Mr. OBERSTAR, from the Committee on Transportation and
Infrastructure, submitted the following

R E P O R T

[To accompany H. Res. 832]

The Committee on Transportation and Infrastructure, to whom was referred the resolution (H. Res. 832) honoring the Texas Water Development Board on its selection as a recipient of the Environmental Protection Agency's 2007 Clean Water State Revolving Fund Performance and Innovation Award, having considered the same, report favorably thereon without amendment and recommend that the resolution be agreed to.

PURPOSE OF THE LEGISLATION

H. Res. 832 honors the Texas Water Development Board on its selection as a recipient of the Environmental Protection Agency's 2007 Clean Water State Revolving Fund Performance and Innovation Award.

BACKGROUND AND NEED FOR LEGISLATION

The Performance and Innovation in the SRF Creating Environmental Success ("PISCES") Awards were created in 2005 to recognize the extraordinary successes of the States' Clean Water Revolving Fund ("CWSRF") programs. Projects financed under the CWSRF programs support the Clean Water Act by protecting environmental health and water quality. The PISCES Awards highlight successfully designed projects that further the goal of clean and safe water with exceptional planning, management, and financing.

The PISCES Award was given to one State in each of the ten EPA regions. More specifically, the following criteria were required for nomination by regional offices: rate of greater than 80 percent at which the program is revolving and applying financial resources to achieve environmental results; audit with no serious programmatic or financial problems; and outstanding performance in

at least two other fields. The fields consisted of better management practices, full-cost pricing, efficient water use, watershed approach, creative use of technologies, leveraging practices, innovative partnerships, innovating lending practices, and effective outreach.

In Texas, a \$10.7 million Northwest Water Reuse Initiative consisted of a five-phase project in El Paso County to deliver treated wastewater for reuse to irrigators, industries, and homeowners from El Paso's Northwest Wastewater Treatment Plant. Equally noteworthy was a wastewater reclamation initiative to deliver reclaimed water from the City of Austin's Walnut Creek Wastewater Treatment Plant to two city-owned properties. The project included a treated effluent pumping station, an underground storage tank, and 54,000 feet of transmission main. It was the first step in the city's development of a transmission and distribution system capable of serving large-volume customers with reclaimed water.

SUMMARY OF THE LEGISLATION

H. Res. 832 honors the Texas Water Development Board on its selection as a recipient of the Environmental Protection Agency's 2007 Clean Water State Revolving Loan Fund Performance and Innovation Award, and states that the House of Representatives recognizes the importance of adequate investment in and management of water resources in sustainable development, including environmental integrity, human health, and overall quality of life in the United States.
