SEC. ____ . SPACEPORTS.

(a) SENSE OF CONGRESS ON STATE SPACEPORT CONTRIBUTIONS.—It is the Sense of Congress that—

(1) State government-owned and -operated spaceports have contributed hundreds of millions of dollars in infrastructure improvements to the national space launch infrastructure, providing the United States Government and commercial customers with world-class space launch and processing infrastructure that is necessary to support continued American leadership in space;

(2) State spaceports play a critical role in providing resiliency and redundancy in the national launch infrastructure to support national security and civil government capabilities, and should be recognized as a critical infrastructure in Federal strategy and planning;

(3) continued State and local government investments at Federal and non-Federal launch facilities should be encouraged and to the maximum extent practicable supported in Federal policies, planning and infrastructure investment considerations, including through Federal-State partnerships;

(4) there is currently no Federal infrastructure investment program funding or encouraging State and local government investment in spaceport infrastructure, unlike Federal grant programs to encourage continued investment in all other modes of transportation, including aviation, highways, ports, and rail, which limits opportunities for the Federal government to leverage and coordinate infrastructure investments with State and local governments;

(5) Federal investments in space infrastructure should enable partnerships between Federal agencies with state spaceports to modernize and enable expanded 21st century space

transportation infrastructure, especially multi-modal networks needed for robust space transportation that support national security, civil, and commercial launch customers; and

(6) States that have made investments to build, maintain, operate, and improve capabilities for national security, civil, and commercial customers should be commended for their infrastructure contributions to both Federal and non-Federal launch sites, and encouraged through a variety of programs and policies to continue these investments in the national interest.
