How To Find U.S. Statutes and U.S. Code Citations

[Revised Edition—1965]

This pamphlet contains typical legal references which require further citing. The official published volumes in which the citations may be found are shown alongside each reference—with suggestions as to the logical sequence to follow in using them. Additional finding aids, some especially useful in citing current legislation, also have been in-

cluded. Examples are furnished at pertinent points and a list of references, with descriptions, is carried at the end.

This revised edition contains illustrations of principal finding aids and reflects the changes made in the new master table of statutes set out in the 1964 edition of the United States Code.

Title 12—BANKS AND BANKING

Chapter V—Federal Home Loan Bank Board

SUBCHAPTER B—FEDERAL HOME LOAN BANK SYSTEM

[No. 19,635]

PART 530—BOARD RULINGS

Liquidity Requirement; Deposits

DECEMBER 30, 1965.

Resolved that the Federal Home Loan Bank Board, upon the basis of consideration by it of the advisability of amendment of § 530.1 of the Regulations for the Federal Home Loan Bank System (12 CFR 530.1) as hereinafter set forth, and for the purpose of effecting such amendment, hereby amends said section as follows, effective January 11, 1966:

§ 530.1 Liquidity requirement; deposits.

Section 523.12 of this subchapter (Regulations for the Federal Home Loan Bank System) prohibits the making of any loan, other than a share loan, by an association that is a member of a Federal Home Loan Bank at any time when its holdings of cash and unpledged obligations of the United States are not at least equal to the percentage of the association's withdrawable accounts specified in said section. For the purposes of compliance with said § 523.12 of this subchapter, cash on hand, deposits made in a Federal Home Loan Bank by a member thereof, deposits made by a member in State banks performing similar reserve functions and deposits made by a member in commercial banks shall be considered as cash. Any deposit in a bank under the control or in the possession of appropriate supervisory authority shall not be considered as cash. Except deposits in a Federal Home Loan Bank, no time deposit established hereafter, whether time deposit-open account or deposit evidenced by a certificate of deposit, shall be considered as cash for such purposes unless (a) such member itself made the deposit in question, (b) the deposit, together with all other time deposits of the association in the same bank, does not exceed the greater of one-quarter of one percent of such bank's total deposits as of the bank's last published statement of condition or \$10,000, and (c) no consideration was received from a third party in connection with the making of the deposit.

Resolved further that since the aforesaid amendment contains only statements of general policy or interpretations of substantive rules adopted or formulated by the Board for the guidance of the public, the requirements of notice and public procedure set out in

§ 508.12 of the general regulations of the Federal Home Loan Bank Board (12 CFR 508.12) and section 4(a) of the Administrative Procedure Act do not apply, and for the same reasons, deferment of the effective date is not required under the provisions of § 508.14 of the general regulations of the Federal Home Loan Bank Board (12 CFR 508.14) and section 4(c) of the Administrative Procedure Act.

By the Federal Home Loan Bank Board.

Title 14—AERONAUTICS AND SPACE

Chapter I—Federal Aviation Agency

[Docket No. 6999; Amdt. 39-180]

PART 39—AIRWORTHINESS DIRECTIVES

Mooney Models M20 and M20A Airplanes

A proposal to amend Part 39 of the Federal Aviation Regulations to include an airworthiness directive requiring inspection and repair where necessary of the wood structure on Mooney Models M20 and M20A airplanes was published in 30 F.R. 13963.

Interested persons have been afforded an opportunity to participate in the making of the amendment. No objections were received.

In consideration of the foregoing, and pursuant to the authority delegated to me by the Administrator (25 F.R. 6489), § 39.13 of Part 39 of the Federal Aviation Regulations is amended by adding the following new airworthiness directive:

MOONEY. Applies to Models M20 and M20A airplanes.

Compliance required at the next periodic inspection after the effective date of this AD and thereafter at each periodic inspection.

To detect wood and glue joint deterioration on wood wing and wood empennage airplanes, accomplish the following:

(a) Remove rear seat, auxiliary fuel tank and wing-to-fuselage fairing. Visually inspect all exposed areas for wood or glue joint deterioration. Apply one coat of aluminized sealer or spar varnish to the interior center section after inspection or repair.

(b) Visually inspect the main wheel well areas for wood or glue joint deterioration. Apply one coat of aluminized sealer or spar varnish to the wing wheel well compartment after inspection or repair.

(c) Remove all wing access panels. Visually inspect all areas that can be viewed through these openings for wood or glue deterioration.

(d) Visually inspect the wing trailing edge for wood or glue joint deterioration. Visually inspect the fabric for cracks or breaks. In areas where fabric is cracked or broken, open the fabric and inspect the adjacent wood or glue joint.

(e) Clear all wing drain holes.

(f) Scupper Boxes: Fill any space between the sides of the fuel tank scupper boxes and wing with Scotch caulking compound or equivalent.

(g) Wing—Fuselage Joint: Check the condition of the tape that seals the joint between the wing and fuselage. Inspect and determine that the tape is applied tightly against the wing and fuselage from the leading edge to the trailing edge of the wing. Replace this seal if necessary using a water resistant tape. Add this tape on airplanes prior to S/N 1196.

(h) Remove fairings between fuselage and empennage and visually inspect the empennage areas which are not covered with fabric for wood and glue joint deterioration. In areas where the fabric is cracked or broken, open the fabric and inspect the adjacent wood and glue joints for deterioration.

(i) Clear empennage drain holes.

(j) Add a piece of water resistant tape over cutout adjacent to fin on right and left sides of horizontal stabilizer.

(k) Repair all structure having wood or glue joint deterioration in accordance with Mooney Service Letters Nos. 20-67 and 20-70 within the next 10 hours' time in service after the inspection.

This amendment becomes effective February 10, 1966.

This amendment is made under the authority of sections 313(a), 601 and 603 of the Federal Aviation Act of 1958 (49 U.S.C. 1354(a), 1421, and 1423).

Issued in Washington, D.C., on January 5, 1966.

*Acting Director,
Flight Standards Service.*

PART 71—DESIGNATION OF FEDERAL AIRWAYS, CONTROLLED AIRSPACE AND REPORTING POINTS

Control Zone and Transition Area; Alteration and Designation

On Page 14968 of the FEDERAL REGISTER for December 3, 1965, the Federal Aviation Agency published regulations for the alteration and designation of control zone and transition areas. This is to amend the description of the Campbellsville, Ky., transition area under Item 3.

Since this amendment is minor in nature, notice and public procedure hereon are unnecessary. In view of the foregoing, the proposed amendment is hereby adopted effective 0001 e.s.t., February 3, 1966, as follows:

1. Amend § 71.181 of Part 71 of the Federal Aviation Regulations in the description of the Campbellsville, Ky., transition area to delete the phrase, "within a 5-mile radius", and insert in lieu thereof, the phrase, "within a 4-mile radius".

p-Chlorophenoxyacetic Acid; Establishment of Tolerance

No comments were received in response to the notice published in the FEDERAL REGISTER of December 1, 1965 (30 F.R. 14857), proposing that Part 120 be amended to establish a tolerance of 2 parts per million for residues of *p*-chlorophenoxyacetic acid in or on mung bean sprouts for the purpose specified. The proposal was based on a petition (PP 2F0360) filed by the Chun King Corp., Post Office Box 206, Duluth, Minn., 55801. No request has been received for referral of the proposal to an advisory committee.

Therefore, pursuant to the provisions of the Federal Food, Drug, and Cosmetic Act (sec. 408(e), 68 Stat. 514; 21 U.S.C. 346a(e)), and under the authority delegated to the Commissioner of Food and Drugs by the Secretary of Health, Education, and Welfare (21 CFR 2.90); *It is ordered*, That the amendments proposed be adopted without change. PART 121—FOOD ADDITIVES

Subpart C—Food Additives Permitted in Feed and Drinking Water of Animals or for the Treatment of Food-Producing Animals

Subpart D—Food Additives Permitted in Food for Human Consumption

HEXACHLOROPHENE; PHENOTHIAZINE

1. The Commissioner of Food and Drugs, having evaluated the data sub-

mitted in a food additive petition (FAP 6D1838) filed by William Cooper & Nephews, Inc., 1909-25 Clifton Avenue, Chicago, Ill., 60614, and other relevant material, has concluded that the food additive regulations should be amended to provide for the safe use of hexachlorophene and phenothiazine in an oral preparation used as an anthelmintic for cattle. Therefore, pursuant to the provisions of the Federal Food, Drug, and Cosmetic Act (sec. 409(c)(1), 72 Stat. 1786; 21 U.S.C. 348(c)(1)), and under the authority delegated to the Commissioner by the Secretary of Health, Education, and Welfare (21 CFR 2.90), Part 121 is amended by adding to Subpart C the following new sections:

§ 121.273 Hexachlorophene.

Hexachlorophene may be safely used in the treatment of food-producing animals in accordance with the following conditions:

(a) The additive is the chemical 2,2'-methylenebis (3,4,6-trichlorophenol), C₁₂H₆Cl₆O₂, conforming to specifications and assay in U.S.P. XVI.

(b) Permitted uses of hexachlorophene are described in tabular form in this section.

(c) The additive is used or intended for use as follows:

Principal ingredient	Amount	Combined with—	Amount	Limitations	Indications for use
Hexachlorophene.	450 mg. per fluid oz. in water.	Phenothiazine.	12.5 grams per fluid oz. in water.	For cattle: Administer as a single oral dose 1 fluid oz. per 100 lb. of body-weight up to a maximum of 6 fluid oz.; one treatment in spring, one in fall for liver flukes; repeat once in 3 weeks for heavy intestinal-worm concentrations; do not treat animals within 14 days of slaughter; milk taken from treated animals within 96 hr. (8 milkings) must be discarded; do not use within 2 weeks of treatment with an organophosphorus insecticide; do not treat sick or weak animals without supervision of a veterinarian.	Control of infestations of liver fluke (<i>F. hepatica</i>) and deer fluke (<i>F. magna</i>) and the gastrointestinal worms <i>Hacmonchus</i> (large stomach worm), <i>Ostertagia</i> (medium stomach worm), <i>Trichostrongylus</i> spp. (black scour worms, small intestinal worms), <i>Oesophagostomum</i> (nodular worm); efficacy against fluke may be reduced in animals weighing more than 650 lb.

(d) To assure safe use, the label and labeling of the additive, any combination containing the additive, and any final dosage form shall bear, in addition to the other information required by the act, the following:

- (1) The name of the additive or additives.
- (2) A statement of the quantity or quantities of each contained therein.
- (3) Adequate directions and warnings for use.

§ 121.279 Phenothiazine.

Phenothiazine may be safely used in the treatment of food-producing animals in accordance with the following conditions:

(a) The additive is the chemical thiodiphenylamine, C₁₂H₉NS, conforming to the following:

- (1) Specifications in N.F. XII.
- (2) Assay: AOAC, 9th Edition, not less than 96.8 percent of C₁₂H₉NS.
- (3) Particle size: 3 microns average.
- (b) Permitted uses of phenothiazine are described in tabular form in this section.
- (c) The additive is used or intended for use as follows:

Principal ingredient	Amount	Combined with—	Amount	Limitations	Indications for use
Phenothiazine.	12.5 grams per fluid oz. in water.	Hexachlorophene.	450 mg. per fluid oz. in water.	For cattle: Administer as a single oral dose 1 fluid oz. per 100 lb. of body-weight up to a maximum of 6 fluid oz.; one treatment in spring, one in fall for liver flukes; repeat once in 3 weeks for heavy intestinal-worm concentrations; do not treat animals within 14 days of slaughter; milk taken from treated animals within 96 hr. (8 milkings) must be discarded; do not use within 2 weeks of treatment with an organophosphorus insecticide; do not treat sick or weak animals without supervision of a veterinarian.	Control of infestations of liver fluke (<i>F. hepatica</i>) and deer fluke (<i>F. magna</i>) and the gastrointestinal worms <i>Haemonchus</i> (large stomach worm), <i>Ostertagia</i> (medium stomach worm), <i>Trichostrongylus spp.</i> (black scour worms, small intestinal worms), <i>Oesophagostomum</i> (nodular worm); efficacy against fluke may be reduced in animals weighing more than 650 lbs.

(d) To assure safe use, the label and labeling of the additive, any combination containing the additive, and any final dosage form shall bear, in addition to the other information required by the act, the following:

(1) The name of the additive or additives.

(2) A statement of the quantity or quantities of each contained therein.

(3) Adequate directions and warnings for use.

2. Based upon an evaluation of the data before him, and proceeding under the authority of the Federal Food, Drug, and Cosmetic Act (sec. 409(c)(4), 72 Stat. 1786; 21 U.S.C. 348(c)(4)), the Commissioner of Food and Drugs has concluded that where cattle are treated with hexachlorophene and phenothiazine in accordance with §§ 121.278 and 121.279, a tolerance limitation is required to assure that the edible tissues and milk from treated animals are safe for human consumption. Therefore, Part 121 is amended by adding to Subpart D the following new sections:

Title 32—NATIONAL DEFENSE

Chapter VI—Department of the Navy

SUBCHAPTER C—PERSONNEL

PART 733—DECORATIONS AND AWARDS

Subpart B—Military Decorations

Subpart E—Campaign and Service Awards

Miscellaneous Amendments

Scope and purpose. Part 733 is updated in accordance with amendments to Secretary of the Navy Instruction 1650.1C, the Navy and Marine Corps Awards Manual, distributed to Navy and Marine Corps commands as Change 2 to that manual and as SECNAV Notice 1650 of September 14, 1965.

1. Section 733.21 is amended by adding paragraphs (c) (4) and (d) to read as follows:

§ 733.21 General.

(c) Attachments—

(4) *Oak leaf cluster.* An oak leaf cluster $1\frac{3}{32}$ -inch long is worn on the suspension ribbon of the medal and $\frac{1}{16}$ -inch long on the ribbon bar to denote each subsequent award of a Joint Service Commendation Medal. (Exception is a subsequent award of a Joint Service Commendation Medal posthumously. In such cases, a medal with oak leaf cluster(s) is issued to the next of kin even though a medal was previously issued to the individual.) A silver oak leaf cluster of the same dimensions is worn on the suspension ribbon of the medal and the ribbon bar of the Joint Service Commendation Medal in lieu of five oak leaf clusters. The oak leaf cluster is worn with the stem of the leaves toward the wearer's right.

(d) *Engraving.* The Medal of Honor will be engraved for both living and deceased recipients as follows: First name, middle initial, last name, grade or rate, branch of Service, and the words "for action above and beyond the call of duty in (area) on (date)." Other Navy decorations will be engraved only in posthumous or in absentia cases with first name, middle initial, last name, grade or rate, and branch of Service.

2. Section 733.22 is amended by revising paragraph (b) to read as follows:

§ 733.22 Recommendations.

(b) *Chain of command.* (1) Except when awarding authority has been delegated (see § 733.24), all recommendations for Navy decorations (except the Purple Heart) shall be submitted to the Secretary of the Navy (Navy Department Board of Decorations and Medals) as follows:

(i) For personnel attached to the Operating Forces of the Navy, recommendations shall be forwarded via the appropriate Fleet Commander in Chief and

the Chief of Naval Operations, with copies provided to commanders of intermediate echelons. In cases concerning Marine Corps personnel, recommendations shall be forwarded via the Commandant of the Marine Corps before transmittal to the Chief of Naval Operations. Commanders receiving information copies of the recommendations may provide comments, if desired, to the Fleet Commander in Chief. Such comments will be submitted in sufficient time to insure receipt by the Fleet Commander in Chief within 15 days of the date of the original recommendation, utilizing electrical means, if necessary. Nonreceipt within this period of time will be interpreted to indicate concurrence in the basic recommendation. Submission of comments will most likely be appropriate only in those cases where there is disagreement with the original recommendation.

(ii) For personnel not assigned to the Operating Forces, recommendations shall be forwarded as follows:

(a) Navy personnel—via the administrative chain of command and the Chief of Naval Operations.

(b) Marine Corps personnel—via the administrative chain of command and the Commandant of the Marine Corps.

(iii) See § 733.35(a) for chain of command for unit award recommendations.

(2) Recommendations for the Purple Heart shall be forwarded directly to the Chief of Naval Personnel/Commandant of the Marine Corps, or other delegated authority, as appropriate, without reference to the chain of command.

(3) Recommendations for the Joint Service Commendation Medal shall be forwarded to the Secretary of Defense or to one of the commands which have been delegated awarding authority. (See § 733.29(j) (2).)

(4) After action by the Board of Decorations and Medals on recommendations for the Medal of Honor, Navy Cross, Distinguished Service Medal, and unit awards, the recommendations shall be transmitted to the Secretary of the Navy as follows:

(i) For personnel assigned to the Operating Forces—via the Chief of Naval Operations, and in addition for Marine Corps personnel via the Commandant of the Marine Corps.

(ii) For personnel not assigned to the Operating Forces—via the Chief of Naval Operations or the Commandant of the Marine Corps, as appropriate.

(5) Disapproval of a recommendation by an officer subordinate to the commander or military department having authority to award a decoration will not alone constitute authority for the return of the recommendation to the initiator. All recommendations shall be forwarded, with appropriate endorsements.

3. Section 733.57 is amended by revising the concluding portion of paragraph (g) (2) subsequent to subdivision

(v) and by revising paragraphs (h) (2) (v) and (j) (2) (ii) (a) to read as follows:

Proposed Rule Making

POST OFFICE DEPARTMENT

[39 CFR Parts 51, 52, 53, 58, 61, 132, 133]

SPECIAL SERVICES; DOMESTIC AND INTERNATIONAL

Proposed Changes in Fees and Regulations

The Department is considering changes in fees and regulations for some special services enumerated in Chapter I of Title 39, Code of Federal Regulations, effective March 26, 1966.

The changes under consideration are as follows:

1. In Part 51, registry, the present 60-cent and 75-cent fee brackets would be combined into one, at 75 cents, for articles valued up to \$100. Registry fees for articles valued in excess of \$100 would remain unchanged.

Fees for c.o.d. service used in conjunction with registered mail would be increased from 40 cents to 60 cents.

2. In Part 52, insurance fees and fee brackets would be changed as follows: The present four fee brackets would be increased to five. The upper limit of the minimum fee bracket would be increased from \$10 to \$15 and the minimum fee would be set at 20 cents.

The following additional fee increases are under consideration:

a. From 20 cents to 30 cents for articles valued from \$15.01 to \$50.

b. From 30 cents to 40 cents for articles valued from \$50.01 to \$100.

c. From 40 cents to 50 cents for articles valued from \$100.01 to \$150.

d. From 40 cents to 60 cents for articles valued from \$150.01 to \$200.

Receipts of delivery, now available for articles valued from \$10.01 to \$200, would be limited to articles valued from \$15.01 to \$200. Thus, restricted delivery and return receipts would not be available for mail insured for \$15 or less, but would still be available for articles insured in excess of that amount. The limiting of delivery receipts to parcels valued in excess of \$15 will also require some conforming changes in the Department's regulations relating to mailing and delivery.

3. In Part 53, the present 40-cent and 50-cent c.o.d. fee brackets would be combined into one fee bracket, at 60 cents, for amounts up to \$10.

4. In Part 58, the certified mail fee would be increased from 20 cents to 30 cents.

5. In Part 61, all domestic and international money order fees would be increased 5 cents.

6. In Part 132, the 60-cent fee for Postal Union registered mail and parcel post registry would be increased to 75 cents. Currently, for Postal Union mail,

the fee is 60 cents, except that for mailings to Canada, fees are 60 cents for liability up to \$10 and 75 cents for liability up to \$100. The latter fee would remain unchanged.

7. In Part 133, the reference to the scale of fees, i.e. to Part 168.5, is changed to specifically set forth a scale of fees (within the limits of the convention with the applicable country).

The international insurance fee changes would be as follows:

a. From 20 cents to 35 cents for articles valued up to \$10.

b. From 25 cents to 35 cents for articles valued from \$10.01 to \$15.

c. From 25 cents to 45 cents for articles valued from \$15.01 to \$25.

d. From 35 cents to 45 cents for articles valued from \$25.01 to \$50.

e. 55 cents for articles valued from \$50.01 to \$100 (no change).

f. From 60 cents to 65 cents for articles valued from \$100.01 to \$150.

g. From 60 cents to 75 cents for articles valued from \$150.01 to \$200.

h. From 65 cents to 95 cents for articles valued from \$200.01 to \$300.

i. From 70 cents to \$1.15 for articles valued from \$300.01 to \$400.

j. From 75 cents to \$1.35 for articles valued from \$400.01 to \$500.

k. From 80 cents to \$1.55 for articles valued from \$500.01 to \$600.

l. From 85 cents to \$1.75 for articles valued from \$600.01 to \$700.

m. From 90 cents to \$1.95 for articles valued from \$700.01 to \$800.

n. From 95 cents to \$2.15 for articles valued from \$800.01 to \$900.

o. From \$1.00 to \$2.35 for articles valued from \$900.01 to \$1,000. With the proposed changes the revised Parts will read as follows:

FEDERAL AVIATION AGENCY

[14 CFR Part 37]

[Docket No. 7101; Notice No. 66-1]

[Technical Standard Order (TSO-C72)]

INDIVIDUAL FLOTATION DEVICES

Notice of Proposed Rule Making

The Federal Aviation Agency is considering amending section 37.178 of the Federal Aviation Regulations to clarify the technical standard order (TSO-C72) for individual flotation devices. This amendment would replace the present generalized buoyancy test requirement with specific tests to be used in showing compliance with the standard.

Interested persons are invited to participate in the making of the proposed rule by submitting such written data, views, or arguments as they may desire. Communications should identify the docket number and be submitted in duplicate to the Federal Aviation Agency, Office of the General Counsel, Attention: Rules Docket, 800 Independence Avenue SW., Washington, D.C., 20553. All communications received on or before April 11, 1966, will be considered by the Administrator before taking action on the proposed rule. The proposal contained in this notice may be changed in the light of comments received. All comments submitted will be available, both before and after the closing date for comments, in the Rules Docket for examination by interested persons.

Although the buoyancy performance requirements, paragraph 5.0.1 of the Federal Aviation Standard, "Individual Flotation Devices", dated July 15, 1963, requires allowance for the effects of compression through extended service use, the present buoyancy test requirement, paragraph 7.0.1 of that Standard, does not indicate how compliance is to be shown. Dynamic testing for simulated service use is a particular problem in connection with open-cell or rigid foam materials for which manual squeezing would be a nonrepeatable procedure due to rupture of cells.

Notwithstanding the paucity of related test method developments, Agency studies indicate that buoyancy performance characteristics may be proved by either a survivor test or a machine test. This proposal accordingly amends the buoyancy test requirement to incorporate two alternative test procedures applicable to either inflatable or noninflatable devices. The survivor test is based upon conditions approximating those under which a device would actually be used. Alternatively, for these manufacturers who object to the time and human factor elements involved in the actual survivor test, the machine test provides an equivalent and probably shorter procedure that simulates manual pressures exerted on a device by a survivor. The Standards of the machine test are based on a correlation established by the Agency through actual comparative tests of flotation devices using human subjects and immersion machines.

In addition, the Agency is aware that some persons have interpreted the pres-

ent standard as requiring that their devices be tested at the standard conditions, i.e., fresh water at 85° F. This proposal would amend the buoyancy test requirements to make it clear that tests may be conducted under other than standard water conditions provided the results can be converted to standard conditions.

In consideration of the foregoing, it is proposed to amend § 37.178 of the Federal Aviation Regulations by amending paragraph 7.0.1 of the Standard in TSO-C72 (Individual Flotation Devices) to read as follows:

7.0.1 *Buoyancy testing.* The device must be tested by one of the following methods under the water conditions specified in paragraph 5.0.1. Either test, however, may be conducted using sea water, or, at a temperature other than 85° F. provided the result can be converted to the standard conditions specified in paragraph 5.0.1.

(a) *Survivor test.* The device must be demonstrated for not less than 8 hours in open water, or simulated open water, with wave heights not less than 2 feet using human subjects having no other means of support and simulating the movements characteristic of a nonswimmer. At the end of the test, the device must possess the minimum buoyancy specified in paragraph 5.0.1.

(b) *Machine test.* The device must be submerged in water to a depth of at least 10 feet and returned to the surface for not less than 300 cycles. Each cycle must be completed at a uniform rate in not less than 1 minute. At the end of the test, the device must exceed the minimum buoyancy specified in paragraph 5.0.1 by a factor of 1.15.

[Airspace Docket No. 65-SW-41]

TEMPORARY RESTRICTED AREA Proposed Designation

The Federal Aviation Agency has under consideration a proposal to amend the Federal Aviation Regulations to designate a temporary restricted area extending from England AFB, Alexandria, La., into parts of Arkansas and Oklahoma.

Interested persons may participate in the proposed rule making by submitting such written data, views, or arguments as they may desire. Communications should identify the airspace docket number and be submitted in triplicate to the Director, Southwest Region, Attention: Chief, Air Traffic Division, Federal Aviation Agency, Post Office Box 1689, Fort Worth, Tex., 76101. All communications received within 45 days after publication of this notice in the FEDERAL REGISTER will be considered before action is taken on the proposed amendment.

The proposal contained in this notice may be changed in the light of comments received.

An official docket will be available for examination by interested persons at the Federal Aviation Agency, Office of the General Counsel, Attention: Rules Docket, 800 Independence Avenue SW., Washington, D.C., 20553. An informal docket also will be available for examination at the office of the Regional Air Traffic Division Chief.

The Federal Aviation Agency has been requested by the Department of the Air Force in behalf of Joint Task Force Two (JTF-2) to designate a temporary restricted area as described herein to electronically test and evaluate airborne weapons delivery systems for all military services, from May 26, 1966, through September 30, 1966. The JTF-2 has stated that the extremely low altitudes and high speeds of participating aircraft to be attained while the pilots are concentrating on the difficult task of low level navigation and target acquisition would present a hazard to nonparticipating aircraft. Moreover, the safety of the participating pilots and the efficiency of the test evaluation require that the tests be conducted without the requirement to see and avoid other aircraft. In this regard it is stated that the flights would deviate from the general operating and flight rules in Part 91 of the Federal Aviation Regulations and that the designation of a restricted area is necessary to assure the safety of the public and the participating aircraft. Further, the test objectives would be seriously compromised if the test aircraft were required to comply with the general operating and flight rules.

The purpose of this test is to collect operational and technical data on airborne weapons delivery systems for the Air Force, Navy, Marine Corps, and Army, and the capability of pilots to navigate while flying as low as possible at speeds ranging from 175 to 600 knots. JTF-2 has advised that this information will assist in the development and refinement of low level aerial warfare techniques, equipment, and doctrine. The result will further the survivability of combat personnel and effectiveness of weapons in situations of a general or limited war.

The test flights will originate at England Air Force Base, Alexandria, La., normally Monday through Saturday, during daylight hours. The restricted area would not be used more than 8 hours daily. Each flight will proceed at low altitudes, normally below 500 feet, from England AFB through one of two navigational corridors for approximately 190 miles. This portion of each flight is a navigational test of the pilot's ability to follow an unmarked course using only visual landmarks such as bridges, dams, or structures for en route navigational guidance to a target. These corridors lead to areas where the pilot will commence simulated runs on specified targets such as surface to air missile sites, bivouac areas, railroad bridges, etc. The target acquisition portion of the test starts north of Victor airway 54N and extends to the end of each course. The

test pilots will comply with FAR 91 north of latitude 35° N; therefore, the restricted area will not be needed in this portion of the area. At the termination of the course, the aircraft will return to England AFB by the use of normal en route procedures. No ordnance will be carried nor will supersonic flight be attained at any time. Communications will be established as required between the using agency and FAA traffic control and advisory elements to ensure maximum utilization of the restricted areas by nonparticipating aircraft when not in use for the purpose designated and to expedite the dissemination of information on the status of the restricted areas and test activity.

There will be approximately 15 sorties daily with a total of approximately 650 completed flights. It is anticipated that some flights will not be completed due to mechanical failures, weather, or other factors. There will be three aircraft orbiting at 23,000 feet to record the results of each test run, to monitor the test area and to abort a run if necessary.

Ground and aerial surveys will be conducted in the test area to identify and mark obstructions and hazards as required to assure maximum recognition by the pilot. The courses will be located over sparsely populated areas insofar as possible.

Should a restricted area be designated, JTF-2 has also advised that they propose to enter a joint-use agreement with the controlling agency, the Houston ARTC Center and would release the entire area, or portions thereof, to the Center when not in use for the purpose designated. They plan to make provision for civil and nonparticipating military pilots to contact the Test Director by reverse charge telephone calls for authorization to conduct flight within the area. Approval of such requests would be contingent on the activities in progress at the time of and on the route of the proposed flight.

JTF-2 has advised that the proposed restricted area will be released to the controlling agency whenever the ceiling along the courses is less than 3,000 feet or the flight visibility is below 5 miles. Observations of the ceiling and visibility will be made at locations within the corridors and by pilots of aircraft.

The Houston Center would be designated as the controlling agency and Joint Task Force Two, Sandia Base, N. Mex., as the using agency.

The using agency will conduct a comprehensive public information program prior to and throughout the test to seek complete public understanding, cooperation, and comprehension of the importance of the test to the national defense effort. The program will include the briefing of State officials, local governments, law enforcement agencies and civic organizations. News releases will be issued to newspapers, radio and television stations defining the test area and advising the public on the purpose and progress of the test program. Wherever practicable, daily operational schedules will be provided to news media in the vicinity of the test area for dissemina-

tion to the public. The Federal Aviation Agency has also been advised that military representatives would visit people within the test area prior to and during the exercise to insure that there is a clear understanding of the necessity for conducting these tests.

The proposal will be placed on the agenda of the ATC advisory committee meetings to be held at Fort Worth, Houston, and Memphis ARTC Centers. The dates of each meeting will be publicized by the appropriate FAA office.

Joint Task Force Two has emphasized that the safety of all aircraft and of persons and property on the ground would be a primary consideration during test operations.

If this action is taken, a temporary restricted area will be designated as follows:

BURLEY TOBACCO

Acreage-Poundage Quotas

Section 317 of the Agricultural Adjustment Act of 1938 (Public Law 89-12, approved April 16, 1965, 79 Stat. 66, 7 U.S.C. 1314c) provides that whenever, during the first or second marketing year of the 3-year period for which marketing quotas on an acreage basis are in effect for any kind of tobacco, the Secretary, in his discretion, determines with respect to that kind of tobacco that acreage-poundage quotas would result in a more effective marketing quota program for that kind of tobacco he shall at the time the next announcement of the amount of the national marketing quota determine and announce the amount of the national quota under acreage-poundage and at the same time announce the national acreage allotment and national average yield goal and within 45 days thereafter conduct a special referendum to determine whether the farmers engaged in the production of that kind of tobacco favor the establishment of marketing quotas on an acreage-poundage basis.

The Act provides further that the Secretary shall not make any such determination with respect to any kind of tobacco, except flue-cured, unless prior thereto he shall conduct public hearings in the areas where such tobacco is produced for the purpose of ascertaining and taking into consideration the attitudes of producers and other interested persons with respect to acreage-poundage quotas.

In compliance with the Act, a meeting was held in Lexington, Ky., on December 21, 1965, to receive the recommendations of all segments of the tobacco industry and to determine the need for an acreage-poundage or similar program for burley tobacco (30 F.R. 14865, 15333).

Burley tobacco growers approved marketing quotas on an acreage basis for the three marketing years beginning October 1, 1965, in a referendum held February 25 and 26, 1965 (30 F.R. 4313).

Hearings for the purpose of ascertaining and taking into consideration the attitudes of producers and other inter-

ested persons with respect to acreage-poundage marketing quotas for burley tobacco will be conducted at the following times and places:

1. January 17, 1966, Greeneville, Tenn., VFW Auditorium, 219 North Main Street.

2. January 18, 1966, Nashville, Tenn., Ellington Agricultural Center, located off U.S. 31 South on Hogan Road.

3. January 18, 1966, Owensboro, Ky., Daviess County Junior High School, East Fourth Street.

4. January 19, 1966, Bowling Green, Ky., Livestock Pavilion, Western State College Campus.

5. January 20, 1966, Shelbyville, Ky., Shelby County High School Auditorium, on U.S. 60 East of Shelbyville.

6. January 21, 1966, Somerset, Ky., REA Auditorium, North Main Street.

7. January 22, 1966, Maysville, Ky., Mason County Courthouse.

The hearings will begin at 9 a.m., local time, except the Owensboro, Ky., hearing will be at 7 p.m. The hearings will be presided over by the Administrator of the Agricultural Stabilization and Conservation Service or an official of the Department of Agriculture designated by him. It is not contemplated that the proceedings will be recorded and transcribed by a reporter. Written submissions will be considered if submitted at any of the hearings or mailed (post-marked) to the Director, Tobacco Policy Staff, Agricultural Stabilization and Conservation Service, U.S. Department of Agriculture, Washington, D.C., 20250, not later than January 22, 1966. All written submissions made pursuant to this notice will be made available for public inspection at such times and places and in a manner convenient to the public business (7 CFR 1.27(b)).

A summary of the provisions of section 317 was published in the FEDERAL REGISTER for October 16, 1965 (30 F.R. 13231). Further information can be obtained by writing to the Director, Tobacco Policy Staff.

Commodity Credit Corporation SALES OF CERTAIN COMMODITIES January Sales List

Notice to buyers. Pursuant to the policy of Commodity Credit Corporation issued October 12, 1954 (19 F.R. 6669), and subject to the conditions stated therein as well as herein, the commodities listed below are available for sale and, where noted, for redemption of payment-in-kind certificates on the price basis set forth.

The prices at which Commodity Credit Corporation commodity holdings are available for sale during January 1966 are as announced by the U.S. Department of Agriculture. The following commodities are available: Butter, cheddar cheese, nonfat dry milk, cotton (upland and extra long staple), wheat, corn, oats, barley, rye, rice, grain sorghum, peanuts, flax and linseed oil.

The January list of commodities is unchanged from December.

During December, CCC resumed offering lower protein wheat stocks for unrestricted use sale. Pricing will be at the market, but not less than 108 percent of 1965-crop support loan rates plus carrying charges. CCC also announced on December 22 that CCC stocks of hard red winter wheat sold through Pacific Northwest ports in redemption of payment-in-kind export certificates are not eligible for export under Title I, P.L. 480.

Corn, oats, barley or grain sorghum, as determined by CCC, will be sold for unrestricted use for "Dealers' Certificates" issued under the emergency livestock feed program. Grain delivered against such certificates will be sold at the applicable current market price, determined by CCC.

In the following listing of commodities and sales prices or method of sales, "unrestricted use" applies to sales which permit either domestic or export use and "export" applies to sales which require export only. CCC reserves the right to determine the class, grade, quality and available quantity of commodities listed for sale.

The CCC Monthly Sales List, which varies from month to month as additional commodities become available or commodities formerly available are dropped, is designed to aid in moving CCC's inventories into domestic or export use through regular commercial channels.

If it becomes necessary during the month to amend this list in any material way—such as by the removal or addition of a commodity in which there is general interest or by a significant change in price or method of sale—an announcement of the change will be sent to all persons currently receiving the list by mail from Washington. To be put on this mailing list, address: Director, Procurement and Sales Division, Agricultural Stabilization and Conservation Service, U.S. Department of Agriculture, Washington, D.C., 20250.

Interest rates per annum under the CCC Export Credit Sales Program (Announcement GSM-3) for January 1966 are 5 percent for periods up to and including 12 months, and 5½ percent for periods from over 12 months up to a maximum of 36 months. Commodities currently offered for sale by CCC, plus tobacco from CCC loan stocks, are available for export sale under the CCC Export Credit Sales Program as provided under specific commodity listings. Commodities from private stocks now eligible for financing under the CCC Export Credit Sales Program include wheat, wheat flour, bulgur, corn, cornmeal, grain sorghum, upland and extra long staple cotton, tobacco, milled and brown rice,

cottonseed oil, soybean oil, and dairy products.

The following commodities are available for programming under Title IV, P.L. 480, private trade agreements: Wheat, corn, rice, grain sorghum, upland and extra long staple cotton, tobacco from CCC loan stocks, butter, cheese, and nonfat dry milk. In addition, other surplus agricultural commodities are also eligible for Title IV programming. Information on commodities available under this program, and current information on interest rates and other phases of the program may be obtained from the Office of the General Sales Manager, Foreign Agricultural Service, U.S. Department of Agriculture, Washington, D.C., 20250.

The following commodities are currently available for barter: Cotton (upland and extra long staple), tobacco, wheat, corn, grain sorghum, butter, and nonfat dry milk. (In addition, free market stocks of cottonseed and soybean oils are eligible for barter programming.) This list is subject to change from time to time.

The CCC will entertain offers from responsible buyers for the purchase of any commodity on the current list. Offers accepted by CCC will be subject to the terms and conditions prescribed by the Corporation. These terms include payment by cash or irrevocable letter of credit before delivery of the commodity, and the conditions require removal of the commodity from CCC stocks within a reasonable period of time. Where sales are for export, proof of exportation is also required, and the buyer is responsible for obtaining any required U.S. Government export permit or license. Purchases from CCC shall not constitute any assurance that any such permit or license will be granted by the issuing authority.

Applicable announcements containing all terms and conditions of sale will be furnished upon request. For easy reference a number of these announcements are identified by code number in the following list. Interested persons are invited to communicate with the Agricultural Stabilization and Conservation Service, USDA, Washington, D.C., 20250, with respect to all commodities or— for specified commodities—within the designated ASCS Commodity Office.

Commodity Credit Corporation reserves the right to amend, from time to time, any of its announcements. Such amendments shall be applicable to and be made a part of the sale contracts thereafter entered into.

CCC reserves the right to reject any or all offers placed with it for the purchase of commodities pursuant to such announcements.

CCC reserves the right to refuse to consider an offer, if CCC does not have adequate information of financial responsibility of the offerer to meet contract obligations of the type contemplated in this announcement. If a prospective offerer is in doubt as to whether CCC has adequate information with respect to his financial responsibility, he should either submit a financial statement to the office named in the invitation prior to making an offer, or

communicate with such office to determine whether such a statement is desired in his case. When satisfactory financial responsibility has not been established, CCC reserves the right to consider an offer only upon submission by offerer of a certified or cashier's check, a bid bond, or other security, acceptable to CCC, assuring that if the offer is accepted, the offerer will comply with any provisions of the contract with respect to payment for the commodity and the furnishing of performance bond or other security acceptable to CCC.

Disposals and other handling of inventory items often result in small quantities at given locations or in qualities not up to specifications. These lots are offered by the appropriate ASCS office promptly upon appearance and therefore, generally, they do not appear in the monthly sales list.

On sales for which the buyer is required to submit proof to CCC of exportation, the buyer shall be regularly engaged in the business of buying or selling commodities and for this purpose shall maintain a bona fide business office in the United States, its territories or possessions and have a person, principal or resident agent upon whom service of judicial process may be had.

Prospective buyers for export should note that generally, sales to U.S. Government agencies, with only minor exceptions will constitute domestic unrestricted use of the commodity.

Commodity Credit Corporation reserves the right, before making any sales, to define or limit export areas.

NORTHERN NATURAL GAS CO.

Notice of Application

JANUARY 4, 1966.

Take notice that on December 23, 1965, Northern Natural Gas Co. (Applicant), 2223 Dodge Street, Omaha, Nebr., filed in Docket No. CP66-206 an application pursuant to section 7(c) of the Natural Gas Act for a certificate of public convenience and necessity authorizing the construction and operation of certain natural gas facilities and the transportation and sale of natural gas in interstate commerce, all as more fully set forth in the application which is on file with the Commission and open to public inspection.

Specifically, Applicant proposes to increase its system capacity by 55,024 Mcf of gas per day to supply the increased contract demand requirements of its present customers commencing with the 1966-67 heating season and deliver the firm requirements of an ore processing plant now under construction by U.S. Steel Corp. near Mountain Iron, Minn. Applicant proposes to supply this new plant with 13,350 Mcf of gas per day with the remaining 41,674 Mcf to be used to meet the increased contract demand requirements of its existing customers.

Applicant also requests approval of reductions in effective contract demand by certain communities presently served by three of its utility customers, Iowa Electric Light & Power Co., Western Power & Gas Co., Inc. and Applicant's Peoples Natural Gas Division. These reductions to individual communities do not constitute a decrease in the overall effective contract demand of any of Applicant's above named utility customers.

In order to provide the proposed additional service Applicant proposes to construct the following facilities: (1) 8.5 miles of 30-inch pipeline north of Oakland, Iowa, (2) 10.1 miles of 30-inch pipeline northeast of Palmyra, Nebr., (3) 10.6 miles of 36-inch pipeline north of Beatrice, Nebr., (4) 8 miles of 30-inch pipeline north of Bushton, Kans., (5) 10 miles of 36-inch pipeline north of Macksville, Kans., (6) 1.9 miles of 6-inch pipeline near Harlin, Iowa, (6) 2.3 miles of 4-inch pipeline near Northfield, Minn., (7) 4.6 miles of 10-inch pipeline together with two 10-inch orifice meter runs near Mountain Iron, Minn., for the new ore processing plant to be constructed by U.S. Steel Corp. and (8) certain piping modifications together with compressor facilities, totaling approximately 39,365 horsepower, to be located at various points in Minnesota, Iowa, Kansas, Oklahoma, and Texas.

The total estimated cost of Applicants proposed construction is \$16,996,700, which cost will be financed from the sale of \$10,000,000 of sinking fund debentures and from internal sources such as reserve accruals, retained earnings and cash-on-hand.

Protests or petitions to intervene may be filed with the Federal Power Commission, Washington, D.C., 20426, in accordance with the rules of practice and procedure (18 CFR 1.8 or 1.10) and the regulations under the Natural Gas Act (157.10) on or before January 26, 1966.

Take further notice that, pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Power Commission by sections 7 and 15 of the Natural Gas Act and the Commission's rules of practice and procedure, a hearing will be held without further notice before the Commission on this application if no protest or petition to intervene is filed within the time required herein, if the Commission on its own review of the matter finds that a grant of the certificate is required by the public convenience and necessity. If a protest or petition for leave to intervene is timely filed, or if the Commission on its own motion believes that formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicant to appear or be represented at the hearing.

SECURITIES AND EXCHANGE COMMISSION

[01-57]

WILCOX ELECTRIC CO., INC.

Notice of Application and Opportunity for Hearing

JANUARY 5, 1966.

Notice is hereby given that Wilcox Electric Co., Inc. (Wilcox), 14th and Chestnut, Kansas City, Mo., has filed an application pursuant to section 12(h) of the Securities Exchange Act of 1934, as amended ("the Act"), for an order exempting it from the registration provisions of section 12(g) of the Act and also from the reporting provisions of section 15(d) of the Act for the balance of its fiscal year ending June 30, 1966. Exemption from sections 12(g) and 15(d) will have the additional effect of exempting Wilcox from section 13 or 14 of the Act and any officer, director or beneficial owner of more than 10 percent of Wilcox's capital stock from section 16 thereof.

Section 12(g) of the Act requires the registration of the equity securities of every issuer which is engaged in, or in a business affecting interstate commerce, or whose securities are traded by use of the mails or any means or instrumentality of interstate commerce, and on the last day of its fiscal year has total assets exceeding \$1 million and a class of equity securities held of record initially by 750 or more persons, and after July 1, 1966, by 500 or more persons. Registration is terminated 90 days after the issuer files a certification with the Commission that the number of holders of the registered class of equity securities is fewer than 300 persons.

Section 15(d) of the Act requires that each issuer which has filed a registration statement under the Securities Act of 1933 containing an undertaking which is operative under section 15(d) of the Act prior to the date of enactment of the Securities Act Amendments of 1964, shall file with the Commission certain periodic reports required by section 13. The duty to file is automatically suspended as to any fiscal year if the securities of such issuer are registered pursuant to section 12, or if at the beginning of such fiscal year, the securities of each class to which the registration statement relates are held of record by less than 300 persons.

Section 12(h) empowers the Commission to exempt, in whole or in part, any issuer or class of issuer from the registration, periodic reporting and proxy solicitation provisions of the Act if the Commission finds, by reason of the number of public investors, amount of trading interest in the securities, the nature and extent of the securities of the issuer, or otherwise, that such exemption is not inconsistent with the public interest or the protection of investors.

Wilcox's application states, in part:

1. Wilcox, a Kansas corporation, had total assets exceeding \$1,000,000 and a class of equity security (common stock) held of record by more than 750 persons at the close of its fiscal year ended June 30, 1965. Accordingly, it would be required to register its common stock pursuant to section 12(g) and to continue until July 1, 1966 to file reports pursuant to section 15(d) of the Act.

2. As of December 3, 1965, there were 134 public shareholders holding a total of 2,954 shares. The remaining shares are owned by Melpar, Inc., a subsidiary of Westinghouse Air Brake Co. The reduction in the number of holders since June 30, 1965, has resulted from an offer made by Melpar, Inc., on August 27, 1965, to exchange one share of Westinghouse for each three shares of Wilcox.

For a more detailed statement of the information presented, all persons are referred to said application which is on file in the offices of the Commission at 425 Second Street NW., Washington, D.C.

Notice is further given that any interested person may, not later than January 24, 1966, submit to the Commission in writing his views or any additional facts bearing upon this application or the desirability of a hearing thereon. Any such communication or request should be addressed: Secretary, Securities and Exchange Commission, 425 Second Street NW., Washington, D.C., 20549, and should state briefly the nature of the interest of the person submitting such information or requesting a hearing, the reason for such request, and the issues of fact and law raised by the application which he desires to controvert. At any time after said date, an order granting the application may be issued by the Commission unless an order for hearing upon said application be issued upon request or upon the Commission's own motion.

By the Commission.

[SEAL] ORVAL L. DuBOIS,
Secretary.

It appearing, that in the original order No. 34573 of these proceedings dated March 18, 1965, the Commission, Division 2, acting as an appellate division, entered upon an investigation concerning the matter of rates and charges, and the rules, regulations and practices affecting such rates and charges, applicable on interstate or foreign commerce of canned goods, various minima, between Pacific Coast territory and transcontinental eastern defined points;

It further appearing, that by order dated November 9, 1965, the Commission referred No. 34573 (Sub-No. 5) to Hearing Examiner Richard S. It further appearing, that by order dated November 29, 1965, the Commission, Board of Suspension, due to the publication of tariff schedules by Sea-Land Service, Inc., containing rates and charges, rules, regulations, and practices which are similar to, or in addition to, those covered by the original order in No. 34573 and Sub-Nos. 1 through 6 in this proceeding, broadened the investigation and instituted Sub-No. 7;

And it further appearing, that upon consideration of the record in these proceedings and having determined that they are of such a nature as to require the adoption of special procedure, including a formal hearing before a hearing examiner, and for good cause appearing therefor:

It is ordered, That the Commission's order dated November 9, 1965, insofar as it directed special procedure to be followed in No. 34573 (Sub-No. 5), the same special procedure should apply in all respects in No. 34573 (Sub-No. 7).

It is further ordered, That a copy of this order be delivered to the Director,

Office of the Federal Register, for publication in the FEDERAL REGISTER as notice to all parties.

And it is further ordered, That, to avoid future unnecessary service upon those respondents who, although participating carriers in the tariff schedules which are the subject of investigation herein, are not actively interested in the outcome of such investigation, subsequent service on respondents herein of notices and orders of the Commission will be limited to those respondents who:
