H. RES. 72

As directed by H. Res. 72 (reprinted below), which was adopted by a vote of the House of 391-to-28 on February 11, 2011, the Committee on Natural Resources is reviewing “existing, pending and proposed regulations, orders, and other administrative actions or procedure by agencies of the Federal government” within the Committee’s jurisdiction. Following is a chart summarizing hearings, both oversight and legislative, that were either focused upon, or involved, such review efforts, as well as additional actions taken through December 15th in response to the Resolution. The Committee’s work relating to H. Res. 72 actively continues.

HRES 72 EH

H. Res. 72
In the House of Representatives, U. S.,
February 11, 2011.

Resolved, That each standing committee designated in section 3 of this resolution shall inventory and review existing, pending, and proposed regulations, orders, and other administrative actions or procedures by agencies of the Federal Government within such committee's jurisdiction. In completing such inventory and review, each committee shall consider the matters described in section 2. Each committee shall conduct such hearings and other oversight activities as it deems necessary in support of the inventory and review, and shall identify in any report filed pursuant to clause 1(d) of rule XI for the first session of the 112th Congress any oversight or legislative activity conducted in support of, or as a result of, such inventory and review.

SEC. 2. MATTERS FOR CONSIDERATION.

In completing the review and inventory described in the first section of this resolution, each committee shall identify regulations, executive and agency orders, and other administrative actions or procedures that—

- (1) impede private-sector job creation;
- (2) discourage innovation and entrepreneurial activity;
- (3) hurt economic growth and investment;
- (4) harm the Nation's global competitiveness;
- (5) limit access to credit and capital;
- (6) fail to utilize or apply accurate cost-benefit analyses;
- (7) create additional economic uncertainty;
- (8) are promulgated in such a way as to limit transparency and the opportunity for public comment, particularly by affected parties;
- (9) lack specific statutory authorization;
- (10) undermine labor-management relations;
- (11) result in large-scale unfunded mandates on employers without due cause;
- (12) impose undue paperwork and cost burdens on small businesses; or
- (13) prevent the United States from becoming less dependent on foreign energy sources.

SEC. 3. COMMITTEES.

The committees referred to in the first section of this resolution are as follows:

- (1) The Committee on Agriculture.
- (2) The Committee on Education and the Workforce.
- (3) The Committee on Energy and Commerce.
- (4) The Committee on Financial Services.
- (5) The Committee on the Judiciary.

APPENDIX VII

VIEWS

ADDITIONAL VIEWS

During the 2011 session of the 112th Congress, the Committee on Natural Resources has been focused on creating new American jobs, responsibly expanding access to our U.S. energy resources and providing critical oversight of the policies and regulations imposed by the Obama Administration and Executive Branch agencies.

Since taking office, the Obama Administration has chosen to impose regulation after regulation and policy after policy on American families and small businesses that are impeding economy recovery and growth. These federal policies, which delay or outright block access to our country's natural resources, send American jobs overseas, forfeit new government revenue and increase our reliance on foreign countries.

Under Republican leadership, the Committee has had an extremely active year advancing common sense solutions to help meet some of our Nation's biggest problems. In stark contrast to the Pelosi-run Congress, we understand that higher taxes, onerous regulations and massive stimulus spending are not the way to get our country back on track. The Committee on Natural Resources has passed dozens of bipartisan bills and conducted over one hundred oversight hearings which have primarily been aimed at responsibly harnessing our natural resources and cutting bureaucratic red tape in order to tackle high unemployment and our federal debt and deficit.

The Committee has conducted oversight on a variety of topics including offshore drilling, onshore energy production, renewable energy development, proposed mining regulations, the President's new restrictive ocean policy, the Endangered Species Act, the man-made California drought, the Wild Lands Secretarial Order, new Wilderness proposals, securing our border on federal lands, protecting taxpayers from risky Stimulus Act loans by the Western Area Power Administration, and numerous other issues that impact Americans across the country.

Specifically, the Committee on Natural Resources has been aggressive in taking action to expand American energy production in order to create jobs, boost our economy and strengthen our national security. In the first few months of the new Congress, the Committee approved and advanced through the House three bipartisan bills that would directly reverse Obama Administration actions that are blocking access to our energy resources. The bills would end the de facto moratorium in the Gulf, resume offshore lease sales that have been delayed or canceled and lift the President's effective ban on new offshore drilling. Together, these three bills would create over 1.2 million jobs and generate \$800 million in new revenue.

The Committee also considered a wide-variety of additional American energy legislation throughout the course of the year.

With bipartisan support, the Committee advanced a package of renewable energy bills to facilitate wind, solar and geothermal development on federal lands and waters, approved a bill to reorganize the Interior Department's offshore energy agencies in order to promote safety and efficiency, and secured House passage of a bill to unlock the third largest copper resource in the world and create thousands of jobs.

The Committee also conducted oversight on a number of energy-related issues including opening a small portion of the Arctic National Wildlife Refuge, encouraging the production of oil shale, developing a revenue sharing proposal for coastal states, lingering economic impacts in the Gulf of Mexico, and the Administration's scheme to rewrite the stream buffer zone rule that could cost thousands of coal jobs.

This fall, the Committee on Natural Resources also began oversight hearings on two important issues: the President's plans to zone the oceans and the Endangered Species Act.

The President's new National Ocean Policy is one more example of this Administration imposing burdensome federal regulations and policies that could destroy American jobs and hinder economic growth. This policy requires a new federal initiative called Marine Spatial Planning, otherwise known as ocean zoning, which could place huge portions of our oceans off-limits to recreation, energy production, transportation, and other commercial activities. Ocean zoning could also reach far inland and impact jobs and economic activities hundreds of miles from the coastline.

In December, the Committee held the first hearing in series that will take a fair look at the ways in which the Endangered Species Act is working well and areas where it could be improved and updated. After two decades, it's past time to update and modernize the ESA to once again focus it on species recovery instead of debilitating lawsuits that costs jobs and delay economic growth.

In the second half of the 112th Congress, the Committee on Natural Resources will continue our commitment to job creation and economic growth while maintaining strong oversight over the Obama Administration's policies and actions. The Committee will continue to advance an all-of-the-above energy approach and work to protect the American people's access to their own land and resources.

DOC HASTINGS,
Chairman.

DISSENTING VIEWS

In the Committee Activities Report submitted in July we noted that, “Bipartisan cooperation on renewable energy development, balanced resource management, and scientific research could result in a future activities report documenting real progress.” Unfortunately, this full-year report documents the Majority’s all too frequent rejection of genuine bipartisan cooperation and a resulting lack of accomplishment.

This report catalogues an aggressive hearing schedule. The Committee is on pace to hold more than twice as many hearings this Congress as last; that is a commendable achievement. A close reading of the report, however, reveals that a large number of these hearings consisted of redundant attempts to launch partisan attacks on the drilling safety reforms put in place by the Obama Administration in the aftermath of the BP Deepwater Horizon offshore drilling disaster, combined with advocacy for virtually unlimited oil and gas drilling on federal lands and in federal waters. At the Full Committee, fully 22 of the 27 hearings held this year were on energy production, many featuring prejudicial titles and witness panels stacked with oil and gas industry representatives.

This repetitive, single-minded, focus on drilling has operated to the exclusion of constructive discussion of cleaner, more sustainable energy sources, not to mention the broad array of non-energy related matters within the Committee’s jurisdiction. Perhaps most harmful is the Committee’s inability to more fully engage in legitimate, objective oversight due to the frequency of drilling advocacy activities.

Further, as a result of the Majority’s misplaced priorities, the Committee’s legislative activity has slowed to a crawl. To date, 31 bills referred to the House Natural Resources Committee have been approved by the House. This is a fraction of the 100 Committee bills passed by the House during the first session of the 111th Congress and the 125 Committee bills passed by the House during the first session of the 110th Congress. Even former Chairman Pombo took time from efforts to undermine the National Environmental Policy Act and Endangered Species Act to shepherd 81 Committee measures through the House in the first session of the 109th Congress.

The current Majority seems to view legislative activity with suspicion and the rules and protocols established by the Majority have worked to slow the Committee’s ability to process legislation. That is unfortunate given the enormous demand among Members of Congress for consideration of natural resource bills supporting their local economies and improving quality of life for their constituents.

Clearly, some portion of the Committee’s agenda is rightly dedicated to discussing the Majority’s vision for this nation’s natural re-

source future. As this activity report documents, however, the Majority's vision is so one-dimensional, and has been promoted so exclusively, that the Committee has largely abdicated its responsibility to respond to the legislative priorities of House Members. As we did in July, we reiterate our desire for more bi-partisan cooperation on the wide array of significant issues within the Natural Resources Committee's jurisdiction and the many important pieces of legislation pending before us.
