## TITLE 5—ADMINISTRATIVE PERSONNEL

### Chapter I—Civil Service Commission

#### PART 01—ORGANIZATION AND OFFICIAL RECORDS OF THE COMMISSION

#### PART 6—EXCEPTIONS FROM THE COMPETITIVE SERVICE

#### PART 24—FORMAL EDUCATION REQUIREMENTS FOR APPOINTMENT TO CERTAIN SCIENTIFIC, TECHNICAL, AND PROFESSIONAL POSITIONS

#### MISCELLANEOUS AMENDMENTS

1. Section 01.11 is amended to read as follows:

§ 01.11 *Investigations Division*—(a) *Organization*. The Commission's investigative activities may be divided into four major types:

(1) Investigations of qualifications of applicants or appointees to positions in the Federal competitive civil service.

(2) Investigations to determine the facts when a preference eligible alleges that he has been denied any of the rights guaranteed him under the Veterans' Preference Act of 1944.

(3) Investigations arising out of the administration of the Merit System involving violations of the Civil Service Act and rules.

(4) Records Checks and Inquiries under Part I, section 3, of Executive Order 9835.

For the purpose of carrying out these investigative functions, the Investigations Division is divided into the following sections:

(i) *Rating Section*. This section develops suitability rating standards for use of regional offices; post-audits rating actions taken by regional investigations divisions, renders advisory opinions on matters of suitability for regional offices, other divisions of the Commission, and other Federal agencies. It rates cases referred by the Executive Director and Chief Examiner or the Chief of the Division.

(ii) *Inspection and Training Section*. This section inspects the work of regional investigations divisions and prepares reports thereon for the consideration of the Commission; prepares training materials and arranges for the training of personnel in the central and regional office investigations divisions.

(iii) *Security Section*. This section maintains the confidential investigative records of the Commission and releases information therefrom. It also develops and disseminates information on loyalty matters which would be of assistance to investigators in detecting leads on questions of loyalty. (For information as to what records are available and to whom they are available, see § 01.19.)

(iv) *Records Processing and Reporting Section*. This section forwards the results of loyalty checks and full field loyalty investigations on incumbent employees to employing agencies, conducts or secures check of files of FBI, ONI, MID, and the House Committee on Un-American Activities on new appointees and reports results to regional offices. It also maintains a control file of investigative cases pending in regional offices and the Master Index file prescribed by E. O. 9835.

(v) *Procedures and Control Section*. This section prepares and issues instructions pertaining to the investigative program and develops procedures for handling investigative cases, conducting such organizational and procedural surveys as necessary. It prepares budget estimates and management control reports on the investigative program; is responsible for the division's personnel program, and handles other administrative services which are not assigned elsewhere.

(b) *Delegation of authority*—(1) *To regional offices*. Regional directors are authorized to handle appeals of veterans under the Veterans' Preference Act of 1944 that arise in their regions and to initiate investigations where the facts so warrant. They are also authorized to initiate investigations into alleged violation of the Civil Service Act and rules. Regional directors are authorized to conduct Record Checks and Inquiries under E. O. 9835 on appointees to positions in the executive branch of the Government on or after October 1, 1947, and to refer to the Federal Bureau of Investigation for full field investigation all cases in which a question of loyalty is developed.

##### UNITED STATES STANDARDS FOR SWEET PEPPERS

On January 20, 1948, notice of proposed rule making was published in the FEDERAL REGISTER (13 F. R. 273) regarding the proposed issuance of United States Standards for sweet peppers for processing. After consideration of all relevant matters presented, including the proposals set forth in the aforesaid notice, the following United States Standards for sweet peppers for processing are hereby promulgated pursuant to the provisions of the Department of Agriculture Appropriation Act 1948 (Pub. Law 266, 80th Cong., 1st Sess., approved July 30, 1947):

§ 51.350 *Sweet peppers for processing—*(a) *Grades.* (1) U. S. No. 1 shall consist of sweet peppers of one variety or similar varietal characteristics, which are fairly firm, fairly well shaped, well colored, free from mold, soft rot, worm holes, or other holes which penetrate through the wall of the pepper, except small, fresh holes or splits incident to proper handling. The peppers shall also be free from damage by any other cause.

(2) U. S. No. 2 shall consist of sweet peppers of one variety or similar varietal characteristics which are fairly well colored and free from serious damage by any cause.

(b) *Culls.* Sweet peppers which fail to meet the requirements of either of the foregoing grades shall be designated as culls.

(5) "Diameter" means the greatest dimension of the pepper measured at right angles to a line running from the stem to the apex.

(6) "Fairly well colored" means that at least three-fourths of the surface of the pepper has a characteristic medium or dark red color.

(7) "Serious damage" means any injury or defect which seriously affects the processing or edible quality of the pepper, or which cannot be removed in the ordinary process of trimming without a loss of more than 20 percent, by weight, of the pepper in excess of that which would occur if the pepper were perfect.

(v) Any oranges, except Temple oranges, grown in the State of Florida which are of a size larger than a size that will pack 150 oranges, packed in accordance with the requirements of a standard pack (as such pack is defined in the aforesaid amended United States Standards), in a standard box (as such box is defined in the aforesaid standards for containers for citrus fruit), unless such oranges grade U. S. No. 1 Russet, U. S. No. 1 Bronze, U. S. No. 1 Golden, U. S. No. 1 Bright, U. S. No. 1, or U. S. Fancy (as such grades are defined in the aforesaid amended United States Standards) and are not of a size larger than a size that will pack 126 oranges, packed in accordance with the requirements of a standard pack (as such pack is defined in the aforesaid amended United States Standards), in a standard box (as such box is defined in the aforesaid standards for containers for citrus fruit).

(2) During the period beginning at 12:01 a. m., e. s. t., February 23, 1948, and ending at 12:01 a. m., e. s. t., July 31, 1948, no handler shall ship any Temple oranges, grown in the State of Florida, which grade U. S. Combination Russet, U. S. No. 2 Russet, U. S. No. 3, or lower than U. S. No. 3 grade (as such grades are defined in the aforesaid amended United States Standards).

(3) As used in this section, the terms "handler," "ship," "Regulation Area I," and "Regulation Area II" shall have the same meaning as is given to each such term in said amended marketing agreement and order. (48 Stat. 31, as amended; 7 U. S. C. 601 et seq.)

#### PART 803a—LICENSING POLICIES AND RELATED SPECIAL PROVISIONS

##### EXPORT LICENSES FOR IRON AND STEEL PRODUCTS

Part 803a "Licensing Policies and Related Special Provisions" is amended by adding thereto a new § 803a.4 to read as follows:

§ 803a.4 *Provisions concerning export licenses for iron and steel products.* The following provisions shall govern licensing of iron and steel products:

(a) *Applicable licensing policy.* Hereafter, and except for certain applications as provided in paragraph (d) (1) of this section, all applications for licenses to export iron and steel products will be approved, and licenses issued, on the basis of the end use for which the exportation is intended, export price, and the country of destination involved, in accordance with the revised licensing policy set forth in § 803a.1.

(b) *Application requirements—(1) Time for submission of applications.* Applications for licenses to export iron and steel products may be submitted at any time during a calendar quarter, except as otherwise provided for certain applications in paragraph (d) (1) of this section.

(2) *Coverage and information; particular applications.* In submitting license applications to export iron and steel sheets, galvanized, Schedule B Nos. 603300 and 603400, materials of all gauges may be included in a single application. However, applications must list materials of gauge 22 and lighter separately from the heavier gauges. Similarly, applications for licenses to export welded steel black pipe, Schedule B No. 607000, must list all butt and lap-weld pipe separately.

(3) *Evidence of availability of material.* Applicants for licenses to export iron and steel products must submit with each license application an acceptance or commitment letter from the supplier, evidence of ownership (such as a bill of sale or a photostatic copy thereof), or other proof that the amount of material covered by the application is in fact available to the applicant.

(4) *Applications in excess of quotas.* Applications for licenses to export iron and steel products which cannot be processed during the calendar quarter in which submitted, because of quota exhaustion, will be retained by the Department of Commerce, for consideration against quotas for the following calendar quarter.

(c) *Licenses; period of validity.* Except as otherwise provided for certain licenses in paragraph (d) (1) of this section, licenses authorizing the exportation of iron and steel products shall be valid for a period of six (6) months from the date of validation, unless the period of validity is reduced or extended by the Department of Commerce, or is otherwise indicated on the license. All such licenses are subject to revocation or revision at any time by the Department of Commerce.

(d) *Iron and steel products added to list of commodities in § 801.2 (b), by*

*Amendment 380, effective January 1, 1948.* Licenses authorizing the exportation of iron and steel products which were added to the list of commodities set forth in § 801.2 (b) of this subchapter by Amendment 380, effective January 1, 1948 (13 F. R. 7), will be issued against first quarter 1948 quotas in accordance with the following provisions.

(1) *Hardship cases.* A portion of the quota will be licensed to permit the exportation of iron and steel products where it can be clearly shown that they have already been produced or are in process of production or advanced in planned production to a state where removal from schedule would constitute a hardship, and further where such products are of a type not readily saleable in the domestic market.

Such applications should be submitted not later than January 15, 1948.

Licenses issued under the provisions of this subparagraph (1) shall be valid for a period of only three (3) months from the date of issuance, subject, however, to reduction, extension, revocation or revision as provided in paragraph (c) of this section.

(2) *Other cases.* The remainder of the quota of these iron and steel products available for export will be set aside for the issuance of licenses on the basis of intended end-use, export price, and country of destination involved, as stated in paragraph (a) of this section. Such licenses shall be valid for a period of six (6) months, as more particularly provided in paragraph (c) of this section.

(Sec. 6, 54 Stat. 714, 55 Stat. 206, 56 Stat. 463, 58 Stat. 671, 59 Stat. 270, 60 Stat. 215, 61 Stat. 214, 61 Stat. 321, Pub. Law 395, 80th Cong.; 50 U. S. C. App. and Sup. 701, 702; E. O. 9630, Sept. 27, 1945, 10 F. R. 12245; E. O. 9919, Jan. 3, 1948, 13 F. R. 59)

Dated: February 13, 1948.

FRANCIS McINTYRE,  
Director,  
Export Supply Branch.

CLAIMS

MISCELLANEOUS AMENDMENTS

1. Section 5.2583 Public No. 484, 73d Congress, as amended is hereby canceled.

2. In § 5.2584, the following amendments are made:

§ 5.2584 *General law and service acts.* Awards of compensation or pension shall be reduced or discontinued as follows under:

General Law (sections 4702 and 4707, Revised Statutes, as amended).

(a) *Termination by limitation—(1) Widows and remarried widows.* (i) Death compensation or pension payable to a widow or remarried widow shall terminate the day of death or the day preceding remarriage. If the widow is receiving additional compensation or pension for a child or children based on service rendered prior to April 21, 1898, the date of termination of such additional compensation or pension shall be the date of death of the child or the day preceding the child's sixteenth birthday: *Provided*, That where additional compensation or pension is being paid for a helpless child solely by virtue of the provisions of Public Law 280, 78th Congress (act of April 1, 1944), the date of termination of such additional payments shall be the day preceding the marriage of the child. If the widow is receiving additional compensation or pension for a child or children based on service rendered on and after April 21, 1898, the date of termination of such additional compensation or pension shall be the date of death, or the day preceding the child's eighteenth birthday, or the day preceding marriage in those cases in which the additional compensation or pension is payable solely by reason of the definition of the term "child" contained in section 7, Public No. 144, 78th Congress: *Provided*, That the discontinuance of additional compensation or pension for a child or children because of school attendance shall be effective as provided in § 5.2598 (g). Additional death compensation or pension being paid on behalf of any child by reason of permanent incapacity for self-

support shall be discontinued effective the date of last payment when a determination has been made that such condition no longer exists.

(ii) *Overpayment to widow.* When a widow has continued to receive compensation or pension after her remarriage and the veteran's child or children under the age of sixteen years or helpless child or children have resided with and been supported by her, the effective date shall be the date of last payment. (R. S. 4702.)

(iii) *Abandonment of children by widow.* The effective date shall be the date of last payment to a widow whose compensation or pension is suspended by reason of abandonment of children under § 5.2600 (section 4706, Revised Statutes, as amended).

Death compensation or pension payable to a child based on service rendered on and after April 21, 1898, shall be discontinued effective the date of death, or the day preceding the child's eighteenth birthday, or the day preceding marriage in those cases in which the child is entitled solely by reason of the definition of the term "child" contained in section 7, Public No. 144, 78th Congress: *Provided*, That the discontinuance of compensation or pension because of school attendance shall be effective as provided in § 5.2598 (g).

(iv) *Marriage of helpless child.* Payments to or for a helpless child who marries shall be discontinued as of the date preceding the marriage. As to a child who is within the definition of the term contained in § 5.2502 (b) (1) (i), the presumption that the helpless condition has ceased may be overcome by positive proof of continuing mental or physical condition resulting in helplessness; as to a child within the definition of the term contained in § 5.2502 (b) (1) (ii) or (b) (2), when compensation or pension is properly discontinued by reason of marriage it shall not thereafter be recommenced. § 107.7 *Form I-416; contents of form.* On the front of Form I-416, the heading shall show the list number, number or other designation of class, port and date of embarkation, name of vessel, and port and date of arrival. The heading for column 1 shall be "Family name—Given name Age (Years) Sex (F-M) Destination in United States"; for column 2, "Married or single"; for column 3, "U. S. Passport No. Place of birth"; for column 4, "No. & description of pieces of baggage"; for column 5, "This column for use of master, surgeon, and U. S. officers." On the back of Form I-416 there shall be an affidavit which shall contain the same language as is prescribed by § 107.6 for affidavit No. 3 on the back of Form I-415.

§ 107.8 *Forms I-415 and I-416; general directions for preparation.* All entries of data on Form I-415 and I-416 shall be dittoed, typewritten, or printed, in the English language, with ink or dye that will not fade or "feather" within 20 years. All data called for by such forms shall be filled in as required by this part, except that it is immaterial whether the copies to be presented to immigration officers, at the port of arrival contain entries in the column pertaining to baggage. A separate Form or Forms I-415 or I-416 shall be prepared for each port of embarkation abroad and each port of arrival in the United States. Such forms shall be numbered consecutively in the indicated space in the upper right-hand corner of the heading, commencing with No. 1 for each voyage. A separate form or forms shall be prepared for each class of alien and citizen passengers carried and the class shown in the heading of the form, except that any stowaways aboard shall be listed on the last Form I-415 or I-416. The notation "Stowaway" shall be shown in the last column, opposite the name of each stowaway. Where third-class or steerage passengers are carried, they shall be grouped to show location of

compartment or space occupied during the voyage and there shall be specified the deck and whether forward, amidship, or aft. The names of all passengers who are members of a family should, to the fullest extent possible, be shown on the same manifest sheet when such passengers travel in the same class; and if they travel in different classes or if some are aliens and others United States citizens, appropriate cross references should be made on the sheet on which the respective names are listed. Notwithstanding the other provisions of this section, where the number of alien passengers in all classes does not exceed 25, all classes may be shown on one Form I-415 with the names grouped according to class and the name of the class of the group noted in the body of the form. The same rule shall be applied with respect to the manifesting of United States citizens on Form I-416.

§ 107.9 *Form I-415; preparation.* Where the total number of alien passengers in all classes exceeds 25, separate Forms I-415 shall be used for those coming to the United States for permanent residence and for those coming for temporary stay. The names of those coming from the same locality shall be kept together so far as practicable. Column 1 of Form I-415 shall be completed to show the alien's family name and given name (in all cases the family name shall be shown first and shall be written in capital letters); age in years at last birthday, except that in the case of aliens under one year, age shall be shown in months, the abbreviation "mos." being used; sex by the abbreviation "F" for female or "M" for male; and the address to which the alien is destined in the United States, showing street and number, city, and State (the address shall be indented two spaces). The abbreviation "M" or "S" shall be used in filling out column 2. In column 3 shall be shown the serial number (red) of Foreign Service Form 257, the serial number (black) of Foreign Service Form 256, the serial number of Immigration Form I-94, or the reentry permit number (red) of Immigration Form I-132. (The Foreign Service forms are issued by American consuls abroad, and reentry permits are issued by the Immigration and Naturalization Service prior to an alien's departure from the United States.) All such documents are required to be surrendered by the passengers to the United States immigrant inspector at the United States port of arrival. In the case of every alien passenger who does not have a Foreign Service Form 257 or 256 or a reentry permit (Form I-132), the transportation company shall, as a part of the manifest Form I-415, execute an Immigration Form I-94 in triplicate in the manner prescribed by § 107.19, but shall deliver it to the passenger for surrender by him to the United States immigrant inspector at the United States port of arrival. In column 3 there shall also be shown the nationality of the passenger. In column 5 shall be shown "Yes" if the transportation company has collected head tax and "No" if it has not collected head tax. In column 6, the master or surgeon shall by use of the

notation "I-442" indicate which passengers are being made the subject of the special report on Form I-442.

§ 107.10 *Form I-416; preparation.* Column 1 of Form I-416 shall be completed to show the passenger's family name and given name; age in years at last birthday, except that in the case of passengers under one year, age shall be shown in months, the abbreviation "mos." being used; sex by the abbreviation "F" for female or "M" for male; and the address to which the passenger is destined in the United States, by showing street and number, city, and state. The abbreviation "M" or "S" shall be used in filling out column 2. In column 3 shall be shown the serial number of any United States passport in the possession of the passenger. If the passenger has no United States passport and is a naturalized citizen of the United States, the number of his certificate of naturalization shall be shown in column 3 or if such certificate is without number or the number is unavailable, then the date of naturalization, the name of the court, and the place of naturalization. In column 3, the passenger's place of birth shall also be shown by giving the state or territory if born in the United States, or country if born outside the United States.

§ 107.11 *Forms I-415 and I-416; "landing cards"; affidavits; delivery.* For convenience of identification on arrival, there may be given to each person listed on Form I-415 or I-416 a ticket or "landing card" showing his name, the number of the manifest or list on which his name appears, and his number on said manifest or list. Immediately on the arrival of a vessel at a port in the United States, one legible copy of the manifest on Forms I-415 and of the list on Forms I-416, covering all of the passengers destined to such port, shall be delivered to the United States immigrant inspector at such port. The forms shall be assembled so that the Forms I-416 precede the Forms I-415; and of the printed affidavits on the back of the forms delivered to the immigrant inspector only affidavits Nos. 1 and 2 on the last Form I-415 need be executed. (Where all passengers are United States citizens and, therefore, only Forms I-416 are prepared, a Form I-415 with front voided shall be attached after the last Form I-416, and Affidavit No. 1 on the back of the Form I-415 executed as to the correctness of the lists on Form I-416.) A second legible copy of the Forms I-415 shall also be delivered simultaneously to such immigrant inspector for use in billing the transportation company for any head tax due, but the affidavits on the back of such second copy need not be executed. Where arriving vessels touch at more than one United States port, passengers shall, as prescribed by § 107.8, be manifested according to their final United States port of destination, but such manifests shall be presented at all intermediate United States ports and the immigrant inspector at such ports shall make a notation in the last column of Forms I-415 and I-416 showing the port or ports at which passengers were granted shore leave. Such notation shall consist of an abbreviation of the name of the port. When

## PROPOSED RULE MAKING

any passenger desires regularly to land at any port in the United States other than the one to which he is manifested, his name shall be stricken by the ship's officer from the manifest upon which it was originally recorded and transferred to the manifest intended for the port where he wishes to land. Such change on the manifest shall be made only with the prior knowledge of the immigrant inspector and shall be attested by his signature and title placed opposite each entry. On the manifest to which the name is transferred, he will note: "Transferred from manifest of passengers for \_\_\_\_\_, dated \_\_\_\_\_, Immigrant Inspector."

§ 107.12 *Form I-434; contents of form.* On the front of Form I-434, the heading shall show the manifest number, port and date of sailing from the United States, name of steamship, and foreign port of destination. The heading for column 1 shall be "Family name—Given name"; for column 2, "Age (Years)"; for column 3, "Travel Document No." No heading for column 4 is prescribed. On the back of the form there shall be the following affidavit:

I, \_\_\_\_\_, \_\_\_\_\_

bound for \_\_\_\_\_  
do solemnly swear that, according to the best of my knowledge and belief, all passengers who departed on the said vessel, numbering \_\_\_\_\_, are listed in the foregoing lists Nos. \_\_\_\_\_ to \_\_\_\_\_ and manifests Nos. \_\_\_\_\_ to \_\_\_\_\_; that concerning each the information recorded is correct, full, and complete in every respect; and that for each alien passenger listed there is, when required by regulations, attached to the said manifests and made a part thereof either a Foreign Service Form 257a or a Form I-94 or I-424.

§ 107.13 *Form I-435; contents of form.* On the front of Form I-435, the heading shall show the list number, port and date of sailing from the United States, name of steamship, and foreign port of destination. The heading for column 1 shall be "Family name—Given name Age (Years) Sex (F-M) Address in United States"; for column 2, "U. S. Passport No."; for column 3, "Place of birth Date and place of naturalization"; for column 4, "Length of time passenger intends to remain abroad." On the back of Form I-435 there shall be the same affidavit as is prescribed in § 107.12 for the back of Form I-434.

§ 107.14 *Forms I-434 and I-435; general directions for preparation.* All entries of data on Form I-434 and I-435 shall be dittoed, typewritten, or printed, in the English language, with ink or dye that will not fade or "feather" within 20 years. All data called for by such forms shall be filled in as required by this part. A separate Form or Forms I-434 or I-435 shall be furnished for each port in the United States covering persons embark-

ing at those ports. Separate Forms I-434 and I-435 shall be furnished for passengers destined to each port of foreign debarkation, except that, if the number for all of the different ports is 25 or less, passengers may be recorded on one Form I-434 or I-435, and grouped according to the particular port of debarkation, which shall be noted in the body of the form. Such forms shall be numbered consecutively in the indicated space in the upper right-hand corner of the heading, commencing with No. 1 for each voyage.

§ 107.15 *Form I-434; preparation.* (a) Column 1 of Form I-434 shall be completed to show the alien's family name and given name. Column 2 shall be completed to show age in years at last birthday, except that in the case of passengers under one year, age shall be shown in months, the abbreviation "mos." being used. In column 3 there shall be shown the serial number of any Foreign Service Form 257a or Immigration Form I-94 presented by the alien passenger. Such forms shall be surrendered by alien passengers to a representative of the transportation company concerned. If the alien presents neither of those forms and, therefore, Immigration Form I-424 is prepared, the notation "I-424" shall be entered in column 3 opposite the name of the passenger. There must be attached to and made a part of Form I-434 for each alien passenger listed on the manifest either a Foreign Service Form 257a; an Immigration Form I-94, "Visitor's Permit"; or an Immigration Form I-424, "Report of Departure of Alien." An Immigration Form I-424 shall be prepared by the transportation company in the case of an alien who departs without surrendering a Foreign Service Form 257a or an Immigration Form I-94. The names of aliens arrested within the United States and deported shall be shown on Form I-434, and Forms I-424, conspicuously marked "Deportee," shall be made in their cases and attached to and made a part of Form I-434. The names of aliens who have applied for admission to the United States with the result that they are excluded, and who are being removed from the United States pursuant to such exclusion, shall not be shown on Form I-434 and no Forms I-424 shall be made in their cases.

(b) A Form 257a which is a part of a full set of Forms 257 (i. e., 257a, 257b, and 257d) is not to be surrendered by an alien who obtained such set of forms to meet documentary requirements at the time of his intended future entry to the United States. Form I-424 shall be prepared in such a case and attached to and made a part of the Form I-434 if the alien does not surrender a Form 257a or a Form I-94 obtained in connection with his prior entry to the United States. The circumstances described in this paragraph may occur in the cases of aliens who reside in foreign contiguous countries and who pass through the United States for the purpose of boarding vessels departing from United States ports and who intend to pass through the United States on their return trip.

§ 107.16 *Form I-435; preparation.* Column 1 of Form I-435 shall be com-

pleted to show the passenger's family name and given name, age, sex, and address in the United States by showing street and number, city, and state. To denote sex, the abbreviation "F" for female or "M" for male shall be used. Column 2 shall be completed to show the number of the passenger's United States passport, except that where the passenger has no United States passport and is a naturalized citizen the number, if any, of his certificate of naturalization shall be shown in this column, preceded by the letter "C". Column 3 shall be completed to show place of birth and also, in the case of naturalized citizens, the date and place of naturalization, except that if the number of the certificate of naturalization is shown in column 2 there may be omitted for such passenger the data called for by column 3. If the passenger states in response to inquiry from the transportation company representative that he intends to remain abroad permanently, the abbreviation "Perm.", followed by the name of the country of intended future residence, shall be entered in column 4. Any temporary period stated definitely or approximately by the passenger as being the intended length of time which he will remain abroad shall be entered in column 4. If the passenger is uncertain or indefinite in his statements as to the length of time he will remain abroad, the word "Indefinite" shall be entered in column 4.

§ 107.17 *Forms I-434 and I-435; depositing.* (a) Forms I-434 and I-435 fully executed in accordance with this part shall be deposited with immigration officials. Of the affidavits on the back of the forms deposited with immigration officials, only the affidavit on the last form shall be executed. Such lists (Forms I-434 and I-435) shall be deposited with the immigration officials before the departure of the vessel, except that in the case of vessels making regular trips to ports of the United States such lists may be delivered so as to reach the immigration officials at the port of departure within 30 days after departure of the vessel. Notwithstanding the exception contained in the preceding sentence, the immigration officer in charge at the port shall not grant clearance papers to the vessel until such lists are delivered if he knows or has reason to believe that the vessel will not return to a port of the United States within 30 days or that such lists will not be delivered so as to reach him within that time.

(b) The term "vessels making regular trips to ports of the United States" as used in the first proviso to section 12 of the Immigration Act of 1917 and in paragraph (a) of this section means vessels which arrive at a port or ports in the United States at intervals of 30 days or less according to a published schedule of which there is sufficient notice to all concerned.

§ 107.18 *Form I-442; report by surgeon.* The ship's surgeon or, if no surgeon, the master shall furnish to the officials in charge at the port of arrival a full and complete report, with respect to all alien passengers, of all injuries, diseases, and illnesses—mental or physical—existing at time of embarkation, and of

any such injuries, diseases, and illnesses, and births and deaths developing or occurring during the voyage. Such report shall be made on Form I-442, which shall conform to the requirements stated in § 107.3. The entries on Form I-442 shall be typewritten, or printed in ink, in the English language. Form I-442 shall be 19" wide and 15" long. Form I-442 shall be on white bond paper that will not discolor or become brittle within 20 years, at least 25% rag, substance 26, 17" x 22", 1,000-sheet basis, and shall conform in every respect to the officially manufactured Form I-442 currently in use and approved by the Commissioner of Immigration and Naturalization.

§ 107.19 *Form I-94; how executed by transportation company.* When in accordance with this part the transportation company executes Form I-94, all data called for by such form shall be typewritten or printed in ink thereon in the English language, except the date and place of admission to the United States, the date to which admitted, and the signature of the United States immigrant inspector.

§ 107.20 *Form I-424; report of departure of alien.* (a) Form I-424 shall be 6" wide and 4" long and shall be on white bond paper that will not discolor or become brittle within 20 years, at least 25% rag, substance 48, 17" x 22", 1,000-sheet basis. The form shall contain the following information regarding the passenger: Name, occupation, last address in United States, date and place of birth, nationality, race, whether male or female, whether married, single, widowed, or divorced, destination abroad, purpose and length of intended stay abroad, date and place of last entry into United States, whether such entry was as a permanent resident or for temporary stay, date and port of departure from United States and name of departing vessel, the sheet and line number of the outgoing manifest on which his name appears, and any "V" or "T" number that may be shown in his passport or, if in possession of a reentry permit, the file number appearing in the upper right-hand corner thereof.

(b) When Form I-424 is required by § 107.15 to be executed by the transportation company, all data called for by such form shall be typewritten or printed in ink thereon in the English language and the form shall be considered as a part of the outgoing manifest on Form I-434.

§ 107.21 *Foreign government officials and certain aliens connected with international organizations.* Notwithstanding the other provisions of this part, the only information required to be shown on Form I-415, I-434, I-94, or I-424 by transportation companies in the case of an alien in possession of a nonimmigrant visa issued under subsection (1) or (7) of section 3 of the Immigration Act of 1924, as amended (43 Stat. 154, 54 Stat. 711, 59 Stat. 672; 8 U. S. C. and Sup. 203), which subsections relate respectively to foreign government officials and certain aliens connected with international organizations, shall be the name, official

position, nationality, destination in the United States, purpose of coming to the United States, and the serial number of any Form 257a or I-94.

§ 107.22 *Cruise passengers.* For the purposes of this section, the term "cruise" means a voyage on which the vessel does not proceed outside the Western Hemisphere, as defined in § 176.101 (y) of this chapter, and which originates and terminates at the same United States port and during which no passengers are discharged or taken aboard at a foreign port. The district director of the district in which is located the United States port of origin and termination of such a cruise, or the officer in charge of such port may, in advance of the departure of a vessel on a cruise and on the written request of the transportation company concerned, waive the filing of Forms I-415 and I-416 on the condition that for such voyage Forms I-434 and I-435 are deposited prior to the return of the vessel to the United States port. Notwithstanding the other provisions of this part, Forms I-94 and I-424 shall not be required for passengers on cruises and such passengers may retain any Forms 257a or I-94. Nothing in this section shall be construed as waiving the presentation by any alien of any passport, visa, or other document required by Executive order or regulations applicable to his case.

§ 107.23 *Form I-448; manifest of aliens coming from foreign contiguous territory.* (a) Upon the inspection of aliens seeking to enter continental United States directly from Canada or Mexico, the examining immigrant inspector shall prepare a manifest on Form I-448 in cases where the preparation of such a manifest is required by the provisions of this chapter, particularly Parts 108 and 114. The Form I-448 shall be filled out from information furnished by the alien in response to questions asked by the examining immigrant inspector. Data such as the following shall be included in the Form I-448: Port, date, full name, age, and sex; whether married or single; calling or occupation; personal description (including height, color of hair and eyes); nationality; race; place of birth; country of last permanent residence; name and address of nearest relative in the country from which the alien came; final destination; whether going to join a relative or friend and, if so, name and address of such relative or friend; whether ever before in the United States and, if so, when; purpose in coming to United States and length of time intending to remain. Immigration officials shall state whether the alien is an immigrant or a nonimmigrant, the character of head-tax assessment, and, if exempt from head tax, the reason therefor, and also the action taken as a result of such inspection. The immigration official making the inspection shall sign such manifest when completed.

(b) The term "continental United States" as used in paragraph (a) of this section means the territory of the forty-eight States, the District of Columbia, and Alaska.

(c) Notwithstanding the other provisions of this section, part, or chapter, the only information required to be shown on Form I-94 or Form I-448 in the case of an alien admitted to the United States under the provisions of subsection (1) or (7) of section 3 of the Immigration Act of 1924 shall be the name, official position, nationality, destination in the United States, purpose of coming to the United States, and the serial number of any Form 257a or I-94.

2. Part 160, Chapter I, Title 8, Code of Federal Regulations, is amended in the following respects.

a. Section 160.6 is amended to read as follows. (The only changes are those concerning the statutory citation to section 12 of the Immigration Act of 1917 and concerning the references to the regulations under that section.)

§ 160.6 *Liability for failure to supply manifest.* Where the master or commanding officer of a vessel bringing aliens into or carrying aliens out of the United States refuses or fails, in violation of section 14 of the Immigration Act of 1917 (39 Stat. 884; 8 U. S. C. 150), to deliver the accurate and full manifests or statements or information, required by section 12 of the Immigration Act of 1917 (39 Stat. 882; 61 Stat. 630, Pub. Law 274, 80th Cong.; 8 U. S. C. 148) and the regulations thereunder prescribed in Part 107 of this chapter, regarding aliens brought into or carried out of the United States, such masters or commanding officers shall pay to the collector of customs (under notice of intention to fine) \$10 for each alien concerning whom proper manifest or statement or information is not furnished at the time of arrival with respect to incoming aliens and before the time of the departure of the vessel with respect to outgoing aliens, except that with respect to outgoing aliens such fine shall not be imposed in cases where such manifest or statement or information is delivered after the departure of the vessel and within the time and under the conditions prescribed in § 107.17 of this chapter. The notice of intention to fine required by this section shall be served on the master or commanding officer or person authorized by the master or commanding officer to receive such notice.

b. A new § 160.20 is added as follows. (Such new section is a reissuance of present § 107.16 of this chapter.)

§ 160.20 *Data concerning cost of transportation.* Transportation companies shall furnish the officers in charge at ports of entry, within two days after request therefor, with the original transportation contracts of all rejected aliens whose cases are covered by the provisions of section 9 of the Immigration Act of 1917 (43 Stat. 166; 8 U. S. C. 145), or section 16 of the Immigration Act of 1924 (43 Stat. 163, 58 Stat. 817; 8 U. S. C. and Sup. 216), such contracts showing the exact amounts paid for transportation from the "initial point of departure," which point shall be stated, to the foreign port of embarkation, from the latter to the United States port of arrival, and from the port of arrival to inland point

## CIVIL AERONAUTICS BOARD

[14 CFR, Part 42]

STANDARDS FOR PILOTS, AIRCRAFT MAINTENANCE AND EQUIPMENT, AND OPERATIONS

### NOTICE OF PROPOSED RULE MAKING

Notice is hereby given that the Civil Aeronautics Board has under consideration certain amendments of Part 42 of the Civil Air Regulations as hereinafter set forth.

Interested persons may participate in the making of the proposed rules by submitting such written data, views, or arguments as they may desire. Communications should be submitted to the Civil Aeronautics Board, attention Safety Bureau, Washington 25, D. C. All communications received by March 5, 1948, will be considered by the Board before taking further action on the proposed rules.

When Part 42 of the Civil Air Regulations was promulgated, establishing nonscheduled air carrier certification and operation rules, the Board was cognizant of the fact that the application of these rules to nonscheduled operations should be kept under constant study, and that changes would be required from time to time based upon operating experience. As a result of this continued consideration, substantial changes have already been made in Part 42 to raise the required minimum level of safety. For example, additional provisions have been promulgated relating to fire prevention, pilot qualification, aircraft maintenance, pilot flight time limitations, and weather minimums. These changes introduced requirements that were comparable with similar operating rules for scheduled air carriers.

Recently, the last of the nonscheduled air carriers operating under the "grandfather clause" of § 42.45 has been inspected by the Administrator, and the qualified carriers have been granted operating certificates. An examination of the certification records indicates that there are more than 2,600 nonscheduled operators, and that about 400 multi-engine aircraft of more than 10,000 lbs. maximum weight are being operated by these carriers. The standards presently established by Part 42 for the operation of these larger types of transport aircraft do not in all respects provide a comparable level of safety with the standards prescribed for scheduled operations. The following amendments, therefore, are designed to establish such equivalent standards as the inherent differences in scheduled and nonscheduled operations permit. New requirements are set forth to insure relatively equal airmen competency and comparable aircraft operation, equipment, and maintenance.

In addition, the term "irregular air carrier" is substituted for "nonscheduled air carrier" wherever used in Part 42. This has been done in order to use identical terminology in the safety and economic regulations relating to the same air carrier operations.

These proposals are the result of many months of observation of operations under the present provisions of Part 42 and a study of the reports of investigations of accidents involving nonscheduled air carrier aircraft. The Board believes that the following amendments are necessary to insure a higher level of safety in nonscheduled operations, especially where passengers are carried. It is proposed to make such rules as are adopted effective 30 days thereafter.

It is proposed to amend Part 42 as follows:

1. By deleting the words "nonscheduled air carriers" wherever such words appear therein and inserting in lieu thereof the words "irregular air carriers."

2. By adding a new § 42.05 to read as follows:

§ 42.05 *Notification of change in location.* The air carrier shall furnish written notification to the Administrator at least 30 days prior to any change in the location of the air carrier's principal operations office and principal operations base.

3. By adding new §§ 42.101, 42.102, 42.103, and 42.104 to read as follows:

§ 42.101 *Minimum passenger requirements for aircraft of 10,000 lbs. or more maximum take-off weight.* Effective June 1, 1948, aircraft of 10,000 lbs. or more maximum take-off weight used for the carriage of passengers in air transportation shall comply with the following:

(a) Aircraft certificated as a basic type after June 30, 1942, shall be certificated in accordance with Part 04b of this chapter, or the transport category requirements of Part 04a of this chapter, and shall meet the requirements of § 42.38 over each route to be flown.

(b) Aircraft certificated as a basic type prior to June 30, 1942, shall either:

(1) Retain their existing status of airworthiness certification and shall be operated in accordance with such operating limitations as the Administrator finds will provide a safe relation between the performance of the aircraft and the dimensions of airports and terrain; or

(2) Qualify by showing compliance with either the performance requirements contained in §§ 04a.75-T through 04a.7533-T or the requirements contained in Part 04b of this chapter, and when so qualified shall meet the requirements of § 42.38 over each route to be flown: *Provided*, That should any model be so qualified all aircraft of any one operator of the same or related models shall be similarly qualified and operated.

(c) Aircraft used after December 31, 1953, shall comply with all of the requirements of Part 04b of this chapter, or the transport category requirements of Part 04a of this chapter, and shall meet the requirements of § 42.38 over each route to be flown.

§ 42.102 *Aircraft used in night or instrument flight rule operations.* Aircraft used for the carriage of passengers at night or under instrument flight rule conditions shall be multiengine and either shall meet the operating limitations of § 42.38 or with one engine in-

operative shall be capable of maintaining a rate of climb of at least 50 feet per minute with authorized load at an altitude of at least 1,000 feet above the highest obstruction to flight on the route on which the aircraft will be operated.

§ 42.103 *Aircraft used in operations over water.* Land aircraft, either single-engine or those multiengine which cannot comply with the provisions of § 42.102, shall not be operated over water unless they can at all times reach land which is suitable for a safe landing in the event of power failure, or the operation consists only of landings, take-offs, or flights for very short distances.

§ 42.104 *Engine rotation.* Multiengine aircraft having engines rated at more than 480 hp. (each) for maximum continuous operation shall be so equipped that engines may be stopped promptly in flight.

4. By amending § 42.130 to read as follows:

§ 42.130 *Required instruments and equipment for aircraft of 10,000 lbs. or more maximum take-off weight.*

(a) Instruments and equipment specified in § 42.13 (a) and (b), except radio equipment which is specified in § 42.131,

(b) Additional air-speed indicator,

(c) Electrically heated pitot tube for each air-speed indicator,

(d) Rate-of-climb indicator,

(e) Artificial horizon indicator,

(f) Additional sensitive altimeter,

(g) Approved carburetor de-icing equipment for each engine,

(h) Additional source of energy to supply gyroscopic instruments which shall be capable of carrying the required load. Engine-driven pumps, when used, shall be on separate engines and, in lieu of one such pump, an auxiliary power unit may be used. The installation shall be such that the failure of one source of energy will not interfere with the proper functioning of the instrument by means of the other source.

5. By adding §§ 42.131 through 42.1312 to read as follows:

§ 42.131 *Radio equipment for aircraft of 10,000 lbs. or more maximum take-off weight.*

§ 42.1311 *Short distance operations.* (a) For day VFR operations over routes on which navigation can be accomplished by visual reference to landmarks, each aircraft shall be equipped with such radio equipment as is necessary to accomplish the following:

(1) Transmit to at least one ground station from any point on the route and transmit, from a distance of not less than 25 miles, to airport traffic control towers;

(2) Receive communications at any point on the route;

(3) By either of two independent means, receive meteorological information at any point on the route and receive instructions from airport traffic control towers.

(b) For day VFR operations over routes on which navigation cannot be accomplished by visual reference to land-

marks, for night VFR, or for IFR operations, each aircraft shall be equipped as specified in § 42.1311 (a) (1), (2), and (3), and in addition shall be equipped with such radio equipment as is necessary to satisfactorily receive by either of two independent means radio navigational signals from any radio aid to navigation intended to be used, except that only one marker beacon receiver is necessary.

(c) If appropriate, one of the means provided for compliance with paragraph (a) (3) of this section may be employed for compliance with paragraph (a) (2) of this section or the means provided for compliance with the additional requirements of paragraph (b) of this section may be employed for compliance with paragraph (a) (3) of this section.

§ 42.1312 *Long distance operations.* Each aircraft shall be equipped with such radio equipment as is necessary to accomplish the following:

(a) By either of two independent means, receive communications at any point on the route;

(b) By either of two independent means, transmit to at least one ground station from any point on the route and transmit, from a distance of not less than 25 miles, to airport traffic control towers;

(c) By either of two independent means, receive meteorological information at any point on the route and receive instructions from airport traffic control towers;

(d) By either of two independent means, satisfactorily receive radio navigational signals from any radio aid to navigation intended to be used, except that only one marker beacon receiver is necessary.

If appropriate, equipment provided for compliance with paragraph (c) of this section may be employed for compliance with either paragraph (b) or paragraph (d) of this section.

6. By adding a new § 42.132 to read as follows:

§ 42.132 *First-aid and emergency equipment.* Each aircraft shall be equipped with a conveniently accessible first-aid kit adequate for the type of operation involved. Aircraft operated for long distances over uninhabited terrain must carry such additional emergency equipment as the Administrator designates for the particular operation involved. All aircraft operated over water shall be equipped with life preservers or flotation devices readily available for each person aboard and with a Very pistol or equivalent signal equipment, except that this requirement will not apply when such operations consist only of landings, take-offs, or flights for short distances over water and the Administrator finds in each case that such equipment is unnecessary. In addition, all aircraft operated for long distances over water shall be equipped with a sufficient number of life rafts to accommodate adequately all occupants, and such additional emergency equipment as may be required by the Administrator.

7. By amending § 42.15 to read as follows:

§ 42.15 *Maintenance and inspections.* Aircraft shall be maintained in a continuous condition of airworthiness. All inspections, repairs, alterations, and maintenance shall be performed in accordance with Part 18 of the Civil Air Regulations and the maintenance manual specified in § 42.156.

§ 42.151 *Inspections.* Aircraft shall be given:

(a) A line inspection within each 25 hours of flight time;

(b) A periodic inspection within each 100 hours of flight time. The annual inspection required by paragraph (c) of this section will be accepted as a periodic inspection;

(c) An annual inspection within the preceding 12 calendar months;

(d) Aircraft maintained and inspected in accordance with a continuous maintenance and inspection system in a manner approved by the Administrator and authorized by the terms of the air carrier operating certificate are exempted from the requirements of paragraphs (a), (b), and (c) of this section.

Copies of the reports of the latest inspections required by paragraphs (a), (b), and (d) of this section shall be carried in the aircraft.

§ 42.152 *Facilities.* Facilities for the proper inspection, maintenance, overhaul, and repair of the types of aircraft used shall be maintained by the air carrier, unless arrangements acceptable to the Administrator are made with other agencies which possess such facilities.

§ 42.153 *Maintenance personnel.* A staff of qualified mechanics and appropriate supervisory personnel shall be employed by the air carrier and kept available for performing the functions indicated in § 42.15, unless arrangements acceptable to the Administrator are made with other agencies having the required personnel. In any case the air carrier shall permit maintenance to be performed only by those agencies or personnel who are qualified to perform the work.

§ 42.154 *Reporting of malfunctioning and defects.* Each air carrier shall report on a form prescribed by the Administrator all malfunctioning and defects occurring during operation or discovered during inspection which cause or may be reasonably expected to cause an unsafe condition in any aircraft, engine, propeller, or appliance. One copy of such form shall be forwarded as prescribed on the form, and a duplicate shall be forwarded to the maintenance inspector assigned to such operation. The corrective action taken by the air carrier to prevent recurrence of the malfunctioning or defect shall be indicated on the form. Such reports shall be forwarded as soon as possible but not later than 15 days after such malfunctioning or defect occurs or is discovered.

§ 42.155 *Reporting of mechanical irregularities occurring in operation.* Each air carrier shall provide a means whereby the aircraft flight crew reports all me-

chanical irregularities occurring in flight to the air carrier's maintenance personnel or maintenance contracting agency. This report shall be made at the end of a through flight, or sooner if the seriousness of the irregularity so warrants. All irregularities so reported must be investigated and corrected by the maintenance personnel responsible before the aircraft is returned to service.

§ 42.156 *Maintenance manual.* Each air carrier who operates a multiengine aircraft or more than 5 single-engine aircraft shall prepare and maintain a maintenance manual for the use and guidance of its personnel. Such manual shall be in form and content acceptable to the Administrator and shall be furnished to all persons designated by the Administrator or Board. A copy of those portions of the maintenance manual pertinent to the aircraft shall be carried therein.

§ 42.1561 *Contents.* The maintenance manual shall specify inspection and overhaul periods and shall contain instructions for the inspection, servicing, maintenance, and overhaul of the aircraft, aircraft engines, propellers, and appliances operated by the air carrier, including any pertinent manufacturers' recommended procedures. When found necessary in the interest of safety, the Administrator may require changes in any recommended procedure whether or not originally accepted as part of the manual.

8. By adding a new § 42.201 to read as follows:

§ 42.201 *Second pilot.*

§ 42.2010 *When required.* When passengers are carried, a second pilot will be required in the following cases:

(a) When specified in the airworthiness certificate,

(b) When the aircraft is of 10,000 lbs. or more maximum take-off weight,

(c) When the operation authorized permits IFR operations, or

(d) When the Administrator finds that the nature of the particular operation requires the services of a second pilot.

9. By amending § 42.23 to read as follows:

§ 42.23 *Pilot proficiency.*

§ 42.230 *Equipment checks.* Prior to serving as first pilot of aircraft carrying passengers, a pilot shall be given an equipment check, by a person authorized by the Administrator, in the make and model aircraft to be flown.

§ 42.231 *Maintenance of pilot technique.* If within any 90-day period, a first pilot has not made at least 3 take-offs and landings in aircraft of a particular make and model, such person shall not thereafter serve as a first pilot in aircraft of that make and model in passenger service without having made at least 3 take-offs and landings in such aircraft with not less than one-half the maximum useful load. If he is to serve at night, at least one of the 3 take-offs and landings specified above must have been made at night. In addition, a pilot

shall have had an equipment check as provided in § 42.230 within the preceding 6 months.

§ 42.232 *Instrument check.* Prior to serving as a first pilot, the pilot shall be given an instrument check, by a person authorized by the Administrator, to demonstrate his ability to accomplish the prescribed instrument approach for a particular airport, including an instrument approach using ILS procedures when this facility is approved by the Administrator for use by the air carrier. To serve as a first pilot thereafter, at night or under instrument flight rule conditions, a pilot shall have been given such an instrument check within the preceding 6 months. The instrument check may be given in any type aircraft regularly used by the air carrier and approved for this purpose by the Administrator.

§ 42.233 *Training program.* A pilot training and instruction program satisfactory to the Administrator shall be maintained by the air carrier.

10. By adding new §§ 42.250 and 42.251 to read as follows:

§ 42.250 *Airman certification.* No air carrier shall utilize an airman as a member of the flight crew unless such airman holds a certificate and rating appropriate to the duties to be performed.

§ 42.251 *Airman records.* Each air carrier shall maintain at its principal operations office current records of the flight crew members utilized. These records shall contain such information concerning the qualifications of each airman as is necessary to show compliance with the appropriate requirements prescribed by the Civil Air Regulations. No air carrier shall utilize any flight crew member unless records are maintained for such airman as required herein.

11. By amending § 42.31 by adding a new paragraph (j) to read as follows:

(j) The latest weather reports available for the route and the airports to be used, which reports shall not be more than 2 hours old at the time of departure. In the case of long range flights to points outside the United States the latest available forecasts pertinent to the flight may be used when weather reports are not available.

12. By adding a new § 42.310 to read as follows:

§ 42.310 *Flight plan and clearance for flights outside the United States.* Except when the flight is made in accordance with terms and conditions prescribed by the Administrator, a flight plan containing the information required by § 60.301 of this chapter shall be filed with and clearance obtained from the appropriate air traffic control center when the point of intended landing is outside the continental limits of the United States.

13. By adding new §§ 42.38 through 42.384 to read as follows:

§ 42.38 *Operating limitations for airplanes certificated under transport category airworthiness requirements.* In operating any airplane transporting pas-

sengers which has been certificated under the airworthiness requirements of Parts 04a or 04b of this chapter, or in accordance with the performance requirements of those parts, the pertinent provisions of §§ 42.380 through 42.384 shall be observed unless deviations therefrom are specifically authorized by the Administrator on the ground that a peculiarity of the particular circumstances of a particular case makes a literal observation of the restrictions unnecessary for safety in that case.

In determining compliance with these provisions, the data obtained in testing the airplane for type certification may be applied, by interpolation or by computation of the effects of changes in the specific variables, to conditions differing from those for which specific tests were made, where such interpolations or computations will give results substantially equalling in accuracy the results of a direct test.

§ 42.380 *Weight limitations.* (a) The airplane shall not be operated from any field at an altitude outside of the altitude range for which maximum take-off weights have been determined and set forth in the airplane operating manual and shall not be dispatched to a field of intended destination, or have any field specified as an alternate, which is at an altitude outside the range for which maximum landing weights have been determined and set forth in the airplane operating manual.

(b) The weight of the airplane at take-off shall not exceed the certificated maximum take-off weight for the altitude of the field from which the take-off is to be made.

(c) The weight at take-off shall be such that, allowing for normal consumption of fuel and oil in flight to the intended destination, the weight on arrival at the destination will not exceed the certificated maximum landing weight for the altitude of the field of intended destination.

§ 42.381 *Take-off limitations to provide for engine failure.* Take-offs shall be made only from such fields in such directions and under such weight limitations that the following conditions are fulfilled as shown by the performance data determined under the pertinent airworthiness requirements and set forth in the airplane operating manual.

(a) From any point on the take-off up to the time of attaining the critical-engine-failure speed set forth in the airplane operating manual, it shall be possible to bring the airplane to a safe stop within the landing area, as shown by the accelerate-and-stop distance data.

(b) If the critical engine should fail at any instant after the airplane attains the critical-engine-failure speed, it shall be possible to proceed with the take-off, and attain a height of 50 feet, as indicated by the take-off path data, before passing over the end of the take-off area. Thereafter it shall be possible to clear all obstacles, either by at least 50 feet vertically, as shown by the take-off path data, or at least 200 feet horizontally within the airport boundaries and 300 feet horizontally after passing beyond such boundaries.

In determining the allowable deviation of the flight path in order to avoid obstacles, it shall be assumed that the airplane is not banked before reaching a height of 50 feet, as shown by the take-off path data, and that a maximum bank thereafter does not exceed 15°.

(c) In applying requirements of paragraphs (a) and (b), of this section correction shall be made for any gradient of the take-off surface. Take-off data based on still air may be corrected to allow for the effect of a favorable wind which is equal to not more than 50% of the component along the direction of take-off due to the reported wind conditions.

§ 42.3810 *Modified take-off limitations.* At the option of the operator consideration of obstacles outside the take-off area as prescribed by § 42.381 (b), and consideration of runway gradient as prescribed by § 42.381 (c), may be omitted: *Provided*, That the distance required to attain a height of 50 feet, as prescribed in § 42.381 (b), does not exceed 85% of the length of the available take-off area.

*NOTE:* The relation between the weight of the airplane and the distance required to attain a height of 50 feet, for various altitudes and wind velocities, is usually available in a convenient form in the airplane operating manual.

§ 42.382 *En route limitations.*

§ 42.3820 *All airplanes; all engines operating.* Airplanes shall be dispatched only at such take-off weights, that, in proceeding along the intended track with the weight of the airplane progressively reduced by the anticipated consumption of fuel and oil, the rate of climb with all engines operating (as set forth in the airplane operating manual) shall be, in feet per minute,  $6V_{50}$ , at an altitude at least 1,000 feet above the elevation of the highest ground or obstruction within 10 miles of either side of the intended track; except that this requirement need not apply to airplanes certificated under the performance requirements of Part 04a of this chapter.

§ 42.3821 *All airplanes; one engine inoperative.* Airplanes shall be dispatched only at such take-off weights that, in proceeding along the intended track with the weight of the airplane progressively reduced by the anticipated consumption of fuel and oil, the rate of climb with one engine inoperative (as set forth in the airplane operating manual) shall be, in feet per minute,  $0.02V_{50}$  for airplanes having maximum take-off weights up to 40,000 lbs., increasing linearly to  $0.04V_{50}$  at 60,000 lbs., and  $0.04V_{50}$  for maximum take-off weights above 60,000 lbs., at an altitude at least 1,000 feet above the elevation of the highest ground or obstruction within 10 miles of either side of the intended track, except that for airplanes certificated under the performance requirements of Part 04a of this chapter, the above rate-of-climb value may be  $0.02V_{50}$  irrespective of maximum take-off weight.

§ 42.3822 *Airplanes with 4 or more engines—2 engines inoperative.* If, from any point along the track flown, more

than 90 minutes at "all engines operating" cruising speed is required to reach an available landing area where the provisions of § 42.383 as modified by § 42.3831 can be met at the airplane weight estimated to exist upon arrival there, an aircraft with 4 or more engines shall not be dispatched over such track unless its weight is such as to permit a rate of climb with 2 engines inoperative (as set forth in the airplane operating manual), in feet per minute, of  $0.01V_{50}$  at an altitude at least 1,000 feet above the elevation of the highest ground or obstruction within 10 miles on either side of the intended track to the landing area, or at 5,000 feet, whichever is higher; except that this requirement need not apply to airplanes certificated under the performance requirements of Part 04a of this chapter. This specified rate of climb shall correspond with the airplane's weight attained at the moment of failure of the second engine (assumed to occur 90 minutes from time of departure) or with the weight which may be attained by dumping fuel at the moment of failure of the second engine: *Provided*, That sufficient fuel is retained on board the airplane to reach a point 1,000 feet directly above the landing area.

§ 42.3823 *Special air navigational facilities.* Where special air navigational facilities provide for reliable and accurate identification of high ground or obstruction extending for less than 20 miles along the track, the lateral distance of 10 miles specified in §§ 42.3820 through 42.3822 may be reduced to 5 miles.

§ 42.383 *Landing distance limitations.* (a) Airplanes shall be dispatched only under such conditions that it would be possible, as shown by the still air landing data determined under the pertinent airworthiness requirements and set forth in the airplane operating manual, at a weight corresponding with the maximum weight expected to exist at the time of arrival at the field of intended destination and under standard air conditions for the altitude of such field, to bring the airplane to rest from a point 50 feet directly above the intersection of the obstruction clearance line (as defined in § 42.384) and the landing surface within a total distance not in excess of 60% of the effective length of the landing area (as defined in § 42.384) most suitable for landing in still air.

(b) For every possible condition of wind velocity and direction and the corresponding landing direction required at the field of intended destination by the ground handling characteristics of the airplane type involved, the ratio of landing distance to effective length of landing area shall not be greater than that specified in paragraph (a) of this section, after allowing for the effect on the landing path and roll of not more than 50% of the favorable wind component due to a particular wind condition.

(c) If requirement of paragraph (a) of this section can be met but requirement of paragraph (b) of this section cannot be fully met at a field of intended destination, a flight to such field may be

dispatched under the following or more conservative conditions:

(1) At least one suitable alternate field shall be designated in the flight plan at which requirements of paragraphs (a) and (b) of this section, as modified by § 42.3831 and the appropriate requirements of §§ 42.33 and 42.34, are met.

(2) If requirement of paragraph (b) of this section cannot be met for the wind conditions existing at the time of arrival, the airplane shall proceed to the alternate.

§ 42.3830 *Modified landing distance limitations.* At the option of the operator, consideration of effective length of runway area and all possible wind conditions as prescribed by §§ 42.383 and 42.384 may be omitted: *Provided*, That the distance to bring the airplane to rest from a point 50 feet directly above the beginning of usable landing area, as prescribed in § 42.383 (a), shall not be in excess of 50% of the length of the usable landing area.

NOTE: The relation between the weight of the airplane and the distance necessary to bring the airplane to rest, for various altitudes and wind velocities, is usually available in a convenient form in the airplane operating manual. The length of the longest available runway on the airport may be used as the length of the usable landing area when applying the requirement of this section.

§ 42.3831 *Landing distance at alternate fields.* The condition of § 42.383 shall apply with respect to alternate fields specified in the flight plan, except that in the case of alternate fields the landing distance as defined in that section shall not exceed 70% of the effective length of the landing area.

§ 42.3832 *Modified landing distance limitations at alternate fields.* At his option the operator may, in lieu of the requirements of § 42.3831, apply the requirements of § 42.3830, except that in case of alternate fields the landing distance as defined in § 42.3830 shall not exceed 60% of the length of the usable landing area. (See note under § 42.3830.)

§ 42.384 *Definition of effective length of landing area.* The effective length of the landing area shall be the distance from the point where the obstruction clearance line, as defined below, intersects the landing surface at the far end of the landing area.

The obstruction clearance line is a line drawn tangent to or clearing all obstructions showing in a profile of the approach area, as defined below. The obstruction clearance line is further limited by having a slope to the horizontal of 1/20 as it approaches the landing area.

The approach area, as used in this section shall be an area symmetrical about a center line coinciding with and prolonging the center line of the runway except that where there is a multiplicity of parallel runways or a large area continuously available for landing the center line of the approach area shall coincide with the most probable landing path for instrument approaches. The approach area shall be considered as extending longitudinally from the landing area out to the most remote obstacle touched by

the obstruction clearance line, assuming the center line of the approach area in plan view to be straight for at least 1,500 feet from the intersection of the obstruction clearance line with the landing surface, and thereafter continuing in a path consistent with the instrument approach procedures for the runway in question or, where such procedures are not specified, consistent with turns of at least 4,000 feet radius; and as extending laterally to a distance of 200 feet on either side of its center line at the point of intersection of the obstruction clearance line with the landing surface, with this distance increasing uniformly to 500 feet on either side of the center line of the area at a longitudinal distance of 1,500 feet from the intersection of the obstruction clearance line with the landing surface, and maintaining a distance of 500 feet from the center line thereafter.

14. By adding a new § 42.39 to read as follows:

§ 42.39 *Route requirements—(a) VFR night operations.* Aircraft carrying passengers at night shall be operated only over lighted civil airways. The airports to be used shall be equipped with adequate lighting facilities.

(b) *IFR operations.* Aircraft carrying passengers under instrument flight rule conditions shall be operated only over civil airways equipped with radio ranges or equivalent facilities.

(c) *Off-airway operations.* Aircraft may be operated other than as provided in paragraphs (a) and (b) of this section only if the Administrator finds that instrument navigation may be conducted over the entire route by the use of radio direction finding equipment installed in the aircraft and he has approved such operation in the air carrier operating certificate.

15. By amending § 42.42 to read as follows:

§ 42.42 *Operations manual.* The air carrier shall prepare and maintain an operations manual to guide flight and ground personnel in the conduct of flight operations, and to inform such personnel regarding their duties and responsibilities. The manual shall be in a form and content approved by the Administrator, and be furnished to all persons designated by the Administrator or Board. All copies shall be kept current. A copy of the operations manual shall be kept at the principal operations office, and pertinent portions thereof shall be carried in the aircraft.

16. By repealing § 42.43.

17. By amending § 42.9 to read as follows:

§ 42.9 *Definitions.*

§ 42.91 *Air carrier.* Air carrier means any citizen of the United States who undertakes, whether directly or indirectly, or by a lease, or by any other arrangement, the carriage by aircraft of persons or property as a common carrier for compensation or hire or the carriage of mail by aircraft in commerce, whether such commerce moves wholly by aircraft or partly by aircraft and partly by other forms of transportation, between any of

the following places: a place in any State of the United States, or the District of Columbia, and a place in any other State of the United States, or the District of Columbia; places in the same State of the United States through the air space over any place outside thereof; places in the same Territory or possession of the United States, or the District of Columbia; a place in any State of the United States, or the District of Columbia, and any place in a Territory or possession of the United States, and a place in any other Territory or possession of the United States; a place in the United States and any place outside thereof.

§ 42.92 *Irregular air carrier.* Irregular air carrier includes any air carrier subject to the provisions of § 292.1 of the Economic Regulations.

These amendments are proposed under the authority of Title VI of the Civil Aeronautics Act of 1938, as amended.

(Secs. 205 (a), 601 through 605, inclusive, 52 Stat. 984, 1007-1010; 49 U. S. C. 425 (a), 551-555)

### DEPARTMENT OF COMMERCE

#### Office of International Trade

[Case No. 31]

#### TRANSCONTINENTAL PRODUCTS CO.

#### ORDER SUSPENDING LICENSING PRIVILEGES

In the matter of Transcontinental Products Co., 401 Broadway, New York 13, New York.

This proceeding was instituted on November 28, 1947, by the transmission of a charging letter to the above named respondent wherein the Office of International Trade charged said respondent with having solicited from its agents or prospective customers in foreign countries blank order forms and false statements as to end uses of steel products for the purpose of submitting fictitious orders and data to the Office of International Trade in order to secure export licenses for steel products. Said charging letter gave notice that a hearing on such charges would be held before a Compliance Commissioner of the Office of International Trade in the Office of the Field Service, Department of Commerce, 350 5th Avenue, New York City, at 10:00 a. m. on December 10, 1947. Respondent appeared personally at such hearing, at which the Compliance Commissioner received the evidence presented, and the Compliance Commissioner, after due consideration of the record, on January 13, 1948, filed his report in the matter.

It appears from the report of the Compliance Commissioner that respondent is a co-partnership consisting of Marvin Morris and Stanley B. Frisch and that respondent and said partners, each of whom appeared and testified at the hearing, were on October 3, 1947, and for some time prior thereto, and still are, engaged in the business of exporting and procuring orders for exporting materials to purchasers in various countries.

It further appears from the report of the Compliance Commissioner that on or about October 3, 1947, with full knowledge and participation by each of said partners, respondent transmitted to some 26 or more of its foreign agents or prospective customers a letter informing the addressees in substance that, under new regulations issued by the Office of International Trade, the issuance of export licenses for steel would depend on the

end use to which the steel would be devoted in the country of destination and also upon a showing by the applicant that he had actual foreign orders stating proper end uses; that such addressees were advised that, to facilitate the securing of export licenses for shipment of steel to them, each of them should forward to respondent 10 blank purchase order forms on their letterheads, and should also send to respondent a separate undated letter in quintuplicate stating that the end use for all steel ordered by them was "reconstruction of ports, highways and transportation facilities, building of hospitals and institutions of public welfare, for governmental agencies, etc."; that such addressees were further advised that, in stating end uses, they should "use your judgment but give good reasons bearing in mind that they do not have to be true—use your imagination"; and that said addressees were further informed that respondent held export licenses which could be used to effect shipment of those types of steel set forth in respondent's price list which required export license.

The Compliance Commissioner has found that such blank purchase order forms were requested with the intention of filling in such forms and of submitting them to the Office of International Trade with the objective of evading the regulations issued by the Office of International Trade; that such false information as to end use was solicited for the purpose of submitting the same to the Office of International Trade as a means of securing export licenses to which respondent would not otherwise be entitled and thus for the purpose of violating said regulations; and that it was the announced intention of respondent to use export licenses already in its possession to effect shipment under new orders in violation of said regulations.

The report of the Compliance Commissioner also discloses that it was the practice of respondent to make application for export licenses for commodities for quantities far in excess of the quantities for which respondent held firm orders and, specifically, that in one case respondent filed an application for an export license for 2,850 water closet sets when in fact it had on hand firm orders for only 25 sets, thus misrepresenting material facts in violation of the applicable export regulations.

It therefore appears, as found by the Compliance Commissioner, that respondent has demonstrated the unreliability of representations made, or to be made, by it to the Office of International Trade and has set in motion forces which, unless and until counteracted, make it impossible for the Office of International Trade to determine whether relevant information submitted by respondent is true or false. The Compliance Commissioner has accordingly recommended that respondent and its constituent partners and their affiliates be denied export licensing privileges, including the privilege of using general licenses, for a period of six months and thereafter until respondent has transmitted to each recipient of the above-mentioned letter of October 3, 1947, a further letter, satisfactory in form and substance to the Office of International Trade, retracting the several false representations and requests made in said letter of October 3, 1947, and affirmatively advising all such recipients of the necessity of complying with export regulations. The findings and recommendations of the Compliance Commissioner have been carefully considered together with the record in this matter and it appears that such findings are supported by the record and that such recommendations should be adopted. Now, therefore, *It is ordered as follows:*

(1) All presently outstanding export licenses issued to respondent are hereby revoked and respondent shall immediately return all such licenses to the Office of International Trade for cancellation.

(2) The right of respondent to apply for, secure or use any form of export license, including general license, is suspended for a period of six months from the date of this order and thereafter until respondent has complied with the requirements of the immediately following paragraph.

(3) Respondent shall prepare and submit to the undersigned for his approval a form of letter for transmittal to each recipient of respondents foreign circular letter of October 3, 1947, retracting each of the false representations and requests made in said letter of October 3, 1947, and affirmatively advising each such recipient that it is necessary scrupulously to supply correct information and otherwise to comply in all particulars with the export regulations. Upon securing un-

dersigned's approval, respondent shall sign and mail to each recipient of said letter of October 3, 1947, a copy of such approved letter of retraction and shall file with the Office of International Trade an affidavit to the effect that such has been done.

(4) The above paragraphs numbered 1 and 2 shall apply not only to respondent but to each of the constituent partners individually and to any other partnership of which either is or shall become a member and to any corporation or other organization in which the partners or either of them have, or shall obtain, a controlling interest or in which either of them has or shall obtain a position in which it is part of his duties to supply information necessary for obtaining export licenses.

This order is subject to the right of respondent to appeal therefrom, within 10 days from receipt of a copy thereof, to the Director of the Export Supply Branch, Office of International Trade.

(Sec. 6, 54 Stat. 714, 55 Stat. 206, 56 Stat. 463, 58 Stat. 671, 59 Stat. 270, 60 Stat. 215, 61 Stat. 214, 61 Stat. 321; Pub. Law 395, 80th Cong.; 50 U. S. C. App. and Sup. 701, 702; E. O. 9630, Sept. 27, 1945, 10 F. R. 12245; E. O. 9919, Jan. 3, 1948, 13 F. R. 59)

[Case No. 32]

DESCO IMPORT AND EXPORT CORP.

ORDER SUSPENDING LICENSING PRIVILEGES

In the matter of Desco Import and Export Corporation, 11 Broadway, New York 4, New York.

This proceeding was instituted on November 28, 1947 by the transmission of a charging letter to the above-named Company (herein referred to as respondent) wherein the Office of International Trade charged said respondent with having violated section 6 of the act of July 2, 1940 (54 Stat. 714), as amended, and the regulations promulgated thereunder, by making false representations in applying for an export license, by transferring to another company the export license so obtained, and by using or causing to be used such export license to effect exportation of a larger quantity of material than was authorized by such license.

Such charging letter gave notice that a hearing on such charges would be held before a Compliance Commissioner of the Office of International Trade in the Office of the Field Service, Department of Commerce, 350 Fifth Avenue, New York, N. Y. at 10:00 a. m. on December 11, 1947. The hearing was held as scheduled, at which time respondent appeared personally, evidence was presented, and the hearing was adjourned. It was resumed, on notice, at 10:00 a. m. on January 19, 1948, in the Office of the Depart-

ment of Commerce, Temporary T Building, Washington, D. C., respondent appeared personally and by attorney, and further evidence was received. The Compliance Commissioner, after due consideration of the record, on February 9, 1948, filed his report in the matter.

It appears from the findings of the Compliance Commissioner that respondent is a corporation of which Mr. Paul Dib is president and principal stockholder; that respondent was during March, 1947, and for some time prior thereto, and still is, engaged in the business of exporting and procuring orders for exportation and that Mr. Paul Dib was during March 1947, and still is, in principal charge of this activity; that in or about March, 1947, respondent submitted to the Office of International Trade an application for a license to export 500 tons of concrete reinforcing steel bars for its account when in fact it had no order for such commodity and had no intention of using an export license, if granted, for its own account; that on or about March 13, 1947 the Office of International Trade issued to respondent an export license bearing No. 799671, pursuant to the above-mentioned application, authorizing respondent to export for its own account 100 tons of concrete reinforcing steel bars; that in violation of the export regulations issued pursuant to section 6 of the act of July 2, 1940 (54 Stat. 714), respondent thereafter transferred said license to Delta Mercantile Company, Inc., 11 Broadway, New York, N. Y.; and that thereafter, on or about May 3, 1947, respondent, acting as agent for Delta Mercantile Company, Inc., exported on the purported authority of said export license, 687 tons of concrete reinforcing steel bars, in further violation of said export regulations.

The Compliance Commissioner has, on the basis of the above-mentioned findings, recommended that respondent and its President, Mr. Paul Dib, be denied the privilege of applying for and obtaining export licenses for a period of five months. The findings and recommendations of the Compliance Commissioner have been carefully considered together with the record in this matter and it appears that such findings are supported by the record and that such recommendations should be adopted. Now, therefore, *It is ordered* as follows:

(1) All presently outstanding export licenses issued to respondent are hereby revoked and respondent shall immediately return all such licenses to the Office of International Trade for cancellation.

(2) The right of respondent and of its President, Mr. Paul Dib, to apply for or obtain export licenses is suspended for a period of five months from the date of this order.

(3) The terms of this order, insofar as they apply to respondent, shall likewise apply to any individual, firm or corporation owning or controlling respondent, owned or controlled by respondent, or under common ownership or control with respondent; and the terms of this order, insofar as they apply to Mr. Paul Dib, shall likewise apply to any partnership in which he is or shall become a member, to any corporation in which he

[Case No. 33]

DELTA MERCANTILE CO., INC.

ORDER SUSPENDING LICENSING PRIVILEGES

In the matter of Delta Mercantile Company, Inc., 11 Broadway, New York 4, New York.

This proceeding was instituted on December 1, 1947, by the transmission of a charging letter to the above-named company (herein referred to as respondent) wherein the Office of International Trade charged said respondent with having violated sections 6 of the act of July 2, 1940 (54 Stat. 714), as amended, and the regulations promulgated thereunder, by exporting approximately 1,374,046 pounds of concrete reinforcing steel bars without first having obtained an export license therefor.

Such charging letter gave notice that a hearing on such charge would be held before a Compliance Commissioner of the Office of International Trade in the Office of the Field Service, Department of Commerce, 350 Fifth Avenue, New York, N. Y., at 2:00 p. m. on December 11, 1947. The hearing was held as scheduled, at which time the respondent appeared personally, evidence was presented, and the hearing was adjourned. It was resumed, on notice, at 10:00 a. m. on January 19, 1948, in the Office of the Department of Commerce, Temporary T Building, Washington, D. C., respondent appeared personally and by attorney, and further evidence was received. The Compliance Commissioner, after due consideration of the record, on February 9, 1948, filed his report in the matter.

It appears from the findings of the Compliance Commissioner that respondent is a corporation which was during March 1947 and for some time prior thereto, and still is, engaged in the business of exporting and procuring orders for exportation; that on or about May 3, 1947, respondent, acting through its agent, Desco Import and Export Corpo-

ration, 11 Broadway, New York, N. Y., exported approximately 1,374,046 pounds of concrete reinforcing steel bars under the purported authority of an export license bearing No. 799671 which had been issued by the Office of International Trade to Desco Import and Export Corporation, authorizing the latter corporation to export, on its own behalf, 100 tons of concrete reinforcing steel bars; and that respondent thus violated the export regulations, issued pursuant to section 6 of the act of July 2, 1940 (54 Stat. 714), by acquiring and using an export license issued to another company and also by exporting a quantity of material in excess of that quantity licensed.

The Compliance Commissioner has, on the basis of the above-mentioned findings, recommended that respondent be denied the privilege of applying for and obtaining export licenses for a period of five months. The findings and the recommendations of the Compliance Commissioner have been carefully considered with the record in this matter and it appears that such findings are supported by the record and that such recommendations should be adopted. Now, therefore, *It is ordered as follows:*

(1) All presently outstanding export licenses issued to respondent are hereby revoked and respondent shall immediately return all such licenses to the Office of International Trade for cancellation.

(2) The right of respondent to apply for or obtain export licenses is suspended for a period of five months from the date of this order.

(3) The terms of this order shall apply to any individual, firm or corporation owning or controlling respondent, owned or controlled by respondent, or under common ownership or control with respondent.

This order is subject to the right of respondent to appeal therefrom, within 10 days from receipt of a copy thereof, to the Director of the Export Supply Branch, Office of International Trade.

(Sec. 6, 54 Stat. 714, 55 Stat. 206, 56 Stat. 463, 58 Stat. 671, 59 Stat. 270, 60 Stat. 215, 61 Stat. 214, 61 Stat. 321; Pub. Law 395, 80th Cong.; 50 U. S. C. App. and Sup. 701, 702; E. O. 9630, Sept. 27, 1945, 10 F. R. 12245; E. O. 9919, Jan. 3, 1948, 13 F. R. 59)

COLLECTION OF ESTIMATED DUTIES**

FEBRUARY 17, 1948.

Reference is made to the daily buying rates which section 522 (c) of the Tariff Act of 1930 (31 U. S. C., 372 (c)) directs the Federal Reserve Bank of New York to certify to the Secretary of the Treas-

ury. The Federal Reserve Bank of New York has announced its intention to certify for dates beginning on February 10, 1948, two rates for the French franc, designated "official" and "free."

The Federal Reserve Bank advises that these rates are to be certified only for the franc for continental France, and only for dates beginning on February 10, 1948, pending receipt of further information which will enable it to certify rates for the franc for other French territory and rates for both continental France and other French territory for the period from January 26, 1948, to February 9, 1948, inclusive, during which certification has been suspended.

In any case where it is necessary to determine the proper rate or rates for the French franc for the purpose of the assessment and collection of duties on merchandise exported to the United States on or after January 26, 1948, from continental France or any French territory, the appraiser and collector shall, respectively, withhold appraisement and suspend liquidation pending receipt of further instruction.

The higher of the two certified rates for the French franc will be published in the weekly Treasury decisions and shall be used solely for the purpose of calculating estimated duties on exports from continental France.
