(a) Warehouse receipts must be issued in the form prescribed by the producer, must be properly endorsed in blank so as to vest title in the holder, and must be issued by an approved warehouse.

(b) Each warehouse receipt must set forth the facts that the flaxseed is insured for not less than market value against the hazards of fire, lightning, inherent explosion, windstorm, cyclone and tornado, or in lieu of this statement it must have stamped or printed thereon the word “Insured.”

(c) Each warehouse receipt, or the warehouseman’s supplemental certificate (if separately issued by the warehouseman) must show the gross weight, grade, dockage, test weight and all grading factors determined in accordance with the Official Grain Standards of the United States for Flaxseed, and must show whether the flaxseed arrived by rail, truck or barge. When the quantity is determined by weight, a bushel shall be 56 pounds of flaxseed, inclusive of dockage. In determining the quantity of sacked flaxseed by weight, a deduction of 3/4 of a pound for each sack will be made.

When the quantity of flaxseed is determined by measurement, a bushel will be 1.5 cubic feet of flaxseed tested 56 pounds per bushel, fractional pound of test weight to be disregarded and the quantity determined will be the following percentages of the quantity determined for 56-pound flaxseed.

For flaxseed testing Percentage

The percentage of dockage shall be determined and the weight of such dockage shall be deducted from the gross weight of the flaxseed in determining the net quantity available for loan or purchase.

For loan or purchase at the full basic support rates shown in the above schedule, the flaxseed must have been shipped on a domestic interstate freight rate basis. On any flaxseed shipped at other than the domestic interstate freight rate basis, the support rate at the designated terminal market will be reduced by the difference between the freight paid plus tax and the domestic interstate freight rate plus tax.

The foregoing schedule of basic support rates applies to flaxseed which has been shipped by rail or water from a country shipping point to any designated terminal market, as evidenced by paid freight bills duly registered for transit privileges. Provided, That in the event the amount of paid-in freight is insufficient to guarantee the minimum proportional domestic interstate freight rate from the terminal market, there shall be deducted from the applicable terminal support rate the difference between the amount of freight actually paid in and the amount required to be paid in to guarantee outbound movement at the minimum proportional domestic interstate freight rate. The warehouse receipt must be accompanied by the receipted freight bills, or, (1) a statement as indicated below signed by the warehouseman, (2) a certificate of the warehouseman containing such information, or, (3) such form of certification as may be approved by CCC.

(c) Warehouse charges. The warehouse receipt and the flaxseed represented thereby may be subject to lien for warehouse charges only from May 1, 1950, or the date the warehouse charges begin, whichever is later. In the case of flaxseed placed under a warehouse-storage loan, or delivered to CCC in an approved warehouse under a purchase agreement, evidence must be submitted with the warehouse receipt that all warehouse charges, except receiving charges, have been prepaid by January 31, 1951, in the States of Arizona, California, and Texas, and through April 30, 1951, in all other States, or a deduction of 11% cents per bushel will be made from the applicable support rate, and CCC will assume the accrued warehouse charges on the flaxseed. If the flaxseed under farm-storage loan is, upon delivery, of a grade and/or quality for which no support rate has been established, the settlement value shall be the support rate established for the grade and/or quality of the flaxseed when placed under loan, less the difference, if any, at the time of delivery, between the market price for the grade and/or quality placed under loan and the market price of the flaxseed delivered, as determined by CCC.

(2) Purchase agreements. Flaxseed delivered to CCC under a purchase agreement must meet the requirements of flaxseed eligible for loan. The purchase rate per bushel of eligible flaxseed will be the support rate established for the approved point of delivery.

Issued this 19th day of May 1950.

to perform related field administration functions, to arrange for redemptions, and to collaborate in the liquidation of unpledged collateral. The PMA Commodity to the United States Department of Agriculture or any agency thereof, as evidenced by the registrars of indebtedness maintained by the County Committees of the PMA, United States Department of Agriculture, and (d) has executed, and has not breached his obligations under, the Producer's Marketing Agreement (ATFA Form 1-1950), or any other similar agreement.

§ 638.103 Eligible naval stores. "Eligible naval stores" are eligible turpentine, eligible resin and the turpentine and resin content in eligible oleoresin.

§ 638.104 Eligible turpentine. "Eligible turpentine" is gum turpentine which is free from extraneous matter resulting from chemical or other treatment of the resin, or of the oleoresin or the trees from which it came, and (b) conforms as to softening point to not less than Federal Specifications TT-T-801, to wit: A maximum of 0.375 and a minimum of 0.686 at 106 degrees over 60 degrees Fahrenheit.

§ 638.105 Eligible resin. "Eligible resin" is the oleoresin upon which (a) was produced from eligible oleoresin, (b) grades "G" or better, (c) is free and clear from all liens and encumbrances, (d) has not been theretofore pledged for a loan and the beneficial interest in which is always has been in the producer, (e) is free from residual solvents, and (f) conforms as to specific gravity to Federal Specifications 404-1950, to wit: 29.4479. This resin must be Federally inspected and weighed or the weights checked prior to tender for loan.

§ 638.106 Eligible oleoresin. "Eligible oleoresin" is oleoresin (a) which was produced in 1950 by an eligible producer, (b) which is free and clear from all liens and encumbrances, (c) the turpentine or resin content in which has not been theretofore pledged for a loan and the beneficial interest in which is and always has been in the producer, and (d) which conforms as to prescribed quality, and resin of the prescribed grades and quality. When a producer's eligible oleoresin is commingled with oleoresin produced by other producers in the processing operation, the turpentine and resin tendered for loan by the producer as representing the processed equivalent of his eligible oleoresin will be deemed to be otherwise eligible, eligible turpentine and eligible resin produced by such producer.

§ 638.107 Eligible metal drums. "Eligible metal drums" are drums conforming to the specifications for metal drums approved by CCC and on file in the office of the Association.

§ 638.108 Availability of loans. (a) Under the Loan Agreement, CCC will make a loan to the Association for the purpose of enabling the Association to make loans on eligible naval stores in eligible amounts to eligible producers of eligible naval stores produced in 1950. The loan to the Association will be in an amount equal to (1) the amount of loans made by the Association to producers, (2) the administrative and operating expenses, approved by CCC, incurred by the Association in connection with making loans available under the Marketing Agreement, and the handling and preservation of pledged naval stores, (3) the storage charges after naval stores are pledged, (4) an indemnification charge to cover the assumption by CCC of the risk of loss on resin and resin content in oleoresin (the storage rate for turpentine includes insurance).

(b) Each producer desiring to obtain loans will execute a Producer's Marketing Agreement with the Association. Each loan will be secured by a pledge by the producer of an indefeasible interest in the eligible turpentine, eligible resin, or unprocessed turpentine or resin content in eligible oleoresin, and the Association, in turn, will pledge the same to CCC as security for the loan to the Association. Loans on resin will be made only on full drums thereof, and loans on the resin content in oleoresin, only upon the equivalent of full drums thereof. No loan will be made later than December 31, 1950.

(c) Eligible naval stores will be deemed tendered for loan by the producer to the Association only when such naval stores have been (1) processed (except where unprocessed turpentine or resin content in oleoresin is offered for loan, (2) placed in storage by an approved warehouseman has executed a Warehouse Agreement (ATFA Form 2-1950), and (3) offered for loan on a Producer's Offer (ATFA Form 3-1950) with the terms and conditions of the Producer's Marketing Agreement, the producer may make a loan to the Association for the purpose of enabling the Association to make loans on eligible oleoresin (the storage rate for turpentine includes insurance).

(d) The redemption price will be the weighted average amount loaned by Commodity to the Association, including applicable expenses and charges, plus interest at the rate of three percent (3%) per annum.

§ 638.113 Rights of CCC upon delinquency. CCC will have the right at any time after maturity of the loan to sell, assign, transfer and deliver the pledged naval stores to any assignee, and to dispose thereof, at such time, in such manner, and upon such terms and conditions as CCC may determine.

§ 638.114 Disposition of proceeds upon liquidation. CCC will apply the net proceeds from the disposition of pledged naval stores (a) towards satisfaction of accrued interest, (b) towards satisfaction of the principal amount loaned, and (c) towards the satisfaction of any other indebtedness of the Association to CCC.
In the event that any sum remains after application of these amounts, such sum will be returned to the Association by CCC for disposition by the Association to its producer-member participants, or for and in behalf of its producer-members, on an equitable basis as determined by the Association with the approval of CCC.

§ 138.115 Personal liability. The loans are non-recourse, except that any fraudulent representation by the producer or the Association in the loan documents, or in obtaining a loan, will render him or her subject to criminal prosecution under applicable law, and personally liable for the amount by which the proceeds received upon the disposition of the pledged naval stores are less than the amount of indebtedness incurred by the Association with respect thereto.

§ 183.264 Materials for yeast mash. Materials capable of producing spirits which are used in preparing yeast mash shall be weighed or measured by the distiller, who will furnish weight or quantity slips to the storekeeper-gauger and make proper record on Form 1588. If the materials used in the yeast mash are included in the materials weighed or measured by the distiller for use in the production of the main mash, a notation should be made on the slip or document, as the case may be, and a separate record made on Forms 1568 and 1668. Such weight or quantity slips will be filed by the storekeeper-gauger for record and reference purposes.

(Interprets or applies 53 Stat. 321; 26 U.S.C. 2841.)

FERMENTING

§ 183.211 Quantity of mash and beer determined. Storekeeper-gaugers assigned to distilleries will determine the number of gallons of mash in each fermenter at the time of filling and the quantity of beer in each fermenter after fermentation is complete, and will enter the same on Form 1568. They will not be required to determine the strength and gravity of the mash or beer in the fermenting tubs, or to ascertain the number of dry inches.

§ 183.212 Tests of beer and slop. At the time of distillation, the distiller will thoroughly agitate the contents of each fermenter and the storekeeper-gauger will then take a sample of beer from each fermenter to determine the alcoholic content of the beer. He will also take, daily, several representative samples of slop or spent beer after the same has come from the still, and determine the alcoholic content of each sample. He will make the tests of beer and slop and compute the calculated yield in accordance with the instructions on Form 1568.

(Interprets or applies 53 Stat. 313; 26 U.S.C. 2847.)

DISTILLATION

§ 183.214 Gauging of unfinished spirits. At distilleries where spirits, in the course of distillation, are run into tanks in the distillery building for temporary deposit preparatory to completing the distillation thereof, and where twenty-four-hour supervision is maintained by the storekeeper-gauger, a daily gauge of such spirits will not be required. Where twenty-four-hour supervision is not maintained, the storekeeper-gauger, prior to leaving the premises, will gauge (measure and proof) the spirits retained in each tank, make an office record of the quantity and proof of the spirits therein, and attach locks in accordance with § 183.418: Provided, That such tanks are enclosed in a room with operating equipment, in accordance with § 183.24, such room or building will be locked in lieu of gauging the unfinished spirits. Upon his return to the premises the storekeeper-gauger will gauge the spirits in the tanks previously gauged and compare the quantity and proof with the office record. Any material discrepancy will be reported immediately to the district superfec.

RULES AND REGULATIONS

COLLECTION AND REMOVAL OF DISTILLATES, DISTILLED WATER, FUSEL OIL, AND CARBON DIOXIDE GAS FROM DISTILLERY

§ 183.245 Storekeeper-gauger's records. Distillates collected for destruction or for removal for denaturation, in accordance with the provisions of §§ 183.225 to 183.246, will be included in the report of inventory on Form 1688 until gauged and destroyed or removed for denaturation. Distillates held in fuel oil tanks or in storage tanks pending removal, will not be included in the report of inventory of unfinished spirits.

RECOVERY AND REMOVAL OF CARBON DIOXIDE

§ 183.255 Procedure. Carbon dioxide may be recovered from fermenters and removed from distillery premises, provided it is first thoroughly washed or scrubbed and purified to remove the alcohol and condensed water. Where carbon dioxide is recovered, the washwater may be collected in a receiving tank and transferred by pipeline to a fermenter or to a beer well. Where the washwater is transferred to a fermenter, the transfer must be made prior to the testing of the beer by the storekeeper-gauger at the time of dispositions. Where the washwater is transferred to a beer well after the calculated yield has been determined, the alcoholic content, the number of gallons, and the calculated yield thereof, will be determined by the storekeeper-gauger and interlined in Part 1 of Form 1686. The alcoholic content of the washwater will be determined in accordance with an approximate number of gallons will also be interlined in Part 1 of Form 1686. If the washwater is not utilized in the manufacture of distilled spirits, it will be run into the sewer or otherwise disposed of, under the supervision of the storekeeper-gauger. Entry of such disposition will not be made on Forms 1598 and 1686.

§ 183.265 Records. Separate record on Form 1598 will not be required for operations under ordinary practice, but the distiller must note on such record the trade name or style under which he operated during the month and the dates of operation under each. The storekeeper-gauger will make a similar notation on his record, Form 1598. Where spirits are produced under a trade name, the storekeeper-gauger's report of gauge, Form 1520, must show both the real name of the actual distiller and the trade name under which the spirits were produced.

ALTERNATE OPERATIONS AS INSTITUTIONAL ALCOHOL PLANT OR FRUIT DISTILLERY

§ 183.381 Completion of record. The following distiller will complete his record, Form 1598, and the storekeeper-gauger his record, Form 1598, as to the removal of such distilled spirits by the transfer of basic materials and mash and beer in process to the successor, as the case may be, and the removal of all spirits produced by the distiller. If distilled spirits collected in accordance with §§ 183.225 to 183.246, or unfinished spirits are retained on the premises pending resumption of opera-
tions as a registered distillery. The storekeeper-gauger will make a similar notation on his form 1598 for such dis­ tillery. Where the change is brought about by operation of law, the administrator, executor, receiver, trustee, assignee, or other fiduciary may not con­tinue such fiduciary operations unless he has been authorized to do so by the court or other body having jurisdiction of such fiduciary or the court or body having jurisdiction of the district supervisor. Any qualifying documents have been filed and approved. In the case of such change, the fiduciary shall make appropriate notation on form 1598 of his succession, and the date thereof, and the storekeeper­ gau ser will make a similar notation on Form 1598.

STOREKEEPER-GAUGER'S RECORDS AND REPORTS

§ 183.394 Form 1598. The storekeeper­gau ser shall keep a daily record of the distillery operations on Form 1598. U. S. (Interprets or applies 53 Stat. 332, § 26 U. S. C. 2911, 2977)

SYSTEM OF FILING

§ 183.396 Monthly records. The store­ keeper-gauger's monthly records on Form 1598 will be filed in chronological order by months and in bound form as a permanent record in the storekeeper-gauger's office, and kept available for inspection by internal revenue officers.

DISTILLER'S RECORDS AND REPORTS

§ 183.399 Record of distillery opera­tions, Form 1598. The distiller shall keep a daily record of the distillery operations on Form 1598. "Proprietor's Report of Operations at Registered Dis­ tillery." Entries shall be made as indicated by the headings of the various columns and lines on the form and in accordance with the instructions printed thereon or issued in respect thereto, and as required by the regulations in this part.

(Interprets or applies 53 Stat. 332, § 26 U. S. C. 2977)

CHANGE OF PERSONS INTERESTED IN BUSINESS

§ 183.388 Records. The outgoing dis­ tiller shall enter all materials, including those in process, received from his predecessor on Form 1442 if the distillery is to be operated as an indus­ trial alcohol plant, or on Form 15 if the distillery is to be operated as a fruit distillery. The materials will also be entered on Form 1598 by the storekeeper­gau ser if the distillery is to be operated as an industrial alcohol plant. If ma­ terials are transferred when the plant is again operated as a registered dis­ tillery, appropriate entry thereof will be made on the records of the transferor and transferee, and the storekeeper­ gau ser.

TITLE 29—LABOR
Chapter V—Wage and Hour Division, Department of Labor

PART 520—STUDENT-LEARNERS CONDITIONS UNDER WHICH CERTIFICATES WILL BE ISSUED

On January 25, 1950, the regulations contained in this part were revised (12 FR 396), Section 520.3 (c) of such regulations provided that under certain specified conditions the written approval of the employment of a student-learner under a cooperative work-study program, trade school, or other type of cooperative vocational training program by a State Commissioner of Education or a local Board of Education shall constitute a temporary certificate authorizing the employment of the student-learner under such program at rates less than 75 cents an hour during the period beginning January 25, 1950, and ending May 25, 1950. It now appears that the continuation of such temporary authorization until July 25, 1950, is necessary in order to prevent the curtailing of opportunities for employment.

Accordingly, pursuant to the authority vested in me by section 14 of the Fair Labor Standards Act of 1938, as amended (sec. 14, 52 Stat. 1068; 29 U.S.C. 214), § 520.3 (c) is hereby amended to change the date "July 25, 1950" therein to read "July 25, 1951." It is the judgment of the Administrator that the proper administration of the Fair Labor Standards Act requires that this amendment extending the temporary authorization contained in § 520.3 (c) become effective immediately, without the original expiration date thereof. Therefore compliance with the requirements of paragraphs (a), (b), and (c) of section 4 of the Administrative Procedure Act is impracticable. Accordingly, this amendment shall become effective on May 25, 1950.

(Sec. 14, 52 Stat. 1068; 29 U.S.C. 214)

Signed at Washington, D.C., this 22d day of May 1950.

Wm. R. McCombs, Administrator.

PART 521—EMPLOYMENT OF APPRENTICES TRAINING OF VETERANS

The Administrator, in an order published in the Federal Register on January 25, 1950 (15 FR 397), amended the regulations contained in this part to authorize for the period beginning January 25, 1950, and ending May 25, 1950, the apprentice-training of veterans at wages below the minimum provided in section 6 of the Fair Labor Standards Act of 1938, as amended, under apprenticeship agreements approved by certain state agencies designated in the Servicemen's Readjustment Act of 1944 as amended (as amended; 49 U.S.C. 651)

This amendment shall become effective upon publication in the Federal Register.

Sean
Donald W. Nyrup, Acting Administrator of Civil Aeronautics.

the date "May 25, 1950" therein to read, "July 25, 1950."

It is the judgment of the Administrator that the proper administration of the Fair Labor Standards Act requires that this amendment extending the temporary authorization contained in § 521.10 become effective simultaneously with the original expiration date thereof. Therefore, compliance with the requirements of paragraphs (a), (b) and (c) of section 4 of the Administrative Procedure Act is impracticable. Accordingly, this amendment shall become effective on May 25, 1950.

Signed at Washington, D. C., this 22d day of May 1950.

[7 CFR, Part 51] BLUEBERRIES

UNITED STATES STANDARDS FOR PROCESSING

Notice is hereby given that the United States Department of Agriculture is considering the issuance of United States Standards for Blueberries for Processing under the authority contained in the Department of Agriculture Appropriations Act, 1950.
§ 51.449 Standards for blueberries for processing—(a) General. (1) These standards apply to species of the genus Vaccinium which contain numerous small seeds that are barely noticeable and not to the true huckleberries of the genus Gaylussacia which contain large seeds with bony coverings.

(b) Grades—(1) U. S. No. 1. U. S. No. 1 shall consist of blueberries which are free from foreign material, and are free from other kinds of berries, clusters and large stems, leaves and other foreign material, distinctly immature berries, and free from damage caused by visible mold, decay, shriveling, dirt, overmaturity, or other means.

(2) U. S. No. 2. U. S. No. 2 shall consist of blueberries which meet all the requirements of U. S. No. 1 grade except that the blueberries shall be free from serious damage caused by shriveling, overmaturity, or other means.

(3) U. S. No. 3. U. S. No. 3 shall consist of blueberries which meet all the requirements of U. S. No. 2 grade except that the blueberries shall be free from serious damage caused by shriveling and except for the increased tolerances specified below.

(1) In order to allow for variations incident to proper handling, the following tolerances shall be permitted for grade defects in a half-pint cup sample:

- Not more than a total of 20 leaves and other foreign material, not more than 5 berries other than blueberries.
- Not more than a total of 70 distinctly immature berries, clusters and large stems, and not more than 12 berries other than blueberries.

No tolerance shall be allowed for large pieces of foreign material.

(c) Unclassified. Unclassified shall consist of blueberries which have not been classified in accordance with the foregoing grades. The term "unclassified" is not a grade within the meaning of these standards but is provided as a designation to show that no definite grade has been applied to the lot.

(1) Grades—(i) Overmaturity, when the appearance of the blueberries shall be free from other kinds of berries, clusters, large stems, cap-stems, with or without berries, attached to a main stem. Cap-stems are those small stems by means of which the individual berry is attached to the main stem.

(ii) Dirt, when it cannot be removed from the blueberries in the ordinary washing process.

(iii) "Distinctly immature berries" means that the berries are green, or whitish due to immaturity.

(iv) "Damage" means any injury or defect which materially affects the appearance, or the processing quality of the blueberries. The following shall be considered as damage:

- Shriveling, when more than one-third of the blueberries in any lot, by volume, are badly wilted, withered or shriveled.

- Dirt, when it cannot be removed from the blueberries in the ordinary washing process.

- Overmaturity, when the appearance and processing quality of the lot of blueberries is materially affected by berries which have a dull appearance and are sticky from leaking berries.

- "Serious damage" means any injury or defect which seriously affects the appearance, or the processing quality of the blueberries, which have a dull appearance and are sticky from leaking berries.

- "Very serious damage caused by shriveling" means that more than one-half of the blueberries in any lot, by volume, are badly wilted, withered or shriveled.

Grade standards apply to species of the genus Vaccinium which contain numerous small seeds that are barely noticeable and not to the true huckleberries of the genus Gaylussacia which contain large seeds with bony coverings.

Other persons claiming credit for service of veterans must furnish like proof in support of their claims. Persons asserting preference rights through settlement or otherwise, and those having equitable claims, shall accompany their applications by duly corroborated statements in support thereof, setting forth in detail all facts relevant to their claims.

4. Leases will be issued for a period of five years, at an annual rental of $3.90, payable for the entire lease period, in advance of the issuance of the lease. Leases will contain an option to purchase clause at the appraised value stated therein, which may be filed at or after the expiration of one year from the date the lease is issued.

5. The tracts leased will be subject to rights-of-way not exceeding 33 feet in width along or near the edges thereof for road purposes and public utilities. Such rights-of-way may be utilized by the Federal Government, or the State, County, or municipality in which the tract is situated, or by any agency thereof. The rights-of-way may, in the discretion of the authorized officer of the Bureau of Land Management, be definitely located prior to the issuance of the patent. If not so located, they may be subject to location after patent is issued.

DEPARTMENT OF COMMERCE
Office of International Trade

ORDER MODIFYING SUSPENSION OF LICENSE PRIVILEGES

In the matter of Edwards International Corporation, Milton Edwards, 20 Church Street, New York, New York.

Under date of August 16, 1949, an order was issued suspending the privilege of the above-named respondents of obtaining or using or participating directly or indirectly in the obtaining or using of validated export licenses for making shipments to destinations in Country Group “R” for a period of two years but providing that respondents might, after the expiration of one year, apply for reinstatement of such validated export license privileges.

It appears, however, that effective March 20, 1950, the Office of International Trade amended its regulations so as to include in Country Group “R” a substantial number of countries not included at the time the above-mentioned suspension order was issued and that, in consequence, such suspension has been given considerably greater scope and respondents’ export shipments have been restricted to a correspondingly greater extent. Respondents have therefore, notwithstanding the fact that the one year period specified in such suspension order has not expired, made application to have such order modified either by limiting its application to shipments made to countries which were in Country Group “R” at the time the order was issued or by reducing the period of suspension.

It appears on reconsideration of the facts involved in the proceeding which led to the original suspension order that, while respondents made application to the Office of International Trade for a license to export a quantity of tires and tubes to Italy with knowledge and intention that such commodities were intended for transshipment to Rumania or Turkey, the license was in fact fact not granted nor shipment made, the commodities involved were to a large extent non-strategic in character, and the employee who handled the transaction for respondents is no longer associated with them. It further appears that it would be impracticable to limit the suspension order to shipments to countries which were included in Group “R” at the time the suspension order was issued and that, under all the circumstances, a reduction in the duration of the suspension is warranted.

Now, therefore, it is ordered, That the suspension of export license privileges imposed upon respondents by the terms of the order of August 16, 1949, which order was reduced from two years to one year from the date of such order and that such suspension terminate on August 15, 1950.

Dated: May 18, 1950.

NOTICES

ORDER SUSPENDING LICENSE PRIVILEGES

In the matter of Paul Wormser, Paul Wormser and Company, Nuschelerstrasse 10, Zurich, Switzerland, respondents.

This proceeding was begun by the issuance of a charging letter dated January 25, 1950, wherein the Office of International Trade charged respondents with, and the provisions of the Export Control Act of 1949 (63 Stat. 7) and the regulations promulgated thereunder. It was charged, more particularly, that respondents, being importers in Switzerland and having placed an order with an American exporter for a quantity of dioctyl phthalate, represented to such exporter and to the American Legation in Bern, Switzerland, and the Office of International Trade, for the purpose of procuring the issuance of an export license to such American exporter authorizing shipment of the commodity to respondents, that the intended end use of such commodity was in the paint and varnish industry in Switzerland and that Switzerland was the country of ultimate destination; that respondents knew and intended that such commodity would be transshipped to Czechoslovakia and that transshipment to Czechoslovakia was intended. It was further charged that such false representations were communicated to the Office of International Trade as part of the license application, that in reliance thereon the Office of International Trade issued an export license, that up on shipment being made by the American exporter to respondents via Antwerp, Belgium, respondents transshipped or caused to be transshipped such dioctyl phthalate from Antwerp to Czechoslovakia.

Upon delivery of the above-mentioned charging letter, respondents in Switzerland, they filed an answer denying the charges and requesting an oral hearing in Washington, but, although respondent Wormser came to the United States to appear at a time fixed for such hearing and was represented by counsel at such hearing, he returned to Europe prior to the hearing and failed to appear personally or to produce any evidence in support of such denial. The evidentiary material in the possession of the Office of International Trade was accordingly presented informally to the Compliance Commissioner and arguments of counsel were heard. On the basis of the evidence produced and the written answer filed by respondents, together with such ex-parte representations as were presented by counsel, the Compliance Commissioner has filed his report under date of May 3, 1950.

It appears from the record and the report of the Compliance Commissioner that respondents are and at all times relevant to this proceeding have been engaged in Switzerland in the conduct of a general import and export business; that on or about September 14, 1949, respondents placed an order with an American exporter for 20 tons of dioctyl phthalate and stated that the intended end use was in the paint and varnish industry in Switzerland; that the American exporter accordingly filed an application for an export license authorizing shipment to respondents of a quantity of dioctyl phthalate, and that on or about September 14, 1949, the Office of International Trade issued the license for which application had been made on the basis of the letter written by respondents; that during the month of November 1949 shipments of dioctyl phthalate were effected by the licensee to respondents in Switzerland via Antwerp, Belgium; and that on or about November 29, 1949, respondents transshipped or caused to be transshipped such commodity from Antwerp to Czechoslovakia.

It further appears from the record and the report of the Compliance Commissioner that respondents represented to the American Legation in Bern, Switzerland, and the Office of International Trade that the intended end use of such commodity was in the paint and varnish industry in Switzerland and that Switzerland was the country of ultimate destination; that respondents knew and intended that such commodity would be transshipped to Czechoslovakia; that such false representations were made with the intention that they should be relayed to the Office of International Trade and for the purpose and with the effect of inducing the Office of International Trade to issue an export license authorizing shipment of such commodity to respondents in Switzerland and thus were made indirectly to the Office of International Trade; and that respondents, in making such false representations and in making or causing to be made such transshipment to Czechoslovakia violated the laws and regulations relating to export control and demonstrated their future untrustworthiness in the handling of licensed commodities and in furtherance of the objectives of export control.

The Compliance Commissioner has accordingly recommended that all outstanding export licenses in which respondents or either of them appear as licensee, consignor, forwarder, intermediate consignee, ultimate consignee, or otherwise as a party in any capacity are hereby revoked and shall be forthwith returned to the Office of International Trade for cancellation. Such suspension shall extend not only to respondents but also to any other person, trade name, firm, corporation, or other business association with which they or either of them may be now or hereafter related by ownership, control, or otherwise in the conduct of export trade.

The findings and recommendations of the Compliance Commissioner have been carefully considered, together with the record of this matter, and it appears that such findings are supported by the record and that such recommendations are fair and reasonable and should be adopted. Therefore, it is ordered that:

(1) All outstanding export licenses in which respondents or either of them appear as licensee, consignor, forwarder, intermediate consignee, ultimate consignee, or otherwise as a party in any capacity are hereby revoked and shall be forthwith returned to the Office of International Trade for cancellation.

(2) Such suspension shall extend not only to respondents but also to any other person, trade name, firm, corporation, or other business association with which they or either of them may be now or hereafter related by ownership, control, or otherwise in the conduct of export trade.

(3) Respondents are hereby further declared to be ineligible for the duration of export control the privilege of obtaining or using, or participating directly or indirectly, either as licensee, consignor, forwarder, intermediate consignee, ultimate consignee, or otherwise as a party in any capacity or permitted, in which respondents appear or otherwise as a party in any capacity in the obtaining or using of export licenses, including general licenses as well as validated licenses, for shipment from the United States to any destination of any commodity included in the Positive List as promulgated by the Office of International Trade and as such Positive List may be modified from time to time; that respondents be further declared to be ineligible for the duration of export control as parties to any exportation of any Positive List commodity; and that, during such period, the Office of International Trade shall issue no export license and Collectors of Customs authenticate no shipper's export declaration, in any capacity as a party to the exportation of any Positive List commodity; and that such denial of export license privileges extend not only to respondents but also to any other person, trade name, firm, corporation, or other business association with which they or either of them may be now or hereafter related by ownership, control, or otherwise in the conduct of export trade.

(4) Such suspension shall extend not only to respondents but also to any other person, trade name, firm, corporation, or other business association with which they or either of them may be now or hereafter related by ownership, control, or otherwise in the conduct of export trade.

(5) Respondents are hereby further declared to be ineligible for the duration of export control the privilege of obtaining or using, or participating directly or indirectly, either as licensee, consignor, forwarder, intermediate consignee, ultimate consignee, or otherwise as a party in any capacity in the obtaining or using of export licenses, including general licenses as well as validated licenses, for shipment from the United States to any destination of any commodity included in the Positive List as promulgated by the Office of International Trade and as such Positive List may be modified from time to time; that respondents be further declared to be ineligible for the duration of export control as parties to any exportation of any Positive List commodity; and that, during such period, the Office of International Trade shall issue no export license and Collectors of Customs authenticate no shipper's export declaration, in any capacity as a party to the exportation of any Positive List commodity; and that such denial of export license privileges extend not only to respondents but also to any other person, trade name, firm, corporation, or other business association with which they or either of them may be now or hereafter related by ownership, control, or otherwise in the conduct of export trade.

(6) Such suspension shall extend not only to respondents but also to any other person, trade name, firm, corporation, or other business association with which they or either of them may be now or hereafter related by ownership, control, or otherwise in the conduct of export trade.

Algonquin seeks authorization to construct and operate a pipeline and appurtenant facilities to receive natural gas from the Texas Eastern Transmission Corporation, applicant in Docket No. G-1012, at a point near Lambertville, New Jersey, and to deliver and sell such natural gas in the New England area. Notice of filing of the application has been given, including publication in the Federal Register on May 13, 1950 (15 F. R. 2833).

On May 2, 1950, Algonquin filed a motion with the Commission that matters relating to the market requirements of Algonquin be set for hearings on a date immediately following in connection with the hearing of Northeastern’s application commenced May 8, 1950, in Boston, Massachusetts.

In response, applicant submits that the proposed facilities of Northeastern in Docket No. G-1267 comprise a project which is in competition with and directly opposed to Algonquin’s application to serve natural gas in the New England area, that certain gas distributing companies have signed letters of intent with both Algonquin and Northeastern to enter into contracts for the purchase of natural gas, and that a full and complete record of the requirements for natural gas in the New England area cannot be made without the participation and supporting evidence of the customers proposed to be served by Algonquin as well as those proposed to be served by Northeastern.

The Commission finds: It is desirable to have a full and complete record of the natural gas requirements of the New England area and that can best be obtained by hearing the evidence in support of Algonquin’s application immediately following the hearings in Docket No. G-1267 which begin in Boston, Massachusetts, on May 8, 1950.

The Commission orders:

(A) A public hearing be held in Court Room No. 4, 12th Floor, United States Post Office Building, Boston, Massachusetts, commencing as soon as practicable following the hearings in Docket No. G-1267.

(B) Interested State commissions may participate as provided by §§ 1.8 and 1.37 (f) of the Commission’s rules of practice and procedure.

Date of issuance: May 18, 1950.

SEcurities And EXchange COMMISSION

[FILE No. 64-176]

UNITED LIGHT AND RAILWAYS CO. ET AL.

NOTICE OF FILING

At a regular session of the Securities and Exchange Commission, held at its office in the city of Washington, D. C., on the 18th day of May A. D. 1950.

Notice is hereby given that The United Light and Railways Company ("Railways"), a registered holding company, and its public utility subsidiary, Eastern Kansas Utilities, Inc. ("Eastern Kansas"), have filed, pursuant to the Public Utility Holding Company Act of 1935 ("Act") and the rules and regulations promulgated thereunder, a joint application-declaration, designated Supplemental Application No. 7, containing certain proposed amendments to the section 11 (e) plan, approved by the Commission on January 10, 1950, with respect to the method of disposition of Eastern Kansas by Railways and proposing certain transactions designed to strengthen the capital structure of Eastern Kansas and to facilitate such disposition.

Notice is further given that any interested person may, not later than June 5, 1950, at 5:30 p.m. e. d. s. t., request from the Commission a written ruling that a hearing be held with respect to said application-declaration, stating the nature of his interest, the reason for such request, and specifying in detail the issues, if any, of fact or law raised by said application-declaration which he proposes to controvert, or may request that he be notified if the Commission orders a hearing thereon. Any such request should be addressed: Secretary, Securities and Exchange Commission, 425 Second Street NW., Washington 25, D. C. At any time after June 5, 1950, said application-declaration, as filed or as amended, may be granted and permitted to become effective as provided in Rule U-83 of the rules and regulations promulgated under the Act or the Commission may exempt such transactions as permitted by Rules U-20 (a) and U-100 thereof.

All interested persons are referred to said application-declaration which is on file in the offices of the Commission, for a statement of the transactions therein proposed which are summarized as follows:

The section 11 (e) plan of Railways and its registered holding company subsidiary, Continental Gas & Electric Corporation, among other things, provides for the liquidation of Railways and of Continental and the distribution and/or sale of their assets. The plan provides that Eastern Kansas is to be sold to non-affiliates. Interests in the long-and-short-haul provisions of the plan are vested with Kansas City Power & Light Company ("Kansas City"), or that Kansas City acquire all or part of Eastern Kansas' assets, subject to the approval of the Commission. The plan also provides that after approval thereof by the Commission, either before or after the effective date, the Commission may authorize or approve such other changes in the plan as may be necessary or advisable to insure expeditious liquidation and dissolution of Railways and Continental in a feasible manner. In this connection, it is stated that at the meeting of the stockholders held February 16, 1950 at which the plan was made effective, a resolution was adopted by the stockholders expressly authorizing the board of directors of Railways to adopt further amendments to the plan, with the approval of the Commission. The application-declaration states that, pursuant to such amendments to the plan, Railways, in connection with the liquidation of Continental, has acquired the outstanding 14,000 shares of Eastern Kansas' common stock and the indebtedness of that company held by Continental, that since the approval of the plan there have come to light serious practical obstacles to the proposal to merge or otherwise combine any part of the property and assets of Eastern Kansas with Kansas City as contemplated by the plan, that in the judgment of the management the sale of the property to non-affiliated interests would not be to the best interests of the stockholders of Railways, but that those interests would be best served and protected by the distribution of the stock of Eastern Kansas to such stockholders. Accordingly, it is proposed, as soon as practicable after the consummation of certain preliminary transactions summarized below, that Eastern Kansas be distributed to the stockholders of Railways on the basis of one share of Eastern Kansas for each 25 shares of Railways. No fractional shares are to be issued, but, in lieu thereof, cash is to be distributed. The amount of such cash distribution expressed in terms of Railways stock is to be an amount equal to one twenty-fifth of one share of Eastern Kansas stock on or about the distribution date, as determined by the officers of Railways, subject to the approval of the Commission upon the basis of such determination and the information upon which it is based. Shares of Eastern Kansas not required for distribution are to be sold by Railways in the manner determined as necessary or advisable by the Commission and approved by the Commission.

The application-declaration further states that, to facilitate distribution and to effect the amendments to the plan of Eastern Kansas, (a) the 18,000 authorized $100 par value shares are to be reclassified into 250,000 shares without par value, (b) the 14,000 outstanding $100
par value shares are to be reclassified into 100,000 shares without par value representing the $1,400,000 of capital now represented by the outstanding 14,000 shares of $100 par value, (c) Eastern Kansas is to issue to Railways 26,933 additional shares without par value in consideration of (i) $200,000 cash, (ii) the cancellation by Railways of $100,000 of open account indebtedness of Eastern Kansas, and (iii) the capitalization of Eastern Kansas' existing paid-in surplus. Upon consummation of these transactions Eastern Kansas will have outstanding 126,833 shares of no par value common stock.

Applicants-declarants request that the Commission enter an order at the earliest practicable date, to become effective upon its issuance, granting and permitting to become effective the application-declaration and that such order contain appropriate recitals conforming to the requirements of Supplement R and section 1903 (f) of the Internal Revenue Code, as amended.
