(F) ROYALTY RATE.—The Secretary shall develop a minimum bid and royalty rate for leases under this paragraph to advance the purposes of this section, to the maximum extent practicable.

(d) SEQUESTRATION.—If, by not later than 4 years after the date of enactment of this Act, any significant fugitive methane emissions from abandoned coal mines on Federal land are not leased under subsection (c)(3), the Secretary shall, in accordance with applicable law, take all reasonable measures—

- (1) to cap those fugitive methane emissions at the source in any case in which the cap will result in the long-term sequestration of all or a significant portion of the fugitive methane emissions; or
- (2) if sequestration under paragraph (1) is not feasible, destroy the fugitive methane emissions by flaring.

(e) REPORT TO CONGRESS.—Not later than 4 years after the date of enactment of this Act the Secretary shall submit to the Committee on Natural Resources of the House of Representatives and the Committee on Energy and Natural Resources of the Senate a report detailing—

- (1) the economic and environmental impacts of the pilot program, including information on increased royalties and estimates of avoided greenhouse gas emissions; and
- (2) any recommendations by the Secretary on whether the pilot program could be expanded geographically to include other significant sources of fugitive methane emissions from coal mines.

SEC. 306. EFFECT.

Except as expressly provided in this title, nothing in this title—

- (1) expands, diminishes, or impairs any valid existing mineral leases, mineral interest, or other property rights wholly or partially within the Thompson Divide Withdrawal and Protection Area, including access to the leases, interests, rights, or land in accordance with applicable Federal, State, and local laws (including regulations);
- (2) prevents the capture of methane from any active, inactive, or abandoned coal mine covered by this title, in accordance with applicable laws; or
- (3) prevents access to, or the development of, any new or existing coal mine or lease in Delta or Gunnison County in the State.

PURPOSE OF THE BILL

The purpose of H.R. 823 is to provide for the designation of certain wilderness areas, recreation management areas, and conservation areas in the State of Colorado, and for other purposes.

BACKGROUND AND NEED FOR LEGISLATION

Coloradans value public land as an essential part of the Colorado way of life. Public lands make the state a desirable place to live, work, and visit by providing a clean water supply; access to recreational opportunities, including hiking, backpacking, camping, mountain biking, skiing, climbing, snowmobiling, off-highway vehicle travel, and rafting; high-quality wildlife habitat and migration corridors that support at-risk species and big game animals important to hunters and anglers; and grazing land that supports Colorado's agricultural economy.

In Colorado, outdoor recreation generates \$28 billion in annual consumer spending, 229,000 direct jobs, \$9.7 billion in wages and salaries, and \$2 billion in state and local tax revenue.¹ H.R. 823 would support Colorado's growing recreation economy by protecting approximately 400,000 acres of public land in Colorado, safeguarding existing and future outdoor recreation opportunities.

H.R. 823 is the result of years of locally driven, collaborative efforts among a diverse set of stakeholders with a shared interest in providing long-term protections for key public lands in Colorado. The bill unites and improves upon earlier proposals to protect roughly 400,000 acres in perpetuity for the benefit of the people of the United States and for future generations. Of the roughly 400,000 acres protected, over half of the acreage is federal mineral withdrawals, about 73,000 acres are new wilderness areas, and nearly 80,000 acres are designated as recreation, conservation, and special management areas. The legislation would also establish approximately 28,676 acres of public land as a first-of-its-kind National Historic Landscape to honor the legacy of the 10th Mountain Division, members of which trained at Camp Hale and helped win World War II and many of whom went on to create the modern outdoor industry in Colorado and across the country. Lastly, the bill congressionally establishes the Curecanti National Recreation Area (NRA). Although the National Park Service has managed the area as an NRA since it was created in 1965, it has never been designated by Congress.

The CORE Act enjoys wide support from stakeholders across Colorado, making it one of the most broadly supported pieces of public lands legislation in recent history. Support for provisions of the CORE Act includes: Eagle, Garfield, Gunnison, Ouray, Pitkin, San Juan, San Miguel, and Summit Counties; the local municipalities of Basalt, Breckenridge, Carbondale, Crested Butte, Dillon, Frisco, Glenwood Springs, Minturn, Mt. Crested Butte, Ophir, Paonia, Ridgway, and Telluride; over 200 businesses across the state, including Arapahoe Basin Ski Area, Blue Grouse Bread, Crystal River Meats, Icelantic Skis, Justin's, The North Face, Osprey Packs, and Vail Resorts; dozens of outdoor recreation and conserva-

tion organizations, including Backcountry Hunters & Anglers, Theodore Roosevelt Conservation Partnership, Conservation Colorado, International Mountain Bicycling Association, National Parks Conservation Association, North Thompson Cattle and Coal Basin Cattle Associations, Outdoor Industry Association, Trout Unlimited, Vet Voice Foundation, Wilderness Workshop, and The Wilderness Society; and many other organizations and individuals.

Title I of H.R. 823 establishes protections for nearly 100,000 acres of wilderness, recreation, and conservation areas in Colorado's central mountains in the White River National Forest—the most visited national forest in the country.² The bill designates three new wilderness areas totaling approximately 20,895 acres in the Hoosier Ridge, Williams Fork Mountains, and Tenmile Range. The bill sponsors have worked extensively with the Office of the Secretary of Defense to confirm that current and future military overflight in the region, including the Colorado Army National Guard High-Altitude Aviation Training Site (HAATS) mission, is preserved. The National Guard Bureau has indicated to the House Armed Services Committee that it has no concerns with H.R. 823. Adjacent to the Tenmile Wilderness, the bill designates the approximately 17,122-acre Tenmile Recreation Management Area to safeguard access to world-class outdoor recreation, such as mountain biking, hunting, and hiking, including access to Quandary Peak, commonly known as a “fourteener” because it reaches an elevation of at least 14,000 feet. The bill adds to three existing wilderness areas by expanding the Eagles Nest, Ptarmigan Peak, and Holy Cross wilderness areas, roughly totaling an additional 20,432 acres of wilderness. Provisions are included for the appropriate management of forest fire, insects, and diseases in the areas.

The bill also designates two new wildlife conservation areas, totaling approximately 11,815 acres, to protect wildlife, scenic, roadless, watershed, and ecological resources. The Porcupine Gulch Wildlife Conservation Area would protect the most important high-elevation migration corridor over Interstate 70 for elk, bear, mule deer, lynx, and other wildlife. The Williams Fork Wildlife Conservation Area would enhance wildlife habitat for the greater sage-grouse and other species. The bill designates roughly 28,676 acres surrounding Camp Hale as the first-ever National Historic Landscape. The 10th Mountain Division that trained at Camp Hale helped lead our nation to victory in World War II, and many of its veterans went on to create the outdoor recreation industry as we know it today. The National Historic Landscape designation would ensure Camp Hale's historic preservation, secure existing recreational opportunities, and protect natural resources. The bill also modifies the boundary of the White River National Forest to include roughly 120 acres and adjusts the boundary of a potential wilderness area around the Trail River Ranch in Rocky Mountain National Park.

Title II of H.R. 823 provides permanent protections for nearly 61,000 acres of land located in the heart of the San Juan Mountains in Southwest Colorado. The bill expands two existing wilderness areas, the Lizard Head Wilderness and Mt. Sneffels Wilder-

ness, in the Grand Mesa, Uncompahgre, and Gunnison National Forests. The bill also designates the new McKenna Peak Wilderness on public land managed by the Bureau of Land Management. Of the roughly 31,725 acres designated as wilderness, approximately 23,000 acres are wilderness additions, including two of the state's most iconic "fourteener" peaks: Mount Sneffels and Wilson Peak. The bill designates approximately 21,663 acres as the Sheep Mountain Special Management Area between the towns of Ophir and Silverton, which includes the popular hiking and skiing destination of Ice Lakes Basin. The inclusion of Paradise Basin in the Special Management Area will not only help protect the scenic, natural, cultural, and popular recreational values of the area, but it will also protect public safety from the potential of avalanches inadvertently triggered by motorized vehicles. The bill also creates the approximately 792-acre Liberty Bell East Special Management Area near Telluride. The Special Management Areas will conserve, protect and enhance the existing resources, uses, and values, including the wilderness characteristics of these areas, while permitting bicycle use in the Ophir Valley Area and Liberty Bell Corridor. The bill also includes the roughly 6,590-acre Naturita Canyon Mineral Withdrawal and releases certain portions of Wilderness Study Areas not designated by this title.

Title III of H.R. 823 resolves oil and gas conflicts in the Thompson Divide by withdrawing approximately 200,000 acres near Carbondale and Glenwood Springs to protect the ranching and agricultural heritage, wildlife, scenery, and other public land values of the Thompson Divide, while preserving existing private property rights for leaseholders and landowners. The bill creates a voluntary process for existing leaseholders who would like to relinquish leases within the Thompson Divide Withdrawal and Protection Area in exchange for credits that may be used for any bid, royalty, or rental payments due under any federal oil or gas lease on federal land in Colorado. The bill includes provisions to support the continuation of natural gas storage at the Wolf Creek Storage Field. The bill also addresses climate change and supports the local economy by creating a pilot program to facilitate the capture, beneficial use, mitigation, and sequestration of fugitive methane emissions from coal mines in Garfield, Gunnison, Delta, and Pitkin Counties.

Title IV of H.R. 823 congressionally establishes the approximately 50,667-acre Curecanti National Recreation Area to be managed as a unit of the National Park System. Although the National Park Service (NPS) has managed resources in the area since 1965, it has never been designated by Congress, which has limited the ability of the National Park Service to effectively manage the area. To further facilitate management, the bill would enable the transfer of administrative jurisdiction of certain public lands in the area, while ensuring that the Bureau of Reclamation maintains jurisdiction over the three dams in the area and uphold its commitment to expand public fishing access. Lastly, the bill allows nearby landowners to voluntarily receive assistance from the NPS to conserve natural resources on their property.

The proposed protections made by H.R. 823 would safeguard and bolster Colorado's recreation economy and have significant support, including from Colorado state and local elected officials, businesses,

local ranchers, sportsmen, veterans, recreational users, and conservationists. The thoughtful participation by a diverse group of stakeholders and careful vetting of the protections and designations included in H.R. 823 would ensure permanent protections for approximately 400,000 acres of public land in Colorado providing recreational and economic opportunities for current and future generations.

Detailed estimate begins on the next page.			

Bill summary: H.R. 823 would designate roughly 200,000 acres of federal land in Colorado for wilderness, recreation, historic preservation, or conservation purposes. The bill would withdraw those areas, along with lands in the Naturita Canyon and Thompson Divide in Colorado, from entry under hardrock mining laws and mineral and geothermal leasing, subject to valid existing rights. That is, the bill would not allow new hardrock mining claims or mineral and geothermal leases on that land. Some of the land designated under H.R. 823 also would be withdrawn from availability for timber production.

The bill also would authorize the appropriation of \$10 million for the Forest Service to conduct historic interpretation, preservation, and restoration activities at the proposed Camp Hale National Historic Landscape. In addition, H.R. 823 would direct the Bureau of Land Management (BLM) to establish a pilot program to capture and lease out or destroy methane emissions in the Greater Thompson Divide region.

Estimated Federal cost: The estimated budgetary effect of H.R. 823 is shown in Table 1. The costs of the legislation fall within budget function 300 (natural resources and environment).

Components may not sum to totals because of rounding; * = between zero and \$500,000.

^a CBO also estimates that enacting H.R. 823 would increase direct spending by an insignificant amount.

Basis of estimate: For this estimate, CBO assumes that the legislation will be enacted near the start of 2020 and that the authorized and necessary amounts will be provided. Estimated outlays are based on historical spending patterns for similar activities.

CBO estimates that implementing H.R. 823 would cost \$19 million over the 2020–2024 period.

Camp Hale National Historic Landscape

Section 107 would establish the Camp Hale National Historic Landscape and would authorize the appropriation of \$10 million for the Forest Service to carry out related management, historic interpretation, preservation, and restoration activities. For this estimate, CBO assumes the entire amount will be appropriated in 2020 and spent over the next five years and thus would cost \$10 million over the 2020–2024 period.

Methane capture pilot program

Section 305 would direct BLM to establish a pilot program to capture and either lease or destroy methane emissions in the Greater Thompson Divide region. Under the bill, BLM would develop an inventory of the emissions and a leasing plan. If the emissions are not leased within four years, H.R. 823 would direct BLM to cap or destroy those emissions. Using information from BLM, CBO estimates that implementing the program would cost \$1 million in 2020 for planning activities. In addition, we estimate that BLM would need five additional employees at an average annual cost of \$120,000 each over the initial years of the program. In total, CBO estimates that implementing section 305 would cost \$4 million over the 2020–2024 period.

Wilderness designations

Sections 102, 103, and 202 would designate new wilderness areas in Colorado and expand existing ones. Using information from the Forest Service and BLM, CBO estimates that the agencies would incur costs of roughly \$2 million in 2020 to amend management plans, complete boundary surveys, and install new signage. There-

after, we estimate that the costs for additional rangers to patrol those areas would total less than \$500,000 annually. In total, CBO estimates that implementing those sections would cost \$3 million over the 2020–2024 period.

Other costs

CBO estimates that implementing other sections of H.R. 823 would cost \$2 million over the 2020–2024 period.

Title IV would confirm the boundary of the Curecanti National Recreation Area and would direct the National Park Service (NPS) to complete a boundary survey and a management plan for the unit. Using information from the NPS, CBO estimates that completing those activities would cost \$1 million.

H.R. 823 also would:

- Designate other conservation, recreation, and management areas;
- Adjust the boundary of the White River National Forest and Rocky Mountain National Park;
- Release some parcels of land from their status as wilderness study areas; and
- Authorize BLM to issue credits to leaseholders who choose to relinquish leases within the Thompson Divide.

Based on the costs of similar tasks, CBO estimates that implementing those activities would cost \$1 million over the 2020–2024 period.

Pay-As-You-Go considerations: Income from mineral leasing and timber production is classified as offsetting receipts and recorded in the budget as a reduction in direct spending. Under H.R. 823, the federal government would forgo receipts because land would be withdrawn from mineral and geothermal leasing and the commercial timber base. However, CBO estimates that any increases in direct spending would be insignificant over the 2020–2029 period.

Increase in long-term deficits: CBO estimates that enacting H.R. 823 would not increase on-budget deficits by more than \$5 billion in any of the four consecutive 10-year periods beginning in 2030.

Mandates: None.

Estimate prepared by: Federal costs: Janani Shankaran; Mandates: Lilia Ledezma.

Estimate reviewed by: Kim P. Cawley, Chief, Natural and Physical Resources Cost Estimates Unit; H. Samuel Papenfuss, Deputy Assistant Director for Budget Analysis.

2. *General Performance Goals and Objectives.* As required by clause 3(c)(4) of rule XIII, the general performance goals and objectives of this bill is to provide for the designation of certain wilderness areas, recreation management areas, and conservation areas in the State of Colorado.

EARMARK STATEMENT

This bill does not contain any Congressional earmarks, limited tax benefits, or limited tariff benefits as defined under clause 9(e), 9(f), and 9(g) of rule XXI of the Rules of the House of Representatives.

UNFUNDED MANDATES REFORM ACT STATEMENT

This bill does not establish or reauthorize a program of the federal government known to be duplicative of another program. Such program was not included in any report from the Government Accountability Office to Congress pursuant to section 21 of Public Law 111-139 or identified in the most recent Catalog of Federal Domestic Assistance published pursuant to 31 U.S.C. § 6104 as relating to other programs.

APPLICABILITY TO LEGISLATIVE BRANCH

The Committee finds that the legislation does not relate to the terms and conditions of employment or access to public services or accommodations within the meaning of section 102(b)(3) of the Congressional Accountability Act.

DISSENTING VIEWS

H.R. 823 creates land restrictions for approximately 400,000 acres of land in Colorado in the form of new wilderness, recreation and conservation areas. While the stated goals of this legislation to protect and enhance outdoor recreation in Colorado are certainly admirable, it is regrettably clear that the proposed language does not reflect the local consensus we believe is critical for lands bills of this magnitude.

Among the primary criticisms of this legislation is the drastic reduction of areas open for motorized recreation use. The bill offers only 28,000 acres for motorized access versus the roughly 400,000 acres of new wilderness and closures.¹ Rural county commissioners have also raised economic concerns about the areas this bill will remove from multiple-use designation.² Instead of a legislative mineral lease exchange, which is supported by the impacted county and would enable energy companies to develop federal minerals in other areas, this bill offers a blanket mineral withdrawal in the Thompson Divide area with zero compromise.³ Finally, in a State with significant wildfire risk, this bill would further reduce acres that have been identified as suitable for forest management by approximately 8,000 acres.⁴

Of most concern to us, is that, contrary to the claims of State-wide consensus made by the sponsors of this legislation, there is significant opposition to this bill from many Colorado stakeholders.⁵ Further, this bill does not have the support of any of the Republican members of the Colorado delegation. Congressman Scott Tipton (CO-03) in particular has expressed significant concerns with this legislation, which contains several provisions that deal directly with federal lands in his Congressional district. In fact, roughly 65 percent of the lands affected by H.R. 823 are in Congressman Tipton's district. It is further troubling that Congressman Tipton was not even consulted on this legislation, and in fact did not even hear about this bill until the day it was publicly announced. To add insult to injury, regrettably, at the April 2, 2019, hearing on this bill, Congressman Tipton was prevented from engaging the bill sponsor, who not only chaired the hearing for a time but also was listed as a witness and testified regarding H.R. 823. This was not only an egregious violation of House rules and

comity among Members, but a very discouraging example of continued disregard for Member engagement shown by the Democrats concerning legislation impacting other Members' districts. Congressman Tipton's specific concerns with the impact that this bill will have on his constituents is appended to these views.

This lack of engagement continued during the markup of H.R. 823 where several amendments offered by Republicans seeking to address major flaws in the bill were rejected on largely party line votes. Among these was an amendment offered by Congressman Doug Lamborn that would have ensured that the important military readiness training conducted at the High Altitude Aviation Training Site in Colorado would not be adversely impacted by this legislation. Also offered at the markup were amendments requiring engagement with an impacted county, the removal of impacted lands in Congressman Tipton's district, and the removal of wilderness designations for lands that do not meet Wilderness Act criteria. All of these amendments were rejected by Committee Democrats, and the legislation advanced without a single Republican vote which bodes ill for its progress in the Senate. If the bill sponsor wants this legislation to serve as anything more than a partisan messaging bill, some long-overdue outreach and genuine efforts at a bi-partisan consensus by the sponsors need to take place.

June 26, 2019

Dear Chairman Grijalva and Ranking Republican Bishop,

I am writing to share my views on H.R. 823, the Colorado Outdoor Recreation and Economy Act, which received a mark-up in the Natural Resources Committee today. I am disappointed that following the April 2, 2019, hearing on this bill, there were no substantial changes made to the text to address the concerns that many of my constituents have raised about the portions of the bill that impact the Third Congressional District of Colorado.

Title I of H.R. 823 designates new wilderness near the Colorado Army National Guard's High-altitude ARNG Aviation Training Site (HAATS) in Gypsum, Colorado. HAATS is the only training site that can prepare rotary-wing aviators to safely navigate the mountainous regions they may encounter in combat zones. Current law requires Department of Defense (DoD) aircraft to fly at a minimum altitude of 2,000 feet above designated wilderness areas, however, in Colorado, the terrain conditions can make maintaining the 2,000 ft. minimum altitude requirement challenging and dangerous. The DoD guidance for Colorado indicates that if oxygen requirements, icing levels, engine power limitations, Cloud Clearance, or Turbulence prevent the DoD aircrews from meeting the 2,000 ft. minimum altitude requirement, the aircraft are authorized to deviate from the requirement to safely transit the wilderness area. While I appreciate the DoD's guidance, I know all too well that regulatory changes do not provide permanent certainty. We cannot risk this guidance being overturned in the future. Therefore, I believe it is critical to codify the guidance within H.R. 823.

During the mark-up on H.R. 823, the sponsor of the bill indicated he had heard from the "DoD community" that they had concerns about language that was included as a proposed amendment to the bill that would codify the Colorado guidance. This amendment included language from my bill, H.R. 3247, to provide for a safe transit exception to service level requirements for Department of Defense aircraft flying over Colorado wilderness areas. On June 4, 2019, the DoD

communicated with my office about its views on H.R. 3247. In that communication, the DoD said, “The Department of Defense supports the subject bill as drafted. The bill would codify existing DoD flight guidance published in DoD Flight Information Publication Area Planning: Military Training Routes: North and South America (DoD FLIP AP/1B). OUSD(P&R) coordinated with the Military Services to modify the DoD FLIP AP/1B to ensure that designation of Colorado wilderness areas would not interfere with or limit DoD's ability to safely conduct training operations in the mountainous regions of Colorado.”

Title II of H.R. 823 adds acres in the San Juan National Forest to the National Wilderness System and establishes areas of special management. I do not support this title of the bill as it is currently written, but I believe there are adjustments that could be made to the text to address the concerns raised by some recreation groups. I am hopeful that the sponsor of the bill will work with me in the future to achieve shared conservation goals in the San Juan National Forest.

Title III of H.R. 823 permanently withdraws 200,000 acres in the Thompson Divide from future oil, gas and mineral development. Three Colorado counties would be impacted by the permanent withdrawal: Gunnison, Pitkin, and Garfield. The Garfield County Board of County Commissioners does not support the permanent withdrawal of acreage in Garfield County from future oil, gas, and mineral development at this time. I believe it is critically important that the unique needs of impacted communities be considered during public land management decisions. I have encouraged the sponsors and supporters of H.R. 823 to consult and coordinate with Garfield County on the issue of the permanent oil, gas, and mineral withdrawal, and until there is consensus among the counties on this issue, I cannot support this portion of the bill.

Title IV of H.R. 823 creates a formal boundary for the Curecanti National Recreation Area (NRA) and transfers management of the area to the National Park Service. I do not oppose the ultimate goal of this section of the bill, however, I believe there are adjustments that must be made to preserve historic recreation activities and grazing in the area, protect water rights, and enable the Forest Service to continue its timber sales and fuel treatment projects on acreage that has been proposed for addition to the NRA.

Additionally, I continue to be concerned about the impact wilderness designations have on our ability to conduct management activities that support healthy forests. While the Wilderness Act includes language meant to give the Secretary of Agriculture flexibility to perform management and remediation projects, the law has been weaponized by some groups to prevent important projects from moving forward. For example, on May 9, 2019, the Forest Service announced it had approved the use of mechanized equipment to clear bark beetle-killed trees that had obstructed access to recreation trails in order to enhance visitor safety and reduce damage that can occur when visitors deviate from trails to avoid downed trees. After the announcement, a coalition of activist groups filed a lawsuit against the Forest Service, citing provisions of the Wilderness Act that ban the use of mechanized and motorized equipment in Wilderness Areas. The Forest Service then rescinded its approval of the project.

The sponsor and supporters of H.R. 823 have argued that the Wilderness Act provides flexibility for active forest management, however, the example above shows that the threat of lawsuits is a disincentive for the Forest Service to utilize this flexibility in order to be proactive.

I value Colorado's open spaces and am committed to ensuring public lands are preserved for future generations of Coloradans and all Americans to enjoy. I also firmly believe that discussions on major land management decisions should include all of the parties that the proposed designations would impact. I am confident there is common-ground to be found in some portions of this bill, and I am committed to working to advance shared conservation and recreation goals. I appreciate your consideration of my views on H.R. 823. Please do not hesitate to reach out to my office in the future should you have any questions.

Sincerely,
