HIGHLIGHTS OF THIS ISSUE

This listing does not affect the legal status of any document published in this issue. Detailed table of contents appears inside.

PUBLIC UTILITIES AND BENEFIT CORPORATIONS—Price Commission notice suspending rate increases and announcing hearings on Feb. 22, 24, 25, 26 1972 3094

PRICE STABILIZATION—
IRS notice of a Price Commission ruling to illustrate the Term Limited Pricing approval procedure 3061
IRS notice of a Price Commission ruling to permit price increases in reflection of wage increases incurred before 11–13–71 3063
IRS notice of a Price Commission ruling to define "retailer" and "ultimate customer" 3063
IRS notice of a Price Commission ruling to disallow patent royalty increases keyed on the cost of living index 3063

RENT STABILIZATION—
IRS notice of a Price Commission ruling to emphasize the 30-day prenotification requirement in rent increases (2 documents) 3061, 3062
IRS notice of a Price Commission ruling to reject the use of indirect municipal fee increases to justify rent raises 3061
IRS notice of a Price Commission ruling on the status of mobile home parks 3062

CROP PROGRAM PAYMENT LIMITATION—USDA interpretation attributing the stock of minor children to the parents 3049

NONMEMBER BROKER-DEALERS—SEC guidelines for rules of conduct 3050

ANIMAL DRUGS—
FDA amendment approving the use of a certain solution for dogs; effective 2–11–72 3053
FDA notice of certain drugs deemed adulterated 3079

LIST OF CFR SECTIONS AFFECTED

1949–1963

This volume contains a compilation of the "List of Sections Affected" for all titles of the Code of Federal Regulations for the years 1949 through 1963. All sections of the CFR which have been expressly affected by documents published in the daily Federal Register are enumerated.

Reference to this list will enable the user to find the precise text of CFR provisions which were in force and effect on any given date during the period covered.

Price: $6.75

Compiled by Office of the Federal Register, National Archives and Records Service, General Services Administration

Order from Superintendent of Documents, U.S. Government Printing Office
Washington, D.C. 20402

FEDERAL REGISTER

Area Code 202 Phone 962-8626

Published daily, Tuesday through Saturday (no publication on Sundays, Mondays, or on the day after an official Federal holiday), by the Office of the Federal Register, National Archives and Records Service, General Services Administration, Washington, D.C. 20408, pursuant to the authority contained in the Federal Register Act, approved July 26, 1935 (49 Stat. 500, as amended; 44 U.S.C., Ch. 15), under regulations prescribed by the Administrative Committee of the Federal Register, approved by the President (1 CFR Ch. I). Distribution is made only by the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402.

The FEDERAL REGISTER will be furnished by mail to subscribers, free of postage, for $2.50 per month or $25 per year, payable in advance. The charge for individual copies is 20 cents for each issue, or 20 cents for each group of pages as actually bound. Remit check or money order, made payable to the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402.

The regulatory material appearing herein is keyed to the CODE OF FEDERAL REGULATIONS, which is published, under 50 titles, pursuant to section 11 of the Federal Register Act, as amended (44 U.S.C. 1510). The CODE OF FEDERAL REGULATIONS is sold by the Superintendent of Documents. Prices of new books are listed in the first FEDERAL REGISTER issue of each month.

There are no restrictions on the republication of material appearing in the FEDERAL REGISTER or the CODE OF FEDERAL REGULATIONS.

POWERED INDUSTRIAL TRUCK SAFETY STANDARDS—Labor Dept. amendments coordinating effective dates and clarifying certain provisions 3053

COPYRIGHT CLAIMS REGISTRATION—Library of Congress rules for sound recordings; effective 2–15–72 3055

INTERNATIONAL MAIL—Postal Service rates and conditions for steamship agreements 3056

HAZARDOUS MATERIALS—DoT amendment to require additional couplers on railroad tank cars; effective 2–11–72 3058

BROKERS AND DEALERS—SEC time extension to 2–15–72 for comments on the proposed financial responsibility measures 3059

ANTIDUMPING—Treasury Dept. notice of investigation into printers' rubberized blankets from the United Kingdom 3061

DRUGS—
FDA notice of intent to withdraw approval of certain solutions (2 documents) 3078, 3079
FDA notice reclassifying as effective certain oral anticoagulants 3077
FDA notice withdrawing approval of a certain solution 3079

EDUCATIONAL TV—HEW listing of applications for Federal financial aid in construction 3080

FEDERAL CONSTRUCTION MINIMUM WAGES—Labor Dept. determinations for specified areas 3096

FOOD ADDITIVES—FDA proposal to revoke regulations authorizing the use of a certain fermentation inhibitor to still wines; comments within 60 days 3060

OCCUPATIONAL SAFETY—Labor Dept. notice announcing a meeting on Feb. 14 and 15, 1972, of the Advisory Committee on Asbestos Standards 3155

Title 7—AGRICULTURE

Chapter VII—Agricultural Stabilization and Conservation Service (Agricultural Adjustment), Department of Agriculture

SUBCHAPTER D—PROVISIONS COMMON TO MORE THAN ONE PROGRAM

PART 795—PAYMENT LIMITATION

Interpretation

The following interpretation of § 795.7 of the regulations governing the payment limitation, 35 F.R. 19339, as amended, is issued.

The question has been raised whether stock owned by an irrevocable trust having minor children as beneficiaries is to be attributed to their parents in applying the provisions of § 795.7. Section 795.7 provides that where any stockholder has more than a 20-percent interest in the value of the outstanding stock of a corporation, the stockholder's pro rata share of the program payments to the corporation shall be attributed to the stockholder for purposes of applying the payment limitation to the stockholder and the corporation.

In the question raised, a father is individually conducting a farming operation. He also owns more than 20 percent of the stock of a corporation which owns and operates a farm. The father proposes to transfer all the stock (or such part as would leave him individually owning less than 20 percent) to an irrevocable trust of which his two minor children are the beneficiaries.

It has been concluded that the stock owned by the irrevocable trust is to be attributed to the father in applying the provisions of § 795.7. Section 795.7 provides specifically that in computing the shares of stock owned by a stockholder, there is to be included the stock owned by his spouse and minor children. In addition, § 795.11 provides that, except under certain described circumstances, a minor child and his parents are to be considered as one person.

Signed at Washington, D.C., on February 7, 1972.

KENNETH E. FRICK,
Administrator, Agricultural Stabilization and Conservation Service.

[FR Doc.72–2030 Filed 2–10–72; 8:45 am]

Chapter IX—Consumer and Marketing Service (Marketing Agreements and Orders; Fruits, Vegetables, Nuts), Department of Agriculture

PART 906—ORANGES AND GRAPEFRUIT GROWN IN THE LOWER RIO GRANDE VALLEY IN TEXAS

Fruit Exempt From Regulations

Findings. (1) Pursuant to the marketing agreement, as amended, and Order No. 906, as amended (7 CFR Part 906), regulating the handling of oranges and grapefruit grown in the Lower Rio Grande Valley in Texas, effective under the applicable provisions of the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601–674), and upon the basis of the recommendations of the Texas Valley Citrus Committee, established under the aforesaid marketing agreement and order, and upon other available information, it is hereby found that the amendment of Subpart—Rules and Regulations thereunder, as hereinafter provided, will tend to effectuate the declared policy of the act.

(2) This action reflects the Department's appraisal of the need for authorizing an additional container for the shipment of fruit in "specialty packs" pursuant to the provisions of §§ 906.42 and 906.44 of this part. The amendment is based upon an appraisal of the marketing situation for Texas oranges and grapefruit and the need to provide an additional container for the shipment of oranges and grapefruit in "specialty packs". Oranges and grapefruit are more elongated than normal this year, and several shipments to a particular outlet for fruit in "specialty packs" using container No. 6506—a container (16½ x 10¾ x 9½ inches), authorized pursuant to § 906.120(e)—have resulted in some of the fruit in many of the containers arriving in a damaged condition due to being bruised or flattened, or both. Because of this poor arrival condition, the opportunity to market Texas oranges and grapefruit to this outlet may be lost unless a suitable shipping container is provided. Such a container is one that is one inch deeper than the telescopic container (16½ x 10¾ x 9½ inches) presently authorized for shipment of oranges and grapefruit in "specialty packs", and this added space will prevent oranges and grapefruit, when packed level full, from arriving at destination bruised or in a flattened condition. The requirements with respect to type, material, and test strenght of the additional container are comparable to current container requirements, and are designed to adequately protect the fruit so packed in shipment to assure that the fruit will reach the consumer in satisfactory condition, and to maximize returns to producers pursuant to the declared policy of the act.

(3) It is hereby further found that it is impracticable, unnecessary, and contrary to the public interest to give preliminary notice, engage in public rule making procedure, and postpone the effective date of this amendment until 30 days after publication of the FEDERAL REGISTER (5 U.S.C. 553) in that (i) the handling of fruit is now in progress and to be of maximum benefit the provisions of this amendment should be effective upon the date hereinafter specified, (ii) the effective date hereof will not require of handlers any preparation that cannot be completed prior thereto, (iii) this amendment was recommended by members of the Texas Valley Citrus Committee in an open meeting at which all interested persons were afforded opportunity to submit their views, (iv) the time intervening between the date when information upon which this amendment is based became available and the time when this amendment must become effective in order to effectuate the declared policy of the act is insufficient, and (v) this amendment relieves restrictions on the handling of oranges and grapefruit grown in the Lower Rio Grande Valley in Texas.

Order. It is therefore ordered that the provisions of § 906.120 (7 CFR 906.120; 36 F.R. 23617) are amended as follows:

Paragraphs (e)(3) and (f) are amended to read as follows:

§ 906.120 Fruit exempt from regulations.

* * * * *

(e) * * *

(3) The fruit is handled (i) in closed fully telescopic fiberboard cartons with inside dimensions of 16½ x 10¾ x 10½

inches: *Provided*, That the cover section and bottom section each has a Mullen or Cady test of at least 250 pounds. *Provided further*, That each such container is packed level full; (ii) in six-packs; (iii) in 12-packs; (iv) in baskets of a capacity of 1 bushel or less; or (v) in any of the containers authorized under § 906.340: *Provided*, That if any of the containers, currently authorized under § 906.340 are so used to handle fruit, each such container shall be stamped or marked "special purpose shipment".

* * * * *

(f) *Meaning of terms.* When used herein, the term "bushel" means a unit of measure equivalent to 2,150.42 cubic inches; the term "level full" means that the fruit is level with the top edge of the bottom section of the carton; the term "six-pack" means any container with a capacity of one-eighth of a bushel; the term "12-pack" means any container with a capacity of one-fourth of a bushel; the term "basket" means any container made of interwoven material; the term "closed" means closed in accordance with good commercial practices; and the term "U.S. No. 1" shall have the same meaning as given to such term in the U.S. Standards for Oranges (Texas and States other than Florida, California, and Arizona) designated as §§ 51.680–51.712 of this title, and the U.S. Standards for Grapefruit (Texas and States other than Florida, California, and Arizona) designated as §§ 51.620–51.653 of this title, as applicable.

(Secs. 1–19, 48 Stat. 31, as amended; 7 U.S.C. 601–674)

Dated, February 7, 1972, to become effective February 8, 1972.

PAUL A. NICHOLSON,
Acting Director, Fruit and Vegetable Division, Consumer and Marketing Service.

[FR Doc.72–2029 Filed 2–10–72;8:45 am]

Title 9—ANIMALS AND ANIMAL PRODUCTS

Chapter I—Animal and Plant Health Service, Department of Agriculture

SUBCHAPTER C—INTERSTATE TRANSPORTATION OF ANIMALS (INCLUDING POULTRY) AND ANIMAL PRODUCTS

PART 82—EXOTIC NEWCASTLE DISEASE; AND PSITTACOSIS OR ORNITHOSIS IN POULTRY

Permitted Movements From Areas Quarantined

Pursuant to the provisions of sections 1, 2, 3, and 4 of the Act of March 3, 1905, as amended, sections 1 and 2 of the Act of February 2, 1903, as amended, sections 4, 5, 6, and 7 of the Act of May 29, 1884, as amended and sections 3 and 11 of the Act of July 2, 1962 (21 U.S.C. 111, 112, 113, 115, 117, 120, 123, 124, 125, 126, 134b, 134f), Part 82, Ttile 9, Code of Federal Regulations is hereby amended in the following respects:

In § 82.4, a new paragraph (c) is added to read as follows:

§ 82.4 Restrictions on interstate movement from guaranteed areas.

* * * * *

(c) *Other movements.* The Deputy Administrator may upon request in specific cases permit the movement, not otherwise provided for in this section, of poultry not known to be affected with exotic Newcastle disease, under such conditions as he may prescribe in each case to prevent the spread of such disease. The Deputy Administrator will promptly notify the appropriate livestock sanitary officials of the States involved of any such action.

(Secs. 4–7,, 23 Stat. 32, as amended; secs. 1 and 2, 32 Stat. 791–792, as amended; secs. 1–4, 33 Stat. 1264, 1265, as amended; secs. 3 and 11, 76 Stat. 130, 132; 21 U.S.C. 11–113, 115, 117, 120, 121, 123–126, 134b, 134f; 29 F.R. 16210, as amended, 36 F.R. 20707)

Effective date. The foregoing amendment shall become effective upon issuance.

The purpose of the foregoing amendment is to authorize the Deputy Administrator of Veterinary Services, Animal and Plant Health Service, in specific cases, to permit the movement of poultry not known to be affected with exotic Newcastle disease from areas quarantined because of such disease, when such movement will not constitute a threat to the poultry industry of the United States.

The amendment relieves certain restrictions presently imposed and must be made effective immediately to be of maximum benefit to affected persons. Accordingly, under the administrative procedure provisions in 5 U.S.C. 553, it is found upon good cause that notice and other public procedure with respect to the amendment are impracticable and unnecessary, and the amendment may be made effective less than 30 days after publication in the FEDERAL REGISTER.

Done at Washington, D.C., this 8th day of February 1972.

G. H. WISE,
Acting Administrator, Animal and Plant Health Service.

[FR Doc.72–2069 Filed 2–10–72;8:47 am]

Title 14—AERONAUTICS AND SPACE

Chapter I—Federal Aviation Administration, Department of Transportation

[Airspace Docket No. 72–SO–9]

PART 71—DESIGNATION OF FEDERAL AIRWAYS, AREA LOW ROUTES, CONTROLLED AIRSPACE, AND REPORTING POINTS

Alteration of Control Zone

The purpose of this amendment to Part 71 of the Federal Aviation Regulations is to alter the Brunswick, Ga. (NAS Glynco) control zone.

The Brunswick (NAS Glynco) control zone is described in § 71.171 (37 F.R. 2056) and is presently effective 24 hours per day. Since the control tower will begin operating from 0700 to 2300 hours, local time, daily, effective February 15, 1972, it is necessary to alter the control zone to redesignate it as part-time. Since this amendment lessens the burden on the public, notice and public procedure hereon are unnecessary.

In consideration of the foregoing, Part 71 of the Federal Aviation Regulations is amended, effective 0901 G.m.t., February 15, 1972, as hereinafter set forth.

In § 71.171 (37 F.R. 2056), the Brunswick, Ga. (NAS Glynco), control zone is amended as follows: "This control zone is effective from 0700 to 2300 hours, local time, daily." is added to the description.

(Sec. 307(a), Federal Aviation Act of 1958, 49 U.S.C. 1348(a); sec. 6(c), Department of Transportation Act, 49 U.S.C. 1655(c))

Issued in East Point, Ga., on February 1, 1972.

DUANE W. FREER,
Acting Director, Southern Region.

[FR Doc.72–2023 Filed 2–10–72; 8:45 am]

Title 17—COMMODITY AND SECURITIES EXCHANGES

Chapter II—Securities and Exchange Commission

PART 241—INTERPRETATIVE RELEASES RELATING TO THE SECURITIES EXCHANGE ACT OF 1934 AND GENERAL RULES AND REGULATIONS THEREUNDER

Relevance of Standards and Rules of Conduct to Nonmember Broker-Dealers

Statement of policy of the Director of the Division of Trading and Markets regarding the comparability of NASD and SECO regulation and the relevance of published NASD standards and rules of conduct to nonmember broker-dealers and their associated persons.

The Commission released the following statement of policy and guidelines of the Director of the Division of Trading and Markets with respect to the relevance of the standards and rules of conduct enunciated and promulgated by the National Association of Securities Dealers, Inc. (NASD) for its members to broker-dealers who are not members of that Association (nonmember broker-dealers).

1. *General policy.* Nonmember broker-dealers are subject to the so-called "SECO program" of the Commission adopted pursuant to sections 15(b) (8), (9), and (10) of the Securities Exchange Act of 1934 (the Act). Enacted in 1964 as amendments to the Act,[1] these provisions empowered the Commission to established for such nonmember broker-dealers and their associated persons supplementary regulatory procedures and

[1] 15 U.S.C. section 780.

rules comparable to those adopted by the NASD for its members and their associated persons. In various rules adopted under these statutory provisions, the Commission has set up specific procedures and norms of conduct closely paralleling those of the NASD in areas such as qualifications of associated persons of broker-dealers (including written examinations), fees and assessment, standards for supervision of securities employees, discretionary accounts, and suitability of recommendation.[2] Particularly under Rule 15b10–2 (17 CFR 240.-15b10–2), dealing with "high standards of commercial honor" and "just and equitable principles of trade" questions have been raised from time to time by nonmember broker-dealers, their counsel and others as to the relevance to SECO firms of standards of conduct embodied in the rules, interpretations, guidelines, policy statements, etc., that have been published by the NASD.[3] A discussion of the general nature and scope of that rule is set forth in part II hereof.

The principles of conduct contained in published NASD rules and standards which are considered by the Division to be relevant guidelines and precedents for nonmember brokers and dealers and their associated persons are included in the first or first two columns of the appendix which also shows in the last two columns the Commission rules, statutory provisions, or other statements forming the basis for the relationship with each NASD standard. In this regard it should be noted that the inclusion in the appendix of certain Commission rules and statutory provisions as closely parrallel to specified NASD standards does not eliminate the possibility that specific activity may also violate other applicable provisions of the Federal securities laws and/or Commission rules (including the antifraud provisions.[4]

It will be noted that these NASD standards fall into several categories. Many are substantially covered by closely parallel statutory provisions and Commission rules. Other NASD policy and interpretative statements or rules contain principles, some or all of which the Commission (or the courts) has already discussed in adjudicated cases or public releases relating to the applicability of general statutory provisions and/or Commission rules (e.g. the antifraud provisions).

Further, many NASD articulated standards, while not specifically covered in Commission rules, cases, or releases, reflect relevant norms of behavior for nonmembers under Rule 15b10–2 which requires the observance of "just and equitable principles of trade" and "high standards of commercial honor." The Division will not recommend disciplinary action for violations of "just and equitable principles of trade" or "high standards of commercial honor" where there has been compliance with these NASD guidelines and applicable legal requirements (i.e., other than Rule 15b10–2).

As indicated above, the Appendix covers (in the first or first two columns) only published NASD standards of conduct. Other standards have emerged through adjudicated NASD disciplinary proceedings, many of which have been reviewed by the Commission and the courts. Nonmember broker-dealers should thus be aware of the published decisions of this nature since the standards so enunciated would generally be useful as precedents for them.[5]

On the other hand, the NASD's rules of fair practice and other directives include some measures which are designed primarily to prevent or aid in the detection of certain abuses but which may not always, depending upon the case, represent general principles of proper conduct. Such measures, including various NASD filing and recordkeeping requirements and some aspects of the Association's rules on hypothecation and lending of securities, payments to employees of others, and margin maintenance, are also included in the appendix. While the Division believes that a number of these standards should be applicable to nonmembers, it is of the opinion that they should be the subject of separate Commission rules and regulations. Proposals in these areas are therefore under consideration, as reflected (by an asterisk) in the third or middle column of the appendix.[6]

It is suggested that nonmember broker-dealers obtain directly from the National Association of Securities Dealers, Inc., 1735 K Street NW., Washington, DC 20006 copies of the NASD manual which contains current NASD rules, interpretations and policy statements.

II. *Nature and Scope of Rule 15b10–2.* Rule 15b10–2 provides:

> Every nonmember broker or dealer and associated person shall observe high standards of commercial honor and just and equitable principles of trade in the conduct of his business.

The rule was adopted under section 15 (b) (10) of the Act which states:

> No broker or dealer subject to paragraph (8) of this subsection shall effect any transaction in, or induce the purchase or sale of, any security (otherwise than on a national securities exchange) in contravention of such rules and regulations as the Commission may prescribe designed to promote just and equitable principles of trade, to provide safeguards against unreasonable profits or unreasonable rates of commissions or other charges, and in general to protect investors and the public interest, and to remove impediments to and perfect the mechanism of a free and open market.

"Just and equitable principles of trade" and "high standard of commercial honor," however, are not phrases which originated in the Act or the Commission's rule but rather are concepts which have long characterized the level of professional integrity expected of persons in the securities business. Moreover, they are evolving standards of ethical conduct about as old as the securities business itself, which have grown in breadth and with increasing definition over the years. They therefore cannot be considered apart from their historical development.

The concepts predate the Federal securities laws by many years. As early as 1848 the Chicago Board of Trade announced one of its purposes to be to "inculcate principles of justice and equity in trade." By 1900 the constitution of nearly every stock exchange, including the New York Stock Exchange, provided that its purposes were "to furnish members with facilities for trading and to maintain high standards of commercial honor and integrity among its members and to promote and inculcate just and equitable principles of trade and business."

Section 6(b) of the Act has provided since 1934 that:

> No registration (of a national securities exchange) shall be granted or remain in force unless the rules of the exchange include provision for the expulsion, suspension,

---

[2] 17 CFR 240.15b–8, 9, and 10 (1967).

[3] The NASD standards discussed herein as useful guidelines for SECO firms are written as norms of conduct which the Association has prescribed for its members. Thus, persons in the SECO category should read the relevant NASD published materials in context. For example, the Association's interpretations often contain descriptions of the NASD's internal review procedures and/or refer to the association committees having responsibility for the implementation or enforcement of the conduct standards covered therein. These references would clearly be of no interest to SECO firms although in most instances the Commission does not have comparable (though not identical) administrative procedures.

[4] See appendix, footnote 1, which is filed as part of the original document.

[5] For instance, the NASD applies its rule on just and equitable principles of trade to certain failures by members to follow the Uniform Practice Code and to certain breaches of trade contracts. In this connection, the business practices relating to such matters as the confirmation, settlement, closing out, etc. of securities transactions, as they have been codified in the NASD's Uniform Practice Code, are an expression of the customs and usages of the trade, National Association of Securities Dealers, Inc. Manual, 1971, Commerce Clearing House, Inc., Chicago, Ill. (hereinafter referred to as "Manual"), paragraphs 3501–61. As such, the practices reflected in provisions of the Code should normally be followed in dealings between members of the NASD and nonmembers and between nonmembers. Consistent with NASD precedent in this regard, a failure by a nonmember, therefore to observe the procedures outlined in that Code could be a violation of Rule 15b10–2. See also Southern Brokerage Co., Inc., Securities Exchange Act Release No. 7463 (1964) and cases cited therein and Nassau Securities, Securities Exchange Act Release No. 7464 (1964), aff'd 348 F. 2d 133 (1965) (failure to honor trade contracts).

[6] In a few instances—as for example, certain recordkeeping requirements included in the Free-Riding and Withholding Policy (manual paragraph 2151)—parallel rule proposals by the Commission are not presently under consideration. In these instances, however, nonmembers who follow the special procedures required of NASD members would normally comply with the general SECO standards.

or disciplining of a member for conduct or proceeding inconsistent with just and equitable principles of trade, and declare that the willful violation of any provisions of this title or any rule or regulation thereunder shall be considered conduct or proceeding inconsistent with just and equitable principles of trade.

In 1938 Congress, in the Maloney Act amendments to the Act, sought to create a type of regulation for the over-the-counter markets similar to that provided by the exchanges for their members. In furtherance of this purpose, it chose the media of registered national securities associations. Testifying at the hearings preceding the passage of the Maloney Act former SEC Commissioner Mathews stated:

An association of this sort, if it is successful, must be able to control those practices of its members which, in the language of the stock exchange rule, are inconsistent with just and equitable principles of trading.

Thus, the concept of just and equitable principles of trade in the regulatory pattern adopted for those doing business in the over-the-counter markets has been embodied in both section 15A of the Act and in the rules of the NASD, the only association registered under that section. Section 15A(b)(8) of the Act provides that an association shall not be registered unless it appears to the Commission that, among other things, "the rules of the association are designed * * * to promote just and equitable principles of trade." Article III, section 1 of the NASD rules of fair practice, which was adopted pursuant to section 15A(b)(8), reflects both of the concepts here involved:

A member, in the conduct of his business, shall observe high standards of commercial honor and just and equitable principles of trade.

Partially as a result of a recommendation of the Commission's Special Study of Securities Markets,[7] Congress in 1964 again addressed itself to the self-regulatory scheme it had created for the over-the-counter markets some 26 years earlier. Since membership in the NASD was voluntary— i.e., some broker-dealers who did not require the economic incentives to NASD membership contemplated by the Act[8] were not members of any self-regulatory organization—a regulatory gap remained. The Commission initially recommended compulsory membership in the NASD as a means of bridging the gap. However, Congress elected to preserve the voluntary character of NASD membership by committing directly to the Commission in new sections 15(b)(8), (9), and (10) the task of establishing supplementary regulatory programs for broker-dealers who do not elect such membership.[9] SECO was not created to afford its "members" any competitive advantage or means of circumventing regulation of ethical behavior by the NASD but solely to preserve freedom of choice. Congress intended that nonmember broker-dealers should receive substantially the same degree of regulation as members of the NASD. Accordingly:

(Section 15(b)(10)) is based in large part upon the requirements imposed upon a securities association by section 15A(b)(8) of the Exchange Act with respect to its membership and is necessary to insure that those brokers and dealers who choose not to belong to an association will be subject to regulation in those areas by the Commission.[10]

Since its inception in 1939 the NASD has been the principal catalyst in the development of the scope and meaning of just and equitable principles of trade and high standards of commercial honor for the over-the-counter markets. There have been a number of avenues through which this development has occurred, including adoption by the Association of rules of fair practice, promulgation by the Board of Governors, through its powers to administer and interpret NASD rules,[11] of statements of policy, guidelines and interpretations, and case by case adjudication in Association disciplinary actions. The particular avenue utilized has depended in large measure on the nature of the regulatory problem concerned as well as other factors. In general, rules have been adopted where the principles of business conduct could be stated in general or reasonably specific terms. For the most part, these rules codified settled standards of behavior or embodied new standards or requirements designed to prevent recognized abuses. Promulgation of statements of policy, interpretations and guidelines regarding the implementation of existing rules has normally been the vehicle used (1) where the basic or underlying principles have been established (e.g., by rules) or have, over a period of time, been generally understood as appropriate norms of conduct and (2) where the enunciation of specific, detailed rules was unnecessary or impractical but (3) where the Board of Governors nevertheless considered it desirable to inform the membership of the guidelines or "rules of thumb," as they developed and evolved, that were being or would be applied by the Board and operating committees in administering such norms. Finally, the evolutionary development of business ethics has occurred through the disciplinary route where conduct recognized as patently contrary to professional standards has been found, but where, for example, the applicable norms previously were not or could not readily be reduced to written rule or guidelines.[12]

There have been many examples throughout the NASD's history of the use of each of the approaches or avenues described above. However, it is important to bear in mind that in all phases of NASD regulatory activity with regard to the development of the concepts of business ethics here involved, the Commission has played an active role both in formulation of standards and in supervising their implementation. The Commission, as part of the Congressional design for "cooperative regulation" of the over-the-counter markets, has been an active participant with the NASD in the development of the concepts of "just and equitable principles of trade" and "high standards of commercial honor." Just as the courts have recognized for some time that the limits of fraud cannot be precisely defined and accordingly have interpreted the antifraud provisions as general proscriptions against myriad forms of deception and manipulation,[13] so too "just and equitable principles of trade" is a standard of great elasticity intended to circumscribe a wide variety of conduct which may operate as an injustice to investors or other participants in the marketplace.

It is thus the opinion of the Division that, subject to the qualifications already noted, the standards of conduct and general interpretive principles which have been prescribed by the NASD for its members pursuant to section 15A(b)(8) of the Act and which have resulted from the continuing processes of definition described above, are relevant guidelines and accepted standards of behavior for nonmember broker-dealers and their associated persons. The Division believes that the language of section 15(b)(10) under the Exchange Act and the legislative history of its passage in 1964 compel such a conclusion. To hold nonmembers to a level of conduct less stringent

[8] Section 15A(i).

[9] The Commission's residual jurisdiction in this area has since received the form designation "SECO" (i.e., SEC-registered only).

[10] H.R. Rep. No. 1418, p. 24, 88th Cong., second sess. (1964).

[11] NASD By-laws, article VII, section 3.

[12] The NASD's Mark-Up Policy (Manual, paragraph 2154) is perhaps the best example of a policy statement of guideline based upon an established general rule (article III, section 4 of the rules of Fair Practice where adoption of more specific and detailed rules has been impractical but where, in view of recurring abuses, the Board has found it necessary to keep the membership apprised of the guidelines and "rules of thumb" being applied. Considerable additional definition has been supplied in this area through the disciplinary route. (See appendix, footnote 10).

A similar pattern has marked the development of most of the NASD's Policy on Corporate Financing (Manual, paragraph 2151). This area is also one which has undergone considerable evolution, particularly in the past 5 years. The Free-Riding and Withholding Interpretation (Manual, paragraph 2151) has also had a similar development, except that here one of the major underlying principles (i.e., the ethical obligation of an underwriter to make a "bona fide public offering") was not previously set forth in writing as a conduct rule. The latter, however, had long been an accepted norm of the investment banking community. And, of course, failure to make a bona fide public offering also may violate the Federal securities laws. See appendix, footnote 5.

[13] See "Securities and Exchange Commission v. Capital Gains Research Bureau, Inc.," 375 U.S. 190 (1962); "J. I. Case Co. v. Borak," 377 U.S. 426 (1963); Tcherephin v. Knight," 389 U.S. 332 (1967); "Securities and Exchange Commission v. National Securities, Inc.," 393 U.S. 453 (1968); "Mills v. Electric Auto-Lite Co., 396 U.S. 375 (1969).

than or at material variance with the standards which have been established for NASD members would be contrary to the intention of Congress. Although it has generally been the position of both the NASD and the Commission, in reviewing NASD action and in interpreting Rule 15b10–2, that in determining whether any given conduct contravenes "just and equitable principles of trade," all relevant facts and circumstances must be considered,[14] it is clear as a general proposition that conduct, which if engaged in by an NASD member (or associated person) would violate the NASD's parallel rule, would similarly constitute a violation of Commission Rule 15b10–2 if engaged in by a SECO firm (or associated person).

Since the views contained herein are being published partly in response to the expressed desires of the securities community for clarification, the Division invites comments from interested persons with respect to the adequacy of the foregoing statement and to the need for possible additional releases in this area.

[SEAL] RONALD F. HUNT,
Secretary.

DECEMBER 1, 1971.

[FR Doc.72–1975 Filed 2–10–72;8:45 am]

Title 21—FOOD AND DRUGS

Chapter I—Food and Drug Administration, Department of Health, Education, and Welfare

SUBCHAPTER C—DRUGS

PART 135—NEW ANIMAL DRUGS

Subpart C—Sponsors of Approved Applications

PART 135b—NEW ANIMAL DRUGS FOR IMPLANTATION OR INJECTION

Naloxone Hydrochloride

The Commissioner of Food and Drugs has evaluated a new animal drug application (35–825V) filed by Endo Laboratories, Inc., proposing the safe and effective use of naloxone hydrochloride injection for the treatment of certain conditions in dogs. The application is approved.

To facilitate referencing, Endo Laboratories, Inc., is being assigned a code number and placed in the list of firms in § 135.501 (21 CFR 135.501).

Therefore, pursuant to provisions of the Federal Food, Drug, and Cosmetic Act (sec. 512(i), 82 Stat. 347; 21 U.S.C. 360b(i)), and under authority delegated to the Commissioner (21 CFR 2.120), Parts 135 and 135b are amended as follows:

1. Part 135 is amended in § 135.501 by adding a new code number 057 to paragraph (c), as follows:

§ 135.501 Names, addresses, and code numbers of sponsors of approved applications.

* * * * *

(c) * * *

Code No.	*Firm name and address*
* * *	* * *
057	Endo Laboratories, Inc., 1000 Stewart Avenue, Garden City, N.Y. 11530.

2. Part 135b is amended by adding the following new section:

§ 135b.36 Naloxone hydrochloride injection.

(a) *Specifications.* Naloxone hydrochloride injection is an aqueous sterile solution containing 0.4 milligram of naloxone hydrochloride per milliliter.

(b) *Sponsor.* See code No. 057 in § 135.501(c) of this chapter.

(c) *Conditions of use.* (1) It is used as a narcotic antagonist in dogs.

(2) It is administered by intravenous, intramuscular, or subcutaneous injection at an initial dose of 0.04 milligram per kilogram of body weight. When given intravenously, the dosage may be repeated at 2- to 3-minute intervals as necessary. Onset of action by intramuscular or subcutaneous injection is slightly longer than it is by intravenous injection, and repeated dosages must be administered accordingly.

(3) For use only by or on the order of a licensed veterinarian.

Effective date. This order shall be effective upon publication in the FEDERAL REGISTER (2–11–72).

(Sec. 512(i), 82 Stat. 347; 21 U.S.C. 360b(i))

Dated: February 3, 1972.

C. D. VAN HOUWELING,
Director,
Bureau of Veterinary Medicine.

Title 22—FOREIGN RELATIONS

Chapter I—Department of State

[Dept. Reg. 108.653]

PART 41—VISAS: DOCUMENTATION OF NONIMMIGRANTS UNDER THE IMMIGRATION AND NATIONALITY ACT, AS AMENDED

Classes of Aliens Eligible To Receive Diplomatic Visas

Correction

In F.R. Doc. 72–1417 appearing on page 2439 in the issue of Tuesday, February 1, 1972, the following changes should be made:

1. The second paragraph should read as follows:

Section 41.102(b) is amended by revising the introductory text and subparagraph (12) and by adding a new subparagraph (13) to read as follows:

2. Subparagraph (12) should be inserted immediately preceding § 41.102 (b)(13), reading as follows:

(12) The Commissioner General of the United Nations Relief and Works Agency for Palestine Refugees in the Near East;

Title 29—LABOR

Chapter XVII—Occupational Safety and Health Administration, Department of Labor

PART 1910—OCCUPATIONAL SAFETY AND HEALTH STANDARDS; NATIONAL CONSENSUS STANDARDS AND ESTABLISHED FEDERAL STANDARDS

Certain Standards for Powered Industrial Trucks; Clarification

On October 20, 1971, there was published in the FEDERAL REGISTER at page 20305 a notice of proposed rule making regarding the possible temporary suspension of certain safety and health standards applicable to the use of powered industrial trucks. The requested temporary suspension would restore from August 27, 1971, to February 15, 1972:

1. The requirement in § 1910.178 (a)(2) that powered industrial trucks used by employers in certain hazardous situations be manufactured in conformity with the American National Standards Institute (ANSI) standard B56.1–1969; and

2. The requirement of § 1910.178 (a)(3) that powered industrial trucks used by employers in certain hazardous situations must bear a label or other identifying mark indicating approval by a testing laboratory.

BACKGROUND

In the FEDERAL REGISTER of May 29, 1971 (36 F.R. 10466), occupational safety and health standards were published which are applicable to employers subject to the Williams-Steiger Occupational Safety and Health Act of 1970. Section 1910.178 containing standards applicable to the use of powered industrial trucks was said to be effective February 15, 1972. By virtue of amendments to Part 1910 which were published in the FEDERAL REGISTER on August 13, 1971, the effective dates of § 1910–178(a) (2) and (3) were accelerated to August 27, 1971.

Subsequently, Cushman Motors, a division of Outboard Marine Corp., Lincoln, Nebr., filed a petition with the Assistant Secretary alleging that the accelerating of the pertinent effective dates had a serious prejudicial effect upon Cushman Motors as a manufacturer of powered industrial trucks. It was asserted that before the August 13, 1971, publication Cushman Motors had made plans to comply with the pertinent standards by February 15, 1972. Cushman asserted that it could not comply with the labeling requirements of ANSI B56.1–1969 before the end of the calendar year and that it would be another month before the required laboratory testing would be accomplished.

The petition argued that the Assistant Secretary has authority to grant the action requested by informal rulemaking under section 6(a) of the Act. It is contended essentially that: (1) The possible temporary suspension is conceptually similar to ancillary rulemaking under

[14] See "Southern Brokerage Co., Inc.," supra note 3.

section 6(a) of the Act establishing various delays in the effective dates of standards, such as those prescribed in the August 13, 1971, document; (2) that section 6(a) permits this suspension; and (3) that section 6(b) was not intended to preclude the taking of the requested action.

On December 28, 1971, Cushman Motors amended its petition to seek a further delay in the effective date of § 1910.178(a) until May 15, 1972. The amendment recites the delay experienced by Cushman since its initial filing in obtaining testing of its powered industrial trucks by a testing laboratory.

COMMENTS

Written comments were received in response to the notice. The comments have been carefully considered.

The petitioner submitted comments which largely reiterate the points made in the petition.

The Industrial Truck Association commented that it does not take a position either for or against the request for suspension. Komatsu American Corp., a distributor in this country for forklift trucks manufactured by Komatsu stated that it relied on the May 29, 1971, publication and its pertinent February 15, 1972, effective date in making purchases of trucks for Komatsu. Komatsu has applied for UL testing, but scheduling for the UL inspection cannot be fixed for the immediate future. An additional delay for forklift trucks is sought until April 15, 1972.

C. Itoh & Co., Inc., which imports forklift trucks manufactured by Toyo Umpanki Company of Japan, generally supports the petition and also seeks clarification as to the meaning of the pertinent standards as they apply to forklift trucks.

The Nader Task Force on Occupational Safety and Health submitted comments asserting that the Assistant Secretary lacks authority to provide the requested relief by means of informal rule making under section 6(a) or the general rulemaking authority under section 8(g)(2). The Task Force appears to ask that the proceeding be treated as rule making under section 6(b) of the Act and the period for comment prescribed therein be provided, or that the Assistant Secretary obtain a list of the purchasers of the equipment, and require such purchasers to seek a variance from the standards involved under section 6(b)(6)(A) of the Act. Concerning section 6(a), the Task Force argues that no delays in effective date from standards issued thereunder was intended by the Congress.

DISCUSSION AND CONCLUSION

The critical portions of § 1910.178(a) read as follows:

(a) * * *

(2) All new powered industrial trucks acquired after the effective date of this subpart shall meet the design specifications established in the "American National Standard for Powered Industrial Trucks, Part II, ANSI B56.1–1969", except for vehicles intended primarily for earth moving or over-the-road hauling.

(3) Approved trucks shall bear a label or some other identifying mark indicating approval by the testing laboratory.

Part II of ANSI B56.1–1969 sets forth safety standards for the design and construction of powered industrial trucks. Although § 1910.178(a)(2) is concerned exclusively with the duties of employers in the acquisition and use of powered industrial trucks, Part II itself is addressed essentially to matters of interest to the manufacturers of powered industrial trucks. The critical standards in Part II insofar as this petition is concerned seem to be paragraph 405A. and paragraph 406. Paragraph 405A. reads as follows:

405 NAMEPLATES AND MARKINGS

A. On every truck the manufacturer shall install a durable, corrosion resistent, nameplate with the truck model or truck serial number and approximate weight of truck legibly inscribed. The truck serial number shall also be stamped on the frame of the truck. If the truck is accepted by a nationally recognized testing laboratory it should be so marked.

Paragraph 406 sets forth in considerable detail various tests which are required for the making of stability determinations regarding the industrial trucks.

The application of § 1910.178(a)(3) quoted above must be read with paragraph (a)(7) which reads as follows:

(a) * * *

(7) Definition: As used in this section, "approved" means listed or approved by at least one of the following nationally recognized testing laboratories: Underwriters Laboratories, Inc.; Factory Mutual Engineering Corp.

Section 1910.178(a) (2), (3), and (7) must be read together. In other words, the rules contemplate that the various tests provided in Part II of ANSI B56.1–1969 will be performed by a nationally recognized testing laboratory.

Only "approved" industrial trucks may be used in hazardous locations. See paragraph (c) prescribing the "designated locations" in which approved powered industrial trucks may be used and (m)(12) providing that only "approved" industrial trucks shall be used in hazardous locations.

It is clear from the foregoing that some restatement or clarification of the pertinent effective dates is necessary. Paragraph (a)(2) applies to "all new powered industrial trucks acquired after the effective date of this subpart". The subpart is Subpart N. However, Subpart N has no single effective date. See § 1910.182(b) (36 F.R. 15106, August 13, 1971). Further, paragraph (b) of § 1910.182 provides that, among other things, the effective date for paragraph (c) shall be February 15, 1972.

In view of this relationship between paragraph (c) and paragraph (a)(3), and in turn the labeling requirements of paragraph 405 of the ANSI standard applied in paragraph (a)(2) requiring a marking if a truck is accepted by a nationally recognized testing laboratory, it would seem that paragraph (a)(2), paragraph (a)(3), and paragraph (c) should have the same effective date. Under these circumstances and in view of the fact that the existing effective date for paragraph (c) is February 15, 1972, the effective date for the three provisions should be February 15, 1972.

The accomplishment of this may be viewed as requiring nothing more than a clarification of existing rules which are patently conflicting. The clarification is considered nonsubstantive in nature.

It is therefore not necessary to reach the issues of whether the use of a February 15, 1972, effective date requires a suspension of standards and whether such a suspension may be accomplished without having recourse to the detailed and time-consuming procedures of section 6(b) of the Act.

The separate requests by Komatsu and Cushman Motors for time beyond February 15, 1972, are rejected. No further postponement in the application of the rules involved appears warranted. They are rules of general application, and we understand that "approved" trucks meeting the requirements of § 1910.178 are presently and generally available. Therefore, the recourse of the petitioners should be addressed to remedies which are more particular in scope.

As the Nader Task Force has observed, employers of new powered industrial trucks may seek variances from the standards involved under section 6(b)(6)(A) of the Act. Section 6(b)(6)(A) permits a variance from a standard when the applicant shows that: (1) He is unable to comply with a standard by its effective date because of the unavailability of professional or technical personnel or to material or equipment needed to come into compliance with the standard; (2) he is taking all available steps to safeguard his employees against the hazards covered by the standard; and (3) he has an effective program for coming into compliance with the standard as quickly as practicable. This relief is available to employers, and not to manufacturers as such. But Cushman Motors itself is also an employer. Further, the applicable procedural rules permit relief for not only individual employers but also classes of employers. Cushman and other users (such as purchasers) of its industrial trucks may well be a class for purposes of Part 1905, Title 29 of the Code of Federal Regulations (36 F.R. 12290, June 30, 1971). Similarly, purchasers from Komatsu may also comprise a class.

Finally, we note that Cushman questions the validity of the definition of the term "approved" in § 1910.178(a)(7). An examination of the pertinent national consensus standards, NFPA No. 505–1969 and ANSI B56.1–1969, suggests that the definition is too narrow. To be consistent with the official NFPA definition of the term "approved" adopted January 23, 1964, rev. December 9, 1969, the definition should be changed to include testing laboratories which are qualified and equipped to conduct the necessary tests required by the cited ANSI standard.

Section 1910.178 of Title 29, Code of Federal Regulations, is hereby amended as indicated below:

1. Section 1910.178 is amended by clarifying the effective date statement in subparagraph (2) of paragraph (a) thereof, by clarifying the application of subparagraph (3) thereof in relation to subparagraph (2), and by revising subparagraph (7) thereof. As amended, § 1910.178 reads as follows:

§ 1910.178 Powered industrial trucks.

(a) * * *

(2) All new powered industrial trucks acquired and used by an employer after the effective date specified in paragraph (b) of § 1910.182 shall meet the design and construction requirements for powered industrial trucks established in the "American National Standard for Powered Industrial Trucks, Part II, ANSI B56.1–1969", except for vehicles intended primarily for earth moving or over-the-road hauling.

(3) Approved trucks shall bear a label or some other identifying mark indicating approval by the testing laboratory. See subparagraph (7) of this paragraph and paragraph 405 of "American National Standard for Powered Industrial Trucks, Part II, ANSI B56.1–1969", which is incorporated by reference in subparagraph (2) of this paragraph and which provides that if the powered industrial truck is accepted by a nationally recognized testing laboratory it should be so marked.

* * * * *

(7) Definition: As used in this section, "approved" means labeled by a nationally recognized testing laboratory; i.e., a laboratory qualified and equipped to conduct the necessary tests required under "American National Standard for Powered Industrial Trucks, Part II, ANSI B56.1–1969", in accordance with the requirements of section 405 thereof.

* * * * *

2. Paragraph (b) of § 1910.182 is amended in order to reflect the effective date change discussed above. As amended, § 1910.182 reads as follows:

§ 1910.182 Effective dates.

* * * * *

(b) The following provisions shall become effective on February 15, 1972:

§ 1910.177 (d) and (f).
§ 1910.178 (a) (2) and (3), (c), (e), and (m) (11).
§ 1910.179 (b) (6), (c), (d), (e), (f), (g), and (h).
§ 1910.180 (c).

* * * * *

(Secs. 6(a), 8(g), 84 Stat. 1553, 1600; 29 U.S.C. 657, 659)

Signed at Washington, D.C., this 8th day of February, 1972.

G. C. GUENTHER,
Assistant Secretary of Labor.

Title 37—PATENTS, TRADEMARKS, AND COPYRIGHTS

Chapter II—Copyright Office, Library of Congress

PART 202—REGISTRATION OF CLAIMS TO COPYRIGHT

Registration for Sound Recordings

Effective February 15, 1972, Part 202 Of Chapter II of Title 37 of the Code of Federal Regulations is amended as follows:

1. In § 202.2, paragraph (b) is amended by revising subparagraphs (1), (2), and (10) to read as follows:

§ 202.2 Copyright notice.

* * * * *

(b) *Defects in notice.* Where the copyright notice does not meet the requirements of the law, the Copyright Office will reject an application for copyright registration. Common defects in the notice include, among others, the following:

(1) The notice lacks one or more of the necessary elements (i.e., the word "Copyright," the abbreviation "Copr.", or the symbol ©, or, in the case of a sound recording, the symbol ℗; the name of the copyright proprietor, or, in the case of a sound recording, the name, a recognizable abbreviation of the name, or a generally known alternative designation, of the copyright owner; and, when required, the year date of publication);

(2) The elements of the notice are so dispersed that a necessary element is not identified as a part of the notice; in the case of a sound recording, however, if the producer is named on the label or container, and if no other name appears in conjunction with the notice, his name will be considered a part of the notice;

* * * * *

(10) A notice is on the wrapper or container which is not a part of the work and which will eventually be removed and discarded when the work is put to use; the notice may be on a container which is designed and can be expected to remain with the work;

* * * * *

2. Section 202.3 is revised as follows:

a. Paragraph (a) is revised to read as set forth below.

b. In paragraph (c) of § 202.3, the list of application forms for the registration of claims to copyright is amended by inserting, after the item "Form L–M—Motion picture (Classes L–M)," the new item "Form N—Sound recording (Class N)."

§ 202.3 Application forms.

(a) *In general.* Section 5 of title 17 of the United States Code provides fourteen classes (Class A through Class N) of works in which copyright may be claimed. Examples of certain works falling within these classes are given in §§ 202.4 to 202.15a inclusive, for the purpose of assisting persons who desire to obtain registration of a claim to copyright, to select the correct application form.

* * * * *

3. In § 202.8, paragraph (b) is revised to read as follows:

§ 202.8 Musical compositions (Class E).

* * * * *

(b) A phonorecord, such as a disc, tape, or other reproduction of a sound recording, is not considered a "copy" of the musical composition or the literary or dramatic work recorded on it, and is not acceptable as a deposit copy for copyright registration of the musical composition or the literary or dramatic work. Concerning the registration of copyright claims in sound recordings as works in themselves (as distinct from the musical compositions or the literary or dramatic works recorded), see § 202.15a.

4. Part 202 is amended by adding a new § 202.15a, reading as follows:

§ 202.15a Sound recordings (Class N).

(a) This class includes published sound recordings, i.e., works that result from the fiixation of a series of musical, spoken, or other sounds. Common examples include recordings of music, drama, narration, or other sounds, as published in the form of phonorecords such as discs, tapes, cartridges, cassettes, player piano rolls, or similar material objects from which the sounds can be reproduced either directly or with the aid of a machine or device. Registration for sound recordings is made in Class N.

(b) Only those sound recordings fixed and published on or after February 15, 1972, are eligible for registration. A sound recording is "fixed" when the complete series of sounds constituting the work is first produced on a final master recording that is later reproduced in published copies.

(c) Sound recordings registrable in Class N do not include a sound track that is an integrated part of a motion picture. Registration for motion pictures, of which a sound track may be an integrated part, is made in Class L or M; see § 202.15.

(d) Registration for a sound recording in Class N does not cover the musical composition or the literary or dramatic work of which a rendition is recorded. A claim of copyright in the recorded musical composition is to be registered separately in Class E; see § 202.8. A claim of copyright in the recorded literary or dramatic work is to be registered separately in Class A, B, C, or D, whichever is appropriate; see §§ 202.4, 202.5, 202.6, and 202.7.

(Sec. 207, 61 Stat. 666; 17 U.S.C. 207)

Dated: February 8, 1972.

GEORGE D. CARY,
Register of Copyrights.

Title 39—POSTAL SERVICE

Chapter I—U.S. Postal Service

PART 619—PURCHASE OF MAIL TRANSPORTATION AND RELATED SERVICES BY CONTRACT

Compensation for Transportation of Surface Mail

Regulations codified under Part 619 are amended to prescribe rates and conditions applicable to the transportation of mail by steamship beyond the United States, when the transportation is effected by agreement based upon the tender and acceptance of mail. Accordingly, in Part 619 add new Subpart 11, to read as follows:

Subpart 11—International Transportation of Mail by Vessel Through Tender and Acceptance Agreement

§ 619.1101 Compensation for transportation of surface mail.

Where the U.S. Postal Service tenders mail for transportation beyond the borders of the United States under the provisions of this section and the mail is so accepted by steamships of United States or foreign registry, acceptance of such mail shall constitute an agreement between the U.S. Postal Service and the accepting steamship or steamship company that the following conditions and rates shall apply to the transportation of such mail.

(a) *Rates.* Payment shall be made for the transportation of U.S. mail and foreign closed transit mail on steamships of the United States and foreign registry at the rates specified in the schedule below. The word "mail" includes parcel post. The rates cover all services performed by foreign flag vessels and all maritime service of U.S.-flag vessels.

Distance conveyed (nautical miles)	(1) Rates[1]	(2) Rates[2]
Up to 300 miles	3.6	1.8
Over 300 up to 600 miles	3.6	2.5
Over 600 up to 1,000 miles	3.6	3.1
Over 1,000 up to 1,500 miles	4.1	3.6
Over 1,500 up to 2,000 miles	5.4	4.0
Over 2,000 up to 2,500 miles	5.4	4.4
Over 2,500 up to 3,000 miles	5.4	4.7
Over 3,000 up to 3,500 miles	5.8	5.0
Over 3,500 up to 4,000 miles	6.1	5.3
Over 4,000 up to 5,000 miles	6.4	5.6
Over 5,000 up to 6,000 miles	7.0	6.1
Over 6,000 up to 7,000 miles	7.5	6.5
Over 7,000 up to 8,000 miles	7.8	6.8
Over 8,000 miles	8.0	7.1

[1] Rates for: Maritime transportation of mail (except U.S. Mail transshipped from the Canal Zone) including outbound empty equipment on steamships of U.S. registry (cents per pound, net weight for mail).

[2] Rates for: 1. All mail (including empty airmail sacks) on steamships of foreign registry; and 2. U.S. Mail transshipped from Canal Zone on steamships of U.S. registry (cents per pound, net weight for mail).

In addition to the maritime transportation rates shown in column (1) above, the U.S. Postal Service will either pay steamships of U.S. registry directly for costs incurred by them or assume the responsibility for cartage from postal facility to pier.

(b) *Special rates.* This section shall not prevent a carrier from accepting maritime transportation rates lower than those shown in paragraph (a) of this section.

(c) *Computation of payments.* The maritime transportation rates prescribed in paragraph (a) of this section, while measured by the net weight of the mail, are intended in all cases to include payment for the weight of the covering mail bags. In the case of vessels of foreign registry, the maritime transportation rates prescribed in paragraph (a) of this section, while measured by the net weight of the mail, also include compensation for the return of empty surface mail bags and the transportation from the postal facility to the pier. Acceptance by steamship companies of mail for transportation constitutes an acceptance of this method of computing payment.

(d) *Outgoing mail.* Steamship companies are to provide for the transportation and protection of all outgoing mail, including parcel post and sacks containing empty sacks, from the post office to the transporting vessel.

(e) *Incoming mail.* All incoming mail, including letter mail, parcel post and sacks containing empty sacks, is to be placed on the piers by the steamship companies. At that point delivery of the mail is made into the custody of agents of the postal service for trucking to the post office. The mail shall be placed on the piers and delivered to the agents of the postal service before the transporting vessel makes entry or breaks bulk, such action to be regarded as compliance with the law. Mail, including letter mail, parcel post and sacks containing empty sacks, waybilled for discharge at ports other than the first port of call of the vessel in the United States, shall be discharged at the first port of call if the vessel is scheduled to remain at said first port of call for more than 24 hours.

(f) *Vehicles and carriers.* Carriers are accountable and answerable in fines for failure to:

(1) Carry the mail in a safe and secure manner. The mail compartment of the completely closed van-type vehicle or trailer-type container vehicle must be locked or sealed during transport from post office to pier. When open-top trucks are used, the sacks shall be covered by a fireproof and rainproof tarpaulin which must be fastened securely to the body of the truck.

(2) Guard the pouches and other mail in their custody from theft or damage by water or any other source.

(g) *Registered (red label) sacks.* The registered sacks shall be specially protected during transfer between post offices and the transporting vessels and on board the vessels. The red label sacks shall be separately delivered to the steamship company's representative at the post office in the case of outgoing mails. Incoming red label sacks shall be segregated from the other mails on the piers by the steamship companies.

(h) *Fines and deductions.* Steamship companies are responsible to the United States for the safety of the mail intrusted to them, and accountable for any loss or damage resulting to any mail by reason of failure on the part of any of their officers, agents, or employees to exercise due care in the custody, handling, or transportation thereof. In case of delinquencies, fines may be imposed or deductions made from the company's pay.

(39 U.S.C. 401, 5601, 5604)

LOUIS A. COX,
General Counsel.

Title 43—PUBLIC LANDS: INTERIOR

Chapter II—Bureau of Land Management, Department of the Interior

APPENDIX—PUBLIC LAND ORDERS

[Public Land Order 5156]

ALASKA

Withdrawal of Lands in Former Reservations

By virtue of the authority vested in the President and pursuant to Executive Order No. 10355 of May 26, 1952 (17 F.R. 4831), it is ordered as follows:

1. Subject to valid existing rights, all of the lands and water areas in the reserves set aside by legislation, Executive and Secretarial Orders for Native use or for administration of Native Affairs, including those created under the Act of May 31, 1938, 52 Stat. 503, which were revoked by section 19(a) of the Alaska Native Claims Settlement Act of December 18, 1971, 85 Stat. 710, are hereby withdrawn from all forms of appropriation under the public land laws, including selections by the State of Alaska under the Alaska Statehood Act (72 Stat. 339), and from location and entry under the mining laws (30 U.S.C., Ch. 2), and from leasing under the Mineral Leasing Act of February 25, 1920, 41 Stat. 437, as amended, 30 U.S.C. section 181 et seq. (1970), in furtherance of the right of any Native Village Corporation or Corporations to acquire title to the surface and subsurface estates in the reservations, pursuant to section 19(b) of said Act.

2. The withdrawal made by this order will remain in full force and effect until December 18, 1973, unless sooner modified or terminated. Any of the lands or water areas not selected under the provisions of the Alaska Native Claims Act, supra, and not withdrawn by said Act or otherwise, shall at 10 a.m. on December 18, 1973, be open to selection by the State of Alaska under the Statehood Act, and to appropriation under the public land laws generally, including location and entry under the mining laws, and to leasing under the mineral leasing laws at 10 a.m. on March 18, 1974.

3. This order shall become effective upon publication in the FEDERAL REGISTER (2-11-72).

HARRISON LOESCH,
Assistant Secretary of the Interior.

FEBRUARY 4, 1972.

COLORADO, UTAH AND WYOMING

Amendment of Public Land Order No. 4522

By virtue of the authority vested in the President and pursuant to Executive Order No. 10355 of May 26, 1952 (17 F.R. 4831), it is ordered as follows:

1. Public Land Order No. 4522 of September 13, 1968, which withdrew deposits of oil shale and lands containing such deposits from appropriation under the U.S. mining laws relating to metalliferous minerals, and from sodium leasing under the mineral leasing laws, is hereby amended to delete the following described national forest lands:

Title 49—TRANSPORTATION

Chapter I—Hazardous Materials Regulations Board, Department of Transportation

[Docket No. HM-38, Amdt. 179-11]

PART 179—SPECIFICATIONS FOR TANK CARS

Interlocking Couplers

On November 13, 1970, the Hazardous Materials Regulations Board published Docket No. HM-38; Amendment No. 179-5 (35 F.R. 17418) prescribing, among other things, that all tank cars built after January 1, 1971, must be equipped with interlocking automatic couplers that will resist car telescoping and jackknifing in derailments and in emergency stops, and that are approved by the Federal Railroad Administrator.

The purpose of this amendment to the Hazardous Materials Regulations is to authorize the use of additional couplers. The design and performance data were reviewed by the Federal Railroad Administration and the couplers were found to be as efficient in resisting car telescoping and jackknifing in derailments and in emergency stops as the existing approved couplers.

Since this amendment imposes no added burden on any person, public notice and procedure thereon are unnecessary, and the amendment may be made effective in less than 30 days.

In consideration of the foregoing, § 179.14 is amended as follows:

§ 179.14 **Tank car couplers.**

(a) All tank cars built after January 1, 1971, must be equipped with interlocking automatic couplers that will resist car telescoping and jackknifing in derailments and in emergency stops, and that have been approved by the Federal Railroad Administrator.

(1) Effective November 13, 1970, couplers designated by the Association of American Railroads Catalog Nos. F70BHT, F70BHTE, F71BHT, F72BHT, F73HT, F73HTE, F79BHT, and F79BHTE are approved.

(2) Effective February 11, 1972, couplers designated by the Association of American Railroads Catalog Nos. F70BHT, F70BHTE, F71BHT, F72BHT, F73HT, F73HTE, F79BHT, and F79BHTE, which have modified shanks and solid butt ends, but do not have pin bearing blocks, are approved.

This amendment is effective upon publication in the FEDERAL REGISTER (2-11-72).

(Secs. 831-835, title 18, United States Code; sec. 9, Department of Transportation Act, 49 U.S.C. 1657)

Issued in Washington, D.C., on February 7, 1972.

MAC E. ROGERS,
Board Member for the Federal Railroad Administration.

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

[14 CFR Part 71]

[Airspace Docket No. 72-NW-05]

CONTROL ZONE AND TRANSITION AREA

Proposed Alteration

The Federal Aviation Administration is considering amendments to Part 71 of the Federal Aviation Regulations that would alter the description of the Pasco, Wash., control zone and transition area.

Interested persons may participate in the proposed rule making by submitting such written data, views, or arguments as they may desire. Communications should be submitted in triplicate to the Chief, Operations, Procedures and Airspace Branch, Northwest Region, Federal Aviation Administration, FAA Building, Boeing Field, Seattle, Wash. 98108. All communications received within 30 days after publication of this notice in the FEDERAL REGISTER will be considered before action is taken on the proposed amendment. No public hearing is contemplated at this time, but arrangements for informal conferences with Federal Aviation Administration officials may be made by contacting the Regional Air Traffic Division Chief. Any data, views, or arguments presented during such conferences must also be submitted in writing in accordance with this notice in order to become part of the record for consideration. The proposal contained in this notice may be changed in the light of comments received.

A public docket will be available for examination by interested persons in the office of the Regional Counsel, Northwest Region, Federal Aviation Administration, FAA Building, Boeing Field, Seattle, Wash. 98108.

A new ILS runway 20R procedure has been developed for the Tri-Cities Airport, Pasco, Wash. In order to provide controlled airspace to protect aircraft executing this procedure, it is necessary to alter the Pasco, Wash., control zone and transition area.

In consideration of the foregoing, the Federal Aviation Administration proposes the following airspace action:

In § 71.171 (37 F.R. 2056) the description of the Pasco, Wash., control zone is amended in part as follows: Delete: " * * * within 3 miles each side of the Pasco VOR 036° radial extending from the 5-mile-radius zone to 8 miles northeast of the VOR * * * " and substitute therefor, " * * * within 4 miles each side of the Pasco ILS localizer northeast course extending from the 5-mile-radius zone to 10 miles northeast of the OM (46°18'41'' North Latitude, 119°03'06'' West Longitude) * * * "

In § 71.181 (37 F.R. 2143) the description of the Pasco, Wash., transition area is amended to read as follows: "That airspace extending upward from 700 feet above the surface within 10.5 miles northwest and 6 miles southeast of the Pasco VOR 046° and 226° radials extending from 23 miles northeast to 12 miles southwest of the VOR within 9.5 miles northeast and 5 miles southwest of the Pasco VOR 131° radial extending from the VOR to 18.5 miles southeast of the VOR."

This amendment is proposed under the authority of section 307(a) of the Federal Aviation Act of 1958, as amended (49 U.S.C. 1348(a)), and of section 6(c) of the Department of Transportation Act (49 U.S.C. 1655(c)).

Issued in Seattle, Wash., on February 4, 1972.

J. H. TANNER,
Acting Director.

[FR Doc.72-2026 Filed 2-10-72;8:45 am]

[14 CFR Part 159]

[Docket No. 7526; Reference Notice 66-29]

LIMITATIONS GOVERNING NUMBER OF AIR CARRIER OPERATIONS EACH HOUR AT WASHINGTON NATIONAL AIRPORT

Withdrawal of Notice of Proposed Rule Making

The purpose of this notice is to withdraw Notice 66-29 (31 F.R. 10199) in which the Federal Aviation Administration proposed methods to effect limitations on the number of air carrier operations at Washington National Airport.

Since the issuance of Notice 66-29 the objectives of that proposal have been accomplished by agreement and by the adoption of the High Density Traffic Airport Rules.

For these reasons the FAA has determined that the proposed rule making action is no longer appropriate, and that Notice 66-29 should be withdrawn.

The withdrawal of this notice, however, does not preclude the FAA from issuing similar notices in the future or commit the FAA to any course of action.

In consideration of the foregoing, the notice of proposed rule making published in the FEDERAL REGISTER (31 F.R. 10199) on July 28, 1966, and circulated as Notice 66-29 is hereby withdrawn.

This withdrawal is issued under the authority of section 2, Act of June 29, 1940, as amended (54 Stat. 688); and section 4, Act of September 7, 1950, as amended (64 Stat. 770).

Issued in Washington, D.C., on February 2, 1972.

C. R. MELUGIN, Jr.,
Acting Manager, CA-1,
National Capital Airports.

[FR Doc.72-2024 Filed 2-10-72;8:45 am]

[14 CFR Part 159]

[Docket No. 7541; Reference Notice No. 66-33]

LIMITATIONS GOVERNING NUMBER OF OPERATIONS (OTHER THAN SCHEDULED AIR CARRIERS) EACH HOUR AT WASHINGTON NATIONAL AIRPORT

Withdrawal of Notice of Proposed Rule Making

The purpose of this notice is to withdraw Notice 66-33 (31 F.R. 10476) in which the Federal Aviation Administration proposed methods to effect limitations on the number of operations, other than scheduled air carrier operations, at Washington National Airport.

Since the issuance of Notice 66–33, the FAA has adopted the High Density Traffic Airports Rule which has obviated the need for the restrictions proposed in Notice 66–33.

For this reason, the FAA has determined that rule-making action on the proposed amendment is not appropriate, and that Notice 66–33 should be withdrawn.

The withdrawal of this notice, however, does not preclude the FAA from issuing similar notices in the future or commit the FAA to any course of action.

In consideration of the foregoing, the notice of proposed rule making published in the FEDERAL REGISTER (31 F.R. 10476) on August 4, 1966, and circulated as Notice No. 66–33 is hereby withdrawn.

The withdrawal is issued under the authority of section 2, Act of June 29, 1940, as amended (54 Stat. 688); and section 4, Act of September 7, 1950, as amended (64 Stat. 771).

Issued in Washington, D.C., on February 2, 1972.

C. R. MELUGIN, Jr.,
Acting Manager, CA–1,
National Capital Airports.

Bureau of Indian Affairs

[25 CFR Part 221]

WIND RIVER IRRIGATION PROJECT, WYO.

Proposed Operation and Maintenance Charges

Basis and purpose. Notice is hereby given that pursuant to the authority contained in the Acts of Congress approved August 1, 1914 (38 Stat. 533), May 18, 1916 (39 Stat. 142), and March 7, 1928 (45 Stat. 210), and by virtue of authority delegated by the Secretary of the Interior to the Commissioner of Indian Affairs (Order No. 2508; 14 F.R. 258), and by virtue of the authority delegated by the Commissioner of Indian Affairs to the Area Director BIAM 3.1 (34 F.R. 637), January 16, 1969, and by authority delegated to the Project Engineer and to the Superintendent by the Area Director June 11, 1969 Release 10–2, 10 BIAM 7.0, § 2.70, notice is hereby given of the intention to modify § 221.95 of Title 25, Code of Federal Regulations, dealing with the irrigable lands of the Wind River Irrigation Project, Wyo. Purpose of this amendment is to establish the assessment charges for the season 1972 and thereafter until further notice, and which charges are applicable to all irrigable lands in the Wind River Irrigation Project.

It is the policy of the Department of the Interior, whenever practicable, to afford the public an opportunity to participate in the rule making process. Accordingly, interested persons may submit written comments, suggestions or objections with respect to the proposed amendment to the Superintendent, Bureau of Indian Affairs, Fort Washakie, Wyo. 82514, within thirty (30) days from the date of publication of this notice of intention in the daily issue of the FEDERAL REGISTER.

Section 221.95 is amended to read as follows:

§ 221.95 Charges.

In compliance with the provisions of the acts of August 1, 1914, and March 7, 1928 (38 Stat. 583, 25 U.S.C. 385; 45 Stat. 210, 25 U.S.C. 387), the operation and maintenance charges for the lands under the Wind River Irrigation Project, Wyo., for the calendar year 1972 and subsequent years until further notice, are hereby fixed at $4.60 per acre for the assessable area under the constructed works on the diminished Wind River Project and at $3.20 per acre on the Ceded Wind River Project; except in the case of all irrigable trust patent Indian land which lies within the Ceded Reservation and which is benefited by the Big Bend Drainage District where an additional assessment of $0.45 (45 cents) per acre is hereby fixed.

CLYDE W. NOBBS,
Superintendent, Wind River Agency.

[21 CFR Part 121]

DIETHYL PYROCARBONATE

Proposed Revocation of Food Additive Regulation

An order published in the FEDERAL REGISTER of March 23, 1963 (28 F.R. 2900), provided for diethyl pyrocarbonate, manufactured by a specified process, to be added as a fermentation inhibitor to still wines. This regulation was amended (1) by an order published in the FEDERAL REGISTER of June 10, 1964 (29 F.R. 7462), to provide for an alternate method of manufacturing diethyl pyrocarbonate; (2) by an order published in the FEDERAL REGISTER of March 8, 1967 (32 F.R. 3819), to provide for the use of the additive in fermented malt beverages; and (3) by an order published in the FEDERAL REGISTER of August 30, 1968 (33 F.R. 12229), to provide for the use of the additive in noncarbonated soft drinks and fruit-based beverages.

Recent information has raised questions about the safety of diethyl pyrocarbonate. It has been shown that this ingredient is theoretically capable of combining with other ingredients to form a byproduct that may present a health hazard. Although this possibility has not yet been proved to occur in any marketed product, in view of this information, this ingredient can no longer be regarded as having been shown to be safe as required by section 409 of the Federal Food, Drug, and Cosmetic Act.

Therefore, pursuant to provisions of the Federal Food, Drug, and Cosmetic Act (secs. 409, 701(a), 52 Stat. 1055, 72 Stat. 1785–88 as amended; 21 U.S.C. 348, 371(a)) and under authority delegated to him (21 CFR 1.120), the Commissioner of Food and Drugs proposes to amend Part 121 by revoking § 121.1117 *Diethyl pyrocarbonate,* on the ground that a fair evaluation of all the data before him fails to establish that the use of the ingridient is safe.

Interested persons may, within 60 days after publication hereof in the FEDERAL REGISTER, file with the Hearing Clerk, Department of Health, Education, and Welfare, Room 6–88, 5600 Fishers Lane, Rockville, Md. 20852, written comments (preferably in quintuplicate) regarding this proposal. Comments may be accompanied by a memorandum or brief in support thereof. Received comments may be seen in the above office during working hours, Monday through Friday.

If suitable data are presented showing that this ingredient may continue to be used safely under the conditions prescribed by the present regulation or under other appropriate conditions, this proposal will be terminated.

Dated: February 8, 1972.

CHARLES C. EDWARDS,
Commissioner of Food and Drugs.

DEPARTMENT OF THE TREASURY

Bureau of Customs

PRINTERS' RUBBERIZED BLANKETS FROM THE UNITED KINGDOM

Antidumping Proceeding Notice

On November 23, 1971, information was received in proper form pursuant to §§ 153.26 and 153.27, Customs regulations (19 CFR 153.26, 153.27), indicating a possibility that printers' rubberized blankets from the United Kingdom are being, or are likely to be, sold at less than fair value within the meaning of the Antidumping Act, 1921, as amended (19 U.S.C. 160 et seq.).

There is evidence on record concerning injury to or likelihood of injury to or prevention of establishment of an industry in the United States.

Having conducted a summary investigation as required by § 153.29 of the Customs regulations (19 CFR 153.29) and having determined as a result thereof that there are grounds for so doing, the Bureau of Customs is instituting an inquiry to verify the information submitted and to obtain the facts necessary to enable the Secretary of the Treasury to reach a determination as to the fact or likelihood of sales at less than fair value.

A summary of information received from all sources is as follows:

The information received tends to indicate that the prices of the merchandise sold for exportation to the United States are less than the prices for home consumption.

This notice is published pursuant to § 153.30 of the Customs regulations (19 CFR 153.30).

[SEAL] EDWIN F. RAINS,
Acting Commissioner of Customs.

[Price Commission Ruling 1972-40]

TERM LIMITED PRICING

Price Commission Ruling

Facts. Company A, a price category I manufacturing firm under Economic Stabilization Regulations, 6 CFR 101.11 (c), 37 F.R. 1237 (January 27, 1971), is required to submit a prenotification to the Price Commission of each proposed price adjustment in accordance with its regulations. Economic Stabilization Regulations, 6 CFR 300.5, 36 F.R. 23974 (December 16, 1971), requires Price Commission approval of any price in excess of the base price. Under its Term Limited Pricing (TLP) approval procedure, Price Commission Release No. 37, December 22, 1971, the Commission has issued a TLP order to Company A for 2 percent. The order is based on allowable cost increases incurred for the company in excess of 2 percent. The order is binding for a period of 1 year during which Company A may not apply for any additional price increases.

Issue. What prices may Company A charge and still be in compliance with the TLP order and the Economic Stabilization Regulations?

Ruling. Company A may raise or lower the prices on any of its products during the year in which the order is in effect so long as the weighted average of all price increases from the base prices does not exceed 2 percent. In calculating its weighted average the company may take into account price decreases on items it sells as well as price increases.

For Company A, the 2 percent increase represents the top level weighted average limitation. The order will also include top limit price increases for particular products. Within the limits set by the order, no prenotification of price increases on individual items is necessary. However, special quarterly reports demonstrating and certifying compliance are required. The burden of proving that the TLP order is being complied with rests with the company. Upon challenge by the Price Commission or the Internal Revenue Service, a company must document compliance or be held to have violated the order.

TLP orders do not displace the profit margin limitation found in § 300.12 of the regulations. Thus, Company A cannot increase its prices even within the 2 percent limitation set by its TLP order if to do so would cause it to increase its profits as a percentage of sales over that which prevailed in the base period.

This ruling has been approved by the General Counsel of the Price Commission.

Dated: February 8, 1972.

LEE H. HENKEL, Jr.,
Acting Chief Counsel,
Internal Revenue Service.

Approved: February 8, 1972.

[FR Doc.72-2034 Filed 2-10-72;8:50 am]

[Price Commission Ruling 1972-41]

NOTICE REQUIREMENTS FOR RENTAL TRANSACTIONS AFTER DECEMBER 28, 1971

Price Commission Ruling

Facts. A residence became occupied on month-to-month terms on October 1, 1971. On December 15, 1971, the lessor decided to increase the rent of the residence to reflect certain increased costs and notified the lessee of the proposed increased rent effective January 1, 1972. On January 1, 1972, the lessee paid the increased rent for the month of January and continued to occupy the residence. However, the lessee contends that the increase violates economic stabilization regulations effective on December 29, 1971 (Economic Stabilization Regulations, 6 CFR Part 301, 36 F.R. 25386 (December 30, 1971)), because the notification requirements of § 301.502 were not met. The lessor contends that the increase in rent is allowable since the 30-day notification required by § 301.502 would have preceded the effective date of Part 301.

Issue. May a lessor increase the rent on a residence after December 28, 1971, without conforming to the notification procedures of Part 301 when the prescribed notice would have been given prior to the effective date of Part 301 (December 29, 1971).

Ruling. No. Section 301.501 provides that no person may increase a rent, with respect to any transaction after December 28, 1971, involving a lease or implied contract of occupancy of a residence unless he has complied with Subpart F of Part 301 (36 F.R. 25392). Section 301.502 (a) of that subpart requires a lessor to notify the lessee of a proposed rent increase at least 30 days before the date it is to become effective. The definition of "transaction" in § 301.2 includes the coming into being of an implied contract of occupancy or an informal lease on month-to-month terms. Thus, the lessee's occupancy of the subject residence on January 1, 1972, constitutes a "transaction" occurring after December 28, 1971, which is governed by § 301.502 (a), and the lessor may not increase the rent of the residence until the notification procedures of Part 301 are followed.

This ruling has been approved by the General Counsel of the Price Commission.

[Price Commission Ruling 1972-42]

INDIRECT MUNICIPAL FEES AS ALLOWABLE COSTS

Price Commission Ruling

Facts. A owns an apartment complex and has an agreement with B that B will remove the trash from A's apartments

for a specified fee. City X has imposed a new dumping fee on all trash haulers, including B, who use the city's trash dumping facilities. B has increased his fee to A pursuant to § 300.14 of the Economic Stabilization Regulations to reflect the new dumping fee, as a cost increase incurred after November 13, 1971 in furnishing the trash collection service. A is now seeking to increase the rent he charges for his apartments in order to offset B's increased trash collection fee.

Issue. Is B's higher fee, based on the new city dumping fee, an "allowable cost" to A under § 301.102 of the Economic Stabilization Regulations in order to justify A's proposed rent increase?

Ruling. B's higher fee is not an "allowable cost" to A within the Economic Stabilization Regulations, 6 CFR 301.102 (b), 36 F.R. 25386 (December 30, 1971).

Although the dumping fee is a local fee for a municipal service, and would be an "allowable cost" for purposes of increased rentals under the Economic Stabilization Regulations 6 CFR 301.102(a)(2), 36 F.R. 25386 (December 30, 1971) if it were imposed directly on A's property or A himself, it is on these facts imposed on B according to his usage of city dumping facilities. If B passes along the burden of the fee by increasing his fees, the increased cost to A does not arise from the municipal fee, but from B's increased fee. Moreover, B may choose to pass along only a portion of the increased cost, or none at all. Therefore, increases in trash hauling fees arising from the city dumping fee are not "allowable costs" within § 301.102(b), and may not justify increased rental rates under § 301.102(a)(2). Increased trash hauling fees arising from increased dumping costs are among the increases in operating costs for which the 2½ percent annual rent increases of § 301.102 (a)(1) is provided.

This ruling has been approved by the General Counsel of the Price Commission.

[Price Commission Ruling 1972-43]

RENTAL OF MOBILE HOME SPACES

Price Commission Ruling

Facts. A mobile home park provides spaces upon which patrons can park mobile homes and facilities for connecting electric, gas, water, and sewer lines. Many of its spaces are occupied by patrons to whom the mobile home is the principal place of abode. Other spaces are used by vacationers or travelers on a temporary basis. The park owner has received a notice that water rates are being increased, and would like to increase his rates on the mobile home spaces to offset the increased water rates, but he is uncertain as to which regulations govern the proposed increase.

Issue. Are rates for mobile home parks subject to the regulations governing rent, or do other regulations apply?

Ruling. Mobile home parks are governed by the general provisions of the rent regulations to the extent that they provide mobile home spaces for use in connection with the principal place of abode of nontransient occupants for a fee. If the park provides a space for a nonresidential use, however, the park is to that extent governed by the regulations applicable to "service organizations".

As defined in the regulations, "rent" means any price for the use of a residence or other real property. Economic Stabilization Regulations 6 CFR 301.3, 36 F.R. 25386 (December 30, 1971). "Other real property" is defined as real property devoted to the use of a residence, and a "residence" is a unit of housing normally occupied as a dwelling place under all the facts and circumstances; a mobile home is included as a "residence" if it is the principal place of abode of nontransient occupants. Economic Stabilization Regulations 6 CFR 301.2, 36 F.R. 25386 (December 30, 1971).

On the above facts, the spaces occupied by persons to whom the mobile home is a principal place of abode are "residences" and are therefore being "rented" within the definitions provided by the rent regulations. Fee increases for those spaces are subject to the rent regulations.

Since water rates are charges for a municipal service, they are "allowable costs" within § 301.102(b) of the regulations. Increases in such rates occurring after December 28, 1971, allocated to the residence or other real property, will justify increases in rents as the residence or other real property becomes occupied after December 28, 1971, under § 301.102(a).

Spaces occupied temporarily by vacationers or travelers do not fit the definition of a "residence" provided by § 301.2, and § 301.3(b) excludes fees or charges paid for space not used in connection with a residence from the definition of "rent". Not being a "rent", such charges are still within the definition of a "price" provided by § 300.5 of the regulations, as compensation for the use of property. In this case, the providing of mobile home spaces on a temporary basis is a leasing or licensing of property to another person which is within the definition of a "service" provided by § 300.5. Therefore, to the extent that it rents spaces for temporary occupancy by travelers and vacationers, the mobile home park is a "service organization" within § 300.5 and the rates on such transactions are governed by § 300.14 of the Economic Stabilization Regulations.

EFFECT OF INSUFFICIENT NOTICE UNDER RENTAL REGULATIONS

Price Commission Ruling

Facts. Lessor, on February 15, 1972, notifies lessee that the monthly rent of his apartment will be raised effective March 1, 1972. The notification does not contain all of the information required by § 301.502(b) of Part 301 (Economic Stabilization Regulations, 6 CFR Part 301, 36 F.R. 25386 (December 30, 1971)). Tenant has reason to believe that the proposed increased rent is in violation of Part 301. After first meeting with the lessor, lessee complains to the Internal Revenue Service that the increased rent is not allowable under rent regulations effective after December 28, 1971, and provides the Service with a copy of the notification received and a written statement as to why he believes there has been a violation (§ 301.502(e)).

Issue. Is the proposed increase in rent effective on March 1, 1972, pending final action with respect to the alleged violation, despite the fact that the notification does not conform to the requirements of § 301.502.

Ruling. No. No person may increase a rent, with respect to any transaction after December 28, 1971, involving a lease or implied contract of occupancy of a residence, unless he has complied with the rental increase procedures of Subpart F, regardless of whether the increase is otherwise allowable under Part 301 (§ 301.501).

Section 301.502(e) provides that "any proposed increase of which the lessee is notified pursuant to this section shall become effective as of the date specified in the notification pending final action with respect to the alleged violation." The notification provided in this case did not meet the 30-day requirement of § 301.502(a), nor did it set forth all the information required by § 301.502(b). The lessee was clearly not notified of the proposed increase pursuant to § 301.502. Therefore, the proposed increase in rent does not become effective on March 1, 1972, and the lessee need not pay the increase in rent pending final action with respect to the alleged violation.

This ruling has been approved by the General Counsel of the Price Commission.

Dated: February 8, 1972.

LEE H. HENKEL, Jr.,
Acting Chief Counsel,
Internal Revenue Service.

Approved: February 8, 1972.

SAMUEL R. PIERCE, Jr.,
General Counsel,
Department of the Treasury.

[Price Commission Ruling 1972-45]

WAGE INCREASES INCURRED PRIOR TO NOVEMBER 13, 1971, AS ALLOWABLE COSTS

Price Commission Ruling

Facts. On April 1, 1971, a hospital, an institutional provider of health services, entered into a contract with a labor union representing the hospital's employees. The contract provided for an aggregate wage increase for the employees of 9 percent per year, to be paid beginning January 1, 1972. Section 300.-18(d) of the Economic Stabilization Regulations provides that generally, aggregate wage increases in excess of 5.5 percent per year incurred after November 13, 1971, are not allowable costs for the purpose of determining allowable price increases by institutional providers of health services. Economic Stabilization Regulations, 6 CFR 300.-18(d), 36 F.R. 25384 (December 30, 1971). A proposed price increase reflecting this 9 percent wage increase will not raise the hospital's annual aggregate revenues more than 6 percent.

Issue. Was the 9 percent wage increase incurred before November 13, 1971?

Ruling. Yes. For the purposes of § 300.-18(d) of the Economic Stabilization Regulations a wage increase will be deemed to be incurred prior to November 13, 1971, if a binding contract to pay that wage increase was entered into before August 15, 1971, even if actual payment under the contract does not begin until after November 13, 1971. The price increase reflecting this increased cost, however, may not take effect until the increased wages are being paid.

This ruling has been approved by the General Counsel of the Price Commission.

Dated: February 8, 1972.

LEE H. HENKEL, Jr.,
Acting Chief Counsel,
Internal Revenue Service.

Approved: February 8, 1972.

SAMUEL R. PIERCE, Jr.,
General Counsel,
Department of the Treasury.

[Price Commission Ruling 1972-46]

DEFINITION OF RETAILER

Price Commission Ruling

Facts. A distributor, D, is in the business of renting, selling, and servicing a multiple line of new and used construction, mining, logging, and road maintenance equipment. D sells a portable cement mixer and several wheelbarrows to a construction company, C.

Issue. Whether D is a retailer as defined in the Economic Stabilization Regulations and consequently subject to the posting requirements?

Ruling. Yes. Section 300.5 defines retailer as a person who carries on the trade or business of selling property to the ultimate consumer. 36 F.R. 23976 (December 16, 1971). A consumer is generally understood to be the person who uses up a commodity or service. The "ultimate consumer," then, is the last person to hold or use an item, in the normal course of events. Thus, for the purposes of the Economic Stabilization Regulations, the ultimate consumer includes a person who purchases an item for use in his trade or business, notwithstanding any other definition or classification, such as the U.S. Standard Industrial Classification Code. Consequently, to the extent that D sells a multiple line of equipment to an ultimate consumer, he is a retailer for the purposes of the price posting requirements. It should be noted, however, that to the extent that D's business involves the sale of used equipment (exempt), or the repairing of equipment (a service), or the leasing of equipment (a service), the price posting requirements do not apply.

This ruling has been approved by the General Counsel of the Price Commission.

Dated: February 8, 1972.

LEE H. HENKEL, Jr.,
Acting Chief Counsel,
Internal Revenue Service.

Approved: February 8, 1972.

[Price Commission Ruling 1972-47]

ROYALTIES FOR USE OF A PATENT

Price Commission Ruling

Facts. A holds the patent rights to an invention in accordance with an agreement with B. The agreement allows the royalties paid to B to be increased in an amount that reflect any increase in the cost of living index.

Issue. Whether such increase royalties are permissible.

Ruling. Increases in royalty payments keyed proportionately to increases in the cost-of-living index are not allowable. The rationale to support this ruling is dependent upon Economic Stabilization Regulation § 300.111, 36 F.R. 25384 (December 30, 1971), entitled Formula-determined lease of personal property.

A royalty, in substance, is a payment for the use of property, most commonly a patent. As such it is similar to a lease of personal property and therefore the same rules should apply and the consistent results are reached. Regulations § 300.111 will not allow price increases based on increases in the consumer price index and therefore an increase in a royalty payment based on an increase in the cost-of-living index is not to be allowed.

This ruling has been approved by the General Counsel of the Price Commission.

Dated: February 8, 1972.

LEE H. HENKEL, Jr.,
Acting Chief Counsel,
Internal Revenue Service.

Approved: February 8, 1972.

DEPARTMENT OF THE INTERIOR

Bureau of Land Management

[S 2825]

CALIFORNIA

Opening of Land Under Section 24 of the Federal Power Act

FEBRUARY 4, 1972.

By virtue of the authority contained in section 24 of the Federal Power Act of June 10, 1920 (41 Stat. 1075; 16 U.S.C. 818), as amended, and pursuant to the authority redelegated to me by the Chief, Division of Technical Services, California State Office, Bureau of Land Management, approved by the California State Director, effective January 12, 1972 (37 F.R. 491), it is ordered as follows:

1. In DA-1102-California, the Federal Power Commission finds that the land described below has no significant power value, therefore, the withdrawal for Project No. 2246 insofar as it pertains to this land should be vacated as to the following described land:

MOUNT DIABLO MERIDIAN

T. 16 N., R. 6 E.,
Sec. 27, lot 7.

The area described contains approximately 1.75 acres, and is situated one-half mile east of the town of Smartsville, Yuba County, Calif.

2. At 10 a.m., on March 15, 1972, the land shall be open to such forms of disposition as may by law be made of such lands.

The State of California has waived its preference right of application for highway rights-of-way or material sites afforded it by section 24 of said Act.

Inquiries concerning the land should be addressed to the California State Office, Bureau of Land Management, Sacramento, Calif.

JESSE H. JOHNSON,
Acting Chief, Branch of Lands, and Minerals Operations.

[Serial No. Idaho-06678]

IDAHO

Notice of Termination of Proposed Withdrawal and Reservation of Lands

FEBRUARY 4, 1972.

Notice of an application Serial No. I-06678 for withdrawal and reservation of lands was published as FEDERAL REGISTER Document No. 57-8740 of the issue for October 24, 1957 (22 F.R. 207). The applicant agency has cancelled its application insofar as it involved the lands described below. Therefore, pursuant to the regulations contained in 43 CFR, Part 2091.2-5(b), such lands will be at 10 a.m. on February 19, 1972 relieved of the segregative effect of the above-mentioned application.

The lands involved in this notice of termination are:

BOISE MERIDIAN

T. 5 S., R. 3 E.,
Sec. 9, S½ of lot 1.

The area described aggregates about 20 acres in Elmore County, Idaho.

RICHARD H. PETRIE,
Chief, Division of Technical Services.

NAVAJO PROJECT

Notice of Availability of Final Environmental Statement

Pursuant to section 102(2)(C) of the National Environmental Policy Act of 1969, the Department of the Interior has prepared a final environmental statement for the Navajo Project, located principally in Arizona.

The environmental statement pertains to the coal-fired electrical power project which is presently under construction. The major feature of the project, the Navajo Generating Station, is located near Page, Ariz. Other features of the project include the Black Mesa and Lake Powell Railroad, the Black Mesa Coal Mining Operation, the Southern Transmission System, and the Western Transmission System. The project will supply electrical energy to portions of Arizona, California, and Nevada, as well as the authorized Central Arizona Project.

Copies of the statement are available for inspection at the following locations:

Office of Communications, Room 7220, Department of the Interior, Washington, D.C. 20240, telephone (202) 343-9247.

Office of Ecology, Room 7620, Bureau of Reclamation, Department of the Interior, Washington, D.C. 20240, telephone (202) 343-4991.

Division of Engineering Support, E&R Center, Technical Services Branch, Building 67, Denver Federal Center, Denver, Colo. 80225, telephone (303) 234-3007.

Office of the Regional Director, Bureau of Reclamation, Post Office Box 427, Boulder City, NV 89005, telephone (702) 293-8560.

Single copies of the final environmental statement may be obtained on request to the Commissioner of Reclamation or the Regional Director. In addition, copies may be purchased from the National Technical Information Service, Department of Commerce, Springfield, Va. 22151. Please refer to the statement number above.

Dated: February 4, 1972.

JOHN W. LARSON,
Assistant Secretary of the Interior.

Effective date. The foregoing notice shall become effective upon publication in the FEDERAL REGISTER (2-11-72).

Certain additional stockyards and slaughtering establishments are added to the list of those heretofore specifically approved under the regulations in 9 CFR Part 78. It has been determined that the inspection and handling of livestock or carcasses or products thereof at such stockyards or establishments are adequate to effectuate the purposes of such regulations. Certain stockyards and slaughtering establishments are removed from the list of those heretofore specifically approved under said regulations, because it has been determined that such stockyards and establishments no longer qualify for specific approval under the regulations. Name changes affecting certain stockyards and slaughtering establishments are also set forth in the foregoing notice. This action, therefore, imposes certain restrictions necessary to prevent the spread of brucellosis, relieves certain restrictions presently imposed, and makes certain changes which do not affect the substance of the restrictions set forth in 9 CFR Part 78. The action should become effective promptly in order to accomplish its purpose in the public interest, to be of maximum benefit to persons subject to the restrictions which are relieved hereby, and to promptly correct the names of all listed stockyards and slaughtering establishments. Therefore, under the administrative procedure provisions of 5 U.S.C. 553, it is found upon good cause that notice and other public procedure with respect to this action are impracticable, unnecessary, and contrary to the public interest, and good cause is found for making this notice effective less than 30 days after publication in the FEDERAL REGISTER.

Done at Washington, D.C., this 8th day of February 1972.

J. M. HEJL,
Acting Deputy Administrator, Veterinary Services, Animal and Plant Health Services.

DEPARTMENT OF HEALTH, EDUCATION, AND WELFARE

Food and Drug Administration

[DESI 5509]

CERTAIN ANTICOAGULANT DRUGS

Drugs for Human Use; Drug Efficacy Study Implementation; Follow-up Notice

Certain anticoagulant drugs containing sodium or potassium warfarin, diphenadione, phenprocoumon, phenindione, bishydroxycoumarin, anisindione, ethylbiscoumacetate, or acenocoumarol.

In a notice [DESI 5509] published in the FEDERAL REGISTER of September 23, 1970 (35 F.R. 14797), the Commissioner of Food and Drugs announced his conclusions pursuant to an evaluation of reports received from the National Academy of Sciences-National Research Council, Drug Efficacy Study Group, on the following anticoagulant drugs:

1. a. Coumadin Injection and

b. Coumadin Tablets both containing sodium warfarin; Endo Laboratories, Inc., 1000 Stewart Avenue, Garden City, N.Y. 11533 (NDA 9-218).

2. a. Athrombin Tablets containing sodium warfarin and

b. Athrombin-K Tablets containing potassium warfarin; The Purdue Frederick Co., 99-101 Saw Mill River Road, Yonkers, N.Y. 10701 (NDA 11-771).

3. Dipaxin Tablets containing diphenadione; The Upjohn Co., 7171 Portage Road, Kalamazoo, Mich. 49002 (NDA 9-751).

4. Liquamar Tablets containing phenprocoumon; Organon, Inc., 375 Mount Pleasant Avenue, West Orange, N.J. 07052 (NDA 11-228).

5. Hedulin Tablets containing phenindione; Walker Laboratories, Division of Richardson-Merrell, Inc., Bradford Road, Mount Vernon, N.Y. 10551 (NDA 8-767).

6. Danilone Tablets containing phenindione; Schieffelin and Co., Box 8, Apex, N.C. 27502 (NDA 8-700).

7. Dicumarol Tablets containing bishydroxycoumarin; Abbott Laboratories, Inc., 14th and Sheridan Road, North Chicago, Ill. 60064 (NDA 5-545).

8. Dicumarol Pulvules containing bishydroxycoumarin; Eli Lilly and Co., Post Office Box 618, Indianapolis, Ind. 46206 (NDA 5-509).

9. Miradon Tablets containing anisindione; Schering Corp., 60 Orange Street, Bloomfield, N.J. 07003 (NDA 10-909).

10. Tromexan Tablets containing ethyl biscoumacetate; Geigy Pharmaceuticals, Division Geigy Chemical Corp., Saw Mill River Road, Ardsley, N.Y. 10502 (NDA 7-542).

11. Sintron Tablets containing acenocoumarol; Geigy Pharmaceuticals (NDA 10-759).

The notice stated that the drugs were regarded as effective, probably effective, possibly effective, and lacking substantial evidence of effectiveness for their various labeled indications.

Based upon further review and evaluation of additional studies, the Commissioner of Food and Drugs finds it appropriate to amend the announcement of September 23, 1970 by:

1. Changing the effectiveness classification of the probably effective indication for use as an adjunct in the treatment of coronary occlusions to effective.

2. Reclassifying the possibly effective indications as lacking substantial evidence of effectiveness in that no new evidence has been presented pursuant to the September 23, 1970 announcement which supports these claims, i.e., prophylaxis and treatment of intravascular clots, to inhibit further intravascular clotting, acute embolic and thrombotic occlusion of the peripheral arteries, prophylaxis in coronary occlusion with myocardial infarction, prophylaxis in blood vessel trauma or surgery such as embolectomy arterial repair, aortic thrombasis popliteal aneurysm, and prophylaxis of thrombosis in thrombosis obliterans and thromboangiitis obliterans.

3. Rewording the indications section to read as follows:

INDICATIONS

This drug is indicated for the prophylaxis and treatment of venous thrombosis and its extension, the treatment of atrial fibrillation with embolization, the prophylaxis and treatment of pulmonary embolism, and as an adjunct in the treatment of coronary occlusion.

Holders of applications approved for these drugs are required to submit, within 60 days following publication of this amended announcement in the FEDERAL REGISTER, supplements to their new drug applications to provide for revised labeling in accord with the indications section above. Such supplements should be submitted under the provisions of § 130.9 (d) and (e) of the new drug regulations (21 CFR 130.9 (d) and (e)) which permit certain changes to be put into effect at the earliest possible time.

Any such preparation, for human use, introduced into interstate commerce after 60 days following publication of this notice in the FEDERAL REGISTER with labeling bearing indications that lack substantial evidence of effectiveness, may be subject to regulatory proceedings.

This notice is issued pursuant to provisions of the Federal Food, Drug, and Cosmetic Act (secs. 502, 505, 52 Stat. 1050–53, as amended; 21 U.S.C. 352, 355) and under authority delegated to the Commissioner of Food and Drugs (21 CFR 2.120).

Dated: February 2, 1972.

SAM D. FINE,
Associate Commissioner for Compliance.

[FR Doc.72-2063 Filed 2-10-72;8:50 am]

[Docket No. FDC-D-408; NDA 6-472, etc.]

DON BAXTER, INC.

Certain Parenteral Electrolyte Solutions; Lactated Potassic Saline Injection and Ammonium Chloride Injection; Notice of Opportunity for Hearing on Proposal To Withdraw Approval of New Drug Applications

In a notice [DESI 6472] published in the FEDERAL REGISTER of August 26, 1970 (35 F.R. 13598), the Commissioner of Food and Drugs announced his conclusions pursuant to the evaluation of reports received from the National Academy of Sciences-National Research Council, Drug Efficacy Study Group, on the following drugs, stating that the drugs are regarded as possibly effective for the labeled indications.

NDA 6-472: Lactated Potassic Saline Injection, containing potassium chloride, sodium chloride, and sodium lactate; Don Baxter, Inc., 1015 Grandview Avenue, Glendale, Calif. 91201.

That part of NDA 6-580 pertaining to Ammonium Chloride in Distilled Water, containing ammonium chloride 0.9 percent; Don Baxter, Inc.

Six months were allowed for obtaining and submitting substantial evidence of effectiveness. The drugs have been reclassified as lacking substantial evidence of effectiveness in that such evidence has not been submitted.

Therefore, notice is given to Don Baxter, Inc., and to any interested person who may be adversely affected, that the Commissioner proposes to issue an order under section 505(e) of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 355 (e)) withdrawing approval of the listed new drug applications and all amendments and supplements thereto on the grounds that new information before him with respect to the drugs, evaluated together with the evidence available to him when the applications were approved, shows there is a lack of substantial evidence that the drugs will have the effects they purport or are represented to have under the conditions of use prescribed, recommended, or suggested in the labeling.

In accordance with the provisions of section 505 of the act (21 U.S.C. 355) and the regulations promulgated thereunder (21 CFR Part 130), the Commissioner will give the applicant, and any interested person who would be adversely affected by an order withdrawing such approval, an opportunity for a hearing to show why approval of the new drug applications should not be withdrawn. Any related drug for human use not the subject of an approved new drug application may be affected by this action.

Within 30 days after publication hereof in the FEDERAL REGISTER, such persons are required to file with the Hearing Clerk, Department of Health, Education, and Welfare, Room 6-88, 5600 Fishers Lane, Rockville, Md. 20852, a written appearance electing whether:

1. To avail themselves of the opportunity for a hearing; or

2. Not to avail themselves of the opportunity for a hearing.

If such persons elect not to avail themselves of the opportunity for a hearing, the Commissioner without further notice will enter a final order withdrawing approval of the new drug applications. Failure of such persons to file a written apperance of election within said 30 days will be construed as an election by such persons not to avail themselves of the opportunity for a hearing.

The hearing contemplated by this notice will be open to the public except that any portion of the hearing that concerns a method or process the Commissioner finds entitled to protection as a trade secret will not be open to the public, unless the respondent specifies otherwise in his appearance.

If such persons elect to avail themselves of the opportunity for a hearing, they must file, within 30 days after publication of this notice in the FEDERAL REGISTER, a written appearance requesting the hearing, giving the reasons why approval of the new drug application should not be withdrawn, together with a well organized and full factual analysis of the clinical and other investigational data they are prepared to prove in support of their opposition. A request for a hearing may not rest upon mere allegations or denials, but must set forth specific facts showing that a genuine and substantial issue of fact requires a hearing. When it clearly appears from the data in the application and from the reasons and factual analysis in the request for the hearing that no genuine and substantial issue of fact precludes the withdrawal of approval of the application, the Commissioner will enter an order on these data, making findings and conclusions on such data. If a hearing is requested and justified by the response to this notice, the issues will be defined, a hearing examiner will be named, and he shall issue, as soon as practicable after the expiration of such 30 days, a written notice of the time and place at which the hearing will commence. (35 F.R. 7250, May 8, 1970; 35 F.R. 16631, October 27, 1970.)

Received requests for a hearing and/or elections not to request a hearing may be seen in the office of the Hearing Clerk (address given above) during regular business hours, Monday through Friday.

This notice is issued pursuant to provisions of the Federal Food, Drug, and Cosmetic Act (sec. 505, 52 Stat. 1052–53, as amended; 21 U.S.C. 355) and under authority delegated to the Commissioner (21 CFR 2.120).

Dated: February 2, 1972.

SAM D. FINE,
Associate Commissioner for Compliance.

[FR Doc.72-2064 Filed 2-10-72;8:51 am]

[Docket No. FDC-D-430]

HESS & CLARK AND JENSEN-SALSBERY LABORATORIES

Certain Tablets Containing Streptomycin, Sulfathiazole and Kaolin; Notice of Drugs Deemed Adulterated

An announcement was published in the FEDERAL REGISTER of July 22, 1970 (35 F.R. 11710, DESI 0020NV), concerning 2-Way Tabs for Calf Scours marketed by Hess & Clark, Division of Rhodia, Inc., Ashland, Ohio 44805, and S-2-K Calf Scour Tabs marketed by Jensen-Salsbery Laboratories, Division of Richardson-Merrell, Inc., Kansas City, Mo. 64141. The announcement set forth the conclusions of the Food and Drug Administration, following evaluation of reports received from the National Academy of Sciences-National Research Council, Drug Efficacy Study Group, that there is a lack of substantial evidence to show that said drugs are effective under the conditions of use prescribed, recommended or suggested in the labeling.

The announcement provided the manufacturers and all interested parties a 6-month period in which to submit new animal drug applications. The above named firms did not submit new animal drug applications for said drugs.

Based on the foregoing and the information before him, the Commissioner of Food and Drugs concludes that the above named drugs are adulterated within the meaning of section 501(a)(5) of the Federal Food, Drug, and Cosmetic Act, in that they are not the subjects of approved new animal drug applications pursuant to section 512 of the act. Therefore, notice is given to Hess & Clark and Jensen-Salsbery Laboratories, and all interested persons that all stocks of said drugs within the jurisdiction of the act are deemed adulterated within the meaning of the act and are subject to appropriate regulatory action.

This notice is issued pursuant to provisions of the Federal Food, Drug, and Cosmetic Act (sec. 501(a)(5), 512, 52 Stat. 1049, as amended, 82 Stat. 343-51; 21 U.S.C. 351(a)(5), 360b) and under the authority delegated to the Commissioner (21 CFR 2.120).

Dated: February 3, 1972.

SAM D. FINE,
Associate Commissioner for Compliance.

[FR Doc.72-2065 Filed 2-10-72;8:51 am]

[Docket No. FDC-D-401; NDA 3-726]

SCHERING CORP.

Sulfacetamide for Oral Administration; Notice of Opportunity for Hearing on Proposal To Withdraw Approval of New Drug Application

In a notice [DESI 3726] published in the FEDERAL REGISTER of July 9, 1970 (35 F.R. 11070) the Commissioner of Food and Drugs announced his conclusions pursuant to the evaluation of a report received from the National Academy of Sciences-National Research Council, Drug Efficacy Study Group concerning Sulamyd (sulfacetamide) Tablets, NDA 3-726 for which is held by Schering Corp., 60 Orange Street, Bloomfield, NJ 07003. The notice stated that the drug was regarded as possibly effective, and lacking substantial evidence of effectiveness for the various labeled indications. Six months were allowed for obtaining and submitting substantial evidence of effectiveness of the drug for the indications regarded possibly effective. The possibly effective indications have been reclassified as lacking substantial evidence of effectiveness in that no new evidence of effectiveness of the drug has been submitted.

Therefore, notice is given to Schering Corp. and to any interested person who may be adversely affected, that the Commissioner proposes to issue an order under section 505(e) of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 355 (e)) withdrawing approval of the listed new drug application and all amendments and supplements thereto on the grounds that new information before him with respect to the drug, evaluated together with the evidence available to him when the application was approved, shows there is a lack of substantial evidence that the drug will have the effects it purports or is represented to have under the conditions of use prescribed, recommended, or suggested in its labeling.

In accordance with the provisions of section 505 of the Act (21 U.S.C. 355) and the regulations promulgated thereunder (21 CFR Part 130), the Commissioner will give the applicant, and any interested person who would be adversely affected by an order withdrawing such approval, an opportunity for a hearing to show why approval of the new drug application should not be withdrawn. Any related drug for human use, not the subject of an approved new drug application, may be affected by this action.

Within 30 days after publication hereof in the FEDERAL REGISTER, such persons are required to file with the Hearing Clerk, Department of Health, Education, and Welfare, Room 6-88, 5600 Fishers Lane, Rockville, Md. 20852, a written apearance electing whether:

1. To avail themselves of the opportunity for a hearing; or
2. Not to avail themselves of the opportunity for a hearing.

If such person elects not to avail themselves of the opportunity for a hearing, the Commissioner without further notice will enter a final order withdrawing approval of the new drug application. Failure of such persons to file a written appearance of election within said 30 days will be construed as an election by such persons not to avail themselves of the opportunity for a hearing.

The hearing contemplated by this notice will be open to the public except that any portion of the hearing that concerns a method or process the Commissioner finds entitled to protection as a trade secret will not be open to the public, unless the respondent specifies otherwise in his appearance.

If such persons elect to avail themselves of the opportunity for a hearing, they must file within 30 days after publication of this notice in the FEDERAL REGISTER, a written appearance requesting the hearing, giving the reasons why approval of the new drug application should not be withdrawn, together with a well-organized and full factual analysis of the clinical and other investigational data they are prepared to prove in support of their opposition. A request for a hearing may not rest upon mere allegations or denials, but must set forth specific facts showing that a genuine and substantial issue of fact requires a hearing. When it clearly appears from the data in the application and from the reasons and factual analysis in the request for the hearing that no genuine and substantial issue of fact precludes the withdrawal of approval of the application, the Commissioner will enter an order on these data, making findings and conclusions on such data. If a hearing is requested and justified by the response to this notice, the issues will be defined, a hearing examiner will be named, and he shall issue, as soon as practicable after the expiration of such 30 days, a written notice of the time and place at which the hearing will commence (35 F.R. 7250, May 8, 1970; 35 F.R. 16631, Oct. 27, 1970).

Received requests for a hearing and/or elections not to request a hearing may be seen in the office of the Hearing Clerk (address given above) during regular business hours, Monday through Friday.

This notice is issued pursuant to provisions of the Federal Food, Drug, and Cosmetic Act (sec. 505, 52 Stat. 1052-53, as amended; 21 U.S.C. 355) and under authority delegated to the Commissioner (21 CFR 2.120).

Dated: January 28, 1972.

SAM D. FINE,
Associate Commissioner for Compliance.

[FR Doc.72-2067 Filed 2-10-72;8:51 am]

[Docket No. FDC-D-344; NDA 12-064]

UPJOHN CO.

Combination Drug Containing Medroxyprogesterone Acetate, Ethoxzolamide and Ectylurea; Notice of Withdrawal of Approval of New Drug Application

On June 10, 1971, there was published in the FEDERAL REGISTER (36 F.R. 11228) a notice of opportunity for hearing (DESI 12064) in which the Commissioner of Food and Drugs proposed to issue an order under section 505(e) of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 355(e)) withdrawing approval of new drug application No. 12-064, Cytran Tablets; The Upjohn Co., 7171 Portage Road, Kalamazoo, MI 49002, in the absence of substantial evidence that the drug is effective as a fixed

combination for the conditions of use recommended in its labeling.

Neither the holder of the NDA nor any other interested person has filed a written appearance of election as provided by said notice. The failure to file such an appearance is construed as an election by such persons not to avail themselves of the opportunity for a hearing.

The Commissioner of Food and Drugs, pursuant to provisions of the Federal Food, Drug, and Cosmetic Act (sec. 505(e), 52 Stat. 1053, as amended; 21 U.S.C. 355(e)) and under authority delegated to him (21 CFR 2.120), finds that on the basis of new information before him, with respect to such drug evaluated together with the evidence available to him when the application was approved, there is a lack of substantial evidence that the drug will have the effect it purports or is represented to have under the conditions of use prescribed, recommended, or suggested in the labeling.

Therefore, pursuant to the foregoing findings, approval of the above new drug application, and all amendments and supplements thereto, is withdrawn effective on the date of publication of this document.

Dated: January 28, 1972.

SAM D. FINE,
Associate Commissioner for Compliance.

DEPARTMENT OF TRANSPORTATION

Hazardous Materials Regulations Board

SPECIAL PERMITS ISSUED OR DENIED

FEBRUARY 4, 1972.

Pursuant to Docket No. HM–1, rule making procedures of the Hazardous Materials Regulations Board, issued May 22, 1968 (33 F.R. 8277) 49 CFR Part 170, following is a list of new DOT Special Permits upon which Board action was completed during January 1972:

Special permit No.	Issued to—Subject	Mode or modes of transportation
6557	General Fire Extinguisher Corp., Northbrook, Ill., to ship carbon dioxide and bromotrifluoromethane in DOT 3A, 3AA or 4BA cylinders for which certain inspection report requirements have been waived.	Highway, rail, water and air.
6558	Eli Lilly Co., Edgewood, N.J., to ship certain corrosive liquids in non-DOT specification steel portable tanks, rubber lined.	Highway and water.
6569	Shippers registered with this Board to ship alcohol, n.o.s., in non-DOT specification steel portable tanks similar to MC306 cargo tanks.	Highway and water.
6572	Brookhaven National Laboratory, Upton, L.I., N.Y., and Inter-Maritime Forwarding, Inc., to make one shipment of special form radioactive material in an ETR type shipping cask.	Highway and water.
6573	Shippers registered with this Board to ship Class I fissile radioactive materials in package identified as Model No. HIT–500.	Highway, rail, and air.
6575	Remington Arms Co., Bridgeport, Conn., to ship percussion caps, Class C explosives, in quantities exceeding present limitations.	Highway and rail.
6578	Ireco Chemicals, Salt Lake City, Utah, to ship surplus tritonal, Class A explosives, in military specification containers.	Highway.
6579	Trojan-U.S. Powder, Allentown, Pa., to ship surplus tritonal, Class A explosives in military specification containers.	Highway.
6580	Shippers registered with this Board to ship paints and related materials in non-DOT specification steel portable tanks similar to DOT–52 tanks.	Highway.
6581	Shippers registered with this Board to ship large quantities of fissile radioactive material, n.o.s., in package identified as Model No. 51032–1.	Highway.
6582	U.S. Small Business Administration, Miami, Fla., to make one shipment of a steel encased Cobalt-60 Irradiator.	Highway.
6583	Phillips Petroleum Co., Bartlesville, Okla., to ship an alkaline caustic liquid in DOT–51 portable tanks with bottom outlet.	Highway.
6586	U.S. Atomic Energy Commission, Oak Ridge, Tenn., to make one shipment of fissile radioactive material in package identified as EBOR Fuel Element Container.	Highway.

Following is a list of requests for special permits which were denied during January, 1972:

Denied—Subject:

1. Stauffer Chemical Co., New York, N.Y., for authorization to ship phosphorus in a DOT–111A60W1 tank car having gross weight of 394,000 pounds.

ALAN I. ROBERTS,
Secretary.

ATOMIC ENERGY COMMISSION

[Docket No. 50–341]

DETROIT EDISON CO.

Notice of Availability of Applicant's Supplemental Environmental Reports

Pursuant to the National Environmental Policy Act of 1969 and the Atomic Energy Commission's regulations, notice is hereby given that a report dated September 1971 and entitled "Applicants Environmental Report (Revised) Construction Permit Stage, Enrico Fermi Atomic Power Plant Unit 2" and Supplements 1 and 2 thereto, submitted by the Detroit Edison Co. are being placed in the Commission's Public Document Room at 1717 H Street NW., Washington, DC, and in the Monroe County Library System 3700 South Custer Road, Monroe, MI 48161. The reports are also being made available to the public at the Office of Planning Coordination, Executive Office of the Governor, Lewis Cass Building, Lansing, Mich. 48713 and at the South East Michigan Council of Governments, 810 Book Building, Detroit, Mich. 48226.

These reports discuss environmental considerations related to the proposed construction of the Enrico Fermi Atomic Power Plant Unit 2, located on the western short of Lake Erie in Frenchtown Township, Monroe County, Mich.

Notice of the availability of the applicant's original environmental report was published in the FEDERAL REGISTER on October 13, 1970 (35 F.R. 16060).

After the reports have been analyzed by the Commission's Director of Regulation or his designee, a draft detailed statement of environmental considerations related to the proposed action will be prepared. This statement will supersede the June 18, 1971 detailed statement for which a notice of availability was published in the FEDERAL REGISTER on July 7, 1971 (36 F.R. 12804). Upon preparation of the draft detailed statement, the Commission will, among other things, cause to be published in the FEDERAL REGISTER a summary notice of the availability of the draft detailed statement. The summary notice will request comments from interested persons on the proposed action and on the draft detailed statement. The summary notice will also contain a statement to the effect that the comments of Federal agencies and State and local officials thereon will be available when received.

Dated at Bethesda, Md., this 4th day of February 1972.

For the Atomic Energy Commission.

ROGER S. BOYD,
Assistant Director for Boiling Water Reactors, Division of Reactor Licensing.

[Docket No. 50-269]

DUKE POWER CO.

Supplementary Notice of Proposed Issuance of Facility Operating License

On January 8, 1971, a notice of proposed issuance of facility operating license was published by the Atomic Energy Commission (the Commission) in the FEDERAL REGISTER (36 F.R. 296) in the captioned proceeding. That notice indicated that the Commission was considering the issuance of a facility operating license which would authorize Duke Power Co. (the applicant) to possess, use, and operate the Oconee Nuclear Station Unit 1, a pressurized water reactor, on the applicant's site located in eastern Oconee County, approximately 8 miles northeast of Seneca, S.C. The notice provided the applicant with an opportunity to request a hearing and also provided an opportunity for any person whose interest might be affected by the proceeding to file a petition for leave to intervene. No request for a hearing or petition for leave to intervene was filed.

On September 9, 1971, the Commission published a revision of its regulations in 10 CFR Part 50, Appendix D, "Implementation of the National Environmental Policy Act of 1969," (36 F.R. 18071) to set forth an interim statement of Commission policy and procedure for implementation of the National Environmental Policy Act of 1969 (NEPA).[1] The revised regulations require the consideration of additional matters in applicants' Environmental Reports and in Detailed Statements of environmental considerations and provide for determination in pending proceedings of specified issues in addition to and different from those previously in issue in AEC licensing proceedings.

Notice is hereby given, pursuant to 10 CFR Part 2, "Rules of Practice," and Appendix D of 10 CFR Part 50, "Licensing of Production and Utilization Facilities," that in the conduct of the captioned proceeding, the Commission is providing an opportunity for hearing with respect to those matters covered by Appendix D of 10 CFR Part 50. This notice does not provide an additional opportunity to any person to intervene on the basis of, or to raise matters encompassed within, the issues pertaining to radiological health and safety and the common defense and security for which opportunity to intervene was provided in the notice of proposed issuance of facility operating license, published in the FEDERAL REGISTER on January 8, 1971.

Accordingly, within thirty (30) days from the date of publication of this notice in the FEDERAL REGISTER, the applicant may file a request for a hearing and any person whose interest may be affected by this proceeding may file a petition for leave to intervene. Requests for a hearing and petitions for leave to intervene shall be filed in accordance with the Commission's rules of practice in 10 CFR Part 2. If a request for a hearing or petition for leave to intervene is filed within the time prescribed in this notice, the Commission will issue a notice of hearing or an appropriate order. In accordance with 10 CFR 2.714, a petition for leave to intervene which is not timely filed will be dismissed unless the petitioner shows good cause for failure to file on time.

For further details with respect to the matters under consideration see the applicant's supplemental Environmental Report and the Commission's draft Detailed Statement of environmental considerations which are available for public inspection at the Commission's Public Document Room, 1717 H Street NW., Washington, D.C., and at the Oconee County Library, 201 South Spring Street, Walhalla, S.C. As it becomes available, the Commission's final Detailed Statement of environmental considerations will also be placed in the Commission's Public Document Room and in the Oconee County Library for inspection by members of the public. Copies of the Commission's draft and final Detailed Statements and, to the extent of supply, a copy of the applicant's supplemental Environmental Report may be obtained by request to the Director of the Division of Reactor Licensing, U.S. Atomic Energy Commission, Washington, D.C. 20545.

Dated at Bethesda, Md., this 9th day of February 1972.

For the Atomic Energy Commission.

F. SCHROEDER,
Deputy Director,
Division of Reactor Licensing.

[FR Doc.72-2198 Filed 2-10-72;10:21 am]

[1] The Commission has since adopted certain amendments to revised Appendix D which were published in the FEDERAL REGISTER on Sept. 30, 1971 (36 F.R. 19158), Nov. 11, 1971 (36 F.R. 21579), and Jan. 20, 1972 (37 F.R. 864).

FEDERAL MARITIME COMMISSION

LATIN AMERICA/PACIFIC COAST STEAMSHIP CONFERENCE

Notice of Agreement Filed

Notice is hereby given that the following agreement has been filed with the Commission for approval pursuant to section 15 of the Shipping Act, 1916, as amended (39 Stat. 733, 75 Stat. 763, 46 U.S.C. 814).

Interested parties may inspect and obtain a copy of the agreement at the Washington office of the Federal Maritime Commission, 1405 I Street NW., Room 1015; or may inspect the agreement at the Field Offices located at New York, N.Y., New Orleans, La., and San Francisco, Calif. Comments on such agreements, including requests for hearing, may be submitted to the Secretary, Federal Maritime Commission, Washington, D.C. 20573, within 20 days after publication of this notice in the FEDERAL REGISTER. Any person desiring a hearing on the proposed agreement shall provide a clear and concise statement of the matters upon which they desire to adduce evidence. An allegation of discrimination or unfairness shall be accompanied by a statement describing the discrimination or unfairness with particularity. If a violation of the Act or detriment to the commerce of the United States is alleged, the statement shall set forth with particularity the acts and circumstances said to constitute such violation or detriment to commerce.

A copy of any such statement should also be forwarded to the party filing the agreement (as indicated hereinafter) and the statement should indicate that this has been done.

Notice of agreement filed by:

F. Conger Fawcett, Esq., Graham & James, 310 Sansome Street, San Francisco, CA 94104.

Agreement No. 8660-4, among the member lines of the Latin America/Pacific Coast Steamship Conference, amends Article 2 of the approved conference agreement to provide that the outbound trade from Pacific Coast ports of the United States and Canada to the countries named in Trade Area "A" shall include, with respect to Panama, the full range of ports on the Pacific Coast of Panama, except Panama City, instead of Puerto Armuelles, Republic of Panama, as presently provided in the conference agreement.

Dated: February 7, 1972.

By order of the Federal Maritime Commission.

FRANCIS C. HURNEY,
Secretary.

FEDERAL POWER COMMISSION

[Docket No. R-393]

EXEMPTION OF SMALL PRODUCERS FROM REGULATION

Notice of Availability of Updated List of Small Producer Certificate Applications

FEBRUARY 3, 1972.

Order No. 428-B, issued July 15, 1971 (36 F.R. 13382), listed all small producers who received small producer certificates or who had applications pending as of April 30, 1971. The order stated that from time to time the list would be updated.

Notice is hereby given that an updated list of small producer certificate applications filed with the Commission through October 21, 1971, and the disposition thereof, if any, is available for inspection and copying in the Commission's Office of Public Information, 441 G Street NW., Washington, DC.

KENNETH F. PLUMB,
Secretary.

[FR Doc.72-2057 Filed 2-10-72;8:47 am]

[Docket No. RP72-104]

CONSOLIDATED GAS SUPPLY CORP.

Notice of Rate Increase

FEBRUARY 4, 1972.

Take notice that on January 31, 1972, Consolidated Gas Supply Corp. (Consolidated) tendered for filing as a part of its FPC Gas Tariff revised tariff sheets and proposed that they become effective March 17, 1972. Consolidated states (1) that the proposed rates constitute an increase of approximately $20 million in presently effective jurisdictional rates based upon its cost-of-service study for a base period of 12 months ending September 30, 1971, as adjusted; (2) that the operating costs incurred during the base period have been adjusted primarily for annualization of increased costs of purchased gas, including tracking increases which became effective through January 22, 1972; and (3) that the cost of service in this filing reflects the adjustments made in Docket No. RP71-77 to the company's annual depreciation rates. Consolidated also proposes, among other things, a purchased gas adjustment provision. Consolidated represents that the proposed increased rates are consistent with the President's antiinflation program and with the applicable provisions of the Economic Stabilization Act and the regulations of the Price Commission.

Any person desiring to be heard or to protest said application should file a petition to intervene or protest with the Federal Power Commission, 441 G Street NW., Washington, DC 20426, in accordance with §§ 1.8 or 1.10 of the Commission's rules of practice and procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before February 25, 1972. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. The company's application is on file with the Commission and available for public inspection.

MARY B. KIDD,
Acting Secretary.

[FR Doc.72-2047 Filed 2-10-72;8:46 am]

[Docket No. E-7704]

ELECTRIC AND WATER PLANT BOARD, FRANKFORT, KY., AND KENTUCKY UTILITIES CO.

Order Accepting Complaint and Prescribing Hearing Procedures

JANUARY 26, 1972.

On December 20, 1971, the Electric and Water Plant Board of the city of Frankfort, Ky. (Frankfort), filed a petition to intervene in the matter of Kentucky Utilities Co. (applicant), Docket No. E-7677 which involves an application to issue short term promissory notes and commercial paper pursuant to section 204 of the Federal Power Act.

Frankfort's petition to intervene in the proceeding alleged that applicant is violating antitrust laws by refusing to enter into pooling operations with Frankfort similar to those operations it has with other parties.

More specifically Frankfort's petition to intervene sets forth the following allegations:

That Frankfort has been actively seeking to enter into the generation business to provide generating capacity to serve its own loads. Because of the technology and economics, Frankfort's entry into the electric power industry is feasible only if it can participate with other utilities in regional planning and construction of generating and transmission facilities, and in regional interconnections and sharing of reserves. To meet those goals discussions were held in 1970 and early 1971 between Frankfort and East Kentucky Rural Electric Cooperative (East Kentucky). Frankfort further alleges that those discussions ceased abruptly in early 1971, and that it is Frankfort's understanding that East Kentucky stopped its negotiations with Frankfort because of opposition by applicant in conjunction with proposals concerning coordination made by applicant to East Kentucky, including East Kentucky's admission into the Kentucky-Indiana Power Pool.

In addition, it is alleged that applicant is unlawfully attempting to monopolize the generation, transmission and bulk supply of electric power and energy in the area of Frankfort and to keep Frankfort a captive, all-requirements customer of applicant by refusing to enter into the same type of joint planning, coordination, and pooling agreement with Frankfort as it has with others, by refusing to even discuss with Frankfort the possibility of Frankfort's entry into the generation and transmission business, and by apparently preventing others from joint planning of generation and transmission with Frankfort. Frankfort claims such actions are anticompetitive.

Frankfort requests that it be admitted as a full party to the proceeding; that the application for authorization be set for hearing; that any authorization granted be expressly conditioned upon applicant's cessation of anticompetitive practices; and that the Commission take such other action herein as it may deem appropriate.

On January 4, 1972, applicant answered Frankfort's petition to intervene denying Frankfort's allegations concerning anticompetitive behavior. The applicant requests that Frankfort's petition be denied in all respects, but without prejudice to Frankfort's continuing right at any time to file a complaint sufficient to warrant Commission consideration.

Upon review of Frankfort's petition to intervene and applicant's reply thereto

and in accordance with our order issued simultaneously herewith in Docket No. E–7677, it is our view that the matter raised by Frankfort should be treated as a complaint under section 306 of the Federal Power Act so that Frankfort can have the opportunity to present evidence in support of their allegations. Accordingly the above-mentioned petition to intervene and the answer of applicant will be treated as a complaint and answer thereto, respectively, and a public hearing will be held in order to afford all parties an opportunity to present evidence on the issues raised therein.

At such a hearing, Frankfort shall have the burden of proving that the applicant has engaged in anticompetitive conduct, that such acts and practices of applicant are continuing or are likely to continue, and to what extent the Commission has jurisdiction to remedy such acts and practices.

The Commission finds:

(1) It is necessary and appropriate in the proper exercise of the Commission's responsibilities under the Federal Power Act that the above-described issues raised by Frankfort in their petition filed in Docket No. E–7677 be investigated in the context of a complaint proceeding to determine what relief, if any, may be granted by the Commission under Part II of the Federal Power Act.

(2) The expeditious disposition of this proceeding will be furthered by the submission of prepared testimony and exhibits by Frankfort in support of their allegation on or before March 6, 1972.

(3) The expeditious disposition of this proceeding will be further effectuated by holding a hearing on March 28, 1972.

The Commission orders:

(A) Pursuant to the authority of the Federal Power Act, particularly sections 202, 306, and 307 thereof and the Commission's rules of practice and procedure, an investigation is hereby instituted to determine the justification of the petition to intervene by Frankfort and, if necessary, to prescribe such relief as is appropriate within the boundaries of the Federal Power Act.

(B) Any person desiring to be heard or to make any protest with reference to the matters presented in this proceeding should, on or before February 16, 1972, file with the Federal Power Commission, Washington, D.C. 20426, petitions to intervene or protest in accordance with the requirements of the Commission's rules of practice and procedure (18 CFR 1.8 or 1.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Persons wishing to participate as a party in any hearing herein must file petitions to intervene in accordance with the Commission's rules.

(C) Frankfort shall file with the Commission and serve on all parties to the proceeding, including the staff of the Commission, direct testimony and exhibits in support of its allegations on or before March 6, 1972.

(D) A public hearing on the issues presented will be held in a hearing room of the Federal Power Commission, 441 G Street NW., Washington, DC, commencing at 10 a.m. e.s.t., on March 28, 1972.

[SEAL] KENNETH F. PLUMB,
Secretary.

[Docket No. E–7701]

MISSOURI POWER & LIGHT CO.

Notice of Proposed Changes in Rates and Charges

FEBRUARY 3, 1972.

Take notice that on January 17, 1972, Missouri Power and Light Co. tendered for filing in Docket No. E–7701 changes in its electric service rates to the cities of Owensville, Centralia, Perry, Kahoka, and Linneus, Mo. The proposed rate change would increase revenues from each of the cities in the amount of 6½ percent annually as follows:

City of Owensville	$3,678.67
City of Linneus	823.88
City of Perry	1,773.96
City of Centralia	8,184.84
City of Kahoka	2,225.26

Missouri Power also proposes a new service agreement relating to its electric service to Linneus, Mo.

Any person desiring to be heard or to protest said application should file a petition to intervene or protest with the Federal Power Commission, 441 G Street NW, Washington, DC 20426, in accordance with §§ 1.8 and 1.10 of the Commission's rules of practice and procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before February 25, 1972. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. The Company's application is on file with the Commission and available for public inspection.

KENNETH F. PLUMB,
Secretary.

[FR Doc.72–2058 Filed 2–10–72;8:47 am]

[Dockets Nos. CP72–47, CP72–88]

NATURAL GAS PIPELINE COMPANY OF AMERICA

Order Consolidating Proceeding, Granting Interventions, and Setting Procedure and Dates for Formal Hearing

FEBRUARY 4, 1972.

On August 30, 1971, Natural Gas Pipeline Company of America (applicant) filed in Docket No. CP72–47 an application pursuant to section 7(c) of the Natural Gas Act for a certificate of public convenience and necessity authorizing applicant to transport and sell 21,730 Mcf of additional natural gas per day for a 2 year period beginning on the date authorization is received and delivery can begin. Applicant also seeks authorization to construct and operate facilities for the receipt and gasification of ethane and propane from which the additional volumes are to be secured, all as more fully set forth in the application. Applicant proposes to purchase the needed ethane and propane from Phillips Petroleum Co.

On September 29, 1971, applicant filed in Docket No. CP72–88 an application pursuant to section 7(c) of the Act for a certificate of public convenience and necessity authorizing (1) transportation and sale of 6,450 Mcf of natural gas per day commencing on the date of initial delivery and through September 30, 1973, (2) construction and operation of facilities to receive and inject propane and ethane from which the additional volumes will be secured, and (3) abandonment of such facilities upon expiration of the term of the certificate, all as more fully set forth in the application. Applicant proposes to purchase the needed ethane and propane from Mobil Oil Corp.

Applicant seeks authorization to use the above-mentioned volumes to provide increased daily demand quantities to its customers during winter period. During summer off-peak seasons, the gas will be used to increase the applicant's total gas supply. Thus, the increased volumes resulting from the gasification of these liquids would, during off-peak periods, be used to reduce curtailment. We note that there exists an interrelationship between the two above-described proceedings and conclude that their disposition would be best accomplished in a consolidated proceeding.

Mobil Oil Corp. has filed in Docket No. CP72–88 a petition for the issuance of a declaratory order to the effect that the sale of light hydrocarbon liquids under the circumstances involved in these proceedings is not subject to the jurisdiction of the Federal Power Commission. Mobil Oil is a prospective supplier of part of the natural gas liquids involved in the instant applications. It is therefore appropriate that the Mobil Oil petition for a declaratory order be considered in conjunction with the proceedings in Dockets Nos. CP72–47 et al.

Petitions seeking leave to intervene in the proceedings in Docket No. CP72–47 were timely filed by North Shore Gas Co., Iowa Electric Gas Light and Coke Co., the Peoples Gas Light and Coke Co., Northern Illinois Gas Co., Illinois Power Co., Iowa-Illinois Gas and Electric Co., Northern Indiana Public Service Co., Interstate Power Co., Mississippi River Transmission Corp., Humble Oil and Refining Co., United Gas Pipe Line Co., the Members[1] of the Petrochemical Group,

[1] B. F. Goodrich Chemical Co.; Celanese Corp.; Chemplex Co.; Dart Industries, Inc.; The Dow Chemical Co.; E. I. du Pont de Nemours and Co.; Ethyl Corp.; Hercules Inc.; Marbon Chemical Division; Borg-Warner Corp.; Olin Corp.; Sinclair-Koppers Co.; Texas Eastman Co., Division of Eastman Kodak Co.; Union Carbide Corp.

Iowa Southern Utilities Co., Phillips Petroleum Co., and Texaco, Inc.

Seeking leave to intervene in Docket No. CP72–88 are Humble Oil and Refining Co., The Peoples Gas Light and Coke Co., Iowa-Illinois Gas and Electric Co., Mobil Oil Corp., Mississippi Power Transmission Corp., Texaco, Inc., Northern Indiana Public Service Co., the Members[3] of the Petrochemical Group, the Northern Illinois Gas Co., and the North Shore Gas Co.

The members of the Petrochemical Group have requested that a hearing be held in this matter. In view of this request and of the significant legal and factual issues raised by the applicant's proposals and the petition of Mobil Oil, we are of the opinion that a formal hearing is appropriate herein. All relevant matters bearing on the public interest should be developed on a full evidentiary record.

The Commission finds:

(1) It is necessary and appropriate that the above-mentioned applications be consolidated for hearing and decision. The petition of Mobil Oil Corp., should be considered in conjunction with the consolidated proceeding.

(2) It is desirable to allow the above-named petitioners to intervene in these proceedings.

The Commission orders:

(A) Each of the above-named petitioners is permitted to intervene in these proceedings subject to the rules and regulations of the Commission: *Provided, however,* That the participation of such intervenors shall be limited to matters affecting asserted rights and interests specifically set forth in the petitions to intervene: *And provided, further,* That the admission of such intervenors shall not be construed as recognition by the Commission that they or any of them might be aggrieved by any order or orders entered in these proceedings.

(B) The above-designated matters are consolidated for the purposes of hearing and decision. The petition of Mobil Oil Corp., shall be considered in conjunction with these consolidated proceedings.

(C) The direct case of Natural Gas Pineline Company of America and all supporting intervenors shall be filed and served on all parties including the Commission and its staff on or before February 22, 1972.

(D) A formal hearing shall be convened in these proceedings entitled Natural Gas Pipeline Company of America, CP72–47 et al., in a hearing room of the Federal Power Commission, 441 G Street NW., Washington, DC, on March 6, 1972 at 10 am., e.s.t. The Chief Examiner will designate an appropriate officer of the Commission to preside at the formal hearing on these matters, pursuant to the Commission's rules of practice and procedure.

By the Commission.

[SEAL] MARY B. KIDD, *Acting Secretary.*

[FR Doc.72–2048 Filed 2–10–72;8:46 am]

[3] See footnote 1, supra.

[Docket No. RP72–96]

NORTHERN NATURAL GAS CO.

Order Suspending Proposed Revised Tariff Sheets, Consolidating Proceedings and Permitting Interventions

JANUARY 26, 1972.

Northern Natural Gas Co. (Northern), on December 27, 1971, filed proposed revised tariff sheets[1] to its FPC Gas Tariff which would increase charges to Northern's jurisdictional customers by $2,097,281 annually, to be effective January 27, 1972. The purpose of the increase is to track increases in Northern's purchased gas costs which are attributable principally to producer price increases incurred after the test period in Northern's general rate increase proceeding in Docket No. RP71–107.

Northern claims that since its last rate increase filing in Docket No. RP71–107 it has experienced increases in its cost of purchased gas due largely to increases in producer prices. These increases result in a unit cost of purchased gas of 16.85 cents per Mcf at 14.65 p.s.i.a., an increase of 0.30 cent per Mcf over the 16.55 cents per Mcf at 14.65 p.s.i.a., the weighted average system unit cost of purchased gas reflected in Northern's rates in Docket No. RP71–107. Northern agrees to refund any savings in cost of gas purchased where the actual average cost of gas experienced during the year or a portion thereof, is less than 16.85 cents per Mcf at 14.65 p.s.i.a.

Petitions to intervene were filed by Iowa Public Service Co., Michigan Wisconsin Pipeline Co., Minnesota Natural Gas Co., Central Telephone and Utilities Corp., Minneapolis Gas Co., Metropolitan Utilities District of Omaha and Northern States Power Co. (Minnesota) and Northern States Power Co. (Wisconsin). Notices of intervention were filed by the Iowa State Commerce Commission and the Suburban Rate Authority (representing municipalities in the State of Minnesota). Several of the petitioners move to reject Northern's filing as being duplicative of cost included in Docket No. RP71–107 and alternatively request suspension of Northern's filing for the maximum period permitted Under the Natural Gas Act and that formal hearing be ordered.

Our review of the petitioners' requests for rejection indicate that they have not shown sufficient reasons for rejection of Northern's filing. However, in view of the issues they have raised and the fact that Northern has no specified tracking authority we shall suspend Northern's tracking filing for 1 day and consolidate it with Northern's general rate increase proceeding in Docket No. RP71–107.

The Commission finds:

(1) It is necessary and proper in the public interest and to aid in the enforcement of the provisions of the Natural Gas Act that the Commission suspend Northern's proposed revised tariff sheets contained in footnote 1 above pending determination of the lawfulness of the rates and charges contained therein.

(2) The participation of the above-named parties in these proceedings, as herein consolidated, may be in the public interest.

The Commission orders:

(A) Northern's proposed revised tariff sheets contained in footnote 1 are hereby suspended and the use thereof is deferred until January 28, 1972, at which time they shall become effective subject to refund.

(B) Northern shall flow through any refunds and rate reductions ordered in Docket No. RP71–107 and Docket No. RP72–96.

(C) The above-named petitioners are hereby permitted to intervene in this proceeding, subject to the rules and regulations of the Commission: *Provided, however,* That the participation of such interveners shall be limited to matters affecting rights and interests specifically set forth in the respective petitions to intervene: *And provided, further,* That the admission of such interveners shall not be construed as recognition that they or any of them might be aggrieved because of any order or orders issued by the Commission in this proceeding.

(D) Docket No. RP72–96 is consolidated with the proceeding in Docket No. RP71–107.

By the Commission.

[SEAL] KENNETH F. PLUMB, *Secretary.*

[FR Doc.72–2059 Filed 2–10–72;8:47 am]

[1] First Revised Sheets Nos. 27b, 29b; Second Revised Sheets Nos. 16, 21, 26, and 37.

[Docket Nos. RP70–29, etc.]

TEXAS EASTERN TRANSMISSION CORP.

Order Accepting Some Revised Tariff Sheets, and Providing for Hearing and Suspending Other Proposed Revised Tariff Sheets

FEBRUARY 4, 1972.

On August 6, 1971, Texas Eastern Transmission Corp. (Texas Eastern) tendered for filing a proposed change in rates, to become effective on September 20, 1971, reflecting the inclusion in rate base of a $10,500,000 advance payment made to its subsidiary, Texas Eastern Exploration Co., for exploration, including lease acquisition costs, development and production of gas in 11 Federal offshore oil and gas leases in the Vermillion Area, Offshore Louisiana. Such filing was made in accordance with Article V of the settlement agreement in this proceeding, approved by Commission order issued March 24, 1971. No objection was filed to the proposed change in rates.

Commission Order 410–A reserved for decision in Docket No. R–411 the question of the proper rate treatment to be afforded advances by pipelines to their affiliates for exploration and lease acquisition. In Order No. 441 we indicated that advance payments for exploration and lease acquisition made pursuant to contracts executed after the issuance of

that order would not be accorded rate base treatment. In that Docket we did not resolve the question of rate treatment for advance payments to affiliates for lease acquisition and exploration. We find no reason to treat a pipeline affiliated producer any differently than an independent producer with respect to such advance payments. The instant filing reflects such advances under contract executed prior to the issuance of Order No. 441. Accordingly, it is appropriate to include these advance payments in rate base.

On August 13, 1971, Texas Eastern tendered for filing a proposed change in rates to become effective on September 27, 1971, reflecting the inclusion in rate base of a $7,200,000 advance payment for gas made by the company to its subsidiary, Texas Eastern Gas Supply Co. (Supply Company). The $7,200,000 is the amount advanced thus far by Supply Company to Mobil Oil Company Canada, Ltd. for exploratory drilling activities currently being conducted in the Sable Island Area, Offshore Nova Scotia, Canada. On September 24, 1971, the Commission staff filed an objection to the inclusion of such payment in rate base and requested that the proposed tariff sheets be suspended for 1 day, be made subject to refund, and that a hearing be held to determine whether such payment is in compliance with Orders 410 and 410–A. Texas Eastern filed a response to staff's objection on October 4, 1971, stating that there is nothing in Order 410 and 410–A to indicate that such a payment cannot be included in rate base and requesting the Commission to allow the proposed rates to becomes effective without suspension. In answers to Texas Eastern's response the Public Service Commission of New York and the Algonquin Customer Group support staff's objection and contend that the language of Article V of the aforesaid stipulation and agreement requires the suspension of the rate change and the ordering of a hearing since the reasonableness of the advance payment has been questioned.

Article V of the stipulation and agreement clearly indicates that if an objection is filed to any filing made pursuant to that article, the filing will be suspended for 1 day and hearing ordered thereon.

The Commission finds:

(1) It is necessary and proper in the enforcement of the provisions of the Natural Gas Act that:

(a) The proposed revised tariff sheets tendered by Texas Eastern on August 6, 1971, be accepted for filing as hereinafter ordered.

(b) The Commission enter upon a hearing concerning the lawfulness of the rates and charges contained in Texas Eastern's FPC Gas Tariff as proposed to be amended by the filing of August 13, 1971; that the proposed tariff sheets listed below be suspended and the use thereof be deferred as herein provided; and the disposition of this proceeding be expedited in accordance with the procedures set forth below.

(2) In view of all the facts and circumstances in this case, the Commission's action herein of permitting the rates tendered on August 6, 1971, to become effective and permitting the increased rates tendered on August 13, 1971, to become effective, subject to refund, after expiration of the suspension period ordered herein pending Commission determination of the justness and reasonableness of such increased rates, is consistent with the Economic Stabilization Act of 1970, as amended, and regulations existing thereunder.

The Commission orders:

(A) The proposed revised tariff sheets tendered for filing by Texas Eastern on August 6, 1971, are accepted and permitted to become effective as of 12:01 a.m., November 14, 1971.

(B) Pursuant to the authority of the Natural Gas Act, particularly sections 4 and 15 thereof, the Commission's rules of practice and procedure, and the Regulations under the Natural Gas Act (18 CFR, Chapter I), a public hearing be held for the purpose of cross examination of prepared testimony on March 21, 1972, at 10 a.m., e.s.t., in a hearing room of the Federal Power Commission, 441 G Street NW., Washington, DC 20426, concerning the lawfulness of the rates and charges contained in Texas Eastern's FPC Gas Tariff, as proposed to be amended by Texas Eastern's filing of August 13, 1971.

(C) Pending such hearing and decision thereon Texas Eastern's proposed tariff sheets tendered on August 13, 1971, identified below, are suspended and the use thereof is deferred until 12:01 a.m., November 15, 1971.

(D) The provisions of § 154.67(a) of the regulations under the Natural Gas Act are waived in order to allow Texas Eastern's proposed increased rates to become effective on November 15, 1971, upon the filing by Texas Eastern of the appropriate motion under section 4(e) of the Natural Gas Act.

(E) Texas Eastern shall file the agreement and undertaking required by § 154.67(d) of the regulations under the Natural Gas Act within 15 days from the date of issuance of this order.

(F) On or before March 3, 1972, Texas Eastern, any intervenors, and the Commission staff shall serve prepared testimony and exhibits concerning the necessity, reasonableness, and appropriateness of the subject advance payment and the lawfulness of the rates contained in Texas Eastern's filing of August 13, 1971.

(G) A presiding Examiner to be designated by the Chief Examiner for that purpose (see Delegation of Authority, 18 CFR 3.5(d)) shall preside at the hearing in this proceeding; shall prescribe relevant procedural matters not herein provided, and shall control this proceeding in accordance with the policies expressed in § 2.59 of the Commission's rules of practice and procedure.

By the Commission.

[Project 1968]

WISCONSIN PUBLIC SERVICE CORP.

Notice of Application for License for Constructed Project

FEBRUARY 4, 1972.

Public notice is hereby given that application for new minor license has been filed under the Federal Power Act (17 U.S.C. 791a–825r) by Wisconsin Public Service Corp. (correspondence to Mr. C. A. McKenna, Secretary, Wisconsin Public Service Corp., 1029 North Marshall Street, Milwaukee, WI 53201), for its constructed Hat Rapids Project No. 1968, located in Oneida County, Wis., near the cities of Rhinelander and Wausau, on the Wisconsin River. The project affects navigable rivers of the United States.

The existing Hat Rapids Project, operated as a run-of-the-river project, consists of (1) a dam about 22 feet high and 1,006 feet long, comprised of two powerhouse sections, one 60 feet long, the other 32 feet long, a 90-foot long spillway section containing four tainter gates 10 feet wide and 18 feet high and a tainter gate 8 feet wide and 18 feet high, and two flanking earth fill dikes 224 feet long on the west side and 600 feet long on the east side, (2) a reservoir which extends about 4½ miles upstream, (3) two powerhouses integral with the dam containing three generating units having an aggregate capacity of 1,440 kw., (4) an outdoor substation, and (5) all other facilities and interests appurtenant to operation of the project.

According to the application: (1) The estimated net investment is $116,000, which is less than its estimated fair value, (2) the estimated severance damages in the event of "takeover" are $50,000, and (3) the annual taxes paid to State and local governments are estimated to be about $5,000.

Applicant states that because the area near the project abounds in good lakes and streams, development of recreational facilities has been located elsewhere. However, one access area to the reservoir near the damsite has been provided, and project lands owned in fee are available for hiking and hunting. No further recreational development is proposed or contemplated by the State, local groups, or the applicant at this time.

Any person desiring to be heard or to make any protest with reference to said application should on or before March 16, 1972, file with the Federal Power Commission, in accordance with the requirements of the Commission's rules of practice and procedure (18 CFR 1.8 or 1.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Persons wishing to become parties to a proceeding or to participate as a party in any hearing therein must file petitions to intervene in accordance with the Commission's rules. The application is on file with the Commission and available for public inspection.

MARY B. KIDD,
Acting Secretary.

Notice of Applications for Unlisted Trading Privileges and of Opportunity for Hearing

FEBRUARY 7, 1972.

In the matter of application of the Philadelphia - Baltimore - Washington Stock Exchange for unlisted trading privileges in certain securities.

The above-named national securities exchange has filed applications with the Securities and Exchange Commission pursuant to section 12(f)(1)(B) of the Securities Exchange Act of 1934 and Rule 12f-1 thereunder, for unlisted trading privileges in the warrants to purchase common stock of the following companies, which securities are listed and registered on one or more other national securities exchanges:

	File No.
City Investing Co., warrants to Purchase General Development Corp. Common Stock	7-4091
Ryder System, Inc., warrants (expiring August 5, 1975)	7-4105
Tesoro Petroleum Corp., warrants (expiring August 24, 1976)	7-4107

Upon receipt of a request, on or before February 22, 1972 from any interested person, the Commission will determine whether the application with respect to any of the companies named shall be set down for hearing. Any such request should state briefly the title of the security in which he is interested, the nature of the interest of the person making the request, and the position he proposes to take at the hearing, if ordered. In addition, any interested person may submit his views or any additional facts bearing on any of the said applications by means of a letter addressed to the Secretary, Securities and Exchange Commission, Washington, D.C. 20549 not later than the date specified. If no one requests a hearing with respect to any particular application, such application will be determined by order of the Commission on the basis of the facts stated therein and other information contained in the official files of the Commission pertaining thereto.

For the Commission (pursuant to delegated authority).

[SEAL] RONALD F. HUNT, *Secretary.*

PRICE COMMISSION

PUBLIC UTILITIES AND PUBLIC BENEFIT CORPORATIONS

Public Hearings and Temporary Suspension of Rate Increases

Notice is hereby given that the Price Commission will hold public hearings on February 22, 24, 25, and 26, 1972, on the subject of the Commission's rules governing price increases by public utilities and public benefit corporations.

The hearings will be held in the auditorium of the U.S. Civil Service Commission, 1900 E Street NW., Washington, DC. It is contemplated that a member of the Commission will preside at the hearings.

The Commission is not proposing any particular modifications to the current regulations applicable to public utilities and public benefit corporations. The purpose of the public hearings is to provide an effective forum for persons who wish to propose such changes which will enable the Commission, in cooperation with Federal, State, and local regulatory agencies, to achieve the goals of the Economic Stabilization Act of 1970, as amended, more effectively and with a minimum of burden on the Commission, the regulatory agencies and the public utilities and public benefit corporations which are subject to the Commission's regulations.

The public hearings hereby scheduled reflect the Commission's intention to comport with the stated desire of Congress (section 207 of the Economic Stabilization Act of 1970, as amended) for public hearings on matters which have a significantly large impact upon the national economy.

Any person who has a substantial interest in the subject of the hearings, or who is representative of a group or class of persons which has a substantial interest in the subject of the hearings, may submit, on or before February 16, 1972, a written request to make an oral presentation. Any such written request should include a description of the substantial interest concerned; if appropriate, a statement of why the requesting person is a proper representative of a group or class of persons which has such an interest; and a concise summary of the proposed oral presentation. Oral presentations may be supplemented by written submissions filed with the Commission before or immediately after the oral presentation. The Commission reserves the right to select the persons to be heard at the hearings, to schedule and determine the length of their respective presentations, and to establish the procedures governing the conduct of the hearings. Except in extraordinary circumstances, no oral presentations will be allowed to last more than 1 hour. In addition, the Commission requests all other interested persons to submit written suggestions and comments on the subject for Commission consideration.

In order to allow time for any changes in the Commission's regulations which may result from these public hearings to be effective on the large number of public utility price increases which might otherwise go into effect before the changes are implemented, the Commission hereby decides, and orders, that all price increases by privately owned public utilities which were not legally in effect on February 9, 1972, are prohibited until the Commission implements the changed regulations, if any, or until March 10, 1972, which ever first occurs.

The time limit for review or other action by the Commission on any public utility or public benefit corporation price increase which has not elapsed by February 10, 1972, and on any public utility or public benefit corporation price increase to which the suspension of the preceding paragraph applies, is hereby extended to March 25, 1972, or to 15 days after the Commission issues modifications, if any, to its public utility regulations resulting from these hearings, whichever first occurs. The price increases to which this extension of time applies include those covered by Price Commission Decision, "Final Action on Rate Increases Reported Prior to January 17, 1972," published in the FEDERAL REGISTER on February 8, 1972 (37 F.R. 2859).

The suspension of price increases under this order does not apply to price increases to which § 300.16(c) of the current Commission regulations applies or to which this section would have applied had it been in effect earlier.

The Price Commission will consider written requests for exceptions to this suspension of price increases which are based upon good cause shown, such as gross inequity or extreme hardship.

All written submissions, requests to make an oral presentation, and requests for exceptions should be sent to the Price Commission, 2000 M Street NW., Washington, DC 20508.

Issued in Washington, D.C., on February 10, 1972.

C. JACKSON GRAYSON, JR.,
Chairman, Price Commission.

[Notice 14]

MOTOR CARRIER TRANSFER PROCEEDINGS

FEBRUARY 8, 1972.

Synopses of orders entered pursuant to Section 212(b) of the Interstate Commerce Act, and rules and regulations prescribed thereunder (49 CFR Part 1132), appear below:

As provided in the Commission's special rules of practice any interested person may file a petition seeking reconsideration of the following numbered proceedings within 20 days from the date of publication of this notice. Pursuant to section 17(8) of the Interstate Commerce Act, the filing of such a petition will postpone the effective date of the order in that proceeding pending its disposition. The matters relied upon by petitioners must be specified in their petitions with particularity.

F. D. No. 26788. By order of January 31, 1972, the Motor Carrier Board approved the transfer to Jim Zanelli and Doris Zanelli, doing business as Hell's Canyon Navigation, Box 145, Oxbow, OR 97840, of the operating rights in the third amended certificate and order issued July 2, 1970, in Nos. W-1014 and W-1014 (Sub-No. 1) to Helen Stubblefield Elliott and Oscar J. Elliott, doing business as Hell's Canyon Navigation, 715 North Sixth Street, Payette, ID 83661, authorizing operations as a common carrier by self-propelled vessels, in interstate or foreign commerce, in the transportation of passengers and their baggage, from and to points along the Snake River, (1) northbound, between Weiser and Granite Creek, Idaho, and from those points except Granite Creek, to Lewiston, Idaho, and (2) southbound, between Kinney Creek Rapids and Home, Oreg., inclusive.

No. MC-FC-73370. By order of January 31, 1972, the Motor Carrier Board approved the transfer to Mary Lee Tours, Inc., Latrobe, Pa., of Broker License No. MC-12833 issued June 1, 1964, to Mary H. Lee, doing business as Mary Lee Tours, Latrobe, Pa., authorizing the holder thereof to engage in operations as a broker at Latrobe, Pa., in arranging for the transportation of: Passengers and their baggage in charter and special operations, beginning and ending at points in specified counties in Pennsylvania and extending to points in the United States, including Alaska and Hawaii. Charles J. Williams, attorney, 47 Lincoln Park, Newark, NJ 07102.

No. MC-FC-73424. By order of February 3, 1972, the Motor Carrier Board approved the transfer to Dominic A. Shippole, doing business as Star Motor Lines, Salisbury, Crag., Worcester, Mass., of certificates Nos. MC-56276 and MC-56276 (Sub-No. 1), issued September 22, 1949, and September 25, 1953, to Star Motor Lines, Inc., 22 Church Street, Auburn, MA, authorizing the transportation of: Steel and steel products, between Worcester, Mass., and points in Rhode Island and Connecticut, in a radial movement; to New York, N.Y., and points within 35 miles thereof in New Jersey, and specified points in Pennsylvania.

No. MC-FC-73437. By order of January 31, 1972, the Motor Carrier Board approved the transfer to Donald L. Harsh, doing business as Harsh Transfer, Rock Falls, Wis., of the operating rights in certificate No. MC-79073 issued August 8, 1962, to Bushendorf Transfer, Inc., Eau Claire, Wis., authorizing the transportation of livestock, between Eau Claire, Wis., and points in the towns of Colfax, Elk Mound, Spring Brook, and Dunn, Dunn County, Wis., the towns of Union and Seymour, Eau Claire County, Wis., and points in the towns of Wheaton, Howard, Tilden, Cooks Valley, Woodmohr, Hallie, and Eagle Point, Chippewa County, Wis., on the one hand, and, on the other, South St. Paul and Newport, Minn.; flour, feed, seed, meat scraps, fertilizer, and groceries, from South St. Paul, Newport, St. Paul, and Minneapolis, Minn., to Eau Claire, Wis.; and feed, seed, fertilizer, glassware, livestock, and agricultural commodities, between Osseo, Wis., and points in the town of Wheaton, Chippewa County, Wis., and the towns of Union, Washington, Fairchild, and Brunswick, Eau Claire County, Wis., on the one hand, and, on the other, South St. Paul, Newport, Minneapolis, and St. Paul, Minn. A. R. Fowler, registered practitioner, 2288 University Avenue, St. Paul, MN 55114, representative for applicants.

No. MC-FC-73444. By order of January 31, 1972, the Motor Carrier Board approved the transfer to T. Connell Piano Movers, Inc., Brooklyn, N.Y., of the operating rights in certificate No. MC-119341 issued February 3, 1960, to Terence Connell, Jr., doing business as Terence Connell—Mover, Brooklyn, N.Y., authorizing the transportation of uncrated pianos, from New York, N.Y., to points in Connecticut, New York, New Jersey, and Pennsylvania within 150 miles of the City Hall, New York, N.Y. and, on return, uncrated shipments of damaged, rejected, repossessed, or second-hand trade-in pianos. Stephen B. Schneider, 101 West 30th Street, New York, NY 10001, attorney for applicants.

No. MC-FC-73450. By order of January 31, 1972, the Motor Carrier Board approved the transfer to B. & S. Truck Line, Inc., Wichita, Kans., of the operating rights in certificates Nos. MC-107180 and MC-107180 (Sub-No. 1) issued June 16, 1949, and August 11, 1950, respectively to O. J. Gray, Potwin, Kans., authorizing the transportation of various commodities from, to and between specified points and areas in Kansas, Missouri, Arkansas, Colorado, Nebraska, Oklahoma, and Texas. Clyde N. Christey, 641 Harrison Street, Topeka, KS 66603, attorney for applicants.

are hereby modified and/or superseded as set forth below. Supersedeas decision numbers are in parentheses following the number of the decision being superseded.

These modification and/or supersedeas decisions are based upon information obtained concerning changes in prevailing hourly wage rates and fringe benefit payments since these determinations were issued.

The determinations of prevailing rates and fringe benefits made in these modifications and/or supersedeas decisions have been made by authority of the Secretary of Labor pursuant to the provisions of the Davis-Bacon Act of March 3, 1931, as amended (46 Stat. 1494, as amended, 40 U.S.C. 276a) and of other Federal statutes referred to in 29 CFR 1.1 (including the statutes listed at 36 F.R. 306 following Secretary of Labor's Order No. 24–70) containing provisions for the payment of wages which are dependent upon determinations by the Secretary of Labor under the Davis-Bacon Act; and pursuant to the provisions of Part 1 of Subtitle A of Title 29 of Code of Federal Regulations, Procedure for Predetermination of Wage Rates, and of Secretary of Labor's Orders 13–71 and 15–71 (36 F.R. 8755, 8756). The prevailing rates and fringe benefits determined in the foregoing area wage determination decisions, as hereby modified, and/or superseded shall, in accordance with the provisions of the foregoing statutes, constitute the minimum wages payable on Federal and federally assisted construction projects to laborers and mechanics of the specified classes engaged in contract work of the character and in the localities described therein.

The modification and/or supersedeas decisions are effective from their date of publication in the FEDERAL REGISTER until the end of the period for which the determinations being modified and/or superseded were issued and are to be used in accordance with the provisions of 29 CFR Part 5.

Any person, organization, or governmental agency having an interest in the wages determined as prevailing is encouraged to submit wage rate information for consideratiaon by the Department. Further information and self-explanatory forms for the purpose of submitting this data may be obtained by writing to the U.S. Department of Labor, Employment Standards Administration, Wage and Hour Division, Division of Wage Determinations, Washington, D.C. 20210. The cause for not utilizing the rule-making procedures prescribed in 5 U.S.C. No. 553 is set forth in the document being modified.

The modification and/or supersedeas decisions to the area wage determination decisions listed above are set forth below.

Signed at Washington, D.C., this 4th day of February 1972.

HORACE E. MENASCO,
Administrator, Employment Standards Administration.

Power equipment operators:						
Group I:						
Bit grinders; bolt threading machine; brakeman; compressors, under 2,000 cu. ft. per minute gas, diesel or electric power; crusher feeder (mechanical); deck hand; drillers helper; fireman and heater tender; grade checker; helper (mechanic or welder, H.D.); oiler; oiler and cable tender, mucking machine; pumpman; rollers, all types on subgrade (farm type, Case, John Deere, and similar-or compacting or vibrator) except when pulled by dozer with operable blade; welding machines	6.30	.45	.45		.015	
Group II:						
A-frame truck (single-drum); assistant refrigeration plant (under 1,000 tons); assistant plant operator, fireman or pugmixer (asphalt); bagley or stationary scraper; batch plant and wet mix operator, single unit (concrete); belt finishing machine; bending machine (pipeline); blower operator (cement); cement hog; compressor (2,000 cu. ft. or over, 2 or more—gas, diesel, or electric power); concrete saw (multiple cut); distributor leverman; dope pots (power agitated); equipment serviceman, greaser and oiler; fork lift or lumber stacker, hydra-lift and similar; gin trucks (pipeline); hoist, single drum; loader (bucket elevator and conveyors); longitudinal float; mixer (portable-concrete); pavement breaker; (hydra-hammer and similar); posthoid auger or punch; power broom; railroad ballast regulation operator (self-propelled); railroad power tamper operator (self-propelled); railroad power tamper jack operator (self-propelled); spray curing machine (concrete); spreader box (self-propelled); straddle buggy (Ross and similar on construction job site); tractor (farm type R/T with attachments except backhoe); tugger operator	6.60	.45	.45		0.15	
Group III:						
A-frame truck (2 or more drums); assistant refrigeration p'ant and chiller operator (over 1,000 tons); backfillers (Cleveland and similar); belt-crete conveyors with power pack or similar; belt loader (Kocal or similar); blade operator (motor patrol and attachments); boat operators; boom cats (side); boring machine (earth); boring machine (rock under 8" bit) (Quarry Master, Joy, or similar); bump cutter (Wayne, Saginau or similar); canal lining machine (concrete); chipper (without crane); cleaning and doping machine (pipeline); concrete pumps (squeeze-crete, flow-crete, pump-crete, Whitman and similar); drills (churn, core, calyx, or diamond); elevating belt-type loader (Euclid, Barber Greene, or similar); elevating grader-type loader (Dumor, Adams, or similar); generator plant engineers (diesel electric); gunnite combination mixer and compressor; hoist (2 or more drums or tower hoist); loaders (overhead and front end, under 4 yds. R/T) locomotive engineer; mixermobile; mucking machine; paver (asphalt and concrete); pump (grout or jet); rollerman (finishing pavement); rubber-tired scrapers (one motor with one scraper, under 40 yds.); screed operator; soil stabilizer (P & H or similar); spreader machine; tractor (crawler, including dozer, scraper, drills, booms, rollers, etc.); traverse finishing machine; trenching machines (under 7 ft. depth capacity); turnhead operator	6.85	.45	.45		.015	
Group IV:						
H.D. mechanic; H.D. welder; refrigeration plant engineer (under 1,000 tons); semi-automatic welding machines	6.95	.45	.45		.015	
Group V:						
Asphalt plant operator; crusher and screening plant operator; rubber-tired scrapers multi-engine power with one scraper (Euclid, TS-24 and similar); rubber-tired scraper, one motor with one scraper (40 yds. and over); single engine with two scrapers (LeTourneau, Tandem B, and similar); surface heater and planer machine	7.00	.45	.45		.015	
Group VI:						
Automatic subgrader (ditches and trimmers) (R. A. Hansen and similar); backhoes (under 3 yds.); batch and wet mix operator—multiple units (2 and including 4); chipper (with crane); clamshell operator (under 3 yds.); concrete slip form paver; cranes (under 65 tons); derricks and stifflegs (under 65 tons); draglines (under 3 yds.); drilling equipment (8" bit and over); (Robbins and similar); Hydra-Cranes (Austin, Western, Hydra-Hoe, and similar with attachments); loader operator (front end and overhead, 4 yds. to 8 yds.); multiple dozer unit with single blade; piledriving engineers; paver (dual drum); quad-track or similar equipment; railroad track liner operator (self-propelled); rubber-tired scrapers, multiple engines with two scrapers; refrigeration plant engineer (1,000 tons and over); shovels (under 3 yds.); signalmen (whirleys, highline, hammerheads, or similar); trenching machines (7 ft. depth and over)	7.15	.45	.45		.015	
Group VII:						
Backhoes (3 yds. and over); batch plant (over 4 units); cableway controller-dispatcher; cableway operators; clamshell operator (3 yds. and over); cranes (65 tons and over); derricks and stifflegs (65 tons and over); drag lines (3yds. and over); loader, (360° revolving Koeluring scooper or simlr); loaders (overhead and front end over 8 yds.); rubber-tired scrapers (multiple engine with 3 or more scrapers); shovels (3 yds. and over); tower crane, whirleys, and hammerheads (all)	7.40	.45	.45		.015	
Underground work—Add 10% to the classification. (Not to include open pits, cuts, ditches, trenches, and such work as paving etc.)						
All cranes booms: 130' to 200'—$0.15/hr. additional to classification, over 200'—$0.30/hr. additional to classification.						
Yo Yo dozer: 10% additional.

Building construction:						
Laborers:						
South of Highway No. 20						
Group A:						
Building and construction laborers, scaffold builders other than for mason or plasterers, ironworkers' helpers, mechanic helpers, mechanic tenders, window washers and cleaners, roofers' helpers, railroad laborer, masonry wall washers (interior and exterior), cement finisher helper, carpenter helper, all portable water pumps with discharge up to 3 inches, mason tenders	5.50	.18	$0.25		.07	
Group B:						
Waterproofing, handling of creosote lumber or like treated material (excluding railroad material), asphalt rakers and lutemen, kettlemen, air tool operators, vibrators, chipping hammer operator, and all other pneumatic tool operators, jackmen and sheeting men working in ditches deeper than 6 ft., laborers working in ditches 6 ft. in depth or deeper, assembly of unicrete pump, chain saw operators, tile layers (sewer or field), sewer pipe layers (metallic and nonmetallic), motor-driven wheelbarrows and concrete buggies, hyster opera-pump crete assemblers, conveyor assemblers, core drill operators, cement, lime, or silica clay handlers (bulk or bag), pneumatic spikers, deck, engine and winch operator, water main and cable ducking (metallic and nonmetallic)	5.70	.18	.25		.07	
Group C:						
Plaster tenders, mortar mixers, welders (acetylene or electric), cutting torch or burner, cement nozzle laborers, cement gun operator, scaffold builders when working for plasterer	5.80	.18	.25		.07	
Group D:						
Tunnel work in free air:						
Muckers or tunnel laborers, bottom men, concrete men (bottom), miners and header men	6.10	.18	.25		.07	
Group E:						
Dynamite men	6.50	.18	.25		.07	
Stacks and chimneys:						
Base to 25'—$0.25 per hour over base rate.						
25' to 50'—0.50 per hour over base rate.						
50' to 75'—0.75 per hour over base rate.						
75' to 100'—1.00 per hour over base rate.						
100' to 150'—$1.25 per hour over base rate.						
150' to 200'—1.50 per hour over base rate.						
200' to 250'—1.75 per hour over base rate.						
250' and up—2.00 per hour over base rate.

Laborer, wrecking and demolition; bituminous batcherman (stationary plant); bituminous shoveler; blacksmith helper; bottom man (sewer, water or gas trench); Bricklayer tender; cement handler (bulk or bag); cement coverman (batch trucks); compaction equipment (hand operated); concrete shoveler, tamper and puddler (paving); concrete vibrator; Concrete batcherman (proportioning plant); concrete longitudinal floatmen (manual bull float on paving); conduit layers (w/o wiring); chipping hammer; curb setter (stone or precast concrete); dumper (wagon, truck, etc.); dump man; dump man (paver-batch truck, etc.); formsetter (municipal type curb and sidewalk; formsetter (pavement); hydrant and valve setter; joint filler (concrete pavement); kettleman (bituminous or lead); service connection maker (water or gas); power buggy; joint sawer; squeegeman (bituminous brick or block); stabilizing batcherman (stationary plant); stonemason tender; drill runner (heavy, including churn drill)	5.95	.35	.35	.40		
Chainsaw man; concrete mixer (1 bag); jackhammer man and paving buster; mortar mixer; pipe handler (water, gas, cast iron); pipe derrickman (triped, manual)	6.00	.35	.35	.40		
Bottom man (sewer, water or gas trench, more than 8 ft. below starting level of manual work); tunnel laborer (atmospheric pressure); underground laborers; cofferdam work; tunnel work; underpinning work; caisson work; other work more than 8 ft. below starting level of manual work; open ditch work	6.10	.35	.35	.40		
Bituminous tamper; pipelayer (sewer, water, gas); sand cushion and bed maker	6.15	.35	.35	.40		
Cement gun (1½ in. and over); leadman	6.20	.35	.35	.40		
Nozzlemen (gunite)	6.25	.35	.35	.40		
Brick or block paving setter	6.28	.35	.35	.40		
Bituminous raker, floater and utility man	6.30	.35	.35	.40		
Powderman; tunnel man (air pressure); tunnel miner	6.53	.35	.35	.40		
Site preparation, excavation and incidental paving, heavy and highway construction:						
Power equipment operators:						
Dredge deck hand; gravel screening plant (portable, not crushing or washing); greaser truck and tractor; leverman; mechanic helper; mechanic space heater (temporary heat); oilers (power shovel, crane, dragline)	6.45	.25	.25			
Tractor, 50 hp. or less without power takeoff	6.48	.25	.25			
Batch plant (concrete); brakeman or switchman; conveyor; fireman; tank car heater; self-propelled vibrating packer (pad type) (35 hp. and over); truck crane oiler	6.55	.25	.25			
Air compressor; lead greaser on grease truck or grease rack (where no mechanic is employed)	6.70	.25	.25			
Concrete distributor and spreader; finishing machine; longitudinal float; joint machine; spray operator; concrete saw (multiple blade) (power operated); fine grade operator; form trench digger (power); power actuated jacks; pumps; shouldering machine (power) (Apsco or similar type including self-propelled sand and chip spreader); stump chipper; self-propelled chip spreader (Flaherty or similar); curb machine	6.72	.25	.25			
Bituminous spreader and bituminous finishing machine (helper) (power)	6.80	.25	.25			
Concrete mixer, on job site 14s and under; front end loader, up to and including 1 cu. yd.; gunite operator gunall; loader (Barber Greene or similar type); power actuate augers; boring machine; rollers up to 8 tons; tractor, D2, TD6 or similar hp. w/power takeoff	6.83	.25	.25			
Grader operator (motor patrol)	6.90	.25	.25			
Asphalt bituminous stabilizer plant; automatic road machine (CMI or similar); backfiller; bituminous spreader and finishing machine (power); boom truck (power operated boom); concrete mixer, on jobsite over 14S; crushing plant (gravel and stone); gravel washing, crushing and screening plant; dope machine (pipeline); drill rigs; heavy duty rotary churn or cable drills; engineer in charge of plant requiring first class license; fork lift; straddle carrier; fork lift or lumber stacker (for construction jobsite); front end loader, over 1 cu. yd. up to 5 cu. yds.; launcherman (tankerman or pilot license); Locomotives, all types; mechanic or welder; Hoist engineer (power); paving breaker or tamping machine (power driven) (Mighty Mite or similar type); power actuated horizontal boring machines over 6″ operator; pickup sweeper, 1 cu. yd. and over hopper cap.; pipeline wrapping cleaning or bending machine; power plant engineer 100 kw.-hr. and over; pugmill; rollers 8 tons and over; rubber tired tractor backhoe attachs.; sheep foot roller (self-propelled) (3 drum and over); slip form (power driven) (paving); tie tamper and ballast machine tractor, over D2, TD6 or similar h.p. with power takeoff; tractor, over 50 h.p. without power takeoff; trenching machine (sewer, water, gas); turnapull (or similar type); well point installation dismantling or repair mechanics; two or more pumps; compressors; welding machines	7.48	.25	.25			
Self-propelled traveling soil stabilizer	7.55	.25	.25			
Dual tractor; elevating grader; pumpcrete; scraper struck capacity 32 cu. yds. and over	7.58	.25	.25			
Cableway; concrete mixer stationary plant over 34E; derrick (guy and stiff leg) (power) (skids or stationary); dredge operator or engineer; dredge operator (power) and engineer; front end loader 5 cu. yds. and over; grader or motor patrol, finishing, earth work and bituminous; locomotive crane; master mechanic; mixer (paving) concrete paving, road; mole operator including power supply; mucking machine (including mucking operations) (Conway or similar); power shovel and/or other equipment with shovel type controls, up to 3 cu. yds.; refrigeration plant engineer; tandem scraper; tractor, boom type; truck crane; tugboat, 100 h.p. and over	7.70	.25	.25			
Crane with over 135 boom, excluding jib; power shovel and/or other equipment with shovel type controls, 3 cu. yds. and over	7.96	.25	.25

Site preparation, excavating and incidental paving:						
Laborers:						
Unskilled laborers; drill runner helper; landscape gardener; sod layer and nurseryman; powder monkey; reinforced steel laborer; reinforced steel setter (pavement); salamander heater and blower tender; carpenter tender; winch handler (manual)	5.85	.35	.35	.40		
Laborer, wrecking and demolition; bituminous batcherman (stationary plant); bituminous shoveler; blacksmith helper; bottom man (sewer, water, or gas trench); bricklayer tender; cement handler (bulk or bag); cement coverman (batch trucks); compaction equipment (hand operated); concrete shoveler, tamper and puddler (paving); concrete vibrator; concrete batcherman (proportioning plant); concrete longitudinal floatmen (manual bull float on paving); conduit layers (w/o wiring); chipping hammer; curb setter (stone or precast concrete); dumper (wagon, truck, etc.); dump man; dump man (paver—batch truck, etc.); form setter (municipal type curb and sidewalk); formsetter (pavement); hydrant and valve setter; joint filler (concrete pavement); kettleman (bituminous or lead); service connection maker (water or gas); power buggy; joint sawer; squeegeman (bituminous brick or block); stabilizing batcherman (stationary plant); stonemason tender; drill runner (heavy, including churn drill)	5.95	.35	.35	.40		
Chainsaw man; concrete mixer (1 bag); jackhammer man and paving buster; mortar mixer; pipe handler (water, gas, cast iron); pipe derrickman (triped, manual)	6.00	.35	.35	.40		
Bottom man (sewer, water, or gas trench, more than 8 ft. below starting level of manual work); tunnel laborer (atmospheric pressure); underground laborers; cofferdam work; tunnel work; underpinning work; caisson work; other work more than 8 ft. below starting level of manual work; open ditch work	6.10	.35	.35	.40		
Bituminous tamper; pipelayer (sewer, water, gas); sand cushion and bed maker	6.15	.35	.35	.40		
Cement gun (1½ in and over); leadman	6.20	.35	.35	.40		
Nozzlemen (gunite)	6.25	.35	.35	.40		
Brick or block paving setter	6.28	.35	.35	.40		
Bituminous raker, floater and utility man	6.30	.35	.35	.40		
Powderman; tunnel man (air pressure); tunnel miner	6.53	.35	.35	.40		
Power equipment operators:						
Dredge deck hand; gravel screening plant (portable, not crushing or washing); greaser truck and tractor; leverman; mechanic helper; mechanic space heater (temporary heat); oilers (power shovel, crane, dragline)	6.45	.25	.25			
Tractor, 50 h.p. or less without power takeoff	6.48	.25	.25			
Batch plant (concrete); brakeman or switchman; conveyor; fireman; tank car heater; self-propelled vibrating packer (pad type) (35 h.p. and over); truck crane oiler	6.55	.25	.25			
Air compressor; lead greaser on grease truck or grease rack (where no mechanic is employed)	6.70	.25	.25			
Concrete distributor and spreader; finishing machine; longitudinal float; joint machine; spray operator; concrete saw (multiple blade) (power operated); fine grade operator; form trench digger (power); power actuated jacks; pumps; shouldering machine (power) (Apsco or similar type including self-propelled sand and chip spreader); stump chipper; self-propelled chip spreader (Flaherty or similar); curb machine	6.72	.25	.25			
Bituminous spreader and bituminous finishing machine (helper) (power)	6.80	.25	.25			
Concrete mixer, on job site 14s and under; front end loader, up to and including 1 cu. yd.; gunite operator gunall; loader (Barber Greene or similar type); power actuate augers; boring machine; Rollers up to 8 tons; tractor, D2, TD6, or similar h.p. w/power takeoff	6.83	.25	.25			
Grader operator (Motor Patrol)	6.90	.25	.25			
Asphalt bituminous stabilizer plant; automatic road machine (CMI or similar); backfiller; bituminous spreader and finishing machine (power); boom truck (power operated boom); concrete mixer, on jobsite over 14S; crushing plant (gravel and stone); gravel washing, crushing and screening plant; dope machine (pipeline); drill rigs; heavy duty rotary churn or cable drills; engineer in charge of plant requiring first class license; fork lift; straddle carrier; fork lift or lumber stacker (for construction jobsite); front end loader, over 1 cu. yd. up to 5 cu yds.; launcherman (tankerman or pilot licensee); locomotives, all types; mechanic or welder; hoist engineer (power); paving breaker or tamping machine (power driven) (Mighty Mite or similar type); power actuated horizontal boring machines over 6" operator; pickup sweeper, 1 cu. yd. and over hopper capacity; pipeline wrapping cleaning or bending machine; powerplant engineer 100 kw.-hr. and over; pugmill; rollers 8 tons and over; rubber tired tractor backhoe attachs.; sheep foot roller (self-propelled) (3 drum and over); slip form (power driven) (paving); tie tamper and ballast machine tractor, over D2, TD6, or similar h.p. with power takeoff; tractor, over 50 h.p. without power takeoff; trenching machine (sewer, water, gas); turnapull (or similar type); well point installation, dismantling or repair mechanics; two or more pumps; compressors; welding machines	7.48	.25	.25			
Self-propelled traveling soil stabilizer	7.55	.25	.25			
Dual tractor; elevating grader; pumpcrete; scraper struck capacity 32 cu. yd. and over	7.58	.25	.25			
Cableway; concrete mixer stationary plant over 34E; derrick (guy and stiff leg) (power) (skids or stationary); dredge operator or engineer; dredge operator (power) and engineer; front end loader, 5 cu. yds. and over; grader or motor patrol, finishing, earth work and bituminous; locomotive crane; master mechanic; mixer (paving) concrete paving, road; mole operator including power supply; mucking machine (including mucking operations) (Conway or similar); power shovel and/or other equipment with shovel type controls, up to 3 cu. yds.; refrigeration plant engineer; tandum scraper; tractor, boom type; truck crane; tugboat, 100 hp. and over	7.70	.25	.25			
Crane with over 135 boom, excluding jib; power shovel and/or other equipment with shovel type controls, 3 cu. yds. and over	7.96	.25	.25

Brick or block paving setter	6.28	.35	.35	.40		
Bituminous raker, floater and utility man	6.30	.35	.35	.40		
Powderman; tunnel man (air pressure); tunnel miner	6.53	.35	.35	.40		
Power equipment operators:						
Dredge deck hand; gravel screening plant (portable, not crushing or washing); greaser truck and tractor; leverman; mechanic helper; mechanic space heater (temporary heat); oilers (power shovel, crane, dragline)	6.45	.25	.25			
Tractor, 50 h.p. or less without power takeoff	6.48	.25	.25			
Batch plant (concrete); brakeman or switchman; conveyor; fireman; tank car heater; self-propelled vibrating packer (pad type) (35 h.p. and over); truck crane oiler	6.55	.25	.25			
Air compressor; lead greaser on grease truck or grease rack (where no mechanic is employed)	6.70	.25	.25			
Concrete distributor and spreader; finishing machine; longitudinal float; joint machine; spray operator; concrete saw (multiple blade) (power operated); fine grade operator; form trench digger (power); power actuated jacks; pumps; shouldering machine (power) (Apsco or similar type including self-propelled sand and chip spreader); stump chipper; self-propelled chip spreader (Flaherty or similar); curb machine	6.72	.25	.25			
Bituminous spreader and bituminous finishing machine (helper) (power)	6.80	.25	.25			
Concrete mixer, on job site 14s and under; front end loader, up to and including 1 cu. yd.; gunite operator gunall; loader (Barber Greene or similar type); power actuate augers; boring machine; rollers up to 8 tons; tractor, D2, TD6, or similar h.p. w/power takeoff	6.83	.25	.25			
Grader operator (motor patrol)	6.90	.25	.25			
Asphalt bituminous stabilizer plant; automatic road machine (CMI or similar); backfiller; bituminous spreader and finishing machine (power); boom truck (power operated boom); concrete mixer, on jobsite over 14S; crushing plant (gravel and stone); gravel washing, crushing and screening plant; dope machine (pipeline); drill rigs; heavy duty rotary churn or cable drills; engineer in charge of plant requiring first class license; fork lift; straddle carrier; fork lift or lumber stacker (for construction jobsite); front end loader, over 1 cu. yd. up to 5 cu. yds.; launcherman (tankerman or pilot license); locomotives, all types; mechanic or welder; hoist engineer (power); paving breaker or tamping machine (power driven); (Mighty Mite or similar type); power actuated horizontal boring machines over 6″ operator; pickup sweeper, 1 cu. yd. and over hopper capacity; pipeline wrapping, cleaning or bending machine; powerplant engineer 100 kw.-hr. and over; pugmill; rollers 8 tons and over; rubber tired tractor backhoe attachs.; sheep foot roller (self-propelled) (3 drum and over); Slip form (power driven) (paving); tie tamper and ballast machine tractor, over D2, TD6, or similar h.p. with power takeoff; tractor, over 50 h.p. without power takeoff; trenching machine (sewer, water, gas); turnapull (or similar type); well point installation, dismantling or repair mechanics; two or more pumps; compressors; welding machines	7.48	.25	.25			
Self-propelled traveling soil stabilizer	7.55	.25	.25			
Dual tractor; elevating grader; pumpcrete; scraper struck capacity 32 cu. yds. and over	7.58	.25	.25			
Cableway; concrete mixer stationary plant over 34E; derrick (guy and stiff leg) (power) (skids or stationary); dredge operator or engineer; dredge operator (power) and engineer; front end loader 5 cu. yds. and over; grader or motor patrol, finishing, earth work and bituminous; locomotive crane; master mechanic; mixer (paving) concrete paving, road; mole operator including power supply; mucking machine (including mucking operations) (Conway or similar); power shovel and/or other equipment with shovel type controls, up to 3 cu. yds.; refrigeration plant engineer; tandem scraper; tractor, boom type; truck crane; tugboat, 100 h.p. and over	7.70	.25	.25			
Crane with over 135′ boom, excluding jib; power shovel and/or other equipment with shovel type controls, 3 cu. yds. and over	7.96	.25	.25

(a) Over 5 yards	8.39	.35	.50			
(b) 5 yards and under	7.84	.35	.50			
Hydraulic leverman	7.45	.35	.50			
Assistant engineer (electric, generator operator for primary pump, power barge or dredge)	7.13	.35	.50			
Engineer welder; craneman	7.08	.35	.50			
Assistant engineer (electric, diesel, steam or booster pump); mates and boatmen	7.03	.35	.50			
Fireman; oiler	6.69	.35	.50			
Assistant mate (deckhand)	6.59	.35	.50			
Power equipment operators:						
Mechanics' helpers (heavy duty)	6.67	.35	.50		.04	
Brakemen; oiler (grade checkers and stakeman)	6.77	.35	.50		.04	
Fireman; fireman (drier and hot plant)	6.88	.35	.50		.04	
Tractor (farmall type, 60 hp. and under); compressors (excavating and general purposes); rollers, tampers and vibrators (other than plant, road mix or multilift materials)	6.93	.35	.50		.04	
Oiler driver on truck cranes (over 45 tons up to 100)	6.95	.35	.50		.04	
Oil distributors; blower distributors and mulch seeding operator	7.00	.35	.50		.04	
Locomotives (dinkey, air, diesel, electric, gas, steam)	7.01	.35	.50		.04	
Equipment service oiler; oiler driver on truck cranes (100 tons and over)	7.05	.35	.50		.04	
Tractors (farmall type, over 60 hp.); pump (water)	7.07	.35	.50		.04	
Post hole diggers (mechanical)	7.20	.35	.50		.04	
Mixer (asphalt up to 4 tons per batch) brooms, power (Wayne, Saginaw and similar); bulldozers (under D9 or similar); saws (concrete); loaders (fork lift or lumber stacker on construction jobsite, Drott travel lift); scrapers (carryall type, single); roller, tampers, and vibrator, twin engine	7.23	.35	.50		.04	
Loaders (elevating Athey, Barber Greene and similar types); loaders (overhead and front end, under 2½ yds.); mixers (concrete and batch 200 yds. per hour and under); pump (concrete, Fuller Kenyon, pump crete); roller, tamper and vibrator (on plant, road mix or multilift materials); trenching machines (under 16 inches); batch plant and mixer (200 yds. per hour and under); conveyors; crushers (rock), washing and screening plants; finishing machine operator (concrete paving); hoists, air tuggers, strato tower bucket, elevators and deck winches (power); powerplant operators; screedman; spreaders (Blaw Knox, Cedarapids, Jaeger, Flarrety or similars); cranes ("A" frame truck, single power drum)	7.26	.35	.50		.04	
Locomotive, mechanics or welder (heavy duty)	7.31	.35	.50		.04	
Tournapulls, caterpillar, Euclid scrapers and similar type equipment (25 yds. and under); motor patrol graders (including model 14 and similar)	7.33	.35	.50		.04	
Hoists on steel erection, air tuggers and towermobiles; compressors (steel erection including sandblasting, painting, or same); loaders (forklifts w/tower)	7.35	.35	.50		.04	
Loaders (elevating grader type, Dumor and similar); cement hogs; locomotive (geared or rod engines); paving; scraper (carryall type, double)	7.38	.35	.50		.04	
Tractors (farmall type, used as backhoes, rubber tired, Ford, Ferguson, Case and similar types, 60 hp. and under)	7.41	.35	.50		.04	
Bulldozer (D-9 or similar)	7.45	.35	.50		.04	
Trenching machines (16 inches and over)	7.52	.35	.50		.04	
Bump cutter (Concut, Christianson or similar types)	7.53	.35	.50		.04	
Conveyors (beltcrete with power pack and similar types); loaders (elevating belt type, Euclid and similar); batch plant and mixer (over 200 yds. per hour through 400 yds.); mixer (concrete and batch, over 200 yds. per hour through 400 yds.), paving (dual), asphalt (4 tons and over per batch)	7.58	.35	.50		.04

		H & W	Pensions	Vacation	App. Tr.	Other
CHANGE—Continued						
Adams, Franklin, Grant, and Douglas and Okanogan Counties east of the 120th Meridian—Con.						
Power equipment operators—Continued						
Group IV:						
H.D. mechanic; H.D. welder; refrigeration plant engineer (1,000 tons and over) semi-automatic welding machine	6.95	.45	.45		.015	
Group V:						
Asphalt plant operator; crusher and screening plant operator; rubber-tired scrapers multiengine power with one scraper (Euclid, TS-24, and similar); rubber-tired scraper, one motor with one scraper (40 yds. and over); single engine with two scrapers (Letourneau, Tandem B, and similar); surface heater and planer machine	7.00	.45	.45		.015	
Group VI:						
Automatic subgrader (ditches and trimmers) (R. A. Hansen and similar); backhoes (under 3 yds.); batch and wet mix operator-multiple units (2 and including 4); clamshell operator (under 3 yds.); concrete slip form paver; cranes (under 65 tons); derricks and stifflegs (under 65 tons); draglines (under 3 yds.); drilling equipment (8" bit and over) (Robbins and similar); Hydra-Cranes (Austin, Western Hydra-Hoe and similar with attachments); loader operator (front end and overhead 4 yds. to 8 yds.); mucking machines; piledriving engineers; paver (dual drum); quad-track or similar equipment; railroad track liner operator (self-propelled); rubber-tired scrapers, multiple engines with two scrapers; shovels (under 3 yds.); signalmen (whirleys, highline hammerheads, or similar); trenching machines (7 ft. depth and over)	7.15	.45	.45		.015	
Group VII:						
Backhoes (3 yds. and over); batch plant (over 4 units); cableway controller-dispatcher; cableway operators; clamshell operator (3 yds. and over); cranes (65 tons and over); derricks and stifflegs (65 tons and over); draglines (3 yds. and over); loader—(360° revolving Koehring scooper or similar); loaders (overhead and front end over 8 yds.); rubber-tired scrapers (multiple engine with 3 or more scrapers); shovels (3 yds. and over); tower crane; whirleys and hammerheads (all)	7.40	.45	.45		.015	
Underground work—Add 10% to the classification. (Not to include open pits, cuts, ditches, trenches, and such work as paving, etc.)						
All crane booms: 130' to 200'—$0.15/hr. additional to classification; over 200'—$0.30/hr. additional to classification.						
Yo-Yo dozer: 10% Additional.						
Adams, Franklin, Grant, and Douglas and Okanogan Counties east of the 120th Meridian:						
Truck drivers:						
Flat bed truck, single rear axle; fork lift, 3,000 lbs. and under; fuel truck driver (steam cleaner and washer); helper and swamper; leverman loading trucks at bunkers; pickup hauling material; stationary fuel operator; team driver; tractor (small rubber-tired pulling trailer or similar equipment); water tank truck 1,800 gallons	6.30	.37	.30			
Bus driver or manhaul driver; flat bed truck, dual rear axle; tireman No. 1; warehouseman	6.35	.37	.30			
Buggy mobile and similar; bulk cement tanker; oil tank driver; power operated sweeper; semitrailer, low bed truck and trailer; straddle carrier (Ross, Hyster, and similar); transit mixers and trucks hauling concrete (3 yds. and under); trucks, side, end, and bottom dump (under 6 yds.); water tank truck (1,801–4,000 gallons)	6.40	.37	.30			
Auto crane (2,000-lb. capacity); bulk cement spreader; dumptor (6 yds. and under); Flaherty spreader, box driver; flat bed truck (using power takeoff); fork lift (over 3,000 lbs.); oil distributor driver (road bootman, leverman, helper); rubber-tired tunnel jumbo; scissors truck; slurry truck driver; transit mixers and trucks hauling concrete (over 3 yds. to 6 yds.); trucks, side, end, and bottom dump (over 6 yds. to 12 yds.); water tank truck (4,001–6,000 gallons); wrecker and tow truck	6.50	.37	.30			
Low boy (under 50 tons); service greaser; tireman No. 2	6.55	.37	.30			
A-frame (Swedish crane, Iowa 3,000, hydrolift); water tank truck (over 6,000 gallons—10¢ for each 2,000 additional)	6.60	.37	.30			
Dumptor (over 6 yds.); transit mixers and trucks hauling concrete (6 yds. to 10 yds.); trucks, side, end, and bottom dump (over 12 yds. including 20 yds.)	6.65	.37	.30			
Low boy (over 50 tons)	6.70	.37	.30			
Transit mixers and trucks hauling concrete (10 yds. to 15 yds.); trucks, side, end, and bottom dump (over 20 yds. including 30 yds.)	6.80	.37	.30			
Tournarocker, D.W.'d, and similar with 2- or 4-wheel power tractor with trailer or yardage scale	6.85	.37	.30			
Transit mixers and trucks hauling concrete (15 yds. to 20 yds.); trucks, side, end, and bottom dump (over 30 yds. to 40 yds.)	6.95	.37	.30			
Transit mixers and trucks hauling concrete (over 20 yds.); trucks, side, end, and bottom dump (over 40 yds.)	7.10	.37	.30

Truck drivers—Continued						
Auto crane (2,000 lb. capacity); bulk cement spreader; Dumptor (6 yds. and under); Flaherty spreader, box driver; flatbed truck (using power takeoff); forklift (over 3,000 lbs.); oil distributor driver (road bootman, leverman, helper); rubber-tired Tunnel Jumbo; scissors truck; slurry truck driver; transit mixers and trucks hauling concrete (over 3 yds. to 6 yds.); trucks, side, end, and bottom dump (over 6 yds. to 12 yds.); water tank truck (4,001–6,000 gallons); wrecker and tow truck	6.50	.37	.30		
Lowboy (under 50 tons); service greaser; fireman No. 2	6.55	.37	.30		
A-frame (Swedish crane, Iowa 3,000, hydrolift); water tank truck (over 6,000 gallons—10¢ for each 2,000 additional)	6.60	.37	.30		
Dumptor (over 6 yds.); transit mixers and trucks hauling concrete (6 yds. to 10 yds.); trucks, side, end, and bottom dump (over 12 yds. including 20 yds.)	6.65	.37	.30		
Lowboy (over 50 tons)	6.70	.37	.30		
Transit mixers and trucks hauling concrete (10 yds. to 15 yds.); trucks, side, end, and bottom dump (over 20 yds. including 30 yds.)	6.80	.37	.30		
Tournarocker, double-wheeled and similar with 2- or 4-wheel power tractor with trailer or yardage scale	6.85	.37	.30		
Transit mixers and trucks hauling concrete (15 yds. to 20 yds.); trucks, side, end, and bottom dump (over 30 yds. to 40 yds.)	6.95	.37	.30		
Transit mixers and trucks hauling concrete (over 20 yds.); trucks, side, end, and bottom dump (over 40 yds.)	7.10	.37	.30		
Power equipment operators:						
Group I:						
Bit grinders; bolt threading machine; brakeman; compressors, under 1,000 cu. ft. per minute gas, diesel, or electric power; crusher feeder (mechanical); deckhand; drillers helper; fireman and heater tender; grade checker; helper (mechanic or welder, heavy duty); oiler; pumpman; rollers, all types on subgrade (farm type, Case, John Deere and similar—or compacting or vibrator) except when pulled by dozer with operable blade; welding machines	6.30	.45	.45		.015	
Group II:						
A-frame truck (single-drum); assistant refrigeration plant (under 1,000 tons); assistant plant operator, fireman or pugmixer (asphalt); Bagley or stationary scraper; batch plant and wet mix operator, single-unit (concrete); belt finishing machine; bending machine (pipeline); blower operator (cement); cement hog; compressor (1,000 cu. ft. or over, 2 or more gas, diesel, or electric power); concrete saw (multiple-cut); distributor leverman; dope pots (power-agitated); equipment serviceman, greaser and oiler; forklift or lumber stacker, hydra-lift and similar; gin trucks (pipeline); hoist, single-drum; loaders (bucket elevators and conveyors); longitudinal float; mixer (portable—concrete); pavement breaker, hydra-hammer and similar; posthold auger or punch; power broom; railroad ballast regulation operator (self-propelled); railroad power tamper operator (self-propelled); railroad power tamper jack operator (self-propelled); spray curing machine (concrete); spreader box (self-propelled); straddle buggy (Ross and similar on construction job site); tractor (farm type rototiller with attachments except backhoe); tugger operator	6.60	.45	.45		.015	
Group III:						
A-frame truck (2 or more drums); assistant refrigeration plant and chiller operator (over 1,000 tons); backfillers (Cleveland and similar); belt-crete conveyors with power pack or similar; belt loader (Kocal or similar); blade operator (Motor Patrol and attachments); boat operators; boom cats (side); boring machine (earth); boring machine (rock under 8-inch bit) (Quarry Master, Joy or similar); bump cutter (Wayne, Saginaw or similar); canal lining machine (concrete); cleaning and doping machine (pipeline); concrete pumps (squeeze-crete, flow-crete, pump-crete, Whitman and similar); drills (churn, core, calyz or diamond); elevating belt-type loader (Euclid, Barber, Greene or similar); elevating grader-type loader (Dumor, Adams, or similar); generator plant engineers (diesel-electric); Gunite combination mixer and compressor; hoist (2 or more drums or tower hoist); loaders (overhead and front-end, under 4 yds. R/T); locomotive engineer; mixermobile; oiler and cable tender, mucking machine; paver (asphalt and concrete); pump (grout or jet); refrigeration plant engineer (1,000 tons); rollerman (finishing pavement); rubber-tired scrapers (one motor with one scraper, under 40 yds.); screed operator; soil stabilizer (P & H or similar); spreader machine; tractor (crawler, including dozer, scraper, drills, booms, rollers, etc.); traverse finishing machine; trenching machines (under 7-foot depth capacity); Turnhead operator	6.85	.45	.45		.015	
Group IV:						
Heavy-duty mechanic; heavy-duty welder; refrigeration plant engineer (1,000 tons and over); semiautomatic welding machine	6.95	.45	.45		.015	
Group V:						
Asphalt plant operator; crusher and screening plant operator; rubber-tired scrapers multi-engine power with one scraper (Euclid, TS-24 and similar); rubber-tired scraper, one motor with one scraper (40 yds. and over); single-engine with two scrapers (LeTourneau, Tandem B and similar); surface heater and planer machine	7.00	.45	.45		.015	
Group VI:						
Automatic subgrader (ditches and trimmers) (R. A. Hansen and similar); backhoes (under 3 yds.); batch and wet mix operator—Multiple units (2 and including 4); clamshell operator (under 3 yds.); concrete slip form paver; cranes (under 65 tons); derricks and stifflegs (under 65 tons); draglines (under 3 yds.); drilling equipment (8-inch bit and over) (Robbins and similar); hydra-cranes (Austin, Western, Hydra-Hoe and similar with attachments); loader operator (front end and overhead, 4 yds. to 8 yds.); mucking machines; piledriving engineers; paver (dual-drum); quad-track or similar equipment; railroad track liner operator (self-propelled); rubber-tired scrapers, multiple-engines with two scrapers; shovels (under 3 yds.); signalmen (Whirleys, Highline Hammerheads or similar); trenching machines (7-foot depth and over)	7.15	.45	.45		.015	
Group VII:						
Backhoes (3 yds. and over); batch plant (over 4 units); cableway controller-dispatcher, cableway operators; clamshell operator (3 yds. and over); cranes (65 tons and over), derricks and stifflegs (65 tons and over); draglines (3 yds. and over); loader (360 degrees revolving Koehring Scooper or similar); loaders (overhead and front end over 8 yds.); rubber-tired scrapers (multiple-engine with 3 or more scrapers); shovels (3 yds. and over); tower crane; Whirleys and Hammerheads (all)	7.40	.45	.45		.015	
Underground work—Add 10% to the Classification. (Not to include open pits, cuts, ditches, trenches and such work as paving, etc.)						
All crane booms: 130 feet to 200 feet—$.15/hr. additional to classification; Over 200 feet—$.30/hr. additional to classification.						
Yo-Yo dozer: 10% additional.

Tractor (farmall type, 60 hp. and under); compressors (excavating and general purposes); rollers, tampers and vibrators (other than plant, road mix or multilift materials)	6.93	.35	.50		.04	
Oiler driver on truck cranes (over 45 tons up to 100)	6.95	.35	.50		.04	
Oil distributors; blower distributors and mulch seeding operator	7.00	.35	.50		.04	
Locomotives (dinkey, air, diesel, electric, gas, steam)	7.01	.35	.50		.04	
Equipment service oiler; oiler driver on truck cranes (100 tons and over)	7.05	.35	.50		.04	
Tractors (farmall type, over 60 hp.); pump (water)	7.07	.35	.50		.04	
Post hole diggers (mechanical)	7.20	.35	.50		.04	
Mixer (asphalt up to 4 tons per batch) brooms, power (Wayne, Saginaw and similar); bulldozers (under D9 or similar); saws (concrete); loaders (forklift or lumber stacker on construction jobsite, Drott travel lift); scrapers (carryall type, single); roller, tampers and vibrator, twin engine	7.23	.35	.50		.04	
Loaders (elevating Athey, Barber Greene and similar types); loaders (overhead and front end, under 2½ yds.); mixers (concrete and batch 200 yds. per hour and under); pump (concrete, Fuller Kenyon, pump crete); roller, tamper and vibrator (on plant, road mix or multilift materials); trenching machines (under 16 inches); batch plant and mixer (200 yds. per hour and under); conveyors; crushers (rock), washing and screening plants; finishing machine operator (concrete paving); hoists, air tuggers, strato tower bucket, elevators and deck winches (power); powerplant operators; screedman; spreaders (Blaw Knox, Cedarapids, Jaeger, Flarrety or similars); cranes A-frame truck, single power drum)	7.26	.35	.50		.04	
Locomotive, mechanics or welder (heavy duty)	7.31	.35	.50		.04	
Tournapulls, Caterpillar, Euclid scrapers and similar type equipment (25 yds. and under); Motor Patrol graders (including model 14 and similar)	7.33	.35	.50		.04	
Hoists on steel erection, air tuggers and towermobiles; compressors (steel erection including sandblasting, painting or same); loaders (forklifts w/tower)	7.35	.35	.50		.04	
Loaders (elevating grader type, Dumor and similar); cement hogs; locomotive (geared or rod engines); paving; scraper (carryall type, double)	7.38	.35	.50		.04	
Tractors (farmall type, used as backhoes, rubber tired, Ford, Ferguson, Case and similar types, 60 hp. and under)	7.41	.35	.50		.04	
Bulldozer (D-9 or similar)	7.45	.35	.50		.04	
Trenching machines (16 inches and over)	7.52	.35	.50		.04	
Bump cutter (Concut, Christianson or similar types)	7.53	.35	.50		.04	
Conveyors (beltcrete with powerpack and similar types); loaders (elevating belt type, Euclid and similar); batch plant and mixer (over 200 yds. per hour through 400 yds.); mixer (concrete and batch, over 200 yds. per hour through 400 yds.), paving (dual), asphalt (4 tons and over per batch)	7.58	.35	.50		.04	
Motor Patrol graders (over model 14 and similar); derricks all-drilling machines (core, cable, rotary and exploration); linked pusher, pay dozer (quad 9 and similar); mucking machines (mole or tunnel drill and/or shield); subgrader (Gurries or other automatic types); Tournapulls, Caterpillar, Euclid scrapers and similar type equipment (25 yds. through 40 yds.); tractors (farmall type, used as backhoes, rubber tired, Ford, Ferguson, Case and similar, over 60 hp.); piledriver engineers (L. B. Foster puller or similar paving breaker); cranes (A-frame truck, double power drum); crawler (truck type, floating, locomotive, Whirley, either 3 yds. and under, or 150' of boom, including jibs, and under, or 45 tons and under); hydralifts; Hyster cat cranes and attachments; bulldozers (engaged) in yo yo operation (while clearing and scaling); shovels (crawler and truck type, all attachments, 3 yds. and under); cranes, chipper, wood with boom attachment; mixer (mobile type with hoist combination); cableways (3 yds. and under); loaders (forklift with power boom and swing attachment); loaders (overhead and front end, 2½ yds. up to 4 yds.)	7.63	.35	.50		.04	
Loaders (overhead and front end, 4 yds. up to 8 yds.)	7.85	.35	.50		.04	
Mixer (concrete mixers and batch over 400 yds. per hour through 600 yds. per hour)	7.89	.35	.50		.04	
Tournapulls, Caterpillar, Euclid scraper (over 70 yds. through 55 yds.)	7.94	.35	.50		.04	
Slip form paver (Zimmerman, CMI, and other similar types); cableway (over 3 yds.); crane (crawler, truck type, floating, locomotive, Whirley, either over 3 yds. or over 150' of boom including jibs, or over 45 tons up to 100 tons); crane (tower cranes, Pecco, Lorraine, Bucyrus and similar types); remote control operator (on rubber tired earth moving equipment); helicopter winch operator; shovel (crawler and truck type, all attachments, over 3 yds. up to 6 yds.)	8.02	.35	.50		.01	
Tournapulls, Caterpillar, Euclid scrapers and similar type equipment (over 55 yds. through 70 yds.)	8.24	.35	.50		.04	
Loaders (overhead and front end, 8 yds. and over)	8.44	.35	.50		.01	
Tournapulls, Caterpillar, Euclid scrapers and similar type equipment (over 70 yds. through 85 yds.)	8.55	.35	.50		.04	
Shovel (crawler and truck type, all attachments, 6 yds. and over); cranes (crawler, truck type, floating, locomotive, Whirley, either 6 yds. and over, 200' pf boom including jibs and over, or 100 tons and over)	8.57	.35	.50		.04	
Tournapulls, caterpillar, Euclid scrapers and similar type equipment (over 85 yds. through 100 yds.)	8.85	.35	.50		.04

Fireman; fireman (drier and hot plant)	6.88	.35	.50		.04	
Tractor (farmall type, 60 h.p. and under); compressors (excavating and general purposes); rollers, tampers and vibrators (other than plant, road mix or multilift materials)	6.93	.35	.50		.04	
Oiler driver on truck cranes (over 45 tons up to 100)	6.95	.35	.50		.04	
Oil distributors; blower distributors and mulch seeding operator	7.00	.35	.50		.04	
Locomotives (dinkey, air, diesel, electric, gas, steam)	7.01	.35	.50		.04	
Equipment service oiler; oiler driver on truck cranes (100 tons and over)	7.05	.35	.50		.04	
Tractors (farmall type, over 60 h.p.); pump (water)	7.07	.35	.50		.04	
Post hole diggers (mechanical)	7.20	.35	.50		.04	
Mixer (asphalt up to 4 tons per batch) brooms, power (Wayne, Saginaw and similar); bulldozers (under D9 or similar); saws (concrete); loaders (fork lift or lumber stacker on construction job site, Drott travel lift); scrapers (carry-all type, single); roller, tampers and vibrator, twin engine	7.23	.35	.50		.04	
Loaders (elevating Athey, Barber Greene and similar types); loaders (overhead and front end, under 2½ yds.); mixers (concrete and batch 200 yds. per hour and under); pump (concrete, Fuller Kenyon, pump crete); roller, tamper and vibrator (on plant, road mix or multilift materials); trenching machines (under 16 inches); batch plant and mixer (200 yds. per hour and under); conveyors; crushers (rock), washing and screening plants; finishing machine operator (concrete paving); hoists, air tuggers, strato tower bucket, elevators and deck winches (power); power plant operators; screedman; spreaders (Blaw Knox, Cedarapids, Jaeger, Flarrety or similars); cranes (A-frame truck, single power drum)	7.26	.35	.50		.04	
Locomotive, mechanics or welder (heavy duty)	7.31	.35	.50		.04	
Tournapulls, Caterpillar, Euclid scrapers and similar type equipment (25 yds. and under); Motor Patrol graders (including Model 14 similar)	7.33	.35	.50		.04	
Hoists on steel erection, air tuggers and towermobiles; compressors (steel erection including sandblasting, painting or same); loaders (fork lifts w/tower)	7.35	.35	.50		.04	
Loaders (elevating grader type, Dumor and similar); cement hogs; locomotive (geared or rod engines); paving; scraper (carryall type, double)	7.38	.35	.50		.04	
Tractors (farmall type, used as backhoes, rubber tired, Ford, Ferguson, Case and similar types, 60 h.p. and under)	7.41	.35	.50		.04	
Bulldozer (D-9 or similar)	7.45	.35	.50		.04	
Trenching machines (16 inches and over)	7.52	.35	.50		.04	
Bump cutter (Concut, Christianson or similar types)	7.53	.35	.50		.04	
Conveyors (beltcrete with power pack and similar types); loaders (elevating belt type, Euclid and similar); batch plant and mixer (over 200 yds. per hour through 400 yds.); mixer (concrete and batch, over 200 yds. per hour through 400 yds.), paving (dual), asphalt (4 tons and over per batch)	7.58	.35	.50		.04	
Motor Patrol graders (over Model 14 and similar); derricks all-drilling machines (core, cable, rotary and exploration); linked pusher, pay dozer (quad 9 and similar); mucking machines (mole or tunnel drill and/or shield); subgrader (gurries or other automatic types); Tournapulls, Caterpillar. Euclid scrapers and similar type equipment (25 yds. through 40 yds.); tractors (farmall type, used as backhoes, rubber tired, Ford, Ferguson, Case and similar, over 60 h.p.); piledriver engineers (L. B. Foster puller or similar paving breaker); cranes (A-frame truck, double power drum); crawler (truck type, floating, locomotive, Whirley, either 3 yds. and under, or 150' of boom, including jibs, and under, or 45 tons and under); hydralifts; hyster cat cranes and attachments; bulldozers (engaged) in yo yo operation (while clearing and scaling); shovels (crawler and truck type, all attachments, 3 yds. and under); cranes, chipper, wood with boom attachment; mixer (mobile type with hoist combination); cableways (3 yds. and under); loaders (fork lift with power boom and swing attachment); loaders (overhead and front end, 2½ yds. up to 4 yds.)	$7.63	.35	.50		.04	
Loaders (overhead and front end. 4 yds. up to 8 yds.)	7.85	.35	.50		.04	
Mixer (concrete mixers and batch over 400 yds. per hour through 600 yds. per hour)	7.89	.35	.50		.04	
Tournapulls, Caterpillar, Euclid scraper (over 70 yds. through 55 yds.)	7.94	.35	.50		.04	
Slip Form Paver (Zimmerman, CMI, and other similar types); cableway (over 3 yds.); crane (crawler, truck type, floating. locomotive, whirley, either over 3 yds. or over 150' of boom including jibs, or over 45 tons up to 100 tons); crane (tower cranes, Pecco, Lorraine, Bucyrus and similar types: Remote control operator (on rubber tired earth moving equipment); helicopter winch operator; shovel (crawler and truck type, all attachments, over 3 yds. up to 6 yds.)	8.02	.35	.50		.04

Tournapulls, Caterpillar, Euclid scrapers and similar type equipment (over 85 yds. through 100 yds.)	8.85	.35	.50		.04	
Clark, Cowlitz, Klickitat, Skamania, Wahkiakum, and southern part of Pacific County:						
Power equipment operators:						
Group I: Assistant conveyor; oiler, including plant and crusher; crusher feederman; deckhand; self-propelled scaffolding; guard rail punch oiler; pump under 4" brakeman switchman; parts man (tool room)	6.10	.40	.50	.20		
Group II: Blase, pulled type; truck crane oiler-driver, 25-ton capacity or fireman, all equipment; A-frame truck, single drum; tugger or coffin type hoist, any power; drill helper; auger oiler; boatman; forklift or lumber stacker; temporary heating plant; grade oiler, required to check grade; grade checker; tar pot fireman; tar pot fireman (power agitated); H.D. repairman helper; welder's helper; fireman helicopter radioman (ground); roller, rock	6.24	.40	.50	.20		
Group III: Plant fireman; pugmill; truck mounted asphalt spreader, with screed; compressor, any power, under 1,000 cu. ft. total capacity; mixer box concrete plant; concrete conveyor; cement hog; concrete saw, self-propelled unit; wire mat machine or booming machine; concrete curing machine, self-propelled; bucket elevator loader, Barber Greene and similar type; hydraulic pipe press; pump any power, 4" and over; hydrostatic pump; motorman; ballast jack tamper; bell boy, phones, etc.; tamping machine, mechanical self-propelled; hydrographic seeder machine, straw, pump or seed; broom operator, self-propelled; air filtration equipment; welding machine	6.34	.40	.50	.20		
Group IV: Screed; compactor, including vibratory; compressor, over 1,000 cu. ft. total capacity, concrete mixer, single drum, under 5-bag capacity; concrete cooling machine; combination mixer and compressor, gunite work; helicopter hoist; fork lift, over 5 tons; Lull Hi-Lift or similar types; pavement breaker; pump, more than 3, any size; locomotive, under 40 tons; roller, oiling, CTB	6.50	.40	.50	.20		
Group V: Curb machine, mechanical berm, curb and/or curb and cutter; Wagner Pactor or similar type (without blade); batch plant material control; power jumbo, setting slip forms, etc. in tunnels; slip form pumps, power driven hydraulic lifting device for concrete forms; hoist, single drum; elevator, diesel, gas, engineer; chip spreading machine; lime spreading; sweeper (Wayne type); self-propelled; tractor, rubber-tired 50 h.p. flywheel and under; trenching machine, maximum digging capacity 3 ft. depth	6.52	.40	.50	.20		
Group VI: Asphalt plant; asphalt paver; Maginnis, internal full slab vibrator; concrete finishing machine, Clary, Johnson, Bidwell, Burgess, bridge deck or similar type; curo machine, mechanical berm, curb and/or curb and gutter; concrete joint machine; concrete planer; cast in place pipe laying machine; concrete paving machine; concrete spreader; loaders, rubber-tired type, 2½ cu. yds. and under; rock spreader, self-propelled	6.60	.40	.50	.20		
Group VII: Roller, asphalt; concrete mixer, single drum, 5-bag capacity and over; beltcrete; pumpcrete; cement pump, Fuller-Kenyon and similar; grouting machine; concrete pump; tower mobile; A-frame truck, double drums; boom truck; churn drill and earth boring machine; hydraulic backhoe, wheel type ¾ cu. yds. and under with or without front end attachments 2½ cu. yds. and under (Ford, John Deere, Case type); elevating grader, tractor and towed requiring operator or grader; pot rammer; ballast regulator; ballast tamper multipurpose; track liner; tie spacer; shuttle car; locomotive, 40 tons and over	6.66	.40	.50	.20		
Group VIII: Diesel-electric engineer, plant or floating; batch plant and/or wet mix, 1 and 2 drums; generator; diesel-electric engineer; belt loaders, Kolman and Ko Cal types	6.76	.40	.50	.20		
Group IX: Bulldozer; drill cat; side-boom cat; compactor, with blade; Chicago boom and similar types; lift slab machine; boom type lifting device, 5 tons capacity or less; cherry pick or similar type crane-hoist; 5-ton capacity or less; grizzley; crusher plant; boreg machine; surface heater and planer; hydraulic backhoe, truck type ⅜ cu. yds. loainr, front end and overhead 2½ cu. yds. and under 4 cu. yds.; pipe cleaning machdee; pipe doping machine; pipe bending machine; pipe wrapping machine; bolt thinading machine; drill doctor; including bit grinder; H.D. mechanic; H.D. welder; mrechine tool operator; stationary drag scraper; tractor rubber-tired over 50 h.p. flawheel; tractor, rubber-tired with boom attachments; trenching machine maximum dygging capacity over 3 ft. depth	6.82	.40	.50	.20		
Group IX: Bulldozer, twin-engine (TC 12 and similar type); cable-plow; compactor, multiengine; driller-percussion, diamond, core, cable, rotary, and similar types; jack operator elevating barges; barge operator, self-unloading combination H.D. mechanic-welder; welder-certified; rubber-tired dozers and pushers (Michigan, Cat, Hough, type)	6.88	.40	.50	.20		
Group XI: Mixermobile; crane, 25 tons and under; shovel, dragline; clamshell, hoe, etc., under 1 cu. yd.; gradeall, under 1 cu. yd.; mucking machine	6.90	.40	.50	.20		
Group XII: Blade; batch plant and/or wet mix, 3 units or more; hoist, 2 drums; hoist, 3 or more drums; elevating loader, Athey and similar types; piledriver (not crane type); rubber-tired scraper, single engine, single scraper; scraper—self-loading, paddle wheel ladder type; rubber-tired scraper, twin engine; rubber-tired scraper, with push-pull attachments; blade mounted spreaders, Ulrich and similar types; shield operator	6.96	.40	.50	.20		
Group XIII: Blade, finish (working with either red or blue tops); blade, electronically controlled by wire or laser beams; blade, multiengine; concrete paving and road mixer; bridge crane, locomotive, gantry overhead; derrick, under 100 tons; hoist stiffleg, guy derrick or similar type 50 tons and over; cableway, up to 25 tons; crane, over 25 tons and including 40 tons; tower crane; piledriver (not crane type); floating clamshell, etc., under 3 cu. yds.; floating crane (derrick barge); less than 30 tons; hydraulic backhoe, truck type over ⅜ cu. yds.; elevating; grader, operated by tractor, Sierra, Euclid, or similar types; back-filling machine; shovel, etc., 1 cu. yd. but less than 3 cu. yds.; gradeall, 1 cu. yd. and over	7.04	.40	.50	.20

Power equipment operators—Continued						
Group III:						
A-frame truck (two or more drums); assistant refrigeration plant and chiller operator (over 1,000 tons); backfillers (Cleveland and similar); belt-crete conveyors with power pack or similar; belt loader (Kocal or similar); blade operator (Motor Patrol and attachments); boat operators; boom cats (side); boring machine (earth); boring machine (rock under 8-inch bit) (Quarry Master, Joy or similar); bump cutter (Wayne, Saginaw or similar); canal lining machine (concrete); cleaning and doping machine (pipeline); concrete pumps (squeeze-crete, flow-crete, pump-crete, Whitman and similar); drills (churn, core, calyx or diamond); elevating belt-type loader (Euclid, Barber Green or similar); elevating grader-type loader (Dumor, Adams, or similar); generator plant engineers (diesel electric); gunite combination mixer and compressor; hoist (two or more drums or tower hoist); loaders (overhead and front-end, under 4 yds. R/T); locomotive engineer; mixermobile; oiler and cable tender, mucking machine; paver (asphalt and concrete); pump (grout or jet); refrigeration plant engineer (1,000 tons); rollerman (finishing pavement); rubber-tired scrapers (one motor with one scraper, under 40 yds.); screed operator; soil stabilizer (P and H or similar); spreader machine; tractor (crawler, including dozer, scraper, drills, booms, rollers, etc.); traverse finishing machine; trenching machines (under 7 ft. depth capacity); turnhead operator	6.85	.45	.45		.015	
Group IV:						
H.D. mechanic; H.D. welder; refrigeration plant engineer (1,000 tons and over); semi-automatic welding machine	6.95	.45	.45		.015	
Group V:						
Asphalt plant operator; crusher and screening plant operator; rubber-tired scrapers multi-engine power with one scraper (Euclid, TS-24 and similar); rubber-tired scraper, one motor with one scraper (40 yds. and over); single engine with two scrapers (Letourneau, Tandem B and similar); surface heater and planer machine	7.00	.45	.45		.015	
Group VI:						
Automatic subgrader (ditches and trimmers) (R. A. Hansen and similar); backhoes (under 3 yds.); batch and wet mix operator-multiple units (two and including four); clamshell operator (under 3 yds.); concrete slip form paver; cranes (under 65 tons); derricks and stiffegs (under 65 tons); draglines (under 3 yds.); drilling equipment (8" bit and over) (Robbins and similar); hydra-cranes (Austin, Western Hydra-Hoe and similar with attachments); loader operator (front end and overhead 4 yds. to 8 yds.); mucking machines; piledriving engineers; paver (dual drum); quad-track or similar equipment; railroad track liner operator (self-propelled); rubber-tired scrapers, multiple engines with two scrapers; shovels (under 3 yds.); signalmen (whirleys, highline, hammerheads or similar); trenching machines (7 ft. depth and over)	7.15	.45	.45		.015	
Group VII:						
Backhoes (3 yds. and over); batch plant (over 4 units); cableway controller-dispatcher; cableway operators; clamshell operator (3 yds. and over); cranes (65 tons and over); derricks and stiffegs (65 tons and over); draglines (3 yds. and over); loader—(360 degrees revolving Koehring scooper or similar); loaders (overhead and front end over 8 yds.); rubber-tired scrapers (multiple engine with three or more scrapers); shovels (3 yds. and over); tower crane; whirleys and hammerheads (all)	7.40	.45	.45		.015	
Underground work—Add 10% to the classification. (Not to include open pits, cuts, ditches, trenches and such work as paving, etc.)						
All crane booms: 130' to 200'—$0.15/hr. additional to classification; over 200'—$0.30/hr. additional to classification.						
Yo-Yo dozer: 10% additional.						
Chelan, Douglas, Kittitas, Okanogan, and Yakima Counties east of the 120th meridian:						
Truck drivers:						
Flat bed truck, single rear axle; fork lift, 3,000 lbs. and under; fuel truck driver (steam cleaner and washer); helper and swamper; leverman loading trucks at bunkers; pickup hauling material; stationary fuel operator; team driver; tractor (small rubber-tired pulling trailer or similar equipment); water tank truck 1,800 gallons	6.30	.37	.30			
Bus driver or manhaul driver; flat bed truck, dual rear[xs]; fireman No. 1; warehouseman	6.35	.37	.30			
Buggy mobile and similar bulk cement tanker; oil tank driver; power operated sweeper; semitrailer, low bed truck and trailer; straddle carrier (Ross, Hyster and similar); transit mixers and trucks hauling concrete (3 yds. and under); trucks, side, end, and bottom dump (under 6 yds.); water tank truck (1,801-4,000 gallons)	6.40	.37	.30			
Auto crane (2,000 lb. capacity); bulk cement spreader; dumptor (6 yds. and under); Flaherty spreader, box driver; flat bed truck (using power take off); fork lift (over 3,000 lbs.); oil distributor driver (road bootman, leverman, helper); rubber tired tunnel jumbo; scissors truck; slurry truck driver; transit mixers and trucks hauling concrete (over 3 yds. to 6 yds.); trucks, side, end and bottom dump (over 6 yds. to 12 yds.); water tank truck (4,001-6,000 gallons); wrecker and tow truck	6.50	.37	.30			
Low boy (under 50 tons); service greaser; fireman No. 2	6.55	.37	.30			
A-frame (Swedish crane, Iowa 3000, hydrolift); water tank truck (over 6,000 gallons—10 cents for each 2,000 additional)	6.60	.37	.30			
Dumptor (over 6 yds.); transit mixers and trucks hauling concrete (6 yds. to 10 yds.); trucks, side, end, and bottom dump (over 12 yds. including 20 yds.)	6.65	.37	.30			
Low boy (over 50 tons)	6.70	.37	.30			
Transit mixers and trucks hauling concrete (10 yds. to 15 yds.); trucks, side, end, and bottom dump (over 20 yds. including 30 yds.)	6.80	.37	.30			
Tournarocker, dual-wheeled and similar with 2 or 4 wheel power tractor with trailer or yardage scale	6.85	.37	.30			
Transit mixers and trucks hauling concrete (15 yds. to 20 yds.); trucks, side, end, and bottom dump (over 30 yds. to 40 yds.)	6.95	.37	.30			
Transit mixers and trucks hauling concrete (over 20 yds.); trucks, side, end, and bottom dump (over 40 yds.)	7.10	.37	.30			
Chelan, Douglas, Kittitas, Okanogan and Yakima Counties west of the 120th meridian:						
Power equipment operators:						
Mechanics' helpers (heavy duty)	6.67	.35	.50		.04	
Brakemen; oiler (grade checkers and stakeman)	6.77	.35	.50		.04	
Fireman; fireman (drier and hot plant)	6.88	.35	.50		.04	
Tractor (farmall type, 60 h.p. and under); compressors (excavating and general purposes); rollers, tampers, and vibrators (other than plant, road mix or multilift materials)	6.93	.35	.50		.04	
Oiler driver on truck cranes (over 45 tons up to 100)	6.95	.35	.50		.04	
Oil distributors; blower distributors and mulch seeding operator	7.00	.35	.50		.04	
Locomotives (dinkey, air, diesel, electric, gas, steam)	7.01	.35	.50		.04	
Equipment service oiler; oiler driver on truck cranes (100 tons and over)	7.05	.35	.50		.04	
Tractors (farmall type, over 60 h.p.); pump (water)	7.07	.35	.50		.04	
Post hole diggers (mechanical)	7.20	.35	.50		.04	
Mixer (asphalt up to 4 tons per batch) brooms, power (Wayne, Saginaw, and similar); bulldozers (under D9 or similar); saws (concrete); loaders (fork lift or lumber stacker on construction job site, Drott travel lift); scrapers (carryall type, single); roller, tampers and vibrator, twin engine	7.23	.35	.50		.04

CHANGE—Continued						
Chelan, Douglas, Kittitas, Okanogan and Yakima Counties west of the 120th Meridian—Continued						
Power equipment operators—Continued						
Loaders (elevating Athey, Barber Greene, and similar types); loaders (overhead and front end, under 2½ yds.); mixers (concrete and batch 200 yds. per hour and under); pump (concrete, Fuller Kenyon, pump crete); roller, tamper, and vibrator (on plant, road mix or multilift materials); trenching machines (under 16 inches); batch plant and mixer (200 yds. per hour and under); conveyors; crushers (rock), washing and screening plants; finishing machine operator (concrete paving); hoists, air tuggers, strato tower bucket, elevators and deck winches (power); power plant operators; screedman; spreaders (Blaw Knox, Cedarapids, Jaeger, Flarrety, or similars); cranes (A-frame truck, single power drum)	7.26	.35	.50		.04	
Locomotive, mechanics or welder (heavy duty)	7.31	.35	.50		.04	
Tournapulls, Caterpillar, Euclid scrapers and similar type equipment (25 yds. and under); motor patrol graders (including model 14 and similar)	7.33	.35	.50		.04	
Hoists on steel erection, air tuggers and towermobiles; compressors (steel erection including sandblasting, painting or same); loaders (fork lifts w/tower)	7.35	.35	.50		.04	
Loaders (elevating grader type, Dumor and similar); cement hogs; locomotive (geared or rod engines); paving; scraper (carryall type, double)	7.38	.35	.50		.04	
Tractors (farmall type, used as backhoes, rubber tired, Ford, Ferguson, Case, and similar types, 60 h.p. and under)	7.41	.35	.50		.04	
Bulldozer (D-9 or similar)	7.45	.35	.50		.04	
Trenching machines (16 inches and over)	7.52	.35	.50		.04	
Bump cutter (Concut, Christianson or similar types)	7.53	.35	.50		.40	
Conveyors (beltcrete with power pack and similar types); loaders (elevating belt type, Euclid and similar); batch plant and mixer (over 200 yds. per hour through 400 yds.); mixer (concrete and batch, over 200 yds. per hour through 400 yds.), paving (dual), asphalt (4 tons and over per batch)	7.58	.35	.50		.04	
Motor patrol graders (over model 14 and similar); derricks all-drilling machines (core, cable, rotary and exploration); linked pusher, pay dozer (quad 9 and similar); mucking machines (mole or tunnel drill and/or shield); subgrader (Gurries or other automatic types); Tournapulls, Caterpillar, Euclid scrapers and similar type equipment (25 yds. through 40 yds.); tractors (farmall type, used as backhoes, rubber tired, Ford, Ferguson, Case and similar, over 60 h.p.); piledriver engineers (L.B. Foster puller or similar paving breaker); cranes (A-frame truck, dbl. power drum); crawler (truck type, floating, locomotive, Whirley, either 3 yds. and under, or 150′ of boom, including jibs, and under, or 45 tons and under); Hydralifts; Hyster cat cranes ad attachments· bulldozers (engaged) in yo-yo operation (while clearing and scaling); shovels (crawler and truck type, all attachments, 3 yds. and under); cranes, chipper, wood with boom attachment; mixer (mobile type with hoist combination); cableways (3 yds. and under); loaders (fork lift with power boom and swing attachment); loaders (overhead and front end, 2½ yds. up to 4 yds.)	7.63	.35	.50		.04	
Loaders (overhead and front end, 4 yds. up to 8 yds.)	7.85	.35	.50		.04	
Mixer (concrete mixers and batch over 400 yds. per hour through 600 yds. per hour)	7.89	.35	.50		.04	
Tournapulls, Caterpillar, Euclid scraper (over 70 yds. through 55 yds.)	7.94	.35	.50		.04	
Slip form paver (Zimmerman, CMI, and other similar types); cableway (over 3 yds.); crane (crawler, truck type, floating, locomotive, Whirley, either over 3 yds. or over 150′ of boom including jibs, or over 45 tons up to 100 tons); crane (tower cranes, Pecco, Lorraine, Bucyrus, and similar types: remote control operator (on rubber tired earth moving equipment); helicopter winch operator; shovel (crawler and truck type, all attachments, over 3 yds. up to 6 yds.)	8.02	.35	.50		.04	
Tournapulls, Caterpillar, Euclid scrapers and similar type equipment (over 55 yds. through 70 yds.)	8.24	.35	.50		.04	
Loaders (overhead and front end, 8 yds. and over)	8.44	.35	.50		.04	
Tournapulls, Caterpillar, Euclid scrapers and similar type equipment (over 70 yds. through 85 yds.)	8.55	.35	.50		.04	
Shovel (crawler and truck type, all attachments, 6 yds. and over); cranes (crawler, truck type, floating, locomotive, Whirley, either 6 yds. and over, 200′ of boom including jibs, and over, or 100 tons and over)	8.57	.35	.50		.04	
Tournapulls, Caterpillar, Euclid scrapers and similar type equipment (over 85 yds. through 100 yds.)	8.85	.35	.50		.04

Power equipment operator—Continued						
Group II:						
A-frame truck (single-drum); assistant refrigeration plant (under 1,000 tons); assistant plant operator, fireman or pugmixer (asphalt); Bagley or stationary scraper; batch plant and wet mix operator, single unit (concrete); belt finishing machine; bending machine (pipeline); blower operator (cement); cement hog; compressor (1,000 cu. ft. or over, 2 or more—gas, diesel, or electric power); concrete saw (multiple cut); distributor leverman; dope pots (power agitated); equipment serviceman, greaser and oiler; forklift or lumber stacker, hydralift and similar; gin trucks (pipeline); hoist, single drum; loaders (bucket elevators and conveyors); longitudinal float; mixer (portable—concrete); pavement breaker, Hydra-Hammer and similar); posthold auger or punch; power broom; railroad ballast regulation operator, (self-propelled); railroad power tamper operator, (self-propelled); railroad power tamper jack operator (self-propelled); spray curing machine (concrete); spreader box (self-propelled); straddle buggy (Ross and similar on construction jobsite); tractor (farm type R/T with attachments except backhoe); tugger operator	6.60	.45	.45		.015	
Group III:						
A-frame truck (2 or more drums); assistant refrigeration plant and chiller operator (over 1,000 tons); backfillers (Cleveland and similar); belt-crete conveyors with powerpack or similar; belt loader (Kocal or similar); blade operator (Motor Patrol and attachments); boat operators; boom cats (side); boring machine (earth); boring machine (rock under 8" bit) (Quarry Master, Joy or similar); bump cutter (Wayne, Saginaw, or similar); canal lining machine (concrete); cleaning and doping machine (pipeline); concrete pumps (squeeze-crete, flow-crete, pump-crete, Whitman and similar); drills (churn, core, calyx, or diamond); elevating belt-type loader (Euclid, Barber, Green or similar); elevating grader-type loader (Dumor, Adams, or similar); generator plant engineers (diesel electric); Gunite combination mixer and compressor; hoist, (2 or more drums or tower hoist); loaders, (overhead and front end, under 4 yds. R/T); locomotive engineer; mixermobile; oiler and cable tender, mucking machine; paver (asphalt and concrete); pump (grout or jet); refrigeration plant engineer (1,000 tons); rollerman (finishing pavement); rubber-tired scrapers (1 motor with 1 scraper, under 40 yds.); screed operator; soil stabilizer (P & H or similar); spreader machine; tractor (crawler, including dozer, scraper, drills, booms, rollers, etc.); traverse finishing machine; trenching machines (under 7 ft. depth capacity); turnhead operator	6.85	.45	.45		.015	
Group IV:						
H.D. mechanic; H.D. welder; refrigeration plant engineer (1,000 tons and over); semiautomatic welding machine	6.95	.45	.45		.015	
Group V:						
Asphalt plant operator; crusher and screening plant operator; rubber-tired scrapers, multi-engine power with one scraper (Euclid, TS-24 and similar); rubber-tired scraper, 1 motor with 1 scraper (40 yds. and over); single engine with 2 scrapers (Letourneau, Tandem B, and similar); surface heater and planer machine	7.00	.45	.45		.015	
Group VI:						
Automatic subgrader (ditches and trimmers) (R. A. Hansen and similar); backhoes (under 3 yds.); batch and wet mix operator-multiple units (2 and including 4); clamshell operator (under 3 yds.); concrete slip form paver; cranes (under 65 tons); derricks and stifflegs (under 65 tons); draglines (under 3 yds.); drilling equipment (8" bit and over) (Robbins and similar); hydracranes (Austin, Western Hydra-Hoe and similar with attachments); loader operator (front end and overhead 4 yds. to 8 yds.), mucking machines; piledriving engineers; paver (dual drum); quad-track or similar equipment; railroad track liner operator (self-propelled); rubber-tired scrapers, multiple engines with 2 scrapers; shovels (under 3 yds.); signalmen (Whirleys, Highline Hammerheads or similar); trenching machines (7 ft. depth and over)	7.15	.45	.45		.015	
Group VII:						
Backhoes (3 yds. and over); batch plant (over 4 units); cableway controller-dispatcher; cableway operators; clamshell operator (3 yds. and over); cranes (65 tons and over); derricks and stifflegs (65 tons and over); draglines (3 yds. and over); loader ((360°) revolving kochring Scooper or similar); loaders (overhead and front end over 8 yds.); rubber-tired scrapers (multiple engine with 3 or more scrapers); shovels (3 yds. and over); tower crane; Whirleys and Hammerheads (all)	7.40	.45	.45		.015	
Underground work—Add 10% to the classification. (Not to include open pits, cuts, ditches, trenches, and such work as paving, etc.)						
All crane booms: 130' to 200'—$0.15/hr. additional to classification; over 200'—$0.30/hr. additional to classification.						
Yo-Yo dozer: 10% additional.						
Truck drivers:						
Flat bed truck, single rear axle; forklift, 3,000 lbs. and under; fuel truck driver (steam cleaner and washer); helper and swamper; leverman loading trucks at bunkers; pickup hauling material; stationary fuel operator; team driver; tractor (small rubber-tired pulling trailer or similar equipment); water tank truck, 1,800 gallons	6.30	.37	.30			
Bus driver or manhaul driver; flat bed truck, dual rear axle; tireman No. 1; warehouseman	6.35	.37	.30			
Buggy mobile and similar; bulk cement tanker; oil tank driver; power operated sweeper; semitrailer, low bed truck and trailer; straddle carrier (Ross, Hyster and similar); transit mixers and trucks hauling concrete (3 yds. and under); trucks, side, end and bottom dump (under 6 yds.); water tank truck (1,801–4,000 gallons)	6.40	.37	.30			
Auto crane (2,000 lb. capacity); bulk cement spreader; Dumptor (6 yds. and under); Flaherty spreader, box driver; flat bed truck (using power takeoff); forklift (over 3,000 lbs.); oil distributor driver (road bootman, leverman, helper); rubber-tired tunnel jumbo; scissors truck; slurry truck driver; transit mixers and trucks hauling concrete (over 3 yds. to 6 yds.); trucks, side, end, and bottom dump (over 6 yds. to 12 yds.); water tank truck (4,001–6,000 gallons); wrecker and tow truck	6.50	.37	.30			
Low boy (under 50 tons); service greaser; tireman No. 2	6.55	.37	.30			
A-frame (Swedish crane, Iowa 3,000, hydrolift); water tank truck (over 6,000 gallons—10¢ for each 2,000 additional)	6.60	.37	.30			
Dumptor (over 6 yds.); transit mixers and trucks hauling concrete (6 yds. to 10 yds.); trucks, side, end, and bottom dump (over 12 yds. including 20 yds.)	6.65	.37	.30			
Low boy (over 50 tons)	6.70	.37	.30			
Transit mixers and trucks hauling concrete (10 yds. to 15 yds.); trucks, side, end, and bottom dump (over 20 yds. including 30 yds.)	6.80	.37	.30			
Tournarocker, dual-wheeled and similar with 2 or 4 wheel power tractor with trailer or yardage scale	6.85	.37	.30			
Transit mixers and trucks hauling concrete (15 yds. to 20 yds.); trucks, side, end, and bottom dump (over 30 yds. to 40 yds.)	6.95	.37	.30			
Transit mixers and trucks hauling concrete (over 20 yds.); trucks, side, end, and bottom dump (over 40 yds.)	7.10	.37	.30

Group VI:						
Automatic subgrader (ditches and trimmers) (R. A. Hansen and similar); backhoes (under 3 yds.); batch and wet mix operator—multiple units (2 and including 4); clamshell operator (under 3 yds.); concrete slip form paver; cranes (under 65 tons); derricks and stifflegs (under 65 tons); draglines (under yds.); drilling equipment (8-inch bit and over) (Robbins and similar); hydra-cranes (Austin, Western Hydra-Hoe, and similar with attachments); loader operator (front end and overhead, 4 yds. to 8 yds.); mucking machines; piledriving engineers; paver (dual drum); quad-track or similar equipment; railroad track liner operator (self-propelled); rubber-tired scrapers, multiple-engines with 2 scrapers; shovels (under 3 yds.); signalmen (Whirleys, Highline, Hammerheads or similar); trenching machines (7-ft. depth and over)	7.15	.45	.45		.015	
Group VII:						
Backhoes (3 yds. and over); batch plant (over 4 units); cableway controller-dispatcher; cableway operators; clamshell operator (3 yds. and over); cranes (65 tons and over); derricks and stifflegs (65 tons and over); draglines (3 yds. and over); loader (360 degrees revolving Koehring Scooper or similar); loaders (overhead and front end, over 8 yds.); rubber-tired scrapers (multiple-engine with 3 or more scrapers); shovels (3 yds. and over); tower crane; Whirleys and Hammerheads (all)	7.40	.45	.45		.015	
Underground work—Add 10% to the classification. (Not to include open pits, cuts, ditches, trenches, and such work as paving, etc.)						
All crane booms: 130 feet to 200 feet—$0.15/hr. additional to classification; over 200 feet—$0.30/hr. additional to classification.						
Yo-Yo dozer: 10% additional.						
Truckdrivers:						
Flatbed truck, single rear axle; forklift, 3,000 lbs. and under; fuel truckdriver (steam cleaner and washer); helper and swamper; leverman loading trucks at bunkers; pickup hauling material; stationary fuel operator; team driver; tractor (small rubber-tired pulling trailer or similar equipment); water tank truck 1,800 gallons	6.30	.37	.30			
Busdriver or manhaul driver; flatbed truck, dual rear axle; fireman No. 1; warehouseman	6.35	.37	.30			
Buggymobile and similar; bulk cement tanker; oil tank driver; power operated sweeper; semi-trailer, lowbed truck and trailer; straddle carrier (Ross, Hyster and similar); transit mixers and trucks hauling concrete (3 yds. and under); trucks, side, end, and bottom dump (under 6 yds.); water tank truck (1,801–4,000 gallons)	6.40	.37	.30

SUPERSEDEAS DECISIONS

State: Indiana; County: Bartholomew.
Decision No.: AM-8,582; Date of decision: Feb. 11, 1972.
Supersedes Decision No. AM-352, dated Aug. 13, 1971, in 36 F.R. 15282.
Description of work: Building construction (excluding single-family homes and garden-type apartments up to and including four stories), heavy and highway construction.

Classification	Basic hourly rates	Fringe benefits payments				
		H & W	Pensions	Vacation	App.-Tr.	Other
Building construction:						
Asbestos workers	$8.10	$0.20	$0.20		$0.02	
Boilermakers	7.95	.40	.50		.01	
Bricklayers: (commerical)	7.35					
Stonemasons	7.35

Terrazzo workers	7.35					
Terrazzo workers' helpers	5.20					
Tile setters	7.35					
Tile setters' helpers	5.10					
Welders receive rate prescribed for craft performing operation to which welding is incidental.						
Paid holidays: A—New Year's Day; B—Memorial Day; C—Independence Day; D—Labor Day; E—Thanksgiving Day; F—Christmas Day.						
Footnotes: a. Holidays: A through F plus Washington's Birthday and Good Friday, providing employee has worked 45 full days during the 120 calendar days prior to the holiday, and the regularly scheduled work days immediately preceding and following the holiday.						
Ind. 2-PEO V:						
Power equipment operators:						
A-frame winch truck, air compressor over 600 cu. ft., air tugger, autograde (CMI), auto patrol, backhoe, ballast regulator (RR), batcher plant (electric control concrete), bending machine (pipe), bituminous plant, bituminous mixer travel plant, bituminous power roller, bulldozer, cable way, Chicago boom, clamshell, concrete mixer (21 cu. ft. or over), concrete paver, concrete pump (crete), crane, craneman, crusher plant, derrick boat, dinkey, dope pots (pipeline), dragline, dredge operator, drill operator, elevating grader, elevator, Ford hoe (or similar type equipment), forklift, formless paver, gantry crane, gradeall, grademan, grout pump, Hetherington paver, highlift, hoist, Hopto, Hough loader (or similar type), hydro crane, hydro hammer, locomotive crane, locomotive, mechanic, mobile mixer, motor crane, motor crane oiler and one (1) piece of minor equipment, mucking machine, multiple tamping machine (RR), overhead crane, pile driver, pulls, push dozer, push boats, roller (sheep foot), Ross carrier, scoop, shovel, side boom, swing crane, tail boom, tar machine (pipeline), throttle valve, trench machine, welder (heavy duty), truck-mounted concrete pump, truck-mounted drill, 2 to 4 pieces of minor equipment, well point, whirleys	$7.38	.20	.20			
Air compressor (200 cu. ft. per min. capacity or more), brakeman, bull float, concrete mixer (over 10S and under 21S), concrete spreader or puddler, deck engine, drill helper, electric vibrator Kompactor (earth or rock), finishing machine, fireman, greaser (on grease facilities servicing heavy equipment), material pump, motor boats, motor crane oiler, oiler and one piece of minor equipment, portable loader, post hole digger, power broom, rock roller, roller-wobble wheel (earth and rock), spike machine (RR), seaman tiller, spreader rock, sub grader, tamping machine, truck mounted drill oiler, welding machine, widener (Apsco or similar type)	6.58	.20	.20			
Air compressor (under 200 cu. ft. per min.), bitunimous distributor, cement saw, conveyor, desk hand, earth roller form grader, generator, guard rail driver, heater, oiler, paving joint machine, steam Jenny, vibrator, water pump	6.03	.20	.20			
Ind.—6-TD K:						
Truckdrivers:						
Drivers on single-axle trucks, low boy helper or flagman, drivers on air compressors and welding machines including those pulled by cars, pickup trucks, tractors, forklifts, dumpsters and val-true when used for specific purpose of transporting materials on the job site. All pickup trucks used on the job for the purpose other than superintendents, foreman of mechanics' transportation or to haul mechanics' tools or repair parts shall be operated by union drivers, warehousemen	4.53	a 9.50	a 10.00		b	
Drivers on mixer trucks 2 yards	4.58	a 9.50	a 10.00		b	
Mechanic helpers and greasers	4.63	a 9.50	a 10.00		b	
Drivers on batch trucks wet or dry three batches or under	4.68	a 9.50	a 10.00		b	
Drivers on tandem-axle trucks (including doglegs), drivers on oil distributors, drivers on mixer trucks 3 yards, winch trucks (when used for transportation of materials suspended from the hook)	4.73	a 9.50	a 10.00		b	
Drivers on single-axle semitrucks, drivers on batch trucks wet or dry or dry over three batches, drivers on pavement breakers	4.78	a 9.50	a 10.00		b	
Drivers on tandem-axle semitrucks, drivers on trac-o-trucks, euclids, tourn-a-pull when pulling other than self-loading equipment up to and including 10 yards, drivers on mixer trucks 4 yards, mechanics	4.88	a 9.50	a 10.00		b	
Drivers on tri-axle trucks	4.93	a 9.50	a 10.00		b	
Drivers on trac-o-trucks, euclids, tourn-a-pull when pulling other than self-loading equipment 11 yards to and including 16 yds., drivers on mixer trucks above 4 yards	5.00	a 9.50	a 10.00		b

Tandem-tandem semitrucks—truck mechanics—heavy equipment type water wagon over 5,000 gallons—triaxle trucks pulling tilt-top trailers—low boys, tandem-tandem axle	4.85	a	b			
Group D:						
Tri-axle trucks—Tandem axle semi trucks—equipment not self loaded or pusher loaded such as Koehring or similar dumpster, track truck, Euclid bottom and hug bottom dump, tournatrailers, tournarockers, Athey wagons, or similar equipment over 12 cu. yds. Tandem axle trucks pulling tilt-top trailers—low boys, tandem axle—Triaxle batch truck	4.80	a	b			
Group E:						
Tandem "Dog-Legs" trucks—semiwater trucks—sprinkler trucks—heavy equipment, type water wagon 5,000 gallon and under	4.75	a	b			
Group F:						
Truck mounted pavement breakers—Tandem trucks over 15 ton payload single axle semi-trucks—farm tractors hauling material—equipment not self loaded or pusher loaded such as Koehring or similar dumpster, track truck, Euclid bottom dump and hug bottom dump tournarockers, Athey wagons, or similar equipment, 12 cu. yds. and under—mixer trucks, all types—single axle trucks pulling tilt—top trailer—low boys, single axle	4.70	a	b			
Group G:						
Tandem axle fuel trucks—tandem axle water trucks—bituminous distributor, 1 man	4.65	a	b			
Group H:						
Single axle "Dog Legs"—tandem trucks or "Dog-Legs"—winch trucks or A frames used for transportation—batch trucks, wet or dry over 3 (34E) batches—grease and maintenance trucks servicing tandem axle trucks	4.60	a	b			
Group I:						
Single axle fuel trucks—single axle water trucks—bituminous distributors, 2-man	4.55	a	b			
Group J:						
Single axle straight trucks—batch trucks, wet or dry 3 (34E) batches or less—grease and maintenance trucks servicing single axle trucks	4.50	a	b			
Group K:						
Helpers, greasers, tiremen, batch board tenders	4.45	a	b			
Group L:						
Pickup trucks	4.35	a	b			

Footnotes:
a. $6 per week for each employee on payroll of employer 30 days or more.
b. $8 per week for each employee on payroll of employer 30 days ormore.

Occupational Safety and Health Administration

ADVISORY COMMITTEE ON ASBESTOS STANDARDS

Notice of Meeting

The first meeting of the Advisory Committee on Asbestos Standards, established under section 7(b) of the Williams-Steiger Occupational Safety and Health Act of 1970 (29 U.S.C. 656), was held on February 3, 1972.

Notice is hereby given that the second meeting of the Committee will take place on February 14 and 15, 1972, in Conference Rooms 102–A, B, and C, U.S. Department of Labor, 14th Street and Constitution Avenue NW., Washington, D.C. The meeting will commence at 9 a.m. on February 14, 1972.

The Advisory Committee has been established to advise the Assistant Secretary of Labor for Occupational Safety and Health with regard to proposed rules concerning exposure of employees to asbestos dust, which were published in the FEDERAL REGISTER on January 12, 1972 (37 F.R. 446). The meeting shall be open to the public.

Signed at Washington, D.C., this 9th day of February 1972.

GEORGE C. GUENTHER,
Assistant Secretary of Labor.

[FR Doc.72–2183 Filed 2–10–72;9:55 am]

Office of the Secretary

PUERTO RICO

Notice of Availability of Extended Unemployment Compensation

The Federal-State Extended Unemployment Compensation Act of 1970, Title II of Public Law 91–373, establishes a program of extended unemployment compensation payable when unemployment is high (according to indicators set forth in the law) to unemployed workers who have received all of the regular compensation to which they are entitled. Pursuant to section 203(b)(2) of the Act, notice is hereby given that Manuel Rivera, Director of the Puerto Rico Bureau of Employment Security, has determined that there was a State "on" indicator in Puerto Rico for the week beginning December 12, 1971, and than an extended benefit period began in the State with the week beginning January 2, 1972.

Signed at Washington, D.C., this 4th day of February 1972.

J. D. HODGSON,
Secretary of Labor.

NATIONAL CAPITAL PLANNING COMMISSION

[NCPC File No. 0735]

PROTECTION AND ENHANCEMENT OF ENVIRONMENTAL QUALITY IN NATIONAL CAPITAL REGION

Policies and Procedures

The Commission's policies and procedures for protection and enhancement of environmental quality in the National Capital Region appear in the FEDERAL REGISTER at 36 F.R. 23706–23709 and 37 FR. 3010. The Commission will consider the addition of the proposed amendments set out below at its meeting on March 2, 1972. Interested parties are requested to submit their views in writing to the Commission within fifteen (15) days from the filing date of this notice in the FEDERAL REGISTER, addressed to:

Ben Reifel, Chairman, National Capital Planning Commission, Washington, D.C. 20576.

The proposed amendments are as follows:

1. Delete subparagraph numbered "(b)" in the first paragraph of Section 2 and renumber subparagraphs "(c)" through "(i)" as subparagraphs "(b)" through "(h)", respectively.

2. Amend subparagraph numbered "(a)" in the first paragraph of section 3 to read as follows:

(a) Require that each submission by Federal agencies shall include a determination by the head of the agency, or other authorized official, as to whether an environmental statement for the project is required pursuant to section 102(2)(C) of the National Environmental Policy Act of 1969. The agency shall submit such an environmental statement, if determined to be required, or a description of the environmental impact of the proposed development.

DANIEL H. SHEAR,
Secretary to the Commission.

FEBRUARY 8, 1972.

Know your Government...

The Manual describes the creation and authority, organization, and functions of the agencies in the legislative, judicial, and executive branches.

Most agency statements include new "Sources of Information" listings which tell you what offices to contact for information on such matters as:

- Consumer activities
- Environmental programs
- Government contracts
- Employment
- Services to small businesses
- Availability of speakers and films for educational and civic groups

This handbook is an indispensable reference tool for teachers, students, librarians, researchers, businessmen, and lawyers who need current official information about the U.S. Government.
