The National Center for Education Statistics (NCES) is the primary federal entity for collecting, analyzing, and reporting data related to education in the United States and other nations. It fulfills a congressional mandate to collect, collate, analyze, and report full and complete statistics on the condition of education in the United States; conduct and publish reports and specialized analyses of the meaning and significance of such statistics; assist state and local education agencies in improving their statistical systems; and review and report on education activities in foreign countries.

NCES activities are designed to address high priority education data needs; provide consistent, reliable, complete, and accurate indicators of education status and trends; and report timely, useful, and high quality data to the U.S. Department of Education, the Congress, the states, other education policymakers, practitioners, data users, and the general public.

We strive to make our products available in a variety of formats and in language that is appropriate to a variety of audiences. You, as our customer, are the best judge of our success in communicating information effectively. If you have any comments or suggestions about this or any other NCES product or report, we would like to hear from you. Please direct your comments to:

## Foreword

---

This directory is part of the continuing series of education directories of the National Center for Education Statistics. We issue this publication in order to provide a current listing of local public school systems and other education agencies to the many institutions and organizations that deal with these entities. The overseas regional offices of the U.S. Department of Defense Dependents Schools and the Bureau of Indian Affairs are also included in this report. Data in this publication also are available electronically on the NCES web site ([nces.ed.gov](http://nces.ed.gov)).

We look forward to continued comments from the education community so our products may be increasingly useful.

Jeffrey Owings  
*Associate Commissioner*  
Elementary/Secondary and Libraries Studies Division

Lee Hoffman  
*Program Manager*  
Elementary/Secondary Cooperative Programs

---

## Acknowledgments

---

Common Core of Data Coordinators are designated by the Chief State School Officers as the official state liaisons with the National Center for Education Statistics (NCES), and are the primary providers of the information presented in this document. The Directory of Public Elementary and Secondary Education Agencies, 2001–02 could not have been developed without substantial efforts by these coordinators. There are others in each state who spent hours assisting the Common Core of Data Coordinators in providing this information to NCES.

Although we cannot list the names of all of these people, we wish to thank them for their invaluable assistance.

Below is a list of all Common Core of Data Coordinators and Chief State School Officers. A list of state education agency addresses is provided in appendix A to this directory.

## Introduction

---

One of the major responsibilities of the National Center for Education Statistics (NCES) is to report on the condition of public elementary and secondary education in the United States. In support of this mission, NCES collects from state education agencies selected data items about all public elementary and secondary schools and education agencies in the 50 states, the District of Columbia, and five outlying areas: American Samoa, Guam, the Commonwealth of the Northern Mariana Islands, Puerto Rico, and the Virgin Islands. Information is also provided by the Bureau of Indian Affairs (BIA) and the U.S. Department of Defense (DOD) on its dependents schools.

Information on the universe of public schools and education agencies is collected annually through the NCES Common Core of Data (CCD) surveys. The CCD survey forms are completed (using state education agency administrative records) by CCD coordinators who were designated by their chief state school officers as the official state liaisons to NCES. The five CCD surveys are: (1) "Public Elementary/Secondary School Universe Survey," (2) "Local Education Agency Universe Survey," (3) "State Nonfiscal Survey of Public Elementary/Secondary Education," (4) "National Public Education Financial Survey," and (5) "School District Financial Survey."

For more information on public elementary/secondary education agencies and access to the 2001–02 CCD "Local Education Agency Universe Survey" file, visit the CCD web site at <http://nces.ed.gov/ccd>.

The information for this publication comes primarily from the CCD Local Education Agency Universe data collection of Spring 2002. Preceding the information on individual agencies are several tables providing summary information, such as numbers and percentages of agencies by type, size, and state. They are followed by the listing of education agencies, organized by state and agency type. The directory lists all reported public elementary/secondary education agencies in the 50 states, the District of Columbia, five outlying areas, BIA, and DOD. An agency cannot be designated as more than one type, and if there are no agencies of a given type in a state, the heading for that type is *omitted*. Definitions of agency types are given on page xvii.

**Directory Contents** — The directory provides up to 12 items of information for each listed public elementary/secondary agency. For some listings, fewer than 12 items are provided either because the missing item(s) of information is not applicable to the particular agency type or the state CCD coordinator did not provide NCES with the information. The 12 items of information are:

- State
- Name of Agency
- Mailing Address including:
  - Street or P.O. Box
  - City of Mailing Address
  - ZIP Code
- Telephone Number
- Name of County
- Metropolitan Status Code
- Grade Span
- Total Student Membership
- Number of Regular High School Graduates (2000–01 school year)
- Number of Students with an Individualized Education Program (IEP)
- Number of Teachers
- Number of Schools

## State

The state in which an agency is located is identified in the upper left-hand or right-hand corner of the page.

## Name of Agency

This column lists the names of education agencies providing public elementary and secondary education in alphabetic *and/or* numeric order, grouped by type of agency within each state or state-level jurisdiction. The listed agency name is the name commonly used within the state, as supplied by the state education agency. It may differ from the legal name of the education agency. *If there are no agencies of a given type in a state, the heading for that type is omitted from the listing.*

## Street or P.O. Box

The street or P.O. box is the post office box number, rural route number, or the building's block number and name of the street where mail to the agency's chief executive officer should be addressed. The address given here may not represent the physical location of the agency. An "N" in this field indicates that no street address is used by the state education agency in mailings to the education agency.

## City

The city is the name of the city used in the mailing address of the agency's chief executive officer. If a state name abbreviation appears in this column, then the mailing address of the agency is located in the state shown rather than in the state actually served by the agency. This was true for 13 agencies in 2001–02. The street address, two-letter state code and ZIP code also follow this convention. If no address was supplied by the state CCD coordinator (as was the case for 20 agencies), this field is blank.

### **ZIP Code**

The ZIP code is assigned by the U.S. Postal Service to aid in the delivery of mail. The first digit is a regional identifier, the next 2 digits identify the post office, and the next 2 digits identify the block or zone.

### **Telephone Number**

The entry in this column lists the 3-digit area code, 3-digit exchange, and 4-digit local telephone number of the administrative office of the agency's chief executive officer. If no number was supplied by the state CCD coordinator, this field is blank (39 agency telephone numbers were not reported).

### **Name of County**

Name of county is the county where the chief executive officer of the agency maintains the agency's operational and administrative base. If county information was not provided, the field is blank.

### **Metropolitan Status Code (MSC)**

This column presents a single-digit code that classifies an education agency's service area relative to one of the 355 Metropolitan Statistical Areas (MSA) determined by the Bureau of Census during the 1980 Decennial Census and updated as of 1998. The following codes are used:

- 1-The agency serves the central city of an MSA.
- 2-The agency serves an MSA but not primarily its central city.
- 3-The agency does not serve an MSA.

### **Grade Span**

The entries of this column identify the lowest and highest grades served by the agency, as inferred from student membership data for the schools affiliated with the agency. This span is represented by a 4-character code with the general form LL–HH, where LL represents the lowest grade level offered by the agency's schools and HH represents

the highest grade level offered. The following codes are used to describe grade span when numerical designations are inappropriate:

- PK = prekindergarten
- K/KG = kindergarten
- UG = ungraded

Grades recognized for inclusion in the universe of elementary and secondary agencies range from prekindergarten (PK) through grade 12. Note that a district whose span is identified by grades may also include ungraded pupils. In addition, two grade span patterns are used that require further explanation:

UG-UG: This category is used to indicate that all of the students of an agency are ungraded. This is typically the case with regional educational services agencies (RESAs).

00-00: This designation identifies agencies that have no responsibility for instructing students or that have no schools associated with them. These types of agencies are typically supervisory union administrative centers and special purpose agencies, which provide the services of a common superintendent of schools and a business manager to clusters of small agencies.

### **Total Student Membership**

Student membership is defined as the unduplicated count of students on the roll of the agency (excluding any formerly enrolled students who withdrew) taken on the school day closest to October 1, 2001.

Various conditions exist in which student membership may not be reported for an agency. Some types of agencies, such as supervisory union administrative centers or RESAs, typically do not report students. Some regular school districts contract with other agencies to provide services for a portion of their students rather than operate schools for these students themselves. In these cases, student membership is not reported for the receiving district in order to avoid duplication of student counts. Conversely, in cases where all

students are sent to a contracting agency, no membership is reported for the sending, or "nonoperating" district. Missing and not applicable responses are represented by an em-dash (—). Additionally, data will be missing and represented by a dagger (†) for the remaining variables in the agency listing because the variables are not applicable to districts and agencies that do not serve students.

#### **Number of 2000–01 Regular High School (WS) Graduates**

This variable is the number of students who received a diploma from a regular high school program under the jurisdiction of the agency during the period September 2000 through August 2001. Not included in this count are other high school completers such as graduates of adult education programs, GED certificate recipients, and completers of educational programs for which a certificate other than a diploma is awarded.

#### **Number of Special Education Individualized Education Programs (IEP)**

This is a count of all students under the jurisdiction of this agency who have an Individualized Education Program on file under the Individuals with Disabilities Education Act (IDEA-Part B). (These students are also included in the Total Student Membership field.)

#### **Number of Teachers**

This variable represents the number of classroom teachers reported in the schools associated with each agency. The source of this number is the 2001–02 CCD Local Education Agency Universe Survey. Teachers who are not assigned to schools, such as teachers of the homebound or itinerant teachers who serve pupils in several schools, may not be included in this count in all cases. This number is reported in full-time equivalents rather than head counts. It is reported to one decimal place at the school level but, the sum for each agency, as reported in this directory, is rounded to the nearest whole number. Virginia did not report teachers on the Local Education Agency Universe Survey in 2001–02.

#### **Number of Schools**

This variable is the number of schools operated by the agency. Because of space constraints, this is abbreviated as "Sch's" in the listings.

---

## Types of Agencies

---

There are seven different types of agencies that operate public schools or provide administrative, research, or other supporting services to these schools. This section defines the seven types of agencies reported in the directory.

◦ **Regular school districts** are agencies responsible for providing free public elementary and secondary education for school-age children residing within their jurisdiction. These agencies may include special and vocational education in a comprehensive educational setting. In some cases, these education agencies contract with other agencies to provide services rather than operating schools themselves.

◦ **Supervisory union components** are regular school districts that are connected to supervisory unions for administrative services. They are listed with regular school districts.

◦ **Supervisory union administrative centers** are agencies that provide administrative services for a group of small school districts. Terminology varies among reporting state education agencies. For example, in Nebraska, each county superintendent provides administrative services to all school districts within the county having fewer than seven teachers. In that state, the supervisory unions are called "county-administered systems." Although supervisory union administrative centers generally do not report student membership, there are some exceptions to this rule.

◦ **Regional educational service agencies (RESAs)** are agencies that provide special services, such as regional vocational/technical or special education to other public elementary and secondary education agencies.

◦ **State-operated agencies** are any elementary, secondary, or combined education programs operated by a state agency (such as state schools for the blind or deaf) reported by the CCD coordinator.

◦ **Federally operated agencies** are any elementary, secondary, or combined education programs operated by a federal agency (such as Bureau of Indian Affairs) reported by the CCD coordinator.

◦ **Other agencies** are any elementary, secondary, or combined education programs that cannot be appropriately classified using another CCD designation and that have been reported as such by the state's CCD coordinator.

Districts having student membership include all regular school districts for which membership of one or more students was reported by the state's CCD coordinator for the 2001–02 school year.

## **SUMMARY TABLES**

---

---

## Summary Tables

---

This section provides six summary tables. The tables provide summary descriptive statistics on the characteristics of public elementary/secondary education agencies which cannot be gained simply from reading the directory listing. For more information on public elementary/secondary education agencies and access to the 2001–02 CCD Local Education Agency survey data file visit the CCD web site at <http://nces.ed.gov/ccd/ccddata.asp>.

Table 1 shows the number and percentage of public elementary/secondary education agencies, by type of agency and by state. In all but six states and the outlying areas (excluding BIA and DOD Dependents Schools), some educational services are provided by agencies other than regular school districts. These agencies take many forms and serve varied purposes, but they generally provide special educational services, such as special or vocational education programs, to a cluster of school districts in a specified jurisdiction.

Table 2 reports the distribution of regular public elementary and secondary school districts and students by district membership size (e.g., 100,000 or more students). This table shows what proportion of students are served by what proportion of districts. For example, the three largest district categories (i.e., student memberships of 10,000 or more) comprise 5.7 percent of all regular school districts in the country, yet they serve 51.4 percent of all public elementary and secondary students in the country.

Table 3 provides a breakdown of regular school districts by grade span and district membership size. It can be seen from this table that elementary/secondary unified school districts (those with a combined elementary/secondary grade span of **PK** or **K** or 1 to 12) represent 73.0 percent of all regular school districts.

Table 4 reports the number of regular public elementary and secondary school districts by grade span and state. The majority of regular school districts include the full range of grades **PK**, **K**, or 1 through 12 (see table 3). However, some states (see California) establish separate administrative units for elementary and secondary education.

Table 5 shows the number of regular school districts in each size category by state. It can be seen from this table that small school districts are more prevalent than large school districts, although the distribution of districts across membership size categories varies somewhat among states.

Table 6, in addition to showing the number of regular school districts having student membership in each state, indicates the number of students in membership in school districts at selected percentile intervals on an ascending size scale. A total of 228 regular school districts did not report students in membership and an additional 102 regular school districts reported zero students and therefore do not appear on this table. In the United States, the median school district has 1,064 pupils in membership; the average, or mean, number of pupils in a district is 3,297. In the 2000–2001 Directory, the median was **1,033** and the mean was 3,210 pupils.

**Table 1. — Number and percentage of public elementary and secondary education agencies, by type of agency and by state: School year 2001–02**

State	Total agencies	Regular school districts		Regional education service agencies & supervisory union administrative centers		State operated agencies		Other agencies <sup>2</sup>

<sup>1</sup>Regular school districts include those that are components of supervisory unions.

<sup>2</sup>DoD and BIA agencies are federal agencies, as is one additional agency in Virginia. Charter school agencies make up 960 of the other agencies. For example, the District of Columbia reports each charter school as a separate agency.

NOTE: Detail may not sum to total because of rounding. U.S. totals include the 50 states and the District of Columbia.

<sup>1</sup> Table includes 26 Department of Defense and 24 Bureau of Indian Affairs school districts that are technically federally operated agencies; this is in order to report data for these agencies in the table.

NOTE: Table includes districts for which no students were reported in membership. U.S. totals include the 50 states and the District of Columbia.

† Not applicable.

<sup>1</sup> Regular school districts include those that are components of supervisory unions.

<sup>2</sup> Table includes 26 Department of Defense and 24 Bureau of Indian Affairs school district that are technically federally operated agencies in order to report data for these agencies in the table.

NOTE: Distributions cannot be calculated for states and outlying areas that have a single district. U.S. totals include the 50 states and the District of Columbia. The mean is the average. If all districts were ranked by size from smallest to largest, half of the districts would fall below the median. For example, dividing the total number of students by the total number of districts yields an average district size of 3,297 students (mean), while half of the districts in the United States have 1,064 or fewer students (median). The percentile indicates what percent of cases a value exceeds; for example, 10 percent of districts have fewer than 123 students.
