A bill to amend the 21st Century Cures Act to reauthorize and expand a grant program for State response to the opioid abuse crisis, and for other purposes.

I. PURPOSE AND SUMMARY

H.R. 2466, the “State Opioid Response Grant Authorization Act”, was introduced by Representatives David Trone (D–MD), Kelly Armstrong (R–ND), Mikie Sherrill (D–NJ), and Denver Riggleman (R–VA). This bill would authorize the Substance Abuse and Mental

Health Services Administration (SAMHSA) State Opioid Response (SOR) Grant program by placing the program under the substance use disorder grant statutory authorities in the 21st Century Cures Act.¹ This grant program would support efforts in the States, Tribes, populations served by tribal organizations, territories, and Washington, D.C. to address substance use disorders, including opioid and stimulant use disorders. Funding from this authorization may support public health-related activities such as substance use disorder prevention efforts, establishing or improving prescription drug monitoring programs, health care practitioner training, and substance use disorder treatment, among other items. The Secretary of Health and Human Services (the Secretary) is required to submit a biennial report to Congress on the program. H.R. 2466 authorizes \$1.5 billion for each of the fiscal years (FY) 2020 through 2026.

II. BACKGROUND AND NEED FOR LEGISLATION

The 2019 National Survey on Drug Use and Health indicates that over twenty million Americans have a substance use disorder.² Unfortunately, this survey found that only four million individuals received substance use treatment.³ This treatment gap has unfortunate consequences. According to the Centers for Disease Control and Prevention (CDC), more than 750,000 Americans have died since 1999 from a drug overdose, with two out of three drug overdose deaths in 2018 involving an opioid.⁴

The SAMHSA SOR grant program has been funded through appropriations legislation since FY 2018.⁵ This grant program does not have a statutory authorization, however. As Admiral Brett Giroir, Assistant Secretary for Health, stated in testimony, SAMHSA's SOR grants provide a high degree of flexibility to States.⁶ Currently, SOR grants aim to address the opioid crisis by increasing access to medication-assisted treatment using the three Food and Drug Administration-approved medications for the treatment of opioid use disorder, reducing unmet treatment needs, and reducing opioid overdose related deaths through the provision of prevention, treatment, and recovery activities for opioid use disorder.⁷

Robert Morrison, executive director and director of legislative affairs for the National Association of State Alcohol and Drug Abuse Directors, noted in testimony that SOR grant program “provides a substantial level of support for innovative and lifesaving programs in States across the country.”⁸ For example, SOR grants have sup-

ported New Jersey’s efforts to increase practitioner training and allow the State to train an additional 640 practitioners to provide substance use disorder treatment to date.⁹ Additionally, in Oregon, SOR grants have allowed the State to purchase and distribute 44,000 naloxone kits, which have been reported to reverse over 3,378 overdoses.¹⁰

The need for continued support is evident in preliminary data suggesting that death rates climbed by nearly five percent in 2019, with more than 71,148 additional deaths predicted.¹¹ Scattered reports from States and counties across the country suggest that numbers continue to rise in 2020 during the COVID–19 pandemic.¹² H.R. 2466 would ensure continued, predictable support for substance use disorder prevention, treatment, and recovery efforts through 2026.

disorders, within States, Indian Tribes, populations served by tribal organizations, territories, and Washington, D.C. The minimum allocation for eligible entities is \$4 million, with preference given to entities with an incidence or prevalence of opioid use disorders that is substantially higher relative to other entities. The formula methodologies for allocating grant funds must be submitted to Congress no later than fifteen days prior to publishing a funding opportunity for grants under this section.

Activities under this grant may include implementing substance use disorder prevention activities, establishing or improving prescription drug monitoring programs, providing training for health care practitioners, and supporting access to health care through Federally certified opioid treatment programs and outpatient and residential substance use disorder treatment services that utilize medication-assisted treatment. Grantees may also direct resources in accordance with local needs related to substance use disorders. Grantees are required to report activities and ultimate recipients of the grant to the Secretary not later than September 30, 2022, and biennially thereafter.
