#### PART 944—REGULATIONS APPLICABLE TO THE OPERATIONS OF THE PRIORITIES SYSTEM

[Priorities Reg. 3, Direction 7, as Amended July 5, 1945]

##### REPLACEMENT OF DEFECTIVE MATERIALS OR MATERIALS LOST, STOLEN, DAMAGED OR DESTROYED IN TRANSIT

The following direction is issued pursuant to Priorities Regulation 3:

(a) *Purpose.* This direction explains how a supplier must schedule delivery of material covered by a rated order where the material delivered is defective or where it is not received by the purchaser because lost, stolen, damaged or destroyed in transit. This direction does not apply to controlled materials. Direction No. 16 to CMP Regulation No. 1 covers the replacement of defective controlled materials and Direction No. 28 to CMP Regulation No. 1 covers controlled materials lost or stolen in transit.

(b) *When supplier must replace notice required.* When a person places a rated or-

der for material and the material sent him is damaged or defective, or where he does not receive physical delivery of the material because it is lost, stolen, or destroyed in transit, he may promptly notify his supplier and, if the notice is received by the supplier within fifteen days after the material was delivered in the case of damaged or defective material, or within forty-five days after the material was shipped in the case of material lost, stolen or destroyed in transit, the supplier must schedule delivery of the material on the basis of the date the original order was placed. If the notice is received by the supplier after the fifteen or forty-five day period, he must schedule delivery of the material just as though he had received an order for it on the date on which he receives the notice. If the purchaser prefers, he may, instead of notifying the original supplier, place an order for the material with another supplier using the same rating, but the new supplier must treat the order as a new order.

(c) *Materials spoiled by purchaser.* Materials which are spoiled by the purchaser cannot be replaced under this direction.

(d) *What is meant by "in transit."* For purposes of this direction, loss, damage, destruction or theft is regarded as happening in transit if it happens before the purchaser receives actual physical delivery, regardless of whether he has title or constructive possession. For example, material in the hands of a carrier is in transit although delivery to the carrier may have given the purchaser title or constructive possession. It is not in transit if the buyer has picked it up from the seller's plant or from the carrier, or if it has been unloaded at his plant. It does not make any difference whether the buyer or the seller has to bear the financial loss.

(e) *Class A and Class B products.* Although this direction does not apply to controlled materials, it does apply to all rated orders for other products and materials. In the case of Class A or Class B products under the Controlled Materials Plan, there will be times when the manufacturer will have to get a new allotment of controlled materials to make the product. In the case of a Class B product, the manufacturer has the responsibility for getting the new allotment and in the case of a Class A product, the customer has this responsibility.

(f) *Exports.* This direction applies to deliveries to territories and possessions of the United States or to Canada, but does not apply to materials exported to any foreign country, other than Canada, unless the materials are lost, stolen, damaged or destroyed while in transit within the United States or unless the defect is discovered before the materials leave the United States. Where material is damaged, lost, stolen or destroyed outside of the United States while in transit to a foreign country, other than Canada, or where the defect is not discovered until after the material has left the United States, the buyer's replacement order must be treated like a new rated order.

(g) *Frozen schedules.* Where a supplier's schedule is a "frozen schedule" as described in General Scheduling Order M-293, as amended July 5, 1945, the shipment of materials to replace defective materials or materials lost, damaged, destroyed or stolen must be approved by the War Production Board by an appropriate amendment of the frozen schedule. The supplier must not ship the materials in the absence of such approval, but he has the responsibility for asking the appropriate Industry Division for the approval.

(h) *No effect on private contractual rights.* This direction has nothing to do with the question of whether the buyer or the seller must bear any financial loss involved as a result of materials being defective or being lost, damaged, destroyed or stolen in transit.

(i) *Applications for special assistance.* Where a purchaser cannot give his supplier notice within the time limits mentioned in paragraph (b) above, and postponement of delivery will result in a substantial loss of production or delay in operations, he may apply to his Claimant Agency or Industry Division for special assistance. Special assistance will be granted only in exceptional cases where a clear showing of substantial interference with the war effort is made.

Issued this 5th day of July 1945.

Recording Secretary.

#### PART 3191—AIRCRAFT

[General Scheduling Order M-360 as  
Amended July 5, 1945]

The fulfillment of requirements for the defense of the United States has created a shortage in the production of certain components for defense, for private account and for export; and the following order is deemed necessary and appropriate in the public interest and to promote the national defense:

§ 3191.31 *General Scheduling Order M-360—(a) Definitions.* For the purpose of this order:

(1) "Aircraft component" means any component, part or sub-assembly to be physically incorporated into heavier than air or lighter than air aircraft.

(2) "Supplier" means any person, to the extent that he makes aircraft components which have been assigned to the Aircraft Resources Control Office by the Office of Product Assignments of the War Production Board.

(b) *Administrative authority.* This order shall be administered by the Aircraft Scheduling Unit acting for and under the direction of the Aircraft Resources Control Office on behalf of the War Production Board.

(c) *Report of requirements and procurements.* Any purchaser of an aircraft component must, when so instructed by the Aircraft Scheduling Unit, file with the Aircraft Scheduling Unit a report on Form WPB-3362, in accordance with the accompanying instructions. The report must give the information called for about requirement and procurement schedules for each aircraft component. The Aircraft Scheduling Unit will adjust these schedules to put them in balance with the requirements of the aircraft program and will send Form WPB-3362 as adjusted to each supplier on whom orders have been placed by the purchaser.

(d) *Supplier's shipping schedules.* (1) Each supplier, upon receiving Form WPB-3362, must indicate on it his schedule of shipment against the stated requirements shown and must file a copy of it as his proposed shipping schedule with the Aircraft Scheduling Unit, in accordance with the accompanying instructions.

(2) When filed by the supplier, the shipping schedule automatically becomes a "Frozen Schedule" as defined in Gen-

eral Scheduling Order M-293 for the number of months stated in the instructions accompanying the form, and the supplier must schedule his production and make his shipments so as to fill it without regard to preference ratings or directions from any government agencies, except that it may be amended by the Aircraft Scheduling Unit (acting for the War Production Board) or under paragraph (e) of this order.

(3) If a supplier is unable to fulfill on time a frozen schedule for any aircraft component, he must make shipments, as far as practicable, in the sequence required by the schedule. In any case where the scheduled dates of shipments will be affected by a delay in or acceleration of production which, in the opinion of the supplier, is appreciable, he must notify the Aircraft Scheduling Unit of the reason for the delay or acceleration and the revised dates on which he expects to be able to make shipments under each purchase order affected. The supplier shall notify the Aircraft Scheduling Unit by either letter or telegram, at his option.

(e) *Other scheduling provisions.* With respect to any purchase orders scheduled under paragraph (d) above, the Aircraft Scheduling Unit may, notwithstanding any other order, preference rating, directive, rule, or regulation of the War Production Board, or any other government agency:

(1) Direct the return or cancellation of any order on the books of a supplier.

(2) Direct changes in the shipping schedule of a supplier.

(3) Cancel orders placed with one supplier and direct that they be placed with another supplier.

(4) Take such other action as it deems necessary with respect to the placing of orders for, or the shipment of, aircraft components.

(f) *Appeals.* Any appeal from the provisions of this order shall be made by filing a letter in triplicate, referring to the particular provisions appealed from, and stating fully the grounds of the appeal.

(g) *Reports and communications.* All reports and forms required by this order and all appeals should be addressed to the Aircraft Scheduling Unit, Dayton, Ohio, Ref: M-360. All reports and forms have been approved by the Bureau of the Budget pursuant to the Federal Reports Act of 1942.

(h) *Application of other orders and regulations.* This order and all transactions affected thereby are subject to all applicable provisions of the regulations of the War Production Board, as amended from time to time, except as explained in paragraph (e).

(i) *Violations.* Any person who willfully violates any provision of this order, or who in connection with this order, willfully conceals a material fact or furnishes false information to any department or agency of the United States is guilty of a crime and upon conviction may be punished by fine or imprisonment. In addition, any such person may be prohibited from making or obtaining further deliveries of, or from processing, or using

material under priority control, and may be deprived of priorities assistance.

Issued this 5th day of July 1945.

## LIST B—RESTRICTIONS ON SPECIAL SALES FOR EXPORT

### Explanation and Scope

§ 944.34 *Priorities Regulation 13—(a) What this regulation does.* This regulation covers special sales, which, in general, are sales of materials or products by persons who acquired or made them for use and not for sale or resale. This is more fully explained in paragraph (b) (1). Special sales may be made freely, except for materials or products on List A (Domestic) or List B (Export), and certain sales as scrap. This is the only WPB regulation on special sales, and a seller who wants to make a special sale need not look at any other WPB regulation or order unless this regulation says he must. However, all buyers must comply with applicable WPB orders on use, inventory, resale, etc., as explained in paragraph (j).

(b) *Definitions.* As used in this regulation:

(1) "Special sale" means a sale of a material or product by any person (in-

cluding a Government agency) who acquired or made it for use and not for sale or resale. All sales by trustees in bankruptcy, receivers and other kinds of liquidators (in the course of liquidation as distinct from continued operation of a business) are special sales even though neither they nor their beneficiaries bought for use. All sales at public auction by general auctioneers are special sales regardless of the purpose for which the material or product was acquired. All sales of surplus materials or products by Government agencies are special sales. Transfers of materials acquired or made for use, from one plant or operating unit to another which is owned by the same person but which normally buys separately, are special sales.

(2) "Material or product" means any commodity, equipment, accessory, part, assembly or product of any kind in finished, semi-finished or raw material form.

(3) A "used" material or product is one which has been put into actual use.

(4) "Persons buying for use" include, among others, a contractor who buys with intent to incorporate the material in a building or product for a third person.

(c) *Sales not covered by this regulation.* The following types of sales are not considered special sales and are not governed by this regulation, even though they may involve materials or products acquired or made for use:

(1) A sale of a material or product by a person regularly engaged in the business of selling it. He is governed, however, by all WPB orders and regulations which apply to his business and to the material or product he is selling.

(2) Sales of plant-generated scrap, meaning scrap which is generated in the course of manufacture or is the waste of industrial fabrication. Sales of other kinds of scrap are covered by paragraph (i).

(3) Sales of rationed products which are controlled by another Government Agency.

NOTE: The subject matter of the former paragraph (c) (3) of this regulation as it read before July 5, 1945, is now contained in section C. (4) (Special orders) in the introduction to List A. Hence, references in other WPB orders to paragraph (c) (3) of this regulation are considered references to the new section C. (4).

(4) Sales of foods for humans or animals, medicines, tobacco, oils and fats, petroleum and petroleum products including natural and liquefied petroleum gases.

(5) Sales of steel, copper or aluminum in controlled material form (as defined in CMP Regulation 1) acquired or produced by a controlled material producer for the purpose of further conversion into other controlled material forms.

(6) A sale of an entire business which is transferred as a going concern to a new owner who continues to operate it in the same or substantially the same form.

(7) A sale made by a utility producer under Order U-1 or a petroleum operator under Order P-98-c.

## General Rules for All Special Sales

(d) *Most special sales may be made freely; general rules.* A seller may make a special sale of most materials or products freely to anyone without WPB authorization and without requiring the buyer to apply or extend a preference rating. The only exceptions are special sales of materials or products on List A (domestic sales) and on List B (export), and certain sales as scrap, as explained in paragraphs (g), (h) and (i). In addition, all sellers are subject to the following general rules and conditions:

(1) If the seller knows that a person who wants to buy the material or product will use it for a prohibited purpose or would have more of it than he is permitted to have, the sale may not be made. The buyers' obligations are stated in paragraph (j).

(2) At special sales, preference ratings have no effect by way of obliging a holder to sell. However, if he sells at all, and the buyer properly gives a rating, the seller must honor it to the extent required by Priorities Regulation 1. For example, if two or more bidders at a public auction offer the same terms for any lot of materials or products, the seller must prefer the bidder who supplies the highest preference rating. Regardless of whether the sale is at auction, a holder need not give preference to a higher rated purchaser if a lower rated or unrated purchaser offers better terms which are not in violation of applicable OPA regulations.

(3) If a person sells a material or product under this regulation to someone who gives him a preference rating or a CMP allotment symbol or number, the seller cannot use this rating or allotment to replace the material or product he has sold. The effect of this rating or symbol or number stops when the seller receives it.

(4) If the sale relates to surplus Government-owned or Government-involved materials or products (including contractor inventories and sales by owning or disposal agencies), the seller may be subject to regulations of the Surplus Property Board.

(e) *Use of material acquired with priorities assistance.* This regulation does not change the general rule of § 944.11 of Priorities Regulation 1 that material acquired with priorities assistance must, if possible, be used for the purpose for which the assistance was given. Where such material cannot be used for this purpose, then this regulation applies if a special sale is made.

(f) *Sales through an agent.* Where a person sells through an agent, except at public auction sales, the sale is a special sale only if it would be a special sale if made directly by the principal. If it is a special sale, the restrictions of this regulation apply to the principal and also to his agent if the latter knows, or has reason to know the facts. In cases of special sales made at public auctions, the restrictions of this regulation are applicable both to the auctioneer and to his principal.

NOTE: The subject matter of the former paragraph (f) of this regulation as it read

before July 5, 1945, is now contained in paragraph (j) (Provisions relating to buyers). Hence, references in other WPB orders to paragraph (f) of this regulation are considered references to the new paragraph (j).

#### Restricted Special Sales

(g) *Materials or products on List A.* A special sale of a material or product on List A attached to this regulation, other than a sale for export, may be made only under the conditions described in the list.

(h) *Materials or products on List B (export).* A special sale of a material or product on List B to a foreign purchaser or to a domestic purchaser who is buying for export or for resale to a foreign purchaser may be made only under the conditions described in the list. Used materials or used products, however, may be sold freely for export unless a notation on List B indicates a restriction on the sale in their used condition. Also, if an exporter, other than a controlled material distributor or warehouse, is unable to export material purchased for export, he may make a special sale of it in the domestic market under the rules of this regulation. Nothing in this regulation relieves any exporter from complying with all applicable regulations of the Foreign Economic Administration or other Government agencies who may have jurisdiction over exports.

(i) *Sales as scrap of materials or products other than plant-generated scrap.* (1) Any material or product (other than those listed below and plant-generated scrap) may be sold as scrap in a special sale if it is obsolete, unusable or not-readily-salable and will be used or consumed principally as scrap although some part of it may possibly be salvaged by the scrap buyer. A person may make such a special sale as scrap without stripping, disassembling or breaking up the material or product before sale. The sale may be made either to any consumer of scrap to be used only as scrap, or to any person regularly engaged in the collection, disassembling, sorting, and disposal of that kind of scrap material, primarily for remelt or other scrap use. Subsequent sales of any salvaged materials or products by such a scrap dealer are not covered by this regulation, but are subject to any WPB orders or regulations which apply to the distribution of the particular material or product. The above does not apply to the following materials and products:

Copper and copper base alloy (new and used) sold as scrap are governed by Order M-9.

Used tin cans sold as scrap are governed by Order M-325.

Domestic mechanical refrigerators (new) may be sold as scrap only on specific WPB authorization. Apply on Form WPB-869.

(2) If the buyer by contract, warranty or otherwise has stated that the particular material or product being sold as scrap will be used or disposed of as scrap, this regulation does not relieve the buyer from compliance with that condition.

(3) The sale at low prices, even as low as scrap prices, of prime or off-grade materials or products for use or resale "as

is" does not constitute a sale as scrap and such sales may not be made under this paragraph. Instead such a sale is subject to all the other rules of this regulation which apply to special sales of the particular materials or products.

(4) This paragraph permits special sales as scrap only for use or resale within the 48 States and the District of Columbia.

#### Provisions Relating to Buyers

(j) *Provisions relating to buyers—(1) Use and quantity restrictions still apply.* The buyer at a special sale may not violate any WPB order or regulation controlling the amount of any material or product he may make or the use or disposition that he may make of it. He must also comply with any applicable order which limits the amount of any material or product he may buy (in terms of a specified quantity or quota, as distinguished from a provision requiring WPB permission for all purchases. The latter type of provision does not apply when a special sale is made unless required by this regulation). All the prohibitions in WPB orders or regulations against the use of materials or products for particular purposes remain in effect, and even though a special sale may not be restricted by this regulation, the buyer may have to get permission to use under the applicable order.

(2) *Inventories.* A person buying for use may accept delivery of any item of a material or product bought on a special sale under this regulation if his total inventory of that item is or will by virtue of accepting such delivery be not in excess of his succeeding six months' requirements. This permits a person to exceed applicable inventory limits only if he acquires the excess under this regulation. However, if thereafter he places orders for deliveries of the particular item from producers or distributors, he may not receive such further deliveries until his inventory is reduced to a practicable minimum working inventory or other applicable limit, and such orders may not call for delivery before that time. This paragraph does not apply to persons buying for resale. It also does not permit a person to stockpile in anticipation of starting or resuming civilian production presently prohibited except as permitted by other applicable regulations or orders. However, if any applicable WPB order or regulation permits a larger inventory than six months, this paragraph does not restrict receipts below the larger amount.

(3) *Persons buying for resale.* If a person at a special sale buys a material or product for resale, he may not resell in violation of any WPB regulation or order which applies to persons engaged in the business of selling the particular material or product. Even if the buyer for resale has not previously sold the material or product as part of his regular business, he is subject to the same restrictions in reselling as a regular wholesaler, retailer or other distributor of it under all applicable WPB regulations and orders, unless the particular regulation or order specifically states otherwise. For example, if an order requires specific WPB permission before a regular

distributor of a product can sell it, any person who buys it at a special sale for resale must do what the order says.

(4) *Reports.* If any order or regulation provides that a buyer of a material or product must make any report or furnish any information either to the War Production Board or to the seller, this regulation does not excuse him from these requirements.

#### Miscellaneous Provisions

(k) *Records.* Any person making a sale under this regulation must keep sufficient records so that he can show that the sale was permitted under this regulation.

(l) *Revisions of Lists A and B.* Lists A and B attached to this regulation will be revised from time to time. A person wishing to sell a material or product under this regulation should be sure that he has the lists which are in effect at the time of the sale. Copies may be obtained from any field office of the WPB.

(m) *Letters and questions.* Any letters or questions about this regulation should be sent to the War Production Board in Washington 25, D. C., marked "Ref: P.R. 13".

Issued this 5th day of July 1945.

WAR PRODUCTION BOARD,  
By J. JOSEPH WHELAN,  
Recording Secretary.

#### LIST A—RESTRICTIONS ON SPECIAL SALES (DOMESTIC)

A. *General rules.* Special sales in the domestic market of materials or products in Column 1 of List A below are restricted to certain classes of buyers as indicated below in section B, and in accordance with any special rules for a particular material or product as shown on the list. The listings show in some instances the class or group of materials and do not always list all the trade names and related materials. Exceptions to the restrictions are indicated below in section C. Special sales of materials or products not listed may be made freely, but all special sales are subject to the general rules in paragraphs (d), (e) and (f) of the regulation.

B. *Classes of buyers.* Special sales of materials or products on this List A may be made to the following classes of buyers:

(1) To a producer of the same kind of material or product.

(2) To a reprocessor, unless a note in Column 4 of the list indicates to the contrary with respect to a particular material or product. A reprocessor means any person who remakes, repairs or reworks new, rejected or second-grade materials or products of the kind being sold.

(3) To a regular dealer, unless Column 3 or a note in Column 4 of the list indicates to the contrary with respect to a particular material or product. A dealer means any wholesaler or retailer regularly dealing in the materials or products of the kind being sold, and reselling them from stock or inventory to industrial users or to other persons. It also includes persons who recondition or rebuild equipment and machinery of the kind being sold for resale to industrial users. Such persons are not, however, relieved from compliance with any WPB orders or regulations which control the distribution of the material by them.

If this List A shows no restrictions on the special sale of a material or product to a regular dealer, the seller may sell it to any person for resale who gives him the following certification, provided the seller has no reason to believe that it is false.

The undersigned buyer certifies under Priorities Regulation 13 to the seller and to the WPB that he will in good faith offer for sale the material or product covered by this order in substantially the same time and manner as would a person regularly dealing in it, that he will render substantially the same type of service as would such a person, and that he will comply with all WPB regulations and orders applicable to such a person.

(Signature)

Any person giving such a certification must comply with all applicable WPB regulations and orders as he has certified he will. The standard certification provided in Priorities Regulation 7 may not be used in place of this certification.

(4) To persons buying for use subject to the restrictions indicated in Columns 2 and 4 of the list.

C. *Exceptions from the restrictions on the list.* Even if this List A shows a restriction on the special sale of a particular material or product, the sale may still be made if one or more of the following conditions apply:

(1) *Special permission.* If the list requires special authorization from the WPB in order for a sale of a particular material or product to be made, or if other conditions imposed by the list cannot be met, the seller may apply on Form WPB-1161 for special permission to sell unless the list states that some other form must be used. If Form WPB-1161 is applicable, and permission is

given, it may be restricted to a specific buyer or class of buyers, or may permit the sale to any buyer for resale who gives the certification described in section B (3) above relating to dealers.

(2) *Used materials or products.* If the material or product is used, it may be sold freely to anyone unless a notation on List A indicates a restriction on its sale.

(3) *Small quantity exemption.* A special sale may be made freely if all the material or product of the same kind or type that the seller has at any one plant, operating unit or location did not cost him more than \$100. In the case of any materials or products involved in a Government contract termination, this exemption applies if there is no more than \$100 worth of the material or product in the termination inventory at any one location. Similarly, \$100 worth (at cost) of any material or product may be sold at any single public auction, regardless of the amount of the material or product the seller has. Also, for the purpose of determining whether a particular lot of material or product is suitable for the prospective customer's use, a person may make a special sale of a sample lot, provided the amount involved (at cost to the seller) of any such sample does not exceed \$20.

(4) *Special orders.* If the War Production Board by an order or in any other way has ruled that all persons engaged in a particular business may sell or exchange the materials or products between themselves, they may do so.

(5) *Disposal of contract termination inventories.* For the purpose of making a settlement of a Government contract, surplus materials or products on List A may be transferred freely from any subcontractor or prime contractor to a procuring agency or disposal agency of the Government, providing the procuring agency has so directed. However, if any material or product is later withdrawn from the contract settlement, its disposition is controlled by this List A.

(6) *Sales to Government stockpiling agencies.* A person may sell surplus materials or products on List A freely to one of the following Government Corporations or to anyone buying as agent for one of them: Commodity Credit Corporation, Defense Supplies Corporation, Metals Reserve or Rubber Reserve Company.

(7) *Transfers of surplus Government-owned materials or products.* Transfers by Government agencies of surplus materials or products, or of idle or excess materials or products not acquired for sale or resale, may be made freely to a Government Disposal Agency acting as such and may be made freely between and within the War Department, Navy Department, Maritime Commission, War Shipping Administration, Veterans' Administration, and the Defense Plant Corporation, and from the Government Disposal Agencies to any of the above.

D. *Buyers obligations.* No matter who the buyer is or how the sale is made or authorized, the buyer is always subject to the conditions and other provisions stated in paragraph (j) of the regulation.

#### LIST A—RESTRICTIONS ON SPECIAL SALES (DOMESTIC)

##### EXPLANATION OF TERMS USED

"WPB-1161" (or other designated WPB form number) means that the seller may not sell to the class of buyer listed at the head of the column without special WPB permission pursuant to application on the form specified. A note in the Remarks Column may show limited exceptions to this requirement.

Section C (1) in the introduction to this list tells how to get permission.

"PR" followed by a letter and number, like "PR-AA5" means that the seller may sell only to a person in the particular class of buyer who extends to him an AA-5 or higher preference rating. These ratings cannot be used further by the seller, as explained in paragraph (d) (3) of the regulation. This regu-

lation does not in any way assign preference ratings.

"WOP" means that the seller can sell to the class of buyer listed at the head of the column without any preference rating, allocation, allotment or other special permission being necessary.

Provisions in the Remarks Column applicable to the particular material or product must be complied with.

## DIRECTION 3

## SALES OF SURPLUS PROPERTY TO GOVERNMENT AGENCIES AND STATE OR LOCAL GOVERNMENTS

(a) *Purpose.* Government agencies and state or local governments are entitled to certain priorities in getting surplus property from government disposal agencies under the Surplus Property Act of 1944 and Surplus Property Board Regulation No. 2. This direction is issued to provide for these priorities and at the same time to make sure that the needs of the Armed Services, war production and essential civilian activities are met.

(b) *Applicability of WPB orders and regulations to sales under Surplus Property Board Regulation No. 2.* Disposal agencies, in making sales under Surplus Property Board Regulation No. 2, must comply with Priorities Regulation 13 and all other applicable orders, regulations or other action of the WPB, except that the requirements for the filling of rated orders are modified in the following two respects unless the WPB otherwise directs in writing.

(1) In the case of orders for any item received during the first 30 days following notice of availability under Surplus Property Board Regulation No. 2, preference may be given, to the extent indicated in that regulation, to government agencies or state or local governments ahead of other purchasers placing orders bearing the same rating.

(2) In addition, to the extent indicated in that regulation, the filling of rated orders received during the above 30-day period may be postponed within the period, and the sequence in which a disposal agency received rated orders bearing the same rating during the period may be disregarded. (Issued May 16, 1945.)

## PART 1260—RUBBER PROCESSING MACHINERY AND EQUIPMENT

[General Limitation Order L-143-a as Amended July 5, 1945]

The fulfillment of requirements of the national defense has created a shortage in the supply of certain critical materials used in the manufacture of rubber processing machinery and equipment for the national defense, for private account and for export; and the following order is deemed necessary and appropriate in the public interest and to promote the national defense:

§ 1260.2 *General Limitation Order L-143-a—(a) Definitions.* For the purpose of this order:

(1) "Person" means any individual, partnership, association, business trust, corporation, governmental corporation or agency, or any organized group of persons, whether incorporated or not

(2) "Rubber processing machinery or equipment" means machinery or equipment of the kinds listed in Groups I, II, III, IV and V, of List A, designed for use in the manufacture of products from natural rubber, natural rubber latex, reclaimed rubber, scrap rubber, and all types of synthetic rubber. The term also means and includes any such machinery or equipment (except "plastics molding machinery" and "fixtures" controlled by General Scheduling Order M-293, Table 15) for experimental use or for use in the manufacture of products from plastics or rubber substitutes. The term does not mean or include "retreading, recapping and repair equipment"

(b) *Production and delivery.* No person shall manufacture or deliver any new rubber processing machinery or equipment except to fill orders in accordance with the following restrictions:

Any order for new rubber processing machinery or equipment may be accepted, but orders which are not specifically rated on Form WPB-1319 or sched-

uled under paragraph (c) shall be treated as unrated orders.

Orders classified as "unrated" may be filled by a supplier only to the extent that he is able to do so without interfering with, or in any way delaying, his production or shipment of orders specifically rated on Form WPB-1319 or orders scheduled under paragraph (c).

Blanket MRO ratings or other forms of priorities assistance (except as authorized on Form WPB-1319) may not be used to obtain new rubber processing machinery or equipment. MRO ratings may, however, be used to the extent authorized by other War Production Board orders and regulations, for the purpose of obtaining parts for the maintenance and repair of machinery or equipment.

(c) *Scheduling and shipping directions.*

(1) The War Production Board may from time to time request all the manufacturers of a particular item of rubber processing machinery or equipment to file operation reports and schedules of unfilled orders. When so requested, each manufacturer shall file forms WPB-3100 and WPB-3101 in accordance with the instructions accompanying them. Form WPB-3101 will be returned to the manufacturer with shipping directions noted thereon and shall be deemed a "frozen" schedule as defined in paragraph (e) of General Scheduling Order M-293, as amended, for the number of calendar months designated by the War Production Board.

(2) Each manufacturer must make shipments in accordance with his frozen schedule, notwithstanding any other preference order, directive or regulation of the War Production Board, but subject to provisions of paragraph (e) of General Scheduling Order M-293, as amended, and must so schedule his production as to meet the shipping dates prescribed in his frozen schedule.

(3) If a manufacturer is unable, for reasons beyond his control, to fulfill his frozen schedule on time, or if he is able to make shipments ahead of schedule, he must in either case make shipments, as far as practicable, in the same sequence as required by the schedule. In any case where the delay or acceleration in shipments will affect dates of shipment by more than 15 days, the manufacturer shall notify the War Production Board of the following facts:

(i) The reason for the delay or acceleration.

(ii) The revised dates on which he expects to make shipments under each purchase order affected.

(4) In the absence of specific shipping directions issued pursuant to this paragraph (c), any manufacturer shall produce rubber processing machinery or equipment, and make shipments thereof in fulfillment of orders authorized pursuant to paragraph (b) of this order, in accordance with applicable preference ratings, allotments, regulations or directions issued by the War Production Board.

(d) *Application for preference rating.* Any person who requires new rubber

processing machinery or equipment to fill essential government or civilian orders may apply for a preference rating on Form WPB-1319; current instructions for filing Form WPB-1319 may be obtained from local War Production Board Field Offices.

If a preference rating is granted, the applicant may use the rating only to obtain new rubber processing machinery or equipment specified on the form, by certifying to the supplier named in his application, in substantially the following form:

The undersigned hereby certifies, subject to the criminal penalties for misrepresentation contained in section 35 (A) of the United States Criminal Code, that he has been granted a preference rating of \_\_\_\_\_ on Form WPB-1319, Case No. \_\_\_\_\_, for the acquisition of the particular rubber processing machinery or equipment specified in the attached purchase order or contract.

Date:

Signature and Title of Authorized  
Official

Orders for rubber processing machinery and equipment rated on Form WPB-1319 must be placed with the supplier within 45 days of the date on which the rating is given; otherwise, they become invalid.

A dealer who accepts an order certified under this paragraph may extend the rating to his supplier by using the general form of certification specified in Priorities Regulation 7.

NOTE: Paragraph (e), formerly paragraph (g), and subparagraphs (1) to (4), inclusive, formerly subparagraphs (2) to (5), inclusive, redesignated July 5, 1945.

(e) *Miscellaneous provisions—(1) Applicability of regulations.* This order and all transactions affected thereby are subject to all applicable Regulations of the War Production Board, as amended from time to time, except to the extent that any provision hereof may be inconsistent therewith, in which case the provisions of this order shall govern.

(2) *Appeals.* Any appeal from the provisions of this order shall be made by filing a letter in triplicate, referring to the particular provision appealed from and stating fully the grounds of the appeal.

(3) *Communications to War Production Board.* All reports required to be filed hereunder, and all communications concerning this order, shall, unless otherwise directed, be addressed to: Rubber Bureau, War Production Board, Washington 25, D. C. Ref.: L-143a.

(4) *Violations.* Any person who willfully violates any provision of this order, or who, in connection with this order, willfully conceals a material fact or furnishes false information to any department or agency of the United States is guilty of a crime, and upon conviction may be punished by fine or imprisonment. In addition, any such person may be prohibited from making or obtaining further deliveries of, or from processing or using, material under

priority control and may be deprived of priorities assistance.

#### PART 3201—MINING

[Limitation Order L-269, as Amended  
July 5, 1945]

The fulfillment of requirements for the defense of the United States has created a shortage in the supply of certain critical materials used in the production of mining equipment for defense, for private account and for export; and the following order is deemed necessary and appropriate in the public interest and to promote the national defense:

§ 3201.1 *Limitation Order L-269*—(a) *Definitions.* For the purposes of this order:

(1) "Mining equipment" means any complete equipment or apparatus of the types, descriptions, and classifications set forth on List A hereto annexed.

(2) "Repair part" means any part manufactured for use in the repair and maintenance of mining equipment.

(3) "Manufacturer" means any person who constructs or manufactures mining equipment to the extent that he is engaged in such construction or manufacture.

(b) *Production and deliveries of mining equipment.* (1) On or before March 25, 1943, and on or before the 15th of each succeeding calendar month, each manufacturer shall file in triplicate on form PD-815 a schedule of proposed production and deliveries and a report of the previous calendar month's shipments and orders.

(2) On and after April 1, 1943, each manufacturer shall produce and deliver mining equipment only in accordance with the schedule filed pursuant to paragraph (b) (1) or as the same may be changed by the War Production Board.

Such schedules are deemed to be "frozen schedules" within the meaning of General Scheduling Order M-293 and are subject to the general provisions

of that order relating to frozen schedules.

(3) With respect to mining equipment, the War Production Board may:

(i) Direct the return or cancellation of any order on the books of a manufacturer.

(ii) Direct changes in the production or delivery schedule of a manufacturer.

(iii) Allocate orders placed with one manufacturer to another manufacturer, or

(iv) Take such other action, as it deems necessary, with respect to the placing of orders for, or the production or delivery of, mining equipment.

(4) Beginning February 1, 1944, except as may be otherwise directed in writing by the War Production Board, a manufacturer need not file Form WPB-2406 with respect to any item of mining equipment on List A marked with an asterisk. Further, the War Production Board may from time to time issue written exemptions relieving manufacturers from the requirement of filing Form WPB-2406 with respect to other items of mining equipment in cases where their production records, together with other circumstances, show such uniformity of production or specialization of orders as to indicate no further need for filing such report; and the War Production Board may also, where circumstances change and again show the need for filing such report, revoke any such exemption.

(c) *Repair parts.* The War Production Board may direct the quantity and type of repair parts to be produced or delivered by any manufacturer in any calendar month, and it may direct changes in any manufacturer's production or delivery schedule for mining equipment so as to provide for adequate production or delivery of repair parts.

(d) [Deleted Feb. 8, 1944.]

(e) *Miscellaneous provisions*—(1) *Applicability of regulations.* This order and all transactions affected thereby are subject to all applicable regulations of the War Production Board as amended from time to time.

(2) *Appeals.* Any appeal from the provisions of this order shall be made by filing a letter in triplicate, referring to the particular provision appealed from and stating fully the grounds of the appeal.

(3) *Communications to War Production Board.* All reports required to be filed hereunder and all communications concerning this order, shall, unless otherwise directed, be addressed to War Production Board, Mining Equipment Division, Washington 25, D. C., Reference L-269.

(4) *Violations.* Any person who willfully violates any provision of this order, or who, in connection with this order, willfully conceals a material fact or furnishes false information to any department or agency of the United States is guilty of a crime, and upon conviction may be punished by fine or imprisonment. In addition, any such person may be prohibited from making or obtaining further deliveries of, or from processing or using, material under priority control and may be deprived of priorities assistance.

(5) *Records and reports.* All persons affected by this order shall keep and preserve for not less than two years accurate and complete records concerning the manufacture, sale and delivery of and orders for mining equipment and repair parts. All persons affected by this order shall file such reports and questionnaires as may be requested from time to time by the War Production Board, subject to the approval of the Bureau of the Budget pursuant to the Federal Reports Act of 1942. The reporting requirements of this order have received the approval of the Bureau of the Budget pursuant to the Federal Reports Act of 1942.

Issued this 5th day of July 1945.

#### PART 3208—SCHEDULED PRODUCTS

[General Scheduling Order M-293, as  
Amended July 5, 1945]

The fulfillment of requirements for the defense of the United States has created a shortage in the production of certain products for defense, for private account, and for export; and the following order is deemed necessary and appropriate in the public interest and to promote national defense.

#### General Explanation of the Order

§3208.1 *General Scheduling Order M-293—(a) Purpose and scope of the order.* This order provides the general

framework for scheduling by the War Production Board. Its purpose is to establish scheduling as a means of insuring that shipments of certain products are made in the sequence best suited to fulfill the requirements of war production. At times, it may also be used to schedule the distribution of some products or portions of production, in ways best suited to care for the civilian economy in areas where there are still critical shortages during the continuance of the war. Its provisions are applicable only to those products, and manufacturers of those products listed on the several tables which accompany this order. Such listed products are referred to as "M-293 products."

(b) *Principal changes contained in this amendment and effect of previous actions.* (1) This revision of Order M-293 is primarily a consolidation of Order M-293 and Priorities Regulation 18. While it incorporates substantially all the provisions of each, the order should be studied carefully. Attention is particularly called to the change in the provisions freezing X product schedules of manufacturers excused from filing. Such schedules are not frozen unless the manufacturer chooses to file them with the War Production Board.

(2) Any actions taken by the War Production Board before this or any other amendment of the order, or any table of the order, remain fully effective until or unless changed by order or direction relating specifically to the action in question. Thus, if a product is removed from the order, or its classification changed, all frozen schedules, specific authorizations or directions relating to the product while it was listed, or by virtue of its previous classification, remain effective and must be observed until they expire by their terms or are modified by later specific direction.

(3) Old orders which have been previously reported to the War Production Board on the form required by the appropriate table of M-293 at the time the report was filed need not be included on a new form specified for the product by an amendment to the table. The manufacturer may report old orders on the form he used before but must report all new orders on the form shown in the appropriate table.

(c) *Definitions.* For the purpose of this order:

(1) "M-293 product" means any item listed in the tables to this order except Table 1. These items are identified in the tables as Class X, Class Y, and Undesignated. The same products may be designated X and Y and, if so, are subject to the provisions applying to each class. Class X, Class Y, and Undesignated products are subject to all other provisions of this order.

(2) "Manufacturer" means any person engaged in making an M-293 product.

#### General Operations Reports

(d) *Operations reports.* Each manufacturer of an M-293 product must file operations reports on the applicable form shown in Column 1 of the appropriate table. These reports must be filed at the times and in the manner pre-

scribed in the instructions which accompany the form. If no form is shown in Column 1, no operations report need be filed. A manufacturer may be excused by the War Production Board from filing these reports. Manufacturers may be required to report unrated orders in operations reports (see instructions which accompany the form).

#### *Frozen Schedules*

(e) *Definition and effect of frozen schedules.* Any production or shipping schedule which is established or prescribed under the terms of this order or under the terms of any other order of the War Production Board which states expressly that schedules thereunder are to be deemed frozen schedules within the meaning of M-293, is known as a "frozen schedule." The sequence of orders or shipments on a frozen schedule may not be changed or interfered with by any person, or in any way, except by an order or direction of the War Production Board which identifies the frozen schedule, and which states specifically that it is an amendment of that schedule.

(f) *Automatic freezing of component schedules.* Whenever any product of a manufacturer is subject to a frozen schedule, all components of that product which the same manufacturer makes in any plant are automatically subject to and a part of the same frozen schedule, to the extent that he must so schedule his supply of those components as to meet and fulfill his frozen schedule according to its terms, regardless of the effect of this scheduling on other orders for those components. There is one exception to this rule. If the other orders for those components are already a part of a frozen schedule which has been filed with the War Production Board, the part of the schedule which has been filed and frozen can only be amended as provided in paragraph (e). This paragraph applies only to components which are incorporated in, or attached to, the scheduled product by the scheduled manufacturer. When any component schedule is automatically frozen under this paragraph, a notation to that effect must be made on the schedule of the M-293 product which is filed. A component schedule which has been automatically frozen under this paragraph shall enjoy the same protection as any other frozen schedule, except that an amendment to the schedule pursuant to paragraph (e) need not identify the frozen schedule if the schedule has not been filed with the War Production Board.

(g) *Deviations from a frozen schedule.* If a manufacturer is unable to fulfill any frozen schedule on time or in exact accordance with its terms, because of some such unexpected difficulty as a production break-down in his plant or a failure to receive required production materials, he must still make his shipments, so far as practicable, in the sequence required by the schedule. Similarly whenever an order is removed from a frozen schedule, a manufacturer must make his shipments under later scheduled orders as

nearly as practicable in the prescribed sequence, moving up the shipping dates of other orders. However, no manufacturer need ship any order in advance of its required delivery date. In any case where a manufacturer foresees an appreciable delay in or acceleration of production and shipments, he must notify the War Production Board in writing, stating the causes of such delay or acceleration and the revised dates on which he expects to be able to make shipments on each purchase order affected.

(h) *Effect of changes in purchase orders.* (1) A cancelled order must be removed from a frozen schedule. An order on which the customer has instructed the manufacturer to hold up work must also be removed from a frozen schedule. If the person who instructed that work be held up requests within ten days thereafter that the manufacturer reinstate his order, the manufacturer must do so, giving the order as nearly as possible its former place in the frozen schedule. *Provided*, That doing so will not cause loss of production or delay in previously scheduled shipments on other orders in the schedule.

(2) Any substantial change in a purchase order removes it from a frozen schedule; for example, a change is substantial if it involves an alteration of the manufacturer's production schedule so as to interfere with production, or if it involves an alteration in the product classification of the item.

(3) Any order which has been cancelled and renewed, or which has been substantially changed, or on which the customer has instructed that work be held up without requesting reinstatement within ten days, must be treated as an entirely new order received as of the date of the change or the date of a later request for reinstatement. Its acceptance or rejection and its place in the manufacturer's schedule must be determined by conditions existing at that date.

(i) *Requests for schedule changes.* Requests for changes in frozen schedules must be made in writing to the appropriate industry division of the War Production Board, and may be made by the manufacturer, the customer, or by any interested claimant agency. Such requests may be made by letter or on the form required for shipping schedules and relate to one or more orders, or may constitute a proposed revision of an entire frozen schedule.

(j) *Preparation and fulfillment of shipping schedules.* Unless he is specifically directed otherwise by the War Production Board, a manufacturer in preparing and arranging a shipping schedule under this order must arrange the sequence of orders and shipments according to the rules of Priorities Regulation No. 1 and any other applicable regulations or orders of the War Production Board. He must never rearrange, however, the sequence of any orders or shipments which have once been frozen in his schedules, except pursuant to an order or direction of the War Production Board amending and changing a frozen schedule. When a shipping schedule has become frozen, a manufacturer must

schedule his production and make his shipments so as to meet that schedule.

(k) *Inclusion of unrated orders in frozen schedules.* Unrated orders shall not be included in any shipping schedule filed or frozen under this order. There are only two exceptions to this rule: (i) unrated orders which are accompanied by specific approval of the War Production Board authorizing them to be placed shall be included in such schedules; (ii) a manufacturer shall also include unrated orders in such schedules if he is specifically directed by the War Production Board to do so, in which case the War Production Board will also specify the manner and sequence in which they shall be included and arranged.

#### *Special Provisions Applicable to Class X Products*

(l) *Filing shipping schedules.* Each manufacturer of a Class X product must file with the War Production Board each month his shipping schedule, beginning with shipments to be made on and after the first of the following month, except when he is excused from filing by the War Production Board. These schedules must be filed on the form shown in Column 2 of the appropriate table, at the times specified and in accordance with the instructions accompanying the form. In preparing the form for filing each month, the manufacturer shall include all purchase orders received up to the close of business on a date which is as near as practicable to the date the form is due to be filed. Orders received after the close of business on that date shall not be included on the form for that month. A manufacturer who is excused from filing may, if he wishes, still file just as if he had not been excused, and, in that case, his schedule is frozen on the date it is filed as explained in the next paragraph.

(m) *Freezing of filed shipping schedules.* A shipping schedule of a Class X product is automatically frozen on the date it is filed, for shipments to be made during the applicable period specified in column 4 of the appropriate table. This period begins on the first day of the month after the schedule is filed, but previously frozen schedules covering shipments to be made before the beginning of the period remain frozen.

#### *SPECIAL PROVISIONS APPLICABLE TO CLASS Y PRODUCTS*

(n) *Authorization of orders required.* No person shall place an order with a manufacturer and no manufacturer shall accept an order for a Class Y product, unless the order is accompanied by specific authorization of the War Production Board obtained on the form shown in Column 3 of the appropriate table. A distributor who wants to buy for immediate resale must supply the information requested on the application for authorization about his customer rather than about himself, and such an application may be filled out and filed either by the distributor or the customer. If the distributor is buying for stock, he must so state and give all information called for by the application form in terms of the types of customers to whom he expects to sell. The term "distribu-

tor" includes wholesalers, retailers, jobbers, sales agencies and consignees for sale. As explained in paragraph (u), a manufacturer must obtain authorization for the transfer of a Y product to a distribution outlet owned or controlled by himself; and must also obtain authorization for shop orders for his own Y products for his own in-plant use.

(o) *Acceptance and freezing of authorized orders.* All authorized purchase orders for Y products which the manufacturer accepts automatically become frozen in his schedules at the time he accepts the order for shipment on the agreed date. If a time for shipment is specified in the authorization of the order, the manufacturer must not accept a purchase order specifying any other shipping time. Also, he must not accept an order which will interfere with a previously frozen schedule, or on which delivery cannot be made on the specified date because of the requirements of Priorities Regulation No. 1 or any other applicable regulation or order of the War Production Board, unless the War Production Board specifically directs him to accept it.

*Special Provisions Applicable to Undesignated M-293 Products*

(p) A manufacturer of an undesignated M-293 product need not file the form shown in Column 2 of the appropriate table unless specifically directed to do so by the War Production Board or unless he chooses to do so. If he is directed to file, the shipping schedule shown on the form becomes frozen in accordance with the direction. If he is not directed, but chooses to file the form, the shipping schedule shown on it does not become a frozen schedule until the War Production Board specifically directs the manufacturer that it is frozen.

*Special Reporting Provisions Covering Certain M-293 Products*

(q) *Reports of requirements by purchasers of M-293 products.* Any claimant agency listed on Table 1 may instruct its prime contractor (or the prime contractor of a procuring agency which the claimant agency represents) who is purchasing M-293 products required in his prime contracts, or any other person purchasing M-293 products except for incorporation into other M-293 products manufactured by himself, to file with the claimant agency a report on Form WPB-3003 or other form approved for the purpose by the Bureau of the Budget. In such a case the person must file the form giving the information called for concerning the purchase orders which he has placed or will place for each specified M-293 product required under the Table 1 programs, except those which are indicated on the tables as being exempt from this paragraph. The report must state how many of each M-293 product will be used as spares.

(r) *Reports of shipping schedules.* A claimant agency listed on Table 1 may send to a manufacturer a Form WPB-3003, or other form approved for the purpose by the Bureau of the Budget, which shows the requirements of purchasers described in paragraph (q) above, covering all M-293 products for Table 1 pro-

grams, except those indicated on the tables as being exempt from the provisions of this paragraph. If a manufacturer receives such a form filled out and certified by the claimant agency in accordance with the accompanying instructions, he must fill in only the proposed shipping dates determined in accordance with Priorities Regulation No. 1 and other applicable orders and regulations of the War Production Board. The shipping dates of purchase orders which already are part of a frozen schedule must not be changed. He must file copies of the form with the claimant agency in accordance with the accompanying instructions and also with the War Production Board when requested to do so by the appropriate industry division. This schedule does not become a frozen schedule unless the War Production Board specifically directs the manufacturer that it is one.

*Other Scheduling Actions*

(s) *Other scheduling provisions and actions which may be taken by the War Production Board.* With respect to any M-293 product, the War Production Board may, from time to time, take any of the following actions:

(1) Excuse any manufacturer of an M-293 product from filing the operations reports required by paragraph (d) of this order, or excuse any manufacturer of Class X products from filing shipping schedules under paragraph (1) of this order.

(2) Direct the filing or freezing of shipping schedules by any manufacturer and direct changes in the shipping schedule of any manufacturer.

(3) Authorize the placing or acceptance of purchase orders for any Class Y product, or revoke any authorization issued by it for the placing or acceptance of any purchase order for a Class Y product.

(4) Direct the return or cancellation of any purchase order on the books of a manufacturer, or cancel orders placed with one manufacturer and direct that they be placed with another manufacturer.

(5) Take such other actions as it deems necessary with respect to the production of, the placing of purchase orders for, or the shipment of M-293 products.

*Miscellaneous Provisions*

#### PART 3208—SCHEDULED PRODUCTS

[General Scheduling Order M-293, Direction 1 to Table 4, as amended July 5, 1945]

#### PURCHASERS OF INTERNAL COMBUSTION ENGINES AND CERTAIN AUTOMOTIVE CHASSIS COMPONENTS TO FURNISH MANUFACTURERS INFORMATION REGARDING END USE

Direction 1 to Table 4 of General Scheduling Order M-293 is hereby amended to read as follows:

The demand for internal combustion engines and for certain automotive chassis components, provision for the scheduling of which is made respectively in paragraphs 3

and 6 of Table 4 to General Scheduling Order M-293, is so large that it is necessary for the War Production Board to determine the relative urgency of shipments to be made by manufacturers of these products. This requires that information be furnished as to the end use of the engines and the chassis components being scheduled. This information is frequently known only to the purchaser, and not to the manufacturer and sometimes only to the customer of the purchaser.

Unless purchase orders already placed and future orders which come through manufacturers are properly identified, the Board may be compelled to postpone delivery by the manufacturer or to remove the orders entirely from the manufacturer's shipping schedule.

Consequently, in order that each manufacturer of internal combustion engines and of chassis components listed in Table 4 to Order M-293 may be in a position to furnish the requisite information to the War Production Board, all purchasers of such engines and chassis components are directed to furnish immediately to the manufacturer of the engine or of the chassis component, the following information in respect to the items he has ordered:

1. The specific use the purchaser will make of the engine or of the chassis component; for example—tractor, generator, pump, truck, combine, truck replacement, etc.

2. The program or project for which the engine or chassis component is required; for example—farm machinery, advanced Naval base, heavy truck, truck replacement, etc.

3. Government contract number (if any) identifying the prime contract placed by the claimant agency for such program or projects; for example—W-04-353-Eng. 339 (this indicates Army Engineer Corps—Contract No. 339). NOBs-1161 (this indicates Navy Bureau of Ships—Contract No. 1161).

4. The claimant agency sponsoring the program or project; for example—the Army, Navy, War Food Administration, Office of Defense Transportation, etc.

The foregoing information must also be furnished by purchasers in respect to all future orders for any engines or of chassis components listed on Order M-293, Table 4, at the time the orders are given the manufacturer. In giving the information, purchasers should furnish a separate statement for purchase orders involving different programs or covered by more than one government contract number.

#### PART 3208—SCHEDULED PRODUCTS

[General Scheduling Order M-293, Direction 1 to Table 6, as Amended July 5, 1945]

#### IDENTIFICATION OF ELECTRIC MOTORS AND CONTROLS, AND EQUIPMENT CONTAINING THEM

The following direction is issued pursuant to General Scheduling Order M-293:

(a) Purpose. This direction applies to the identification of new items of electric motors and controls, or equipment containing them, when needed for the prosecution of the war.

This will be accomplished by the claimant agency or other ultimate user initiating the identification and giving it to the supplier; if the supplier can make the shipment without having to obtain any of such items from his suppliers, the identification goes no further. If he must obtain some electric motors or controls or equipment containing them, in order to make the shipment, he must then extend the identification to his supplier (but only as to the items specifically needed to enable him to ship the items identified by his customer). The details of this procedure are specified in the remainder of this direction. The identification itself does not affect any of the priority rules in Priorities Regulation 1 or Order M-293 or any other applicable WPB order or regulation.

(b) Items subject to this direction. (1) This direction applies to certain purchases of fractional and integral horsepower motors and generators (except specifically designed airborne types), electric motor control equipment, small air circuit breakers, aircraft switches and circuit breakers, and panel boards rated 600 volts or less for lighting and power distribution of the wall mounted type for shipboard use, as covered by subdivisions 1 (except airborne type motors and generators) to 5, inclusive, of Table 6. Items of these kinds are referred to below as "electric motors or controls".

(2) This direction also applies to certain purchases of items of other equipment containing electric motors or controls.

(c) Items needed for the prosecution of the war should be identified by ultimate user.

(1) Any person (including the Army, Navy, Maritime Commission, and their prime contractors) who has placed or hereafter places

a rated order covering electric motors or controls, or equipment containing electric motors or controls, should furnish his suppliers of such items with information sufficient to identify the purpose for which the items are required, if needed for either of the following purposes:

(i) For incorporation into products to be used directly by any military agency of the United States or any such agency of any other country under the "Lend-Lease Act" (including maintenance and repair parts for such products); or

(ii) For use as plant facilities (including new and enlarged plant facilities necessary for increased production, or essential repair of existing plant facilities) for making products to be used directly by any military agency, or component materials or parts for such products. (The words "plant facilities", as used here, do not include electric power, gas, water, telegraph, telephone and similar service facilities not owned by the plant owner or operator). The ultimate purchaser should give this information whether he uses a preference rating assigned on Form WPB-542 or under WPB Directives 23 or 31, or on Forms WPB-617 or WPB-541 or other preference rating certificate, or a blanket MRO rating.

(2) The War Production Board may find it necessary to postpone shipments of any unidentified items in favor of those which are identified, as well as to make adjustments in shipments of identified items.

(d) When identification must be extended by suppliers of electric motors or controls, or by suppliers of equipment containing electric motors or controls—(1) By supplier of motors or controls. Any person (other than the producer of the electric motors or controls) who accepts or has accepted a rated order covering shipments of any electric motors or controls, that have been identified by his customer as being required for either of the purposes referred to in paragraphs (c) (1) (i) or (ii) above, must extend the identification to his supplier of such items if he must obtain them from the supplier in order to ship the items identified by his customer, by the required delivery date.

(2) By suppliers of equipment containing electric motors or controls. Any person (including manufacturers and distributors of any equipment containing electric motors or controls) who accepts or has accepted a rated order covering shipments of any equipment containing electric motors or controls, that have been identified by his customer as being required for either of the purposes referred to in paragraphs (c) (1) (i) or (ii) above, must extend the identification to his supplier of the electric motors or controls, or the equipment containing them, if he must obtain any of such items in order to ship the equipment identified by his customer, by the required delivery date.

(3) When not to be extended. Any supplier referred to in paragraphs (d) (1) or (d) (2) above shall not extend any identification, however, under either of the following conditions:

(i) It shall not be extended when he expects to be able to ship the identified items by the required delivery dates, in accordance with applicable WPB regulations and orders, and without having to get the required motors or controls (or equipment containing them) before he can make the shipment. Items being purchased as production material or to round out a line or for inventory (for general production or distribution), and not needed specifically for making an identified shipment, may not be identified (by extension of the identification) as being required for the identified purpose. If any unfilled purchase order covers a number of such items, and only a part of them are needed specifically to make an identified shipment, the identification may be extended only to that part of them which are needed solely for that purpose.

(ii) It shall not be extended if he knows or has reasonable cause to believe the identification to be false or inaccurate.

(4) *When extension is required later.* If a supplier has not extended the identification (under the conditions stated in paragraph (d) (3) (i) above), he must extend it as promptly as practicable whenever he later finds that he will be unable to make the shipment identified by his customer unless he obtains the required electric motors or controls or equipment containing them (or some of such items) from his supplier. In such a case he shall extend the identification only as to the items so required.

(e) *Information necessary for identification.* (1) The following identification should be given by an ultimate user and must be extended by a supplier: (i) the specific items which are being identified (if all of them under his purchase order are not), (ii) the application or use to be made of the items, (iii) the program or name of the project (both, if available) in which the items are to be used (including the class and hull number, if available, of the vessel, when for use aboard ship), and (iv) the Government contract number (if any) identifying the prime contract placed by the claimant agency for the purchase of the programmed requirement item or project. If the Government contract number covers several items, show the item numbers as shown on the order placed by the Government agency or office. (In the case of government-furnished equipment, the government contract and item numbers identify the prime contract placed by the Government agency or office for the equipment in question, and not for the program or project). Examples of identification: "For lathes, U. S. Navy Rocket Program, Naval Ordnance Plant, Louisville, Ky., contract No. \_\_\_\_\_", or "For ventilating fans, for VC-2-S-AP5 vessels, contract No. MC-\_\_\_\_\_, Hull Nos. \_\_\_\_\_".

(2) In the case of orders previously placed without the above identification, the following will also be necessary: (i) the name under which his purchase order was placed, (ii) his order number, (iii) any further description necessary to show the size or type of the items.

(3) In the identification extended by a supplier, the facts referred to in (1) (i), (2) (i), (ii) and (iii) above must relate to his own purchase order, and not his customer's.

(f) *When and how given.*—(1) *By ultimate users.* The identification must be given in writing, signed by the purchaser or a responsible official duly authorized to sign for him. It should be furnished with each order for items hereafter placed by any ultimate user; and as quickly as practicable under each order already placed.

(2) *Extension by suppliers.* When a supplier is required by this direction to extend an identification, he must do this in writing, signed by him or a responsible official duly authorized to sign for him. He must extend it as promptly as practicable and in any event within 30 days after he has accepted the order, received the identification and found that he needs to obtain items to make the shipment.

(3) In any case where the identification has been given, under the procedure in paragraphs (q) and (r) of Order M-293 or otherwise, it need not be given again.

(4) If it is impossible to furnish complete and definite specifications along with the purchase order or identification, this should not delay the giving of the identification.

(g) *Purpose and effect of identification.* (1) The identification is needed so that WPB can take appropriate priority action under Order M-293, to assure delivery of identified items on the dates required; and also so that the supplier may have more definite information as to the required delivery or performance dates, for his use in accordance

with § 944.8 of Priorities Regulation 1. However, no person may reject a rated order merely because no identification is given by the purchaser.

(2) While the WPB may find it necessary to postpone shipment of any unidentified items, this direction does not in any way affect the priority or the delivery date to which a purchase order is entitled, nor does it permit any person to request earlier delivery dates or greater quantities than are truly necessary, no matter how important any delivery may be; some other important delivery may be delayed if this is done. No one may assume that a purchase order will be uprated or given any special priorities assistance after it is placed, merely because it is identified under this direction. Urgent orders should, of course, be placed and complete and definite specifications should be furnished as far in advance of the required delivery date as practicable.

(3) If any supplier identifies to his supplier any items as being needed for making a specific identified shipment, and after receiving them finds that he is required to use them for filling some other order because of the rules in Priorities Regulation 1, or Order M-293, the identification itself does not relieve him from following those rules; and where identified items have been diverted to some other order in this way, the identification must again be extended for any additional quantity actually needed to make the uncompleted identified shipment.

(h) *True identification required.* No person shall furnish any false identification. An intermediate supplier receiving such identification may rely upon it, and must pass it on to his supplier when required to do so by this direction, unless he knows or has reason to believe it to be false or inaccurate.

(i) *Other cases.* It is recognized that many persons who purchase electric motors or controls or equipment containing them, for general distribution or to round out a line or as production material for other equipment which they make, may have what they feel

to be an important need for such items, particularly if many of their deliveries are currently being made for uses which may be considered essential to the prosecution of the war. This direction does not prohibit any person from informing his supplier as to why he needs or expects to need any items, as long as he does not furnish his supplier any inaccurate or false identification. The giving of such information does not affect in any way the priority or delivery dates required by Priorities Regulation 1 or other applicable WPB orders or regulations.

(j) *Violations.* Any person who willfully violates any provisions of this direction, or who in connection with this direction willfully conceals a material fact or furnishes false information to any department or agency of the United States, is guilty of a crime, and upon conviction may be punished by fine or imprisonment. In addition, any such person may be prohibited from making or obtaining further deliveries of, or from processing or using material under priority control, and may be deprived of priorities assistance.

NOTE: The reporting requirements in this direction have been approved by the Bureau of the Budget in accordance with the Federal Reports Act of 1942.

Issued this 5th day of July 1945.

#### PART 3208—SCHEDULED PRODUCTS

[General Scheduling Order M-293, Direction 1 to Table 15]

##### CHEMICAL PROCESSING MACHINERY

The purpose of this direction is to assure that manufacturers of products included in Table 15 produce and deliver essential machinery before filling other orders. Its further purpose is to assure that manufacturers with available capacity for a particular period over and above that required to take care of essential orders, which are to be treated as a frozen schedule, are able to use their spare capacity to the fullest extent without interference with more essential orders and that all customers desiring machinery for less essential purposes have an equal opportunity.

(a) No person may apply or extend any preference rating to obtain any product listed on Table 15 except ratings assigned on Form WPB-1319. All preference ratings for products listed on Table 15 other than those assigned on Form WPB-1319 are void. Applications for preference ratings may be made on Form WPB-1319 in accordance with the instructions accompanying the form. In

general preference ratings for products listed on Table 15 will only be assigned if the products are required by the military services or for use in the fulfillment of war orders or to meet an extreme emergency or in accordance with the criteria outlined in Priorities Regulation 24.

(b) In addition to listing rated orders, pursuant to paragraph (k) of Order M-293 each manufacturer required to file Form WPB-3001.71 under Table 15 is specifically directed to include on the form the aggregate by types of machinery of all unrated orders which he expects to ship during the period covered by the schedule. However, no part of the schedule is automatically frozen except orders rated on Form WPB-1319. In preparing his schedule under this direction each manufacturer must arrange the sequence of his shipments of orders rated on Form WPB-1319 in accordance with paragraph (j) of Order M-293.

(c) A manufacturer may accept and fill unrated orders for products listed on Table 15 if to do so will not interfere with his filling the frozen part of his shipping schedule in accordance with Order M-293.

Issued this 5th day of July 1945.

PRODUCTION OF BOILERS FOR STOCK

In order to conserve materials and manufacturing facilities for the production of high pressure steel boilers listed on Table 14 of General Scheduling Order M-293 and to prevent the accumulation of duplicate stocks of such high pressure steel boilers in the hands of manufacturers, dealers and warehouses, the following direction under Table 14 of M-293 is issued:

(1) Notwithstanding the provisions of Priorities Regulation 1, or General Scheduling Order M-293, no manufacturer shall, without specific authorization from the War Production Board, begin production of any high pressure steel boilers listed on Table 14 of General Scheduling Order M-293, which the manufacturer knows or has reason to

believe, will be held in the stock of any manufacturer, wholesaler, dealer or any other person rather than shipped directly for installation.

[Limitation Order L-1-E, as Amended July 5,  
1945]

##### MOTOR TRUCKS AND TRUCK-TRAILERS

Section 3292.1 *Limitation Order L-1-E*, as amended March 27, 1945, is hereby further amended to read as follows:

The fulfillment of requirements for the defense of the United States having created a shortage in the supply of rubber, steel and other materials entering into the production of motor trucks and truck-trailers for defense, for private account and for export, the following order is deemed necessary and appropriate in the public interest and to promote the national defense:

§3292.1 *Limitation Order L-1-E*—(a) *Definitions*. For the purposes of this order.

(1) "Motor truck" means a complete motor vehicle, or the chassis thereof, designed for operating entirely or in part on rubber tires for use either on or off the public highways in the military or commercial transportation of materials or persons. The term "Motor truck" does not include integral motorized fire equipment, integral buses or automobiles as defined in Limitation Order L-2-G, paragraph (a) (1).

(2) "Truck-trailer" means a complete full-trailer or semi-trailer, or the chassis thereof, having a load-carrying capacity of 10,000 pounds or more, designed for military or commercial transportation of materials or persons. The term "truck-trailer" does not include integral trailer buses.

(3) "Person" means any individual, partnership, association, business trust, corporation or any organized group of persons whether incorporated or not.

(b) *Limitation on production of motor trucks or truck-trailers*. No person shall

produce any motor trucks or truck-trailers except as specifically authorized in writing by the War Production Board.

(c) *Production with priorities assistance*. Priorities assistance, in the form of allotments of controlled materials and preference ratings for the purchase of other materials and components, will be given for the production of a definite number of motor trucks or truck-trailers according to approved War Production Board programs. In determining the number of nonmilitary vehicles which each producer will be authorized to make with priorities assistance an equitable assignment of quotas will be made. The assignment of quotas for the production of motor trucks or truck-trailers with priorities assistance will not be dependent upon any applicant having been engaged in the production of trucks or truck-trailers at some previous time.

(1) Any person wishing an authorization to produce non-military motor trucks or truck-trailers with priorities assistance shall apply by letter to the Automotive Division, War Production Board, stating (i) the number of trucks by weight class or the number of trailers by type, as the case may be, and (ii) the period within which such vehicles are to be produced.

(d) *Production without priorities assistance*. In addition, any person wishing to produce non-military motor trucks or truck-trailers without priorities assistance may apply for authority to do so as explained in Priorities Regulation 25.

(e) *Changes in authorizations*. The War Production Board may revoke or modify any authorization provided for in paragraph (b), notwithstanding any other order, preference rating, directive or regulation of the War Production Board or other governmental agency.

(f) *No duplication of orders for materials*. No person authorized to produce trucks or truck-trailers shall place any order with one or more suppliers for a total quantity of any material or components in excess of his actual requirements to fill his production schedule.

(g) *Vehicles for civilian use to be subject to General Order ODT-44, effective July 1, 1944*. All motor trucks and truck-trailers produced under the terms of this order, except those produced on orders for the United States Army or Navy, will be subject to the provisions of the Office of Defense Transportation Order ODT-44, effective July 1, 1944, and amendments thereto.

(h) *Reports*. Any person receiving an authorization to produce motor trucks or truck-trailers shall file on or before the third day of each month Form WPB-4291 (formerly GA-1188) in accordance with instructions accompanying that form, and such other reports as may be required from time to time subject to the approval of the Bureau of the Budget. The reporting requirements in this order have been approved by the Bureau of the Budget pursuant to the Federal Reports Act of 1942.

(i) *Violations*. Any person who willfully violates any provision of this order, or who, in connection with this order, willfully conceals a material fact or fur-

nishes false information to any department or agency of the United States, is guilty of a crime, and upon conviction may be punished by fine or imprisonment. In addition, any such person may be prohibited from making or obtaining further deliveries of, or from processing or using, materials under priority control and may be deprived of priorities assistance.

(j) *Communications*. All communications concerning this order shall, unless otherwise directed, be addressed to: Automotive Division, War Production Board, Washington 25, D. C., Ref: Order L-1-E.

## Chapter XI—Office of Price Administration

## PART 1305—ADMINISTRATION

[Supp. Order 108, Amdt. 3]

MANUFACTURERS' MAXIMUM AVERAGE PRICES  
FOR CERTAIN ITEMS OF APPAREL AND AP-  
PARREL ACCESSORIES

A statement of the considerations involved in the issuance of this amendment, issued simultaneously herewith, has been filed with the Division of the Federal Register.

Supplementary Order 108 is amended in the following respects:

1. Section 9 (a) is amended by amending the first two paragraphs thereof to read as follows:

(a) *Persons who are unable to establish base periods under section 2.* Except in the case of transfers of business as provided in section 10, if you made no deliveries at all in a particular category between January 1, 1943 and December 31, 1944, you may not deliver any items in that category after August 15, 1945 until you have received an order from the OPA establishing a maximum average price for that category.

However, if you made your first delivery of any item in that category between December 31, 1944, and April 28, 1945, and if you file your application under this section and receive an acknowledgment from the OPA dated on or before June 20, 1945 you may deliver items in that category at ceiling prices established under the appropriate regulation without regard to the requirements of this order, until an order has been issued to you under this section: Except that, until an order is issued, you must not deliver any item in that category at a price higher than the highest maximum price you have already established for any item in that category which you delivered before April 28, 1945. If you have not received an acknowledgment of the receipt of your application dated before June 21, 1945, you may not deliver any items in the category after August 15, 1945, until an order has been issued to you under this section.

This amendment shall become effective as of July 2, 1945.

Issued this 3d day of July 1945.

Administrator.

## PART 1305—ADMINISTRATION

[Supp. Order 117]

PROVISION FOR ADDITION OF INCREASED  
POSTAL RATES AND CHARGE ON CERTAIN  
COLLECT-ON-DELIVERY SALES

A statement of the considerations involved in the issuance of this supplementary order has been issued simultaneously herewith and filed with the Division of the Federal Register.

§ 1305.145 *Provision for addition of increased postal rates and charge on certain collect-on-delivery sales.* (a) Not-

<sup>1</sup> 10 F.R. 4336, 5995, 6404.

withstanding the provisions of any price regulation heretofore or hereafter issued by the Office of Price Administration, in the case of collect-on-delivery sales of any commodity where the seller's established practice is to add a uniform charge to the price to cover mailing costs, any established maximum price for such sales may be increased by an amount equivalent to any increase, not already included in such price, heretofore or hereafter made in postal rates or charges.

(b) "Price Regulation" as used in this Supplementary Order No. 117 means a price schedule effective in accordance with the provisions of section 206 of the Emergency Price Control Act of 1942, as amended, a maximum price regulation or temporary maximum price regulation issued by the Office of Price Administration, or any amendment or supplement thereto or order issued thereunder.

This order shall become effective as of July 1, 1945.

## PART 1340—FUEL

[RMFR 137, Amdt. 10]

PETROLEUM PRODUCTS SOLD AT RETAIL ESTAB-  
LISHMENTS AND CERTAIN OTHER RETAIL  
SALES OF LIQUEFIED PETROLEUM GAS

A statement of the considerations involved in the issuance of this amendment, issued simultaneously herewith, has been filed with the Division of the Federal Register.

Revised Maximum Price Regulation No. 137 is amended in the following respects:

1. Section 1 (a) is amended by adding the words "including pressure appliance fuel" after the words "cleaners or other naphthas."

2. Section 4 (e) is added to read as follows:

(e) *Failure to keep records.* If a seller shall fail to keep the records provided by this section 4, or if such records are incorrect, or if a seller fails to file for establishment of a maximum price under section 11 if he is required to do so, the Office of Price Administration may issue an order establishing maximum prices in line with maximum prices established by this regulation for any commodity subject to this regulation sold by such seller. This will not relieve the seller of his obligations to comply with the requirements of this section 4 or any other sections of the regulation or of the various penalties for any failure to do so. Orders under this section may be issued by the Price Administrator, any Regional Administrator, or any District Director authorized to do so by written order of his Regional Administrator.

3. Section 5 (d) is added to read as follows:

(d) *Orders for adjustment where seller determined his maximum prices under*

*former section 9 (b) (2).* If a seller's maximum price for any grade of motor fuel has been lowered by the revocation of the October 1-15, 1941 margin provision (former section 9 (b) (2)) he may file an application with the District Office of the Office of Price Administration for an order which will either establish his maximum price in line with the prevailing prices in his area, or which will re-establish for such seller his October 1-15, 1941 margin. In the latter case, no order will be granted unless the seller can prove by satisfactory written proof of his October, 1941 sales prices (for example, by records of his own Station, and/or of his customers, and/or of his supplier, and/or of a nearby and traditionally competitive seller) and purchase prices, that his margin has been decreased by the revocation of such October 1-15, 1941 margin provision (former section 9 (b) (2)).

Any such applications must be in writing and must be filed on or before September 1, 1945 with the District Office of the Office of Price Administration for the area in which the seller has his retail establishment. Orders upon such applications may be issued by the Price Administrator, any Regional Administrator, or any District Director authorized to do so by written order of his Regional Administrator.

Any seller who determined his maximum price prior to the effective date of this amendment by use of the October 1-15, 1941, margin provision (former section 9 (b) (2)) and files an application, as set forth above, with the District Office of the Office of Price Administration, may continue to sell motor fuel at the maximum prices determined under former section 9 (b) (2) until otherwise ordered by the Price Administrator, Regional Administrator or District Director.

The Price Administrator, any Regional Administrator or any District Director authorized to do so by written order of his Regional Administrator, may by an order re-establish the October 1-15, 1941 margin provision within any State or part thereof where the Administrator or Director finds that a majority of sellers are adversely affected by its revocation.

4. Section 7 (b) is amended to read as follows:

(b) "Motor fuel" means any liquid fuel including Diesel fuel, used for the propulsion of motor vehicles, aircraft, or motorboats, and shall include any liquid fuel to which Federal gasoline taxes apply, except: (i) Aviation gasoline of 87 Octane rating or higher (ASTM method), and (ii) all grades of liquefied petroleum gas.

5. Section 7 (c) entitled "Retail establishments", is amended by adding the following sentence at the end of such paragraph: "On all deliveries of motor fuel into fuel tanks of aircraft at an airport, such airport shall for the purposes of this regulation be deemed to be a retail establishment."

6. Section 9 (b) (2) is revoked.

This amendment shall become effective the 10th day of July 1945.

[Restriction Order 13, Amdt. 3]

LARD RESTRICTION ORDER FOR PUERTO RICO

A rationale accompanying this amendment, issued simultaneously herewith, has been filed with the Division of the Federal Register.

Restriction Order No. 13 is amended in the following respects:

1. Section 1.1 (a) is amended by deleting the figures " $\frac{4}{10}$  (40%)" and inserting in lieu thereof the figures " $\frac{6}{10}$  (60%)".

2. Section 1.1 (b) is amended to read as follows:

(b) No retailer shall transfer or offer to transfer to any customer, and no customer shall accept a transfer from any retailer of more than  $\frac{1}{10}$  (60%) of the average weekly transfers of lard made to that customer during the months of November and December, 1944, and January 1945. *Provided*, That such transfer made by a retailer to a customer shall not exceed five (5) ounces of lard a week per customer. A customer may act as an agent of a family or other unit in the purchase of a quantity of lard not to exceed the allotment for all members of such unit who customarily eat the majority of the meals as member of such unit.

3. Section 1.2 (e) is amended to read as follows:

(e) *The local Boards may grant authorization for the acquisition of lard and may assign clients to wholesalers and retailers.* (1) An institutional or industrial user who must use lard in the performance of services essential to the health or welfare of the community who prior to February 24, 1945 was not a lard customer, or who cannot perform its services with the quantities of lard to which it is entitled under the provisions of this order, may be issued a certificate for the acquisition of lard by the Board having jurisdiction over the area where such establishment is located. The Director shall instruct the Boards as to the amount of lard which may be allotted by them to the different classes of institutional or industrial users, and may, if circumstances so require eliminate from the eligible list any class of institutional or industrial user for such period of time as he may deem proper.

(2) A retailer who during the basic period transferred to his clients a quantity of lard larger than the quantity obtained by him from his supplier during such basic period may be issued a certificate for the acquisition of lard by the Board having jurisdiction over the area where such establishment is located, or a retailer may be authorized by the Board to obtain lard from a wholesaler who during the basic period obtained from his supplier a quantity of lard larger than the amount transferred by him to his clients during said period. The quantity of lard which a retailer may be authorized to obtain under the provisions of this paragraph shall not exceed an amount which when added to his allowable quota will permit him to transfer to each of his customers more than five (5) ounces of lard a week. The Boards shall issue certificates for the acquisition of lard to retailers only after having taken care of all eligible applications for lard filed by institutional and industrial users.

The certificates for the acquisition of lard shall be issued by the Boards on form OPA PR-R 206, shall not exceed the quota of lard assigned to such Board, shall be honored by any wholesaler or importer, and shall be valid for the transfer of lard in the quantities specified. The importer or wholesaler shall return the corresponding part of the certificate to the Office of Price Administration, at San Juan, Puerto Rico, within ten (10) days after receipt of same.

(3) A new consumer may be authorized by his local Board to obtain lard from a retailer who during the basic period obtained from his suppliers a quantity of lard larger than the amount transferred by him to his clients. The quantity of lard which a new consumer may be authorized to obtain from the retailer shall not exceed five (5) ounces of lard a week per person.

4. Section 1.2 (f) is amended to read as follows:

(f) *How applications are made to local Boards.* Applications made by institutional or industrial users, or retailers,

shall be made in writing to the local Board having jurisdiction over the area where such establishment is located, setting forth all pertinent facts.

5. Section 2.2 is amended to read as follows:

**SEC. 2.2 Importer's, wholesaler's, and retailer's monthly reports.** Every importer and wholesaler shall prepare in triplicate a monthly report on form OPA PR-R 205, indicating the name of its customers and the transfers of lard made to each one of them during the month. The original of said report must be filed with the Office of Price Administration at San Juan, Puerto Rico; the duplicate shall be filed with the local Board having jurisdiction over the area where such importer's or wholesaler's establishment is located, and the triplicate shall be kept in such importer's or wholesaler's establishment for at least six (6) months after this order has been revoked. Every retailer shall prepare in duplicate a monthly report on form OPA PR-R 205 indicating the names of his suppliers and the quantities of lard obtained from each of them during the month. The original of said report shall be filed with the local Board having jurisdiction over the area where such retailer's establishment is located, and the duplicate shall be kept in his establishment for at least six months after this order has been revoked. These monthly reports must be filed not later than the 5th day of the month immediately succeeding the period reported.

6. Section 2.5 is added to read as follows:

**SEC. 2.5 A retailer may not acquire or transfer lard if he does not file his monthly report.** A retailer who does not file his monthly reports on the dates specified in this order shall not thereafter transfer or accept the transfer of lard.

This amendment shall become effective as of June 18, 1945.

[Territorial Consumer Goods Reg. 1, Amdt. 2  
to Supp. 1]

**MAXIMUM PRICES FOR JEWELRY AND CERTAIN  
OTHER ITEMS IMPORTED INTO THE TERRI-  
TORY OF HAWAII**

A statement of the considerations involved in the issuance of this amendment, issued simultaneously herewith, has been filed with the Division of the Federal Register.

1. Supplement 1 to Territorial Consumer Goods Regulation is amended in the following respects:

Article I, Section 3 (a) (8) is amended to read as follows:

(8) "Manufacturer's selling price" means the price at which the manufacturer of the article sold and invoiced it f. o. b. factory, less all discounts and allowances except discounts for prompt payment up to 2% and before the addition of any premium or other charge permitted under the Second Revised Maximum Export Price Regulation. However, a special commission allowed a wholesaler off the manufacturer's customary price to wholesalers paid by reason of services performed as a factory representative need not be deducted from the manufacturer's selling price provided the wholesaler presents to the Office of Price Administration, Honolulu 2, T. H., as evidence of such services (and secures the Office of Price Administration's approval of the same) a letter or signed statement of the manufacturer setting forth the following data:

1. Amount of the commission.
2. That the commission is paid for service as a factory representative and is deducted from the manufacturer's customary price to wholesalers.
3. That it was customary for the manufacturer to pay such a commission during March, 1942, or prior thereto.

2. Article III, Section 16 is amended as follows:

In the item "all watch bands" insert the word "metal" between "all" and "watch" so that the item reads "all metal watch bands."

This amendment shall become effective as of June 1, 1945.

Issued this 5th day of July 1945.

**PART 1418—TERRITORIES AND POSSESSIONS**  
[RMPR 288, Amdt. 3]

**PACKAGED DISTILLED SPIRITS AND WINE  
IN ALASKA**

A statement of the considerations involved in the issuance of this amendment, issued simultaneously herewith, has been filed with the Division of the Federal Register.

Section 32 is amended to read as follows:

**SEC. 32. Maximum prices for packaged distilled spirits and wine—**(a) *What this section does.* This section fixes the maximum prices at which retailers may sell any item of domestic or imported packaged distilled spirits and wine specified in Table 1 below.

(b) *How maximum prices are fixed.* Turn to Table 1 at the end of this section. The first column in this table shows a range of net cost prices per case. For each net cost price there is a corresponding dollar-and-cent retail price per container in columns 2, 3 and 4, according to the type and class and container size of the item. When the retailer has found the corresponding re-

tail price, he turns to Table 2 following Table 1. Table 2 shows the transportation allowance for purchases from United States suppliers which may be added to the Table 1 price, according to container size and the zone in which the retailer's establishment is situated. The sum of the appropriate price in Table 1 and the appropriate transportation allowance in Table 2 shall be the retailer's ceiling price.

(c) *Determination of net cost per case.* The net cost to be used by a retailer to determine a maximum price is the total of the following elements of cost actually paid by him:

(1) *Purchase price.* The supplier's selling price per case (not in excess of his maximum price under applicable regulations or orders of the OPA) less all discounts.

(i) Excepting any discount for prompt payment (cash discount) or interest on an advance payment; but

(ii) Including any amount subtracted from the supplier's maximum price to compensate for discontinuance of a discount for prompt payment.

(2) *Taxes.* United States customs duties and excise taxes if not included in the supplier's selling price and territorial excise taxes. (License, income, franchise, receipts, gross receipts, sales, use or other similar Federal, State, territorial or local taxes cannot be included in the net cost.)

*Example:* X, a retailer in Juneau, buys a case of Scotch whiskey in fifths from a wholesaler for which he pays \$45.50, which is the wholesaler's ceiling price. X pays a Federal excise tax of \$7.20 and a territorial excise tax of \$2.40. His net cost per case is therefore \$55.10. This amount falls in the \$55-\$55.99 price range. Since Scotch whiskey is an imported product, the corresponding retail price per container will be found in column 4-A. This price is \$6.34. To this price X adds the transportation allowance, which is 9 cents for fifths for retailers in the First Judicial Division (Zone 1). X's ceiling price is \$6.43.

(d) *Determination of maximum prices for certain transactions.*—(1) *For purchases from another retailer in the United States.* If the supplier is another retailer in the United States, his selling price may not be figured as the retailer's purchase price under paragraph (c) (1) above unless the supplier certifies on his invoice that the price charged does not exceed his net cost determined under MPR 445.

(2) *For sales to another retailer of packaged liquors.* A retailer's maximum price per case to another retailer shall be his net cost per case (figured according to paragraph (c) (1)). A retailer's maximum price to another retailer for individual containers of an item shall be an amount determined by dividing his net cost per case (figured according to paragraph (c) (1)) by the number of individual containers customarily packaged in the case by his supplier. No markups may be added for such sales.

(3) *For purchases from a supplier in Alaska.* A retailer's maximum price for packaged distilled spirits and wine acquired by him from a supplier in Alaska shall be the appropriate Table 1 price plus the freight expense actually incurred in acquiring the goods. As used

<sup>1</sup> 10 F.R. 5909, 6802, 7794.

herein, the term "freight expense" means expense incurred for railroad or vessel freight. Except as provided in paragraph (h) below, any retailer who receives deliveries by air transportation must absorb the difference between the air freight charges and the freight expense he would have incurred if the goods had been shipped by rail or vessel at lowest current common carrier rates.

(4) *Purchases of less than a case.* Where a retailer purchases less than a case of an item, his maximum price to consumers and other retailers shall be the price he would be permitted to charge under this section if he purchased a case of that item from the same supplier. In such case, the retailer will, of course, have to ascertain his supplier's ceiling price for a case and determine his net cost in accordance with paragraph (c) above.

(e) *Treatment of fractional parts of a nickel.* Notwithstanding the provisions of section 6 (a) (3) of this regulation, when the charging of the exact maximum price established under this section requires the use of a fractional part of a nickel, that maximum price may be increased to the next higher full nickel if the fraction is  $2\frac{1}{2}$  cents or more, and shall be reduced to the next lower full nickel if the fraction is less than  $2\frac{1}{2}$  cents. A price adjusted under this paragraph shall be posted as the retailer's ceiling price.

(f) *Sales slips and receipts.* The sales slip or receipt given to the purchaser in accordance with section 9 (c) of this regulation shall show, in addition, the brand name, container size, type and proof of each item sold.

(g) *Definitions.* As used in this section, the term:

(1) "Domestic" means produced within the continental United States, Puerto Rico or the Virgin Islands.

(2) "Imported" means produced outside of the continental United States and its Territories.

(3) Unless the context otherwise requires, the definitions of the commodities and terms descriptive thereof used in this section shall be those set forth in Regulation No. 4 Relating to the Labeling and Advertising of Wine, and to Regulation No. 5 Relating to the Labeling and Advertising of Distilled Spirits, issued under the provisions of the Federal Alcohol Administration Act, as amended.

(h) *Transportation allowance for retailers in Bethel, Alaska.* (1) Licensed retailers of packaged distilled spirits and wine in Bethel may add as a further transportation allowance to the appropriate table allowance established for retailers in Zone 4, the applicable amount set forth below:

Container size:	Additional allowance
Tenth	\$0.60
Pint	.70
Fifth	1.05
Quart	1.25

(2) This paragraph (h) shall apply only to those items of packaged distilled

spirits and wine for which air transportation costs from Anchorage to Bethel are actually incurred during the period in which the ban on vessel shipments of liquor cargo to Bethel is in effect.

(3) This paragraph (h) supersedes Region IX Order AG-12 under MPR 288.

#### PART 1429—POULTRY AND EGGS

[RMFR 333, Amdt. 7]

##### EGGS AND EGG PRODUCTS

A statement of the considerations involved in the issuance of this amendment, issued simultaneously herewith, has been filed with the Division of the Federal Register.

Revised Maximum Price Regulation 333 is amended in the following respects:

1. Section 1.12 is amended by deleting the word "ungraded" from the sentence in Table A-1 that reads as follows: "Small—Small sizes of all grades, ungraded, checks, and dirties may sell at no more than the price of grade C large."

2. Section 1.13 is amended by adding at the end of paragraph (a) a sentence to read as follows:

These prices are to be figured on Table A maximum prices for the week preceding the week in which the sales are made to household consumers.

3. Section 1.14 is amended by deleting Table A-3 from paragraph (b) and by

adding new paragraphs to read as follows:

(c) "Purchased from a U. S. Government agency." If a licensed ship supplier buys eggs from a civilian seller at the direction, or through the intervention, of War Shipping Administration or the United States Army, such eggs shall be considered to have been purchased from a U. S. Government agency.

(d) "Cost of acquisition." As to all eggs purchased from a U. S. Government agency for sale to a ship operated under the jurisdiction of War Shipping Administration, or for sale to a ship chandler, a licensed ship supplier shall compute his "cost of acquisition" by taking the amount of the purchase price paid by him and adding to it either or both of the following charges: cost of transportation into his store or warehouse, and actual public cold storage warehouse costs accrued and paid by him. Such added costs must however be approved in writing by War Shipping Administration.

(e) Maximum prices for sales by licensed ship suppliers, and Groups I and II ship chandlers. Maximum prices for eggs delivered shipside the vessel by licensed ship suppliers and Group I or II ship chandlers are set out in Table A-3 below. Additions to or deductions from these maximum prices are set out in footnotes (1), (2) and (3) to the table. "Licensed ship supplier" as used in this paragraph does not include ship chandlers.

TABLE A-3—OTHER TYPES OF SALES—LICENSED SHIP SUPPLIERS, SHIP CHANDLERS

Grade	If purchased from—	Maximum price for delivery shipside the vessel on sales by—		
		Any licensed ship supplier	Group II—Ship chandler	Group I—Ship chandler
Consumer or procurement.	Producer, shipper prior purchaser, first receiver, jobber.	Price for the grade and size in Tables A, A-1, plus 2¢ per dozen.	Price for the grade and size in Tables A, A-1 plus 2.0¢ per dozen.	Price for the grade and size in Tables A, A-1 plus 3.0¢ per dozen.
Procurement.	U. S. Government agency.	2¢ per dozen over cost of acquisition.	2.0¢ per dozen over purchase price paid.	3.0¢ per dozen over purchase price paid.

(1) If eggs purchased from a U. S. Government agency are sold by a licensed ship supplier to a ship chandler f. o. b. the licensed ship supplier's store or warehouse, the maximum price is ½ cent per dozen above the seller's cost of acquisition.

(2) If eggs purchased from a U. S. Government agency are sold by a licensed ship supplier to a ship chandler and delivered by the seller shipside a vessel, for the chandler's account, the licensed ship supplier's maximum price is one cent over his cost of acquisition and the ship chandler's mark-up is reduced by one cent. On the same kind of transaction, if the eggs were not originally purchased from a U. S. Government agency, the licensed ship supplier's price is one cent above Tables A, A-1 prices, and the ship chandler's markup is reduced one cent.

4. Section 2.3 is amended by adding a footnote immediately below Table B (Western Area) to read as follows:

<sup>1</sup> 9 F.R. 11514, 12216; 10 F.R. 1609, 2025, 3221, 5523.

The basing point city of New York shall include the New York Metropolitan Area:

consisting of the following: the City of New York, and the Counties of Nassau, Suffolk, and Westchester in the State of New York; and the Counties of Essex, Hudson, Union, and Passaic in the State of New Jersey.

5. Section 2.6a is added to read as follows:

SEC. 2.6a. Sales for use by a U. S. Government agency. (a) Sales of frozen or liquid egg products to a United States Government agency may be made f. o. b. the seller's shipping point and the maximum price is the price for that place in which the seller's shipping point is located, as determined by the provisions of section 2.3.

(b) A manufacturer or processor of food products for the United States Army may purchase liquid or frozen egg products f. o. b. the seller's shipping point under the conditions listed following, and the maximum price is the price for that place in which the seller's shipping point is located, as determined by the provisions

of section 2.3. In buying such egg products the buyer must at the time of purchase furnish to the seller a certificate stating that the frozen or liquid egg products being purchased will be used in the preparation of dried eggs or other food products ordered by the U. S. Army under its purchase order (describing the order by number, date, quantity and type of products). One copy of such certificate is to be sent to the Office of Price Administration, Washington, D. C., and one copy each is to be retained by the buyer and seller for so long as the Emergency Price Control Act remains in effect.

6. Section 3.9 is amended by deleting the last paragraph in the section and substituting an undesignated paragraph to read as follows:

Invoice. At the time of delivery of shell eggs sold by any first receiver or jobber to any buyer, except an ultimate consumer, the seller shall furnish to the buyer a written statement, setting forth the names and addresses of the buyer and seller, the date of delivery, the quantities, grades, sizes or weights of the eggs sold, and the prices charged and received. If the eggs are sold in cartons, the number of cartons and the amount charged for cartons shall be stated separately.

This amendment shall become effective July 5, 1945.

NOTE: All record-keeping and reporting requirements of this regulation have been approved by the Bureau of the Budget in accordance with the Federal Reports Act of 1942.

4. Section 13 (h) is amended to read as follows:

(h) *Quality cleaned and processed seed mixtures.* (1) This paragraph establishes base prices for quality cleaned and processed seed mixtures composed of alsike clover and white Dutch clover seeds. Subparagraphs (2) and (3) below shall have no application to this mixture. The base price per 100 pounds for the sale of a quality cleaned or processed seed mixture composed of alsike clover and white Dutch clover seeds shall be the base price per 100 pounds of alsike clover seed, figuring the purity according to the combined purities of the two kinds of seeds and the germination and hard seed according to the weighted average of the percentages of germination and hard seed in said two kinds of seeds, plus an addition at the rate of 35 cents per pound for each one pound or fraction thereof over 5 pounds of white Dutch clover seed per 100 pounds of the lot. This base price shall be reduced per 100 pounds of seed as follows:

(i) For weed seed content, by the same discount provided for alsike clover seed under paragraph (f) (1) of this section;

(ii) For noxious weed seed content, by the same discount provided for alsike clover seed under paragraph (f) (2) of this section.

(2) This paragraph establishes base prices for two classes of mixtures: quality cleaned and processed seed mixtures in which all of the seeds are subject to the regulation, and quality cleaned and processed seed mixtures composed of two or more seeds subject to the regulation when present in excess of 75% of the whole and one or more seeds not subject to the regulation.

The base prices for such mixtures shall be determined by multiplying the percentage of each seed subject to the regulation in 100 pounds of the mixtures by its base price per 100 pounds as shown in paragraphs (a), (d) and (e), whichever is applicable of this section, taking the highest possible purity and the particular percentage of germination and hard seed for each kind of seed subject to the regulation in the mixture, and adding the results. This base price shall be reduced per 100 pounds of seed as follows:

(i) For weed seed content.

Weed seed content:	Amount to be deducted per 100 pounds of seed
Less than 0.50 percent.....	None
0.50-1.00 percent.....	\$0.50

<sup>1</sup> For each additional one-half of one percent or fraction thereof above 2%.

(ii) For noxious weed seed content.

9-36 per pound.....	\$0.50
37-63 per pound.....	1.00
64-100 per pound.....	1.50
101-150 per pound.....	2.00
151-500 per pound.....	2.50
501-1000 per pound.....	3.00
For each additional 500 or fraction thereof per pound.....	.50

(iii) For sweetclover seed content: In quality cleaned or processed seed mixtures of alfalfa and sweetclover or red clover and sweetclover or alsike clover and sweetclover, the base price for such mixtures shall be reduced for sweetclover seed content as follows:

Sweetclover seed content:	Amount to be deducted per 100 pounds of seed
5.00% and over.....	\$5.00

(3) This paragraph establishes base prices for quality cleaned or processed seed mixtures composed of one seed subject to the regulation and seeds not subject to the regulation, when the former is in excess of 75% of the whole.

The base price for the sale of any quality cleaned or processed seed mixture, in which one of the seeds subject to the regulation is mixed with seeds not subject to the regulation and the former is present in excess of 75% of the whole, shall be determined by multi-

plying the percentage of the principal component in 100 pounds of the mixture by its base price per 100 pounds, figured on the basis of its highest possible purity and its actual percentage of germination and hard seeds in the mixture, and the result shall be the base price for such mixture. This base price shall be reduced per 100 pounds of seed as follows:

(i) For weed seed content, by the same discounts for weed seeds that are provided for the principal component under paragraphs (b) (1) and (f) (1) of this section;

(ii) For noxious weed seed content, by the same discounts for noxious weed seeds that are provided for the principal component under paragraphs (b) (2) and (f) (2) of this section;

(l) "State plan" refers to the information and proposals, including budgets, submitted by the State health authority pursuant to these regulations for activities of the State and political subdivisions thereof for (1) the prevention, treatment and control of venereal disease, (2) the prevention, treatment and control of tuberculosis, or (3) establishing and maintaining adequate public health services.

§ 9.2 *Allotments; size of health problems.* For the purpose of making allotments to the several States:

(a) The size of the venereal disease problem shall be determined by the Surgeon General taking into consideration such factors as:

(1) The varying composite and racial prevalence rates for syphilis;

(2) The extent to which treatment facilities have been provided as evidenced by the population under treatment for syphilis;

(3) The total number of syphilis patients brought to treatment in the primary or secondary stages during the previous year;

(4) The varying costs of providing equal services as determined by the inverse function of the syphilitic density, and the direct function of the size of the population of each State;

(5) The need for training centers and demonstrations in selected areas;

(6) The need for facilities for the prevention and control of venereal diseases in localities where there is an unusual concentration of population.

(b) The size of the tuberculosis problem shall be determined by the Surgeon General taking into consideration such factors as:

(1) The morbidity of the disease;

(2) The mortality attributed to the disease;

(3) The relative need among the States of facilities for diagnosis and treatment of tuberculous persons;

(4) The potential increased incidence of the disease occasioned by war congestion; and

(5) The number of non-resident tuberculous persons within the State.

(c) The size of special health problems shall be determined by the Surgeon General taking into consideration such factors as:

(1) The ratio which the mean annual number of deaths in each State from pneumonia, cancer, and other infectious and parasitic diseases, except influenza, tuberculosis and the venereal diseases, bears to the total mortality from these causes in the United States as shown by the most recent mortality statistics of the Bureau of the Census;

(2) Special conditions which create unequal burdens in the administration of equal public health services among the States indicated by the relative population density as shown by the most recent Bureau of Census population census;

(3) The need for regional training centers;

(4) The health needs occasioned by war activities, including the environments of military posts, cantonments, maneuver areas, and war industries.

§ 9.3 *Basis of allotments.* Of the total sum determined to be available for each fiscal year for allotment to the several States for the purposes of subsections (a), (b), and (c) of section 314 of the act, allotments to the several States shall be made as follows:

(a) Of the amount available for allotment for venereal disease control programs:

From 10 per cent to 20 percent, on the basis of population;

From 60 per cent to 80 per cent, on the basis of the size of the venereal disease problem;

From 10 per cent to 20 percent, on the basis of financial need.

(b) Of the amount available for allotment for tuberculosis control program:

From 5 per cent to 15 per cent, on the basis of population;

From 70 per cent to 90 percent, on the basis of the size of the tuberculosis problem;

From 5 per cent to 15 per cent, on the basis of financial need.

(c) Of the amount available for allotment for general health purposes:

From 20 per cent to 30 percent, on the basis of population;

From 40 per cent to 60 per cent, on the basis of special health problems;

From 20 per cent to 30 percent, on the basis of financial need.

§ 9.4 *Allotments; estimates; time of making; duration.* (a) For each fiscal year, the Surgeon General shall, with the approval of the Administrator, determine the amount of the appropriation for each program which shall be available for allotment among the several States.

(b) Four months prior to the beginning of each fiscal year, the Surgeon General shall prepare and make available to the States an estimated schedule of the amounts which it is expected will be allotted to each State during the fiscal year.

(c) Allotments to States shall be made, for each fiscal quarter, prior to the beginning of such quarter or as soon thereafter as practicable. At the end of each quarter, except the last quarter of each fiscal year, the amounts of such allotments which have not been certified for payment to the respective States pursuant to § 9.8 shall become available for allotment among the States in the same manner as moneys which had not previously been allotted.

(d) Allotments for the first quarter of the fiscal year for each program shall equal in amount not less than 30 per cent nor more than 40 per cent of the total sum determined to be available for allotment during that fiscal year. All funds available for allotment shall be allotted in the course of the year.

(e) The Secretary of the Treasury and the respective State health authorities shall be notified of the amounts of allotments, and of the period for which they are made.

§ 9.5 *State plans; submission and amendments.* (a) Each State making application for grants under section 314 of the act shall submit plans through its State health authority for each fiscal year for carrying out the purposes of such section. A State making application for Federal funds for more than one of the purposes authorized by section 314 of the act may consolidate its plan provided that the information specifically required for a State plan is distinguished with respect to each purpose.

(b) The State plan and amendments thereto shall be prepared in accordance with official forms supplied by the Public Health Service for the purpose.

(c) The State plan may be amended with the approval of the Surgeon General. Amendments shall state the period they are to be in effect.

§ 9.6 *State plans; contents.* A State plan with respect to any program shall consist of two parts.

(a) Part I shall describe the current organization and functions of health services for the program and the proposals of the State health authority for extending, improving, and otherwise modifying such organization and functions. It shall include a description of the services and source of all funds available or expected to be available for the operation of the plan, and a statement that the plan if approved will be carried out as described and in accordance with the regulations prescribed under section 314 of the act.

(b) Part II shall consist of proposed budgets for carrying out the activities described in Part I, and shall specify the period for which such budgets are submitted.

§ 9.7 *State plans; time of submission and approval.* (a) Parts I and II of a plan (the former in duplicate, the latter in quadruplicate) shall be submitted at least 45 days prior to the beginning of the Federal fiscal year to which the plan relates, except that with respect to the fiscal year 1946 such parts shall be submitted prior to August 1, 1945.

(b) Review and approval of Part I shall precede review and approval of Part II. Part II of a plan shall not be approved unless each item thereof relates to activities specifically described in Part I.

Part II of a plan submitted prior to August 1, 1945 may be approved for the entire fiscal year. Thereafter, Part II of a plan shall not be approved for any period antedating receipt of such part by the Public Health Service, except that in the event of epidemics or similar emergency, involving expenditures not capable of prediction, telegraphic requests for approval of emergency expenditures may be tentatively approved pending submission of necessary amendments to Parts I and II (and justification thereof) at a later date prescribed at the time of such tentative approval.

§ 9.8 *Payments to States.* Payments made to a State having an approved plan from the allotment to such State shall not exceed the allotment to such State or the total estimated expenditure necessary for carrying out the State plan, whichever is less.

Subject to the foregoing limitations, payments shall be made as follows:

(a) Payments shall be made once in each quarter from the allotment for that quarter except that with respect to an allotment for the first quarter in a fiscal year, two payments shall be made.

(b) The first payment from the allotment for the first quarter shall be made to a State in an amount equaling 50 percent of the amount allotted to that State for that quarter.

(c) Payment for the fourth quarter shall be that part of the allotment for that quarter which, together with the unencumbered cash balance adjusted for exceptions, will equal the estimated required expenditure necessary to carry to completion the State plan for the fiscal year.

(d) All other payments shall be the amount of the difference between the

unpaid balance of the current allotment of the respective State and the unencumbered cash balance of the respective fund in the State treasury at the beginning of the quarter for which payment is to be made, adjusted for exceptions.

(e) For purposes of the venereal disease control and general health programs, the term "unencumbered cash balance" in (c) and (d) above, includes unencumbered cash balances remaining from grants for venereal disease control and general health purposes made pursuant to sections 4a-4e of the act of July 9, 1918, as amended (52 Stat. 439, 42 U.S.C. 25a-25e), and Title VI of the act of August 14, 1935, as amended (49 Stat. 634, 42 U.S.C. 801-803); and the term "exceptions" as used therein includes exceptions to expenditures from such grant moneys.

Except with respect to the first payment in the first fiscal quarter, payments from allotments shall not be certified unless all reports and documents, prescribed by these regulations to be due, have been received. Payments subsequent to the above first payment shall not be made until an application for the payment has been received.

§ 9.9 *Required expenditure of State and local funds.* (a) Moneys paid to any State pursuant to section 314 of the act shall be paid upon the condition that there be expended in such State, during the fiscal year for which such payment is made and for purposes specified in the State plan with respect to which the payment is made, public funds of such State and its political subdivisions (excluding any funds derived by loan or grant from the United States) in amounts determined as follows:

(1) With respect to payments for a venereal disease control program, an amount equal to 50 per cent of the amount of Federal funds to be expended pursuant to the State plan.

(2) With respect to payments for a tuberculosis control program, an amount equal to the amount of Federal funds to be expended pursuant to the State plan.

(3) With respect to payments for a general health program, an amount equal to 50 per cent of the amount of Federal funds to be expended pursuant to the State plan.

The expenditures required for any one of the above programs shall be additional to the expenditures required for other programs.

(b) Federal funds paid to a State shall not be used to conserve State and local funds. The ratio of amounts expended to amounts certified as available for operation of the State plan shall be used for evaluating compliance with this requirement.

§ 9.10 *Required administrative standard; State plans; expenditures.* (a) Federal funds paid to a State, including unencumbered balances remaining from grants for venereal disease control and general health purposes made pursuant to sections 4a-4e of the act of July 9, 1918, as amended (52 Stat. 439, 42 U.S.C. 25a-25e), and Title VI of the Act of August 14, 1935, as amended (49 Stat. 634, 42 U.S.C. 801-803), shall be expended

solely for the purposes specified in plans approved by the Surgeon General, and in accordance with the regulations in this part.

(b) State laws and regulations governing the custody and disbursement of State funds shall govern the custody and disbursement of Federal funds paid to the State, subject to such modification as may be determined by the Surgeon General.

§ 9.11 *Required administrative standard; State plans; health services.* (a) The State plan shall provide for health services in substantial accordance with nationally accepted standards.

(b) The following standards are prescribed for evaluating compliance of venereal disease control programs with this requirement:

(1) The State laboratory and any other serologic laboratory receiving funds under subsection (a) of section 314 of the act shall demonstrate by a suitable method that the tests for syphilis performed therein have a satisfactory sensitivity and specificity rating. Such rating shall be determined in the case of the State laboratory by the Public Health Service.

(2) The State laboratory, and any laboratory of political subdivisions thereof, receiving funds under subsection (a) of section 314 of the act shall provide laboratory services for the venereal diseases on the same basis as such service is provided for other communicable diseases. No State department of health shall be entitled to receive such funds unless such laboratory services are provided within that State.

(3) Free diagnostic and treatment facilities for both syphilis and gonorrhea shall be provided by all health departments receiving funds under subsection (a) of section 314 of the act. In order to provide complete clinical service, funds may be reallocated in the discretion of the State health authority independently to the gonorrhea or syphilis departments of polyclinics. All health departments or clinics receiving funds shall provide facilities for (i) diagnosis and emergency treatment of all patients who apply; (ii) continued treatment, consultative advice or opinion for all patients referred by private physicians; and (iii) continued treatment for all patients unable to afford private medical care. The determination of the ability of patients to pay for private medical care shall be the responsibility of the State or local health department or constituted welfare agencies within these areas. Clinics collecting fees from semi-indigent patients shall not receive assistance under subsection (a) of section 314 of the act unless such fees are used solely by the venereal disease clinics for improvement of diagnostic and therapeutic services rendered therein.

(4) Free distribution of drugs, except as modified in the approved State plan, for the treatment of syphilis and gonorrhea shall be made on the request of any physician authorized by the law of his State to administer such drugs for the treatment of his patients. Health departments may furnish such drugs upon the condition that the physician

furnish a morbidity report on the case to be treated.

(5) To receive funds under subsection (a) of section 314 of the act, diagnostic and treatment services shall be as freely available to infected residents of other States and counties as to people who reside in the State or political subdivision thereof providing the services. Clinics shall be so located as to be easy of access and of maximum convenience to the population, and shall be held in well-lighted and well-ventilated rooms. The number of clinic sessions shall be adequate to meet local needs, and shall be held at such times as to avoid economic loss to employed patients; the physical arrangements shall be such as to insure privacy for the patients when receiving medical attention, and the minimum equipment shall include all apparatus and reagents necessary for the proper examination and treatments of patients infected with syphilis and gonorrhea. Such equipment will also include apparatus for darkfield examination, ophthalmologic examination, and for lumbar punctures, unless there is immediate access to such examinations by some other means. The minimal data included on the morbidity, clinical, and epidemiological records shall be those presented in the reprint of the United States Public Health Service on "A Mechanical System for Reporting Morbidity, Treatment-Programs, and Control of Venereal Diseases," or such minimal data as may be later approved by the members of the Conference of State and Territorial Health Officers. Efficient case-finding and case-holding work shall be conducted in all clinics by qualified personnel.

(c) The following standards are prescribed for evaluating compliance of tuberculosis control programs with this requirement:

(1) The State laboratory and any other laboratory receiving funds under subsection (b) of section 314 of the act shall demonstrate by a suitable method that the tests for tubercle bacilli performed therein have a satisfactory sensitivity rating. Such rating shall be determined in the case of the State laboratory by the Public Health Service.

(2) All health departments or clinics receiving funds shall provide facilities for (i) diagnosis and follow-up supervision of all patients who apply; (ii) continued medical supervision, consultative advice or opinion for all patients referred by private physicians; and (iii) continued medical supervision for all patients unable to provide medical care.

(3) The minimal data included in the morbidity, clinical and epidemiological records shall be those presented in the reprint of the United States Public Health Service on "Record and Filing Systems for Mass Radiography". Efficient case-finding and case-holding work shall be conducted in all clinics and mass radiography units by qualified personnel.

§ 9.12 *Required administrative standard; State plans; personnel administration on a merit basis.* A system of per-

sonnel administration on a merit basis shall be established and maintained with respect to services and programs described in the State plan. Standards for evaluating compliance with this requirement shall be contained in "Merit System Policies of the Public Health Service," in effect at the time of the expenditure.

§ 9.13 *Required administrative standard; State plans; training of personnel.*

(a) When Federal funds are utilized for the training of personnel for State or local health work, such training shall be conducted in accordance with "Training Policies of the Public Health Service" in effect at the time of expenditure.

(b) Approval for expenditure of Federal funds shall not be given for stipend, tuition, travel or salary of a trainee incident to accredited field experience or to intramural study for any period prior to receipt by the Public Health Service of a trainee application on an official form.

§ 9.14 *Required administrative standard; fiscal affairs.* (a) A separate and distinct fund account shall be maintained for each fund of Federal moneys by the principal State accounting officer.

(b) An efficient method for the conduct of fiscal affairs (including financial and property controls) shall be established and maintained with respect to State and local public health agencies receiving financial assistance through grants pursuant to the regulations in this part. Standards for evaluating compliance with this requirement shall be prescribed by the Surgeon General.

§ 9.15 *Required administrative standard; required information; reports when due; audits.* (a) The Surgeon General may require the submission of information pertinent to the operation of the State plans and to the purpose of the grants, including the following:

(1) A certification on an official form as to the amount of State and local funds available for carrying out the State plan shall be due in duplicate on August 1, 1945, for the fiscal year 1946, and on July 1 of each fiscal year thereafter.

(2) A statement on an official form showing the distribution of all funds by functional activities for the then current fiscal year and the year following shall be due in duplicate on August 1, 1945, and on July 1 of each fiscal year thereafter.

(3) A report on an official form of personnel sent to training centers shall be due in duplicate one month following the close of each quarter.

(4) Quarterly reports on an official form showing total receipts, expenditures, unliquidated encumbrances and balances of Federal funds shall be due in duplicate when an application for payment from the respective current allotment is received.

(5) Quarterly reports on an official form showing total quarterly expenditures of moneys from both grant and other sources, for each budget shall be due in duplicate at the close of the succeeding quarter.

(6) A detailed annual report on an official form showing expenditures for each budget and item for the preceding fiscal year shall be due in duplicate on October 1 of each year.

(7) A report on an official form showing personnel facilities and services for each local health organization included in the current State plan shall be due in duplicate on August 15 of each year, beginning August 15, 1946.

(8) The following reports on official forms shall be submitted with respect to venereal disease activities within 30 days after the close of the period to which they pertain:

(i) A semiannual report on the status of venereal disease control activities.

(ii) A monthly clinic report for each clinic in the State treating venereal diseases.

(iii) A monthly morbidity report.

(iv) A monthly city morbidity report for each city in which the population is 200,000 or over.

(9) The following reports on official forms shall be submitted with respect to tuberculosis control activities within 30 days after the close of the period to which they pertain:

(i) A quarterly report on mass chest surveys.

(ii) A quarterly report on tuberculosis morbidity, with separate report for cities of 500,000 population or over.

(iii) A quarterly report on clinic and nursing services.

(b) Audit of the activities and programs described in the State plan may be made after prior consultation with the State health authority. Records, documents, and information available to the State health authority pertinent to the audit shall be accessible for purposes of audit.

§ 9.16 *Effective date; prior regulations superseded.* The regulations in this part shall become effective upon the date of their publication in the FEDERAL REGISTER, and shall supersede the regulations issued pursuant to sections 4a-4e of the act of July 9, 1918,<sup>1</sup> as amended (52 Stat. 439, 42 U.S.C. 25a-25e), and Title VI of the act of August 14, 1935,<sup>2</sup> as amended (49 Stat. 634, 42 U.S.C. 801-803).

SEC. 5. *Provisions governing the orderly transfer of workers—(a) General.* (1) A new employee, who during the preceding 60-day period was engaged in an essential or locally needed activity, may be hired only if such hiring would aid in the effective prosecution of the war. Such hiring shall be deemed to aid in the effective prosecution of the war only if:

(i) Such individual is hired for work in an essential or locally needed activity or for work to which he has been referred by the United States Employment Service, and

(ii) Such individual presents a statement of availability from his last employment in an essential or locally needed activity, or is referred by the United States Employment Service of the War Manpower Commission, or is hired with its consent, as provided herein.

(2) *Issuance of statements of availability by employers or USES.* A female worker whose last employment is or was in an essential or locally needed activity shall receive a statement of availability from her employer or the USES if:

(i) She has been discharged, or her employment has been otherwise terminated by her employer, or

(ii) She has been laid off for an indefinite period, or for a period of seven or more days, or

(iii) Continuance of her employment would involve undue personal hardship, or

(iv) Such employment is or was at a wage or salary or under working conditions below standards established by State or Federal law or regulation, or

(v) Such employment is or was at a wage or salary below a level established or approved by the National War Labor Board (or other agency authorized to adjust wages or approve adjustments thereof) as warranting adjustments, and the employer has failed to adjust the wage in accordance with such level or to apply to the appropriate agency for such adjustment or approval thereof.

(3) *Issuance of statements of availability by USES.* At the discretion of the USES, a male worker whose last employment is or was in an essential or locally needed activity may receive a statement of availability from the USES in lieu of a referral card if:

(i) He has been discharged, or his employment has been otherwise terminated by his employer, or

(ii) He has been laid off for an indefinite period, or for a period of seven or more days, or

(iii) Continuance of his employment would involve undue personal hardship, or

(v) Such employment is or was at a wage or salary below a level established or approved by the National War Labor Board (or other agency authorized to adjust wages or approve adjustments thereof) as warranting adjustment, and the employer has failed to adjust the wage in accordance with such level or to apply to the appropriate agency for such adjustment or approval thereof.

(vi) He is in the employ of an employer whom the War Manpower Commission finds, after notice, hearing and final decision, has not complied with any War Manpower Commission employment stabilization plan, regulation or policy, and for so long as such employer continues his non-compliance after such finding. In addition, such employer may not hire any new employee; whether or not such new employee presents a statement of availability.

(4) *Limited referral.* In order to facilitate the employment of individuals during off-season or other short periods, in essential or locally needed activities, the United States Employment Service may issue referral cards containing limitations as to the length of time for which the worker is available for employment. At the expiration of such time, or sooner, if requested by the United States Employment Service, the hiring employer shall promptly release the worker for return to his customary employment.

(5) *Referral in case of under-utilization.* If an individual is employed at less than full time or at a job which does not utilize his highest recognized skill for which there is a need in the war effort, the USES may, upon his request, refer him to other available employment in which it finds that the individual will be more fully utilized in the war effort.

(6) *Workers who may be hired only upon referral by the USES.* (i) A new employee may not be hired solely upon presentation of a statement of availability but may be hired only upon referral by, or in accordance with arrangements with, the USES when:

(a) The new employee has not lived or worked in the locality of the new employment throughout the preceding 30-day period. However, such a referral must be subject to the condition communicated to both worker and new employer that if, after his case is called to the attention of the United States Employment Service in the area from which he has migrated, it is determined that he should not be so referred, his employment will be terminated.

(b) The new employee's last regular employment was in agriculture and he is to be hired for non-agricultural work: *Provided*, That no such individual shall be referred to non-agricultural work except after consultation with a designated representative of the War Food Administration, *And provided*, That such an individual may be hired for non-agricultural work for a period not to exceed six weeks without referral or presentation of a statement of availability.

(c) The new employee is of the male sex and is scheduled for thirty hours or more per week, without regard to the duration of the employment. Arrange-

ments may be made for the use of certain existing hiring channels upon written delegation by the Area Director setting forth the conditions under which such hiring or referral is conducted.

(7) *Encouragement of local initiative and use of existing hiring channels.* To the maximum degree consistent with this employment stabilization plan, local initiative and cooperative efforts shall be encouraged and utilized and maximum use made of existing hiring channels such as private employers, labor organizations, professional organizations, schools, colleges, technical institutions and government agencies.

(8) *Exclusions.* No provision of this employment stabilization plan shall be applicable to:

(i) The hiring of a new employee for agricultural employment.

(ii) The hiring of a new employee for work of less than seven days' duration, or for work which is supplementary to the employee's principal work; but such work shall not constitute the individual's "last employment" for the purposes of this plan, unless the employee is customarily engaged in work of less than seven days' duration.

(iii) The hiring of an employee in any territory or possession of the United States, except Alaska and Hawaii.

(iv) The hiring by a foreign, State, county or municipal government, or their political subdivisions, or their agencies, and instrumentalities, or to the hiring of any of their employees, unless such foreign, State, county, or municipal government, or political subdivision or agency or instrumentality has indicated its willingness to conform, to the maximum extent practicable under the Constitution and laws applicable to it, with the plan.

(v) The hiring of a new employee for domestic service, or to the hiring of a new employee whose last regular employment was in domestic service.

(vi) The hiring of a school teacher for vacation employment or the rehiring of a school teacher for teaching at the termination of the vacation period.

(10) *Content of statements of availability.* A statement of availability issued to an individual pursuant to this plan shall contain only the individual's name, address, social security number, if any, the name and address of the issuing employer or WMC officer and office, and the date of issuance.

(11) *Solicitation of workers.* No employer shall advertise or otherwise solicit for the purpose of hiring any individual if the hiring of such an individual would be subject to restrictions under this employment stabilization plan, except in a manner consistent with such restrictions.

(12) *Hiring.* The decision to hire or refer a worker shall be based on qualifications essential for performance of, or

suitability for the job, and shall be made without discrimination as to race, color, creed, sex, national origin, or except as required by law, citizenship.

(13) *Representation.* Nothing contained in the plan shall be construed to restrict any individual from seeking the advice and aid of, or from being represented by, the labor organization of which he is a member or any other representative freely chosen by him, at any step in the operation of the plan.

(14) *General referral policies.* No provision in this plan shall limit the authority of the USES to make referrals in accordance with approved policies and instructions of the WMC.

(15) *Protection of seniority rights of workers.* A referral card shall be issued promptly to an individual when the individual has received from a former employer, with whom the worker has re-employment rights under an existing collective bargaining agreement, a notice that he must return to work for such employer in order to preserve his seniority rights.

(16) *Establishment of employment ceilings.* No employer of eight (8) or more full time employees may hire any full time male worker if the hire of such worker shall bring the employer's total full time male workers above the level established for that employer by the Area Director, except for the following exceptions:

(i) Veterans of World War II may be hired regardless of employment ceiling limitations: *Provided, however,* That subsequent separations are not to be replaced until such time as separations have brought total male employment to the ceiling limitations.

(ii) The Area Director may approve the hiring of a limited number of key employees requiring specialized training or experience even though current employment is at or above the assigned ceiling; *Provided, however,* That subsequent separations are not to be replaced until such time as separations have brought employment to the ceiling limitations.

#### [Region III Order G-1 Under RMPR 251] INSTALLED SIDING IN THE DETROIT, MICH., AREA

An opinion accompanying this order, issued simultaneously herewith, has been filed with the Division of the Federal Register.

In the judgment of the Regional Administrator of Region III of the Office of Price Administration, the maximum prices established by this order are generally fair and equitable and are necessary to effectuate the purposes of the Emergency Price Control Act of 1942, as amended, and Executive Orders Nos. 9250 and 9328.

Therefore, under the authority vested in the Regional Administrator by section 9 of Revised Maximum Price Regulation No. 251, and by the Emergency Price Control Act of 1942, as amended, and Executive Orders Nos. 9250 and 9328, Order No. G-1 is hereby issued.

#### ARTICLE I—TRANSACTIONS COVERED BY THIS ORDER; ITS RELATIONSHIP TO REVISED MAXIMUM PRICE REGULATION NO. 251; AND GEOGRAPHICAL APPLICABILITY

SECTION 1. *Transactions covered by this order.* (a) This order covers (1) sales of composition siding on an installed basis, (2) construction services preparatory to such installations, and (3) additional services unrelated to such installations.

"Composition siding" means types of siding used in new and re-siding jobs such as asbestos-cement and insulated brick or stone but not wood shingles or wood siding.

"Installed basis" means a transaction in which the seller furnishes composition siding and related materials or services required to incorporate such siding into a building or structure.

"Related materials or services" means the furnishing and installation of leveling strips, felt, felt strips, corner beads, calking, mouldings, nails, and other materials, labor cost, other job costs, commissions or brokerage directly related to and necessary to such installations.

"Construction services preparatory to such installations" means all services which are necessary to place a structure in repair prior to installation. (Example—boxing in of concrete, cement block, natural stone, or brick basement walls, construction of new dormer, etc.)

"Additional services unrelated to such installations" means separate work or services which may be performed apart from siding installations (for example, roof repairs, painting, etc.), and not necessary for direct siding installation.

(b) The kinds of siding installation covered by this order are: (1) Asbestos-cement siding of standard surface hardness; (2) Insulated brick or insulated stone siding.

SEC. 2. *Relationship of this Order No. G-1 to Revised Maximum Price Regulation No. 251.* (a) The provisions of this order supersede sections 6, 7 and 8 of Revised Maximum Price Regulation No. 251, except as otherwise provided in this order, with respect to sales of siding on an installed basis.

(b) An employer paying labor rates higher than those in effect for him on the effective date of this order, by reason of a predetermination of wage rates by the Secretary of Labor under the Davis-Bacon Act or an order or authorization of the Wage Adjustment Board, National War Labor Board or Economic Stabilization Director, may add his increased

labor cost to his maximum price as determined under this order. For the purpose of this paragraph "increased labor cost" means the difference in amount between the employer's labor cost based upon labor rates in effect on the effective date of this order, and his labor cost based upon such legally approved rates, plus his additional payments for Federal old-age benefits, unemployment compensation taxes, and public liability insurance. It should be noted that the increased labor cost is to be added to the maximum price determined by this order.

An application need not be made to the Office of Price Administration nor its prior approval obtained in order to put into effect the maximum price increases described in this paragraph (b).

(c) Except as otherwise provided herein, all transactions subject to this order shall remain subject to all provisions of Revised Maximum Price Regulation No. 251, together with all amendments that have been or hereafter may be issued.

**SEC. 3. Geographical applicability.** This order shall apply in the Detroit, Michigan, area, more particularly defined as the counties of Clinton, Eaton, Ingham, Jackson, Hillsdale, Lenawee, Livingston, Macomb, Monroe, Oakland, St. Clair, Washtenaw, and Wayne, all in the State of Michigan.

#### ARTICLE II—MAXIMUM PRICES FOR INSTALLED SIDING

**SEC. 4. Maximum prices for sales of siding on an installed basis including related materials and services.** The maximum prices for sales of siding on an installed basis shall be as shown in the following Table I of this section, and shall be upon a price per square basis for the kinds and sizes described. Such prices include:

(a) The cost of siding materials delivered to the site where the installation is to be performed.

(b) The cost of accessories used in the insulation of the siding, which means, but is not limited to, leveling material, backer board, felt and/or felt strips, corner beads, calking, moldings, nails or other necessary material.

(c) Labor costs, including Federal old-age benefits, unemployment compensation taxes and workmen's compensation and public liability insurance.

(d) Other job costs, including trucking, removal of rubbish, rental of scaffold or other equipment (if any).

(e) Margin, which includes commission or brokerage.

TABLE I

The maximum prices are as follows:

	Per square
Asbestos-cement siding of standard surface hardness:	
Installed over backer board.....	\$28.00
Installed without backer board.....	27.00
Sizes 12" x 24" or 12" x 27" insulated brick or insulated stone siding (fiber insulation board base).....	28.50

**SEC. 5. Measurements.** It shall be the seller's responsibility to ascertain that all measurements of the area to be covered are accurate; such measurements including allowance for wastage and overlap shall be made as follows:

(a) On installation jobs of ten squares or less, sellers shall compute the over-all area to be covered with siding without allowance for doors or windows. On installation jobs of more than ten squares, the seller must deduct one-half of the area of doors and windows from the overall area, or

(b) Sellers may use the following alternative method of determining the net area on which the contract price shall be based: deduct the full area of all windows and door openings from the overall area; to the net area so determined, add 8 percent, bringing the resulting figure up to the nearest larger half or full square.

A tolerance of 3 percent of the net area may be allowed in either of the computations under paragraphs (a) and (b) above; if in excess of 3 percent, an adjustment will be required to the area established by paragraphs (a) and (b) above.

**SEC. 6. Maximum prices for certain services—(a) Construction services preparatory to installations.** The maximum prices that may be charged by sellers of preparatory construction services which are necessary to place a structure in repair prior to installation shall be the maximum prices established in accordance with Revised Maximum Price Regulation No. 251.

(b) **Additional services unrelated to installations.** The maximum prices that may be charged by sellers of additional services unrelated to installations shall be the maximum prices established in accordance with Revised Maximum Price Regulation No. 251.

**SEC. 7. Quoting a "guaranteed price."** The seller may offer to sell a siding job covered by this order on the basis of a "guaranteed price" wherein the seller agrees to charge a fixed amount: *Provided, however,* That the so-called "guaranteed price" must not be higher than the maximum price figured in accordance with the pricing methods and requirements of this order. Upon completion of the contract, if requested by the purchaser, the seller is required to furnish the purchaser with an itemized statement showing the number of squares, the net area and the maximum price per square for the material used as shown in Table I above, and an itemization of the amount for incidental work.

**SEC. 8. Notification to purchasers of existence of order and Revised Maximum Price Regulation No. 251.** Every person making sales subject to this order shall, if requested by the purchaser, show the purchaser a copy of this Order and Revised Maximum Price Regulation No. 251.

#### ARTICLE III—MISCELLANEOUS

This Order No. G-1 shall become effective June 11, 1945.

Issued: June 11, 1945.

1. Section 3 (g) is amended to read as follows:

(g) "Special fluid whole milk" means a particular seller's Grade A fluid milk which in addition conforms to at least one of the following: (1) quality or production standards established by governmental authorities or non-governmental medical, farm or trade organizations, e. g., "certified", "Golden Guernsey", "Jersey Creamline"; or (2) high butterfat content equal to or in excess of standards established by any federal, state or local government agency; or (3) additional processing other than by cooling, weighing, testing, reconstituting, bottling, standardizing or separating, e. g., homogenization and/or "fortification" with Vitamin D.

(o) "Sale at wholesale" means any sale of "bottled" fluid milk to a person other than the Army and Navy and the ultimate consumer, and any sale of "bulk" fluid milk to stores, hotels, restaurants and institutions other than the Army and Navy, excepting a purchase by any person governed by Part II of this order.

4. The date in section 3 (q) is changed to April 30, 1945.

The application shall be in duplicate on Revised Form ASF-72, copies of which are furnished on request, or shall contain the following information: (1) the name and address of the applicant and the exact location of all his processing plants involved in the application; (2) the length of time he has been engaged in distributing milk at a uniform price in all markets served; (3) the names of all communities served prior to April 30, 1945; (4) the uniform price at wholesale and retail charged for each size and container during April, 1945; (5) the volume (in terms of quarts) sold and delivered in each community during April, 1945; and (6) the names and addresses of retailers who purchase at wholesale for resale in a community for which this order establishes a lower maximum retail price. The Atlanta Regional Office of the Office of Price Administration may by written order grant permission to the applicant to function as a one-price distributor selling at a uniform price in the particular markets served.

c. The date in section 6 (d) is changed to August 1, 1945.

6. Section 7 is amended to read as follows:

SEC. 7 (a) Each seller named in section 16 is authorized to sell premium milk of the type there specified at the maximum prices set forth in part opposite his respective name, subject to the quantity limitations provided in this section. These maximum prices have been established by filings under Supplementary Regulation 14A or by orders issued by the Atlanta Regional Office pursuant to Supplementary Regulation 14A to the General Maximum Price Regulation.

(b) Except for the named milks authorized to the specific sellers named in section 16, no person shall sell a "special" fluid whole milk or buttermilk at a premium price on or after August 1, 1945, unless he applies in writing to the Atlanta Regional Office, Candler Building, Atlanta, Georgia, for permission to sell such special milk at a premium price and is granted such permission by a written

order from that office. The application shall be in duplicate either on Form ASF-71 (Revised), copies of which will be supplied on request, or by a statement containing the following information: (1) the total quantity, expressed in quarts, of standard milk (or buttermilk) the applicant sold during the months of March 1942, and April 1945; (2) the quantity of each type of special fluid whole milk (or special buttermilk) the applicant sold at a premium price during the months of March 1942, and April 1945; (3) the established price for each size and container the applicant charged for each type of special fluid whole milk (or special buttermilk) during March 1942, and the prevailing price of standard approved milk (or buttermilk) during March 1942, in the particular market for each specific size; and (4) the names of all communities where the applicant sold special whole milk (or buttermilk) at a premium price over standard milk (or buttermilk) in March 1942, and April 1945.

(c) Unless the applicant is able to present evidence that he had an established premium price during March, 1942, or that another seller has established a premium price for a special milk in the same particular market, which belongs in the same category of special milks as defined in section 3 (g), the Atlanta Regional Office shall not grant the applicant permission to sell a special fluid whole milk (or buttermilk) at a premium price.

(d) Orders issued by the Atlanta Regional Office authorizing the sale of a special fluid whole milk (or special buttermilk) according to the provisions of this section shall contain limitations upon each authorized seller's total monthly sales of such special milk at a premium price, not in excess of the highest of the following quantity limitations: (1) the seller's total sales (expressed in quarts) of special milk (or buttermilk) at premium prices during the month of April, 1945, plus 5 per cent of such sales by quantity; or (2) a percentage of the seller's monthly total sales (expressed in quarts) of standard milk (or buttermilk) represented by his sales at premium prices during any month which is equal to the corresponding percentage for the month of April 1945; or (3) 10 per cent of the total quantity, expressed in terms of quarts, of his monthly sales of standard milk (or buttermilk).

*Provided*, That the quantity limitations of this section are inapplicable to the following: (1) any special fluid whole milk meeting the qualifications set forth in section 3 (g) (1) sold by any person; and (2) any special fluid whole milk coming within the classification of section 3 (g) (2) and sold by the producer.

(e) Every authorized seller of "special fluid whole milk" subject to the quantity limitations on monthly volume of sales provided in paragraph (d) of this section shall file a report with the Atlanta Regional Office on or before October 15 and April 15 of each year. The report shall give the monthly sales (expressed in quarts) of each type of "special fluid whole milk" sold at authorized premium prices, and the monthly sales (expressed in quarts) of standard fluid milk for each

calendar month during the preceding six months.

Every authorized seller of "special buttermilk" (including lactic acid milk) shall file a report with the Atlanta Regional Office on or before October 15 and April 15 of each year. The report shall give the monthly sales (expressed in quarts) of each type of "special buttermilk" sold at authorized premium prices and the monthly sales (expressed in quarts) of plain buttermilk for each calendar month during the preceding six months.

(This filing requirement is subject to the approval of the Bureau of the Budget in accordance with the Federal Reports Act of 1942.)

(f) Penalties for the sale of special fluid whole milk (or buttermilk) in excess of the maximum quantity established by order. If the monthly sales of special fluid milk (or buttermilk) at premium prices by any authorized seller exceed the maximum quantity established for him by order for any calendar month, such seller's maximum wholesale and retail prices for all of the excess quantity sold shall be the same as the established maximum wholesale and retail prices for approved standard fluid milk (or buttermilk) established by this order.

The provisions of this paragraph are in no way a substitution for the penalties and remedies provided by law for a violation of any of the provisions of this order.

(g) A retail store which purchases special milk at wholesale from a distributor or producer-distributor who has been granted permission by a written order to charge a premium wholesale price on such special milk may add a markup not exceeding two cents per quart or one cent per smaller container to the maximum wholesale price as established in the written order to the distributor or producer-distributor.

(h) The Atlanta Regional Office may correct or revise any maximum prices established for any type of special milk, with regard to the differentials prevailing in adjoining areas.

(i) Any seller who is authorized to sell a special fluid whole milk (or buttermilk) at a premium price according to the terms of this section may apply to the Atlanta Regional Office for permission to increase the maximum monthly quantity of such special milk (or special buttermilk) which he is permitted to sell according to the terms of this Section or under a written order issued by the Atlanta Regional Office pursuant hereto. In filing such an application, the seller must supply data showing the latest monthly quantity, expressed in quarts, of his sales of standard fluid milk (or buttermilk) and the requested maximum monthly quantity of special fluid whole milk (or special buttermilk); and in addition, he shall demonstrate that a serious deficiency, actual or impending, exists with respect to the supply of this milk in his community, which deficiency is directly associated with the war program, e. g., the establishment of a military hospital.

7. A new section is added to Part I, to read as follows:

Sec. 8a *Adjustments.* The Regional Administrator may make adjustments or

act upon applications for the adjustment of maximum prices established by this Part I only in accordance with the authority set forth for "bottled" milk in § 1499.75 (a) (9) (Supplementary Regulation 15) to the General Maximum Price Regulation, and for "bulk" milk in § 1351.807 of Maximum Price Regulation 280.

Applications for adjustments shall be filed in accordance with Revised Procedural Regulation 1.

8. The descriptive title of section 10 is changed to read: "Exempt Purchases".

9. Section 11 (g) is revised to read as follows:

(g) "Producer" means a farmer or other person or representative who owns, superintends, manages or otherwise controls the operations of a farm on which milk is produced and who sold milk during January 1943, and/or September 1944, or has sold or delivered milk according to the provisions of a regional order which establishes a maximum price for the purchaser of that milk. The term includes a farmers' cooperative with respect to all its sales of milk except milk processed by or for it in a milk receiving or processing plant owned, leased or contracted for by it.

NOTE: This order does not prohibit the payment of patronage dividends by a farmers' cooperative in accordance with the provisions of Supplementary Order 84 issued by the Office of Price Administration.

10. Section 11 (h) is rewritten to read as follows: "New Producer" means a producer as defined above, except that he did not sell milk in January 1943, and/or September 1944, to whom no "purchaser" has obtained an order establishing a maximum buyer's price under Section 13 (d) (2) of this order.

11. Section 11 (j) is deleted.

12. Section 11 (k) is deleted.

13. Section 11 (m) shall be redesignated section 11 (j) and section 11 (l) shall be redesignated section 11 (k).

14. Section 13 is rewritten to read as follows:

Sec. 13. *Maximum prices.* (a) The following provisions, in conjunction with the tables set forth in sections 17, 18 and 19 (sections 17 and 18 of Order G-16) and regional orders issued hereunder, establish maximum prices for all purchasers covered by this Part II.

(b) Pricing method applicable to purchases from a "producer" who sold milk during January 1943.

(1) The maximum price which a purchaser may pay to any producer from whom he purchased milk in January 1943, shall be the highest of the following:

(i) The maximum price, subject to the applicable butterfat differential, set forth in section 17 for the county, city or town in which the purchaser has his bottling plant if such county, city or town is listed in the table in that Section; or if it is not listed,

(ii) The maximum price, subject to the applicable butterfat differential, set forth in section 18 (except in Order

G-16<sup>1</sup>) as corresponding with a figure which he shall select in accordance with the following rules:

(a) His retail home-delivered price for approved fluid milk sold in quart containers, if he has any such price established as of August 31, 1944, in the market where he has the bottling plant at which he receives the milk to be priced; or if he himself had no such price established, then

(b) The retail home-delivered price as of August 31, 1944, for such milk so sold, established by and common to the numerical majority of those purchasers who have established such a price in the county or (if the prices there are different) in the city or town in that county in which he has the bottling plant at which he receives the milk to be priced; or at the purchaser's option.

(iii) The highest price paid by the purchaser himself to that producer for milk of the same grade and butterfat content during January 1943, or the maximum price, subject to the applicable butterfat differential, named for such purchaser as payable to the particular producer under the provisions of a regional adjustment order.

Provided, That every purchaser who bought milk from a particular producer in January 1943, may on any particular purchase from that producer pay the highest maximum price any other purchaser might have paid on that purchase. This proviso applies only where two or more purchasers received milk from the same producer in January 1943, at different prices.

(2) The maximum price which a purchaser may pay for milk to a particular producer who sold his milk to another purchaser (or purchasers) during January 1943, shall be the highest price for milk of the same grade and butterfat content which any such other purchaser (or purchasers) is now permitted to pay that particular producer. For the purposes of this section 13 (b) (2), "Purchaser" means any purchaser of milk whose bottling plant is located in Region IV of the Office of Price Administration (Alabama, Florida, Georgia, Mississippi, South Carolina, North Carolina, Tennessee and Virginia).

(c) Pricing method applicable to purchases from a "Producer" who sold milk during September 1944, but not during January 1943.

(1) The maximum price which a purchaser may pay to a producer from whom he purchased milk in September 1944, but who did not sell milk to any purchaser in January 1943, for milk used in a bottling plant located in any county, city or town listed in the table in section 17 shall be the maximum price fixed for such county, city or town in the table in section 17 opposite the name of the county, city or town where the purchaser's bottling plant is located, subject to the applicable "butterfat differential", or the maximum price established in any regional order applicable to purchases from that producer, whichever is higher.

<sup>1</sup> All counties in Florida are named in section 17 of Order G-16.

*Provided*, That any purchaser who in September 1944, bought milk from a producer who did not sell milk in January 1943, may on any particular purchase from that producer pay the highest maximum price any other such purchaser might have paid on that purchase.

(2) The maximum price which a purchaser may pay to such a producer for milk for use in a bottling plant in any county, city or town in the state covered by this order which is not named in the table in section 17 shall be the price, subject to the applicable butterfat differential, set forth in the table in section 18 (except in Order G-16<sup>1</sup>) opposite the retail home-delivered price established as of August 31, 1944, for approved fluid milk sold in quart glass containers in the market where the purchaser's plant is located, determined in accordance with the rules set forth in section 13 (b) (1) (ii) of this order, or the maximum price established in a regional order applicable to purchases from such producer, whichever is higher.

*Provided*, That any purchaser who in September, 1944, bought milk from a producer who did not sell milk in January, 1943, may on any particular purchase from that producer pay the highest maximum price any other such purchaser might have paid on that purchase.

(3) The maximum price which a purchaser may pay to such a producer who sold milk to another purchaser (or purchasers) in September, 1944, shall be the maximum price for purchases from that producer established for the purchaser or purchasers who bought from that producer in September, 1944. For the purposes of this section 13 (c) (3), "purchaser" means any purchaser whose bottling plant is located in Region IV of the Office of Price Administration (Alabama, Florida, Georgia, Mississippi, North Carolina, South Carolina, Tennessee and Virginia).

(d) Pricing method applicable to purchases from a producer who sold milk neither during January 1943, nor September 1944.

(1) The maximum price which any purchaser may pay to a producer who has sold and delivered milk to a purchaser for whom a maximum price, payable to such producer, has been established by a regional order issued under section 13 (d) (2) of this order, is the maximum price set forth in such purchaser order.

(2) The maximum price which a purchaser may pay to a "new producer" shall be the maximum price authorized by the Regional Administrator, Region IV of the Office of Price Administration upon application by the prospective purchaser. This application shall be filed in duplicate and shall contain all the facts which are required by Revised Form RO-IV-5-ASF-42, including a statement of the requested maximum price. The applicant must also furnish any additional information required by the Office of Price Administration.

<sup>1</sup> All counties in Florida are named in section 17 of Order G-16.

For the purposes of this section, the requested maximum price shall be deemed to have been authorized thirty days after the mailing of the application (or any requested additional information, amended application, or change in application), unless within that time the Regional Office has disapproved the proposed maximum price.

**NOTE:** The applicant should remember to allow sufficient time after the expiration of the 30-day period to permit notification by mail to reach him before he assumes that no action has been taken by the Regional Office during such period.

(3) The maximum prices approved, authorized, or proposed under any of the preceding subparagraphs of this paragraph remain subject to disapproval or revision by the Regional Administrator, Region IV, at any time.

(e) *New purchasers.* A new purchaser who was not engaged in the business of purchasing milk during January 1943, and subsequently engaged in such business without purchasing an existing business or establishment shall determine his maximum price to producers except new producers in accordance with the provisions of section 13 (b), (c) or (d) (1), whichever is applicable. Regional or district offices of the Office of Price Administration will assist such purchaser in ascertaining the correct maximum price. If such a purchaser desires to purchase milk from a "new producer", his maximum price shall be determined upon application in accordance with the provisions of section 13 (d) (2).

(f) *Butterfat standards.* (1) Any purchaser whose maximum price to an individual producer has been established without reference to a butterfat test shall employ such maximum price to that producer as if it referred to 4 percent milk, if and when a butterfat test is instituted. Any purchaser whose maximum price to an individual producer has been established on a butterfat base standard other than 4 percent shall employ such maximum base price in purchasing milk testing 4 percent. This maximum price may be increased 5¢ per cwt. for each  $\frac{1}{10}$  of 1 percent by which the butterfat content exceeds 4 percent, and this maximum price must be reduced by 5¢ per cwt. for each  $\frac{1}{10}$  of 1 percent by which the butterfat content is lower than 4 percent. Any purchaser who purchased milk from a producer without reference to a butterfat test during January 1943, and continues to do so, may pay such producer a maximum price which is the higher of the following: (1) The maximum price so established to such producer in January 1943; or (2) The maximum price per cwt. or per gallon established by section 13 for purchases of milk from such producer on a 4 percent butterfat basis.

(2) No purchaser may pay a maximum price for milk to a particular producer in terms of the pound of butterfat in such milk unless that purchaser, or another purchaser, purchased milk from that producer according to the pound of

butterfat in January, 1943, and/or September, 1944.

*Provided*, That a purchaser who paid for milk according to the pound of butterfat in January, 1943, and/or September, 1944, may propose a price per pound of butterfat in an application to be filed pursuant to section 13 (d).

*Provided, further*, That a purchaser who paid his producers according to the pound of butterfat in January, 1943, may adopt the maximum price per cwt. or per gallon of milk at 4 per cent butterfat content, with the applicable butterfat differential established for purchases from those producers under the provisions of section 13.

(g) *Changes in place of delivery.* The maximum f. o. b. bottling plant price of a purchaser who buys from a producer to whom another purchaser has a maximum price but for delivery at a bottling plant located elsewhere, is the maximum price which such other purchaser may pay f. o. b. that bottling plant.

15. A new section is added to Part II which shall read as follows:

**Sec. 13a. Adjustments.** The Regional Administrator may adjust or act upon applications for the adjustment of maximum prices established pursuant to this Part II only in accordance with the authority set forth in § 1351.408 of Maximum Price Regulation 329 as amended. Applications for adjustment of maximum prices payable to producers shall be filed in accordance with the provisions of Revised Procedural Regulation 1.

This amendment shall become effective June 15, 1945.
