government support to get started—will produce coal to liquid diesel that has 46 percent less carbon emissions than diesel fuel made presently from oil—46 percent less.

On chart 3, we show greenhouse gas emissions. This chart shows the life cycle of greenhouse gas emissions of different kinds of fuel based on the analysis of the Idaho National Lab. On the left, we have diesel fuel, coal to liquid fuels with no environmental technology, coal to liquid that uses carbon capture, and coal to liquid that uses carbon capture and biomass. As we can see by the chart, coal to liquid can be very clean. That is our goal.

For comparison, I included gasoline and ethanol blends on the right. If we support coal to liquids and let the industry develop these carbon capture and biomass technologies, we will reduce emissions more than corn-based E85 and more than cellulosic E10. That is currently what everybody wants to do. E85 is the big savior. The new cellulosic ethanol, E10, is the big savior. As we can see by this chart, that is not true because the emissions at the end of the line with cellulosic E10 and corn E85 are all higher than the coal to liquids mixed with biomass. That is the truth. Those are facts.

The sector should be given time, just as everyone else, to develop the best technology and not rely on Congress to pick it for them. That is why my coal to liquid fuel amendment sets the environmental standard for coal to liquids at the same aggressive 20-percent life cycle reduction that Chairman BINGAMAN requires for biofuels. The very same reduction that Chairman BINGAMAN in his Energy bill requires of biofuels is the one I have in this amendment. Every gallon of coal-to-liquids made with the help of my amendment would meet this standard and would be a gallon of oil we do not have to buy from the Middle East.

While I have shown that limited Government support is necessary and coal to liquid fuels will be as clean as biofuels, another reason to support coal to liquid fuels is national security.

I want my colleagues to look at this chart because this is the most important part of coal to liquid technology, and putting it on this Energy bill.

The military is the largest single purchaser in this country, and the Air Force consumes 50 percent of this total. I have spoken many times with the Secretary of the Air Force, and I am proud to say he has taken the lead on developing this domestic resource.

Last year, the Air Force spent nearly $7 billion—$7 billion—alone on aviation fuels, which was over budget by $1.6 billion. For every $1 change in the price of a barrel of oil, it costs the Air Force about $60 million a year. That dramatic impact is 10 times worse for our commercial airlines.

As we can see, if we do it the right way, we can produce enough of our aviation fuel from this technology with a change in the way the Air Force buys their fuels. If we change it from 5 to 20 years in terms of the amount of time they can contract for, we can have this kind of dramatic impact for our military.

With this in mind, last summer, the Air Force tested jet fuel with a 50-percent mix of Fischer-Tropsch fuel—that is the coal to liquid process—in a B–52 bomber. The results of these tests so far are nothing short of outstanding. We already knew these fuels are nearly zero in sulfur and very low in nitrogen oxide and particulate matter emissions, but we are learning very new benefits.

During these tests, the Air Force demonstrated this fuel we are talking about burns significantly cleaner and burns significantly cooler than conventional jet fuel. These characteristics allow our jets to have a smaller radar profile and lower heat signature. And these advantages translate into better mileage, reducing both fuel costs, as well as greenhouse gas emissions.

In light of this successful assessment, the Air Force plans to test this fuel in the C–17 cargo plane this year, and it is embracing the goal of certifying the entire fleet of aircraft by 2016.

By that time, the Air Force intends to meet 50 percent of its annual fuel needs, more than 1.3 billion gallons, with Fischer-Tropsch fuel. Coal-to-liquid fuel will provide a safety net for our military to ensure a stable fuel supply regardless of the global politics of oil, but only if we build a domestic industry to make the fuel for them.

Let me turn to the two amendments we will consider today. I am asking that my colleagues support the Bunning-Domenici amendment that I have offered with Senator CRAIG, Senator ENZI, Senator MARTINEZ, and Senator HATCH. Our amendment is the only amendment that will help create a domestic coal to liquids industry, is a separate program that will not compete with biofuels in any way, requires coal to liquids meet the same 20 percent life cycle reduction of greenhouse gases that biofuels must meet—the rest of this bill requires that—requires coal to liquid facilities to capture carbon dioxide, and mandates only one-sixth as much fuel as the renewable fuel standard.

I am also urging my colleagues to oppose the Tester-Bingaman amendment. This amendment is not—and I emphasize this—is not a coal to liquid amendment. It sets an irresponsible environmental standard and will just kick Government support for this fuel into the future.

Their amendment is opposed by 23 members of the coal to liquid coalition, including industry, airlines, railroads, and others.

It sets strict technology mandates for emissions that will stifle innovation and prevent nearly all domestic coal to liquid plants from moving forward.

It limits the availability of the loan to 50 percent of the plant cost, making it less effective than the already existing DOE program that we passed in 2005.

It will take years in DOE rulemaking before the first dollar is ever allocated for a plant.

In the greatest deception of all, it does not require coal to be used in the coal to liquid process.

Let me say that again so everybody understands. The biggest deception of all is that the Tester-Bingaman amendment does not even require coal to be used in the coal to liquid process.

I am committed to the coal-to-liquid fuel as a secure domestic and environmentally sound fuel. The Tester amendment looks at coal-to-liquids as an afterthought. I think my proposal should be adopted for any one of a dozen arguments that we have made for coal to liquid fuels. It will create jobs, bring down the price of fuel, bring down the price of what we pay at the pump, fuel our military, but basically displace foreign oil, enhance our national security, add value to our coal resources, and improve our environment.

But my final and perhaps most important point is that coal to liquid fuels deserve fair treatment. I ask that my colleagues look at what we have done for biofuels in America and the benefits we have given to our farmers. Communities throughout the Midwest are uniting to invest in ethanol and biomass. Money from Wall Street is flowing into our rural communities, developing infrastructure and creating jobs. In many parts of America, I have seen new hope in agriculture and new ways for farmers to realize greater values for their crops.

It all started with the ethanol fuel mandate. My amendment will create the exact same mandate for coal to liquid fuel with the same environmental standards. I think our coal communities deserve the same support we gave our farm community.

Will you tell the Governors of the Southern States, Pennsylvania, Ohio, Illinois, North Dakota, Colorado, Nevada, and Montana that you oppose their efforts to bring coal to liquid plants to their States?

Will you tell the men and women who serve as coal miners, construction workers, truckdrivers, train conductors, and plant operators that they deserve less support than our farmers?

Will you tell all Americans that you would rather keep buying oil from the Middle East instead of making fuel in America?

Mr. President, I yield the floor.

The PRESIDING OFFICER. The Senator from Colorado is recognized.

Mr. SALAZAR. Mr. President, parliamentary inquiry: How much time remains on either side?

The PRESIDING OFFICER. The Senator from Kentucky has 50 seconds—5–0 seconds—remaining and the majority side has 30 minutes remaining.

Mr. SALAZAR. Mr. President, I ask unanimous consent that I be recognized to speak for 10 minutes in support of the Tester amendment, followed by 10 minutes for Senator BINGAMAN.

The PRESIDING OFFICER. Without objection, the Senator from Colorado is recognized for 10 minutes.

Mr. SALAZAR. Mr. President, I rise today to speak on behalf of amendment No. 1614, which is the amendment Senators TESTER, BYRD, ROCKEFELLER, BINGAMAN, and I are cosponsoring today. Before I make my prepared remarks, let me make a couple of introductory remarks.

The work we are doing today here on the floor of the Senate is perhaps the most important work we could be doing, because how we move from our current chaos on energy here in America to the reality of energy independence is the hallmark of the 21st century. It is an absolute imperative for us to get to the kind of energy independence that has been desired in this country for over 40 years and which has been the topic of much rhetoric and very little action. This is our opportunity, today and in the days ahead, as the Senate speaks out loudly and clearly about the importance of energy and how we will move forward in this world.

From my perspective, I believe we have no choice. I believe the inescapable forces of our civilization today require us to do nothing less than to embrace this concept of a clean energy future with the sense of moral imperative President Carter spoke about over 30 years ago. I believe there are three inescapable forces that are with us today.

First, there is national security. When we see the rockets that are raining down from Hezbollah and northern Israel, one has to ask, where is that money coming from that is funding those rockets; and where is that money coming from that is funding 10,000 members of the militia? We know it is coming from the $67 per barrel being paid today for oil that is imported from those countries. Today, indeed, when one looks at the fact that, for instance, in March it was 66, 67 percent of the oil we use in America that was imported from foreign sources, our national security requires us to make sure we move forward with this imperative before us today.

Secondly, there are environmental security issues in how we deal with climate change. I think it is finally a reality here in America that our world needs to deal with the issue of climate change in a realistic way. We need to do it now. We cannot wait. Even the President of the United States, who appeared to be a person who didn't believe in global warming, in his State of the Union speech as he addressed the Congress, said he wanted the Congress this year to address the issue of global warming.

The third and inescapable force which should compel us to move forward on the issue of energy has to do, again, with the economics of our Nation and making sure we are not subject to the volatility we have seen so often in the past. That is why I come to the floor to speak on behalf of the coal gasification amendment for which Senator TESTER is the lead sponsor. What we are proposing fits very well into making sure we are adopting this clean energy future.

I am not against the development of coal. I know what coal is in the West, in places such as Montana and other places, places such as my own State of Colorado, where the coal miners in the mines on the western slope know the importance of coal and the importance of clean energy. The amendment we have introduced will help us reduce our independence on foreign oil by making better use of our vast coal resources here at home. Fuels, fertilizers, chemicals, and consumer products derived from coal, if produced responsibly with coal gasification technology, can replace much of the imported oil we use on a daily basis.

Coal is to the United States what oil is to Saudi Arabia. It is our most abundant domestic energy resource. It produces more than 50 percent of our electricity. As a nation, we have enough coal to last more than 200 years. Until recently, however, coal has not been a legitimate replacement for oil. With old technologies, coal gasification resulted in high CO_2 emissions, which caused global warming. Without carbon capture technology, CO_2 emissions from liquid coal, a product of the coal gasification process, are twice that from conventional fuels. This poses an unacceptable risk to our environmental security. So as we try to deal with CO_2 emissions, we ought not embrace a policy or technology that will increase our problems with respect to CO_2 emissions.

Fortunately, we have new technologies, and those new technologies offer us a way to use coal in our transportation sector and other sectors of our economy in an environmentally responsible manner. Not only can we sequester the carbon produced in the gasification process, but we are able to produce a wide range of materials that are currently being made from oil and natural gas, including diesel fuel, plastics, fertilizer, chemicals, and a wide range of household items.

Senator TESTER and I and the other cosponsors of this amendment have included in this amendment a framework for how we proceed with coal gasification in a responsible manner. Our amendment has four main components.

First, it provides $10 billion in direct loans for the construction of low emission coal gasification plants.

Secondly, our legislation will establish a grant program that will help spur construction of a new generation of coal gasification plants. The grants will be up to $20 million for any one project or $200 million nationwide. They will be awarded to projects that use a variety of feedstocks such as coal and biomass and which have carbon emissions that are 20 percent lower than conventional baseline emissions.

The third component of our amendment is a set of studies that will help us determine the opportunities that might be provided with greater use of coal and moving forward with liquid production of coal. The amendment commissions a study of the benefits of maintaining coal to liquid products in the Strategic Petroleum Reserve. It also requires the administrator of the EPA to examine the emissions of coal-based products that are used as vehicle and aviation fuel.

Fourth, the legislation also provides additional funding for the Air Force research lab to continue its development and testing of synthetic fuels for use in jets.

The amendment that Senator TESTER, myself, and others are proposing is a reasoned way of making better use of our vast coal resources here at home. It recognizes that coal can replace much of the imported oil, but it also creates a rigorous carbon emission standard for these new coal gasification projects to meet in order to get Federal support. We simply cannot afford to dump excess carbon into the atmosphere, and this amendment ensures we won't.

I once again thank Chairman BINGAMAN and Senator DOMENICI for their leadership on the overall bill.

Before I conclude, I want to make a comment with respect to a statement made on the other side with respect to a competing amendment. The essence of the competing amendment is to say it is the end of the world for coal if we don't adopt the amendment that is being proposed by my good friend from Kentucky. As I said earlier, we are not anti-coal. Both of us who are sponsoring amendments are from coal-producing States. We believe coal is very much an item that has to be in our portfolio in the future.

I have a letter, however, in which Dow Chemical says they are fully supportive of Senator TESTER's amendment, and one of the conclusions they reach, in support of the amendment is that:

Dow Chemical believes the environmental standards in the bill are achievable.

It says:

The requirement that 75 percent of the carbon dioxide generated is captured will ensure that all companies prepare for long-term CO_2 management. This will help drive action to make carbon capture and storage a reality sooner than later.

In conclusion, I urge my colleagues to join us in support of amendment 1614 because it is the most responsible way to proceed as we deal with energy independence as well as dealing with the issue of high emissions.

Mr. President, I yield the floor.

The PRESIDING OFFICER. The majority side has 20 minutes 40 seconds remaining, and on the minority side there are 50 seconds remaining.

The Senator from New Mexico.

Mr. BINGAMAN. Mr. President, I ask unanimous consent that the minority side be given an additional 5 minutes, and would note that Senator DOMENICI and Senator CRAIG are here to use that time.

The PRESIDING OFFICER. Without objection, it is so ordered.

Who seeks time?

The Senator from Idaho is recognized.

Mr. CRAIG. Mr. President, I will talk quickly in 2 minutes.

I come to support the Bunning-Domenici amendment of coal to liquids. It is quite simple. I look at it in rather black-and-white terms. A vote for coal is a vote against Saudi Arabia. A vote for coal-to-liquids is a vote against Hugo Chavez. A vote of coal-to-liquids is a vote against Nigeria and for our own production.

The Senator from Colorado talks about America always laying the claim that we are the Saudi Arabia of coal, except we are rapidly deciding we are not going to use it for anything. Now, if we are going to use it, and it is the great energy supply, then we have to make it cleaner, and that is clearly the technology at hand.

One of the ways to do so, and not only to use it for transportation fuels, is to run it through the liquefication process. And who is the expert in the field of testing it? The Idaho National Laboratory, working with Baard Energy, looked at the Ohio projects—46 percent cleaner. If you add biomass to it, 30 percent biomass to sequester the carbon dioxide and the combined cycle cogeneration process, that is what you get.

Now, isn't that a technology worth passing on to China, which is the largest emitter, or soon will be, producing more emission with less economy of CO_2 than the United States? I think it is time we pushed all technologies, and if they are cleaner, they are better.

The argument here is they have to be perfect before we do them. I would suggest that perfect may not be possible, but 50 percent cleaner or more is possible, and that is where we ought to go. That is where the Bunning amendment takes us.

I tell you what I am going to do; I am going to vote for Senator BUNNING's amendment, and I am going to vote against Saudi Arabia.

Mr. DOMENICI. Mr. President, I think I have, what, 3 minutes remaining?

The PRESIDING OFFICER. The Senator has 3 minutes 35 seconds.

Mr. DOMENICI. Thank you very much, Senator LARRY CRAIG, for those comments.

Now, let me say we have a similar situation to the one we had here in the last 2 or 3 days on the 15-percent wind mandate—RPS. We have two amendments out here, and all of a sudden we find out neither of them is going to have the votes. I am afraid what has happened here is we have two amendments and neither is going to get the votes if the Senate doesn't consider the difference between these two bills and vote for the one that is most apt to accomplish the purpose we set out in a coal to liquid amendment.

The Tester-Bingaman amendment, No. 1614, in this Senator's opinion is only a long shot that we are going to get a lot of incentives for coal-to-liquid. There is $10 billion in direct loans. That is nice for everybody. We are going to have $10 billion to loan, but it is loanable on a number of things beyond coal-to-liquid. I predict the money is going to go to those other things because it is so hard to reach the calibration required in this amendment of coal-to-liquid.

In the Bunning amendment, there is a long time to work on it, until 2016, and a given amount of that liquid will be purchased and they can get ready for it to be purchased. But the standard is clearly achievable because it is the same 20 percent we are going to require of ethanol and of the other programs we are achieving, and we are saying do the same thing. They are not saying that in the Montana amendment—do the same as we have done for the other fuels. I am afraid we are not going to get there and the money is going to get loaned for the wrong things before we are finished. In competing between the two, both are going to die. I suggest that colleagues vote against the amendment of the Senator from Montana and for the one of the Senator from Kentucky if you want to get coal-to-liquid started.

Mr. BINGAMAN. Mr. President, how much time remains?

The PRESIDING OFFICER. The majority has 20 minutes 15 seconds, and the minority has 53 seconds remaining.

Mr. BINGAMAN. Mr. President, I will take 5 minutes. I know Senator TESTER is here and wishes to speak. I understand Senator KERRY and many others wish to speak also.

The issue between the two amendments is what our focus should be, when we think about the future of coal, are we sure the best use of coal and the

best future for coal is in the developing of transportation fuels? In my view, that is what the Bunning amendment concludes.

The Tester amendment, to the contrary, takes a broader view of the future of coal. I believe we want to enable the development of many potential uses of coal that are both environmentally and economically sound. We should not be focused on commercializing in large-scale uses of coal that do not make good sense in the marketplace.

First, let me say a couple of things about the Bunning amendment.

There are currently no large-scale coal to liquid plants in the United States. The price tag of a typical plant is in the billions of dollars.

The Bunning amendment purports to require that coal-derived fuels be 20 percent better than gasoline. But we have an apples-to-oranges comparison here because coal-to-liquids plants will produce primarily diesel fuel, not gasoline. The total greenhouse gas emissions from coal-derived diesels are likely to be greater by about 150 percent than the emissions from diesels that are powered from petroleum.

The Bunning amendment is technologically limiting, and such uses of coal as conversion to chemicals, to plastics, and to fertilizer are not permitted to benefit from the Bunning amendment.

Coal to liquids products mandated by the Bunning amendment have very large water requirements. Water requirements are estimated to be about 2 gallons for every gallon of coal-derived fuel produced. The Tester amendment, by contrast, is much more broad in the beneficial uses coal can be put to, whether to make fuels or fertilizers or plastics or chemicals.

There are industrial plants in the United States that do use coal commercially as a feedstock for chemical products.

I have a letter from the president of Dow Chemical which I ask unanimous consent to be printed in the RECORD at the end of my statement.

The PRESIDING OFFICER. Without objection, it is so ordered.

(See Exhibit 1.)

Mr. BINGAMAN. He states as follows in that letter:

On behalf of Dow Chemical Company, I write to offer my strongest support for Senator TESTER's ''Coal Innovation'' amendment.

Simply put, it will allow companies to build gasification plants in the United States that run on coal, biomass and other feedstocks, while helping to increase fuel and feedstock diversity and demonstrate options for carbon capture and storage. This will result in gasification plants that are more efficient and help address climate change and contribute to energy security.

Mr. President, I also have a letter that I want to have printed in the RECORD at the end of my remarks from various unions—the AFL–CIO Building and Construction Trades Department, the Industrial Union, the United Mine Workers, various others.

The PRESIDING OFFICER. Without objection, it is so ordered.

(See Exhibit 2.)

Mr. BINGAMAN. They strongly endorse the Tester amendment. They previously were part of a coal to liquids coalition which issued an earlier letter which has now been rescinded which spoke in favor of the Bunning amendment and against the Tester amendment, and they say in their letter that they strongly support the Tester amendment.

Clearly, I think the Tester amendment gives us the best chance of promoting the use of coal to meet our energy needs in the future, and I strongly support it and oppose the Bunning amendment. I hope my colleagues will do the same. I believe this is the right course for us to follow.

EXHIBIT 1

THE DOW CHEMICAL COMPANY,
Midland, Michigan, June 18, 2007.

Hon. JEFF BINGAMAN,
U.S. Senate, Washington, DC.

DEAR CHAIRMAN BINGAMAN: On behalf of The Dow Chemical Company, I write to offer my strongest support for Senator Tester's ''Coal Innovation'' amendment to H.R. 6, the energy bill pending before the Senate. Simply put, it will allow companies to build gasification plants in the United States that run on coal, biomass and other feedstocks, while helping to increase fuel and feedstock diversity and demonstrate options for carbon capture and storage. This will result in gasification plants that are more efficient, help address climate change and contribute to energy security.

Dow is excited by the prospect of this legislation being enacted. As you know, Dow is one of the world's largest chemical companies and is heavily reliant in the U.S. on natural gas and oil as raw materials for the products we manufacture. High and volatile prices for these inputs have caused the company's energy bill to swell three-fold since 2002, reaching $22 billion last year, and have forced us to look to other parts of the world for our growth.

In an effort to address this problem, and to help sustain our operations here, we have expressed interest in utilizing industrial gasification technology and in leading a consortium in the U.S. to demonstrate it on a commercial scale. A company like Dow could be a major purchaser of the syngas and/or the naphtha that these plants produce. As you know, the military also has a high interest in taking syngas-based liquid fuels.

Dow would be able to make virtually all of the products we currently make from natural gas liquids by substituting coal, biomass or a combination thereof. The ability to manufacture products like plastics, fibers and coatings would help to optimize the carbon footprint of a project, since a portion of the carbon would reside in finished goods that are not burned. However, one major hurdle for any would-be plant sponsor is the financing. The direct loans in the amendment would go a long way toward helping to get these types of plants built, and help provide, in the long run, a lower cost alternative to oil and natural gas.

In addition, Dow believes that the environmental standards in the bill are achievable. The requirement that 75% of the carbon dioxide generated is captured will ensure that all companies prepare for long-term CO2 management. This will help drive action to make carbon capture and storage a reality sooner rather than later.

Thank you for your and your staff's attention to this issue, which is critical to American manufacturing, the economy and our energy security. Please let us know if there is any way we can be of assistance on this matter.

Sincerely,

ANDREW N. LIVERIS,
Chairman and CEO.

EXHIBIT 2

JUNE 18, 2007.

DEAR SENATOR: On June 13, 2007 the Coal-to-Liquids (CTL) Coalition sent you a letter purporting to have the support of the undersigned labor unions and organizations. The CTL Coalition did not clear this letter with us before sending it. We regret that this letter created the mistaken impression that our organizations had arrived at a position on the issues addressed in the June 13 letter.

Unfortunately, this unauthorized correspondence has been misconstrued to mean that our organizations oppose an amendment that Senators Tester, Byrd, Rockefeller, Salazar, and Bingaman are expected to offer later this week to the Creating Long-Term Energy Alternatives for the Nation (CLEAN Energy) Act of 2007 (H.R. 6).

On the contrary, we strongly urge your support for the Tester-Byrd-Rockefeller-Salazar-Bingaman amendment to establish a coal innovation direct loan program. This $10 billion program would enable America to build successful large-scale facilities to demonstrate carbon dioxide capture for coal conversion technologies, which is essential to guarantee the viability of coal into the future. The coal innovation direct loan program would create thousands of U.S. jobs in mining, construction, and operation.

We believe strongly that coal can be both an economically and environmentally responsible choice for America's energy security. To realize the potential of coal, America must make significant investments to prove the new technologies vital to its future. We therefore urge you to support the Tester-Byrd-Rockefeller-Salazar-Bingaman amendment.

Sincerely,

AFL–CIO Building and Construction Trades Department.
AFL–CIO Industrial Union Council.
International Brotherhood of Boilermakers.
International Union of Operating Engineers.
Laborers International Union of North America.
United Mine Workers of America.

Mr. BINGAMAN. I yield the floor and suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

The PRESIDING OFFICER. The Senator from Montana.

Mr. TESTER. I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. TESTER. Mr. President, I wish to speak in opposition to amendment

1628, the Bunning amendment, for a number of reasons.

No. 1, this is a mandate to develop the gallonage from coal-to-liquids. I don't think it is the right direction to go. This amendment—folks have been using apples and oranges to compare greenhouse gases. The Bunning amendment says coal-to-liquids will be 20 percent better than gasoline, but coal-to-liquids does not produce gasoline-equivalent fuel, they produce the equivalent of diesel fuel, and that is 150 percent higher in greenhouse gas emissions than diesel produced from petroleum.

The third thing, it is technology-limiting. Fuels produced from coal are only allowed under the Bunning amendment rather than articles such as fertilizer, chemicals, and plastics, as my amendment does.

Finally, there is no path to coal's future in a carbon-constrained world with the Bunning amendment—no requirement to deal with the carbon dioxide produced in the coal to liquids plants, no technology incentive to keep coal viable into the future, which we absolutely need. If and when our greenhouse gases are regulated, these plants will not be economic, and the cost to the consumers of the Bunning mandate will soar.

I have seen many signs up today, placards, talking about how coal-to-liquid technology is automatically less than petroleum. That is not correct unless you have carbon capture. The Bunning amendment does not allow for carbon capture. My amendment does.

With that, I would certainly suggest and request that the body vote against the Bunning amendment and support the Tester amendment No. 1614.

I yield the floor and suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

The PRESIDING OFFICER. The Senator from Pennsylvania.

Mr. SPECTER. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. SPECTER. I ask unanimous consent to be permitted to speak for up to 5 minutes.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. SPECTER. I have sought recognition to speak in favor of the amendment which will be voted on later this afternoon which provides that we would lift the antitrust exemption which is now held by the OPEC nations.

There have been judicial interpretations holding that the OPEC countries have sovereign immunity from prosecution under the antitrust laws, and it is my legal judgment that the limited judicial holdings in this field are erroneous because there was a well-accepted exception to the sovereign immunity doctrine where there is commercial activity involved. But in any event, there is no doubt that the Congress of the United States has the authority to legislate in the field, and I believe it would be very crucial to remove the antitrust exemption which the OPEC nations now have.

We have a crisis—a strong word but I think an accurate word—on gasoline prices today. The price of crude oil has been hovering around $65 a barrel. The American people are paying on average more than $3 a gallon for gasoline. Consumers are paying more for products because American companies have to pay more to manufacture, and without going into great detail, there is no doubt that there is a crisis in the field.

This legislation has been acted on in the past—in the 109th Congress when I chaired the Judiciary Committee—and it has been reintroduced this year. Senator KOHL is the chairman of the Subcommittee on Antitrust and has taken the lead, and we have a very impressive list of sponsors: Senator LEAHY, Senator GRASSLEY, Senator BIDEN, Senator COBURN, Senator FEINGOLD, Senator SNOWE, Senator DURBIN, Senator BOXER, Senator LIEBERMAN, Senator SCHUMER, Senator SANDERS, as well as my own cosponsorship of this legislation.

I have been interested in this subject for more than a decade because I think the antitrust exemption which they enjoy ought not to be. I wrote to President Clinton in his term in office—and received no answer on the subject—a very lengthy letter which I put in the CONGRESSIONAL RECORD when I spoke on this amendment last week. I followed it up with a letter to President George Bush on the same subject. We passed the amendment last year. As I say, it was dropped in conference. We are asking for a rollcall vote on it this time because the practical realities are, if it gets a very strong vote—and I anticipate it will—it will have more stature when it gets to conference.

I urge my colleagues to support this amendment to eliminate the conspiracy, the concerted action where the OPEC nations get together in a room, reduce supply, and that raises the price. This is an important amendment, and it will contribute to reducing the price of gasoline at the pump.

I yield the floor.

The PRESIDING OFFICER. Who yields time?

Mr. BINGAMAN. Mr. President, how much time remains?

The PRESIDING OFFICER. Roughly 9 minutes for the majority, and there is no time remaining for the minority.

Mr. BINGAMAN. Mr. President, let me ask the Senator from Montana if he wanted to use the remaining 9 minutes or some lesser amount of that. We can go ahead and go to a vote whenever you are finished with your statement.

The PRESIDING OFFICER. The Senator from Montana.

Mr. TESTER. I just want to talk about my amendment, 1614, as long as we have time to do that, very quickly recap it because I think it is important that we know the facts.

First of all, we have enough coal in this country, if it is used at the current rate, to last us for 250 years. We need to develop it responsibly. This amendment for coal-to-liquids will develop it responsibly. What it does is it provides grants and loans for clean coal technology. Let me tell you the parameters because some folks have said this can't be achieved.

In front of the Senate Finance Committee, it was testified that it is entirely capable, with the technology we have today, to have 85 percent carbon capture. This amendment requires 75 percent carbon capture.

The National Mining Association said that with coal to liquids, adding some biomass with the coal, we could achieve 46 percent less in life cycle greenhouse gases than comparable petroleum—46 percent less. This amendment requires 20 percent less. This amendment is entirely doable by the industry. If we want to develop our coal resources in a manner that meets the needs of consumers as well as being able to develop our coal resources in a responsible way that would not trash the environment when climate change is such a huge issue in the world, we need to step forth and adopt this amendment.

I could go into the amendment further and talk about the potential of replacing foreign oil. I could talk about how it is a win-win situation for the country overall, as far as achieving energy independence, as we push this bill forward that deals with renewables such as biofuels and wind and solar and geothermal. The fact is, with this amendment there are no bogeymen. It is achievable by the industry, and it should be adopted if we are going to lead this country down the road of energy independence, a road that will allow the climate change issue to be put to bed.

By the way, if we pass this amendment, I fully believe, with the two powerplants a month China is putting on board at 500 megawatts each, we can also help lead China down a road to clean coal technology.

I would appreciate a ''yes'' vote on amendment 1614.

I yield the floor.

The PRESIDING OFFICER (Mrs. MCCASKILL). The Republican leader.

Mr. MCCONNELL. Madam President, I rise to speak in support of my good friend from Kentucky, Senator BUNNING, and his amendment with the Senator from New Mexico to establish a program to help support and promote

clean coal-to-liquid fuels. Focusing more on coal-to-liquid fuels will benefit our economy and our national security. Coal is a vital part of America's energy production, and coal is a vital part of Kentucky's economy and history. The coal industry creates over 60,000 jobs in my State, including approximately 15,000 coal miners. Over half the country's electricity is generated by coal, and coal constitutes over 90 percent of America's fossil fuel resources. That means the coal we can mine in this country alone would be enough to supply our Nation for more than 250 years. What Saudi Arabia is to oil, America is to coal. Therefore, it would be irresponsible of us, not to mention downright foolish, not to invest in technology to take advantage of this vital natural resource. That is why I thank my friend Senator BUNNING for his leadership on this issue.

Greater use of coal to liquid fuels will benefit the environment by reducing emissions of sulfur dioxide, nitrous oxide, particulate matter, and other pollutants as compared to conventional fuels. The Bunning amendment also requires that coal to liquid fuels under this program reduce greenhouse gas emissions by 20 percent relative to gasoline. Greater use of coal to liquid fuels, which we can generate here at home, will mean less dependence on foreign sources of oil. Right now America gets 60 percent of its oil from foreign countries, many of which do not have our best interests at heart, as we certainly know. Passing this amendment will mean greater energy independence and strengthened national security. I commend my good friend and fellow Senator JIM BUNNING, as well as Senator DOMENICI. Senator BUNNING has been hard at work on this issue for a lengthy time. I thank him for his dedication to the coal producers and miners of Kentucky and America. This amendment is the right thing to do for them, for our economy, and for our national security.

I urge my colleagues to support it.

I yield the floor.

Mr. BINGAMAN. Madam President, I yield back the time.

The PRESIDING OFFICER. Under the previous order, the question is on agreeing to amendment No. 1628 offered by the Senator from Kentucky, Mr. BUNNING.

Mr. DOMENICI. I ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second?

There appears to be a sufficient second.

The clerk will call the roll.

The legislative clerk called the roll.

Mr. DURBIN. I announce that the Senator from Connecticut (Mr. DODD) and the Senator from South Dakota (Mr. JOHNSON) are necessarily absent.

Mr. LOTT. The following Senators are necessarily absent: the Senator from Kansas (Mr. BROWNBACK), the Senator from Oklahoma (Mr. COBURN), and the Senator from Arizona (Mr. MCCAIN).

The PRESIDING OFFICER. Are there any other Senators in the Chamber desiring to vote?

The result was announced—yeas 39, nays 55, as follows:

[Rollcall Vote No. 213 Leg.]

YEAS—39

Allard	Dole	Martinez
Bennett	Domenici	McConnell
Bond	Ensign	Murkowski
Bunning	Enzi	Roberts
Burr	Graham	Sessions
Chambliss	Grassley	Shelby
Cochran	Hagel	Smith
Coleman	Hatch	Specter
Corker	Hutchison	Stevens
Cornyn	Inhofe	Thune
Craig	Isakson	Vitter
Crapo	Lott	Voinovich
DeMint	Lugar	Warner

NAYS—55

Akaka	Feinstein	Nelson (FL)
Alexander	Gregg	Nelson (NE)
Baucus	Harkin	Obama
Bayh	Inouye	Pryor
Biden	Kennedy	Reed
Bingaman	Kerry	Reid
Boxer	Klobuchar	Rockefeller
Brown	Kohl	Salazar
Byrd	Kyl	Sanders
Cantwell	Landrieu	Schumer
Cardin	Lautenberg	Snowe
Carper	Leahy	Stabenow
Casey	Levin	Sununu
Clinton	Lieberman	Tester
Collins	Lincoln	Webb
Conrad	McCaskill	Whitehouse
Dorgan	Menendez	Wyden
Durbin	Mikulski	
Feingold	Murray	

NOT VOTING—5

Brownback	Dodd	McCain
Coburn	Johnson	

The amendment (No. 1628) was rejected.

Mr. BINGAMAN. I move to reconsider the vote.

Mrs. BOXER. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

The PRESIDING OFFICER. Under the previous order, there will now be 2 minutes of debate equally divided on amendment No. 1614, offered by the Senator from Montana, Mr. TESTER.

The Senator from New Mexico.

Mr. BINGAMAN. Madam President, I strongly urge support for the Tester-Byrd amendment.

I yield the remainder of the time to Senator TESTER.

The PRESIDING OFFICER. The Senator from Montana.

Mr. TESTER. Madam President, what this amendment does is gives loans for equipment to capture and sequester carbon from coal to liquid technology. It also allows for loans to construct the plant.

The Federal Government has the opportunity right now to push coal to liquids forward with some dollars. Also, what happens with this amendment is—and these are entirely achievable parameters—75 percent of the carbon would be captured and sequestered, and it would be 20 percent less than lifecycle greenhouse gases from petroleum. It works for this country in making us more energy independent and it works for the global warming issue to make sure we get our hands wrapped around that and it is progress in the proper way for energy development.

It is endorsed by the AFL–CIO, the United Mining Association, and Dow Chemical. This amendment is achievable, entirely achievable.

The industry testified in the Senate Finance Committee that they could capture and sequester 85 percent. This amendment does it at 75 percent.

I encourage the adoption of this amendment.

The PRESIDING OFFICER. Who yields time in opposition?

Mr. DOMENICI. Madam President, I looked around and didn't see anyone else, so I guess I will respond.

Fellow Senators, we defeated the best amendment to assure we would bring coal to liquid on board. Now what you have is an amendment that says a $10 billion direct loan program—not any other kind of loan but a direct loan—meaning the appropriators, without the White House, can approve in appropriations $10 billion. But the kicker is it does not have to go for coal to liquid technology, it can go for a number of technologies, and if you can't reach it in coal, you will reach it in the others. So you surely are voting for $10 billion in direct loans. You are not assuring that you are going to get coal to liquid because the standards are so high you may not be able to achieve them in the coal to liquid.

That is enough for me. I thank you for giving me some time, and I urge a ''no'' vote.

I yield the floor.

The PRESIDING OFFICER. The question is on agreeing to amendment No. 1614.

Ms. LANDRIEU. Madam President, I ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The clerk will call the roll.

The assistant legislative clerk called the roll.

Mr. DURBIN. I announce that the Senator from Connecticut (Mr. DODD) and the Senator from South Dakota (Mr. JOHNSON) are necessarily absent.

Mr. LOTT. The following Senators are necessarily absent: the Senator from Kansas (Mr. BROWNBACK), the Senator from Oklahoma (Mr. COBURN), and the Senator from Arizona (Mr. MCCAIN).

The result was announced—yeas 33, nays 61, as follows:

[Rollcall Vote No. 214 Leg.]

YEAS—33

Akaka	Bayh	Brown
Baucus	Bingaman	Byrd

Carper	Kohl	Nelson (NE)
Casey	Landrieu	Obama
Clinton	Levin	Pryor
Coleman	Lieberman	Reid
Conrad	Lincoln	Rockefeller
Dorgan	Lugar	Salazar
Durbin	McCaskill	Stabenow
Inouye	Murkowski	Tester
Klobuchar	Nelson (FL)	Webb

NAYS—61

Alexander	Enzi	Mikulski
Allard	Feingold	Murray
Bennett	Feinstein	Reed
Biden	Graham	Roberts
Bond	Grassley	Sanders
Boxer	Gregg	Schumer

Ensign	Menendez	

NOT VOTING—5

Brownback	Dodd	McCain
Coburn	Johnson	

The amendment (No. 1614) was rejected.

AMENDMENT NO. 1519

The PRESIDING OFFICER. Under the previous order, there is 30 minutes equally divided on the Kohl amendment. Who yields time?

The Senator from Wisconsin.

Mr. KOHL. Madam President, I rise at this time with 13 cosponsors to urge all of my colleagues to support our bipartisan no-OPEC amendment to the Energy bill. This amendment will hold OPEC member nations to account under U.S. antitrust law when they agree to limit supply or fix prices in violation of the most basic principles of free competition.

In addition to the 13 cosponsors of this amendment today, companion House legislation passed the other body last month by an overwhelming 345-to-72 vote. This amendment will authorize the Justice Department, and only the Justice Department, to file suit against nations or other entities that participate in a conspiracy to limit supply or fix the price of oil.

We have longed decried OPEC, but sadly no one in Government has yet tried to take any action. This amendment will, for the first time, establish clearly and plainly that when a group of competing oil producers, such as the OPEC nations, act together to restrict supply or to set prices, then they will be violating U.S. law.

As we consider the high price of gas, one fact has remained consistent: the price of crude oil and, in turn, gasoline dances to the tune set by the OPEC members.

Referring to the 18-percent rise in worldwide crude oil prices since the start of the year, OPEC's president commented:

We did have a bad situation at the beginning of the year, but it is much better now.

The difference was OPEC's decision last fall to enforce combined output cuts of 1.7 billion barrels of oil a day in order to drive up the price of crude oil. Just last week, OPEC refused to add more oil supply to the market despite the International Energy Agency's urgent call for new supplies to meet rising demand.

While OPEC enjoys its newfound riches, the average American consumer suffers every time he or she visits the gas pump or pays a home heating bill. Gas prices have now increased 71 cents a gallon just since the start of the year, to a current national average of $3.01 per gallon, an increase of more than 30 percent.

The Federal Trade Commission has estimated that 85 percent of the variability in the cost of gasoline is the result of changes in the cost of crude oil. If private companies engaged in such an international price-fixing conspiracy, there would be no question it would be illegal. The actions of OPEC should be treated no differently because it is a conspiracy of nations.

The amendment will not authorize private lawsuits, but it will authorize the Justice Department to file suit under the antitrust laws for redress. It will always be at the discretion of the Justice Department and the President as to whether to take action against OPEC.

Our amendment will not require the Government to bring legal action against OPEC member nations. This decision will entirely remain in the discretion of the executive branch.

I believe the Senate should now join the 345 of our colleagues in the House and vote to support this legislation.

I reserve the remainder of my time.

The PRESIDING OFFICER. Who yields time? The Senator from New Mexico.

Mr. BINGAMAN. Madam President, there is an old legal adage that says, hard cases make bad law. That seems to be the case here. No one likes OPEC. None of us like being put in a position of appearing to defend OPEC. But this amendment, in my opinion, would make bad law. The Framers of the Constitution wisely assigned responsibility for formulating foreign policy and conducting foreign relations to the President and to the Congress, not to the law courts.

Chief Justice Marshall said nearly two centuries ago:

The judiciary is not the department of the Government to which the assertion of its interest against foreign powers is confided. A question like this is more a political one than a legal one.

There has been much talk in this Chamber over the years about the proper role of the judiciary. Nearly every time we are asked to confirm a judicial nomination, we hear speeches given on the Senate floor about the need for judges to confine themselves to the business of interpreting the law, not making the law. And this is exactly what the courts have done in this circumstance.

Here is a case where the courts have wisely recognized that OPEC's pricing policies are not something that should be litigated in U.S. courts but should instead be addressed by the political branches of the Government—the President, the executive branch, and the Congress. Senator KOHL's amendment would throw the issue of OPEC's oil prices back into our courts and force the courts to address those issues.

The amendment before us has its roots in a lawsuit filed by the labor union nearly 30 years ago. The union at that time charged OPEC with price fixing in violation of our antitrust laws.

The trial court dismissed the case on the ground that OPEC members are sovereign nations and are immune from suit. On appeal, the appeals court affirmed the dismissal, though for different reasons. It dismissed the suit under the act of State doctrine. In the court's words:

The act of State doctrine declares a United States court will not adjudicate a politically sensitive dispute which would require the court to judge the legality of the sovereign act of a foreign State.

Quoting the Supreme Court, the Court said:

Every sovereign State is bound to respect the independence of every other sovereign State, and the courts of one country will not sit in judgment on the acts of the government of another done within its own territory.

Senator KOHL's amendment overturns the act of state doctrine, at least so far as OPEC is concerned. It also creates a new offense under the Sherman Act to get at OPEC, it waives sovereign immunity for this new offense, and it amends the Foreign Sovereign Immunities Act to cover the new offense. In short, it sweeps away all of the legal defenses OPEC members have against antitrust suits in our courts.

Adopting the amendment will undoubtedly be very popular, but it is also very unwise. The Ninth Circuit Court of Appeals explained nearly 30 years ago:

To participate adeptly in the global community, the United States must speak with one voice and pursue a careful and deliberate policy.

The President can do this, the court said; the judiciary cannot.

Here is another quote from that same decision:

When the courts engage in piecemeal adjudication of the legality of the sovereign acts of states, they risk disruption of our country's international diplomacy. The executive may utilize protocol, economic sanction, compromise, delay, and persuasion to achieve international objectives. Ill-timed

judicial decisions challenging the acts of foreign states could nullify these tools and embarrass the United States in the eyes of the world.

In this case—

the granting of any relief would in effect amount to an order from a domestic court instructing a foreign sovereign to alter its chosen means of allocating and profiting from its own valuable natural resources. On the other hand, should the court hold that OPEC's actions are legal, this would greatly strengthen the bargaining hand of the OPEC nations in the event that Congress or the executive chooses to condemn OPEC's actions.

In addition, we here in the Senate ought to consider how enactment of this amendment might affect our relations with OPEC members. What will be the international repercussions when the United States starts awarding judgments against foreign nations and attaching their assets in this country? What sort of precedent will the amendment set in the international community? Will other nations start to view our trade policies—such as our nuclear trade restrictions—as violations of their antitrust laws?

The Bush administration has offered us answers to some of these questions. Its statement of administration policy on this bill, which we are considering here in the Senate, says that:

The consequent targeting of foreign direct investment in the United States as a source of damage awards would likely spur retaliatory action against American interests in those countries and lead to a reduction in oil available to U.S. refiners. Not only would such a result substantially harm U.S. interests abroad, it would discourage foreign investment in the United States economy.

For these reasons, the administration concluded:

If a bill including such a provision is presented to the President—

That is the bill we are considering right here on the Senate floor.

—his senior advisers will recommend that he veto the bill.

For all these reasons, I urge my colleagues to vote against the Kohl amendment.

Madam President, how much time remains on both sides?

The PRESIDING OFFICER. There is 8½ minutes in opposition, and 11½ minutes in support.

Mr. LEAHY. Madam President, I join Senator KOHL as a cosponsor of his NOPEC amendment and urge the Senate to adopt it. Under Senator KOHL's leadership, the NOPEC bill has passed unanimously out of the Senate Judiciary Committee without amendment in four separate Congresses, under both Democratic and Republican leadership.

The support for this legislation is both bipartisan and bicameral. The House of Representatives recently passed NOPEC with 345 Members voting for it.

NOPEC will simply hold accountable certain oil-producing nations for their collusive behavior that has artificially reduced the supply and inflated the price of fuel. Unless this amendment becomes law, consumers across the Nation will continue to suffer.

The rise and fall of oil and gas prices has a direct impact on American consumers and our economy. Last month, gas prices in the United States reached a near record high. While prices have come down slightly in recent weeks, that is no reason to condone anticompetitive conduct by foreign government cartels. American consumers should not be held economic hostage to the whim of colluding, foreign governments.

The Associated Press recently reported the Iranian oil minister's announcement that members of OPEC would not increase the supply of oil despite reports that demand is on the rise. Without collusion, OPEC members would compete to serve that demand and prices at home would fall.

When entities engage in anticompetitive conduct that harms American consumers, it is the responsibility of the Department of Justice to investigate and prosecute. It is wrong to let members of OPEC off the hook just because their anticompetitive practices come with the seal of approval of national governments. I am disappointed that the administration does not share this view and has threatened a veto.

Americans deserve better, and it is time for Congress to act. We know the oil cartel and Big Oil companies like things just the way they are, and why shouldn't they? They continue to break new records as they roll up huge profits taken from consumers' pockets.

I hope this Senate and this Congress will take the side of American consumers, not the side of Status Quo, Incorporated. We cannot claim to be energy independent while we permit foreign governments to manipulate oil prices in an anticompetitive manner. I thank Senator KOHL for his leadership on this issue.

Mr. BINGAMAN. Madam President, I yield the floor.

The PRESIDING OFFICER. Who yields time?

Mr. KOHL. Madam President, I yield several minutes to Senator LINCOLN.

I am sorry, did the Senator from Rhode Island wish to speak?

Mr. WHITEHOUSE. If I may, but it is to a different amendment. It is for the Cardin amendment.

Mr. BINGAMAN. Madam President, if we could complete the debate on this amendment, and then if the Senator wishes to yield back time, we could proceed to debate on the next amendment.

Mr. WHITEHOUSE. That will be fine.

Mr. KOHL. Madam President, I will yield several minutes to Senator LINCOLN.

The PRESIDING OFFICER. The Senator from Arkansas.

AMENDMENT NO. 1556

Mrs. LINCOLN. Madam President, I thank my colleague from Wisconsin, Senator KOHL, for giving me a few moments.

My comments are on a slightly different topic today, and I appreciate my colleague yielding to me. I filed an amendment, No. 1556, to the energy legislation almost a week ago. Since that time, I have pleaded with my colleagues to help reach an agreement where I could come to the floor and offer this important amendment. I offered it several times last week in the latter part of the week so it could be considered by the Chamber and get an up-or-down vote on its merits. Unfortunately, I understand that certain colleagues are unwilling to lift their objection to this amendment being considered on the floor under any circumstances. So I come to the floor today to try to express some of my frustrations in dealing with this bill and particularly my amendment, not only for myself and many of my colleagues who are strongly in support of my amendment but also for the hardworking farm families across our Nation.

The amendment I introduced with my good friend and colleague from New Mexico, Senator DOMENICI, is quite simple. It is identical to the legislation we cosponsored together last Congress and have reintroduced again this year, which is S. 807. The bill already has 26 cosponsors in the Senate and 121 cosponsors in the House. This amendment is particularly timely and appropriate for the legislation we are currently considering in the Chamber today because there is a growing understanding in this countryside that without the clarification provided by this amendment, requirements and liabilities under CERCLA, a law designed to clean up toxic industrial pollutants, could be unfairly applied to America's farmers and ranchers of all sizes, of any size, large or small. These are the very men and women who hold the future of renewable energy production in this country in their hands and in their production operations.

The underlying bill we will consider today would take steps to promote the use of biomass, and specifically animal manure, as an important and critical source of renewable energy. It is widely known that farmers are beginning to use their excess manure for energy generation already, through methane digesters and other innovative technologies that are developing on a day-to-day basis. The expanded use of animal manure for energy production not only promotes our Nation's energy independence, it is also a way to control the unavoidable supply of manure and litter from livestock production in an environmentally friendly manner while adding economic value for our farm families and our rural communities.

This is a win-win situation for our Nation and especially for American agriculture. Yet as this Chamber stands

ready to incentivize these innovative practices and spur the growth of alternative technologies to manage this waste, pending lawsuits threaten the entire viability of this emerging industry, not to mention the viability of the hard-working farm families across our country.

We should not stand by and allow a situation where farmers or those who are transporting manure for energy production or other purposes are handling a hazardous waste subject to CERCLA's strict and punitive liability provisions.

It is worth noting that CERCLA section 101(14) specifically excludes petroleum. Here we are, looking to lessen our independence on foreign oil and petroleum products, yet they are exempt from CERCLA. We are looking at the possibility of agricultural by-products being included in CERCLA under the definition of hazardous waste substances but petroleum releases are not subject to CERCLA reporting and liability provisions. Why is it these same liability provisions should apply to our Nation's farmers and ranchers, and particularly our dairy farmers? Farmers and ranchers have always been responsible stewards of the land, making great strides to preserve a healthy environment for their food production but also for their families and communities. Keep in mind that agricultural operations are already regulated under the Clean Water and the Clean Air Acts, as well as other Federal and State environmental laws. The larger size operations are subject to management practices. These are the appropriate regulatory tools to manage the environmental impacts of agriculture in this country, and any farmer will tell you that our U.S. producers are already subject to much greater scrutiny in this area than their foreign competitors. That is one reason why Americans continue to enjoy the safest food supply in the world, produced right here at home by our Nation's farm families, working as hard as they possibly can to not only produce that safe food and fiber but to do it in a way that is respectful of the environment under the regulations we put upon them. The last thing we need to do is stand by and allow policies that encourage the outsourcing of food production in this country.

On that note, it is my view that Congress never intended for CERCLA to apply to agriculture in the first place. In fact, the idea of including animal agriculture under CERCLA was never raised during the first two decades of this law's existence. If normal animal manure is found by the courts to be a hazardous substance under CERCLA, then virtually every farming operation in the country could be potentially exposed to severe liability and penalties under the law. Clearly, Congress never intended such an outcome, and we should take the necessary steps by taking up and passing my amendment to ensure that the courts clearly understand what our congressional intent is. We should not jeopardize American agriculture by allowing courts to impose CERCLA liability on farmers for their traditional farming practices, including the use of manure as a beneficial fertilizer or an emerging feedstock for renewable energy production. This would be most unfortunate.

I hope my colleagues will look at this and be aware. I will continue my efforts to clarify that CERCLA liability does not apply to agriculture, to our livestock, to our ranches and our dairy farms, making sure that agriculture in this country can continue to do what it has always done, and that is to produce a safe, abundant, and affordable food supply under the regulations we provide them.

I thank the Senator from Wisconsin for yielding, and I yield back his time.

The PRESIDING OFFICER. The Senator from New Mexico.

Mr. DOMENICI. Madam President, I believe we have 8 minutes remaining in opposition, and I yield myself 5 minutes.

The PRESIDING OFFICER. The Senator is recognized for 5 minutes.

AMENDMENT NO. 1519

Mr. DOMENICI. First, before the Senator from Arkansas leaves the floor, I wish to say I associate myself with her remarks as they pertain to both subjects, and in particular CERCLA, in which we both share a common interest. We have to get something done; we both know it. Those who are not letting us have a chance at getting a vote will find out sooner or later we are going to get a vote, and what is fair and reasonable will prevail. We are going to work hard to see that is done sooner rather than later.

Having said that, I want to talk about the No-OPEC amendment that would permit legal action to be brought in U.S. courts by the Department of Justice on alleged price-fixing and other anticompetitive behavior affecting petroleum product pricing, production, and distribution by members of the Organization of Petroleum Exporting Countries—OPEC.

While I can see at some level how this idea appeals to our sense of fairness and our frustration about oil prices, I must oppose this amendment and join with my chairman, because it is reality, not sentiment, that counts in public policy. The reality is this amendment would be unenforceable. OPEC producers would simply decide not to sell oil to us any longer. One-third of the oil used in the United States every day comes from an OPEC member. They would suffer the loss of some profits, but our entire economy could come to a grinding halt.

Another problem I have with the amendment is it is a major change in international law that has potential applications beyond the oil sector. The sovereignty of nations is put into question by this amendment. I know of no instance when the United States Government sued a foreign government.

I think if this amendment passes, we can expect a jittery oil market to become even more nervous. We can expect that. In reality, that means higher prices. We can expect less transparency from OPEC. In reality, that means higher prices. We can also expect less cooperation from OPEC in the future, and I think that, too, will lead to higher prices.

I believe this amendment should fail, but obviously, looking at the past and looking at the propensity of Senators to vote on this amendment without looking at the realities of it, I am not too hopeful. Nonetheless, that is the extent of my remarks.

Madam President, I yield the floor.

Mr. BINGAMAN. Madam President, how much time remains on both sides?

The PRESIDING OFFICER. There is 5 minutes in opposition and about 3½ in favor.

Mr. BINGAMAN. Madam President, I think the Senator from Wisconsin should be given the chance to conclude his remarks or close the argument. I will yield back the time in opposition and allow Senator KOHL to use whatever additional times he wants. Then we can close the debate on this amendment and proceed to the next amendment.

The PRESIDING OFFICER. The Senator from Wisconsin is recognized.

Mr. KOHL. Madam President, I believe the arguments set forth by the administration, as well as those on the floor today in opposition to this bill, are without merit. For example, we disagree that it would harm U.S. interests overseas.

The Justice Department has taken action to sue many foreign cartels that have engaged in price fixing, including, for example, the international vitamin cartel. There has been no retaliation against U.S. business interests abroad.

Only 11 Nations in the world are members of the OPEC oil cartel. There would be no reason for any other Nation to retaliate against the United States for attempting to enforce this legislation. The idea that OPEC could strongly discourage investment in the U.S. economy is likewise speculative and without basis. The existence of strong U.S. antitrust laws for over a century, laws that are already reaching foreign conduct affecting the U.S. markets, has not discouraged investment in the United States.

Further, and this is enormously important, this legislation does not require the administration to do anything. It simply gives them the authority to bring action in court against the OPEC oil cartel. It seems to me the legislation would have a constructive

effect in bringing notice to the OPEC oil cartel that we do have recourse, should it be necessary, to move against them in retaliation of their fixing prices of oil at unreasonably high levels.

That is why I believe this legislation should be passed by this body as it was passed by the House of Representatives.

I yield back the remainder of our time.

Mr. DOMENICI. I think Senator BINGAMAN yielded our time back.

The PRESIDING OFFICER. All time is yielded back. There will now be 30 minutes of debate on the Thune amendment. Who yields time?

Mr. BINGAMAN. Madam President, I see Senator WHITEHOUSE is waiting to speak on the Cardin amendment. Senator THUNE is agreeable to letting him speak for 3 minutes or so on that before beginning discussion on the Thune amendment. So I ask unanimous consent that that be the order.

The PRESIDING OFFICER. Without objection, it is so ordered.

The Senator from Rhode Island is recognized for 3 minutes.

AMENDMENT NO. 1610

Mr. WHITEHOUSE. I thank Senators BINGAMAN and THUNE for their courtesy. I am here today to express my support for an amendment sponsored by my colleague, Senator CARDIN, regarding State approval for liquefied natural gas terminals. I am a cosponsor of this important bipartisan amendment with Senators MIKULSKI, SNOWE, DODD, KERRY, KENNEDY, BOXER, LIEBERMAN, and my senior Senator, JACK REED of Rhode Island.

Our country is grappling with a serious and difficult question: how to meet our growing energy needs without depleting our natural resources, threatening our environment or endangering our people.

I strongly support the work of Senators BOXER and BINGAMAN, with many of our colleagues, to take a significant step forward in our use of alternative and renewable fuels. But as we develop these new and emerging fuel sources, we must take great care to balance our need for energy with other imperatives.

Liquefied natural gas is rapidly assuming a larger share of the overall natural gas market. Over 40 new LNG terminals are now proposed for construction, many of which are planned near heavily populated areas or environmentally sensitive coastal areas. Unfortunately, in their haste to expand this market, the LNG industry and the Federal Energy Regulatory Commission have dismissed the risks this poses to public safety and the environment. I am particularly concerned about a proposed LNG terminal in Fall River, MA, a town of nearly 100,000 people, barely over the State line from Rhode Island.

This is Rhode Island's treasured Narragansett Bay. The Bay is used, particularly on beautiful summer days such as today, for commercial and recreational boating and fishing. Tens of thousands of Rhode Islanders live along its shores, and our Bay is in many ways the economic heart, as well as the environmental and recreational heart, of our ocean State.

Now, to reach the LNG facility proposed for Fall River, LNG tankers would have to navigate 21 nautical miles through Narragansett Bay, passing directly by the homes and businesses of 64,000 Rhode Island residents. Along the way, tankers would pass under four heavily trafficked bridges and execute what the Coast Guard itself recently described as extremely challenging navigational maneuvers, as many as 130 times per year.

Moreover, the tanker requires a security zone around it as it proceeds through the Bay. Here is the tanker. This is the size of the security zone it requires, completely occupying the east passage going up through Narragansett Bay between Newport and Jamestown. It would displace all recreational boaters and other cargo boats and disrupt bridge traffic as it transits.

The residents of my State of Rhode Island have spoken loudly and in large numbers against the LNG terminal proposed for Fall River. I have heard their deep concern about the environmental and security risks posed by LNG tankers passing so close to their homes and communities. Yet their voices have not been heard adequately in the current process for permitting LNG terminals.

This amendment would help correct this flaw and give all States and communities the seat at the table they deserve, by requiring the concurrence of affected States for permits to build liquefied natural gas terminals.

The PRESIDING OFFICER. The Senator has used 3 minutes.

Mr. WHITEHOUSE. I urge my colleagues to vote in favor of this amendment.

I yield the floor.

The PRESIDING OFFICER. The Senator from South Dakota.

AMENDMENT NO. 1609

Mr. THUNE. Madam President, I rise today in support of my amendment to create clean energy corridors, which will greatly enhance our grid system to transmit clean and renewable energy.

Much of the debate in this Energy bill has focused on renewable energy. How much renewable energy should we use? How should it be produced? Who should be required to use it? However, this debate has overlooked a key component in this argument, which is, how do we transport this energy from areas with high concentrations of renewable resources to areas with high demand for electrical power?

Oftentimes, clean, renewable sources of power are located in rural areas with low demand for electricity and limited capacity to transmit large amounts of power long distances. At the other end of the spectrum, States with larger urban areas are passing State laws that require the use of renewable energy. In many cases, it is more economical to import that energy from other areas of the country.

It is critical that we create the infrastructure to allow that movement of energy to happen. I have to point to this chart to illustrate exactly how my State of South Dakota serves as a prime example of this dilemma. In South Dakota, we are blessed to have abundant sources of wind. In fact, according to the U.S. Department of Energy, South Dakota has enough wind to produce 566 gigawatts of electric power from wind, which is the equivalent of 55 percent of the Nation's electricity demand.

I will refer to the chart. If you look at these red areas and the pink areas, the purple areas around the country, all these different colors demonstrate varying amounts of wind energy.

Of course, as you can see, South Dakota and North Dakota, Minnesota, Iowa, have enormous amounts of wind energy available. Although South Dakota has an abundant source of wind, this renewable resource is dramatically underdeveloped in my State.

In fact, we have less than one-tenth the wind energy production of our neighboring States, even though our wind resources are far superior. The fundamental problem is we don't have the population markets to use large amounts of wind power within my State's borders.

More importantly, we lack the transmission capacity to carry wind power from rural areas in South Dakota to urban areas in other areas of the country. This amendment includes simple provisions that would significantly improve transmission development for renewable sources of energy.

First, this amendment would direct the Department of Energy to identify areas with transmission constraints that increase costs to consumers, limit resource options to serve load growth or limit access to sources of clean, renewable energy, such as wind, solar, geothermal energy, and biomass.

Upon completion of this study, after verifying all alternatives and public comments, the Department of Energy could then designate these areas as ''National Interest Electric Transmission Corridors.''

These corridors, which enjoyed broad bipartisan support as part of the Energy Policy Act of 2005, are important tools for transmission development. Under current law, these corridors are targeted toward areas experiencing heavy grid congestion. My amendment would expand the designation of these corridors to include access to clean, renewable sources of energy.

This amendment also directs the Federal Energy Regulatory Commission to establish regulations that allow public utilities to allocate and recover costs associated with building the additional transmission infrastructure for wind and other forms of renewable energy. It ensures that rates associated with this development are reasonable, just, and nondiscriminatory.

By overcoming some of the inherent obstacles associated with transmitting renewable energy long distances, I believe this amendment promotes clean, renewable sources of energy in a commonsense fashion.

This amendment will serve as the blueprint for the 21st century grid by facilitating the national scale designation and construction of clean energy corridors that will enable the delivery of clean, sustainable, reliable power to consumers across this country.

As I have met with people from the industry, as I have traveled my State, as I have talked with those who invest in energy projects, it is clear that this is one of the issues that presents a major obstacle to wind energy development in this country. This amendment helps address that by creating and opening these corridors, clean energy corridors that would allow clean green wind energy to make it from areas where it is in abundance, places such as the State of South Dakota, to places in the country that desperately need affordable power.

So I hope my colleagues in the Senate will support this amendment and do something that will significantly address and further the production of wind energy and affordable electricity to America's consumers.

I yield the floor and reserve the remainder of my time.

The PRESIDING OFFICER. The Senator from New Mexico.

Mr. DOMENICI. Madam President, I wish to say to the Senator, I congratulate you on this amendment, the scope of the amendment and the rationale. It is something we need. From my standpoint, I am in favor of it. It will not require a rollcall vote. Hopefully, we can dispose of your amendment very shortly.

I yield the floor.

The PRESIDING OFFICER. The Senator from New Mexico.

Mr. BINGAMAN. Madam President, Senator THUNE's amendment makes a major change in a provision of the Federal Power Act that governs the siting of electric transmission lines. Until 2 years ago, the siting of electric transmission lines was under the exclusive control of the States. The Federal Power Act gave neither the Secretary of Energy nor the Federal Energy Regulatory Commission the authority to site transmission lines.

The States tended to make their siting decisions in the best interests of their citizens, not necessarily in the best interests of the citizens of neighboring or even distant States that might benefit by the long distance transmission of electricity.

Two years ago, in the Energy Policy Act of 2005, which I worked on with Senator DOMENICI, which amended the Federal Power Act to provide what is called the Federal backstop siting authority. Specifically, we directed the Secretary of Energy to conduct a comprehensive national study of electric transmission congestion once every 3 years.

We then authorized the Secretary to designate, based on the study, any geographic areas experiencing electric transmission congestion as ''national interest electric transmission corridors.'' The Secretary completed the first congestion study last August, and he has begun proceedings to designate the first national interest corridors.

Designation of an area as a national interest corridor is likely to have serious consequences. Under the law we passed 2 years ago, a utility that wants to build an electric transmission line within the corridor can apply to the Federal Energy Regulatory Commission for a permit, and the Commission can approve construction of the transmission line without the permission of or even over the objections of the State. Once the Federal Energy Regulatory Commission issues the utility a permit, the utility can then go into Federal court and exercise the Federal Government's power of eminent domain and take private property to erect the transmission line.

I have heard speeches in the time I have served in the Senate from many of my colleagues about their concern over the exercise of the power of eminent domain. The passage of the Thune amendment substantially increases the likelihood that authority, that power of eminent domain, will be exercised against private property rights. Giving Federal officials and private utilities these powers was a major change in Federal law and a major departure from past practice. Nonetheless, we believed the step was warranted to ensure that the national interest in a national electric grid was protected. We believed that entrusting the Secretary of Energy with the task of studying congestion on a national basis and allowing the Secretary to designate only those areas which affected the national interest would prevent abuse of this Federal eminent domain authority.

Even though this authority is less than 2 years old, no corridors have yet been designated, no construction permits have been issued, and no private property has been taken. The authority is already, however, proving very controversial. There is major opposition to the use of this authority just west of here in northern Virginia and in other areas of the country. There has been talk of repealing the authority.

The Thune amendment will only add to the controversy. It makes a fundamental change in the current authority. The Thune amendment says that ''the Secretary may designate additional corridors . . . upon the application by an interested person.'' So even though the Secretary of Energy did not find that a particular area presented congestion concerns of national interest in conducting his congestion study last year and even though the Secretary of Energy did not see fit to propose an area as a national interest corridor, a utility that would like to make use of the Federal eminent domain authority to take private property can apply to the Secretary and the Secretary could then designate the area as a corridor under this new authority. This, as one of the authors of the provision we put in law in 2005, is a major expansion of that authority, and it is an unwarranted expansion.

In addition, the Thune amendment contains additional provisions on rates and recovery of costs which direct the Federal Energy Regulatory Commission to issue new rules setting transmission rates for the recovery of the cost of transmission lines in national interest corridors. Frankly, I am not entirely sure what the purpose of these provisions are. I am not sure how these provisions affect the ratemaking authority the Commission already exercises under the Federal Power Act. They are either redundant or unnecessary or else they authorize the Commission to set up a new rulemaking standard that will apply in national interest corridors different from the standard the Commission applies elsewhere.

I urge my colleagues to oppose the amendment. We should give the program we created in the Energy Policy Act just 2 years ago a chance to work before we dramatically expand it in ways that are not entirely clear.

I yield the floor.

The PRESIDING OFFICER. The Senator from New Mexico.

Mr. DOMENICI. Madam President, because our very economic security is dependent on the availability of electricity, our Nation must reinforce its electric power transmission system.

In the Energy Policy Act of 2005, Congress sought to establish national interest electric transmission corridors to make America's electricity grid more secure by ensuring there is enough capacity in essential areas.

In EPAct, we directed the Energy Department to identify regions where electricity reliability is threatened by transmission congestion and to designate national corridors. Congress further provided FERC with ''backstop siting'' authority for the construction of transmission facilities if the states involved are unable or unwilling to do so.

Just recently, DOE unveiled the following two draft corridor designations:

the Mid-Atlantic Area National Corridor, which runs from New York to Northern Virginia; and the Southwest Area National Corridor, which includes counties in southern California, western Arizona, and southern Nevada.

The amendment offered by Senator THUNE would authorize the Energy Department, in designating national corridors, to consider transmission constraints or congestion that increases costs to consumers; limits resource options to serve load growth; or limits access to sources of clean energy, such as wind, solar, geothermal, and biomass.

Now we just had a debate on the Senate floor last week on the use of renewable energy sources. We all support the increased use of renewable energy sources but there is often heated opposition to the siting of transmission facilities. This is not in the national interest.

I don't see how you can support a mandate for more renewable energy sources but then oppose the designation of national corridors to get the transmission built that is needed to move these renewable energy sources to market.

Yet as we consider this amendment to expand the work we began in the Energy Policy Act of 2005, there are those in the House that are attempting to block the needed funding to implement the national corridors designations out of NIMBY concerns. Again, such attempts are not in the national interest.

The siting provision in EPAct literally provides a light at the end of the tunnel for parts of the country where the electricity grid is at risk due to congestion.

The Thune amendment simply seeks to allow national corridor designations to ensure the necessary transmission to access clean sources of energy like wind, solar, geothermal, and biomass.

I ask my colleagues to support the Thune amendment.

I congratulate Senator THUNE for his amendment because it is just a rational extension and expansion of what we did in the Energy Policy Act. I happened to be part of that Energy Policy Act. As a matter of fact, I think I can say that for years before we got together and Senator BINGAMAN and I were carrying it, we couldn't get it through. But we did get it through. I believe we got it through because it was high time the United States decided that for most matters we could stand on States rights, but every now and then something percolated up that demanded that we take a serious look at a greater interest of the Federal Government.

That is all we are talking about here. If the development of our electric grid ran into situations where you couldn't go through because of the obstinacy of a State to your moving from one State to another or one property owner had a transmission line totally locked up, you could back that up with the Federal Government ending up saying: It has to go because it is a big national interest. You are just kind of piggybacking on that national interest already found in that law as we passed it. Therefore, I believe it is appropriate that we pass this amendment tonight.

I yield back any time I have. I wonder if Senator BINGAMAN would so we could vote.

The PRESIDING OFFICER. The Senator from South Dakota.

Mr. THUNE. Before I yield back my time, I thank both Senators from New Mexico. They have both been great leaders on the energy issue.

The 2005 Energy Act was a landmark accomplishment in the Congress. It set a lot of new policy with regard to energy and moved us in a direction that gets us less dependent upon foreign sources of energy and more energy independent, which I think is what this debate is all about.

I argue with respect to this amendment that it builds upon the work we did in 2005. In fact, that amendment that was talked about in 2005 which deals with those areas which are experiencing heavy grid congestion—this simply expands that designation to those corridors to include access to clean, renewable sources of energy, which I believe is what a part of this debate is all about; that is, how do we take energy sources in this country, make them more available to people across the country, and lessen the dependence on foreign sources of energy?

I use my State as a prime example. There are lots of different regulatory bodies, whether it is the Federal Energy Regulatory Commission, the Western Area Power Administration, the Midwest Independent System Operators, whether it is the Public Utilities Commission of the State of South Dakota, there is a balkanization of networks out there that has evolved over time that has created these barriers in the grid to getting power from where it is generated, where it is produced, to where it is needed. My State is a good example of that. On the border of South Dakota, we have what is called a pancaking problem where there is a stacking of fees that makes it difficult to get wind generated in South Dakota across State lines into other areas that could benefit from it.

This is fairly straightforward and consistent with the good work that was done in the Energy bill in 2005. It doesn't in any way undermine or contradict that but complements it in a way that is consistent with what our priorities should be and what our objectives are in terms of energy policy.

I appreciate the comments of both of my colleagues from New Mexico, and I yield back the remainder of my time.

Mr. BINGAMAN. Madam President, I yield back any additional time remaining in opposition.

The PRESIDING OFFICER. All time is yielded back.

The question is on agreeing to amendment No. 1609.

The amendment (No. 1609) was agreed to.

Mr. DOMENICI. Madam President, I move to reconsider the vote.

Mr. BINGAMAN. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

AMENDMENT NO. 1610

The PRESIDING OFFICER. Under the previous order, there remains 11½ minutes in support of and 15 minutes in opposition to amendment No. 1610 offered by the Senator from Maryland, Mr. CARDIN.

Who yields time? The Senator from Maryland.

Mr. CARDIN. Madam President, I yield myself 3 minutes.

The amendment I am proposing with Senators MIKULSKI, SNOWE, DODD, KERRY, REED, KENNEDY, WHITEHOUSE, BOXER, and LIEBERMAN would restore the authority of our State and local governments to protect the environment and ensure public safety with respect to the siting of liquefied natural gas—LNG—terminals within their States. This measure simply gives our States a say as to whether these kinds of facilities should be built within their boundaries and, if so, the exact location.

It amends the Rivers and Harbors Act of 1899. Under that law, the Army Corps of Engineers, acting for the Secretary of the Army, is responsible for issuing permits to anyone who wants to build a structure in and above waters of the United States. These are often called section 10 permits because that is where the provision is found in the Rivers and Harbors Act.

I wish to clarify, we are not changing the authority of the Federal Energy Regulatory Commission. Their authority to site is not changed by this amendment. What we are doing is requiring the Army Corps to work with our States before they issue their permits under the Rivers and Harbors Act. This is not about stopping LNG plants from being sited. Today, there are six in our country. One is located in my State of Maryland in the right location. This amendment is about siting LNG plants where they should be sited and having confidence in federalism and in our States. Our States will act responsibly, but they should be consulted before LNG plants are sited. That is what this amendment will do. We want to make sure they are located in the right locations.

My colleague from Rhode Island pointed out pretty vividly the concerns he has about a site up in the New England area. AES Sparrows Point LNG and Mid-Atlantic Express have proposed building a new terminal near a densely populated area of Baltimore.

That is the wrong location for an LNG plant. If we had consultation and working with the States, we would be able to site these facilities without the risk that they will be located in areas where they should not be. That is what the amendment is about. In our area, our congressional delegation, Governor O'Malley, Baltimore County Executive Jim Smith, and other local officials have all come out against this particular location because of the risk to the community, because of the risk to the environment.

This amendment is very simple. It requires the Army Corps to work with our States before an LNG license could be issued under section 10 permits. It is the right way for federalism to work. We should take advantage of each State's unique understanding of the issues it faces and make sure that expertise is considered in a meaningful way. That is why the Coastal States Organization supports this amendment. They believe it is the right sharing of how LNG plants should be sited.

I urge my colleagues to respect federalism. Respect the goodwill of our States. Respect the fact that we want LNG facilities and terminals to be located, but we want them to be located in the right location.

I yield my colleague from Maryland 5 minutes.

The PRESIDING OFFICER. The Senator from Maryland.

Ms. MIKULSKI. I thank my colleague.

I understand this is his first amendment that will be voted on in the Senate. I am proud to stand with him as he stands up for Maryland and also stands up for the fact that when we are talking about the siting of an LNG facility, those who are the most affected should have the most to say, which means the State in which it is being located. I support this amendment because it is also the right public policy and because it is the right public policy for Maryland.

I am absolutely opposed to a new LNG facility in Sparrows Point, MD. As the senior Senator from Maryland, I will do all I can to protect the people of Baltimore and to protect the Port of Baltimore. I oppose this LNG facility because of my fears and frustrations. I worry about a terrorist attack. I worry about an accident with ghoulish consequences. This is a national security issue and a community security issue, not just an energy or a budget issue.

These concerns are not mine alone. According to a GAO report, scientists and engineers have raised enormous concern about the potential hazard of an accident or an attack on LNG facilities. GAO says we don't know about the impact of an LNG accident on public safety. We are talking about possible injury and death. How can anyone make a decision on LNG without knowing the decision on public safety?

This is why I support this amendment. This amendment gives States and communities a stronger voice by making sure the Army Corps of Engineers gets the approval of the affected State before giving permits for construction for an LNG facility. That means the Governor can say: ''Hold on a minute; this is not good for my State,'' or, ''Hold on a minute; it is good for my State.''

We cannot let a Federal agency rubberstamp plans for an LNG facility. I am committed to promoting America's energy independence, but it must not compromise our national security or our neighborhood security. I want to make sure we know the consequence of what happens when an LNG facility comes to a geographic area. What can be done and should be done to review and control the plants, the docks, the ships, the crews?

I do not want permits issued and foreign-flagged tankers coming to our ports until we know key answers. I do not want permits authored by Federal agencies when our States are adamantly opposed and they are not involved in the decision making. Many States will welcome it. Some States will raise questions as we have.

It is my responsibility as a Senator to make sure we ask the right questions to protect the American people. But, most of all, we want to give the people most affected something to say.

We worry about this second LNG facility in Sparrows Point. It is 50 miles up the Chesapeake Bay. These tankers will have to pass under the Bay Bridge. My Governor is worried about the impact on the Port of Baltimore, and the people are worried about the impact on the community.

My colleague says we have another facility, and it was in the right place. Well, I am not sure it was in the right place. They built this LNG facility 3 miles away from a nuclear powerplant—3 miles away from a nuclear powerplant—but it got closed in the 1980s when the market went down. But guess what. FERC issued a permit to reopen Cove Point in a different part of the State 1 month after 9/11, and they did not ask about security concerns. It took this Senator—and then my colleague, Senator Sarbanes, and I—demanding the Department of Homeland Security get involved, demanding the Nuclear Regulatory Commission to say: Is it OK to have an LNG facility down the street? I had to force the Coast Guard to look at it from a security standpoint rather than just an environmental standpoint.

I worry about the rockfish in the bay, but I worry about the people who eat the rockfish in the bay, meaning my constituents. We finally got the reviews we needed and we moved ahead with the permit. Let me tell you, I am on the side of safety, and I believe the safest thing is to make sure the Governor has a chance to comment with the Corps and to have an expressed impact on this permit facility.

I think the Senator's policy is a wise one; it is a prudent one. It is narrowly crafted. I ask my colleagues to adopt the amendment.

I yield the floor.

The PRESIDING OFFICER (Mr. SALAZAR). Who yields time?

The Senator from New Mexico.

Mr. DOMENICI. Mr. President, how much time do we have in opposition?

The PRESIDING OFFICER. Fifteen minutes.

Mr. DOMENICI. Well, I want to take 5 minutes and yield the rest of it to Senator BINGAMAN. But I do want to make a point that this country is going to need large amounts of natural gas over the next 15, 20, 30 years. One source is probably going to be LNG, liquefied natural gas. It is terribly important for our country that we have this available when we need it, and if the price is right that we be able to locate sites that serve the United States.

Now, frankly, when we passed the Energy Policy Act, there were three or four things that were very much on the minds of those who wanted to deliver energy to the United States. I say to my new friend, the new Senator from Maryland, one of those at that particular time happened to be liquefied natural gas and those around the world who were trying to figure out whether the United States was going to be a place where they could sell liquefied natural gas or was it going to be a place where they could be held up forever.

We had to decide, as we worked through this very gigantic, gargantuan bill, what we were going to do about the concern on the part of the LNG market that if you left the law as it was, every State's Governor would have a veto power, and in some instances mayors would have veto power over an LNG site. We decided that would not work.

Now, we did not take away everyone's power. As a matter of fact, we encouraged cooperation. We encouraged the involvement of the States and the local governments with the LNG company, and we said only when you get to the point where you cannot reach agreement does the Federal Government step in, and then they backstop it and make a determination, through FERC, what is in the interest of our Nation, what is fair, and what is right.

Frankly, I don't know the facts about the Maryland plant, and I do not believe we need to know them on the floor of the Senate, nor do the Senators. What we need to know is we have a good law now on the books that gives involvement and participation to everyone who ought to have that, but it does not give a Governor veto power over the site.

I correct any implications or direct statements by my good friend, the new

Senator from Maryland. There is no question the amendment which they offer seeks veto power on the part of the Governor, gives the ultimate control to the Governor of the State as to what happens to an application. I do not believe that is what we wanted when we overwhelmingly—as the occupant of the chair has said so many times—in a bipartisan manner passed the Energy Policy Act.

I do not think we intended the first time we had a problem that somebody would come to the floor and change that wonderful law that was clear as could be, that when it came to locating LNG plants, we were not going to revert back to where we were and take the power away from FERC, the Federal agency in charge, and reinvest it in the Governor of the State.

We all know how this happens. People get disgruntled about a site, they go to the Governor, we immediately have a political tussle, and, all of a sudden, the Governor, talking to 500, 600, 700 people at a meeting, cannot get out of it, and that puts the Governor in the position where he has to say: I am not going to let that happen.

We saw that over the years. We saw it in other areas. We were bold enough in that Energy Act to change that situation, not only when it came to this kind of LNG siting but we also changed it—just a while ago we were talking about it as it pertained to the grid—the occupant of the chair might recall, where we said, if the grid gets clogged up, where you cannot get things done, we are going to actually put power in the Federal Government to use its public powers to take that gorging and dislodge it through eminent domain.

We did that, and we did other things, all in the interest of what we knew was true; that you ultimately had to let energy sources and energy grids and energy plants—you had to let the Federal Government have the last say, especially where arbitrariness on the part of the local unit was entering the picture and they wanted their way, their way under all circumstances.

I thank the Chair for being aware that I am over a moment or so, but I am now finished and have left most of the time for Senator BINGAMAN because I think he will do a good job, and maybe we will not have to have a vote. But if we do, I urge Senators not to change the law they just voted for 77 strong. Do not change it the first time we get an amendment of this nature coming before us. Leave it there for a try. Let it get tried. It is going to work. It is not going to hurt anybody.

I yield the floor.

The PRESIDING OFFICER. The Senator from New Mexico.

Mr. BINGAMAN. Mr. President, I am sympathetic to the concerns of my colleagues from Maryland, but I also rise to oppose their amendment.

Just 2 years ago, the Senate approved the Energy Policy Act of 2005 which contains this comprehensive approach to the siting of liquefied natural gas receiving terminals. In that bill, Congress gave FERC, the Federal Energy Regulatory Commission, the jurisdiction to approve the siting of LNG terminals that are located on shore.

FERC acts as the lead agency for NEPA compliance and also as a safety regulator. The combined NEPA and permitting process set forth in that legislation, EPAct 2005, fully recognizes the role of other Federal agencies and the role of State agencies acting under delegated Federal authority.

A project developer is not able to move forward unless all relevant permits are granted. FERC has addressed State concerns related to other LNG facilities through conditions placed on its approval certificate and it has denied a certificate due to safety concerns. So it is clear FERC is taking this authority and responsibility very seriously.

Moreover, this EPAct 2005 legislation also mandated the consideration of State concerns in the NEPA prefiling process which occurs very early in the siting process. The Governor of the affected State has a direct role in that process.

The Senators from Maryland describe their amendment as ''not affecting FERC authority,'' but the amendment would essentially trump FERC's authority to site the entire facility.

As my colleagues know, LNG is imported. It is delivered to this country by ship. Therefore, an absolutely essential piece of the LNG receiving facility is a place for the ship to moor and to unload its cargo; that is, a dock that is constructed in the navigable waters of the United States. The Senators' amendment would allow a Governor of an affected State—and there is a very broad definition of which States are affected; in fact, any State within 15 miles of the terminal would be an affected State under their definition—it would allow the Governor of an affected State to block the Corps' permit, Army Corps of Engineers' permit. Obviously, there is no point in building a terminal if the ship is not permitted to get near it.

Finally, all of us are aware of the high price of natural gas and the pressure that puts on electricity prices, home heating prices, and on the viability of domestic industries that rely on natural gas. The Energy Information Administration estimates that by 2030 the United States will need almost 21 billion cubic feet per day of regasified LNG to meet a total estimated demand of about 81 billion cubic feet per day. This means LNG will account for over 25 percent of our natural gas supply. We need a workable process to assure we have adequate capacity to meet this need.

So, Mr. President, for those reasons, I urge my colleagues to vote ''no'' on this amendment.

I know the Senator from Maryland wishes, I assume, to use the remainder of his time or to conclude his argument. Following that, I will yield back the remaining time in opposition.

The PRESIDING OFFICER. The Senator from Maryland is recognized.

Mr. CARDIN. Mr. President, let me thank both of my friends from New Mexico for their leadership on this bill. They have brought forward a good bill—a bill that I am proud to support and a bill that I hope will be strengthened by the amendment process and that will allow us to become energy independent because we need to for national security reasons, for economic reasons, and for environmental reasons.

But it is important that we get it right and that LNG facilities and terminals be placed in the right locations. My friend from New Mexico says this is a veto power by the State. It is not veto power by the State, no more so than you think FERC today has dictatorial powers on siting LNG plants. What my amendment is trying to do is to make sure our States work with the Federal Government and with our Federal agencies on appropriately siting LNG facilities. That is how federalism should work.

I have confidence in my Governor. He was elected by the people of Maryland. He is going to do the right thing. He makes tough decisions. We make tough decisions. But we should work together because that is the way we are going to be able to get the type of energy policy in this country that will achieve all three objectives, and that is security for energy independence, economic security, and environmental security for this country.

We need to engage our States. We should. This amendment does not change the law that was passed 2 years ago. FERC power remains the same. It amends the Rivers and Harbors Act dealing with the Army Corps of Engineers. That is what it should be; they should be consulting and working with the States before they issue their permits. This is a real problem. There are dozens of applications pending today. We will be able to site LNG plants, but let's site them in the right location. Let's not site them, as my friend from Rhode Island said, in a very sensitive part of Massachusetts or Rhode Island that literally would block recreational use and endanger communities. Let's not site them in a place right next to downtown Baltimore, which we know is going to present a risk—not just an accidental risk but a terrorist target. That is not where we should site LNG plants.

So we can get it right. We can get our energy policy right. I urge my colleagues to respect federalism, respect the fact that the States and the Federal Government should be working together on the energy policies of this

country so we truly become energy independent for the right reasons. I urge my colleagues to support the amendment.

Mr. President, I ask unanimous consent that Senator FEINSTEIN be added as a cosponsor of this amendment.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BINGAMAN. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. CARDIN. Mr. President, I ask unanimous consent the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

AMENDMENT NO. 1520, AS MODIFIED

Mr. CARDIN. Mr. President, I ask unanimous consent that my amendment No. 1520 be made the pending amendment for the purposes of modifying it, and I send a modification to the desk.

The PRESIDING OFFICER. Is there objection?

Without objection, the amendment is so modified.

The amendment as modified is as follows:

At the end of subtitle D of title II, add the following:

SEC. 255. SUPPORT FOR ENERGY INDEPENDENCE OF THE UNITED STATES.

It is the policy of the United States to provide support for projects and activities to facilitate the energy independence of the United States so as to ensure that all but 10 percent of the energy needs of the United States are supplied by domestic energy sources.

SEC. 256. ENERGY POLICY COMMISSION.

(a) ESTABLISHMENT.—

(1) IN GENERAL.—There is established a commission, to be known as the ''National Commission on Energy Independence'' (referred to in this section as the ''Commission'').

(2) MEMBERSHIP.—The Commission shall be composed of 15 members, of whom—

(A) 3 shall be appointed by the President;

(B) 3 shall be appointed by the majority leader of the Senate;

(C) 3 shall be appointed by the minority leader of the Senate;

(D) 3 shall be appointed by the Speaker of the House of Representatives; and

(E) 3 shall be appointed by the minority leader of the House of Representatives.

(3) CO-CHAIRPERSONS.—

(A) IN GENERAL.—The President shall designate 2 co-chairpersons from among the members of the Commission appointed.

(B) POLITICAL AFFILIATION.—The co-chairpersons designated under subparagraph (A) shall not both be affiliated with the same political party.

(4) DEADLINE FOR APPOINTMENT.—Members of the Commission shall be appointed not later than 90 days after the date of enactment of this Act.

(5) TERM; VACANCIES.—

(A) TERM.—A member of the Commission shall be appointed for the life of the Commission.

(B) VACANCIES.—Any vacancy in the Commission—

(i) shall not affect the powers of the Commission; and

(ii) shall be filled in the same manner as the original appointment.

(b) PURPOSE.—The Commission shall conduct a comprehensive review of the energy policy of the United States by—

(1) reviewing relevant analyses of the current and long-term energy policy of, and conditions in, the United States;

(2) identifying problems that may threaten the achievement by the United States of long-term energy policy goals, including energy independence;

(3) analyzing potential solutions to problems that threaten the long-term ability of the United States to achieve those energy policy goals; and

(4) providing recommendations that will ensure, to the maximum extent practicable, that the energy policy goals of the United States are achieved.

(c) REPORT AND RECOMMENDATIONS.—

(1) IN GENERAL.—Not later than December 31 of each of calendar years 2009, 2011, 2013, and 2015, the Commission shall submit to Congress and the President a report on the progress of United States in meeting the long-term energy policy goal of energy independence, including a detailed statement of the consensus findings, conclusions, and recommendations of the Commission.

(2) LEGISLATIVE LANGUAGE.—If a recommendation submitted under paragraph (1) involves legislative action, the report shall include proposed legislative language to carry out the action.

(d) COMMISSION PERSONNEL MATTERS.—

(1) STAFF AND DIRECTOR.—The Commission shall have a staff headed by an Executive Director.

(2) STAFF APPOINTMENT.—The Executive Director may appoint such personnel as the Executive Director and the Commission determine to be appropriate.

(3) EXPERTS AND CONSULTANTS.—With the approval of the Commission, the Executive Director may procure temporary and intermittent services under section 3109(b) of title 5, United States Code.

(4) FEDERAL AGENCIES.—

(A) DETAIL OF GOVERNMENT EMPLOYEES.—

(i) IN GENERAL.—Upon the request of the Commission, the head of any Federal agency may detail, without reimbursement, any of the personnel of the Federal agency to the Commission to assist in carrying out the duties of the Commission.

(ii) NATURE OF DETAIL.—Any detail of a Federal employee under clause (i) shall not interrupt or otherwise affect the civil service status or privileges of the Federal employee.

(B) TECHNICAL ASSISTANCE.—Upon the request of the Commission, the head of a Federal agency shall provide such technical assistance to the Commission as the Commission determines to be necessary to carry out the duties of the Commission.

(e) RESOURCES.—

(1) IN GENERAL.—The Commission shall have reasonable access to materials, resources, statistical data, and such other information from Executive agencies as the Commission determines to be necessary to carry out the duties of the Commission.

(2) FORM OF REQUESTS.—The co-chairpersons of the Commission shall make requests for access described in paragraph (1) in writing, as necessary.

Mr. CARDIN. Mr. President, I ask unanimous consent that the amendment be set aside.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. CARDIN. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. KOHL. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

AMENDMENT NO. 1519

The PRESIDING OFFICER. Under the previous order, there will now be 2 minutes of debate equally divided on amendment No. 1519 offered by the Senator from Wisconsin.

The Senator from Wisconsin is recognized.

Mr. KOHL. Mr. President, I urge my colleagues to join me and our 13 cosponsors in voting in favor of our OPEC amendment. This amendment will declare price fixing by the OPEC oil cartel illegal under our antitrust laws and will give our Government a much needed weapon to combat the illegal actions of the OPEC cartel that harms consumers every time they visit the gas pump.

Contrary to the fears of the opponents of this amendment, this amendment will not harm either our foreign relations or foreign investment in the United States. Enforcement of NOPEC is reserved exclusively to the Justice Department. Should the administration deem it imprudent to take action against NOPEC, then it need not do so. It is long past time for us to have the ability, should our Government decide to do so, to take legal action to fight back against the OPEC conspiracy on behalf of American consumers.

So I urge my colleagues to join 345 House Members who last month voted in huge numbers in favor of NOPEC.

I yield the remainder of my time.

The PRESIDING OFFICER. The Senator's time has expired.

The Senator from New Mexico is recognized.

Mr. BINGAMAN. Mr. President, since I don't see anyone else here, let me speak in opposition to the amendment.

This is one of these feel-good amendments where you can tell your constituents you struck a blow for freedom by outlawing OPEC.

The truth is, this is terrible precedent for us to say we are going to drag foreign governments into our court system and allow them to be sued for antitrust violations. We have always stopped short of doing this. The precedent would be terrible because obviously they would do the same thing with us. If we can bring foreign governments into our courts and subject them to penalties here, they can bring our Government into their courts and do the same thing. The courts have stayed away from these issues. These are diplomatic issues and political issues the courts should stay out of.

I urge my colleagues to oppose the amendment.

The PRESIDING OFFICER. All time has expired. The question is on agreeing to the Kohl amendment.

Mr. BINGAMAN. Mr. President, I ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second? There appears to be a sufficient second.

The clerk will call the roll.

The legislative clerk called the roll.

Mr. DURBIN. I announce that the Senator from Delaware (Mr. BIDEN), the Senator from Connecticut (Mr. DODD), and the Senator from South Dakota (Mr. JOHNSON) are necessarily absent.

Mr. LOTT. The following Senators are necessarily absent: the Senator from Kansas (Mr. BROWNBACK), the Senator from Oklahoma (Mr. COBURN), and the Senator from Arizona (Mr. MCCAIN).

The PRESIDING OFFICER. Are there any other Senators in the Chamber desiring to vote?

The result was announced—yeas 70, nays 23, as follows:

[Rollcall Vote No. 215 Leg.]

YEAS—70

Akaka	Feinstein	Nelson (NE)
Alexander	Graham	Obama
Baucus	Grassley	Pryor
Bayh	Harkin	Reed (RI)
Boxer	Hatch	Reid (NV)
Brown	Hutchison	Rockefeller
Bunning	Inouye	Salazar
Byrd	Isakson	Sanders
Cantwell	Kennedy	Schumer
Cardin	Kerry	Sessions
Carper	Klobuchar	Shelby
Casey	Kohl	Smith
Chambliss	Lautenberg	Snowe
Clinton	Leahy	Specter
Coleman	Levin	Stabenow
Collins	Lieberman	Stevens
Conrad	Lincoln	Tester
Corker	Martinez	Thune
Craig	McCaskill	Voinovich
Crapo	McConnell	Webb
Dorgan	Menendez	Whitehouse
Durbin	Mikulski	Wyden
Ensign	Murray	
Feingold	Nelson (FL)	

NAYS—23

Allard	Dole	Lott
Bennett	Domenici	Lugar
Bingaman	Enzi	Murkowski
Bond	Gregg	Roberts
Burr	Hagel	Sununu
Cochran	Inhofe	Vitter
Cornyn	Kyl	Warner
DeMint	Landrieu	

NOT VOTING—6

Biden	Coburn	Johnson
Brownback	Dodd	McCain

The amendment (No. 1519) was agreed to.

AMENDMENT NO. 1610

The PRESIDING OFFICER. Under the previous order, there will now be 2 minutes of debate equally divided on amendment No. 1610, offered by the Senator from Maryland, Mr. CARDIN.

Who seeks time?

The Senator from Maryland.

Mr. CARDIN. Mr. President, this amendment would restore the authority of State and local governments to protect the environment and ensure public safety with respect to siting of liquefied natural gas, LNG terminals. This measure simply gives our States a say in whether these kinds of facilities, LNG facilities, should be built within their boundaries and, if so, their exact location.

The amendment does not eliminate FERC's siting authority. It doesn't amend the FERC statute at all. It amends the Army Corps' permitting statute and requires that the Army Corps work with our States in siting LNG facilities.

The amendment is common sense, one that engages our States as partners in serious decisionmaking authority as to where an LNG plant should be located. This bill is all about securing America's future through energy independence. We need to work with our States. It should be federalism. We should respect the authorities of our States and the sincerity of our Governors, and this bill restores that type of balance so that the States are involved in protecting the environment at the location of LNG facilities.

I urge my colleagues to support the amendment.

The PRESIDING OFFICER. The Senator from New Mexico.

Mr. BINGAMAN. Mr. President, this amendment does not just allow the States to participate in the decision; this amendment would give the States the ability to veto the issuance of any permit to the Army Corps of Engineers to build a terminal and would, in that way, cut us off from needed access to international supplies of liquefied natural gas, LNG. We are going to be more and more dependent upon these liquefied natural gas supplies from overseas. We need to have these terminals constructed. We have a provision in existing law that gives us good processes for including the States, but it is important that we not change existing law.

Senator DOMENICI, did you wish to speak?

Mr. DOMENICI. Mr. President, I want to say that I wholeheartedly agree with Senator BINGAMAN. Just 2½ years ago, we decided we needed LNG so much in the future that we wanted an orderly process that did not give the Governors of each State the right to veto. This one is even broader. This gives Governors a 15-mile radius around the opportunity to veto.

I don't think we should change the law so quickly. I think we should leave it alone for a few years.

The PRESIDING OFFICER. The Senator's time has expired. The question is on agreeing to the amendment of the Senator from Maryland, Mr. CARDIN.

Mr. BINGAMAN. Mr. President, I ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second?

There is a sufficient second.

The clerk will call the roll.

The assistant legislative clerk called the roll.
