PURPOSE AND SUMMARY

H.R. 3922 was introduced on October 3, 2017, by Representative Greg Walden (R–OR). The bill extends federal funding for important public health priorities, including Community Health Centers, the Special Diabetes Programs, the National Health Service Corps, the Teaching Health Center Graduate Medical Education Program, Family-to-Family Health Information Centers, the Youth Empowerment Program, and the Personal Responsibility Education Program.

BACKGROUND AND NEED FOR LEGISLATION

On September 30, 2017, the funding for several important programs authorized under the Public Health Service Act expired. These critical programs, such as the Community Health Centers program and the Special Diabetes Program, have helped to reduce costs, improve health outcomes, and deliver cost-effective care. Programs like the National Health Service Corps and the Teaching Health Center Graduate Medical Education Program play a critical role in training and placing primary care providers in underserved areas.

COMMITTEE ACTION

The Committee on Energy and Commerce has not held hearings on the legislation.

On October 4, 2017, the full Committee on Energy and Commerce met in open markup session and ordered H.R. 3922, as amended, favorably reported to the House by a recorded vote of 28 yeas and 23 nays.

COMMITTEE VOTES

Clause 3(b) of rule XIII requires the Committee to list the record votes on the motion to report legislation and amendments thereto.

The following reflects the record votes taken during the Committee consideration:

Hon. GREG WALDEN,

House of Representatives, Washington, DC.*

DEAR MR. CHAIRMAN: The Congressional Budget Office has prepared the enclosed cost estimate for H.R. 3922, the CHAMPION Act of 2017.

Sincerely,

KEITH HALL,
Director.

Enclosure.

H.R. 3922—CHAMPION Act of 2017

Summary: H.R. 3922 would extend funding for Community Health Centers and several other public health programs for two years, through 2019. It also would shorten the grace period during which premiums can be paid and reduce funding available for the Prevention and Public Health Fund. On net, CBO estimates that implementing the legislation would reduce the deficit by \$1.4 billion over the 2018–2027 period.

Enacting H.R. 3922 would affect direct spending and revenues; therefore, pay-as-you-go procedures apply.

CBO estimates that enacting H.R. 3922 would not increase net direct spending or on-budget deficits in one or more of the four consecutive 10-year periods beginning in 2028.

H.R. 3922 contains no intergovernmental or private-sector mandates as defined in the Unfunded Mandates Reform Act (UMRA).

Estimated cost to the Federal Government: The estimated budgetary effect of H.R. 3922 is shown in the following table. The costs of this legislation fall within budget functions 550 (health) and 500 (education, training, employment, and social services).

Notes: Components may not add to totals because of rounding; GME = Graduate Medical Education; PREP = Personal Responsibility Education Program; QHP = Qualified Health Plan.

Basis of estimate: For this estimate, CBO assumes that H.R. 3922 will be enacted near the start of calendar year 2018. Estimated outlays are based on historical spending patterns for the affected programs.

Extension of expiring provisions

H.R. 3922 would extend several public health provisions that would otherwise expire under current law. In total, CBO estimates that enacting those extensions would increase federal spending by about \$8.9 billion over the 2018–2027 period. The budget authority for those extensions include:

- \$3.6 billion per year in 2018 and 2019 for the Community Health Center Fund, which provides grants to health centers that can be used for infrastructure, management, training, and other expenses related to providing health care services;
- \$310 million per year in 2018 and 2019 for the National Health Service Corps, which funds scholarships for primary care providers that serve in underserved communities;
- \$263 million in 2018 and \$300 million in 2019 for the Special Diabetes Program, which funds research on the prevention and cure of type 1 diabetes at the National Institutes of Health and funds diabetes treatment and prevention programs for American Indians through Indian Health Service, Tribal, and Urban Indian health providers;
- \$111.5 million in 2018 and \$126.5 million in 2019 for the Teaching Health Center Graduate Medical Education program, which supports training for medical and dental residents in primary care settings;
- \$75 million per year for 2018 and 2019 for the Youth Empowerment Program (known as the Abstinence Education program under current law), which funds education on avoiding sexual risk;
- \$75 million per year for 2018 and 2019 for the Personal Responsibility Education Program, which funds youth education about abstinence, contraception, and topics to prepare youth for adulthood; and
- \$6 million per year for 2018 and 2019 to fund the Family-to-Family Health Information Centers, which support families of children with special health care needs.

Qualified health plan grace period requirements

Under current law, people who enroll in subsidized health insurance purchased through a marketplace established under the Affordable Care Act (ACA) and pay the premium for at least their first month of coverage are granted a grace period of three months if they miss a subsequent payment. If they pay their premiums in full during that grace period, their coverage continues normally. If, at the end of three months, they have not made their premium payments, their coverage is terminated retroactively to the end of the first month of their grace period.

H.R. 3922 would shorten the grace period to one month unless a state sets a different one. CBO and the staff of the Joint Committee on Taxation (JCT) estimate that many people who, under current law, would have paid their delinquent premiums during the second or third month of their grace period would instead have

their coverage terminated under this bill. CBO and JCT estimate that the subsidies those people would have received for coverage during the remainder of the calendar year would no longer be paid, resulting in a reduction in the federal deficit. In addition, some of those people who became uninsured would pay a penalty for not maintaining health insurance coverage under provisions known as the individual mandate, which would increase revenues. Based on information from states, insurers, surveys, and the Department of Health and Human Services, CBO and JCT estimate that fewer than 500,000 people would have their coverage terminated at some point each year. As a result, CBO and JCT estimate that this provision would reduce the deficit by about \$4.9 billion over the 2018–2027 period; that estimated savings includes about \$4.2 billion in reduced outlays and about \$700 million in increased revenues.

Prevention and Public Health Fund

The legislation would reduce funding available to the Prevention and Public Health Fund. The Department of Health and Human Services awards grants through that fund to public and private entities to carry out prevention, wellness, and other public health activities. Under current law, annual funding available for these purposes totals \$900 million in 2018, and rises to \$2.0 billion in 2027 and each year thereafter. Over the 2019–2026 period, the legislation would reduce that funding by \$6.3 billion. CBO estimates that enacting the provision would reduce direct spending by \$5.5 billion over the 2018–2027 period.

Pay-As-You-Go considerations: The Statutory Pay-As-You-Go Act of 2010 establishes budget-reporting and enforcement procedures for legislation affecting direct spending or revenues. The net changes in outlays and revenues that are subject to those pay-as-you-go procedures are shown in the following table.

Increase in long-term direct spending and deficits: CBO estimates that enacting the legislation would not increase net direct spending or on-budget deficits in any of the four consecutive 10-year periods beginning in 2028.

Intergovernmental and private-sector impact: H.R. 3922 contains no intergovernmental or private-sector mandates as defined in UMRA.

Estimate prepared by: Federal costs: Kate Fritzsche, Jennifer Gray, Emily King, Lisa Ramirez-Branum, Robert Stewart, and Ellen Werble and the staff of the Joint Committee on Taxation; intergovernmental and private-sector impact: Amy Petz.

Estimate approved by: Holly Harvey, Deputy Assistant Director for Budget Analysis.

SECTION-BY-SECTION ANALYSIS OF THE LEGISLATION

Section 1. Short title

Section 1 provides that the Act may be cited as the “Community Health And Medical Professionals Improve Our Nation Act of 2017” or the “CHAMPION Act”.

Section 2. Table of contents

Section 2 lists the table of contents.

Section 101. Extension for community health centers and the National Health Service Corps

Section 101 extends the funding for Community Health Centers and the National Health Service Corps (NHSC) for two years, at \$3.6 billion a year for Community Health Centers, and \$310 million a year for the NHSC.

In addition, section 101 includes technical and programmatic changes that improve the health centers ability to function in the modern health care landscape. Specifically, this section provides the Health Resources and Services Administration (HRSA) with explicit authority to make supplemental awards to Health Centers focused on quality improvement, and to make grants for New Access Points and Expanded Services. It clarifies the focus on unmet need and extends the current rural to urban statutory ratio guardrails for New Access Points and Expanded Services.

This section adds homeless veterans and veterans at risk of homelessness to the list of focus populations for grants focused on care to the homeless. It provides \$25 million for health centers to participate in the All of Us Research Program, an effort to accelerate health research and medical breakthroughs by creating the most diverse biomedical data resource in history. It requires health centers to consult and collaborate with existing local providers, programs and agencies with respect to the services and programs offered by a new site, and it requires health centers to have written policies and procedures around appropriate use of federal funds to ensure that the center is operated in compliance with applicable federal laws and regulations.

Finally, this section provides the legal authority for HRSA to require direct employment of health center CEOs and Executive Directors.

Section 102. Extension for special diabetes programs

Section 102 extends the funding for two years for the Special Diabetes Program for Type 1 Diabetes and the Special Diabetes Program for Indians at \$150 million a year each.

Section 103. Reauthorization of program of payments to teaching health centers that operate graduate medical education programs

Section 103 extends the funding for the Teaching Health Center Graduate Medical Education Program for two years, at \$126.5 million a year.

Section 104. Extension for family-to-family health information centers

Section 104 extends the Family-to-Family Health Information Center program for two years at \$6 million a year. This section also establishes Family-to-Family Health Information Centers in all of the territories and for the Indian tribes.

Section 105. Youth empowerment program; personal responsibility education

Section 105 extends the Personal Responsibility Education Program for two years at \$75 million a year. This section also renames the Abstinence Education Program as the Youth Empowerment Program (PREP) and extends its funding for two years at \$75 million a year. In addition, section 105 includes technical and programmatic changes to the Youth Empowerment Program, that better reflects the intent of the program to empower youth to make healthy decisions, resist sexual risk, and set goals for the future.

Similar to PREP, if a State does not apply for grant funding, the Secretary shall allot to one or more entities in the State, through a competitive grant process, the amount that would have been allocated to the State had it applied for the funding. A State or entity that receives funding must collect information on the programs and activities funded through its allotment and submit a report to the Secretary on the data from such programs and activities. In consultation with relevant stakeholders, the Secretary must also establish and conduct one or more national evaluations of the education funded through the Youth Empowerment Program and submit a report to Congress on the collected information.

Section 201. Providing for qualified health plan grace period requirements for issuer receipt of advance payments of cost-sharing reductions and premium tax credits that are more consistent with State law grace period requirements

Under current law, subsidized patients with exchange plans have a three-month grace period when they do not pay their health insurance premiums. During these three months, their plan cannot discontinue coverage for nonpayment of premiums. This means that patients receiving the advance premium tax credits (APTCs) and cost sharing reductions (CSRs) can pay for only nine months of health insurance, but receive a full year's coverage. According to one McKinsey report, one-in-five exchange enrollees stopped payment in 2015 with nearly 90 percent of these individuals repurchasing a plan the following year. Of this group, half enrolled in the same plan they stopped payment for in 2015. Section 201 allows States to define their grace period, or move to a default of one month.

Section 202. Prevention and Public Health Fund

The Prevention and Public Health Fund (PPHF) was created in the Affordable Care Act to fund “programs authorized by the Public Health Service Act for prevention, wellness, and public health activities.” Section 202 allocates \$6.35 billion from the PPHF to support the public health programs in the CHAMPION Act.

(3) MEDICALLY UNDERSERVED POPULATIONS.—

(A) IN GENERAL.—The term “medically underserved population” means the population of an urban or rural area designated by the Secretary as an area with a shortage of personal health services or a population group designated by the Secretary as having a shortage of such services.

(B) CRITERIA.—In carrying out subparagraph (A), the Secretary shall prescribe criteria for determining the specific shortages of personal health services of an area or population group. Such criteria shall—

- (i) take into account comments received by the Secretary from the chief executive officer of a State and local officials in a State; and
- (ii) include factors indicative of the health status of a population group or residents of an area, the ability of the residents of an area or of a population group to pay for health services and their accessibility to them, and the availability of health professionals to residents of an area or to a population group.

(C) LIMITATION.—The Secretary may not designate a medically underserved population in a State or terminate the designation of such a population unless, prior to such designation or termination, the Secretary provides reasonable notice and opportunity for comment and consults with—

- (i) the chief executive officer of such State;

- (ii) local officials in such State; and
- (iii) the organization, if any, which represents a majority of health centers in such State.

(D) PERMISSIBLE DESIGNATION.—The Secretary may designate a medically underserved population that does not meet the criteria established under subparagraph (B) if the chief executive officer of the State in which such population is located and local officials of such State recommend the designation of such population based on unusual local conditions which are a barrier to access to or the availability of personal health services.

(c) PLANNING GRANTS.—

(1) **IN GENERAL.—** *CENTERS.*—

(A) CENTERS.—The Secretary may make grants to public and nonprofit private entities for projects to plan and develop health centers which will serve medically underserved populations. A project for which a grant may be made under this subsection may include the cost of the acquisition and lease of buildings and equipment (including the costs of amortizing the principal of, and paying the interest on, loans) and shall include—

(i) (A) an assessment of the need that the population proposed to be served by the health center for which the project is undertaken has for required primary health services and additional health services;

(ii) (B) the design of a health center program for such population based on such assessment;

(iii) (C) efforts to secure, within the proposed catchment area of such center, financial and professional assistance and support for the project;

(iv) (D) initiation and encouragement of continuing community involvement in the development and operation of the project; and

(v) (E) proposed linkages between the center and other appropriate provider entities, such as health departments, local hospitals, and rural health clinics, to provide better coordinated, higher quality, and more cost-effective health care services.

(B) MANAGED CARE NETWORKS AND PLANS.—The Secretary may make grants to health centers that receive assistance under this section to enable the centers to plan and develop a managed care network or plan. Such a grant may only be made for such a center if—

(i) the center has received grants under subsection (e)(1)(A) for at least 2 consecutive years preceding the year of the grant under this subparagraph or has otherwise demonstrated, as required by the Secretary, that such center has been providing primary care services for at least the 2 consecutive years immediately preceding such year; and

(ii) the center provides assurances satisfactory to the Secretary that the provision of such services on a prepaid basis, or under another managed care arrangement, will not result in the diminution of the level or quality of health services provided to the

medically underserved population served prior to the grant under this subparagraph.

[(C) PRACTICE MANAGEMENT NETWORKS.—The Secretary may make grants to health centers that receive assistance under this section to enable the centers to plan and develop practice management networks that will enable the centers to—

[(i) reduce costs associated with the provision of health care services;

[(ii) improve access to, and availability of, health care services provided to individuals served by the centers;

[(iii) enhance the quality and coordination of health care services; or

[(iv) improve the health status of communities.

[(D) USE OF FUNDS.—The activities for which a grant may be made under subparagraph (B) or (C) may include the purchase or lease of equipment, which may include data and information systems (including paying for the costs of amortizing the principal of, and paying the interest on, loans for equipment), the provision of training and technical assistance related to the provision of health care services on a prepaid basis or under another managed care arrangement, and other activities that promote the development of practice management or managed care networks and plans.]

(2) LIMITATION.—Not more than two grants may be made under this subsection for the same project, except that upon a showing of good cause, the Secretary may make additional grant awards.

(3) RECOGNITION OF HIGH POVERTY.—

(A) IN GENERAL.—In making grants under this subsection, the Secretary may recognize the unique needs of high poverty areas.

(B) HIGH POVERTY AREA DEFINED.—For purposes of subparagraph (A), the term “high poverty area” means a catchment area which is established in a manner that is consistent with the factors in subsection (k)(3)(J), and the poverty rate of which is greater than the national average poverty rate as determined by the Bureau of the Census.

[(d) LOAN GUARANTEE PROGRAM.—

[(1) ESTABLISHMENT.—

[(A) IN GENERAL.—The Secretary shall establish a program under which the Secretary may, in accordance with this subsection and to the extent that appropriations are provided in advance for such program, guarantee up to 90 percent of the principal and interest on loans made by non-Federal lenders to health centers, funded under this section, for the costs of developing and operating managed care networks or plans described in subsection (c)(1)(B), or practice management networks described in subsection (c)(1)(C).

[(ii) the loan would not be available on reasonable terms and conditions without the guarantee under this subsection; and

[(iii) amounts appropriated for the program under this subsection are sufficient to provide loan guarantees under this subsection.

MINORITY VIEWS

Committee Democrats unanimously oppose H.R. 3922, the “Community Health and Medical Professionals Improve Our Nation Act of 2017,” or the CHAMPION Act. While we support the reauthorization of the critical public health programs included in the CHAMPION Act, we cannot support doing so using the partisan offsets the Republicans have proposed in this bill. Rather than working together to identify offsets that we all could support, the Committee Republicans chose to continue their efforts to repeal and undermine the Affordable Care Act (ACA) through this legislation.

THE MINORITY MEMBERS OPPOSE PAYING FOR CRITICAL PUBLIC HEALTH PROGRAMS WITH CUTS TO THE AFFORDABLE CARE ACT

The CHAMPION Act would cut \$6.35 billion or nearly half of the funding from the Prevention and Public Health Fund (Prevention Fund) over the next decade, which will harm efforts to improve America’s health and to prepare and respond to public health crises. The Prevention Fund was created by the ACA and is the federal government’s only dedicated mandatory investment in improving our nation’s public health system. As a result of the Republican proposed cuts to the Prevention Fund, funding would not be available to invest in critical preventive and public health programs such as efforts to reduce tobacco use, increase physical activity, expand mental health and injury prevention, and improve our ability to detect and respond to infectious disease and other public health threats. Therefore this legislation is forcing Congress to make a false choice between cutting funding for important public health programs in order to provide funding to maintain others. We reject this harmful action.

Cutting nearly half of the funding from Prevention Fund could cripple our public health prevention, preparedness, and response capabilities. The Centers for Disease Control and Prevention (CDC) plays a critical role in saving the lives and protecting the health of Americans. Currently, the Prevention Fund provides 12 percent of the annual budget of CDC. The proposed \$400 million cut to the Prevention Fund next year included in the CHAMPION Act would require CDC to roll back their public health programs as well as cut the funding it provides to states, communities, and tribal and community organizations.

Such a cut could not come at a worse time as we are in the midst of a near endless series of public health crises. From the lead crisis in Flint, to the international Zika and Ebola outbreaks, to the opioid epidemic, and now to our response to the trio of hurricanes that have devastated Texas, Florida, Puerto Rico, and the Virgin Islands, we have relied on CDC to be on the front lines to help protect the health of all Americans. Cutting funding to CDC as pro-

posed by this legislation could mean that CDC and its state and local partners will not have the resources necessary to prepare and mount a timely response to such events.

In addition to helping us prepare and respond to emerging public health crises, CDC is leading efforts to prevent and control chronic disease. Today in America, chronic disease, such as heart disease, diabetes, and cancer, are among the nation's most common, costly, and preventable health problems. Unsurprisingly, spending on chronic disease alone accounts for roughly 86 percent of all health care expenditures in the United States.¹ Chronic diseases also take a toll on American lives. In fact, chronic diseases account for 7 out of 10 deaths in the United States. Yet, despite the harms caused by chronic diseases, only a small percentage of government health expenditures are directed at preventing these diseases before they happen.

Using funding from the Prevention Fund, CDC supports public health programs like the highly successful *Tips from Former Smokers* national campaign. A recent study published in the *Lancet* found that the first three months of the national ad campaign led an estimated 1.6 million smokers to attempt to quit smoking and helped more than 100,000 Americans quit smoking permanently.² Another study published in the *American Journal of Preventive Medicine* found that the campaign prevented more than 17,000 premature deaths in the United States.³ Slashing nearly half of the funding to the Prevention Fund over the next decade could prevent CDC from implementing other successful public health interventions like *Tips from Former Smokers*.

Compounding the harmful cuts to the Prevention Fund is that the Republican proposed cuts would further strain the safety net health care system. Cutting nearly half the funding from the Prevention Fund could mean that more people would need health services from community health centers and other safety net programs. However, this legislation provides level funding needed to meet the current demand for services provided by community health centers—not increased funding to take on the additional burden that would result from cuts to the Prevention Fund. Therefore we reject this proposal that would require us to cut important investments in certain public health programs to fund needed investments in others.

Additionally, the minority members oppose paying for these important public health priorities by cutting funding for financial assistance for low and middle-income Americans who purchase subsidized coverage in the Marketplaces. Under the ACA, individuals have up to 90 days in order to pay premiums before insurers can terminate their coverage. These grace periods are important to ensure that low and middle-income families facing temporary difficulties paying premiums are not unfairly excluded from coverage. Shortening grace periods to 30 days could result in harsh con-

sequences for these families, who would lose coverage and would be barred from reenrolling until the next open enrollment season.

The minority members oppose the majority's continued attempts to repeal and undermine the ACA. We urge Committee Republicans to turn to the important task of stabilizing the Marketplaces and ending the widespread uncertainty due to the Trump Administration's continual threats to unilaterally end the payment of cost-sharing reductions. Failure to provide this certainty is resulting in significantly higher premiums and fewer choices for consumers.⁴
