H.R. 2379, the “State Opioid Response Grant Authorization Act of 2021,” amends the 21st Century Cures Act to authorize the State Opioid Response (SOR) Program administered by the Substance Abuse and Mental Health Services Administration (SAMHSA). This grant program would support efforts in the states, territories, and Washington, DC, as well as tribes, populations served by tribal organizations, and Urban Indian organizations to address opioid and stimulant use and misuse. The funding provided through this legislation may support public health-related activities such as substance use disorder prevention efforts, establishing or improving prescription drug monitoring programs, health care practitioner training, and substance use disorder treatment, among other activities. The Secretary of Health and Human Services (HHS) is also required to submit a biennial report to Congress on the SOR program. H.R. 2379 authorizes $1.75 billion for each of the fiscal years (FY) 2022 through 2027.

II. BACKGROUND AND NEED FOR LEGISLATION

Substance use disorders (SUD) are complex, treatable diseases that impact physical and mental health. In 2019, roughly 20.3 million Americans—including over one million children ages 12 to 17—had a SUD. Of the 20.3 million with a SUD, over ten million experienced opioid misuse. If untreated, SUDs can lead to severe health outcomes and in the most tragic cases, death.

Prior to the coronavirus disease of 2019 (COVID–19) pandemic, opioid overdose deaths were increasing in the United States. Recent data from the Centers for Disease Control and Prevention (CDC) indicate an acceleration of overdose deaths during the pandemic. In the 12 months leading up to January 2021, 94,134 drug overdose deaths were reported; the highest total ever recorded in...
a 12-month period.\textsuperscript{6} Further, CDC estimates that three in five overdose deaths presented opportunities for care and prevention.\textsuperscript{7} They observed that a significant number of overdose deaths involved individuals recently released from institutions, who previously experienced overdose, with mental health diagnoses, or were treated for a SUD.\textsuperscript{8}

The SAMHSA SOR grant program has been funded through appropriations legislation since FY 2018.\textsuperscript{9} This grant program, however, does not have a statutory authorization.\textsuperscript{10} Currently, SOR grants aim to address the opioid crisis by increasing access to medication-assisted treatment using the three Food and Drug Administration-approved medications for the treatment of opioid use disorder, reducing unmet treatment needs, and reducing opioid overdose related deaths through the provision of prevention, treatment, and recovery activities for opioid use disorder.\textsuperscript{11} H.R. 2379 would ensure continued, predictable support for substance use disorder prevention, treatment, and recovery efforts through 2027 by authorizing this program.

Section 1. Short title

Section 1 designates that the short title may be cited as the “State Opioid Response Grant Authorization Act of 2021.”

Sec. 2. Grant program for State and Tribal response to opioid and stimulant use and misuse

Section 2 amends the 21st Century Cures Act to authorize the Secretary to carry out a grant program that addresses opioid and stimulant use and misuse within states, territories, Washington, DC, as well as Indian tribes, populations served by tribal organizations, and Urban Indian Organizations. The minimum allocation for eligible entities is $4 million, with preference given to entities with an incidence or prevalence of opioid use disorders that is substantially higher relative to other entities. The Secretary is directed to develop a formula methodology for allocating grant funds,
including performance assessments for continuation awards, and is
directed to submit such formula methodology to Congress no later
than 30 days prior to publishing a funding opportunity for grants
under this section. The Comptroller General of the United States
must submit a report to Congress within two years of enactment
that assesses the grant funding allocations, how changes to alloca-
tions have impacted state efforts to address opioid misuse, and if
the projects funded by the grants are similar to those supported by
other grant programs administered by the Substance Abuse and
Mental Health Services Administration.

Grants awarded under the legislation must be for carrying out
activities pertaining to opioid and stimulant use and misuse, which
may include implementing substance use disorder prevention ac-
tivities and evaluating such activities, establishing or improving
prescription drug monitoring programs, providing training for
health care practitioners, and supporting access to health care
services through federally certified opioid treatment programs, out-
patient and residential substance use disorder treatment services
that utilize medication-assisted treatment, and recovery support
services. Grantees may also direct resources in accordance with
local needs related to substance use disorders. Grantees are re-
quired to report activities, ultimate recipients of the grant, number
of individuals served, and the funding level to the Secretary not
later than September 30, 2024, and biennially thereafter. The Sec-
retary is directed to provide technical assistance to eligible entities.

The authorization for appropriations is $1.75 billion for each of
the FYs 2022 through 2027. The legislation sets a 20 percent cap
for administrative expenses, training, technical assistance, and
evaluations. A set aside of five percent is available for Indian
tribes, tribal organizations, and Urban Indian Organizations, and,
of the remaining amount, 15 percent is reserved for the states with
the highest age-adjusted rate of drug overdose deaths.
