Part 11 is hereby amended to read as follows:

Preliminary statement. The Bureau of Mines is prepared, at its Pittsburgh Experiment Station, to conduct tests to establish a list of permissible self-contained breathing apparatus for use in irrespirable and poisonous gases. This schedule of tests is for the information of those who may desire to have such apparatus tested.

The authority for conducting such tests and investigations is contained in the act of February 25, 1913 (37 Stat. 681), as amended June 30, 1932 (47 Stat. 410), and in Executive Order No. 6611, February 22, 1934 (30 U.S.C. secs. 3, 5, 7).

AUTHORITY: §§ 11.1 to 11.14, inclusive, issued under 37 Stat. 681, as amended by 47 Stat. 410, and Executive Order 6611, February 22, 1934, 30 U.S.C. secs. 3, 5, 7.

§ 11.1 *Definition of "permissible"*. The Bureau of Mines considers a self-contained breathing apparatus to be permissible for use in irrespirable and poisonous gases if all the details of construction and materials are the same in all respects as those of a self-contained breathing apparatus that has passed the tests for safety, practicability, and efficiency in accordance with standards established by the Bureau and hereinafter described.

§ 11.2 *Conditions under which self-contained breathing apparatus will be tested.* The conditions under which the Bureau of Mines will examine and test self-contained breathing apparatus to establish their permissibility are as follows:

(a) Applications for inspection, examination, and test shall be made in duplicate to the Director, Bureau of Mines, Washington 25, D. C., and shall be accompanied by a complete written description of the apparatus and a set of drawings, both in duplicate, showing full details of construction of the apparatus. If an apparatus is of a type that operates

with a regenerator, the application also should be accompanied by a complete written description of the regenerator and a set of drawings showing full details of its construction, all in duplicate. The application shall state, among other things, whether the apparatus is ready to be marketed.

(b) The examination, inspection, and test shall be made at the Experiment Station of the Bureau of Mines at Pittsburgh, Pennsylvania.

(c) The applicant submitting the self-contained breathing apparatus for inspection, examination, and test will be required to provide two sets of apparatus, prepaid to the Engineer in Charge of Breathing-Apparatus Testing, Bureau of Mines, 4800 Forbes Street, Pittsburgh, Pennsylvania. If the apparatus successfully passes all the tests and requirements hereinafter specified, one set of apparatus will be retained by the Bureau of Mines as a laboratory exhibit and the other set will be returned to the owner. If the apparatus does not pass all of the Bureau's tests or requirements, both sets of apparatus will be returned to the owner.

(d) Each self-contained breathing apparatus submitted for tests shall have marked on it in a distinct manner the name and address of the manufacturer and the name, letter, or number by which the apparatus is designated for trade purposes.

(e) (1) For tests of self-contained oxygen breathing apparatus utilizing a supply of compressed gaseous oxygen, the oxygen will be supplied by the Bureau of Mines and will be of the purity specified in contracts by the Bureau for use in its own self-contained breathing apparatus, namely, at least 98 percent oxygen and the remainder nitrogen. The applicant shall supply such regenerators or regenerating materials as are necessary to operate the apparatus during the tests as hereinafter described.

(2) For tests of self-contained breathing apparatus utilizing a supply of compressed air, the applicant shall supply the compressed air (in suitable containers) necessary in making the hereafter desired tests. The compressed air shall not contain any amount of gaseous, liquid, or solid substance that is harmful to a wearer of the apparatus under any condition of use. The applicant shall give to the Bureau's engineer in charge of breathing-apparatus testing a written statement setting forth the method used to compress the air and the controls used to prevent contamination of the compressed air by any gaseous, liquid, or solid substance that is harmful to a human being.

(3) For tests of self-contained breathing apparatus utilizing a supply of oxygen that is generated by a chemical reaction when using the apparatus, the applicant shall supply the oxygen-generating chemicals (in suitable containers) in amounts necessary to conduct the hereafter described tests. The oxygen shall not contain any amount of gaseous, liquid, or solid substance that is harmful to a wearer of the apparatus under any condition of use. The applicant shall give to the Bureau's engineer in charge of breathing-apparatus testing a

written statement setting forth the method by which the oxygen is generated and the chemical reaction involved for this purpose during the use of the apparatus. Furthermore, this statement shall set forth how the chemicals in the oxygen generator have been manufactured so as to prevent contamination of the oxygen by any gaseous, liquid, or solid substance in amounts or proportions harmful to a human being.

(f) On receipt of the self-contained breathing apparatus for which application has been made for examination, inspection, or test, the engineer in charge of breathing-apparatus testing will advise the applicant whether the apparatus meets the requirements of this schedule and whether additional spare parts are necessary to facilitate the making of a proper test for the apparatus. The applicant will be required to provide additional parts, if needed, and also to alter the apparatus, if necessary.

(g) No self-contained breathing apparatus will be tested unless it is in the complete form in which it is to be placed on the market.

(h) Only the Bureau of Mines engineer in charge of breathing-apparatus testing, his assistants, and one representative of the applicant shall be permitted to be present during the test.

(i) The test shall be conducted under the direction of the Bureau's engineer in charge of breathing-apparatus testing.

(j) As soon as possible after the formal application for the test and the apparatus to be tested have been received, the applicant will be notified of the date on which the test will begin and if any additional material is required.

(k) The tests will be made in the order of receipt of application for test, if the necessary apparatus and material are provided at the proper time.

(l) Details of the results of the tests shall be regarded as confidential by all present at the tests and shall not be made public in any way before an official announcement is made by the Bureau of Mines.

(m) The results of tests of breathing apparatus that fail to pass the requirements shall be kept confidential, except that the person who provides the apparatus will be informed of defects with a view to their correction for subsequent tests, if desired, but such changes will not be permitted while the tests are being conducted.

(n) Tests of breathing apparatus will be made for manufacturers or accredited agents of manufacturers and for inventors.

(o) A list of permissible self-contained breathing apparatus and data on tests of such equipment will be made public from time to time by the Bureau of Mines.

§ 11.3 *General requirements of self-contained breathing apparatus.* To receive approval of the Bureau of Mines for any type of self-contained breathing apparatus described under A, B, C, or D in the following schedule, the apparatus must comply with the requirements specified.

A, ½-hour; B, ¾-hour; C, 1-hour; or D, 2-hour self-contained breathing

apparatus must pass satisfactorily each of the 15 tests hereinafter specified. The Bureau of Mines considers that the A, ½-hour and the B, ¾-hour self-contained breathing apparatus are suitable for mine rescue and recovery work as auxiliary equipment only.

(a) The amount of oxygen or air supplied by the apparatus must meet the needs of the wearer at all times.

(b) The apparatus shall be free from mechanical obstructions so that the wearer can breathe freely at all times.

(c) The temperature of the inspired air must not exceed 110° F. when the temperature of the external air does not exceed 85° F. A much lower temperature than 110° for the inspired air is desirable.

(d) The apparatus shall be durable in construction and all vital parts must be so protected as to prevent damage or excessive wear to the apparatus during the tests to which it will be subjected.

(e) (1) For an apparatus that recirculates the expired air, utilizes a supply of compressed oxygen or compressed air, and is equipped with a separate regenerator, the regenerating material shall absorb carbon dioxide from the expired air to the extent that no more than 2½ percent shall be present in the inspired air at any time. The average carbon-dioxide content shall not exceed 1 percent for the duration of the test, determined by analyses of air samples taken as close to the point of inspiration as is practicable, and at uniform intervals of time.

(2) For an oxygen-generating apparatus in which the expired air is recirculated, and wherein a chemical change is effected so that carbon dioxide is absorbed concurrently with oxygen generation within the oxygen generator, the absorbent shall absorb carbon dioxide from the expired air to the extent that no more than 2½ percent shall be present in the inspired air at any time. The average carbon-dioxide content shall not exceed 1 percent for the duration of the test, determined by analyses of air samples taken as close to the point of inspiration as is practicable and at uniform intervals of time.

(f) All parts of a self-contained breathing apparatus, including the source of the breathed atmosphere, shall be carried on the body of the wearer.

§ 11.4 *Construction.* (a) When worn in irrespirable air, the apparatus shall, without recharging, meet the needs of the wearer for not less than the period for which it has been designed. Preferably, it shall not weigh more than 36 pounds complete when fully charged, and no apparatus weighing more than 40 pounds, complete and fully charged, will be accepted for test.

(1) Apparatus designed for use with a mouth-breathing device, when properly adjusted to the face of the wearer, shall have a capacity of not more than 250 cubic centimeters of dead space inside the mouth-breathing device, exclusive of tubes or connections attached thereto.

(2) Apparatus designed to be worn with a facepiece, when properly adjusted to the face of the wearer, shall have a capacity of not more than 400 cubic centimeters of dead space inside the face

attachment exclusive of tubes or connections attached thereto.

(b) The mechanical construction of the apparatus shall be such that every part can be tested, inspected and repaired by persons that are skilled in such work, and all parts that require sterilizing shall be readily accessible for this purpose.

(c) All parts of the apparatus subject to or liable to be subjected to pressures in excess of 5 pounds per square inch shall be so constructed and equipped with safety devices that the safety of the wearer shall be assured, as determined by the 15 tests hereinafter described.

(d) In apparatus equipped with breathing bag or bags, or their equivalent, the inhalation and exhalation compartments shall have a combined capacity of at least 8 liters. If a single breathing bag is used it shall have a capacity of at least 5 liters.

(e) In apparatus equipped with a breathing bag that is used in conjunction with the operation of an oxygen or air admission valve, the bag shall have a capacity of at least 3 liters of air after the admission valve is closed. After 3 liters of air are introduced into the breathing bag, the water-gage pressure shall not exceed 3 inches.

(f) All parts enclosing the breathed atmosphere of a self-contained breathing apparatus shall consist of material that will exclude gases external to the apparatus and be impervious to gasoline fumes for at least a 2½-hour period; the material shall be of good strength and flexible, and the joints or seams shall either be cemented and sewed or vulcanized or bound in such manner that the part or parts will not come apart at the joints or seams when the apparatus is used; such parts may be made of one piece without joints or seams.

(g) The apparatus shall not have in its circulatory system any zone of constant negative pressure, or a positive pressure at the mouthpiece or facepiece of more than 3 inches water gage after a 2½-liter exhalation.

(h) A self-contained breathing apparatus in which the expired air is recirculated shall be provided with a release valve that is operated manually or automatically and is placed at some point in the circulatory system of the apparatus. The function of this valve shall be to permit the escape to the outside atmosphere of a part of the air in the circulatory system of the apparatus. The valve shall be so designed that air from the outside atmosphere cannot be drawn into the apparatus on inhalation.

(i) When apparatus is equipped with high pressure gas containers, the applicant having the apparatus tested by the Bureau of Mines shall furnish therewith a certificate of test issued by the Interstate Commerce Commission under specifications No. 3-A or equivalent specifications or shall give evidence satisfactory to the Bureau's engineer in charge of breathing-apparatus testing that such high-pressure gas containers have been tested in accordance with Interstate Commerce Commission specifications No. 3-A or equivalent specifications.

(j) When an apparatus is equipped with high-pressure gas containers, the safety cap attached to the closing valve, in addition to the usual copper disk provided, shall be filled with a metal (such as Rose's metal) fusing at a temperature of approximately 94° C. Such fusible metal shall not be forced from the safety cap by a pressure of less than 150 atmospheres.

(k) The closing valve of the high-pressure gas containers shall be provided with a device to prevent the wearer of the apparatus from screwing the stem entirely out of the valve. The closing valve shall also be provided with a device to enable the wearer to lock the valve stem open when the valve has been opened to the desired point. The valve-closing device shall be operable by hand without use of wrenches or external levers.

(l) When an apparatus is equipped with a gage for recording time or pressure of compressed-oxygen or compressed-air supply, such a gage will be tested for accuracy of calibration by the Bureau of Mines. A variation of 3 atmospheres (approximately 45 pounds per square inch) will be allowed in comparison with the pressure shown by the Bureau of Mines standard pressure gage.

(m) (1) Apparatus having a separate pressure-gage connection shall be equipped with a valve to shut off the compressed-oxygen or compressed-air supply from the gage. The gage-connection valve shall be so placed that it can be manipulated readily by the wearer's hand without interfering with the flow of compressed oxygen or compressed air from the high-pressure gas container to the circulatory system of the apparatus.

(2) An oxygen-generating, self-contained breathing apparatus shall be equipped with a timing device that will indicate accurately the number of minutes a person may continue to wear the apparatus with safety.

(n) Any pressure gage or a timing device shall be so located that it can be read easily by the wearer.

(o) Apparatus equipped with a reducing valve giving a constant or automatic flow of oxygen or air shall be provided with a bypass valve that will permit a free flow of compressed oxygen or compressed air from the high-pressure gas container to the circulatory system of the apparatus independent of the reducing valve.

(p) When the compressed-oxygen or compressed-air supply of the apparatus is controlled by automatic devices, such devices shall adjust themselves readily to the needs of the wearer.

(q) Apparatus equipped with a mouth-breathing device shall be provided with an adequate saliva trap so designed that during the operation of the saliva trap no surrounding atmosphere can be drawn into the apparatus during inhalation. The adequacy of the saliva trap will be determined by the tests to which the apparatus will be subjected.

(r) Apparatus equipped with a mouth-breathing attachment shall be provided with a suitable nose clip properly attached to the apparatus. The suitability of the nose clip will be determined by

the tests to which the apparatus will be subjected.

(s) Apparatus equipped with a facepiece shall meet the following requirements:

(1) The facepiece shall be so constructed as to assure a quick, gas-tight fit on persons of widely varying facial shapes and sizes.

(2) The eyepieces shall be of non-shatter type and so located as to provide a satisfactory field of vision for persons of widely varying facial shapes and sizes. Air or oxygen shall enter the facepiece in a manner that will prevent the accumulation of moisture on the eyepieces.

(3) A facepiece shall be provided with elastic headbands that are adjustable and replaceable.

(4) If a facepiece is equipped with an exhalation valve, the valve shall be guarded to prevent distortion and injury.

§ 11.5 Character and general description of tests. After the self-contained breathing apparatus to be tested for permissibility has been thoroughly inspected for adequacy of its mechanical principles, a series of 15 working tests, each for a period of time according to the type of the apparatus (A, B, C, or D) to be tested, will be made. At the beginning of the series of tests, if a high-pressure gas container is used on the apparatus, it shall first be charged with oxygen or air to a pressure of 10 atmospheres (approximately 150 pounds per square inch) and the oxygen or air permitted to escape into the atmosphere. Any high-pressure gas container used in the tests shall be fully charged at the beginning of each test at a pressure prescribed by the manufacturer of the apparatus.

If an apparatus using compressed oxygen or compressed air is equipped with one or more breathing bags, the breathing bag or bags shall be deflated at the beginning of each test to expel any contained nitrogen.

A single test must be continuous, without removal of the apparatus from the wearer during the test.

Samples of air will be obtained from the apparatus on the inhalation side of the circulatory system and as close to the mouthpiece or the face attachment as possible. The first sample will be taken from the source of supply to be used and just before the beginning of the test. The second sample will be taken immediately after the apparatus has been adjusted to the wearer and compressed oxygen or compressed air has been turned on. Samples will be taken every 10, 15, 20, or 30 minutes thereafter for ½-hour (A) types, ¾-hour (B) types, 1-hour (C) types, and 2-hour (D) types, respectively, during each ½ hour thereafter during the test. The physiological effects of the apparatus on the wearer will be noted in each test; they include the comfort of the wearer, ease of breathing, and lack of interference with normal body functioning as determined by questioning the wearer of the apparatus during and after testing.

Not more than one test of 2 hours' duration will be made on any one day. The tests will be completed within 60 days from date of beginning, unless con-

ditions that are beyond the control of the engineer in charge of the tests prevent.

All tests of apparatus will be conducted in a specially equipped gallery filled with an irrespirable atmosphere, at the Pittsburgh Experiment Station of the Bureau of Mines.

Before beginning each test, the apparatus shall be examined and tested to make certain that no leakage is present under working conditions.

The apparatus under test will be worn during each and all of the periods of the 15 tests by the Bureau of Mines engineer in charge of the testing or by one or more of his assistants. Immediately before participation in any of these tests the prospective wearer of the apparatus being tested shall pass in a satisfactory manner a physical examination by a qualified physician. If it is impossible to complete any one of these tests solely because of the poor physical condition of the wearer, when such condition has been brought about through no fault of the apparatus being tested, such test shall be disregarded and the apparatus shall not be penalized or disqualified thereby.

At the conclusion of each test a note shall be made by the engineer in charge of breathing-apparatus testing of the general physical condition of the wearer and of the apparatus and of the amount of compressed oxygen or compressed air, if any, remaining in the container. The schedule of work to be performed by the wearer of the apparatus in each of the 15 working tests is as stated in § 11.6.

The wearer will remain as far as possible in a sitting posture throughout the test and perform no work. He will be allowed to manipulate the devices controlling the compressed-oxygen or compressed-air supply to conserve such compressed-oxygen or compressed-air supply to the greatest advantage.

At the end of each air-sampling period 2 minutes shall be allowed for taking air samples and temperature readings.

§ 11.7 *Preliminary test or inspection of breathing apparatus.* Self-contained breathing apparatus in course of development may be submitted by manufacturers and inventors for preliminary test or inspection to ascertain defective construction or misapplication of safety principles. The nature of such tests or inspection will be determined by the Bureau's engineer in charge of testing such apparatus.

§ 11.8 *Approval plates for permissible self-contained breathing apparatus.* Manufacturers of types of self-contained breathing apparatus that have passed the test of the Bureau which they wish to market as permissible will be required to attach to each such apparatus a plate containing the following inscription:

Permissible Breathing Apparatus United States Bureau of Mines Approval No.

If the plate is not used, the same inscription may be stamped or cast into the metal of the apparatus.

§ 11.9 *Notification to manufacturer.* As soon as the testing engineer of the Bureau of Mines is satisfied that a self-contained breathing apparatus has passed in a satisfactory manner all the tests herein set forth the manufacturer or inventor shall be formally notified to that effect.

When two or more applications for tests on different apparatus are received within a period of 10 days, the announcement of approval for each shall not exceed the interval of time between the receipt of the applications.

When a manufacturer or inventor receives this formal notification he shall be free to advertise this type of successfully tested self-contained breathing apparatus as "permissible" and to use the approval inscription described in § 11.8.

§ 11.10 *Scope of approval.* The listing by the Bureau of Mines of any self-contained breathing apparatus as permissible shall be construed as applying only to apparatus of that specific type, class form, and rating, made by the same manufacturer, and having the same construction in all details directly or indirectly affecting the safety features of the apparatus.

Manufacturers shall, before claiming the Bureau's approval for any modification of a permissible self-contained breathing apparatus, submit to the Bureau drawings or parts that shall show the extent and nature of such modifications, that the Bureau may decide whether test of the remodeled apparatus will be necessary for approval. If it is decided by the Bureau that testing of the remodeled apparatus is necessary, the word "permissible" shall not be used on the remodeled apparatus until it has again passed the complete schedule of tests or such part of these tests as the Bureau's engineer in charge of breathing-apparatus testing considers necessary.

§ 11.11 *Withdrawal of approval.* The Bureau reserves the right to rescind for cause, at any time, any approval granted under the conditions herein set forth. Cause for rescinding approval shall be the use of the issuance of approval by the Bureau in an unauthorized manner, as placing the approval stamp on apparatus that has not been approved by the Bureau, or on apparatus certain parts of which have been altered in construction or material without submittal to the Bureau for test or approval; failure of the apparatus or any part or parts to safeguard wearers may also be cause for withdrawal of approval.

§ 11.12 *Approval of regenerators for breathing apparatus.* The Bureau will, on application, make separate tests, identical with the foregoing tests, of regenerators manufactured for use with any breathing apparatus that has been approved by the Bureau under the provisions of this schedule.

Regenerators that fulfill the requirements of the foregoing tests will be approved for use only with that particular type of apparatus for which they are designed and that has previously received the approval of the Bureau.

§ 11.13 *Fees for testing self-contained breathing apparatus.* Careful consideration has been given to the entire cost of the services rendered in testing self-contained breathing apparatus at the Pittsburgh Experiment Station of the Bureau. The following schedule of fees to cover expenses to be charged has been established and approved by the Secretary of the Interior, in accordance with the provisions of the statute previously quoted:

	Apparatus with separate regenerator	Oxygen-generating apparatus	Demand-type apparatus

Extension of approval on any type apparatus will depend on number of changes made and amount of work involved in making necessary tests.

The fees specified may be increased to cover the cost of testing an unusually complicated type of self-contained breathing apparatus, and are also subject to change when recommended by the Director of the Bureau of Mines and approved by the Secretary of the Interior.

§ 11.14 *Procedure to be followed in making application for tests, submitting material, conducting tests, and notifying applicants of results.* (a) Application for tests should be addressed to the Director of the Bureau of Mines, Washington 25, D. C. This application shall be accompanied by check or draft (see foregoing schedule of fees) made payable to the Treasurer of the United States; it shall also be accompanied by a complete written description of the self-contained breathing apparatus to be tested, and a set of the drawings as specified in § 11.2 (a), marked "Drawings of Approved Self-Contained Breathing Apparatus To Be Filed." Duplicate copies of the application and drawings should be sent to the "Engineer in Charge of Testing Self-Contained Breathing Apparatus, Bureau of Mines, Pittsburgh, Pa."

(b) As soon as the application is received by the Bureau's engineer in charge of breathing-apparatus testing, the applicant will be notified of the date when the tests will begin.

(c) After the applicant has received this notification, he should send the material required to the "Engineer in Charge of Breathing Apparatus Testing, Bureau of Mines, Pittsburgh, Pa." This material should be delivered not less than 1 week in advance of the date set for the beginning of the tests.

(d) The tests will begin on the date set and continued until the self-contained breathing apparatus has been approved, rejected, or withdrawn.

(e) After the Bureau's testing engineers have considered the results of the tests, a formal report will be made to the applicant in writing by the Director of the Bureau of Mines as to whether the self-contained breathing apparatus has been approved. The details of the tests will be regarded as confidential by all present.

R. R. SAYERS,
Director.

It includes shipments into a free port, free zone, or bonded custody of the United States Bureau of Customs (bonded warehouse) in the continental United States and shipments into the continental United States for processing or manufacture in bond for exportation.

It does not include shipments in transit in bond through the continental United States without processing or manufacture, to Canada, Mexico or any other foreign country, or shipments through a free port or free zone to a foreign country without processing or manufacture.

(5) [Deleted Mar. 1, 1946.]

(6) Material shall be deemed "in transit" if it is afloat, if an on board ocean bill of lading has actually been issued with respect to it, or if it has actually been delivered to and accepted by a rail, truck, or air carrier, for transportation to a point within the continental United States.

The foregoing restrictions shall apply to the importation of any material subject to the order regardless of the existence on the governing date or thereafter of any contract or other arrangement for the importation of such material. The materials subject to this order are those listed from time to time upon Lists A attached hereto.

(2) Authorization by Civilian Production Administration. Any person desiring such authorization, whether owner, purchaser, seller, or consignee of the material to be imported, or agent of any of them, shall make application therefor in duplicate on Form CPA-1041 addressed to the Civilian Production Administration Ref: M-63, Washington 25, D. C. Unless otherwise expressly permitted, such authorization shall apply only to the particular material and shipment mentioned therein and to the persons and their agents concerned with such shipment; it shall not be assignable or transferable either in whole or in part.

(3) Restrictions on financing of imports. No bank or other person shall participate, by financing or otherwise, in any arrangement which such bank or person knows or has reason to know involves the importation after the governing date of any material subject to this order, unless such bank or person either has received a copy of the authorization issued by the Civilian Production Administration under the provisions of paragraph (2) or is satisfied from known

facts that the proposed transaction comes within the exceptions set forth in paragraph (b) (4).

(4) *Exceptions.* Unless otherwise directed by the Civilian Production Administration, the restrictions set forth in this paragraph (b) shall not apply:

(i) To the Reconstruction Finance Corporation, U. S. Commercial Company, Commodity Credit Corporation, or any other United States governmental department, agency, or corporation, or any agent acting for any such department, agency or corporation; or

(ii) To any material of which any United States governmental department, agency, or corporation is the owner at the time of importation, or to any material which the owner at the time of importation had purchased or otherwise acquired from any United States governmental department, agency, or corporation; or

(iii) To any material which on the governing date was in transit to a point within the continental United States.

(viii) To manufactured materials which are imported in bond solely for the purpose of having them repaired and then returned to the owner outside the continental United States; or

(ix) To materials which were grown, produced, or manufactured in the continental United States, and which were shipped outside the continental United States on consignment or pursuant to a contract of purchase, and which are now returned as rejected by the prospective purchaser; or

(x) [Deleted July 16, 1946.]

(xi) [Deleted July 1, 1946.]

(c) [Deleted June 4, 1945.]

(d) [Deleted June 4, 1945.]

(e) *Restrictions on distribution of List A materials.* Unless otherwise provided by the terms of the authorization issued pursuant to paragraph (b) (2), any material on List A which is imported in accordance with the provisions of this order after the governing date, may be sold, delivered, processed, consumed, purchased, or received without restriction under this order, but all such transactions shall be subject to all applicable provisions of the regulations of the Civilian Production Administration and to all orders and directions of the Civilian Production Administration which now or hereafter may be in effect with respect to such material.

(f) *Reports*—(1) *Reports on customs entry.* No material which is imported

[as defined in paragraph (a) (4)] after the governing date, including materials imported by or for the account of the Reconstruction Finance Corporation, U. S. Commercial Company, Commodity Credit Corporation or any other United States governmental department, agency or corporation, shall be entered through the United States Bureau of Customs for any purpose, unless the person making the entry shall file with the entry Form CPA-1040 in duplicate. The filing of such form a second time shall not be required upon any subsequent entry of such material through the United States Bureau of Customs for any purpose; nor shall the filing of such form be required upon the withdrawal of any material from bonded custody of the United States Bureau of Customs, regardless of the date when such material was first transported into the continental United States. Both copies of such form shall be transmitted by the Collector of Customs to the Civilian Production Administration, Imports Division, Ref.: M-63, Washington 25, D. C.

(2) *Other reports.* All persons having any interest in, or taking any action with respect to, any material imported after the governing date, whether as owner, agent, consignee, or otherwise, shall file such other reports as may be required from time to time by the Civilian Production Administration.

(3) *Exceptions.* The provisions of this paragraph (f) shall not apply to materials imported and consigned as gifts for personal use by or to members of the Armed Services of the United States.

(g) *Routing of communications.* All communications concerning this order shall, unless otherwise herein directed be addressed to: Civilian Production Administration, Washington 25, D. C. Ref.: M-63.

(h) *Violations.* Any person who wilfully violates any provision of this order, or who, in connection with this order, wilfully conceals a material fact or who furnishes false information to any department or agency of the United States is guilty of a crime, and upon conviction may be punished by fine or imprisonment. In addition, any such person may be prohibited from making or obtaining further deliveries of, or from processing or using material under priority assistance. In addition, the Civilian Production Administration may direct the disposition and use of any material which is imported without authorization as required by paragraph (b).

(i) *Applicability of priorities regulations.* This order and all transactions affected thereby are subject to all applicable provisions of the priorities regulations of the Civilian Production Administration as amended from time to time.

(j) *Effect on liability of removal of material from order.* The removal of any material from the order shall not be construed to affect in any way any liability for violation of the order which

accrued or was incurred prior to the date of removal.

INTERPRETATION 1: Revoked June 4, 1945.

INTERPRETATION 2

The following official interpretation is hereby issued by the Civilian Production Administration with respect to the meaning of the term "in transit" as defined in paragraph (a) (6) of General Imports Order M-63 (§ 1042.1) as amended.

By amendment dated December 17, 1942, the definition of material "in transit" was changed by adding the following clause, "or if it has actually been delivered to and accepted by a rail, truck, or air carrier for transportation to a point within the continental United States." The question has been raised as to the meaning of the term as applied to a case where the material on the governing date had been delivered to and accepted by a rail, truck, or air carrier on a through bill of lading for transportation to a specified port and from thence by boat to a point within the continental United States.

The material in the stated case is not deemed to be in transit within the meaning of the term as used in the order. If the material is to be carried to the port of arrival in the continental United States by ship the material must have been afloat, or on an board ocean bill of lading must have been issued with respect to it on the governing date in order for it to be considered as having been in transit on such date.

Material which has been delivered to and accepted by a rail, truck, or air carrier on the governing date for transportation to a point within the continental United States is deemed to be in transit within the meaning of the term as used in the order only when the transportation specified in the bill of lading issued by such carrier calls for delivery of the material at the port of arrival in the continental United States by rail, truck, or air carrier, not by ship. (Issued March 5, 1943.)

INTERPRETATION 3: Revoked June 4, 1945.

Chapter XXIII—War Assets Administration

[Special Order 17]

DISPOSAL OF AERONAUTICAL SPECIAL TOOLING IN GOVERNMENT-OWNED PLANTS

Surplus Property Board Special Order 17, August 17, 1945, entitled "Disposal of Special Tooling in Government-Owned Aircraft Plants" (10 F.R. 10398) is hereby revised and amended as hereinafter set forth as War Assets Administration Special Order 17. The title is amended to read as follows: "Disposal of Aeronautical Special Tooling in Government-Owned Plants".

Pursuant to the authority of the Surplus Property Act of 1944 (58 Stat. 765; 50 U.S.C. App. Sup. 1611), Pub. Law 181, 79th Cong., 1st Sess. (59 Stat. 533), E. O. 9689 (11 F.R. 1265), and Pub. Law 375, 79th Cong. 2d Sess., it is hereby ordered, that:

1. *Definitions*—(a) *Terms defined in act.* Terms not defined in paragraph (b) of this section which are defined in the Surplus Property Act of 1944 shall in this order be given the meaning assigned to them in the act.

(b) *Other terms.* (1) "Contract" includes subcontracts and subleases and "contractor" includes subcontractors and sublessees.

(2) "Facilities contract" means a lease, rental agreement or other contract or contract provision, specifically governing the acquisition, use, or disposition of Government-owned machinery, tools, building installations, or other property furnished to or acquired by a war contractor for any war production purpose except incorporation in end products.

(3) "Scrap" means property that has no reasonable prospect of sale except for its basic material content.

(4) "Special tooling" means equipment of such special design that it has apparent value only as scrap except in the manufacture of the particular product which such equipment was specifically designed to produce; it includes only jigs, dies, fixtures, gauges, moulds, and similar equipment and as used in this order is limited to such equipment as was designed for the manufacture of aircraft including its components and parts.

2. *Scope.* This order is issued under the authority of section 14 (a) of the act relating to contractor inventory. It applies only to Government-owned special tooling that is located in Government-

owned plants which are being operated by private contractors pursuant to facilities contracts.

3. *Owning agencies empowered to authorize retentions or disposals of special tooling.* The Administrator hereby empowers each owning agency to authorize any contractor with such agency or subcontractor thereunder that is in possession of any special tooling to retain or sell such property as provided in this order. Retentions or sales may be made hereunder at any time before the owning agency takes possession of special tooling. Nothing herein affects the authority of owning agencies to sell small lots, scrap, or salvage in accordance with other regulations or orders of the Administrator.

4. *Retentions by contractors for own use.* (a) Retentions of special tooling by contractors in possession shall be made by negotiated sale and at prices that are fair and reasonable taking into consideration its special value to the purchaser, acquisition cost to the Government, and replacement cost to the contractor, as well as any proceeds that might be expected to be obtained if the property were offered for sale at such time.

(b) There shall be obtained with each retention under this paragraph a written representation from the contractor that (1) he is acquiring the property for immediate or eventual use in his production; (2) that he is not retaining it for the purpose of reselling it directly or indirectly at a profit; and (3) that except for licenses granted to the Government, no third person is licensed to manufacture the product which such special tooling was specifically designed to produce; or that if such third persons have been so licensed that they have stated in writing that they do not wish to acquire the property on the same terms being offered to the contractor.

(c) In any case where special tooling is, in accordance with the terms of a facilities contract, in the possession of a subcontractor or sublessee, such subcontractor or sublessee shall for the purpose hereof be considered as the contractor in possession. If such subcontractor or sublessee shall state in writing that he does not desire to acquire the special tooling, the contractor holding the covering facilities contract may be permitted to retain the property under a negotiated sale as herein provided.

(d) Retentions of special tooling by a contractor not for his own use but for later resale shall be treated as sales and shall be governed by the requirements of the following paragraph.

5. *Sales by contractors.* All sales by contractors shall be made on the basis of competitive bidding through sealed bids or at auction at the discretion of the owning agencies and under rules and regulations prescribed by the owning agencies. Such rules and regulations shall contain, among other provisions, the following requirements:

(a) The determination of lots shall be subject to approval by the owning agency.

(b) The owning agency shall set an upset price on each lot at which figure the bidding on each lot shall be started.

(c) The right shall be reserved by the owning agency to reject all bids.

(d) Notice shall be given by publication to all possible interested purchasers indicating the special tooling that will be available for sale, naming a date not less than fourteen (14) days from the time of first publication when the bidding will be closed or when the auction will be held, and giving the upset price on each lot.

(e) If no acceptable bid to purchase is received and the property cannot be disposed of within a reasonable period of time on the terms stated in this paragraph, it may be sold by the contractor at the best price obtainable to any buyer who will use the property in the United States for manufacturing, maintenance or repair purposes. Sales prices shall be determined on a basis that is fair and reasonable, taking into consideration the limited sale value of the property, its special value, if any, to the purchaser, upset prices and any bids received. In connection with such sale there shall be obtained from the buyer a written representation that he intends to use the property and that he is not purchasing it for the purpose of reselling it at a profit.

6. *Assistance from disposal agencies.* The owning agency may request the advice and assistance of the appropriate disposal agency in setting upset prices and in determining acceptable sale prices. At the discretion of the owning agency, auctions and sales authorized hereunder may be combined with auctions and sales authorized under § 8306.7 of Surplus Property Administration Regulation 6,¹ and sales made hereunder shall be included in the statistical reports prepared by owning agencies pursuant to Order 2 to Surplus Property Administration Regulation 6.²

This order shall become effective July 17, 1946.

Administrator.

PART 8302—DISPOSAL OF SURPLUS PERSONAL PROPERTY TO PRIORITY CLAIMANTS

PURCHASES BY RECONSTRUCTION FINANCE CORPORATION FOR RESALE TO SMALL BUSINESS

Pursuant to the authority of the Surplus Property Act of 1944 (58 Stat. 765, 50 U. S. C. App. Sup. 1611), Public Law 181, 79th Congress, 1st Session (59 Stat. 533), Executive Order 9689 (11 F.R. 1265), and Public Law 375, 79th Congress, 2d Session, *It is hereby ordered, That:*

1. *Scope.* This order shall apply only within the continental United States to disposals by disposal agencies to the Reconstruction Finance Corporation of

¹ SPA Reg. 6 (10 F.R. 14521; 11 F.R. 1893).

² SPA Reg. 6, Order 2 (11 F.R. 5167).

³ 11 F.R. 5125, 6237, 6545.

surplus personal property* for resale to small business. It shall not apply to any disposal made directly by a disposal agency to small business purchasers, since provision has been made in other regulations² of the War Assets Administration to accord preference in the purchase of surplus property to small business purchasers dealing directly with disposal agencies.

2. *General policy.* The Reconstruction Finance Corporation, as successor to the Smaller War Plants Corporation, may acquire, subject to all applicable regulations of the War Assets Administration, any surplus personal property for resale to such purchasers as Reconstruction Finance Corporation determines to be small business, (and is empowered to acquire other property in exchange as partial or full payment therefor) when in its judgment such disposition is authorized under section 18 (e) of the Surplus Property Act of 1944, in order to preserve and strengthen the competitive position of small business or to assist the Corporation in the duties and responsibilities imposed upon it as the successor to the Smaller War Plants Corporation. Before making purchases for resale to small business, Reconstruction Finance Corporation shall give due consideration to such normal disposal procedures of the War Assets Administration as give preference to small business as compared with other commercial buyers in the purchase of surplus property.

3. *Written findings.* Each purchase order by Reconstruction Finance Corporation for resale purposes shall be based upon a written finding that the resale is necessary to preserve and strengthen the competitive position of small business or to assist the Corporation in the discharge of the duties and responsibilities imposed upon it by law as successor to the Smaller War Plants Corporation. Reconstruction Finance Corporation shall maintain records of the considerations underlying the approval of each application from small business.

4. *Purchases and payments to be made by Reconstruction Finance Corporation.* All purchases of surplus property from disposal agencies by Reconstruction Finance Corporation for small business shall be made by Reconstruction Finance Corporation in its own name, and payment therefor shall be made by Reconstruction Finance Corporation.

5. *Fair value.* Purchases by Reconstruction Finance Corporation shall be made at the fair value of the property pursuant to the provisions of § 8302.11.

This order shall become effective July 17, 1946.

PART 8314—DISPOSAL TO NONPROFIT INSTITUTIONS AND DISCOUNTS FOR EDUCATIONAL OR PUBLIC-HEALTH INSTITUTIONS OR INSTRUMENTALITIES

DISPOSAL OF HIGH VOLTAGE X-RAY MACHINES

There have been declared surplus several 1,000 KVP and 2,000 KVP industrial X-ray machines and component parts, the reported acquisition costs of which run from \$25,000 to \$35,000. The fair value for purposes of resale has been established at sixty (60) per cent of acquisition cost.

Various hospitals and universities have indicated interest in acquiring these machines for purposes of research and treatment, especially in the field of cancer.

The Administrator finds that the benefit which will accrue to the United States from the use of such machines by educational and public-health institutions or instrumentalities will justify disposal to them at a nominal price approximately sufficient to cover the costs of care, handling, and disposition, and further finds that such a nominal price should be three (3) per cent of the fair value of the machines.

Pursuant to the authority of the Surplus Property Act of 1944 (58 Stat. 765; 50 U. S. C. App. Sup. 1611), Public Law 181, 79th Congress, 1st Session (59 Stat. 533), Executive Order, 9689 (11 F. R. 1265), and Public Law 375, 79th Congress, 2d Session, *It is hereby ordered, That:*

1. "X-ray machines" as used herein means items under Code 34-6230 of the Standard Commodity Classification (May 1943) Volume I.

2. Notwithstanding the provisions of § 8314.9, War Assets Administration as a disposal agency, after offering 1,000 KVP and 2,000 KVP X-ray machines and component parts to priority claimants at fair value in accordance with the provisions of Part 8302,¹ is hereby authorized to sell such machines to educational or public-health institutions or instrumentalities as defined in § 8314.1, whose orders have been approved by the Federal Security Agency, at a price equivalent to three (3) per cent of the fair value thereof, f. o. b. location.

3. War Assets Administration shall give wide public notice of the availability of these machines and shall give priority claimants and educational and public-health institutions and instrumentalities an opportunity to make application for them. As between claimants of the same class the machines shall be disposed of to those who in the opinion of War Assets Administration can put them to the use most beneficial to the United States, and preference shall be given to their use for research, especially in the field of cancer. The War Assets Administration in determining what use is most beneficial to the United States shall seek the advice of the Federal Security Agency.

This order shall become effective July 17, 1946.

INDEBTEDNESS OF SERIES G-1947

OFFERING OF CERTIFICATES

JULY 17, 1946.

I. *Offering of certificates.* 1. The Secretary of the Treasury, pursuant to the authority of the Second Liberty Bond Act, as amended, invites subscriptions, at par, from the people of the United States for certificates of indebtedness of the United States, designated ¾ percent Treasury Certificates of Indebtedness of Series G-1947, in exchange for Treasury Certificates of Indebtedness of Series F-1946, maturing August 1, 1946. Approximately \$1,250,000,000 of the maturing certificates will be retired on cash redemption.

II. *Description of certificates.* 1. The certificates will be dated August 1, 1946, and will bear interest from that date at the rate of ¾ percent per annum, payable semiannually on February 1 and August 1, 1947. They will mature August 1, 1947, and will not be subject to call for redemption prior to maturity.

2. The income derived from the certificates shall be subject to all Federal taxes, now or hereafter imposed. The certificates shall be subject to estate, inheritance, gift or other excise taxes, whether Federal or State, but shall be exempt from all taxation now or hereafter imposed on the principal or interest thereof by any State, or any of the possessions of the United States, or by any local taxing authority.

3. The certificates will be acceptable to secure deposits of public moneys. They will not be acceptable in payment of taxes.

4. Bearer certificates with interest coupons attached will be issued in denomi-

nations of \$1,000, \$5,000, \$10,000, \$100,000 and \$1,000,000. The certificates will not be issued in registered form.

5. The certificates will be subject to the general regulations of the Treasury Department, now or hereafter prescribed, governing United States certificates.

III. *Subscription and allotment.* 1. Subscriptions will be received at the Federal Reserve Banks and Branches and at the Treasury Department, Washington. Banking institutions generally may submit subscriptions for account of customers, but only the Federal Reserve Banks and the Treasury Department are authorized to act as official agencies.

2. The Secretary of the Treasury reserves the right to reject any subscription, in whole or in part, to allot less than the amount of certificates applied for, and to close the books as to any or all subscriptions at any time without notice; and any action he may take in these respects shall be final. Subject to these reservations, subscriptions for amounts up to and including \$25,000 will be allotted in full, and subscriptions for amounts over \$25,000 will be allotted to all holders on an equal percentage basis, but not less than \$25,000 on any one subscription. The basis of the allotment will be publicly announced, and allotment notices will be sent out promptly upon allotment.

IV. *Payment.* 1. Payment at par for certificates allotted hereunder must be made on or before August 1, 1946, or on later allotment, and may be made only in Treasury Certificates of Indebtedness of Series F-1946, maturing August 1, 1946, which will be accepted at par, and should accompany the subscription.

V. *General provisions.* 1. As fiscal agents of the United States, Federal Reserve Banks are authorized and requested to receive subscriptions, to make allotments on the basis and up to the amounts indicated by the Secretary of the Treasury to the Federal Reserve Banks of the respective Districts, to issue allotment notices, to receive payment for certificates allotted, to make delivery of certificates on full-paid subscriptions allotted, and they may issue interim receipts pending delivery of the definitive certificates.

2. The Secretary of the Treasury may at any time, or from time to time, prescribe supplemental or amendatory rules and regulations governing the offering, which will be communicated promptly to the Federal Reserve Banks.

Whereas, on April 19, 1946, the Administrator caused to be published in the FEDERAL REGISTER a notice of opportunity to show cause why the following proposed amendment to Title 29, Chapter V, Code of Federal Regulations, Part 516, issued September 15, 1941, pursuant to authority contained in section 11 (c) of the Fair Labor Standards Act of 1938, should not be adopted by the Administrator:

§ 516.2 * * *

(b) *Record of hours worked by unsupervised employees engaged in woods operations on pulpwood, including the hauling of pulpwood in or from the woods.* An employer of an employee who is employed in woods operations on pulpwood, including the hauling of pulpwood in or from the woods, away from supervision under circumstances in which it is impracticable or impossible for the employer to ascertain the number of hours worked by the employee in any way other than on the representation of such employee, may instruct and require such employee to enter on an appropriate form, furnished by the employer, the number of hours the employee has worked on each day during the workweek. The employer shall give full and detailed instructions to such employee with respect to the entries to be made on the form to the end that the employee may fully understand the nature and purpose of the report as the basis for determining the straight-time and overtime compensation to be paid to him and the necessity for completeness and accuracy of the entries to be made by the employee. Such a record, when signed by the employee as a true and accurate statement of the hours he has worked, shall be kept and preserved by the employer and, with respect to the hours worked by the employee away from supervision, shall be considered to meet the requirement of these regulations insofar as they require the recording of the hours worked each day, provided that the employer has used such means as are reasonably available to determine that the hours actually worked by such an employee have been accurately recorded;

and

Whereas, within 15 days following the publication of the said notice of opportunity to show cause, the Administrator received objections and requests for hearing; and
