[Regulations Serial Number 197]

PART 60—AIR TRAFFIC RULES

SPECIAL REGULATION, CIVIL AIR REGULATIONS, AUTHORIZING THE ADMINISTRATOR TO DESIGNATE NEW CONTROL ZONES AND OTHER NEW CONTROL AREAS PRIOR TO JANUARY 20, 1942

At a session of the Civil Aeronautics Board held at its office in Washington, D. C., on the 5th day of December 1941.

Whereas the Civil Aeronautics Board at a regular session held at its office in Washington, D. C., on November 21, 1941, adopted a series of amendments to Part 60 of the Civil Air Regulations, such

amendments being Nos. 60-25 to 60-43,¹ inclusive, whereby the Administrator was authorized to designate control zones and other control areas, etc.; and

Whereas the effective date of such series of amendments is January 20, 1942; and

It appearing that:

(a) A further designation of additional control zones or other control areas by the Civil Aeronautics Board at this time might be confusing to the flying public;

(b) It has become necessary prior to January 20, 1942, to designate further control zones and other control areas, etc.;

The Board finds that:

Its action is in the public interest and in the interest of the safety of air commerce;

Now, therefore, the Civil Aeronautics Board, acting pursuant to the authority vested in it under the Civil Aeronautics Act of 1938, as amended, particularly sections 205 (a) and 601 of said Act, makes and promulgates the following special regulation:

Notwithstanding the effective date of amendments Nos. 60-25 to 60-43, inclusive, to the Civil Air Regulations, the Administrator, in the interest of safety and after finding it necessary for the proper control of air traffic, may designate new or additional, or amend or repeal any existing designation of, control zones of intersection, radio fixes, airway traffic control areas, or control airports.

§ 66.1 *Scope.* The following regulations in this part shall apply to scheduled operations within the United States (not including the Philippines) by aircraft of a foreign air carrier holding a permit issued by the Board, pursuant to the provisions of section 402 of the Civil Aeronautics Act of 1938.

§ 66.2 *Application of the air traffic rules.* Such operation shall be conducted in accordance with the provisions of the air traffic rules prescribed in Part 60 of the Civil Air Regulations except to the extent otherwise provided in these regulations. Any pilot employed in such operation may be required to accomplish a satisfactory examination demonstrating his knowledge of such rules.

§ 66.3 *Requirement of pilot certificate.* Each member of the crew of such aircraft shall be possessed of a proper currently effective certificate issued by the country whose nationality the aircraft possesses evidencing his competency to perform his duties in connection with the operation of such aircraft, or of a comparable certificate issued by the United States.

In the case of an air-traffic control-tower ground station such person shall be a qualified air-traffic control-tower operator and shall be in such tower during such times as communication with the aircraft is necessary.

§ 66.8 *Requirement of operation specifications.* No foreign air carrier shall operate an aircraft in scheduled service within the United States unless the Administrator shall, after investigation and upon determination that such carrier is properly and adequately equipped and able to conduct a safe operation with respect to other aircraft, have issued to such carrier operation specifications prescribing the conditions under which such operation shall be conducted.

§ 66.9 *Operation in accordance with operation specifications.* No foreign air carrier shall operate aircraft in scheduled service within the limits of the United States other than in accordance with operation specifications issued by the Administrator. Such specifications shall prescribe the type of operation (visual contact or instrument, day or night), the points to and from which and the civil airways over which such operation is to be conducted, the points of take-off and landing, and such other restrictions as may be reasonably required in the interest of avoiding collision between the foreign air carrier aircraft and other aircraft.

SUBCHAPTER C—MISCELLANEOUS EXCISE TAXES

[T.D. 5102]

PART 320—RETAILERS' EXCISE TAXES

Regulations 51, Relating to Excise Taxes on Sales by the Retailer, Amended¹

Regulations 51, approved September 29, 1941 [Part 320, Title 26, Code of Federal Regulations, 1941 Sup.], are amended as follows:

PARAGRAPH 1. Section 320.30 (a) is amended to read as follows:

§ 320.30 *Scope of tax.* * * *

(a) All articles commonly or commercially known as jewelry, whether real or imitation, regardless of the substance of which made including articles to be carried in the hand, or hung on the arm, or carried or worn on the person, which are made of, ornamented, mounted or fitted with, pearls, precious or semi-precious stones, or imitations thereof.

PAR. 2. Section 320.31 is amended to read as follows:

§ 320.31 *Jewelry.* Jewelry in general includes articles designed to be worn on the person or apparel for the purpose of adornment and which in accordance with custom or ordinary usage are worn so as to be displayed, such as rings, chains, brooches, bracelets, cuff buttons, necklaces, earrings, beads, etc. The tax is imposed on the sale of any of such articles at retail, regardless of the substance of which made and without reference to their utilitarian value or pur-

¹ 6 F.R. 4965.

pose, unless for a purpose specifically exempted by law.

Jewelry also includes articles to be carried in the hand, or hung on the arm, or carried or worn on the person, whether in pocket or bag or under the outer garment, such as cigarette cases, eyeglass cases, pencils, powder boxes, garter buckles, canes, purses or handbags, if made of, or ornamented, mounted or fitted with, pearls, precious or semi-precious stones, or imitations thereof. Such articles are likewise subject to tax without regard to their utilitarian value or purpose. (But see § 320.33 for the taxability of such articles where made of, or ornamented, mounted or fitted with, precious metals, or imitations thereof.)

For purposes of the tax, it is immaterial whether jewelry is real or imitation.

PAR. 3. Section 320.32 is amended by adding the following at the end thereof:

§ 320.32 *Pearls, precious and semi-precious stones, and imitations thereof.*
* * * (But see § 320.31 for the taxability of certain articles where made of, or ornamented, mounted or fitted with, pearls, precious or semi-precious stones, or imitations thereof.)

PAR. 4. The third paragraph of § 320.37 is amended to read as follows:

§ 320.37 *Exemptions.*

Where an article otherwise taxable is sold for religious purposes and the article is of such nature as to be usable for non-religious as well as religious purposes, for example, crosses, candlesticks, vases, etc., the retailer must have in his possession a statement from the consumer certifying that the article was purchased solely for religious purposes in order to establish his right to exemption from the tax on the sale. However, if the article is of such nature as to be usable only for religious purposes, for example, a crucifix, rosary, chalice, etc., a statement from the purchaser or consumer will not be required to establish the tax exemption.

PAR. 5. Section 320.64 is amended by eliminating all but the first paragraph and substituting the following in lieu thereof:

§ 320.64 *Returned goods; price adjustments.* * * *

Where an article is sold and before use, the sale is rescinded by a return of the article to the retailer and by a refund or credit of the full amount of the purchase price, including tax, to the purchaser, no tax is payable with respect to the transaction. In such case, if a tax was paid by the retailer, the amount thereof may be applied as a credit upon a subsequent monthly return, or may be made the subject of a claim for refund.

Where an article is sold and before use, the sale is rescinded by a return of the article to the retailer, and the purchaser receives credit for the full amount of the purchase price, including tax, in an

exchange of the article for another article, with appropriate adjustment for the difference, if any, in the values of both articles, the tax applies to the second article, if taxable, without regard to the time when the sale of the first article occurred, whether before, on, or after October 1, 1941. If a tax was paid by the retailer with respect to the first article, the amount thereof may be applied as a credit upon a subsequent monthly return or may be made the subject of a claim for refund.

Where an article sold under a guaranty contract is returned to the retailer from whom purchased, whether before or after use, by reason of a defect or a failure under the warranty, and a new article of the same kind is given without charge in exchange therefor, no tax is payable with respect to the transaction. In such case, there is no adjustment within the meaning of section 2407 (a) of the price at which the first article was sold; accordingly, no credit or refund of the tax, if any, paid with respect to the returned article is allowable. Where the purchaser receives an article, whether of the same kind or of a different kind, and is required to make some payment for the second article in addition to whatever amount is allowed as an adjustment for the returned defective article, the tax is payable with respect to the second article, if taxable, on the basis of the amount paid therefor, plus the amount allowed for the returned article. In that case, the amount allowed for the returned article is an adjustment within the meaning of section 2407 (a) of the price at which such article was sold, and the retailer may be allowed a refund or credit of that part of the tax, if any, paid with respect to such article which is proportionate to the part of the sales price allowed as an adjustment.

A credit or refund of tax is not allowable with respect to an article returned as a "trade-in" in the purchase of another article. In such case, there is no adjustment within the meaning of section 2407 (a) of the price at which the first article was sold. Instead, the sale of the second article is a separate and distinct transaction in which the first article is merely applied in part payment of the purchase price. Accordingly, the full amount of the tax due upon the sale of the second article is payable without any allowance or offset for the tax paid on the sale of the first article. (See § 320.5)

(This Treasury decision is issued pursuant to the authority contained in section 2410 of the Internal Revenue Code, added by section 552 of the Revenue Act of 1941 (Public Law 250, 77th Congress).)

CHAPTER IX—OFFICE OF PRODUCTION MANAGEMENT

SUBCHAPTER B—PRIORITIES DIVISION

PART 933—COPPER

Conservation Order No. M-9-c as Amended December 10, 1941 Curtailing the Use of Copper in Certain Items

Section 933.4 (Conservation Order No. M-9-c) is hereby amended so as to read as follows:

Whereas national defense requirements have created a shortage of Copper for the combined needs of defense, private account, and export; action has already been taken to increase and conserve the supply and to direct the distribution of Copper to insure deliveries for defense and essential civilian requirements; and the supply of Copper now is and will be insufficient for defense and essential civilian requirements unless the use of Copper in the manufacture of many products where such use is not absolutely necessary for the defense or essential civilian requirements is curtailed or prohibited;

Now, therefore, it is hereby ordered, That:

§ 933.4 *Conservation order No. M-9-c as amended December 10, 1941—(a) Restrictions on use of copper in articles appearing on List "A"—(1) Curtailment to January 1, 1942.* Except as provided in paragraph (b) hereof, during the period between October 15 and December 31, 1941, no manufacturer may use in the aggregate in the manufacture of any Item on List "A" attached, more Copper or Copper Base Alloy than the greater of the following two limits:

(i) One-half of the total amount of Copper or Copper Base Alloy, respectively, used in the aggregate by him in the manufacture of such Item during the last three months of 1940, or

(ii) One-eighth of the total amount of Copper or Copper Base Alloy, respectively, used in the aggregate by him in the manufacture of such Item during the year 1940.

If any Manufacturer is manufacturing any such Item which he did not manufacture in 1940, then during the period between October 15 and December 31, 1941, he may use in the aggregate in the manufacture of such Item Copper or Copper Base Alloy to a total amount not exceeding 50% of the total amount used in the aggregate by him in the manufacture of such Item during the period between August 1 and September 30, 1941.

(2) *Prohibitions after January 1, 1942.* Except as provided in paragraph (a), sub-paragraphs (3) and (4), and in paragraph (b) hereof, after January 1, 1942, no Manufacturer of any Item on List "A" attached, may use in the manufacture of any such Item any Copper or Copper Base Alloy.

(3) *Substitution of plating in limited cases.* Nothing contained in this paragraph (a), however, shall prevent the use of Copper or Copper Base Alloy for plating any Item included on List "A," provided:

(i) That such plating is not primarily for decorative purposes, and

(ii) That the use of or the normal wear on such Item would make impractical any other form of coating, and

(iii) That such Item was formerly plated with Copper or Copper Base Alloy, or if such Item was not formerly so plated, then provided that the total amount of Copper or Copper Base Alloy to be used in the plating of each such Item is less than 5% of the amount that was used in the manufacture of each such Item immediately preceding the effective date of this Order.

(4) Notwithstanding the provisions of paragraph (a) (2), a Manufacturer may, until March 31, 1942, complete the manufacture of any item on List "A" provided:

(i) The Manufacturer has not used more Copper or Copper Base Alloy than permitted by the terms of this Order, and

(ii) The Manufacturer had on hand on December 1, 1941, Copper or Copper Base Alloy which, as of said date, was in a form or alloy in which it could not be used by himself or by any other Person in the manufacture of any Item not on List "A," and that no additional Copper or Copper Base Alloy beyond that covered in this sub-paragraph (ii) is required to complete the manufacture of such Item; and

(iii) In no event shall the amount of Copper or Copper Base Alloy used in the aggregate in the manufacture of any such Item during the period between October 15, 1941 and March 31, 1942, exceed twice the amount permitted under sub-paragraph (a) (1) of this Order for the period between October 15 and December 31, 1941; and

(iv) On or before December 31, 1941, he files Form PD-189 with the Office of Production Management, Ref. M-9-c, establishing the facts entitling him to continue operations under the provisions of this paragraph and setting forth inventories and other particulars as called for therein.

(b) *General exception.* The prohibitions and restrictions contained in paragraphs (a) and (c) shall not apply to the use of Copper or Copper Base Alloy in the manufacture of any Item on List "B" attached where and to the extent that the use of any less scarce material is impractical, nor in articles, or parts thereof, which are being produced:

(1) Under a specific contract or subcontract for the Army or Navy of the United States, the United States Maritime Commission, the Panama Canal, the Coast and Geodetic Survey, the Coast Guard, the Civil Aeronautics Authority, the National Advisory Commission for Aeronautics, the Office of Scientific Research and Development, or for any foreign country pursuant to the Act of March 11, 1941, entitled "An Act to Promote the Defense of the United States," (Lend-Lease Act) if in any such case the use of Copper or Copper Base Alloy to the extent employed is required by the specifications of the prime contract, or

(2) For use to comply with Underwriters Regulations, or Safety Regulations issued under Governmental authority, provided the pertinent provisions of such Regulations were, in either case, in effect both on October 1, 1941, and on the date of such use, and specifically and exclusively require the use of Copper or Copper Base Alloy to the extent employed, or

(3) For use in chemical plants to the extent that corrosive action makes the use of any other material impractical, or

(4) For use in research laboratories and hospitals where and to the extent that the physical and chemical properties make the use of any other material impractical, or

(5) For use as part of the motive power or mechanical and electrical equipment of vessels other than pleasure craft where corrosive action makes the use of any other material impractical, or

(6) For use for repair or replacement purposes in plants employing chemical processes, in plants processing food, and in plants which are smelters or refiners of metal where in each case the existing installation is Copper or Copper Base Alloy and where and to the extent that chemical action makes the use of any other material impractical.

(c) *Restrictions on use of copper in all other articles.* During the period between October 15 and December 31, 1941, and during each 3 months' period thereafter, until further action by the Director of Priorities, no Manufacturer may use in the aggregate in the manufacture of any article not on List "A" attached,

more Copper and Copper Base Alloy than the greater of the following three limits:

(1) 70% of the total amount of Copper or Copper Base Alloy, respectively, used in the aggregate by him in the manufacture of such article during the last three months of 1940, or

(2) 17½% of the total amount of Copper or Copper Base Alloy, respectively, used in the aggregate by him in the manufacture of such article during the year 1940, or

(3) 50% of the total amount of Copper or Copper Base Alloy, respectively, used in the aggregate by him in the manufacture of such article during the period between July 1 and September 30, 1941;

plus in each such case, the amount of Copper or Copper Base Alloy necessary to manufacture articles which are being produced pursuant to the exceptions of paragraph (b) hereof.

The provisions of this paragraph shall not limit the amount of Copper or Copper Base Alloy which a Manufacturer may use in the manufacture of any article which is being produced by him with the assistance of a Preference Rating Order (not including a Preference Rating Certificate) issued directly to and in the name of such Manufacturer which assigns a rating of A-2 or higher to deliveries to him of materials used in the production of such article provided that such limitations may be exceeded only to the extent that the use of any other material is impractical in the manufacture of such article.

(d) *Prohibitions against sales or deliveries of copper or copper base alloy.* No Person shall hereafter sell or deliver Copper or Copper Base Alloy, to any person if he knows, or has reason to believe such material is to be used in violation of the terms of this Order.

(e) *Limitation of inventories.* No Manufacturer shall accumulate an Inventory of Copper, or Copper Base Alloy (including scrap) or products thereof, in the form of raw materials, semi-processed materials, finished parts or subassemblies in quantities in excess of a minimum practicable working Inventory, taking into consideration the limitations placed upon the production of Copper products by this Order. Any Manufacturer who has an Inventory in excess of a minimum practicable working Inventory is prohibited from receiving additional Copper or Copper Base Alloy (including scrap) or products thereof, beyond the extent necessary to maintain such minimum practicable working Inventory.

(f) *Miscellaneous provisions—(1) Priorities Regulation No. 1.* All of the provisions and definitions of Priorities Regulation No. 1 issued by the Director of Priorities on August 27, 1941 (Part 944), as amended from time to time, are hereby included as a part of this Order with the same effect as if specifically set

forth herein, except as otherwise specifically provided herein.

(2) *Appeal.* Any person affected by this Order who considers that compliance therewith would work an exceptional and unreasonable hardship upon him, or that it would result in a degree of unemployment which would be unreasonably disproportionate compared with the amount of Copper conserved, or that compliance with this Order would disrupt or impair a program of conversion from nondefense to defense work, may appeal to the Director of Priorities on Form PD-167, Ref.: M-9-c, Office of Production Management, Social Security Building, Washington, D. C., setting forth the pertinent facts and the reasons he considers he is entitled to relief. The Director of Priorities may thereupon take such action as he deems appropriate.

(3) *Applicability of order.* The prohibitions and restrictions contained in this Order shall apply to the use of material in all articles hereafter manufactured irrespective of whether such articles are manufactured pursuant to a contract made prior or subsequent to the effective date hereof, or pursuant to a contract supported by a preference rating. Insofar as any other Order of the Director of Priorities may have the effect of limiting or curtailing to a greater extent than herein provided the use of Copper or Copper Base Alloy in the production of any article, the limitation of such other Order shall be observed.

(4) *Violations or false statements.* Any person who violates this Order, or who willfully falsifies any records which he is required to keep by the terms of this Order, or by the Director of Priorities, or who otherwise willfully furnishes false information to the Director of Priorities or to the Office of Production Management may be deprived of priorities assistance or may be prohibited by the Director of Priorities from obtaining any further deliveries of materials subject to allocation. The Director of Priorities may also take any other action deemed appropriate, including the making of a recommendation for prosecution under section 35A of the Criminal Code (18 U.S.C. 80).

(5) *Definitions.* For the purposes of this Order:

(i) "Copper" means Copper metal which has been refined by any process of electrolysis, or fire refining to a grade and in a form (cathodes, wire bars, ingot bars, ingots, cakes, billets, wedge bars, or other refined shapes) suitable for fabrication, or in any subsequent stage of fabrication. It shall include Copper metal produced from scrap.

(ii) "Copper base alloy" means any alloy in the composition of which the percentage of Copper metal by weight equals or exceeds the percentage of all other metals.

(iii) "Inventory" of a person includes the Inventory of affiliates and subsidiaries of such person, and the Inventory of others where such Inventory is under

the control of or under common control with or available for the use of such person.

(iv) "Manufacturer" means one who manufactures, fabricates, assembles, melts, casts, extrudes, rolls, turns, spins, or processes in any other way.

(v) "Item" means any article or any component part thereof.

(vi) "Use in the aggregate" means the amount of Copper or Copper Base Alloy contained in a completed article or Item multiplied by the total number of such articles or Items, respectively, completed in a given period.

(6) *Installation.* The restrictions of this Order do not apply to the installation of a finished product for the ultimate consumer.

(7) *Effective date.* This Order shall take effect upon the date of issuance and shall continue in effect until revoked by the Director of Priorities. (P.D. Reg. 1, August 27, 1941, 6 F.R. 4489; O.P.M. Reg. 3 Amended, Sept. 2, 1941, 6 F.R. 4865; E.O. 8629, Jan. 7, 1941, 6 F.R. 191; E.O. 8875, Aug. 28, 1941, 6 F.R. 4483; sec. 2 (a), Public, No. 671, 76th Congress, Third Session, as amended by Public, No. 89, 77th Congress, First Session; sec. 9, Public, No. 783, 76th Congress, Third Session)

PART 1020—AUTOMATIC PHONOGRAPHS AND WEIGHING, AMUSEMENT AND GAMING MACHINES

Limitation Order L-21 to Restrict the Production of Automatic Phonographs and Weighing, Amusement and Gaming Machines

Whereas the demands of national defense have created a shortage of iron, steel, and other materials used in the manufacture of automatic phonographs, and weighing, amusement and gaming machines; action has already been taken to conserve the supply and direct the distribution of such materials to insure deliveries for defense and essential civilian requirements; and the present supply of these materials will be insufficient for defense and essential civilian requirements unless the manufacture of automatic phonographs and weighing, amusement and gaming machines is curtailed and the use of critical material for such manufacture thereby reduced;

During the period commencing January 1, 1942, and ending January 31, 1942, no manufacturer of automatic phonographs and no manufacturer of weighing or amusement machines shall produce per month any type of such equipment in an amount greater than 50% of the monthly average of units of such type equipment produced by him during the twelve months ending June 30, 1941. Thereafter, and until otherwise ordered, no manufacturer of automatic phonographs and no manufacturer of weighing or amusement machines shall produce per month any type of such equipment in an amount greater than 25% of the monthly average of such type equipment produced by him during the twelve months ending June 30, 1941.

(2) *Gaming machines.* During the period beginning December 1 and ending December 31, 1941, no manufacturer of gaming machines shall produce any type of such equipment in an amount greater than 50% of the monthly average of units of such type equipment produced by him during the twelve months ending June 30, 1941. During the period commencing January 1, 1942 and ending January 31, 1942 no manufacturer of gaming machines shall produce any type of such equipment in an amount greater than 25% of the monthly average of units of such type equipment produced by him during the twelve months ending June 30, 1941. (d) *Records.* All persons affected by this order shall keep and preserve for

not less than two years accurate and complete records concerning inventories, production and sales.

(e) *Audit and inspection.* All records required to be kept by this order shall, upon request, be submitted to audit and inspection by duly authorized representatives of the Office of Production Management.

(f) *Reports.* Each manufacturer to whom this order applies shall file with the Electrical Appliances and Consumers' Durable Goods Branch of the Division of Civilian Supply of the Office of Production Management a monthly report on Form PD-182, and such other reports or questionnaires as said Office shall from time to time specify.

(g) *Appeals.* Any person affected by this Order who considers that compliance therewith would work an exceptional and unreasonable hardship upon him, or that it would result in a serious problem of unemployment in his community, or that compliance with this Order would disrupt or impair a program of conversion from nondefense work, may appeal by a letter directed to the Director of Priorities, Social Security Building, Washington, D. PART 1350—EMERGENCY CIVILIAN DEFENSE
MATERIALS AND EQUIPMENTPRICE SCHEDULE NO. 48—EMERGENCY CIVILIAN
DEFENSE MATERIALS AND EQUIPMENT

The declaration by the Congress of the United States that a state of war exists between this country and the Japanese Empire makes it imperative that immediate steps be taken to insure the defense of the civilian population. To accomplish this end certain materials will be needed in large amounts. In certain localities, readily available supplies of many of these emergency de-

fense materials may prove inadequate to meet the full demand of a large civilian population. The Director of Civilian Defense has requested the Office of Price Administration to turn its attention toward the stabilization of prices of certain of these emergency defense materials. As a measure of public security, it becomes necessary to establish maximum prices for such materials and equipment as may be affected by inordinate increases in demand due to the civilian defense program.

Accordingly, under the authority vested in me by Executive Order No. 8734, it is hereby directed that:

§ 1350.1 *Maximum prices for, and supporting provisions affecting sales of, emergency civilian defense materials and equipment.* On and after the effective date of any schedule supplemental hereto, no person shall sell, offer to sell, deliver or transfer any emergency civilian defense material or equipment at prices higher than the maximum prices established for such material or equipment by such supplemental schedule, or in any other way contrary to the provisions of such supplemental schedule.*

* §§ 1350.1 to 1350.7, inclusive, issued pursuant to the authority contained in Executive Orders Nos. 8734, 8875, 6 F.R. 1917, 4483.

§ 1350.2 *Less than maximum prices.* Lower prices than the maximum prices established by any schedule supplemental hereto may be charged, demanded, paid or offered.*

§ 1350.3 *Evasion.* The limitations set forth in this Schedule or in any schedule supplemental hereto shall not be evaded whether by direct or indirect methods in connection with a purchase, sale, delivery or transfer of emergency civilian defense materials or equipment, alone or in conjunction with any other material, or by way of premium, commission, service, transportation, or other charge, or by a tying-agreement or other trade understanding, or by any other means.*

§ 1350.4 *Enforcement.* In the event of refusal or failure to abide by the price limitations, or other provisions of this Schedule, or in the event of any evasion or attempt to evade the price limitations or other provisions of this Schedule, the Office of Price Administration will make every effort to assure (a) that the Congress and the public are fully informed thereof, (b) that the powers of Government, both state and federal, are fully exerted in order to protect the public interest and the interest of those persons who conform with this Schedule, (c) that full advantage will be taken of the cooperation of the various political subdivisions of state, county, and local governments by calling to the attention of the proper authorities failures to comply with this Schedule which may be regarded as grounds for the revocation of licenses and permits; and (d) that the procurement services of the Government are requested to refrain from selling to or purchasing from those persons who fail

to comply with this Schedule. Persons who have evidence of the receipt or demand of prices higher than the maximum prices, or of any evasion or effort to evade the provisions hereof, are urged to communicate with the Office of Price Administration.*

§ 1350.5 *Modification of the schedule.* Persons complaining of hardship or inequity in the operation of this Schedule or any schedule supplemental hereto may apply to the Office of Price Administration for approval of any modification thereof or exception therefrom: *Provided*, That no applications under this section will be considered unless filed by persons complying with this Schedule.*

§ 1350.6 *Definitions.* When used in this Schedule, the term

(a) "Person" means an individual, partnership, association, corporation, or other business entity;

(b) "Emergency civilian defense materials and equipment" means any material or equipment defined in any schedule supplemental hereto.*

§ 1350.7 *Effective date of schedule.* This Schedule shall become effective on December 10, 1941.*

Issued this 10th day of December 1941.
Effective December 10, 1941.

An opportunity having been afforded to all parties to file exceptions to the Examiner's Report and supporting briefs, and no such exceptions or supporting briefs having been filed;

The undersigned having determined, after a consideration of the record, that the Proposed Findings of Fact and Proposed Conclusions of Law of the Examiner should be approved and adopted as the Findings of Fact and Conclusions of Law of the undersigned;
