ARMY DAY, 1943

BY THE PRESIDENT OF THE UNITED STATES OF AMERICA

A PROCLAMATION

WHEREAS Senate Concurrent Resolution 5, 75th Congress, 1st Session, which was agreed to by the House of Representatives on March 16, 1937 (50 Stat. 1108), provides:

"That April 6 of each year be recognized by the Senate and House of Representatives of the United States of America as Army Day, and that the President of the United States be requested, as Commander in Chief, to order military units throughout the United States to assist civic bodies in appropriate celebration to such extent as he may deem advisable; to issue a proclamation each year declaring April 6 as Army Day, and in such proclamations to invite the Governors of the various States to issue Army Day proclamations: *Provided*, That in the event April 6 falls on Sunday, the following Monday shall be recognized as Army Day";

WHEREAS the men of the United States Army have carried the flag of the United States and the ideals which it represents to every part of the earth, and with their brothers-in-arms from the nations united with us are offering their lives for the future of America and of the world;

WHEREAS our soldiers on the firing lines and in posts of danger depend for their very lives on the constant flow of ammunition, weapons and supplies from their brothers at home; and on the fidelity of their countrymen to maintain the ideals which they bravely defend:

NOW, THEREFORE, I, FRANKLIN D. ROOSEVELT, President of the United States of America, do hereby proclaim Tuesday, April 6, 1943, as Army Day; and I invite the Governors of the States to issue proclamations appropriate to that day; and I request that on Army Day, while intensifying the war effort in factories, fields, mines, transportation lines and ports, the American people reflect upon the soldiers whose very lives

they hold in trust and upon ways and means of increasing the flow of supplies to them and of maintaining in this nation a country worthy of their sacrifice and fit for their return.

IN WITNESS WHEREOF, I have hereunto set my hand and caused the seal of the United States of America to be affixed.

DONE at the City of Washington this 26th day of March in the year of our Lord nineteen hundred and [SEAL] forty-three and of the Independence of the United States of America the one hundred and sixty-seventh.

§ 724.517 *Allotments by county committees.*—An amount not in excess of two percent of the 1940 acreage allotment for each State will be available for allotment by the respective county committees. A farm shall be eligible upon application for allotment as provided hereunder (1) if the committee finds that the 1942 allotment for the farm is relatively smaller in relation to the land, labor and equipment available for the production of tobacco on the farm than the average of the allotments in relation to such factors on other farms in the county, or (2) if tobacco was harvested on the farm in 1942 and no acreage allotment was established for the farm. In making the adjustment in the farm acreage allotment the county committee shall consider the past acreage of tobacco (harvested and diverted), the land, labor and equipment available for the production of tobacco, and crop rotation practices. Particular consideration should be given to the land, labor and equipment available for the production of war crops as well as the proposed adjustment in to-

§ 727.517 *Allotments by county committees.* An amount not in excess of two percent of the 1940 acreage allotment for each State will be available for allotment by the respective county committees. A farm shall be eligible upon application for allotment as provided hereunder (1) if the committee finds that the 1942 allotment for the farm is relatively smaller in relation to the land, labor and equipment available for the production of tobacco on the farm than the average of the allotments in relation to such factors on other farms in the county, or (2) if tobacco was harvested on the farm in 1942 and no acreage allotment was established for the farm. In making the adjustment in the farm acreage allotment, the county committee shall consider the past acreage of tobacco (harvested and diverted), the land, labor and equipment available for the production of tobacco, and crop rotation practices. Particular consideration should be given to the land, labor and equipment available for the production of war crops as well as the proposed adjustment in tobacco acreage. In the case of any farm on which tobacco was harvested in 1942 for which no acreage allotment was established, the committee may establish an allotment not exceeding ten percent of the acreage of tobacco harvested on the farm in 1942. Without prior approval of the State committee, the acreage allotted under this section shall not exceed one percent of the county acreage allotment for 1940.

All adjustments as provided above shall be subject to the approval of the State committee.

TITLE 29—LABOR

Chapter V—Wage and Hour Division

DEHYDRATION OF CITRUS PULP AND WASTE IN FLORIDA AND TEXAS

DETERMINATION AS INDUSTRY OF SEASONAL NATURE

In the matter of the determination that dehydrating of citrus pulp and waste in the States of Florida and Texas is of a seasonal nature, pursuant to section 7 (b) (3) of the Fair Labor Standards Act of 1938 and Part 526, as amended, of the regulations issued thereunder.¹

Whereas the Kuder Citrus Pulp Company of Florida and various other parties filed an application for the exemption of the dehydrating of citrus pulp and waste from the maximum hours provisions of the Fair Labor Standards Act of 1938, as an industry of a seasonal nature, pursuant to section 7 (b) (3) of the Act and Part 526, as amended, of the regulations issued thereunder; and

Whereas in accordance with § 526.5 of the regulations, the Administrator of the Wage and Hour Division determined that a prima facie case for the granting of the exemption had been shown, and

¹ This document affects the table in § 526.101.

notice of this preliminary determination was published in the FEDERAL REGISTER (6 F.R. 1697) on March 29, 1941; and

Whereas within 15 days following that preliminary determination, the Administrator received objection and request for a hearing from the Citrus By-Products Workers Union No. 20831, of Los Angeles, California; and

Whereas pursuant to notice a public hearing was held on June 5, 1941 at Los Angeles, California before Presiding Officer Harold Stein, a duly authorized representative of the Administrator, who upon the basis of the record made at the hearing found that the dehydrating of citrus pulp and waste, and the manufacture of cattle feed therefrom, is not an industry of a seasonal nature within the meaning of section 7 (b) (3) of the Act and Part 526 of the regulations, and determined that the application should be denied, and notice of this finding was published in the FEDERAL REGISTER (6 F.R. 5647) on November 6, 1941; and

Whereas petitions were filed by the applicants pursuant to § 526.7 of the regulations for review of the said denial; and

Whereas the Administrator thereupon set the matter for further hearing pursuant to §§ 526.5 and 526.6 of the regulations before an authorized representative of the Administrator, for the purpose of taking additional evidence on the questions raised by the said petitions in lieu of reviewing the determination under the provisions of section 526.7 of the regulations; and

Whereas the Administrator then gave notice of public hearings to be held at Tampa, Florida on January 12, 1942, at San Antonio, Texas on January 20, 1942, and at Los Angeles, California on January 26, 1942, before James G. Johnson, authorized as representative of the Administrator to take testimony, to hear argument, and to determine:

Whether the dehydrating of citrus pulp and waste is an industry of a seasonal nature within the meaning of section 7 (b) (3) of the Act and Part 526, as amended, of the regulations issued thereunder, and if so, the appropriate limits of said industry; and

Whereas the hearing scheduled for Los Angeles was indefinitely postponed at the instance of the interested parties, and the hearings scheduled for Tampa and San Antonio were, pursuant to notice, consolidated into a public hearing held on January 16, 1942 at Washington, D. C., before James G. Johnson, as Presiding Officer, who made the following findings of fact and determination:

1. The dehydration establishments receive the citrus pulp and waste from citrus canneries as soon as it becomes available.

2. The pulp must be processed within a few hours after the juice or sections have been removed from the fruit. The dehydration plants operate during the period or periods in which citrus canning and juicing plants operate and are dependent entirely upon these plants for their principal raw materials.

3. Citrus waste is available to the dehydration industry in Texas during a period of not over six months out of each year. Citrus waste is technically available in Florida for a period of approximately eight months.

However, due to various factors it is usually available as a raw material to the citrus dehydration industry for a period of time averaging six to seven months out of each year.

4. The dehydration of citrus pulp and waste and the manufacture of cattle feed therefrom, insofar as the dehydration of citrus pulp and waste in the states of Florida and Texas are concerned, is an industry of a seasonal nature within the meaning of section 7 (b) (3) of the Act and part 526 of the Regulations issued thereunder.

The application for seasonal exemption under section 7 (b) (3) is granted to the branch or branches of the citrus pulp and waste dehydration industry, located in the states of Florida and Texas.

Whereas it appears from the findings and determination of Presiding Officer Johnson that he concluded that the operations of dehydrating citrus pulp and waste in the states of Florida and Texas constitute a branch or branches of the dehydration of citrus pulp and waste industry and are of a seasonal nature within the meaning of the Act and the regulations; and

Whereas it appears from the statement of Presiding Officer Johnson, submitted in support of his findings and determination, that the Florida citrus pulp and waste dehydration plants shut down for about six months each year, except for an insubstantial amount of production that may be produced during a trial or experimental period shortly before the main production season; and

Whereas the findings and determination of James G. Johnson as Presiding Officer, including the statement in support thereof, were duly filed with the Administrator on January 8, 1943, and are now on file in Room 1619, National Office of the Wage and Hour Division, 165 West 46th Street, New York, New York, and are available for examination by all interested parties; and

Whereas on February 26, 1943, the Administrator caused to be published in the FEDERAL REGISTER (8 F.R. 2448) a notice which stated that, pursuant to the provisions of § 526.7 of the aforesaid regulations, any person aggrieved by the said determination might within 15 days after February 26, 1943 file a petition with the Administrator requesting that he review the action of the said representative upon the record of hearing before the said representative; and

Whereas no petition for review has been filed within the 15-day period,

Now, therefore, pursuant to the provisions of § 526.7 of the regulations, the exemption provided by section 7 (b) (3) of the Fair Labor Standards Act of 1938 will become effective on the date this notice appears in the FEDERAL REGISTER. This exemption is applicable only as specified by the aforesaid findings and determination of James G. Johnson as Presiding Officer.

Signed at New York, New York, this 25th day of March 1943.

L. METCALFE WALLING,
Administrator.

PART 1010—SUSPENSION ORDERS

[Suspension Order S-255]

J. B. RUSSELL, INC.

J. B. Russell, Inc., Lexington, Missouri, is a corporation engaged in the retail distribution of lumber and builders' supplies. From October 8 to November 14, 1942, the Company made deliveries to Oscar Pangborn, Lexington, Missouri, of \$512.02 worth of lumber, cement, nails, and other construction material to be incorporated in a residence for the said Oscar Pangborn the estimated cost of which was in excess of the permitted cost of construction as defined by Conservation Order L-41. Application for specific authorization for the construction of said residence was made by Oscar Pangborn to the United States Department of Agriculture County War Board and was denied on August 4, 1942. The Company was familiar with the provisions of Conservation Order L-41, assisted Oscar Pangborn in preparing his application for authorization, knew that authorization of the War Production Board was required and that such authorization had been denied. Consequently, the making of the deliveries of construction lumber and building supplies as aforesaid constituted a wilful violation of Conservation Order L-41.

This wilful violation of Conservation Order L-41 has impeded and hampered the war effort of the United States. In view of the foregoing facts, *It is hereby ordered*, That:

§ 1010.255 *Suspension Order No. S-255.* (a) Deliveries of material to J. B. Russell, Inc., its successors and assigns, shall not be accorded priority directly or indirectly over deliveries under any other contract or order, and no preference rating shall be assigned, applied or extended to such deliveries by means of preference rating certificates, preference rating orders, general preference orders, or any other orders or regulations of the War Production Board, except as specifically authorized by the War Production Board.

(b) No allocation shall be made to J. B. Russell, Inc., its successors or assigns, of any material, the supply or distribution of which is governed by any order of the War Production Board, except as specifically authorized by the War Production Board.

(c) Nothing contained in this order shall be deemed to relieve J. B. Russell, Inc., its successors and assigns, from any restriction, prohibition, or provision contained in any order or regulation of the War Production Board, whether now in force or hereafter issued, except in so far as the same may be inconsistent with the provisions hereof.

(d) This order shall take effect on March 28, 1943 and shall expire on June 28, 1943, at which time the restrictions contained in this order are to be of no further effect.

Issued this 26th day of March 1943.

A. rating) of 16 cubic feet or less. A low temperature mechanical refrigerator designed for the storage of frozen foods or for the quick-freezing of food, where the low temperature compartment customarily operates at a temperature of not higher than 15 degrees above zero (Fahrenheit) and contains 75% or more of the total refrigerating space in the refrigerator, shall not be considered a domestic mechanical refrigerator.

(3) "New domestic mechanical refrigerator" means any domestic mechanical refrigerator which has never been used by an ultimate consumer, including any such refrigerator which has been used merely for demonstration purposes.

(4) "Manufacturer" means any person who manufactures or assembles new domestic mechanical refrigerators.

(b) *Restrictions on transfers of new domestic mechanical refrigerators.* No person shall transfer or accept transfer of any new domestic mechanical refrigerator except as permitted under the provisions of this paragraph (b). Whenever any manufacturer or distributor is authorized to transfer new domestic mechanical refrigerators under subparagraph (3) of this paragraph (b) or under paragraph (c) (2) (iii), such transfers shall be made as far as is practicable through his normal distributive outlets on a basis proportionate to his distribution of new domestic mechanical refrigerators to them, respectively, during the year 1941, regardless of any previous commitments or contracts.

(1) Any new domestic mechanical refrigerator may be transferred pursuant to a certificate of transfer under the provisions of paragraph (c) or pursuant to other specific authorization of the War Production Board.

(2) Any new domestic mechanical refrigerator may be transferred in fulfillment of any contract or purchase order for delivery of any such refrigerator to or for the account of the Army or Navy of the United States, the United States Maritime Commission or the War Shipping Administration.

(3) Any new electric or gas (but not kerosene) domestic mechanical refrigerator, which at 10 A. M. Eastern War Time, February 14, 1942, was in the inventory of a dealer, independent distributor or any other person not a manufacturer or affiliated distributor, may be transferred by any person to any other person without limit as to the number of transfers which may be made of any such refrigerator: *Provided*, That any transfer of a new domestic mechanical refrigerator to an ultimate consumer

under the provisions of this subparagraph (3) may be made only if such transferee executes a purchaser's certification, on Form PD-833, which is countersigned by the transferor.

Any new electric or gas domestic mechanical refrigerator which at 10 A. M. Eastern War Time, February 14, 1942, had been bought and fully paid for and was in the hands of the seller at that time, shall be deemed to have been in the inventory of the purchaser at 10 A. M. Eastern War Time, February 14, 1942.

(4) Any new kerosene domestic mechanical refrigerator which at 10 A. M. Eastern War Time, February 14, 1942, had been bought and fully paid for by an ultimate consumer, and was in the hands of the seller at that time may be delivered to the purchaser.

(5) Any person may distraint or levy by execution, attachment or similar form of judicial process, on any new domestic mechanical refrigerators, or repossess them on default, but may not transfer them thereafter except pursuant to the provisions of subparagraphs (1) and (2) of this paragraph (b) unless the refrigerators come within the provisions of subparagraph (3) of this paragraph (b).

(6) Any manufacturer may sell any new domestic mechanical refrigerator to Defense Supplies Corporation and Defense Supplies Corporation may resell any such refrigerators to the manufacturer from whom they were purchased.

(c) *Transfer of new domestic mechanical refrigerators by a certificate of transfer.* The War Production Board may in its discretion issue a certificate of transfer in either of the following forms:

(1) A certificate of transfer on Form PD-428 may be issued pursuant to a written application filed on Form PD-427 in accordance with the instructions contained thereon by a person desiring to purchase one or more new domestic mechanical refrigerators. Each such certificate of transfer, when signed by an authorized official of the War Production Board, authorizes the transfer to the person named of the refrigerators mentioned therein, in accordance with the terms stated. If the certificate is presented to a dealer or distributor who is unable to fill the order from his stock of refrigerators, such dealer or distributor may obtain the refrigerators necessary to fill the order by placing a written purchase order for such refrigerators with a manufacturer, distributor or other person endorsing thereon a statement in the following form:

I (We) have received Certificate of Transfer, No. —, signed by an authorized official of the War Production Board, covering these refrigerators, and do not have them in stock.

Name of Company
By -----

Title

Any person with whom a purchase order bearing such an endorsement is placed may, if he does not have enough refrigerators in stock to fill the order, extend it by placing his own purchase order with a Manufacturer or other person holding such refrigerators and endorsing thereon a statement in the following form:

Any person with whom a purchase order for new domestic mechanical refrigerators is placed having an endorsement in either of the above forms, unless he knows or has reason to believe it to be false, shall be entitled to rely on such endorsement and may transfer the refrigerators specified in such order in accordance with its terms.

(2) A certificate of transfer on Form PD-430 may be issued in order to permit the transfer of new domestic mechanical refrigerators:

(i) From one warehouse or place of storage to another warehouse or other place of storage, whether or not it involves any change in the ownership or title of such refrigerators;

(ii) From any person to any other person when the transfer does not come within the provisions of subparagraph (1) of this paragraph (c); or

(iii) From any manufacturer, affiliated distributor or independent distributor without limit as to the number of transfers which may be made of any such refrigerators to any person other than a person acquiring refrigerators for export to and consumption or use in any foreign country: *Provided, That*

(a) The words "unlimited transfer" appear on such certificate; and

(b) Any transfer to an ultimate consumer made under the provisions of this subdivision (iii) of this paragraph (c) (2) may be made only if such ultimate consumer executes a purchaser's certification on Form PD-833, which is countersigned by the transferor.

Whenever such certificates for "unlimited transfer" are issued by the War Production Board it shall take into consideration the number, price range, size and type of new domestic mechanical refrigerators in the stocks of manufacturers, affiliated distributors, and independent distributors on February 14, 1942 and thereafter;

(iv) From any manufacturer, affiliated distributor or independent distributor without limit as to the number of transfers which may be made of any such refrigerators to any person acquir-

Issued this 27th day of March 1943.

WAR PRODUCTION BOARD,
By J. JOSEPH WHELAN,
Recording Secretary.

INTERPRETATION 1

Supplementary General Limitation Order L-5-d, restricting the transfer of new domestic mechanical refrigerators, exempts from some of its restrictions a refrigerator which was in the hands of the seller at 10 a. m. Eastern War Time, February 14, 1942, and which "had been bought and fully paid for" prior to that time. The test to be employed in determining whether or not a refrigerator "had been bought and fully paid for" is whether the seller had received full payment at the specified time. If the full price of the refrigerator had been paid to the seller in cash, or by any other means, the refrigerator should be considered as "bought and fully paid for" regardless of the source of payment. It is not necessary that the full price be paid by the purchaser provided the seller had been fully paid. Thus if the purchaser had made a down payment of part of the purchase price and a finance company or bank had paid or credited the account of the seller with the balance of the price pursuant to a financing agreement with the purchaser, the refrigerators should be considered to have been "bought and fully paid for." In addition, in the absence of exceptional circumstances the receipt by the seller of a check prior to 10 a. m., Eastern War Time, February 14, 1942, for the full purchase price should be considered as payment in full before that time even though the check had not been cashed, deposited or otherwise collected. (Issued June 29, 1942.)

PART 1071—INDUSTRIAL AND COMMERCIAL REFRIGERATING AND AIR CONDITIONING MACHINERY AND EQUIPMENT

[General Limitation Order L-38 as Amended March 27, 1943]

Section 1071.1 *General Limitation Order L-38* as amended is hereby amended to read as follows:

The fulfillment of requirements for the defense of the United States has created a shortage in the supply of steel, copper, and other materials for defense, for private account and for export; and the following order is deemed necessary and appropriate in the public interest and to promote the national defense:

§ 1071.1 *General Limitation Order L-38*—(a) *Definitions*. For the purpose of this order:

(1) "System" means any refrigerating or air conditioning system, consisting of an assembly or combination of machinery, equipment, or other apparatus designed primarily to lower the temperature of, or remove water vapor from gaseous, liquid, or solid matter, directly or indirectly, by mechanical, chemical, or physical means. The term shall not include a domestic mechanical refrigerator as defined in paragraph (a) (10), a domestic ice refrigerator as defined in paragraph (a) (11), or a farm milk cooler as defined in paragraph (a) (12) of this order.

(2) "Parts" means any parts, materials, insulated enclosures, implements, or devices, designed for incorporation in a system or for use therewith in causing it to perform its functions.

(3) "New", when applied to any system or part, means a system or part that has never been sold and delivered to any person acquiring it for use. "Used", when so applied, means any system or part which has been so sold and delivered, regardless of whether or not it has subsequently been reconditioned or redesigned.

(4) "Authorized order" means any order for the delivery of a system or parts, which the War Production Board has authorized on Form PD-830 or PD-831 pursuant to paragraph (c) of this order.

(5) "Person" means any individual, partnership, association, business trust, corporation, governmental corporation or agency, or any organized group of persons, whether incorporated or not.

(6) "Producer" means any person to the extent that he is engaged in the manufacture, fabrication, or assembly of systems or parts. The term shall not include any sales or distribution outlet of a producer.

(7) "Dealer" means any person, other than a producer, engaged in the business of selling or distributing new, used, or reconditioned systems or parts, whether at wholesale, retail, or otherwise. The term includes any sales or distribution outlet of a producer.

(8) "Emergency repair service" means the repair of any installed system when, subsequent to its installation and operation, a breakdown occurs therein, or is immediately threatened. The term shall not include replacement of the high (pressure) side or condensing unit (with or without motor or condenser) except in sealed unit types, the low (pressure) side, or the insulated enclosure, or any change of the type of refrigerant, design, or capacity of the system; but shall include necessary replacement of any component part of the high side, low side, or insulated enclosure, if such part cannot be repaired and if the part installed is not of greater capacity than the part replaced, and shall also include the shop repair of the replaced component part.

(9) "Deliver" means to transfer physical possession, title, or ownership to another person, to install, or to place in the hands of any carrier or otherwise in transit for transfer of possession to another person, regardless of whether such transfer, installation, or shipment is for the purpose of sale, trade, loan, lease, or some other type of transaction.

(10) "Domestic mechanical refrigerator" means any refrigerator for household use which operates either by compression or absorption and which has a net capacity of 16 cubic feet or less (National Electric Manufacturing Association rating), but does not include any low temperature mechanical refrigerator designed for the storage of frozen foods or for the quick freezing of food where the low temperature compartment customarily operates at a temperature of not higher than 15 degrees above zero Fahrenheit and contains 75% or more of the total refrigerating space in the refrigerator.

(11) "Domestic ice refrigerator" means any non-mechanical ice chest or ice box for home use.

(12) "Farm milk cooler" means any immersion (drop-in) type or surface (tubular) type milk cooler for use on a farm, and includes any system or parts which have been installed in any such cooler, or acquired pursuant to an "authorized order" (as defined in paragraph (a) (4)) by a manufacturer of farm milk coolers for installation in such coolers. The term shall not include any (refrigerating) system or parts (except the cabinets and insulated enclosures of farm milk coolers) prior to actual acquisition thereof by such a manufacturer.

(13) "Industrial type extended surface heating equipment" means any apparatus employing a heat transfer element and designed primarily to increase the temperature of gaseous matter, in connection with the operation of any refrigerating or air conditioning system.

(14) "Industrial type humidifying equipment" means any apparatus designed primarily to add water vapor to gaseous matter, in connection with the operation of any industrial or commercial refrigerating or air conditioning system, or for any purpose other than the health or comfort of persons.

(15) "Comfort cooling system" means any system described as such on List F (made a part of this order) as amended from time to time.

(16) "Owned," when applied to any materials means such materials as were in the possession or control of the designated person, or in transit to him, on the date indicated.

(17) "Any person acquiring the same for use" shall include any person who purchases or otherwise acquires any systems, parts, or other equipment, except a dealer or producer acquiring systems, parts, or other equipment for resale, and reselling the same.

(b) *Restrictions on deliveries*—(1) *Parts for repair service*. (i) No dealer or producer shall deliver any new or used parts to the owner, lessee, or user of any used system, and no person shall accept delivery of any such parts, unless such parts are delivered either (a) for use in "emergency repair service" and to fill a purchase order bearing a preference rating of AA-4 or higher, or (b) to fill an "authorized order," or (c) for direct use by the Army, Navy, Maritime Commission, or War Shipping Administration, including orders for any Army or Marine Corps Post Exchange or any Navy Ships Service Department; and the parts replaced shall be disposed of in accordance with paragraph (e) of this order, if made of metal; and

(ii) No dealer or producer shall deliver any new or used parts to the owner, lessee, or user of a "comfort cooling system" for the repair of such system, except pursuant to an "authorized order," or pursuant to a purchase order bearing a preference rating of AA-4 or higher where all the parts necessary for the "emergency repair service" for such

system do not have an aggregate sales value in excess of the following: (a) \$25 where the aggregate installed capacity is not over 20 h. p. or tons of refrigeration (ASRE specifications), (b) \$50 where such capacity is over 20 h. p. or tons but not over 100 h. p. or tons, or (c) \$100 where such capacity is over 100 h. p. or tons. (If the parts required are to be obtained under several purchase orders placed either with the same supplier, or with different suppliers, so that the value of the parts furnished under each or any of such orders is less than the amounts specified above, such division shall not avoid the restriction of this subdivision (ii)). No such order for parts (having a value in excess of the applicable amount specified above) will be authorized unless it is demonstrated to the satisfaction of the War Production Board that the continued operation of such "comfort cooling system" is essential to avoid air conditions which would be intolerable or dangerous to health, and that such conditions cannot be avoided by the use of that portion of the system designed for the circulation of air, electric fans, or other power driven equipment possessed by the owner, lessee, or user of the system and/or by opening of windows or doors. No person shall accept delivery of any parts for the repair of a "comfort cooling system," except in accordance with the provisions of this subparagraph (1).

(2) *Other equipment*—(i) *List A items*. Any dealer, producer, or other person may deliver (unrestricted by this order) and any person may accept delivery of, any new or used item of equipment of any kind or type included on List A (made a part of this order as amended from time to time), or any new or used parts acquired by such dealer, producer, or other person prior to May 15, 1942 for use in any such equipment owned by him on May 15, 1942, except a new refrigeration condensing unit rated at more than $\frac{1}{2}$ h. p. and designed for remote installation.

(ii) *List B, Part I, items*. No dealer or producer shall deliver any new item of equipment of any kinds included on List B, Part I, (made a part of this order as amended from time to time) to any person acquiring the same for use, except pursuant to an "authorized order" to any agency or other person designated on said list; and no person shall accept delivery of any such item of equipment, except such an agency or other person receiving delivery pursuant to an "authorized order."

(iii) *List B, Part II, items*. No dealer or producer shall deliver any new item of equipment of any kinds included on List B, Part II (made a part of this order as amended from time to time) to any person acquiring the same for use, except to an agency designated on said list; and no person shall accept delivery of any such item of equipment except such an agency.

(iv) *Items for farm milk coolers*. No dealer or producer shall deliver any new (refrigerating) systems for use in farm milk coolers or parts for such systems other than the cabinets or insulated enclosures, to a manufacturer of such coolers or any other person, except pursuant to an "authorized order." The subsequent delivery of any such systems or parts acquired pursuant to an "authorized order" by such a manufacturer, or owned by him on April 6, 1943, or of any farm milk coolers in which any such systems or parts have been installed, shall not be restricted by the terms of this order.

(v) *Items exclusive of List A and List B items and farm milk coolers*. No dealer or producer shall deliver any new system of any kind or type, not referred to under the preceding subdivisions (i), (ii), (iii), or (iv), to any person acquiring the same for use, except pursuant to an "authorized order," or for direct use by the Army, Navy, Maritime Commission, or War Shipping Administration.

(vi) *Parts not for emergency repair service*. No dealer or producer shall deliver any new parts of any kind or size, or any used high side, compressor, turbo blower, condenser, low side, or evaporator, designed for use with a system rated at three horse power or more or having a rated capacity of three tons or more (American Society of Refrigerating Engineers' Specifications) to any person acquiring the same for use other than for emergency repair service, except pursuant to an "authorized order," or for direct use by the Army, Navy, Maritime Commission, or War Shipping Administration.

(vii) *Heating or humidifying equipment*. No dealer or producer shall deliver any new "industrial type extended surface heating equipment" or any "industrial type humidifying equipment" to any person acquiring the same for use, except pursuant to an "authorized order" or for direct use by the Army, Navy, Maritime Commission, or War Shipping Administration.

(viii) *List C*. No purchase order for any equipment referred to under subdivisions (v), (vi), or (vii) above will be authorized if such equipment is not to be used for a purpose described on List C (made a part of this order) as amended from time to time.

(ix) *Report of orders placed under (iii), (v), (vi), and (vii) for Army, etc.* On or before the 10th day of April, 1943, and the 10th day of each succeeding calendar month, each producer shall file with the War Production Board a letter, in triplicate, showing all orders accepted by him during the preceding calendar month for any new system referred to under subdivision (iii) above, or any new equipment referred to under subdivision (v) above, or any new major part (high side, compressor, turbo blower, condenser, insulated enclosure, low side, or evaporator, of any size) referred to under subdivision (vi) above, or any new equipment referred to under subdivision

(vii) above, and delivered, or to be delivered, to or for the account of (and for direct use by) the Army, Navy, Maritime Commission, or War Shipping Administration. Such letter shall also state the name of the purchasing agency, the name and address of the purchasing officer, the date of acceptance of such order, the required delivery date, and a brief description of the quantity, type, and size of the equipment ordered and the purchaser's order number. Copies of such purchase orders may be filed with such letter to furnish such detailed information, in lieu of incorporating the same therein. (This reporting requirement approved by the Bureau of the Budget in accordance with Federal Reports Act of 1942).

(x) As used in this paragraph (b) (2), the words "Army" and "Navy", shall not include any Army or Marine Corps Post Exchange or any Navy Ships Service Department.

(c) *Method of securing authorization for an "authorized order."* (1) (i) Application for the authorization required to make any purchase order an "authorized order" shall be made to the War Production Board by the person seeking to place such order, on Form PD-830 if the system or parts to be purchased are required for use in any cold storage warehouse, industrial or commercial ice plant, frozen food locker plant, food processing plant (except a dairy or ice cream plant requiring equipment having a capacity of five (5) horsepower or five (5) tons (ASRE specifications) or less), industrial processing of products other than food, refrigerated railroad car, truck, or ship, or any air conditioning installation of any size; and on Form PD-831, if for any other purpose.

(ii) The filing of such application shall relieve the applicant from the necessity of filing the application form required to obtain authorization for the placing or acceptance of a purchase order for any component part subject to Orders L-100, L-163, or L-172, to be included in the system covered by said application, and the inclusion of such component part in the production or delivery schedule of the manufacturer thereof.

(iii) If the system, parts, or other equipment required are for use in construction work subject to the terms of Conservation Order L-41, as amended from time to time, the application on Form PD-830 or PD-831 shall include only such materials as are necessary for installation of the system, parts, or other equipment covered thereby.

(2) The War Production Board may authorize any such order on Form PD-830 or PD-831 upon such conditions, if any, as it shall specify (except as to dates of production and delivery), and may assign a preference rating thereto or rerate any such order. Such authorization will be issued to the applicant upon one of said forms, and will be accompanied by separate authorizations for each of the component parts included therein if required under Orders L-100,

L-163, and L-172 of the War Production Board for the purposes specified, which shall be transmitted by the purchaser to his supplier, and by the latter to his suppliers of component parts when necessary for delivery of such component parts.

Nothing in this order, however, shall relieve any manufacturer from filing any periodical reports of production or delivery schedules or other operations, or from complying with any requirement or direction which may be issued by the War Production Board, as to scheduling or rescheduling of production or deliveries of any such component parts, as required by any other order of the War Production Board including Orders L-100, L-163, and L-172, or any specific directions from the War Production Board.

(3) Deliveries of any component parts covered by any such accompanying authorizations shall be made in accordance with the terms of such authorizations and the War Production Board orders pursuant to which they are respectively issued.

(d) *Restrictions on production—(1) Types and uses prohibited altogether—(i) List D items.* No producer shall manufacture any new system or equipment of any kind named or described on List D (made a part of this order) as amended from time to time, for delivery to any person or for any purpose.

(ii) *List E items.* No producer shall manufacture any new system or equipment of any kind named or described on List E (made a part of this order) as amended from time to time, except for direct use by an agency or person designated on said List and for a purpose (if any) designated thereon.

(iii) *Reach-in refrigerators and walk-in coolers.* No producer of reach-in refrigerators or prefabricated sectional walk-in coolers shall manufacture any such refrigerators or coolers for any purpose other than for direct use by the Army, Navy, Maritime Commission or War Shipping Administration, unless manufactured entirely from parts or materials owned by such producer on April 6, 1943; except, however, that any such producer may acquire from another such producer any such parts or materials owned by the latter on such date, and may use such acquired parts or materials in such manufacture. As used in this subdivision (iii), the words "Army" and "Navy" shall not include any Army or Marine Corps Post Exchange or any Navy Ships Service Departments.

(2) *Production for permitted types or uses.* (i) No producer shall commence the manufacture of any compressor or turbo blower for use in any high (compression) side rated at fifty (50) horse power or fifty (50) tons (ASRE specifications) or over, unless and until such producer shall have received an "authorized order" for which compressor, turbo blower or high side or for a system in which the same is to be used or an order for such a compressor, turbo blower, or high side to be used directly by the Army, Navy, Maritime Commis-

sion, or War Shipping Administration, which has been reported by such manufacturer in accordance with paragraph (b) (2) (ix) above; and

(ii) No producer shall manufacture a greater quantity of any type of system or parts for assembly into new systems (exclusive of compressors and blowers of the sizes described under (d) (2) (i) above, and exclusive also of replacement parts described under (3) below), production of which is permitted under the terms of this order, than the following:

During the calendar quarter beginning April 1, 1943, or during any succeeding calendar quarter, no producer shall manufacture a quantity of any system or part in excess of the greater of the two quantities of such system or part determined as indicated in (a) and (b) below:

(a) The number of such new item for which the producer has on hand unfilled orders bearing a rating of AA-4 or higher; or

(b) The number of such new item delivered on order bearing a rating of A-1-J or higher during the next preceding calendar quarter.

(3) *Replacement parts; protection of production schedules.* (i) No producer shall manufacture replacement parts (for the repair or maintenance of systems) in such quantities that his production thereof will result in his acquiring an inventory of such parts in excess of his average monthly inventory of similar parts during the months of January, February, and March, 1941.

(ii) Producers of replacement parts under the terms of this order may, notwithstanding the provisions of the Priorities Regulation No. 1 (Part 944), schedule their production of replacement parts as if the orders therefor bore a rating of AA-1, but subject to any specific directions which may be issued by the War Production Board as to the scheduling of production or deliveries of any such parts as required by any other order of the War Production Board, or by any specific direction from the War Production Board.

(4) *Restrictions on deliveries to producers.* No person engaged in the production or sale of component parts or sub-assemblies designed for incorporation in any larger assembly or system shall knowingly deliver any such parts or sub-assemblies to any producer for further fabrication or assembly into larger assemblies or systems if such fabrication or assembly by such producer is prohibited by the terms of this order; and no producer shall accept delivery of any such parts ordered for a use which has been prohibited by the terms of this order unless such parts or sub-assemblies are to be used for a purpose which is not prohibited.

(e) *Required utilization of replaced parts.* (1) In replacing any parts permitted under paragraph (b) (1) of this order, no dealer or producer shall deliver any part made of metal to the owner of the system to be repaired, unless such owner agrees that he will deliver the old part to the dealer or producer if directed

to do so by the latter, and if not so directed, that he will dispose of the old part to a scrap dealer, within 30 days after installation of the newly installed part. Any person making such an agreement with a dealer or producer shall deliver or dispose of the old part accordingly; and all such old parts obtained by a dealer or producer during any calendar quarter shall either be repaired or replaced in his inventory, or returned to his supplier of new parts, or disposed of to a scrap dealer, during or within 30 days after the end of such quarter. *Provided, however,* That no block tin pipe shall be replaced unless an equal quantity thereof is returned to the fabricator; but

(2) The provisions of the preceding subparagraph (1) shall not apply:

(i) Where parts are delivered for installation in any system located outside of the United States at the time of such delivery; or

(i) Where the system requiring repair is being used directly by the Army, Navy, Maritime Commission, or War Shipping Administration; or

(iii) Where the system requiring repair is owned by any Federal, State or local governmental agency, bureau, department, or political subdivision which is prohibited by law from disposing of such replaced parts in the manner presented under the preceding subparagraph (1).

(f) *Filing of report of inventories.* (1) On or before the 15th day of April, 1943, every producer shall file a report on Form PD-829 showing such producer's inventories and such other information as shall be required on said form.

(g) *Exemptions—(1) Certain specific transactions.* (i) The following shall be exempted from the terms of paragraph (b) (1) (i):

The repair, by (a) a bottler of carbonated beverages, or (b) a manufacturer of ice cream for resale, or (c) a person engaged in the business of leasing mechanical or non-mechanical drinking water coolers, or (d) any other person owning (refrigerating) systems of any type included on List A or List B and used by such owner or his lessees for dispensing food or beverages at retail, of any such systems owned by such person, using new parts owned by him on May 15, 1942, or used parts obtained from the dismantling of any such used system owned by such person; but no parts shall be delivered by any dealer or producer to any such person for the repair of any such system except for "emergency repair service" thereto;

(ii) The following shall be exempted from the terms of paragraph (b) (2):

(a) The temporary delivery of a used system or parts to a dealer or producer for repair and redelivery to the same owner, the redelivery of a repaired system or part to the same owner, or the loan of a new or used system or parts for a period not to exceed 30 days pending the performance of "emergency repair service" to a used system or parts; or

(b) The delivery of a used system or parts for junking or scrapping; or

(c) The delivery of new or used mechanical or non-mechanical drinking water coolers owned on May 15, 1942, by any person engaged primarily in the business of leasing such water coolers, to any other person (and acceptance thereof).

(iii) The following shall be exempted from the terms of paragraphs (b) (2) and (d) (1) (i):

(a) The assembly, by any producer of single duty or double duty display cases, of any such cases, within 60 days after April 6, 1943, solely from parts which, on said date, had been fabricated or processed to the extent that use in any other type of equipment would be impracticable, if such parts were owned by such producer on said date, or were received within said period from any other such producer; and the delivery of such parts by any producer to any other producer; or

(b) The assembly by any producer of mechanical or non-mechanical drinking water coolers, of any such coolers not designed for use aboard ship, solely from parts or materials which, on April 6, 1943, had been fabricated or processed to the extent that use in any other type of equipment would be impracticable, if such parts or materials were owned by such producer on said date; or are received from any other such producer; and the delivery of any such parts or materials by any producer to any other producer.

(2) *Other transactions.* The following shall be exempted from paragraph (b) (2):

(i) *Creation, assignment and enforcement of liens—*(a) The creation, or assignment of any chattel mortgage, deed of trust, conditional sales contract or other lien on any new or used system or parts;

PART 1071—INDUSTRIAL AND COMMERCIAL REFRIGERATION AND AIR CONDITIONING MACHINERY AND EQUIPMENT

[Schedule II to Limitation Order L-126, as Amended March 27, 1943]

REQUIRED SPECIFICATIONS FOR REFRIGERATION CONDENSING UNITS

Section 1071.4 *Schedule II to Limitation Order L-126* is hereby amended to read as follows:

§ 1071.4 *Schedule II to Limitation Order L-126*—(a) *Definitions.* For the purpose of this schedule:

(1) "Producer" means any person who produces, manufactures, processes, fabricates or assembles refrigeration condensing units.

(2) "Refrigeration condensing unit" means a specific refrigerating machine combination, of the open type intended for remote installation, usually consisting of a compressor, receiver, base, and the usually furnished accessories, with or without motor, and with or without condenser. As used in this schedule, the term refrigeration condensing unit refers only to such units which are to be used in a "system" as defined in paragraph (a) (1) of Limitation Order No. L-126.

(3) "Open type" refrigeration condensing unit means that type of unit in which the motive power and compressor are interconnected in such a way that a refrigerant shaft seal is necessary.

(4) "Model" means a specific combination of the following items in a refrigeration condensing unit:

- (i) Base.
- (ii) Valves.
- (iii) Condenser.
- (iv) Number of cylinders.
- (v) Bore and stroke.
- (vi) Motor (H. P. rating).

Any change in the size or capacity of any one of the above items constitutes a change in model, except that conversion of a water cooled to an evaporatively cooled condensing unit does not constitute such a change in model.

(5) "Compressor body" means that part of a compressor which consists of a specific combination of bore, stroke, valve, and cylinder.

(6) "Duplex condensing unit" means any refrigeration condensing unit consisting of two or more compressors which are powered by one or more motors mounted on a common base, and which discharge into a common condenser.

(7) "Lend-lease country" means the government of any foreign country receiving aid pursuant to the Act of March 11, 1941, entitled "An Act to Promote the Defense of the United States" (Lend-Lease Act).

(8) "Sealed type" refrigeration condensing unit means that type of unit in which the motive power and compressor are located within the same enclosure in such a way that a refrigerant shaft seal is not necessary.

(b) *Required specifications.* Pursuant to Limitation Order L-126, the following required specifications are hereby established for refrigeration condensing units:

(1) No producer shall:

(i) Manufacture any refrigeration condensing units in sizes below $\frac{1}{6}$ h. p.

(ii) Manufacture any refrigeration condensing units up to and including 2 h. p., except in air-cooled condensing models. *Provided, however,* That water cooled condensing units below 3 h. p. may be produced for:

(a) Installations in which the condensing unit must operate in an ambient temperature of 110° F. or higher;

(b) Installations in which the condensing unit must operate within a substantially air-tight room or enclosure, such as a photographic or X-ray developing room;

(c) Installations in which the condensing unit is designed to operate at a refrigerant suction temperature below minus 40° F. and the unit is used as a part of a system for a low temperature test cabinet.

(iii) Manufacture any refrigeration condensing units above 2 h. p., except in water cooled and evaporatively cooled models. *Provided,* That a 3 h. p. air-cooled unit for (prefabricated sectional) walk-in refrigerators for direct use by the Army of the United States may be produced.

(iv) Manufacture any duplex condensing units up to and including 20 h. p., except for multi-stage applications;

(v) Manufacture or assemble more types of basic compressor bodies than a number equal to one-half, or less, the total number of types (by horse power rating) of refrigeration condensing units being produced by him (excluding units completed under paragraph (c) (1) (ii)), except that a person producing only one type may continue to produce one basic compressor body.

(vi) Manufacture more than one refrigeration condensing unit model or more than one sealed type of refrigeration condensing unit in any given horse power rating for the suction temperature brackets of 5° F., 20° F., and 40° F., respectively, and for each of the following refrigerant classifications:

Ammonia
Carbon dioxide
Freon, methyl chloride, sulphur dioxide;

Except that, where the refrigeration condensing unit is to be operated at suction temperatures below minus 10° F., the use of motors of larger horse power rating shall not be deemed a change in model.

(vii) Deliver any refrigeration condensing unit, or the belt-driven type, unless it includes a motor pulley and belt drive at the time of shipment.

(viii) Manufacture any refrigeration condensing unit in a h. p. rating not produced by him before May 1, 1942, nor manufacture any unit which is designed to use a refrigerant not used by him prior to May 1, 1942; or

(ix) Use any metals in the construction of the base of any refrigeration condensing unit, as herein described, or of any other types of condensing unit of either the open type or sealed type and whether intended for remote installation or not, employing a motor of 2 horse power and below, or a motor of above 20 horse power except that ferrous metals may be used for necessary bolts, washers, nuts, straps, sole plates, pipe sleeves, and

adjustable motor rails: *Provided,* That the restrictions in this subdivision (ix) shall not apply to any such condensing units, of any types, for use in aircraft by the Army or Navy of the United States or for use aboard ship or at advanced bases by the Army or Navy of the United States, the Maritime Commission or War Shipping Administration.

(x) Use any metals in the construction of the fan shroud of any air-cooled refrigeration condensing unit employing a motor of 2 horse power and below except that ferrous metals may be used for necessary bolts, washers, nuts and straps: *Provided,* That the restrictions in this subdivision (x) shall not apply to any such condensing units for use aboard ship.

(xi) Manufacture or assemble more types of basic compressor bodies, for other than the open type intended for remote installations, than permitted under paragraph (b) (1) (v) of this schedule.

(xii) Use any copper or copper base alloy pipe or tubing for interconnecting refrigerant lines larger than $\frac{3}{4}$ " size (O. D.), except for use aboard ship and at advanced bases, by the Army or Navy of the United States, the Maritime Commission or the War Shipping Administration.

(c) *Applicability of order.* (1) The required specifications established by paragraph (b) hereof shall apply to all refrigeration condensing units: *Provided, however,* That the foregoing shall not prohibit:

(i) The production, fabrication, delivery, acceptance, or installation of refrigeration condensing units, the plans of which have already been drawn and accepted by or for the account of the Army or Navy of the United States, the Maritime Commission, the War Shipping Administration, or Lend-Lease countries, and

(ii) The delivery by a producer of any refrigeration condensing units (or the acceptance thereof) which were in his stock in finished form on July 3, 1942, or which had on said date been cast, machined, or otherwise processed in such manner that their manufacture in conformance with this schedule would be impractical.

(d) *Effective date.* This amendment shall become and be effective on and after April 6, 1943.

Issued this 27th day of March 1943.

Amended March 27, 1943]

REQUIRED SPECIFICATIONS FOR COIL OR TUBE
ASSEMBLIES FOR REFRIGERATION CONDENSERS
OR COOLERS

Section 1071.5 *Schedule III to Limitation Order L-126* is hereby amended to read as follows:

§ 1071.5 *Schedule III to Limitation Order L-126—(a) Definitions.* For the purpose of the schedule:

(1) "Producer" means any person who produces, manufactures, processes, fabricates or assembles any coil or tube assemblies for refrigeration condensers or coolers.

(2) A "coil or tube assembly for condensers" means an assembly used in a refrigerating or air conditioning "system" as defined in paragraph (a) (1) of Limitation Order No. L-126 consisting of any arrangement of pipes, tubing, pressure vessels, or plates by means of which heat is removed from the vaporized refrigerant.

(3) A "coil or tube assembly for coolers" means an assembly used in a refrigerating or air conditioning "system" as defined in paragraph (a) (1) of Limitation Order No. L-126 consisting of any arrangement of pipes, tubing, pressure vessels, or plates by means of which heat is absorbed by either a volatile refrigerant or a non-volatile medium such as water.

(4) "Protective coating" means a surface coating applied to any or all parts of a "coil or tube assembly for condensers or coolers" for the purpose of retarding or preventing corrosion.

(5) "Integral fin tubing" means finned tubing, the fins and tubes of which are formed from the same piece of metal by extrusion or by any machine operation.

(6) "Metallic fin bond" means a tie between tubing and fins obtained through the use of a metallic base substance usually applied with heat. The fin surface of integral fin tubing shall be considered as having a metallic fin bond.

(7) "Mechanical fin bond" means a tie obtained between tubing and fins by physical contact and without the use of a metallic base substance.

(8) "Fin height" means the distance from the outside of a pipe or tube to the nearest outside edge of the fin.

(9) "Return bend" means a semi-circular section of tubing or pipe used to join parallel runs of tubing or pipe.

(10) "Lend-lease country" means the government of any foreign country receiving aid pursuant to the Act of March 11, 1941, entitled "An Act to Promote the Defense of the United States" (Lend-Lease Act).

(b) *Required specifications.* Pursuant to Limitation Order No. L-126, the following required specifications are hereby established for coil or tube assemblies for condensers or coolers:

(1) In the manufacture of any coil or tube assembly for condensers or of any coil or tube assembly for coolers, no producer shall, except for use aboard ship,

(i) Use any non-ferrous metals, except for soldering or brazing materials, for protective coatings, or for any coil or tube assembly for water cooled condensers as defined in paragraph (b) (3) of this schedule.

(ii) Use any seamless steel tubing, except

(a) To form integral fin tubing, or
(b) That which has been made into return bends but only if the radius thereof is less than $1\frac{1}{2}$ times the outside diameter of such tubing and the straight extensions thereof are not longer than

2 times the outside diameter of such tubing; or

(iii) Use any steel tubing (other than integral fin tubing) of wall thickness greater than the following:

	Wall thickness maximum inch
(a) Up to & including $\frac{3}{8}$ "	0.028
(b) Over $\frac{3}{8}$ " up to & including $\frac{1}{2}$ "	.035
(c) Over $\frac{1}{2}$ " up to & including $\frac{3}{4}$ "	.049
(d) Over $\frac{3}{4}$ " up to & including 1"	.065
(e) Over 1" up to & including $1\frac{1}{4}$ "	.083
(f) Over $1\frac{1}{4}$ " up to & including 2"	.095
(g) Over 2" up to & including $2\frac{1}{2}$ "	.120

Provided, That where external refrigerant working pressures exceed 400 lbs. per sq. in. gauge, a producer may use a wall thickness in excess of the foregoing but not to exceed the thickness being used by him on September 2, 1942.

(2) In the manufacture of any coil or tube assembly for air-cooled condensers no producer shall

(i) Except for use aboard ship, use finned tubing (other than integral fin tubing) having an average fin thickness to the nearest U. S. standard gauge in excess of 4% of the fin height, or a maximum of 0.023", whichever is smaller;

(ii) Except for use aboard ship, use a metallic protective coating (other than paint) where a mechanical fin bond is employed;

(iii) Use a protective coating containing more than 7% tin where a metallic fin bond is employed;

(3) In the manufacture of any coil or tube assembly for water-cooled condensers, no producer shall, except for use aboard ship

(i) Use more than 7 lbs. of non-ferrous metals per condensing unit nominal horse power for all self-contained refrigeration condensing units: *Provided however*, That where, for the purpose of simplification, one condenser is designed to be used with either of two or more self-contained condensing units, not more than 9.0 lbs. of non-ferrous metals per condensing unit nominal horse power of the smaller unit may be used.

(ii) Use more non-ferrous metals per ton of refrigeration, for other than self-contained condensing unit condenser assemblies, than the following:

7 lbs. per ton of refrigeration for systems having saturated refrigerant vapor suction temperatures above 30° F.

8 lbs. per ton of refrigeration for systems having saturated refrigerant vapor suction temperatures from 0° to 30° F., inclusive.

9 lbs. per ton of refrigeration for systems having saturated refrigerant vapor suction temperatures below 0° F.

"Ton of refrigeration", as here used, means the removal of heat, at the low side, at the rate of 12,000 B. T. U. per hour; total tons to be based on the design operating load of the low side connected to the condensing unit or units with which the condenser is used.

(4) In the manufacture of any coil or tube assembly for evaporatively cooled condensers, no producer shall:

(i) Use finned tubing (other than integral fin tubing) having an average fin thickness to the nearest U. S. standard gauge in excess of 4% of the fin height, or a maximum of 0.023", whichever is smaller; or

(ii) Use a combination protective coating and metallic fin bond containing more than 7% tin.

(5) In the manufacture of any cooler coil or tube assembly for air-cooling, no producer shall:

(i) Use a metallic protective coating containing more than 7% tin, except that when the coil is used in food storage and the air passing over the coil is in direct contact with the food a hot-dipped galvanized coating or a coating containing not more than 35% tin may be used, and except also that for use aboard ship in connection with food storage the use of protective metallic coatings is not restricted by this paragraph; or

(ii) Use finned tubing (other than integral fin tubing) having an average fin thickness to the nearest U. S. standard gauge in excess of 4% of the fin height, or a maximum of 0.023", whichever is smaller.

(c) *Applicability of order.* (1) The required specifications established by paragraph (b) (1) to (5) inclusive, shall not prohibit:

(i) The production, fabrication, delivery, acceptance, or installation of coil or tube assemblies, the plans of which had on September 2, 1942, been drawn and accepted by or for the account of the Army or Navy of the United States, the Maritime Commission, the War Shipping Administration, or Lend-Lease countries, or

(ii) The use (in the production or fabrication of, or the delivery, acceptance, or installation of coil or tube assemblies for condensers or coolers) of any of the following materials in a producer's possession or control or in transit to a producer on September 2, 1942:

(a) Steel tubing.

(b) Coil or tube assemblies which on said date were in finished form or the parts for which had on said date been cast, machined or otherwise processed in such manner that the manufacture of such assemblies in conformance with this Schedule III would be impractical.

(d) *Effective date.* This amendment shall become and be effective on and after April 6, 1943.

Issued this 27th day of March 1943.

(vii) Remarks in column 10 may, if necessary, be extended on the reverse side of the sheet. Include in remarks quantity of petroleum sulfonates used in manufacture for preparation of primary products in corresponding period of year 1941. If requirements have increased appreciably, state reasons.

(2) Each producer or distributor seeking authorization to make delivery of petroleum sulfonates during any calendar month beginning with December, 1942, shall file application on or before the 20th day of the month preceding the month for which authorization is requested. PART 3130—MINERAL OIL POLYMERS

[General Preference Order M-258 as Amended
March 27, 1943]

The fulfillment of requirements for the defense of the United States has created a shortage in the supply of mineral oil polymers for defense, for private account and for export; and the following order is deemed necessary and appropriate in the public interest and to promote the national defense:

§ 3130.1 *General Preference Order M-258*—(a) *Definitions.* (1) "Mineral oil polymers" means the resinous product produced by the polymerization of mixtures of unsaturated hydrocarbons (either the solid resin or solvent extended product) and does not include polystyrene, polyisobutylene, polyethylene, butadiene, or the copolymers of such materials.

(2) "Producer" means any person who produces or refines mineral oil polymers, and includes any person who has mineral oil polymers produced for him pursuant to toll agreement.

(3) "Distributor" means any purchaser of mineral oil polymers from any person for purpose of resale as mineral oil polymers.

(b) *Restrictions on deliveries and use.*

(1) Subject to paragraph (c) hereof, no producer or distributor shall deliver or use mineral oil polymers, and no person shall accept delivery of mineral oil polymers from a producer or distributor, except as specifically authorized or directed by the War Production Board.

(2) Authorizations or directions with respect to deliveries to be made or accepted in each month, beginning with December, 1942, will so far as practicable be issued by the War Production Board prior to the commencement of such month, but the War Production Board may at any time (including the period prior to December 1, 1942), at its discretion and notwithstanding the provisions of paragraph (c) hereof, issue directions with respect to deliveries to be made or accepted, or with respect to the use or uses which may or may not be made of material to be delivered or then on hand.

(3) Each person specifically authorized to accept delivery of mineral oil polymers shall use such material for the purpose authorized, and only for such purpose, except as otherwise specifically directed.

(4) Producers who prepare oil products from mineral oil polymers shall be considered users and must receive authorization for such use.

(c) *Small order exemption.* No specific authorization shall be required for:

(1) Acceptance of delivery by any person in any one calendar month of 50 pounds or less of mineral oil polymers in the aggregate; provided that such person has not been specifically authorized to accept delivery of any quantity of such material during such month;

(2) The delivery by any producer or distributor to any person who shall certify to him in writing that he is entitled pursuant to paragraph (c) hereof to accept delivery;

(3) The use by any producer in any calendar month of 50 pounds or less of mineral oil polymers in the aggregate.

(d) *Applications and reports.* (1) Each person seeking authorization to accept delivery of mineral oil polymers during any calendar month, beginning with December, 1942 (except as provided in paragraph (c) hereof), whether for his own consumption or resale, shall file application therefor on or before the 15th day of the month preceding the month

for which authorization for delivery is requested. Applications by producers for authorization to use shall be filed in the same manner. Others (specify)

(vi) In Column 4, specify ultimate use of product (for example, if the "primary product" called for by Columns 3, 20 and 22 is "core oil", the "ultimate use of product" might be "aircraft engine cylinders"), and also specify in each case whether your customer is Army, Navy, other government agency, Lend-Lease, or commercial customer.

(vii) Remarks in Column 10 may, if necessary, be extended on the reverse side of the sheet. Include in remarks quantity of mineral oil polymers used in manufacture for preparation of primary products in corresponding period of year 1941. If requirements have increased appreciably, state reasons.

(2) Each producer or distributor seeking authorization to make delivery of mineral oil polymers during any calendar month beginning with December, 1942, shall file application on or before the 20th day of the month preceding the month for which authorization is requested. (3) On or before November 30, 1942, each person who as of November 1, 1942 owned 500 pounds or more of mineral oil polymers shall report the amount of each grade of mineral oil polymers owned on such date by letter addressed to the War Production Board, Chemicals Division, Washington, D. C., Ref: M-258.

(4) The War Production Board may require each person affected by this order to file such other reports as may be prescribed, and may issue other and further directions to any such person with respect to preparing and filing Forms PD-600 and PD-601.

(e) *Notification of customers.* Each supplier shall notify his regular customers, as soon as possible, of the requirements of this order, but failure to receive such notice shall not excuse any person from complying with the terms hereof.

PART 962—IRON AND STEEL

[General Preference Order M-21-b-1]

GENERAL STEEL WAREHOUSES AND DEALERS

The fulfillment of requirements for the defense of the United States has created a shortage in the supply of steel for defense, for private account and for export; and the following order is deemed necessary and appropriate in the public interest and to promote the national defense:

§ 962.10 *General Preference Order M-21-b-1—(a) Purpose and scope.* This order tells how, under the Controlled Materials Plan, a distributor obtains deliveries of general steel products from producers and from other persons for stock or for delivery direct to a distributor's customers. The method by which a distributor obtains deliveries of merchant trade products is set forth in General Preference Order M-21-b-2. Deliveries of steel from stock by distributors to persons not purchasing for resale are governed by CMP Regulation No. 4. Deliveries by distributors to other distributors are governed by this order and not by CMP Regulation No. 4.

(b) *Definitions.* For the purposes of this order:

(1) "Steel" means carbon steel, alloy steel, and wrought iron, in each case only in the forms and shapes indicated in the CMP Materials List.

(2) "Alloy steel" means any steel containing any one or more of the following elements in the following amounts:

Manganese, maximum of range in excess of 1.65%.

Silicon, maximum of range in excess of 0.60%.

Copper, maximum of range in excess of 0.60%.

Aluminum, chromium, cobalt, molybdenum, nickel, titanium, tungsten, vanadium, zirconium, or any other alloying element in any amount specified or known to have been added to obtain a desired alloying effect.

(3) "Carbon steel" means any steel (including wrought iron) other than alloy steel.

(4) "General steel product" means any of the steel products listed in Schedule A hereto.

(5) "Product group" means any of the 16 numbered groups of general steel products listed in Schedule A hereto.

(6) "Type" means (i) carbon steel, or (ii) stainless steel, or (iii) other alloy steel.

(7) "Base tonnage" of a warehouse for any product group and type means the tonnage of such product group and type delivered by such warehouse from stock during the first calendar quarter of 1941, or as specifically otherwise established by the War Production Board.

(8) "Distributor" means any person (including a warehouse, jobber, dealer or retailer) who is engaged in the business of receiving steel for sale or resale and who does not process the material so sold otherwise than by performing such operations as cutting to length, shearing to size, torch cutting or burning to shape, sorting and grading, or pipe threading; but a person who, in connection with any sale, forms bends, punches or performs any fabricating operation designed to prepare steel for final use or assembly shall not be deemed a distributor with respect to such sale.

(9) "Warehouse" means a distributor who receives physical delivery of general steel products from a producer for sale or resale in the form received, and who was engaged in the business of distributing steel from stock on August 9, 1941. The term does not include any structural shape, bar, or sheet fabricator unless his sales from stock during 1940 of general steel products in the form received represented at least 25 percent of the total tonnage of general steel products received by him in that year. If a warehouse maintains a stock at more than one location, each location shall be deemed a separate warehouse.

(10) "Dealer" means a distributor (other than a warehouse) who receives physical delivery of general steel products from persons other than producers for sale or resale in the form received, and who was engaged in the business of distributing steel from stock on August 9, 1941. The term does not include any distributor who is primarily a scrap dealer. For the purposes of this definition a distributor shall be considered primarily a scrap dealer if the tonnage of all scrap purchased for stock by him in 1940 equalled or exceeded the tonnage of steel purchased for stock by him in that year.

(11) "Delivery" includes deliveries received on consignment.

(c) *Restrictions on placing orders with producers for shipment to warehouse stock—(1) Product groups and types to be ordered.* No warehouse shall order or accept delivery to warehouse stock of general steel products in any product group and type except those which have been certified to such warehouse on form PD-83-b by the War Production Board. A producer shall not deliver general steel products to any warehouse stock unless such warehouse shall first have filed with such producer a copy of its PD-83-b certificate, or in any product group and type except those certified on such certificate.

(2) *Quantity restrictions on prime quality material.* No warehouse which, during 1940, purchased more than 25 percent of its tonnage of any product group in a grade now invoiced as less than prime quality may order for deliv-

ery to warehouse stock during any calendar quarter, prime quality steel products (requiring scheduled rollings) of the same product group from all producers in an amount greater than one-fourth of the total tonnage of such prime quality material purchased from all producers during 1940.

(3) *Quantity restriction on product groups.* No warehouse shall order steel from producers in any one product group for delivery to warehouse stock in any calendar quarter in excess of 150 percent of its base tonnage for such product group.

(4) *Quantity restrictions on types, interim period.* No warehouse shall place orders with producers for delivery to warehouse stock in the second quarter of 1943 (as to carbon general steel products) or in the period April 1-July 31, 1943 (as to stainless or other alloy general steel products) which shall aggregate, for any type of steel, more than the quantity authorized for such warehouse in CMP-85. Orders outstanding on March 31, 1943, in excess of this quantity which call for delivery within such periods shall be suspended immediately.

(5) *Stock replacement after interim period.* Every order for delivery of carbon general steel products from a producer to a warehouse stock after June 30, 1943, or of stainless or other alloy general steel products after July 31, 1943, shall be supported by form CMP-11 duly filled out and signed by the purchasing warehouse. For the purposes of CMP-11, tonnage previously delivered from stock in one or more product groups representing the same type of steel (carbon, stainless, or other alloy) may be accumulated to support an order for any one or more product groups of the same type. During April, 1943, each warehouse may place orders with producers for delivery to stock after June 30, 1943, accompanied by form CMP-11 and in accordance with the terms of this paragraph (c) (5), amounting, for any type of steel, to one-third of its total deliveries of such type from stock during the first quarter of 1943. Thereafter, a purchase order shall be placed only to replace general steel products delivered from warehouse stock at any time during the previous 90 days on authorized controlled material orders duly confirmed in accordance with CMP Regulation No. 4, or on other orders as permitted by paragraph (d) of that regulation. In addition, a warehouse may order and report on form CMP-11 an amount to cover scrap loss not to exceed the following percentage of the tonnage reported on such form:

Product group:	Prime Quality	Second Quality
3. Plates (universal and sheared)-----including skelp	8%	10%
11. Sheets and strip, hot rolled	3%	10%
12. Sheets and strip, cold reduced	3%	10%
All other general steel products	3%	8%

Provided, however, That the total tonnage of any type of general steel products ordered on this basis in any calendar quarter shall not exceed actual scrap sales of such type during the previous calendar quarter as reported on form PD-83. Orders requiring scheduled rollings shall specify delivery, in the case of carbon steel not earlier than the month 90 days following the date of order entry, and in the case of stainless or other alloy steel, not earlier than the month 105 days following the date of order entry. Orders not requiring scheduled rollings (such as rejects, wasters, waste wasters) may specify delivery at any time.

(6) *Status of warehouse orders.* Each order placed by a warehouse with a producer for delivery to warehouse stock pursuant to paragraph (c) (5) and supported by form CMP-11 shall be deemed an authorized controlled material order.

(d) *Warehouse purchases from idle or excess inventories.* A warehouse may order for delivery to its stock, without limitation as to quantity, from idle or excess inventories pursuant to Priorities Regulation No. 13 general steel products in any product group and type which has been certified to such warehouse on Form PD-83-b. Each purchase order for such material shall be endorsed in substantially the following form, and when so endorsed shall be deemed to be an authorized controlled material order:

The undersigned certifies to the seller and to the War Production Board that this order is placed pursuant to paragraph (d) of Order M-21-b-1, and is an authorized controlled material order.

----- By -----

(e) *Warehouse purchases for direct shipment to customer.* A warehouse receiving an authorized controlled material order from a customer and wishing to arrange for shipment direct to such customer by the producer or other supplier shall specify delivery to a point other than the warehouse, and shall copy on its own purchase order the endorsement made to it by its customer (including the customer's name) in accordance with CMP Regulation No. 1 or other applicable regulation or order. A purchase order specifying direct shipment and so endorsed shall be deemed an authorized controlled material order.

(f) *Earmarked warehouse stocks.* To the extent agreed upon by the Steel Division and any claimant agency, an earmarked stock of general steel products may be established in any warehouse. Deliveries to such stock and withdrawals therefrom shall be made only in accordance with the specific directions which shall be issued at the time such stock is established.

(g) *Purchases by dealers.* Purchase orders for general steel products may be placed by a dealer with persons other than producers to replace in the dealer's stock steel of the same type delivered by

him during the 90 days preceding the placing of such purchase order, provided the steel to be replaced (if delivered prior to April 1, 1943) was delivered pursuant to Supplementary Order M-21-b, or (if delivered on or after April 1, 1943) was delivered pursuant to CMP Regulation No. 4. No delivery can be used more than once to support such a replacement order. Each such replacement order must carry an endorsement in substantially the following form:

The undersigned hereby certifies to the seller and to the War Production Board that the material covered by this order is to replace in stock general steel products of the same type and weight delivered by the undersigned within the 90 days preceding the date of this order and in accordance with CMP Regulation No. 4 (or Supplementary Order M-21-b). This constitutes an authorized controlled material order.

Any order so endorsed shall be deemed an authorized controlled material order.

(h) *Reports.* Each warehouse shall file with the Bureau of the Census, Washington, D. C., on or before the 15th day of each month a report in duplicate on Form PD-83 Revised, or on such other form as may be prescribed. A warehouse having a total base tonnage of all general steel products amounting to 150 tons or less shall file such report only on or before the fifteenth day of April, July, October, and January, for the preceding calendar quarter.

(i) *Appeals.* Any appeal from the provisions of this order shall be made by letter referring to the particular provision appealed from and stating fully the grounds for the appeal. In emergency cases, appeal may be made by telegraph.

(j) *Communications to War Production Board.* All appeals or other communications concerning this order shall be addressed to Warehouse Branch, Steel Division, War Production Board, Washington, D. C., Reference M-21-b-1.

(k) *Violations.* Any warehouse, dealer, or other person who willfully violates any provision of this order or who, in connection with this order, willfully conceals a material fact or furnishes false information to any department or agency of the United States is guilty of a crime, and upon conviction may be punished by fine or imprisonment. In addition any such person may be prohibited from making or obtaining further deliveries of, or from processing or using, material under priority control and may be deprived of priorities assistance.

(l) *Effective date.* This order shall be effective April 1, 1943.

(c) *Procedure for obtaining authorization of the War Production Board.*

A rationale for this amendment has been issued simultaneously herewith and has been filed with the Division of the Federal Register.*

1. Section 1315.513 is added to read as follows:

(a) *Who may obtain an allotment of rear-wheel tractor-type tires and tubes.* Any dealer or any person who intends in good faith to become a dealer may obtain an allotment of rear-wheel tractor-type tires and rear-wheel tractor tubes.

Only one allotment for each establishment may be granted.

The State Director or District Manager may refuse to authorize the allotment if granting it will defeat or impair the effectiveness or policy of this Ratio Order No. 1A.

2. Section 1315.602 (i) is added to read as follows:

(i) *Allotment of rear-wheel tractor tires and tubes.* Application for an allotment of rear-wheel tractor-tires and tubes shall be filed on OPA Form No. R-60 with the State Director or District Manager for the area in which the establishment is located.

3. Section 1315.607 (b) (2) is amended to read as follows:

(2) *For allotment of tires and tubes.* OPA Form No. R-2 (Revised) authorizing an applicant to acquire an allotment of Grade I, Grade II or Grade III tires, passenger tubes or rear-wheel tractor-type tires or tubes.

4. Section 1315.611 (c) (2) is added to read as follows:

(2) Any dealer may, in exchange for a certificate for a truck tube, transfer to the holder thereof a passenger tube.

5. The table set forth in § 1315.804 (c) (3) is amended to read as follows:

If the fuel oil ration record card was issued for heat, or heat and hot water, and coupon sheets are requested, the board shall issue Class 1 or Class 2 coupon sheets containing coupons valid only in the thermal period for which the ration was issued. ² 8 F.R. 3096.

1. Section 1499.73 (a) (7) is amended by deleting the word "food" wherever it appears.

2. Section 1499.73 (a) (7) (i) is amended to read as follows:

(i) *Explanation.* The purpose of the new method of pricing provided by this subparagraph (7) is to permit the packer who is now packing certain commodities in containers of new types and sizes (that is, types and sizes which he did not deliver or offer for delivery during March 1942) to establish maximum prices for those items. The method permits him to account for differences in container costs, and for differences in transportation costs caused by the difference in containers, without permitting him to increase the price per unit of the commodity packed in the new container. The new method, however, applies only where a previous maximum price of the commodity has been set for a container size not more than 50% larger or smaller than the new size, and only in cases where both containers are of the nonreturnable, single-use type. Packers must refigure every maximum price set under the General Maximum Price Regulation for a commodity packed in a new container type or size to which the rules of this subparagraph (7) are applicable. However, packers who before January 25, 1943, had figured the maximum price for a commodity under §§ 1499.2 (b) or 1499.3 (b) of the General Maximum Price Regulation, or under the rules formerly provided in this subparagraph, may, if they wish keep that price or instead figure a new maximum price using the new pricing method where it is applicable. The new pricing method applies to the following commodities:

(a) Food commodities, excepting coffee and coffee compounds (see subparagraph (53)), dog and cat foods (see subparagraph (62)).

(b) Granite grit.

3. Section 1499.73 (a) (7) (vi) is hereby revoked.

[MPR 188,¹ Amendment 9]

MANUFACTURERS' MAXIMUM PRICES FOR SPECIFIED BUILDING MATERIALS AND CONSUMERS' GOODS OTHER THAN APPAREL

A statement of the considerations involved in the issuance of this amendment has been issued simultaneously herewith and filed with the Division of the Federal Register.*

Section 1499.161 is amended and a new § 1499.167 is added, both as set forth below:

¹ 7 F.R. 5872, 7967, 8943, 8948, 10155; 8 F.R. 537, 1815, 1980, 3105.

§ 1499.161 *Applications for adjustment and petitions for amendment—(a) Applications for adjustment.* The Office of Price Administration, or any duly authorized officer thereof, may by order adjust any maximum price established under this Maximum Price Regulation No. 188 in the following cases:

(1) In the case of a manufacturer who shows:

(i) That such maximum price causes him substantial hardship and is abnormally low in relation to the maximum prices established for competitive sellers of the same or similar commodities; and

(ii) That establishing for him a maximum price bearing a normal relation to the maximum prices established for competitive sellers of the same or similar commodities will not cause or threaten to cause an increase in the level of retail prices.

Applications for adjustment under this paragraph (1) shall be filed in accordance with Revised Procedural Regulation No. 1.² No application for adjustment filed after November 15, 1942, will be granted under this paragraph (1).

(2) In the case of any manufacturer, when it appears with respect to an article set forth in Appendix B (§ 1499.167) of this Maximum Price Regulation No. 188:

(i) That there exists or threatens to exist in a particular locality a shortage in the supply of a commodity which aids directly in the war program or is essential to a standard of living consistent with the prosecution of the war; and

(ii) That such local shortage will be substantially reduced or eliminated by adjusting the maximum prices of such manufacturer and of like manufacturers for such commodity; and

(iii) That such adjustment will not create or tend to create a shortage, or need for increase in price, in another locality, and will effectuate the purposes of the Emergency Price Control Act of 1942, as amended.

Each regional administrator is authorized to make adjustments or act upon applications for adjustment under this paragraph (2).

(3) In the case of any manufacturer who shows:

(i) That he is the sole manufacturer of an essential commodity such as one, the production and sale of which is affirmatively permitted by regulations or orders issued by the War Production Board.

(ii) That the maximum prices established by this regulation do not permit the recovery of total costs; and

(iii) That the operations of the company are currently being conducted at a loss.

Adjustment in price may be made to an extent sufficient to enable the manufacturer to recover total costs on the article, together with a profit. In a proper case, the manufacturer may charge a price equal to the price requested in the application, provided that he has received a letter from the Office of Price Administration stating that his is a proper case. Such price shall be tentative and refunds shall be made to

each purchaser in the event that the application is denied in whole or in part. Applications for adjustment under this paragraph shall be filed in accordance with Revised Procedural Regulation No. 1.

(b) *Petitions for amendment.* Any person seeking an amendment of any provision of this Maximum Price Regulation No. 188 may file a petition for amendment in accordance with the provisions of Revised Procedural Regulation No. 1.

§ 1499.167. *Appendix B.* The maximum prices for articles set forth below may be adjusted in accordance with provisions of § 1499.161 (a) (2) of this Maximum Price Regulation No. 188.

NOTE: The articles listed below are not intended to include (a) any commodity subject to a specific maximum price regulation or price schedule in effect on August 1, 1942, or issued any time thereafter, or (b) any commodity exempted from the General Maximum Price Regulation by any supplementary regulation thereto, in effect on August 1, 1942, or issued any time thereafter. Since the designations of some articles are broad enough in certain instances to suggest that articles are included which are intended to be excluded, other regulations which might be applicable to the article or type of article have been indicated. Manufacturers selling articles listed below should, before seeking an adjustment of their maximum prices in accordance with this regulation, determine whether specific price regulations or regulations supplementary to the General Maximum Price Regulation have been issued subsequent to the date of this regulation with respect to the articles so listed.

¹8 F.R. 2195, 2348, 2598, 2666, 2667, 3178, 3216, 3255, 3616.

tion Order No. 16 at the close of business on March 28, 1943 is to be computed in the following way:

(1) The amount in pounds in each of the following classes is determined:

- (i) Meat (except poultry but including canned fish)
- (ii) Rationed cheeses
- (iii) Butter (as defined in Ration Order No. 16)
- (iv) Margarine (as defined in Ration Order No. 16)
- (v) Shortening (as defined in Ration Order No. 16)
- (vi) Cooking or salad oils (as defined in Ration Order 16)

(2) The amount in pounds in each of the above classes are added together;

(3) The resulting sum is multiplied by a factor fixed for that purpose by the Office of Price Administration (in a supplement to this order). The result is treated as the point value of his inventory.

2. Section 4.2 (b) is amended by inserting the words "or foods covered by Ration Order No. 16" immediately following the phrase "processed foods" wherever it appears in this paragraph.

3. Section 5.2 (a) is amended by inserting the following sentence between the second and third sentences:

* * * However, in the case of foods covered by Ration Order No. 16, the first allotment period is from March 29, 1943 to April 30, 1943. * * *

4. Section 5.3 (b) is amended by adding the following parenthetical sentence between the first and second sentences:

* * * (However, an institutional user who has registered under this order may apply for an allotment of foods covered by Ration Order No. 16 for the first allotment period by making a written request therefor to the Board at any time between March 29, 1943 and April 7, 1943.) * * *

5. Section 6.2 (a) is amended as follows:

The words "each rationed food" are deleted and "sugar, coffee and processed foods" are added in place thereof; and

The words "and of foods covered by Ration Order No. 16 for the second allotment period" are added between the word "periods" and the word "is".

6. Section 6.2 (b) is added to read as follows:

(b) The allotment of foods covered by Ration Order No. 16 for the first allotment period is computed in the following way:

(1) The number of persons served during December 1942 is multiplied by the "allowance per person" fixed for those foods by the Office of Price Administration as set forth in a supplement to this Order.

(2) The result is multiplied by one and one-tenth (1.1) (since the allotment is for one and one-tenth months);

(3) The figure obtained is the allotment.

7. Section 7.1 (a) (1) is amended by adding the following parenthetical sentence before the semicolon at the end thereof; * * *

(For the purpose of determining the base, all cheeses except cottage, pot and bakers', shall be included in foods covered by Ration Order No. 16.)

The words "and foods covered by Ration Order No. 16" are inserted immediately following the phrase "processed foods" wherever it appears in this paragraph; and

The phrase "sections 3.2 (f) and 3.6 (b)" is inserted in lieu of the phrase "section 3.2 (f)".

9. Section 7.2 (a) is amended by adding the following sentence at the end thereof:

* * * However, his allotment of foods covered by Ration Order No. 16 for the first allotment period, for his establishments in Group III is one and one-tenth (1.1) times his base for those foods.

10. Section 9.3 (a) is amended by inserting the words "or foods covered by Ration Order No. 16" immediately following the phrase "processed foods" wherever it appears in this paragraph.

11. Section 9.4 is added to read as follows:

SEC. 9.4 *Emergency certificates for foods covered by Ration Order No. 16.*

(a) A Group II or III institutional user who has registered under this order and who needs foods covered by Ration Order No. 16 before his application for an allotment of those foods can be passed upon, may apply, in any convenient manner, for an emergency certificate for those foods. Only one application may be made under this section.

(b) The Board may issue a certificate in an amount computed in the following way:

(1) The number of persons served in December 1942 shall be multiplied by 0.93;

(2) The result shall be divided by 2;

(3) The quotient is the maximum amount (in points) of the certificate which may be issued.

(c) The amount of the emergency certificate issued shall be added to the opening inventory of the applicant and the sum shall be considered his opening inventory for the purposes of sections 9.1 and 9.2. The certificate shall not be considered to increase his allotment.

12. Section 11.2 (a) is amended as follows:

The words "of coffee, sugar or processed foods" are added between the phrase "a supplemental allotment" and the phrase "for the first"; and

Board shall grant the supplemental allotment only if it finds that the number of persons he will serve during that allotment period will be more than twenty (20) percent larger than one and one-tenth (1.1) times the number he served during December 1942. The supplemental allotment is computed as follows:

(1) The number of persons he served during December 1942 is multiplied by one and one-tenth (1.1);

(2) The resulting figure is subtracted from the total number he will serve during the current period;

(3) The difference is multiplied by the allowance per person for those foods;

(4) The result is the supplemental allotment to be granted.

14. Section 11.3 (a) is amended as follows:

The words "of coffee, sugar or processed foods" are added between the phrase "a supplemental allotment" and the phrase "for the first"; and

The phrase "or of foods covered by Ration Order No. 16 for the second allotment period," is added between the phrase "second allotment period" and the phrase "the Board".

(2) His dollar revenue during that allotment period will be more than twenty (20) percent larger than one and one-tenth (1.1) times his dollar revenue during December 1942.

(d) His supplemental allotment of foods covered by Ration Order No. 16 is to be computed in the following way:

(1) The amount of the estimated increase in the number of persons he will serve is divided by one and one-tenth (1.1) times the number he served during December 1942;

(2) The amount of the estimated increase in his dollar revenue is divided by one and one-tenth (1.1) times his dollar revenue for December 1942;

(3) The smaller of the two figures obtained in (1) and (2) above is multiplied by his allotment of those foods for the first allotment period;

(4) The result is the supplemental allotment to be granted.

16. Section 16.2 (a) is amended by adding the following sentence after the parenthetical sentence:

Only one ration bank account may be opened for the foods covered by Ration Order No. 16.

17. Section 17.1 (d) is amended as follows:

19. Sections 23.1 (c) and 25.1 (b) are amended by substituting the words "processed foods and foods covered by Ration Order No. 16" for the words "processed foods", wherever those words appear in those sections.

This amendment shall become effective 12:01 a. m. on March 29, 1943 except that section 9.4 shall become effective March 27, 1943.

A statement of the considerations involved in the issuance of this amendment

Chapter XIII—Petroleum Administrator
for War

PART 1535—PETROLEUM PROCESSING AND
REFINING

[PAO 10]

The fulfillment of the requirements for the defense of the United States has created a shortage of fatty oils needed for the production of petroleum lubricating greases which can be remedied in part by the substitution of fatty acids for fatty oils in the manufacture of certain lubricating greases; and the following order is deemed necessary in the public interest, to promote the national defense, and to provide adequate supplies of lubricating greases for military and other essential purposes:

§ 1535.1 *Petroleum Administrative Order No. 10—(a) Definitions.* (1) "Person" means any individual, partnership, association, business trust, corporation, governmental corporation or agency, or any organized group of persons, whether incorporated or not.

(2) "Petroleum" means petroleum, petroleum products, and associated hydrocarbons, including but not limited to natural gas, except that natural gas which has entered into gas transmission lines from field gathering lines shall not be so included.

(3) "Fatty oils" means all fats and oils (regardless of acid content) of animal or vegetable origin, except essential oils, from which no glycerine has been recovered.

(4) "Fatty acids" means all acids obtained by the hydrolysis or saponification of fatty oils or of waxes of animal or vegetable origin.

(5) "Manufacturer" means any person who processes, reprocesses or in any manner alters (including compounding and blending) petroleum or petroleum products and who produced not less than 500 short tons of lubricating greases during the year beginning July 1, 1941 and ending June 30, 1942, or who produced 125 short tons of lubricating greases in any calendar quarter-year thereafter.

(6) "Lubricating greases" means all lubricants manufactured from petroleum or petroleum products and a soap, organic salt or ester of any fatty oil or fatty acid. This term shall not be construed to mean any compounded mineral oil which includes, among others, marine oils and soluble and non-soluble cutting oils and compounds.

(7) "Exempt greases" means those lubricating greases having a soap base of which base not less than one-half is a sodium soap or a barium soap or a lithium soap.

(b) *Limitation on use of fatty oils.* Beginning with the calendar quarter-year from April to June, inclusive, 1943 and subject to the exemptions in paragraph (c) of this section, no manufacturer shall produce lubricating greases not subject to the provisions of said paragraph (c) which in the aggregate in any calendar quarter-year consume fatty oils in excess of 50% by weight of the total amount of fatty oils and fatty acids

used in such manufacture in such calendar quarter-year.

(c) *Exemptions.* The provisions of paragraph (b) of this section shall not apply to the manufacture of exempt greases or to the manufacture of those amounts of other lubricating greases which are purchased by the United States Army, Navy or Office of Lend-Lease Administration or which are exported outside the territory comprising the continental United States, Canada and Alaska.

(d) *Reports.* On the 15th day of the month immediately following the end of each calendar quarter-year, each manufacturer shall file a report for such calendar quarter-year, in the form attached hereto as Exhibit A, with the Director of Refining, Petroleum Administration for War, Interior Building, Washington, D. C. The first such report shall be for the calendar quarter-year April to June, inclusive, 1943 and shall be due on July 15, 1943 and further reports shall be due thereafter as prescribed in this paragraph (d). No manufacturer shall sell or otherwise dispose of any lubricating grease reported as "Produced for Army, Navy or Lend-Lease" or as "Produced for export" except such as are actually purchased by the United States Army, Navy or Office of Lend-Lease Administration or are actually exported outside the territory comprising the continental United States, Canada and Alaska, respectively.

(e) *Appeals.* Any person affected by this order who considers that compliance therewith would work an exceptional and unreasonable hardship upon him may file an appeal setting forth the pertinent facts and reasons why he considers himself entitled to relief. All appeals shall be filed in quadruplicate and shall be addressed to the Director of Refining, Petroleum Administration for War, Interior Building, Washington, D. C., Ref: PAO 10.

(f) *Violations.* Any person who willfully violates any provision of this order, or who, by any act or omission, falsifies records kept or information furnished in connection with this order is guilty of a crime and upon conviction may be punished by fine or imprisonment.

Any person who willfully violates any provision of this order may be prohibited from delivering or receiving any material under priority control, or such other action may be taken as is deemed appropriate.

(g) *Effective date.* This order shall take effect on April 1, 1943.

(h) *Revocation of Recommendation No. 58.* Recommendation No. 58, §§ 1504.91 to 1504.96, inclusive, of this chapter, 7 F.R. 10082, is hereby revoked, effective as of the effective date of this order, except with respect to the first report required by § 1504.94 of said Recommendation No. 58 to be filed on or before April 15, 1943, which said report shall be filed with the Director of Refining, Petroleum Administration for War, Interior Building, Washington, D. C.

(2) On days when firing is scheduled and flag is being displayed as prescribed in paragraph (a) (3) above, no person, boat, vessel or craft shall enter or re-

(3) These regulations shall not deny traverse of portions of the danger zone by regular cargo carrying vessels proceeding on established steamer lanes, nor by naval units (both surface and air) engaged in anti-submarine operations, nor shall they deny passage of vessels at all times within one mile of the shore in the area. In the case of the presence of any such vessel in the danger area, the officer in charge of gunnery operations shall cause the cessation or postponement of fire until the vessel has cleared the part of the area. The vessel shall proceed on its normal course and not delay its progress.

TITLE 34—NAVY

Chapter I—Department of the Navy

PART 1—GENERAL REGULATIONS AFFECTING THE PUBLIC

RECIPROCAL VISITS TO COMMERCIAL PLANTS BY NATIONALS OF U. S. AND CANADA

§ 1.128 *Reciprocal visits to commercial plants by nationals of the United States and Canada.* (a) The Joint War Production Committee of Canada and the United States has recommended to the President of the United States and to the Prime Minister of Canada a policy for the facilitation of war production of the two countries. The aforesaid policy included the following statements:

(1) That administration barriers and other regulations or restrictions of any character which prohibit, prevent, delay, or otherwise impede the free flow of necessary munitions and war supplies between the two countries should be suspended or otherwise eliminated for the duration of the war;

(2) That the two Governments should take all measures necessary for the full-

est implementation of the foregoing principles.

(b) The President of the United States has approved the above-mentioned policy and has requested that affected departments and agencies of the Government of the United States abide by the letter and spirit of such policy so far as lies within their power.

(c) The prevailing restrictions upon visits of Canadian nationals to domestic commercial plants are considered to be burdensome and to constitute an impediment to the progress of the joint war production of the Governments of the United States and Canada. Imperative inspections, technical discussions, exchange of ideas and manufacturing processes, etc., must not be encumbered by delay, formalities, and the inconvenience which foreign nationality necessarily evokes.

(d) Accordingly, effective March 1, 1943, and for the duration of the war, Canadian nationals will be considered as and accorded the same privileges as citizens of the United States with respect to the matter of visits to commercial manufacturing plants, or government owned privately operated plants, engaged upon naval work or equipment. For the purposes herein provided, Canadian nationals are intended to mean Canadian citizens or British subjects permanently residing in Canada, who are representatives of Canadian manufacturing plants or who represent agencies controlled by the Canadian Government.

(e) Article 128, U. S. Navy Regulations, is hereby modified, to be effective upon the date previously mentioned and for the duration of the war, to the extent that applications for visits of such Canadian nationals need not be submitted to, nor authority required from, the Navy Department. Such visits shall, on and after the date specified, be administered within the jurisdiction of the Naval Inspection Service. Upon being assured that the visits are for a purpose essential to maximum production or to the prosecution of the war, and upon presentation of proper identification, i. e., passport, employee's identification card, or other satisfactory evidence, Naval Inspectors may exercise the same latitude of discretion in the matter of visits by Canadian nationals as they now apply to visits of citizens of the United States. In acknowledgment of the primary responsibility of contractors for the security of naval production within their plants, the decision of whether or not such a visit will be permitted shall continue to be subject to the determination of the respective contractor. Except in cases of emergency, where time does not allow for correspondence, applications for visits by Canadian nationals should be directed to the company whose plant is to be visited within a reasonable time in advance of the proposed visit.

(f) The policy announced in paragraphs (a) and (b) is founded upon an agreement of mutual cooperation for a common purpose. The benefits to be derived therefrom are intended to be bilateral and reciprocal. To insure these advantages in converse the Canadian Government, contemporaneously, is

adopting a policy, comparable to that herein established, for the administration of visits of United States citizens to Canadian plants.

JAMES V. FORRESTAL,
Acting Secretary of the Navy.

§ 6.20 *Limitations on speed.* (a) Speed of vehicles is limited to 35 miles per hour, unless a lower limit is prescribed for a particular road or roads by special regulations. In every event, vehicles shall be driven or operated at an appropriate reduced speed when approaching and crossing an intersection, when approaching and going around a curve, when approaching a hill crest, when traveling upon a narrow and winding road, and when special hazards exist with respect to pedestrians or other traffic or by reason of weather or roadway conditions.
