

Administration of Donald J. Trump, 2020

**Joint Statement by President Trump and President Jair Messias Bolsonaro of Brazil
on Health Cooperation To Address the Coronavirus Pandemic**

May 31, 2020

The American and Brazilian people stand in solidarity in the fight against the coronavirus. Today, as a demonstration of that solidarity, we are announcing the United States Government has delivered two million doses of hydroxychloroquine (HCQ) to the people of Brazil. The United States will also soon be sending 1,000 ventilators to Brazil.

HCQ will be used as a prophylactic to help defend Brazil's nurses, doctors, and healthcare professionals against the virus. It will also be used as a therapeutic to treat Brazilians who become infected.

Further, in continuation of the two countries' longstanding collaboration on health issues, we are also announcing a joint United States-Brazilian research effort that will include randomized controlled clinical trials. These trials will help further evaluate the safety and efficacy of HCQ for both prophylaxis and the early treatment of the coronavirus.

Going forward, the United States and Brazil will remain in close coordination in the shared fight against the coronavirus pandemic and the ongoing regional response to safeguard public health, further limit the spread of the coronavirus, advance the early development of a vaccine, and save lives. With President Donald J. Trump and President Jair Bolsonaro having spoken twice since March, the two countries are well-positioned to continue their work together to address the coronavirus pandemic, in addition to other matters of strategic importance.
