Title 3—The President

MEMORANDUM OF JUNE 21, 1972

[Presidential Determination No. 72–17]

Presidential Determination—Malaysia

Memorandum for the Secretary of State

THE WHITE HOUSE,
Washington, June 21, 1972.

In accordance with the recommendation in the Department of State's memorandum of May 18, I hereby determine, pursuant to Section 4 of the Foreign Military Sales Act, as amended, that the extension of credit to the Government of Malaysia, in connection with the sale of F–5 military aircraft, is important to the national security of the United States.

You are hereby requested on my behalf to report this determination to the Congress as required by law.

This determination shall be published in the FEDERAL REGISTER.

Title 6—ECONOMIC STABILIZATION

Chapter I—Cost of Living Council

PART 105—COST OF LIVING COUNCIL PROCEDURAL REGULATIONS

Subpart F—Use of Information

The purpose of this amendment is to add a new Subpart F "Use of Information" to Part 105 of the Cost of Living Council regulations, to clarify the policy and procedures of the Cost of Living Council with respect to the use by the Internal Revenue Service of economic stabilization information obtained by it from or on behalf of the Cost of Living Council in the performance of any of its duties. It makes clear that any information obtained or developed by the Internal Revenue Service for stabilization purposes may be used by the Internal Revenue Service and the Cost of Living Council in the performance of any of their duties.

Because the purpose of these regulations is to amend Part 105 and to give immediate guidance and information as to Cost of Living Council decisions, the Council finds that publication in accordance with usual rule making procedures is impracticable and that good cause exists for making this regulation effective in less than 30 days. Interested persons may submit written comments regarding the above amendments. Communications should be addressed to the Office of General Counsel, Cost of Living Council, New Executive Office Building, Washington, D.C. 20507.

These amendments shall become effective when filed with the Office of the Federal Register.

DONALD RUMSFELD,
Director, Cost of Living Council.

The following new Subpart F is added at the end of Part 105:

Subpart F—Use of Information

Sec.
105.60 Purpose and scope.
105.61 Definitions.
105.62 Use of economic stabilization information.

AUTHORITY: The provisions of this Subpart F issued under Economic Stabilization Act of 1970, as amended Public Law 91–379, 84 Stat. 799; Public Law 91–558, 84 Stat. 1468; Public Law 92–8, 85 Stat. 13; Public Law 92–15, 85 Stat. 38; Public Law 92–210, 85 Stat. 743; and Executive Order No. 11460, as amended.

Subpart F—Use of Information

§ 105.60 Purpose and scope.

This subpart sets forth the policies and procedures of the Cost of Living Council for the use of economic stabilization information, obtained from or on behalf of the Council for economic stabilization purposes, by the Internal Revenue Service.

§ 105.61 Definitions.

For the purpose of this subpart—"economic stabilization information" includes:

(a) The amount or source of any income, profits, losses, or expenditures of any person, firm, partnership, corporation, or association obtained by the Cost of Living Council, anybody under its jurisdiction, or the Internal Revenue Service in connection with economic stabilization matters;

(b) Any schedule, list, written statement, or other written document filed by or on behalf of any person with the Cost of Living Council, anybody under its jurisdiction, or the Internal Revenue Service, in connection with economic stabilization matters; and

(c) All other reports, oral or written information, factual data, documents, papers, abstracts, memoranda, or evidence taken, or any part thereof, relating to any person and held by the Cost of Living Council, any body under its jurisdiction, or the Internal Revenue Service, in connection with economic stabilization matters. "Person" has the meaning given by section 7701(a)(1) of the Internal Revenue Code of 1954 (68 Stat. 911; 26 U.S.C. 7701(a)(1)).

§ 105.62 Use of economic stabilization information.

(a) Information from or for the Cost of Living Council. Any information which is acquired by the Internal Revenue Service for economic stabilization purposes from or on behalf of the Cost of Living Council, or any body under the jurisdiction of the Cost of Living Council, may also be used by the Internal Revenue Service in the performance of any of its duties.

(b) Information of the Internal Revenue Service. Any information obtained or developed by the Internal Revenue Service for economic stabilization purposes may be used by the Internal Revenue Service and the Cost of Living Council in the performance of any of their duties.

[FR Doc.72–10977 Filed 7–14–72;8:52 am]

Chapter II—Pay Board

PART 201—STABILIZATION OF WAGES AND SALARIES

Intra-Unit Inequities; Exception

The purpose of the amendments set forth below is to incorporate the provisions of a Pay Board resolution regarding "intraplant" inequities, announced in Pay Board News Release PB–79, dated April 26, 1972. The resolution and these amendments provide an exception to the standard for certain comprehensive programs designed to correct pay inequities between job classifications within the same appropriate employee unit. As provided in the resolution the word "plant" is to be defined as an appropriate employee unit within the meaning of § 201.3. Accordingly, the exception has been redesignated as "intraunit" inequities.

Since such amendments are essential to the expeditious implementation of the Economic Stabilization Act of 1970, as amended, and Executive Order No. 11640, as amended, the Board finds that the time for submission of written comments by interested persons in accordance with the usual rule making procedures is impracticable and that good cause exists for promulgating them in less than 30 days. As previously announced by the Board (37 F.R. 7557), comments on Pay Board regulations will be solicited and public hearings will be held upon recodification of the regulations. The substance of the amendments set forth below will be included in such recodification as a notice of proposed rule making.

These amendments are issued pursuant to the authority vested in the Pay Board by the Economic Stabilization Act of 1970, as amended (Public Law 92–210, 85 Stat. 743), Executive Order No. 11640, 37 F.R. 1213 (1972) as amended by Executive Order No. 11660, 37 F.R. 6175 (1972),

and Cost of Living Council Order No. 3, 36 F.R. 20202 (1971), as amended.

Effective date. These amendments are effective on and after July 15, 1972.

GEORGE H. BOLDT,
Chairman of the Pay Board.

Section 201.11 is amended by adding a new subparagraph (8) to paragraph (a) and by revising paragraph (c). These added and revised provisions read as follows:

§ 201.11 Criteria for exceptions.

(a) *In general.* * * *

(8) *Intraunit inequities*—(i) *General.* An exception to the standard will be permitted if the employer demonstrates to the Pay Board (or its delegate) that wage and salary increases in excess of the standard are necessary to correct intraunit inequities (as defined in subdivision (ii) of this subparagraph). In order to qualify for this exception the employer must prepare and submit a comprehensive program which describes the cause or nature of such inequity and the manner in which such inequity is proposed to be corrected. Such program must show each of the following criteria:

(*a*) Job classifications that are described with sufficient detail to identify differences in job content based on relative value of the factors by which the classifications are measured (including e.g., skill, physical strain, responsibility, etc.).

(*b*) A realinement of wage rates that follows a systematic and orderly method for classifying, ranking or rating all of the job classifications in the unit, giving effect to skill, effort, responsibility, working conditions and other factors reflected in the classification content.

(*c*) Rate relationships (expressed in dollars and cents) that are established in accordance with accepted methods for job classification, historical practice in an industry, or through some other demonstrable guide in general use for classification purposes, including an explanation of the derivation of factor weightings on which the system is based.

(*d*) Rate relationships (expressed in dollars and cents) that reflect the different levels of skills as measured by grading selected jobs from the lowest to the highest level, on each of which a significant number of employees are grouped.

(*e*) A computation of the percentage increase in the wage rates or rate ranges for each job classification in the unit requesting exception, pursuant to the methods described in subdivision (iv) of this subparagraph.

(ii) *Intraunit inequity defined.* For purposes of this subparagraph, the term "intraunit inequity" means an inequitable pay situation within an appropriate employee unit resulting from the introduction of new or changed technology whereby—

(*a*) Technological changes are made or introduced in equipment, methods, materials, or processes, and

(*b*) A comprehensive change is required in production methods and techniques which affect not less than 10 percent of the job classifications and not less than 25 percent of the employees in such appropriate employee unit.

(iii) *Limitations on exceptions.* The maximum permissible annual aggregate wage and salary increase with respect to an appropriate employee unit for the control year such exception is claimed shall not exceed 7 percent: *Provided, however,* Such maximum shall be reduced to the extent that the amount necessary for the correction of intraunit inequities is less than 1.5 percent of the unit's base compensation rate. Once this exception has been claimed and allowed with respect to an appropriate employee unit for a control year, it may not be claimed in any succeeding control year with respect to the same unit.

(iv) *Computation of increase in job classification rate or rate ranges.* The computation referred to in subdivision (i)(*e*) of this subparagraph shall exclude "red circle" rates which become personal rates for incumbents and shall reflect, as appropriate, the following percentages—

(*a*) *Single job classification rates.* For single job classification wage rates, the percentage difference between the weighted average of current job rates and the weighted average of the proposed job rates.

(*b*) *Job reclassifications within existing rate ranges.* For the reclassification of jobs without change in the existing rate ranges, the percentage difference between the weighted average of the rates actually paid within the range for each job classification prior to reclassification and the weighted average of the rates to be paid after such reclassification.

(*c*) *Revised rate range structure.* For revised rate range structures, the percentage difference between the weighted average of the midpoint of each job classification in the existing structure and the weighted average of the midpoint of each proposed job classification in the revised structure.

* * * * *

(c) *Procedures for exceptions.* Exceptions pursuant to subparagraphs (1), (2), (6), (7), and (8) of paragraph (a) of this section shall require prior approval of the Pay Board (or its delegate). Exceptions pursuant to subparagraphs (3), (4), and (5) of paragraph (a) of this section shall be self-executing for Category II and III wage and salary increases, but reports of all such wage and salary increases shall be made to the Pay Board (or its delegate). Category I wage and salary increases, including those pursuant to subparagraphs (3), (4), and (5) of paragraph (a) of this section shall require prior approval of the Pay Board (or its delegate).

Title 7—AGRICULTURE

Chapter IX—Agricultural Marketing Service (Marketing Agreements and Orders; Fruits, Vegetables, Nuts), Department of Agriculture

[Navel Orange Regs. 244, 251, Amdt. 1]

PART 907—NAVEL ORANGES GROWN IN ARIZONA AND DESIGNATED PART OF CALIFORNIA

Limitation of Handling

Findings. (1) Pursuant to the marketing agreement, as amended, and Order No. 907, as amended (7 CFR Part 907), regulating the handling of Navel oranges grown in Arizona and designated part of California, effective under the applicable provisions of the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601–674), and upon the basis of the recommendations and information submitted by the Navel Orange Administrative Committee, established under the said amended marketing agreement and order, and upon other available information, it is hereby found that the limitation of handling of such Navel oranges, as hereinafter provided, will tend to effectuate the declared policy of the Act.

(2) It is hereby further found that it is impracticable and contrary to the public interest to postpone the effective date of these amendments until 30 days after publication in the FEDERAL REGISTER (5 U.S.C. 553). Shipments of Navel oranges grown in the production area are currently being regulated as to size by the provision of these regulations which, unless amended, will expire on July 31, 1972. The Navel Orange Administrative Committee recognizes the need to regulate the size composition of initial shipments in late October and early November, prior to issuance of a regular seasonal size regulation. Shipments of small Navel oranges adversely affect prices received for larger Navel oranges and overall grower returns are lowered. The committee has, therefore, recommended extending the effective time of these size regulations until a regular seasonal size regulation can be issued. Notice of rule making concerning this amendment, with an effective date as herein specified, was published in the FEDERAL REGISTER (37 F.R. 12396) and no objection to either this amendment or such effective date was received. Compliance with this amendment will not require any special preparation on the part of persons subject thereto which cannot be completed by the effective time thereof.

Orders, as amended. 1. The dates specified in paragraph (a) of § 907.54 (Navel Orange Regulation 244; 36 F.R. 23289) are hereby amended to read as follows:

§ 907.544 Navel Orange Regulation 244.

(a) Order: From December 17, 1971, through November 16, 1972, * * *

* * * * *

2. The dates specified in paragraph (a) of § 907.551 (Navel Orange Regulation 251; 36 F.R. 25147) are amended to read as follows:

§ 907.551 Navel Orange Regulation 251.

(a) Order: From January 21, 1972, through November 16, 1972, * * *

* * * * *

(Secs. 1–19, 48 Stat. 31, as amended; 7 U.S.C. 601–674)

Dated: July 12, 1972.

Deputy Director, Fruit and Vegetable Division, Agricultural Marketing Service.

[Lemon Reg. 542]

PART 910—LEMONS GROWN IN CALIFORNIA AND ARIZONA

Limitation of Handling

§ 910.842 Lemon Regulation 542.

(a) *Findings.* (1) Pursuant to the marketing agreement, as amended, and Order No. 910, as amended (7 CFR Part 910; 36 F.R. 9061), regulating the handling of lemons grown in California and Arizona, effective under the applicable provisions of the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601–674), and upon the basis of the recommendations and information submitted by the Lemon Administrative Committee, established under the said amended marketing agreement and order, and upon other available information, it is hereby found that the limitation of handling of such lemons, as hereinafter provided, will tend to effectuate the declared policy of the Act.

(2) It is hereby further found that it is impracticable and contrary to the public interest to give preliminary notice, engage in public rule making procedure, and postpone the effective date of this section until 30 days after publication hereof in the FEDERAL REGISTER (5 U.S.C. 553) because the time intervening between the date when information upon which this section is based became available and the time when this section must become effective in order to effectuate the declared policy of the Act is insufficient, and a reasonable time is permitted, under the circumstances, for preparation for such effective time; and good cause exists for making the provisions hereof effective as hereinafter set forth. The committee held an open meeting during the current week, after giving due notice thereof, to consider supply and market conditions for lemons and the need for regulation; interested persons were afforded an opportunity to submit information and views at this meeting; the recommendation and supporting information for regulation during the period specified herein were promptly submitted to the Department after such meeting was held; the provisions of this section, including its effective time, are identical with the aforesaid recommendation of the committee, and information concerning such provisions and effective time has been disseminated among handlers of such lemons; it is necessary, in order to effectuate the declared policy of the Act, to make this section effective during the period herein specified; and compliance with this section will not require any special preparation on the part of persons subject hereto which cannot be completed on or before the effective date hereof. Such committee meeting was held on July 11, 1972.

(b) *Order.* (1) The quantity of lemons grown in California and Arizona which may be handled during the period July 16, 1972, through July 22, 1972, is hereby fixed at 275,000 cartons.

(2) As used in this section, "handled," and "carton(s)" have the same meaning as when used in the said amended marketing agreement and order.

[Lime Reg. 6]

PART 911—LIMES GROWN IN FLORIDA

Limitation of Handling

§ 911.406 Lime Regulation 6.

(a) *Findings.* (1) Pursuant to the marketing agreement, as amended, and Order No. 911, as amended (7 CFR Part 911; 37 F.R. 10497), regulating the handling of limes grown in Florida, effective under the applicable provisions of the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601–674), and upon the basis of the recommendations and information submitted by the Florida Lime Administrative Committee, established under the said amended marketing agreement and order, and upon other available information, it is hereby found that the limitation of handling of such limes, as hereinafter provided, will tend to effectuate the declared policy of the Act.

(2) The need for the regulation stems from the current supply and market situation. There currently is available a much greater supply of limes than can be marketed at a fair return to growers. The current crop of limes is estimated to be the largest crop of record and 14 percent above last season's record crop. Improved weather conditions in most major markets have resulted in an increase in demand for limes in such markets. With the increase in demand and reduced market supply, prices have increased and are now firmer. The committee reports that because of the large supply available in the production area, excessive shipments would likely be made next week in the absence of volume regulation. It estimates that 13,832 bushels were shipped last week and that 24,013 bushels were shipped during the preceding week. Shipments of limes during the current week, the fifth week of volume regulation, are limited to 20,000 bushels. Limitation of volume to such levels has resulted in a more stable and orderly market situation. Thus, continued volume regulation is needed to promote orderly marketing by limiting shipments as hereinafter specified during the week of July 16 through July 22, 1972.

(3) It is hereby further found that it is impracticable and contrary to the public interest to give preliminary notice, engage in public rule making procedure, and postpone the effective date of this section until 30 days after publication hereof in the FEDERAL REGISTER (5 U.S.C. 553) because the time intervening between the date when information upon which this section is based became available and the time when this section must become effective in order to effectuate the declared policy of the Act is insufficient, and a reasonable time is permitted, under the circumstances, for preparation for such effective time; and good cause exists for making the provisions hereof effective as hereinafter set forth. The committee held an open meeting during the current week, after giving due notice thereof, to consider supply and market conditions for Florida limes, and the need for regulation; interested persons were afforded an opportunity to submit information and views at this meeting; the recommendation and supporting information for regulation during the period specified herein were promptly submitted to the Department after such meeting was held; the provisions of this section, including its effective time, are identical with the aforesaid recommendation of the committee, and information concerning such provisions and effective time has been disseminated among handlers of such limes; it is necessary, in order to effectuate the declared policy of the Act, to make this section effective during the period herein specified; and compliance with this section will not require any special preparation on the part of persons subject hereto which cannot be completed on or before the effective date hereof. Such committee meeting was held on July 12, 1972.

(b) *Order.* (1) The quantity of limes grown in Florida which may be handled during the period July 16, 1972, through July 22, 1972, is hereby fixed at 20,000 bushels.

(2) As used in this section, "handled" and "limes" have the same meaning as when used in said amended marketing agreement and order, and "bushel" means 55 pounds of limes.

Title 9—ANIMALS AND ANIMAL PRODUCTS

Chapter I—Animal and Plant Health Inspection Service, Department of Agriculture

SUBCHAPTER C—INTERSTATE TRANSPORTATION OF ANIMALS (INCLUDING POULTRY) AND ANIMAL PRODUCTS

[Docket No. 72-533]

PART 76—HOG CHOLERA AND OTHER COMMUNICABLE SWINE DISEASES

Areas Quarantined

Pursuant to provisions of the Act of May 29, 1884, as amended, the Act of February 2, 1903, as amended, the Act of March 3, 1905, as amended, the Act of September 6, 1961, and the Act of July 2, 1962 (21 U.S.C. 111–113, 114g, 115, 117, 120, 121, 123–126, 134b, 134f), Part 76, Title 9, Code of Federal Regulations, restricting the interstate movement of swine and certain products because of hog cholera and other communicable swine diseases, is hereby amended in the following respects:

1. In § 76.2, in paragraph (e) (1) relating to the State of Texas, subdivision (i) is amended to read:

(1) *Texas.* (i) That portion of the State of Texas comprised of all of Dawson, Harris, Jim Wells, Moore, Nueces, Terry, and Webb Counties.

2. In § 76.2, the reference to the State of Mississippi in paragraph (f) is deleted and paragraph (g) is amended by adding thereto the name of the State of Mississippi.

(Secs. 4–7, 23 Stat. 32, as amended; secs. 1, 2, 32 Stat. 791–792, as amended; secs. 1–4, 33 Stat. 1264, 1265, as amended; sec. 1, 75 Stat. 481; secs. 3, 11, 76 Stat. 130, 132; 21 U.S.C. 111–113, 114g, 115, 117, 120, 121, 123–126, 134b, 134f; 29 F.R. 16210, as amended; 37 F.R. 6327, 6505)

Effective date. The foregoing amendments shall become effective upon issuance.

The amendments excluded all of Cameron, Hidalgo, Starr, and Willacy Counties in Texas from the areas quarantined because of hog cholera. Therefore, the restrictions pertaining to the interstate movement of swine and swine products from or through quarantined areas contained in 9 CFR Part 76, as amended, do not apply to the excluded areas, but will continue to apply to the quaratined areas described in § 76.2(e). Further, the restrictions pertaining to the interstate movement of swine and swine products from nonquarantined areas contained in said Part 76 apply to the excluded areas.

The amendments delete Mississippi from the list of hog cholera Eradication States in § 76.2(f) and add Mississippi to the list of hog cholera Free States in § 76.2(g). The special provisions pertaining to the interstate movement of swine and swine products from Eradication and Free States remain applicable to Mississippi.

The amendments relieve restrictions presently imposed but no longer deemed necessary to prevent the spread of hog cholera and should be made effective promptly in order to be of maximum benefit to affected persons. It does not appear that public participation in this rule making proceeding would make additional relevant information available to the Department.

Accordingly, under the administrative procedure provisions in 5 U.S.C. 553, it is found upon good cause that notice and other public procedure with respect to the amendments are impracticable and unnecessary, and good cause is found for making them effective less than 30 days after publication in the FEDERAL REGISTER.

Done at Washington, D.C., this 11th day of July 1972.

F. J. MULHERN,
Administrator, Animal and Plant Health Inspection Service.

Title 12—BANKS AND BANKING

Chapter II—Federal Reserve System

SUBCHAPTER A—BOARD OF GOVERNORS OF THE FEDERAL RESERVE SYSTEM

[Regs. G, T, and U]

SECURITIES CREDIT TRANSACTIONS

Same Day Substitutions; Convertible "Hedge" Transactions

By notice of proposed rule making published in the FEDERAL REGISTER on June 23, 1972 (37 F.R. 12409), the Board of Governors published a modified proposal to amend Parts 207, 220, and 221 (Regs. G, T, and U) with respect to same-day substitutions and convertible "hedge" transactions.[1] Following consideration of all comments received, and for the reasons set forth in the proposal, the Board has determined that the proposed amendments should be adopted.

To implement its decision, the Board amends Parts 207, 220, and 221 as follows and as set forth below:

1. In Part 207 (Reg. G), § 207.1(j)(2) is amended; a new paragraph (k) is added to § 207.2; and a new paragraph (f) is added to § 207.5.

2. In Part 220 (Reg. T), § 220.3 (a), (b)(1), (d)(3), and (g) are amended; § 220.4(j) subparagraph (4) is amended and a new subparagraph (5) is added; and in § 220.8 (the Supplement to Regulation T) a new paragraph (g) is added and the existing paragraphs (g) and (h) are redesignated as paragraphs (h) and (i), respectively.

3. In Part 221 (Reg. U), § 221.1(c) is amended; and a new paragraph (f) is added to § 221.4.

4. To conform with the above amendments, Part 220 (Reg. T) is amended as follows: In § 220.2(e)(2), the reference to § 220.8(g) is changed to read § 220.8 (h); and in § 220.2(e)(3)(ii), the reference to § 220.8(h) is changed to read § 220.8(i).

5. These amendments are issued pursuant to section 7 of the Securities Exchange Act of 1934 (15 U.S.C. 78g).

Effective date. These amendments are effective September 18, 1972.

By order of the Board of Governors, July 12, 1972.

[SEAL] MICHAEL A. GREENSPAN,
Assistant Secretary.

[1] Previous proposals in this matter were published at 36 F.R. 14032 (July 29, 1971) and 37 F.R. 9243 (May 6, 1972).

PART 207—SECURITIES CREDIT BY PERSONS OTHER THAN BANKS, BROKERS, OR DEALERS

§ 207.1 General rule.

* * * * *

(j) *Withdrawals and substitutions of collateral.* * * *

(2) *Same-day substitution of collateral.* Except as prohibited by § 207.4 (a)(2), in the case of a credit in which the equity ratio is equal to or exceeds the minimum equity ratio as prescribed in § 207.5 (the supplement to the regulation) a lender may permit a substitution of margin securities effected by a purchase and sale on orders executed within the same day: *Provided,* That (i) if the proceeds of the sale exceed the total cost of the purchase, the credit is reduced by at least an amount equal to the retention requirement in respect to the sale less the retention requirement in respect to the purchase, or (ii) if the total cost of the purchase exceeds the proceeds of the sale, the credit may be increased by an amount no greater than the maximum loan value of the securities purchased less the maximum loan value of the securities sold. If the maximum loan value of the collateral securing the credit has become less than the amount of the credit, the amount of the credit may nonetheless be increased if there is provided additional collateral having maximum loan value at least equal to the amount of increase, or the credit is extended pursuant to § 207.4(a).

§ 207.2 Definitions.

* * * * *

(k) The term "equity ratio" means the fraction stated as a percentage in which the denominator is the current market value of the collateral having loan value in respect of the credit and the numerator is such current market value minus the amount of the credit currently owing.

§ 207.5 Supplement.

* * * * *

(f) *Minimum equity ratio.* The minimum equity ratio of a credit subject to § 207.1 is 40 percent.

PART 220—CREDIT BY BROKERS AND DEALERS

§ 220.3 General accounts.

(a) *Contents of general account.* All financial relations between a creditor and a customer, whether recorded in one record or in more than one record, shall be included in and be deemed to be part of the customer's general account with

the creditor, except that the relations which § 220.4 permits to be included in any special account provided for by that section may be included in the appropriate special account, and all transactions in commodities, and, except to the extent provided in paragraph (b)(2) of this section, all transactions in non-equity securities, exempted securities, and in other securities having no loan value in a general account under the provisions of paragraph (c) of this section and § 220.8 (the Supplement to Regulation T) (except unissued securities, short sales, and securities positions to offset short sales other than those permitted in § 220.4(j)(5), purchases to cover short sales and contracts involving an endorsement or guarantee of any put, call, or other option), shall be included in the appropriate special account provided for by § 220.4. During any period when such § 220.8 specifies that margin equity securities shall have no loan value in a general account or special convertible debt security account (sometimes referred to herein as "special convertible security account") subject to § 220.4 (j), any transaction consisting of a purchase of a security other than a purchase of a security to reduce or close out a short position shall be effected in the special cash account provided for by § 220.4(c) or in some other appropriate special account provided for by § 220.4.

(b) *General rule.* (1) (i) A creditor shall not effect for or with any customer in a general account, special bond account subject to § 220.4(i), or special convertible debt security account any transaction which, in combination with the other transactions effected in such account on the same day, creates an excess of the adjusted debit balance of such account over the maximum loan value of the securities in such account, or increases any such excess, unless in connection therewith the creditor obtains, as promptly as possible and in any event before the expiration of 5 full business days following the date of such transaction, the deposit into such account of cash or securities in such amount that the cash deposited plus the loan value of the securities deposited equals or exceeds the excess so created or the increase so caused.

(ii) If the adjusted debit balance in a general account or special convertible debt security account, computed using the margin requirement for short sales specified in § 220.8(g)(2) of the Supplement to Regulation T, exceeds the maximum loan value of the securities in such account specified in § 220.8(g)(1), the account is subject to § 220.8(g) (sometimes referred to herein as "account subject to section 8(g)"). If an account is subject to § 220.8(g) as of the close of business on the preceding business day, it shall be subject in addition to all other requirements applying to the account, to the requirement that the creditor shall not effect any transaction in the account which creates an excess of the adjusted debit balance of such account, computed using the margin requirements for short sales specified in § 220.8(d), over the maximum loan value of the securities in such account specified in § 220.8(a) and (c), or increases any such excess, unless in connection therewith the creditor obtains, as promptly as possible and in any event before the expiration of 5 full business days following the date of such transaction, the deposit into such account of cash or securities in such amount that the cash deposited plus the loan value of the securities deposited equals or exceeds the excess so created or the increase so caused. The required deposit may be reduced by the amount of cash or securities which otherwise could be withdrawn pursuant to the provisions of subparagraph (2) of this paragraph in connection with any other transactions in the account on the same day.

* * * * *

(d) *Adjusted debit balance.* For the purpose of this part, the adjusted debit balance of a general account, special bond account, or special convertible debt security account shall be calculated by taking the sum of the following items:

* * * * *

(3) The current market value of any securities (other than unissued securities) sold short in the general account plus, for each security (other than an exempted security), such amount as the Board shall prescribe from time to time in § 220.8(d) (the Supplement to Regulation T) as the margin required for such short sales, except that such amount so prescribed in such § 220.8(d) need not be included when there are held in the general account or special convertible debt security account the same securities or securities exchangeable or convertible within 90 calendar days, without restriction other than the payment of money, into such securities sold short;

* * * * *

(g) *Transactions on given day.* (1) For the purpose of paragraph (b)(1) of this section, except in the case of an account subject to section 8(g), the question of whether or not an excess of the adjusted debit balance of a general account, special bond account, or special convertible debt security account over the maximum loan value of the securities in such account is created or increased on a given day shall be determined on the basis of all the transactions in the account on such day exclusive of any deposit of cash, deposit of securities, covering transactions, or other liquidation that has been effected on such day, pursuant to the requirements of paragraph (b) or (e) of this section, in connection with a transaction on a previous day.

(2) In the case of an account subject to section 8(g), the required deposit, under paragraph (b)(1)(ii) of this section in connection with transactions on a given day, shall be equal to the amount by which the retention requirement of any securities sold for such account on such day exceeds the maximum loan value of any securities purchased in such account on such day. Such computation may be made at the close of trading on such day and shall be made exclusive of any deposit of cash, deposit of securities, covering transactions or other liquidation that has been effected on such day, pursuant to the requirements of paragraph (b) or (e) of this section, in connection with a transaction on a previous day.

(3) In any case in which an excess so created, or increase so caused, by transactions on a given day does not exceed $100, the creditor need not obtain the deposit specified therefor in paragraph (b)(1) of this section.

(4) Any transaction which serves to meet the requirements of paragraph (e) of this section or otherwise serves to permit any offsetting transaction in an account shall, to that extent, be unavailable to permit any other transaction in such account.

(5) For the purposes of this part (Regulation T), if a security has maximum loan value under paragraph (c)(1) of this section in a general account, or under § 220.4(j) in a special convertible debt security account, a sale of the same security (even though not the same certificate) in such account shall be deemed to be a long sale and shall not be deemed to be or treated as a short sale.

* * * * *

§ 220.4 Special accounts.

* * * * *

(j) *Special convertible debt security account.* * * *

(4) In the event any convertible debt security held in this account is to be converted to a stock, such security shall upon conversion be transferred to the customer's general account against a deposit of cash or margin securities eligible for an extension of credit in this account (counted at their maximum loan value) equal to at least the maximum loan value of the security so transferred without regard to the retention requirement of § 220.3(b)(2).

(5) In a special convertible debt security account the amount of margin equity securities into which a margin debt security held in the account is convertible may be sold short without regard to the margin required for short sales in § 220.8(d) (Supplement to Regulation T), and such short position may be carried in the special convertible debt security account in conformity with the exception provided in § 220.3(d)(3).

* * * * *

§ 220.8 Supplement.

* * * * *

(g) *Account subject to section 8(g).* For purposes of the computation described in § 220.3(b)(1)(ii),

(1) The maximum loan value of a registered non-equity security held in the account on March 11, 1968, and continuously thereafter, and of a margin equity security shall be 60 percent of the current market value of such security, and the maximum loan value of an exempted security held in the account on March 11, 1968, and continuously thereafter shall be the maximum loan value of the security as determined by the creditor in good faith.

(2) The amount to be included in the adjusted debit balance of the account pursuant to § 220.3(d)(3) as margin required for short sales of securities (other than exempted securities) shall be 40 percent of the current market value of each security.

* * * * *

PART 221—CREDIT BY BANKS FOR THE PURPOSE OF PURCHASING OR CARRYING MARGIN STOCKS

§ 221.1 General rule.

* * * * *

(c) *Same-day transactions.* (1) Except as provided in § 221.3(r)(1), a bank may in the case of a credit in which the equity ratio is equal to or exceeds the minimum equity ratio as prescribed in § 221.4 (the supplement to the regulation) permit a substitution of stock whether margin or nonmargin, effected by a purchase and sale on orders executed within the same day: *Provided,* That (i) if the proceeds of the sale exceed the total cost of the purchase, the credit is reduced by at least an amount equal to the "retention requirement" with respect to the sale less the "retention requirement" with respect to the purchase, or (ii) if the total cost of the purchase exceeds the proceeds of the sale, the credit may be increased by an amount no greater than the maximum loan value of the stock purchased less the maximum loan value of the stock sold. If the maximum loan value of the collateral securing the credit has become less than the amount of the credit, the amount of the credit may nonetheless be increased if there is provided additional collateral having maximum loan value at least equal to the amount of the increase.

(2) For the purpose of this paragraph, the term "equity ratio" means the fraction (stated as a percentage) in which the denominator is the current market value of the collateral having loan value in respect of the credit and the numerator is such current market value minus the amount of the credit currently owing.

* * * * *

§ 221.4 Supplement.

* * * * *

(f) *Minimum equity ratio.* The minimum equity ratio of a credit subject to § 221.1 is 40 percent.

Title 14—AERONAUTICS AND SPACE

Chapter I—Federal Aviation Administration, Department of Transportation

[Docket No. 10749, Amdt. 37-33]

PART 37—TECHNICAL STANDARD ORDER AUTHORIZATIONS

Airborne Radio Receiving and Direction Finding Equipment

The purpose of this amendment is to revise the Technical Standard Order for Airborne Radio Receiving and Direction Finding Equipment (TSO-C41b) by updating the minimum performance standards contained in § 37.139 of the Federal Aviation Regulations. This action was published as a notice of proposed rule making (36 F.R. 23, January 1, 1971) and circulated as Notice 70-52, dated December 29, 1970.

Two of the three comments received in response to Notice 70-52 were in favor of the performance standards in the proposed amendment. However, one of these comments suggested that proposed § 37.139(e), by permitting airborne radio receiving and direction finding equipment approved prior to the effective date of the proposed amendment to continue to be manufactured under the provisions of the original approval, weakens the proposed TSO by permitting a double standard. The FAA does not agree. While the proposed standards update the current standards, the current standards are still compatible with the present air traffic control system. At the same time the FAA believes that the requirement that all new models of the equipment meet the proposed standards will make the improved equipment available to operators and will also provide for an orderly transition to such equipment. The same commentator also suggested that the proposed standards also be made applicable to airborne radio receiving and direction finding equipment in the VHF/UHF frequencies. The standards contained in the proposed TSO were developed for equipment intended for operation in the 200-850 KHz range, and the application of these standards to equipment operating in the VHF/UHF frequency range was not considered or proposed. Although the suggestion is outside the scope of the notice, it will be considered in connection with the development of standards for such equipment.

One commentator objected to the proposed TSO on the grounds that a specific discrete frequency channel resolution requirement is implied and that the manufacturer should be permitted to declare his channel frequency resolution and demonstrate compliance with the requirements of that category for which approval is requested. The FAA does not agree. The proposed TSO does not require a specific discrete frequency channel resolution; however, the equipment must have either a 0.5 or 1.0 KHz frequency channel resolution in order for the equipment to be compatible with the transmission frequencies of the ground stations in the areas of the equipment's intended operation. However, it has been brought to the attention of the FAA that the capability criteria is proposed § 37.139(b)(2) are also set forth in the RTCA document referenced in this TSO and that this redundancy may cause some confusion. Therefore, these capability criteria have been removed from § 37.139(b)(2).

Interested persons have been afforded the opportunity to participate in the making of this amendment and all relevant material submitted has been fully considered. The FAA has determined that the proposed amendment as published in Notice 70-52 should be adopted with the only change being the aforementioned change in proposed § 37.139(b)(2).

In consideration of the foregoing and for the reasons set forth in Notice 70-52, § 37.139 of the Federal Aviation Regulations is amended to read as hereinafter set forth, effective August 14, 1972.

§ 37.139 Airborne Radio Receiving and Direction Finding Equipment TSO-C41c.

(a) *Applicability.* This technical standard order prescribes the minimum performance standards that airborne radio receiving and direction finding equipment must meet in order to be identified with the applicable TSO marking. New models of equipment that are to be so identified, and that are manufactured on or after August 14, 1972, must meet the requirements of Radio Technical Commission for Aeronautics Document No. DO-142 entitled "Minimum Performance Standards—Airborne Radio Receiving and Direction Finding Equipment Operating within the Radio Frequency Range of 200-850 Kilohertz" dated January 8, 1970, and Radio Technical Commission for Aeronautics Document No. DO-138 entitled "Environmental Conditions and Test Procedures for Airborne Electronic/Electrical Equipment and Instruments" dated June 27, 1968. RTCA Documents Nos. DO-142 and DO-138 are incorporated herein in accordance with 5 U.S.C. 552(a)(1) and § 37.23. Additionally, RTCA Documents Nos. DO-142 and DO-138 may be examined at any FAA regional office of the Chief of Engineering and Manufacturing Branch (or in the case of the Western Region, the Chief, Aircraft Engineering Division), and may be obtained from the RTCA Secretariat, Suite 655, 1717 H Street NW., Washington, DC 20006, at a cost of $6 per copy for Document No. DO-142 and $8 per copy for Document No. DO-138.

(b) *Marking.* In addition to the markings specified in § 37.7 the equipment must be permanently and legibly marked with the following:

(1) The equipment must be marked to indicate the environmental categories over which it has been designed to operate in accordance with Appendix B of RTCA Document DO-138.

(2) The equipment must be marked to indicate its class as follows:

(i) *Class A.* Equipment intended for operation in the European-Mediterranean area (EUM) and in other areas where the frequency separation and geographical separation of ground facilities and their output powers are similar to the EUM area.

(ii) *Class B.* Equipment intended for operation in the United States of America and its possessions, and in other areas where the frequency and geographical separation of ground facilities and their output powers are similar to the U.S.A. areas.

Equipment which complies with both Class A and Class B requirements need only be marked as Class A equipment.

(3) Each separate component of the equipment (antenna, receiver, indicator, etc.) must be identified with at least the name of the manufacturer, the TSO number, and the environmental categories over which the component is designed to operate. Where an environmental test procedure described in DO-138 is not applicable to that component and the test is not conducted, an "X" should be placed in the space assigned for that environmental category.

(c) *Data requirements.* In accordance with § 37.5, the manufacturer must furnish to the Chief, Engineering and Manufacturing Branch, Flight Standards Division (or in the case of the Western Region, the Chief, Aircraft Engineering Division), Federal Aviation Administration, in the region in which the manufacturer is located, the following technical data:

(1) One copy of the manufacturer's operating instructions and equipment limitations including a statement specifying the class of the equipment.

(2) One copy of the installation procedures with applicable schematic drawings, wiring diagrams, and specifications, and a list of components (by part number) or possible combinations thereof, which make up a system complying with this TSO. The procedures must show all limitations, restrictions, or other conditions pertinent to the installation.

(3) One copy of the manufacturer's test report.

(d) One copy of the installation procedures with the data identified in paragraph (c)(2) of this section, including limitations, restrictions, or other conditions pertinent to the installation must be furnished with each equipment manufactured under this TSO.

(e) *Previously approved equipment.* Airborne radio receiving and direction finding equipment approved prior to the effective date of this section may continue to be manufactured under the provisions of its original approval.

PART 71—DESIGNATION OF FEDERAL AIRWAYS, AREA LOW ROUTES, CONTROLLED AIRSPACE, AND REPORTING POINTS

Alteration of Control Areas

The purpose of this amendment to Part 71 of the Federal Aviation Regulations is to alter the description of the control areas associated with Jet Route No. 502 outside the continental control area.

J-502 is presently designated between Seattle, Wash., and Kotzebue, Alaska. The U.S. portion of this jet route is designated within the continental control area, except the short segment between the United States/Canadian border and the Annette Island, Alaska, VORTAC.

Accordingly, action is taken herein to alter the description of the control areas associated with J-502 in § 71.161 (37 F.R. 2047) so that the description of the control areas adjust to the current jet route alinment.

Since this amendment is minor in nature and no substantive change in the regulation is effected, notice and public procedure thereon are unnecessary and good cause exists for making this amendment effective on less than 30 days' notice.

In consideration of the foregoing, Part 71 of the Federal Aviation Regulations is amended effective upon publication in the FEDERAL REGISTER (7-15-72) as hereinafter set forth.

In § 71.161 (37 F.R. 2047) Jet Route No. 502 is altered to read:

Jet Route No. 502 from the United States/Canadian border to Annette Island, Alaska.

(Sec. 307(a), Federal Aviation Act of 1958, 49 U.S.C. 1348(a); sec. 6(c), Department of Transportation Act, 49 U.S.C. 1655(c))

Issued in Washington, D.C., on July 10, 1972.

Chief, Airspace and Air Traffic Rules Division.

Chapter I—Bureau of Customs, Department of the Treasury

[T.D. 72-189]

PART 4—VESSELS IN FOREIGN AND DOMESTIC TRADES

PART 6—AIR COMMERCE REGULATIONS

Unlading, Lading and Overtime Services

On October 28, 197', a notice of proposed rule making regarding the issuance and revocation of permits—special licenses for unlading, lading, and overtime services of Customs officers was published in the FEDERAL REGISTER (36 F.R. 20697). Interested persons were given an opportunity to submit written comments, suggestions, or objections. None were submitted. The amendments as proposed are hereby adopted as set forth below:

Section 4.10 is amended to read:

§ 4.10 Request for overtime services.

Request for overtime services in connection with the entry or clearance of a vessel, including the boarding of a vessel for the purpose of preliminary entry,[55] shall be made on Customs Form 3171. (See § 24.16 of this chapter regarding pleasure vessels.) Such request for overtime services must specify the nature of the services desired and the exact times when they will be needed, unless a term special license (unlimited or limited to the service requested) has been issued (see § 4.30(g)) and arrangements are made locally so that the proper Customs officer will be notified during official hours in advance of the rendering of the services as to the nature of the services desired and the exact times they will be needed. Such request shall not be approved (previously issued term special licenses shall be revoked) unless the carrier complies with the provisions of paragraphs (l) and (m) of § 4.30 regarding terminal facilities and employee lists, respectively, and the required cash deposit or bond, on Customs Form 7567 or 7569, has been received. Separate bonds shall be required if overtime services are requested by different principals.

(Secs. 448, 451, 46 Stat. 714, as amended, 715, as amended; 19 U.S.C. 1448, 1451)

Paragraphs (a), (b), (c), (f), (g), (h), and (i) of § 4.30 are amended to read as follows:

§ 4.30 Permits and special licenses for unlading and lading.

(a) Except as prescribed in paragraph (f), (g), or (k) of this section or in § 123.8 of this chapter, and except in the case of a vessel exempt from entry or clearance under 19 U.S.C. 288,[56] no passengers,[56] cargo,[57] baggage,[57] or other article [58] shall be unladen from a vessel which arrives directly or indirectly from any port or place outside the Customs territory of the United States and no cargo, baggage, or other article shall be laden [59] on a vessel destined to a port or place outside the Customs territory of the United States, if Customs supervision of such unlading [60] or lading [61] is required, until the district director of Customs shall have issued, on Customs Form 3171, a permit (for lading and unlading during official hours) or a special license (for lading or unlading at night or on a Sunday or holiday when overtime services of a Customs officer is required).

(b) Application for a permit or special license shall be made by the master, owner, or agent of the vessel on Customs Form 3171, and shall specifically indicate the type of service desired at that

time, unless a term permit or term special license has been issued. Arrangements, in the case of a term permit or term special license, shall be made locally so that the proper Customs officer will be notified during official hours in advance of the rendering of the services as to the nature of the services desired and the exact times they will be needed. An agent of a vessel may limit his application to operations involved in the entry and unlading of the vessel or to operations involved in its lading and clearance. Such limitation shall be specifically noted on the application.

(c) The request for a permit or a special license shall not be approved (previously issued term permits or special licenses shall be revoked) unless the carrier complies with the provisions of paragraphs (l) and (m) of this section regarding terminal facilities and employee lists, and the required cash deposit or bond,[3] on Customs Form 7567 or 7569, has been received. When a carrier has on file a bond on Customs Form 3587, no further bond shall be required solely by reason of the unlading or lading at night or on a Sunday or holiday of merchandise or baggage covered by bonded transportation entries. Separate bonds shall be required if overtime services are requested by different principals.

* * * * *

(f) The district director may issue a term permit on Customs Form 3171 for any period up to 1 year, but not longer than the period of the supporting bond, to unlade merchandise, passengers, or baggage, or to lade merchandise or baggage during official hours.

(g) The district director may issue a term special license on Customs Form 3171 for any period up to 1 year, but not longer than the period of the supporting bond, to unlade merchandise, passengers, or baggage, or to lade merchandise or baggage at night or on a Sunday or holiday when Customs supervision is required. (See § 24.16 of this chapter regarding pleasure vessels.)

(h) A special license for the unlading or lading of a vessel at night or on a Sunday or holiday shall be refused by the district director if the character of the merchandise or the conditions or facilities at the place of unlading or lading render the issuance of such special license dangerous to the revenue. In no case shall a special license for unlading or lading at night or on a Sunday or holiday be granted except on the ground of commercial necessity.

(i) The district director shall not issue a permit or special license to unlade cargo or equipment of vessels arriving directly or indirectly from any port or place outside the United States, except on compliance with one or more of the following conditions:

(1) The merchandise shall have been duly entered and permits issued; or

(2) A vessel bond, on Customs Form 7567 or 7569, or cash deposit shall have been given; or

(3) The merchandise is to be discharged into the custody of the district director as provided for in section 490(b), Tariff Act of 1930.[4]

(Secs. 448, 450, 451, 46 Stat. 714, as amended, 715, as amended; 19 U.S.C. 1448, 1450, 1451)

Section 6.2 (e) and (f) are amended to read as follows:

§ 6.2 Landing requirements.

* * * * *

(e) *Permits to unlade and lade.* A permit on Customs Form 3171 running for any period up to 1 year, but not longer than the period of the supporting bond, may be issued to any and all aircraft to unlade passengers or merchandise, including baggage, or to lade merchandise or baggage during official hours. Except when a term permit has been issued and arrangements are made locally so that the proper Customs officer will be notified during official hours in advance of the rendering of the services as to the specific nature of the services desired and the exact times they will be needed, a separate application for a permit shall be filed in the case of each arrival or departure. The permit shall not be issued (previously issued term permits shall be revoked) unless the carrier complies with the provisions of § 4.30 of this chapter regarding terminal facilities and employee lists, and the required cash deposit or bond, on Customs Form 7567 or 7569, has been received.

(f) *Special licenses to unlade and lade.* A special license on Customs Form 3171 running for any period up to 1 year, but not longer than the period of the supporting bond, may be similarly issued to any and all aircraft to unlade passengers or merchandise, including baggage, or to lade merchandise or baggage from such aircraft at night or on a Sunday or holiday when Customs supervision is required. A previously issued term special license shall be revoked unless the carrier complies with the provisions of § 4.30 of this chapter regarding terminal facilities and employee lists, and the required cash deposit or bond, on Customs Form 7567 or 7569, has been received. (See § 24.16(c) of this chapter as to private aircraft.) Separate bonds shall be required if overtime services are requested by different principals.

PART 111—CUSTOMHOUSE BROKERS

Limitation of Liability to Importers

On March 22, 1972, a notice of proposed rule making was published in the FEDERAL REGISTER (37 F.R. 5820) to explicitly prohibit customhouse brokers from entering into or relying upon contractual language which purports to limit their potential liability to their clients for claims arising out of the brokers' wrongful or negligent action.

All data, views, or arguments received in response to the notice have been duly considered, and the proposed amendment, with technical changes, is hereby adopted as follows:

Part 111 is amended by adding a new § 111.44 as follows:

§ 111.44 Limitation of liability.

A broker may not limit his liability to a client with respect to a claim by the client arising out of the wrongful or negligent action of the broker in connection with a matter handled by him as a broker. Further, no broker shall enter into a contract which purports to so limit his liability.

(Sec. 641, 46 Stat. 759, as amended; 19 U.S.C. 1641)

Effective date. This amendment shall become effective 30 days after the date of its publication in the FEDERAL REGISTER.

Title 21—FOOD AND DRUGS

Chapter I—Food and Drug Administration, Department of Health, Education, and Welfare

SUBCHAPTER A—GENERAL

PART 1—REGULATIONS FOR THE ENFORCEMENT OF THE FEDERAL FOOD, DRUG, AND COSMETIC ACT AND THE FAIR PACKAGING AND LABELING ACT

"Cents-Off" and "Economy Size" Package Promotions; Confirmation of Effective Dates

In the FEDERAL REGISTER of December 30, 1971 (36 F.R. 25219), a new final order was published which established new enforcement regulations (21 CFR 1.1d, 1.1e) to control "cents-off," "economy size," and other savings representations. Thirty days were allowed for filing objections. In response three trade associations and six corporations filed objections, and some of those submitting objections also requested that their objections be made the subject of a public hearing.

The Commissioner of Food and Drugs has evaluated all the responses to the order. The points raised and the Commissioner's response to them are as follows:

1. Four objections and requests for a hearing were made concerning the applicability of § 1.1d of the regulations to labeled savings representations in the form of coupon offers. The objections included the following opinions:

a. Coupon offers are neither "cents-off" offers nor bonus economy offers and, therefore, should not be covered.

b. A reference on the package to a redeemable coupon inside the package is not a saving representation as to that particular package, and, therefore, no authority exists under section 5 of the Fair Packaging and Labeling Act for regulating coupons.

c. The inclusion of coupons in § 1.1d (a), (c), (d), and (f) is meaningless. Regular prices are not changed where coupons are concerned, and, therefore, there is no reason for time/volume limits, establishment of a regular price, or recordkeeping.

d. There is no evidence indicating that regulations covering coupons are necessary to prevent deception.

e. It is not logical or consistent to regulate coupons inserted into packaging in view of the conclusion (under paragraph 13 in the preamble of the final order published December 30, 1971) implying that coupons available in newspapers, by mail, door-to-door, etc., are not considered subject to the regulations unless they are used or displayed in such a manner as to constitute a label or labeling.

No objections were raised to the regulation of labeled savings representations in the form of "cents-off" promotions, two-for-one sales, 1-cent sales, and other such promotions. The Commissioner finds that coupon offers accompanied by labeled savings representations are merely another form of stating or implying that a commodity is offered at a price lower than the ordinary and customary retail price and, accordingly, that no factual issue requiring a hearing has been presented.

After reviewing comments stating that regulation of coupons inserted into packaging is inconsistent with his conclusion (under paragraph 13 in the preamble of the final order published December 30, 1971) that coupons available in newspapers, by mail, door-to-door, etc., are not subject to regulation unless they are used or displayed in a manner as to constitute a label or labeling, the Commisioner has reevaluated the status of newspaper and other coupons not inserted in packaging. Because coupons available in newspapers and from other means of public dissemination are used in such a manner as to constitute labeling when they are displayed in stores in conjunction with a commodity or are redeemed in connection with the purchase of a commodity, such coupon promotions are subject to all applicable provisions of § 1.1d. Regulation of coupons inserted in packaging without concommitant regulation of redeemable coupons disseminated by other promotional endeavors would be tantamount to leaving coupon promotions unregulated.

The Commissioner agrees, however, that the provisions of § 1.1d(a) (2) and (3) are not applicable to such coupon offers, and, therefore, the regulation has been editorially amended as set forth below by adding a new subparagraph (4) to § 1.1d(a) to clarify this point.

2. One objection was directed to the conclusion (under paragraph 9 in the preamble of the final order published on December 30, 1971) that "the 50-percent limit is not applicable to savings promotions on consumer commodities available through catalog sales operations." The Commissioner recognizes that this statement was an inadvertence, since such catalogs are clearly labeling as defined by the Federal Food, Drug, and Cosmetic Act. The Commissioner therefore concludes that the 50-percent limit placed on the number of units of a consumer commodity which may be the subject of a price reduction representation within a 12-month period is applicable to savings promotions on such commodities available through such catalog sales operations.

3. One objection was made to reference to "labeling" in the regulations since the Fair Packaging and Labeling Act pertains only to labels. The Commissioner concludes, as he did under paragraph 2 in the preamble to the final order, that: "While the Fair Packaging and Labeling Act specifically provides for regulations applicable to the label of a package, the foods, drugs, devices, and cosmetics involved are also subject to the label and labeling requirements of the Federal Food, Drug, and Cosmetic Act. It is imperative that these regulations be made applicable to both labels and labeling so as to prevent misleading representations on labeling that could not appear on the label of a subject consumer commodity. This will ensure that the consumer is adequately protected from situations in which a savings representation for a consumer commodity at retail might be abused by the labeling (for example, contiguous placards, shelf displays, etc.)."

4. An objection was made to the coverage of "other savings representations," such as "two-for-one" sales and "1-cent sales." The Commissioner concludes, as he did under paragraph 4 in the preamble to the final order, that such representations connote that the consumer commodity is offered for retail sale at a price lower than the ordinary and customary retail price, and therefore that such promotions are subject to the regulations.

5. Objections were made to the requirement that the consumer commodity package must bear a phrase such as "Price marked is _____ cents off the regular price," and to the requirement for furnishing a sign, placard, or shelf-marker to the retailer even if the sponsor has included a "regular price" spot on the package or label. The Commissioner concludes that both of these requirements are reasonable and necessary for uniform and orderly compliance and that they shall remain in the regulation.

6. One objection was made to the requirement that the consumer be reimbursed for the cost of first class postage in cases where the sponsor requests that the coupon be mailed to some point for redemption. The Commissioner concludes that, unless the cost of mailing the coupons for redemption is reimbursed to the consumer, the savings representations would not be as represented and, therefore, that it is reasonable and proper that this requirement shall remain in the regulation.

7. An objection was made to the requirement that statements disclosing material conditions in the coupon offer be stated in conjunction with the savings representation wherever it appears on the label or labeling of the consumer commodity.

The Commissioner concludes that the regulation shall remain as written because of the importance to the consumer of information concerning all material conditions to the coupon offer.

8. Objection was made to the requirement that the consumer commodity container may bear a saving representation by virtue of size only if the price per unit of weight, volume, measure, or count is reduced by the retailer by at least 5 percent from the actual price of all other packaged or labeled units of the same brand of that commodity offered simultaneously. Such objection was based on the grounds that the sponsor of the economy size promotion cannot control the pricing practices of the retailer. Since this regulation applies not only to the sponsor but also to "all subsequent levels of commerce," the Commissioner concludes that the sponsor would not suffer because of wrongs committed by a retailer and that the provision shall remain as written.

9. One objection was made to limiting "cents-off," coupon, or other savings representations made by a sponsor in a given geographic trade area to three promotions during a 12-month period. It was suggested that six 1-month promotions would be more reasonable.

In this connection the Commissioner has consulted with the Federal Trade Commission and has been advised that FTS staff interprets their guide concerning "free" merchandise promotions (16 CFR 251.1; 36 F.R. 21517) as allowing three such promotions (including offers such as "Buy 1—get 1 Free," "2-for-1 sale," "50 percent off with purchase of Two," "1¢ Sale," etc.) during a 12-month period and that these three promotions may be in addition to the three "cents-off" promotions permitted during a 12-month period by the FTC regulation governing "cents-off" promotions (16 CFR 502.102; 36 F.R. 12284, 23056). Therefore, in order to achieve consistency with the above-cited Federal Trade Commission regulation and guide, the Commissioner concludes it is reasonable and proper that paragraph (d) of § 1.1d should be revised to allow up to six labeled savings representation promotions during a 12-month period provided that no more than three such promotions shall be of the same kind or type (e.g. "cents-off," "bonus offer," "two-for-one sale," "1-cent sale," etc.). Such amendment is being proposed elsewhere in this issue of the FEDERAL REGISTER.

10. Objections were made to the fact that the order was silent concerning disposal of packages in inventory or with the trade as of the effective date of the regulations. The Commissioner recognizes that section 6(d) of the Fair Packaging and Labeling Act provides that regulations when issues shall not preclude the orderly disposal of such packages on hand as of the effective date of the regulations. This provision has been construed to permit the filling of nonconforming packages until the effected date of any applicable regulation and further permits distribution of such nonconforming packaged products in inventory following that date. Unfilled nonconforming packaging on hand as of the effective date may not be used unless modified to comply with the regulation.

Therefore, the Commissioner, pursuant to provisions of the Fair Packaging and Labeling Act (secs. 5, 6, 80 Stat. 1298–1300; 15 U.S.C. 1454–1455) and the Federal Food, Drug, and Cosmetic Act (secs. 403 (a), (f), 502 (a), (c), 602 (a), (c), 701, 52 Stat. 1047, 1050, 1054, 1055, as amended; 21 U.S.C. 343 (a), (f), 352 (a), (c), 362 (a), (c), 371) and under authority delegated to him (21 CFR 2.120), gives notice that no objections to regulations 21 CFR 1.1d and 1.1e were supported by grounds legally sufficient to justify a hearing. Accordingly, the regulations promulgated by the above-identified order became effective 30 days after date of publication except that §§ 1.1d (e), (f), and 1.1e became effective March 31, 1972, and § 1.1d (b)(1) became effective June 30, 1972.

In addition, pursuant to the above-cited provisions of the Fair Packaging and Labeling Act and the Federal Food, Drug, and Cosmetic Act and under authority delegated to the Commissioner (21 CFR 2.120), § 1.1d(a) is editorially amended by adding a new subparagraph (4) as follows:

§ 1.1d "Cents-off," "coupon," or other savings representations.

* * * * *

(a) * * *

(4) The provisions of subparagraphs (2) and (3) of this paragraph are not applicable to such savings representations where the savings differential represented on the package or labeling of the consumer commodity is passed on to the consumer in the form of a redeemable coupon.

* * * * *

Since this amendment is editorial in nature, it shall become effective upon publication of this confirmation in the FEDERAL REGISTER (7–15–72).

SUBCHAPTER E—PESTICIDES PROGRAMS

PART 180—TOLERANCES AND EXEMPTIONS FROM TOLERANCES FOR PESTICIDE CHEMICALS IN OR ON RAW AGRICULTURAL COMMODITIES

Fees

Increases in salaries, laboratory costs, equipment costs, and general overhead, plus increased scope and complexity of pesticide petitions, have resulted in a wide gap between receipts under the current fee schedule set in 1965 and current petition processing expenses. The total expense of processing fee petitions in 1971 was approximately 3⅓ times the total fees collected. Accordingly, a 3⅓ increase in fees is needed to balance petition fee receipts against expenses to process these petitions.

Therefore, pursuant to provisions of the Federal Food, Drug, and Cosmetic Act (secs. 408, 701, 68 Stat. 511, 52 Stat. 1055, as amended; 21 U.S.C. 346a, 371), the authority transferred to the Administrator of the Environmental Protection Agency (35 F.R. 15623), and the authority delegated by the Administrator to the Deputy Assistant Administrator for Pesticides Programs (36 F.R. 9038), the general regulations for tolerances and exemptions from tolerances for pesticide chemicals in or on raw agricultural commodities are amended to provide for an increase in fees and to eliminate the number of numerical tolerance levels as a basis for fee determination by changing § 180.33, as follows:

§ 180.33 Fees.

(a) Except as noted in paragraphs (b) and (c) of this section, each petition or request for the establishment of a tolerance shall be accompanied by a deposit of $10,000, plus $1,000 for each raw agricultural commodity more than nine on which the establishment of a tolerance is requested.

(b) Except as noted in paragraph (d) (2) of this section, a petition requesting a temporary tolerance or a temporary exemption from the requirement of a tolerance shall be accompanied by a deposit of $6,000. A request to renew or extend such temporary tolerance or temporary exemption shall be accompanied by a deposit of $3,000.

(c) Each petition or request for the establishment of a tolerance at a lower numerical level or levels than a tolerance already established for the same pesticide chemical, or for the establishment of a tolerance on additional raw agricultural commodities at the same numerical level as a tolerance already established for the same pesticide chemical, shall be accompanied by a deposit of $1,000, plus $1,000 for each raw agricultural commodity on which a tolerance is requested.

(d) Each petition or request for an exemption from the requirement of a tolerance or the amendment or repeal of a tolerance or exemption shall be accompanied by a deposit of $10,000, unless it meets the requirements of subparagraph (1) or (2) of this paragraph.

(1) Such deposit is not required when, in connection with the change sought under this paragraph, a petition or request is filed for the establishment of new tolerances to take the place of those sought to be amended or repealed and a deposit is made as required by paragraph (a) of this section.

(2) A request for a temporary tolerance for a pesticide chemical which has a tolerance for other uses at the same numerical level or a higher numerical level shall be accompanied by a deposit of $1,000, plus $1,000 for each raw agricultural commodity on which the temporary tolerance is sought.

(e) If a petition or a request proposing the issuance of a regulation is not accepted for filing or processing because it is technically incomplete, the deposit, less a $1,000 fee for clerical handling and initial administrative review, shall be returned unless the petitioner indicates that he wishes to submit a supplement, in which case the deposit will be held by the Administrator, and the supplement shall be accompanied by a nonreturnable fee of $1,000.

(f) When a petition is withdrawn after filing and resubmitted within 6 months, it shall be accompanied by a deposit of $3,000, or by a deposit equal to the one originally submitted, whichever is smaller. If resubmitted after 6 months, it shall be accompanied by the deposit that would be required if it were being submitted for the first time.

(g) After a petition has been filed, any additional information or data submitted in support of it (i.e., any substantive amendment) shall be accompanied by a deposit of $3,000 or by a deposit equal to the one originally submitted, whichever is smaller.

(h) Objections under section 408(d)(5) of the Act shall be accompanied by a filing fee of $1,000.

(i) * * *

(3) An advance deposit shall be made in the amount of $10,000 to cover the costs. Further advance deposits of $10,000 each shall be made upon request

of the Administrator when necessary to prevent arrears in the payment of such costs. Any deposits in excess of actual expenses will be refunded to the depositor.

* * * * *

(m) Any person who believes that payment of these fees will work a hardship on him may petition the Administrator to waive or refund the fees. Ordinarily, fees will not be refundable after a petition is filed under section 408(d) or after scientific review has begun on a petition submitted under section 408 (e) or (j).

Notice and public procedure and delayed effective date are not necessary prerequisites to the promulgation of this order, and I so find, since the increase in fees is necessary to cover the cost of processing petitions and requests for establishing tolerances or exemptions from tolerances for pesticide chemicals in or on raw agricultural commodities, as provided by section 408(o) of the Federal Food, Drug, and Cosmetic Act.

Effective date. This order shall become effective on the date of publication in the FEDERAL REGISTER (7–15–72).

(Sec. 408(0), 68 Stat. 511, as amended; 21 U.S.C. 346a(o))

Dated: July 12, 1972.

Title 41—PUBLIC CONTRACTS AND PROPERTY MANAGEMENT

Chapter 1—Federal Procurement Regulations

PART 1–3—PROCUREMENT BY NEGOTIATION

Subpart 1–3.6—Small Purchases

SMALL PURCHASES FROM MINORITY BUSINESS ENTERPRISES

This amendment of the Federal Procurement Regulations implements recommendations of the Committee on Small Purchases appointed by the Federal Procurement Task Force on Minority Business Enterprise pursuant to Executive Order 11458, March 5, 1969. The purpose of this amendment is to improve opportunities for participation of minority business enterprises in small purchases.

1. Section 1–3.601 is revised as follows:

§ 1–3.601 Purpose.

The objectives of the simplified purchase methods prescribed herein are to reduce the administrative costs in accomplishing small purchases, to improve opportunities for small business concerns and minority business enterprises to obtain a fair proportion of Government purchases and contracts, and to eliminate costly and time consuming paper processes.

2. Section 1–3.602 is amended by revising paragraph (b), as follows:

§ 1–3.602 Policy.

* * * * *

(b) The objective of helping small concerns and minority business enterprises to participate in Federal procurement has wide potential application where small purchases are concerned and, accordingly, placement of small purchases with small concerns and minority business enterprises is specifically encouraged, consistent with other valid considerations such as price feasibility.

* * * * *

3. Section 1–3.603–1 is amended by revising paragraph (b), as follows:

§ 1–3.603–1 Solicitation.

* * * * *

(b) Reasonable competition for small purchases ordinarily can be obtained without soliciting quotations from sources outside the trade area in which the procurement office is located. However, solicitation shall not be limited to suppliers of well known and widely distributed makes or brands, nor shall quotations be solicited purely on a selective personal preference basis. New supply sources, disclosed through trade journals or other media, shall be continuously reviewed and, when appropriate, added to the list of available sources. Each agency shall prescribe procedures for insuring that the small business and minority business enterprise status of each source is recorded on agency small purchase source lists, where lists are maintained, when such status is made known to the agency. Such status information shall be used to insure that small business concerns and minority business enterprises are given opportunities to submit quotations in response to small purchase solicitations. Small business size standards are set forth in Subpart 1–1.7, and minority business enterprise is defined in § 1–1.1310–2.

(Sec. 205(c), 63 Stat. 390; 40 U.S.C. 486(c))

Effective date. This amendment is effective July 17, 1972, but may be observed earlier.

Dated: July 10, 1972.

Chapter 103—Department of Health, Education, and Welfare

SUBCHAPTER A—GENERAL

PART 103–1—INTRODUCTION

Miscellaneous Amendments

Chapter 103, Title 41, Code of Federal Regulations, is amended as set forth below. The purpose of these amendments is to provide current information regarding organizational designations and responsibilities resulting from changes which have occurred since this portion of the chapter was last revised, and to provide clarification in some subject areas. Subpart 103–1.51 lists delegations of authority in matters pertaining to personal property, transportation, and motor vehicles.

It is the general policy of the Department of Health, Education, and Welfare to allow time for interested parties to take part in the rule making process. However, the amendments contained herein involve matters of a minor technical nature. Therefore, the public rule making process is deemed unnecessary in this instance.

1. The table of contents of Part 103–1 is amended to revise Subpart 103–1.1 and add Subpart 103–1.51, as follows:

Subpart 103–1.1—Regulation System

Sec.	
103–1.100	Scope of subpart.
103–1.101	Federal Property Management Regulations System.
103–1.105	Authority for HEWPMR System.
103–1.108	Agency implementation and supplementation of FPMR.
103–1.108–50	Applicability of HEWPMR.
103–1.108–51	Temporary-type HEWPMR.
103–1.109	Numbering in the FPMR System.
103–1.110	Deviation.
103–1.150	Revision.
103–1.151	Exclusion.
103–1.152	Citation.

AUTHORITY: The provisions of this Subpart 103–1.1 are issued under 5 U.S.C. 301; 40 U.S.C. 486(c).

Subpart 103–1.51—Delegations of Authority

Sec.	
103–1.5100	Scope of subpart.
103–1.5101	Authority.
103–1.5102	Use and replacement standards.
103–1.5103	Redelegations.
103–1.5104	General delegations of authority.
103–1.5104–1	[Reserved]
103–1.5104–2	[Reserved]
103–1.5104–3	[Reserved]
103–1.5104–4	Transfer of title to Government-owned motor vehicles.
103–1.5104–5	Use of Government-owned or controlled motor vehicles between domicile and place of employment.
103–1.5104–6	Exceptions to use and replacement standards for typewriters.
103–1.5104–7	Exceptions to replacement standards for material handling equipment.
103–1.5104–8	Exceptions to use standards for executive type office furniture and furnishings.
103–1.5104–9	Exceptions to replacement standards for office machines.
103–1.5104–10	Exceptions to replacement standards for furniture.

AUTHORITY: The provisions of this Subpart 103–1.51 are issued under 5 U.S.C. 301; 40 U.S.C. 486(c).

2. Subpart 103–1.1 is revised as follows:

Subpart 103–1.1—Regulation System

§ 103–1.100 Scope of subpart.

This subpart sets forth introductory material concerning the Department of Health, Education, and Welfare Property Management Regulations (HEWPMR) in terms of the establishment, authority, publication, applicability, implementation, and supplementation of the Federal Property Management Regulations (FPMR). It establishes the method of numbering, and provides the procedure for obtaining authority to deviate from regulations prescribed herein.

§ 103–1.101 Federal Property Management Regulations System.

(a) The HEW Property Management Regulations, as part of the Federal Property Management Regulations System, are issued as this Chapter 103 of Title 41. They relate to the Federal Property Management Regulations (41 CFR Ch. 101), and provide instructions governing the property management operations of the Department of Health, Education, and Welfare (HEW). To effectively provide selected material to specialized groups from the wide range of subject matter covered by the FPMR, the HEWPMR is divided into segments and published as HEW Manuals, e.g., Materiel Management, Telecommunications, Real Property Management, Facilities Planning and Construction.

(b) The effective date of Federal Property Management Regulations (FPMR) throughout HEW will be the date indicated in the respective FPMR unless otherwise provided in the HEW PMR. HEWPMR will be effective on the date of the transmittal notice by which distributed unless otherwise indicated in the respective transmittal notice.

§ 103–1.105 Authority for HEWPMR System.

HEWPMR are issued to establish uniform policies and procedures in the Department within the area of property management. They are prescribed by the Assistant Secretary for Administration and Management, under authority of 5 U.S.C. 301 and section 205(c), Federal Property and Administrative Services Act of 1949, as amended (40 U.S.C. 486(c)), delegated by the Secretary.

§ 103–1.108 Agency implementation and supplementation of FPMR.

(a) HEWPMR considered to be of interest to the general public appear in the Code of Federal Regulations as this Chapter 103 of Title 41, Public Contracts and Property Management, and are published in the FEDERAL REGISTER. Related material, not affecting the public, may also be published in the FEDERAL REGISTER, when its inclusion will provide a logical, comprehensive statement of HEW property management policies and procedures. Copies of the FEDERAL REGISTER in which HEWPMR are published and the Code of Federal Regulations may be purchased by Federal Agencies and the public, at nominal cost, from the Superintendent of Documents, Government Printing Office, Washington, D.C. 20402.

(b) HEWPMR are issued in looseleaf form for use by employees of HEW. The material published in the FEDERAL REGISTER will be identified by a solid vertical line to the left of the text. The length of the line will coincide with the length of the text to indicate the material published.

(c) All subject matter in the Materiel Management Manual issued at the Department level is the responsibility of, and published by, the Director of Procurement and Materiel Management, OS–OASAM. Original approved and signed manuscripts are retained and filed in the Director's office.

(d) Implementary material is defined as that which expands upon related Federal Property Management Regulation material. Supplementary material is that for which there is no counterpart in the FPMR. The illustration in § 103–1.9901 identifies the numbering of supplementing parts assigned to each subchapter. Where material in the FPMR requires no implementation, there is no corresponding number in the HEWPMR. Thus, there are gaps in the HEWPMR sequence of numbers where the FPMR, as written, are applicable to HEW property management functions.

§ 103–1.108–50 Applicability of HEWPMR.

FPMR and HEWPMR apply to all HEW activities unless otherwise specified, or unless a deviation is approved as provided in § 103–1.110.

§ 103–1.108–51 Temporary-type HEWPMR.

HEWPMR include a temporary-type, issued as Circulars, for use under circumstances similar to those specified in FPMR 101–1.103 (a) and (b). Conversion to permanent type HEWPMR shall be made as soon as possible, in most instances within 180 days.

§ 103–1.109 Numbering in the FPMR System.

HEW has been assigned Chapter 103 for use in publishing its implementing and supplementing regulations. These regulations shall be numbered as provided in FPMR 101–1.109(b).

§ 103–1.110 Deviation.

(a) *FPMR.* Requests for deviations from the provisions of FPMR shall be forwarded, through administrative channels, to the Director of Procurement and Materiel Management, OS–OASAM, for consideration. Approved requests shall be forwarded to the General Services Administration for appropriate action. Requests for deviations shall set forth clearly the nature of the required deviations and the circumstances warranting them.

(b) *HEWPMR.* In the interest of establishing and maintaining uniformity to the maximum extent feasible, deviations from the HEWPMR shall be kept to a minimum. Requests for such deviations shall be forwarded, through administrative channels, to the Director of Procurement and Materiel Management, OS–OASAM, for consideration and appropriate action.

§ 103–1.150 Revision.

When circumstances are such that an operating agency deems it essential that regulations set forth in HEWPMR be changed in the interest of program effectiveness, a proposed revision of the regulations may be submitted to the Director of Procurement and Materiel Management, OS–OASAM, for review and consideration. A detailed statement of justification shall be attached to each proposed revision submitted for review.

§ 103–1.151 Exclusion.

(a) Certain HEW property management policies and procedures which come within the scope of this Chapter 103 nevertheless may be excluded therefrom when justified. These exclusions may include the following categories:

(1) Policies or procedures which are instituted on an experimental basis, or which are expected to be effective for a period of less than 6 months.

(2) Policies and procedures pertaining to other functions of HEW as well as to property management functions, where there is need to make the issuance available simultaneously to all HEW employees concerned.

(3) Numerous changes are required in Chapter 103, and all necessary changes cannot be made promptly.

(4) Issuances having extensive and detailed information such as manual guides.

(b) Property management procedures and instructions issued under paragraph (a) (2) and (3) of this section will be published in Chapter 103 at the earliest practicable date.

§ 103–1.152 Citation.

The HEWPMR will be cited in the same manner as the FPMR are cited. Thus this section, in referring to divisions of the FPMR System should be cited as "Section 103–1.152 of Chapter 103." When the official Code of Federal Regulations citation is used, this section should be cited as "41 CFR 103–1.153." Any citation of the FPMR and the HEWPMR may be identified informally, for purposes of brevity, as "FPMR" or "HEWPMR" respectively, followed by the section number, such as "FPMR 101–1.101" or "HEWPMR 103–1.152."

3. Section 103–1.5002–10 is revised to read as follows:

§ 103–1.5002–10 Operating agency.

"Operating agency" shall mean the Food and Drug Administration, Office of Education, Health Services and Mental Health Administration, National Institutes of Health, Social and Rehabilitation Service, and Social Security Administration.

4. Subpart 103–1.51 is added as follows:

Subpart 103–1.51—Delegations of Authority

§ 103–1.5100 Scope of subpart.

This subpart indicates the authority delegated by the Secretary in matters pertaining to personal property, transportation, and motor vehicles.

§ 103–1.5101 Authority.

Delegations of authority set forth in this subpart are made pursuant to the authority of the Assistant Secretary for Administration and Management stated in Chapter 1T of the Organization Manual.

§ 103–1.5102 Use and replacement standards.

Use and replacement standards referred to in this subpart are those stated in Subparts 103–25.3 and 103–25.4, respectively.

§ 103–1.5103 Redelegations.

Redelegations of authority conferred by this subpart shall be in writing over the signature of the official vested with redelegation authority; shall specify the authority delegated; and shall conform with Chapter 8–75 of the DHEW General Administration Manual.

§ 103–1.5104 General delegations of authority.

The authorities set forth in this § 103–1.5104 shall be exercised in accordance with the policies and procedures established by the Office of the Secretary; redelegations of authorities to regional program representatives shall be exercised in accordance with the policies and procedures of the respective Regional Directors.

§ 103–1.5104–1 [Reserved]

§ 103–1.5104–2 [Reserved]

§ 103–1.5104–3 [Reserved]

§ 103–1.5104–4 Transfer of title to Government-owned motor vehicles.

(a) *Authority delegated.* Authority has been delegated to the officials listed below to execute transfers of title to Government-owned motor vehicles:

To whom delegated	*Area of authority*
Director of Procurement and Materiel Management, OS–OASAM.	Department-wide.
Heads of Operating Agencies.	Vehicles assigned to their respective agencies.
Regional Directors	Vehicles assigned to their respective offices.

(b) *Redelegation.* This authority may be redelegated, as authorized.

§ 103–1.5104–5 Use of Government-owned or controlled motor vehicles between domicile and place of employment.

(a) *Authority to make determinations of necessity and authorizations for use.* (1) The Assistant Secretary for Administration and Management may determine the necessity for and authorize the use of Government-owned or controlled motor vehicles between domiciles and place of employment by officials and employees of the Department.

(2) In addition to subparagraph (1) of this paragraph, the officials listed below have been delegated authority to determine the necessity for and authorize the use of Government-owned or controlled vehicles between places of employment and domiciles. Such determinations and authorizations are to be in accordance with the criteria set forth in § 103–38.058. All determinations and authorizations are subject to the approval action described in paragraph (b) of this section.

To whom delegated	*Area of authority*
Heads of Operating Agencies.	Officers and employees in respective organizations.
Regional Directors	Employees of the Department regularly assigned to the staff of the Regional Director.

(3) This authority may be redelegated to such officials as may be deemed appropriate, as authorized.

(b) *Authority to approve determinations and authorizations for use.* (1) The Assistant Secretary for Administration and Management shall approve the use of Government-owned or controlled motor vehicles between domicile and place of employment by officers and employees of the Office of the Secretary at Department headquarters and by those officials who have been delegated the authority as listed in paragraph (a)(2) of this section, or other employees of the Department as required. The approval authority delegated to those designated in subparagraph (2), of this paragraph, does not extend to their use of vehicles.

(2) Authority has been delegated to the officials named below to exercise the approval authority vested in the Secretary by the Act of July 16, 1914, as amended, 31 U.S.C. 638a.(c), in respect to an officer or employee engaged in field work, using a Government-owned or controlled vehicle for transportation between place of employment and domicile when such use has been determined to be necessary and authorized in accordance with paragraph (a) of this section.

To whom delegated	*Area of authority*
Director of Procurement and Materiel Management, OS–OASAM.	Department-wide.
Heads of Operating Agencies.	Officers and employees in their respective organizations.
Regional Directors	Employees of the Department regularly assigned to the staff of the Regional Director.

(3) This authority may not be redelegated without specific written approval of the Assistant Secretary for Administration and Management. Requests for redelegation are to include a justification, the area of authority, and the organization level as well as the title of the position to receive the delegation.

(4) This delegation does not authorize "blanket" or continuing approvals; each separate use authorized from place of employment to domicile shall be reviewed and acted upon. Applicable forms and procedures are prescribed in §§ 103–38.058–1 and 103–38.059–1.

(5) In the exercise of this authority, attention is invited to the provision of 31 U.S.C. 638a.(c), which states in part, "Any officer or employee of the Government who willfully uses or authorizes the use of any Government-owned passenger motor vehicle or aircraft or of any motor vehicle or aircraft leased by the Government, for other than official purposes, or otherwise violates the provisions of this paragraph, shall be suspended from duty by the head of the Department concerned, without compensation, for not less than 1 month, and shall be suspended for a longer period or summarily removed from office if circumstances warrant."

(6) Approving officials shall take such steps as are necessary to insure that authorizations they have approved are available for audits, field station inspection surveys, visits to field stations by staff members, and at other times as appropriate.

§ 103–1.5104–6 Exceptions to use and replacement standards for typewriters.

(a) *Authority delegated.* Authority to grant exceptions to use and replacement standards for electrically and manually operated typewriters has been delegated to the following:

To whom delegated	*Area of authority*
Director of Procurement Materiel Management, OS–OASAM.	Department-wide.
Heads of Operating Agencies.	Their respective agencies.
Regional Directors	Their respective offices.

(b) *Redelegation.* This authority may not be redelegated without specific approval of the Assistant Secretary for Administration and Management. Requests for redelegation are to include a justification, the area of authority, and the organizational level as well as the title of the position to receive the delegation.

§ 103–1.5104–7 Exceptions to replacement standards for materials handling equipment.

(a) *Authority delegated.* Authority to grant exceptions to the replacement standards for materials handling equipment has been delegated to the following:

To whom delegated	*Area of authority*
Director of Procurement and Materiel Management, OS–OASAM.	Department-wide.
Heads of Operating Agencies.	Their respective agencies.
Regional Directors	Their respective offices.

(b) *Redelegation.* This authority may not be redelegated without specific approval of the Assistant Secretary for Administration and Management. Requests for redelegation are to include a justification, the area of authority, and the organizational level as well as the title of the position to receive the delegation.

§ 103–1.5104–8 Exceptions to use standards for executive type office furniture and furnishings.

(a) *Authority delegated.* Authority to grant exceptions to the use standards for

executive type office furniture and furnishings has been delegated to the following:

To whom delegated	Area of authority
Director of Procurement and Materiel Management, OS–OASAM.	Department-wide.
Heads of Operating Agencies.	Their respective agencies.
Regional Directors	Their respective offices.

(b) *Redelegation.* This authority may not be redelegated without specific approval of the Assistant Secretary for Administration and Management. Requests for redelegation are to include a justification, the area of authority, and the organizational level as well as the title of the position to receive the delegation.

§ 103–1.5104–9 Exceptions to replacement standards for office machines.

(a) *Authority delegated.* Authority to approve exceptions to the replacement standards for office machines (electrically and manually operated adding machines, comptometers, and desk calculators excluding electronic type) has been delegated to the following:

To whom delegated	Area of authority
Director of Procurement and Materiel Management, OS–OASAM.	Department-wide.
Heads of Operating Agencies.	Their respective agencies.
Regional Directors	Their respective offices.

(b) *Redelegation.* This authority may be redelegated to the deputy agency head or equivalent and principal administrative officer as well as to the heads of field offices and installations and their respective deputies. In the Regional Office this authority may be redelegated to the Assistant Regional Director. Other redelegations may not be made without the approval of the Assistant Secretary for Administration and Management. Requests for redelegation are to include a justification, the area of authority, and the organizational level as well as the title of the position involved.

§ 103–1.5104–10 Exceptions to replacement standards for furniture.

(a) *Authority delegated.* Authority to approved exceptions to the replacement standards for furniture (office, household, quarters, and institutional) has been delegated to the following:

To whom delegated	Area of authority
Director of Procurement and Materiel Management, OS–OASAM.	Department-wide.
Heads of Operating Agencies.	Their respective agencies.
Regional Directors	Their respective offices.

(b) *Redelegation.* This authority may be redelegated to the deputy agency head or equivalent and principal administrative officer as well as to the heads of field offices and installations and their respective deputies. In the Regional Offices this authority may be redelegated to the Assistant Regional Director. Other redelegations may not be made without the approval of the Assistant Secretary for Administration and Management. Requests for redelegation are to include a justification, the area of authority, and the organizational level as well as the title of the position involved.

Effective date. These amendments shall be effective upon publication in the FEDERAL REGISTER (7–15–72).

Dated July 11, 1972.

N. B. HOUSTON,
Deputy Assistant Secretary for Administration.

Title 47—TELECOMMUNICATION

Chapter I—Federal Communications Commission

[Dockets Nos. 18397, etc.]

CABLE TELEVISION SERVICE; CABLE TELEVISION RELAY SERVICE

Extension of Date for Hearings

Order. In the matter of amendment of Part 74, Subpart K, of the Commission's rules and regulations relative to community antenna television systems; and inquiry into the development of communications technology and services to formulate regulatory policy and rule making and/or legislative proposals, Docket No. 18397, Docket No. 18397–A; amendment of § 74.1107 of the Commission's rules and regulations to avoid filing of repetitious requests, Docket No. 18373; amendment of §§ 74.1031(c) and 74.1105 (a) and (b) of the Commission's rules and regulations as they relate to addition of new television signals, Docket No. 18416; amendment of Part 74, Subpart K, of the Commission's rules and regulations relative to Federal-State or local relationships in the community antenna television system field; and/or formulation of legislative proposals in this respect, Docket No. 18892; amendment of Subpart K of Part 74 of the Commission's rules and regulations with respect to technical standards for community antenna television systems, Docket No. 18894.

1. In paragraph 114 of the "Cable Television Report and Order," FCC 72–108, 37 F.R. 3252, the Commission indicated that certain pending nonhearing matters involving the Cable Television Service and the Cable Television Relay Service would be dismissed as moot unless, within 90 days of the effective date of the new rules, they were supplemented to demonstrate their consistency with the new regulatory program. On June 27, 1972, the law firm of Cole, Zylstra & Raywid requested, on behalf of a number of cable television relay applicants, an extension of time in which to file supplementary pleadings for their clients. The supplements are due on or before June 29, 1972.

2. In support of the request for extension, Cole, Zylstra & Raywid argues that the recently adopted "Memorandum Opinion and Order on Reconsideration of the Cable Television Report and Order," FCC 72–530, released June 26, 1972 (37 F.R. 13848, July 14, 1972), contains basic policy decisions and a number of changes in the new cable television rules, and that they will not have sufficient time to study this document and file appropriate pleadings in the pending cases involving their clients. It appears that the public interest would be served by granting an extension of time.

3. *Accordingly, it is ordered,* Pursuant to § 0.289(c)(5) of the Commission's rules and regulations, that the period for supplementing cable television and cable television relay petitions and applications that were pending prior to March 31, 1972, and were not designated for hearing is extended to and including August 31, 1972.

Adopted: June 28, 1972.

Released: July 3, 1972.

Chief, Cable Television Bureau.

[Docket No. 19484; FCC 72–591]

PART 0—COMMISSION ORGANIZATION

PART 1—PRACTICE AND PROCEDURE

PART 81—STATIONS ON LAND IN THE MARITIME SERVICES AND ALASKA—PUBLIC FIXED

PART 87—AVIATION SERVICES

PART 89—PUBLIC SAFETY RADIO SERVICES

PART 91—INDUSTRIAL RADIO SERVICES

PART 93—LAND TRANSPORTATION RADIO SERVICES

Safety and Special Radio Services

In the matter of amendment of Parts 0, 1, 81, 87, 89, 91, and 93 of the Commission's rules relating to the time in which applications, and amendments thereto, or petitions to deny applications, may be filed in the Safety and Special Radio Services, Docket No. 19484.

Report and order.

1. On March 28, 1972, we released a notice of proposed rule making (NPRM) in this docket. The notice was published in the FEDERAL REGISTER on April 4, 1972 (37 F.R. 6752). The notice provided for the filing of comments on or before May 9, 1972 and reply comments on or before May 19, 1972.

2. In that notice we proposed to establish cutoff dates in our rules for the filing of mutually exclusive applications, major amendments thereto, and petitions to

deny applications in the Safety and Special Radio Services of which public notice is required by section 309(b) of the Communications Act. The proposed rules will apply, generally, to applications for fixed microwave stations; industrial radio positioning stations for which frequencies are assigned on an exclusive basis; aeronautical advisory, enroute, fixed and airdrome control stations; and for maritime public coast stations.

3. Comments in response to the NPRM were filed by Aeronautical Radio, Inc. (ARINC); the Central Committee on Communications Facilities of the American Petroleum Institute (Central Committee); and the Utilities Telecommunications Council (UTC). Central Committee and UTC recommended that in the case of applications for certain industrial fixed point-to-point microwave facilities 60 days be allowed to file a petition to deny, rather than the 30 days proposed in our NPRM. Both commenters stated, essentially, that petitions to deny are rarely filed in those instances, or hearings held, because the rules have provided sufficient time for the parties concerned to negotiate and informally reconcile any conflicting interest, or mutually resolve any problems that may exist. These two commenters argue that more than 30 days is often required for a licensee of an existing facility to obtain copies of an application, assess its impact on the existing facility, and negotiate with the applicant to determine if a petition to deny should be filed to protect the licensee's interests. The commenters believe the 30-day limitation will result in the filing of many petitions to deny in cases where mutually agreeable understandings are later reached that render the petitions to deny moot and unnecessary.

4. ARINC also objects to the 30-day time limitation for filing a petition to deny, not only for microwave facilities, but for all applications involved in this proceeding, and for the same general reasons advanced by the other two commentors. Additionally, ARINC states that all applications, to include those with only minor amendments, should again be placed on public notice when resubmitted to the Commission and that the cutoff dates for opposition or competitive filings should commence with the new notice date. ARINC recommends that § 1.962(e) of the rules be amended to provide for public notice of all resubmitted applications.

5. We have considered the comments filed in this proceeding, but will not adopt the recommendations to provide different time periods within which to file petitions to deny in the cases of applications generally, or for fixed microwave stations specifically. We are not persuaded that in most instances, the circumstances under which applications for the microwave stations or facilities are filed are significantly different from the circumstances that ordinarily exist with respect to other applications that are subject to this proceeding. We do not believe, therefore, that it is necessary to provide a special rule provision applying only to that category of license applications. Nor do we believe, in the great majority of routine cases, that more than 30 days is needed for a party to decide whether to file a petition to deny. If a need arises for additional filing time in a particular instance because of unusual or extraordinary circumstances, relief can be provided through a request for extension of time, for good cause shown, as provided for in §§ 0.332(j) and 1.46 of our rules, and a new § 0.331(b)(22) adopted herein, as set forth below.

6. With respect to ARINC's comment that all resubmitted applications, subject to this proceeding, should be placed on new public notice and that the cutoff dates for opposition or competitive filings should commence with the new public notice date, we do not agree that such rule changes are necessary or desirable. Pursuant to our present rules and procedure, resubmitted applications with substantial amendments are placed on new public notices and the cutoff dates commence with the date of the new notice, whereas the cutoff dates for resubmitted applications with only minor amendments commences with the date of the initial public notice of the application filing. To subject applications in this second category to a new public notice procedure upon resubmission, and a new 30-day waiting period before grant, would be administratively burdensome and delay application processing to the detriment of an applicant without any compensating advantages of substantively better public notice. For these reasons we will not adopt this recommendation of ARINC.

7. In view of the foregoing: *It is ordered,* That pursuant to the authority contained in sections 4(i), 303(r) and 309(d)(1) of the Communications Act of 1934, as amended, Parts 0, 1, 81, 87, 91, and 93 of the Commission's rules are amended, effective August 22, 1972, as set forth below.

8. *It is further ordered,* That the proceeding in Docket 19484 is terminated.

(Secs. 4, 303, 309, 48 Stat., as amended, 1066, 1082, 1085; 47 U.S.C. 154, 303, 309)

Adopted: July 6, 1972.

Released: July 11, 1972.

FEDERAL COMMUNICATIONS COMMISSION,[1]
[SEAL] BEN F. WAPLE,
Secretary.

Chapter I of Title 47 of the Code of Federal Regulations is amended as follows:

1. In § 0.331(b) a new subparagraph (22) is added to read as follows:

§ 0.331 Authority delegated.

* * * * *

(b) * * *

(22) To act on requests for waiver of § 1.918(b) of the rules in this chapter so as to accept untimely filed amendments to certain types of applications prior to their designation for hearing, where the proposed amendment, or amendments, would resolve the controversy or will eliminate one or more issues.

* * * * *

2. In § 1.227 paragraphs (b), (2), and (3) are amended to read as indicated below; a new subparagraph (4) is added as indicated below; and the existing subparagraphs (4) and (5) are renumbered (5) and (6) respectively.

§ 1.227 Consolidations.

* * * * *

(b) * * *

(2) In other than broadcast, common carrier, and safety and special radio services cases, any application that is mutually exclusive with another application or applications already designated for hearing will be consolidated for hearing with such other application or applications only if the later application in question has been filed within 5 days after public notice has been given in the FEDERAL REGISTER of the Commission's order which first designated for hearing the prior application or applications with which such application is in conflict.

(3) In common carrier cases, other than Public Coast stations in the Maritime Mobile Services which are provided for in subparagraph (4) of this paragraph, and except those involving Domestic Public Radio Services, any application that is mutually exclusive with another previously filed application will be considered with such prior filed application only if the later filed application is substantially complete and tendered for filing prior to the close of business on the day preceding the day the earlier filed application is designated for hearing. In the Domestic Public Radio Services no application will be consolidated for hearing as mutually exclusive with a previously filed application or applications unless such application, or such application as amended so as to constitute a major change therein as defined in § 21.33 of this chapter, is substantially completed and tendered for filing by whichever date is earlier: (i) The close of business 1 business day preceding the day on which the Commission designates the earlier filed application for hearing; or (ii) within 60 days after the date of the public notice listing the first prior filed application (with which subsequent applications are in conflict) as having been accepted for filing. An application which is subsequently amended by a major change will, for the purpose of this section, be considered to be a newly filed application. Where major changes which do not relate to the mutually exclusive aspect of a proceeding are warranted, or in the case of multiple mutually exclusive issues where the warranted major changes serve to resolve one or more of the issues but do not relate to the mutually exclusive aspect of the proceeding, such changes or amendments will not serve to alter the existing mutually exclusive status so long as new conflicts are not created.

[1] Commissioner Hooks not participating.

(4) In cases of applications filed in the Safety and Special Radio Services, any application that is mutually exclusive with another application or applications will be consolidated for hearing with such other application or applications only if the later application in question is substantially complete and tendered for filing by whichever date is earlier: (i) Not later than the close of business 1 business day before the Commission adopted an order which first designated for hearing the prior application or applications with which such application is in conflict; or (ii) within 60 days after the date of public notice listing the first prior filed application (with which subsequent applications are in conflict) as having been accepted for filing. An application which is substantially amended by a major change (i.e., substantial change as defined by § 1.962 (c)) will, for the purpose of this section, be considered to be a newly filed application.

* * * * *

3. In § 1.918, paragraph (b) is amended, and a new paragraph (c) is added to read as follows; and the existing paragraph (c) is redesignated (d).

§ 1.918 Amendment of applications.

* * * * *

(b) Any application may be amended as a matter of right prior to the grant of such application by filing the appropriate number of copies of the amendments in question duly executed: *Provided, however,* That when an application is mutually exclusive with another application, or when a petition to deny such an application has been filed, an application to amend the application substantially, as defined in § 1.962(c), or in a way that would improve the applicant's position in any comparative hearing, or to change the issues in any hearing, must be filed not later than 30 days after the filing at the Commission of the petition to deny such application or, in the case of mutually exclusive applications, within 30 days of the public notice of the filing of the mutually exclusive application. If a petition to deny has been filed, or the application is mutually exclusive with another application, the amendment shall be served on the petitioner, or the other applicant, as the case may be.

(c) An application to amend an application after it has been designated for hearing will be considered only upon written petition addressed to the hearing examiner and served upon the parties of record, and will be granted only for good cause shown. A petition which requests a substantial change or to change the applicant's position, or the issues, in a hearing, must be accompanied by a signed statement of a person with knowledge of the facts as to whether or not consideration has been promised to or received by the petitioner, directly or indirectly, in connection with the filing of such petition for amendment. If consideration has been promised, or received, the statement shall set forth in full detail all the relevant facts with sufficient itemization of the consideration to enable the examiner to determine to what extent, if any, that the consideration represents only the reasonable costs of prosecuting the petitioner's application.

* * * * *

4. Section 1.962(g) of the rules is amended to read as follows:

§ 1.962 Public Notice of acceptance for filing; petitions to deny application of specified categories.

* * * * *

(g) Any party in interest may file with the Commission a petition to deny any application, whether as filed originally or as subsequently amended by a substantial amendment as defined in paragraph (c) of this section, subject to the provisions of this section, no later than 30 days after the date of the public notice listing the application, or substantial amendment to the application, as having been accepted for filing. A petitioner shall serve a copy of such petition on the applicant. A petition shall contain specific allegations of fact sufficient to show that the petitioner is a party in interest and that a grant of the application would be prima facie inconsistent with the public interest, convenience, and necessity. Such allegations of fact, except for those of which official notice may be taken, shall be supported by affidavit of a person or persons with personal knowledge thereof.

§§ 81.28, 87.39, 89.69, 91.61 and 93.61 [Amended]

5. Sections 81.28(b), 87.39(b), 89.69 (a), 91.61(a), and 93.61(a) are amended identically to read as follows:

Any application, except for mutually exclusive applications or those against which a petition to deny has been filed, may be amended as a matter of right at any time prior to the time the application is granted or designated for hearing. Each amendment to an application shall be signed and submitted in the same manner as required for the original application. The procedures for amending applications mutually exclusive under this part, applications against which a petition to deny has been filed, and applications designated for hearing are set forth in § 1.918 of this chapter.

PART 15—RADIO FREQUENCY DEVICES

Subpart G—Auditory Training Devices

LICENSING FOR THE PARTIALLY DEAF

Report and order. In the matter of amendment of the Commission's rules and regulations to provide for the licensing of auditory training devices for the partially deaf in the bands 72–73 and 75.4–76 MHz, Docket No. 19185.

1. This proceeding was instituted in response to a series of petitions[1, 2] received from HC Electronics Inc. (hereafter HC).

2. HC manufactures a device known as the "Phonic Ear" which is an auditory training system, composed of an FM wireless microphone, operated by a teacher, and a group of FM receivers worn or carried by students, used in the institutional instruction of children suffering impaired hearing. HC claims that its "Phonic Ear" is currently employed by a substantial number of schools for the deaf and that this system has proved to be a pronounced improvement over existing auditory training aids because it provides student and teacher mobility and its "strong and distortion-free signal" (see discussion in paragraphs 4, et seq., below) allows the student to receive a high fidelity reproduction of the human voice. These petitions are supported with letters from schools and audiologists and with newspaper clippings highly favorable of the results achieved with the HC device.[3]

3. HC developed its Phonic Ear to operate in the 88–108 MHz band pursuant to the provisions of § 15.212 of our rules which requires the device to meet all of the following conditions:

The device shall not cause harmful interference to the FM broadcasting service.

Emissions shall be confined in a 200 kHz band centered on the operating frequency.

On-frequency emission shall not exceed 50 uV/m at 50 feet.

Out-of-band emissions shall not exceed 40 uV/m at 10 feet.

The device shall use only the antenna furnished by the manufacturer.

The device shall be type approved pursuant to the procedures in FCC rules Part 2; § 2.567 of these rules prohibits modification of type approved equipment without prior approval from the Commission.[3a]

4. The petition for rule making and supplement filed by HC asked the Commission to revise Part 15 to provide more liberal operating provisions. In its petition for special relief and supplement, HC requested a temporary waiver of § 15.212 (pending the outcome of the rule

[1] The following petitions were received from HC Electronics Inc.: Petition for Special Relief, RM–1752, filed Feb. 18, 1971; Petition for Rule Making, RM–1752, filed Feb. 18, 1971; Supplement to Petition for Special Relief, filed Mar. 10, 1971; and Supplement to Petition for Rule Making, filed Mar. 22, 1971.

[2] In response to the HC petitions, pleadings were received from Electronic Futures Inc., (a competitor of HC): Reply to supplement to Petition for Special Relief, filed Mar. 22, 1971; Petition for extension of time in which to prepare a response to HC's; Petition for Special Relief. In view of the Commission's action in denying this petition from HC, the Petition for Extension of Time is moot.

[3] In this connection, it should be noted that at least one competitive device has been developed, but no reports of actual classroom experience were available when the HC petitions were filed. Information filed in this proceeding challenge HC's contention. See paragraph 19 et seq.

[3a] This prohibition against modification of type approved equipment is also set out in § 15.237 of Part 15.

making requested in its other petitions) and of § 2.803 to permit continued marketing of its device.[4] In justification, HC provided information regarding its contractual relationships and economic position, and stressed the need for immediate action to keep the Company from going out of business.

5. Having carefully reviewed the information provided, the Commission was convinced that HC had established a need to use RF devices for auditory training and that systems using low power FM modulated transmitters providing short distance communication to small, light weight receivers which can be worn by children on their person should be provided for in our rules. Accordingly, a notice of proposed rule making was issued[5] looking toward the establishment of a new radio service to accommodate devices for the use of educational institutions in the auricular training of the deaf and hearing-impaired. This action was considered to grant in substantial measure HC's request for more liberal operating provisions. In order to expedite action, the Notice did not set out detailed and specific rules, but merely enunciated principles on which actual rules were to be based. The following principles were set out:

Units of transmitting equipment will be required to be individually licensed.

Operation will be permitted in the frequency bands 72–73 MHz and 75.4–76 MHz.

Transmitters must be crystal controlled, use FM emission, have a maximum emission bandwidth of 200 kHz (a modulation limiter to be required), must be limited to a maximum power input of 100 milliwatts, and radiate from a permanently affixed short antenna.

Transmitters must be type accepted; receiving units must be certified.

Receivers must be crystal controlled and employ tone-encoded squelch.[6a]

6. In addition, comments were also solicited on several additional technical specifications, namely:

A requirement for a specified signal-to-noise ratio at the receiver output for all desired ambient fields exceeding 50 microvolts per meter based on HC's suggestion that a 60 dB signal-to-noise ratio was required.

A requirement for an essentially flat system audio response based on HC's proposal for a flat response between 100 and 5000 Hz.

A restriction limiting use of the device only for communication with a receiver used by persons with at least 20 decibels of hearing loss.[6b]

7. In the same action that granted in part HC's petition for rule making, the Commission denied HC's petition for special relief to permit continued marketing of its non-complying 221–T Phonic Ear.[7] This denial was reaffirmed in response to a petition for reconsideration filed by HC on April 15, 1971.[8] Although the Commission had denied HC's request for a blanket waiver of our marketing regulations, individual waivers were granted between June and September 1971 to a number of schools for the deaf to acquire the HC equipment for use in their educational programs. These waivers, based on a showing of urgent need, authorized the schools to use the non-complying HC 221–T Phonic Ear and authorized HC to sell and ship these noncomplying devices to the several schools. However, the Commission was constrained to discontinue granting waivers in September 1971,[9] when the increase in the number of requests for waivers made it evident that HC was trading on our leniency in this matter.

Auditory Training Systems

8. Systems involving electronic amplification for the purpose of auditory training have been in use for some 30 years.[10] In order to place in perspective the RF system which is the subject of this rule making, the various systems currently in use are briefly reviewed.

9. *Hard wire system.* This system involves the use of a microphone connected by wire to an amplifier. The amplifier output is fed by wire to headphones worn by the students. The microphone can be suspended overhead, in which case the teacher must stay within a limited area and may not move about freely. Alternatively, the microphone may be worn as a lavaliere in which case the teacher is trailing the microphone cable and must take care to avoid tripping or getting tangled in the trailing cable. The classroom must be wired up with an outlet at each desk. The student is thus confined to the immediate vicinity of his desk. The chief objections to this system are its cost, its lack of mobility for teacher and student and low signal to noise ratio if the microphone is suspended overhead.

10. *Loop system.* This system consists of a microphone wired to an amplifier as in the hard wire system. The amplified signal is fed into a loop of wire installed at the perimeter of the classroom. The student wears a device which responds to the electromagnetic field generated by the currents in the loop and amplifies the signal sufficiently to operate the student headset. The student is no longer confined to his desk, but must stay within the room. The teacher is subject to the same limitation as in the hard wire system.

11. There are two basic variations of the loop system. In the "audio loop system," the amplified audio signal is fed directly into the loop and the student's receiver picks up the magnetic field established inside the loop. A major problem is spill-over of energy into adjacent rooms. The audio loop system is also subject to interference from any device producing a magnetic field such as 60 Hz hum from the powerline. To minimize the spill-over problem, an "RF or carrier loop system" may be used. In this system, the audio signal is caused to modulate an RF carrier (usually in the range 100–350 kHz) and the modulation RF signal is fed into the loop. The student's receiver picks up by induction the RF field within the loop, demodulates this and feeds the amplified audio signal into the headphones. By using different carriers in adjacent rooms and by tuning the student's receiver, spill-over problems are avoided. The RF radio loop is of course subject to all the problems that confront conventional radio operation on the same frequencies—namely interference from other radio stations and natural manmade radio noise, and nonuniformity of the field, producing dead spots in the room.

12. The most recent addition is the "direct RF system" in which the teacher wears a wireless microphone that transmits by radio a modulated VHF signal to the student receiver which contains a radio receiver tuned to the teacher's transmitter. A further variation of this system involves the inclusion in the receiver case of a local microphone (to pick up room noise and the student's voice), an audio amplifier and a separate earphone. The chief advantage is mobility for both the teacher and the student within the transmission range of the wireless microphone. The classroom need not be wired so the system can be used in any room. By a judicious choice of frequencies, interference between systems in adjacent rooms can be avoided. An RF system is subject to the same problems that confront any RF communication system: Limitation of transmission range, nonuniformity of the output signal when VHF is used, and interference from other stations operating on the same frequencies and from manmade noise. These systems commonly use FM, finding it superior in many respects to AM transmission.

13. A variation of the direct RF system involves transmission from the teacher's wireless microphone to a fixed receiver whose output is then fed into an audio or carrier loop system. This arrangement provides mobility to the teacher while retaining the use of existing loop systems.

14. Both transmitter and receiver in the direct RF system is subject to regulation by the Commission. It must either be licensed or comply with the requirements of Part 15 for operation without an individual license. A small number of such devices used for auditory training

[10] The description of auditory training systems is summarized from comments in this proceeding and from an address delivered to the EARS workshop on August 2, 1968, by Mr. Hyman Goldberg, Chairman Hearing Aid Research Committee of Hearing Aid Industry Conference, EARS Monograph 1, page 14, 1968, published by San Diego Speech and Hearing Center, 8001 Frost Street, San Diego, CA 92123. purposes are presently licensed under Part 91 of our rules.[11] By far the larger number of such devices qualify as wireless microphones to operate without individual license under § 15.212 of Part 15.

RESPONSE TO THE COMMISSION'S PROPOSAL

15. Comments were received from a substantial number of parties. In addition to the initial filings, a number of parties—particularly the manufacturers of auditory training devices—filed supplemental statements, amplifying and elaborating the comments originally filed. Three clearly discernible viewpoints emerge. One view, identified with the manufacturers and vendors urges early adoption of rules, largely along the lines proposed. These comments are discussed in greater detail below.

16. A second view to which many from the scientific and academic communities subscribe, counsels a slower pace with further study and deliberation in order to promulgate the most appropriate and well-considered regulations. The third viewpoint is largely that of the classroom teachers of the deaf and appears to express dismay that the Commission has become concerned with this problem and strongly urge that nothing be done to disrupt present programs or prevent use of existing equipment.

17. The comments submitted by the teachers of the deaf, are filled with praise and enthusiasm for the RF auditory training equipment and further persuade the Commission of the merits of RF auditory training systems. However these comments contain no substantial information to help evaluate the technical requirements for such equipment. Where technical requirements are suggested, the statements made are unsupported by measurements or other data and appear merely to parrot the comments made by the manufacturers.

18. In nearly all cases, the scientific and academic community urged the Commission not to rush into a premature decision, but to establish a committee of experts to study this problem and to prepare a detailed recommendation concerning the requirements for an RF auditory training system. Recognizing the merit of an independent evaluation, the Commission solicited the help of the National Academy of Engineering and of the Department of Health, Education, and Welfare. The National Academy of Engineering convened a meeting of its experts—the Subcommittee on Sensory Aids of its Committee on the Interplay of Engineering with Biology and Medicine. The report of this Subcommittee (hereafter NAE report) was received on October 4, 1971. The Department of Health, Education, and Welfare called on its National Advisory Committee on Education of the Deaf. This committee met with a number of consultants and this report (hereafter HEW report) was received by the Commission on December 22, 1971.

19. The comments received from the manufacturers indicate a large disparity of opinion as to the need to revise the technical specifications for an RF auditory training device. A number of the respondents express anger and dismay at the proceeding. Maico Hearing Instruments (Maico), pointing out that it has been a leader in auditory training equipment for 25 years, states:

> It seems to us to be incomprehensible for for a manufacturer who has not been able to produce his equipment within the specified limits of the regulations to request and receive changes in the rules which would enable him to continue to produce with a minimum of change and cost and yet would require other manufacturers to obsolete present equipment and designs at a large expense to them.[12]
>
> We also oppose any change that would make it possible for a manufacturer who has been violating the regulations to easily be able to comply with changes recommended by them that would be difficult or costly for other manufacturers who have complied with existing rules.[13]

20. Fleetwood Furniture Co. (Fleetwood), which manufactures wireless microphones and associated receiving equipment, states:

> We also feel very strongly that HC has caused serious inconvenience to others by taking a competitive advantage due to their illegal operation. A special band to be used for auditory training is fine, but should not be allocated in such a manner that it only benefits HC who has taken the liberty to circumvent the law.[14]
>
> We understand HC's problem, but we certainly do not feel that the frequency spectrum should be changed to accommodate them at the expense of others who are in this field and who are operating within FCC requirements.[15]

21. The Aurex Corp. (Aurex), the distributor of the Aurex "Open Space" auditory training system using Fleetwood wireless microphones and receivers, states:

> We respectfully submit the above protest to the proposed changes, which, if interpreted to apply to Aurex and Fleetwood, would work great hardship on ourselves, on school users, and on our supplier, Fleetwood.[16]

22. Sonotronics, Ltd., which manufactures a cordless microphone, commends the Commission on its effort to provide effective electronic aids to the education of the deaf. It states further:

> As a vendor with a substantial investment made to comply with FCC regulations, we should not be penalized by permitting a potential broadcast band polluter special relief when it is not necessary. We can supply the necessary technology so that every "hard of hearing" person in this country can have what they need to assist them with their hearing difficulty and do it without pollution of the existing FM broadcast band.[17]

23. Jay L. Warren, Inc. (Warren), which has been in the auditory training equipment business for over 23 years, states:

> We believe that the present FCC regulations are fair, just, and equitable to all manufacturers of auditory training equipment.
>
> * * * * *
>
> Comments made by HC regarding the effect of their device is strictly a matter of opinion by HC. Adequate and superior equipment for the deaf was available long before HC came to realize that a market existed.[18]

24. Other manufacturers, however, support the proposal to provide a more liberal limit on the radiated signal than is permitted under § 15.212 and agree that operation with an input of 100 milliwatts will provide the higher level of signal that is required and will permit use of the direct RF system in playgrounds, on field trips as well as in the classroom.

25. There is general agreement on the Commission's proposal to require crystal control both in the transmitter and in the receiver, although some objections were expressed toward requiring crystal control in the transmitter. Most of the manufacturers favored a requirement to use FM, although Zenith calls such a requirement unduly restrictive and urges that the rules should permit AM and other, more sophisticated, modulation schemes, and Maico points out that its present equipment[19] operates satisfactorily using AM.

26. On the question of receiver standards, the comments are divided. Some of those commenting accept the Commission's proposals. Others accept the proposals in part. Still others argue that detailed receiver specifications should be left to negotiation between the manufacturer and the user. In this way, it is argued, the receiver can be tailored to meet the needs of the particular user.

27. Considerable objection was expressed to imposing a requirement that would limit use to persons having a hearing loss of 20 dB or more. For one thing, it is pointed out, these auditory training devices are frequently used by persons whose hearing loss is less than 20 dB. But of even greater significance is the plea that these devices have been found to be useful with children having other types of handicaps and such use should not arbitrarily be prohibited. The NAE report, for example, says:

> There appears to be no good reason to regulate the degree of hearing loss or educational deficiencies of the children who will be using the equipment.[20]

28. The largest difference of opinion in the comments is on the subject of operating frequency. HC urges continued use

[11] One example is the Maico Hearing Instruments device which is licensed under Part 91 as a Business Radio Station to operate in the 30 MHz band and complies with the technical standards in § 91.555.

of the FM band (88–108 MHz) with 100 mW input. It argues that only in the FM band can a sufficient number of 200 kHz channels (which it deems to be essential) be obtained, that the 72–76 MHz bands proposed by the Commission provide only eight 200 kHz channels—a number "woefully" inadequate for schools that must operate simultaneously in 20 or more rooms. This position is supported by Telex and Electronic Futures, Inc. (EFI). Zenith points out that operation in the 72–76 MHz bands may subject the students to interference from television channels 4 and 5.[21] At the same time Zenith points out the difficulty of finding any substantial number of clear FM channels in a metropolitan area[22] and recommends that wide band operation[23] be permitted on the frequencies in the 152 MHz band allocated for the industrial radio service. In a supplemental statement filed on February 29, 1972, Zenith makes a second proposal that narrow band operation in 30 kHz be permitted in the 88–108 MHz with the operating frequency set at the edge of the channels assigned to FM broadcast stations.

29. Product Assurance Corp. pleads for the assignment of several additional bands, preferably the unused television bands, contending that the anticipated interference problem is immensely exaggerated. This argument is supported by Fleetwood which specifically asks for the use of the UHF frequencies 300–1000 MHz.

30. The NAE report did not address itself to the power or field strength required. Focusing on the educational requirements, the NAE report listed the following as the minimum requirements for an RF auditory training device:

Audio output bandwidth: 100–8000 Hz.
Signal to noise ratio: 55 dB.
Number of channels: 16.
Transmission range: 75 feet.
Equipment should be capable of transmitting voice and signals from tapes, movie film tracks, etc.
Licensing should be limited to the school—not the individual classroom, and station identification should not be required.

The first three requirements could be met, the NAE report points out, if these audio training devices were required to operate in 100 kMz channels using FM. It points out further that the 72–76 MHz band appears to be satisfactory for this purpose and that both the transmitter and receiver should be crystal controlled (although no tolerance is specified). Finally the report concludes that there does not appear to be any reason to regulate the audio response characteristics or squelch function of the receiver, nor to regulate the degree of hearing loss or educational deficiency of the children who will be using the equipment, and that present equipment should be amortized over a period of 10 years.

31. The HEW report recommends that the overall response required is 100–7000 Hz, that the radiated power be determined by field strength measurements (but does not specify what constitutes a suitable level) and that a transmission range of 50 feet be provided. The report questions the need for a signal-to-noise ratio of 55–60 dB stating that under normal ambient noise conditions a signal-to-noise ratio beyond 40 dB is not likely to be realized. It accepts operation in the 72–76 MHz bands and points out that if operation is restricted to 50 kHz, a total of 32 channels is available which would be adequate for most educational programs.

The Bell and Howell Filing

32. Bell and Howell Communications Co. (B&H) filed a petition requesting that the scope of the proceeding be enlarged to encompass its vibratory paging system for use by the deaf and deaf-blind persons. If such action is not deemed advisable, B&H asks that its filing be considered as a separate petition for rule making.

33. The current proceeding is intended to provide spectrum space for devices used in auricular training programs. The B&H proposal is not being considered herein, inasmuch as it is beyond the scope of this proceeding. However, their request will be dealt with under a separate rule making proceeding.

Auditory Training Systems to Operate Without Individual License

34. With the adoption of this order, the Commission has promulgated rules to permit the operation of auditory training systems with a level of output requested in the petition under blanket regulations in Part 15. Although the notice of proposed rule making indicated that licensing of the transmitter would be required, the lukewarm response to licensing prompted the Commission to reconsider its original proposal and to conclude that for auditory training devices used in an institutional program a procedure permitting operation and use under the standards and requirements of Part 15 would be appropriate.

35. These devices will be permitted to operate on channels spaced by either 50 kHz or 200 kHz in the bands 72–73 MHz and 75.4–76 MHz. Although some objections have been submitted regarding the use of these bands, the Commission does not consider that any of the arguments have demonstrated that these bands are not suitable for this service.

36. The objection to the use of these bands appears to stem chiefly from the belief that only eight 200 kHz[24] channels would be made available—a number that everyone agreed was inadequate.[25] This belief is undoubtedly based on the assumption that the Commission proposed to retain the same channeling arrangement that is presently used in the 88–108 MHz band. The comments received have convinced the Commission that 50 kHz channels are adequate to provide the necessary quality of service. Accordingly, the Commission is dividing the available spectrum space into 50 kHz channels which will make a total of 32 channels available. In addition, provision is being made for use of 200 kHz channels by users willing to accept the smaller number of available channels which would obtain.

37. Objections have been expressed to use of the 72–76 MHz band because of the interference potential. The Commission recognizes that there is the possibility of interference from inband fixed and low-power land mobile operations but believes that, in most cases, sharing should pose no problem. The operational fixed stations operating in the band do not use high power as compared to broadcasting stations, and are usually located away from residential areas because they may not cause interference to the reception of television channels 4 and 5. Land mobile stations operating in the band are usually located in industrial areas and are limited to low power inplant industrial uses as well as for controlling models in the Citizens Radio Service. In the case of call boxes, the on the air duty cycle is very low. In addition, there is an inherent protection in the reduced size antenna systems usually employed in the type equipment used as auditory training devices.

38. The comments also raise a spectre of interference from TV channels 4 and 5 which operate at 66–72 MHz and 76–82 MHz respectively. The Commission recognizes the interference potential but doubts that it will prove serious. Interference from TV channel 4 is most likely to stem only from the aural transmitter on the frequency 71.75 MHz—250 kHz from the lowest channel available to the Auditory Training Radio Service. The aural transmitter operates with 10 percent of the power used by the video transmitter, and with a maximum frequency deviation of 25 kHz. Out of band emissions—those that might interfere with the emissions of the auditory training system—can be expected to be greatly attenuated at 72 MHz. There is some possibility, also, of interference from the lower sideband of TV channel 5. The channel 5 visual carrier operates at 77.25 MHz—1.25 MHz above

[21] TV channel 4 occupies the band 66–72 MHz; TV channel 5 occupies the band 76–82 MHz. These frequencies are immediately below 72–73 MHz and immediately above 75.4–76 MHz—the bands proposed by the Commission.

[22] "In Cleveland, Ohio, for example, when using type-approved 88–108 MHz wireless microphones, there are only seven channels clear enough for classroom operation; and of these seven, four are subject to periodic severe interference from FM broadcast stations in the Detroit area, over 200 miles distant. In the Chicago area, using the same equipment, there is only one channel clear enough for classroom operation." Zenith Supplemental Comment dated Feb. 29, 1972, at p. 3.

[23] Zenith proposes that operation be permitted in 300 kHz channels in the bands 150.815–151.955 MHz, 152.87–153.68 MHz, and 158.16–158.46 MHz.

[24] In its proposal, the Commission indicated that it was contemplating the use of 200 kHz channels.

[25] Only Electronic Futures Inc., in its supplemental comment dated Dec. 6, 1971, recognized that narrower channels would be required in the 72–76 MHz band in order to provide an adequate number of channels for multiple classroom operation.

the highest frequency available herein—with emissions below the channel edge required to be suppressed at least 20 dB. Under the worst condition, this may mean that use of auditory training channels between 75.4 and 76 MHz may be difficult in particular areas close to a channel 5 transmitter. The Commission concludes therefore that satisfactory service can be obtained on the frequencies in the 72–76 MHz band available herein.

EQUIPMENT STANDARDS

39. The Commission is persuaded by the comments which requested that AM and other forms of modulation not be prohibited and the regulations adopted permit this. The regulations provide that if FM is used, the frequency deviation shall not exceed 20 kHz for operation in a narrow channel (50 kHz) and 75 kHz for operation in a wide channel (200 kHz). The regulations would prohibit a variable control but would permit a simple switch to changeover from 50 to 200 kHz bandwidth. For AM, modulation must be limited to 100 percent. Out-of-band emissions must be maintained within the limits specified. The regulations also provide that the transmitter maintain a frequency stability of 0.005 percent and set two limits on power that must be met simultaneously. The power drawn from the battery is limited to 250 milliwatts. At the same time, the field strength established by the power radiated may not exceed 8000 uV/m at 30 m. Out-of-band emissions are limited to 150 uV/m at 30 m—requiring a suppression of about 35 dB on harmonics.

40. Although receiver standards frequently were treated broadly in the comments, the matter of receiver selectivity and sensitivity were not dealt with in specific detail. However, the necessity for certain minimum performance for these characteristics is implied. Particularly if several channels are to be provided within a given school, minimum frequency stability and selectivity standards must be met. Accordingly, the following standards are adopted:

Frequency stability shall be maintained within	±0.005 percent
Image frequency rejection	60 dB
Adjacent channel selectivity and desensitization	60 dB

when measured in accordance with Electronic Industries Association (EIA) standard RS–204 or equivalent.[26] In addition such receivers must meet the emission limitations applicable to all receivers that operate in the band 30–890 MHz. Other characteristics: Squelch, audio frequency response, sensitivity, audio power output, etc., are left to agreement between the manufacturer and the user-purchaser.

41. The rules adopted herein require the transmitter part of the system to be type approved pursuant to the procedures in Subpart F of Part 2. The receiver part of the system must be certificated pursuant to the procedures in Subpart C of Part 15.[27]

42. The rules adopted herein provide for continued operation of the following categories of equipment:

Devices type approved under Part 15 for operation in the 88–108 MHz band pursuant to § 15.212.

Devices operating on other frequencies, pursuant to the applicable provisions of Part 15.

Devices that are currently licensed in the Business Radio or any other of the licensed services which operate pursuant to the regulations of that service.

43. Devices which were authorized to operate in the 88–108 MHz band under a waiver of § 15.212 granted during the period of June 1, 1971, to September 21, 1971, are authorized to continue operating under the terms of such waiver until January 1, 1982. While repair and replacement of equipment is permitted, no additional equipment will be authorized under the said waivers. If a school using such equipment finds it necessary to expand its facilities, this may be done by acquiring equipment that complies in all respects with the provisions of § 15.212. The alternative, of course, is to replace its equipment prior to the required conversion date of January 1, 1982, with a system operating in the band 72–76 MHz or on other available frequencies under the conditions applicable to such frequencies.

44. Authority for the amendments set out in the attached appendix, is contained in sections 4(i), 302, 303 (c), (g), and (r) of the Communications Act of 1934, as amended.

45. In view of the foregoing: *It is ordered*, Effective August 22, 1972, that Part 15 of the FCC rules is amended as set forth below, and that this proceeding is terminated in all respects. The petition and comment filed by Bell & Howell Communications Co. will be treated in a separate rule making proceeding.

(Secs. 4, 303, 48 Stat., as amended, 1066, 1082; sec. 302, 82 Stat. 290; 47 U.S.C. 154, 302, 303)

Adopted: July 6, 1972.

AUTHORITY: The provisions of this Subpart G issued under secs. 4, 303, 48 Stat., as amended, 1066, 1082; sec. 302, 82 Stat. 290; 47 U.S.C. 154, 302, 303.

Subpart G—Auditory Training Devices

§ 15.331 Scope of this subpart.

This subpart provides rules under which a restricted radiation device may be operated without individual license as an auditory training system in institutional education programs for auricular instruction of persons having speech or hearing handicaps. The facilities provided under these rules permit an enlarged scope of operation beyond that permitted by the regulations in Subpart E of this part.

§ 15.333 Operation in the band 72–76 MHz.

(a) A transmitter may be operated as part of an auditory training system on the frequencies listed in § 15.351 provided it meets the technical specifications in §§ 15.353–15.359 inclusive and is type approved pursuant to § 15.347.

(b) A receiver may be operated as part of an auditory training system provided it meets the technical specifications in §§ 15.361–15.367 inclusive and is certificated pursuant to § 15.345.

§ 15.335 Operation in the band 88–108 MHz.

(a) An auditory training system may be operated in the band 88–108 MHz provided the transmitter meets the technical specifications in § 15.212 (including type approval) and the receiver has been certificated pursuant to § 15.345.

[26] Standard RS–204 "Minimum Standards for Land Mobile Communications FM or PM Receivers" (1958) may be purchased from the Electronic Industries Association, 2001 Eye Street NW., Washington, DC.

[27] These procedures are subject to revision in a proceeding in Docket No. 19356; Notice of Proposed Rule Making adopted Nov. 24, 1971, 36 F.R. 23313

[28] Commissioner H. Rex Lee concurring to placing the system in the 72–76 MHz band, but dissenting to the omission of a licensing requirement; Commissioners Reid and Wiley not participating; Commissioner Hooks absent.

(b) Those institutions holding waivers of § 15.212 (granted during June 1, 1971–September 21, 1971) may operate the devices authorized under the provisions specified in the request for waiver, until January 1, 1982. Existing equipment may be repaired or replaced as required, but no additional equipment may be added under such waiver.

§ 15.337 Operation on other frequencies.

(a) An auditory training system may be operated on any frequency available under this Part 15 provided the transmitter and receiver parts of the system meet the applicable technical specifications of this Part 15 and are certificated, if certification is required.

(b) An auditory training system may be operated as a licensed station in an authorized radio service provided the transmitter meets the applicable regulations of such service and is type accepted and the receiver is certificated pursuant to § 15.345, if certification is required.

§ 15.341 Interference from an auditory training system.

(a) Operation of an auditory training system is subject to the general conditions of operation set out in § 15.3.

(b) The operator of an auditory training system who is advised that his system is causing harmful interference to an authorized radio service shall promptly stop operating the system, and operation shall not be resumed until the condition causing the harmful interference has been eliminated.

§ 15.343 Marketing of an auditory training system.

Marketing of an auditory training system shall comply with the marketing regulations in Subpart I of Part 2 of this chapter.

§ 15.345 Certification of receiver.

(a) A receiver operated as part of an auditory training system shall be certificated pursuant to the provision of Subpart C of this Part 15.

(b) Application for certification shall be filed on FCC Form 722 accompanied by the required fees and attachments.

§ 15.347 Type approval of transmitter (72–76 MHz).

(a) A transmitter operated as part of an auditory system on a frequency in the band 72–76 MHz shall be type approved pursuant to the provisions of Subpart F of Part 2 of this chapter.

(b) Application for type approval shall be filed on FCC Form 729 accompanied by the required fees and attachments.

§ 15.351 Frequencies available in the band 72–76 MHz.

(a) An auditory training system may be operated either as a narrow band device in a 50 kHz channel, or as a wide band device in a 200 kHz channel.

(b) If the auditory training device is in a narrow band (50 kHz), the carrier frequency of the device shall be set on one of the frequencies listed below:

72.025 MHz	72.575 MHz	75.525 MHz
72.075 MHz	72.625 MHz	75.575 MHz
72.125 MHz	72.675 MHz	75.625 MHz
72.175 MHz	72.725 MHz	75.675 MHz
72.225 MHz	72.775 MHz	75.725 MHz
72.275 MHz	72.825 MHz	75.775 MHz
72.325 MHz	72.875 MHz	75.825 MHz
72.375 MHz	72.925 MHz	75.875 MHz
72.425 MHz	72.975 MHz	75.925 MHz
72.475 MHz	75.425 MHz	75.975 MHz
72.525 MHz	75.475 MHz	

(c) If the auditory training device is operated in a wide channel (200 kHz), the carrier frequency of the device shall be set out on one of the frequencies listed below:

72.10 MHz	72.70 MHz	75.70 MHz
72.30 MHz	72.90 MHz	75.90 MHz
72.50 MHz	75.50 MHz	

§ 15.353 Transmitter frequency tolerance (72–76 MHz).

A transmitter operated as part of an auditory training system in the band 72–76 MHz shall maintain a frequency tolerance of ±0.005 percent over an ambient temperature range of 0° to 50° C. at normal supply voltage, and over a supply voltage variation of 85 percent to 115 percent of normal supply voltage at a temperature of 20° C.

§ 15.355 Transmitter power (72–76 MHz).

(a) The D.C. power drawn from its supply by a transmitter as part of an auditory training system in the band 72–76 MHz shall not exceed 250 milliwatts.

(b) Notwithstanding the power input to the transmitter, the field strength of the unmodulated carrier shall not exceed 8000 uV/m at 30 meters.

§ 15.357 Transmitter modulation requirements (72–76 MHz).

(a) When using FM and operating in a narrow band (50 kHz) the frequency deviation shall not exceed ±20 kHz.

(b) When using FM and operating in a wide band (200 kHz) the frequency deviation shall not exceed ±75 kHz.

(c) The device may be equipped with a changeover switch so that it may be operated either in a 50 kHz or a 200 kHz channel. However, no variable control to provide such a changeover shall be available to the user.

(d) When using AM, modulation shall not exceed 100 percent.

(e) If other types of modulation are to be used, the application for type approval shall describe such modulation in detail, and the specifications of the authorized modulation process will be set out in the grant of type approval.

(f) The modulation requirements specified in this section shall be met for any speech sound applied to the microphone or any electrical signal applied to the device from an external source, if the device is designed to accept external signals.

§ 15.359 Transmitter emissions out of band (72–76 MHz).

(a) For a transmitter operating in a narrow band (50 kHz) the field strength of emissions on any frequency removed from the normal carrier by 50 kHz or more shall not exceed 150 uV/m at 30 meters.

(b) For a transmitter operating in a wide band (200 kHz) the field strength of emissions on any frequency removed from the nominal carrier by 200 kHz or more shall not exceed 150 uV/m at 30 meters.

§ 15.361 Receiver frequency stability (72–76 MHz).

A receiver operating as part of an auditory training system in the band 72–76 MHz shall maintain a frequency stability such that the frequency corresponding to the center of the reception pass-band shall be within ±0.005 percent of the nominal operating frequency over an ambient temperature range of 0° to 50° C. at the nominal supply voltage and over a voltage range of 85 percent to 115 percent of the nominal supply voltage at an ambient temperature of 20° C.

§ 15.363 Receiver selectivity and desensitization (72–76 MHz).

A receiver operating as part of an auditory training system in the band 72–76 MHz shall provide a minimum of 60 dB adjacent channel selectivity and desensitization when measured in accordance with the procedure specified in EIA Standard RS–204 dated January 1958, or equivalent procedure. (See IEEE Standard 184, April 1969.)

§ 15.365 Receiver image rejection (72–76 MHz).

A receiver operating as part of an auditory training system in the band 72–76 MHz shall provide a minimum of 60 dB image frequency rejection when measured in accordance with the procedure specified in EIA Standard RS–204 dated January 1958, or equivalent procedure. (See IEEE Standard 184, April 1969.)

§ 15.367 Receiver emission limitation (72–76 MHz).

(a) A receiver operating as part of an auditory training system shall meet the emission limitations set out in § 15.63 for radiated and conducted (if applicable) energy.

§ 15.371 Changes in equipment.

(a) No change whatsoever may be made in the design of a type approved transmitter without prior authorization from the Commission. When a change is requested, the Commission may authorize the change or require that the modified transmitter be submitted for retesting and be identified with a new type number.

(b) Two classifications of permissive changes may be made in a certificated received without change in type number or recertification.

(1) The first classification includes any modification that will not change the receiver characteristics beyond the rated limits established by the manufacturer as accepted by the Commission when certification was granted. A permissive change in this category need not be reported.

(2) The second classification includes any modification that will bring the receiver performance beyond the manufacturer's rated limits as set out in the original application for certification, but not outside the technical standards of the applicable rules. A permissive change in this category shall be described in detail and shall be accompanied by measurement showing the revised performance.

(c) Changes in a certificated receiver other than those described in paragraph (b) of this section require a change in type number of the receiver and recertification.

§ 15.373 Change in type number.

Where the manufacturer changes the type number of a transmitter or receiver for sales purposes, or any other reason, without modifying the circuitry or internal construction of the equipment, he shall apply for a new type approval or certification under such new type number. In lieu of the usual attachments (and/or report of measurements) it will be adequate for the manufacturer to furnish the following information:

(a) A statement giving the type number of the equipment originally type approved or certificated.

(b) The date of the Commission's action.

(c) What changes, if any, were made in the equipment.

(d) A statement certificating that the data previously furnished or the prototype previously submitted for testing apply equally to the equipment to be sold under the new type number.

§ 15.375 Identification of auditory training equipment (72–76 MHz).

(a) Each transmitter and each receiver operated as part of an auditory training system shall be individually identified with a distinctive label or nameplate containing the following information:

(1) The name of the grantee of type approval or of certification or the trade (or brand) name given in the application therefor.

(2) A distinctive type number identical to that given in the application for type approval or certification. Any change in the type approval number is subject to the provisions of § 15.373.

(3) On the transmitter, the type number assigned by the Commission in the form

FCC TYPE APPROVAL NO. ---------

(4) On the receiver, the following statement:

This receiver complies with FCC Rules Part 15. Operation is subject to the condition that the device will not cause harmful interference and that the device must accept any interference that may be received, including interference that may cause undesired operation.

(b) The label required by paragraph (a) of this section may not be attached to the equipment until type approval or certification has been granted. It shall be permanentlly attached to the equipment and be readily visible to the prospective purchaser and user.

PART 73—RADIO BROADCAST SERVICES

FM Broadcast Stations in Soddy-Daisy, Tenn.

Report and order. In the matter of amendment of § 73.202, *Table of Assignments,* FM Broadcast Stations. (Soddy-Daisy, Tenn.), Docket No. 19483, RM-1810.

1. The Commission has before it the notice of proposed rule making, adopted March 23, 1972, looking toward the assignment of FM Channel 272A to Soddy-Daisy, Tenn. The proposal came from Robert A. Mayer, licensee of a daytime-only AM station at Daisy, Tenn., and he is the only party to have commented at any stage of this proceeding.

2. Although expressing the view that the subject was worthy of inquiry, we also indicated our concern about two matters. We pointed to the recent assignment to another community in the Chattanooga, Tenn., metropolitan area and wondered if another assignment in this general area was warranted. In addition, we asked parties to comment on the possible assignment of the channel on a hyphenated basis rather than to one of the two communities. Subsequently submitted information has enabled us to resolve these matters.

3. Contrary to our original impression, Soddy and Daisy are no longer separate communities. Rather, they have merged and the new entity, Soddy-Daisy, has a population of 7,569. It is located northeast of Chattanooga, within its standard metropolitan statistical area but beyond its urbanized area. The only local service is AM on a daytime-only basis and this assignment would provide the first local FM channel. While the earlier assignment to another part of the Chattanooga metropolitan area was thought to bear heavily on this proposal, it now appears that spacing and terrain considerations dictate use of a site which would lead to only minimal service being provided to the Soddy-Daisy area. In our view Soddy-Daisy warrants its own assignment and none of the other area assignments can be expected to fulfill this need.

4. As we pointed out in our notice, the proposal does not require a change in any existing assignment, nor would it have a significant preclusionary effect on otherwise possible assignments. Under these circumstances, we think the public interest would be served by providing Soddy-Daisy with its first FM assignment and we shall so order.

5. In view of the foregoing, and pursuant to the authority contained in sections 4(i), 303(g) and (r) and 307(b) of the Communications Act of 1934, as amended: *It is ordered,* That effective August 22, 1972, the FM Table of Assignments, § 73.202(b) of the Commission's rules, is amended to read as follows for the community listed below:

City	*Channel No.*
Soddy-Daisy, Tenn.	272A

6. *It is further ordered,* That this proceeding is terminated.

Title 49—TRANSPORTATION

Chapter V—National Highway Traffic Safety Administration, Department of Transportation

[Docket No. 1-8; Notice 8]

PART 571—FEDERAL MOTOR VEHICLE SAFETY STANDARDS

Retreaded Pneumatic Tires; Denial of Petitions for Reconsideration

This notice responds to petitions for reconsideration received in response to the reissuance, on March 23, 1972 (37 F.R. 5950), of Federal Motor Vehicle Safety Standard No. 117, "Retreaded Pneumatic Tires" (49 CFR 571.117). Timely petitions were received from the Rubber Manufacturers' Association, the American Retreaders' Association, and the Firestone Tire and Rubber Company. Related documents were received from the National Tire Dealers and Retreaders' Association, and while these documents are not timely filed petitions for reconsideration, they have been considered in the preparation of this notice.

The petitions requested that the standard be amended to allow certain casing size designations (5.20, 6.40, 7.50, 8.00, 8.20, 8.50, and 9.50, in 13-inch, 14-inch, and 15-inch rim sizes) to be retreaded. Previous requests to add these sizes were denied by the issuance of March 23. The petitions argue that (1) among these casings, those produced prior to 1965, the date which sizes presently allowed were initially produced, are a small minority and the chance they would be retreaded is "remote and fanciful," and (2) the NHTSA has not shown that prohibiting the use of these casings will still leave the industry with a sufficient number of retreadable casings. The NHTSA accepts neither of these arguments. The first assumes that the retreading of tire casings occurs chronologically according to the time of manufacture of the original tire. The petitions have not provided justification for this argument, and the NHTSA does not consider it to be meritorious.

With reference to the second argument, petitioners argued that there is a casing shortage, and that the elimination of any casings would add to the shortage. As stated in the issuance of March 23, 1972, however, one purpose of Standard No. 117 is to limit usable casings to those manufactured within a limited period before the effective date of the standard. Allowing the casings in question to be retreaded could allow 10-year-old casings to become retreaded tires. The benefit to safety in prohibiting the retreading of excessively old casings outweighs, in the opinion of the NHTSA, the need of the retreading industry to be able to retread the casing sizes in question. The petitions are accordingly denied.

The petitions also request that a 3 percent tolerance to the minimum size factor requirement be permitted. This request was denied in the issuance of March 23, 1972, and is hereby again denied. The petitioners argue that because of the shrinkage of nylon cord materials during the retread process, the tolerance is necessary. They also argue that granting the request will not adversely affect the safe use of the tire as nylon cord material returns to its full size after the tire is run. The NHTSA does not agree that a need exists for relaxing the requirement. NHTSA test data do show that, even with shrinkage, retreaded tires are meeting the present size factor requirements.

The petitions opposed those provisions of the standard (paragraph S6.3) requiring retreaded tires to be labeled on the sidewall with specific information, using affixed labels for 1 year, and permanent labeling thereafter. One petition suggested that affixed labels only be required to specify the tire's size designation, whether the tire is "tubeless" or "tube type," and whether the tire is a radial tire. The petitioner argued that the other required information (maximum inflation pressure, maximum load rating, ply rating, and type of construction) is readily available to the consumer through literature required to be available at the point of sale by the Federal Trade Commission. This request is denied. The argument that the information is required to be otherwise available is incorrect. Moreover, the NHTSA does not consider inclusion of the additional information to be unnecessarily burdensome. Each item of information is readily ascertainable from the casing or from Table 1 of the standard. To further facilitate its inclusion the NHTSA has authorized the use of labels listing information for many tires, allowing the retreader to identify with an "X" or other appropriate symbol the information applicable to the particular tire.

The petitioner also requested that the affixed label be allowed to be placed in the tread area. The petitioner claimed that when such labels are on the sidewall they will not be visible when the tire is stored on a rack. This request is denied. The required location for placement of the label is not designed to facilitate storage, which can vary from place to place, but to ensure that the label is retained on the tire at least through its first installation on a vehicle. The NHTSA believes that affixing the label to the sidewall is more likely to achieve this result, as the tread area is more susceptible to forces which can destroy or obliterate affixed labeling than is the more protected sidewall area. There is no prohibition, however, of a retreader affixing an additional label to the tread area should he desire.

One petition requested the deletion of the requirement that labeling be affixed during the retread process. It was argued that the purpose of the labeling requirement is to provide information to a consumer when the tire is sold, and that each retreader will have his own system for identifying casings during the retread process. The NHTSA agrees with the purpose of the provision as stated by the petitioner, but cannot agree that this purpose is better served by allowing parties other than the retreader to affix required labeling to retreaded tires. The retreader is the only person involved in the manufacture and sale of retreaded tires who has access to the unbuffed casing, the source of labeling information. He is clearly in a better position to affix correct labeling to retreaded tires than parties farther down the chain of distribution. The request is accordingly denied.

The petition further requested that 180 days be provided as leadtime for the requirements regarding affixed labels. This request is denied. The NHTSA finds that 90 days is sufficient time for retreaders to obtain appropriate labels.

The petitions opposed the provisions dealing with permanent labeling, on the basis that permanent labeling would raise the price of retreads by necessitating additional time in their manufacture and the hiring of additional personnel. It was also argued that permanent labeling would not increase the safety of retreaded tires. If such labeling is required, however, the petitioners maintain that the requirements should be deferred until new tire labeling requirements are modified and an adequate casing supply with casings so labeled is available. In addition, affidavits of numerous retreaders were submitted expressing concern over increased costs of production and possible dangers resulting from the permanent labeling process.

The NHTSA recognizes that permanent labeling may necessitate some changes in the retreading process. It is for this reason that the 1-year period for compliance is allowed. However, the NHTSA does not agree that the requirements will impose unreasonable burdens on retreaders.

The National Traffic and Motor Vehicle Safety Act provides explicitly for permanent labeling of tires with information related to their safe use. Purchasers of retreaded tires are entitled to have this information in order that they can determine that retreaded tires are suitable for the vehicles for which they are purchased. The NHTSA has limited

the information required to that which retreaders can readily obtain from the casing or from the standard.

The arguments that the amount of additional expense needed to label retreaded tires presents unreasonable demands on retreaders or that labeling creates a safety hazard are without merit. The technology for permanently labeling retreaded tires is established and is presently being used successfully by retreaders in complying with the Tire Identification and Recordkeeping Regulations (49 CFR Part 574). The information which the standard requires to be labeled has been specifically designed to facilitate labeling. Much of the required information (e.g., ply rating, maximum inflation pressure, "tubeless or tube type," and type of construction) is identical for so many tires that the labeling molds can be made a permanent or semipermanent part of the matrix. While size and load rating may vary from tire to tire, these items are directly related to each other and can be combined for labeling purposes. The NHTSA considers that the interests of safety require these items to be permanently labeled onto each tire, and that such interests outweigh the time and expense necessary for labeling. The requests for the deletion of the permanent labeling requirements are accordingly denied.

Many of the petitions request the NHTSA to furnish data supporting specific decisions and determinations reflected in the standard. The decisions and determinations embodied in this standard are based on all the information at the agency's disposal, together with the informed judgment and expertise of agency personnel. Documentary materials relating to NHTSA decisions regarding the standard are part of the public docket. The agency is not obliged by law, nor does it consider it appropriate, to categorize or interpret those records as supporting particular statements or decisions made on rulemaking issuances.

FLATHEAD INDIAN IRRIGATION PROJECT, MONT.

Service Connections

JULY 6, 1972.

This notice is published in exercise of authority delegated by the Secretary of the Interior to the Commissioner of Indian Affairs by 230 DM 2 (32 F.R. 13938).

Notice is hereby given that, pursuant to the authority vested in the Secretary of the Interior by 5 U.S.C., section 301 (1970 ed.), and sections 6 and 7 of the Act of May 25, 1948 (62 Stat. 269–273), it is proposed to amend § 232.10 of Part 232, Subchapter U, Chapter I, of Title 25 of the Code of Federal Regulations. The purpose of this amendment is to eliminate the need for the project to furnish a meter socket or meter base to consumers. The items are now standardized and, as a general practice in the electric utility industry, the consumer furnishes a complete meter loop.

It is the policy of the Department of the Interior, whenever practicable, to afford the public an opportunity to participate in the rule making process. Accordingly, interested persons may submit written comments, suggestions, or objections with respect to the proposed amendment to the Bureau of Indian Affairs, Washington, D.C. 20242, within 30 days from date of publication of this notice in the FEDERAL REGISTER.

Section 232.10 of Chapter I, Title 25 of the Code of Federal Regulations, is amended to read as follows:

§ 232.10 Service connections.

On each new service the consumer shall provide and maintain a service entrance at a location convenient to the lines of the project, and all connections from the service entrance to the meter base and from the meter base to the main line circuit breaker or distribution center. The meter will be furnished by the United States. The meter socket will be furnished and installed by the consumer and in a suitable location, preferably on the outside of the building, or service pole, where the meter will be accessible to the meter-reader at all times. The meter socket shall not be more than 7 feet nor less than 5 feet above the ground or floor. The entire service installation must be satisfactory to the project engineer and must conform to the provisions then in force of the National Electrical Code of the National Board of Fire Underwriters for Electric Wiring and Apparatus. When alterations of a consumer's premises make it necessary to move an existing meter loop, the consumer may be required to install a meter socket in the new loop, located in conformity with the stipulations of this section. When an inspection is required by municipal ordinance, the project engineer shall require a certificate of inspection and approval by the municipal inspector before connecting a new service.

Deputy Commissioner.

MILK IN CHICAGO REGIONAL MARKETING AREA

Notice of Recommended Decision and Opportunity To File Written Exceptions on Proposed Amendments To Tentative Marketing Agreement and To Order

Notice is hereby given of the filing with the Hearing Clerk of this recommended decision with respect to proposed amendments to the tentative marketing agreement and order regulating the handling of milk in the Chicago Regional marketing area.

Interested parties may file written exceptions to this decision with the Hearing Clerk, U.S. Department of Agriculture, Washington, D.C., 20250, by the seventh day after publication of this decision in the FEDERAL REGISTER. The exceptions should be filed in quadruplicate. All written submissions made pursuant to this notice will be made available for public inspection at the office of the Hearing Clerk during regular business hours (7 CFR 1.27(b)).

The above notice of filing of the decision and of opportunity to file exceptions thereto is issued pursuant to the provisions of the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601 et seq.), and the applicable rules of practice and procedure governing the formulation of marketing agreements and marketing orders (7 CFR Part 900).

PRELIMINARY STATEMENT

The hearing on the record of which the proposed amendments, as hereinafter set forth, to the tentative marketing agreement and to the order as amended, were formulated, was conducted at Madison, Wisconsin, on May 31, 1972, pursuant to notice thereof which was issued May 9, 1972 (37 F.R. 9634).

The material issues on the record of the hearing relate to:

1. Pooling standards for distributing plants.

2. Pooling standards for supply plants.

FINDINGS AND CONCLUSIONS

The following findings and conclusions on the material issues are based on evidence presented at the hearing and the record thereof:

1. *Pooling standards for distributing plants.* The provisions with respect to pool distributing plant performance standards should be modified. A pool distributing plant should have disposition of packaged fluid milk products from such plant either on routes or to other plants of not less than the following percentages of the plant's Grade A receipts; 45 percent during each of the months of September through December, 35 percent in each of the months of January, February, March, and August, and 30 percent during each of the months April through July.

The order now provides that for each month a pool distributing plant dispose of not less than 45 percent of its Grade A receipts in the form of packaged fluid milk products on routes or to other plants and that such disposition in the marketing area amount to not less than 10 percent of its Grade A receipts.

Fifteen cooperative associations, representing a substantial majority of the producers on the market, proposed that the pool distributing plant performance standards be modified as described above, except for the percentage applicable during August which they propose to leave at 45 percent.

No change was proposed in the 10 percent minimum in-area sales performance standard for pool distributing plants.

Class I utilization in the Chicago Regional market is declining. Since 1969 the Class I utilization percentage in the market during several months each year has been lower than the minimum percentage route disposition (Class I) performance standard for a pool distributing plant. Proponents' witness stated that this circumstance encourages operators of some pool distributing plants to adjust their plant operations and become partially regulated. Proponents contended that this poses a problem of instability with respect to producers sharing uniformly in the proceeds from Class I sales in the market and the burden of the reserve milk supply. Thus, they urge that the pooling standard be brought up to date with the supply and sales changes in the market.

In 1971 the amount of producer milk pooled on the Chicago Regional market averaged 76.3 million pounds per month

more than in 1969. During the same period Class I sales for the market declined from a monthly average of 300.7 million pounds to 286.9 million pounds and the annual market Class I utilization percentage dropped from 51 percent to 43 percent.

In addition to the trend toward lower market utilization described above, the market utilization varies seasonally due to seasonal fluctuations in production and Class I sales. Increased milk production in the spring, and lower Class I sales during the summer, result in lower market utilization during those periods than during the fall and winter months when production declines and sales increase.

During 1971 Class I utilization in the market varied from a low of 35 percent in June to a high of 50 percent in November. For the first 4 months of 1972 Class I utilization was as follows: January, 43 percent; and February, 43 percent; March, 41 percent; and April, 37 percent.

Each month since January 1971 from one to six plants that had been fully regulated distributing plants failed to meet the 45 percent pool plant performance standard during 1 or more months. During July 1971, when the market utilization was 39 percent, six such plants were partially regulated. These plants received 6.8 million pounds of Grade A milk, which, because of the plants' status, was not pooled under the order.

A handler operating a partially regulated distributing plant has three options under the order with respect to his obligation on Class I sales in the marketing area. The operator of such a plant may (1) offset such sales with the purchase of Class I milk from a Federal order source, (2) pay to the producer-settlement fund the difference between the Class I and uniform prices on that quantity of Class I disposition in the market, or (3) pay the full utilization value at the order class prices to those farmers supplying milk to the plant.

When the marketwide utilization is less than the 45 percent pooling standard the utilization value per hundredweight of milk at a plant with slightly less than 45 percent Class I use exceeds the marketwide uniform price applicable in most price zones under the order.

In such circumstances there is an incentive for a distributing plant operator to procure additional supplies of milk from producers to reduce its utilization percentage below 45 percent and become partially regulated, because he would be in a position to elect to pay his producers the use value of his milk. This value per hundredweight would be greater than the marketwide uniform price.

Appropriately, distributing plant pooling standards should provide pool status for a plant that has a higher utilization than the average for the market and its Class I disposition is primarily within the market, to effect the intent of the marketwide pooling provisions of the order. Through marketwide pooling the proceeds from Class I sales in the market are distributed uniformly among all producers serving the market. Also, the burden of the reserve supplies associated with such Class I sales is distributed uniformly among all producers through marketwide pooling. Such objectives would not be served if the order provided an incentive for a distributing plant operator in the market to reserve a higher use value for the farmers supplying his plant than the weighted average use value for the market. Such incentive tends to exist when the utilization percentage standard for a distributing plant is greater than the marketwide utilization percentage.

The monthly distributing plant performance percentages proposed by proponents are slightly lower than the market utilization percentages during each corresponding month over the past 2 years, except for the month of August. During August 1970 and 1971 Class I utilization was 43 and 41 percent, respectively, or slightly lower than the present 45 percent pooling standard which proponents proposed to retain during each of the months August through December.

Recently, the Class I utilization for both August and March has been about the same. Although cooperatives proposed different minimum pooling standards for the 2 months it would not be appropriate to set the standard for August significantly above the market's utilization percentage for such month. Thus, the distributing plant performance percentage of 35 percent, which cooperatives proposed for March and is adopted herein, likewise should apply in August. Adoption of a 35 percent performance level in August, along with adoption of the remaining proposed monthly percentages, would more closely align such performance percentages with the market's seasonal pattern of utilization percentages. This will tend to encourage retention of pool status by operators of distributing plants in the market. In turn, it will tend to better effect the uniform sharing of the Class I sales in the market among all producers supplying the market.

2. *Pooling standards for supply plants.* The minimum percentage of Grade A milk receipts from dairy farmers that a supply plant must ship to distributing plants to qualify as a pool plant should be reduced by 5 percentage points in each of the months of August through November.

A supply plant presently qualifies for pooling by shipping at least 40 percent of its Grade A milk received from dairy farmers (including producer milk diverted) to pool distributing plants or producer-handler plants, or to any partially regulated distributing plant as Class I milk to the extent of the latter's distribution of Class I milk in the marketing area, during September, October, and November, and by shipping 30 percent of its receipts to such outlets in all other months. A supply plant that demonstrates its association with the market during the period of seasonally low production, by qualifying during each of the months of August through December, may retain pool plant status during the following 7 months of January through July regardless of shipments.

The Director of the Dairy Division is authorized to adjust the pooling standards applicable during any of the months of August through December by as much as 10 percentage points if he finds such action is necessary to obtain needed shipments or to prevent uneconomic shipments.

Pooling standards for supply plants identify those supply plants that are associated with the market as regular suppliers of milk for fluid use in the market, as opposed to plants that serve other fluid milk markets or the manufacturing use market.

Fifteen cooperative associations of producers supplying the market jointly proposed that the minimum shipping percentage for pool supply plant status be changed to 25 percent in the month of August, and 35 percent in each of the months September, October, and November. The proposed percentages are 5 percentage points lower than those now provided in the order for such months. Proponents' witness stated that the proposed change is needed to facilitate pooling of milk now associated with the market.

Distributing plants in the Chicago regional market rely on supply plants for a large proportion of their fluid milk requirements. Approximately 1 billion pounds of the 1.7 billion pounds of Grade A milk received by all distributing plants during the months of August through December 1971 were received from pool supply plants.

During 1971 many pool supply plants had difficulty meeting the pooling standards during the fall months. For the period August through December 1971 producer receipts in the market increased 3.9 percent relative to the same period the previous year. Most of the additional milk was associated with pool supply plants. As a result, the proportion of the market's total receipts received by supply plants during the period increased from an average of 71.1 percent in 1970 to 76.1 percent in 1971, an increase of 5 percent.

The proportion of pool supply plant milk shipped to pool distributing plants during the months of August through November declined 5.1 percent from 1969 to 1971. In 1971 supply plant shipment percentages for the August-December period averaged as follows: August, 37.6 percent; September, 46.2 percent; October, 42.6 percent; November, 45.8 percent; and December, 42.7 percent.

About 55 percent of the milk associated with supply plants in the market is received at plants for which Central Milk Producers Cooperative accepts the responsibility for making fluid milk shipments to distributing plants. For this group of supply plants, shipments to distributing plants during the August through December qualifying period of 1971 averaged as follows: August, 34.8 percent; September, 40.6 percent; October, 40.6 percent; November, 46 percent; and December, 42.8 percent.

For the corresponding months of 1972, Central Milk Producers Cooperative estimates that receipts of milk at such group of supply plants will be about 11 million pounds greater and shipments about 4.5

million pounds less than in 1971. Accordingly, they expect that shipment percentages for such group of plants will average 3 to 4 percentage points less in 1972 than in 1971.

In this market situation it is apparent that the proportion of supply plant milk needed to supplement fluid milk requirements of distributing plants has declined to the point where the present minimum shipping standards need to be reduced 5 percentage points for the months of August through November to accommodate pooling of the milk now associated with the market. The December shipping standard, which is 10 percentage points less than during September through November, should not be reduced. Class I utilization during December 1970 and 1971 was about the same as during the preceding months of September through November each year. Shipments from supply plants were only 4.2 and 4.9 percentage points less in December than the period September through November during 1970 and 1971, respectively.

If the shipping standards are not reduced, handlers undoubtedly will have to modify normal marketing practices to maintain pool status of the producer milk on the market. To insure that the proportion of milk shipped from supply plants is sufficient to qualify such plants for pooling, it probably would be necessary to route current direct receipts of producer milk at distributing plants through supply plants. Such a practice would likely involve unnecessary transportation of milk and should not be encouraged.

Accordingly, it is concluded that proponents' proposal to reduce the minimum supply plant shipping percentages should be adopted.

General Findings

The findings and determinations hereinafter set forth are supplementary and in addition to the findings and determinations previously made in connection with the issuance of the aforesaid order and of the previously issued amendments thereto; and all of said previous findings and determinations are hereby ratified and affirmed, except insofar as such findings and determinations may be in conflict with the findings and determinations set forth herein.

(a) The tentative marketing agreement and the order, as hereby proposed to be amended, and all of the terms and conditions thereof, will tend to effectuate the declared policy of the Act;

(b) The parity prices of milk as determined pursuant to section 2 of the Act are not reasonable in view of the price of feeds, available supplies of feeds, and other economic conditions which affect market supply and demand for milk in the marketing area, and the minimum prices specified in the tentative marketing agreement and the order, as hereby proposed to be amended, are such prices as will reflect the aforesaid factors, insure a sufficient quantity of pure and wholesome milk, and be in the public interest; and

(c) The tentative marketing agreement and the order, as hereby proposed to be amended, will regulate the handling of milk in the same manner as, and will be applicable only to persons in the respective classes of industrial and commercial activity specified in, a marketing agreement upon which a hearing has been held.

Recommended Marketing Agreement and Order Amending the Order

The recommended marketing agreement is not included in this decision because the regulatory provisions thereof would be the same as those contained in the order, as hereby proposed to be amended. The following order amending the order, as amended, regulating the handling of milk in the Chicago regional marketing area is recommended as the detailed and appropriate means by which the foregoing conclusions may be carried out:

In § 1030.11, paragraph (a)(3) and the preamble of paragraph (b)(4) are revised as follows:

§ 1030.11 Pool plant.

* * * * *

(a) * * *

(3) Not less than 45 percent in each of the months of September, October, November, and December and 35 percent in each of the months of January, February, March, and August, and 30 percent in all other months of such receipts is disposed of in the form of packaged fluid milk products, except filled milk, either on routes or moved to other plants. Such disposition is to be exclusive of receipts of packaged fluid milk products from other pool distributing plants.

* * * * *

(b) * * *

(4) Such percentage shall be not less than 35 percent in each of the months of September, October, and November, and 25 percent in August and 30 percent in all other months, except that a plant which is a pool plant pursuant to this paragraph during each of the months of August through December shall be a pool plant for each of the following months of January through July unless:

[9 CFR Part 2]

ANIMAL WELFARE

Annual Fees and Report; Termination of Licensees

Notice is hereby given in accordance with the administrative procedure provisions in 5 U.S.C. 553, that pursuant to the provisions of the Act of August 24, 1966 (Public Law 89-544), as amended by the Animal Welfare Act of 1970 (Public Law 91-579) (7 U.S.C. 2131 et. seq.), the Animal and Plant Health Inspection Service is considering amending §§ 2.6 (b) and 2.7 (b) and (c) of Part 2, Subchapter A, Chapter I, Title 9, Code of Federal Regulations.

Statement of considerations. The Act of August 24, 1966 (Public Law 89-544), was amended by the Animal Welfare Act of 1970 (Public Law 91-579). The regulations and standards to implement such legislative amendments were published as Miscellaneous Amendments in the FEDERAL REGISTER on December 24, 1971 (36 F.R. 24917-24927). It was the Department's intent to have the amount of the annual fee for a dealer to be based on the total gross amount, expressed in dollars, derived from the sale of animals to research facilities, dealers, exhibitors, retail pet stores, and to persons for use as pets, directly or through auction sales, by the dealer during his preceding business year. It was the Department's intent to have the amount of the annual fee for an operator of an auction sale to be based on the total gross amount, expressed in dollars, derived in commissions or fees charged to the public for the sale of animals at auction to retail pet stores and persons for use as pets, as well as to research facilities, dealers, and exhibitors, during the preceding business year. However, the provisions in § 2.6 of the regulations relating to annual fees, inadvertently omitted sales for pet purposes as a basis for computing the annual license fees for dealers and operators of auction sales. This proposed revision of the regulations would correct these oversights.

Subparagraphs (1), (2), and (4) of paragraph (b) of § 2.6 of the regulations would be amended to read as follows:

§ 2.6 Annual fees; and termination of licenses.

* * * * *

(b) (1) Except as provided in subparagraphs (3) and (4) of this paragraph, the amount of the annual license fee for a dealer shall be based on the total gross amount, expressed in dollars, derived from the sale of animals to research facilities, dealers, exhibitors, retail pet stores, and persons for use as pets, directly or through an auction sale, by such dealer or applicant during his preceding business year (calendar or fiscal).

(2) Except as provided in subparagraphs (3) and (4) of this paragraph, the amount of the annual license fee for an operator of an auction sale shall be that of a Class "B" dealer and shall be based on the total gross amount, expressed in dollars, derived from commissions or fees charged for the sale of animals at auction by the operator to research facilities, dealers, exhibitors, retail pet stores, and persons for use as pets, during the preceding business year (calendar or fiscal).

* * * * *

(4) In the case of an applicant for a license as a dealer or operator of an auction sale who did not operate for at least 6 months during his preceding business year, the annual license fee will be based in the case of a dealer on the anticipated total gross yearly income to be derived from the sale of animals to research facilities, dealers, exhibitors, retail pet stores, and persons for use as pets, directly or through an auction sale, and in the case of an operator of an auction sale on the anticipated gross yearly income to be derived from commissions and fees charged for the sale of animals at auction to research facilities, dealers, exhibitors, retail pet stores, and persons for use as pets.

* * * * *

Paragraphs (b) and (c) of § 2.7 of the regulations would be amended to read as follows:

§ 2.7 Annual report by licensees.

* * * * *

(b) A person licensed as a dealer shall set forth in his annual report the total gross dollar amount derived from the sale of animals to research facilities, dealers, exhibitors, retail pet stores, and persons for use as pets, directly or through an auction sale, by the licensee during the preceding business year (calendar or fiscal), and such other information as may be required thereon.

(c) A person licensed as an operator of an auction sale shall set forth in his annual report the total gross amount, expressed in dollars, derived from commissions or fees charged for the sale of animals at auction by the licensee to research facilities, dealers, exhibitors, retail pet stores, and persons for use as pets, during the preceding business year (calendar or fiscal), and such other information as may be required thereon.

Any person who wishes to submit written data, views, or arguments concerning this proposal may do so by filing them with the Deputy Administrator, Veterinary Services, Animal and Plant Health Inspection Service, U.S. Department of Agriculture, Federal Center Building, Hyattsville, Md. 20782, within 30 days after publication of this notice in the FEDERAL REGISTER.

All written submissions made pursuant to this notice will be made available for inspection at times and places and in a manner convenient to the public business (7 CFR 1.27(b)).

DEPARTMENT OF LABOR

Occupational Safety and Health Administration

[29 CFR Part 1910]

SANITATION

Proposed Safety and Health Standards

Pursuant to section 6(b) of the Williams-Steiger Occupational Safety and Health Act of 1970 (84 Stat. 1593; 29 U.S.C. 655), Secretary of Labor's Order No. 12-71 (36 F.R. 8754), and 29 CFR Part 1911 (36 F.R. 17506), it is hereby proposed to revise 29 CFR 1910.141 as set forth below.

The changes proposed herein are summarized as follows:

(1) Clarifying definitions for several terms would be provided.

(2) False floors, platforms, mats, or other dry standing places or appropriate waterproof footgear would be required where wet processes are used.

(3) Where vermin are detected an extermination program would be required.

(4) Drinking water would be required within 200 feet of regular workplaces.

(5) A requirement of the sewage disposal method would be that it not endanger the health of employees.

(6) Toilet facilities would be required within 200 feet of a place where employees regularly work.

(7) Cleansing agents would be required to be supplied with lavatories.

(8) Warm air blower would be recognized as acceptable drying means in washrooms.

(9) The ratio of showers per affected employees would be set. The actual requirement to have showers would be contained in specific standards with respect to employees who are exposed to toxic substances and physical stresses. These standards will be established at a future time.

(10) If employees are permitted to bring lunches into the premises, and vermin are a problem, then a sanitary repository for lunches would be required.

(11) Specific limitations to the scope of the section would be eliminated. However, in accordance with § 1910.267 the application of the section would continue to be confined to nonagricultural operations.

(12) Clean ice would be permitted in drinking water. The present ANSI (American National Standards Institute) standard Z4.1 had justification for prohibiting ice in drinking water when the original standard was established, since much ice was then cut from rivers and lakes. Today most ice is machine made, and sanitation in its manufacture is practicable.

(13) Nonpotable water would be permitted for cleaning the premises, bathing or laundering provided that it has been treated so that chemicals or organisms harmful to employees are eliminated. The present standard is too restrictive in the uses of nonpotable water. In many places the availability of potable water is limited and the use of treated nonpotable water for cleaning premises or washing any portion of person or clothing presents no health problem.

(14) The requirement for adequate washing facilities in or adjacent to each toilet room would be changed to require one lavatory for each toilet facility. The present requirement for adequate washing facilities is too vague.

(15) All provisions relating to separate facilities based on sex are eliminated. Separate facilities for each sex have no basis in sanitation standards.

(16) The requirement for split toilet seats would be changed to apply only to seats installed or replaced after the effective date of this change.

(17) The number of lavatories in office occupancies would be reduced to the number of toilet facilities. Not all office workers need or do wash at the end of the working day. The number of lavatories required in the present standard and ANSI Z4.1 is based more on industrial occupancies, where the load on washing facilities is likely to be heavier, and concentrated at specific periods of the working day.

(18) The present language regarding change rooms would be replaced by a requirement to have change rooms only when employees are required to wear protective clothing pursuant to standards issued under this Part relating to exposure to toxic materials. Separate storage facilities (both for each employee and for street and work clothing) would be required. The present standard is vague, speaking of "practice" and "necessity" for reasons of "excessive dirt, heat, vapors, moisture."

(19) The specific area requirement for lunchrooms required on account of toxic materials exposures or potential exposures in work areas would be deleted. It appears that the specification of a precise number of square feet is not relevant.

Written data, views, and arguments concerning the proposal may be mailed to the Office of Standards, Room 305, 400 First Street NW., Washington, DC 20210, within 30 days after the publication of this notice in the FEDERAL REGISTER. The data, views, and arguments will be available for public inspection and copying at the Office of Standards located at the above address.

Pursuant to 29 CFR 1911 (b) and (c), interested persons may in addition to filing written matter as provided above, file objections to the proposal requesting an informal hearing with respect thereto in accordance with the following conditions:

(1) The objections must include the name and address of the objector;

(2) The objections must be postmarked on or before the 30th day after the date of publication of this notice of proposed rule making.

(3) The objections must specify with particularity the provision of the proposed rule to which objection is taken, and must state the grounds therefor;

(4) Each objection must be separately stated and numbered; and

(5) The objections must be accompanied by a summary of the evidence proposed to be adduced at the requested hearing.

The terms of the proposed amendment read as follows:

§ 1910.141 Sanitation.

(a) *General*—(1) *Scope.* This section applies to all permanent places of employment.

(2) *Definitions applicable to this section.* (i) "Lavatory," means a basin or other vessel for washing.

(ii) "Nonwater carriage toilet facility," means a toilet facility not connected to a sewer.

(iii) "Personal service room," means a room used for activities not directly connected with the production or service function performed by the establishment. Such activities include, but are not limited to first-aid, medical services, dressing, showering, toilet use, washing, and eating.

(iv) "Place where employees regularly work" means a location or station within an establishment where an employee or employees spend the principal portion of the working day. If the employee moves about during the working day, it shall mean a location or station to which the employee or employees regularly or frequently return, or assemble for such purposes as reassignment to another work station or to pick up tools or supplies.

(v) "Potable water," means water which meets the quality standards prescribed in the U.S. Public Health Service Drinking Water Standards published in Part 72 of Title 42, of the Code of Federal Regulations.

(vi) "Sanitary condition," means a condition of the various components of the physical environment such that those compenents do not contribute to the incidence or spread of disease.

(vii) "Toilet facility," means a fixture maintained within a toilet room for the purpose of defecation and/or urination.

(viii) "Toilet room," means a room maintained within or on the premises of any place of employment, containing toilet facilities for use by employees.

(ix) "Toxic materials area," means an area where toxic materials are present or likely to be present in the air in concentrations exceeding the limits of §§ 1910.93 and 1910.93a or where toxic materials are otherwise present to the extent that deleterious effects may result from their entry into the body by inhalation, absorption, ingestion, or other route.

(x) "Urinal," means a fixture maintained within a toilet room for the sole purpose of urination.

(xi) "Water closet," means a toilet facility which is flushed with water.

(3) *Housekeeping.* (i) All places of employment shall be kept clean and orderly and in a sanitary condition.

(ii) The floor of every workroom shall be maintained in a clean, and, so far as possible, a dry condition. Where wet processes are used drainage shall be maintained. False floors, platforms, mats or other dry standing places or appropriate waterproof footgear shall be provided where wet processes are used. Antislip compounds, where used, shall not create unsanitary conditions, nor release toxic materials to the air in concentrations exceeding the limits of §§ 1910.93 and 1910.93a, or otherwise expose employees to deleterious concentrations of materials by inhalation, absorption, ingestion or other route of entry into the body.

(iii) Cleaning shall be done in such a manner as to prevent the dispersal of toxic materials into the air in concentrations exceeding the limits of §§ 1910.93 and 1910.93a, or otherwise expose employees to deleterious concentrations of materials by inhalation, absorption, ingestion or other route of entry into the body.

(iv) To facilitate cleaning, every floor, working place, and passageway shall be kept free from protruding nails, splinters, holes, or loose boards.

(4) *Spitting.* (i) Spitting upon the walls, floors, workplaces, or stairs of any establishment shall not be permitted.

(ii) Spittoons, if used, shall be of such construction that they are cleanable or disposable. They shall be cleaned or replaced at least daily when in use.

(5) *Waste disposal.* (i) Any receptacle used for putresible solid or liquid waste or refuse shall be so constructed that it does not leak and may be thoroughly cleaned, and it shall be maintained in a sanitary condition. Such a receptacle shall be equipped with a tight-fitting cover.

(ii) All sweepings, solid or liquid wastes, refuse, and garbage shall be removed in such a manner as to avoid creating a nuisance or menace to health and as often as necessary to maintain the place of employment in a sanitary condition.

(6) *Vermin control.* Every enclosed workplace and personal service room shall be constructed, equipped, and maintained, in such a manner as to prevent the entrance or harborage of rodents, insects, and other vermin. A continuing and effective program of extermination shall be instituted and documented where their presence is detected.

(b) *Water supply*—(1) *Potable water.* (i) Potable water shall be provided for drinking, washing, and cooking purposes in all places of employment. Portable dispensers shall be refilled at least once each working day and shall be cleaned at each refilling. Drinking water shall be made available within 200 feet of any place where employees regularly work.

(ii) Drinking fountains shall be constructed of impervious material, such as vitreous china, porcelain, enameled cast iron, other metals, or stoneware. The jet of the fountain shall issue from a nozzle of nonoxidizing impervious material set at an angle from the vertical such as to prevent the return of water in the jet to the orifices from whence the jet issues. The nozzle and every other opening in the water pipe or conductor leading to the nozzle shall be above the edge of the bowl, so that such nozzle or opening will not be flooded in case a drain from the bowl of the fountain becomes clogged. The end of the nozzle shall be protected by nonoxidizing guards to prevent the mouth and nose of persons using the fountain from coming into contact with the nozzle. Guards shall be so designed that the possibility of transmission of infectious agents by touching the guards is reduced to a minimum. The inclined jet of water issuing from the nozzle shall not touch the guard. The bowl of the fountain shall be so designed and proportioned as to be free from corners which would be difficult to clean or which would collect dirt. The bowl shall be so designed as to prevent unnecessary splashing at a point where the jet falls into the bowl. The drain from the fountain shall not have a direct physical connection with a waste pipe, unless the drain is trapped. The height of the fountain at the drinking level shall be such as to be convenient to employees utilizing the fountain. The waste opening and pipe shall be of sufficient size to carry off the water promptly.

(iii) Ice provided for drinking water shall be pure, and free from contamination by dirt, dust, or any other source.

(iv) Open containers such as barrels, pails, or tanks for drinking water from which the water must be dipped or poured, whether or not they are fitted with a cover, are prohibited.

(v) The common drinking cup is prohibited.

(vi) Where single service cups (to be used but once) are supplied, both a sanitary container for the unused cups and a receptacle for disposing of the used cups shall be provided.

(2) *Nonpotable water.* (i) Outlets for nonpotable water, such as water for industrial or firefighting purposes only, shall be posted to indicate clearly that the water is unsafe and is not to be used for drinking, cooking, or washing, except as provided by subdivision (iv) of this subparagraph.

(ii) There shall be no cross-connection, open or potential, between a system furnishing potable water and a system carrying or furnishing nonpotable water.

(iii) Construction of nonpotable water systems shall be such as to prevent backflow of contaminated water into a potable water system.

(iv) Nonpotable water may be used for cleaning premises, or washing any portion of the person or clothing: *Provided,* That this nonpotable water has been so treated that it contains no chemicals or organisms that might be harmful to the employees. Such nonpotable water outlets shall be posted to clearly indicate the specific uses of the water, and that it is not to be used for drinking, cooking, or washing cooking or eating utensils.

(c) *Toilet facilities*—(1) *General.* (i) Toilet facilities shall be provided in accordance with Table J–1 of this section.

(ii) The sewage disposal method shall not endanger the health of employees.

(iii) Toilet facilities shall be readily accessible to all employees, and in no case more than one floor-to-floor flight of stairs, or more than 200 feet from any place where employees regularly work.

(iv) When persons other than employees are permitted the use of toilet facilities on the premises, the number of such facilities shall be appropriately increased in accordance with Table J–1 of this section in determining the minimum number of toilet facilities required.

(v) Toilet paper with holder shall be provided for every water closet.

(vi) Covered receptacles shall be kept in all toilet rooms used by women.

(vii) For each required toilet facility at least one lavatory shall be provided either in the toilet room or adjacent thereto.

(2) *Construction of toilet rooms.* (i) Each water closet shall occupy a separate compartment with walls or partitions between fixtures sufficiently high to assure privacy.

(ii) In all toilet rooms installed on or after August 31, 1971, the floors and sidewalls, to a height of at least 6 inches, including the angle formed by the floor and sidewalls, shall be of watertight construction.

TABLE J–1

Type of employment	Water closets		Urinals	Lavatories	
	Number of employees	Number of fixtures		Number of employees	Number of fixtures
Office	1–9	1	Wherever urinals are provided one water closet less than specified may be provided for each urinal installed except that the number of water closets in such cases shall not be reduced to less than ⅔ of the minimum specified.	1–9	1.
	10–24	2		10–24	2.
	25–49	3		25–49	3.
	50–74	4		50–74	4.
	75–100	5		75–100	5.
	Over 100	One fixture for each additional 30 employees.		Over 100	One fixture for each additional 30 employees.
All other	Same schedule as for offices		Same schedule as for offices	1–100 employees: 1 fixture for each 10 employees. Over 100 employees: 1 fixture for each additional 15 employees.	

(iii) The floors, walls, ceilings, partitions, and doors of all toilet rooms shall be of a finish that can be easily cleaned. In installations made on or after August 31, 1971, cove bases shall be provided to facilitate cleaning.

(3) *Construction and installation of toilet facilities.* (i) Every water carriage toilet facility shall be set entirely free and open from all enclosing structures and shall be so installed that the space around the facility can be easily cleaned. This provision does not prohibit the use of wall-hung-type water closets or urinals.

(ii) Every water closet shall have a hinged seat made of substantial material having a nonabsorbent finish. Seats installed or replaced after (effective date of this provision) shall be of the open-front type.

(iii) Nonwater carriage toilet facilities and disposal systems shall be in accordance with § 1910.143.

(d) *Washing facilities*—(1) *General.* Washing facilities shall be maintained in a sanitary condition.

(2) *Lavatories.* (i) Lavatories shall be provided in accordance with the requirements for lavatories as set forth in Table J–1 of this section. Twenty-four lineal inches of wash sink or 24 inches of a circular basin, when provided with water outlets for each such space, shall be considered equivalent to one lavatory.

(ii) Each lavatory shall be supplied with hot and cold water.

(iii) Suitable nonirritating cleansing agents (i.e., noncorrosive or irritating to the skin and not containing ingredients which by absorption would have harmful effects) shall be provided.

(iv) Individual hand towels or sections thereof, of cloth or paper, or warm air blowers, shall be provided. When adjacent to washing facilities, dispensing stations for towels, or blowers shall be provided at the rate of one dispenser or blower for each three washing spaces or fraction thereof as required by Table J–1.

(v) Receptacles shall be provided for disposal of used towels.

(vi) Warm air blowers shall provide air at not less than 90° F. and shall have means to automatically prevent the discharge of air exceeding 140° F.

(vii) Electrical components of warm air blowers shall meet the requirements of Subpart S of this part.

(3) *Showers.* (i) Showers shall be provided where expressly required by any standard promulgated under this part.

(ii) When showers are required, one shower shall be provided for each 10 employees or fraction thereof.

(iii) Required showers shall be provided with a supply of a suitable nonirritating cleansing agent.

(iv) Required showers shall be supplied with hot and cold water from a combination fixture. The temperature of water shall be adjustable to at least 100° F., but shall not exceed 140° F.

(v) Employees who use showers shall be provided with individual towels.

(e) *Change rooms.* When employees are required by standards issued under this part to wear special protective clothing because of the possibility of contamination with toxic materials, change rooms equipped with clothing storage facilities separate for each employee and separate for street clothing and the special protective clothing shall be provided.

(f) *Clothes drying facilities.* When working clothes become wet or have to be washed between shifts, provision shall be made to insure that such clothing is dry before reuse.

(g) *Consumption of food and beverages on the premises*—(1) *Application.* This paragraph shall apply only where employees consume food or beverages, or both, on the premises.

(2) *Eating and drinking areas.* Areas where employees consume food or beverages shall be sanitary, but may be in the work area and need not be exclusively designated for eating and drinking. Such areas shall not include toilet rooms or toxic materials areas as defined by paragraph (a)(2)(ix) of this section.

(3) *Waste disposal containers.* Covered receptacles constructed of smooth, corrosion resistant, easily cleanable or disposable materials, shall be provided and used for the disposal of waste food. The number, size, and location of such receptacles shall encourage their use and not result in overfilling. They shall be emptied not less than once daily, unless unused, and shall be maintained in a clean and sanitary condition.

(4) *Sanitary storage.* (i) No food or beverages shall be stored in toilet rooms or toxic materials areas as defined by paragraph (a)(2)(ix) of this section.

(ii) Where employees are permitted to bring food into the place of employment and where vermin are found or suspected to be present, a vermin-proof repository for the food shall be provided.

(h) *Food handling.* All employee food service facilities and operations shall be carried out in accordance with hygienic principles the application of which will eliminate any conditions or operating methods that might provide a source of contamination. In all places of employment where all or part of the food service is provided, the food dispensed shall be wholesome, free from spoilage and shall be processed, prepared, handled, and stored in such a manner as to be protected against contamination and adulteration.

(Sec. 6, 84 Stat. 1593; 29 U.S.C. 655)

Signed at Washington, D.C., this 10th day of July 1972.

"CENTS-OFF," COUPON, AND OTHER SAVINGS REPRESENTATIONS

Proposed Frequency Limitation

In the FEDERAL REGISTER of December 30, 1971 (36 F.R. 25219), a new final order was published which established new enforcement regulations (21 CFR 1.1d, 1.1e) to control "cents-off," "economy size," and other savings representations. An order published elsewhere in this FEDERAL REGISTER confirming the effective dates of those regulations also

includes discussion of an objection made to the provision of § 1.1d that limits to no more than three the number of "cents-off," coupon, or other savings promotions of an identical consumer commodity that a sponsor may initiate in a given geographic trade area during a 12-month period. The objector suggested that six 1-month promotions would be more reasonable.

In response to this objection the Commissioner has consulted with the Federal Trade Commission and has been advised that FTC staff interprets their guide concerning "free" merchandise promotions (16 CFR 251.1; 36 F.R. 21517) as allowing three such promotions (including offers such as "Buy 1-get 1 Free," "2-for-1 sale," "50 percent off with purchase of Two," "1¢ Sale," etc.) during a 12-month period and that these three promotions may be in addition to the three "cents-off" promotions permitted during a 12-month period by the FTC regulation governing "cents-off" promotions (16 CFR 502.102; 36 F.R. 12284, 23056). Accordingly, in order to achieve consistency with the above-cited FTC regulation and guide, the Commissioner concludes that it is reasonable and proper that the FDA regulation governing "cents-off," coupon, or other savings representations should be amended as proposed below to allow up to six labeled savings representation promotions during a 12-month period provided that no more than three such promotions shall be of the same kind or type (e.g. "cents-off," "bonus offer," "two-for-one sale," 1-cent sale," etc.).

Therefore, pursuant to provisions of the Fair Packaging and Labeling Act (secs. 5, 6, 80 Stat. 1298–1300; 15 U.S.C. 1454–55) and the Federal Food, Drug, and Cosmetic Act (secs. 403 (a), (f), 502 (a), (c), 602 (a), (c), 701, 52 Stat. 1047, 1050, 1054, 1055, as amended; 21 U.S.C. 343 (a), (f), 352 (a), (c), 362 (a), (c), 371) and under authority delegated to the Commissioner (21 CFR 2.120), it is proposed that § 1.1d be amended by revising paragraph (d) to read as follows:

§ 1.1d "Cents-off," coupon, or other savings representations.

* * * * *

(d) The "cents-off," coupon, or other savings promotion may not be employed by a sponsor on consumer commodities for distribution to a specific geographic trade area until after 1 month has elapsed since their last distribution of that identical consumer commodity bearing a savings representation to the same geographic trade area. The number of such promotions for that identical consumer commodity that may occur within a 12-month period comprising a calendar, fiscal, or market year shall not exceed a total of six with no more than three of any one type or kind (e.g. "cents-off," "bonus offer," "two-for-one sale," "1-cent sale," etc.), and the total period of time for all such promotions shall not exceed 6 months within that 12-month period.

Interested persons may, within 60 days after publication hereof in the FEDERAL REGISTER, file with the Hearing Clerk, Department of Health, Education, and Welfare, Room 6–88, 5600 Fishers Lane, Rockville, Md. 20852, written comments (preferably in quintuplicate) regarding this proposal. Comments may be accompanied by a memorandum or brief in support thereof. Received comments may be seen in the above office during working hours, Monday through Friday.

PROCUREMENT BY NEGOTIATION

Use of Negotiation

Notice is hereby given in accordance with the administrative provisions in 5 U.S.C. 553, that pursuant to the Federal Property and Administrative Services Act of 1949, as amended, the Office of the Secretary is considering an amendment to 41 CFR Chapter 3 by amending Part 3–3, Procurement By Negotiation, to add a new Subpart 3–3.1.

Any person who wishes to submit written data, views, or objections pertaining to the proposed amendment may do so by filing them in duplicate with the Director, Office of Procurement and Materiel Management, OASAM, Room 3340, HEW North Building, Department of Health, Education, and Welfare, 330 Independence Avenue SW., Washington, DC 20201, within 30 days following publication of this notice in the FEDERAL REGISTER. All comments submitted pursuant to this notice will be available for public inspection during regular business hours in the Office of Procurement and Materiel Management.

This amendment provides policy and procedures for notifying and debriefing unsuccessful offerors in competitive negotiated procurements.

Dated: July 11, 1972.

N. B. HOUSTON,
Deputy Assistant Secretary for Administration.

As proposed, the amendment to Part 3–3 would read as follows:

PART 3–3—PROCUREMENT BY NEGOTIATION

1. Table of contents of Part 3–3 is amended to add a Subpart 3–3.1 as follows:

Subpart 3–3.1—Use of Negotiation

Sec.	
3–3.103	Dissemination of procurement information.
3–3.103–50	Notifying and debriefing of unsuccessful offerors.

2. Subpart 3–3.1 is added to read as follows:

Subpart 3–3.1—Use of Negotiation

§ 3–3.103 Dissemination of procurement information.

§ 3–3.103–50 Notifying and debriefing of unsuccessful offerors.

(a) *Policy.* (1) The policy of this Department is to provide a debriefing, when requested in writing, to an offeror that has unsuccessfully competed for a DHEW procurement. Exceptions or deviations from debriefing policy and procedures will be submitted to the Director, Office of Procurement and Materiel Management, OASAM, for approval.

(2) A debriefing is intended to:

(i) Tell an unsuccessful offeror which areas of his proposal were judged to be weak and deficient and whether the weaknesses or deficiencies were factors in his not having been selected;

(ii) Identify the factors which were the basis for selection of the successful contractor. If the quality of the successful offeror's proposal to satisfy the mission requirement was the basis, the unsuccessful offeror should be so informed, and given a general comparison of significant areas, but not a point-by-point comparison of all the elements considered in the evaluation criteria. If the successful offeror was selected on the basis of cost, the unsuccessful offeror should be told that such is the case. If selection was based on other factors, they should be specified.

(3) If an unsuccessful offeror feels that his failure to obtain the award was not justified, he will rely, at least in part, on the information given him in the debriefing to determine whether he should seek recourse. Accordingly, it is essential that a debriefing be conducted in a scrupulously fair, objective, and impartial manner, and that the information given the unsuccessful offeror be absolutely factual and consistent with the findings of the Contracting Officer and the basis on which he made the award.

(4) A debriefing should not reveal:

(i) Confidential or privileged commercial or financial information, trade secrets, techniques, or processes of the other offerors; and

(ii) The relative merits or technical standing of the unsuccessful offerors.

(b) *Procedures.* (1) Once a procurement action has been initiated, through the evaluation process, and even after the selection of a contractor, all queries as to the relative merits of the submitted proposals shall be courteously but firmly directed to the Contracting Officer. All other personnel will avoid exchange of comments with all offerors.

(2) Upon determination that an offeror is eliminated from consideration of an award, formal notification of such fact may be made immediately if the Contracting Officer deems it appropriate. Particular care should be taken to insure that the notification letter advises that offeror that proposed revisions will not be considered. Notification will be made to the remainder of the unsuccessful offerors promptly after the award has been made. The post-award

notification shall include the name of the successful offeror, amount of award, and number of proposals received. The above procedure is applicable to procurements over $10,000. Upon request, in accordance with paragraph (a) of this section, unsuccessful offerors shall be furnished the reasons why their proposals were not accepted.

(3) All DHEW employees who receive from an unsuccessful offeror a request, written or oral, for a debriefing shall immediately refer the request to the contracting officer. If the request is made orally the contracting officer shall require that the request be reduced to writing. The contracting officer or his designee shall be present at all debriefings and shall review written debriefings prior to release.

(4) In some cases it may be necessary to arrange informal debriefings for an unsuccessful offeror's personnel by DHEW evaluation participants. This determination will be made by, and meeting arrangements will be the responsibility of, the contracting officer.

(5) It is most important that all DHEW personnel engaged in the evaluation and selection process be aware of the foregoing policies and procedures. Detailed and complete records of the procurement will be maintained by key technical and contracting personnel in a manner which will facilitate either a written or an oral debriefing of any unsuccessful offeror.

(c) *Report.* When a debriefing is held, a brief report, summarizing the results of the debriefing, will be prepared and placed in the contract file.

Advance Notice of Proposed Rule Making

Correction

In F.R. Doc. 72-9364, appearing at page 12660 of the issue of Tuesday, June 27, 1972, the following changes should be made:

1. In the sixth line of § 172.503(a), insert the word "unless", after "§ 172.502".

2. In § 172.602(a)(4)(ii), in Table III, the phrase "Gases, Compressed or Liquefied", should be transposed under the word *"Hazards"*.

3. Under Appendix A—Definitions, in paragraph IX(b) on page 12674, in the fourth line, insert the phrase "of 50", between "LC_{50}" and "or less".

FEDERAL COMMUNICATIONS COMMISSION

[47 CFR Part 73]

[Docket No. 19537; FCC 72-599]

FM BROADCAST STATIONS

Table of Assignments, Princess Anne, Md.

In the matter of amendment of § 73.202, *Table of assignments*, FM Broadcast Stations (Princess Anne, Md.), Docket No. 19537, RM-1870.

1. The Commission has before it a petition filed by Maranatha, Inc., seeking the assignment of Class B Channel 273 at Princess Anne, Md.

2. Princess Anne, located in the Maryland portion of the DelMarVa peninsula, has a population of ony 975 and is located in Somerset County, population 18,924. Neither Princess Anne nor Somerset County has an FM assignment. Maranatha urges us to assign a Class B channel notwithstanding the small size of the community, so that an area-wide service could be inaugurated. Maranatha argues that many more persons would receive service from a Class B operation than from a Class A operation even at maximum facilities (including a large number of additional seasonal residents) and that a significant number of people would be receiving their first or second FM service. Assignment of a Class B channel under these circumstances is said to be appropriate and consistent with Commission action on two other occasions in which Class B channels were assigned the small DelMarVa peninsula communities of Tasley and Exmore, Va. Although spacing restrictions would require use of a site 7 miles or more south or southeast of Princess Anne, Maranatha contends that the requisite coverage could be provided from such a site. Finally, Maranatha insists that the preclusionary effects of the proposed assignment would be minimal and would not constitute a significant impediment to favorable action.

3. In our view this proposal has sufficient merit to warrant exploration. However, we are not expressing an opinion on the ultimate view to be taken on this proposal, for there are several matters that need to be resolved before favorable action could be taken. Even though Princess Anne is a quite small community, the population distribution of the whole southern portion of the peninsula is such that there are few significant population centers to which channels could be assigned. Both in terms of economics and coverage, it may well be necessary to assign Class B channels to such communities if there is ever to be effective service in the area. We were persuaded that such was the appropriate course to follow in the proceeding involving first assignments in Tasley and Exmore further south on the peninsula. This case appears to present a similar situation, and it may well warrant similar treatment.

4. Heretofore, we have acted on the various proposals in this area as separate matters, but a pattern has begun to emerge from these actions. As a result we no longer can simply act on each proposal separately without considering its overall significance and impact in relation to the pattern of assignments. In this particular situation we are concerned about the impact of this proposal on the Class A assignment at the nearby and much larger community of Pocomoke City. Especially in an area of low population density such as this, it may well be that assigning a Class B channel to Princess Anne would forever preclude utilization of the Class A assignment to Pocomoke City. In fact, in our recent action in Ocean City, Md., we assigned a Class B rather than a Class A channel for just the reasons which are cause for concern here.[1]

5. Although several Class A Channels appear to be available for assignment to Princess Anne, we are not inclined to pursue this possibility. Maranatha's showing and our past experience have convinced us that while a Class A assignment might be viewed as a preferable approach in the context of this particular community by itself, it still would be inappropriate as part of an area pattern. Moreover, if a Class B Channel is to be assigned, as we now propose, we consider it preferable to assign it to Pocomoke City as a substitute for its present Class A. From this location service could be provided to a wide area. At present, all of the assignments on the DelMarVa peninsula south of the Wicomico/Worcester County line in Maryland are Class B with one exception, the unoccupied Class A assignment at Pocomoke City. In each instance where we have considered the matter, we have been persuaded about the need for a Class B rather than a Class A assignment and have made them at Tasley and Exmore, Va. (and somewhat north of the line at Ocean City). In fact, south of the Delaware border (extended west to Chesapeake Bay) there is only one other Class A assignment and it is operating at Salisbury, the area's principal population center. Under these circumstances, we propose to delete the current Class A assignment at Pocomoke City and to substitute Channel 273(B) there. Such a course of action would permit its use at Princess Anne instead, but in terms of the assignment itself, we do not believe it appropriate to assign a Class B Channel to Princess Anne under circumstances that would bar its use at Pocomoke City because it is a listed community.

6. Cutoff procedure. As in other recent FM rule making proceedings, the following procedures will govern:

---

[1] It should be noted that when this channel is activated, it would serve much of the area which Maranatha mentions as that in which it would provide a first or second FM service. Even with this channel activated the services available in this general area are hardly abundant.

(a) Counterproposals advanced in this proceeding itself will be considered, if advanced in initial comments, so that parties may comment on them in reply comments. They will not be considered, if advanced in reply comments.

(b) With respect to petitions for rule making which conflict with any of the proposals in this notice, they will be considered as comments in the proceeding, and public notice to this effect will be given, as long as they are filed before the date for filing initial comments herein. If filed later than that, they will not be considered in connection with the decision herein.

7. In view of the foregoing, and pursuant to authority found in sections 4(i), 303 (g) and (r), and 307(b) of the Communications Act of 1934, as amended, it is proposed to amend the FM Table of Assignments (§ 73.202(b) of the Commission's rules and regulations), as concerns the community listed below:

TELEVISION BROADCAST STATIONS

Table of Assignments, Keyser, W. Va.

In the matter of amendment of § 73.606, *Table of assignments*, Television Broadcast Stations (Keyser, W. Va.), Docket No. 19538, RM-1965.

1. Notice is given of the petition by the West Virginia Board of Regents to amend the TV Table of Assignments (§ 73.606(b) of the Commission's rules) assigning television Channel 48 to Keyser, W. Va., and reserving it for educational use.

2. The Regents contemplate a system of translators to bring educational television service to various parts of the State of West Virginia. As a component in this system, the proposed Keyser translator would receive the signal of Station WWVU-TV Morgantown for relay to other locations in the West Virginia panhandle area. The area to be served by the Keyser proposed operation is described as physically isolated from the rest of the State and economically distressed. On this basis the Regents urge us to assign Channel 48 so that the Keyser area may be linked with the rest of the State and benefit from the offerings of the State university station. Although the petition is not clear on this point, it appears that a full-fledged TV operation is planned for some future date when the necessary funding might become available.

3. The proposal is said to meet all applicable technical regulations, save as to the separation from the Channel 52 assignment at Cumberland, Md. Although the distance between the reference points on these unoccupied channels is 18.4 miles instead of the required 20 miles, the Regents indicate they contemplate (and in their translator application propose) a site which more than meets the spacing requirement. Waiver of the technical short spacing has been requested.

4. We agree that consideration should be given to this proposal notwithstanding the short-spacing technically involved. It does not appear that another channel not subject to short-spacing problems would be available, and we can take suitable steps to insure that the channel is not used at substandard spacings. Although the petition does not articulate this point, one of the purposes appears to be that the proposed translator could be operated with 1 kw. power if it operated on an assigned channel. Although translators are a secondary usage of a given channel, this proposal appears to have real merit and might well lead to an operation of greater scope in future years. While we are prepared to consider this proposal, we do feel that it is necessary to obtain additional information from the Regents. In particular, we desire an explanation of the importance of the proposed assignment to the translator operation the Regents contemplate and a clarification of their plans (if any) for regular use of the channel.

5. In view of the foregoing and in accordance with the provisions of sections 4(i), 303 (g) and (r), and 307(b) of the Communications Act of 1934, as amended, it is proposed to amend the Television Table of Assignments, § 73.606(b) of the Commission's rules, to read as follows for the community listed below:

City	Channel No.	
	Present	Proposed
Keyser, W. Va.		*48

6. Pursuant to applicable procedures set out in § 1.415 of the Commission's rules and regulations, interested parties may file comments on or before August 22, 1972, and reply comments on or before September 1, 1972. All submissions by parties to this proceeding or persons acting on behalf of such parties, must be made in written comments, reply comments, or other appropriate pleadings.

7. In accordance with the provisions of § 1.419 of the Commission's rules and regulations, an original and 14 copies of all written comments, reply comments, pleadings, briefs, or other documents, shall be furnished the Commission. Responses filed in this proceeding will be available for public inspection during regular business hours in the Commission's Public Reference Room at its headquarters in Washington, D.C., 1919 M Street NW.

Adopted: July 6, 1972.

Released: July 11, 1972.

[Docket No. 19539; FCC 72-602]

TELEVISION BROADCAST STATIONS IN GRAND JUNCTION, COLO.

Proposed Table of Assignments

In the matter of amendment of § 73.606(b), *Table of Assignments*, Television Broadcast Stations (Grand Junction, Colo.), Docket No. 19539, RM-1852.

1. The Commission has before it for consideration a petition for rule making, filed August 26, 1971, by Woodland Broadcasting Co. (Woodland), licensee of Radio Station KBUC(AM), Montrose, Colo., requesting the assignment of Channel 8 at Grand Junction, for a second VHF assignment and commercial service. Its proposal would require no changes in other television channel assignments and would amend the television Table of Assignments for Grand Junction as follows:

City	Channel No.	
	Present	Proposed
Grand Junction, Colo.	5-, *18	5-, 8[1], *18

[1] Petitioner recommended that the proposed Grand Junction Channel 8 assignment be made with minus offset. This would be desirable since Channel 8+ was assigned at Richfield, Utah, approximately 190 miles from Grand Junction by our action of June 1, 1972, in Docket No. 19463, 35 FCC 2d....., and Channel 8 even is assigned at Pueblo, Colo.

2. An opposing statement was filed by XYZ Television, Inc. (XYZ), licensee of Station KREX-TV, which operates on the Grand Junction Channel 5 assignment, and also of Station KREY-TV (Channel 10), Montrose, Colo., and of

[1] Commissioner Hooks not participating.

[1] Commissioner Hooks not participating.

Station KREZ–TV (Channel 6), Durango, Colo., both satellites of Station KREX–TV.

3. Grand Junction (1970 population, 20,170) is the largest city and seat of Mesa County (1970 population, 54,347), located in western Colorado, approximately 190 miles southwest of Denver and southeast of Salt Lake City, Utah. It has been assigned both a reserved educational and an unreserved television assignment, Channel 5 and Channel *18, but only the unreserved Channel 5 assignment is in use. Channel 5 is occupied by Station KREX–TV which has been in operation under XYZ's ownership since 1966 and under other ownership since 1954. Station KREX–TV, together with XYZ's VHF satellite stations, KREY–TV at Montrose (1970 population, 6,496), about 55 miles southeast of Grand Junction, and Station KREZ–TV at Durango (1970 population, 10,333), about 90 miles south of Montrose, are the only television stations in operation in western Colorado. Numerous translators, however, also serve this area, and there are cable TV systems in operation at Grand Junction, Montrose, and Durango.

4. In support of its petition, Woodland submits that it is important for western Colorado to have a television station group on the air other than Station KREX–TV at Grand Junction and its satellites at Montrose (KREY–TV) and Durango (KREZ–TV). It states that, if Channel 8 is assigned at Grand Junction, it is the intention of its controlling stockholders and others with more than sufficient financial worth, to apply for the channel and, if authorization is obtained, to construct and operate a station on Channel 8 that will serve the needs of Grand Junction, Mesa County, and the western part of Colorado. It asserts that Grand Junction is the economic center of Mesa County and western Colorado and that this area can well support a second VHF assignment and station at Grand Junction. Its accompanying engineering statement shows that Channel 8 would be technically feasible for assignment and use at Grand Junction.

5. In opposition, XYZ contends that to add a new VHF channel assignment at Grand Junction for a second local commercial outlet would seriously jeopardize the present television service, rather than be of additional convenience and necessity to the public. It states that the western half of Colorado is now blanketed with television signals from all three networks, independent stations, and educational stations by its three television stations at Grand Junction, Montrose, and Durango, and by translators and CATV. In Grand Junction, it points out, local service is provided by its Channel 5 stations, and Cable TV provides the signals of the Channel 2 (KWGN), Channel 4 (KOA–TV), Channel 6 (KRMA) and Channel 9 (KBTV) Denver stations. Outside Grand Junction, in the coverage area of its Channel 5 station, it avers that off the air signals are received from numerous translators which bring in the Pueblo, Colo., Channel 5 (KOAA) station and the Salt Lake City Channel 2 (KUTV) and Channel 4 (KCPX–TV) stations. It adds that in the Durango and Cortez, Colo. areas, translators transmit all four Albuquerque, N. Mex., television stations.

6. Pointing out that Grand Junction is in a heavy mountainous terrain with elevations rising to over 10,000 feet within 15 miles, XYZ claims that there is insufficient population in Grand Junction and Mesa County to support even one television station. It states that, in order to reach an audience large enough to support its Grand Junction station, it had found it necessary to expand its coverage to reach almost all of the communities in western Colorado. This, it points out, was accomplished by constructing three local VHF stations (two of which are satellites) and by retransmitting the KREX–TV signal over more than 40 translators. It is of the view that it would be virtually impossible for another commercial station in Grand Junction to do this also.

7. We think the petitioner's proposal merits further consideration in rule making since Channel 8 appears technically feasible for a Grand Junction assignment; there appears interest and intent to establish a station at Grand Junction in the event an assignment is made available there; and it would implement our television goals and priorities and significantly benefit the public in the Grand Junction area, we believe, to have a first comparable and competing local television outlet and opportunity for diversified off-the-air local television service from another source.

8. As for XYZ's claims that a second VHF station at Grand Junction would be economically infeasible and that it would jeopardize present television service in the area, they are buttressed by no showing which would warrant either conclusion or be reason for denying rule making on the proposal. These unsupported claims do not warrant denial of this rule making request, in our view, especially in light of the fact that the petitioner, also a broadcaster in this area, has made the business judgment that there is sufficient economic potential in the Grand Junction area at this time to warrant the establishment of a second local television outlet there. Also, while it is reasonable to expect that another local station at Grand Junction would be likely to have some competitive impact upon XYZ's long-established local Channel 5 station, it does not necessarily follow that the overall public interest would be adversely affected thereby. The Commission's Table of Assignments is not static and existing licensees are not entitled to a protection from additional assignments which might have a possible adverse effect on their private economic interests. Rule making on this Channel 8 proposal will provide additional opportunity to evaluate the significance of these claimed disadvantages of this assignment proposal, and we invite comments in particular in this regard.

9. In view of the foregoing, we propose, for consideration, the revision of the TV Table of Assignments, §73.606(b) of the rules, by assigning Channel 8, at Grand Junction, Colo.

10. Authority for the action proposed herein is contained in sections 4(i), 303, and 307(b) of the Communications Act of 1934, as amended.

11. Pursuant to applicable procedures set out in § 1.415 of the Commission's rules and regulations, interested parties may file comments on or before August 22, 1972, and reply comments on or before September 1, 1972. All submissions by parties to this proceeding or persons acting on behalf of such parties must be made in written comments, reply comments, or other appropriate pleadings.

12. In accordance with the provisions of § 1.419 of the Commission's rules and regulations, an original and 14 copies of all comments, reply comments, pleadings, briefs, or other documents shall be furnished the Commission.

13. All filings made in this proceeding will be available for examination by interested parties during regular business hours in the Commission's Public Reference Room at its headquarters, 1919 M Street NW., Washington, DC.

TELEVISION BROADCAST STATIONS IN TERRE HAUTE, IND.

Proposed Table of Assignments

In the matter of amendment of § 73.606(b), *Table of Assignments*, Television Broadcast Stations (Terre Haute, Ind.), Docket No. 19536, RM–1919.

1. In this notice of proposed rule making, the Commission invites comments on the petition of Alpha Broadcasting Corp., as amended, to assign Channel 38 to Terre Haute, Ind., as a substitute for Channel 66 (RM–1919). Changes elsewhere are not necessary in order to allocate Channel 38 to Terre Haute. The petitioner also requests a show cause order for modification of its construction permit (BPCT–4117), if the substitution is made.

2. Terre Haute, population 70,335, is the seat of Vigo County, population 114,528, and the central city of the Terre Haute Standard Metropolitan Statistical Area (SMSA) consisting of Vigo, Clay (pop. 23,933), Sullivan (pop. 19,889), and Vermillion (pop. 16,793) Counties. All population data is from the 1970 census. It has four television channel assignments (Channels 2, 10, *26, and 66). Station KTWO and KTHI–TV occupy Channels 2 and 10, respectively.

3. Alpha Broadcasting Corp. (Alpha) states that it was granted a construction

[2] Commissioner Hooks not participating.

permit (CP) on December 28, 1971, for Channel 66 (BPCT-4117, Docket No. 18322). Alpha's premise is that in order for a commercial UHF station to compete with VHF stations there must be a reduction of the disparity between VHF and UHF channels, here, narrowing the difference in frequencies. In this respect, Alpha refers to its previous petition to change the educational reservation from Channel 26 to 66 which was denied (19 RR 2d 1850 (1970)). It initiated this proceeding on the basis that commencement of the first UHF station in Terre Haute on the lowest available channel is more persuasive in the light of action taken in the land mobile proceedings;[1] note is made that in Docket No. 18262 steps have been taken to reassign Channels 70 through 83 to land mobile service, and Alpha believes that in a few years "this may be extended downward" to encompass Channel 66.

4. The petition, which also requested change of the noncommercial reservation from Channel 26 to 38, was opposed by the Corporation for Public Broadcasting (CPB), and the National Association of Educational Broadcasters (NAEB) as concerns change of the ETV reservation. CPB relied on its and other educational groups'[2] opposition to the petitioner's previous request to change assignment. NAEB, in reply comments, supported the view expressed by CPB; the latter feels that the rationale expressed by the Commission in the report and order in Docket 18808 is equally applicable here.

5. Subsequently, Alpha amended its petition to merely request substitution of Channel 38 for 66 and that a show cause order be issued as to amending its CP accordingly. It appears that Alpha has made a sufficient showing that we consider amending the TV Table of Assignments as follows:

City	Channel No.	
	Present	Proposed
Terre Haute, Ind.....	2, 10, *26, 66	2, 10, *26, 38

If the Commission decides to adopt the proposed amendment or otherwise change the Channel 66 assignment at Terre Haute, then, pursuant to section 316 of the Communications Act of 1934, as amended, Alpha Broadcasting Corp. shall show cause why its construction permit for that channel should not be modified to specify the substitute channel.

6. Authority for the action proposed herein, is contained in sections 4(i), 303 (g) and (r), and 307(b) of the Communications Act of 1934, as amended.

7. Pursuant to applicable procedures set out in § 1.415 of the Commission's rules and regulations, interested parties may file comments, on or before August 22, 1972, and reply comments on or before September 1, 1972. All submissions by parties to this proceeding, or by persons acting on behalf of such parties must be made in written comments, reply comments, or other appropriate pleadings.

8. In accordance with the provisions of § 1.419 of the Commission's rules and regulations, an original and 14 copies of all written comments, reply comments, pleadings, briefs, or other documents, shall be furnished the Commission. These documents will be available for public inspection during regular business hours in the Commission's Public Reference Room at its Headquarters, 1919 M Street NW., Washington, D.C.

A copy of the record pertaining to this decision is available for public review during ordinary business hours of the Department of Commerce, at the Office of Import Programs, Department of Commerce, Washington, D.C.

Docket No. 72-00324-91-02300. Applicant: Harvard University, Purchasing Department, 75 Mount Auburn Street, Cambridge, MA 02138. Article: Andreas Hofer programed feeding unit. Manufacturer: Andreas Hofer, Switzerland. Intended use of Article: The article is intended to be used in a research program seeking an accurate way to measure the ability of specific human foods to cause tooth decay. Materials which are suspected of having the ability to reduce the caries-producing influence of a human food will be evaluated. Rats will be used as subjects in this research program.

Comments: No comments have been received with respect to this application.

Decision: Application approved. No instrument or apparatus of equivalent scientific value to the foreign article, for such purposes as this article is intended to be used, is being manufactured in the United States.

Reasons: The foreign article provides programed feeding for 72 test animals for use in research on the cause of tooth decay. We are advised by the Department of Health, Education, and Welfare (HEW) in its memorandum dated June 9, 1972, that the capability described above is pertinent to the purpose for which the article is intended to be used. HEW also advises that it knows of no scientifically equivalent domestic instrument which can be used for the applicant's intended purposes.

The Department of Commerce knows of no other instrument or apparatus of equivalent scientific value to the foreign article, for such purposes as this article is intended to be used, which is being manufactured in the United States.

Notice of Decision on Application For Duty-Free Entry of Scientific Article

The following is a decision on an application for duty-free entry of a scientific article pursuant to section 6(c) of the Educational, Scientific, and Cultural Materials Importation Act of 1966 (Public Law 89-651, 80 Stat. 897) and the regulations issued thereunder as amended (37 F.R. 3892 et seq.).

A copy of the record pertaining to this decision is available for public review during ordinary business hours of the Department of Commerce, at the Office of Import Programs, Department of Commerce, Washington, D.C.

Docket No. 72-00157-50-02000. Applicant: University of Colorado, Regent Hall, Room 122, Boulder, Colo. 80302. Article: Anemometer, Mark II. Manufacturer: Rauchfuss Instrument & Staff Pty. Ltd., Australia. Intended use of article: The article will be used for weather measuring in connection with studies involving snow avalanches.

Comments: No comments have been received with respect to this application.

Decision: Application approved. No instrument or apparatus of equivalent scientific value to the foreign article, for such purposes as this article is intended to be used, is being manufactured in the United States.

Reasons: The foreign article provides the capabilities for use under rime ice conditions at 3,600 meters and a 30-day service interval. We are advised by the National Bureau of Standards (NBS) in its memorandum dated June 7, 1972, that the capabilities for use under rime ice conditions and capability for a 30-day service interval are pertinent to the purposes for which the article is intended to be used. NBS further advises that it knows of no domestically manufactured instrument capable of satisfying both of the applicant's pertinent specifications.

The Department of Commerce knows of no other instrument or apparatus of equivalent scientific value to the foreign article, for such purposes as this article is intended to be used, which is being manufactured in the United States.

Docket No. 72-00312-00-46040. Applicant: University of Florida, M-452, College of Medicine, Department of Medical Microbiology, Gainesville, Fla. 32601. Article: Electrical exposure shutter with equipment for exposure measurement. Manufacturer: Siemens, AG, West Germany. Intended use of article: The article is an accessory for an existing electron microscope.

Comments: No comments have been received with respect to this application.

Decision: Application approved. No instrument or apparatus of equivalent scientific value to the foreign article, for such purposes as this article is intended to be used, is being manufactured in the United States.

Reasons: The application relates to a compatible accessory for an instrument that had been previously imported for the use of the applicant institution. The article is being furnished by the manufacturer which produced the instrument with which the article is intended to be used and is pertinent to the applicant's purposes.

The Department of Commerce knows of no similar accessory being manufactured in the United States, which is interchangeable with or can be readily adapted to the instrument with which the foreign article is intended to be used.

Notice of Decision on Application For Duty-Free Entry of Scientific Article

The following is a decision on an application for duty-free entry of a scientific article pursuant to section 6(c) of the Educational, Scientific, and Cultural Materials Importation Act of 1966 (Public Law 89-651, 80 Stat. 897) and the regulations issued thereunder as amended (37 F.R. 3892 et seq.).

A copy of the record pertaining to this decision is available for public review during ordinary business hours of the Department of Commerce, at the Office of Import Programs, Department of Commerce, Washington, D.C.

Docket No. 72-00325-33-46040. Applicant: University of Pennsylvania, School of Medicine, 36th and Spruce Streets, Philadelphia, Pa. 19104. Article: Electron microscope, Model HU-11E. Manufacturer: Hitachi, Ltd., Japan. Intended use of article: The article is intended to be used in investigations dealing with the isolation, identification, structure, and behavior of animal viruses, with special emphasis on leukemia viruses of murine origin. The article will also be used for the training of graduate students and post doctorates in the techniques and application of electron microscopy.

Comments: No comments have been received with respect to this application.

Decision: Application approved. No instrument or apparatus of equivalent scientific value to the foreign article, for such purposes as this article is intended to be used, is being manufactured in the United States. Reasons: The foreign article has a specified resolving capability of 3.5 angstroms. The most closely comparable domestic instrument is the Model EMU-4C electron microscope manufactured by the Fórgflo Corporation. The Model EMU-4C has a specified resolving capability of 5 angstroms. (The lower the numerical rating in terms of angstrom units, the better the resolving capability.) We are advised by the Department of Health, Education, and Welfare (HEW) in its memorandum dated June 9, 1972, that the additional resolving capability of the foreign article is pertinent to the purposes for which the foreign article is intended to be used. We, therefore, find that the Model EMU-4C is not of equivalent scientific value to the foreign article for such purposes as the article is intended to be used.

The Department of Commerce knows of no other instrument or apparatus of equivalent scientific value to the foreign article, for such purposes as this article is intended to be used, which is being manufactured in the United States.

Manufacturer: AEI Scientific Apparatus, Ltd., United Kingdom. Intended use of article: The article is intended to be used to examine human tumor and tumor cells at high resolution in studies to determine the manner in which nerve cells of the brain are interconnected.

Comments: No comments have been received with respect to this application.

Decision: Application approved. No instrument or apparatus of equivalent scientific value to the foreign article, for such purposes as this article is intended to be used, is being manufactured in the United States.

Reasons: The foreign article is equipped with a tilt stage having a guaranteed resolving power of 5 angstroms. The most closely comparable domestic instrument is the Model EMU-4C electron microscope manufactured by the Forgflo Corp. (Forgflo). The Model EMU-4C can be equipped with a tilt stage but the guaranteed resolving power of this stage is 8 angstroms. (The lower the numerical rating in terms of angstrom units, the better the resolving power.) We are advised by the Department of Health, Education, and Welfare in its memorandum dated June 9, 1972, that the guaranteed resolving power of the tilt stage of the foreign article is pertinent to the applicant's research studies. We, therefore, find that the Model EMU-4C electron microscope is not of equivalent scientific value to the foreign article for such purposes as this article is intended to be used.

ADVISORY COUNCIL ON HISTORIC PRESERVATION

NATIONAL REGISTER OF HISTORIC PLACES

Protection of Properties; Procedures for Compliance

Pursuant to the National Historic Preservation Act of 1966 (80 Stat. 915, 16 U.S.C. 470), the Advisory Council on Historic Preservation has proposed steps to implement the purposes of that Act through the revision of Procedures for Compliance previously set forth in Paragraphs II A through C (37 F.R. 5430), of the FEDERAL REGISTER of March 15, 1972. In addition, the role and functions of the Advisory Council on Historic Preservation have been more clearly defined.

It is the purpose of this notice, through publication of the following information and materials, to apprise the public, as well as governmental agencies, associations, and all other organizations and individuals interested in historic preservation of the implementing actions that are proposed in order that there will be a greater awareness of the responsibilities entrusted to the Advisory Council. Interested parties are hereby invited to submit written comments, suggestions or objections to the proposed revisions in the Procedures for Compliance to the Executive Secretary, Advisory Council on Historic Preservation, Room 12123, 1100 L Street NW., Washington, DC 20005, within 30 days of publication of this notice in the FEDERAL REGISTER.

THOMAS FLYNN,
Executive Director, Advisory Council on Historic Preservation.

PROTECTION OF PROPERTIES IN THE NATIONAL REGISTER OF HISTORIC PLACES

Introduction. The National Historic Preservation Act of 1966 created the Advisory Council on Historic Preservation, an independent agency of the Executive Branch of the Federal Government, to advise the President and Congress on matters involving historic preservation. Its members are the Secretary of the Interior, the Secretary of Housing and Urban Development, the Secretary of Treasury, the Secretary of Commerce, the Attorney General, the Secretary of Transportation, the Secretary of Agriculture, the Administrator of the General Services Administration, the Secretary of the Smithsonian Institution, the Chairman of the National Trust for Historic Preservation, and 10 citizen members selected on the basis of their outstanding service in the field of historic preservation.

The Council is authorized to review and comment upon undertakings carried out, licensed, or financially assisted by the Federal Government which have an effect upon properties listed on the National Register; to recommend measures to coordinate activities of Federal, State, and local agencies and private institutions, and individuals relating to historic preservation; and to secure from the appropriate Federal agencies certain information necessary to the performance of these duties.

I. PROCEDURES FOR COMPLIANCE WITH SECTION 106

The Council exercises an important function by reviewing and commenting upon undertakings carried out, licensed, or financially assisted by the Federal Government when the undertaking will affect a property listed on the National Register. This authority derives from section 106 of the National Historic Preservation Act, which provides that:

> The head of any Federal agency having direct or indirect jurisdiction over a proposed Federal or federally assisted undertaking in any State and the head of any Federal department or independent agency having authority to license any undertaking shall, prior to the approval of the expenditure of any Federal funds on the undertaking or prior to the issuance of any license, as the case may be, take into account the effect of the undertaking on any district, site, building, structure, or object that is included in the National Register. The head of any such Federal agency shall afford the Advisory Council on Historic Preservation established under title II of this Act a reasonable opportunity to comment with regard to such undertaking.

The Advisory Council desires to provide maximum assistance to Federal agencies in connection with section 106. Normally the Council anticipates that its comments will be required in only the most complex situations, and it requests that Federal agencies fulfill their obligations under section 106 by the use of the following procedures:

ADVISORY COUNCIL ON HISTORIC PRESERVATION

PROCEDURES FOR COMPLIANCE WITH SECTION 106 NATIONAL HISTORIC PRESERVATION ACT OF 1966

The Advisory Council on Historic Preservation hereby establishes the following procedures for agencies of the Federal Government having direct or indirect jurisdiction or authority over a Federal or federally financed or licensed undertaking for compliance with Section 106 of the National Historic Preservation Act of 1966.

A. *Definitions:* As used in these procedures:

1. "National Historic Preservation Act" means Public Law 89-665, approved October 15, 1966, an "Act to establish a program for the preservation of additional historic properties throughout the Nation and for other purposes," 80 Stat. 915, 16 U.S.C. 470, hereinafter referred to as "the Act."

2. "Undertaking" means any Federal action, activity, or program, or the approval, sanction, assistance or support of any other action, activity or program, such as the issuance of a license or permit, or the granting of funds.

3. "National Register" means the National Register of Historic Places, which is a register of districts, sites, buildings, structures, and objects significant in American history, architecture, archeology, and culture, maintained by the Secretary of the Interior under authority of section 2(b) of the Historic Sites Act of 1935 (49 Stat. 666, 16 U.S.C. 461) and section 101(a)(1) of the National Historic Preservation Act. The National Register is published in its entirety in the FEDERAL REGISTER each year in February. Addenda are published monthly.

4. "National Register Property" means a district, site, building, structure, or object listed in the National Register.

5. "National Register Criteria" means the following criteria established by the Secretary of the Interior for use in evaluating and determining the eligibility of properties for listing in the National Register:

The quality of significance in American history, architecture, archeology, and culture is present in districts, sites, buildings, structures, and objects of State and local importance that possess integrity of location, design, setting, materials, workmanship, feeling, and association and:

a. That are associated with events that have made a significant contribution to the broad patterns of our history; or

b. That are associated with the lives of persons significant in our past; or

c. That embody the distinctive characteristics of a type, period, or method of construction, or that represent the work of a master, or that possess high artistic values, or that represent a significant and distinguishable entity whose components may lack individual distinction; or

d. That have yielded, or may be likely to yield, information important in prehistory or history.

Criteria considerations. Ordinarily cemeteries, birthplaces, or graves of historical figures, properties owned by religious institutions or used for religious purposes, structures that have been moved from their original locations, reconstructed historic buildings, properties primarily commemorative in nature, and properties that have achieved significance within the past 50 years shall not be considered eligible for the National Register. However, such properties will qualify if they are integral parts of districts that do meet the criteria or if they fall within the following categories:

(1) A religious property deriving primary significance from architectural or artistic distinction or historical importance.

(2) A building or structure removed from its original location but which is significant primarily for architectural value, or which is the surviving structure most importantly associated with a historic person or event.

(3) A birthplace or grave of a historical figure of outstanding importance if there is no appropriate site or building directly associated with his productive life.

(4) A cemetery which derives its primary significance from graves of persons of transcendent importance, from age, from distinctive design features, or from association with historic events.

(5) A reconstructed building when accurately executed in a suitable environment and presented in a dignified manner as part of a restoration master plan, and when no other building or structure with the same association has survived.

(6) A property primarily commemorative in intent if design, age, tradition, or symbolic value has invested it with its own historical significance.

(7) A property achieving significance within the past 50 years if it is of exceptional importance.

6. "Criteria for Effect" means the following criteria established by the Advisory Council on Historic Preservation for use in determining the effect of an undertaking upon a National Register property:

A federally financed or licensed undertaking shall be considered to have an effect on a National Register listing (districts, sites, buildings, structures, and objects, including their settings) when any condition of the undertaking creates any change in the quality of the historical, architectural, archeological, or cultural character that qualified the property under the National Register criteria for listing in the National Register.

Generally, adverse effects occur under conditions which include but are not limited to:

a. Destruction or alteration of all or part of a property;

b. Isolation from or alteration of its surrounding environment;

c. Introduction of visual, audible, or atmospheric elements that are out of character with the property and its setting.

7. "Agency Official" means the head of the Federal agency having responsibility for the undertaking or a subordinate employee of the Federal agency to whom authority with respect to the evaluation of the effect of the proposed undertaking has been delegated.

8. "Executive Director" means the Executive Director of the Advisory Council on Historic Preservation established by section 205 of the Act, or his designated representative.

9. "State Liaison Officer" means the official within each State, authorized by the State at the request of the Secretary of the Interior, to act as liaison for purposes of implementing the Act, or his designated representative.

B. *Agency Procedures*

1. *Consideration of Effect.* At the earliest stage of planning or consideration of a proposed undertaking, the Agency Official shall: (a) Consult the National Register to determine if a National Register property is involved in the undertaking; and (b) upon finding involvement, apply the "Criteria for Effect." Upon applying the criteria and finding no effect, the undertaking may proceed.

2. *Effect Established.* Upon finding that the undertaking will have an effect upon a National Register property, the Agency Official shall: (a) Notify the State Liaison Officer and the Executive Director; and (b) in joint consultation with them, determine whether or not the effect will be adverse. Upon finding no adverse effect, the Agency Official, the State Liaison Officer, and the Executive Director shall execute a joint memorandum acknowledging no adversity and forward the document to the Chairman of the Advisory Council for review. See Section C(1).

3. *Adverse Effect Established.* Upon finding an adverse effect, in the opinion of any of the parties to the consultation, the Agency Official shall:

a. With the State Liaison Officer and the Executive Director, select and unanimously agree upon a prudent and feasible alternative to remove the adverse effect, and

b. With the State Liaison Officer and the Executive Director, execute a joint memorandum acknowledging no adversity and forward the document to the Chairman of the Advisory Council for review. See Section C(1).

c. Upon failing to find and unamimously agree upon a prudent and feasible alternative, delay further processing of the undertaking.

d. Provide written notice affording the Advisory Council an opportunity to comment. The notice shall include a record of the status of the proposal in the planning and funding sequence and an account of actions taken in accordance with the Procedures for Compliance.

e. Upon request submit a report of the undertaking.

C. *Council Procedures*

1. *Review of Joint Memorandum.* Upon receipt from the Agency Official of a joint memorandum acknowledging no adversity, the Chairman of the Council shall review the content of the document. Unless the Chairman, or in his absence a citizen member of the Council appointed by the membership for this purpose, shall notify the Agency Official that the matter has been placed on the agenda of the Council for final review and comment, the joint memorandum shall become final in 30 days, and the undertaking may proceed.

2. *Preliminary Action on Request for Comment.* Upon receipt of a written notice from an agency requesting the comments of the Advisory Council in accordance with Section 106 of the Act, the Council will prepare an acknowledgment and institute a 30-day review period during which it will:

a. Review the notice to determine whether the Procedures for Compliance have been observed;

b. Request, when necessary, more information from the Federal Agency, the State Liaison Officer, or the Executive Director; and

c. Determine whether or not it will comment, and inform the Federal Agency of its decision.

3. *Decision to Comment.* Upon determination to comment upon an undertaking, the Council will:

a. Place the matter on the agenda of the next regular meeting or, in exceptional cases, schedule the matter for consideration at a special or in an unassembled meeting. For purposes of considering comments upon an undertaking at a regularly scheduled meeting, the Council shall consider it reasonable to be in receipt of a request for comment at least 6 weeks in advance of the meeting.

b. Notify the Federal Agency of the date on which comments will be considered; and

c. Authorize preparation of a Section 106 report.

4. *Content of section 106 report.* For purposes of arriving at comments under section 106 of the Act, the Advisory Council prescribes that certain reports be made available to it and accepts reports and statements from other interested parties. Specific informational requirements are enumerated below. Generally, the requirements represent an explication or elaboration of principles contained in the "Criteria for Effect." The Council notes, however, the Act recognizes that historical and cultural resources should be preserved "as a living part of our community life and development." Consequently, in arriving at final comments, the Council considers those elements in an undertaking that have relevance beyond historical and cultural concerns. To assist it in weighing the public interest, the Council welcomes information not only bearing upon physical, sensory, or esthetic effects but information concerning economic, social, and other benefits or detriments that will result from the undertaking.

5. *Elements of the section 106 report.* The report on which the Council relies for comment shall consist of:

a. A report from the Executive Director to include a verification of the legal and historical status of the National Register property; an assessment of the historical, architectural, archeological, or cultural significance of the National Register property; a statement indicating the special value of features to be most affected by the undertaking; an evaluation of the total effect of the undertaking upon the National Register

property; and a critical review of any known feasible and prudent alternatives.

b. A report from the Federal agency requesting comment to include a general discussion of the proposed undertaking; when appropriate, an account of the steps taken to comply with section 102(2)(A) of the National Environmental Policy Act of 1969 (83 Stat. 852, 42 U.S.C. 4332); an evaluation of the effect of the undertaking upon the National Register property, with particular reference to the impact on the historic scene; steps taken or proposed by the agency to take into account or minimize the effect of the undertaking; a discussion of alternatives, and, if applicable and available, a copy of the draft of the preliminary environmental impact statement prepared in compliance with section 102(2)(C) of the National Environmental Policy Act of 1969.

c. A report from any other Federal agency having under consideration a plan or undertaking that will concurrently or ultimately affect the National Register property, including a general description of the plan or undertaking and a discussion of the effect the undertaking under consideration by the Council will have upon such proposals.

d. A report from the State Liaison Officer to include an assessment of the significance of the National Register property; an identification of features of special value; an evaluation of the effect of the undertaking upon the National Register property and its specific components; a consideration of known alternatives; a discussion of present or proposed participation of State and local agencies or organizations in preserving or assisting in preserving the National Register property; an indication of the support or opposition of units of government and public and private agencies and organizations within the State; and the recommendations of his office.

e. Other pertinent reports, statements, correspondence, transcripts, minutes, and documents received by the Council from any and all parties, public or private.

6. *Report by recipient or potential recipient.* When the Federal agency requests comment upon an application for funds, a grant, or license or some other form of Federal approval, sanction, assistance, or support, the Council will welcome the submission and presentation of a report by the applicant or potential recipient. Arrangements for the submission and presentation of reports by applicants or potential recipients should be made through the Federal agency having jurisdiction in the matter.

7. *Coordination of section 106 reports and statements.*

a. In considerations involving, either directly or indirectly, more than one Federal department, the agency requesting comment shall act as a coordinator in arranging for a full assessment and discussion of all interdepartmental facets of the problem and prepare a record of such coordination to be made available to the Council.

b. The Council may request the State Liaison Officer or other State officials to accept the responsibility for notifying appropriate governmental units and public and private organizations within the State of the pending comments of the Council, and to coordinate the presentation of written statements to the Council.

8. *Council meetings.* The Council will not hold formal hearings on section 106 matters. All meetings will be open except as otherwise ordered by the Chairman. Reports and statements will be presented to the Council in open session in accordance with a prearranged agenda and considered by the Council in executive session for the purpose of preparing comments. Regular meetings of the Council occur on the first Wednesday and Thursday of February, May, August, and November.

9. *Oral statements to the Council.* A schedule shall provide for oral statements from the Executive Director; the referring Federal agency presently or potentially involved; the recipient or potential recipient; the State Liaison Officer; and representatives of National, State, or local units of government and public and private organizations. The Council requests that parties wishing to make oral remarks submit written statements of position in advance to the Council staff.

10. *Comments by the Council.* The comments of the Council shall take the form of a three-part statement, including an introduction, findings, and a conclusion. Comments shall be made to the head of the Federal agency requesting comment or having responsibility in the matter. Immediately thereafter, the comments of the Council will be forwarded to the President and the Congress as a special report under authority of section 202(b) of the Act and published as soon as possible in the FEDERAL REGISTER.

11. *Records of the Council.* The records of the Council shall consist of an oral transcript of the proceedings at each meeting, the section 106 report prepared by the Executive Director, and all other reports, statements, transcripts, correspondence, and documents received. Records shall be maintained in the office of the Council.

II. OTHER POWERS OF THE COUNCIL

A. *Comment or report upon non-Federal undertaking.*

The Council will exercise the broader advisory powers, vested by section 202(a)(1) of the Act, to comment or report upon a non-Federal undertaking that will adversely affect a National Register property or any other property determined by the Secretary of the Interior to meet the National Register criteria (1) upon request from the President of the United States, the President of the U.S. Senate, or the Speaker of the House of Representatives, or (2) when agreed upon by a unanimous vote of the members of the Council.

B. *Comment or report upon Federal undertaking in special circumstances.*

The Council will exercise its broader advisory powers by commenting to Federal agencies in certain special situations even though written notice that an undertaking will have an effect has not been received. For example, the Council may choose to comment in situations where an objection is made to a Federal agency finding of "no effect."

[Docket No. 23486; Order 72-7-30]

INTERNATIONAL AIR TRANSPORT ASSOCIATION

Order Regarding Fare Matters

Issued under delegated authority July 10, 1972.

An agreement has been filed with the Board pursuant to section 412(a) of the Federal Aviation Act of 1958 (the Act) and Part 261 of the Board's economic regulations, between various air carriers, foreign air carriers, and other carriers, embodied in the resolutions of Traffic Conference 3 of the International Air Transport Association (IATA). The

agreement, adopted pursuant to the provisions of Resolution 072a dealing with the establishment of special excursion fares within the area comprised of the South Pacific Islands/Australasia/Asia, has been assigned the above-designated CAB agreement number.

The agreement, originated by Air New Zealand and promulgated in an IATA letter dated June 12, 1972, would establish a special 6/30-day excursion fare for circle and round trips between Auckland and Pago Pago at a level of 84 United Kingdom pounds.[1] The fare would be available between July 15, 1972, and March 31, 1973.

Pursuant to authority duly delegated by the Board in the Board's regulations, 14 CFR 385.14, it is not found that the subject agreement is adverse to the public interest or in violation of the Act.

Accordingly, it is ordered, That:

Agreement CAB 23165 be and hereby is approved.

Persons entitled to petition the Board for review of this order, pursuant to the Board's regulations, 14 CFR 385.50, may file such petitions within 10 days after the date of service of this order.

INTERNATIONAL AIR TRANSPORT ASSOCIATION

Order Regarding Passenger Sales Agents

Issued under delegated authority July 10, 1972.

An agreement has been filed with the Board pursuant to section 412(a) of the Federal Aviation Act of 1958 (the Act) and Part 261 of the Board's economic regulations, between various air carriers, foreign air carriers, and other carriers, embodied in the resolutions of Traffic Conference 1 of the International Air Transport Association (IATA). The agreement, which was adopted by mail vote, has been assigned the above-designated CAB agreement number.

The agreement would amend existing resolutions governing passenger sales agency rules for non-U.S. agents, as well as the form of passenger sales agency agreements, by reducing the rate of commission from 6.09 to 5.82 percent for the sale of air transportation by agents in Chile. The agreement is of primary interest to the Government of Chile. However, we are not disclaiming jurisdiction inasmuch as the agreement would apply to tickets sold in air transportation as defined by the Act. Accordingly, we will herein approve the subject agreement.

Pursuant to authority duly delegated by the Board in the Board's regulations, 14 CFR 385.14, it is not found that Resolutions 100(Mail 902)810a and 100(Mail 902)820a, which are incorporated in Agreement CAB 23155, are adverse to the public interest or in violation of the Act.

Accordingly, it is ordered, That:

Agreement CAB 23155 be and hereby is approved.

Persons entitled to petition the Board for review of this order pursuant to the Board's regulations, 14 CFR 385.50, may file such petitions within 10 days after the date of service of this order.

This order shall be effective and become the action of the Civil Aeronautics Board upon expiration of the above period, unless within such period a petition for review thereof is filed or the Board gives notice that it will review this order on its own motion.

This order will be published in the FEDERAL REGISTER.

INTERNATIONAL AIR TRANSPORT ASSOCIATION

Order Regarding Specific Commodity Rates

Issued under delegated authority July 10, 1972.

An agreement has been filed with the Board pursuant to section 412(a) of the Federal Aviation Act of 1958 (the Act) and Part 261 of the Board's economic regulations, between various air carriers, foreign air carriers, and other carriers, embodied in the resolutions of the International Air Transport Association (IATA) and adopted pursuant to the provisions of Resolution 590 dealing with specific commodity rates.

The agreement, adopted pursuant to unprotested notices to the carriers and promulgated in an IATA letter dated June 23, 1972, names an additional specific commodity rate, as set forth below. The rate reflects a reduction from the otherwise applicable general cargo rate.

Specific commodity item No.	*Description and rate*
1430	Cut Flowers — Except Orchids, 266 cents per kg., minimum weight 100 kgs. From Los Angeles to Sydney.

Pursuant to authority duly delegated by the Board in the Board's regulations, 14 CFR 385.14, it is not found that the subject agreement is adverse to the public interest or in violation of the Act, provided that approval is subject to the condition hereinafter ordered.

Accordingly, it is ordered, That:

Agreement CAB 23054, R-5, be and hereby is approved, provided that approval shall not constitute approval of the specific commodity description contained therein for purposes of tariff publications; provided further that tariff filings shall be marked to become effective on not less than 30 days' notice from the date of filing.

Persons entitled to petition the Board for review of this order, pursuant to the Board's regulations, 14 CFR 385.50, may file such petitions within 10 days after the date of service of this order.

This order shall be effective and become the action of the Civil Aeronautics Board upon expiration of the above period, unless within such period a petition for review thereof is filed or the Board gives notice that it will review this order on its own motion.

This order will be published in the FEDERAL REGISTER.

[Docket No. 23333; Order 72-7-40]

INTERNATIONAL AIR TRANSPORT ASSOCIATION

Order Regarding Transatlantic Cargo Rate Matter

Adopted by the Civil Aeronautics Board at its office in Washington, D.C., on the 12th day of July 1972.

By Order 72-6-137, the Board generally approved, in some instances subject to conditions, agreements adopted by the carrier members of the International Air Transport Association (IATA) for the purpose of establishing a new North Atlantic cargo rate structure. However, in acting on the agreement scheduled for July 1, 1972, effectiveness, the Board deferred action on rates and provisions proposed for application between the United States and the Federal Republic of Germany for the carriage of containerized freight in unit-load devices designated as Types 1 and 2. These devices are more commonly known as "bungalow" cargo containers designed for particular carriage in wide-bodied B-747 freighter aircraft. The longest dimension of such containers measures 20 feet and 10 feet for Type 1 and Type 2, respectively.

In deferring action on the provisions of the agreement, which would govern the rating of bungalows, the Board noted the relationship between such provisions and a request by Seaboard in Docket 24425 for Board suspension of bungalow rates in tariffs filed unilaterally by Lufthansa during the IATA "open-rate" period that prevailed prior to the agreements' effectiveness. The Board indicated that it would defer action for consideration with further action in Docket 24425. However, as a result of recent consultations between the Governments of the United States and the Federal Republic of Germany, the latter has indicated that Seaboard and other carriers designated by the two governments to serve between the two countries will be permitted to establish rates, charges and provisions equivalent to the

[1] U.S. $218.90.

bungalow rates for the carriage of airfreight in any other unit-load device or devices. Accordingly, the Board has concluded to approve, for a limited period of July 15, 1972, through September 30, 1972, rates, charges, and provisions embodied in the subject IATA agreement for application to the 10-foot bungalow (Type 2). Inasmuch as no carrier has commenced utilization of the larger, 20-foot bungalow (Type 1), we will continue to defer action on the rates, charges, and provisions embodied in the agreement for that unit-load device.

Accordingly, it is ordered, That:

1. Agreement CAB 22969, R–16, insofar as it provides rates, charges, and provisions applicable to containerized freight moving between the United States and the Federal Republic of Germany in Type 2 unit-load devices, be and hereby is approved through September 30, 1972, subject to the following conditions:

(a) That equivalent rates, charges, and provisions may be established during the same period for the transportation of airfreight in any other unit-load device or devices by any carrier designated by the Governments of the Federal Republic of Germany and of the United States to serve between points in the two respective countries;

(b) That tariffs implementing the rates, charges, and provisions pursuant to the subject agreement and the above condition may be filed, on not less than 1 day's notice, to be effective on or after July 15, 1972, and shall bear an expiration date of September 30, 1972; provided further that such tariffs shall not be applied after September 30, 1972, unless the Civil Aeronautics Board has extended its approval of the subject agreement and the Government of the Federal Republic of Germany has approved the equivalent rates, charges, and provisions contemplated by our condition (a) herein.

2. Action be and hereby is further deferred with respect to that portion of Agreement CAB 22969, R–16, containing rates, charges, and provisions applicable to containerized freight moving between the United States and the Federal Republic of Germany in Type 1 unit-load devices.

This order will be published in the FEDERAL REGISTER.

FEDERAL COMMUNICATIONS COMMISSION

[Docket No. 19531; FCC 72–555]

JENNINGS MOBILFONE

Memorandum Opinion and Order Designating Application for Hearing on Stated Issues

In the matter of application of Floyd E. Dugas, doing business as Jennings Mobilfone, for a license for a new public coast Class III–B radiotelephone station to be located in the vicinity of Jennings, La., Docket No. 19531, File No. 828–M–L–51.

1. The above-captioned application seeks a license for a new Class III–B public coast station to be located in the vicinity of Jennings, La. This class of station provides ship-shore radiotelephone common carrier service, primarily of a local character, on VHF channels. The applicant seeks authority to serve the Jennings, La. area.

2. South Central Bell Telephone Co. (hereinafter called Bell) has filed a petition to deny the subject application alleging that, within the meaning of § 81.303 of the rules, the service area of the proposed station would be solely within the service areas of its existing public coast class III–B stations at Lake Charles, La. (KKD–735) and at Erath, La. (KKM–649), and that the grant would result in unnecessary and wasteful duplication of service. The applicant has filed an opposition to the petition to deny alleging that the service area of its proposed station in the Mermentau River basin is beyond the coverage area of the existing Bell stations. The applicant further alleges that, whatever the extent of overlap, if any, the application should be granted because the existing Bell stations are not adequately serving the needs of the public in the Mermentau River basin area.

3. Except for the issues otherwise specified herein, the applicant is qualified to become a licensee of the Commission. On the basis of its status as the licensee of KKD–735 and KKM–649, Bell is found to be a party of interest. The Safety and Special Radio Services Bureau and the Common Carrier Bureau of the Federal Communications Commission are parties to this proceeding.

4. It is evident from an analysis of the application and pleadings that some degree of overlap in service area will exist if the application of Floyd E. Dugas, doing business as Jennings Mobilfone (hereinafter called Mobilfone) is granted. In addition, the application and associated pleadings do not conclusively establish that the service area of the proposed station will be solely within the service area of the existing stations, or to what extent there is now an unfilled need for public radio maritime communication service facilities to serve the area here involved. In view of these substantial and material questions of fact, the Commission is unable to make a determination that it would be in the public interest to grant the applications; therefore, an evidentiary hearing is required to resolve the questions of fact and to determine if the public interest would be served by the grant of their application.

5. *Accordingly, it is ordered,* That the above-captioned application of Mobilfone is designated for hearing at a time and place to be specified in a subsequent order on the following issues:

a. To determine the coverage area of Mobilfone's proposed station.

b. To determine the coverage area of Bell's stations at Lake Charles (KKD–735) and Erath (KKM–649), La.

c. To determine whether overlap, if any, of the coverage areas of the Bell stations by the proposed station would be contrary to the public interest.

d. To determine whether there is a need for the proposed facility at the proposed location, taking into account whether Bell is adequately serving the needs of the public.

e. To determine, in light of the evidence adduced on all the foregoing issues, whether the public interest, convenience and necessity will be served by the grant of the subject application.

6. *It is further ordered,* That the petition to deny filed by Bell, is granted to the extent indicated herein and is otherwise denied.

7. *It is further ordered,* That coverage areas will be computed on the basis of the information in the Commission's Report and Order in Docket No. 18944.

8. *It is further ordered,* That the burden of proof and the burden of proceeding with the introduction of evidence on issue (b) is on Bell, and on the applicant with respect to all other issues except issue (e) which is conclusory.

9. *It is further ordered,* That to avail themselves of an opportunity to be heard, Mobilfone and Bell, pursuant to § 1.221 (c) of the rules, in person or by attorney, shall within 20 days of the mailing of this order, file with the Commission in triplicate a written appearance stating its intention to appear on the date set for

hearing and present evidence on the issues specified in this order.

Adopted: June 28, 1972.

Released: July 3, 1972.

Notice of Agreement Filed

Notice is hereby given that the following agreement has been filed with the Commission for approval pursuant to section 15 of the Shipping Act, 1916, as amended (39 Stat. 733, 75 Stat. 763, 46 U.S.C. 814).

Interested parties may inspect and obtain a copy of the agreement at the Washington office of the Federal Maritime Commission, 1405 I Street NW., Room 1015; or may inspect the agreement at the Field Offices located at New York, N.Y., New Orleans, La., and San Francisco, Calif. Comments on such agreements, including requests for hearing, may be submitted to the Secretary, Federal Maritime Commission, Washington D.C., 20573, within 20 days after publication of this notice in the FEDERAL REGISTER. Any person desiring a hearing on the proposed agreement shall provide a clear and concise statement of the matters upon which they desire to adduce evidence. An allegation of discrimination or unfairness shall be accompanied by a statement describing the discrimination or unfairness with particularity. If a violation of the Act or detriment to the commerce of the United States is alleged, the statement shall set forth with particularity the acts and circumstances said to constitute such violation or detriment to commerce.

A copy of any such statement should also be forwarded to the party filing the agreement (as indicated hereinafter) and the statement should indicate that this has been done.

Notice of agreement filed for approval by:

Mr. R. M. L. Duffy, Secretary General, International Passenger Ship Association, Suite 631, 17 Battery Place, New York, NY 10004.

Agreement No. 9856-2, filed by the International Passenger Ship Association, amends the present Article 2C concerned with conference jurisdiction with respect to travel agency sales and substitutes the following language with respect to such jurisdiction:

With respect to Travel Agency sales in general: The United States and Canada.

With respect to Travel Agency sales for transatlantic travel under the jurisdiction of the transatlantic section: The United States and Canada and all European countries and countries bordering on the Mediterranean and Black Seas and Morocco, Madeira, and the Azores Islands.

Dated: July 12, 1972.

HUMBLE OIL & REFINING CO.

Order Providing for Hearing on and Suspension of Proposed Change in Rate, and Allowing Rate Change To Become Effective Subject to Refund

JULY 7, 1972.

Respondent has filed a proposed change in rate and charge for the jurisdictional sale of natural gas, as set forth in Appendix A hereof.

The proposed changed rate and charge may be unjust, unreasonable, unduly discriminatory, or preferential, or otherwise unlawful.

The Commission finds: It is in the public interest and consistent with the Natural Gas Act that the Commission enter upon a hearing regarding the lawfulness of the proposed change, and that the supplement herein be suspended and its use be deferred as ordered below.

The Commission orders: (A) Under the Natural Gas Act, particularly sections 4 and 15, the regulations pertaining thereto (18 CFR, Ch. I), and the Commission's rules of practice and procedure, a public hearing shall be held concerning the lawfulness of the proposed change.

(B) Pending hearing and decision thereon, the rate supplement herein is suspended and its use deferred until date shown in the "Date Suspended Until" column. This supplement shall become effective, subject to refund, as of the expiration of the suspension period without any further action by the Respondent or by the Commission. Respondent shall comply with the refunding procedure required by the Natural Gas Act and § 154.102 of the regulations thereunder.

(C) Unless otherwise ordered by the Commission, neither the suspended supplement, nor the rate schedule sought to be altered, shall be changed until disposition of this proceeding or expiration of the suspension period, whichever is earlier.

By the Commission.

UNION TEXAS PETROLEUM

Order Providing for Hearing on and Suspension of Proposed Change in Rate, and Allowing Rate Change To Become Effective Subject to Refund

JULY 7, 1972.

Respondent has filed a proposed change in rate and charge for the jurisdictional sale of natural gas, as set forth in Appendix A hereof.

The proposed changed rate and charge may be unjust, unreasonable, unduly discriminatory, or preferential, or otherwise unlawful.

The Commission finds: It is in the public interest and consistent with the Natural Gas Act that the Commission enter upon a hearing regarding the lawfulness of the proposed change, and that the supplement herein be suspended and its use be deferred as ordered below.

The Commission orders: (A) Under the Natural Gas Act, particularly sections 4 and 15, the regulations pertaining thereto (18 CFR, Ch. I), and the Commission's rules of practice and procedure, a public hearing shall be held concerning the lawfulness of the proposed change.

(B) Pending hearing and decision thereon, the rate supplement herein is suspended and its use deferred until date shown in the "Date Suspended Until" column. * Unless otherwise stated, the pressure base is 14.65 p.s.i.a.

The proposed increases filed herein do not exceed the corresponding rate filing limitation imposed in southern Louisiana and therefore are suspended for 1 day.

The producers' proposed increased rates and charges exceed the applicable area price levels for increased rates as set forth in the Commission's statement of general policy No. 61-1, as amended (18 CFR 2.56).

CERTIFICATION OF ABBREVIATED SUSPENSION

Pursuant to § 300.16(1)(3) of the Price Commission rules and regulations, 6 CFR Part 300 (1972), the Federal Power Commission certifies as to the abbreviated suspension period in this order as follows:

(1) This proceeding involves producer rates which are established on an area rather than company basis. This practice was established by Area Rate Proceeding, Docket No. AR61-1 et al., Opinion No. 468, 34 FPC 159 (1965), and affirmed by the Supreme Court in Permian Basin Area Rate Case, 390 U.S. 747 (1968). In such cases as this, producer rates are approved by this Commission if such rates are contractually authorized and are at or below the area ceiling.

(2) In the instant case, the requested increases do not exceed the ceiling rate for a 1-day suspension.

(3) By Order No. 423 (36 F.R. 3464) issued February 18, 1971, this Commission determined as a matter of general policy that it would suspend for only 1 day a change in rate filed by an independent producer under section 4(d) of the Natural Gas Act (15 U.S.C. 717c(d)) in a situation where the proposed rate exceeds the increased rate ceiling, but does not exceed the ceiling for a 1-day suspension.

(4) In the discharge of our responsibilities under the Natural Gas Act, this Commission has been confronted with conclusive evidence demonstrating a natural gas shortage (See Opinion Nos. 595, 598, and 607, and Order No. 435). In these circumstances and for the reasons set forth in Order No. 423 the Commission is of the opinion in this case that the abbreviated suspension authorized herein will be consistent with the letter and intent of the Economic Stabilization Act of 1970, as amended, as well as the rules and regulations of the Price Commission, 6 CFR Part 300 (1972). Specifically, this Commission is of the opinion that the authorized suspension is required to assure continued, adequate, and safe service and will assist in providing for necessary expansion to meet present and future requirements of natural gas.

PIED PIPER YACHT CHARTERS CORP.

Order Temporarily Suspending Exemption, Statement of Reasons Therefor, and Notice of Opportunity for Hearing

JULY 6, 1972.

I. Pied Piper Yacht Charters Corp. (issuer), a corporation incorporated under the laws of the State of Delaware on July 9, 1970, with its principal offices in the State of Illinois, filed with the Commission on September 30, 1970, a notification on Form 1-A and an offering circular relating to a proposed offering of 60,000 shares of $0.10 par value common stock at $5 per share for an aggregate offering price of $300,000 for the purpose of obtaining an exemption from the registration requirements of the Securities Act of 1933, as amended, pursuant to the provisions of section 3(b) thereof and Regulation A promulgated thereunder.

II. The Commission has reason to believe from information reported to it by the staff that:

A. The notification and offering circular contain untrue statements of material facts and omit to state material facts necessary in order to make the statements made, in the light of the circumstances under which they were made, not misleading, including, but not limited to the following:

1. The notification and offering circular omits to disclose the nature and identities of the underwriters participating in the offering and omits to disclose the extent of said underwriters involvement in the offering.

2. The offering circular omits to state that additional underwriting compensation including substantial "pay-offs" were made to the principals of G. L. Equities Corp. and Pilgrim Securities Corp., both of whom are New York area broker-dealers.

3. The offering circular omits to disclose that the aforementioned "pay-offs" were to be made from the proceeds of the Regulation A offering.

4. The offering circular omits to state that Pilgrim Securities Corp. and G. L. Equities Corp. and others participating in the offering did purchase and sell the common stock of the subject company while in possession of material nonpublic information concerning the business and affairs of Pied Piper and its affiliates.

5. The notification and offering circular omit to disclose that a "payroll deduction" plan was established by Industrial Gear Manufacturing Co. which plan would enable the employees of said company to purchase the securities of the subject company on an installment basis. Industrial Gear Manufacturing Co. is an affiliate of Pied Piper and its president is Fred A. Coda, who is also president of Pied Piper.

6. The offering circular falsely states that not more than 6,000 shares had been reserved for sale to persons designated by the issuer and omits to state that, in fact, 12,000 shares were reserved and sold to Fred A. Coda's friends, relatives, and employees.

7. The notification falsely states that the securities of the subject company would be offered in eight States and omits to state that compliance with the local blue sky requirements was only secured in two States—New York and Illinois.

8. The notification and offering circular omits to state that securities of the subject company would be sold during the public offering to investors who resided in States where sale was without compliance with prevailing blue sky laws.

B. The terms and conditions of Regulation A have not been complied with in that:

The issuer offered and sold its securities without using an offering circular containing the information required by Schedule I of Form 1–A.

The Report of Sales required to be filed by the issuer pursuant to Rule 260 within 30 days after the end of each 6-month period following the effective date was not filed with the Chicago Regional Office.

C. The offering has been in violation of the antifraud provisions of section 17 of the Securities Act of 1933 and section 10(b) of the Securities Exchange Act of 1934 and Rule 10b–5, in that:

1. During the period from on or about December 8, 1970, to date the issuer and others established, maintained, dominated, controlled and manipulated the market for the common stock of Pied Piper.

2. Pilgrim Securities Corp. and G. L. Equities Corp. and others participating in the offering, in an effort to induce customers to purchase securities of the subject company did disclose to certain customers material nonpublic information, which said individuals had in their possession, concerning the business and officers of Pied Piper Yacht Charters Corp. and its affiliates.

3. George C. Bergleitner of G. L. Equities Corp. in his recommendations of Pied Piper Yacht Charters Corp.'s common stock made predictions that the over-the-counter market price would rapidly increase to $20, $25, or $40 a share and omitted to disclose that there was no reasonable basis for making such projections.

It appearing to the Commission that it is in the public interest and for the protection of investors that the exemption of the issuer under Regulation A be temporarily suspended.

It is ordered, Pursuant to Rule 261(a) of the general rules and regulations under the Securities Act of 1933, as amended, that the exemption of the issuer under Regulation A be, and it hereby is, temporarily suspended.

It is further ordered, Pursuant to Rule 7 of the Commission's rules of practice, that the issuer file an answer to the allegations contained in this order within 30 days of the entry thereof.

Notice is hereby given that any person having an interest in the matter may file with the Secretary of the Commission a written request for hearing within 30 days after the entry of this order; that within 20 days after receipt of such request, the Commission will, or at any time upon its own motion may, set the matter down for hearing at a place to be designated by the Commission for the purpose of determining whether this order of suspension should be vacated or made permanent, without prejudice however, to the consideration and presentation of additional matters at the hearing; that if no hearing is requested, and none is ordered by the Commission, this order shall become permanent on the 30th day after its entry and shall remain in effect unless, or until, it is modified or vacated by the Commission; and that notice of the time and place for such hearing will be promptly given by the Commission.

By the Commission.

[SEAL] RONALD F. HUNT,
Secretary.

PROVIDENT BALANCED FUND

Notice of Filing of Application for Order Declaring that Company Has Ceased To Be an Investment Company

JULY 11, 1972.

Notice is hereby given that Provident Balanced Fund (Applicant), Suite 2024, 3 Penn Center Plaza, Philadelphia, Pa. 19102, a Delaware corporation registered as an open-end, diversified investment company under the Investment Company Act of 1940 (Act), has filed an application pursuant to section 8(f) of the Act for an order declaring that Applicant has ceased to be an investment company as defined in the Act. All interested persons are referred to the application on file with the Commission for a statement of the representations set forth therein, which are summarized below.

Applicant registered under the Act by filing a notification of registration on Form N–8A on December 26, 1968. Applicant states, however, that the board of directors and the sole shareholder of Applicant have determined not to presently operate an investment company of the nature of Applicant, and have initiated proceedings to merge Applicant into the sole shareholder.

Applicant asserts that 17,241,379 of its shares are currently outstanding, all of which shares are owned by Provident Management Corp., a Delaware corporation, all of the securities of which are owned beneficially by two individuals. Provident Management Corp. does not presently propose to make a public offering of its securities.

Applicant further asserts that it is not making and does not presently propose to make a public offering of its securities. Provident Management Corp., the sole shareholder of Applicant, is in the process of filing a certificate of ownership and merger with the State of Delaware, pursuant to which Applicant will be merged into Provident Management Corp.

Section 3(c)(1) of the Act excepts from the definition of an investment

company any issuer whose outstanding securities are beneficially owned by not more than 100 persons and which is not making and does not propose to make a public offering of its securities.

Section 8(f) of the Act provides, in pertinent part, that when the Commission, upon application, finds that a registered investment company has ceased to be an investment company, it shall so declare by order, and upon the taking effect of such order, the registration of such company shall cease to be in effect.

Notice is further given that any interested person may, not later than August 4, 1972, at 5:30 p.m., submit to the Commission in writing a request for a hearing on the matter accompanied by a statement as to the nature of his interests, the reason for such request and the issues, if any, of fact or law proposed to be controverted, or he may request that he be notified if the Commission should order a hearing thereon. Any such communication should be addressed: Secretary, Securities and Exchange Commission, Washington, D.C. 20549. A copy of such request shall be served personally or by mail (airmail if the person being served is located more than 500 miles from the point of mailing) upon Applicant at the address stated above. Proof of such service (by affidavit or in the case of an attorney at law by certificate) shall be filed contemporaneously with the request. At any time after said date as provided by Rule 0–5 of the rules and regulations promulgated under the Act, an order disposing of the application herein may be issued by the Commission upon the basis of the information stated in said application, unless an order for hearing upon said application shall be issued upon request or upon the Commission's own motion. Persons who request a hearing or advice as to whether a hearing is ordered will receive notice of further developments in this matter, including the date of the hearing (if ordered) and any postponements thereof.

For the Commission, by the Division of Corporate Regulation, pursuant to delegated authority.

[SEAL] RONALD F. HUNT,
Secretary.

TARIFF COMMISSION

[TEA-W-143]

COLUMBIAN ROPE CO.

Workers' Petition for Determination; Notice of Amended Investigation

On the basis of an amended petition filed under section 301(a)(2) of the Trade Expansion Act of 1962, on behalf of the former workers of the Plymouth Cordage Division of the Columbian Rope Co., Plymouth, Mass., the U.S. Tariff Commission instituted an investigation under section 301(c)(2) of the Act to determine whether, as a result in major part of concessions granted under trade agreements, articles like or directly competitive with cordage of man-made fibers (of the types provided for in item 316.60 of the Tariff Schedules of the United States (TSUS)) and cordage of hard (leaf) vegetable fibers of stranded construction, measuring 3/16 inch or over in diameter (items 315.35 through 315.60 of the TSUS) manufactured by said firm, are being imported into the United States in such increased quantities as to cause, or threaten to cause, the unemployment or underemployment of a significant number or proportion of the workers of such company or an appropriate subdivision thereof.

A public hearing was held in connection with this investigation on July 6, 1972. Another hearing will be held on request of any other party showing a proper interest in the subject matter of the investigation, provided such request is filed within 10 days after this notice is published in the FEDERAL REGISTER.

The petition filed in this case is available for inspection at the Office of the Secretary, U.S. Tariff Commission, Eighth and E Streets NW., Washington, DC, and at the New York City office of the Tariff Commission located in Room 437 of the Customhouse.

Issued: July 12, 1972.

By order of the Commission.

[Administrative Ruling 120, Secs. 20(11), 219, 413]

Concealed Loss and Damage Claims

JULY 7, 1972.

The following is an administrative ruling of the Bureau of Operations made in response to questions proponded by the public, indicating what is deemed by the Bureau to be the correct application and interpretation of the Act and regulations. Rulings of this kind are tentative and provisional and are made in the absence of authoritative decisions upon the subject by the Commission.

Question. May a carrier, subject to ICC jurisdiction, offer a compromise settlement of a concealed loss or damage claim, with particular reference to the Commission's report and order "Loss and Damage Claims," 340 ICC 515, served February 24, 1972?

Answer. Yes. In "Loss and Damage Claims," this Commission found that carrier rules by which they arbitrarily prorate cargo claims are unlawful in that they violate section 20(11) of the Interstate Commerce Act. Carriers are and have been for many years fully responsible for damage they cause to shipments they transport. It is difficult, and often impossible, however, to determine definitely when, where, and how concealed loss or damage occurs and who is responsible for it. Therefore, where investigation has been properly conducted and no conclusive evidence exists as to the responsible party, but the carrier recognizes it may have caused or contributed to some or all of the damage, there is no prohibition against a compromise offer of settlement. The right of a carrier to compromise cargo claims is specifically recognized in 49 CFR 1005.5 (Disposition of Claims). Needless to say, if the investigation shows the casualty to have been caused by the carrier or a connecting line, the full amount of the loss or damage should be paid. On the other hand, if the investigation reveals that the damage resulted from noncarrier causes, no payment by the carrier may be made.

[SEAL] R. D. PFAHLER,
Director.

APPENDIX—GENERAL INFORMATION REGARDING LOSS AND DAMAGE CLAIMS

In view of the increasing number of general inquiries and complaints from the shipping public regarding loss and damage claims, the following information and suggestions to receivers of freight are furnished in an effort to provide some assistance, and maximize chances of obtaining prompt and satisfactory settlement of a loss or damage claim.

1. Check for a shortage—as goods are being unloaded count the cartons, containers, or items and, if possible, make written tally record whenever a large number of items are being received or the shipment is composed of a number of different items. If there is a discrepancy, make a full notation on the freight bill before signing for the goods, both on the carrier's copy and yours.

2. Check the labels on all cartons or containers to be certain they are yours. Misdeliveries can occur.

3. Carefully check for any visible signs of damage to the cartons, containers, or items. Include any unusual "rattles." If such damage exists, the package should be opened immediately and a joint inventory and examination of contents should be made by the carrier and yourself. A full, detailed description of the results of such examination should be endorsed on both the carrier's delivery receipt and your copy. Generally, the carrier's driver will sign the exception on your copy of the document. Courts have generally ruled that a consignee may not open the containers and examine the merchandise before giving a receipt to the carrier, unless the containers indicate the probability of damage.

4. The law on the subject of accepting damaged merchandise is quite clear. The fact that goods are damaged during transportation does not of itself justify a refusal to accept them. Where, however, the damage is such that the entire value of the goods is destroyed, you may refuse to accept them, and hold the carrier responsible for their value. Whenever practical, however, goods should be accepted and all necessary steps should be taken to minimize the damage, and claim should be filed with the carrier. It is suggested that while awaiting the carrier's inspection you only move the goods if absolutely necessary and that you leave them in the original container. This facilitates and improves the inspection procedure.

5. File your claim in writing immediately. If you have a standard claim form available, use it. Carriers will furnish the form upon request. Be certain you request an inspection—and confirm your request in writing, if made orally. Complete the claim form in full—too much information is better than too little. Most claims must be supported by the original bill of lading (or a bond of indemnity in lieu thereof), evidence of the freight charges, and the original invoice for the goods shipped if it is available. To save

time, attach these documents to your claim form, being certain to keep a copy of each for your records.

6. Claims must be filed in writing within 9 months of delivery, and in the case of loss, within 9 months after a reasonable time for delivery has elapsed.

7. Under rules adopted by this Commission, effective July 1, 1972, carriers are required to acknowledge receipt of cargo claims within 30 days. Further, they must pay, decline or make a firm compromise settlement offer within 120 days of receipt of a claim whenever possible. If such disposition is not possible within that time, carriers must then, and at each succeeding 60-day interval, notify the claimant of the reason for delay in the disposition of his claim.

8. As stated earlier, concealed damage claims present different and often complex problems. The consignee has given a receipt to the carrier at time of delivery indicating the goods were received in apparent good order. It is possible that the merchandise within a container may have been damaged prior to or during the course of transportation and without there being visible evidence of such damage. In a concealed damage claim the burden of proof ordinarily shifts to the claimant to show that the carrier caused the damage, or, stated differently, to show that others who handled the goods did not cause the damage. Normally, there will not be sufficient time to examine the contents of all containers without visible damage during the "free time" at delivery. It is suggested, therefore, that you keep any subsequent movement of the containers to a minimum, and inspect the contents as soon as possible. If any damage is discovered, leave the damaged item in the carton or container, immediately report the damage to the carrier, and request inspection in writing. Then follow the same procedure as for any other cargo claim.

The carrier is required to make a thorough investigation. It is also required to pay the claim in full, decline it, or make an offer of compromise settlement. It would be difficult to justify the denial or compromise of a claim without an explanation. Carriers will consider many factors during the course of their investigation of a concealed damage claim—factors such as, but not limited to, the nature of the goods, adequacy of packaging, movement before pickup or after delivery, when the damage was reported, retention and condition of original cartons, etc.

You need not accept a declination of your claim based solely upon your having given a clear receipt at time of delivery. You should be allowed to present evidence to indicate the actual condition of the goods, and to support your position that the damage was carrier-caused.

Following are several other items pertaining to loss and damage claims which may further assist claimants:

Many times it is necessary that goods be interlined between two or more carriers from point of origin to point of destination, on a through bill of lading. Under these circumstances, section 20(11) of the Interstate Commerce Act provides options to the claimant as to the carrier with which he may file his claim. Claim may be filed with either the originating or delivering carrier, even though it may not be known which one may have caused the loss or damage. Connecting carriers may have to confer about various aspects of liability, but once the validity of a claim is established, they may not properly withhold settlement while they await settlement by the carrier which actually caused the loss or damage.

All motor common carriers of property and freight forwarders are required to maintain cargo insurance for the protection of the shipping public. Under this protection, the insurance company is directly liable to a shipper or consignee for any cargo claim for which the motor carrier may be legally liable. Thus, it is normal for an insurance company to decline a claim its insured has declined. However, this insurance protection is of primary importance if a motor carrier unduly procrastinates in settlement or is in poor financial condition. No limitations in the policy itself, such as deductibles, may be used as a defense by the insurance companies against claims filed under this Commission's prescribed cargo endorsement, Form BMC 32. The name of the insurance company may be obtained by writing to this Commission's Bureau of Operations, Section of Insurance, Interstate Commerce Commission, Washington, D.C. 20423.

Although this Commission has recommended to Congress that it be granted the requisite legal authority to resolve disputed cargo claims, under the present state of the law a claimant's recourse in such a case still lies with the courts. We appreciate the fact that litigation is seldom a satisfactory remedy for a businessman, and because of this fact the Commission made the recommendation. To assist claimants in such disputes, this Commission does require all motor carriers to designate an agent for service of legal process in each State into or through which it may operate. The name of this process agent may be obtained by writing to the Bureau of Operations, Section of Insurance, Interstate Commerce Commission, Washington, D.C. 20423.

While the Commission does not have specific, binding authority to adjudicate a disputed claim, it will render all possible assistance. If you feel a carrier has misapplied the law of carrier liability, has been grossly unreasonable in the settlement of a claim, or a further explanation of its position is desired, do not hesitate to request our aid. This may produce a satisfactory disposition of your claim and avoid the need to take court action.

NATIONAL DEFENSE STUDENT LOAN PROGRAM

List of Schools Determined To Have a High Concentration of Students From Low-Income Families

Pursuant to the provisions of section 205(b)(3)(A)(i) of the National Defense Education Act of 1958 as amended (20 U.S.C. 425(b)(3)(A)(i)), notice is hereby given of the public and other nonprofit elementary and secondary schools which have been listed in accordance with the regulations governing the administration of the National Defense Student Loan Program (45 CFR 144.8(i)(2)) as being in school districts of local educational agencies eligible for assistance pursuant to Title II of Public Law 874, 81st Congress, as amended (title I of the Elementary and Secondary Education Act of 1965), and as having high concentration of children from low-income families during the school year 1971–72.

Teachers with outstanding indebtedness under the National Defense Student Loan Program are entitled to the 15 percent per annum rate of loan cancellation for each complete academic year (or equivalent) of full-time service performed in a public or other nonprofit elementary or secondary school which for that year has been designated by the U.S. Commissioner of Education as having a high concentration of students from low-income families.

The purpose of the lists published under this notice is to identify those schools in each of the States in which loan cancellation for teaching service during the 1971–72 school year is authorized under the special incentive terms and rates provided for under section 205(b)(3)(A)(i) of the National Defense Education Act of 1958.

The school lists appear in alphabetical order by State. The entries for American Samoa, the Trust Territory, Guam, Puerto Rico, and the Virgin Islands appear following the list for the State of Wyoming. The District of Columbia is included in the alphabetical sequence.

Despite the fact that every reasonable precaution has been taken to assure the accuracy of these lists, it is possible that some errors may occur. Should an apparent discrepancy be noted, inquiry may be made to the appropriate State education agency and the Program Support Branch, Division of Student Assistance, Bureau of Higher Education, U.S. Office of Education, Washington, D.C. 20202.

Dated: July 7, 1972.

PRESTON VALIEN,
Acting Associate Commissioner for Higher Education.

Approved: July 11, 1972.

S. P. MARLAND, Jr.,
U.S. Commissioner of Education.
