RULES AND REGULATIONS

TITLE 7—AGRICULTURE

Chapter VII—Production and Marketing Administration (Agricultural Adjustment), Department of Agriculture

PART 722—COTTON

PROCLAMATION RELATING TO NATIONAL MARKETING QUOTA AND NATIONAL ACREAGE ALLOTMENT FOR 1951 CROP

§ 722.201 Basis and purpose. This section is issued to announce findings made by the Secretary of Agriculture with respect to the total supply and the normal supply of cotton for the marketing year beginning August 1, 1950, and to proclaim whether, upon the basis of such findings, a national marketing quota and a national acreage allotment for the 1951 crop of cotton are required under the provisions of the Agricultural Adjustment Act of 1938, as amended. Section 342 of the said act provides, in part, that, whenever during any calendar year the Secretary determines that the total supply of cotton for the marketing year beginning in such calendar year will exceed the normal supply for such marketing year, the Secretary shall pro-

claim such fact and a national marketing quota shall be in effect for the crop of cotton produced in the next calendar year. Whenever a national marketing quota is proclaimed under section 342, the Secretary is required to determine and proclaim a national acreage allotment for the crop of cotton to be produced in the next calendar year. The act further provides that the proclamation with respect to a national marketing quota shall be made not later than October 15 of the calendar year in which the determinations relating thereto are made.

The term "cotton" and the data appearing in § 722.202 do not include long staple cotton covered by section 347 (a) of the said act or similar types of such cotton which are imported.

The terms "total supply", "carry-over", and "normal supply", as they relate to cotton, are defined in the act as follows:

"Total supply" of cotton for any marketing year shall be the carry-over at the beginning of such marketing year, plus the estimated production of cotton in the United States during the calendar year in which such marketing year begins and the estimated imports of cotton into the United States during such marketing year.

"Carry-over" of cotton for any marketing year shall be the quantity of cotton on hand in the United States at the beginning of such marketing year, not including any part of the crop which was produced in the United States during the calendar year than current.

"Normal supply" of cotton for the marketing year shall be the estimated domestic consumption of cotton for any marketing year for which such normal supply is being determined, plus the estimated exports of cotton for such marketing year, plus 30 per centum of the sum of such consumption and exports as an allowance for carry-over.

The findings and determinations made by the Secretary are contained in § 722.202 and have been made on the basis of the latest available statistics of the Federal Government. Producers are now engaged in harvesting their 1950 cotton crop and will soon begin making plans and arrangements for the production of cotton and other crops in 1951. It is in the interest of these farmers, as well as other persons engaged in business activities closely related to the production, marketing and processing of cotton, that the determinations and proclamations contained herein be issued at the earliest possible date. Accordingly, it is hereby determined and found that compliance with the notice, public procedure, and effective date requirements of the Administrative Procedure Act (60 Stat. 237) is impracticable and contrary to the public interest, and the proclamations set forth in § 722.202 shall be effective upon filing of this document with the Director, Division of Federal Register.

§ 722.202 Findings and determinations with respect to a national marketing quota and a national acreage allotment for the 1951 crop of cotton—(a) Total supply. The total supply of cotton for the marketing year beginning August 1, 1950 (in terms of running bales or the equivalent), is 18,405,000 bales, consisting of (1) a carry-over on August 1, 1950, of 6,639,000 bales, (2) estimated production from the 1950 crop of 9,637,000 bales, and (3) estimated imports into the United States during the marketing year beginning August 1, 1950, of 129,000 bales.

(b) Normal supply. The normal supply of cotton for the marketing year beginning August 1, 1950 (in terms of running bales or the equivalent), is 18,798,000 bales, consisting of (1) estimated domestic consumption for the marketing year beginning August 1, 1950, of 9,860,000 bales, (2) estimated exports during the marketing year beginning August 1, 1950, of 4,600,000 bales, and (3) 30 percent of the sum of subparagraphs (1) and (2) of this paragraph as an allowance for carry-over, or 4,338,000 bales.

(c) National marketing quota. It is hereby determined and proclaimed that the total supply of cotton for the marketing year beginning August 1, 1950, will not exceed the normal supply for such marketing year. Therefore, a national marketing quota shall not be in effect for the crop of cotton produced in the calendar year 1951.

(d) National acreage allotment. It is hereby determined and proclaimed that a national acreage allotment shall not

§ 933.485 *Grapefruit Regulation 128*—
(a) *Findings.* (1) Pursuant to the marketing agreement, as amended, and Order No. 33, as amended (7 CFR Part 933), regulating the handling of oranges, grapefruit, and tangerines grown in the State of Florida, effective under the applicable provisions of the Agricultural Marketing Agreement Act of 1937, as amended, and upon the basis of the recommendations of the committees established under the aforesaid amended marketing agreement and order, and upon other available information, it is hereby found that the limitation of shipments of grapefruit, as hereinafter provided, will tend to effectuate the declared policy of the act.

(2) It is hereby further found that it is impracticable and contrary to the public interest to give preliminary notice, engage in public rule making procedure, and postpone the effective date of this section until 30 days after publication in the *FEDERAL REGISTER* (60 Stat. 237; 5 U. S. C. 1001 et seq.) because the time intervening between the date when information upon which this section is based became available and the time when this section must become effective in order to effectuate the declared policy of the act is insufficient; a reasonable time is permitted, under the circumstances, for preparation for such effective time; and good cause exists for making the provisions hereof effective not later than October 9, 1950. Shipments of grapefruit grown in the State of Florida, have been subject to regulation by grades and sizes, pursuant to the amended marketing agreement and order, since September 11, 1950, and will so continue until October 9, 1950; the recommendation and supporting information for continued regulation subsequent to October 8 was promptly submitted to the Department after an open meeting of the Growers Administrative Committee on October 3; such meeting was held to consider recommendations for regulation, after giving due notice of such meeting, and interested persons were afforded an opportunity to submit their views at this meeting; the provisions of this section, including the effective time thereof, are identical with the aforesaid recommen-

dation of the committee, and information concerning such provisions and effective time has been disseminated among handlers of such grapefruit; it is necessary, in order to effectuate the declared policy of the act, to make this section effective during the period hereinafter set forth so as to provide for the continued regulation of the handling of grapefruit; and compliance with this section will not require any special preparation on the part of persons subject thereto which cannot be completed by the effective time hereof.

(iii) Any seedless grapefruit, grown in the State of Florida, which are of a size smaller than a size that will pack 96 grapefruit, packed in accordance with the requirements of a standard pack, in a standard nailed box; or

(iv) Any pink seeded grapefruit, grown in the State of Florida, which are of a size smaller than a size that will pack 80 grapefruit, packed in accordance with the requirements of a standard pack, in a standard nailed box.

§ 933.484 *Orange Regulation 184*—
(a) *Findings.* (1) Pursuant to the marketing agreement, as amended, and Order No. 33, as amended (7 CFR Part 933), regulating the handling of oranges, grapefruit, and tangerines grown in the State of Florida, effective under the applicable provisions of the Agricultural Marketing Agreement Act of 1937, as amended, and upon the basis of the recommendations of the committees

established under the aforesaid amended marketing agreement and order, and upon other available information, it is hereby found that the limitation of shipments of oranges, as hereinafter provided, will tend to effectuate the declared policy of the act.

(2) It is hereby further found that it is impracticable and contrary to the public interest to give preliminary notice, engage in public rule making procedure, and postpone the effective date of this section until 30 days after publication thereof in the *FEDERAL REGISTER* (60 Stat. 237; 5 U. Shipments of oranges, grown in the State of Florida, have been subject to regulation by grades and sizes, pursuant to the amended marketing agreement and order, since September 11, 1950, and will so continue until October 9, 1950; the recommendation and supporting information for continued regulation subsequent to October 8 was promptly submitted to the Department after an open meeting of the Growers Administrative Committee on October 3; such meeting was held to consider recommendations for regulation, after giving due notice of such meeting, and interested persons were afforded an opportunity to submit their views at this meeting; the provisions of this section, including the effective time thereof, are identical with the aforesaid recommendation of the committee, and information concerning such provisions and effective time, has been disseminated among handlers of such oranges; it is necessary, in order to effectuate the declared policy of the act, to make this section effective during the period hereinafter set forth so as to provide for the continued regulation of the handling of oranges; and compliance with this section will not require any special preparation on the part of persons subject thereto which cannot be completed by the effective time hereof.

[Orange Reg. 343]

PART 966—ORANGES GROWN IN CALIFORNIA AND ARIZONA

LIMITATION OF SHIPMENTS

§ 966.489 Orange Regulation 343—(a) Findings. (1) Pursuant to the provisions of Order No. 66, as amended (7 CFR Part 966; 14 F. R. 3614), regulating the handling of oranges grown in the State of California or in the State of Arizona, effective under the applicable provisions of the Agricultural Marketing Agreement Act of 1937, as amended (7 U. S. C. 601 et seq.), and upon the basis of the recommendation and information submitted by the Orange Administrative Committee, established under the said amended order, and upon other available information, it is hereby found that the limitation of the quantity of such oranges which may be handled, as hereinafter provided, will tend to effectuate the declared policy of the act.

(2) It is hereby further found that it is impracticable and contrary to the pub-

RULES AND REGULATIONS

lic interest to give preliminary notice, engage in public rule making procedure, and postpone the effective date of this section until 30 days after publication thereof in the *FEDERAL REGISTER* (60 Stat. 237; 5 U. S. C. 1001 et seq.) because the time intervening between the date when information upon which this section is based became available and the time when this section must become effective in order to effectuate the declared policy of the act is insufficient, and a reasonable time is permitted, under the circumstances, for preparation for such effective time; and good cause exists for making the provisions hereof effective as hereinafter set forth. Shipments of oranges, grown in the State of California or in the State of Arizona, are currently subject to regulation pursuant to said amended order; the recommendation and supporting information for regulation during the period specified herein was promptly submitted to the Department after an open meeting of the Orange Administrative Committee on October 5, 1950, such meeting was held, after giving due notice thereof to consider recommendations for regulation, and interested persons were afforded an opportunity to submit their views at this meeting; the provisions of this section, including its effective time, are identical with the aforesaid recommendation of the committee, and information concerning such provisions and effective time has been disseminated among handlers of such oranges; it is necessary, in order to effectuate the declared policy of the act, to make this section effective during the period herein-after specified; and compliance with this section will not require any special preparation on the part of persons subject thereto which cannot be completed by the effective time thereof.

(b) *Order.* (1) The quantity of oranges grown in the State of California or in the State of Arizona which may be handled during the period beginning at 12:01 a. m., P. s. t., October 8, 1950, and ending at 12:01 a. m., P. s. t., October 15, 1950, is hereby fixed as follows:

(i) *Valencia oranges.* (a) Prorate District No. 1: Unlimited movement;

(b) Prorate District No. 2: 900 car-loads;

(c) Prorate District No. 3: Unlimited movement.

(ii) *Oranges other than Valencia oranges.* (a) Prorate District No. 1: No movement;

(b) Prorate District No. 2: No movement;

(c) Prorate District No. 3: No movement.

(2) The prorate base of each handler who has made application therefor, as provided in the said amended order, is hereby fixed in accordance with the prorate base schedule which is attached hereto and made a part hereof by this reference.

(3) As used in this section, "handled," "handler," "varieties," "carloads," and "prorate base" shall have the same meaning as when used in the said amended order; and the terms "Prorate District No. 1," "Prorate District No. 2," and "Prorate District No. 3" shall have the same meaning as given to the respec-

tive term in § 966.107 of the current rules and regulations (14 F. R. 6588) contained in this part.

Orange Regulation 332 (7 CFR 966.478 15 F. R. 3863) fixes the sizes of designated oranges which may be handled during the aforesaid period.

[Pecan Reg. 2]

PART 994—HANDLING OF PECANS GROWN IN GEORGIA, ALABAMA, FLORIDA, MISSISSIPPI, AND SOUTH CAROLINA

GRADE AND SIZE REGULATION

§ 994.101 Pecan Regulation 2—(a) **Findings.** (1) On September 30, 1950, notice of proposed rule making was published in the FEDERAL REGISTER (15 F. R. 6607) regarding a proposal to change the initial grade and size regulation, currently in effect pursuant to the marketing agreement and order regulating the handling of pecans grown in Georgia, Alabama, Florida, Mississippi, and South Carolina (7 CFR Part 994). The aforesaid initial regulation is prescribed in § 994.4 (e), and became effective October 20, 1949 (14 F. R. 6167). After consideration of all relevant matters presented, including the proposals set forth in the aforesaid notice which

were submitted by the Pecan Administrative Committee (established pursuant to the aforesaid marketing agreement and order) and other available information, it is hereby found that the changed grade and size regulation, hereinafter set forth, will tend to effectuate the declared policy of the act.

(2) It is hereby further found that good cause exists for not postponing the effective date of this section until 30 days after publication thereof in the FEDERAL REGISTER (60 Stat. 237; 5 U. S. C. 1001 et seq.) in that:

(i) Estimates made by the Pecan Administrative Committee at its September 21 meeting in Albany, Georgia, and submitted to the Department, indicate that the handling of pecans from a few of the early producing districts in the production area is likely to begin on October 9, and it is necessary that the changed regulation be applied against all pecans of the 1950 crop handled for in-shell distribution in order to effectuate the declared policy of the act;

(ii) Information regarding the provisions of this section has been disseminated among handlers and growers by the committee and through the press;

(iii) Notice that consideration was being given to the issuance of the regulation recommended by the committee was heretofore published in the FEDERAL REGISTER, and interested persons were afforded an opportunity to submit their views;

(iv) Compliance with this section will not require any special preparation on the part of persons subject thereto which cannot be completed on or before the effective time hereof; and

(v) A reasonable time is permitted, under the circumstances, for preparation for such effective time.

(b) **Order.** (1) The initial grade and size regulation (7 CFR 994.4 (e); Pecan Reg. 1; 14 F. R. 6167) shall be superseded at the effective time of the grade and size regulation set forth in this section.

(2) Beginning at 12:01 a. m., e. s. t., October 9, 1950, no person shall handle, except as provided in § 994.4 (e), any unshelled pecans:

(i) Unless such pecans have a count per pound of less than 91 nuts, and the 10 smallest nuts in a representative 100-nut sample weigh at least 1.5 ounces; and

(ii) In addition, meet the requirements of the U. S. Commercial grade as changed, for the purpose of this section, to read in the manner set forth in subdivision (iii) of this subparagraph.

(iii) The pecans shall consist of unshelled pecans which are free from serious damage caused by stains or adhering hulls, split or broken shells, loose hulls or other foreign material, or other means. At least 75 percent, by

count, of the pecans in any lot shall have kernels which meet the requirements of U. S. No. 1 grade, and the remainder shall have kernels which are fairly well cured, free from rancidity, molds, decay, and worm injury, and from serious damage caused by shriveling, discoloration, or other means. In order to allow for variations incident to proper grading, the following tolerances shall be permitted:

(a) For external defects (defects of the shell) not more than 10 percent, by count, of the pecans in any lot may be below the requirements of this grade; and

(b) For internal defects (defects of the kernel) not more than 15 percent, by count, of the pecans in any lot may be below the requirements of this grade, but not more than three-fifths of this amount, or 9 percent, shall be allowed for kernels which are rancid, moldy, decayed, injured by worms, or so shriveled that they are virtually of no food value. No part of any tolerance shall be allowed to reduce, for the lot, the 75 percent of kernels required to meet the U. S. No. 1 grade.

(3) Terms used in this section shall have the same meaning as when used in said marketing agreement and order, or, when applicable, as when used in the United States Standards for Unshelled Pecans (14 F. R. 2543, 2608; 7 CFR 51.342).

(Sec. 5, 49 Stat. 753, as amended; 7 U. S. C. and Sup. 608c)

Issued at Washington, D. C., this 4th day of October 1950.

(2) The total of specific uses of fluid milk products by a handler during the month shall consist of the total quantity of fluid milk products physically handled, and for which specific disposition is established, at the handler's regulated plants. The quantity of syrup or other flavoring material contained in flavored milk or flavored skim milk so disposed of shall not be considered part of the total of specific uses.

(d) *Determination and classification of plant shrinkage.* (1) Plant shrinkage shall be determined by deducting the total of specific uses from the volume handled. The remainder, if it can reasonably be considered to represent the loss or shrinkage in fluid milk products normally incurred by the handler in the receiving, processing, packaging, and distribution of the milk and milk products handled by him, shall be considered his plant shrinkage.

(2) The classification of plant shrinkage shall be determined by computing 2 percent of the volume handled, and comparing the result with the plant shrinkage. Plant shrinkage not in excess of such result shall be classified as Class II milk. Plant shrinkage in excess of such result shall be classified as Class I milk.

§ 934.104 *Due dates of reports of nonpool handlers.*—(a) *Application of this section.* The provisions of this section shall apply with respect to the due dates for the filing of reports by nonpool handlers relating to their receipts and utilization of fluid milk products, pursuant to § 934.31.

(b) *Reports of buyer-handlers and producer-handlers.* (1) Except as provided in subparagraphs (2) and (3) of this paragraph, each buyer-handler and producer-handler shall file a report for each calendar quarterly period of the year within 8 days after the end of the period.

(2) Within 8 days after the end of any month in which a buyer-handler or producer-handler receives outside milk or exempt milk, or receives Class I milk from a New York, Boston, Worcester, or Springfield order regulated plant, he shall file a separate report for that month and for each prior month of the same calendar quarterly period. He

shall also file a separate report for each subsequent month of that quarterly period within 8 days after the end of such month.

(3) Each buyer-handler and producer-handler who is requested in writing by the market administrator before the end of the month to file a separate report for any month shall file the report within 8 days after the end of the month.

(c) *Reports of handlers who operate unregulated distributing plants.* Each handler who operates an unregulated plant from which Class I milk is distributed directly to consumers in the marketing area during the month shall file a report within 8 days after the end of such month.

§ 934.105 *Detail and form of handlers' reports.*—(a) *Application of this section.* The provisions of this section shall apply with respect to the detail and form for the filing of reports by all handlers relating to their total receipts and utilization of fluid milk products, pursuant to §§ 934.30 and 934.31.

(b) *Requirements applicable to all handlers.* Each handler's report shall include the following information:

(1) The receipts of fluid milk products at each plant from other handlers and dealers, and from any of the handler's unregulated plants.

(2) The receipts of milk from his own production, and from other dairy farmers.

(3) The butterfat test of Class I milk received from New York, Boston, Worcester, or Springfield order regulated plants.

(4) The respective quantities of Class I milk disposed of inside the marketing area and outside the marketing area, showing the quantities disposed of to consumers and the quantities disposed of to individual handlers or dealers.

(5) The total quantity of fluid milk products disposed of as Class II milk, and information as to the quantities so disposed of to individual handlers or dealers.

(c) *Requirements applicable to pool handlers.* Each pool handler's report shall include the following additional information:

(1) The respective total quantities of milk received at each plant from producers whose farms are located not more than 40 miles from the City Hall in Lawrence; from producers whose farms are located more than 40 miles from the City Hall in Lawrence but not more than 80 miles from the State House in Boston; and from producers whose farms are located more than 80 miles from the State House in Boston; and the number of producers in each group.

(2) Separate totals of receipts at each plant from producers who are members of each association of producers and from nonmembers; and the number of producers in each group.

(3) The name of each producer and the quantity of milk received from him, with the information subdivided according to the producer's farm location and member or nonmember status, as indicated in subparagraphs (1) and (2) of this paragraph. However, this subparagraph shall not apply to any pool plant

at which milk was received from 50 or more producers during the month.

§ 934.106 Averaging of producers' semimonthly butterfat tests. In making payments for milk to each producer as required by §§ 934.60 and 934.61 (a), each handler may determine the average butterfat content of the milk by using the simple average of the butterfat tests of semimonthly composite samples of the milk, unless the difference between the semimonthly tests is more than two points (0.2%), or the quantity of milk delivered by the producer in either semimonthly period is as much as three times as large as his deliveries in the other semimonthly period.

§ 934.107 Deductions from payments to producers—(a) Authorization for deductions. In making payments for milk to each producer as required by §§ 934.60 and 934.61 (a), the burden shall rest upon the handler making deductions from such payments to prove that each deduction is properly authorized, and properly chargeable to the producer.

(b) Deductions for associations of producers. The following provisions shall apply with respect to the deductions which are provided for in § 934.70:

(1) Each handler shall be obligated to make deductions for an association of producers if the association files a claim with the handler for amounts to be deducted from the handler's payments to its members. The claim shall contain a list of the producers, an agreement to indemnify the handler in the making of the deductions, and a certification that the association has an unterminated membership contract with each producer, authorizing the claimed deduction.

(2) Upon receipt of notice from the market administrator that there is an error in the claim filed by an association of producers pursuant to subparagraph (1) of this paragraph, the handler shall be relieved of the obligation to make that part of the deductions which was claimed in error, as determined by the market administrator.

§ 934.108 Weights of fluid milk products—(a) Application of this section. The provisions of this section shall apply in determining the respective quantities of fluid milk products received or used by each handler or dealer.

(b) Basis for determination of quantity. The determination of the quantity of fluid milk products received or used by each handler or dealer shall be on the basis of the weight, in pounds, of the fluid milk products.

(c) Standard weights. In the absence of specific weights, the weight of fluid milk products received or disposed of in a quart or 40-quart container shall be determined according to the following table. The weight of such products in any other container shall be determined by multiplying the equivalent number of quarts by the respective standard weight per quart container, except that, in the absence of specific weights, the weight of such products in a 20-quart container shall be considered to be one-half of the applicable standard weight per 40-quart container.

FEDERAL COMMUNICATIONS
COMMISSION,
[SEAL] W.M. P. MASSING,
Acting Secretary.

1. Paragraph (c) of § 3.565 (as amended June 27, 1950, effective September 1, 1950) is proposed to be further amended to read as follows:

(c) If the transmitter power rating is 10 watts or less, one or more operators holding first-, second- or third-class radiotelephone or telegraph licenses or permits shall be on duty at the place where the transmitting apparatus of the station is located, except as provided in paragraph (d) of this section, and in actual charge thereof: *Provided*, That, in the case of an operator holding a third-class radiotelephone or radiotelegraph permit, (1) such operator is prohibited from making any adjustments that may result in improper transmitter operation, and (2) the equipment is so designed that the stability of the frequency of the transmitter is maintained by the transmitter

itself within the limits of tolerance specified by the station license, and none of the operations necessary to be performed during the course of normal rendition of service may cause off-frequency operation or result in any unauthorized radiation, and (3) any needed adjustments of the transmitter that may affect the proper operation of the station are regularly made by or under the immediate supervision and responsibility of a person holding a first- or second-class radiotelephone or radiotelegraph operator license who shall be responsible for the proper functioning of the station equipment.

2. A new paragraph (d) is proposed to be added to § 3.565 (as amended June 27, 1950, effective September 1, 1950) to read as follows:

(d) A noncommercial educational FM broadcast station licensed for transmitter power output of 10 watts or less may, upon securing prior authorization from the Commission, be operated by remote control. Application for authorization to operate by remote control may be made as a part of an application for construction permit or license, or modification thereof, or may be made by informal application at any time. For the purpose of this section, remote control is defined as the operation of a transmitter by a licensed operator from an operating position from which the transmitter is not directly accessible to but is under the control of the operator. Authority for operation by remote control shall be subject to the following conditions and applications for such authority shall clearly indicate the means whereby the conditions will be met:

(1) The equipment at the operating and transmitting positions shall be on premises under the control and supervision of the licensee at all times and shall not be accessible to persons other than the licensee or his agents.

(2) The control circuits from the operating position to the transmitter

shall provide positive on and off control and shall be such that open circuits, short circuits, grounds or other line faults will not actuate the transmitter and any fault causing loss of such control will automatically place the transmitter in an inoperative condition.

(3) Monitoring equipment shall be installed at the remote control point so as to continuously monitor the actual FM carrier and audibly indicate the nature and quality of the program being broadcast.

3. Paragraph (d) of § 3.565 (as amended June 27, 1950, effective September 1, 1950) is proposed to be recodified to become paragraph (e) of this section and is proposed to be revised to read as follows:

(e) The original license (or FCC Form 759) of each station operator and of each operator responsible for the proper functioning of the transmitting equipment shall be posted at the place where the transmitting apparatus is located: *Provided*, however, That where remote control operation is authorized the original license (or FCC Form 759) of each station operator shall be posted at his normal place of duty at the station.

4. Paragraph (e) of § 3.565 (as amended June 27, 1950, effective September 1, 1950) is proposed to be recodified to become paragraph (f) of this section.

5. The wording of paragraph (b) of § 3.553 is proposed to be revised to read as follows:

(b) The licensee of each noncommercial educational FM broadcast station licensed for transmitter power output of 10 watts or less shall provide a percentage modulation indicator or a calibrated program level meter from which a satisfactory indication of the percentage of modulation of the transmitter can be determined.

R. 4278), I hereby classify under the Small Tract Act of June 1, 1938 (52 Stat. 609), as amended July 14, 1945 (59 Stat. 467, 43 U. S. C. section 682a), as hereinafter indicated, the following described land in the Los Angeles, California, land district, embracing approximately 20 acres.

CALIFORNIA SMALL TRACT CLASSIFICATION
No. 236

The lands are situated adjoining the Town of Barstow, in San Bernardino County, California. It is situated on U. S. Highway 66-91 leading from Los Angeles, California, eastward.

2. As to applications regularly filed prior to 9:00 a. m., August 31, 1950, and are for the type of site for which the land is classified, this order shall become effective upon the date it is signed.

3. As to the land not covered by applications referred to in paragraph 2, this order shall not become effective to permit leasing under the Small Tract Act until 10:00 a. m., November 17, 1950. At that time such land shall, subject to valid existing rights, become subject to application as follows:

(a) Advance period for simultaneous nonpreference filings from 9:00 a. m., August 31, 1950, to 10:00 a. m., February 16, 1951.

5. Applications filed within the periods mentioned in paragraphs 3 (b) and 4 (a) will be treated as simultaneously filed.

A veteran shall accompany his application with a complete photostatic, or other copy (both sides), of his certificate of honorable discharge, or of an official document of his branch of the service which shows clearly his honorable discharge as defined in § 181.36 of Title 43 of the Code of Federal Regulations, or constitutes evidence of other facts upon which the claim for preference is based and which shows clearly the period of service. Other persons claiming credit for service of veterans must furnish like proof in support of their claims. Persons asserting preference rights, through settlement or otherwise, and those having equitable claims, shall accompany their application by duly corroborated statements in support thereof, setting forth in detail all facts relevant to their claims.

6. All of the land will be leased in tracts of approximately .625 acres, each being approximately 165 by 165 feet.

7. Preference right leases referred to in paragraph 2 will be issued for the land described in the application irrespective of the direction of the tract, provided the tract conforms to or is made to conform to the area and the dimension specified in paragraph 6.

8. Leases will be for a period of five years at an annual rental of \$5.00 payable for the entire lease period in advance of the issuance of the lease. Leases will contain an option to purchase clause at the appraised value of \$50.00 per tract, application for which

may be filed at or after the expiration of one year from date the lease is issued.

9. Tracts will be subject to rights-of-way not exceeding 33 feet in width along or near the edges thereof for road purposes and public utilities. Such rights-of-way may be utilized by the Federal Government, or the state, county or municipality in which the tract is situated, or by any agency thereof. The rights-of-way may, in the discretion of the authorized officer of the Bureau of Land Management, be definitely located prior to the issuance of the patent. If not so located, they may be subject to location after patent is issued.

10. All inquiries relating to these lands should be addressed to the Manager, Land Office, Los Angeles, California.
