"milk cans" includes cans and covers transferred together and cans transferred apart from covers, but it does not include covers transferred apart from cans. Milk cans transferred for any purpose in the continental United States, Alaska, Hawaii, Puerto Rico and the Virgin Islands, and for export, are subject to the provisions of this supplementary order. As used herein "State" means any State, Alaska, Hawaii, Puerto Rico or the Virgin Islands.

§ 1202.378 *Compliance with this supplementary order.* No person shall make a transfer or accept a transfer of milk cans for any purpose, except in accordance with the provisions of this supplementary order or directions which may be issued by the Director.

§ 1202.379 *Manufacturers' transfer of milk cans.* (a) Subject to the provisions of Food Production Order No. 14 and this supplementary order, each manufacturer may transfer not in excess of the following percentages of his scheduled production of milk cans during the designated calendar quarters, and the remainder of such production shall constitute a reserve:

Calendar quarter commencing—	Authorized for transfer		Reserve
	Percent	Percent	
Oct. 1, 1943.....	85	15	
Jan. 1, 1944.....	70	30	
Apr. 1, 1944.....	70	30	

In making the transfer of milk cans authorized by this paragraph, during any of the calendar quarters mentioned, no manufacturer shall transfer into any State a percentage of his scheduled production of milk cans greater than the percentage which his total transfers of milk cans into such State in 1941 and 1942 was of his total transfers during those years into all States. However, if a manufacturer is unable during any calendar quarter to transfer into any State

the full number of milk cans permitted by this paragraph, such manufacturer may transfer the remainder into such State during any subsequent calendar quarter in addition to other permitted transfers. For the purposes of this paragraph, when a manufacturer transfers milk cans to a distributor or other person who operates in more than one State, such transfer will be considered as having been made into the State in which the office (home or branch office) of the distributor or other person placing the order is located.

(b) (1) The Director is hereby authorized to direct the transfer or to prohibit the transfer of the reserve established by paragraph (a) of this section. In so doing, the Director may direct the transfer of a manufacturer's current production at any given time, or he may direct the transfer of the reserve from the inventory of such equipment.

(2) Any person who wishes to make a transfer or accept a transfer of milk cans from a manufacturer's reserve for the purpose of handling milk or milk products may apply to the Director. Such application shall be in writing and shall be filed with the State AAA Committee for the State in which the milk cans will be principally used, and such State AAA Committee shall promptly transmit such application to the Director, together with its recommendation.

(3) If, by the fifteenth day before the end of any calendar quarter, the Director has not directed or prohibited the transfer of part or all of a manufacturer's reserve, such manufacturer may transfer his undirected reserve either (i) in the same manner provided in paragraph (a) of this section, or (ii) in accordance with a distribution plan submitted to the Director, unless the Director disapproves such plan and written notice of such disapproval is given to such manufacturer within seven working days after delivery of such distribution plan to the Director. The mailing of such distribution plan to the Director by registered mail shall constitute delivery of the plan under this paragraph.

§ 1202.380 *Transfers of milk cans for use in handling milk or milk products in the continental United States.* (a) Except as provided in paragraph (b) of this section, no person in the continental United States, other than a Federal agency, shall make a transfer or accept a transfer of milk cans for use in handling milk or milk products, except pursuant to a purchase certificate issued under Food Production Order No. 14 and this supplementary order. Such purchase certificate need not be limited to one milk can.

(b) If a dealer wishes to transfer milk cans to farmers for use in handling milk or milk products without obtaining purchase certificates from such farmers, such dealer shall first obtain a purchase certificate in his own name authorizing him to make such transfer. A purchase certificate issued to a dealer for this purpose may authorize the transfer of not to exceed 40 milk cans. Such dealer may then transfer such milk cans to farmers for use in handling milk or milk products without obtaining purchase certi-

ificates from such farmers. No farmer shall accept a transfer of more than two such milk cans during any calendar quarter in this manner, and no dealer shall transfer any milk cans during any calendar quarter to a farmer in this manner if he knows or has reason to believe that such farmer is not authorized to accept such transfer. In making transfers authorized by this paragraph, a dealer shall require farmers to sign a statement substantially as follows:

I hereby certify to _____
(Name of Dealer)
with whom this order is placed and to the War Food Administration that I am a farmer and that the milk cans received on this order are needed now and will be used by me in handling milk or milk products and that I have not, and will not, during this calendar quarter accept a transfer of more than two milk cans, except as may be authorized by a purchase certificate issued to me by the County Farm Rationing Committee.

Date _____ Purchaser _____

Upon request, such dealer shall submit all certifications which he has received in making transfers authorized by this paragraph to his County Farm Rationing Committee or State AAA Committee. If a dealer wishes to obtain an additional purchase certificate pursuant to this paragraph, he shall submit with his application to the issuing County Farm Rationing Committee or State AAA Committee all certifications received by him in making transfers authorized by the purchase certificate previously issued to him under this paragraph.

(c) Purchase certificates for milk cans issued under Food Production Order No. 3, as amended,¹ shall continue to be valid as though issued under Food Production Order No. 14 and this Supplementary Order until their revocation or expiration.

§ 1202.381 *Transfers of milk cans for use in handling milk or milk products in the territories and possessions of the United States.* Notwithstanding any provision of Food Production Order No. 14, the Farm Rationing Committee for Alaska, Hawaii and for Puerto Rico and the Virgin Islands is hereby authorized, in its discretion, to direct the distribution of milk cans and to provide for their transfer for use in handling milk or milk products in such territory or possession. The Farm Rationing Committee shall at all times serve the objectives sought by the rationing program and allocate milk cans in such manner as will afford the maximum contribution to agricultural production. In so doing, the Farm Rationing Committee may prohibit transfers of milk cans except pursuant to purchase certificates issued under its authority, and may prescribe the form of such certificates. Control over such transfers may be exercised by the Farm Rationing Committee in such manner and under such regulations as it may deem appropriate to carry out the purposes of this supplementary order. Any regulations issued by a Farm Rationing Committee shall be published in the FEDERAL REGISTER.

¹ 8 F.R. 5963, 7299, 7625, 8045, 9100, 9101, 10343, 11607.

§ 1202.382 *Transfers of milk cans for uses other than in handling milk or milk products.* No person shall make a transfer or accept a transfer of milk cans for use other than for handling milk or milk products, except pursuant to a written authorization from the Director.

§ 1202.383 *Transfer of milk cans to a Federal agency.* No Federal agency shall accept a transfer of milk cans, except pursuant to a written authorization from the Director.

§ 1202.384 *Transfers of milk cans for export.* No person shall make a transfer or accept a transfer of milk cans for shipment, nor shall any person ship milk cans, outside the continental United States, its territories and possessions, except pursuant to a written authorization from the Director.

§ 1202.385 *Authority for State AAA Committees to act as county farm rationing committees.* (a) A State AAA Committee shall act as the county farm rationing committee in the issuance of purchase certificates for milk cans to persons, including dairies and farmers' cooperatives, operating in two or more counties or in a county in which there is no county farm rationing committee. In such cases, the State AAA Committee shall perform the functions and carry out the duties of the county farm rationing committee and shall follow the procedures established for county farm rationing committees. In carrying out these functions, such State AAA Committee may appoint committees to discharge these functions in certain designated areas. Appeals from the action of such committees shall be made directly to the State AAA Committee.

§ 1202.386 *Manufacturers' reports.* Each manufacturer of milk cans shall, within 10 days after the commencement of any calendar quarter, furnish the Director with a report on Form MR-124 with respect to transfers of milk cans made during the preceding calendar quarter. (This reporting requirement has been approved by the Bureau of the Budget in accordance with the Federal Reports Act of 1942.)

§ 1202.387 *Communications.* All communications concerning this Supplementary Order No. 3 to Food Production Order No. 14 shall, unless otherwise directed, be addressed to the Director in charge of the Office of Materials and Facilities, War Food Administration, Washington 25, D. C., Ref. FPO 14, Supp. 3.

§ 1202.388 *Incorporation into Food Production Order No. 14.* This Supplementary Order No. 3 shall be added to and become a part of Food Production Order No. 14 and any violation of this Supplementary Order No. 3 shall be deemed to be a violation of Food Production Order No. 14.

[Suspension Order S-481]

MODERN CONSTRUCTION COMPANY

Sidney H. DesMarais does business as Modern Construction Company, a construction and contracting business located at 1329 Grand Avenue, St. Paul, Minnesota. On July 5, 1943, without War Production Board authorization, Sidney H. DesMarais caused "Residential Construction" to be begun, consisting of alterations and additions to the dwelling located at 609 Lafond Avenue, St. Paul, Minnesota, the estimated cost of which was \$2,900. By October 8, 1943, \$1,100. in labor and material had been incorporated into said dwelling, in violation of

paragraph (b) (1) of Conservation Order L-41, which placed a limit of \$200. on such construction. Further, in using restricted grades of softwood lumber in the construction work on said premises without specific approval from the War Production Board, he violated the provisions of paragraph (c) (1) of Conservation Order M-208. These acts constituted willful violations of the respective orders.

This violation of Conservation Order L-41 has diverted scarce materials to uses not authorized by the War Production Board, and has hampered and impeded the war effort of the United States. In view of the foregoing, it is hereby ordered, that:

§ 1010.481 *Suspension Order No. S-481.* (a) Deliveries of material to Sidney H. DesMarais, doing business as Modern Construction Company, or otherwise, his successors or assigns, shall not be accorded priority over deliveries under any other contract or order, and no preference rating shall be assigned, applied or extended to such deliveries by means of preference rating orders, preference rating certificates, general preference orders, or any other order or regulation of the War Production Board, unless hereafter specifically authorized in writing by the War Production Board.

(b) No allocation or allotment of materials or products, the supply or distribution of which is governed by any order of the War Production Board, shall be made to Sidney H. DesMarais, doing business as Modern Construction Company, or otherwise, his successors or assigns, unless hereafter specifically authorized in writing by the War Production Board.

(c) Nothing contained in this order shall be deemed to relieve Sidney H. DesMarais, from any restriction, prohibition or provision contained in any other order or regulation of the War Production Board, except in so far as the same may be inconsistent with the provisions hereof.

(d) This order shall take effect on January 19, 1944, and shall expire on March 19, 1944.

PART 1226—GENERAL INDUSTRIAL EQUIP-
MENT

[Conservation Order M-28 as Amended January 20, 1944]

DICHLORODIFLUOROMETHANE

The fulfillment of requirements for the defense of the United States has created a shortage in the supply of dichlorodifluoromethane for defense, for private account, and for export; and the following order is deemed necessary and appropriate in the public interest and to promote the national defense.

§ 1226.27 *Conservation Order M-28—*
(a) *Definitions.* For the purpose of this order:

(1) "F-12 gas" means dichlorodifluoromethane (sometimes called "freon-12").

(2) "Person" means any individual, partnership, association, business trust, corporation, governmental corporation or agency or any organized group of persons whether incorporated or not.

(3) "Producer" means any person engaged in the production of F-12 gas.

(4) "Supplier" means any person to the extent that he is engaged in the business of distributing F-12 gas to persons using the same for installation in refrigerating or air conditioning systems. The term shall include an equipment manufacturer to the extent that he engages in the sale of F-12 gas which has not been installed in such systems. "System" means any "system" as defined in General Limitation Order L-38.

(5) "Equipment manufacturer" means any person to the extent that he uses F-12 gas for charging new refrigerating or air conditioning systems or parts of systems manufactured by him. It does not include affiliates, subsidiaries, branches, divisions or sections or an enterprise, if not actually engaged in the manufacture of systems or refrigerant containing parts of systems.

(6) "Insecticide manufacturer" means any person to the extent that he uses F-12 gas in the production of insecticide.

(7) "User" means any person who installs F-12 gas in a refrigerating or air-conditioning system, other than an equipment manufacturer. It includes suppliers, service agencies, owners or lessees, to the extent that they engage in installing F-12 gas in any system.

(8) "Contract agent" means any person to whom or for whose account F-12 gas is delivered by a producer for distribution to suppliers.

(If the same person, or two or more branches, divisions or sections of the same enterprise, acts in two or more capacities as contract agent, supplier, equipment manufacturer, or insecticide manufacturer, the particular provisions of this order which apply to the respective activities must be followed, to the extent to which the various provisions are applicable to each activity.)

(b) *Systems for which no deliveries are permitted.* (1) No person (including users, dealers, and other suppliers, and producers) shall deliver, or accept delivery of, any F-12 gas for use in, or for resale for use in any new or used

system which is of a type referred to in List A.

(2) During the period from November 12, 1943, through August 31, 1944, no person (including users, dealers, and other suppliers, and producers), shall deliver, or accept delivery of, any F-12 gas for use in, or for resale for use in any new or used system of any type (not in List A) unless the system must be operated under one or more of the following conditions:

(i) Where an air-cooled condenser is used and the ambient temperature is 110° F or higher; or

(ii) Where the saturated refrigerant temperature corresponding to the suction pressure is less than minus 10° F; or

(iii) Where aluminum or magnesium alloys or rubber (except synthetic rubber) have been used in construction of the system and come in contact with the refrigerant, and are not easily replaceable; or

(iv) Where the system is for use aboard ship, or outside of the continental United States by the Army, Navy, Maritime Commission or War Shipping Administration; or

(v) Where the total operating charge required to operate the system is ten (10) pounds or less of F-12 gas and the system was in operation on November 12, 1943, and is used for food preservation or for storage of penicillin, blood serum, blood for plasma, blood plasma, biologicals and bacteriologicals; or

(vi) Where the use of no Group 2 or Group 3 refrigerants, as defined in the American Standard Safety Code for Mechanical Refrigeration, ASRE Circular No. 15, ASA-B 9-1939, as approved by the American Standards Association April 20, 1939, is permitted by that Code; or

(vii) Where the system is used in a sealed railroad car or sealed bus.

(The above restrictions apply not only to systems used for ordinary civilian purposes, but also to those owned, operated, or used within the continental United States by the Army, Navy, Maritime Commission or War Shipping Administration, including post exchanges and ships service stores, other than those used aboard ships.)

(3) Attention is called to paragraph (c) (2), which prohibits a supplier from delivering F-12 gas except on certified orders.

(c) *Deliveries by suppliers.* (1) No supplier or any other person (except a producer) shall deliver any F-12 gas for export outside of the continental United States, or for use by any of the following non-retail users (or to any ship yard or other person for use in a system to be delivered to any of them), namely: The Army, Navy, Maritime Commission, War Shipping Administration, post exchanges, ships service departments and activities, equipment and insecticide manufacturers, for new or used systems, or for use in insecticide, without specific authorization from the War Production Board. Subject to the foregoing restriction, any supplier or any other person (except a producer) may deliver F-12 gas to any other person, for use in any new or used system not referred to on List A of this order, if it must be operated under

one or more of the conditions stated in (b) (2) (i) to (b) (2) (vii) both inclusive.

No person shall accept from a supplier or other person any delivery of F-12 gas which is prohibited by the restrictions in this order.

(2) Whenever the owner of a system or any other user wishes to obtain F-12 gas for installation in a system or systems for which deliveries by suppliers are permitted under this order, he may place his order with any supplier for the minimum quantity, which the available cylinder or cylinders permit, necessary to bring the charge in the system or systems up to a normal operating charge. He must certify his order, or the vendor's delivery receipt, by a certificate endorsed on or attached to it, showing that the F-12 gas is to be used for such purposes only, and that he is not holding any empty cylinders not owned by him, which shall be in substantially the following form:

The undersigned purchaser certifies to the seller and the War Production Board that he does not have any F-12 gas cylinders not owned by him, which have been empty for more than 15 days; and that the F-12 gas covered by this order will not be used or re-sold for any purposes not permitted by Order M-28.

Such certificate, which must be signed by the purchaser or his authorized official, will constitute a representation that what is stated in it is true. A supplier must not deliver any F-12 gas except under certified orders; and he must not make delivery under any order which is certified if he knows, or has any reason to believe that the certificate furnished with such order is untrue, incomplete, or inaccurate. In such a case the supplier must reject the order, and should explain why he is doing so, so that the prospective purchaser can comply with this order. Each supplier must keep all accepted orders and certificates which he receives, for a period of two years, for inspection by the War Production Board. (Certificates in the form required by this order before its amendment on November 12, 1943, may continue to be used for 30 days after that date, in place of the above form.)

This restriction shall not prevent a person who services several systems for which deliveries are permitted by this order from purchasing a cylinder of F-12 gas from a supplier, if the amount purchased is the smallest quantity practicable considering the sizes of the standard commercial cylinders and the amount needed in his current operations.

(3) No "standby charge" or any other quantity of F-12 gas, over and above that needed to bring the total charge in a system or systems up to the normal operating charge, shall be delivered to or accepted by any person for use in a system which he owns, leases, or operates (except the Army, Navy, Maritime Commission or War Shipping Administration): except, however, that a "standby charge" may be maintained for a system which is operated primarily for one of the following purposes: air conditioning or refrigeration for the production and storage of penicillin, or blood serum; or

refrigeration for the storage of blood for plasma, or the production or storage of blood plasma.

(d) *Deliveries by producers.* Each producer shall hold his entire inventory of F-12 gas, together with all additional quantities produced or otherwise obtained by him from time to time, for delivery under such orders and for such uses as may be authorized or directed from time to time by the War Production Board. No deliveries of F-12 gas shall be made by a producer except pursuant to specific authorizations or directions heretofore or hereafter issued by the War Production Board.

(e) The provisions of this order shall be followed by every producer, contract agent, supplier, user, equipment manufacturer, insecticide manufacturer, and any other person buying, selling or delivering F-12 gas, without any regard to any preference ratings which have been assigned or which may hereafter be assigned to particular contracts or orders.

(f) *Miscellaneous provisions.*—(1) *Applicability of regulations.* This order and all transactions affected thereby are subject to all applicable regulations of the War Production Board, as issued and amended from time to time.

(2) *Reports.* (i) Each equipment manufacturer who wishes to secure delivery of F-12 gas during any month for charging systems or parts produced by him, or for factory repair and charging of sealed or hermetic condensing units, shall file with the War Production Board, on or before the 15th day of the preceding month a report on Form WPB-3326, prepared in accordance with the instructions for such form.

(ii) Any person wishing to secure F-12 gas during any month for ultimate uses (such as testing coaxial cable for leaks) other than the charging of new or used refrigeration or air conditioning systems or parts or use in insecticide, shall file with the War Production Board, on or before the 20th day of the preceding month, a report by letter, in triplicate, showing the minimum amount required for the month, the purpose for which required, and the amount used during the preceding calendar month for that purpose.

(3) *Violations.* Any person who willfully violates any provisions of this order, or who, in connection with this order, willfully conceals a material fact or furnishes false information to any department or agency of the United States is guilty of a crime, and upon conviction may be punished by fine or imprisonment. In addition, any such person may be prohibited from making or obtaining further deliveries of, or from processing or using, materials under priority control, and may be deprived of priorities assistance.

(4) *Appeals.* Any appeal from the provisions of this order, or any direction thereunder, shall be made by filing a letter in triplicate, referring to the par-

ticular provision appealed from and stating fully the grounds of the appeal.

(5) *Communications.* All reports to be filed and other communications concerning this order should be addressed to: War Production Board, General Industrial Equipment Division, Washington 25, D. C., Ref. M-28.

Issued this 20th day of January 1944.

INTERPRETATION 1

[Interpretation 1 revoked November 12, 1943]

INTERPRETATION 2

(a) *Quantities which may be obtained by system owner.* Subparagraphs (c) (2) permits the owner (or lessee) of a refrigerating or air conditioning system (not on List A) who does his own installation of F-12 gas, to place his order for the minimum quantity "which the available cylinder or cylinders permit", necessary to bring the charge in his system up to a normal operating charge.

The standard commercial cylinders are generally available in sizes which contain four

pounds, ten pounds, twenty-five pounds, and one hundred forty-five pounds of the gas, and a particular supplier may not have all four sizes in stock at all times. Questions will therefore arise as to the number and sizes of cylinders which the owner of a system is permitted to obtain, if the particular supplier with whom his purchase order is first placed should not happen to have the sizes of cylinder from which the minimum quantity needed by the system can be furnished the owner.

In such a case, the owner of the system should make a reasonable effort to obtain the minimum quantity which he needs, from some other supplier in his locality, rather than purchase an excessive quantity from the first supplier upon whom he calls. While the order does not prescribe rigid rules as to exactly what effort the purchaser should make in every case, it is required that he do whatever is practicable, under his particular conditions, to obtain the minimum quantity which he needs, and no more.

Where he is located in a large community in which there are a number of suppliers, he should contact several, if necessary in order to obtain the quantity needed. If he happens to be located in a small community where there is only one supplier who cannot furnish the exact quantity needed and the F-12 gas must be obtained immediately in order to avoid spoilage of a substantial quantity of food, the restriction would not prevent him from obtaining a larger amount, if that is unavoidable without letting his food spoil.

As a guide to the number and size of cylinders which should normally be obtained, for the different quantities of F-12 gas which may be needed in different cases, the following table is furnished:

Pounds of F-12 gas required	Amounts which should be ordered			
	Number of cylinders			
	4 pounds	10 pounds	25 pounds	145 pounds
0-4	1			
5-9		1		
10-14	1	1		
15-24		2 or	1	
25-29	1		1	
30-39	1		1	
40-49	1	2	1	
50-59		1	2	
60-69		2	2	
70-79	1		3	
80-89		1	3	
90-110		1	4	
111-145				1
146-170			1	1
171-195			2	1
196-220			3	1
221-245			4	1
246-290				2
291-315			1	2
316-340			2	2
341-365			3	2
366-390			4	2
391-435				3

The above interpretation applies only where the system owner buys his F-12 gas from a supplier, and installs it himself. If he has a service shop install the gas, the shop will always be able to furnish no more than the amount actually needed, from its service cylinders, and there will be no problem.

(b) *Installation of F-12 gas in systems or parts held by equipment manufacturers or dealers.* Paragraph (b) (1) prohibits deliveries of F-12 gas for systems on List A; (b) (2) prohibits deliveries for any other system, unless it must be operated under one or more of the conditions specified. These restrictions are intended to prevent deliveries of F-12 gas where there is a sale or other delivery of the gas. They prevent an equipment manufacturer or other person

from delivering F-12 gas in any new or used system or refrigerant-containing parts if charged with F-12 gas furnished by him after the effective date of the applicable restriction, for any prohibited use.

These restrictions do not prevent the withdrawal and reinstallation of F-12 gas in the course of repairing a used system or refrigerant-containing part, where no additional F-12 gas is added to what was already in the system or part.

Neither do they restrict the delivery of new or used systems or refrigerant-containing parts which had already been charged at the time the applicable restriction became effective; nor do they prevent the owner or lessee of an installed system who had F-12 gas in his possession on the effective date of the applicable restriction, from charging the system with such gas, or having someone else do this charging for him, where no transfer of possession or ownership is involved. (Issued November 30, 1943.)

PART 3201—MINING

[Preference Rating Order P-56 as Amended Jan. 20, 1944]

MINES AND SMELTERS

§ 3201.11 *Preference Rating Order P-56—(a) Purpose and scope.* This order explains how operators of mines and smelters in the United States and in foreign countries may get the materials and products they need to carry on their operations. The materials covered include not only maintenance, repair, and operating supplies, including controlled materials, but also machinery, other kinds of materials, and equipment. This order does not apply, however, to an operator of a nonessential mine as defined in Limitation Order L-208.

(b) *Definitions.* (1) "Producer" means a person operating any of the following enterprises, whether in the United States, or any of its territories, or in a foreign country, but does not include any enterprise defined as a "nonessential" mine in Order L-208 or any like enterprise located outside the United States, its territories or possessions: (i) any plant actually engaged in the extraction by surface, open-pit, or underground methods, or in the beneficiation, concentration, or preparation for shipment of the products of mining activity; (ii) any plant wholly engaged in the processing and burning of refractories; (iii) any plant producing any material listed below by smelting or refining processes, and to whom a serial number has been issued under Preference Rating Order P-73, or is hereafter issued as provided in paragraph (c):

Antimony	Nickel
Cobalt	Platinum
Copper	Tin
Iridium	Tungsten
Lead	Vanadium
Mercury	Zinc
Molybdenum	

(iv) any prospecting enterprise for the discovery, exploration, or development of new or additional mining projects, including the construction of access roads; and (v) mines, concentrating mills,

smelters, railroads, power plants, refineries, and appurtenances owned and operated by the companies holding serial numbers under Preference Rating Order P-58 on December 24, 1943.

(2) "District" means a mine supply control district of the Foreign Economic Administration.

(3) "Maintenance, repair, and operating supplies" means material used for the following purposes by producers in the conduct of enterprises described above in paragraph (b) (1): (i) minimum upkeep necessary to continue the working condition of essential property or equipment, and (ii) restoration of essential property or equipment to a sound working condition after wear and tear, damage, destruction or failure of parts, or the like have made the property or equipment unfit or unsafe for service; and supplies which are essential to and consumed or worn out in the conduct of such enterprises. In addition, except as hereinafter noted, the term "maintenance, repair, and operating supplies" includes minor capital additions normally necessary to the operation of the enterprise, but not exceeding in cost \$500 (excluding purchaser's cost of labor) for any one complete capital addition. The term "one complete capital addition" includes a group of items customarily purchased together and all items which would normally be purchased as part of a single project or plan. No capital addition shall be subdivided for the purpose of coming within this paragraph.

Producers Holding Serial Numbers

(c) *Priorities assistance for producers with serial numbers.* Producers holding serial numbers, which may be obtained in the manner specified in paragraph (f), may apply for priorities assistance as follows:

(1) For maintenance, repair, and operating supplies, by filing the appropriate mine quota application form with the Mining Division, War Production Board, Washington 25, D. C., as follows:

Metal mines.....	Form WPB-2937
Coal mines.....	Form WPB-2938
Non-metallic mines.....	Form WPB-2939
Smelters and refineries.....	Form WPB-2040
Core or churn drill operators.....	Form WPB-2937

For the first and second quarters of 1944, in order to purchase minor capital additions as defined in paragraph (b) (3), a producer must apply for a dollar value quota by letter filed with the Mining Division, War Production Board, Washington 25, D. C. A producer who has several plants or other operating units, even though they maintain separate records of maintenance, repair, and operating supplies, may apply in such letter for a single, aggregate quota covering all of such units, designating the several serial numbers involved. After the second quarter of 1944, application for a dollar value quota for the purchase of such minor capital additions may be made on the appropriate mine quota application form listed above.

(2) For other machinery, materials and equipment, by submitting to the Mining Division, War Production Board, Washington 25, D. C., an application on Form WPB-2910. In submitting applications under this subparagraph, Form WPB-2910 may be accompanied by a letter giving any unusual circumstances relevant to the application.

Foreign Producers Operating Under Mine Supply Control Districts

(d) *Priorities assistance for certain foreign producers operating under mine supply control districts.* To enable a producer not holding a serial number hereunder and located outside the continental United States and within the jurisdiction of a district to obtain priorities assistance, the following procedure is established:

(1) For maintenance, repair, and operating supplies a district may apply for priorities assistance by filing Form WPB-2937 with the Mining Division, War Production Board, Washington 25, D. C. A producer not holding a serial number and located in a district may apply for priorities assistance by submitting to such district his purchase orders for maintenance, repair, or operating supplies, together with such information as may be required by the district. Within the limits of the priorities assistance granted to it pursuant to this paragraph (d) (1), such district may authenticate any such purchase order for maintenance, repair, or operating supplies by indicating the appropriate priorities assistance and countersigning the purchase order as follows:

Approved: _____
 Name of district _____
 Signature of authorized official _____

(2) For other machinery, materials, and equipment, a producer not holding a serial number and located within a district may submit to the War Production Board, Form WPB-2910, such application to be endorsed with the signed approval of the district within which the applicant is located.

(3) A distributor of maintenance, repair, or operating supplies or of other machinery, materials, or equipment used by producers, who is located outside the United States and within the jurisdiction of a district, may apply for priorities assistance in the same manner as prescribed in paragraphs (d) (1) and (d) (2) for producers not holding serial numbers and located within the jurisdiction of a district.

Other Producers Not Holding Serial Numbers

(e) (1) *Priorities assistance for other producers not holding serial numbers.* A preference rating of AA-5 is hereby assigned to delivery orders for maintenance, repair, and operating supplies, except minor capital additions as defined

in paragraph (b) (3), placed by producers operating within the United States, its territories and possessions, and not holding serial numbers (other than operators of nonessential mines as defined in Limitation Order L-208). Such producers may apply for further priorities assistance for machinery or equipment or for further assistance for maintenance, repair, or operating supplies by submitting to the Mining Division of the War Production Board, Washington 25, D. C., a written application on Form WPB-2910. Foreign producers, not holding serial numbers and not located in a mine supply control district, may apply for priorities assistance by submitting to the Mining Division of the War Production Board a written application on Form WPB-2910.

(2) *Emergency procedure for non-serialized mines.* In case of actual or impending breakdown, producers not holding serial numbers may apply for priorities assistance on Form WPB-1436 or by telegraph either to the Washington Office or the nearest regional or district office of the War Production Board.

Serial Numbers

(f) *Issuance of serial numbers.* Applications for serial numbers may, in the case of producers within the continental limits of the United States, be filed with the appropriate War Production Board Regional Office, Attention: Regional Technical Advisor, Mining Division; or with the appropriate State Coordinator of Mines for transmission to such Regional Advisor; or with the Mining Division, War Production Board, Washington, D. C. Serial number application by districts must be filed with the Mining Division, War Production Board, Washington 25, D. C. Applications by all other foreign producers should also be filed with the Mining Division, War Production Board, Washington 25, D. C. In filing such application, the following forms shall be used:

Metal mines.....	Form WPB-1212
Coal mines.....	Form WPB-2784
Non-metallic mines.....	Form WPB-2758
Core or churn drill operators.....	Form WPB-2952

Smelters and refineries shall apply by letter. In issuing and cancelling serial numbers, the War Production Board will consider the importance to national defense of the present and prospective output of materials to be produced, the consumption of the critical material involved, and the importance to national defense of competing demands for such material, and competing demands for manpower and transportation. Serial numbers issued under Preference Rating Orders P-58 and P-73, and not cancelled prior to December 24, 1943, are hereby confirmed and shall be considered as having been issued under this Order P-56.

Use of Priorities Assistance; All Producers

(g) *Application and extension of priorities assistance.* The way to use pref-

erence ratings is explained in Priorities Regulation No. 3, and the way to use allotments, both in placing authorized controlled material orders and in making allotments, is explained in CMP Regulation No. 1. Instead of using the certification prescribed by those regulations or by any other regulation of the War Production Board, including Priorities Regulation No. 7, the producer may use the following endorsement signed manually or as provided in Priorities Regulation No. 7:

Allotment number _____
 Preference rating _____
 Order authorized under Preference Rating
 Order P-56, Serial No. _____

He shall not add the symbol "MRO" despite the certification instructions in CMP Regulation No. 5 or any other regulation. Requirements of other orders of the War Production Board as to special certifications remain applicable, but the foregoing endorsement shall be added to such certification. The use of the foregoing endorsement by a producer shall constitute a representation, subject to the criminal penalties for misrepresentation contained in section 35A of the Criminal Code (18 U. S. C. 80) that the material or equipment ordered will be used for the purpose for which priorities assistance was granted to acquire it. Preference ratings assigned for maintenance, repair, and operating supplies on Forms WPB-2910 (non-serialized producers only), 2937, 2938, 2939, and 2040 may not be used to obtain items on List A or List B of Priorities Regulation No. 3. Any items which are purchased without the use of preference ratings need not be charged against authorized dollar quotas.

(h) Restrictions on receipts and inventories. Notwithstanding the provisions of any other order or regulation of the War Production Board, including CMP Regulation 2, receipts and inventories of producers shall be subject to the following restrictions only: No producer shall receive any delivery of material which will increase his inventory of such material to an amount greater than the minimum necessary to sustain his current level of operations; and the ratio of such inventory to current production shall in no event exceed the ratio of average inventory to average production for the years 1938, 1939, and 1940.

(i) Restrictions on use and resale of material. Notwithstanding § 944.11 of Priorities Regulation No. 1, no producer shall use any material, whether or not obtained pursuant to this order, for any purpose other than that for which priorities assistance was granted to acquire it; nor may he sell any material (including machinery and equipment), which he has used in the conduct of any enterprise described in paragraph (b) (1), whether or not he obtained such material with priorities assistance under this or any other order, except:

- (1) To a producer holding a serial number hereunder, or
- (2) With the written approval of the War Production Board applied for by letter to the Mining Division, or

(3) With the written approval of a district if he is a non-serialized producer located within such district, or

(4) As permitted by Priorities Regulation No. 13.

Applicability of Other Regulations and Orders

(j) (1) CMP Regulation No. 5 and other regulations of the War Production Board. None of the restrictions contained in CMP Regulation No. 5 shall be applicable to producers, and no producer shall obtain any material under CMP Regulation No. 5. However, privileges under other orders and regulations of the War Production Board granted to persons on Schedules I and II of CMP Regulation No. 5 shall be considered as applicable to producers operating under this order. For example, Order E-5-a on gauges and precision measuring hand tools classifies a person on Schedules I and II of CMP Regulation No. 5 as an "approved user." Producers operating under Order P-56 are in the same position providing that certification clauses and all other provisions of such other orders are complied with.

(2) Restriction on use of priorities assistance. No producer, except as permitted by paragraph (e), shall acquire any maintenance, repair, or operating supplies through the use of any preference rating, except after prior application filed with the Mining Division of the War Production Board, Washington 25, D. C., on the appropriate mine quota application form for maintenance, repair, and operating supplies, as specified in paragraphs (c) and (d); nor shall he acquire any other machinery, material (other than maintenance, repair, and operating supplies), or equipment through the use of either any preference rating or any specific authorization of the War Production Board, except after prior application filed with the Mining Division on Form WPB-2910 or except after filing a project application. This means that, with exceptions noted, in cases where some other order or regulation of the War Production Board requires the filing of a special application in order for a person to get any particular product, producers who are covered by this Order P-56 are required to file an application in the form specified in this order with the Mining Division before they may file the special application required by the other order or regulation. The purpose of this provision is to enable the Mining Division both to screen all such applications in the light of its knowledge of the industry's requirements, and to help a producer in approved cases to obtain the material he wants.

Miscellaneous Provisions

(k) Records, audits, and reports. Each producer and each distributor shall keep and preserve for a period of not less than two years accurate and complete records of all transactions affected by this order, and shall submit from time to time to audit and inspec-

tion by duly authorized representatives of the War Production Board. Each producer and each distributor shall execute and file with the War Production Board or other designated agency such reports and questionnaires as the War Production Board may from time to time require.

(l) Federal Reports Act of 1942. The reporting requirements of this order have received the approval of the Bureau of the Budget pursuant to the Federal Reports Act of 1942.

(m) Appeals. Any appeal from the provisions of this order shall be made by filing a letter in triplicate with the Mining Division of the War Production Board, Washington 25, D. C., referring to the particular provision appealed from and stating fully the grounds of the appeal.

(n) Communications. All reports and applications hereunder and all other communications with respect to this order shall, except as otherwise specifically provided, be addressed to the Mining Division, War Production Board, Washington 25, D. C., Ref: P-56.

(o) Violations. Any person who willfully violates any provision of this order, or who, in connection with this order, wilfully conceals a material fact or furnishes false information to any department or agency of the United States is guilty of a crime, and upon conviction may be punished by fine or imprisonment. In addition, any such person may be prohibited from making or obtaining further deliveries of, or from processing or using, material under priority control and may be deprived of priorities assistance.

Issued this 20th day of January 1944.

WAR PRODUCTION BOARD,
 By J. JOSEPH WHELAN,
 Recording Secretary.

INTERPRETATION 1

APPLICABILITY TO CUTTING AND POLISHING OPERATIONS AT THE QUARRY

The term "producer" as defined in Preference Rating Order P-56 includes persons operating a quarry and also persons conducting further cutting and polishing operations at the quarry site, such as the manufacture of building stone and tombstones. These latter operations are included in the phrase "preparation for shipment, of the products of mining activity" appearing in paragraph (b) (1) (i) (§ 3201.11) of the order.

Since paragraph (j) (1) of the order forbids "producers" from obtaining any materials under CMP Regulation 5, producers of tombstones or other stone products at the quarry site may not operate under this regulation but must get priorities assistance exclusively under Order P-56.

The manufacture of tombstones and structural stone at a separate plant away from the quarry is not covered by Order P-56, and priorities assistance for MRO supplies required in such operations may be obtained under CMP Regulation 5. Under CMP Regulation 5, a rating of AA-2 is assigned to persons engaged in the manufacture of structural stone, while persons engaged in the manufacture of tombstones and monuments may use the AA-5 rating which is assigned under that regulation to unlisted business. PART 3292—AUTOMOTIVE VEHICLES, PARTS AND EQUIPMENT

[Limitation Order L-158, as Amended Jan. 20, 1944]

(iii) In addition, but only for passenger carriers and motorized fire equipment: (47) body structural repair parts, (48) sash, (49) destination signs, (50) fare boxes, (51) guards and grab rails, (52) door-operating mechanisms, (53) heating and ventilating equipment.

(2) "Rebuilt or reconditioned parts" means any replacement parts (defined in paragraph (a) (1) above) which have been used and restored for use through rebuilding or reconditioning operations.

(3) "Parts consumed in use" means those parts whose function in the operation of the vehicle results in a dissipation or deterioration of material, either in whole or in part, so that the residue has little or no salvage value.

(4) "Ignition contacts" means tungsten tipped parts such as screws, rivets, levers, arms or discs which are components of ignition circuit breaker assemblies.

(5) "Passenger automobile" means any passenger vehicle, including station wagons and taxicabs propelled by an internal combustion engine and having a seating capacity of less than eleven (11) persons.

(6) "Light truck" means a complete motor truck or truck-tractor with a gross vehicle weight rating of less than 9,000 pounds, as authorized by the manufacturer thereof, or the chassis thereof.

(7) "Medium and heavy motor truck" means a complete motor truck or truck-tractor with a gross vehicle weight rating of 9,000 pounds or more, as authorized by the manufacturer thereof, or the chassis thereof.

(8) "Truck trailer" means a complete semi-trailer or full trailer designed for transportation of property or persons, or the chassis thereof.

(9) "Passenger carrier" means a complete motor coach for passenger transportation, having a seating capacity of not less than eleven (11) persons.

(12) "Producer" means any individual, partnership, association, corporation, or other form of business enterprise engaged in the manufacture of replacement parts, as defined in paragraph (a) (1) above.

(13) "Supplier" means a person who supplies a producer with materials or component parts for the production or assembly of replacement parts.

(14) "Distributor" means any person not a producer or supplier whose business consists, in whole or in part, of the sale of replacement parts, as defined in paragraph (a) (1) above, from inventory. Distributor includes wholesalers, jobbers, dealers, retailers and other persons performing a similar function including garages and service stations.

(15) "Consumer" means the owner or operator of the automotive vehicle for which replacement parts are required, or the user of such replacement parts for any other purpose, not including the Army or Navy of the United States, the United States Maritime Commission, and other agencies listed in paragraph (c) (1) below.

(16) "Inventory" means a stock of new replacement parts held by a distributor for his own account. Inventory does not include any new replacement parts held on consignment or any "as is", rebuilt, reconditioned or reconditionable parts.

Provisions Relating to Production

(b) *Production of certain parts to be made as if orders were rated AA-1 and others AA-2X.* Notwithstanding the provisions of Priorities Regulation No. 1, Part 944, replacement parts, for medium and heavy motor trucks, truck trailers, passenger carriers, off-the-highway motor vehicles and motorized fire equipment, enumerated in paragraph (a) (1), except items (41) to (46) inclusive, must be produced as if the orders therefor bore a preference rating of AA-1. Replacement parts, for passenger automobiles and light trucks, enumerated in paragraph (a) (i) and also items (41) to (46) inclusive, must be produced as if the orders therefor bore a preference rating of AA-2X.

(c) *Correction of critical shortages.* Whenever the War Production Board determines that a critical shortage exists in respect to replacement parts, the Board may order any producer or supplier to schedule and deliver his production in such manner as will relieve the shortage; and in addition, may direct any producer or distributor to deliver or sell to any other person, at regularly established prices and terms, such quantities of replacement parts available for civilian distribution as the War Production Board may determine.

(d) *Production restricted to enumerated replacement parts; use of critical materials.* (1) No producer shall manufacture any parts for use in the repair, maintenance or improvement of passenger automobiles, light, medium and heavy trucks, truck trailers, passenger carriers, off-the-highway motor vehicles or motorized fire equipment except the items, and their components, enumerated in paragraph (a) (1) above as items (1) to (53) inclusive.

(2) In the production of such parts no materials shall be used which are prohibited by any orders, regulations or other restrictions on the use of critical materials now or hereafter issued by the War Production Board.

Standardization and Simplification Provisions

(e) *Pistons and bearings.* On and after November 15, 1943, producers shall make replacement pistons, piston pins, piston rings and engine bearings as components of engines, only according to the following standards:

(1) Pistons as components of engines only in standard sizes and the following oversizes: .005, .020, .030, .040, .060 and semi-finished.

(2) Piston pins as components of engines only in standard sizes and the following oversizes: .003, .005, .010.

(3) Piston rings as components of engines only in standard sizes and the following oversizes: .005, .020, .030, .040, .060; and in addition, for medium and heavy trucks and busses, .080, .100.

(4) Engine bearings as components of engines only in standard sizes and the following undersizes: .002, .010, .020, .030, .040, .060, .090 and semi-finished. In addition, connecting rod bearings with oversize outside diameter, and the "special length Ford main bearings".

(f) *Ignition contacts.* On and after December 1, 1943, all discs cut from tungsten contact rod for ignition contacts for all vehicles shall be cut to a thickness not exceeding .030 inch, plus a tolerance of .002 inch.

Provisions Relating to Distributors' Inventories

(g) *Restrictions on distributors' inventories.* (1) No distributor of replacement parts whose place of business is located in the eastern or central war time zone shall accept delivery of new replacement parts which, in combination with his existing inventory of new replacement parts, measured in total dollar cost value, will exceed a sixty-day (60) supply. Sixty-day supply means a supply in dollar cost value equal to the distributor's total sales, at his cost, of such new parts in the preceding two months' period.

(2) No distributor of replacement parts whose place of business is located in any other war time zone shall accept delivery of new replacement parts which, in combination with his existing inventory of new replacement parts, measured in total dollar cost value, will exceed a ninety-day (90) supply. Ninety-day supply means a supply in dollar cost value equal to the distributor's total sales, at his cost, of such new parts in the preceding three months' period.

(3) Irrespective of the restrictions in subparagraphs (1) and (2) above, a distributor may accept delivery of specific items of replacement parts even though his inventory then exceeds, or will by reason of such acceptance exceed, his maximum permissible inventory as specified in subparagraphs (1) and (2) above. The quantity of such specific items in dollar cost value shall not exceed the dollar cost value of his sales of such items during the preceding thirty days or the last thirty-day period in which a sale was made if the distributor is located in the eastern or central war time zones, and forty-five days in all other zones.

(h) *Return of new replacement parts.* New replacement parts, returned by a distributor to another distributor, if not included in the inventory of the person receiving the parts during the calendar quarter in which received shall be included in his inventory in the next succeeding calendar quarter.

(i) *Disposition of traded-in used parts.* No distributor may keep in his inventory, in his possession or under his control any used replacement parts which have been traded in and cannot be reconditioned for a period of more than thirty (30) days after they have been determined to be unserviceable, but he must dispose of them through customary disposal or scrap channels. Traded-in parts which can be reconditioned must be reconditioned, or returned to be reconditioned, as quickly as minimum quantities will permit.

(j) *Traded-in ignition contact points to be reclaimed.* As tungsten is a highly critical material, traded-in ignition contact points must be saved for possible reclamation. Therefore, they may not be scrapped. Where distributors can not reclaim the tungsten contacts for reuse, they must return them through normal trade channels to producers or suppliers for reclamation.

Provisions Relating to Distribution

(j) *No preference ratings required for delivery of replacement parts for resale.* No producer or distributor shall require any preference ratings for the purchase or the delivery of finished replacement parts for resale as such, except on Army, Navy, Maritime Commission and War Shipping Administration orders as provided in paragraph (L). All deliveries of such parts for resale or to consumers may be made as if the orders therefor bore the preference ratings assigned to their production in paragraph (b), and without regard to orders bearing a lower rating. In addition, the provisions of this paragraph are applicable to orders for finished parts required for rebuilding or reconditioning operations.

(k) *Parts for emergency repairs—(1) How to order parts.* Notwithstanding the provisions of paragraph (g) above, a distributor may order and accept delivery of replacement parts which he does not have in stock when required by a consumer for the emergency repair of a particular vehicle which cannot be operated without such parts. In such emergency, a distributor must file with his order to the producer a certificate in the following form:

CERTIFICATE FOR EMERGENCY REPAIR ORDER
AUTOMOTIVE REPLACEMENT PARTS

The undersigned purchaser certifies, subject to criminal penalties for misrepresentation, that the replacement parts specified in the attached order are essential for the repair of the following vehicle, which cannot now be operated without such parts:

Make..... Engine number.....
Signed.....
(Firm, partnership or corporation)
By.....
(Name and title of individual)
Dated:.....
Address of firm, partnership or corporation.

A copy of the certificate must be retained by the distributor issuing it as a part of his records.

(2) *Emergency repair orders take preference.* A producer receiving an order accompanied by a Certificate for Emergency Repair must give such order precedence in shipment over other orders not of an emergency nature.

(3) *Use of certificate restricted.* The Certificate for Emergency Repair may be used only to secure essential replacement parts for emergency repairs as described in this paragraph (k). It must not under any circumstances be used by a distributor to replenish his stock.

(l) *Preference ratings of AA-2X or higher required on sales by distributors to army, navy and maritime commission.* Irrespective of the provisions of this order, no distributor shall sell or deliver any replacement parts, as enumerated in paragraph (a) (1) above, to the Army or Navy of the United States, the United States Maritime Commission, or the War Shipping Administration except upon receipt of an order bearing a preference rating of AA-2X or higher.

(1) *Additional provisions for army orders.* Purchase orders for replacement parts (except parts for "post exchange" vehicles) submitted to distributors by the Army must specify, in accordance with War Department instructions, the type, manufacturer, model and United States Army registration number of vehicles covered by the purchase order; and must carry a certification that such vehicles are "dead-lined" for emergency repair. Delivery by distributors of replacement parts against such orders for the Army must be limited to replacement parts in distributors' inventory available for immediate delivery.

(m) *Restrictions on sales to consumers—(1) No sale of new parts where old part can be rebuilt or reconditioned.* No new replacement part shall be sold or delivered to a consumer to replace a part which the producer or distributor can rebuild or recondition by use of available local reconditioning facilities.

(2) *Used part to be turned in.* No producer or distributor shall sell or deliver any replacement part either new, used or rebuilt, to a consumer unless the consumer turns in to the producer or distributor, concurrently with his purchase, a used replacement part of similar kind and size for each such replacement part delivered to the consumer. However, a used replacement part need not be turned in in the following cases:

(i) Where the used part has been consumed in use, lost or stolen;

(ii) Where the used part is a cab assembly;

(iii) Where the consumer is a Federal or Territorial Department, Bureau of Agency, or a State or political subdivision thereof, which is forbidden by law from making such disposal of replacement parts;

(iv) Where the new or rebuilt part is ordered by telephone, telegraph or mail, or is to be installed by the purchaser.

(v) Where the new part to be purchased by the consumer will improve the efficiency of the vehicle, its capacity or usefulness, such parts being as follows: for all vehicles—oil filters; for medium and heavy trucks, truck trailers, passen-

ger carriers, off-the-highway motor vehicles and motorized fire and police equipment—auxiliary springs, trailer connections, brakes, fifth wheels, auxiliary fuel tanks, governors, landing gears, heavy duty generators, auxiliary transmissions, power take-offs, heavy duty trailer axles, wheels and rims which do not increase tire sizes, marker, clearance and identification lamps, spot lamps (internally controlled only), fog lamps and backup lamps, signaling devices, reflex reflectors, windshield defrosters, truck and bus traction sanders.

(3) *Use of consumer's certificates.* In any of the cases provided for in subparagraphs (2) (i), (ii), (iv), and (v) above, in which the consumer is not required to turn in a used part, he must sign and deliver to the producer or distributor concurrently with each purchase, or on the written confirmation thereof if the order is placed by telephone or telegraph, a Consumer's Certificate in the following form:

CONSUMER'S CERTIFICATE

AUTOMOTIVE REPLACEMENT PARTS

The undersigned purchaser certifies, subject to criminal penalties for misrepresentation, that: (a) the replacement parts covered by this certificate are essential for the maintenance, repair or improvement of equipment he now owns or operates; (b) these parts will be used to replace parts which, to the best of his knowledge, cannot be rebuilt or reconditioned by use of available facilities; and (c) he will, within thirty days after receiving the parts, dispose of the old parts, if any through scrap channels.

(Signed) _____
Vehicle owner or operator.

Date: _____ Address: _____

The foregoing Consumer's Certificate must be retained by the producer or distributor making the sale to the consumer as part of his records.

(4) *Emergency stocks for truck and passenger carrier fleet operators.* On and after December 31, 1943, any owner or operator of a fleet of twenty-five (25) or more medium or heavy trucks, passenger carriers or off-the-highway motor vehicles may, without turning in a similar used part or filing a Consumer's Certificate, purchase engines, less starting, ignition and fuel systems; transmission assemblies; and rear axle assemblies; in quantities not exceeding one each such part for every twenty-five (25) vehicles, or multiples of twenty-five (25) which he maintains in service currently licensed.

Miscellaneous Provisions

(n) *Applicability of War Production Board regulations.* This order and all transactions affected thereby are subject to all applicable provisions of the regulations of the War Production Board as amended from time to time except where otherwise stated.

(o) *Exceptions to applicability of this order.* (1) The terms and restrictions of this order, except as provided for in paragraph (c) and (L) above, shall not apply to any replacement parts sold to or produced under contracts or orders for delivery to or for the account of the Army or Navy of the United States, the United States Maritime Commission, the

War Shipping Administration, the Panama Canal, the Coast and Geodetic Survey, the Civil Aeronautics Administration, the National Advisory Committee for Aeronautics, the Offices of Scientific Research and Development.

(2) The terms and restrictions of this order entitled Provisions Relating to Distributors' Inventories and Provisions Relating to Distribution shall not apply to any person located outside of the forty-eight (48) states and the District of Columbia.

(p) *Violations.* Any person who willfully violates any provision of this order, or who, in connection with this order, willfully conceals a material fact, or furnishes false information to any department or agency of the United States, is guilty of a crime, and upon conviction may be punished by fine or imprisonment. In addition, any such person may be prohibited from making or obtaining further deliveries of, or from processing or using, materials under priority control and may be deprived of priorities assistance.

(q) *Appeals.* Any appeal from the provisions of this order shall be made by filing a letter in triplicate with the Field Office of the War Production Board nearest the appellant's place of business, referring to the particular provision appealed from and stating fully the grounds for appeal.

(r) *Communications.* All communications concerning this order shall, unless otherwise directed, be addressed to: War Production Board, Automotive Division, Washington 25, D. C., Ref.: Order L-158.

Issued this 20th day of January 1944.

WAR PRODUCTION BOARD,
By J. JOSEPH WHELAN,
Recording Secretary.

INTERPRETATION 1

RESIZING OF ENGINE PISTONS AND BEARINGS BY PRODUCERS' BRANCHES

The question of resizing engine pistons and bearings in the field to sizes other than those specified in paragraphs (e) (1) and (e) (4), respectively, of § 3292.46, Limitation Order L-158, has been the subject of some uncertainty in the industry. In order to clarify the order, with respect to the intent of these paragraphs, the following interpretation is hereby issued:

Producers' direct factory branches of warehouses, wholly owned or controlled by them, may finish engine pistons and bearings to any intermediate sizes not specified in paragraphs (e) (1) and (e) (4), respectively, of Limitation Order L-158, when ordered from the factory branch by a customer for immediate use in a specific engine. None of these intermediate sizes may be ordered from a factory branch for stock or to be held in inventory. A certificate for emergency order, as provided for in Order L-158, paragraph (k), should accompany each order placed with the factory branch for the intermediate sizes other than those specified in the paragraphs mentioned above, as a means of identifying the need for the part in a specific vehicle. (Issued Oct. 1, 1943.)

INTERPRETATION 2

PRODUCTION OF DECORATIVE HUB CAPS, WHEEL CAPS AND WHEEL TRIM RINGS NOT PERMITTED UNDER ORDER L-158

Hub caps, wheel caps and wheel trim rings which serve only as ornamental or decora-

tive items are not considered components of wheels, Item (8), paragraph (a) (1) (1) of Limitation Order L-158, as amended November 13, 1943. Consequently, they may not be produced. However, hub caps which serve as grease retainers are considered components of wheels and may be produced. (Issued Dec. 29, 1943.)

Subchapter C—Office of Director of War Utilities

PART 4501—COMMUNICATIONS

[Utilities Order U-2 as Amended Jan. 20, 1944]

GENERAL CONSERVATION ORDER FOR TELEPHONE INDUSTRY

§ 4501.1 *Utilities Order U-2—(a) Definitions.* (1) "Operator" means any individual, partnership, association, business trust, corporation, receiver, or any form of enterprise whatsoever, whether incorporated or not, the United States, the District of Columbia, any state or territory of the United States, any political, corporate, administrative or other division or agency thereof, to the extent engaged in rendering telephone communication service within, to, or from the United States, its territories or possessions.

(2) "Exchange line plant" means all that portion of an operator's local wire or cable distribution system which extends from the central office main frame, exclusive of poles, crossarms, insulators, and non-metallic conduit, and associated hardware and guys, and exclusive of drop and block wires.

(3) Without regard to accounting practices:

(i) "Maintenance" means the minimum upkeep necessary to continue a facility in sound working condition.

(ii) "Repair" means the restoration of a facility to sound working condition when the same has been rendered unsafe or unfit for service by wear and tear, damage, failure of parts or the like.

(iii) Neither maintenance nor repair shall include the improvement of any plant, facility or equipment, by replacing material which is still usable with material of a better kind, quality, or design.

(4) "Drop and block wire" means the portion of a customer's circuit (whether aerial or underground) extending from the inside wire (usually at the station protector or connecting block), or from the station equipment when no inside wire is involved, to the point of connection with the general overhead or underground system. This includes such circuit, carried by means of wire or small cables, extending to the cable terminal in cases where connection is made with a general cable system, or to the point of connection with the aerial wire plant in cases where connection is made with a general wire system, and also includes brackets, bridle rings, insulators, knobs, span clamps, screws, sleeves, strand, tubes, and other material used in the installation of drop and block wires; and the pipes or other protective covering for underground service connections.

(5) "Station installations" means the wires (or small cables) from the station apparatus to the point near the entrance to the building where the drop or block wire or cable terminates, or to the junction boxes where the house cable or other cable terminates; the wires (or small cables) used to connect station apparatus in the same building, such as main stations with extension stations, and stations of intercommunicating systems; the wires (or small cables) used to connect private branch exchange switchboards or their distributing frames with terminal stations located in the same building; and the clamps, cleats, connecting blocks, ground wire, ground rods, nails, station protectors, screws, and other material used in the installation of station apparatus and inside wires. The cables referred to above are the small cables used in station installations instead of wires, such as those run from wall outlets or floor terminals to the station apparatus. Inside wires (or small cables) installed specifically to serve as trunk, battery, or generator circuits from a private branch exchange to the point of connection with the permanent house or outside cables or wires shall be considered as a part of the station installation. The term "station installations" does not include the telephone instrument or other "station apparatus."

(6) "Schedule A service" means service to the extent required for the proper discharge of duties in the direct defense, public health, welfare and security categories listed on Schedule A attached.

(7) "Interim service" includes all service installed or reconnected on and after April 15, 1943 which requires an allocation or assignment of exchange central office station terminal equipment or exchange line plant. It also includes any service installed prior to that date according to a contract specifying that the service was on an interim basis.

(b) *Conservation.* (1) Operators shall conserve scarce and critical materials by the employment of all practical methods.

(2) [Revoked Jan. 20, 1944]

(3) Operators shall discontinue the further installation of dial P. B. X. systems and dial private intercommunicating systems. This provision does not prevent the installation of systems of less than 100 lines where the equipment is already in the stock of the operator or can be obtained from the stock of another operator. Nor does it bar additions to dial systems. Nor does it bar moves for the same business service within the same exchange area, or to a contiguous exchange area of the same operator, so long as no addition to exchange central office equipment or exchange line plant is made except for Schedule A business service.

(c) *Availability of facilities for essential uses.* (1) Operators shall disconnect service when they learn that the present real user of service is not a user contemplated in the service agreement. Any such disconnections shall be considered "normal disconnections" within the meaning of paragraph (c) (2) below.

(2) Exchange line plant, exchange central office equipment, or telephone sets made available through normal disconnections shall be used to take care of current applications for Schedule A service, service authorized by the War Production Board because of unreasonable hardship and service essential to producers of substantial quantities of food, before other applications for service are cared for.

(3) Idle facilities may be reserved to the extent operators find necessary to meet promptly the known or fairly anticipated requirements for Schedule A service and to provide for essential public pay station service.

(4) To the extent necessary to meet minimum needs for Schedule A service and for essential public pay station service, operators shall make available additional exchange central office equipment or exchange line plant by regrading any service or disconnecting "interim service" under the following provisions:

(i) "Interim service" shall not be subject to disconnection so long as it continues to meet the requirements of Schedule A service, essential public pay station service, or service essential to the producers of substantial quantities of food.

(ii) Regrading is to be done only when current installations of central office equipment permit. Regrading of Schedule A service and of business service is to be done only if regraded service meets minimum service needs.

(iii) In so far as practical these steps shall be taken in the following order. Regrading shall precede disconnection. Residence service shall be regraded or disconnected before business service. Any regrading or disconnection shall be in the reverse order of the dates of connection at the existing locations, that is, the most recent shall be regraded or disconnected first.

(5) Subject to the provisions of (c) (4) (ii) and (c) (4) (iii) above, operators shall regrade existing service to the extent necessary to provide service authorized by the War Production Board because of unreasonable hardship.

(d) *Limitations on additional telephones.* (1) Main stations. Operators shall limit the number of main telephone stations, including P. B. X. trunks, connected to any central office to 105% of the number the central office was designed to serve under pre-war engineering and operating practices. This provision has the following exclusions and exceptions:

(i) Main stations do not include extensions or P. B. X. stations.

(ii) If the number of main stations connected to a central office on March 25, 1943 exceeded the 105% limit, the number need not be reduced so long as service is satisfactory.

(iii) The 105% limitation need not be applied to a single-office exchange which is designed to serve less than 1,000 main stations.

(iv) The War Production Board may approve a percentage other than 105% for any central office.

(2) Residence extension service. Operators shall not install or reconnect

residence extension telephones, residence extension bells or residence P. B. X. telephones, nor as a substitute provide additional main lines or stations on party lines, nor install jacks and plugs for residence service. This provision has the following exclusions and exceptions.

(i) Jacks already in place may be reconnected provided that no more than one telephone and one bell shall be furnished with the telephone line with which the jacks are associated.

(ii) Temporary installations of one residence extension may be made when the operator finds it essential in cases of serious illness.

(iii) For practicing physicians and surgeons, the following services may be provided, but the operator shall supply the minimum which will meet professional requirements. The operator may install two jacks and make the main station telephone a portable telephone, or, as an alternative, install one extension telephone or, as an alternative, install two jacks for use with a single portable extension telephone. The operator may also provide a connection with an answering bureau.

(iv) The installation and reconnection in residence quarters of telephones connected to private branch exchanges serving hotels, apartment houses, etc., may be made to the extent that no more than one such telephone may be provided in any residence quarters.

(e) *Limitation on drop and block wire.* Except when necessary to meet the needs for Schedule A service or for essential public pay station service, operators shall limit the further installation of drop and block wire to the following lengths. In exchanges serving more than 1,000 main stations, aerial drop and block wire shall not exceed one pole-to-pole span along any pole line from the point of connection with existing plant. If this span is less than 75 feet, two pole-to-pole spans are permitted. In exchanges serving 1,000 main stations or less, drop and block wire shall not exceed two pole-to-pole spans. However, the drop wire may be extended beyond the limits specified to a messenger strand attachment in the next adjacent span and to a single pole outside the line, when this is necessary to provide clearance over a street or to clear a tree or other obstacle. An underground drop and block wire shall not exceed 500 feet.

(f) *Limitation on replacements.* Operators shall not make replacements of equipment and facilities (other than poles, crossarms, insulators and non-metallic conduit, associated hardware and guys and station installations) except:

(1) To maintain or protect existing service.

(2) In making an addition, to the extent that the cost of material replaced or of the replacing material does not exceed

25 percent of the cost of the total material added.

NOTE: Paragraphs (f) (3), (4), (5), (6) and (7), formerly (f) (2), (3), (4), (5), and (6), redesignated Jan. 20, 1944.

(3) To provide a permanent installation in lieu of one temporarily made to meet an exigency.

(4) To provide for decreased service demands or for the regrading provided for in paragraph (c).

(5) To make necessary replacements for supplying the residence extension service which is permitted for practicing physicians and surgeons in paragraph (d) (2) (iii) and for reconnecting jacks in paragraph (d) (2) (i).

(6) To effect a change in the "class" or "grade" of service, provided the change is not otherwise prohibited by this order. The "classes" of service involved are business, residence, semi-public, residence coin; the "grades" of service involved are individual, two-party, four-party, multi-party.

(7) To provide station wiring plans or key arrangements which conserve one or more telephones.

(8) To replace "left-in" telephone sets so that a subscriber may retain the same type telephone sets after a change of address within the same exchange area or to a contiguous exchange area of the same operator.

(9) To install amplifying equipment for the hard-of-hearing.

(10) To recover insulated drop wire from existing plant to the extent required for current operations.

(g) *Limitation on additions.* Operators shall not add exchange central office equipment or exchange line plant unless essential for one of the following reasons:

(1) To maintain or protect existing service.

(2) To meet the known or fairly anticipated needs of Schedule A service or to provide essential public pay station service where facilities cannot be made available through regrading or disconnection as provided in paragraph (c) above. Whenever cable is added pursuant to this subparagraph, it may include additional cable conductors totaling not more than 200 pounds of copper. The operators shall not divide a single job or project so as to qualify hereunder.

(3) To provide cable terminals warranted by sound engineering practices.

(4) To install exchange central office equipment, *Provided*, That 75 percent or more in cost of material required for the addition is recovered from the operator's plant or is obtained from any operator's stocks. The material taken from stocks or plant pursuant to this subparagraph shall not be replaced.

(5) To provide exchange cable or exchange line rearrangements or extensions warranted by sound engineering practices, *Provided*, That in no single instance shall more than 200 pounds of

copper (copper content of cable) or 50 pounds of steel wire be used. The operator shall not divide a single job or project to qualify it hereunder.

(h) *Non-applicability to certain replacements and additions.* (1) The terms of this order shall not prohibit wire communications projects approved by the War Production Board on Forms WPB-617 (PD-200), WPB-2774 (UF-30), WPB-1696 (PD-685) or other appropriate form.

(2) Nor do they prohibit the completion of a project the physical installation of which was started at a time when the project was permitted by Order L-50 or an earlier issue of Order U-2.

(i) *Producers of substantial quantities of food.* Notwithstanding other provisions of this order, additions to the exchange open wire line plant and drop wire plant to provide service which is essential to the operations of a producer of substantial quantities of food may be made to the following extent. The addition must be limited to two spans of insulated paired wire, including the pole-to-house span, and 100 pounds of steel or iron wire in the case of a grounded circuit or 200 pounds in the case of a metallic circuit for each qualified subscriber connected. The portions of the steel or iron wire classed as "exchange line plant" and "drop and block wire" shall not affect these limits. The addition may include poles, crossarms, hardware and other material used in the installation of open line wire and drop wire. An addition for a group of subscribers as a single project may be made under the terms of this paragraph if the aggregate amount of steel or iron wire required for the entire project divided by the number of qualified subscribers does not exceed the limit specified.

PART 4501—COMMUNICATIONS

[Utilities Order U-3 as Amended Jan. 20, 1944]

PREFERENCE RATING ORDER (MRO) FOR TELEPHONE INDUSTRY

§ 4501.6 *Utilities Order U-3*—(a) *Definitions*. For the purpose of this order:

(1) "Operator" means any individual, partnership, association, business trust, corporation, receiver, or any form of enterprise whatsoever, whether incorporated or not, the United States, the District of Columbia, any state or territory of the United States, any political, corporate, administrative, or other division or agency thereof, to the extent engaged in rendering telephone communication service to the public (and such telegraph and teletypewriter service as may also be conducted by him) within, to, or from the United States, its territories, or possessions. Public law enforcement agencies and public fire protection agencies are excluded from this definition for the purposes of this order.

"Operator" also includes any persons operating a rural cooperative or mutually-owned telephone system. It further includes persons owning either a telephone or a telephone system which is connected to a telephone system rendering service to the public, so long as they do not generally use an MRO order other than Order U-3. Those who generally use another MRO order for their business operations, as for example railroads using Order P-142 or a manufacturer using CMP Reg. 5 are excluded from this definition.

"Operator" also includes any persons to the extent engaged in the operation of a private telephone communications system, provided that a specific direction from the War Production Board entitles such persons to use the preference rating and allotment number authorized by this order. Application for such a specific direction should be made by letter to the War Production Board, Washington 25, D. C., Ref.: U-3.

(2) "Material" means any commodity, equipment, accessory, part, assembly or product of any kind.

(3) Without regard to accounting practices:

(i) "Maintenance" means the minimum upkeep necessary to continue a facility in sound working condition.

(ii) "Repair" means the restoration of a facility to sound working condition when the same has been rendered unsafe or unfit for service by wear and tear, damage, failure of parts or the like.

(iii) Neither maintenance nor repair shall include the improvement of any plant, facility or equipment, by replacing material which is still usable, with material of a better kind, quality or design.

(4) "Operating supplies" means any material essential to the operator's busi-

ness and used for purposes other than maintenance and repair. "Operating supplies" purchased with the rating or allotment number authorized by this order can not be used in any single case in an amount exceeding the dollar limits of paragraph (c).

(5) Without regard to accounting practices, "operator's inventory" means the aggregate of material currently owned by an operator and not incorporated into plant or in the process of being consumed, exclusive of:

(i) Material listed for sale on Form WPB-2567 (UF-6), and filed with the Communications Division, Office of War Utilities. Records of withdrawals from and additions to material listed for sale shall be maintained and preserved for a period of not less than two years under the authority of paragraph (i) and shall be reported to the Communications Division upon the request of the War Production Board.

(ii) Material for use on a project approved by the War Production Board.

(iii) [Revoked Oct. 30, 1943]

(iv) Material set aside to restore plant damaged by enemy action or sabotage provided the operator has received War Production Board approval on Form WPB-2774 or other appropriate form. Withdrawals must be reported to the War Production Board.

(v) Lead covered cable or bare line wire maintained by an operator for the repair of major breakdowns due to storms, floods, etc., reported as prescribed on Form WPB-1127 (UF-5), unless disapproved by the War Production Board.

(vi) Poles, crossarms, insulators and non-metallic conduit, furniture and fixtures; office machinery; printing, stationery and office supplies; house service supplies; and coal and petroleum products.

(b) *Rating and CMP allotment number*. (1) An operator is authorized to use the allotment number U-9 and preference rating of AA-1 for deliveries of material for maintenance, repair and operating supplies.

(2) An operator may apply and a supplier may extend the rating or allotment number in the manner provided in Priorities Regulation 3 and CMP Regulation 3, by placing on his delivery order substantially the certification set forth below in paragraph (b) (3).

(3) Utilities maintenance, repair and operating supplies certification.

Allotment number U-9, preference rating AA-1. The undersigned operator certifies, subject to the penalties of section 35A of the United States Criminal Code, to the seller and to the War Production Board, that, to the best of his knowledge and belief, the undersigned is authorized under applicable War Production Board regulations or orders, and under all provisions of Utilities Orders U-2, U-3, and U-6, to place this delivery order, to receive the item(s) ordered for the purpose for which ordered and to use any preference rating or allotment number which the undersigned has placed on this order.

(c) *Restrictions on use of material*.

(1) Material obtained under this order may be used by an operator only within the limitations of Orders U-2 and U-6.

(2) Material obtained under this order may be used for operating supplies only in the following cases:

(i) An amount costing not more than fifty dollars may be used on any project specifically approved by the War Production Board on Form WPB-2774 or any alternative form.

(ii) [Revoked Jan. 20, 1944]

(iii) It may be used for telegraph and teletypewriter facilities in any single case in which the total material cost does not exceed \$2,500.

(iv) An amount costing not more than \$2,500 may be used for other purposes in any single case in which the total cost of all material used does not exceed \$5,000.

(v) It may be used on any construction project approved by the War Production Board on Form WPB-2774 or any alternative form. However, material so used may only be replaced in inventory by use of the preference rating or allotment number authorized on the WPB-2774 or alternative form.

(3) An operator, who does not furnish telephone service to the public, whose "operator's inventory" at the end of 1942 or whose use of material during 1942 did not exceed \$10,000 may not, in any single case, use material obtained under this order costing more than \$500 for operating supplies.

(4) No operator shall subdivide a single order job, or project to qualify it under the dollar limitations of this paragraph.

(5) Material obtained under this order may be used for maintenance and repair without regard to dollar limitations on the use of material for operating supplies.

(6) The dollar limits of this paragraph (c) shall not prevent the use of material on hand to meet temporary traffic or emergency requirements, but where the dollar limits are exceeded the material must be returned to inventory or to its original location in plant within thirty days, unless application has been made to the War Production Board for authority to continue the use of material.

(7) No material may be used for building construction except as permitted by Order L-41. However, an operator may effect maintenance and repair of buildings which are essential to the conduct of the operator's business.

(8) A P. B. X. switchboard obtained under this order may be installed initially only for Schedule A service as set forth in Order U-2, or for essential public pay station service.

(d) *Authority to begin construction*. For any addition or expansion of telephone, telegraph or teletypewriter facilities involving a total material cost which exceeds the dollar limitations of paragraph (c) (2) or (c) (3) above, or which involves a total cost in material in excess of \$5,000, an operator must obtain authority to begin construction and necessary priority assistance on Form WPB-2774.

(e) *Restrictions on inventory*. (1) No operator shall accept deliveries of

material unless after the delivery his operator's inventory will not exceed a practical working minimum. A practical working minimum shall in no case be greater than 27½% of the dollar value of material used during the calendar year 1940 for all purposes exclusive of the items in paragraph (a) (5) (vi) and materials which were used for building construction. The items in (a) (5) (vi) may be accepted by an operator even if his operator's inventory exceeds 27½% of his 1940 usage of material.

(2) No operator shall accept delivery of a size, type, gauge and length of cable, wire or strand, if the operator's inventory of that size, type, gauge and length is in excess of requirements for the next sixty days. However, if an operator needs some wire, cable or strand, this provision does not forbid purchase of the minimum standard reel-length, even though the operator does not expect to use the whole reel in the next sixty days.

(3) No operator shall replace in inventory by use of the preference rating or allotment number of Order U-3 any material withdrawn pursuant to paragraph (g) (4) of Order U-2.

(f) *Restrictions on purchases.* (1) No operator shall use the allotment number or preference rating assigned by this order to obtain material during any calendar quarter in an aggregate dollar amount exceeding one-fourth of his aggregate dollar usage in 1942 for maintenance, repair and operating supplies.

(2) But, so long as the 1942 base as set forth in paragraph (f) (1) is not exceeded during a calendar year, an operator may in any quarter obtain the dollar quantity used in the corresponding quarter of 1942.

(g) *Exemptions.* (1) Any operator whose operator's inventory did not exceed \$10,000 at the end of 1942 is exempt from the inventory restriction of paragraph (e) (1).

(2) Any operator whose use of material during the year 1942 did not exceed \$10,000 shall be exempt from the provisions of paragraph (f) (1) above.

(h) *Sales of material.* Material which is "industrial material" as defined in Priorities Regulation 13 and is listed for sale under (a) (5) (1) or is reserved for emergencies under (a) (5) (iv) and (a) (5) (v), must when sold between operators be sold without a preference rating or allotment number. However, the material in (a) (5) (iv) and (a) (5) (v) so sold must be used for the purposes for which it was originally reserved.

(i) *Records and reports.* Each operator acquiring maintenance, repair or operating supplies pursuant to this regulation shall keep and preserve, for a period of not less than two years, accurate and complete records of all such supplies so acquired which shall, upon request be submitted to audit and inspection by duly authorized representatives of the War Production Board. In addition, each operator affected by this order shall file such reports with the Communications Division, Office of War

Utilities, as may from time to time be required by the War Production Board.

(j) *Applicability of regulations.* (1) This order and all transactions affected by it, except as expressly provided, are subject to all applicable regulations of the War Production Board, as amended from time to time.

(2) None of the provisions of CMP Regulations No. 5 or 5A shall apply to operators as defined in paragraph (a) (1) of this order, and no such operator shall obtain any material under the provisions of these regulations.

(k) *Violations.* Any person who wilfully violates any provision of this order or who, in connection with this order, wilfully conceals a material fact, or furnishes false information to any department or agency of the United States is guilty of a crime, and upon conviction may be punished by fine or imprisonment. In addition, any such person may be prohibited from making or obtaining further deliveries of, or from processing or using, material under priority control, and may be deprived of priorities assistance.

(l) *Communications.* All reports to be filed, appeals and other communications concerning this order should be addressed to: Communications Division, Office of War Utilities, War Production Board, Washington 25, D. C. Ref.: U-3.

² The maximum prices stated above shall not apply where community prices are established for apples sold at retail by district or regional offices of the Office of Price Administration.

(6) The maximum price in each case for sales of apples that have been "set aside" under Food Distribution Order 88, delivered to the designated receiving point of a government procurement agency, in less-than-carlots or less-than-trucklots, shall be the sum of the following:

dices to Article III, section 15, for less-than-carlot and less-than-trucklot sales to institutional users.

8. A new paragraph is added to section 2 to read as follows:

(d) Any regional office of the Office of Price Administration, and such district offices as the appropriate regional office may authorize, may by order establish maximum markups for purveyors at wholesale receiving points within its jurisdiction, not to exceed 150% of the applicable over-all maximum markups for less-than-carlot and less-than-trucklot sales named in the Appendices to Article III, section 15, and add further limitations to the definition of the term "purveyor" in order to reflect any additional functions normally performed by such sellers in the particular wholesale receiving point for which the markup is being fixed.

9. A new subparagraph is added to section 8 (a) to read as follows:

(14) "Purveyor" means a person who (i) purchases the kind of fresh fruits and vegetables being priced, (ii) maintains facilities for washing, trimming, sorting, grading, repacking and ware-

housing, and employs such of these facilities in connection with the sale of the particular goods being sold, as may be specified by the appropriate regional or district office, (iii) employs salesmen to call on institutional and commercial users, (iv) makes less-than-carlot or less-than-trucklot or less-than-original-container sales to restaurants, ships, hotels, hospitals, camps, or other institutional users, (v) delivers within the metropolitan area surrounding and including the city, town, village, or other populated area in which his warehousing and selling facilities are located, and (vi) performs such additional functions as may be defined by the appropriate regional or district office of the Office of Price Administration for the area in which the seller is located. A seller shall be considered a purveyor only when making sales to institutional users of goods which have been handled and sold in this manner, and no seller shall be considered a purveyor when selling unbroken containers.

PART 1306—IRON AND STEEL

[MPR 350, Amdt. 1]

PACKERS' TIN CANS

A statement of considerations involved in the issuance of this amendment, issued simultaneously herewith, has been filed with the Division of the Federal Register.*

Maximum Price Regulation 350 is amended in the following respects:

1. Section 1306.503 is amended to read as follows:

§ 1306.503 *Adjustable pricing.* Any person may agree to sell at a price which can be increased up to the maximum price in effect at the time of delivery; but no person may, unless authorized by the Office of Price Administration, deliver or agree to deliver at prices to be adjusted upward in accordance with action taken by the Office of Price Administration after delivery. Such authorization may be given when a request for a change in the applicable maximum price or a request for the establishment of a charge under paragraph (f) 3 of Appendix A is pending, but only if the authorization is necessary to promote distribution or production and if it will not interfere with the purposes of the Emergency Price Control Act of 1942, as amended. The authorization may be given by the

Administrator or by any official of the Office of Price Administration having authority to act upon the pending request for a change in price or to give the authorization. The authorization will be given by order, except that it may be given by letter or telegram when the contemplated revision will be the granting of an individual request.

2. Paragraph (f) 3 of Appendix A is amended to read as follows:

3. *For enamels other than sanitary or "C" enamels:* The charge, if any, which the selling producer charged or had in effect for the same enamel between October 1 and 15, 1941. Where the selling producer furnishes an enamel other than one customarily furnished by him between October 1 and 15, 1941, no charge may be added except where established in the following manner. The producer shall request the Iron and Steel Branch of the Office of Price Administration, Washington, D. C., in writing to establish a specified extra charge for the enamel. Such request must include a description of the enamel, its special nature, the cost of furnishing it, the circumstances under which it will be sold, and whatever other information the producer wishes to submit in support of his request. Within ten days after receipt of the request the Iron and Steel Branch may request such additional information as it may require. The Iron and Steel Branch shall deny the request or establish such extra charge as may seem to it just and proper. This must be done in writing within twenty days after receipt of the request or if additional information is duly required by the Iron and Steel Branch, twenty days from the receipt of such information. Otherwise, the charge requested shall be deemed automatically approved for a period of three months or until such time as the Iron and Steel Branch acts, whichever period is longer. Action by the Iron and Steel Branch shall be in writing and any charge approved may be subject to such conditions (including requests for information) and limitations as may seem to the Iron and Steel Branch just and proper.

This amendment shall become effective January 26, 1944.

ORDER DISMISSING PROCEEDINGS

In the matter of licensee, Suckow Borax Mines Consolidated, Inc. Proceedings for revocation of license.

To: Suckow Borax Mines Consolidated, Inc., Ruth Suckow, President, and Paul O. Tobeler, Secretary-Treasurer, 2466 East 56th Street, Los Angeles 11, California.

Information now available to me, including the transcript of the hearing on September 29 and 30 at which you were given an opportunity to show cause why licenses issued to you under the Federal Explosives Act should not be permanently revoked, does not, in my opinion, definitely indicate affirmatively whether you are loyal and friendly or are disloyal and hostile to the United States. The license heretofore issued to you has expired. In the circumstances I am of the opinion (1) that these proceedings should be dismissed; (2) that if you submit to me a properly completed application a license should be issued to you; and (3) that if a license is issued to you, your transactions in and operations involving explosives should be under special surveillance.

It is so ordered.

Dated at Washington, D. C., this 12th day of January 1944.

In the matter of licensee, Consolidated Wagon and Machine Company. Proceedings for revocation of license.

To: Consolidated Wagon and Machine Company, 144 South State Street, Salt Lake City, Utah.

Based upon the records in this matter, I make the following findings of fact.

1. On December 18, 1943, a specification of charges against you, setting forth violations of the Federal Explosives Act (65 Stat. 863), as amended, and the regulations pursuant thereto of which you were accused, was mailed to you, and on December 24, 1943, was delivered to you, giving you notice to mail an answer within 15 days from December 18, 1943, answering the charges against you and requesting an oral hearing if you wished.

2. More than 25 days have elapsed since December 18, 1943. The length of time required for mail to be delivered to the Bureau of Mines, Washington, D. C., from Salt Lake City, Utah, does not exceed 6 days. You have not answered the charges against you or requested an oral hearing.

3. The charges against you are true.

Now, therefore, by virtue of the authority vested in me by the Federal Explosives Act and the regulations pursuant thereto, I hereby order:

1. That all licenses issued to you under the Federal Explosives Act be and they are hereby revoked at the expiration of three weeks from the date of this order;

2. That within three weeks from the date of this order, you shall use, or sell or otherwise dispose of, to properly licensed persons, or destroy, all explosives and ingredients of explosives owned or possessed by you or consigned to you, or which are in your custody;

3. That after having used, disposed of or destroyed all of the explosives and ingredients as required by paragraph 2 of this order, you shall, within three weeks from the date of this order, deliver or mail to R. D. Reeder, Supervising Engineer, United States Bureau of Mines, 1600 East First South, Salt Lake City 1, Utah, a sworn statement of your uses of and transactions in explosives and ingredients of explosives beginning with the date of this order and ending with the final use, sale or other disposition or destruction of the explosives and ingredients as required above. The statement shall set forth the amount of each kind of explosives and ingredients of explosives which you had on hand at each location at the opening of business on the date of this order, the amount of each kind acquired by you that day and each day thereafter, the dates on which acquired, and the names and addresses of the persons from whom acquired, the amount of each kind used, sold or otherwise disposed of or destroyed by you, the dates on which used, sold or otherwise disposed of or destroyed by you, and the names and addresses and numbers and dates of Federal explosive licenses of the persons to whom sold or otherwise disposed of;

4. That within three weeks from the date of this order, you shall surrender all licenses issued to you under the Federal Explosives Act and all certified or photographic copies thereof by mailing or delivering them to R. D. Reeder, Supervising Engineer, 1600 East First South, Salt Lake City 1, Utah.

Failure to comply with any of the provisions of this order will constitute a violation of the Federal Explosives Act punishable by a fine of not more than \$5,000 or by imprisonment for not more

than one year, or by both such fine and imprisonment.

This order shall be published in the FEDERAL REGISTER.

Dated at Washington, D. C., this 14th day of January 1944.
