[Schedule 4 to Limitation Order L-211]

STRUCTURAL STEEL SHAPES

§ 3102.5 Schedule 4 to Limitation Order L-211-(a) Definitions. (1) "Structural steel shapes" means flanged sections of carbon and alloy steel used in the construction of bridges, buildings, ships, towers, tanks, and for general structural purposes, but not including bar size sections such as channels, angles, tee and zee bars having maximum cross-section dimensions as follows: Equal angles and tees, under 2 inches: unequal angles, under 21/2 inches; all other, under 3 inches. (2) "Government order" means an or-

der placed:

(i) By the Government of the United States or any department or agency thereof, or

(ii) By any other person covering material to be physically incorporated into material to be delivered to such government, department, or agency, or

(iii) By a warehouse which has been designated by such government, department, or agency as a source of supply for government orders, for delivery to a stock maintained for that purpose.

(b) Restrictions in sizes and shapes. No person shall produce, fabricate, or deliver any structural steel shape except in a size and shape set forth in National **Emergency** Specifications, Simplification of Structural Steel Shapes, as revised May 11, 1942.

(c) Restrictions on specifications—(1) Government orders. No person shall produce, fabricate, or deliver on a Government order any structural steel shape which does not conform to a specification set forth in List 1 or List 2 of this schedule.

(2) Other orders. No person shall produce, fabricate, or deliver on any order other than a government order any structural steel shape which does not conform to a specification set forth in List 1 of this Schedule.

(d) Acceptance of delivery. No person shall accept delivery of any structural steel shape which he knows or has reason to believe was produced, fabricated, or delivered in violation of the provisions of paragraphs (b) or (c).

(e) General exceptions. The provi-sions of paragraphs (b), (c), and (d) shall not apply to structural steel shapes:

(1) The production, fabrication, delivery, or acceptance of which is specifically excepted by the Director Gen-eral for Operations. In the case of alloy structural steel shapes, such exceptions may be granted with respect to chemical compositions by the approval of a melting, production, or delivery schedule by the Director General for Operations, or

(2) Which have been produced or fabricated before February 25, 1943, or which before such date have been processed in such manner and to such extent that processing to conform to such provisions would be impracticable.

(3) Which are certified by the U.S. Army or Navy to the producer, fabricator, or supplier as being necessary to insure the military characteristics of the item for which such structural steel shape is required.

(f) Exceptions on specifications. The provisions of paragraphs (c) and (d) shall not prevent

(1) Waiver by the purchaser or pro-curing agency of any of the inspection or test requirements of the specifications prescribed in paragraph (c), or

(2) Delivery or acceptance of structural steel shapes which because of errors in manufacture do not conform to the requirements of paragraph (c), providing such requirements are waived by the purchaser or procuring agency.

(g) Records. Each person owning or possessing structural steel shapes excepted by the provisions of paragraphs (e) or (f) shall retain records of such material available for inspection by duly authorized representatives of the War Production Board. In addition, each person accepting an order for structural steel shapes excepted by the provisions of paragraph (e) (3) shall furnish details of such order to the War Production Board within five days after such acceptance.

Issued this 25th day of February 1943.

(1) "Shellac" means lac of all grades produced from the secretion of Laciffer Lacca Kerr (Tachardia Lacca) including dry, cut, bleached or otherwise processed shellac, seedlac or other types of lac, but excluding such lac after it has been incorporated into protective or technical coatings or molding compounds, or after it has been mixed with a substantial quantity of other materials (except chlorine, alcohol or other solvents, or impurities in the original lac), or has been made an integral part of some article (such as electrical equipment or parts). This ex-emption shall not apply to lac processed no further than cutting or bleaching. (5) "Supplier" means any person, includ-ing any importer, engaged in the business of

selling shellac to other persons. (6) "Inventory" of a person includes all shellac to or in which such person has any title or equity of redemption, as well as the inventory as so defined of affiliates and sub-sidiaries of such person, but excluding shellac ordered for future delivery for which payment has not been made.

(2) Each person authorized to accept delivery of shellac shall use such material only for the purpose authorized except as otherwise specifically directed by the Director General for Operations.

(3) Shellac allocated for inventory shall be reserved intact and shall not be used, processed or delivered except as further specifically directed by the Director General for Operations. Likewise, shellac which is not used for the purpose for which it was allocated shall revert to inventory as though allocated for inventory.

(4) Authorizations for a particular allocation month shall not terminate at the end of such month, except with respect to delivery to and acceptance of delivery by any consumer who

(i) Requires the supplier to postpone any authorized delivery beyond ten days after the close of the allocation month; or

(ii) Fails to place an order with the supplier for the authorized shellac before the end of the allocation month.

(5) In addition to regular allocations of shellac by the Director General for Operations for each allocation month, the Director General for Operations at his discretion, notwithstanding the provisions of paragraph (c) or (d) hereof. may issue special directions to any person with respect to use, processing, delivery or acceptance of delivery of shellac by such person,

(c) Existing stock exceptions. The provisions of paragraph (b) (1) shall not apply to:

(1) Shellac which was cut or bleached and in the possession of a person other than a cutter, bleacher or importer prior to February 25, 1943; or

(2) Seed-lac which was cut or bleached prior to February 25, 1943, subject to any specific directions which may have been issued to the cutter or bleacher by the Director General for Operations with respect to such seed-lac.

(d) General exceptions. The provisions of paragraph (b) (1) shall not apply to:

(1) The use or processing for testing purposes by any person in any one calendar month of not more than 20 lbs. of shellac; or the delivery of samples of shellac of not more than 20 lbs, each by any person to any other person and the use of such samples of shellac by the deliveree for testing purposes, provided that no person during any one calendar month shall accept delivery of more than 20 lbs. of shellac for testing purposes, or deliver more than 50 lbs. of shellac for testing purposes.

(3) Delivery of shellac by any person to Defense Supplies Corporation, Commodity Credit Corporation, or any other Government agency which may from time to time be specified by the Director General for Operations.

(4) The importation of shellac into the United States or its territories and possessions, the acceptance of delivery of such shellac by the consignee thereof and the delivery by such consignee to any person who purchased or contracted to purchase such shellac prior to its importation; provided, that nothing contained in this paragraph (d) (4) shall alter the requirements of General Imports Order M-63, as now or hereafter amended.

(5) Delivery of shellac by any person to a supplier; provided, however, that no supplier shall deliver shellac to another supplier pursuant to this paragraph (d) unless the aggregate amount of (5) shellac held in inventory by the supplier making delivery is less than ten thousand (10,000) pounds immediately prior to the delivery.

The third supplier and any subsequent suppliers to whom the set of PD-617 forms are forwarded, shall add similar additional parts in the same form and at the same time add one copy of all parts of the complete set before forwarding the set to another supplier.

(3) Each supplier receiving a set of PD-617 forms from a consumer or from another supplier and not needing to apply for delivery of shellac from another supplier, shall forward such forms, without making any entry therein or adding any additional copies, to the War Production Board, Chemicals Division, Washington, D. C., Ref: M-106, an inventory report on Form PD-334 (revised) in the manner prescribed therein. Each person having a lesser quantity of shellac who shall receive a set of PD-334 forms from the War Production Board shall so certify in such forms as indicated and shall return such forms to the War Production Board.

 (2) Each person who shall accept delivery of shellac pursuant to paragraph
 (d) (5) shall, within twenty-four hours after acceptance of such delivery, report by letter addressed to the War Production Board, Chemicals Division, Washington, D. C., Ref: M-106, the amount and grade of shellac delivered and the names of the persons making and accepting such delivery.

(3) Each person affected by this order shall file such other reports as may from time to time be required by the Director General for Operations.

(h) Miscellaneous provisions—(1) Applicability of regulations. This order and all transactions affected hereby are subject to all applicable provisions of War Production Board Regulations, as amended from time to fime, except Priorities Regulation No. 13, which shall be subject to this order to the extent it is inconsistent herewith.

(2) *Records.* Each person who shall use or participate in any transaction with respect to shellac shall keep and preserve for a period of not less than two years accurate and complete records of all such transactions and of his use and inventory of shellac.

(3) Violations. Any person who wilfully violates any provision of this order, or who, in connection with this order, wilfully conceals a material fact or furnishes false information to any department or agency of the United States is guilty of a crime, and upon conviction may be punished by fine or imprisonment. Between July 29, 1942, and October 1, 1942, except to fill orders bearing a preference rating of A-1-a or higher, no manufacturer shall put into process foreign silver for restricted uses in excess of one-twelfth of the aggregate amount by weight of such foreign silver put into process by such manufacturer for restricted uses during the year 1941 or in excess of one-sixth of the aggregate amount by weight of such foreign silver put into process by such manufacturer for restricted uses during the period from January 1, 1942, to July 1, 1942, whichever is greater. Except to fill orders bearing a preference rating of A-1-a or higher, no manufacturer shall put into process any foreign silver for restricted uses, nor shall he process further any partially processed products or parts thereof of foreign silver on List A, unless the foreign silver was put into process prior to October 1, 1942, and unless the products or parts will be finished by November 15, 1942. After October 1, 1942, except to fill orders bearing a preference rating of A-1-a or higher, no manufacturer shall put into process any foreign silver for restricted uses and after November 15, 1942, except to fill orders bearing a preference rating of A-1-a or higher, no manufacturer shall process any foreign silver for restricted uses.

[Note: The word "foreign" was struck from paragraphs (h) and (i) Feb. 25, 1943.]

(e) Restrictions upon the purchase or receipt of domestic silver for restricted uses. In the period between February 25, 1943, and April 1, 1943, and in any calendar month thereafter until further notice, no manufacturer shall purchase or receive domestic silver for restricted uses, except to fill orders bearing a preference rating of A-1-a or higher, in excess of 1/24 of the aggregate amount by weight of all silver purchased or received (not including receipts under toll agreement) by such manufacturer for restricted uses during the calendar year 1941 or the calendar year 1942, whichever is greater; Provided, however, That such manufacturer, in computing the amount of domestic silver which he is entitled to purchase or receive under the foregoing provision, shall deduct from his said aggregate purchases or receipts for restricted uses for the year 1941 or 1942, as the case may be, the aggregate amount by weight of sales made by him in such year of silver scrap or silver waste material resulting from his processing operations.

(f) Restrictions upon manufacture of domestic silver for restricted uses. In the period between February 25, 1943, and April 1, 1943, and in any calendar month thereafter until further notice, no manufacturer shall put into process domestic silver for restricted uses, except to fill orders bearing a preference rating of A-1-a or higher, in excess of 1/24 of the aggregate amount by weight of all silver put into process by such manufacturer for restricted uses during the calendar year 1941 or the calendar year 1942, whichever is greater; Provided, however, That such manufacturer, in computing the amount of domestic silver which he is entitled to put into process under the foregoing provision, shall deduct from the said aggregate amount put into process by him for restricted uses for the year 1941 or 1942, as the case may be, the aggregate amount by weight of sales made by him in such year of silver scrap or silver waste material resulting from his processing operations.

(g) Special exception as to domestic silver. The restrictions of this order as to the purchase, receipt, and manufacture of domestic silver for restricted uses shall not apply to any manufacturer:

(1) Who manufactures jewelry by the use of hand tools exclusively; or

(2) Who meets each and all of the following requirements:

(i) He was engaged in the silver manufacturing business throughout the year 1941;

(ii) His gross receipts in the year 1941 from the sale of silver products did not exceed \$25,000;

(iii) He continues to employ five persons or less in such silver manufacturing business, each of whom is either over the age of 50 years or physically incapacitated from performing ordinary factory labor; and

(iv) His gross sales of silver products for the calendar year 1943 and for each calendar year thereafter do not exceed \$35,000 per year.

(h) Delivery certificate for silver. No supplier shall deliver silver to any manufacturer and no manufacturer shall receive silver from any supplier unless the manufacturer shall make and deliver to the supplier, or endorse on the purchase order, a certificate, manually signed by the manufacturer or a responsible official thereof, in substantially the following form, to-wit:

The undersigned hereby certifies that he is familiar with the terms of Conservation Order M-199; that he is a manufacturer as such term is used in such order, and that the silver covered by the accompanying order of even date shall be received and used as permitted by said Order M-199.

Such certificate shall constitute a representation by the manufacturer to the supplier and the War Production Board of the facts stated therein. The supplier shall be entitled to rely on such representation unless he knows or has reason to believe it to be false.

[Note: Paragraphs (h), (i), (j), (k), (l) and (m) formerly designated (e), (f), (g), (h), (i) and (j).]

(i) General exception. None of the restrictions in this order as to sale, purchase, delivery, receipt, or use of silver shall be applicable to the United States or any of its departments or governmental agencies.

(j) Repair exception. The restrictions of this order shall not apply to a person repairing a used article on or off the premises of the owner, if the person making the repair does not use silver weighing in the aggregate more than 3 ounces and if any putting into process or processing done by such person is for the purpose of making the specific repair. The term "repair" as used in this paragraph shall include the replating of used articles, provided the article was originally made of silver or silver-plated material.

(k) Limitations of invantories. No manufacturer shall receive delivery of silver, in the form of raw materials, semiprocessed materials, finished parts, or sub-assemblies, nor shall he put into process any raw material, in quantities which in either case shall result in an inventory of raw, semi-processed, or finished material in excess of a minimum practicable working inventory, taking into consideration the limitations placed upon the use of silver by this order.

(1) Reports. Each supplier and each manufacturer and every other person affected by this order shall file such reports as may be requested from time to time by the Director General for Operations.

(m) Miscellaneous provisions-(1) Appeal. Any person affected by this order who considers that compliance therewith would work an exceptional and unreasonable hardship upon him, or that it would result in a degree of unemployment which would be unreasonably disproportionate compared with the amount of silver conserved, or that compliance with this order would disrupt or impair a program of conversion from non-defense to defense work, may appeal to the War Production Board by letter or other written communication, in triplicate, setting forth the pertinent facts and the reasons he considers he is entitled to relief. The Director General for Operations may thereupon take such action as he deems appropriate.

(2) Applicability of order. The prohibitions and restrictions contained in this order as to foreign silver shall apply to the use of such material in all items manufactured after July 29, 1942, irrespective of whether such items are manufactured pursuant to a contract made prior or subsequent to July 29, 1942. The prohibitions and restrictions contained in this order as to domestic silver shall apply to the use of such material in all items manufactured after February 25, 1943, irrespective of whether such items are manufactured pursuant to a contract made prior or subsequent to February 25, 1943. Insofar as any other order of the Director General for Operations may have the effect of limiting or curtailing to a greater extent than herein provided. the use of foreign or domestic silver in the production of any item, the limitations of such other order shall be observed.

(3) Applicability of Priorities Regulations. This order and all transactions affected thereby are subject to all applicable provisions of the Priorities Regulations of the War Production Board, as amended from time to time.

(4) Communications to War Production Board. All reports required to be filed hereunder, and all communications concerning this order, shall, unless otherwise directed, be addressed to: War Production Board, Miscellaneous Minerals Division, Washington, D. C. Ref.: M-199.

(5) Violations. Any person who wilfully violates any provision of this order, or who, in connection with this order, wilfully conceals a material fact or furnishes false information to any department or agency of the United States is guilty of a crime, and upon conviction may be punished by fine or imprisonment. In addition, any such person may be prohibited from making or obtaining further deliveries of, or from processing or using, material under priority control and may be deprived of priorities assistance.

Issued this 25th day of February, 1943.

Director General for Operations.

INTERPRETATION 1

Conservation Order M-199 imposes certain limitations upon the amount of foreign silver which a manufacturer may put into process for restricted uses. In many silver manufacturing processes, a manufacturer starts with a certain amount of silver in primary shapes and ends the operation with a large part of such silver in the form of scrap. It is custom-ary for the manufacturer in these cases to have this scrap melted, rolled, or otherwise processed so as to return it to a primary shape in which it can again be subjected to manu-facturing processes. This reforming of the sliver scrap in some instances is done by the manufacturer himself, in other instances the work is done by others under toll agreement. The question has been presented as to whether the processing of this reformed scrap must be considered as coming within the meaning of the term "put into process" or whether such processing of reformed scrap shall be considered as only the continuation of a processing operation which began when the manufacturer processed for the first time in any form for a restricted use the specific amount of silver from which such scrap was produced.

It is hereby determined that for the purposes of Order M-199, the term "put into process" shall be deemed to cover only the manufacturer's first processing for a restricted use of a given amount of silver. It shall not be deemed to cover the subsequent processing of reformed scrap produced therefrom, whether such reforming is done by the manufacturer himself or by others for him under toll agreement. The term shall be deemed to cover, however, the processing for a restricted use of reformed scrap which was produced in a manufacturing operation which is not restricted under the order. (Issued September 1, 1942.)

The fulfillment of requirements for the defense of the United States has created a shortage in the supply for defense, for private account and for export of lumber and other materials used in the manufacture of matches; and the following order is deemed necessary and appropriate in the public interest and to promote the national defense:

§ 3193.1 Limitation Order L-263-Definitions. (1) "Strike-on-box (a) match" means a wood splint match normally strikeable on the box only, through the special preparation of the match head and the striking surface of the box.

(4) "Nought-size match" means a strike-anywhere match normally sold in boxes containing between 37 and 41 matches.

(5) "Single-lined board" means any paper board having a lining on one side containing virgin pulp or high grade waste or a combination thereof, the center and back being composed solely of materials listed in Schedule A annexed hereto.

(6) "Distributor" means a person who purchases matches for sale at wholesale and includes any person who purchases matches directly from a match manufacturer, but shall not include the Army or Navy of the United States, the United States Maritime Commission or War Shipping Administration.

(7) "30-day supply" or "45-day supply" means one-twenty-fourth and onesixteenth, respectively, of the total guantity of matches of which delivery was accepted during the two year period January 1, 1941, to December 31, 1942.

(b) Restrictions on production and packaging. No manufacturer of matches shall on and after March 27, 1943:

(5) Package in any caddy a quantity of book match books containing in the aggregate less than 1,000 book match splints.

(6) Use in stitching any book match, steel wire heavier than 25 gauge wire or use more than 7/8 of an inch of wire for each 20 book match splints.

(7) Manufacture more than one size of book match splint, nor shall the width of paper board used exceed 1.25 inches for each ten match splints.

(8) Manufacture any box for strikeon-box matches having a phosphorus striking surface greater than the area of one side of such box.

(9) Manufacture any cover for book matches having a phosphorus striking surface exceeding 1/4 inch in width.

(10) Use in the manufacture of any match, match box, book cover, or caddy, any metal powder, metallic ink, lacquer, spirit varnish or over-print varnish.

(2) The quantity of matches which may be ordered or received by a distributor who at the time of placing such order or of such receipt does not own or have in his possession more than the 30-day supply specified in paragraph (c) (1) hereof, shall not exceed a 45-day supply: Provided, however, That this paragraph (c) (2) shall not prevent a distributor from ordering or accepting delivery of a single carload of matches or a single truck load of matches where shipment was made to him by carload or truck load, as the case may be, during the two year period January 1, 1941 to December 31, 1942.

(3) No person shall deliver matches to a distributor if he knows or has reason to believe that such delivery will be in violation of paragraphs (c) (1) and (c) (2) hereof.

The applicant shall in such case note on such form any changes in the nature or amount of his use since the date of the original application. Waste," is amended; new items are added to the "Men's Wear" and "Miscellaneous" categories in Table II: Table III. "Maximum Prices for Knitted Wool Clips," is amended; and an item is added to the "Miscellaneous" category in Table IV; and in § 1410.81 the "Maximum Charge" table is amended by Amendment 5 so that Maximum Price Regulation 123 shall read as follows:

In the judgment of the Price Administrator, the prices of raw and processed wool waste materials have risen and are threatening further to rise to an extent and in a manner inconsistent with the purposes of the Emergency Price Control Act of 1942. The Price Administrator has ascertained and given due consideration to the prices of raw and processed wool waste materials prevailing between October 1 and October 15. 1941, and has made adjustments for such relevant factors as he has determined and deemed to be of general applicability. So far as practicable, the Price Administrator has advised and consulted with representative members of the industry which will be affected by this Regulation.

In the judgment of the Price Administrator, the maximum prices established by this Regulation are and will be generally fair and equitable and will effectuate the purposes of said Act. A statement of the considerations 2 involved in the issuance of this Regulation has been issued simultaneously herewith and has been filed with the Division of the Federal Register.

Therefore, under the authority vested in the Price Administrator by the Emergency Price Control Act of 1942, and in accordance with Procedural Regulation No. 1,3 issued by the Office of Price Administration, Maximum Price Regulation No. 123 is hereby issued.

DEHYDRATING OF CITRUS PULP AND WASTE INDUSTRY

NOTICE OF OPPORTUNITY TO PETITION, ETC.

Notice of opportunity to petition for review of the determination in the matter of the rehearing of the application for the exemption of the dehydrating of citrus pulp and waste from the maximum hours provisions of the Fair Labor Standards Act of 1938 as an industry of a seasonal nature, pursuant to section 7 (b) (3) of the Act and Part 526, as amended, of the regulations issued thereunder.

Whereas the Kuder Citrus Pulp Company of Florida and various other parties filed an application for the exemption of the dehydrating of citrus pulp and waste from the maximum hours provisions of the Fair Labor Standards Act of 1938, as an industry of a seasonal nature, pursuant to section 7 (b) (3) of the Act and Part 526, as amended, of the regulations issued thereunder; and

Whereas in accordance with § 526.5 of the regulations, the Administrator of the Wage and Hour Division determined that a prima facie case for the granting of the exemption had been shown, and notice of this preliminary determination was published in the FEDERAL REGISTER (6 F.R. 1697) on March 29, 1941; and

Whereas within 15 days following that preliminary determination, the Administrator received objection and request for a hearing from the Citrus By-Products Workers Union No. 20831, of Los Angeles, California; and

Whereas pursuant to notice a public hearing was held on June 5, 1941 at Los Angeles, California before Presiding Officer Harold Stein, a duly authorized representative of the Administrator, who upon the basis of the record made at the hearing, found that the dehydrating of citrus pulp and waste, and the manufacture of cattle feed therefrom, is not an industry of a seasonal nature within the meaning of section 7 (b) (3) of the Act and Part 526 of the regulations, and determined that the application should be denied, and notice of this finding was published in the FEDERAL REGISTER (6 F.R. 5647) on November 6, 1941; and

Whereas, petitions were filed by the applicants pursuant to § 526.7 of the regulations for review of the said denial; and

Whereas the Administrator thereupon set the matter for further hearing pursuant to §§ 526.5 and 526.6 of the regulations before an authorized representative of the Administrator, for the purpose of taking additional evidence on the questions raised by the said petitions in lieu of reviewing the determination under the provisions of § 526.7 of the regulations; and

Whereas the Administrator then gave notice of public hearings to be held at Tampa, Florida on January 12, 1942, at San Antonio, Texas on January 20, 1942. and at Los Angeles, California on January 26, 1942, before James G. Johnson, authorized as representative of the Administrator to take testimony, to hear argument, and to determine:

Whether the dehydrating of citrus pulp and waste is an industry of a seasonal nature within the meaning of section 7 (b) (3) of the Act and Part 526, as amended, of the regulations issued thereunder, and if so, the appropriate limits of said industry; and

Whereas, the hearing scheduled for Los Angeles was indefinitely postponed at the instance of the interested parties, and the hearings scheduled for Tampa and San Antonio were, pursuant to notice, consolidated into a public hearing held on January 16, 1942 at Washington, D. C., before James G. Johnson, as Presiding Officer, who made the following findings of fact and determination:

1. The dehydration establishments receive the citrus pulp and waste from the citrus canneries as soon as it becomes available. The pulp must be processed within a 2 few hours after the juice or sections have been removed from the fruit. The dehydra-tion plants operate during the period or periods in which citrus cannings and juicing plants operate and are dependent entirely upon these plants for their principal raw materials.

3. Citrus waste is available to the dehydraa clirus waste is available to the denytra-tion industry in Texas during a period of not over six months out of each year. Citrus waste is technically available in Florida for a period of approximately eight months. However, due to various factors it is usually available as a raw material to the citrus dehydration industry for a period of time averaging six to seven months out of each year.

4. The dehydration of citrus pulp and waste and the manufacture of cattle feed therefrom, insofar as the dehydration of citrus pulp and waste in the states of Florida and Texas are concerned, is an industry of a seasonal nature within the meaning of section 7 (b) (3) of the Act and part 526 of the Regulations issued thereunder.

The application for seasonal exemption under section 7 (b) (3) is granted to the branch or branches of the citrus pulp and waste dehydration industry, located in the states of Florida and Texas.

Whereas it appears from the findings and determination of Presiding Officer Johnson that he concluded that the operations of dehydrating citrus pulp and waste in the states of Florida and Texas constitute a branch or branches of the dehydration of citrus pulp and waste industry and are of a seasonal nature within the meaning of the Act and the Regulations; and

Whereas the findings and determination of James G. Johnson as Presiding Officer were duly filed with the Administrator on January 8, 1943, and are now on file in Room 1619, National Office of the Wage and Hour Division, 165 West 46th Street, New York, New York, and are available for examination by all interested parties;

Now, therefore pursuant to § 526.7 of the aforesaid regulations, notice is hereby given that any person aggrieved by the said determination may with 15 days after the date this notice appears in the FEDERAL REGISTER, file a petition with the Administrator at the National Office of the Wage and Hour Division, 165 West 46th Street, New York, New York, requesting that he review the action of the said representative upon the record of the hearing. Such petition shall set forth the grounds upon which the petition for review is based.

Signed at New York, New York, this 23rd day of February 1943.
