## JOINT EXPLANATORY STATEMENT OF THE COMMITTEE OF CONFERENCE

The managers on the part of the House and the Senate at the conference on the disagreeing votes of the two Houses on the amendment of the Senate to the bill (H.R. 3183) making appropriations for energy and water development for the fiscal year ending September 30, 2010, and for other purposes, submit the following joint statement to the House and Senate in explanation of the action agreed upon by the managers and recommended in the accompanying conference report.

The language and allocations set forth in House Report 111–203 and Senate Report 111–45 should be complied with unless specifically addressed to the contrary in the conference report and statement of managers. Report language included by the House which is not contradicted by the report of the Senate or the conference, and Senate report language which is not contradicted by the report of the House or the conference is approved by the committee of conference. The statement of managers, while repeating some report language for emphasis, does not intend to negate the language referred to above unless expressly provided herein. In cases where both the House report and Senate report address a particular issue not specifically addressed in the conference report or joint statement of managers, the conferees have determined that the House report and Senate report are not inconsistent and are to be interpreted accordingly. In cases in which the House or Senate have directed the submission of a report, such report is to be submitted to both the House and Senate Committees on Appropriations. Senate amendment: The Senate deleted the entire House bill after the enacting clause and inserted the Senate amendment. The conference agreement includes a revised bill.

Funds for the individual programs and activities within the accounts in this Act are displayed in the detailed table at the end of the explanatory statement for this Act. Funding levels that are not displayed in the detailed table are identified in this explanatory statement.

*Red River of the North Basin, Minnesota, North Dakota, and South Dakota.*—The conference agreement includes \$3,000,000 to continue various flood damage reduction studies in North Dakota and Minnesota. Studies are ongoing under this authority in the Fargo, North Dakota-Moorhead, Minnesota Metro area, Pembina, North Dakota, and the area upstream of Fargo, North Dakota. Additional studies of the Sheyenne River are to be undertaken to evaluate solutions to the 2009 spring flood.

*Coastal Field Data Collection.*—The conference agreement includes \$4,483,000 for this nationwide program. The Wave Data Study should also be continued within this overall funding amount. The conferees have included a portion of the climate change funding requested in the Operation and Maintenance account in this line item to ensure that this data collection effort continues.

*Flood Plain Management Services Program.*—The conference agreement includes \$8,059,000 for this nationwide program. The conferees have provided a listing in the table of projects that should be given priority if cost-sharing funds are available from the local sponsors. However, the Corps should view these amounts as guides and reprogram funds within this line item as appropriate to move these studies forward as rapidly as possible.

*Planning Assistance to States.*—The conference agreement includes \$7,161,000 for this nationwide cost-shared program. The conferees have provided a listing in the table of projects that should be given priority if cost-sharing funds are available from the local sponsors. However, the Corps should view these amounts as guides and reprogram funds within this line item as appropriate to move these studies forward as rapidly as possible.

*Research and Development.*—The conference agreement includes \$20,508,000 for the Corps' nationwide research and development programs. Some of the additional funds provided should be utilized for climate change research to be conducted in concert with the Coastal Data Information Program.

#### CONSTRUCTION

##### (INCLUDING TRANSFER OF FUNDS)

The conference agreement provides \$2,031,000,000 for Construction, instead of \$2,143,679,000 as proposed by the House and \$1,924,000,000 as proposed by the Senate.

The conferees direct the Administration to report, not later than March 31, 2010, on an updated detailed accounting of receipts into and obligations and expenditures from the Inland Waterways Trust Fund. The report shall include a list of priority projects eligible for additional funding, including the cost-benefit ratio, life-safety information, total lifecycle cost remaining, and incremental information for each project.

The allocation for projects and activities within the Construction account is shown in the following table:

/1 ITEMS REQUESTED BY THE ADMINISTRATION IN OPERATION AND MAINTENANCE

*Delaware Main Channel Deepening, Pennsylvania, New Jersey and Delaware.*—The conference agreement provides \$4,844,000 for the Delaware River Main Channel Deepening project. None of the funds provided for this project are to be used in the State of Delaware during fiscal year 2010 for any construction activities. During fiscal year 2010, the Corps is urged to work with the State of Delaware on any State of Delaware permits necessary for project construction.

*Palm Beach County, Florida.*—Within the funds provided, \$50,000 is provided for the Delray Beach segment. The balance of the funding is provided for the Boca Raton segment.

*South Florida Ecosystem Restoration, Florida.*—The conference agreement provides \$180,064,000 for this important restoration project. Within the funds provided, \$100,000 is provided each for Site 1 and the Indian River Lagoon elements of the project, consistent with the treatment of all other new start construction projects. No funds are provided for the Modified Waters Delivery project. This project should remain funded within the Interior Department.

*Chicago Sanitary and Ship Canal, Illinois.*—The conferees are concerned about the threat that harmful invasive species, such as the Asian carp, pose to the Great Lakes ecosystem. The conferees are aware that the Chicago Sanitary and Ship Canal second dispersal barrier recently went to higher operating parameters. The Corps is encouraged to continue working in conjunction with the Coast Guard on any safety testing of the electrical parameters deemed necessary.

*Olmsted Locks and Dam, Ohio River, Illinois, and Kentucky.*—The conference agreement includes \$101,521,000 to continue construction of this project. None of the funds provided for the Olmsted Locks and Dam Project or any other construction funds are to be used to reimburse the Claims and Judgment Fund.

*Missouri Fish and Wildlife Recovery, Iowa, Kansas, Missouri, Montana, Nebraska, North Dakota, and South Dakota.*—Within the funds provided, \$18,000,000 is to be used for modifications to the Intake Dam to provide additional habitat for the pallid sturgeon.

*Muddy River, Boston and Brookline, Massachusetts.*—Funding is included to continue project design and construction, including ecosystem restoration features.

*Sault Ste. Marie (Replacement Lock), Michigan.*—The Corps has identified billions of dollars in annual savings from commerce on the Great Lakes transiting the St. Lawrence Seaway, commerce that would be devastated if a failure of the existing, aging infrastructure were to occur. The Omnibus Appropriations Act of 2009 included \$17,000,000 to begin construction of a second Poe-sized lock at Sault Ste. Marie, Michigan. The conferees are deeply concerned that despite congressional support for the project, the support of the states in the region, and the fact that the Army Corps of Engineers recognizes the Soo Locks as the ‘single point of failure’ that can cripple Great Lakes shipping, the Administration has failed to include funding for a second large lock, either under the authority provided in the American Recovery and Reinvestment Act (ARRA) or in its budget request for fiscal year 2010.

*Rural Nevada, Nevada.*—The conference agreement includes \$15,000,000 for this project. Within the funds provided, the Corps should give consideration to projects at North Lemmon Valley, Spanish Springs, Indian Springs, Moapa Valley, Searchlight, Huffaker Hills Water Conservation, Lawton-Verdi, Boulder City, Lyon County, Gerlach, Incline Village, Esmeralda County, Cold Springs, Fallon, Goldfield, Churchill County, West Wendover, Yearington, Virginia Valley Water District, Lovelock, Truckee Meadows Water Authority, McGill-Ruth Consolidated Sewer and Water District, Carlin, Eldorado Valley, Ely, Pahrump, Carson City, and City of Fernley. Other communities that meet the program criteria should be considered as funding allows.

*North Dakota [EI], North Dakota.*—The conference agreement includes \$15,000,000 for this program. \$7,900,000 is for the Traill Rural Water District; \$3,000,000 is for the North Central Rural Water District; \$950,000 is for the Barnes Rural Water District; \$750,000 is for the Williams Rural Water District; \$600,000 is for the Langdon Rural Water District; \$425,000 is for the North Prairie Rural Water District; and \$375,000 is for the Greater Ramsey Water District.

*Levisa and Tug Forks and Upper Cumberland River, West Virginia, Kentucky, and Virginia.*—The conference agreement includes \$16,250,000 for the continuation of the project. Within the funds provided, \$4,000,000 is included for the Buchanan County, Dickenson County, and Grundy, Virginia elements. Further, the conferees include \$2,750,000 for Kermit, Lower Mingo County, McDowell County, Upper Mingo, and Wayne County, West Virginia. Within the funds, \$9,500,000 is provided for the State of Kentucky, including not less than \$3,000,000 for the Town of Martin.

*Continuing Authorities Program.*—The Corps shall give first priority to the projects listed in the tables in this report. The management of the program should continue consistent with the guidelines outlined in the Omnibus Appropriations Act of 2009.

#### MISSISSIPPI RIVER AND TRIBUTARIES

The conference agreement provides \$340,000,000 for Mississippi River and Tributaries, as proposed by the Senate, instead of \$251,375,000 as proposed by the House.

#### OPERATION AND MAINTENANCE

The conference agreement provides \$2,400,000,000 for Operation and Maintenance, instead of \$2,510,971,000 as proposed by the House and \$2,450,000,000 as proposed by the Senate. The Act includes legislative language proposed by the Senate directing the Corps to allocate no more than 99 percent of the funds provided in this Act for Operation and Maintenance prior to the fourth quarter. This measure is intended to allow Headquarters flexibility to respond to national emergencies.

/1 ITEMS FUNDED IN CONSTRUCTION

*Michigan Harbor Dredging, Michigan.*—The conference agreement includes \$6,000,000 for this line item to provide for the dredging needs of the State as well as several individual projects. All of the harbors and waterways that are eligible for this funding are listed in the table under this heading, including those for which a specific amount is provided. The Corps is directed to propose a dredging program for fiscal year 2010 that would most effectively utilize the scarce funds available for these harbors.

*Cheyenne River Sioux Tribe, Lower Brule Sioux, South Dakota.*—The conference agreement includes \$3,000,000 in accordance with the requirements of title VI of the Water Resources Development Act of 1999 to protect cultural resource sites and provide funding to the State and tribes for approved restoration and stewardship plans. The Corps is directed to contract with or reimburse the State of South Dakota and affected tribes for performance of these duties.

*Chinook, Head of Sand Island, and Baker Bay, Washington.*—The conferees note the proximity of Corps navigation facilities on the Columbia River between Chinook and the Head of Sand Island, Washington, and at Baker Bay, Washington. The conferees encourage the Corps of Engineers to seek ways to achieve cost savings and efficiency, such as by utilizing appropriate contracting methods while having these two projects considered together when seeking bids and awarding contracts. \$1,445,000 is included for dredging at these harbors.

*National Coastal Mapping.*—\$10,000,000 is included for this program. \$5,000,000 of these funds are for LIDAR bathymetry for use in regional sediment management and for Coastal Zone Mapping and Imaging LIDAR/LASER to be conducted with the University of Southern Mississippi.

*Reserve for Key Emergency Maintenance/Repairs.*—The conference agreement includes no funding for this item. The conferees believe it is critical for Corps Headquarters to retain a maintenance reserve. Therefore, a proviso in the Operation and Maintenance section of the Act is included to address this need.

### TITLE III

#### DEPARTMENT OF ENERGY

The summary tables at the end of this title set forth the Act with respect to the individual appropriations, programs, and activities of the Department of Energy. Additional items in the Act are discussed below.

The conference agreement provides \$27,111,438,000 for the Department of Energy, instead of \$26,876,350,000 as proposed by the House and \$27,398,221,000 as proposed by the Senate, to fund programs in its five primary mission areas: science, energy, environment, nuclear non-proliferation and national security.

The conferees direct the Department to submit to the House and Senate Committees on Appropriations, within 60 days of enactment of this Act, a report included in the House report detailing an implementation and progress measurement plan for each funded Energy Innovation Hub. The conference agreement does not include the subsequent progress report proposed by the House for each Energy Innovation Hub.

The conferees direct the department to submit to the House and Senate Committees on Appropriations an annual report on the status of work for others activities in each of the national laboratories, instead of the quarterly report included in the House bill. The conferees recognize the value of the scientific capability that resides at our nation's laboratories and the importance of work for others at the national laboratories, particularly in light of the National Nuclear Security Administration's intention of moving to a National Security Enterprises business model. Work for others can be a mechanism to both maintain expertise and refine technical capabilities, and this work could be leveraged more effectively if performed in a strategic context rather than an ad hoc fashion. Given the importance of work for others in a time of tight budgetary constraints, the conferees believe the Department should critically examine how and when work for others is in the long-term interests of the national laboratories. The Department should outline a strategy and procedures to maximize the utilization of the unique scientific expertise of the laboratories while providing a rational financial basis for the acceptance of such work.

The Department is directed to submit an annual Financial Balance report by May 30, 2010, instead of the semi-annual report included in the House bill.

## REPROGRAMMING REQUIREMENTS

The Department of Energy is directed to operate in a manner fully consistent with the following reprogramming guidelines. A reprogramming request must be submitted to the House and Senate Committees on Appropriations for consideration before any implementation of a reorganization proposal which includes moving previous appropriations between appropriation accounts. The Department is directed to inform the Committees promptly and fully when a change in program execution and funding is required during the fiscal year. To assist the Department in this effort, the following guidance is provided for programs and activities funded in the Energy and Water Development and Related Agencies Appropriations Act. The Department is directed to follow this guidance for all programs and activities unless specific reprogramming guidance is provided for a program or activity.

*Definition.*—A reprogramming includes the reallocation of funds from one activity to another within an appropriation, or any significant departure from a program, project, activity, or organization described in the agency's budget justification as presented to and approved by Congress. For construction projects, a reprogramming constitutes the reallocation of funds from one construction project identified in the justifications to another project or a significant change in the scope of an approved project.

Any reallocation of new or prior year budget authority or prior year de-obligations must be submitted to the House and Senate Committees on Appropriations in writing and may not be implemented prior to approval by the Committees.

## ENERGY PROGRAMS

### ENERGY EFFICIENCY AND RENEWABLE ENERGY

The conference agreement provides \$2,242,500,000 for Energy Efficiency and Renewable Energy (EERE) programs, instead of \$2,310,000,000 as proposed by the House and \$2,233,967,000 as proposed by the Senate.

*Reporting Requirements.*—The conference agreement does not include a reporting requirement proposed by the House to quantify and track the progress and impact of investments made in the energy efficiency and renewable energy portfolio.

*Hydrogen Technology.*—The conference agreement provides \$174,000,000 for Hydrogen Technology, instead of \$190,000,000 as proposed by the Senate. The House proposed \$153,213,000 for hydrogen and fuel cell technologies under the Fuel Cell Technology and Vehicle Technologies program areas.

These funds shall be used to further program goals with new contracts and continue funding 190 contracts the Department placed at risk in fiscal year 2010 by requesting zero funding for this program. Additionally, fuel cell technology can continue to be pursued under the Hydrogen Technology program in fiscal year 2010 as it has been in the past.

*Fuel Cell Technology.*—The conference agreement provides no funding for Fuel Cell Technology.

*Biomass and Biorefinery Systems Research and Development.*—The conference agreement provides \$220,000,000.

*Wind Energy.*—The conference agreement provides \$80,000,000 for wind energy systems, instead of \$70,000,000 as proposed by the House and \$85,000,000 as proposed by the Senate.

*Geothermal Technology.*—The conference agreement provides \$44,000,000 for geothermal systems.

*Water Power.*—The conference agreement provides \$50,000,000 for Water Power. The conferees direct the Department to apply all of the available increase over the request to expand marine and hydrokinetic research, development, and deployment. Within available funds, the conferees further direct the Department to validate economic and technical viability of a variety of technologies and to provide a written report to the House and Senate Committees on Appropriations on the prospect of each of the technologies. This report shall include the Department's research and development priorities and goals for this program for the next five years.

The conferees direct the Department to utilize its only marine sciences laboratory to undertake a research and development program to expand marine and hydrokinetic renewable energy programs consistent with section 633 of EISA 2007.

The conferees provide not more than \$3,500,000 from within available funds to identify opportunities to increase power generation at conventional hydropower sites. The conferees encourage the Department to focus the assessment on sites not owned by Federal entities.

*Vehicle Technologies.*—The conference agreement provides \$311,365,000 for Vehicle Technologies.

The conference agreement does not include \$40,000,000 for hydrogen transportation systems in the Vehicle Technologies program, as proposed by the House.

Within available funds, \$2,200,000 is provided to the vehicles program for the Department to contract with the National Academy of Sciences to conduct a comprehensive analysis of energy use within the light-duty vehicle transportation sector, and use the analysis to conduct an integrated study of the technology and fuel options that could reduce petroleum consumption and greenhouse gas emissions.

The conferees provide up to \$7,500,000 for coordination with the Biomass program to expand and accelerate testing of intermediate fuel blends of ethanol and gasoline, as proposed by the Senate.

The conference agreement does not include a study on the variety and density of recharging infrastructure options, as proposed by the Senate.

The conference agreement includes \$5,000,000 for natural gas vehicle research and development.

*Building Technologies.*—The conference agreement provides \$200,000,000 for Building Technologies. No funds are provided under this heading for the Energy Efficient Building Systems Design Energy Innovation Hub. From within available funds, the conferees provide \$27,000,000 for solid state lighting research and development.

*Industrial Technologies.*—The conference agreement includes \$96,000,000 for Industrial Technologies. From within available funds, the conferees provide \$500,000 for a comprehensive awareness campaign and training program on how mechanical insulation can improve energy efficiency.

*Federal Energy Management Program.*—The conference agreement provides \$32,000,000 for the Federal Energy Management Program.

*RE-ENERGYSE.*—The conference agreement provides no funding for RE-ENERGYSE.

*Facilities and Infrastructure.*—The conference agreement provides \$63,000,000 for facilities and infrastructure, of which \$44,000,000 is provided for the South Table Mountain Ingress/Egress and Traffic Capacity Upgrades project at the National Renewable Energy Laboratory. The conferees agree with and restate Senate language supporting the use of American Recovery and Reinvestment Act (ARRA) funding for these traffic capacity upgrades. If the Department uses ARRA funds for this project, the conferees support the use of this \$44,000,000 to fund the proposed Fuels from Sunlight and Energy Efficient Building Systems Design Energy Innovation Hubs at \$22,000,000 each.

*Program Direction.*—The conference agreement provides \$140,000,000 for Program Direction.

*Program Support.*—The conference agreement provides \$45,000,000 for Program Support. Within these funds, the Department is directed to provide \$10,000,000 for the International Renewable Energy Program, to include \$2,000,000 for the U.S.-Israeli energy cooperation agreement.

While the conferees support strategic and policy analysis capabilities within the Department to guide investment decisions and support policymaker decisions, these capabilities should be located in the Department-wide policy office rather than within each program office.

The conferees also agree with the importance of commercialization efforts to ensure that innovations within national and other research laboratories enter the marketplace. Therefore, the conferees encourage the Department to develop an agency-wide commercialization strategy and capability rather than developing piecemeal solutions within individual program offices.

*Weatherization Assistance.*—The conference agreement provides \$210,000,000 for weatherization assistance program grants, of which \$3,300,000 shall be for training and technical assistance.

The conference agreement provides \$30,000,000 from within available funds for the development of a pilot project that would increase the leverage of Federal funding through the formation of partnerships between the Department and traditional and/or non-traditional weatherization providers.

The conference agreement does not include funding to develop a pilot program demonstrating energy savings through use of improved insulating and sealing in homes built prior to 1980.

*State Energy Program.*—The conference agreement provides \$50,000,000 for the State Energy Program.

*Tribal Energy Activities.*—The conference agreement provides \$10,000,000 for Tribal Energy Activities.

*Congressionally Directed Projects.*—The conference agreement provides \$292,135,000 for the following congressionally directed projects and activities. The agency should remind recipients that statutory cost-sharing requirements may apply to these projects.

## STRATEGIC PETROLEUM RESERVE

The conference agreement provides \$243,823,000 for the Strategic Petroleum Reserve, including \$25,000,000 for expansion activities at the Richton, Mississippi, site.

## NORTHEAST HOME HEATING OIL RESERVE

The conference agreement provides \$11,300,000 for the Northeast Home Heating Oil Reserve as proposed by the House and Senate.

## ENERGY INFORMATION ADMINISTRATION

The conference agreement provides \$110,595,000 for the Energy Information Administration as proposed by the Senate, instead of \$121,858,000 as proposed by the House.

## NON-DEFENSE ENVIRONMENTAL CLEANUP

The conference agreement provides \$244,673,000 for Non-Defense Environmental Cleanup, instead of \$237,517,000 as proposed by the House and \$259,829,000 as proposed by the Senate.

*Gaseous Diffusion Plants.*—The conference agreement provides \$100,885,000 for the Gaseous Diffusion Plants. The conferees are aware that the Department intends to complete testing and initiate full operations on both facilities in this fiscal year. The conferees expect the Department to utilize its reprogramming authority as necessary to maintain this schedule.

*Internal Reprogramming Authority.*—In fiscal year 2010, the Department may transfer up to \$2,000,000 between programs within the Non-Defense Environmental Cleanup accounts to reduce health or safety risks or to gain cost savings, as long as no program or project is increased or decreased by more than \$2,000,000 during the fiscal year. The House and Senate Committees on Appropriations must be notified within thirty days of the use of this reprogramming authority. The account control points for reprogramming are the Fast Flux Test Reactor Facility, West Valley Demonstration Project, Gaseous Diffusion Plants, Small Sites, and construction line-items.

## URANIUM ENRICHMENT DECONTAMINATION AND DECOMMISSIONING FUND

The conference agreement provides \$573,850,000 for activities funded from the Uranium Enrichment Decontamination and Decommissioning Fund, instead of \$559,377,000 as proposed by the House and \$588,322,000 as proposed by the Senate. The conference agreement includes \$225,000,000 for Oak Ridge, Tennessee, \$116,446,000 for Paducah, Kentucky, and \$232,404,000 for Portsmouth, Ohio. The conferees have adjusted the funding levels in re-

sponse to the Department's decision to expand ongoing cleanup activities at Portsmouth, despite the fact that this work was not proposed in the President's budget request. The Department has proposed that this expanded cleanup work is to be financed with an off-budget barter strategy for federal uranium assets. Based on the Department's limited experience with such transactions and the fact that the Congressional Budget Office estimates the Department will only achieve 55 percent of its deficit reduction targets from uranium sales in fiscal year 2010, the conferees have serious concerns regarding the Department's ability to successfully implement this proposal. The conferees direct the Government Accountability Office (GAO) to undertake a review of the Department's oversight and implementation strategy to ensure that the Department executes this program consistent with section 3112 of the USEC Privatization Act (42 U.S.C. section 2297h-10). In addition, the conferees request that GAO's review include an evaluation of the Department's overall uranium management plan and an assessment of the Department's success or failure in meeting its existing deficit reduction targets utilizing asset sales, including sales of Departmental stockpiles of uranium, nickel, and other materials surplus to its needs.

## SCIENCE

The conference agreement includes funding for nuclear medicine application research in Biological and Environmental Research.

The conference agreement includes not less than \$19,200,000 for Isotope Development and Production for Research and Applications, University Operations. The conferees have concerns regarding the state of isotope production in the United States for medical and industrial applications. The conferees support the House and Senate language regarding cost-effectively improving the supply of these isotopes, including through utilizing existing sources and upgrading existing research reactors or accelerators.

*Biological and Environmental Research.*—The conference agreement provides \$604,182,000 for Biological and Environmental Research. Within these funds, the conferees direct the Department to provide \$17,500,000 for nuclear medicine application research.

*Basic Energy Sciences.*—The conference agreement provides \$1,636,500,000 for Basic Energy Sciences. Within these funds, the conference agreement provides \$22,000,000 for EPSCOR, and directs the limit of one Implementation Grant per EPSCOR state be removed and the cap on the maximum allowable award be increased to \$2,500,000. The conference agreement provides no funds for an Energy Innovation Hub within the Office of Science. Further, the conferees include funding as requested for the Spallation Neutron Source and the High Flux Isotope Reactor.

*Advanced Scientific Computing Research.*—The conference agreement provides \$394,000,000 for Advanced Scientific Computing Research.

The House proposed \$20,000,000 for the laser fusion program at the Naval Research Laboratory (NRL). It also directed the Department of Energy to report to the House and Senate Committees on Appropriations on the potential of the KrF laser for commercial fusion. The Senate provided no comparable direction. The conference agreement includes no explicit funding for NRL and supports the House reporting requirement. This report is due not later than 60 days following enactment of this Act. The conferees encourage the Secretary to explore all possible opportunities to ensure that this program, which offers unique potential for long-term energy independence, is not abandoned for lack of a bureaucratic home.
