| <i>Responding to Geopolitical Challenges</i> | 117 |
| <i>Promoting Opportunity and Managing Risks in Digital Trade</i> | 119 |
| Conclusion | 122 |
| Chapter 4: Investing in Young Children's Care and Education | 125 |
| The Effectiveness of Early Childhood Investments | 126 |
| <i>Benefits for Children and Society</i> | 126 |
| <i>Defining Quality in ECE</i> | 128 |
| <i>Benefits for Working Parents</i> | 129 |
| Challenges in the Market for Early Care and Education. | 133 |
| <i>Workforce Challenges</i> | 134 |
| <i>The High Costs of High-Quality Care</i> | 136 |
| <i>ECE Pricing and Price-Sensitive Consumers</i> | 140 |
| <i>Business Model Fragility</i> | 141 |
| <i>Participation in and Availability of ECE</i> | 142 |
| The Role of Subsidies in the Market for Care | 146 |
| <i>International Comparisons</i> | 146 |
| <i>Subsidies in the United States' ECE Market</i> | 147 |
| Conclusion | 150 |
| Chapter 5: Building Stronger Postsecondary Institutions. | 153 |
| The U.S. Postsecondary Institutional Landscape. | 155 |

| | |
|--|-----|
| <i>Institutions Serve a Diverse Student Population</i> | 156 |
| <i>Institutions Vary in Their Prices and Spending on Students</i> . . | 157 |
| <i>Institutions Vary in Their Student Outcomes</i> | 158 |
| <i>Institutions Matter for Student Outcomes</i> | 160 |
| The Rationale for and Delivery of Public Postsecondary Investment | 162 |
| <i>The Economic Rationale for Public Sector Investment</i> | 163 |
| <i>How Public Funds Are Delivered: Student Aid and Institutional Support</i> | 164 |
| The Imperfect Market for Postsecondary Institutions | 169 |
| <i>Geographic Constraints</i> | 170 |
| <i>Informational and Behavioral Constraints</i> | 170 |
| <i>College Expansion Constraints</i> | 171 |
| Institution-Focused Policies That Promote Access to Postsecondary Value | 173 |
| <i>Supporting the Quality of Existing Colleges and Programs</i> . . | 173 |
| <i>Institutional Accountability</i> | 175 |
| <i>Addressing Geographic Barriers to Access</i> | 178 |
| Conclusion | 181 |
| Chapter 6: Supply Challenges in U.S. Labor Markets | 183 |
| Labor Supply Fundamentals | 184 |
| <i>Trends in U.S. Labor Market Participation</i> | 185 |
| <i>Why Worry About Slower Labor Supply Growth?</i> | 186 |
| Causes of U.S. Labor Supply Challenges | 189 |
| <i>Demographic Trends</i> | 189 |
| <i>Declining Labor Market Participation Among Men</i> | 191 |
| <i>Female Labor Force Participation: The United States Falls Behind</i> | 197 |
| <i>The COVID-19 Pandemic's Lingering Effects on the Labor Supply</i> | 199 |
| Options to Boost the U.S. Labor Supply | 201 |
| <i>Increasing Immigration</i> | 201 |
| <i>Drawing More Adults into the Labor Market</i> | 204 |
| Conclusion | 209 |

Chapter 7: Competition in the Digital Economy: New Technologies,
Old Economics 211

 The Benefits of Digital Markets 213

Reducing Search Costs 213

Increased Variety 214

“Free” Products and Services 215

 How Is Competition Different in Digital Markets? 217

Big Data 218

Network Effects 220

Multi-Homing 223

When Do Markets Tip? 223

 The Role of Law and Regulation in the Digital Market 225

Network Effects Create a Competitive Moat. 227

*The Challenge of Preserving Competition in
 Digital Markets* 228

*Preventing the Extension of Dominance into
 Adjacent Markets.* 229

Preventing the Misuse of Consumer Data 230

Monitoring Pricing Algorithms and Collusion 232

 Conclusion 235

Chapter 8: Digital Assets: Relearning Economic Principles. 237

 The Perceived Appeal of Crypto Assets 239

Claim: Crypto Assets Could Be Investment Vehicles 244

*Claim: Cryptocurrencies Could Offer Money-like Functions
 without Relying on a Single Authority* 244

Claim: Crypto Assets Could Enable Fast Digital Payments 244

Claim: Crypto Assets Could Increase Financial Inclusion 245

*Claim: Crypto Assets Could Improve the United States’
 Current Financial Technology Infrastructure* 246

 The Reality of Crypto Assets 246

Crypto Assets Are Mostly Speculative Investment Vehicles 246

*Cryptocurrencies Generally Do Not Perform All the
 Functions of Money as Effectively as Sovereign Money,
 such as the U.S. Dollar* 251

Stablecoins Can Be Subject to Run Risk. 255

| | |
|---|-----|
| <i>Crypto Assets Can Be Harmful to Consumers and Investors . .</i> | 256 |
| <i>There Have Been Limited Economic Benefits from DLT Technology</i> | 258 |
| <i>The Risks of Financial Innovation</i> | 263 |
| <i>Other Risks from Crypto Assets.</i> | 264 |
| Investing in the Nation’s Digital Financial Infrastructure | 268 |
| <i>The FedNow Instant Payment System</i> | 268 |
| <i>Central Bank Digital Currencies</i> | 270 |
| Conclusion | 272 |
| Chapter 9: Opportunities for Better Managing Weather Risk in the Changing Climate | 273 |
| Economic Principles of Adaptation Policy and Planning | 277 |
| The Economic Costs and Financial Risks of Climate Change in the United States | 280 |
| <i>The Costs of Climate Change for the United States’ Well-Being and Prosperity.</i> | 280 |
| <i>Climate Change and Financial Stability.</i> | 284 |
| The Federal Fiscal Implications of Physical Climate Risk | 288 |
| <i>Risk Assumption.</i> | 289 |
| <i>Climate-Exposed Assets.</i> | 289 |
| <i>The Provision of National Public Goods</i> | 291 |
| <i>The Programs of the Social Safety Net</i> | 291 |
| Market Failures and Distortions That Slow Adaptive Adjustments and Policy Responses. | 292 |
| <i>Imperfect Information on Physical Climate Risks</i> | 293 |
| <i>Information Asymmetries.</i> | 293 |
| <i>Externalities and Public Goods.</i> | 294 |
| <i>Credit Constraints</i> | 295 |
| <i>Moral Hazard</i> | 296 |
| Four Potential Pillars of the Federal Adaptation Strategy and Major Policy Opportunities. | 297 |
| <i>Producing and Disseminating Knowledge about Climate Risk</i> | 297 |
| <i>Long-Term Planning for the Climate Transition.</i> | 298 |
| <i>Ensuring the Accurate Pricing of Climate Risk</i> | 300 |

| | |
|--|-----|
| <i>Protecting the Vulnerable</i> | 301 |
| Conclusion | 302 |
| References | 305 |

Appendixes

| | |
|--|-----|
| A. Report to the President on the Activities of the Council of Economic Advisers during 2022 | 415 |
| B. Statistical Tables Relating to Income, Employment, and Production | 427 |

Figures

| | |
|--|----|
| 1-1 Average Annual U.S. Real GDP Growth since 1790, by Decade and Contributor | 26 |
| 1-2 Miles of U.S. Railroads, 1830–90 | 27 |
| 1-3 U.S. Patents Issued, 1790–2000 | 28 |
| 1-4 Contributors to U.S. Real GDP Growth, 1930–50 | 29 |
| 1-5 U.S. Secondary School Enrollment and Graduation Rates, 1890–1991 | 30 |
| 1-6 The U.S. Labor Force, 1800–2021 | 31 |
| 1-7 U.S. Residences with Electricity, 1930–56 | 31 |
| 1-8 U.S. Capital Stock, 1925–2021 | 32 |
| 1-9 Total Factor Productivity Growth, 1953–2021 | 33 |
| 1-10 GDP per Capita for the United States, Argentina, and Singapore, 1800–2018 | 34 |
| 1-11 Woman’s Labor Force Participation Rate, 1970–2022 | 36 |
| 1-12 Percentage of Postsecondary Degrees Received by Women, 1980–2020 | 37 |
| 1-13 Percentage of Households with a Child under 18 That Have an Adult over Age 65 Years, 1989–2021 | 38 |
| 1-14 Consumption of Nursing Home and Childcare Services and Women’s Labor Force Participation, 1960–2022 | 39 |
| 1-15 Share of Private Industry Workers with Access to Benefits | 39 |
| 1-16 Nonparticipation in the Labor Force, by Reason | 41 |
| 1-17 Carbon Dioxide Levels Over Time | 42 |
| 1-18 Number of Billion-Dollar Natural Disasters in the United States, 1980–2022 | 43 |
| 1-19 Percentage of Adults Who Report Using the Internet Over Time | 45 |
| 2-1 The U.S. Economy, 2018–22 | 51 |

| | | |
