PURPOSE OF THE BILL

The purpose of H.R. 5040 is to direct the Director of the Bureau of Land Management to study the effects of drone incursions on wildfire suppression, and for other purposes.

BACKGROUND AND NEED FOR LEGISLATION

When people fly drones near wildfires, federal land management agencies engaging in wildland fire suppression activities often ground their aircraft to avoid potential midair collisions. These airborne response delays pose threats to firefighters on the ground and to nearby communities, and they may undermine suppression efforts and allow wildfires to grow larger. Although the Federal Aviation Administration (FAA) often implements Temporary Flight Restrictions (TFRs) around wildfires to protect aircraft involved in suppression operations, and although it is a federal crime to interfere with wildfire suppression efforts on public lands irrespective of a TFR, interferences from private drones have rapidly increased in recent years. According to the FAA, there are more than 100 documented cases of unauthorized drone incursions near wildfires.1

H.R. 5040 requires the Bureau of Land Management, in consultation with the U.S. Forest Service and the National Association of State Foresters, to conduct a study on the impacts and costs of unauthorized drone incursions on wildland fire suppression with respect to lands managed by the Department of the Interior or the Department of Agriculture. The bill raises awareness on the impacts of drone incursions on wildland fire suppression while examining ways to avoid future incursions.

COMMITTEE ACTION

H.R. 5040 was introduced on November 12, 2019, by Representative John Curtis (R–UT). The bill was referred to the Committee on Natural Resources, and in addition to the Committee on Agriculture. On July 29, 2020, the Natural Resources Committee met to consider the bill. The Subcommittee was discharged by unanimous consent. Rep. Curtis offered an amendment designated Curtis #1. The amendment was agreed to by unanimous consent. No additional amendments were offered, and the bill, as amended, was

adopted and ordered favorably reported to the House of Representa-

H.R. 5040 would direct the Bureau of Land Management (BLM) to study how drone incursions affect the suppression of wildfires on federal land. The agency would be required to submit that study and any recommendations to the Congress.

Based on the costs of similar tasks, CBO estimates that any costs incurred by BLM to implement H.R. 5040 would be insignificant over the 2021–2025 period; any spending would be subject to the availability of appropriated funds.

The CBO staff contact for this estimate is Janani Shankaran. The estimate was reviewed by H. Samuel Papenfuss, Deputy Director of Budget Analysis.

2. General Performance Goals and Objectives. As required by clause 3(c)(4) of rule XIII, the general performance goals and objectives of this bill are to direct the Director of the Bureau of Land Management to study the effects of drone incursions on wildfire suppression.
