

Executive Order 14213—Establishing the National Emergency Dominance Council
February 14, 2025

By the authority vested in me as President by the Constitution and the laws of the United States of America, it is hereby ordered:

Section 1. Policy. America is blessed with an abundance of natural resources and is a leader in energy technologies and innovation that are critical to the economic prosperity and national security of the American people, as well as our partners and allies. We must expand all forms of reliable and affordable energy production to drive down inflation, grow our economy, create good-paying jobs, reestablish American leadership in manufacturing, lead the world in artificial intelligence, and restore peace through strength by wielding our commercial and diplomatic levers to end wars across the world. By utilizing our amazing national assets, including our crude oil, natural gas, lease condensates, natural gas liquids, refined petroleum products, uranium, coal, biofuels, geothermal heat, the kinetic movement of flowing water, and critical minerals, we will preserve and protect our most beautiful places, reduce our dependency on foreign imports, and grow our economy—thereby enabling the reduction of our deficits and our debt.

It shall be the policy of my Administration to make America energy dominant.

Sec. 2. Establishment. There is hereby established within the Executive Office of the President the National Energy Dominance Council (Council).

- (ii) advise the President regarding the actions each agency can take under existing authorities to prioritize the policy objective of increasing energy production, such as rapidly and significantly increasing electricity capacity; rapidly facilitating approvals for energy infrastructure; approving the construction of natural gas pipelines to, or in, New England, California, Alaska, and other areas of the country underserved by American natural gas; facilitating the reopening of closed power plants; and bringing Small Modular Nuclear Reactors online;
- (iii) provide to the President a review of markets most critical to power American homes, cars, and factories with reliable, abundant, and affordable energy;
