OF AMERICA

A PROCLAMATION

WHEREAS American mothers have ever nurtured the ideals which foster and enrich a true democracy; and

WHEREAS it is a cherished American custom to dedicate one day each year to expressions of affection for our own mothers and for all mothers of the Nation; and

WHEREAS the Congress, by a joint resolution approved May 8, 1914 (38 Stat. 770), gave formal recognition to that custom by designating the second Sunday in May as Mother's Day and paid tribute to the contribution made by American mothers to the home and the community:

NOW, THEREFORE, I, HARRY S. TRUMAN, President of the United States of America, do hereby request the observance of Sunday, May 9, 1948, as Mother's Day, and I direct the officials of the Government to display the flag on all Government buildings on that day. I also call upon the people of the United States to give public and private expression to the esteem in which our country holds its mothers through the display of the flag at their homes and other suitable places, through prayers at their places of worship, and through appropriate manifestations of honor, devotion, and love.

TITLE 14—CIVIL AVIATION

Chapter I—Civil Aeronautics Board

[Civil Air Regs., Amdt. 04b-9]

PART 04b—AIRPLANE AIRWORTHINESS;
TRANSPORT CATEGORIES

MINIMUM FLIGHT CREW

Adopted by the Civil Aeronautics Board at its office in Washington, D. C., on the 14th day of April 1948.

Section 04b.603 of the civil air regulations establishes the minimum flight crew as that number of persons necessary for safe operation during day contact flight. This regulation does not specifically refer to the Administrator as the determining authority. Moreover, the determination of a minimum basic crew is limited to that required for day contact operations. In order to clarify the original intent of this regulation it is proposed to revise the wording so as specifically to point out that the Administrator would be the determining authority. In addition, since it is obvious that modern aircraft certificated under the transport category requirements of Part 04b are not intended either by the manufacturer or user to be used solely for day contact operations, it is desirable to require that the minimum crew be determined on the basis of what is required in the interest of safety for all operations authorized.

Interested persons have been afforded an opportunity to participate in the making of this amendment, and due consideration has been given to all relevant matter presented.

In consideration of the foregoing the Civil Aeronautics Board hereby amends Part 04b of the civil air regulations (14 CFR, Part 04b, as amended) effective May 19, 1948:

By amending § 04b.603 to read as follows:

§ 04b.603 *Minimum flight crew.* The minimum flight crew shall be established by the Administrator as that number of persons which he finds necessary for safety in the operations authorized under § 04b.604. This finding shall be based upon the work load imposed upon individual crew members with due consideration given to the accessibility and the ease of operation of all necessary controls by the appropriate crew members.

(Secs. 205 (a), 601, 603, 52 Stat. 984, 1007, 1009; 49 U. S. C. 425 (a), 551, 553)

PART 41—CERTIFICATION AND OPERATION
RULES FOR SCHEDULED AIR CARRIER
OPERATIONS OUTSIDE CONTINENTAL
LIMITS OF THE UNITED STATESADDITIONAL FLIGHT CREW COMPLEMENT FOR
FOREIGN AND OVERSEAS SCHEDULED AIR
CARRIER AIRCRAFT

Adopted by the Civil Aeronautics Board at its office in Washington, D. C., on the 14th day of April 1948.

The Civil Aeronautics Board on October 6, 7, and 8, 1947, conducted a public hearing on the question of whether, and under what circumstances and conditions, if any, additional flight crew complement should be required on air carrier aircraft. Upon due consideration of the evidence presented the Board has determined that certain changes in the present requirements of the regulations affecting scheduled foreign and overseas air carrier aircraft are desirable. These changes will be treated separately with respect to the particular airman involved.

A. *Flight engineer.* Part 41 presently requires flight engineers when "the design of the aircraft used or the type of operation is such as to require engineer personnel." In the light of present operating circumstances it appears desirable to promulgate additional specifications to more clearly define the circumstances under which a flight engineer should be required. In the hearing above referred to extensive testimony was presented to the Board with respect to the desirability of a flight engineer on various aircraft, such as the Douglas DC-6, the Boeing 377, and the Douglas DC-4. As a result of this testimony the Board has concluded that the multiplicity of instrumentation and complexity of operational controls on certain of these aircraft limit the pilot's ability to focus his attention on all of the critical instruments and controls. It is believed that a competent flight engineer, by assuming certain mechanical duties, will enable the pilot to concentrate his attention on the actual flight of the aircraft, radio operation, and receipt of traffic control clearances particularly during instrument conditions where this is imperative. The Board considers that a flight engineer is required on aircraft of the size and complexity of the Douglas DC-6 and the Boeing 377. Under certain operating conditions, such as some extended over water flights, the safe operation of the Douglas DC-4 may require the assignment of a flight engineer. Therefore, the regulation herein established will require flight engineers on aircraft such as the Boeing 377 and Douglas DC-6, and will permit the Administrator

to require flight engineers on other aircraft including the DC-4 where such airman are essential for safe operation. The Board is cognizant that compliance with this amendment may require the training of additional personnel and for this reason has established the date of December 1, 1948 as being sufficiently advanced to constitute a firm compliance date.

B. *Flight navigator.* Part 41 presently requires a crew member holding a flight navigator certificate in all operations where "celestial navigation is necessary, either as a primary or secondary means of navigation." In view of the varying interpretations of this requirement, it is deemed desirable to establish more specific requirements for full time flight navigators. Current changes in navigational aids and the constant improvement in the quantity, usage, and efficiency of such aids require flexibility in any rule governing the assignment of flight navigators. For this reason, the Administrator, who has all of the information relative to the navigational aids available for use on a particular route or segment thereof, should continue to make the determination as to when a flight navigator is required based upon the necessity for the use of celestial navigation or such other specialized means of navigation as cannot adequately be accomplished from the pilot's station.

C. *Flight radio operator.* Part 41 presently requires a flight radio operator "when radiotelegraphy is used for communication with ground stations during flight." In view of the varying interpretations of this requirement, the Board feels it desirable to provide more specifically that where radiotelegraphy is necessary the sole duty of an airman shall be that of a flight radio operator, and that such operator shall be required over that segment of the route for which radiotelegraphy is necessary for communication with ground stations.

In order to adequately determine the full required crew complement this amendment also provides that the Administrator shall make such determination by applying the established standards on proving flights to be conducted by the carrier under his direction. Where proving flights have already been accomplished the Administrator shall make this determination upon a review thereof, taking into account the latest information available. Where such review is inconclusive, the Administrator may make such additional investigation as is necessary.

Interested persons have been afforded an opportunity to participate in the making of this amendment, and due consideration has been given to all relevant matter presented.

In consideration of the foregoing the Civil Aeronautics Board hereby amends Part 41 of the civil air regulations (14 CFR, Part 41, as amended) effective May 19, 1948:

1. By adding a new § 41.309 to read as follows:

§ 41.309 *Composition of flight crew.* The minimum flight crew shall be deter-

mined by the Administrator on the proving flights by applying the standards hereinafter prescribed for each route or segment thereof to be flown. Where such flights already have been accomplished, the Administrator shall make the determination by review of the proving flights and such other inspection as he finds necessary. The kind and number of crew members thus determined shall be specified in the air carrier operating certificate.

2. By amending § 41.310 to read as follows:

§ 41.310 *When required.* An airman holding a flight radio operator certificate shall be required solely for communication for that route or segment thereof over which the Administrator has determined that radio-telegraphy is necessary for communication with ground stations during flight.

3. By amending § 41.320 to read as follows:

§ 41.320 *When required.* After December 1, 1948, an airman holding a flight engineer certificate shall be required solely as a flight engineer on all aircraft certificated for more than 80,000 pounds maximum take-off weight, and on all other aircraft certificated for more than 30,000 pounds maximum take-off weight where the Administrator has found that the design of the aircraft used or the type of operation is such as to require engineer personnel for the safe operation of the aircraft.

4. By amending § 41.330 to read as follows:

§ 41.330 *When required.* An airman holding a flight navigator certificate shall be required solely for navigation for that route or segment thereof for which the Administrator has determined that:

- (a) Celestial navigation is necessary, or
- (b) Other specialized means of navigation necessary for the safe conduct of flight cannot be adequately accomplished from the pilot station.

(Secs. 205 (a), 601, 604, 52 Stat. 984, 1007, 1010; 49 U. S. C. 425 (a), 551, 554)

[Civil Air Regs., Amdt. 41-20]

PART 41—CERTIFICATION AND OPERATION RULES FOR SCHEDULED AIR CARRIER OPERATIONS OUTSIDE CONTINENTAL LIMITS OF THE UNITED STATES

COCKPIT CHECK LIST

Adopted by the Civil Aeronautics Board at its office in Washington, D. C., on the 16th day of April 1948.

The present civil air regulations do not require all air carrier operators to provide and maintain cockpit check lists and procedures for all aircraft operated in air transportation.

The purpose of this amendment is to require the maintenance of cockpit check lists for the operation involved in a readily accessible location in the pilot compartment of each aircraft. These check lists will set forth the procedures to be followed by the flight crew for a particular make and model aircraft prior to starting engines, prior to take-off, prior to landing, and for powerplant emergencies.

Interested persons have been afforded an opportunity to participate in the making of this amendment, and due consideration has been given to all relevant matter presented.

In consideration of the foregoing, the Civil Aeronautics Board hereby amends Part 41 of the civil air regulations (14 CFR, Part 41, as amended) effective May 20, 1948:

By adding a new § 41.29 to read as follows:

§ 41.29 *Cockpit check list.* (a) The air carrier shall provide for each make and model aircraft a cockpit check list, approved by the Administrator, adapted to each operation in which the aircraft is to be utilized. An approved check list shall be installed in a readily accessible location in the cockpit of each aircraft and shall be appropriately used by the flight crew for each flight.

PART 42—NONSCHEDULED AIR CARRIER CERTIFICATION AND OPERATION RULES

COCKPIT CHECK LIST

Adopted by the Civil Aeronautics Board at its office in Washington, D. C., on the 16th day of April 1948.

The present civil air regulations do not require all air carrier operators to provide and maintain cockpit check lists and procedures for all aircraft operated in air transportation.

The purpose of this amendment is to require the maintenance of cockpit check lists for the operation involved in a readily accessible location in the pilot compartment of each aircraft. These check lists will set forth the procedures to be followed by the flight crew for a particular make and model aircraft prior to starting engines, prior to take-off, prior to landing, and for powerplant emergencies.

Interested persons have been afforded an opportunity to participate in the making of this amendment, and due consideration has been given to all relevant matter presented.

In consideration of the foregoing, the Civil Aeronautics Board hereby amends

Part 42 of the civil air regulations (14 CFR, Part 42, as amended) effective May 20, 1948:

By amending § 42.14 to read as follows:

§ 42.14 *Cockpit check list.* (a) The air carrier shall provide for each make and model aircraft a cockpit check list, approved by the Administrator, adapted to each operation in which the aircraft is to be utilized. An approved check list shall be installed in a readily accessible location in the cockpit of each aircraft and shall be appropriately used by the flight crew for each flight.

(b) The cockpit check list shall include procedures prior to starting engines, prior to take-off, prior to landing, and for powerplant emergencies. (Secs. 205 (a), 601, 604, 52 Stat. 984, 1007, 1010; 49 U. S. C. 425 (a), 551, 554)

PART 61—SCHEDULED AIR CARRIER RULES

ADDITIONAL FLIGHT CREW COMPLEMENT FOR DOMESTIC SCHEDULED AIR CARRIERS

Adopted by the Civil Aeronautics Board at its office in Washington, D. C., on the 14th day of April 1948.

The Civil Aeronautics Board on October 6, 7, and 8, 1947, conducted a public hearing on the question of whether, and under what circumstances and conditions, if any, additional flight crew members should be required on air carrier aircraft. Testimony was presented relative to the desirability of requiring a flight engineer, a flight radio operator, and a flight navigator, individually and collectively as part of the required flight crew complement. Upon due consideration of the evidence presented the Board has determined that the present regulations which specially require only a first and second pilot should be amended, so as to require a flight engineer under specified circumstances. The Board's conclusions for not requiring any further additions to the flight crew personnel are also set forth below:

A. *Flight engineer.* In the hearing above referred to extensive testimony was presented to the Board with respect to the desirability of a flight engineer on various aircraft such as the Douglas DC-6, the Boeing 377, and the Douglas DC-4. As a result of this testimony the Board has concluded that the multiplicity of instrumentation and complexity of operational controls on certain of these aircraft limit the pilots' ability to focus attention on all the critical instruments and controls. It is believed that a competent flight engineer by assuming certain mechanical duties will enable pilots to concentrate on actual flight of the aircraft, radio operation, and receipt of traffic control clearances, particularly during instrument conditions where this is imperative. The Board considers that the flight engineer is re-

quired on aircraft of the size and complexity of the Douglas DC-6 and the Boeing 377. Under certain operating conditions such as some extended over water flights the safe operation of the Douglas DC-4 may require the assignment of a flight engineer. Therefore, the regulation herein established will require flight engineers on aircraft such as the Douglas DC-6 and the Boeing 377, and will permit the Administrator to require flight engineers on other aircraft, including the DC-4, where such airmen are essential for safe operation. The Board is cognizant that compliance with this amendment may require the training of additional personnel and for this reason has established the date of December 1, 1948, as being sufficiently advanced to constitute a firm compliance date.

B. Flight navigator and flight radio operator. The Board, after carefully evaluating the testimony with respect to the value of flight navigators and flight radio operators on flights within the continental limits of the United States, has determined that the navigational aids available to pilots, and the dependability of radiotelephony are such as to obviate the need for professional assistance to the pilots in these specialized fields.

Interested persons have been afforded an opportunity to participate in the making of this amendment, and due consideration has been given to all relevant matter presented.

In consideration of the foregoing the Civil Aeronautics Board hereby amends Part 61 of the civil air regulations (14 CFR, Part 61, as amended) effective May 19, 1948:

By amending § 61.56 to read as follows:

§ 61.56 *Flight engineer; when required.* After December 1, 1948, an airman holding a flight engineer certificate shall be required solely as a flight engineer on all aircraft certificated for more than 80,000 pounds maximum take-off weight, and on all other aircraft certificated for more than 30,000 pounds maximum take-off weight where the Administrator has found that the design of the aircraft used or the type of operation is such as to require engineer personnel for the safe operation of the aircraft. (Secs. 205 (a), 601, 604, 52 Stat. 984, 1007, 1010; 49 U. S. C. 425 (a), 551, 554)

C., on January 28, 1948 at which all interested persons were given an opportunity to be heard; and

Whereas, an opportunity was provided for any interested persons appearing at the hearing to submit proposed findings and conclusions within 15 days after the close of the hearing, no such proposed findings and conclusions have been filed, and the time for filing has expired; and

Whereas, upon reviewing all the evidence adduced in this proceeding and after giving consideration to the provisions of the act, particularly sections 5 and 8 thereof, I have concluded that the recommendation of the Committee for a minimum wage rate in the shoe manufacturing and allied industries in Puerto Rico, as defined, was made in accordance with law, is supported by the evidence adduced at the hearing, and taking into consideration the same factors as are required to be considered by the Committee, will carry out the purposes of sections 5 and 8 of the act; and

Whereas, I have set forth my decision in a document entitled "Findings and Opinion of the Administrator in the Matter of the Recommendation of Special Industry Committee No. 5 for Puerto Rico for a Minimum Wage Rate in the Shoe Manufacturing and Allied Industries in Puerto Rico," a copy of which may be had upon request addressed to the Wage and Hour Division, United States Department of Labor, Washington 25, D. C.; now therefore, it is ordered, that:

SUBPART B—DOMESTIC TELEGRAPH SPEED OF SERVICE STUDIES

DEFINITIONS

§ 64.201 *Message center.* A "message center" means any telegraph operating room whose primary function is sending and receiving telegrams by telegraph, telephone, tube, or belt conveyor and which is usually separated from any public office on the premises. In the case of main offices comprised of several operating units, such as telephone centers, tieline centers and trunk centers, all such units together shall be considered one message center.

§ 64.202 *Delivery office.* A "delivery office" is an office operated by the company or its agent from which messages are dispatched for physical delivery by messengers and where more than 50% of the routes are business routes.

§ 64.203 *Business routes.* A "business route" means any route whose due-out time is controlled by a business message.

§ 64.204 *Sent wire numbers.* A "sent wire number" means the channel message serial number assigned, usually beginning each day with the number 1, to messages over each channel each day.

§ 64.205 *Time filed.* "Time filed" (except in the case of multiple address messages) means the time a message is first accepted at an office for transmission. In the case of messages received in an office by messenger, the time the messenger returns to the office from the pickup run shall be the time filed. In the case of messages filed at the counter, the time the transaction with the sender is completed shall be the time filed. In the case of messages filed or corrected over the telephone, the time the transaction with the sender is completed shall be the time filed. In the case of messages filed over a tieline, the time the message is correctly received and is available for release from the receiving position shall be the time filed. *Provided, however,* That if an acknowledgment is sent before the message is available for release from the receiving position, the time the message is acknowledged shall be the time filed. In the case of multiple address messages where individual copies of the message are not filed, the time filed shall be no later than the time duplicating and addressing, prior to transmission, is completed.

§ 64.206 *Time delivered.* "Time delivered" means the time a message is delivered to the addressee (or to a person authorized to receive the message for the addressee) or the first attempt to make such delivery.

§ 64.207 *First attempt.* "First attempt" means: In the case of teleprinter tieline delivery, the time transmission was attempted but could not be made because the addressee did not answer or, having answered, requested later trans-

mission; in the case of telephone delivery, the time the addressee's telephone is reported to be busy or not answered or the addressee is not available to receive the message. In all such cases there shall be noted on the message the "first attempt" time and the reason for non-delivery.

§ 64.208 *Message center speed of service.* Message center speed of service is the interval of time between the receipt of a message in a message center to the time of transmission from that message center.

§ 64.209 *Origin to destination speed of service.* Origin to destination speed of service in the case of messages delivered by private customer tieline or by telephone, means the interval between time filed to time delivered. In the case of messages delivered by messenger it means the sum of three separate studies herein provided as follows: (a) Time filed to time received at delivery offices, (b) time received at delivery offices to time routed out and (c) time routed out to time delivered.

GENERAL PROVISIONS

§ 64.211 *Instructions for the conduct of domestic telegraph speed of service studies and the submission of reports thereof.* The Western Union Telegraph Company shall conduct monthly speed of service studies in accordance with the provisions of §§ 64.201 through 64.283 in the following twenty-five cities: Atlanta, Ga.; Baltimore, Md.; Boston, Mass.; Buffalo, N. Y.; Charlotte, N. C.; Chicago, Ill.; Cincinnati, Ohio; Cleveland, Ohio; Dallas, Tex.; Denver, Colo.; Detroit, Mich.; Jacksonville, Fla.; Kansas City, Mo.; Los Angeles, Calif.; Minneapolis, Minn.; New Orleans, La.; New York, N. Y.; Oakland, Calif.; Philadelphia, Pa.; Pittsburgh, Pa.; Portland, Oreg.; Richmond, Va.; St. Louis, Mo.; San Francisco, Calif.; and Washington, D. C., and shall file with the Commission, not later than the twentieth day of each succeeding month, reports thereof in quadruplicate, in accordance with § 1.560 of the Commission's rules and regulations.

§ 64.222 *Messages to be marked with a filing time.* All classes of messages which were marked with a filing time according to company practice on or after March 1, 1943 shall continue to be marked with a filing time as prescribed in § 64.205.

§ 64.223 *Computation of daily load.* The 24-hour daily average message load shall be determined on the basis of messages handled the previous month on all days, Monday through Friday, required to be studied.

§ 64.224 *Types of messages to be tallied at message centers.* Of the messages selected, as hereinafter provided, the following shall be tallied by time intervals on speed of service daily tally sheets: Government (priority full rate, and serial), Priority Messages, X and RX, Money Order, CND, Full Rate, Serial and CAK. Service messages shall be tallied as Full Rate Messages.

§ 64.225 *Suspension of tallying.* Speed of service tallies shall not be taken with

respect to messages handled on the following holidays: New Year's, Independence Day, Labor Day, Thanksgiving, and Christmas; and on the day immediately preceding each of the foregoing holidays. In the event of a serious and unusual communication emergency such as that caused by flood, earthquake, strike by respondent's employees, or fire, tallying may be suspended. In such cases, however, the Commission shall be promptly notified of any city at which studies are suspended. Any suspension of tallying pursuant to the provisions of this paragraph shall be noted and explained on the monthly summary forms filed with the Commission.

§ 64.226 *Company instructions to Offices making studies.* Two copies of all general instructions and of any amendments thereto issued to field offices for the purpose of complying with § 1.560 and §§ 64.201 through 64.283 of these rules and regulations shall be filed with the Commission upon issuance.

§ 64.227 *Summary reports.* The results of tallies of speed of service shall be summarized monthly at each city on forms approved by the Commission. The individual monthly summaries shall then be forwarded to the headquarters office of the carrier for completion of F. C. C. Form 338-A, Monthly Summary of Message Center Speed of Service, and on F. C. C. Form 340-A Monthly Summary of Origin to Destination Speed of Service.

MESSAGE CENTER SPEED OF SERVICE; TALLY ROUTINE FOR MANUALLY OPERATED MESSAGE CENTERS

§ 64.241 *Tallies; when made.* Speed of Service tallies at manually operated message centers shall be made after 7 p. m. the day of transmission but not later than the day following transmission of the messages under study except that any tally to be made on a holiday may be postponed to the following day.

§ 64.242 *Volume of messages to be tallied.* At each office studied there shall be tallied for each day, Monday through Friday, not less than one-quarter of 1% of the total 24-hour daily average of manually sent and received messages, provided, however, that for each such day a minimum of 75 messages shall be tallied by time intervals.

§ 64.243 *Selection of message groups.* (a) Groups of messages to be sampled shall be selected for tallying in the following manner:

(1) Each compartment designation of the file cabinets containing messages transmitted over teleprinter or multiplex circuits, excluding those designations or compartments containing only messages sent over tieline circuits, shall be entered on a card. Where large groups of messages, such as government messages, have in the past been filed separately from other messages without subdivision, subdivisions of such groups shall be made and a designation for each subdivision entered on a card so that there will be a representative number of cards for the number of messages in such groups.

(2) The entire set of cards shall be thoroughly shuffled daily and a number

withdrawn to determine the groups of messages from which tallies will be made. These cards shall be withdrawn and used in the order of their appearance in the pack, so that the cumulative number of messages sent between 9:01 a. m. and 6:00 p. m. contained in the compartments or groups represented by the cards used is approximately 2½% of the average 24-hour daily manually sent and received messages.

§ 64.244 *Selection of messages to be tallied.* (a) The individual messages to be tallied from the compartments or groups selected shall be determined from the sent wire number as follows:

(1) A set of ten cards shall be prepared, each card bearing one of the digits 0 to 9.

(2) The ten cards shall be thoroughly shuffled face down. The digit appearing on the bottom card shall determine the messages to be tallied. Each message in the selected compartments or groups transmitted between 9:01 a. m. and 6:00 p. m. on which the sent wire number ends in the digit selected shall be tallied.

(3) If, in accordance with the foregoing instructions, the required 75 message tallies by time interval are not obtained upon examination of the messages in the compartments or groups originally selected (containing approximately 2½% of the average 24-hour daily sent and received messages) a number of additional message compartments shall be selected and examined in the order their designations appear in the shuffled pack. In no event, however, shall it be necessary to select and examine more than 3½% of the total average 24-hour sent and received messages. If experience shows that examination of 3½% of the total average 24-hour daily manually sent and received messages does not produce 75 tallies by time interval, however, additional messages in the compartments examined shall be selected and tallied by simultaneous use of one or more additional digits. These digit numbers shall be selected in order from the bottom of the pack of digit cards. In no case, however, shall less than 2½% of the average 24-hour daily sent and received messages be examined for tallying when two or more digits are used.

§ 64.245 *Measurement of time interval.* (a) The time interval for tallied messages shall be measured as follows:

(1) In the case of messages received from public offices or message centers over teleprinter or multiplex circuits manually operated at the transmitting end, the time interval shall be measured from digit time to time sent.

(2) In the case of messages received from public offices or message centers over Morse circuits, the time interval shall be measured from the received time placed on the message by the Morse operator to the time sent.

(3) In the case of messages received or filed in the message center over the telephone, the interval shall be measured from the received or filing time to the time sent.

(4) In the case of messages filed over customer tieline circuits, the interval shall be measured from the filing time at the message center to the time sent.

(5) In the case of messages received by other means, the interval shall be measured from the time received at the message center to the time sent.

(6) In cases where messages are subject to the RQ-BQ handling, the interval shall be measured from digit or received time, as the case may be, to the last BQ time.

§ 64.246 *Exclusion of messages from tally.* Messages other than those specified in § 64.224, or on which the office speed of service cannot be accurately measured as specified in § 64.245, shall not be tallied. These messages include among others: Wire, Press, Day Letter, Night Letter, Deadhead, Cable, Wireless, Radio EFM, messages received through reperforator relay, confirmation copies of messages previously delivered, messages accepted and marked on the relay copy "subject to office hours" and delayed for that reason and messages sent from the message center over Morse circuits or customer tieline circuits or commission agency circuits. All messages to be excluded from the tally shall be specifically listed in the company instructions issued to field offices.

MESSAGE CENTER SPEED OF SERVICE; TALLY ROUTINE FOR REPERFORATOR OPERATED MESSAGE CENTERS

§ 64.251 *Volume of messages to be tallied.* At each office studied there shall be tallied by time intervals each day between 9:01 a. m. and 6:00 p. m. Monday through Friday, a number of messages not less than one-half of 1% of the 24-hour daily average number of messages sent over multiplex reperforator circuits, *Providing, however,* That for each day a minimum of 75 messages shall be tallied by time intervals.

§ 64.252 *Selection of messages to be tallied.* (a) The selection of messages to be tallied shall be made in the following manner:

(1) The name or designation of each outgoing multiplex channel associated with a secondary reperforator and line transmitter shall be entered on a list of consecutively numbered cards. In the case of lightly loaded channels, two or more channels with adjacent line transmitters may be grouped together if it is practicable to make studies of these channels at the same time. The designation of these channels on the list or cards prepared shall be so arranged as to facilitate examination of the line transmitters.

(2) All observations of line transmitters shall be made in the order of their appearance on the list or cards prepared. Where a single line transmitter is being observed, the first message which it is possible to tally by time interval, of the types enumerated in § 64.224, shall be tallied. Where more than one line transmitter is being observed, the clerk shall tally, from all channels under observation, a total number of messages equal to the number of channels in the group being observed. Thereafter, the tally clerk shall move to the next succeeding channel or channels, observations continuing until the required number of messages have been tallied. If after observing any transmitter or group of transmitters for a period of five minutes

the required number of messages have not been tallied, the clerk shall, nevertheless move to the next succeeding channel or channels. If, after all listed channels have been examined, an insufficient number of messages have been tallied observations shall be continued starting with the first channel observed that day. The last channel examined each day shall be the first channel examined the following day.

(3) If it is not necessary to observe messages continuously between 9:01 a. m. and 6:00 p. m. to secure the required number of tallies, the hours during which tallies are made shall be staggered from day to day so that each hour of the interval from 9:01 to 6:00 p. m. will be sampled as often as every other hour of that interval.

§ 64.253 *Measurement of time interval.* The following messages shall be tallied by time interval: Messages received in the message center over circuits manually operated at the sending terminal and reperforator operated at the message center and messages which show that they originated in the message center (such as originating tieline or telephoned messages) and which were manually transmitted from a local sending position. In the case of messages received in the message center over circuits manually operated at the sending terminal and reperforator operated at the message center the interval shall be measured from the digit time to the time transmission is completed through the line transmitter. In the case of messages which show that they originated in the message center (such as originating tieline or telephoned messages) the interval shall be measured from the filing time to the time transmission is completed through the line transmitter.

ORIGIN TO DESTINATION SPEED OF SERVICE; TALLY ROUTINE FOR MESSAGES DELIVERED BY TELEPRINTER PRIVATE TIELINE

§ 64.261 *Volume of messages to be tallied.* At each office studied there shall be tallied for each day, Monday through Friday, not less than 1% of the 24-hour daily average load of messages sent to teleprinter private tieline customers: *Provided, however,* That for each day a minimum of 15 messages shall be tallied by time intervals.

§ 64.262 *Selection of message groups.* (a) Groups of messages to be sampled shall be selected for tallying in the following manner:

(1) Each compartment designation of the file cabinets, containing messages transmitted over teleprinter private tielines, shall be entered on a card. Where large groups of messages, such as government messages, have in the past been filed separately from other messages without subdivision, subdivisions of such groups shall be made and a designation for each subdivision entered on a card so that there will be a representative number of cards for the number of messages in such groups.

(2) The entire set of cards shall be thoroughly shuffled daily and a number withdrawn to determine the groups of messages from which tallies will be made. These cards shall be withdrawn and used

in the order of their appearance in the pack, so that the cumulative number of messages sent between 9:01 a. m. and 6:00 p. m. contained in the compartments or groups represented by the cards used is approximately 10% of the average 24-hour daily sent messages.

§ 64.263 *Selection of messages to be tallied.* (a) The individual messages to be tallied from the compartments or groups selected shall be determined from the sent wire number as follows:

(1) A set of ten cards shall be prepared, each card bearing one of the digits 0 to 9.

(2) The ten cards shall be thoroughly shuffled face down. The digit appearing on the bottom card shall determine the messages to be tallied. Each message in the selected compartments or groups transmitted between 9:00 a. m. and 6:00 p. m. on which the sent wire number ends in the digit selected shall be tallied.

(3) If, in accordance with the foregoing instructions, the required 15 message tallies by time interval are not obtained from examination of the messages in the compartments or groups originally selected (containing approximately 10% of the average 24-hour daily sent messages) a number of additional message compartments shall be selected and examined in the order their designations appear in the shuffled pack. In no event, however, shall it be necessary to select and examine more than 15% of the total average 24-hour sent messages. If experience shows that examination of 15% of the total average 24-hour daily sent messages does not produce 15 tallies by time interval, however, additional messages in the compartments examined shall be selected and tallied by simultaneous use of one or more additional digits. These digit numbers shall be selected in order from the bottom of the pack of digit cards. In no case, however, shall less than 10% of the average 24-hour daily sent messages be examined for tallying when two or more digits are used.

§ 64.264 *Exclusion of messages from tally.* Messages, other than those specified in § 64.224, shall not be tallied. These messages include among others: Wire, Press, Day Letter, Night Letter, Deadhead, Cable, Wireless, Radio EFM, messages accepted and marked on the relay copy "subject to office hours" and delayed for that reason. All messages to be excluded from the tally shall be specifically listed in the company instructions issued to field offices.

§ 64.265 *Measurement of time interval.* The interval of time to be measured is from the time filed to time delivered as defined in §§ 64.205 to 64.207, inclusive.

TALLY ROUTINE FOR MESSAGES DELIVERED
BY TELEPHONE

§ 64.271 *Volume, selection and measurement.* The type of tally routine prescribed for messages delivered by teleprinter private tieline, §§ 64.261 to 64.265, inclusive, shall apply in the selection and tally of messages delivered by telephone, except that the individual messages to be tallied from the compartments or groups of telephoned messages shall be determined from the received wire number.

TALLY ROUTINE FOR MESSAGES DELIVERED
BY MESSENGER

§ 64.281 *Procedure for manually operated message centers.* The type of tally routine prescribed for messages delivered by teleprinter private tieline, §§ 64.261 to 64.265, inclusive, shall apply in the selection and tally of messages manually transmitted to teleprinter operated delivery offices, except that the interval of time to be measured is from time filed to time transmitted to the delivery office.

§ 64.282 *Procedure for reperforator offices.* The volume, selection and measurement of messages at reperforator offices shall be conducted as follows:

(a) *Volume of messages to be tallied.* At each office studied there shall be tallied by time intervals each day, Monday through Friday, a number of messages not less than 1% of the 24-hour daily average number of messages sent over teleprinter operated delivery office circuits, *Providing, however,* That for each day a minimum of 15 messages shall be tallied by time intervals.

(b) *Selection of messages to be tallied.* The selection of messages to be tallied shall be made in the following manner:

(1) The name or designation of each outgoing teleprinter operated delivery office channel associated with a secondary reperforator and line transmitter shall be entered on a list of consecutively numbered cards. In the case of lightly loaded channels, two or more channels with adjacent line transmitters may be grouped together if it is practicable to make studies of these channels at the same time. The designation of these channels on the list of cards prepared shall be so arranged as to facilitate examination of the line transmitters.

(2) All observations of line transmitters shall be made in the order of their appearance on the list or cards prepared. Where a single line transmitter is being observed, the first message which it is possible to tally by time interval, of the types enumerated in § 64.224, shall be tallied. Where more than one line transmitter is being observed, the clerk shall tally, from all channels under observation, a total number of messages equal to the number of channels in the group being observed. Thereafter, the tally clerk shall move to the next succeeding channel or channels, observations continuing until the required number of messages have been tallied. If, after observing any transmitter or group of transmitters for a period of five minutes the required number of messages have not been tallied, the clerk shall, nevertheless move to the next succeeding channel or channels. If, after all listed channels have been examined, an insufficient number of messages have been tallied observations shall be continued starting with the first channel observed that day. The last channel examined each day shall be the first channel examined the following day.

(3) If it is not necessary to observe messages continuously between 9:01 a. m. and 6:00 p. m. to secure the required number of tallies, the hours during which tallies are made shall be staggered from day to day so that each hour of

the interval from 9:01 a. m. to 6:00 p. m. will be sampled as often as every other hour of that interval.

(c) *Measurement of time interval.* The interval of time to be measured is from time filed to the time transmission is completed through the line transmitter.

§ 64.283 *Procedure at delivery offices.* The following procedure shall be followed at delivery offices:

(a) The selection of messages to be tallied shall be made in the following manner:

(1) At all business offices in the cities enumerated in § 64.221, regularly maintaining route sheets, records shall be kept on route sheets showing whether the message controlling the due-out time is a business message. Each business route sheet shall indicate the due-out time according to established routing times, the time sent out, and the time returned. The due-out time shall be computed from the digit time at teleprinter operated offices working with manual relays and from the time received at other offices.

(2) Each city with 8 or more business offices shall separate the offices into four groups, designated Group 1, Group 2, Group 3, and Group 4; each group comprising approximately the same number of offices. Cities with less than 8 business offices shall be designated Group 1.

(3) Four times monthly in different weeks the headquarters office shall choose a four-hour period between the hours of 9:01 a. m. and 6:00 p. m. during a weekday, Monday through Friday, exclusive of holidays, to study routing and delivery performance on business routes at one of the four groups of offices. The field offices shall be notified of the selected group not earlier than the day following the day selected for study that a routing and delivery performance report shall be prepared from the route records of the day selected. The date and hours of study and the group of offices to be studied shall be alternated in such manner that the field offices cannot anticipate the period to be studied and that all the various hours and days will receive study from time to time, and that each group of offices is studied once a month.

(4) In each delivery office involved all business routes sent out during the hours selected shall be used to prepare routing and delivery performance studies.

(b) The measurement of time intervals shall be made in two steps as follows:

(1) The "time received" at the delivery office to time routed out shall, in the case of routes carrying only one message delivery, comprise the interval from the digit or received time, as the case may be, to the time routed out. Where two or more messages comprise a single route, the interval from the digit or received time of the control message on the route to the time routed out shall be divided by two. The weighted average routing out time for all messages tallied shall be computed by multiplying the time interval for each route as prescribed above by the number of messages on that route and dividing the total of such computations by the total number of messages.

(2) The time routed out to time delivered shall comprise the interval from the time the route was dispatched to the time the messenger returned, divided by two. The weighted average delivery time for all messages tallied shall be computed as prescribed in paragraph (b) (1) of this section.

FEDERAL COMMUNICATIONS COMMISSION

[47 CFR, Part 3]

[Docket No. 8774]

CONTRACTS FOR RESERVATION OF TIME UPON SALE OF STATION

SUPPLEMENTAL NOTICE OF PROPOSED RULE MAKING

In the matter of promulgation of §§ 3.109, 3.241 and 3.641 containing special rules relating to contracts providing for reservation of time upon sale of a station.

1. Supplemental notice is hereby given of proposed rule making in the above-entitled matter.

2. On February 6, 1948, the Commission released a Notice of Proposed Rule Making in the above-entitled matter. The final date for submitting comments on the proposals embodied in this Notice was March 8, 1948. It is now proposed to modify the original proposal by renumbering proposed §§ 3.109 (b) (5), 3.241 (b) (5) and 3.641 (b) (5) as 3.109 (b) (6),

3.241 (b) (6) and 3.641 (b) (6), adding the language set out below, and to include in the proposed rules new §§ 3.109 (b) (5), 3.241 (b) (5) and 3.641 (b) (5).

3. The new §§ 3.109 (b) (5), 3.241 (b) (5) and 3.641 (b) (5) would require that modifications of contracts, agreements and understandings of the type referred to in these sections contain an express provision setting forth a definite expiration date of such contracts, agreements and understandings. Since sections 301 and 309 (b) of the Communications Act of 1934, as amended, make it clear that licensees do not possess any property rights in a license, it appears to be clearly contrary to the public interest to permit the rights granted by licenses to be the subject of encumbrance by the creation of interests enduring in perpetuity or for unreasonably long periods of time. It is, therefore, proposed to promulgate §§ 3.109 (b) (5), 3.241 (b) (5) and 3.641 (b) (5), as follows:

(5) An express provision setting forth a definite expiration date of the contract, arrangement or understanding. Such expiration date shall not extend beyond June 1, 1963 and shall in no event extend beyond the expiration date originally provided for in any such contract, agreement or understanding, in the event that such expiration date is a date prior to June 1, 1963.

4. The notice of proposed rule making in the above-entitled matter provided that contracts of the type referred to were required to be modified by the inclusion of an express provision giving the licensee the right at any time to terminate the contract, arrangement or understanding upon the payment of a lump sum or periodic payments. These provisions which were formerly included in §§ 3.109 (b) (5), 3.241 (b) (5) and 3.641 (b) (5) and which are now included in §§ 3.109 (b) (6), 3.241 (b) (6) and 3.641 (b) (6) have been amended by the addition of language clarifying the requirement of those provisions by providing that the amount initially fixed should thereafter decrease as the amount of time reserved is decreased by performance of the contract. Sections 3.109 (b) (6), 3.241 (b) (6) and 3.641 (b) (6) are proposed to read as follows (New text appears in brackets):

(6) An express provision giving to the licensee the right at any time to terminate the contract, arrangement or understanding at his own discretion upon the payment of a lump sum or periodic payments [and providing that the amount initially fixed shall thereafter decrease as the amount of time reserved is decreased by performance of the contract]. Any such payment should not be so unduly large as to constitute in practice an effective deterrent to the licensee exercising the right. In determining whether the amount is unduly large, the Commission will consider the amount by which consideration in return for the transfer of the station was decreased by reason of the reservation of time or the present value of the radio time still reserved and unused as of the date of the exercise of the [right of termination].

5. The proposed rules are issued under the authority of sections 301, 303 (r),

307, 308 (b), 309 and 319 of the Communications Act of 1934.

6. Except as hereinabove set forth the notice of proposed rule making released February 6, 1948 in the above-entitled matter, is unchanged.

7. Any interested person who is of the opinion that the proposed rules should not be adopted, or should not be adopted in the form set forth, may file with the Commission on or before April 29, 1948, a written statement or brief setting forth his comments. The Commission will consider all comments, briefs and arguments presented before taking final action with respect to the proposed rules.

8. Fifteen copies of each brief or written statement should be filed as required by § 1.764 of the Commission's rules and regulations.

Adopted: April 14, 1948.

Released: April 14, 1948.

REPORTS (FILING OF INFORMATION, CONTRACTS, PERIODIC REPORTS, ETC.)

NOTICE OF PROPOSED RULE MAKING

1. Notice is hereby given of proposed rule making in the above-entitled matter.

2. The Commission's proposed new rules and amendments are set forth in an appendix attached to this notice and, among other things, codify and amend the provisions of Commission Order No. 105 which upon adoption of a final order herein shall be revoked and cancelled.

3. The proposed rules are issued under the authority of sections 211 and 219 of the Communications Act of 1934, as amended.

4. Any interested person who is of the opinion that the proposed rules should not be adopted, or should not be adopted in the form set forth, may file with the Commission on or before May 17, 1948, a written statement or brief setting forth his comments. The Commission will consider all comments that are received before taking final action in the matter, and if any comments are submitted which appear to warrant the holding of an oral argument, notice of the time and place of such oral argument will be given.

5. In accordance with the provisions of § 1.764 of Part 1 of the Commission's rules relating to organization and practice and procedure, an original and 14 copies of all statements, briefs or comments filed shall be furnished the Commission.

the charges for inbound communications, shall be filed not later than 15 days after any such change is agreed upon.

7. The instruction and forms referred to in the above section are set forth below:

INSTRUCTIONS

1. Show the information for international telegraph communications from and to U. S. gateway cities of origin and exit only, except where messages from and to other places in the continental United States result in a different foreign participation.

2. Show the total charge per word for each class of message for transmission over the normal route or routes between the continental United States and each foreign country (except countries to which the domestic word-count applies) and the division of such charge in the detail specified in the traffic arrangements between respondent and carriers or administrations in foreign countries with which respondent interchanges such messages.

3. Information with respect to classes of messages other than full rate may be shown by means of percentages of the full rate in a footnote reference when such information can be fully disclosed by such means.

4. Indicate clearly the purpose or the name of the carrier or administration for which each portion of the total charge is intended.

5. Separate forms should be used when there is a difference in the total charges or a difference in the division of charges due to a different route or because of a subdivision of the foreign country of destination or origin, unless such differences can be shown clearly by appropriate footnote references.

6. With respect to inbound communications, the total charge per word collected from users (in local currency) should be shown on the inbound form in all cases where the respondent is in a position to obtain accurate, current information; in all other cases, such information as is obtainable may be shown in any convenient manner.

7. Modifications of the form where necessary to fit particular circumstances may be made provided that the same general outline is followed.

8. If any information called for is not furnished, state the reasons for failure to furnish it.

9. The information requested should be filed in single copy.

Highway No. 91 crosses the extreme northwest corner. Travel over this highway is heavy during the winter months. It is one of the main routes between Utah-Nevada points and southern California. State Highway No. 127 enters Baker from northern points of interest such as Death Valley and old ghost mining camps along the west line of the section. These lands are practically level and lie at an elevation of about 920 feet.

3. There are no public services available on these lands at the present time. It is probable that electric power and telephone lines could be extended from Baker as the demand occurs and when materials become more readily available. The common practice in the area is to purchase water. Adequate supplies for

domestic use are available at Baker. A population increase will undoubtedly lead to the development of additional water supplies. It is necessary to drill to a depth of around 210 feet in order to secure a dependable supply.

4. Pursuant to § 257.9 of the Code of Federal Regulations (43 CFR 257, Circ. 1647, May 27, 1947, and Circ. 1665, November 19, 1947), a preference right to a lease is accorded to those applicants whose applications (a) were regularly filed under the regulations issued pursuant to the act, prior to 2:10 p. m. on December 30, 1947, and (b) are for the type of site for which the land subject thereunder has been classified. As to such applications, this order shall become effective upon the date on which it is signed.

5. As to the land not covered by the applications referred to in paragraph 4, this order shall not become effective to permit the leasing of such land under the small tract act of June 1, 1938, cited above, until 10:00 a. m. on June 17, 1948. At that time such land shall, subject to valid existing rights and the provisions of existing withdrawals, become subject to application, petition, location, or selection, as follows:

(a) *Ninety-day period for other preference right filings.* For a period of 90 days from 10:00 a. m. on June 17, 1948, to close of business on September 16, 1948, inclusive, to (1) application under the small tract act of June 1, 1938, by qualified veterans of World War II, for whose service recognition is granted by the act of September 27, 1944 (58 Stat. 747) as amended May 31, 1947 (61 Stat. 123, 43 U. S. C. sec. 279), and by other qualified persons entitled to credit for service under the said act, subject to the requirements of applicable law, and (2) application under any applicable public land law, based on prior existing valid settlement right and preference rights conferred by existing law or equitable claims subject to allowance and confirmation. Application by such veterans shall be subject to claims of the classes described in subdivision (2).

(b) *Advance period for simultaneous preference right filings.* All applications by such veterans and persons claiming rights superior to those of such veterans filed at 2:10 p. m. on December 30, 1947, or thereafter, up to and including 10:00 a. m. on June 17, 1948, shall be treated as simultaneously filed.

(c) *Date for nonpreference right filings authorized by the public land laws.* Commencing at 10:00 a. m. on September 17, 1948, any of the land remaining unappropriated shall become subject to application under the small tract act by the public generally.

(d) *Advance period for simultaneous nonpreference right filings.* Applications under the small tract act by the general public filed at 2:10 p. m. on December 30, 1947, or thereafter, up to and including 10:00 a. m. on September 17, 1948, shall be treated as simultaneously filed.

6. Veterans shall accompany their applications with certified copies of their certificates of discharge, or other satis-

factory evidence of their military or naval service. Other persons entitled to credit for service shall file evidence of their right to credit in accordance with 43 CFR 181.36 (Circ. 1588). Persons asserting preference rights, through settlement or otherwise, and those having equitable claims, shall accompany their applications by duly corroborated affidavits in support thereof, setting forth in detail all facts relevant to their claims.

7. All applications referred to in paragraphs 4 and 5, which shall be filed in the district land office at Sacramento, California, shall be acted upon in accordance with the regulations contained in § 295.8 of Title 43 of the Code of Federal Regulations (Circ. 324, May 22, 1914, 43 L. D. 254), to the extent that such regulations are applicable. Applications under the small tract act of June 1, 1938, shall also be governed by the regulations contained in Part 257 of Title 43 of the Code of Federal Regulations.

8. Lessees under the small tract act of June 1, 1938, will be required, within a reasonable time after execution of the lease, to construct upon the leased land, to the satisfaction of the appropriate officer of the Bureau of Land Management authorized to sign the lease, improvements which, in the circumstances are presentable, substantial, and appropriate for the use for which the lease is issued. Leases will be for a period of 5 years at an annual rental of \$5 for home, cabin, health and convalescent sites, payable for the entire lease period in advance of the issuance of the lease. The rental for business sites will be in accordance with a schedule of graduated charges based on gross income, with a minimum charge of \$20, payable yearly in advance, the remainder, if any, to be paid within 30 days after each yearly anniversary of the lease.

9. All of the lands will be leased in tracts of approximately 5 acres each being approximately 330 by 660 feet, the longer dimension extending north and south. The tracts, whenever possible must conform in description with the rectangular system of surveys as one compact unit; i. e., the E $\frac{1}{4}$ or the W $\frac{1}{2}$ of a quarter-quarter-quarter section.

10. Preference right leases referred to in paragraph 4 will be issued for the land described in the application, irrespective of the direction of the tract, provided the tract conforms or is made to conform to the area and dimensions specified above.

11. Where only one 5-acre tract in a 10-acre subdivision is embraced in a preference right application, the Acting Manager is authorized to accept applications for the remaining 5-acre tract extending in the same direction so as to fill out the subdivision, notwithstanding the direction of the tract may be contrary to that specified in paragraph 9.

12. All inquiries relating to these lands shall be addressed to the Acting Manager, District Land Office, Sacramento 5, California.

[Docket No. 8509]

WEST ALLIS BROADCASTING CO.

MEMORANDUM OPINION AND ORDERS

In re application of West Allis Broadcasting Company, West Allis, Wisconsin, Docket No. 8509, File No. BP-5800, for construction permit.

The Commission has under consideration a petition filed December 22, 1947 by Vincent S. Barker and Gladys J.

Barker, a partnership, d/b as Freeport Broadcasting Company, licensee of Station WFRL, Freeport, Illinois, requesting reconsideration of the Commission's action of November 28, 1947 (publicly announced on December 1, 1947) in granting the above-entitled application of West Allis Broadcasting Company for a permit to construct a new standard broadcast station in West Allis, Wisconsin. The West Allis Broadcasting Company filed an opposition to said petition on January 2, 1948, and both parties subsequently filed supplementary pleadings.

Although no question as to the timeliness of the petition has been raised by the pleadings, the Commission must on its own motion consider its jurisdiction in the premises, inasmuch as the petition was not filed until the twenty-first day after the public announcement of the decision of grant. Section 405 of the Communications Act provides that in radio matters the time within which application for rehearing may be made shall be limited to twenty days after the effective date of the order,¹ and the Commission has held that it has no power to extend the statutory period. Memorandum Opinion and Order May 8, 1947, in re application of Wilton E. Hall (WAIM), Anderson, South Carolina (3 Pike and Fischer Radio Regulation 170). However, the instant case is peculiar in that the twentieth day fell on a Sunday, and the petition was filed on the next business day. It remains to be determined, therefore, whether § 1.703 of the Commission's rules (providing that when the last day of a prescribed period falls on a Sunday or holiday, it is not to be included in the computation of time) serves to extend the twenty day period under the circumstances. In judicial interpretations of a similar statute (limiting the time for appeal from district courts of the United States to circuit courts of appeal), it had long been held that when the last day of the period fell on a Sunday or holiday, the filing of the appeal on the next business day was too late. *Walker v. Hazen*, 90 F. 2d 502, 503 (App. D. C., 1937). However, after the adoption of the Federal Rules of Civil Procedure, it was held that Section 6 (a) thereof (similar to § 1.703 of the Commission's rules) effectuated a change in the prior judicial constructions of the jurisdictional statute and made the method of computing time conform to that prescribed by the common law rule and standard business practice. *Wilson v. Southern Ry. Co.*, 147 F. 2d 165 (C. C. A. 5, 1945); *Sherwood Bros. v. District of Columbia*, 113 F. 2d 162 (App. D. C., 1940). It has also been indicated that the method of computing time in administrative proceedings should be more liberal than in purely judicial proceedings.

¹Section 402 (c) of the Communications Act provides, "Unless a later date is specified by the Commission as part of its decision, the decision complained of shall be considered to be effective as of the date on which public announcement of the decision is made at the office of the Commission in the city of Washington". Hence, since a later date was not specified by the Commission in its order of grant, the twenty day period is to be computed from the date on which public announcement was made.

Sherwood Bros. v. District of Columbia, 113 F. 2d 162 (App. D. C., 1940). It is held, therefore, that, under section 405 of the Communications Act and §§ 1.390 (a) and 1.703 of the Commission's rules, the instant petition was timely filed, and that the Commission has jurisdiction to consider it.

On the merits, it appears that the petition should be granted. Under the Commission's Standards the proposed operation at West Allis, Wisconsin, would involve objectionable interference with petitioner's Station WFRL in Freeport, Illinois, and measurements submitted by the West Allis Broadcasting Company are not sufficient to show that the conductivity between Freeport and West Allis is different from that shown in the Standards, since the measurements were not taken over the exact path involved. Further, petitioner has also submitted measurements which, although likewise having little or no probative value, purport to show that the interference would be greater than as computed under the Standards.

Accordingly, *It is ordered*, This 14th day of April 1948 that, pursuant to section 309 (a) of the Communications Act of 1934, as amended, and § 1.390 of the Commission's rules, the said petition by Freeport Broadcasting Company (WFRL) be, and it is hereby, granted; that the grant of the above-entitled application of West Allis Broadcasting Company be, and it is hereby, set aside; and that said application of West Allis Broadcasting Company be, and it is hereby, designated for hearing, at a time and place to be designated by subsequent order of the Commission upon the following issues:

1. To determine the technical and other qualifications of the applicant corporation, its officers, directors and stockholders, to construct and operate the proposed station.

2. To determine the areas and populations which may be expected to gain or lose primary service from the operation of the proposed station and the character of other broadcast service available to those areas and populations.

3. To determine whether the operation of the proposed station would involve objectionable interference with Station WFRL, Freeport, Illinois, or with any other existing broadcast stations and, if so, the nature and extent thereof, the areas and populations affected thereby, and the availability of other broadcast service to such areas and populations.

4. To determine whether the operation of the proposed station would involve objectionable interference with the service proposed in any pending applications for broadcast facilities and, if so, the nature and extent thereof, the areas and populations affected thereby, and the availability of other broadcast service to such areas and populations.

5. To determine whether the installation and operation of the proposed station would be in compliance with the Commission's rules and Standards of Good Engineering Practice Concerning Standard Broadcast Stations.

It is further ordered, That Vincent S. Barker and Gladys J. Barker, a partnership, d/b as Freeport Broadcasting Com-

pany, licensee of Station WFRL, Freeport, Illinois, be, and it is hereby, made a party to this proceeding.

VHF SPECIALIZED OPERATIONAL RADIO-
TELEPHONE MARITIME MOBILE SERVICE

DECISION TO ESTABLISH SERVICE

APRIL 8, 1948.

The Commission today announced that it had decided to establish on a regular basis at the earliest opportunity a VHF (very high frequency) radiotelephone maritime mobile service to serve the operational and business needs of ships. The Commission also announced that in connection with this decision it had granted applications for certain land radiotelephone stations and a number of associated radiotelephone stations aboard tugboats.

Although experimental grants have previously been made to communication common carriers looking toward the development of regularized VHF operation in the established public maritime mobile service in direct connection with public service land wire telephone systems, the action here announced is exceptional in the marine field.

The grants here concerned are designated as class 2 experimental. However, the Commission emphasized that these grants are not for the purpose of determining whether a proposed service should be established on a regular basis, but rather are to be construed as being of an interim character to permit operation in order that the Commission may thereby be furnished with information needed for the formulation of rules to govern the service on a regular basis.

Many questions remain unsolved in relation to the operations authorized by these grants and other similar ones that may be made, and, of necessity, the Commission reserves to itself authority to make such changes in the authorizations as from time to time seem to it necessary or desirable.

It is proposed to make further interim grants in this specialized service to all

eligible applicants, but until further determinations are made such grants will not be for use on a common carrier basis. The establishment of this service will not preclude further common carrier experimentation on the one duplex channel (2 frequencies) now being used for such experimental purposes.
