PURPOSE

The purpose of S. 1548 is to designate certain land administered by the Bureau of Land Management (BLM) and the Forest Service in the State of Oregon as wilderness and national recreation areas and to make additional wild and scenic river designations in the State of Oregon.

BACKGROUND AND NEED

The Chetco, Rogue, and Molalla Rivers are important watersheds west of the Cascade Mountains. Together, they provide spawning habitat for several fish species—including salmon, steelhead, and green sturgeon. The rivers also are popular recreation destinations for kayaking, rafting, hiking, biking, camping, hunting, and fishing.

Parts of the Chetco River are already designated under the Wild and Scenic Rivers Act (Public Law 90–542). S. 1548 changes some of the previous classifications from “scenic” to “wild” and from “recreational” to “scenic.” The bill also prohibits mineral development in the vicinity of the Chetco river system by withdrawing lands from mineral entry along the river extending from the Kalmiopsis Wilderness Area within the Rogue River-Siskiyou National Forest.

Approximately 15 miles of the Molalla River and 6.2 miles of its Table Rock Fork would be added to the Wild and Scenic Rivers System. The BLM has determined the Molalla River and the Table Rock Fork are appropriate for wild and scenic designation.

S. 1548 designates approximately 98,150 acres of BLM land as the “Rogue Canyon Recreation Area,” and approximately 29,884 acres of BLM land as the “Molalla Recreation Area.”

The Wild Rogue Wilderness Area was designated by Congress in 1978 (Public Law 95–237) and is located primarily on lands managed by the Forest Service. The Wild Rogue Wilderness Area includes approximately 8,600 acres of lands administered by the BLM. The Rogue River is one of the initial eight rivers designated in the 1968 Wild and Scenic Rivers Act (Public Law 90–542). S. 1548 expands the Wild Rogue Wilderness Area by adding 59,512 acres of BLM and Forest Service land. The bill extends the existing Rogue Wild and Scenic River designation by adding 112.2 miles on 34 tributaries of the Rogue to the wild and scenic river system. In addition, S. 1548 withdraws 27.6 miles of eight other Rogue River tributaries from operation under public land, mining, and mineral leasing laws, and prohibits the Federal Energy Regulatory Commission (FERC) from licensing new water resource projects and associated facilities along these tributaries.

The Devil’s Staircase area is part of the Oregon Coast Range on the west coast of Oregon, northwest of Elkton. The terrain is steep, wild, and remote. The name “Devil’s Staircase” comes from a stair-
step waterfall on Wasson Creek. The bill designates as wilderness 30,621 acres of land administered by the BLM and the Forest Service.

LEGISLATIVE HISTORY

Senator Wyden introduced S. 1548 on July 13, 2017. The Subcommittee on Public Lands, Forests, and Mining, held a hearing to consider the bill on July 26, 2017.

COMMITTEE RECOMMENDATION

The Senate Committee on Energy and Natural Resources, in open business session on October 2, 2018, by a majority voice vote of a quorum present, recommends that the Senate pass S. 1548, if amended as described herein. Senators Barrasso, Risch, and Lee requested to be recorded as voting no.

COMMITTEE AMENDMENT

During its consideration of S. 1548, the Committee adopted an amendment in the nature of a substitute.

In section 101(a), the substitute amendment changes the designations of Rogue Canyon and Molalla from “National Recreation Areas” to “Recreation Areas;” increases the acreage of land designated in Rogue Canyon from 94,700 acres of land to 98,150 acres of land; and increases the acreage of land designated in Molalla from 24,100 acres of land to 29,884 acres of land. A new subsection (c)(4) is added to make clear that the Secretary concerned can conduct vegetation management activities within the recreation areas.

In section 201(a), the substitute amendment increases the length of Whisky Creek that is designated as a recreational river from 0.6 miles to 1.6 miles; decreases the length of Whisky Creek that is designated as a wild river from 1.9 miles to 1.2 miles; increases the
length of Howard Creek that is designated as a scenic river from 0.3 miles to 3.5 miles; strikes the provision designating 0.1 miles of Russian Creek as a scenic river; strikes the provision designating 3.3 miles of Quartz Creek as a scenic river; and strikes the provision designating 5.7 miles of North Fork Galice Creek as a recreational river. Subsections (d)(4)(G) and (d)(4)(H) add the 3.3 mile segment of Quartz Creek and the 5.7 mile segment of North Fork Galice Creek to the stream segments that are withdrawn under subsection (d)(3).

In section 202, the substitute amendment adds a clause withdrawing the Whychus Creek area, subject to valid existing rights, from entry, appropriation, and disposal under public land laws; location, entry, and patent under mining laws; and disposition under mineral and geothermal leasing laws.

In section 205(a), the substitute amendment adds new provisions designating two miles of East Fork Blackberry Creek as a wild river; four miles of Butler creek as wild and scenic rivers; 2.8 miles of East Fork Butler Creek as a scenic river; and two miles of Purple Mountain Creek as wild and scenic rivers. Subsection (b) increases the length of Walker Creek that is designated as a recreational river from two miles to 2.9 miles.

In section 301(b), the substitute amendment increases the expansion of the Wild Rogue Wilderness Area from 56,100 acres of land to 59,512 acres of land. The substitute amendment strikes section 301(b)(3) in the language as introduced, which was a provision that amended section 3(b) of the Endangered American Wilderness Act (16 U.S.C. 1132 note). The substitute amendment strikes sections 301(c) and 301(d) in the language as introduced, which designated potential wilderness and provided for the management of the potential wilderness.

In section 302(b), the substitute amendment increases acreage of land designated as the Devil’s Staircase Wilderness Area from 30,540 acres of BLM and Forest Service land, to 30,621 acres of BLM and Forest Service land.

Executive Communications

The testimony provided by the Departments of the Interior and Agriculture at the July 26, 2017, hearing on S. 1548 follows:
STATEMENT OF JOHN RUHS, ACTING DEPUTY DIRECTOR FOR OPERATIONS, BUREAU OF LAND MANAGEMENT, U.S. DEPARTMENT OF THE INTERIOR

S. 1548, OREGON WILDLANDS ACT

Thank you for the opportunity to testify on S. 1548, the Oregon Wildlands Act. S. 1548 would establish two new national recreation areas on forest lands in western Oregon (Title I), add over 280 miles of Oregon rivers on lands administered by the Bureau of Land Management (BLM) and Forest Service to the National Wild and Scenic River System (Title II), and establish new conservation designations in western Oregon (Title III).

Secretary Zinke, through Secretarial Order 3347, has pledged to expand access to America’s public lands and increase hunting, fishing, and recreational opportunities nationwide. In addition, Secretary Zinke is focused on restoring full collaboration and coordination with local communities and making the Department of the Interior (Department) a better neighbor. While the Department supports the goals of S. 1548 that align with these important priorities, we are concerned that the bill as currently written could ultimately decrease public access, limit outdoor recreational opportunities, and impede management and harvest of timber and other forest products. For these reasons, we cannot support the bill as written. We would like to work with the sponsors and the Subcommittee on a number of modifications to the bill to address these issues.

Background

The O&C Lands Act of 1937 placed 2.2 million checkerboard acres of Oregon and California Railroad and Coos Bay Wagon Road grant lands (the O&C lands) under the jurisdiction of the Department. Under the O&C Lands Act, the Department manages the O&C lands for “the purpose of providing a permanent source of timber supply, protecting watersheds, regulating stream flow, and contributing to the economic stability of local communities and industries, and providing recreational facilities.” The Act also provides that the 18 O&C counties receive yearly payments equal to 50 or 75 percent of receipts from timber harvests on O&C lands in these counties. In addition to the O&C lands, the BLM manages approximately 212,000 acres of public domain forests and other acquired lands in western Oregon. These and other BLM-managed lands in western Oregon also provide outstanding recreational opportunities, with over 5 million people visiting each year to enjoy hiking, camping, hunting, and fishing.

Timber harvests and the associated payments to counties decreased significantly in the mid-1990s, after the historic highs experienced in the late 1980s. The decrease was caused, in part, by management measures seeking to address the conservation and recovery of threatened and endangered species such as the northern spotted owl, coho salmon, and marbled murrelet. The Department manages the O&C lands, public domain forests, and other acquired lands under the 2016 western Oregon Resource Management Plans (2016 RMPs), along with guidance and management recommendations derived from the 2011 Northern Spotted Owl Recovery Plan.
and 2012 Final Critical Habitat Rule, as well as a number of court decisions.

The 2016 RMPs provide direction for the management of approximately 2.5 million acres of BLM-administered lands and offer outcomes for tourism, recreation, and timber harvest, while still maintaining protections for the northern spotted owl, listed fish species, and water resources. With full implementation of the 2016 RMPs, the BLM estimates that it will be able to offer for sale 278 million board feet (mmbf) per year in total timber volume. At the same time, the 2016 RMPs will help increase fire resiliency, develop habitat for northern spotted owl and other species, and protect listed fish species and water resources.

Oregon National Recreation Areas (Title I)

Title I of S. 1548 establishes the Rogue Canyon and Molalla National Recreation Areas on nearly 119,000 acres of intermixed O&C lands and public domain forests in western Oregon and provides guidance for the management of each area. Although the Department strongly supports efforts to increase access to and facilitate and enhance recreational opportunities on BLM-managed lands in western Oregon, we have concerns with the language of Title I and the impacts if it were to be implemented as written.

As discussed briefly above, the BLM’s management of O&C lands and public domain forests is currently governed by a number of statutory requirements, including the National Environmental Policy Act (NEPA), the Endangered Species Act (ESA), the Clean Water Act, the O&C Lands Act of 1937, the Federal Land Policy and Management Act (FLPMA), and the relevant implementing regulations and plans. Under this framework, the BLM manages these lands for forest production in conformance with the principles of sustained yield and for other multiple uses.

The Department notes that the designations in this title involve O&C lands within the harvest land base established under the 2016 RMPs. We require additional time to conduct the detailed analysis necessary to evaluate the extent of potential impacts to timber harvest levels. As a result, the Department does not support this legislation as written.

We also believe that the management language for the proposed recreation areas is unclear and may impact existing commercial timber production activity that relies on rights-of-way held by adjacent private forest landowners and existing commercial recreational activity. Because of the size of the proposed areas, some of the bill’s language may also limit access to existing trailheads and scenic opportunities. Therefore, the Department is concerned this language is inconsistent with Secretarial Order 3347 and Secretary Zinke’s commitment to sustaining and creating recreational access.

Finally, we note that the maps for both of the proposed recreation areas were created for previous iterations of the legislation and may contain designations or other features unrelated to this bill. Consequently, the Department would like the opportunity to provide updated maps that display the proposed areas in greater detail using the latest data.
Additional Wild & Scenic River Designations & Technical Corrections (Title II)

Title II of S. 1548 would designate over 280 miles of Oregon rivers on lands managed by the BLM and Forest Service as recreational, scenic, or wild rivers under the Wild and Scenic Rivers Act. Title II also withdraws 16 miles of 6 Rogue River tributaries from land laws, mining laws, and mineral leasing laws and prohibits the Federal Energy Regulatory Commission (FERC) from licensing new water resource projects and associated facilities along these tributaries.

The Department believes that there may be alternative approaches for managing sensitive resources and would like to work with the sponsors and the Subcommittee to ensure the full range of uses and permitted activities continue on BLM-managed lands. As with the recreation areas proposed by Title I, the wild and scenic river designations involve O&C lands within the harvest land base established under the 2016 RMPs. We would need additional time to conduct the detailed analysis necessary to evaluate the extent of potential impacts to timber harvest levels. If Congress opts to add these segments to the National Wild and Scenic River System, we would like to work with the Subcommittee on clarifications and technical issues, including a correction to the amended language for the original Rogue River designation. We defer to the Department of Agriculture regarding wild and scenic river designations on lands managed by the Forest Service.

Wilderness Areas (Title III)

Title III of S. 1548 would add approximately 60,000 acres of BLM-managed public lands to the existing Wild Rogue Wilderness in southwestern Oregon. This title would also designate approximately 23,000 acres of Forest Service-managed lands and approximately 7,000 acres of BLM-managed public lands as the Devil’s Staircase Wilderness, also in southwestern Oregon. The Department supports Congressional action to resolve wilderness designations across the West, and we welcome opportunities to further those efforts. Congress has the sole authority to designate lands to be managed permanently as wilderness, and we believe that such proposals should be considered as part of a locally driven process that incorporates the views of a wide range of stakeholders.

The Department notes that the lands proposed for wilderness designation by S. 1548 generally serve as habitat for a diversity of plant and animal life for forest-dependent species, including Pacific salmon, steelhead trout, and green sturgeon, and provide important opportunities for fishing, rafting and boat tours, and hiking and backpacking, and other forms of outdoor recreation in the forested mountains of western and southwestern Oregon.

Pursuant to the priorities outlined by Secretary Zinke, the Department believes there may be alternative approaches for managing these resources, and we would like the opportunity to work with the sponsors and the Subcommittee to determine if wilderness designation is the best mechanism for managing these important resources and uses. If Congress opts to proceed with designation of these lands as wilderness, we would like to work with the sponsors to ensure that the bill language is consistent with how the BLM manages other congressionally-designated Wilderness Areas. We
defer to the Department of Agriculture regarding wilderness designations on lands managed by the Forest Service. As with the proposed recreation areas and wild and scenic river designations, the wilderness designations outlined in this title involve O&C lands within the harvest land base established under the 2016 RMPs. We would need additional time to conduct the detailed analysis necessary to evaluate the extent of potential impacts to timber harvest levels. In addition, the Department notes that the maps for each of the proposed wilderness areas were created for previous legislation and may not reflect current land status data. For clarity, we would like the opportunity to provide updated maps of the proposed designations.

Finally, the Department has no objection to the transfer of administrative jurisdiction of 49 acres to the Forest Service, which is an isolated parcel with limited road access and is not included in future BLM timber sale plans.

Conclusion

The Department is committed to increasing public access, expanding outdoor recreational opportunities, and increasing management and harvest of timber and other forest products. Therefore, the Department cannot support S. 1548 as written. We would be interested in working with the sponsors and the Subcommittee to address the specific concerns noted in our testimony with regard to the bill as drafted to accomplish our shared multiple use goals for BLM-managed lands.

STATEMENT OF GLENN CASAMASSA, ASSOCIATE DEPUTY CHIEF, NATIONAL FOREST SYSTEM, U.S. FOREST SERVICE, UNITED STATES DEPARTMENT OF AGRICULTURE

S. 1548—OREGON WILDLANDS ACT

Chairman Lee, Ranking Member Wyden, members of the Subcommittee, thank you for the opportunity to present the views of the U.S. Department of Agriculture (USDA) regarding S. 32—the California Desert Protection and Recreation Act of 2017, S. 468—the Historic Routes Preservation Act, S. 941—the Yellowstone Gateway Protection Act, S. 1230—the Water Rights Protection Act, S. 1271—the Fowler and Boskoff Peaks Designation Act, and S. 1548—the Oregon Wildlands Act. I am Glenn Casamassa, Associate Deputy Chief for the National Forest System (NFS), USDA Forest Service.

S. 1548—Oregon Wildlands Act

Wild & Scenic River Designations

Section 202(a) amends the existing designation in Section 3(a)(69) of the Wild and Scenic Rivers Act to change the starting and ending points of the three main segments of the Chetco River consistent with the Siskiyou National Forest Land and Resource Management Plan. The total length of the Chetco Wild and Scenic River would remain 44.5 miles. In addition, this amendment would effectuate a mineral withdrawal of the Federal land within the boundary of the segments of the Chetco River designated as a wild and scenic river. Typically under the Wild and Scenic Rivers Act,
only Federal lands within segments designated as wild are subject to a mineral withdrawal. USDA is supportive of these technical changes as they provide a more appropriate naming convention, and better reflect management classifications and direction for the Chetco River.

Section 202(b) officially changes the name of “Squaw Creek” to “Whychus Creek” to better reflect local usage, current geographic nomenclature standards, and the name change approved by the U.S. Board on Geographic Names in 2005. This section also updates the location description in the existing designation in section 3a(102) of the Wild and Scenic Rivers Act to incorporate several other name changes. USDA strongly supports this much-needed technical correction to remove the offensive name of the designations.

Section 203 would designate approximately 10.4 miles of streams on National Forest System lands as part of the National Wild and Scenic Rivers System: 5.9 miles of Wasson Creek and 4.5 miles of Franklin Creek, both on the Siuslaw National Forest. USDA defers to the Department of the Interior in regard to the proposal to designate the 4.2-mile segment of Wasson Creek flowing on lands administered by BLM.

The Forest Service conducted an evaluation of the Wasson and Franklin Creeks to determine their eligibility for wild and scenic river designation as part of the forest planning process for the Siuslaw National Forest. However, the Agency has not conducted a wild and scenic river suitability study, which provides the basis for determining whether to recommend a river as an addition to the National System. Wasson Creek was found eligible as it is both free-flowing and possesses outstandingly remarkable scenic, recreational and ecological values. USDA supports designation of the 1.7 miles of the Wasson Creek on NFS lands based on the segment’s eligibility. At the time of the evaluation in 1990, Franklin Creek, although free flowing, was found not to possess river-related values significant at a regional or national scale and was therefore determined ineligible for designation. However, USDA does not oppose Franklin Creek’s designation at this time.

Section 205(a) would amend the Wild and Scenic Rivers Act by adding additional segments in the Elk River watershed to the National Wild and Scenic Rivers System on the Siskiyou National Forest. These additions would increase the Elk’s designated wild and scenic river mileage from approximately 29 miles to 63.4 miles. USDA takes no position on these additional designated segments. None of the additional segments are currently identified as eligible or suitable for wild and scenic river designation under the 1989 Siskiyou National Forest Land and Resource Management Plan. However, USDA would be happy to work with the Subcommittee to provide additional relevant information concerning the Elk River segments identified in this bill.

Wilderness Designations

Section 301 of the bill would designate 56,100 acres managed by the Bureau of Land Management (BLM) and by the Forest Service as an addition to the Wild Rogue Wilderness. USDA supports this addition of wilderness on National Forest System.
Section 301(b) would expand the Wild Rogue Wilderness in Oregon by designating 56,100 acres of land currently managed by the Bureau of Land Management and the Forest Service as wilderness. The “Proposed USFS Wilderness” identified in this section and on the referenced “Wild Rogue Wilderness Additions” map is located along a “cherry stem” into the existing wilderness area. The “cherry stem” originally allowed for the existence of a Level II Forest System Road, part of the designated “Grave Creek to Marial Back Country Byway,” and the continuation of the Marial Lodge, a permitted resort. Marial Lodge accommodates hikers in the spring, rafters through the summer and commercial fishing trips in the fall. Proposed boundary adjustments in this area appear to be consistent with the continuation of the present and current use of the existing facilities.

Section 301(b)(1)(A) also includes language that turns back administration of a portion of the existing Wild Rogue Wilderness from Forest Service to BLM management. The Forest Service is currently authorized to manage this BLM area through a Memorandum of Understanding. USDA does not see any issues of concern related to management of this expanded Wilderness area. However, we would like to work with the Subcommittee to develop a detailed “inset map” in the legislation to ensure that the boundaries between BLM and USFS parcels are clear and unambiguous.

Section 302 would designate the Devil’s Staircase Wilderness (30,540 acres) on lands managed by the Forest Service and BLM surrounding Wasson Creek. Approximately 24,000 acres of this wilderness would be on the Siuslaw National Forest. Section 302(h) of the bill also would effectuate the transfer of administrative jurisdiction of an approximately 49 acre parcel managed by BLM to the Forest Service to be managed as part of the Siuslaw National Forest. This parcel includes a site of cultural significance to the Coos, Lower Umpqua, and Siuslaw Indians. Approximately 7,800 acres of the NFS lands are within the Wasson Creek Undeveloped Area and were evaluated for wilderness characteristics in the 1990 Siuslaw National Forest Land and Resource Management Plan. The proposed Devil’s Staircase Wilderness provides an outstanding representation of the Oregon Coast Range and would enhance the National Wilderness Preservation System. There is an existing road within the proposed boundary of this wilderness that would require decommissioning by heavy equipment prior to designation as wilderness or allowance for use of mechanized equipment for this purpose after the enactment. USDA supports the designation of the proposed Devil’s Staircase Wilderness.

Other portions of this bill would designate additional BLM lands and rivers flowing on BLM lands and would be administered by the Secretary of the Interior. Therefore, USDA defers to Department of the Interior on these proposed designations.

This concludes my written testimony. Again I thank the Subcommittee for holding this hearing and providing the opportunity to testify, and I look forward to answering your questions at the appropriate time.
