Highlights

FEDERAL REGISTER Published daily, Monday through Friday, (not published on Saturdays, Sundays, or on official holidays), by the Office of the Federal Register, National Archives and Records Service, General Services Administration, Washington, D.C. 20408, under the Federal Register Act (49 Stat. 500, as amended; 44 U.S.C. Ch. 15) and the regulations of the Administrative Committee of the Federal Register (1 CFR Ch. I). Distribution is made only by the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402.

The **Federal Register** provides a uniform system for making available to the public regulations and legal notices issued by Federal agencies. These include Presidential proclamations and Executive Orders and Federal agency documents having general applicability and legal effect, documents required to be published by Act of Congress and other Federal agency documents of public interest. Documents are on file for public inspection in the Office of the Federal Register the day before they are published, unless earlier filing is requested by the issuing agency.

The **Federal Register** will be furnished by mail to subscribers, free of postage, for $75.00 per year, or $45.00 for six months, payable in advance. The charge for individual copies is $1.00 for each issue, or $1.00 for each group of pages as actually bound. Remit check or money order, made payable to the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402.

There are no restrictions on the republication of material appearing in the **Federal Register.**

Area Code 202–523–5240

22310 **Role of the Grand Jury** Justice/NIJ announces availability of grant or cooperative agreement funds, proposals by 5–17–80

22323 **Energy Policy and Conservation** DOT/NHTSA publishes 1980 Automotive Fuel Economy Program Report to Congress

22112 **Historic Preservation** DOD/ACE proposes regulations implementing regulations and Executive Orders for protection of historic and cultural properties; comments by 6–6–80

22022 **Freedom of Information** Consumer Product Safety Commission revises regulations to clarify availability of draft commission staff documents and briefing packages; effective 4–3–80

22144 **Atlantic Mackerel Fishery** Commerce/NOAA issues decision on harvest levels for United States and establishment of reserve for distribution to domestic and foreign fisheries; comments by 5–16–80

22053 **Electric Utilities and Natural Gas Pipelines** DOE/FERC proposes to permit tax normalization for certain ratemaking and income tax purposes; comments by 6–30–80

22118 **Pipelines** DOT/RSPA proposes safety regulations for the transportation of natural and other gas; comments by 8–1–80

22041 **U.S.-Flag Vessels** Commerce/MA issues provisions for war risk insurance; effective 4–3–80

Privacy Act Documents

22351 Treasury Department

22049, 22186 Executive Office of the President, Office of Administration, (2 documents)

Presidential Documents

Title 3—

The President

Proclamation 4743 of April 1, 1980

Mother's Day, 1980

By the President of the United States of America

A Proclamation

Each year, we set aside a special day of celebration to thank this Nation's mothers for the role they play in our lives.

Mother's Day 1980 finds the always demanding role of being a mother made even more complex by the choices modern women have that were not available to women of previous generations.

Today's mothers are involved in every aspect of business, politics, education, sports, the arts, the sciences, and government, and yet they still remain at the core of this Nation's greatest natural resource—the American family.

Whether they seek careers or work full time in the home, mothers contribute immensely to our Nation's future by shaping the character of our children.

That is why our observance of Mother's Day is so important. It provides us not only with an opportunity to honor our own mothers, but also to thank all the women who make this Nation stronger through their tireless devotion to their children.

NOW, THEREFORE, I, JIMMY CARTER, President of the United States of America, do hereby request that Sunday, May 11, 1980, be observed as Mother's Day. I direct Government officials to display the flag of the United States on all Government buildings, and I urge all citizens to display the flag at their homes and other suitable places on that day.

IN WITNESS WHEREOF, I have hereunto set my hand this first day of April, in the year of our Lord nineteen hundred and eighty, and of the Independence of the United States of America the two hundred and fourth.

Rules and Regulations

Federal Register
Vol. 45, No. 66
Thursday, April 3, 1980

This section of the FEDERAL REGISTER contains regulatory documents having general applicability and legal effect, most of which are keyed to and codified in the Code of Federal Regulations, which is published under 50 titles pursuant to 44 U.S.C. 1510.
The Code of Federal Regulations is sold by the Superintendent of Documents. Prices of new books are listed in the first FEDERAL REGISTER issue of each month.

DEPARTMENT OF AGRICULTURE

Agricultural Marketing Service

7 CFR Part 907

[Navel Orange Reg. 487]

Navel Oranges Grown in Arizona and Designated Part of California; Limitation of Handling

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Final rule

SUMMARY: This regulation establishes the quantity of fresh California-Arizona navel oranges that may be shipped to market during the period April 4–10, 1980. Such action is needed to provide for orderly marketing of fresh navel oranges for this period due to the marketing situation confronting the orange industry.

EFFECTIVE DATE: April 4, 1980.

FOR FURTHER INFORMATION CONTACT: Malvin E. McGaha, 202–447–5975.

SUPPLEMENTARY INFORMATION: *Findings.* This regulation is issued under the marketing agreement, as amended, and Order No. 907, as amended (7 CFR Part 907), regulating the handling of navel oranges grown in Arizona and designated part of California. This agreement and order are effective under the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601–674). This action is based upon the recommendations and information submitted by the Navel Orange Administrative Committee and upon other available information. It is hereby found that this action will tend to effectuate the declared policy of the act.

This action is consistent with the marketing policy for 1979–80 which was designated significant under the procedures of Executive Order 12044. The marketing policy was recommended by the committee following discussion at a public meeting on October 30, 1979. A final impact analysis on the marketing policy is available from Malvin E. McGaha, Chief, Fruit Branch, F&V, AMS, USDA, Washington, D.C. 20250, telephone 202–447–5975.

The committee met again publicly on April 1, 1980 at Los Angeles, California, to consider the current and prospective conditions of supply and demand and recommended a quantity of navels deemed advisable to be handled during the specified week. The committee reports the demand for navel oranges is slower when compared to demand reported for the previous week.

It is further found that there is insufficient time between the date when information became available upon which this regulation is based and when the action must be taken to warrant a 60 day comment period as recommended in E.O. 12044, and that it is impracticable and contrary to the public interest to give preliminary notice, engage in public rulemaking, and postpone the effective date until 30 days after publication in the **Federal Register** (5 U.S.C. 553). It is necessary to effectuate the declared purposes of the act to make these regulatory provisions effective as specified, and handlers have been apprised of such provisions and the effective time.

§ 907.787 Navel Orange Regulation 487.

Order. (a) The quantities of navel orange grown in Arizona and California which may be handled during the period April 4, 1980, through April 10, 1980, are established as follows:

(1) District 1: 1,500,000 cartons;

(2) District 2: Unlimited cartons;

(3) District 3: Unlimited cartons;

(4) District 4: Unlimited cartons.

(b) As used in this section, "handled," "District 1," "District 2," "District 3," "District 4," and "carton" mean the same as defined in the marketing order.

(Secs. 1–19, 48 Stat. 31, as amended; 7 U.S.C. 601–674)

Dated: April 2, 1980.

D. S. Kuryloski,

Deputy Director, Fruit and Vegetable Division, Agricultural Marketing Service.

[FR Doc. 80-10330 Filed 4-2-80; 12:15 pm]

BILLING CODE 3410-02-M

7 CFR Part 908

[Valencia Orange Reg. 639]

Valencia Oranges Grown in Arizona and Designated Part of California; Limitation of Handling

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Final rule.

SUMMARY: This regulation establishes the quantity of fresh California-Arizona Valencia oranges that may be shipped to market during the period April 4–April 10, 1980. Such action in needed to provide for orderly marketing of fresh Valencia oranges for this period due to the marketing situation confronting the orange industry.

EFFECTIVE DATE: April, 4, 1980.

FOR FURTHER INFORMATION CONTACT: Malvin E. McGaha, 202–447–5975.

SUPPLEMENTARY INFORMATION: *Findings.* This regulation is issued under the marketing agreement, as amended, and Order No. 908, as amended (7 CFR Part 908), regulating the handling of Valencia oranges grown in Arizona and designated part of California. The agreement and order are effective under the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601–674). The action is based upon the recommendations and information submitted by the Valencia Orange Administrative Committee and upon other available information. It is hereby found that the action will tend to effectuate the declared policy of the act.

This action is consistent with the marketing policy for 1979–80 which was designated significant under the procedures of Executive Order 12044. The marketing policy was recommended by the committee following discussion at a public meeting on January 22, 1980. A final impact analysis on the marketing policy is available from Malvin E. McGaha, Chief, Fruit Branch, F&V, AMS, USDA, Washington, D.C. 20250, telephone 202–447–5975.

The committee met again publicly on April 1, 1980, at Ventura, California, to consider the current and prospective conditions of supply and demand and recommended a quantity of Valencia oranges deemed advisable to be handled during the specified week. The committee reports the demand for Valencia oranges is fair to good on all sizes.

It is further found that there is insufficient time between the date when information became available upon which this regulation is based and when the action must be taken to warrant a 60-day comment period as recommended in E.O. 12044, and that it is impracticable and contrary to the public interest to give preliminary notice, engage in public rulemaking, and postpone the effective date until 30 days after publication in the **Federal Register** (5 U.S.C. 553). It is necessary to effectuate the declared purposes of the act to make these regulatory provisions effective as specified, and handlers have been apprised of such provisions and the effective time.

§ 908.939 Valencia Orange Regulation 639.

Order. (a) The quantities of Valencia oranges grown in Arizona and California which may be handled during the period April 4, 1980 through April 10, 1980, are established as follows:

(1) District 1: Unlimited cartons;

(2) District 2: Unlimited cartons;

(3) District 3: 175,000 cartons.

(b) As used in this section, "handled," "District 1," "District 2," "District 3," and "carton" mean the same as defined in the marketing order.

(Secs. 1–19, 48 Stat. 31, as amended; 7 U.S.C. 601–674)

Dated: April 2, 1980.

D. S. Kuryloski,

Deputy Director, Fruit and Vegetable Division, Agricultural Marketing Service.

DEPARTMENT OF ENERGY

Economic Regulatory Administration

10 CFR Part 211

[Docket No. ERA-R-78-03F]

Mandatory Petroleum Allocation Regulations; Entitlements Program—Phase Out of Small Refiner Bias

AGENCY: Economic Regulatory Administration, Department of Energy.

ACTION: Final rule.

SUMMARY: The Economic Regulatory Administration (ERA) of the Department of Energy (DOE) is deleting from its April 1979 final rule regarding changes to the small refiner bias in the entitlement program (which rule was effective on June 1, 1979) that portion which was designed to phase out the bias prior to the expiration of legislative authority for price and allocation controls on September 30, 1981.

EFFECTIVE DATE: June 1, 1979.

FOR FURTHER INFORMATION CONTACT:

SUPPLEMENTARY INFORMATION:

I. Background

II. Amendment Adopted

III. Procedural Requirements

I. Background

On April 27, 1979, the ERA issued a final rule (44 FR 25621, May 2, 1979), effective June 1, 1979, adopting amendments to the small refiner bias provisions of the entitlements program. The principal purpose of the amendments was to reduce the amount of the bias for certain categories of small refiners. The new formula adopted included a provision (10 CFR 211.67(e)(4)) designed to phase out the small refiner bias prior to expiration of the price and allocation authority on which the entitlements program is based on September 30, 1981.

The new rule was immediately challenged in the courts in an action brought by seven small refiners. In a decision issued August 21, 1979, the United States District Court for the District of Columbia upheld the amendments to the small refiner bias in all respects, except with regard to § 211.67(e)(4) (the small refiner bias phase-out provision), which it held was adopted in a procedurally defective manner. (*Mt. Airy Refining Co. v. Schlesinger*, 3 DOE ¶ 26,159). The court therefore enjoined DOE from enforcing or applying § 211.67(e)(4) in calculating entitlements benefits occurring to those seven refiners that were plaintiffs in the lawsuit.

In *Mt. Airy*, the District Court was precluded, by section 211 of the Economic Stabilization Act of 1970 (ESA),[1] from enjoining DOE as to any refiners other than those which were plaintiffs in that action. No other refiners have brought suit to extend the application of the injunction to include the benefits received by them under the small refiner bias. Nonetheless, we believe that it would be inequitable not to apply § 211.67(e)(4) to some small refiners but to apply it to others. We also recognize that any other small refiner could file a similar action in the same court and would likely receive the same relief. Therefore, in light of the *Mt. Airy* decision, we believe that it is appropriate for DOE to rescind § 211.67(e)(4) in order to put all small refiners on an equal footing with those that were plaintiffs in the litigation.

Even though the phase-out provision was adopted to be effective for refiners' crude oil runs to stills beginning in June 1979, its actual operation has not yet been triggered due to market conditions. The phase out provision was designed, by way of a formula, to become operative when the "runs credit"—i.e., the national domestic crude oil supply ratio (DOSR) multiplied by the price of a crude oil entitlement—for a given month drops below that for June 1979.[2] The price of a crude oil entitlement has been increasing since June because price increases by the Organization of Petroleum Exporting Countries (OPEC) have exceeded those of domestic price-controlled crude oil. At the same time, the DOSR has decreased only slightly. Since the value of the runs credit is currently higher than it was in June 1979, the point at which the phase-out mechanism would be triggered has not yet been reached and, even without significant further increases in world crude oil prices, is not expected to be reached until at least near the end of 1980.

II. Amendment Adopted

As explained above, we have decided to delete § 211.67(e)(4). We are making this deletion effective June 1, 1979, so that the phase-out provision will be treated as void from the time of its inception. Since the phase-out provision has not yet become actually operative, no small refiner is adversely affected by applying the deletion retroactive to June 1, 1979. The effect of the deletion is that, unless an additional rulemaking is

---

[1] Pub. L. 91–379, as amended, Pub. L. 92–210, Pub. L. 93–28. Section 211 of the ESA was incorporated by Section 5(a) of the Emergency Petroleum Allocation Act of 1973 (EPAA), and thereby is made applicable to regulations promulgated by DOE under the EPAA.

[2] The phase out formula is set forth in § 211.67(e)(4), which reads as follows:

(4) For a given month, the number of additional entitlements to be issued pursuant to subparagraph (e)(1) above shall be multiplied by the lesser of 1.0 or a fraction, the numerator of which is the product of multiplying the national domestic crude oil supply ratio for that month by the entitlement price for the same month, and the denominator of which is the product of multiplying the national domestic crude oil supply ratio for June 1979 by the entitlement price for June 1979.

instituted and further changes are adopted in accordance with prescribed procedures, the per-barrel amounts of the small refiner bias benefits for different categories of small refiners will remain at present levels until the termination of the entitlements program.

III. Procedural Requirements

A. *Section 404 of the DOE Act: Referral to the FERC.* Pursuant to the requirements of Section 404(a) of the Department of Energy Act, we have referred this rule to the Federal Energy Regulatory Commission (FERC) for a determination whether the proposed rule would significantly affect any matter within the FERC's jurisdiction. Following an opportunity to review this rule, the FERC has declined to determine that it may significantly affect any of its functions.

B. *Section 7 of the FEA Act: Referral to the EPA.* Under section 7(a) of the Federal Energy Administration Act of 1974 (15 U.S.C. section 787 *et seq.*, Pub. L. 93–275 as amended), the requirements of which remain in effect under section 501(a) of the DOE Act, the delegate of the Secretary of Energy shall, before promulgating proposed rules, regulations, or policies affecting the quality of the environment, provide a period of not less than five working days during which the Administrator of the Environmental Protection Agency (EPA) may provide written comments concerning the impact of such rules, regulations, or policies on the quality of the environment.

A copy of this rule was sent to the EPA Administrator. After completing its five day review, the EPA Administrator had no comments.

C. *National Environmental Policy Act.* It has been determined that this rule does not constitute a "major Federal action significantly affecting the quality of the human environment" within the meaning of the National Environmental Policy Act (NEPA), 42 U.S.C. 4321 *et seq.* This amendment to the entitlements program simply deletes a provision which has never become operative and which has been judicially declared to have been adopted in a procedurally defective manner. While the provision technically could still be applied to small refiners that were not plaintiffs in the *Mt. Airy* litigation, it would be impractical and inequitable to do so. Therefore, the amendment will have no effect on the environment, and an environmental assessment or an environmental impact statement is not required by NEPA or by the applicable DOE regulations for compliance with NEPA.

D. *Section 501 of the DOE Act: Notice and Comment.* Under section 501(c) of the DOE Act we are not bound by the prior notice and hearing requirements of subsections 501 (b)–(d) with respect to a rule upon our determination that no substantial issue of fact or law exists and that the rule is unlikely to have a substantial impact on the Nation's economy or large numbers of individuals or businesses. Where no such substantial issue or impact is foreseen, the proposed rule may be promulgated in accordance with section 553 of the Administrative Procedure Act (APA), Title 5, United States Code.

This amendment to the entitlements program raises no substantial issue of law or fact, nor is it likely to have a substantial impact on the economy or large numbers of individuals or businesses, because it merely deletes a provision which has never been applied or enforced in the past and which will not be applied or enforced in the future in view of the judicial decision as to its unlawful adoption. Therefore, the amendment will be promulgated in accordance with section 553 of the APA.

E. *Section 553 of the APA: Notice and Comment.* Section 553(b) of the APA requires that general notice of a proposed rulemaking be published in the **Federal Register**, except when the agency for good cause finds that notice and public procedure thereon is impracticable, unnecessary, or contrary to the public interest. We find that the notice and public comment procedures of section 553(b) are unnecessary in this case, because this amendment merely deletes a provision which has never been operative and which has been held by the judiciary to have been defective in the manner in which it was adopted.

Section 553(d) requires that the publication of a substantive rule be made at least 30 days before the effective date of the rule. Subsection (d)(1) of section 553, however, provides for an exception to this 30-day publication requirement where the rule grants or recognizes an exemption or relieves a restriction. This amendment relieves a restriction by deleting a provision which might otherwise reduce the entitlements benefits of certain refiners, and therefore fits the exception of section 553(d)(1).

F. *Executive Order 12044.* Executive Order 12044 (43 FR 12661, March 23, 1978) requires the agencies subject to it to publish all proposed "significant" regulations for public comment for a minimum of 60 days. Section 2(e) of the Executive Order directs the agencies to establish criteria to identify which regulations are significant. DOE's implementing procedures are contained in DOE Order 2030 (44 FR 1032, January 3, 1979).

DOE Order 2030 provides that DOE will consider a regulation significant unless it is not expected to affect important policy concerns and is not the object of much public interest. Because this amendment merely deletes a provision which has never been operative and which has been held void by the judiciary, it will not affect any policy concerns nor will it arouse much public interest. Therefore we find that this rule is not "significant", and does not invoke the 60-day advance public comment requirement of Executive Order 12044.

(Emergency Petroleum Allocation Act of 1973, 15 U.S.C. § 751 *et seq.*, Pub. L. 93–159, as amended, Pub. L. 93–511, Pub. L. 94–99, Pub. L. 94–133, Pub. L. 94–163, and Pub. L. 94–385; Federal Energy Administration Act of 1974, 15 U.S.C. § 787 *et seq.*, Pub. L. 93–275, as amended, Pub. L. 94–332, Pub. L. 94–385, Pub. L. 95–70, and Pub. L. 95–91; Energy Policy and Conservation Act, 42 U.S.C. § 6201 *et seq.*, Pub. L. 94–163, as amended, Pub. L. 94–385, Pub. L. 95–70, Pub. L. 95–619, and Pub. L. 96–30; Department of Energy Organization Act, 42 U.S.C. § 7101 *et seq.*, Pub. L. 95–91, Pub. L. 95–509, Pub. L. 95–619, Pub. L. 95–620, and Pub. L. 95–621; E.O. 11790, 39 FR 23185; E.O. 12009, 42 FR 46267.)

In consideration of the foregoing, Part 211 of Chapter II of Title 10 of the Code of Federal Regulations is amended as set forth below.

Issued in Washington, D.C., March 28, 1980.

Hazel R. Rollins,

Administrator, Economic Regulatory Administration.

§ 211.67 [Amended]

1. Subsection 211.67(e) is amended by deleting subsection (e)(4) and renumbering subsection (e)(5) to be (e)(4).

Federal Aviation Administration

14 CFR Part 75

[Airspace Docket No. 80–WE–1]

Alteration of Jet Routes

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This amendment alters several jet routes in the Los Angeles, Calif., area to overlie current profile descent routes into the Los Angeles International Airport. The realignment improves traffic flow, aids flight

planning and reduces controller workload for arrival traffic.

EFFECTIVE DATE: May 15, 1980.

FOR FURTHER INFORMATION CONTACT: Lewis W. Still, Airspace Regulations Branch (AAT–230), Airspace and Air Traffic Rules Division, Air Traffic Service, Federal Aviation Administration, 800 Independence Avenue, SW., Washington, D.C. 20591; telephone: (202) 426–8525.

SUPPLEMENTARY INFORMATION:

History

On February 19, 1980, the FAA proposed to amend Part 75 of the Federal Aviation Regulations (14 CFR Part 75) to realign Jet Routes No. 64 and No. 107, in part, between Los Angeles, Calif., and Hector, Calif., and realign Jet Route No. 128 between Los Angeles and Peach Springs, Ariz., (45 FR 10807). The new alignment of these jet routes overlie current profile descent routes to Los Angeles International Airport. This action reduces controller workload by aligning jet routes with low altitude airway segments that interface with the profile descent procedures, thereby reducing coordination and radar vectors in the Los Angeles terminal area. Interested persons were invited to participate in the rulemaking proceeding by submitting written comments on the proposal to the FAA. No comments objecting to the proposal were received. This amendment is the same as that proposed in the notice. Subpart B of Part 75 was republished in the **Federal Register** on January 27, 1980, (45 FR 732).

The Rule

This amendment to Part 75 of the Federal Aviation Regulations realigns Jet Routes No. 64 and No. 107 between Los Angeles, Calif., and Hector, Calif., and realigns Jet Route No. 128 between Los Angeles and Peach Springs, Ariz. This action improves flow control procedures for arrival and departure traffic in the Los Angeles terminal area.

Adoption of the Amendment

Accordingly, pursuant to the authority delegated to me by the Administrator, Part 75 of the Federal Aviation Regulations (14 CFR Part 75) as republished (45 FR 732) is amended, effective 0901 G.m.t., May 15, 1980, as follows:

Under Jet Route No. 64: "From Los Angeles, Calif., via Paradise, Calif.; Hector, Calif.;" is deleted and "From Los Angeles, Calif., via INT Los Angeles 083°T and Hector, Calif., 226°T radials; Hector;" is substituted therefor.

Jet Route No. 107 is amended to read as follows: "From Los Angeles, Calif., via Los Angeles 083°T and Hector, Calif., 226°T radials; Hector; Boulder City; Milford, Utah; Delta, Utah; Rock Springs, Wyo.; Crazy Woman, Wyo.; Dickinson, N. Dak.; Pembina, N. Dak.; to Kenora, Ontario, Canada. The portion within Canada is excluded."

Under Jet Route No. 128: "From Los Angeles, Calif., via Paradise, Calif.; Peach Springs, Ariz.;" is deleted and "From Los Angeles, Calif., via INT Los Angeles 083°T and Peach Springs, Ariz., 244°T radials; Peach Springs;" is substituted therefore.

(Secs. 307(a) and 313(a), Federal Aviation Act of 1958 (49 U.S.C. 1348(a) and 1354(a)); sec. 6(c), Department of Transportation Act (49 U.S.C. 1655(c)); and 14 CFR 11.69.)

Note.—The FAA has determined that this document involves a regulation which is not significant under Executive Order 12044, as implemented by DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979). Since this regulatory action involves an established body of technical requirements for which frequent and routine amendments are necessary to keep them operationally current and promote safe flight operations, the anticipated impact is so minimal that this action does not warrant preparation of a regulatory evaluation.

Issued in Washington, D.C., on March 31, 1980.

B. Keith Potts,

Acting Chief, Airspace and Air Traffic Rules Division.

14 CFR Part 159

[Docket No. 19939; Amdt. 159–17]

Dulles Airport Access Highway

Note.—This document originally appeared in the **Federal Register** for Tuesday, April 1, 1980. It is reprinted in this issue to meet requirements for publication on the Monday–Thursday schedule assigned to the Department of Transportation.

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: Carpools of four or more persons will be permitted to use the Dulles Airport Access Highway during the peak commuter hours. The highway had been restricted to airport traffic only. The following ramps will be open to carpools:

Ramp	A.M.	P.M.
Reston Ave. Eastbound	6 to 9	3:30 to 7.
Reston Ave. Westbound	6 to 9	3:30 to 7.
Trap Road Eastbound	6 to 9	Closed.
Trap Road Westbound	Closed	4 to 7

The hours and 4 person limitation will be strictly enforced by the State of Virginia. FAA is relaxing its restrictions on the Dulles Airport Access Highway in order to promote energy efficient ride sharing.

EFFECTIVE DATE: April 1, 1980.

FOR FURTHER INFORMATION CONTACT: Dexter Davis, Manager, Dulles International Airport, P.O. Box 17045, Washington, D.C. 20041, Telephone 471–7596, or Edward Faggen, Legal Counsel, Metropolitan Washington Airports, Washington National Airport, Hangar 9, Washington, D.C. 20001, Telephone 577–8123.

SUPPLEMENTARY INFORMATION: The FAA Director of Metropolitan Washington, Airports issued a Notice of Proposed Rulemaking on January 9, 1980 (Notice No. 80–1) which was published in the **Federal Register** on January 14, 1980 (45 FR 2661) in which FAA proposed to allow carpools to use the Dulles Airport Access Highway (Access Highway). With certain exceptions, use of the Access Highway is presently restricted to airport users. The proposal was to permit vehicles with four or more persons to have access to the highway in both directions during the peak commuter periods until January 1, 1985. Interested persons have been afforded an opportunity to participate in the making of this final rule. After consideration of comments received in response to the Notice, and after having completed an environmental assessment of the proposal, FAA has determined that the proposed rule should be finalized, as modified below, and made effective.

This amendment is part of the DOT/FAA continuing effort to improve transportation efficiency and to encourage ride sharing and other energy conservation measures. This amendment removes certain restrictions on the use of the Dulles Airport Access Highway and will enhance carpooling as an alternative to the existing modes of transportation for those who commute from or to the Dulles Airport Access Highway corridor.

Discussion of Comments

The FAA received approximately 50 comments predominantly from members of the general public who reside or work in the Access Highway corridor. Several comments were submitted by civic organizations on behalf of large numbers of individuals. Comments were also submitted by representatives of local government and by agencies of the Federal Government. Industry organizations such as the Air Transport Association and the American Motorcycle Association also expressed their views on the opening of the Access Highway to carpools.

Airport Access

The majority of the comments by far were in favor of opening the Access Highway to carpools. However, many of the comments expressed concern or sought clarification about one aspect of the proposal or another. The comments in opposition expressed concern about access for the users of Dulles Airport. The Air Transport Association supports an exclusive airport use policy and objects to deviation from that policy, including the proposed carpool use. The ATA believes that if carpools are allowed, enforcement of the 4 person restriction should be on a full-time basis not on spot check basis. ATA also takes the position that the Highway should revert to the use for which it was authorized and constructed no later than January 1, 1985. Restoration to exclusive airport related use in 1985 should not be conditioned on the adoption of the Metropolitan Washington Airports Policy which appeared in the **Federal Register** on January 21, 1980. The ATA also expressed concern over the informal exemptions to the "airport only" policy that have developed over the years such as for the Reston Commuter Bus and for patrons of Wolf Trap Farm Park. One other commenter expressed concern about congestion on the Access Highway and was skeptical about FAA's ability to return the road to exclusive airport use.

The FAA's philosophy regarding the Access Highway has not changed. The Dulles Access Highway was built with Federal funds to provide airport users with a free flowing artery to the airport. It was designed to support use of Dulles Airport. The FAA remains committed to preserving the original intent of the Access Highway. The Secretary of Transportation's report to Congress entitled Carpool Access to Dulles Airport Access Road, July 1979, in which the Department of Transportation recommended opening the Highway to four or more person carpools, clearly acknowledged that free flowing airport access is the overriding purpose of the highway and it recommended that carpools be allowed only until January 1, 1985.

Also, the National Capital Planning Commission specifically endorsed the carpool proposal on the condition that carpool use be terminated in 1985. By that date Dulles Airport traffic is projected to have increased to the point that the carpool and other non-airport users will contribute to congestion on the Access Highway. However, FAA's traffic projections indicate that significant interference to airport patrons will not result before 1985 from implementation of the proposal. FAA's resolve to preserve the Access Highway for its principal purpose was stated in the Notice and is restated here. As congestion increases on the Highway, whether or not it is a result of efforts to promote Dulles Airport, efforts to minimize or eliminate non-airport related traffic will be considered by FAA.

As for informal exemptions. FAA has allowed very few exemptions in the 18 years that the Highway has been open. In addition to carpools, this regulation will give formal recognition to vehicles operated for the purpose of going directly to or from performances of Wolf Trap Farm Park, to buses operated in common carriage for which use of the Access Highway is appropriate, and to buses operated by the Fairfax County School systems.

Enforcement

Several commenters urged that if the carpool proposal is adopted a strong commitment to enforcement is essential to its success. FAA agrees, but has clearly stated from the outset, that enforcement is primarily a local government responsibility inasmuch as local citizens and employees derive the benefit from carpool use. FAA has sought and received the cooperation of the State of Virginia in this regard. FAA and the State have executed a Memorandum of Understanding in which the State has assumed the responsibility for the enforcement of the carpool restrictions. The enforcement plan involves having an attendant on duty on each of the ramps during the carpool operating hours. The attendant will operate the gates to permit entrance to the highway only by vehicles with four or more occupants. State or local police will provide the necessary law enforcement. FAA is taking the necessary steps to confer jurisdiction upon the State to enable the State police to enforce the carpool restriction on the ramps which heretofore have been subject to exclusive Federal jurisdiction. The carpool restriction will be posted on an official sign at the ramps. Violators will be subject to penalty under Virginia Code Sections 46.1–173. A violation is a traffic infraction subject to a fine of not more than one hundred dollars under Virginia code Section 46.1–16.01.

In addition, FAA police will continue to have jurisdiction over these ramp areas. Since this regulation is enacted pursuant to the authority of the FAA granted in the Second Washington Airport Act, 64 Stat. 770, violations may be prosecuted as a Federal misdemeanor offense under Section 159.19 and subjected to a fine to be determined by the Federal Court. Operation of a vehicle in violation of an operating sign is also a violation of the regulation under section 159.35(c)(6). If violations become excessive, stricter enforcement measures will be taken. If ineffective enforcement of these restrictions occurs which would jeopardize the primary purpose of the Highway, the FAA will have to consider closing it to carpools.

Hours of Operation

A considerable number of commenters requested FAA to modify the proposed hours for carpool access. As proposed in Notice 80–1, the carpools would be allowed to operate between 6:00 a.m. and 9:00 a.m. and between 4:00 p.m. and 7:00 p.m., Monday through Friday. Many employees at the United States Geological Survey in Reston, Virginia requested that the ramps at Reston Avenue be open at 3:30 p.m. instead of 4:00. FAA has inquired at the Geological Survey and has been advised that more than 2,000 employees complete their work day at 3:30 p.m. and that the vast majority of these employees commute by private automobile. Many carpools already exist and would use the Access Highway westbound in the morning but would be precluded from using them in the afternoon without enduring a half-hour delay that more than offsets the benefits from carpool use of the Access Highway.

FAA agrees that the ramps at Reston can be opened at 3:30 p.m. The State of Virginia has also concurred and will provide law enforcement and an attendant at this hour. Therefore the Reston Avenue ramps will be open in both directions from 6:00–9:00 a.m. and from 3:30–7:00 p.m.

The ramps at Trap Road are not expected to generate as much traffic as Reston Avenue. The Trap Road ramps will be opened in the peak direction only. That is, in the morning the westbound exit ramp from the Access Highway onto Trap Road will be closed. The eastbound entrance ramp onto the Highway will be opened to carpools from 6:00–9:00 a.m. In the afternoon, the eastbound ramp will be closed. Westbound carpool traffic will be able to exit from 4:00–7:00 p.m.

The hours are summarized as follows:

Ramp	A.M.	P.M.
Reston Ave. Eastbound	6 to 9	3:30 to 7.
Reston Ave. Westbound	6 to 9	3:30 to 7.
Trap Road Eastbound	6 to 9	Closed.
Trap Road Westbound	Closed	4:00 to 7.

Furthermore, FAA wants to keep a degree of flexibility in the hours of

operation of the ramps. Therefore, the final regulation will not prescribe the hours which would necessitate regulatory action to make even a minor adjustment. Instead, these vehicles may operate in the hours prescribed by the signs posted on the Access Highway. Enforcement action is not dependent on the hours being prescribed by regulation. FAA will, in cooperation with the State of Virginia, see to it that the hours of operation are set forth on a highway sign at each of the ramps. Once posted, the hours will be enforced as any other Access Highway operating sign pursuant to Section 159.35(c)(6). However, the hours of operation may only be changed by order of the Director of the Metropolitan Washington Airports.

Wolf Trap Farm Park

The Department of Interior, National Park Service, which operates Wolf Trap expressed concern about the use of the Trap Road ramps. During the summer months when the park is open, matinee performances are conducted which generate considerable traffic during the early part of the rush hour. To expedite the traffic from the park, Trap Road is operated in a one way mode south from the park towards the Access Highway for the time necessary to clear the parking lots. Carpools arriving at the Westbound exit ramp of Trap Road at 4:00 p.m. on the matinee days may encounter delays up to 30 minutes in exiting the ramp.

FAA does not intend to interfere with the efficient operation of Wolf Trap. Neither does FAA believe that carpooling should be disallowed on the westbound Trap Road ramps or that the hours of operation should differ significantly from the other ramps. FAA has discussed the matter with the Park Service and has decided that the Westbound ramp should be available to carpools from 4:00 to 7:00 p.m. in the afternoon, as proposed. Carpoolers are advised that they may encounter significant delays on matinee performance days during the Wolf Trap performance season.

The Park Service's other principal concern is that the parking lots at Wolf Trap might be used by commuters for carpool formation. FAA does not condone or encourage in any way, the use of Wolf Trap parking lots by commuters. However, the park police, as opposed to FAA or State Police, are in the best position to enforce the Park Service parking policies. Should unanticipated conflicts with Park operations arise, further carpool management action may be undertaken in consultation with the National Park Service. Such action could include, if necessary, changing carpool operating hours at Trap Road or closing the Westbound ramp to carpools during the Park season.

"Backtracking"

Backtracking is the term applied to those commuters who enter on the road, proceed west to the Airport only for the purpose of making a U turn and proceeding back to the east. The maneuver evidently results in some time saving for commuters, its circuitous nature notwithstanding. The practice has become widespread; as many as 3500 cars make U turns at Dulles Airport in a typical peak period. The practice has led to considerable congestion on the Access Highway from Route 28 west to the Airport. Furthermore the practice is not legal as the road is intended to be an "airport only" highway and its use is restricted by regulation. The regulation is, today, clarified in this regard by the addition of the phrase "on airport related business" to 159.35(a). Unless one of the exceptions apply, private vehicles are permitted to use the Access Highway only for the purpose of going to, or leaving, Dulles Airport on Airport related business.

Several commenters were concerned that FAA is cracking down on this illegal use as part of implementing the carpool proposal. This not the case. FAA will engage in random enforcement of the traffic restrictions on the Access Highway. However, the advent of carpooling does not require or signal any change in the FAA's position on backtracking. Carpooling offers commuters a legal alternative to backtracking and the FAA is hoping that the number of backtrackers will be diminished. This is the only relationship between the carpool proposal and backtracking.

Number of Occupants

A significant percentage of the commenters urged FAA to lower the vehicle occupancy requirement to three or two persons because such carpools are easier to form and could ultimately take more cars off congested alternative routes than four person carpools.

FAA considers it necessary to require carpools to have four or more persons in order to insure the free flow of traffic for airport users. A lower number may indeed attract more cars. It would also create a greater likelihood of congestion and therefore constitute a conflict with the FAA's airport only policy. The four person requirement is consistent with existing and planned carpool strategies for the metropolitan area. Less than four person carpools are not allowed on the I–395 carpool lanes, nor will they be allowed on the I–66 segment inside I–495 (the "Beltway"), nor on the Dulles Access Highway extension to meet I–66 when it is completed. These roads would become overly congested if the four person restrictions were relaxed. When the Access Highway and I–66 are connected, the Access Highway will conform to the traffic restrictions imposed upon I–66 by the Secretary of Transportation. It would not be good transportation policy to provide relaxed carpool requirements for the interim period until the Dulles Access Highway extension and I–66 are completed; this would encourage a commuter practice which will need to be stopped when the new facilities are open.

Neither does FAA agree with those commenters who urged that carpools be given a pass so that on days when one, or more than one, member is absent, the vehicle and its remaining occupants may continue to use the highway. A pass system, though a convenience for some, is also subject to abuse when absenteism becomes more the rule than the exception. An increased enforcement effort would be required in order to minimize the violation rate and to be fair to legitimate four-person carpoolers. Neither FAA nor the State is prepared to undertake the administrative tasks associated with issuing passes for the use of the Access Highway and assuring that the passes are not abused.

Motorcycles

Several commenters urged FAA to open the Access Highway to motorcycles on the theory that motorcycles provide an energy efficient form of transportation. FAA, however, is not prepared to allow vehicles onto the Access Highway based upon their passenger miles per gallon of fuel consumed. If it did so, the same rationale would have to be extended to fuel efficient automobiles. The result would be a vehicle access plan that is difficult to administer and one that has a greater potential for adding congestion to the Dulles Airport Access Highway as well as to Reston Avenue and Trap Road. The Department of Transportation and FAA's efforts are directed at promoting carpooling and ride sharing, and relaxing the restrictions on the Access Highway will achieve these objectives. Allowing motorcycles would not promote these objectives.

Metrorail

One citizen association expressed its opposition to the carpool access until such time as the Metrorail system replaces "other ground transportation

systems" in the corridor such as the proposed Dulles toll road. FAA does not believe that Metrorail is a realistic short-term alternative to promoting carpooling. Metrorail is planned to serve Vienna, Virginia, and will eventually provide a transportation alternative to the automobile and bus in the area. Also, the median strip of the Access Highway is being preserved by FAA for Metrorail in the eventuality that the Washington Metropolitan Area Transit Authority concludes that an extension of Metrorail to Dulles Airport is feasible and prudent. Moreover, while the Department of Transportation is interested in the issue of Metro service to Dulles, that issue is not properly a subject of FAA rulemaking or one exclusively within FAA's authority.

New Ramps

The Board of Supervisors of Loudoun County, Virginia, endorsed the proposal to allow carpools to use the Access Highway and, further, requested FAA to pursue the construction of access ramps at Route 28. At present access to or from Route 28 is permitted only to and from the airport. As a result Route 28 is heavily used by "backtrackers." Loudoun County carpools would have to travel to Reston Avenue to gain lawful access to the Highway. FAA recognizes this as a disincentive to Loudoun County commuters. Nevertheless, the FAA is not prepared to undertake the capital expenditures in excess of $750,000.00 associated with the new ramp construction. Carpoolers will be allowed to turn around at Dulles Airport, since the number of carpools making the U turn is not anticipated to be so great as to cause significant delay to airport users. This approach will be beneficial to carpools composed of citizens from Loudoun County and from the Herndon area of Fairfax County.

Implementation at Reston, Virginia

The Reston Community Association and the Reston Commuter Bus (RCB) organization generally endorsed the proposal and submitted a suggested plan to allow carpools to use the Reston Avenue ramps. These ramps are Federal property but were constructed at the expense of Gulf Reston. They have been used primarily to provide Highway access for Reston's commuter bus service. RCB is concerned that FAA not "arbitrarily assign priority to car and vanpools."

The ramps have served as a convenient transfer point for bus riders and a staging area for the RCB. The compatibility of this practice with automobile use of the ramps concerns the FAA and the State of Virginia from a safety standpoint. Every effort should be made to retain the bus transfer location on the ramps. If that is not tenable, then a location in the immediate vicinity of the ramp will be pursued. FAA and the State have developed a plan for operating the ramp that does not contemplate relocating the bus operation unless operational problems develop that cannot be otherwise resolved. It is currently planned to widen the ramp approximately six feet opposite the bus shelter to allow automobiles to pass the stopped buses. Additional construction and the use of barriers will be considered if found necessary after the ramps are opened. Also, traffic signal lights will be installed at the intersections of the ramps and Reston Avenue. This is expected to moderate the speed of vechicles through the area and safely permit left turns from the westbound exit ramp onto Reston Avenue. After the opening of the ramps, further measures will be taken as needed.

Local Governments and Planning Organizations

Loudoun County and Fairfax County, Virginia have endorsed the proposal. The Council of Governments Transportation Planning Board (COG) and the National Capital Planning Commission (NCPC) have also endorsed the proposal. No opposition has been expressed by any local government or planning agency. NCPC's endorsement was conditioned on development of an acceptable enforcement program, termination of carpool use by January 1, 1985, and development of measures to avoid commuter parking at the Wolf Trap parking lots. The COG staff concurred with NCPC and, in addition, urged completion of the Dulles Access Highway Extension to join I–66.

An adequate enforcement program has been developed by FAA that is in accordance with all of the conditions expressed by NCPC and COG. The FAA does not encourage or condone the use of Wolf Trap for parking and carpool formation. However, enforcement of the no parking restrictions will be the responsibility of the National Park Service.

Environmental Assessment

FAA has prepared and circulated for comment an environmental assessment. A number of comments have been received and on the basis of the study and the comments FAA has concluded that the proposal, if implemented, will not have a significant impact on the human environment.

The principal environmental concerns related to continued growth in western Fairfax County and Loudoun County and to the burden imposed on closer in jurisdictions by measures that encourage, rather than discourage, use of the automobile as means of commuting to the District of Columbia.

The FAA, on behalf of the United States, is a significant landowner and employer in western Fairfax and Loudoun Counties. It has an interest in land use and in planning for the areas surrounding Dulles Airport. Also, FAA has an obligation, when considering how to best use the land entrusted to it, to carefully weigh the impacts of its decisions on its neighbor's land. Therefore, in principle, FAA agrees with those comments that stress the complex interrelationship between certain transportation development projects and land development.

However, FAA does not believe that this carpool proposal is one of those projects. The carpool proposal is a transportation development much smaller in scale with significantly less impact than, for example, the plan for building a Dulles Toll Road. The carpool proposal will not provide increased access for commercial traffic and therefore the commercial growth planned for the Dulles corridor will continue to be restrained as it currently is. The Access Highway/Route 7 corridors are planned for substantial residential development and that development is occurring rapidly and without regard for the outcome of this proposal. Several of the projected carpools that will use the DAH are already formed and are either backtracking at the airport or using alternate routes. As the incentives for carpools increase when the Dulles Extension and I–66 are completed, new carpools will be formed from existing commuters now traveling alone or in two or three passenger carpools. While the increase in carpools will result in some reduction in congestion in traffic on alternate routes, the reductions are not expected to be great enough to attract any significant growth in the corridor. While home/work trips constitute a large share of the through traffic on Route 7, the transportation problems in northwest Fairfax County frequently surface at times other than carpool peak periods such as on weekends, and holidays. The existence of the carpool access for limited weekday periods is not likely to draw any significant volumes of people to western Fairfax County or Loudoun County that would otherwise not relocate there.

Furthermore, this proposal is not expected to significantly change the

volume of traffic passing through Arlington County, Virginia and into the District of Columbia. Any change that there is will be towards the reduction in total vehicle trips. There will be no significant secondary impacts on these areas as a result of this proposal.

Access by Handicapped Persons

FAA was requested by an individual to allow handicapped persons who are not in carpools to commute via the Access Highway. An exemption is not warranted. The purpose of the rule is to promote the use of carpools. An exemption for the commuter who is handicapped does not promote the carpool policy, nor is it consistent with the basic FAA policy on commuter use of the Access Highway. Commuters in private vehicles have not been permitted to use the Access Highway and handicapped individuals have not been exempt. The relaxation of the rule to permit carpools does not change the status of the individual commuter.

Editorial Revisions

The reference to "trespass" in section 159.35(a) is deleted as obsolete. Violators of the Access Highway regulation may be charged with a misdemeanor under the Second Washington Airport Act, 64 Stat. 770, and under these regulations, 14 C.F.R. 159.191. The regulation will state that any person who enters upon the Highway for an unauthorized purpose shall be guilty of a criminal offense and subject to a penalty under these regulations.

Access "road" is changed to access "highway."

The phrase "on airport related business" is added to 159.35(a) to further underscore the original intent of the regulation that private vehicles may enter upon the highway only to travel to the airport on airport related business, unless one of the exceptions apply.

Termination

The regulation provides that carpool access will terminate on January 1, 1985. The Agreement between the FAA and the State of Virginia Department of Highways and Transportation providing for enforcement and other responsibilities, also expires on January 1, 1985. Termination of that Agreement may occur prior to that date: (a) if a highway paralleling the Access Highway is completed by the State of Virginia and is open to the public; (b) if FAA determines that enforcement of the carpool restrictions are not effectively achieving a high level of compliance; or (c) if FAA determines that the carpool traffic is interfering with Dulles Airport traffic; (d) if the State of Virginia determines that carpool access should be terminated due to a severe decrease in use, the State's inability to staff the ramps, or similar reason.

Termination of the Agreement with the State may cause FAA to amend its regulations to modify carpool access or prohibit carpool use of the access highway. The State has agreed that termination of the Agreement shall be effective only after public notice and an opportunity to comment. FAA regulations would not be amended without appropriate notice and opportunity for comment.

Effective Date

The rule will be effective upon publication in the **Federal Register** (April 1, 1980). Inasmuch as the rule operates to remove a restriction, the requirement for publication of the rule not less than 30 days before its effective date is inapplicable. 5 U.S.C. Section 553(d).

Adoption of Amendment

Accordingly, § 159.35 of Part 159 of the Federal Aviation Regulations is amended, effective April 1, 1980, to read as follows:

§ 159.35 Use of access highway to Dulles International Airport.

(a) Except in an emergency, and except as provided in paragraph (b) of this section, private vehicles may enter upon the Dulles Airport Access Highway only for the purpose of going to, or leaving, Dulles International Airport on airport related business, or, with the permission of the Airport Manager, to perform work on the Highway. Entry by any person upon the Dulles Airport Access Highway for a purpose not authorized by this section is a criminal offense. Violators are subject to a penalty under these regulations.

(b) *Exceptions.* Any person may enter upon and travel over the Access Highway in the following vehicles:

(1) Vehicles operated for the purpose of going directly to or from performances at the Wolf Trap Farm Park for the Performing Arts.

(2) Buses operated in common carriage of persons by companies holding a certificate of public convenience and necessity for an operation for which use of the highway is appropriate, and buses operated by the Fairfax County School System.

(3) Until January 1, 1985, vehicles occupied by four or more persons. These vehicles may operate as prescribed by signs posted on the Access Highway.

(c) Except in an emergency, no operator of a private vehicle may—

(1) Enter or leave the Access Highway through an entrance or exit road or ramp other than one constructed by the FAA as part of the Access Highway system;

(2) Make a U-turn on the Access Highway;

(3) Enter or cross the median strip of the Access Highway;

(4) Use an exit road or ramp to enter the Access Highway;

(5) Use an entrance road or ramp to leave the Access Highway; or

(6) Operate the vehicle in violation of speed limit signs and other operating signs posted on the Access Highway.

(Secs. 3 and 4 of the Second Washington Airport Act, 64 Stat. 770; sec. 313 of the Federal Aviation Act of 1958, as amended (49 U.S.C. 1359); sec. 6, Department of Transportation Act (29 U.S.C. 1655))

Note.—The FAA has determined that this document involves a regulation which is not significant under Executive Order 12044, as implemented by DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979). The economic impact of the proposal is judged to be minimal and a detailed evaluation is not required.

Issued in Washington, D.C. on March 28, 1980.

Langhorne Bond,

Administrator.

BILLING CODE 4910-13-M

FEDERAL TRADE COMMISSION

16 CFR Part 13

[Docket No. 7845]

Arthur Murray, Inc., et al.; Prohibited Trade Practices, and Affirmative Corrective Actions

AGENCY: Federal Trade Commission.

ACTION: Modifying order.

SUMMARY: This order modifies an order issued on July 26, 1960 by inserting a roman numeral one before the preamble of the original order; vacating the *it is further ordered* paragraph therein; and adding new Parts II, III, IV, and V. The modified order strengthens the 1960 order by giving consumers the right to unlaterally cancel contracts with the company and receive prescribed refunds within 30 days of cancellation. The company is additionally required to direct franchisees and sub-franchisees to comply with the terms of the order, institute a program of continuing surveillance designed to reveal non-conformers, and terminate dealings with such parties.

DATES: Order issued July 26, 1960. Modifying order issued March 10, 1980.[1]

FOR FURTHER INFORMATION CONTACT: FTC/P, Albert H. Kramer, Washington, D.C. 20580. (202) 523–3727.

SUPPLEMENTARY INFORMATION: In the Matter of Arthur Murray, Inc., a corporation, et al. Codification under 16 CFR Part 13, appearing at 25 FR 9673, has been changed to include: Subpart-Corrective Actions and/or Requirements: § 13.533 Corrective Actions and/or Requirements; 13.533–20 Disclosures; 13.533–55 Refunds, rebates and/or credits; 13.533–60 Release of general, specific, or contractual constrictions, requirements, or restraints.

(Sec. 6, 38 Stat. 721; (15 U.S.C. 46). Interprets or applies sec. 5, 38 Stat. 719, as amended; (15 U.S.C. 45))

The Order Modifying Order to Cease and Desist, including further order requiring report of compliance therewith, is as follows:

Order Modifying Order To Cease and Desist

The Commission on September 18, 1979, issued its order to show cause why this proceeding should not be reopened and its order of July 27, 1960 (hereafter sometimes referred to as "the Commission Order of 1960"), modified.

Respondents having consented to the reopening of this proceeding and the modification of the Commission Order of 1960, as set forth in the show cause order and the Commission having considered the comments filed by interested persons,

Now, therefore, it is hereby ordered, That the Commission Order of 1960 be, and it hereby is, modified by inserting a roman numeral one, I, before the preamble of the Commission Order of 1960, by vacating the: IT IS FURTHER ORDERED paragraph therein, and by adding new Parts II, III, IV, and V so that the Modified Order will read as follows:

Order

I

It is ordered, That respondent Arthur Murray, Inc., a corporation, and its officers, and respondents Arthur Murray, Kathryn Murray and David A. Teichman, individually and as officers of said corporation, and respondents' agents, representatives and employees, directly or through any corporate or other device, or through any licensee, in connection with the solicitation, advertising or sale of dancing instruction in commerce, as "commerce" is defined in the Federal Trade Commission Act, do forthwith cease and desist from:

1. Representing, directly or by implication, by means of radio or television broadcasts, newspaper advertisements, contracts, telephone quizzes, crossword, dizzy dance or zodiac puzzels, "Lucky Buck" contests, or any certificates relating thereto, or any other means, that a course of dancing instruction or a specified number of dancing lessons, or any other service or thing of value, will be furnished free of charge, at a reduced price, or for any price, unless the period or periods of *bona fide* dancing instruction or other service or thing of value is in fact furnished as represented.

2. Refusing to honor the terms and provisions of any certificate, award or offer.

3. Using (a) by telephone any quiz, puzzle, contest or other device which purports to involve, or is represented as involving, skill, competition or special selection; (b) by other means any promotion which purports to be a *bona fide* quiz, puzzle, contest or other device involving skill, competition or special selection is not involved; or (c) any *bona fide* quiz, puzzle, contest or similar device when a purpose of such promotion is to obtain leads to prospective customers and such purpose is not fully and conspicuously disclosed in the announcement or description of such promotion.

4. Using in any single day "relay salemanship", that is consecutive sales talks or efforts of more than one representative, with or without the employment of hidden listening devices, to induce the purchase of dancing instruction.

5. Using "analyses", "tests", "studio competitions", "dance derbies", or any other artifices purportedly designed to evaluate dancing ability, progress or proficiency when said artifices are not so designed or so used but are in fact to induce the purchase of dancing instruction.

6. Requesting pupils or prospective pupils to sign uncompleted contracts or agreements; evading or refusing to answer inquiries concerning amount due or payable on proposed or completed contracts or agreements; or misrepresenting to pupils or prospective pupils what is or will be due or payable.

7. Falsely representing to or assuring pupils or prospective pupils that a given course of dancing instruction will enable him or her to achieve a given standard of dancing proficiency.

8. Contracting with a pupil or prospective pupil for a specific course of dancing instruction and thereafter, prior to the completion of the given course, subjecting such pupil or prospective pupil to sales effort toward the purchase of additional lessons, unless (a) any contract for additional lessons is subject to cancellation by such pupil or prospective pupil, with or without cause, at any time up to and including one week after the completion of the units of dancing instruction previously contracted for, without cost or obligation, except that a charge may be made for not in excess of two additional lessons furnished during such week and (b) all of such units previously contracted for shall be used or completed prior to the commencement of the additional lessons.

9. Using any technique or practice similar to those set out in paragraphs 4 through 8 hereof to mislead, coerce, or induce by other unfair or deceptive means the purchase of dance instruction.

II

For purposes of this part the following definitions shall be applicable:

Total contract price shall mean the total cash price paid or to be paid by the pupil or prospective pupil for the dance instruction or dance instruction services which are the subject of the contract or written agreement.

Notice of cancellation shall be deemed to have been provided by a pupil or prospective pupil by mailing or delivering written notification to cancel the contract or written agreement or by failing to attend instructional facilities for a period of five consecutive appointment days on which classes or the provision of services which are the subject of the contract or written agreement were prearranged with the pupil or prospective pupil.

Reasonable and fair service fee shall mean no more than 10% of the total contract price for contracts of $1,000 and under. For contracts over $1,000, "reasonable and fair service fee" shall mean no more than $100 plus an amount equal to 5% of the total contract price over $1,000 (not to exceed $250 in total).

It is further ordered, That respondent Arthur Murray, Inc., a corporation, and its officers, and respondent agents, representatives and employees, directly or through any corporate or other device, or through any licensee, in connection with the solicitation, advertising or sale of dance instruction or dance instruction services which are the subject of a contract or written agreement, do forthwith cease and desist from:

1. Entering into any contract or written agreement for dance instruction or dance instruction services which are the subject of the contract or written agreement unless it clearly and

[1] Copies of the Ordering Modifying Order to Cease and Desist filed with the original document.

conspicuously discloses in the exact language below that:

This agreement is subject to cancellation at any time during the term of the agreement upon notification by the student. If this agreement is cancelled within three business days, the studio will refund all payments made under the agreement. After three business days, the studio will only charge you for the dance instruction and dance instruction services actually furnished under the agreement plus a reasonable and fair service fee.

2. Failing to refund to a pupil or prospective pupil who cancels any contract or written agreement within three business days from the date on which the contract or written agreement was executed, all payments made by the pupil or prospective pupil. Such refunds shall be provided, and any evidence of indebtedness cancelled and returned, within 30 days after receiving notice of cancellation.

3. Receiving, demanding, or retaining more than a pro rata portion of the total contract price plus a reasonable and fair service fee where a pupil or prospective pupil cancels any contract or written agreement after three business days from the date on which the contract or written agreement was executed and within the term of the said contract or written agreement. Seller must, within thirty (30) days of notice of cancellation, provide any refund payment due to the pupil or prospective pupil or must cancel that portion or the pupil's or prospective pupil's indebtedness that exceeds the amount due. The pro rata portion shall be calculated in the following manner:

(a) For the time period preceding notice of cancellation, there must be calculated the number of hours or lessons of dance instruction or dance instruction services received or attended by the pupil pursuant to the contract or written agreement.

(b) This number must be divided by the total number of hours or lessons of dance instruction or dance instruction services which are the subject of the contract or written agreement.

(c) The resulting number shall be multiplied by the total contract price.

(d) For contracts combining a course of dance instruction with dance instruction services, separate prices for the dance instruction and the dance instruction service portions must be designated and the pro rata portion of the total contract price shall be the sum of the separate pro rata obligations for the dance instruction portion and the dance instruction service portion.

4. Misrepresenting in any manner to any pupil or prospective pupil any of the provisions of this Order.

III

It is further ordered, That nothing contained in the Modified Order to cease and desist shall be construed to relieve respondent from complying with any provisions of any federal, state, or local law, rule, regulation, or order which affords greater protection to pupils or prospective pupils than the comparable provision of the Commission's order or to waive any legal rights the pupil or prospective pupil may have under the various jurisdictions.

IV

It is further ordered, That:

1. Respondent corporation deliver a copy of this Order to each of its present and future franchisees or sub-franchisees, with directions that such persons promulgate and enforce same.

2. Respondent obtain from each person described in subparagraph 1 above a signed statement setting forth his/her intention to conform his/her business practices to the requirements of this Order; if Respondent is unable to obtain such signed statements, Respondent shall notify the Federal Trade Commission of the name of the franchisee or subfranchisee which will not sign such a statement and report the reason therefore to the Federal Trade Commission.

3. Respondent institute a program of continuing surveillance adequate to reveal whether the business operation of each person described in subparagraph 1 above conform to the requirements of this Order; and

4. Respondent discontinue dealing with or terminate the use or engagement of any person described in subparagraph 1 above who continues, after notice, to engage in a continuous course of conduct involving acts or practices prohibited by this Order as revealed by the aforesaid program of surveillance. Respondent is permitted to effect such termination in accordance with applicable state laws in those states which have statutes governing franchise termination.

V

It is further ordered, That:

1. Respondent corporation forthwith distribute a copy of this Order to each of its operating divisions.

2. Respondent corporation notify the Commission at least thirty (30) days prior to any proposed change in the corporate respondent such as dissolution, assignment or sale resulting in the emergence of a successor corporation, the creation or dissolution of subsidiaries or any other change in the corporation which may affect compliance obligations arising out of the Order.

3. Respondent corporation, within one hundred fifty (150) days after service upon it of this Order, file with the Commission a report, in writing, setting forth in detail the manner and form in which it has complied with this Order.

By direction of the Commission.

Carol M. Thomas,

Secretary.

BILLING CODE 6750-01-M

---

16 CFR Part 13

[Docket No. 9073]

Ford Motor Co., et al.; Prohibited Trade Practices, and Affirmative Corrective Actions

AGENCY: Federal Trade Commission.

ACTION: Modifying order.

SUMMARY: This order reopens and modifies a consent order issued on March 29, 1979 so that Paragraph II (C)(7) of the order provides for a waiver of customers' surplus rights in the event that a dealership retains a repossessed vehicle for its own use, rather than for resale. This brings the order into conformity with one aspect of an order issued against Francis Ford, Inc. on September 21, 1979, under the same docket number.

DATES: Decision issued March 29, 1979. Modifying Order issued February 26, 1980.[1]

FOR FURTHER INFORMATION CONTACT: Bruce D. Carter, Seattle Regional Office, 10R, Federal Trade Commission, 28th Floor, Federal Bldg., 915 Second Ave., Seattle, Wash. 98174. (206) 442-4655.

SUPPLEMENTARY INFORMATION: In the Matter of Ford Motor Company, Ford Motor Credit Company, and Francis Ford, Inc., corporations. Codification, under 16 CFR Part 13, appearing at 44 FR 25630, remains unchanged.

(Sec. 6, 38 Stat. 721; (15 U.S.C. 46). Interprets or applies sec. 5, 38 Stat. 719, as amended; (15 U.S.C. 45))

The Order Reopening and Modifying Consent Order is as follows:

By petition of November 26, 1979, respondents Ford Motor Company and Ford Motor Credit Company (hereafter "Ford respondents") have asked the Commission to modify Paragraph II C. (7) of the Consent Order entered by the Commission against these respondents on March 29, 1979, in order to conform with a less restrictive provision of the litigated order in this docket entered against respondent Francis Ford, Inc. on

[1] Copies of the Order Reopening And Modifying Consent Order filed with the original document.

September 21, 1979. An "Order to Show Cause" as to why the requested change should not be made, dated January 15, 1980, has elicited no objection.

Paragraph VII B. of the Consent Order provides that if a final order is issued in Dockets No. 9073, 9074, or 9075 that imposes less restrictive standards in certain enumerated respects than does the Consent Order, the Commission shall reopen the Consent Order within 120 days of a petition to do so and modify the Consent Order to conform with the less restrictive provisions contained in the other order.

Although the less restrictive order upon which Ford respondents rely for their request has not yet become final, due to the pendency of an appeal, no purpose would be served by delaying modification of the Consent Order until such time as the appeal is resolved, inasmuch as the appeal by Francis Ford is hardly likely to result in imposition of a *more* restrictive standard than the Commission has imposed. Modification now will expedite achievement of uniform treatment of automobile dealers which is a primary purpose of Paragraph VII B. Therefore,

It is ordered, That the Consent Order in this docket be reopened for the limited purpose of effecting the following changes.

It is further ordered, That Paragraph II of the Consent Order be modified to eliminate the following language:

"C. The accounting system shall provide that: 7. Dealers are not to obtain waivers of surplus or redemption rights from repurchase financing customers."

It is further ordered, That Paragraph II of the Consent Order be modified to add the following language:

"C. The accounting system shall provide that: 7. Dealers are not to take any action to obtain or to attempt to obtain or bring about a waiver of a customer's rights to redeem, except in the precise manner and circumstances contemplated by the applicable state law version of Section 9–505 of the Uniform Commercial Code. Under Section 9–505 a waiver of a customer's right to a surplus may not be sought unless the dealer intends to retain the collateral for its own use for the immediate future rather than to resell the collateral in the ordinary course of business. If a waiver is sought, the dealer shall not represent that by proposing the waiver, it proposes to forego its right to a deficiency judgment, unless it intends to seek such a judgment should the waiver not be given. No customer's waiver of rights or failure to object to any secured party's proposal to retain the repossessed vehicle, unless procured in exact conformity with this subparagraph, shall limit the provisions of the accounting system relating to accounting for and paying any surplus."

By direction of the Commission.

Carol M. Thomas,

Secretary.

BILLING CODE 6750–01–M

16 CFR Part 13

[Docket No. C–3013]

Hair Extension of Beverly Hills, Inc., et al.; Prohibited Trade Practices, and Affirmative Corrective Actions

AGENCY: Federal Trade Commission.

ACTION: Final order.

SUMMARY: In settlement of alleged violations of federal law prohibiting unfair acts and practices and unfair methods of competition, this consent order, among other things, requires two California firms and two individuals engaged in the sale of hair replacement services to cease soliciting, selling or performing hair implants; and/or misrepresenting, in advertising or otherwise, the safety or effectiveness of the hair implant process in the treatment of baldness. Should the parties engage in any future hair replacement business, they are required to expend at least $8,000 on corrective advertising warning consumers that "Hair Implants Are Unsafe." The order also requires that the Commission notify past hair implant customers that the process is unsafe and that they should seek prompt medical attention.

DATES: Complaint and order issued March 13, 1980.[1]

FOR FURTHER INFORMATION CONTACT: Carleton Eastlake, Acting Direcor, 7R, Los Angeles Regional Office, Federal Trade Commission, 11000 Wilshire Blvd., Los Angeles, Calif. 90024. (213) 824–7575.

SUPPLEMENTARY INFORMATION: On Tuesday, October 23, 1979, there was published in the **Federal Register** 44 FR 61050, a proposed consent agreement with analysis In the Matter of Hair Extension of Beverly Hills, Inc., a corporation, also trading and doing business as Hair TransCenter, Hair Extension, Inc., a corporation, also trading and doing business as Hair TransCenter, Lee Marlow, individually and as an officer of said corporations, and Ann Marlow, individually and as an officer of said corporations, for the purpose of soliciting public comment. Interested parties were given sixty (60) days in which to submit comments, suggestions or objections regarding the proposed form of order.

Comments were filed and considered by the Commission. The Commission has ordered the issuance of the complaint in the form contemplated by the agreement, made its jurisdictional findings and entered its order to cease and desist, as set forth in the proposed consent agreement, in disposition of this proceeding.

The prohibited trade practices and/or corrective actions, as codified under 16 CFR Part 13, are as follows: Subpart-Advertising Falsely or Misleadingly: § 13.90 History of product or offering; § 13.170 Qualities or properties of product or service; 13.170–24 Cosmetic or beautifying; 13.170–30 Durability or permanence; 13.170–78 Renewing, restoring; § 13.190 Results; § 13.195 Safety; 13.195–60 Product; § 13.205 Scientific or other relevant facts. Subpart-Corrective Actions and/or Requirements: § 13.533 Corrective actions and/or requirements; 13.533–20 Disclosures; 13.533–40 Furnishing information to media. Subpart-Disseminating Advertisements, Etc.: § 13.1043 Disseminating advertisements, etc. Subpart-Misrepresenting Oneself and Goods—Goods:§ 13.1650 History of product; § 13.1710 Qualities or properties; § 13.1730 Results; § 13.1740 Scientific or other relevent facts. Subpart-Neglecting, Unfairly or Deceptively, To Make Material Disclosure: § 13.1854 History of products; § 13.1885 Qualities or properties; § 13.1890 Safety; § 13.1895 Scientific or other relevent facts.

(Sec. 6, 38 Stat. 721; (15 U.S.C. 46). Interprets or applies sec. 5, 38 Stat. 719, as amended; (15 U.S.C. 45))

CONSUMER PRODUCT SAFETY COMMISSION

16 CFR Part 1015

Procedures for Disclosure or Production of Information Under the Freedom of Information Act; Revisions for Briefing Packages and Draft Documents

AGENCY: Consumer Product Safety Commission.

ACTION: Final revisions to Freedom of Information Act regulation.

SUMMARY: In this document the Consumer Product Safety Commission revises its Freedom of Information Act regulation to clarify the availability of draft Commission staff documents and Commission staff briefing packages. The present regulation treats these documents differently from other Commission documents and fails to make clear that these documents will not be made available if disclosure is barred by statute or if the documents are exempt from mandatory disclosure and disclosure is contrary to the public interest. Under the revision, draft staff documents that are agency records and staff briefing packages will be available upon request in the same manner as other Commission records. Additionally, the revision provides that briefing packages that would be released upon request under the FOIA and the Commission's FOIA regulation will be made available in the Commission's public reference facility after they are forwarded to the Commissioners.

EFFECTIVE DATE: April 3, 1980.

FOR FURTHER INFORMATION CONTACT: Alan H. Schoem, Office of the General Counsel, Consumer Product Safety Commission, Washington, D.C. 20207, telephone (202) 634–7770.

SUPPLEMENTARY INFORMATION: On February 22, 1977, the Commission published in the **Federal Register** its final Freedom of Information Act (FOIA) Regulation (42 FR 10490), codified at 16 CFR Part 1015. The regulation, among other things, specifically addresses the public availability of draft staff documents and staff briefing packages. 16 CFR 1015.15 (b) and (c). In a December 31, 1979 notice, 44 FR 77196, the Commission proposed to revise these sections of its FOIA regulation to clarify that such documents will be available upon request in the same manner as other Commission documents. Additionally, the Commission proposed the revision to clarify the availability of briefing packages in the Commission's public reference facility after transmittal to the Commissioners. No comments on the proposed revision were received by the Commission.

The revision to § 1015.15 (b) and (c) clarifies that the Commission will consider draft documents no differently from other documents requested under the FOIA. Under the amended regulation, the decision whether to release a particular document will be made on a case-by-case basis applying the FOIA and the Commission's FOIA regulation.

Additionally, the revision to § 1015.15(c) clarifies that briefing packages are, for purposes of the FOIA, subject to the same standards as other Commission records. The Commission expects however, that few requests for such documents will be made under the FOIA. This is because under the revision to § 1015.15(c), briefing packages, or the portions thereof, determined by the Secretary, with the advice of the Office of the General Counsel, to be available to the public, will be placed in the Commission's public reading room promptly after transmittal to the Commissioners.

Accordingly, § 1015.15 is amended by revising paragraphs (b) and (c) to read as follows:

§ 1015.15 Purpose and scope.

* * * * *

(b) No identifiable record requested in accordance with the procedures contained in this part shall be withheld from disclosure unless it falls within one of the classes of records exempt under 5 U.S.C 552(b). The Commission will make available, to the extent permitted by law, records authorized to be withheld under 5 U.S.C. 552(b) unless the Commission determines that disclosure is contrary to the public interest. In this regard the Commission will not ordinarily release documents that provide legal advice to the Commission concerning pending or prospective litigation where the release of such documents would significantly interfere with the Commission's regulatory or enforcement proceedings.

(c) Draft documents that are agency records are subject to release upon request in accordance with this regulation. However, in order to avoid any misunderstanding of the preliminary nature of a draft document, each draft document released will be marked to indicate its tentative nature. Similarly, staff briefing packages, which have been completed but not yet transmitted to the Commission by the Office of the Secretary are subject to release upon request in accordance with this

regulation. Each briefing package or portion thereof released will be marked to indicate that it has not been transmitted to or acted upon by the Commission. In addition, briefing packages, or portions thereof, which the Secretary upon the advice of the Office of the General Counsel has determined would be released upon request in accordance with this regulation, will be publicly available in the public reference facility established under § 1015.2 promptly after the briefing package has been transmitted to the Commissioners by the Office of the Secretary. Such packages will be marked to indicate that they have not been acted upon by the Commission.

* * * * *

§ 1015.17 [Amended]

Section 1015.17 is amended by deleting the phrase "or draft document" in § 1015.17, line 4; § 1015.17(a), line 4; and § 1015.17(b), lines 3–4.

(Consumer Product Safety Act, (15 U.S.C. 2051); the Federal Hazardous Substances Act, (15 U.S.C. 2161); the Poison Prevention Packaging Act of 1970, (15 U.S.C. 1471); the Refrigerator Safety Act, (15 U.S.C. 1211); the Flammable Fabrics Act, (15 U.S.C. 1191); and the Freedom of Information Act, (5 U.S.C. 552))

Dated: March 25, 1980.

Sadye E. Dunn,

Secretary, Consumer Product Safety Commission.

DEPARTMENT OF HEALTH, EDUCATION, AND WELFARE

Social Security Administration

20 CFR Part 404

Federal Old-Age, Survivors and Disability Insurance Benefits; Wage Credits for Veterans and Members of the Uniformed Services

Correction

In FR Doc. 80-7912, appearing at page 16463 in the issue for Friday, March 14, 1980, make the following correction:

On page 16467, in the first column, in § 404.1325, in paragraph (f), in the fifth line, the word "kidnaping" should be spelled "kidnapping" and should be followed by a comma (,).

BILLING CODE 1505-01-M

DEPARTMENT OF JUSTICE

Attorney General

28 CFR Part 0

[Order No. 884-80]

Delegations Respecting Claims Against the Federal Bureau of Investigation

AGENCY: Department of Justice.

ACTION: Final rule.

SUMMARY: This order creates a new § 0.89a under Subpart P of Part 0, 28 CFR, in which authority of the Director of the Federal Bureau of Investigation delegated from the Attorney General respecting claims against the Bureau is consolidated. The order authorizes the Director to exercise the authority of the Attorney General under 31 U.S.C. 224b to certify certain claims against the Bureau for non-negligent property damage for payment to the Congress. The order also transfers, with minor editorial changes, the provision at 28 CFR 0.85(k) to paragraph (a) of the new section. This latter provision delegates limited settlement authority under the Federal Tort Claims Act to the Director. Finally, the order authorizes limited redelegation of both authorities.

EFFECTIVE DATE: March 25, 1980.

FOR FURTHER INFORMATION CONTACT: John A. Mintz, Assistant Director—Legal Counsel, Federal Bureau of Investigation, Washington, DC 20535 (202–324–5018).

SUPPLEMENTARY INFORMATION: The Department has not invited public comment on this rule because its subject is limited to a matter of internal Departmental procedure. the Department has, further, determined that this rule is not significant for purposes of Executive Order 12044.

By virtue of the authority vested in me by 28 U.S.C. 509 and 510 and 5 U.S.C. 301, Subpart P of Part 0 of Chapter 1 of Title 28, Code of Federal Regulations, is amended by adding the following new § 0.89a to read as follows:

§ 0.89a Delegations respecting claims against the FBI.

(a) The Director of the Federal Bureau of Investigation is authorized to exercise the power and authority vested in the Attorney General under 28 U.S.C. 2672 to consider, ascertain, adjust, determine, and settle any claim thereunder not exceeding $5,000 in any one case caused by the negligent or wrongful act or omission of any employee of the Federal Bureau of Investigation.

(b) The Director of the Federal Bureau of Investigation is further authorized to exercise the power and authority vested in the Attorney General under the Act of March 20, 1936, Ch. 159, Pub. L. 74–481, 49 Stat. 1184 (31 U.S.C. 224b) with regard to claims thereunder not exceeding $500 in any one case.

(c) The Director of the Federal Bureau of Investigation is authorized to redelegate to the Assistant Director, Legal Counsel Division, or his designee within that division, any of the authority, functions, or duties vested in him by paragraphs (a) and (b) of this section. This authority shall not be further redelegated.

§ 0.85 [Amended]

Subpart P of Part 0 of Chapter 1 of Title 28, Code of Federal Regulations, is further amended to delete paragraph (k) of § 0.85.

Dated: March 25, 1980.

Benjamin R. Civiletti,

Attorney General.

[FR Doc. 80-10134 Filed 4-2-80; 8:45 am]

BILLING Code 4410-01-M

DEPARTMENT OF THE INTERIOR

National Park Service

36 CFR Part 7

Everglades National Park Fishing and Boating Regulations; Correction

AGENCY: National Park Service, Interior.

ACTION: Correction of final rule.

SUMMARY: On February 15, 1980, the National Part Service published in the **Federal Register** (45 FR 10350), final regulations governing fishing and boating activities in Everglades National Park. Section (f)(17) entitled *Bag Limits* contains an error in designating a subsection and a phrase relating to mullet and pompano harvest was inadvertently omitted.

EFFECTIVE DATE: April 3, 1980.

FOR FURTHER INFORMATION CONTACT: Richard H. Dawson, Resource Management Specialist, Everglades National Park, Telephone: (305) 247–6211.

SUPPLEMENTARY INFORMATION: Final regulations governing fishing and boating activities at Everglades National Park were published in the **Federal Register** on February 15, 1980 (45 FR 10350). Paragraph (f)(17) of § 7.45 of Title 36 CFR entitled *Bag Limits* (45 FR 10354) contains an error designating a subsection. The subsection excluding bait fish from the bag limit should be corrected from the (f)(7) designation, as published, to (f)(6). In addition to the error, a phrase was inadvertently

omitted relating to mullet and pompano harvest within the part. The phrase, which is used to clarify that mullet and pompano harvest is permitted by persons, firms, or corporations holding a valid commercial park fishing permit for netting, should be added to the (f)(17) subsection. Since this phrasing was used in the previously published proposed rules on September 14, 1979 (44 FR 53541) and was discussed in the preamble of the **Federal Register** published on February 15, 1980, public notice and comment is not considered necessary.

Therefore, in consideration of the foregoing, on page 10354 of FR Doc. 80–5186 dated February 15, 1980, paragraph (f)(17) of § 7.45 should read as follows:

§ 7.45 Everglades National Park.

* * * * *

(f) * * *

(17) *Bag Limits.* No person shall take, have in his possession, buy, offer for sale, sell, or unnecessarily destroy, at any time more than: Ten (10) fish of one species, excluding bait fish, as stated in paragraph (f)(6) of this section, and not totally more than twenty (20) fish of all species, excluding bait fish, with the exception of persons, firms, or corporations holding a valid commercial park fishing permit for mullet and pompano netting only.

* * * * *

(Sec. 3 of the Act of August 25, 1916 (39 Stat. 535, as amended, 16 U.S.C. 3); 245 DM 1 (27 FR 6395) as amended; and National Park Service Order 77 (38 FR 7478, as amended).

Daniel J. Tobin, Jr.,

Associate Director, Management and Operations.

[FR Doc. 80–10159 Filed 4–2–80; 8:45 am]

BILLING CODE 4310–70–M

FEDERAL EMERGENCY MANAGEMENT AGENCY

44 CFR Part 67

National Flood Insurance Program; Final Flood Elevation Determinations

AGENCY: Federal Insurance Administration, FEMA.

ACTION: Final rule.

SUMMARY: Final base (100-year) flood elevations are listed below for selected locations in the nation.

These base (100-year) flood elevations are the basis for the flood plain management measures that the community is required to either adopt or show evidence of being already in effect in order to qualify or remain qualified for participation in the National Flood Insurance Program (NFIP).

EFFECTIVE DATE: The date of issuance of the Flood Insurance Rate Map (FIRM), showing base (100-year) flood elevations, for the community.

ADDRESSES: See table below.

FOR FURTHER INFORMATION CONTACT: Mr. Robert G. Chappell, National Flood Insurance Program, (202) 426–1460 or Toll Free Line (800) 424–8872 (In Alaska and Hawaii call Toll Free (800) 424–9080), Room 5150, 451 Seventh Street SW., Washington, D.C. 20410.

SUPPLEMENTARY INFORMATION: The Federal Insurance Administrator gives notice of the final determinations of flood elevations for each community listed.

This final rule is issued in accordance with Section 110 of the Flood Disaster Protection Act of 1968 (Title XIII of the Housing and Urban Development Act of 1968 (Pub. L. 90–448)), 42 U.S.C. 4001–4128, and 44 CFR 67.8 (presently appearing at its former Title 24, Chapter 10, § 1917.8 of the Code of Federal Regulations). An opportunity for the community or individuals to appeal this determination to or through the community for a period of ninety (90) days has been provided, and the Administrator has resolved the appeals presented by the community.

The Administrator has developed criteria for flood plain management in flood-prone areas in accordance with 44 CFR Part 67 (formerly 24 CFR Part 1910).

The final base (100-year) flood elevations for selected locations are:

(National Flood Insurance Act of 1968 (Title XIII of Housing and Urban Development Act of 1968), effective January 28, 1969 (33 FR 17804, November 28, 1968) as amended; 42 U.S.C. 4001–4128; Executive Order 12127, 44 FR 19367; and delegation of authority to Federal Insurance Administrator, 44 FR 20963)

Issued: March 6, 1980.

Gloria M. Jimenez,

Federal Insurance Administrator.

[FR Doc. 80-9950 Filed 4-2-80; 8:45 am]

BILLING CODE 6718-03-M

44 CFR Part 67

National Flood Insurance Program; Final Flood Elevation Determinations

AGENCY: Federal Insurance Administration, FIA.

ACTION: Final Rule.

SUMMARY: Final base (100-year) flood elevations are listed below for selected locations in the nation.

These base (100-year) flood elevations are the basis for the flood plain management measures that the community is required either to adopt or show evidence of being already in effect in order to qualify or remain qualified for participation in the National Flood Insurance Program (NFIP).

EFFECTIVE DATE: The date of issuance of the Flood Insurance Rate Map (FIRM), showing base (100-year) flood elevations, for the community.

ADDRESSES: See table below.

FOR FURTHER INFORMATION CONTACT: Mr. R. Gregg Chappell, National Flood Insurance Program, (202) 426–1460 or Toll Free Line (800) 424–8872 (in Alaska and Hawaii Call Toll Free (800) 424–9080), Room 5150, 451 Seventh Street, S.W., Washington, D.C. 20410.

SUPPLEMENTARY INFORMATION: The Federal Insurance Administrator gives notice of the final determination of flood elevations for each community listed.

This final rule is issued in accordance with Section 110 of the Flood Disaster Protection Act of 1968 (Title XIII of the Housing and Urban Development Act of 1968 (Pub. L. 90–448), 42 U.S.C. 4001–4128, and 44 CFR Part 67.11). An opportunity for the community or individuals to appeal this determination to or through the community for a period of ninety (90) days has been provided. No appeals of the proposed base flood elevations were received from the community or from individuals within the community.

The Administrator has developed criteria for flood plain management in flood-prone areas in accordance with 44 CFR Part 60.

The final base (100-year) flood elevations for selected locations are:

Final Base (100-year) Flood Elevations

State	City/town/county	Source of flooding	Location	#Depth in feet above ground. *Elevation in feet (NGVD)
Alaska	Valdez (City), Unorganized Borough [Docket No. FE-5497].	Lowe River	Dayville Road (100 feet) downstream from centerline	*22
			Dayville Road (110 feet) upstream from centerline	*27
			Pipeline Access Road (100 feet) downstream from centerline	*47
			Pipeline Access Road (100 feet) upstream from centerline	*53
		Valdez Glacier Stream	Intersection of Mineral Creek Road and Richardson Highway	*4
			Intersection of Valdez Airport Road and Richardson Highway	*4
			Northeast Corner of Northernmost Runway at Valdez Airport	*6
			Approximately 13,000 feet northeast along New Valdez Glacier Road from its intersection with Richardson Highway.	*11
		Port Valdez	100 feet downstream of northern face of Dayville Road Bridge over Allison Creek.	*11
			Intersection of Kenicott Avenue and North Harbor Drive	*11
		Robe Lake	At confluence of Robe River	*28
		Robe River	Approximately 2000 feet southeast along Richardson Highway from its intersection with New Valdez Glacier Road.	*2
			Southwest side of Richardson Highway, 400 feet northwest of its intersection with Dayville Road.	*3
	Maps available at City Hall, Pioneer Drive, Valdez, Alaska.			
Arkansas	City of Mammoth Springs, Fulton Co. [FEMA-5738].	Spring River	Just downstream of State Hwy 63	*502
		Warm Fork, Spring River	Just downstream of St. Louis-San Francisco Railway	*504
		Town Branch	Just upstream of State Highway 63	*506
			Just upstream of Bronson Avenue	*524
	Maps available at City Hall, 110 Main Street, Mammoth Springs, Arkansas 72554.			
California	Glenn County, Unincorporated Areas [Docket No. FEMA-5728].	Walker Creek	County Road 35 at centerline	*160
			County Road 33, 30 feet upstream in centerline	
		Stony Creek	Tehama-Colusa Canal 100 feet upstream from centerline	*167
				*230
			Interstate Highway 5 at centerline	*264
		Hambright Creek	State Highway 99 West at centerline	*256
			County Road G at centerline	*276
			County Road FF, 25 feet upstream from centerline	*285
		South Fork Willow Creek (Sheet Flow).	Intersection of County Road KK and County Road 48	#1
			Intersection of Garden Street and Second Street	*130
		South Fork Willow Creek (Ponding).	Intersection of Green Street and Butte Street	*136
			Intersection of State Highway 99 West and County Road 45	*139
		Wilson Creek (Ponding)	2000 feet southwest of the intersection of Interstate Highway 5 and County Road 39.	*148
		Walker Creek (Ponding)	Intersection of County Road 47 and County Road 48	*130
	Maps are available at County Planning Department, County Courthouse, 526 West Sycamore, Willows, California.			
Colorado	Douglas County (Unincorporated Areas) [Docket No. FEMA-5728].	Plum Creek	Titan Road 150 feet downstream from centerline	*5,529
			Titan Road 50 feet upstream from centerline	*5,536
			Denver and Rio Grande Western Railroad 50 Feet upstream from Centerline.	*5,636
			Unnamed Road 25 feet upstream from centerline	*5,647
			West Rio Grande Avenue 25 feet upstream from centerline	*5,740
			Confluence with East Plum and West Plum Creeks	*5,770
		East Plum Creek at Sedalia	State Highway 67 100 feet upsteam from centerline	*5,785
		Indian Creek	Rainbow Creek Road 25 feet upstream from centerline	*5,932
			Cherokee Drive 25 feet upstream from centerline	*5,986
			Apache Drive 25 feet upstream from centerline	*6,078
		West Plum Creek	Perry Park Road (first crossing) 50 feet upstream from centerline	*6,339
			Red Rock Drive 25 feet upstream from centerline	*6,430
			Private Road 25 feet upstream from centerline	*6,467
		East Plum Creek at Larkspur	Interstate Highway 25, 125 feet upstream from centerline	*6,599
			County Road No. 18, 25 feet upstream from centerline	*6,620
			Perry Park Avenue 50 feet upstream from centerline	*6,662
			Spruce Mountain Road 50 feet upstream from centerline	*6,697
		Hangmans Gulch	Confluence with East Plum Creek	*6,100
			Denver and Rio Grande Western Railroad 25 feet upstream from centerline.	*6,145
			Interstate Highway 25, 140 feet upstream from centerline	*6,195
			Corporate Limits (2nd crossing) 10 feet upstream from centerline	*6,286
		East Plum Creek at Castle Rock	Confluence with Hangmans Gulch 50 feet upstream from centerline	*6,100
			U.S. Highway 85, 50 feet upstream from centerline	*6,214
		Sellers Gulch	Dirt Road (first crossing) 25 feet upstream from centerline	*6,267
			Dirt Road (second crossing) 25 feet upstream from centerline	*6,317
		Unnamed Tributary to Sellers Gulch.	County Road 25 feet upstream from centerline	*6,255
		Carpenter Creek	Denver and Rio Grande Western Railroad 125 feet upstream from centerline.	*6,841
			County Road No. 74, 50 feet upstream from centerline	*6,895
		Cherry Creek	Arapahoe and Douglas County Limits 40 feet upstream from centerline.	*5,710
			West Parker Road 160 feet upstream from centerline	*5,814
			Stroh Avenue 50 feet upstream from centerline	*5,905
			Scott Road 40 feet upstream from centerline	*5,967
			County Road 40 feet upstream from centerline	*6,040
		Happy Canyon Creek	Corporate Limits 50 feet upstream from centerline	*5,725
			Dogwood Avenue 50 feet upstream from centerline	*5,811
			Birch Avenue 50 feet upstream from centerline	*5,834
			West Parker Road 100 feet upstream from centerline	*5,850
			First Street 125 feet upstream from centerline	*5,857

Final Base (100-year) Flood Elevations—Continued

State	City/town/county	Source of flooding	Location	#Depth in feet above ground. *Elevation in feet (NGVD)
		Newlin Gulch	Confluence with Cherry Creek	*5,773
			Jordan Road 50 feet upstream from centerline	*5,819
			Dirt Road 100 feet upstream from centerline	*6,004
		Baldwin Gulch	Confluence with Cherry Creek 150 feet upstream from centerline	*5,759
			Pine Street 35 feet upstream from centerline	*5,774
			Pine Drive 25 feet upstream from centerline	*5,894
			Soil Conservation Service Flood Control Dam 25 feet upstream from centerline.	*5,958
			Antelope trail 25 feet upstream from centerline	*6,041
		Sulphur Gulch	Confluence with Cherry Creek	*5,816
			Parker Road (State Highway 83) 15 feet upstream from centerline	*5,850
			County Road No. 9, 25 feet upstream from centerline	*6,119
		Tallman Gulch	Siebert Circle (1st crossing) 75 feet upstream from centerline	*5,893
			Unnamed Road 25 feet upstream from centerline	*5,968
		Bayou Gulch	Confluence with Cherry Creek 50 feet upstream from centerline	*5,997
			State Highway 83, 150 feet upstream from centerline	*6,024
			Dirt Road 100 feet upstream from centerline	*6,205
		South Platte River	State Highway 67, 50 feet upstream from centerline	*6,388
			County Road 126, 40 feet upstream from centerline	*6,400
		Horse Creek	Dirt Road 75 feet upstream from centerline	*6,406
		West Creek	Dirt Road 15 feet upstream from centerline	*7,414
			Unnamed Road (2nd crossing) 25 feet upstream from centerline	*7,460
			National Forest Access Road Number 200, 25 feet upstream from centerline.	*7,482
	Maps available at Planning and Zoning Department, 355 South Wilcox Street, Castle Rock, Colorado.			
Delaware	Ocean View, Town, Sussex County [Docket No. FEMA-5738].	Indian River Bay	All areas between Assawoman Canal and Route 26, adjacent to White Creek and White Creek Ditch.	*6
	Maps available at the Town Hall, Ocean View, Delaware.			
Florida	City of Orlando, Orange County [FI-5673].	Lake Winyah	Entire Shoreline	*75
		Lake Estelle	Entire Shoreline	*75
		Lake Rowena	Entire Shoreline	*75
		Lake Formosa	Entire Shoreline	*75
		Lake Ivanhoe	Entire Shoreline	*81
		Lake Highland	Entire Shoreline	*81
		Park Lake	Intersection of Park Lake Court and Park Lake Circle	*96
		Lake Dot	Entire Shoreline	*95
		Lake Eola	Entire Shoreline	*91
		Lake Lucerne	Entire Shoreline	*89
		Lake of the Woods	Entire Shoreline	*80
		Lake Copeland	Entire Shoreline	*80
		Lake Beauty	Entire Shoreline	*95
		Lake Lurna	Entire Shoreline	*93
		Lake Cherokee	Intersection of Cherokee Dr. and Osceola Ave.	*75
		Lake Davis	Intersection of Cherokee Dr. and Davis Dr.	*75
		Lake Lancaster	Entire Shoreline	*75
		Lake Olive	Entire Shoreline	*77
		Lake Lawsona	Entire Shoreline	*76
		Lake Weldona	Entire Shoreline	*76
		Lake Greenwood	Entire Shoreline	*76
		Fern Creek	Just downstream of South St.	*76
			Just downstream of Livingston Ave.	*98
		Lake Como	Entire Shoreline	*102
		Lake Baldwin	Entire Shoreline	*95
		Lake Susannah	Entire Shoreline	*99
		Lake Barton	Entire Shoreline	*96
		Lake Theresa	Entire Shoreline	*113
		Lake Underhill	Entire Shoreline	*102
		Lake Arnold	Entire Shoreline	*100
		Lake Giles	Entire Shoreline	*107
		Lake Rabama	Entire Shoreline	*111
		Pineloch Lake	Entire Shoreline	*96
		Turkey Lake	Entire Shoreline	*98
		Clear Lake	Entire Shoreline	*97
		Shingle Creek	Just upstream of Conroy Road	*97
			Just downstream of the Northern corporate limits	*98
		Sunset Lake	Entire Shoreline	*99
		Lake Beardall	Intersection of Colyer St. and Rio Grande Ave.	*100
		Lake Lorna Doone	Entire Shoreline	*102
		Lake Concord	Entire Shoreline	*81
		Lake Adair	Entire Shoreline	*82
		Spring Lake	Entire Shoreline	*92
		Lake Fairhope	Entire Shoreline	*96
		Lawne Lake	Entire Shoreline	*90
		Lake Orlando	Intersection of Lake Orlando Parkway and Rosamond Dr.	*90
		Lake Fairview	Entire Shoreline	*91
		Bay Lake	Entire Shoreline	*95
		Lake Mann	Entire Shoreline	*95
		Lake Walter	Entire Shoreline	*97
	Maps available at City Hall, 400 South Orange Avenue, Orlando, Florida 32801.			
Florida	City of Palm Bay, Brevard County [FI-5507].	Turkey Creek	Just upstream of U.S. HW 1	*7
			Approximately 200 feet upstream of Port Malabar Blvd	*15
			Just upstream of Interstate 95	*21

Final Base (100-year) Flood Elevations—Continued

State	City/town/county	Source of flooding	Location	#Depth in feet above ground. *Elevation in feet (NGVD)
		Turkey Run	Just upstream of Troutman Boulevard	*13
			Approximately 800 feet upstream of Knecht-Road	*18
		Indian River	Port Malabar Boulevard (extended)	7
		Channel C	Approximately 250 feet east of the intersection of Port Malabar Boulevard and Pebble Beech Avenue.	*24
		St. John River	Krassner Drive	*24
			Garvey Road	*24
Maps available at Building Department, City Hall, 175 N.W., Palm Bay Road, Palm Bay, Florida 32905.				
Idaho	Caldwell Canyon County [Docket No FEMA-5748].	Boise River	Intersection of West Belmont Street and Riverside Canal	*2,351
			Intersection of West Elgin Street and Boise Avenue	*2,353
			Intersection of West Galveston Street and Boise Avenue	*2,354
			Intersection of river and West Plymouth Street	*2,361
		Indian Creek	Intersection of creek and Sewer Plant Road	*2,349
			Intersection of creek and Riverside Canal	*2,352
			25 feet upstream from center of Stock Bridge	*2,377
			30 feet downstream from center of Elm Lane	*2,393
			Intersection of creek and Ustick Road	*2,411
Maps available at City Hall, 704 Blaine Street, Caldwell, Idaho.				
Idaho	Middleton (City) Canyon County [Docket No. FEMA-5738].	Boise River	400 feet upstream from confluence with Willow Creek	*2,382
			120 feet upstream from confluence with Mill Creek	*2,384
		Willow Creek	70 feet upstream from center of State Highway 44 (Main Street)	*2,401
			Intersection of Concord Street and Elderberry Drive	*2,411
			Intersection of 8th Street North and Hawthorne Drive	*2,413
Maps available at City Hall, 15 North Dewey, Middleton, Idaho.				
Illinois	Countryside (City) Cook County [Docket No. FEMA-5748].	Peck Avenue Ditch	Intersection of 55th Place and Peck Avenue	*676
			Intersection of Peck Avenue and Plainfield Road	*677
		East Avenue Ditch	Intersection of East Avenue and 57th Street	*648
			Intersection of Lorraine Drive and Rose Court	*648
			East side of intersection of LaGrange Road and 59th Street	*649
		East Avenue Ditch Tributary	South edge of 57th Street approximately 550 feet east from its intersection with LaGrange Road.	*648
		67th Street Ditch	30 feet downstream from center of Brainard Avenue	*658
			25 feet upstream from center of Sunset Avenue	*674
Maps available at City Hall, 5550 East Avenue, Countryside, Illinois.				
Kentucky	Daviess County Unincorporated Areas [Docket No. FEMA 5701].	Ohio River	Confluence with Cowhide Slough 4	*386
			Confluence with Yellow Creek 69	*390
		Panther Creek	State Highway 1554 at Curdsville at centerline	*384
			State Highway 56 (Glenn Bridge) at centerline	*385
			Hayden Bridge Road at centerline	*385
			State Highway 81 (Calhoun Bridge) at centerline	*390
		North Fork Panther Creek	U.S. Highway 231—50 feet upstream from centerline	*391
			Old Leitchfield Road 50 feet upstream from centerline	*402
			State Highway 54—150 feet upstream from centerline	*409
			Shorts Station Road at centerline	*412
		Pup Creek	State Highway 405—100 feet upstream from centerline	*391
			Confluence with Roberts Ditch 75	*399
		Persimmon Ditch	Confluence with Tributary of Persimmon Ditch	*402
		Ohio River Tributary	Owensboro Corporate limits, most upstream crossing 200 feet upstream.	*398
		Devins Ditch	State Highway 212—30 feet upstream from centerline	*397
		Carter Ditch	State Highway 212 at centerline	*398
		Scherm Ditch	State Highway 212 at centerline	*398
		Tamarack Ditch	Arlington Drive at centerline	*397
		Goetz Ditch	Todd Bridge Road 30 feet upstream from centerline	*393
			Sheet Flow Area 400 feet north or crossing of State Route 212	#2
		Harsh Ditch	Veach Road, first crossing at centerline	*394
		West Tributary of Harsh Ditch	Louisville and Nashville Railroad at centerline	*394
		Horse Fork	State Highway 212, most downstream crossing 50 feet upstream from centerline.	*394
			Old Hartford Road 50 feet upstream from centerline	*400
Maps are available at Daviess County Courthouse, Daviess County, Owensboro, Kentucky.				
Louisiana	Village of Gilbert, Franklin Parish [FEMA-5738].	Deer Creek	Approximately 400 feet upstream of Louisiana HWY 572	*69
			Just upstream of downstream of corporate limits	*66
Maps available at City Clerk's Office, City Hall, Gilbert, Louisiana 71295.				
Louisiana	Town of Homer, Clairborne Parish [FEMA-5748].	Caney Creek	Approximately 280 feet upstream of Lyons Hill Road	*230
			Approximately 70 feet upstream of U.S. HWY 79	*250
Maps available at City Hall, East Main Street, Homer, Louisiana 71040.				
Louisiana	Town of Rayville, Richland Parish [FEMA-5748].	Little Creek	Approximately 400 feet upstream of the downstream corporate limits	*79
			Just upstream of West Rosa Street	*80
		Little Creek, Tributary	Just downstream of West Francis Street	*79
		Stream No. 2	Approximately 500 feet downstream of State HWY 3048	*79
		Burns Bayou	Approximately 340 feet upstream of U.S. HWY 80	*79
		Burns Bayou, Tributary No. 2	Approximately 200 feet upstream of Linda Street	*78
Maps available at City Hall, P.O. Box 750, Rayville, Louisiana 71269.				

Final Base (100-year) Flood Elevations—Continued

State	City/town/county	Source of flooding	Location	#Depth in feet above ground. *Elevation in feet (NGVD)
Louisiana	Village of Tallulah, Madison Parish [FEMA-5738].	Panola Bayou	Just upstream of Fish Street, extended	* 79
	Maps available at City Clerk's Office, 204 North Cedar, Tallulah, Louisiana 71282.			
Maine	(T) Monmouth Kennebec County [Docket No. FEMA-5702].	Cobbosseecontee Lake	Shoreline	* 170
		Annabessacook Lake	Shoreline	* 173
		Cochnewagon Lake	Shoreline	* 272
		Wilson Pond	Shoreline	* 245
		Sand Pond	Shoreline	* 178
		Woodbury Pond	Shoreline	* 178
	Maps available at Town Office, Monmouth, Maine 04259.			
Maryland	Pocomoke City, Worcester County [Docket No. FEMA-5738].	Pocomoke River	Entire Shoreline	* 6
	Maps available at the City Hall, Pocomoke City, Maryland.			
Michigan	(C) Clio, Genesee County [Docket No. FEMA-5702].	Pine Run	At western corporate limits	* 687
			Just upstream of Chessie System Railroad bridge	* 691
			Just downstream of Center Street	* 692
			Just upstream of Center Street	* 695
			Just upstream of Clio Road	* 696
			Just upstream of Vienna Road	* 696
			Confluence of Mason Drain	* 698
			Approximately 730 feet upstream from the confluence of Mason Drain	* 699
			At eastern corporate limits	* 702
		Mason Drain	At confluence of Pine Run	* 698
			Approximately 1000 feet upstream from confluence of Pine Run	* 699
			Approximately 500 feet downstream from southern corporate limits	* 701
			At southern corporate limits	* 704
	Maps available at City Hall, 200 Griffes Street, Clio, Michigan 48420.			
Minnesota	(C) Medina, Hennepin County [Docket No. FEMA-5702].	Elm Creek	Approximately 105 feet downstream from Highway 55	* 959
			Just upstream from Highway 55	* 959
			Just downstream from State Highway 101	* 962
			Just upstream from State Highway 101	* 964
			Just downstream from Access Road (First Crossing)	* 966
			Just upstream from Access Road (Second Crossing)	* 973
			Just downstream from Soo Line Railroad	* 973
			Just upstream from Soo Line Railroad	* 975
			Approximately 300 feet upstream from Elm Creek Drive	* 977
			Just downstream from upstream crossing of Soo Line Railroad	* 978
		Lake Independence	Shoreline within Medina	* 960
			At mouth	* 961
		Unnamed Tributary	Approximately 250 feet upstream of Lake Shore Avenue	* 961
			Just downstream of Ardmore Street	* 961
		Lake Ardmore	Shoreline within Medina	* 962
	Maps available at City Hall, 2052 County Road 24, Hamel, Minnesota 55340.			
Minnesota	Zumbrota (City), Goodhue County [Docket No. FEMA-5748].	North Fork, Zumbro River	60 feet upstream from center of State Highway 58 (Main Street)	*972
		Bitter Creek	West Avenue 100 feet south from its intersection with 2nd Street	*976
			40 feet upstream from center of 5th Street	*985
			50 feet upstream from center of County Road 10	*1014
		Roscoe Creek	At center of Chicago, Milwaukee, St. Paul, and Pacific Railroad crossing.	*977
	Maps available at City Hall, 55 East 3rd Street, Zumbrota, Minnesota.			
Mississippi	Washington County, Unincorporated Areas [Docket No. FI-4254].	Mississippi River	Intersection of river and Southern Washington County Line	*128
			50 feet upstream from center of U.S. Highway 82	*137
			Intersection of river and Northern Washington County Line	*146
		Main Canal	Mouth of canal at Swan Lake	*108
			50 feet upstream from center of State Highway 438	*114
			50 feet upstream from center of Cedar Lane Farms Road	*118
			50 feet upstream from center of Columbus and Greenville Railroad	*122
			50 feet upstream from center of Metcalfe Road	*126
		Black Bayou	Mouth of Bayou at Swan Lake	*108
			50 feet upstream from center of State Highway 12	*109
			50 feet upstream from center of State Highway 438	*111
			50 feet upstream from center of Wilcox Road	*115
			0.5 miles upstream from center of U.S. Highway 82	*120
			50 feet upstream from center of Old Leland Road (also known as Red Bridge Bayou in this area).	*122
		Ditch No. 6	Intersection of ditch and center of Tate Road	*117
			50 feetupstream from center of Wilcox Road	*119
			50 feet upstream from center of South Main Street	*122
		Bowman Boulevard Ditch	50 feet upstream from center of Anne Stokes Road	*123
	Maps available at Washington County Courthouse, Greenville, Mississippi.			
Nebraska	(C) Fairbury, Jefferson County [Docket No. FEMA-5702].	Little Blue River	About 1.2 miles downstream from confluence of Brawner Creek	*1,292
			Just downstream of State Highway 15	*1,301
			Just upstream of Chicago, Rock Island and Pacific Railroad	*1,306
			Just upstream of Fredrick Street	*1,312
			About 1,500 feet upstream of U.S. Highway 136	*1,323

Final Base (100-year) Flood Elevations—Continued

State	City/town/county	Source of flooding	Location	#Depth in feet above ground. *Elevation in feet (NGVD)
			About 1.2 miles upstream of abandoned Rock Island and Pacific Railroad, at upstream limit of study.	*1,330
		Brawner Creek	At confluence with Little Blue River	*1,299
			About 850 feet downstream of Union Pacific Railroad	*1,300
			Just upstream of Fairgrounds Road	*1,326
			Just downstream of Chicago, Rock Island, and Pacific Railroad	*1,350
			Just upstream of U.S. Highway 136	*1,363
			About 0.60 mile upstream of U.S. Highway 136	*1,367
			Just downstream of County Road	*1,387
			Just upstream of County Road	*1,393
			Just downstream of Soil Conservation Service Dam	*1,400
			Just upstream of Soil Conservation Service Dam	*1,415
			0.68 mile above Soil Conservation Service Dam	*1,416
			Just downstream of County Road (0.82 mile above dam)	*1,419
			Just upstream of County Road (0.88 mile above dam)	*1,427
			At northern extraterritorial limit	*1,443
	Maps available at City Hall, 612 D Street, Fairbury, Nebraska 68352.			
Nebraska	(V) South Bend, Cass County [Docket No. FEMA-5702].	Platte River	1,600 feet upstream of Chicago, Rock Island, and Pacific Railroad	*1,039
			At corporate limits 4,100 feet upstream of Chicago, Rock Island, and Pacific Railroad.	*1,040
			6,500 feet upstream of Chicago, Rock Island, and Pacific Railroad	*1,043
	Maps available at Chairman's home, P.O. Box 222, South Bend, Nebraska 68058.			
New York	Town of Chemung, Cheumug County [Docket No. FEMA-5734].	Chemung River	Downstream Corporate Limits (200 feet downstream of State Route 17 crossing).	*778
			540 feet downstream from confluence of Dry Brook	*787
			Confluence of Wynkoop Creek	*791
			Upstream side of Wynkoop Creek Road crossing	*801
			Upstream side of Conrail crossing	*806
			Upstream side of State Route 17 (final upstream crossing)	*815
			Confluence of Baldwin Creek	*820
		Wynkoop Creek	Confluence with Chemung River	*791
			Upstream side of Conrail crossing	*804
			Upstream side of Old Route 17 crossing	*808
			Upstream side of County Highway 50 crossing	*833
			1st downstream side crossing of Wynkoop Creek Road	*863
			Downstream side of the second downstream crossing of Wynkoop Creek Road.	*880
			Upstream side of Clark Road crossing	*920
		Baldwin Creek	Confluence with Chemung River	*820
			State Route 17 Bridges (upstream side)	*829
			Confluence of Hoffman Hollow	*832
			South of intersection of Lowman Road and Corporate Limits	*845
	Maps available at the Town Hall.			
New York	Village of Scottsville, Monroe County [Docket No. FEMA-5734]	Oatka Creek	Downstream Corporate Limits	*532
			Upstream Corporate Limits	*538
		Mill Race	Confluence with Oatka Creek	*538
			Private Drive Culvert (upstream)	*547
			Approximately 650 feet upstream of Caledonia Avenue	*552
	Maps available at the Village Hall.			
North Carolina	Town of Catawba, Catawba County [FEMA-5738].	Lyle Creek	Just upstream of N.C. 10	*774
		Town Creek	Just upstream of S.R. 1004	*818
			Just upstream of S.R. 1822.	*841
	Maps available at Mayor's Office, Catawba City Hall, Catawba, North Carolina 28609.			
North Carolina	Unincorporated Areas of Catawba County [FEMA-5738].	Lyle Creek	Just upstream of N.C. 10	*775
			Just downstream of I 64, I 70	*788
			Just downstream of SR 1709	*829
			Approximately 1,100 feet downstream of 1441	*936
		McLin Creek	Just downstream of SR 1722	*778
			Just upstream of SR 1731	*868
			Just upstream of SR 1746	*919
		West Tributary, McLin Creek	Approximately 3,400 feet downstream of SR 1736	*915
		Hagan Fork Creek	Just upstream of SR 1727	*813
			Just upstream of N.C. 10	*821
			Just upstream of SR 1806	*861
		Mull Creek	Just upstream of I 40	*860
		Bakers Creek	Just upstream of N.C. 16	*870
			Just upstream of SR 1512	*889
		Conover Creek	Just upstream of SR 1712	*876
		Cline Creek	Just downstream of SR 1164	*870
			Just upstream of U.S. Highway 321, 64, 70	*883
			Just upstream of SR 1488	*900
		Cline Creek, North	Just downstream of SR 1486	*893
		Propst Creek	Approximately 750 feet upstream of SR 1683	*920
			Approximately 200 feet downstream of SR 1492	*1,006
		Herman Branch Creek	Just upstream of SR 1544	*918
			Just downstream of SR 1621	*978
		Clark Creek	Approximately 450 feet upstream of SR 2012	*812
			Approximately 500 feet downstream of SR 201	*824

Final Base (100-year) Flood Elevations—Continued

State	City/town/county	Source of flooding	Location	#Depth in feet above ground. *Elevation in feet (NGVD)
			Just upstream of SR 1165	*861
		Miller Branch Creek	Approximately 150 feet downstream of SR 1478	*894
		Smyre Creek	Approximately 125 feet downstream of SR 1880	*847
		South Fork Catawba River	Just upstream of N.C. 10	*820
		Henry Fork	Just upstream of SR 1144	*833
			Just upstream of SR 1124	*918

		Elk Shoal Creek	Just upstream of SR 1703	*877
			Just upstream of SR 1702	*926
		Dellinger Creek	Just upstream of SR 1702	*961
		Long Creek	Approximately 1,900 feet upstream of the Confluence with McLin Creek.	*869
			Just downstream of the Southern Railway	*945
		Town Branch	Approximately 2,100 feet downstream from SR 1004	*799
		Bills Creek	Just upstream of U.S. Highway 321	*835
		Betts Branch	Just downstream of SR 2012	*812
		Pinch Gut Creek	Approximately 150 feet downstream of SR 1882	*830
			Just downstream of SR 1880	*851
		Maiden Creek	Approximately 200 feet downstream of SR 1867	*880
		Allen Creek	Approximately 200 feet downstream of SR 1867	*880
		Naked Creek	Just upstream of SR 1453	*960
Map available at Planning Office, County Administration Building, Newton, North Carolina 28658.				
North Carolina	City of Conover, Catawba County [FEMA-5738].	Lyle Creek	Just upstream of S.R. 1484 Bridge	*894
			Just upstream of S.R. 1490 Bridge	*905
		Propst Creek	Approximately 25 feet downstream of S.R. 1583 Bridge	*915
		Conover Creek	Approximately 130 feet upstream of I-40 Bridge	*927
			Approximately 100 feet upstream of 7th Street Bridge	*934
			Approximately 75 feet downstream of 5th Street Bridge	*948
		Mull Creek	Approximately 100 feet upstream of SP 1714	*929
Maps available at Conover City Office, 101 First Street West, Conover, North Carolina 28613.				
North Carolina	Long View (Town), Catawba County [Docket No. FI-5275].	Long View Creek	25 feet upstream from centerline of 1st corporate limits	*1,012
			775 feet downstream from centerline of confluence with Long View Creek Tributary Number Two.	*1,030
			60 feet downstream from centerline of U.S. Highways 64 and 70	*1,050
			25 feet upstream from centerline of U.S. Highways 64 and 70	*1,080
			25 feet upstream from centerline of 26th Street S.W.	*1,080
		Frye Creek	40 feet upstream from centerline of 2nd Avenue N.W	*1,052
			150 feet upstream from centerline of 19th Street N.W.	*1,059
			25 feet upstream from centerline of 20th Street N.W.	*1,062
			120 feet downstream from centerline of 23rd Street N.W	*1,065
			20 feet upstream from centerline of 23rd Street N.W.	*1,070
			60 feet upstream from centerline of 27th Street N.W.	*1,085
			20 feet upstream from centerline of 30th Street Place N.W	*1,105
			20 feet upstream from centerline of 33rd Street N.W.	*1,120
		Long View Creek Tributary Two	840 feet upstream from the confluence with Long View Creek	*1,050
Maps available at Town Hall, 139 24th Street, S.W., Hickory, North Carolina.				
North Carolina	Town of Maiden, Catawba County [FEMA-5738].	Maiden Creek	Just upstream of State Road 2007	*805
			Approximately 450 feet upstream of US 321	*812
			Just upstream of State Road 1810	*830
		Allen Creek	Just upstream of State Road 1870 (Extended)	*840
		Clarks Creek	Just upstream of State Road 2007	*804
		Holly Branch	Just upstream of State Road 2005	*818
		Pinch Gut Creek	Approximately 100 feet downstream of Northwestern Railroad	*809
			Approximately 400 feet upstream of US 321	*810
Maps available at Town Manager's Office, Town Hall, 113 W. Main Street, Maiden, North Carolina 28650.				
North Carolina	City of Newton, Catawba County [FEMA-5738].	Clarks Creek	Approximately 250 feet upstream of the Confluence of Smyre Creek	*829
			Just upstream West C Street (NC HWY 10)	*839
			Approximately 270 feet downstream HWY 1149	*849
		Hildebran Creek	Approximately 200 feet upstream of HWY 10	*838
			Approximately 75 feet upstream of SR 1154	*851
			Approximately 100 feet downstream of West 1st Street	*867
			Just upstream of SR 1156	*913
		Smyre Creek	Downstream of HWY 321	*833
			Approximately 140 feet downstream of HWY 1880	*847
		Town Creek	Approximately 30 feet upstream of P Street	*836
			Approximately 200 feet upstream of South Caldwell Avenue	*869
			Just upstream SR 1880	*869
		Snow Hill Branch	Just upstream of HWY 16	*875
			Approximately 50 feet upstream of SR 1736	*901
			At East 11th Street	*936
		McLin Creek	Approximately 170 feet upstream SR 1739	*940
			Approximately 30 feet upstream of Confluence of East Tributary McLin Creek.	*944
Maps available at City Hall, P.O. Box 550, Newton, North Carolina 28658.				
Ohio	(V) Corwin, Warren County [Docket No. FEMA-5702].	Little Miami River Mill Run Channel.	About 960 feet downstream of Corwin Road	*724
			About 1,810 feet upstream of Corwin Road	*724
Maps available at the Village Hall, Corwin, Ohio 75068.				

Final Base (100-year) Flood Elevations—Continued

State	City/town/county	Source of flooding	Location	#Depth in feet above ground. *Elevation in feet (NGVD)
Oregon	Lincoln (County), Unincorporated Areas [Docket No. FEMA-5701].	Pacific Ocean Near Yachats	Area 1,800 feet North from the City of Yachats Northern corporate limits.	*32
			Area 1,800 to 4,600 feet North of City of Yachats corporate limits; West of U.S. Highway 101.	*26

DEPARTMENT OF TRANSPORTATION

Coast Guard

46 CFR Parts 34, 76, 95, 162, 167 and 193

[CGD 76-086a]

Fire Station Hydrants, Hose, and Nozzles; Extension of Compliance

AGENCY: Coast Guard, DOT.

ACTION: Supplemental Final Rule.

SUMMARY: This supplemental final rule modifies the rules published in the **Federal Register** of January 11, 1979 by extending the compliance date for all affected vessels to February 12, 1981. Those rules, which require the affected vessels, with certain exceptions, to have approved combination solid stream and water spray firehose nozzles at all hydrants, were intended to allow the owners and operators of those vessels two years to replace their currently installed straight or "smoothbore" firehose nozzles with approved combination nozzles. The Coast Guard determined that this extended time period is necessary due to the limited supply of Coast Guard approved nozzles available. Compliance date: The Fire Station Hydrant, Hose, and Nozzle regulations (Coast Guard Docket No. CGD 76-086) published in the **Federal Register** of January 11, 1979 (44 FR 2390) must be met on February 12, 1981.

FOR FURTHER INFORMATION CONTACT: Mr. William Boyce, Office of Merchant Marine Safety (G-MMT/13), Room 1300, U.S. Coast Guard Headquarters, 2100 Second St., S.W., Washington, D.C. 20593, (202) 426-2205.

SUPPLEMENTARY INFORMATION: The rules concerning fire station hydrants, hose and nozzles (Coast Guard Docket No. 76-086) published in the **Federal Register** of January 11, 1979 (44 FR 2390) amended the firefighting and fire protection equipment regulations of 46 CFR Chapter I. The amended rules require that, except in special limited cases, only Coast Guard approved combination solid stream and water spray firehose nozzles and low velocity water spray applicators that meet the equipment specification of 46 CFR 162.027 may be on Coast Guard certificated vessels except small passenger vessels. The rules have the effect of prohibiting straight or "smoothbore" fire hose nozzles as installed equipment on all affected vessels, both new and existing. In addition, they require that existing combination nozzles approved under a previous equipment specification be replaced, when no longer serviceable, with nozzles meeting the equipment specification currently in effect.

Recognizing that an overall conversion from "smoothbore" to combination nozzles might exhaust the stocks of approved combination nozzles available from suppliers of such equipment, the Coast Guard intended to allow all affected vessels in existence on the effective date of the regulations two years to comply. As the rules were published, however, the extended compliance date applied only to so-called "grandfathered" vessels, i.e., those with installations contracted for before May 26, 1965 (March 1, 1968, for Oceanographic Vessels).

This supplemental rule making extends the compliance date for all vessels affected by the January 11, 1979 amendments to February 12, 1981. The fire hose nozzle and water spray applicator requirements in the following regulations of 46 CFR Chapter I, in effect before February 12, 1979 apply until February 11, 1981:

For Tank vessels—§ 34.10-10 (e), (n), and (o) and § 34.10-90(a)(7).

For Passenger Vessels—§ 76.10-10 (g) and (j) and § 76.10-90(a)(1).

For Cargo and Miscellaneous Vessels—§ 95.10-10 (g) and (i) and § 95.10-90(a)(1).

For Nautical School Ships—§ 167.45-5(c)(1) and § 167.45-40(c).

For Oceanographic Vessels—§ 193.10-10 (d) and (i) and § 193.10-90(a)(2).

(46 U.S.C. 390b, 481, and 391a; 49 U.S.C. 1655(b)(1); and 49 CFR 1.46(b) and (n)(2))

Dated: March 26, 1980.

Henry H. Bell,

Rear Admiral, U.S. Coast Guard, Chief, Office of Merchant Marine Safety.

[FR Doc. 80-9772 Filed 4-2-80; 8:45 am]

BILLING CODE 4910-14-M

DEPARTMENT OF COMMERCE

Maritime Administration

46 CFR Part 308

War Risk Insurance

AGENCY: Maritime Administration, Department of Commerce.
ACTION: Final rule.

SUMMARY: The authority of the Secretary of Commerce (Secretary) to provide insurance and reinsurance under Title XII, Merchant Marine Act, 1936, (Act), as amended (46 U.S.C. 1281–1293), expired on September 30, 1979. It was reinstated by Pub. L. 96–195 enacted into law on February 25, 1980, and will expire on September 30, 1984. The purpose of these amendments to 46 CFR Part 308 is to provide the terms and conditions upon which war risk insurance interim binders for United States-flag vessels will be reinstated; to change the expiration date of the binder forms; to announce the availability of war risk insurance interim binders for United States-flag vessels, as well as for foreign-flag vessels owned or controlled by United States citizens; and to make editorial changes related to official titles, addresses and references to certain forms used by commercial insurers.

EFFECTIVE DATE: April 3, 1980.

FOR FURTHER INFORMATION CONTACT: Mr. K. H. Green, Director, Office of Marine Insurance, Maritime Administration, Washington, D.C. 20230. Telephone: 202–377–4820

SUPPLEMENTARY INFORMATION: The authority of the Secretary to provide war risk insurance and reinsurance under Title XII of the Act was last reinstated in 1976 by Pub. L. 94–523. Regulations under 46 CFR Part 308 were subsequently amended in two steps to effectuate this authority. By notice of final rulemaking in the **Federal Register** of March 8, 1977 (42 FR 13023), the Maritime Administration published various amendments with respect to war risk coverage for United States-flag vessels. Amendments were also made to implement the statutory expansion of coverage to include certain containers. A notice of proposed rulemaking was published on June 2, 1978 (43 FR 24075), for the purpose of amending the regulations to clarify the eligibility of United States-flag vessels for war risk insurance coverage and to establish the eligibility for certain foreign-flag vessels, consistent with the criteria in section 1203(a) of the Act (46 U.S.C. 1283(a)). Extensive comments were submitted, principally with respect to the eligibility of foreign-flag vessels owned or controlled by United States citizens. After careful agency review of all comments, final regulations were published on November 20, 1978, (43 FR 54090). The amendments to 46 CFR Part 308 now being made are principally of a procedural and technical nature. They include an application procedure for interim binders on foreign-flag vessels owned or controlled by United States citizens. A determination has been made that these amendments are not significant within the meaning of EO 12044 and implementing procedures of the Department of Commerce and Maritime Administration. These amendments will not result in any major economic consequences that would require the preparation of a regulatory analysis.

Accordingly, 46 CFR Part 308 is amended as follows:

1. Section 308.6 is revised to read as follows:

§ 308.6 Period of interim binders and renewal procedures.

(a) All interim binders on United States-flag vessels under § 308.1(a) issued in accordance with Subparts B, C, and D of this part and which expired at midnight, September 30, 1979, are reinstated from April 3, 1980 until midnight, September 30, 1984: *Provided,* That on or before June 2, 1980 the assureds under interim binders on United States-flag vessels comply with the requirements as set forth in paragraph (b) of this section. Failure to comply with such requirements within the prescribed time will result in automatic termination of the binders.

(b) Assureds under interim binders on United States-flag vessels reinstated under paragraph (a) of this section shall file a statement, in triplicate, on the letterhead of the assured, setting forth the former binder numbers, the vessel name and official number (unless the vessel is undocumented), and a list of all documents previously submitted, with a certification as to their completeness and accuracy as of the date of filing for reinstatement. If any previously submitted documents are no longer complete and accurate, as required, assureds shall submit corrected documents. Any required documents not previously submitted shall be attached to the certification and accompany the binder fees, as prescribed in §§ 308.12, 308.202 and/or 308.302. Checks should be made payable to "Maritime Adm.—Commerce" and be sent with the other required documents to the American War Risk Agency, 14 Wall Street, New York, New York 10005, within the prescribed 60-day period.

(c) New applications for interim binders on United States-flag vessels, with necessary attachments (as specified in § 308.3), as well as checks for the binder fees prescribed, shall be filed with the American War Risk Agency at the address shown in paragraph (b) of this section. All interim binders on United States-flag vessels shall become effective as of the date of determination of eligibility by the Maritime Administration (as required).

(d) Applications for interim binders on United States citizen-owned or controlled foreign-flag vessels, together with necessary attachments (as specified in § 308.3) and checks for binder fees prescribed, shall be filed with the Maritime Administration, Attention: Director, Office of Marine Insurance, Washington, D.C. 20230. All interim binders for foreign-flag vessels will become effective on the date the owner's contract of commitment is executed by the Maritime Administration.

§§ 308.7, 308.101, 308.106, 308.107, 308.201, 308.206, 308.207, 308.301 and 308.305 [Amended]

2. Sections 308.7; 308.101; 308.106; 308.107; 308.201; 308.206; 308.207; 308.301, and 308.305 are amended by revising each reference to "American Institute Hull War Risks and Strikes Clauses" to read: "American Institute Hull War Risks and Strikes Clauses (Including Automatic Termination and Cancellation Provisions) for Attachment to American Institute Hull Clauses, December 1, 1977".

§§ 308.106, 308.206 and 308.305 [Amended]

3. Sections 308.106; 308.206, and 308.305 are amended by changing the expiration date of the interim binders to "September 30, 1984".

§ 308.509 [Amended]

4. Section 308.509(b) is amended by changing the second sentence in that paragraph to read as follows:

* * * * *

(b) * * * "Upon receipt of the deposit, the underwriting agent shall assign a serial number to it and transmit it to the Maritime Administration, Attention: Director, Office of Financial Management, Washington, D.C. 20230."

§ 308.510 [Amended]

5. Section 308.510(b) is amended by changing the third sentence of that paragraph to read as follows:

* * * * *

(b) * * * "Upon receipt of the surety bond, the underwriting agent shall assign a serial number to it and transmit it to the Maritime Administration, Attention: Director, Office of Financial Management, Washington, D.C. 20230."

§ 308.522 [Amended]

6. Section 308.522 is amended by changing the receipt section at the bottom of the form of transmittal letter to read as follows:

"Received on ———— (date), and collateral sent by registered mail to the Maritime Administration, Attention: Director, Office of Financial Management, Washington, D.C. 20230".

§ 308.528 [Amended]

7. Section 308.528 is amended by changing the Post Office Zip Code number in Section 2 of the fifth (5th) paragraph of the form of Surety Bond A to "20230".

§ 308.529 [Amended]

8. Section 308.529 is amended by changing the Post Office Zip Code number in Section 2 of the fifth (5th) paragraph of the form of Surety Bond B to "20230".

§ 308.549 [Amended]

9. Section 308.549 is amended by changing the addressee in the form of application letter for appointment of cargo underwriting agent to "Assistant Secretary for Maritime Affairs, Maritime Administration, Washington, D.C. 20230".

§ 308.553 [Revised]

10. Section 308.553 is revised to read as follows:

"All interim binders heretofore issued and now in effect shall be deemed to have been amended, effective as of the date of issuance or as of noon, eastern standard time, April 3, 1980, whichever is the later date to conform with the standard forms of binders prescribed in §§ 308.106; 308.206, and 308.305, as amended".

(Secs. 204(b), 1201–1214, Merchant Marine Act, 1936, as amended (46 U.S.C. 1114(b), 1281–1294); Reorganization Plans No. 21 of 1950 (64 Stat. 1273), and No. 7 of 1961 (75 Stat. 840), as amended by Pub. L. 91–469 (84 Stat. 1036); and Department of Commerce Organization Order 10–8 (36 FR 19077, July 23, 1973.); Pub. L. 96–195)

Dated: March 27, 1980.

By order of the Assistant Secretary of Commerce for Maritime Affairs, Maritime Administration.

Robert J. Patton, Jr.,

Secretary.

[BMCS Docket No MC–78; Amdt. No. 79–31]

Hours of Service of Drivers; 100-Mile Exemption—Driver's Logs

AGENCY: Federal Highway Administration (FHWA), DOT.

ACTION: Final rule.

SUMMARY: This rule allows an exemption from preparing the driver's log for drivers and motor carriers who operate motor vehicles within a 100-mile radius of the place where the driver reports for work. Those drivers who choose to take advantage of the 100-mile radius exemption must return, within 12 consecutive hours, to the place they report for work each day. Further, certain time records must be maintained. This action will reduce the paperwork burden on the drivers and motor carriers while retaining adequate controls over the hours of service.

EFFECTIVE DATE: May 5, 1980.

FOR FURTHER INFORMATION CONTACT: Mr. Gerald J. Davis, Chief, Development Branch, Regulations Division, Bureau of Motor Carrier Safety, (202) 426–9767, or Mr. Gerald M. Tierney, Motor Carrier and Highway Safety Law Division, Office of the Chief Counsel, (202) 426–0346, Federal Highway Administration, Department of Transportation, 400 Seventh Street, SW., Washington, D.C. 20590. Office hours are from 7:45 a.m. to 4:15 p.m. ET, Monday through Friday.

SUPPLEMENTARY INFORMATION: A Notice of Proposed Rulemaking (NPRM), Docket No. MC–78, Notice No. 77–7, was published in the **Federal Register** on October 13, 1977 (42 FR 55109) to solicit comments regarding a proposed modification of the 50-mile radius exemption from log preparation requirements.

One hundred and twelve responses were filed in reply to the NPRM. Eight respondents opposed the proposal as written. Fifty-eight respondents supported the proposal as written. Thirty respondents submitted conditionally favorable responses predicated on variations of one or more elements of the proposed modification. Sixteen were considered out of the scope of the proposal. Those respondents who submitted conditionally favorable responses objected to particular elements that would require—

1. The drives to prepare a log every day if the driver operates beyond the

proposed 100-mile radius more than one day per month;

2. The driver to return (within 12 hours) to the place the driver reported for work; and

3. Time records related to those exempt operations to be retained at the carrier's principal place of business unless permission is obtained to retain the records at another location.

It is agreed that the one day per month limitation may be overly restrictive. The requirement that the motor carrier prepare and retain true and accurate time records, coupled with the 12-hour limitation, ensures that adequate records are available to determine driver compliance with the hours of service regulations.

Therefore, the proposed exemption is being modified to require log preparation on a daily basis by drivers who operate beyond the 100-mile radius more than one time in any 7 consecutive day period. If a driver operates beyond the 100-mile radius more than one time in any 7 consecutive days, a pattern of operation would be established that would require preparation of a log every day. If a motor carrier demonstrates that the driver will no longer be required to operate beyond the 100-mile radius, the exemption could then be reinstated for that particular driver. This action is in harmony with the present interpretation covering operations beyond the 50-mile radius (42 FR 60078).

Many of the commenters who favored the proposal, in general, objected to the 12-hour limitation. Those commenters indicated that there are certain places such as piers, oil refineries, steel mills, etc., where waiting times of 6–7 hours occur frequently and a driver would not exceed the 10-hour driving rule but because of the delays could exceed the 12-hour limit imposed in the 100-mile exemption rule and on those days not be entitled to the exemption. On the other hand, other commenters pointed out that the 12-hour limitation was fair considering the benefits to be gained by not having to prepare a log.

Another argument raised by certain commenters against the 12-hour limit was that some drivers may now be operating within the 50-mile radius exemption who, under the 100-mile radius exemption, would now have to prepare a log. However, since FHWA is expanding the area of operation four-fold, a limitation is necessary to ensure that the hours of service are not violated. This limitation applies only if one wants to take advantage of the 100-mile log exemption. The exemption does not alter or should not be confused with the present hours of service limitations set forth in Section 395.3 of the Federal Motor Carrier Safety Regulations (FMCSR). It should be clearly understood that once a driver exceeds that 12-hour limitation, the 100-mile exemption would no longer be applicable for that day and the hours of service for that day would have to be recorded on a driver's log.

An opponent of the proposed retention requirement for retaining time records at the motor carrier's principal place of business expressed opposition by stating that: "This would cause a needless duplication (of work) at both the branch and headquarters offices, since in almost all cases the records must be used at the branch office, and that in fact is where the supervisory personnel over the drivers are located. It is precisely these branch operations where the log exemption proposed in this docket would apply the most."

The present 50-mile radius exemption is silent concerning the retention site of accurate time records. The imposition of the proposed record retention requirement would defeat, in part, the purpose of the exemption. Therefore, the 100-mile radius exemption will also be silent concerning the location of required time records. The motor carrier will still be required to retain the time records for a period of 1 year. It should be stressed that, upon request by an authorized representative of the FHWA, the records must be produced.

Two State law enforcement agencies expressed concern about the difficulties foreseen with the adoption of the 100-mile radius exemption. One agency, of one State, which adopted the FMCSR in toto, stated that it will be very difficult to enforce the hours of service regulations on intrastate carriers. It also said that the regulations will be difficult to enforce on many interstate carriers that could operate within the 100-mile radius with little chance of detection. The other State agency contended that the exemption would cause difficulty if the driver did not have possession of a log book when operating beyond the 100-mile radius or when exceeding the 12-hour limitation. The agency recommended that the driver be required to carry a log book, maintained along with other required timekeeping records, for any tour of duty in which the driver could be reasonably expected to exceed 12 consecutive hours or the 100-mile radius.

Abuses of the 100-mile radius limitation are usually detectable by interview and records examination at the inspection site. It is reasonable to believe that both the motor carrier and the driver will know if the possibility exists that the driver will go beyond the 100-mile radius or exceed the 12-hour limitation. It will, therefore, be the responsibility of the driver and the carrier, before the driver is dispatched, to ensure that the driver has possession of a log book if the driver is expected to operate beyond the 100-mile radius or exceed the 12-hour limitation.

There is no difference between enforcing the hours of service regulations with a 50-mile radius exemption from log preparation and enforcing the regulations with a 100-mile radius exemption from log preparation. In the absence of the driver's log and other documentary evidence, an investigating officer has the alternative of investigating at the motor carrier's facility where required documents are retained.

The majority of those responding to the NPRM were in favor of making the 100-mile radius exemption available to casual or intermittent drivers as well as regularly employed drivers. The International Brotherhood of Teamsters (IBT) opposed application of the exemption to casual or intermittent drivers "primarily because of the enforcement difficulties it would present." The IBT continued: "A motor carrier could not know, for example, whether a casual driver had been employed by other carriers as a road driver during the past month, or whether his employment with other carriers would still qualify him for the exemption. * * *"

Making the exemption available to casual or intermittent drivers as well as regularly employed drivers is preferred by the motor carriers. Also, the statement of opposition made by the IBT has merit. It was decided that the exemption will be made available to the casual or intermittent driver. Any casual or intermittent driver will be required by the employing motor carrier to furnish the employing motor carrier a statement of available hours before being dispatched. This statement is expected to be sufficient to ensure compliance with the basic driving limitation if challenged by inspecting authorities. It would be inconsistent with the intent of the regulation to create more mandatory paperwork.

Many of the responses clearly indicated that some people confused the exemption from the preparation of the driver's log with the maximum driving and on-duty time requirements of § 395.3 of the FMCSR. The exemption addressed in this document allows certain drivers to operate a motor vehicle within a 100-mile radius of the place reported for work, within a 12-hour period, without recording changes in duty status during their hours of service on the prescribed driver's log. As

mentioned earlier, the exemption in no way alters the hours of service regulations, or the exemptions thereto, that appear in § 395.3 of the FMCSR.

PART 395—HOURS OF SERVICE OF DRIVERS

Accordingly, 49 CFR 395.8 and 395.9 are amended as follows:

1. By revising § 395.8(t)(1) to read:

§ 395.8 Driver's daily log.

* * * * *

(t) *Exemptions* (1) *100-mile-radius drivers.* A driver is exempt from the requirements of this section if—

(i) The driver does not operate beyond the 100-mile radius of the work reporting location more than one time in any 7 consecutive day period;

(ii) The driver, except a driver salesperson, returns to the work reporting location within 12 hours;

(iii) At least 8 consecutive hours off-duty separate each 12 hours on duty; and

(iv) The motor carrier which employs the driver maintains accurate and true records showing—

(A) The total number of hours the driver is on duty each day;

(B) The time the driver reports for duty each day;

(C) The time the driver is released from duty each day; and

(D) The total on-duty time for the preceding 7 days in accordance with paragraph (r) of this section for drivers used for the first time or intermittently.

* * * * *

2. By revising § 395.9(v)(1) to read:

§ 395.9 Driver's multi-day log.

* * * * *

(v) *Exemptions*—(1) *100-mile-radius drivers.* A driver is exempt from the requirements of this section if—

(i) The driver does not operate beyond the 100-mile radius of the work reporting location more than one time in any 7 consecutive day period;

(ii) The driver, except a driver salesperson, returns to the work reporting location within 12 hours;

(iii) At least 8 consecutive hours off-duty separate each 12 hours on duty; and

(iv) The motor carrier which employs the driver maintains accurate and true records showing—

(A) The total number of hours the driver is on duty each day;

(B) The time the driver reports for duty each day;

(C) The time the driver is released from duty each day; and

(D) The total on-duty time for the preceding 7 days in accordance with paragraph (t) of this section for drivers used for the first time or intermittently.

BILLING CODE 4910-22-M

National Highway Traffic Safety Administration

49 CFR Part 571

[Docket No. 79-14; Notice 02]

Windshield Mounting; Windshield Zone Intrusion

AGENCY: National Highway Traffic Safety Administration (NHTSA).

ACTION: Final rule.

SUMMARY: This notice amends two safety standards, Standard No. 212, *Windshield Mounting*, and Standard No. 219, *Windshield Zone Intrusion*, to limit the maximum unloaded vehicle weight at which vehicles must be tested for compliance with these standards. This action is being taken in response to petitions from the Truck Body and Equipment Association and the National Truck Equipment Association asking the agency to amend the standards to provide relief from some of the test requirements for final-stage manufacturers. Many of these small manufacturers do not have the sophisticated test devices of major vehicle manufacturers. The agency concludes that the weights at which vehicles are tested can be lessened while providing an adequate level of safety for vehicles such as light trucks and while ensuring that compliance with these standards does not increase their aggressivity with respect to smaller vehicles.

EFFECTIVE DATE: Since this amendment relieves a restriction by easing the existing test procedure and will not impose any additional burdens upon any manufacturer, it is effective April 3, 1980.

FOR FURTHER INFORMATION CONTACT: Mr. Willian Smith, Crashworthiness Division, National Highway Traffic Safety Administration, 400 Seventh St. SW., Washington, D.C. 20590 (202-426-2242).

SUPPLEMENTARY INFORMATION: On August 2, 1979, the National Highway Traffic Safety Administration published a notice of proposed rulemaking (44 FR 45426) relating to two safety standards: Standard Nos. 212, *Windshield Mounting*, and 219, *Windshield Zone Intrusion*. That notice proposed two options for amending the test procedures of the standards that were designed to ease the compliance burdens of small final-stage manufacturers.

The agency issued the proposal after learning that final-stage manufacturers were frequently unable to certify certain vehicles in compliance with these two safety standards. The problem arises because of weight and center of gravity restrictions imposed upon the final-stage manufacturer by the incomplete vehicle manufacturer. The final-stage manufacturer typically purchases an incomplete vehicle from an incomplete vehicle manufacturer, usually Ford, General Motors or Chrysler. The incomplete vehicle usually includes the windshield and mounting but does not include any body or work performing equipment. Since the incomplete vehicle manufacturer installs the windshield, it represents to the final-stage manufacturer that the windshield will comply with the two subject safety standards. In making this representation, however, the incomplete vehicle manufacturer states that the representation is contingent on the final-stage manufacturer's adherence to certain restrictions. Any final-stage manufacturer that does not adhere to the restrictions imposed by the incomplete vehicle manufacturer must recertify the vehicle based upon its own information, analysis, or tests. The major restrictions imposed by the incomplete vehicle manufacturers on the final-stage manufacturer involve weight and center of gravity limitations. In many instances, these limitations have made it impossible for final-stage manufacturers either to rely on the incomplete vehicle manufacturer's certification or to complete vehicles on the same chassis that they were accustomed to using (prior to the extension of the two safety standards to these vehicle types). As a result, the final-stage manufacturer is faced either with buying the same chassis as before and recertifying them or with buying more expensive chassis with higher

GVWR's and less stringent weight and center of gravity limitations.

The agency has tried several different ways to alleviate this problem for the final-stage manufacturer. The NHTSA has met with representatives of the major incomplete vehicle manufacturers to encourage them to respond voluntarily by strenthening their windshield structures and reducing the restrictions that they currently impose upon final-stage manufacturers. The agency also discussed the possibility of its mandating these actions by upgrading Standards Nos. 212 and 219. Ford and General Motors indicated that the making of any major changes in these standards could lead to their deciding to discontinue offering chassis for use in the manufacturing of multi-stage vehicles. They said that such chassis were a very small percentage of their light truck sales and that, therefore, they would not consider it worth the cost to them to make any extensive modifications in their vehicles. NHTSA also asked the incomplete vehicle manufacturers to be sure that they have properly certified their existing vehicles and that they are not imposing unnecessarily restrictive limitations upon final-stage manufacturers. To this agency's knowledge, these vehicle manufacturers have neither undertaken any strengthening of their vehicles' windshield structures nor lessened any of their restrictions.

At the same time that the agency was made aware of the final-stage manufacturers' problems of certifying to these standards, the agency was becoming concerned about the possibility that compliance of some light trucks and vans with these standards might have made the vehicles more aggressive with respect to smaller passenger cars that they might impact. According to agency information, if these standards require a substantial strengthening of vehicle frames, the aggressivity of the vehicles is increased. Therefore, as a result of the agency's concern about aggressivity and its desire to address the certification problems of final-stage manufacturers in a manner that would not lead to a cessation of a chassis sales to those manufacturers, the agency issued the August 1979 proposal. The agency hoped that the proposal would allow and encourage incomplete vehicle manufacturers to reduce their weight and center of gravity restrictions, thereby easing or eliminating the compliance test burdens of final-stage manufacturers. The agency believed that this could occur using either option because either would result in vehicles being tested at lower weights. Currently vehicles are tested under both standards at their unloaded vehicle weights plus 300 pounds.

The first option would have required some vehicles whose unloaded vehicle weights exceeded 4,000 pounds to be tested by being impacted with a 4,000 pound moving barrier. The second option proposed by the agency would have required vehicles to be tested at their unloaded vehicle weight up to a maximum unloaded vehicle weight of 5,500 pounds. This option was suggested to the agency by several manufacturers and manufacturer representatives.

Comments on Notice

In response to the agency's notice, nine manufacturers and manufacturer representatives submitted comments. All of the commenters supported some action in response to the problems of final-stage manufacturers. Most of the commenters also suggested that the agency's second alternative solution was more likely to achieve reductions in the restrictions being imposed by incomplete vehicle manufacturers. The first option would have created a new, unproven test procedure, and manufacturers would have been cautious in easing center of gravity or weight restrictions based upon this test procedure. Accordingly, most commenters were not sure that the first option would achieve the desired results. The consensus was, therefore, that the second option should be adopted.

Some manufacturers recommended that both options be permitted allowing the manufacturer to decide how to test its vehicles. The agency does not agree with this recommendation. Not only would it be more difficult and expensive to enforce a standard that has alternative test procedures, but most manufacturers prefer the 5,500 pound weight limit option. The NHTSA concludes that as a result of the comments supporting the 5,500 pound maximum test weight, that this is an acceptable procedure for testing compliance with these two standards. Therefore, the standards are amended to incorporate this procedure.

The major incomplete vehicle manufacturers commenting on the notice suggested that testing vehicles at a maximum weight of 5,500 pounds might provide some immediate relief. None of the major incomplete vehicle manufacturers provided any information concerning how substantial that relief might be. Ford indicated that any relief might be limited.

The agency believes that the incomplete vehicle manufacturers must accept the responsibility for establishing reasonable restrictions upon their incomplete vehicles. The NHTSA has not been provided with sufficient evidence substantiating the statements of the incomplete vehicle manufacturers that their existing restrictions are reasonable. In fact, some evidence indicates that unnecessarily stringent restrictions are being imposed because incomplete vehicle manufacturers do not want to conduct the necessary testing to establish the appropriate weight and center of gravity restrictions. Since this amendment should reduce the severity of the test procedures, the agency concludes that incomplete vehicle manufacturers should immediately review their certification test procedures and reduce the restrictions being passed on to final-stage manufacturers.

Due to changes in the light truck market, there is reason to believe that the incomplete vehicle manufacturers will be more cooperative than when the agency spoke to them before beginning this rulemaking. At that time, light truck sales were still running well. Now that these sales are down, these manufacturers may be more solicitous of the needs of the final-stage manufacturers. If relief is not provided by the incomplete vehicle manufacturers, then the agency will consider taking additional steps, including the upgrading of Standards Nos. 212 and 219 as they apply to all light trucks.

General Motors (GM) questioned one of the agency's rationales for issuing the notice of proposed rulemaking. GM stated that the agency concludes that this action will provide a more appropriate level of safety for the affected vehicles while the initial extension of these standards to the affected vehicles provided, in GM's view, only a slight increase in the level of safety of the vehicles. GM indicates that since the application of these standards to the affected vehicles provided only slight benefits and since this amendment will reduce those benefits, the standards should not apply to light trucks and vans. The agency disagrees with this suggestion.

The agency is currently reviewing the applicability of many of its safety standards to determine whether they ought to be extended to light trucks and other vehicles. Accident data clearly indicate the benefits that have resulted from the implementation of safety standards to cars. The fatality rate for passenger cars has decreased substantially since the implementation of a broad range of safety standards to those vehicles. On the other hand, light

trucks and vans have not had a corresponding reduction in fatality rates over the years. The agency attributes much of this to the fact that many safety standards have not been applied to those vehicles. Since those vehicles are becoming increasingly popular as passenger vehicles, the agency concludes that safety standards must apply to them.

In response to GM's comment that this reduction in the test requirements for Standards Nos. 212 and 219 will remove all benefits derived by having the standards apply to those vehicles, the agency concludes that GM has misinterpreted the effects of this amendment. This amendment will reduce somewhat the compliance test requirements for those light trucks and vans with unloaded vehicle weights in excess of 5,500 pounds. It will not affect light trucks with unloaded vehicle weights below 5,500 pounds. According to agency information, approximately 25 percent of the light trucks have unloaded vehicle weights in excess of 5,500 while the remainder fall below that weight. As a result of weight reduction to improve fuel economy, its is likely that even more light trucks will fall below the 5,500 pound maximum test weight in the future. Therefore, this amendment will have no impact upon most light trucks and vans. In light of the small proportion of light trucks and vans affected by this amendment and considering the potential benefits of applying these standards to all light trucks and vans, the agency declines to adopt GM's suggestion that the standards be made inapplicable to these vehicles.

With respect to GM's question about the appropriate level of safety for light trucks, the agency's statement in the notice of proposed rulemaking was intended to show that the safety of light trucks and vans cannot be viewed without considering the relative safety of lighter vehicles that they may impact. Accordingly, the level of safety that the agency seeks to achieve by this and other safety standards is determined by balancing the interests of the occupants of passenger cars and heavier vehicles.

GM also questioned the agency's statement that vehicle aggressivity may be increased by imposing too severe requirements on these vehicles. GM suggested that no evidence exists that vehicle aggressivity is increased as a result of complying with these standards.

The agency stated in the proposal that it was concerned that compliance with the standards as they now exist might have increased the aggressivity of the vehicles, thereby harming the occupants of passenger cars that are impacted by these larger, more rigid vehicles. The agency is now beginning to examine the full range of vehicle aggressivity problems. The docket for this notice contains a paper recently presented by a member of our staff to the Society of Automotive Engineers on this subject. The agency tentatively concludes, based upon the initial results of our research and analysis, that vehicle aggressivity could be a safety problem and that the agency considers that possibility in issuing its safety standards. The NHTSA notes that Volkswagen applauds the agency's recognition of the vehicle aggressivity factor in safety.

As to GM's argument that compliance with the standards may not have increased vehicle aggressivity, our information on this point came from the manufacturers. The manufacturers indicated that compliance with Standards 212 and 219 requires strengthening the vehicle frame. This makes a vehicle more rigid. Our analysis indicates that making a vehicle more rigid may also make it more aggressive. Therefore, the agency concludes partially on the basis of the manufacturer's information, that compliance with the safety standards as they are written may have increased the aggressivity of the vehicles.

Ford Motor Company suggested that, rather than change these two particular standards, the agency should amend the certification regulation (Part 568) to state that any vehicle that is barrier tested would be required only to comply to an unloaded vehicle weight of 5,500 pounds or less. Ford suggested that this would standardize all of the tests and provide uniformity.

The agency is unable to accept Ford's recommendation for several reasons. First, the certification regulation is an inappropriate place to put a test requirement applicable to several standards. The tests requirements of the standards should be found in each standard. Second, the Ford recommendation would result in a reduction of the level of safety currently imposed by Standard No. 301, *Fuel System Integrity*.

As we stated earlier and in several other notices, the agency is legislatively forbidden to modify Standard No. 301 in a way that would reduce the level of safety now required by that standard. Even without this legislative mandate, the agency would not be likely to relieve the burdens imposed by Standard No. 301. That standard is extremely important for the prevention of fires during crashes. compliance of a vehicle with this standard not only protects the occupants of the vehicle that is in compliance but also protects the occupants of vehicles that it impacts. The agency concludes that the standard now provides a satisfactory level of safety in vehicles, and NHTSA would not be likely to amend it to reduce these safety benefits even if such an amendment were possible.

With respect to fuel system integrity, several manufacturers suggested that the agency had underestimated the impact of that standard upon weight and center of gravity restrictions. These commenters indicated that compliance with that standard requires more than merely adding shielding to the fuel systems of the vehicles. The agency is aware that compliance with that standard in certain instances has imposed restrictions upon manufacturers. Nonetheless, the agency continues to believe that as a result of this amendment, the chassis manufacturers will be able to reduce their weight and center of gravity restrictions while still maintaining the compliance of their vehicles with Standard No. 301.

Chrysler commented that the agency should consider including the new test procedure in Standard No. 204 and all other standards that require barrier testing. The agency has issued a notice on Standard No. 204 (44 FR 68470) stating that it was considering a similar test provision for that standard. The agency also is aware that any barrier test requirement imposed upon vehicles subject to substantial modifications by final-stage manufacturers will create problems for the final-stage manufacturers. Accordingly, the agency will consider the special problems of these manufacturers prior to the issuance of standards that might affect them and will attempt to make the test requirements of the various standards consistent wherever possible.

The agency has reviewed this amendment in accordance with Executive Order 12044 and concludes that it will have no significant economic or other impact. Since the regulation relieves some testing requirements, it may slightly reduce costs associated with some vehicles. Accordingly, the agency concludes that this is not a significant amendment and a regulatory analysis is not required.

In accordance with the foregoing, Volume 49 of the Code of Federal Regulations Part 571 is amended by adding the following sentence to the end of paragraph § 6.1(b) of Standard No. 212 (49 CFR 571.212) and paragraph § 7.7(b) of Standard No. 219 (49 CFR 571.219).

Vehicles are tested to a maximum unloaded vehicle weight of 5,500 pounds.

The authors of this notice are William Smith of the Crashworthiness Division and Roger Tilton of the Office of Chief Counsel.

(Secs. 103, 119, Pub. L. 89-563, 80 Stat. 718 (15 U.S.C. 1392, 1407); delegations of authority at 49 CFR 1.50.)

Issued on March 28, 1980.

BILLING CODE 4910-59-M

DEPARTMENT OF THE INTERIOR

Fish and Wildlife Service

50 CFR Part 26

Opening of Chincoteague National Wildlife Refuge to Public Access, Use and Recreation

AGENCY: United States Fish and Wildlife Service, Department of the Interior.

ACTION: Special Regulation.

SUMMARY: The Director has determined that the opening to public access, use and recreation of Chincoteague National Wildlife Refuge is compatible with the objectives for which the area was established and will provide additional recreational opportunity to the public through a non-consumptive use. This document amends and completely replaces the special regulations governing this use published on page 77168, **Federal Register**, Volume 44, No. 251, Monday, December 31, 1979.

DATES: April 15, 1980 through December 31, 1982.

ADDRESSES: Contact the Refuge Manager at the address and/or telephone number listed below in the body of Special Regulations.

FOR FURTHER INFORMATION CONTACT: Howard N. Larsen, Regional Director, U.S. Fish and Wildlife Service, One Gateway Center, Suite 700, Newton Corner, Massachusetts 02158 (617/965-5100 Ext. 200).

SUPPLEMENTARY INFORMATION: Public access, use and recreation is permitted on Chincoteague National Wildlife Refuge in accordance with 50 CFR 26 and the following Special Regulations. Portions of the refuge which are open to public access, use and recreation are designated by signs and/or shown on maps available from addresses indicated below. No vehicle travel is permitted except on designated roads and trails. Special Regulations applying to Chincoteague Refuge are listed on leaflets available at refuge headquarters and from the Regional Director, U.S. Fish and Wildlife Service, One Gateway Center, Suite 700, Newton Corner, Massachusetts 02158.

The Refuge Recreation Act of 1962 (16 U.S.C. 460k) authorizes the Secretary of the Interior to administer such areas for public recreation as an appropriate incidental or secondary use only to the extent that it is practicable and not inconsistent with the primary objective for which the area was established. In addition, the Refuge Recreation Act requires (1) that any recreational use permitted will not interfere with the primary purpose for which the area was established; and (2) that funds are available for the development, operation, and maintenance of the permitted forms of recreation.

The recreational use authorized by these regulations will not interfere with the primary purpose for which these National Wildlife Refuges were established. This determination is based upon consideration of among other things, the Service's Final Environmental Statement on the Operation of the National Wildlife Refuge System published in November 1976. Funds are available for the administration of the recreational activities permitted by these regulations.

Public entry shall be in accordance with all applicable Federal and State laws and regulations subject to the following special regulations:

§ 26.34 Special regulations; public access, use and recreation; for individual wildlife refuge areas.

Public access, use and recreation is permitted on the Chincoteague National Wildlife Refuge, P. O. Box 62, Chincoteague, Virginia 23336. Contact the Refuge Manager at 804/336-6122. Special Conditions: Entry into the refuge is permitted between the hours of 4:00 AM to 10:00 PM daily from April 1 to November 30 and from one-half hour before sunrise to one-half hour after sunset from December 1 to March 31 for the purposes of sightseeing, nature study, wildlife observation, photography, hiking, beachcombing, kite flying, sunbathing and fishing, including clamming and crabbing, as posted. Swimming and surfing are permitted as posted on the ocean beach. Fishing, kite flying, and possession of glass containers are prohibited within the protected beach areas. The use or possession of metal detectors is not permitted on the refuge. Entry into the refuge by boat is permitted at the designated public use areas at Tom's Cove Hook and the public use area operated by the Town of Chincoteague at Assateague Point. Picnicking and contained fires are permitted at Tom's Cove Hook in designated areas. Open fires by special permit only. All fires must be extinguished by water. Operation of registered motor vehicles and bicycles is permitted on designated access roads, trails, and parking areas. No vehicle may be left on the area during closed hours except by special permit. Motorcycles or mopeds with motor in operation are not permitted on the Wildlife Drive or on other trails designated for foot or bicycle use. The use of mopeds or motorized bicycles shall be governed as follows: as a bicycle when motor is not in operation; as a motorcycle when motor is in operation; the methods of operation, equipment, license and registration requirements shall be the same as those set by the State of Virginia. Riding of horses and other saddle animals is permitted only along the shoulder of the access road to the Coast Guard crossover and thence only within designated areas along the beach. Pets are not permitted on the refuge. Off-road travel by oversand vehicles is permitted only on designated routes within the public use areas at Tom's Cove Hook. Driving so as to cut circles or otherwise needlessly deface the sand dunes or vegetation is prohibited. Speed may not exceed 25 miles per hour. When approaching or passing within 100 feet of a pedestrian or person on horseback, speed must be reduced to 15 miles per hour. Pedestrians and horseback riders always have the right of way. Oversand vehicles may not be used to tow persons on any recreational device over sand, or in the water or air. An annual permit at a fee of $15.00 or a seven-day permit at a fee of $10.00 is required for oversand vehicle use. Such permits are not transferable and shall be displayed as directed by the refuge manager. The annual permit shall be valid from April 15 to April 14 of the following year. All oversand vehicles must conform to applicable State laws having to do with licensing, registering, inspecting and insuring of such vehicles. Motorcycles and mopeds must remain on designated access roads and are not permitted in oversand vehicle areas. All oversand vehicles must carry at all times on the beach, shovel, jack, tow rope or chain, board or similar support for the jack and low pressure tire gauge. No permit will be issued for a vehicle which does not meet the following standards:

On four-wheel-drive vehicles:
Maximum vehicle length—26 feet.
Maximum vehicle width—8 feet.
Minimum ground clearance—7 inches.

Gross vehicle weight rating may not exceed—10,000 lbs.
Maximum number of axles—2.
Maximum number of wheels per axle—2.
Minimum number of wheels—4.

On two-wheel-drive vehicles in addition to the seven items listed above: Minimum width of tire contact on the sand—8 inches each wheel. Tires with regular mud/snow treads are not acceptable. The refuge manager may issue a single trip permit for a vehicle of greater weight or length when such use is not inconsistent with the purposes of the regulations. Forty-two (42) oversand vehicles are permitted in the oversand zone. The refuge manager may temporarily close or limit access to the beach when this level is reached. Special event permits may be issued by the refuge manager. Oversand vehicle permits issued by the National Park Service for operation on the Assateague Island National Seashore will also be honored for operation on the designated oversand vehicle routes within the public use areas at Tom's Cove Hook.

Fishermen who hold special overnight beach-fishing permits may remain on the refuge during closed hours on the dates for which such permit is issued. At least one member of the fishing party must be actively engaged in fishing at all times while on the refuge, under the terms of the permit. Organized youth-group and backpack camping is permitted by advance reservation only. Daily fee for youth group camping is $5.00 per site.

On that portion of the Chincoteague National Wildlife Refuge known as Tom's Cove Hook and described as the area bounded on the north by the wildlife fence adjacent to the main parking lot, on the east and south by the Atlantic Ocean extending to Fishing Point, and on the west by the waters of Tom's Cove to and along the canal in Swan Cove adjacent to the main parking lot, authorized National Park Service personnel may enforce the above regulations utilizing policies, procedures of the Assateague Island National Seashore, or if properly deputized, may utilize policies, procedures and authorities normally associated with law enforcement procedures of the Chincoteague National Wildlife Refuge.

The provisions of this special regulation supplement the regulations which govern public access, use and recreation on wildlife refuge areas generally which are set forth in Title 50, Code of Federal Regulations, Part 26. The public is invited to offer suggestions and comments at any time.

Note.—The Department of the Interior has determined that this document is not a significant rule and does not require a regulatory analysis under Executive Order 12044 and 43 CFR Part 14.

Administrative needs require that the Chincoteague Refuge oversand vehicle regulations and permit requirements be implemented concurrent with those of the National Park Service. It is therefore found impracticable to issue regulations that would be effective 30 days after publication in accordance with Department of the Interior general policy.

David F. Riley,

Acting Regional Director, Fish and Wildlife Service.

BILLING CODE 4310-55-M

Proposed Rules

Federal Register
Vol. 45, No. 66
Thursday, April 3, 1980

This section of the FEDERAL REGISTER contains notices to the public of the proposed issuance of rules and regulations. The purpose of these notices is to give interested persons an opportunity to participate in the rule making prior to the adoption of the final rules.

EXECUTIVE OFFICE OF THE PRESIDENT

Office of Administration

5 CFR Part 2504

Privacy Act of 1974; Proposed Implementation Regulations

AGENCY: Office of Administration, Executive Office of the President.

ACTION: Proposed Rule.

SUMMARY: The following proposed regulations, drafted in accordance with the Privacy Act of 1974 (5 U.S.C. 552a(f)), are hereby offered for public comment. These regulations establish procedures for an individual to determine if the Office of Administration has a record[1] pertaining to them, and to gain access to that record for purposes of review, amendment, and correction.

DATE: Comments are due on or before May 5, 1980.

ADDRESS: Send comments to Sarah T. Kadec, Deputy Director, Office of Administration, Washington, D.C. 20503.

FOR FURTHER INFORMATION CONTACT: Donald Street, Assistant to the Deputy Director, 456–2970.

It is proposed to add the following Part 2504 to Title 5 of CFR.

Sarah T. Kadec,
Deputy Director.

PART 2504—PRIVACY ACT REGULATIONS

Sec.

2504.1 Purpose and scope.
2504.2 Definitions.
2504.3 Annual notice of systems of records maintained by the Office.
2504.4 Determining if an individual is the subject of a record.
2504.5 Granting access to a record.
2504.6 Special procedures for medical records.
2504.7 Granting access when accompanied by another individual.
2504.8 Action on request for access.
2504.9 Identification requirements.
2504.10 Access of others to records about an individual.
2504.11 Access to the accounting of disclosures from records.
2504.12 Denials of access.
2504.13 Requirements for requests to amend records.
2504.14 Action on request to amend a record.
2504.15 Procedures for appeal of determination to deny access to or amendment of records.
2504.16 Appeals process.
2504.17 Fees.
2504.18 Penalties.

Authority.—5 U.S.C 552a.

§ 2504.1 Purpose and scope.

These regulations implement the Privacy Act of 1974, 5 U.S.C. 552a. The regulations apply to all records maintained by the Office of Administration that are contained in a system of records, and that contain information about an individual. The regulations also establish procedures that (a) authorize an individual's access to records maintained about him (or her); (b)limit the access of other persons to those records, and (c) permit an individual to request the amendment or corrections of records about him (or her).

§ 2504.2 Definitions.

For the purposes of this part—

(a) "Office" means the Office of Administration, Executive Office of the President;

(b) "Individual" means a citizen of the United States or an alien lawfully admitted for permanent residence;

(c) "Maintain" means collect, use or distribute;

(d) "Record" means any item, collection or grouping of information about an individual that is maintained by the Office, including but not limited to education, financial transactions, medical history, and criminal or employment history and that contains the individual's name, identifying number, symbol, or other identifiers assigned to the individual, such as a finger or voice print or photograph;

(e) "System of records" means a group of any records controlled by the Office and from which information is retrieved by the name of the individual;

(f) "System manager" means the employee of the Office who is responsible for the maintenance, collection, use or distribution of information contained in a system of records;

(g) "Routine use" means, with respect to the disclosure of a record, the use of that record for a purpose consistent with the purpose for which it was collected;

(h) "Subject individual" means the individual named or discussed in a record or the individual to whom a record otherwise pertains;

(i) "Statistical record" means record in a system of records maintained for statistical research or reporting purposes only and not used in whole or in part in making any determination about an identifiable individual, except as provided by section 8 of Title 13 U.S.C.;

(j) "Agency" means agency as defined in 5 U.S.C. 552(e).

(k) "Work days" as used in calculating the date when response is due does not include Saturdays, Sundays and legal public holidays.

§ 2504.3 Annual notice of systems of records maintained by the office.

(a) The Office will publish in the **Federal Register** an annual notice describing the systems of records the Office maintains. The notices shall include (a) the system name, (b) the system location, (c) the categories of individuals covered by the system, (d) the categories of records in the system, (e) the Office's authority to maintain the system, (f) the routine uses of the system, (g) the Office's policies and practice for maintenance of the system, (h) the system manager, (i) the procedures for notification, access to and correction of records in the system, and (j) the sources of information for the system.

(b) Notices shall also be published, as required by the Privacy Act of 1974, of significant changes in or additions to the Office's systems of records.

§ 2504.4 Determining if an individual is the subject of a record.

(a) Individuals desiring to know if a specific system of records maintained by the Office contains a record pertaining to them should address inquiries to the Deputy Director, Office of Administration, Washington, D.C. 20503.

(b) Inquiries must be in writing and the words "PRIVACY ACT REQUEST" should be printed on both the letter and the envelope. The request letter should contain the complete name and

[1] See the Notices Section of this issue for the systems of records maintained by the Executive Office of the President, the Office of Administration.

identifying number of the pertinent system as published in the annual **Federal Register** notice describing the Office's Systems of Records; the full name and address of the subject individual; a brief description of the nature, time, place and circumstances of the individual's association with the Office; and any other information the individual believes would help the Deputy Director determine whether the information about the individual is included in the system of records. In instances when the information is insufficient to ensure disclosure to the subject individual to whom the record pertains, the Office reserves the right to ask the requestor for additional identifying information.

(c) To the extent possible, the Deputy Director will answer or acknowledge the inquiry within 10 working days of its receipt by the Office. When the response cannot be made within 10 work days, the Deputy Director will provide the requestor with the date when a response may be expected and, whenever possible, the specific reasons for the delay.

§ 2504.5 Granting access to a record.

(a) An individual requesting access to a record about them in a system of records maintained by the Office should submit the request in writing to the Deputy Director. Due to security measures at the Old and New Executive Office Buildings, requests made in person can only be accepted from current Office employees, who should make access requests to the Deputy Director on regularly scheduled work days between 9:00 a.m. and 5:30 p.m.

(b) The request for access should contain the same information set forth in § 2504.4(b) of this part. However, if the request for access follows a request made under §§ 2504.4 (a) and (b) of this part, the same identifying information need not be included, PROVIDED THAT a copy of the prior request or a copy of the Office's response to that request is attached. The request should state if a copy of the record is desired.

§ 2504.6 Special procedures for medical records.

(a) When the Deputy director receives a request from an individual for access to those official medical records which belong to the Office of Personnel Management and are described in Chapter 339, Federal Personnel Manual (medical records about entrance qualification or fitness for duty, or medical records which are otherwise filed in the Official Personnel Folder), the pertinent records shall be referred to a Federal Medical Officer for review and determination in accordance with this section. If no Federal Medical Officer is available to make the determination required by this section, the Deputy Director shall refer the request and the medical reports concerned to the Office of Personnel Management for determination.

(b) If, in the opinion of a Federal Medical Officer, medical records requested by the subject individual indicate a condition about which a prudent physician would hesitate to inform a person suffering from such a condition of its exact nature and probable outcome, the Deputy Director shall not release the medical information to the subject individual nor to any person other than a physician designated in writing by the subject individual, his guardian, or conservator.

(c) If, in the opinion of a Federal Medical Officer, the medical information does not indicate the presence of any condition which would cause a prudent physician to hestitate to inform a person suffering from such a condition of its exact nature and probable outcome, the Deputy Director shall release it to the subject individual or to any person, firm, or organization which the individual authorizes in writing to receive it.

§ 2504.7 Granting access when accompanied by another individual.

An individual who wishes to have a person of his choosing review, accompany him (or her) in reviewing, or obtain a copy of a record must, prior to the disclosure, sign a statement authorizing the disclosure of his record. The statement shall be maintained with the record.

§ 2504.8 Action on request for access.

(a) The Deputy Director shall acknowledge requests for access within 10 work days of its receipt by the Office. At a minimum, the acknowledgement shall include:

(1) When and where the records will be available;

(2) The name, title and telephone number of the official who will make the records available;

(3) Whether access will be granted only through providing a copy of the record through the mail, or only by examination of the record in person if the Deputy Director has determined the requestor's access would not be unduly impeded;

(4) Fee, if any, charged for copies. (See § 2504.17 of this part); and

(5) Identification documentation required to verify the identify of the requestor (see § 2504.9 of this part).

2504.9 Identification requirements.

(a) A requestor should be prepared to identify himself (or herself) by signature, i.e., to note by signature the date of access and/or to produce two other legal forms of identification (driver's license, employee identification, annuitant card, passport, etc.).

(b) If an individual is unable to produce adequate identification, the individual shall sign a statement asserting identity and acknowledging that knowingly or willfully seeking or obtaining access to records about another person under false pretenses may result in a fine of up to $5,000 (see § 2504.18). In addition, depending upon the sensitivity of the records, the Deputy Director may require further reasonable assurances, such as statements of other individuals who can attest to the identity of the requestor.

(c) If access is granted by mail, the identity of the requestor shall be verified by comparing signatures. If, in the opinion of the Deputy Director, the granting of access through the mail may result in harm or embarrassment if disclosed to a person other than the subject individual, a notarized statement of identity or some other similar assurance of identity will be required.

§ 2504.10 Access of others to records about an individual.

(a) No official or employee of the Office shall disclose any record to any person or to another agency without the express written consent of the subject individual, unless the disclosure is:

(1) To officers or employees of the Office who need information to perform their official duties;

(2) Under the requirements of the Freedom of Information Act;

(3) For a routine use that has been published in a notice in the **Federal Register**;

(4) To the Bureau of the Census for uses under Title 13 of the United States Code;

(5) To a person or agency who has given the Office advance written notice of the purpose of the request and certification that the record will be used only for statistical purposes. (In addition to deleting personal identifying information from records released for statistical purposes, the Deputy Director shall ensure that the identity of the individual cannot reasonably be deduced by combining various statistical records);

(6) To the National Archives of the United States if a record has sufficient historial or other value to be preserved by the United States Government, or to the Deputy Director (or a designee) to

determine whether the record has that value;

(7) In response to written request, that identifies the record and the purpose of the request, made by another agency or instrumentality of any Government jurisdiction within or under the control of the United States for civil or criminal law enforcement activity, if that activity is authorized by law;

(8) To a person who, showing compelling circumstances, needs the information to prevent harm to the health or safety of an individual, but not necessarily the individual to whom the record pertains (upon such disclosure, a notification shall be sent to the last known address of the subject individual);

(9) To either House of Congress, or to a Congressional committee or subcommittee if the subject matter is within its jurisdiction;

(10) To the Comptroller General, or an authorized representative, to carry out the duties of the General Accounting Office; or

(11) Pursuant to a court order.

§ 2504.11 Access to the accounting of disclosures from records.

(a) Rules governing access to the accounting of disclosures are the same as those granting access to the records.

§ 2504.12 Denials of access.

(a) The Deputy Director may deny an individual access to his (or her) record if:

(1) In the opinion of the Deputy Director, the individual seeking access has not provided sufficient identification documentation to permit access; or

(2) The Office has published rules in the **Federal Register** exempting the pertinent system of records from the access requirement.

(b) If access is denied, the requestor shall be informed of the reasons for denial and the procedures to obtain a review of the denial (see § 2504.15 of this part).

§ 2504.13 Requirements for requests to amend records.

(a) Individuals who desire to correct or amend a record pertaining to them should submit a written request to the Deputy Director, Office of Administration, Washington, D.C., 20500. The words "PRIVACY ACT—REQUEST TO AMEND RECORD" should be written on the letter and the envelope.

(b) The request for amendment or correction of the record must state the exact name of the system of records as published in the **Federal Register**; a precise description of the record proposed for amendment; a brief statement describing the information the requestor believes to be inaccurate or incomplete, and why; and, the amendment or correction desired. If the request to amend the record is the result of the individual's having accessed the record in accordance with §§ 2504.5, 2504.6, 2504.7, and 2504.8 of this part, copies of previous correspondence between the requestor and the Office should be attached, if possible.

(c) Individuals needing assistance in preparing a request to amend a record may contact the Deputy Director at the address cited in paragraph (a) of this section.

(d) If the individual's identity has not been previously verified, the Office may require identification documentation as described in § 2504.9 of this part.

§ 2504.14 Action on request to amend a record.

(a) To the extent possible, a request for amendment of a record will be answered within 10 work days of its receipt by the Office. If a decision cannot be made within this time, the requestor will be informed by mail of the reasons for the delay and the date when a reply can be expected, normally within 30 work days from receipt of the request.

(b) The final response will include the Office's determination of whether to grant or deny the request. If the request is denied, the response will include:

(1) The reasons for the decision;

(2) The name and address of the official to whom an appeal should be directed;

(3) The name and address of the official designated to assist the individual in preparing the appeal;

(4) A description of the appeal process within the Office; and

(5) A description of any other procedures which may be required of the individual in order to process the appeal.

§ 2504.15 Procedures for appeal of determination to deny access to or amendment of records.

(a) Individuals who disagree with the refusal of the Office to grant them access to or to amend a record about them should submit a written request for review to the Deputy Director, Office of Administration, Washington, D.C. 20500. The words "PRIVACY ACT—APPEAL" should be written on the letter and the envelope. Individuals desiring assistance preparing their appeal should contract the Deputy Director.

(b) The appeal letter must be received by the Office within 30 calendar days from the date the requestor received the notice of denial. At a minimum, the appeal letter should identify:

(1) The records involved;

(2) The date of the initial request for access to or amendment of the record;

(3) The date of the Office denial of that request;

(4) The reasons supporting the request for reversal of the Office's decision.

Copies of previous correspondence from the Office denying the request to access or amend the record should also be attached, if possible.

(c) The Office reserves the right to dispose of correspondence concerning the request to access or amend a record if no request for review of the Office's decision is received within 180 days of the decision date. Therefore, a request for review received after 180 days may, at the discretion of the Deputy Director, be treated as an initial request to access or amend a record.

§ 2504.16 Appeals process.

(a) Within 20 work days of receiving the request for review, a review group composed of the Deputy Director, the General Counsel and the Official having operational control over the record, will issue a determination on the appeal, in writing, to the requestor. If a final determination cannot be made in 20 days, the requestor will be informed of the reasons for the delay and the date on which a final decision can be expected. Such extensions are unusual, and should not exceed an additional 30 work days.

(b) If the original request was for access and the initial determination is reversed, the procedures in § 2504.8 of this part will be followed. If the initial determination is upheld, the requestor will be so advised and informed of the right to judicial review pursuant to 5 U.S.C. 552a(g).

(c) If the initial denial of a request to amend a record is reversed, the Office will correct the record as requested and advise the individual of the correction. If the original decision is upheld, the requestor will be so advised and informed in writing of the right to judicial review pursuant to 5 U.S.C. 552a(g). In addition, the requestor will be advised of his (or her) right to file a concise statement of disagreement with the Deputy Director. The statement of disagreement should include an explanation of why the requestor believes the record is inaccurate, irrelevant, untimely or incomplete. The Deputy Director shall maintain the statement of disagreement with the disputed record, and shall include a copy of the statement of disagreement in any disclosure of the record.

Additionally, the Deputy Director shall provide a copy of the statement of disagreement to any person or agency to whom the record has been disclosed, if the disclosure was made pursuant to § 2504.10 (5 U.S.C. 552(a)(c)).

§ 2504.17 Fees.

(a) Individuals will not be charged for:

(1) The search and review of the record;

(2) Any copies produced to make the record available for access;

(3) Copies of the requested record if access can only be accomplished by providing a copy through the mail; and

(4) Copies of three (3) or less pages of a requested record.

(b) Records will be photocopied for 10¢ per page for four pages or more (except for (a), (1), (2), (3), (4) above). If the record is larger than 8½ x 14 inches, the fee will be the cost of reproducing the record through Government or commercial sources.

(c) Fees shall be paid in full prior to issuance of requested copies. Payment shall be by personal check or money order payable to the Treasurer of the United States, and mailed or delivered to the Deputy Director, Office of Administration, Washington, D.C. 20503.

(d) The Deputy Director may waive the fee if:

(1) The requestor is an employee of the Office and copies requested do not exceed 50 pages;

(2) The cost of collecting the fee exceeds the amount collected; and

(3) The production of the copies at no charge is in the best interest of the government.

(e) A receipt will be furnished on request.

§ 2504.18 Penalties.

(a) Title 18, U.S.C. Section 1001, Crimes and Criminal Procedures, makes it a criminal offense, subject to a maximum fine of $10,000 or imprisonment for not more than five years, or both, to knowingly and willfully make or cause to be made any false or fraudulent statements or representation in any matter within the jurisdiction of any agency of the United States. Section (i)(3) of the Privacy Act (5 U.S.C 552a) makes it a misdemeanor, subject to a maximum fine of $5,000 to knowingly and willfully request or obtain any record concerning an individual under false pretenses. Sections (i) (1) and (2) or 5 U.S.C. 552a provide penalties for violations by agency employees of the Privacy Act or regulations established thereunder.

BILLING CODE 3115-01-M

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 71

[Airspace Docket No. 80-AL-3]

Proposed Designation of Alternate Airway

AGENCY: Federal Aviation Administration. (FAA), DOT.

ACTION: Notice of proposed rulemaking.

SUMMARY: This notice proposes to designate a south alternate to V-321 airway between King Salmon, Alaska, and Homer, Alaska, to provide an additional route and a reduction in traffic delays caused by congestion during peak traffic periods.

DATES: Comments must be received on or before May 5, 1980.

ADDRESSES: Send comments on the proposals in triplicate to: Director, FAA Alaska Region, Attention: Chief, Air Traffic Division, Docket No. 80-AL-3, Federal Aviation Administration, P.O. Box 14, 701 C Street, Anchorage, Alaska 99513.

The official docket may be examined at the following location: FAA Office of the Chief Counsel, Rules Docket (AGC-24), Room 916, 800 Independence Avenue, SW., Washington, D.C. 20591.

An informal docket may be examined at the offfice of the Regional Air Traffic Division.

FOR FURTHER INFORMATION CONTACT: Everett L. McKisson, Airspace Regulations Branch (AAT-230), Airspace and Air Traffic Rules Division, Air Traffic Service, Federal Aviation Administration, 800 Independence Avenue, SW., Washington, D.C. 20591; telephone: (202) 426-3715.

Comments Invited

Interested persons may participate in the proposed rulemaking by submitting such written data, views or arguments as they may desire. Communications should identify the airspace docket number and be submitted in triplicate to the Director, Alaska Region, Attention: Chief, Air Traffic Division, Federal Aviation Administration, P.O. Box 14, 701 C Street, Anchorage, Alaska 99513. All communications received on or before May 5, 1980, will be considered before action is taken on the proposed amendment. The proposal contained in this notice may be changed in the light of comments received. All comments submitted will be available, both before and after the closing date for comments, in the Rules Docket for examination by interested persons.

Availability of NPRM

Any person may obtain a copy of this Notice of Proposed Rulemaking (NPRM) by submitting a request to the Federal Aviation Administration, Office of Public Affairs, Attention: Public Information Center, APA-430, 800 Independence Avenue, SW., Washington, D.C. 20591, or by calling (202) 426-8058. Communications must identify the docket number of this NPRM. Persons interested in being placed on a mailing list for future NPRMs should also request a copy of Advisory Circular No. 11-2 which describes the application procedures.

The Proposal

The FAA is considering an amendment to § 71.125 of Part 71 of the Federal Aviation Regulations (14 CFR Part 71) that would add a south alternate to V-321 airway to relieve congestion on a segment of this airway between King Salmon and Homer, Alaska. The proposed action would designate V-321S from King Salmon via the INT of King Salmon 087°T(066°M) and Homer 237°T(213°M) radials. Section 71.125 of Part 71 was republished in the **Federal Register** on January 2, 1980 (45 FR 342).

ICAO Considerations

As part of this proposal relates to the navigable airspace outside the United States, this notice is submitted in consonance with the International Civil Aviation Organization (ICAO) International Standards and Recommended Practices.

Applicability of International Standards and Recommended Practices by the Air Traffic Service, FAA, in areas outside domestic airspace of the United States is governed by Article 12 of, and Annex 11 to, the Convention on International Civil Aviation, which pertains to the establishment of air navigational facilities and services necessary to promoting the safe, orderly, and expeditious flow of civil air traffic. Their purpose is to insure that civil flying on international air routes is carried out under uniform conditions designed to improve the safety and efficiency of air operations.

The International Standards and Recommended Practices in Annex 11 apply in those parts of the airspace under the jurisdiction of a contracting state, derived from ICAO, wherein air traffic services are provided and also whenever a contracting state accepts the responsibility of providing air traffic services over high seas or in airspace of undetermined sovereignty. A contracting state accepting such responsibility may

apply the International Standards and Recommended Practices in a manner consistent with that adopted for airspace under its domestic jurisdiction.

In accordance with Article 3 of the Convention on International Civil Aviation, Chicago, 1944, state aircraft are exempt from the provisions of Annex 11 and its Standards and Recommended Practices. As a contracting state, the United States agreed by Article 3(d) that its state aircraft will be operated in international airspace with due regard for the safety of civil aircraft.

Since this action involves, in part, the designation of navigable airspace outside the United States, the Administrator has consulted with the Secretary of State and the Secretary of Defense in accordance with the provisions of Executive Order 10854.

The Proposed Amendment

Accordingly, pursuant to the authority delegated to me, the Federal Aviation Administration proposes to amend § 71.125 of Part 71 of the Federal Aviation Regulations (14 CFR Part 71) as republished (45 FR 342) as follows:

V–321 title and text is deleted and "V–321 From Cape Newenham, Alaska, NDB via King Salmon, Alaska; to Homer, Alaska, including a south alternate via the INT of King Salmon 087° and Homer 237° radials." is substituted therefor.

(Secs. 307(a), 313(a), and 1110, Federal Aviation Act of 1958 (49 U.S.C. 1348(a), 1354(a), and 1510; Executive Order 10854 (24 FR 9565); sec. 6(c), Department of Transportation Act (49 U.S.C. 1655(c)); and 14 CFR 11.65)

Note.—The FAA has determined that this document involves a regulation which is not significant under Executive Order 12044, as implemented by DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979). Since this regulatory action involves an established body of technical requirements for which frequent and routine amendments are necessary to keep them operationally current and promote safe flight operations, the anticipated impact is so minimal that this action does not warrant preparation of a regulatory evaluation and a comment period of less than 45 days is appropriate.

Issued in Washington, D.C., on March 31, 1980.

B. Keith Potts,

Acting Chief, Airspace and Air Traffic Rules Division.

BILLING CODE 4910–13–M

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

18 CFR Part 2

[Docket No. RM80–42]

Tax Normalization for Certain Items Reflecting Timing Differences in the Recognition of Expenses or Revenues for Ratemaking and Income Tax Purposes

AGENCY: Federal Energy Regulatory Commission.

ACTION: Notice of proposed rulemaking.

SUMMARY: The Commission is proposing to issue a rule permitting a public utility or interstate pipeline making a rate filing under section 205 of the Federal Power Act or under sections 4 or 7 of the Natural Gas Act to use tax normalization to compute the income tax component for its cost of service. If the rate applicant were to make such an election it would be required to use tax normalization for all timing difference transactions except those addressed in prior Commission orders. The proposed rule is not intended to modify existing procedures contained in the Commission's Uniform Systems of Accounts.

DATES: Written comments by June 30, 1980. Public hearings (if warranted) to be announced.

ADDRESS: Office of the Secretary, Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, D.C. 20426. Reference Docket No. RM80–42.

FOR FURTHER INFORMATION CONTACT:
Angela Lancaster, Office of the Chairman, Federal Energy Regulatory Commission, Room 9000, 825 North Capitol Street NE., Washington, D.C. 20426 (202) 357–8333.
Ronald L. Rattey, Office of Regulatory Analysis, Federal Energy Regulatory Commission, Room 3000F, 825 North Capitol Street NE., Washington, D.C. 20426 (202) 357–8186.
Jane E. Phillips, Office of the General Counsel, Federal Energy Regulatory Commission, Room 8104B, 825 North Capitol Street NE., Washington, D.C. 20426 (202) 357–8033.

Issued March 31, 1980.

I. Introduction

The Federal Energy Regulatory Commission (Commission)[1] is proposing to amend Part 2 of its regulations by adding a new § 2.202 as a substantive rule applicable to both the electric utility and natural gas pipeline industries. The rule would permit tax normalization, or interperiod tax allocation, with respect to all miscellaneous transactions (other than those specifically excluded as discussed below) that create "timing differences" in the recognition of expenses or revenues for ratemaking (or book) and income tax purposes. In addition, the proposed rule codifies existing Commission practice with regard to the related cost of service effects for the rate base adjustments resulting from the treatment of accumulated deferred income tax accounts.

This Commission's predecessor, the Federal Power Commission, on various occasions considered the issue of normalizing the effects of certain transactions for which timing differences exist. Order No. 530–B, Docket Nos. R–424 and R–446, issued July 6, 1976,[2] represents the culmination of the last generic normalization proceeding before the FPC. That processing, *inter alia*, addressed the ratemaking implications of normalization and modified the provisions of the Uniform Systems of Accounts in order to establish accounting procedures necessary to achieve tax normalization. The instant proceeding has been initiated in response to the February 16, 1979 remand of the Order No. 530 series of the United States Court of Appeals for the District of Columbia Circuit in *Public Systems, et al.* v. *FERC*, 606 F.2d 973 (D.C. Cir. 1979), rehearing denied March 30, 1979.

II. Scope of Proposed Regulation

Although the proposed regulation is relatively broad in scope, certain items are expressly excluded from consideration. It appears neither appropriate nor necessary to re-evaluate the accounting or ratemaking treatment of those timing difference transactions for which normalization has been prescribed in prior proceedings. To the extent that the Commission's treatment of any of the excluded items has been challenged before the courts, the Commission has been sustained in the exercise of its expert judgment. See discussion of legal history, Section V, *infra*. Moreover, because these timing difference transactions were not addressed in Order No. 530 or its progeny, they are beyond the scope of the Order No. 530–B remand.

[1] The term "Commission" refers to the Federal Power Commission (FPC) with respect to actions taken prior to October 1, 1977, and to the Federal Energy Regulatory Commission with respect to any actions on or after that date.

[2] *See also*, Order Nos. 530 and 530–A, issued June 18, 1975, and January 19, 1976, respectively; Order Denying Rehearing of Order No. 530–B, issued September 3, 1976.

Thus, this rulemaking proceeding *does not* relate to previously established Commission policy concerning normalization of the tax effects associated with the following timing differences:[3]

(1) Differences that result from the use of accelerated depreciation and Class Life Asset Depreciation Range (ADR) tax provisions. (Order No. 404, May 15, 1970; Opinion No. 578, June 3, 1970; and Order No. 504, February 11, 1974.)

(2) Differences that result from the use of accelerated amortization provisions on certified defense and pollution control facilities. (Order Nos. 203, May 29, 1958; 204, May 29, 1958; and 432, April 23, 1971.)

(3) Differences that arise from recognition of extraordinary property losses as a current expense for tax purposes but as a deferred and amortized expense for book purposes. (Order No. 504, February 11, 1974.)

(4) Differences that arise from recognition of research, development, and demonstration expenditures as a current expense for tax purposes but as a deferred and amortized expense for book purposes. (Order Nos. 408, August 26, 1970; 504, February 11, 1974; and 566, June 3, 1977.)

(5) Differences that result from different tax and book reporting of deferred gains or losses from disposition of utility plant. (Order No. 505, February 11, 1974.)

(6) Differences that result from the use of the Asset Guideline Class "Repair Allowance" provision of the Internal Revenue Code of 1954. (Order No. 504, February 11, 1974.)

(7) Differences that result from recognition of purchased gas costs as a current expense for tax purposes but as a deferred expense for book purposes. (Order No. 13, October 18, 1978.)

Another matter which the Commission does not propose to reconsider at this time concerns the accounting provisions established in Order No. 530.[4] The rule currently under advisement may properly be viewed as enunciating a ratemaking rather than an accounting rule. The accounting practices previously set forth have been incorporated in the Commission's Uniform Systems of Accounts and were not directly at issue on judicial review. Moreover, the provisions of the Uniform Systems of Accounts relating to income taxes are designed to accommodate Commission ratemaking practices, whether or not normalization is utilized. Therefore, changes in ratemaking practices that permit normalization would not need to be accompanied by changes in the Uniform Systems of Accounts.

Having thus narrowed the scope of this rulemaking, the Commission is proposing a rule that would generalize the application of normalization to all other (miscellaneous) timing difference transactions. Order No. 530, at 6–7, identified seven examples of miscellaneous timing difference transactions that had not been considered in prior Commission proceedings. While that list contains the major additional items that would qualify for normalization under the current proposal, it should not be construed as exhaustive. In fact, the policy of comprehensive normalization sought to be implemented by this proposal would encompass a wide variety of less significant timing difference transactions.[5] *See* Appendix C for additional examples of timing differences.

The proposed rule as well as this preamble attempt to define the term "timing differences" in such a way as to eliminate any confusion concerning the Commission's intent to permit normalization of tax effects associated with all transactions that fit within the definition. Also in this preamble, we distinguish "permanent difference transactions," noting that normalization is inapposite in the case of permanent differences.

The Commission contemplates a uniform application of normalization to the timing difference transactions encompassed by this proposal. Toward that end, the proposed rule requires that a company electing normalization for the tax effects of any of the miscellaneous items must normalize the tax effects of all other miscellaneous timing difference transactions. This condition is necessary because normalization of certain transactions may initially increase revenue requirements, while normalization of others may have an initial rate reducing effect. The same principles support normalization in either case, and we cannot countenance a selective use of normalization which fails to recognize both positive and negative effects on rates.

III. Purposes of Proposed Rule

The primary purposes of this rulemaking proceeding can be summarized succinctly as follows:

(a) To develop a policy that equitably balances the Commission's obligations to ensure reasonable rates for ratepayers while maintaining the financial integrity of the electric and natural gas industries that is necessary for continued reliable service. In establishing such ratemaking policies, it is clear that the Commission must consider a variety of factors. *See, e.g., FPC* v. *Memphis Light, Gas & Water Division, et al.*, 411 U.S. 458, 465–66, 474 (1973). It is also apparent that the Commission has been vested with broad discretion to exercise its expertise in such matters. *See, id.* at 466–67.

(b) To further develop and explain the policy considerations, rationale and cost implications underlying normalization. This proposal addresses, among other matters, the probable impacts of normalization on factors such as cash flow, external financing requirements, cost of capital considerations, price squeeze concerns, rate stability, and overall rate levels. The device by which much of this information is set forth and evaluated is a recently completed staff report incorporated as part of this proposal and attached as Appendix A.

(c) To respond to certain criticisms of Order No. 530–B and the related orders which the Court of Appeals for the District of Columbia Circuit noted in *Public Systems, supra.*

(d) To eliminate an ongoing controversy and attendant uncertainty regarding the appropriate treatment of timing difference transactions in Commission rate proceedings by establishing a generic rule sanctioning normalization. Apart from other considerations, the resulting administrative efficiency and clarity should benefit consumers, regulated utilities, [6] and the Commission. Although an industry-wide determination proscribing normalization might similarly avoid case-specific controversies or eliminate confusion, our inquiry into the subject suggests that normalization more appropriately comports with sound regulatory principles and with the public interest.

[3] With the exception of item number seven, each of these timing difference transactions was specifically eliminated from consideration in Order No. 530, at 5–6.

[4] These provisions were adopted consistent with accounting practices described in Opinion No. 11 of the Accounting Principles Board of the American Institute of Certified Public Accountants, issued December 1967.

[5] As noted in the Staff analysis that accompanies this proposal (Appendix A), certain of these additional transactions may significantly affect individual companies at particular points in time, although it is unlikely that they would substantially affect industry-wide electric or gas prices.

[6] Unless otherwise indicated, "utility" or "company" refer to both natural gas pipelines and public utilities.

IV. Explanation of Normalization and Flow-Through Ratemaking Policies

The computation of allowable income taxes is an integral facet of any cost of service determination. In order to enable a jurisdictional electric utility or natural gas pipeline company to recover its prudently incurred costs and have an opportunity to earn a fair return on the capital that it has invested for the benefit of its consumers, the Commission must concomitantly consider the Federal, state and local taxes which the company will be required to pay on its earnings. Only by allowing the company to recover such taxes from its ratepayers will the company have the opportunity to realize after-tax earnings at a level which has been determined to be just and reasonable.

The issue of interperiod tax allocation is a subset of the broader question of interperiod cost allocation. In the rate setting process, the Commission invariably must address the question of allocating costs between different periods of time. Taxes, like any other cost of doing business, can be recognized in rates currently or they can be recognized earlier or later than the time at which they are actually incurred. In the final analysis, the Commission must determine whether the interperiod allocation of all costs, including taxes, will produce results compatible with statutory standards.

Under the ratemaking policy known as "flow-through," the tax component of a regulated entity's cost of service is computed so as to reflect the incurrence of expenses and the receipt of revenues consistent with the interperiod cost and revenue allocation policies of the Internal Revenue Service (IRS). "Normalization," on the other hand, conforms the cost of service tax allowance with the associated ratemaking treatment of the underlying expenses and revenues.

The distinction between these two approaches becomes clearer by reference to certain disparities between IRS and Commission policies. Both the IRS and the Commission are bound by statute and by policy to consider a variety of public interest issues in the exercise of their respective responsibilities. However, because the concerns governing the actions of this Commission and those of the IRS do not always coincide, the interperiod allocations of costs and revenues may also differ. If the Commission determines that a current utility expense should not be borne entirely or immediately by current ratepayers, the Commission may require a spreading of the expense over some other time period. However, the IRS may permit the company to recognize the total expense and realize an associated tax deduction in the year of incurrence. [7] When taxing and ratemaking policies diverge in such a manner, a "timing difference" arises.

There are four types of transactions that give rise to timing differences:

1. *Expenses* that are recognized for tax filings in periods *prior to* when they are recognized in rates;
2. *Expenses* that are recognized for tax filings in periods *later than* when they are recognized in rates;
3. *Revenues* that are recognized for tax filings in periods *prior to* when they are recognized in rates; and
4. *Revenues* that are recognized for tax filings in periods *later than* when they are recognized in rates.

The first and fourth types reduce tax liability currently and raise it later. The second and third types raise tax liability currently and reduce it later. In order to avoid confusion, the major focus of our discussion will be on the expense types of timing differences. [8]

The alternative policies of flow-through and normalization have both been advanced as methods for determining an appropriate cost of service tax allowance when there are timing differences. Under the flow-through policy, ratepayers are permitted to realize the tax benefits of expenses (lower tax liability) when those expenses are used as tax deductions by a company. In other words, the entire tax benefit arising from the current deductibility of an expense for IRS purposes is immediately flowed through the company's rates (via its tax allowance) to its customers, despite the fact that the company's rates will recover the related expense in some other period. [9]

Normalization, on the other hand, treats taxes on a deferred or prepaid basis depending upon the ratemaking treatment of the associated expenses. Normalization matches the tax effect of an expense with the ratemaking treatment for recovery of that expense. Normalization acknowledges the timing difference created by divergent IRS and ratemaking treatment of expenses and revenues and establishes a tax allowance that is consistent with the ratemaking treatment of the expenses and revenues. The procedure permits the regulated company to defer certain of its tax deductions for ratemaking purposes until such time as the expenses which produced the deductions are recovered in the company's rates. Conversely, where ratemaking permits the recovery of an expense earlier than the time at which it is deducted for tax purposes (e.g., plant removal costs), the normalized tax allowance reflects the deductibility of the expense in advance of the actual deduction. The result, again, is a matching of the Commission's treatment of taxes with its treatment of the underlying expenses.

While there are a number of expense and revenue items which create timing differences, normalization operates in essentially the same manner for each. In determining the tax component of the cost of service, a deferred tax component equal to the tax effects of timing difference transactions deducted currently for income tax purposes is added to actual taxes payable in that period. Concurrently, deferred taxes associated with timing difference transactions recognized in rates currently but deducted in other periods for income tax purposes are subtracted from actual taxes payable in that period. These two adjustments (which relate only to expense transactions) can be aggregated into a single (net) deferred tax component. Similar adjustments would relate to revenue transactions. The use of such deferred tax debits and credits causes rates to be set at levels approximating what they would be if the interperiod cost and revenue allocation policies of the IRS were conformed to those of the Commission.

In addition, the Commission requires that accumulated deferred taxes be deducted from the company's rate base prior to applying the overall rate of return in the cost of service computation. This companion practice is designed to ensure that the company's stockholders do not earn a return from ratepayers on those assets financed with deferred tax funds.

As discussed above, the proposed regulation sanctions normalization only with respect to timing differences, not permanent differences. In order to

---

[7] A simple example of this situation is the recovery of regulatory commission expenses. Although these costs are deducted for tax purposes in the year of disbursement, the Commission often requires an amortization of regulatory expenses in order to more nearly establish a representative level for rate purposes. The reverse situation is illustrated with the example of plant removal costs for which the Commission allows recovery over a period of time prior to actual incurrence and deduction for tax purposes.

[8] Repetitive explanations can be avoided since revenues can be viewed as negatives of expenses, and the analysis of revenue transactions parallels that of expense transactions. Furthermore, expense transactions are the most prevalent types of transactions addressed by the policies and potentially have the most significant effects on rates.

[9] As discussed in Section VI, *infra*, the actual result of the flow-through policy is to reduce the income tax allowance and rates by an amount greater than the tax effect of a deducted expense.

comprehend the distinction between timing differences and permanent differences, it is necessary to recognize two fundamental characteristics of individual timing differences: (1) the difference between recognition of a transaction for tax purposes and for ratemaking purposes arises in one time period and reverses direction or "turns around" in one or more other periods; and (2) over the life of the transaction (before and after the reversal) the total amounts recognized for tax purposes and for ratemaking purposes are equal. In contrast, permanent differences are not offset by reversals in other periods. Rather, they arise when a different dollar value (including nonrecognition of the transaction) is placed on a particular expense or revenue transaction by the IRS than by the regulatory commission. The result is that the total expense deduction or revenue addition taken for tax purposes over time differs from that recognized in ratemaking.[10] Because no interperiod cost or revenue allocation problem exists in the case of permanent differences, normalization is inappropraite for those transactions.

A final important concept relating to the issue of timing differences and interperiod tax allocation is that of "continual tax deferral." This is associated with the composite effects over time of a combination of timing differences affecting a company. A "continual tax deferral" arises when, over time, the total tax benefit associated with new timing differences equals or exceeds the total value of the reversals occurring from earlier timing differences.[11] As a result, under a normalization policy, a positive balance of accumulated deferred taxes reflecting the collection of more taxes in rates than have been paid by the company could exist into the foreseeable future.

Continual tax deferrals are often referred to by the misnomer "permanent tax savings." This term has the connotation that taxes are not only deferred but are also somehow permanently forgiven. This is inaccurate. Regardless of the number of individual timing differences affecting a given utility, each such timing difference will reverse so that, over the life of the transaction, the total amount of the transaction recognized for ratemaking will equal the total amount recognized for tax purposes. Deferred taxes associated with each timing difference are, in fact, recognized when revenues associated with the transaction are recovered, whether or not the reversals of initial timing differences are replaced by new timing differences of the same or larger magnitude. In addition, as discussed previously, some timing differences (such as those associated with plant removal costs) operate in an opposite manner, so that normalization recognizes tax deductions in the cost of service in advance of IRS recognition of those deductions. Reductions to the accumulated deferred tax accounts associated with this type of timing difference offset, at least in part, the deferred taxes arising from other timing differences. Moreover, and perhaps of greater significance, is the fact that there cannot be a permanence in the deferral of taxes unless there is, concomitantly, a permanence in the deferred recovery of the associated costs. As the staff study notes (Appendix A, Section II.C.), with a tax rate of approximately 50 percent, the associated deferred costs are twice as large as the deferred taxes. It is inconsistent to call continually deferred taxes "permanent tax savings" which should be flowed through to ratepayers and at the same time to maintain rates that continually defer the recovery of the much larger associated expenses.

V. History of the Issue and Standards for Implementation of Commission Policy

In *FPC* v. *Hope Natural Gas Company*, 320 U.S. 591 (1944), the Supreme Court held that there are two aspects of the Commission's authority to assure just and reasonable rates:

1. "To protect consumers against exploitation * * *"[12]

2. To promote the financial interests of the natural gas companies (and, by inference, electric utilities) as measured, not only by revenues sufficient to recover operating expenses and capital costs but also by revenues "* * * sufficient to assure confidence in the financial integrity of the enterprise, so as to maintain credit and to attract capital."[13]

In determining the justness and reasonableness of rates, the Commission utilizes its expertise in selecting from a variety of ratemaking approaches. *FPC* v. *Natural Gas Pipeline Company*, 315 U.S. 575, 586 (1942); *Alabama Tennessee Natural Gas Company* v. *FPC*, 359 F.2d 318, 331 (1966). As discussed below, various courts, including the United States Supreme Court, have recognized the Commission's broad discretion to allow either flow-through or normalization of the tax effects of timing differences. We are unaware of any court decision expressly requiring the Commission to adopt either flow-through or normalization on the basis of any particular factor.

When the FPC first allowed normalization of the tax effects of accelerated depreciation, the United States Court of Appeals upheld the Commission, deferring to the Commission's expertise in the area.[14] Shortly thereafter, when the Commission decided to allow a 1.5 percent rate of return on accumulated deferred taxes, an appellate court upheld the Commission's decision and held that the Commission's discretion was not constrained:

> Since these evaluations are in the expert competence of the Commission, we do not disturb the conclusion derived from them.[15]

In the *Alabama-Tennessee* case,[16] a subsequent Commission (in a three-to-two decision) decided to require the use of flow-through with accelerated depreciation instead of permitting normalization as a previous Commission had done. The Commission relied principally on the "tax deferral"/"tax savings" distinction, finding that normalization would produce "tax savings" for a company's composite plant assuming that plant would remain stable or grow. On appeal, the Commission was affirmed on the basis that there was substantial evidence to support this finding.[17] The appellate court noted that the problem was in a special field that required a regulatory agency's expertise [18] and that the reasonableness of the entire rate structure (not the mechanics used to arrive at the rate structure) was the important issue.[19] Further, the court stated that:

> The Commission must, of course, concern itself with the possibility of having misread the future and with the future's taking a turn without benefit of advice from the Commission. All things change. But we should expect agency policy to be sufficiently flexible to attempt to change with changing times.[20]

A later Commission voted to permit normalization of the tax effects of accelerated depreciation of certain vintage property in *Texas Gas*

[10] As discussed in Appendix A, Section II.A., examples of permanent differences include municipal bond interest and political contributions.

[11] This relates to timing differences arising from expenses that are recognized as tax deductions prior to their collection in rates. For logical completeness there should also be a term, such as "continual tax prepayments," to relate to expenses recognized as tax deductions after they are recovered in rates.

Transmission Corporation,[21] again reversing the position of a prior Commission. The primary ground for its decision was that "there is little chance with respect to this plant that there will be any permanent tax savings." [22] The United States Court of Appeals for the District of Columbia Circuit reversed the Commission's opinion in *Texas Gas,*[23] and the Commission appealed that reversal to the United States Supreme Court. In *FPC* v. *Memphis Light, Gas & Water Division,* 411 U.S. 458 (1973), the Court reversed and remanded the decision of the District of Columbia Circuit and held that the Federal Power Commission in *Texas Gas* had correctly decided that it had—

> The authority to determine whether on particular facts the abandonment of flow-through by a utility within the parameter of the Tax Reform Act of 1969 would be in the public interest as envisaged by the Natural Gas Act, even though it might increase rates.[24]

On remand, the District of Columbia Circuit noted this Supreme Court finding [25] and, on the merits, affirmed the Commission's approval of normalization of the tax effects of accelerated depreciation in the utility's cost of service.[26]

The 530 Series of Orders

In 1975, the Commission issued Order No. 530. The order dealt with the tax effects of certain timing differences that had not been covered by previous Commission orders or opinions. The order promulgated accounting amendments relating to normalization and announced a general ratemaking policy in favor of normalization. With respect to the timing differences covered by the rulemaking, Order No. 530 contemplated that the normalization issue would be decided in individual rate cases. Although the Commission stated that parties to a rate proceeding should make an appropriate factual showing to sustain their claims or counterclaims, it did not specify the nature of the factual showings required. In support of its normalization policy the Commission cited the need of both natural gas companies and electric utilities to attract captial, and the tendency of normalization to increase cash flow, reduce external financing requirements, contribute to financial stability and improve fixed charge coverages.

On rehearing, the Commission stated that the courts had required it to find a "tax deferral" rather than a "permanent tax savings" before it could allow normalization.[27] Order No. 530–A therefore required that, in each individual rate case, a "tax deferral" rather than a "tax savings" would have to be proved by the utility with respect to a class of items before that class could qualify for normalization.

In Order No. 530–B, the Commission reassessed the issue. It determined that while the courts had typically dealt with the normalization/flow-through question in terms of the Commission's own standard of deferral versus savings, they had never held that this distinction required the Commission to adopt either flow-through or normalization. According to the Commission, the only bar to the adoption of normalization was if the particular transaction would cause a permanent difference rather than a timing difference. In view of its freedom to choose between competing accounting methods, and based on the record in Docket Nos. R–424 and R–446 and the policy considerations enunciated in both Order Nos. 530 and 530–B, the Commission ultimately adopted a ratemaking policy permitting normalization of the tax effects of all timing differences between the treatment of items for tax and book purposes. The Commission decided that normalization should be allowed even when accumulated deferred tax balances would grow or remain constant. The Commission also continued the policy of deducting accumulated deferred taxes from rate base.

On petition for review of the 530 series of orders to the District of Columbia Circuit,[28] petitioners contended that the Commission failed to provide a reasonable basis for its action and improperly neglected the anticompetitive consequences of its normalization policy. The court concentrated only on Order No. 530–B. The court held that section 19(b) of the Natural Gas Act imposed the "substantial evidence" standard on informal rulemakings, as well as adjudicatory proceedings.[29] It stated that the Commission's order should "include a reasoned opinion detailing those factual elements in the record that underlie the Commission's actions." [30] Noting that Order No. 530–B "rest[ed] on general policy considerations," [31] the court concluded that the Commission failed to "assess the consequences of its action for the industry" or to "indicate 'fully and carefully' the purposes behind the order." [32]

In its decision the court discussed in detail its view of the areas in which Order No. 530–B failed to meet the appropriate standards:

1. There was no indication of the impact on consumers or utilities of adopting normalization and no statement as to the financial resources at issue.[33]

2. The orders did not specify all of the expenses that would be covered by normalization, giving seven examples instead.

3. Only three of the seven examples were discussed adequately (interest, pension costs, and taxes incurred during construction). The other items received such summary treatment that the court considered the order to contain an "insufficient explanation of the Commission's position for effective review." [34]

4. As to both the items discussed and those that received summary treatment, there was nothing to support the Commission's implicit conclusion that there would be no "tax savings." [35] (The court apparently equated "tax savings" with growing or constant balances in accumulated deferred taxes.)

5. The order failed to explain the goals of the Commission's policy.[36] The only policy goals mentioned by the order would apply to a generic flow-through

[28] *Public Systems, et al.* v. *FERC,* 606 F.2d 973 (D.C. Cir. 1979).

[29] There is presently a conflict between the United States Circuit Courts of Appeal over the specific question of whether the "substantial evidence" test or the "arbitrary and capricious" standard applies to judicial review of rulemakings under the Natural Gas Act. *Compare Superior Oil Company* v. *FPC,* 563 F.2d 191 (5th Cir. 1977) with *Public Systems, et al.* v. *FERC,* 606 F.2d at 973. The dissent in *Public Systems* argued that the substantial evidence standard should not apply to informal rulemaking. The dissenting Judge would have applied the "arbitrary, capricious, [or] abuse of discretion" standard of the Administrative Procedures Act and would have upheld Order No. 530–B. (606 F.2d at 983, Judge Robb dissenting.) However, several courts have indicated that the "arbitrary and capricious" test and the "substantial evidence" test may not, in practical effect, impose a different standard of review for informal rulemakings. *See ECEE* v. *FERC,* No. 79–1171, —— F.2d —— (5th Cir. February 7, 1980, Slip op. at 3019–20, n. 22); *American Public Gas Association* v. *FPC* 567 F.2d 1016, 1028–29 (D.C. Cir. 1977); *Associated Indus. of N.Y. State, Inc.* v. *U.S. Department of Labor,* 487, F.2d 342, 349–50 (2d Cir. 1973).

policy as well as to a normalization policy.

6. No reason or rationale was given for the Commission's decision to decide the price squeeze implications of normalization on a case-by-case basis.

The court remanded Order No. 530–B to the Commission for further action not inconsistent with the court's opinion.

In order to alleviate the uncertainty among presiding law judges and litigants concerning the procedure to be followed in the wake of *Public Systems*, the Commission issued an Order Establishing Interim Procedures in Docket Nos. R–424 and R–446.[37] The Commission stated that the procedures set forth in Order No. 530–B would remain in effect pending further action on the court's remand. There was only one exception to this policy. If the filing utility submitted evidence on the normalization issue, staff and intervenors would be allowed to submit evidence and engage in cross-examination on the issue. Further, the Commission declared that.

> Any final decision which requires a refund of amounts otherwise in excess of the just and reasonable rate level shall not require a refund of that portion of the rate related to interperiod tax allocation. That portion shall continue in effect, subject to refund, pending a final order in these dockets.

The proposed rule reflects the Commission's effort to follow a course that is consistent with legal precedent, including *Public Systems*, as well as with the Commission's own standards for the implementation of ratemaking policy. The Commission has broad discretion in the determination of the appropriate tax treatment for the cost of service of electric utilities and natural gas pipelines. The Commission also possesses the flexibility to employ a procedure, like the informal rulemaking procedure chosen here, that it believes is best suited to effective resolution of the issue of interperiod tax allocation. *See Vermont Yankee Nuclear Power Corporation* v. *Natural Resources Defense Council*, 435 U.S. 519 (1978). Moreover, the Commission has the option of adopting either flow-through or normalization as long as it sufficiently articulates the policy reasons behind the decision and provides support for the factual underpinnings of those policy reasons.

VI. Policy Considerations

Analysis of the Issue

As a general matter, the rationale underlying tax normalization is different from the rationale underlying flow-through. As discussed in an earlier section, this difference between the two policies is most easily seen with an expense that creates a tax deferral.

Under normalization, the tax effect of an expense is recognized in the cost of service in the same time period as the expense itself is recognized in the cost of service. This is the matching principle that is discussed more fully in Section II.A. of the staff study (Appendix A). Taxes are deferred under normalization when the collection of the expense in rates is deferred. The goal of this matching is to achieve equity, or to ensure fairness,[38] by allocating the tax benefit of an expense to the same customers that pay the expense. To do otherwise would permit subsidization of present consumers by future consumers who would be denied the tax benefit associated with the expense at the time that the expense is recovered in their rates.

Underlying the equity argument is the concept of "used and useful" property. Usually, the determination that a piece of equipment or property can be included in rate base rests on whether that equipment is "used and useful" in providing service to existing ratepayers.[39] If current customers are receiving a service from the equipment or property, it is reasonable to require them to pay for the use of this property. The next step is a logical one. If current customers are paying the expenses associated with a given piece of equipment or property, because they are receiving service from it, they also should be receiving the benefits of the tax deductions arising from the associated expenses. Not only is it fair to match the overall use of equipment or property with payment for that use but also it is fair to match the *tax* benefits of expenses for equipment or property with the expenses themselves.

Conversely, if customers are not receiving service from property or equipment because it is not yet "used and useful," the customers should not be charged for the expenses associated with that property or equipment. Since the expenses are incurred currently but cannot be recovered in rates until some time in the future, it is reasonable to withhold from the rate calculation the tax benefit (deduction) associated with those as yet unrecovered expenses. Moreover, the utility must finance the expenses in some manner. By temporarily allowing the utility to realize the current tax benefit, the burden of financing the expenses is lessened. Customers, in effect, provide some of the financing by way of the deferred taxes included in their rates. At the time that the expenses are eventually recovered in rates, the tax benefit of the expenses is also reflected in rates so that the utility "pays back" the tax benefit to the customers at the time the customers are charged the expenses themselves.[40]

The rationale underlying flow-through, on the other hand, is that customers should not be charged more taxes in any one year that the utility actually pays in taxes during that year. The cost of service tax allowance should match the IRS determined tax liability as closely as possible. This is referred to as the "actual taxes paid" doctrine, a theory often invoked to demonstrate that flow-through is cost-based.

The proposed normalization policy is also cost-based but not in the same manner as the flow-through policy. Normalization does not give special treatment to taxes. Under normalization, taxes are allocated over time on a prepayment or deferral basis in a manner similar to other costs. The fact that other costs are not, as a general rule, allocated on an "as paid" basis does not mean that the ratemaking cost of service is not cost-based. Similarly, the fact that normalization does not allocate taxes on an "as paid" basis does not mean that normalization is not

[37] Issued June 8, 1979.

[38] A finding that rates are fair necessitates a proper balancing of the relative claims of the interested parties in a rate proceeding. The determination of fair or equitable rates must be, by its very nature, within the judgment and discretion of the Commission. The courts have recognized the Commission's "recourse to equitable concepts in striving for the reasonableness that broadly identifies the ambit of sound discretion," *City of Chicago* v. *FPC*, 385 F.2d 629, 642 (1967), and the fact that "conceptions of equity . . . may properly be invoked by administrative agencies seeking to achieve 'the necessities of control in an increasingly complex society without sacrifice of fundamental principles of fairness and justice.' " *Id.* at 642–43, *citing Niagara Mohawk Power Corporation* v. *FPC*, 379 F.2d 153, 160 (1967).

[39] The "used and useful" concept is consistent with the Commission's disallowance of construction work in progress (CWIP) in rate base. Nevertheless, in late 1974, when the Commission proposed a rulemaking to include CWIP in rate base because of the severe financial pressure facing the electric utility industry and the extensive construction programs in progress, the Commission, in effect, was proposing to put aside the matching and equity principles. As financial circumstances eased somewhat, the Commission reiterated its policy of AFUDC capitalization rather than inclusion of CWIP in rate base. However, exceptions were made for pollution control and fuel conversion facilities since the incentive given utilities by CWIP inclusion to pursue pollution control and fuel conversion were necessary to meet national goals of greater importance than the regulatory matching and equity principles enunciated here.

[40] An analogy can be drawn between this result and an involuntary "loan" provided by customers to the utility in the form of deferred taxes. Customers are compensated for the "loan" in the form of reduced rates resulting from rate base deduction of accumulated deferred taxes. This analogy is discussed in Appendix A, Section II.B.1.

cost-based. It simply means that taxes, like other costs, may be more properly chargeable to periods other than the periods during which the taxes are actually paid by the utility. Further, just as one can say that the allowance for other costs properly covers the actual expenditures made by a utility over time and no more, so too can one say that the tax allowance, under normalization, covers actual taxes over time and no more. Since there is no inherent difference between tax expenses and other expenses, the Commission believes that it is inconsistent to treat them differently, as the flow-through policy does. In addition, because flow-through allocates the tax benefits of expenses to different periods from those periods to which the expenses themselves are allocated, there is a resulting mismatch that creates inequitable results.

A flow-through policy would distort the Commission's pricing objectives in instances in which the Commission determines that the related expense should be recovered in a different time period. As discussed earlier, the Commission must decide for cost allocation purposes whether an expense should be recovered in rates in the same period, after, or before it is incurred by the utility. For instance, if the Commission has determined that a reasonable allocation for the recovery of a $100 expense incurred in year 1 is $50 in each of years 2 and 3, then rates in year 1 should be unchanged and rates in years 2 and 3 should be increased by $50. This is essentially what occurs under a normalization poilicy. A flow-through tax policy, however, produces a very different result. Because income received in the form of a tax allowance represents additional taxable revenues, rates under a flow-through policy actually would be reduced in year 1 by $100 and increased by $100 in each of years 2 and 3.[41]

An advantage of normalization is that, other things being equal, revenue swings between time periods are likely to be more moderate than under flow-through. Thus, a Commission policy objective of revenue stability can be furthered with the adoption of normalization. The tendency toward stability is demonstrated by the staff study in its discussion of the single transaction case (Appendix A, Section II.B.). As the prior example demonstrated, flow-through lowers rates during the construction period below the rate level that would be required absent construction—but by more than the amount of the tax benefit itself—and raises rates during the operating life of the plant—but by more than the expense recovery. Normalization, on the other hand, affects rates during the construction period only slightly, if at all.

The Commission must often balance the benefits of short-term rate reductions to consumers against the longer term effects of its policies on costs and reliability of service. As indicated by the staff study (Appendix A, Sections II.B.2. and II.D.), normalization produces beneficial effects on cash flow and on the costs of obtaining financial capital. Normalization tends to improve a utility's internal cash flow when the need is greatest and to decrease it when the need it less. Generally, a utility using normalization realizes and is allowed to retain the tax benefits of an expense in the year in which the utility incurs the expense. This lessens the impact of the expense on the utility's cash flow. Conversely, when the expense is recognized and collected in rates and the utility has no actual liability, normalization reduces the amount of the expense actually allowed to be collected by reducing rates to reflect the pass-through of the associated tax benefits to consumers.

Using AFUDC interest as an example, this means that when a utility must expend $100 for this expense, normalization provides $50 of deferred tax debits in rates (assuming a 50 percent tax rate) so that the net impact on the utility's cash out-flow is only $50. When a utility is permitted $100 in rates during a given period to reflect AFUDC interest that it has paid in some prior period(s), normalization reduces the tax allowance by $50 in deferred tax credits so that the net impact on the utility's cash in-flow is only $50.

The financial stability resulting from these effects on cash flow should tend to lower the risks associated with utility investments and thus the costs of capital (*see*, Appendix A, Section II.D.). Further, to the extent that investors view frequent trips to the capital markets as a sign of increased risk, utilities that normalize would be viewed as less risky than flow-through utilities since normalizing utilities, other things being equal, would have lower external capital needs. This also tends to explain the observed lower capital costs to utilities using normalization (*see*, Appendix A, Section II.D.). Since all other costs of service are the same, this lower capital cost means that normalization, over the long-term, should tend to lower the cost of serving customers below flow-through. The lower capital costs and improved cash flow, over time, should also aid a utility in attracting capital and enable a utility to replace and maintain equipment to prevent service deterioration.

In summary, the Commission has proposed tax normalization for the timing differences covered in this proceeding as a matter of general ratemaking policy because it believes that the broad regulatory goals of equitable treatment of ratepayers and investors, long-term cost minimization consistent with service reliability, and cost-based rates can be achieved most successfully by adopting this tax treatment method. In addition, the Commission has reviewed the results of the staff study to determine the industry-wide implications on rates of its proposed rule.

Implications of staff's rate impact analysis

The results of the attached staff impact analysis are important in a number of respects. In addition to providing some indication of the relative magnitude of the impact that the proposed rule has on rates, the staff study provides useful information on some of the issues underlying normalization that are most controversial. For example, various parties opposing the implementation of normalization express concern (explicitly or implicitly) that "continual tax deferrals" necessarily result in continually higher electric or natural gas rates. The staff study demonstrates that this is not necessarily the case since normalized rates may fall below flow-through rates even in the presence of "continual tax deferrals." (*See*, Appendix A and discussion, *infra*.)

Staff's quantitative evaluation covered the types of timing differences addressed in the proposed regulation that, for the majority of the individual utilities, can be expected to have the largest impacts on rates. They are:

1. Differences that result from recognition of the following items as current expenses for tax purposes and as capitalized and amortized expenses for ratemaking purposes:
   (a) The interest component of the Allowance for Funds Used During Construction (AFUDC);
   (b) Construction-related pensions; and
   (c) Construction-related taxes.
2. Differences that result from the use of different depreciation lives for taxes and ratemaking.
3. Differences that result from recognition of regulatory commission cost as a current expense for tax purposes and as an expense amortized over a number of years for ratemaking.

In addition, the study discusses, but does not attempt to quantify, the impact

[41] For a more complete explanation of this result, *see* Appendix A, Section II.B.1.

on rates of applying normalization to "plant removal (or dismantling) costs."[42] The largest impacts arising from this latter item would be for electric utilities with nuclear generating plants and for natural gas pipeline companies with significant offshore facilities. However, with respect to nuclear plants, the appropriate method for decommissioning remains uncertain and the costs associated with the various methods can vary by a factor of ten (*see*, Appendix A, Section III.A.4.). Therefore, any assessment of the effects on rates or normalizing this item would be very speculative.

While there are numerous other items that create timing differences that would qualify for normalization under the proposed rule, they are believed to be relatively insignificant in comparison to the items that were specifically addressed.[43] Nevertheless, the commission is asking responding parties to supply additional estimates of the effects on rates of permitting normalization for any items that the parties believe to cause timing differences. (*See, Comment Procedure*, Section IX, *infra.*)

With respect to the items listed above for which the staff study did quantify impacts, assuming no difference in the cost of capital for flow-through and normalization, the results indicate that electric utility rates, on average, would have risen 3.3 percent and gas pipeline rates 0.2 percent over flow-through rates in 1976[44] had a utility switched from a flow-through policy to a normalization policy. (*See*, Appendix A, Section III.A.3.) For 1980, the maximum impacts are estimated to be about 2.2 percent for electric utilities and 0.1 percent for gas pipelines. These impacts are generally projected to diminish over the next 20 years, with normalized gas pipeline rates falling below flow-through rates during this time span. In the year 2000, normalized rates are projected to be less than flow-through rates in the natural gas pipeline industry and to be a maximum of about 0.9 percent above flow-through rates in the electric utility industry. This differential for electric utilities continues past the year 2000.

The actual dollar impacts (in constant 1980 dollars)[45] of normalization versus flow-through also are set forth in the staff analysis for the base and life depreciation timing differences (items 1 and 2 listed above).[46] In 1976, jurisdictional required revenues for the gas pipeline industry would have been $26 to $32 million higher (depending on the assumed growth rate) under normalization than under flow-through if all pipelines had switched to normalization of the base and life differences. By 1980, the jurisdictional required revenues are estimated to be $18 to $20 million higher under normalization and to be $4 to $6 million higher by 1990. By the year 2000, jurisdictional required revenues for gas pipelines are projected to be $5 to $10 million *less* under normalization than under flow-through. After the year 2000, the trend of lower revenues under normalization increases.

For electric utilities, jurisdictional required revenues would have been $183 to $234 million higher (depending on the growth rates and still in constant 1980 dollars) in 1976 if utilities had switched to normalization from flow-through for the base and life differences. In 1980, the jurisdictional required revenues would be $149 to $183 million higher under normalization than under flow-through, and by the year 2000, normalization rates would be $58 to $148 million higher than flow-through rates. While the highest estimated dollar impact of $234 million in 1976 appears large, as noted earlier it represents only a little over 3 percent differential between normalized and flow-through rates. For the high growth case of 14 percent, the staff analysis projects total (jurisdictional and non-jurisdictional) electric utility revenues to be $85 billion in 1980, of which approximately 10 percent represents jurisdictional revenues.

These projections should be qualified. The assumptions as to growth rates and capital cost, which are highly dependent on inflation rates, must be taken with an increasing degree of skepticism as the projections are taken further into the future.[47] In addition, the above conclusions do not incorporate the differential between the overall cost of capital for normalized firms and for flow-through firms, even though there is evidence that such a differential exists (*see*, Appendix A, Section II.D.). When the staff analysis considers the effects of a minor cost of capital differential, that is, flow-through firms face slightly higher costs of capital than firms that normalize, use of normalization eventually results in electric utility rates lower than under flow-through. In the low-growth case, with a ten basis point differential, normalized rates would drop below flow-through rates in the year 2005. A 30-basis point or more differential would yield a lower average rate under normalization by the year 1990 for the low-growth case. (*See*, Attachment A, Section III.A.3.)

With respect to the high-growth case for electric utilities, normalized rates would fall below flow-through rates by the year 2000 if a 30-basis point or more differential is assumed. With a 40 to 50-basis point differential in the high-growth case, normalized rates would be lower than flow-through rates by the year 1990. (*See*, Attachment A, Section III.A.3.) Nevertheless, even if the cost of capital differential is ignored and the higher indicated rates for normalization in fact occur through or beyond the year 2000, this would not be a reason *per se* to disallow tax normalization. (*See*, discussion of equity, *supra.*)

The Commission does not believe that the other timing difference items covered by the proposed rule would substantially affect the quantitative results. Taken alone, plant removal cost, which is probably the most significant item that was not quantified, could conceivably lower normalized rates as compared to flow-through rates for electric companies with significant nuclear generation capacity and for natural gas pipelines with offshore facilities. However, on an industry-wide, average price basis, the probable effect

[42] This item is a different type of expense item than the interest portion of AFUDC and is prepaid rather than deferred. Tax normalization would at least initially lower rates below flow-through rates for this type of timing difference. (*See*, Appendix A, Section III.A.4.)

[43] Other items not addressed also tend to be of differing magnitudes between firms and overtime. Additional items are listed in Appendix C. The Commission believes that the definition of timing differences in the proposed rule is specific enough so that parties to rate proceedings can readily identify those revenue and expense items that create timing differences for which tax normalization would be permitted. Accordingly, it is unnecessary to specify every single revenue and expense item that might give rise to a timing difference.

[44] The year 1976 was the first year during which utilities had the option of adopting normalization for these items.

[45] The 1980 constant dollar base is derived from data for 1976 inflated by the assumed inflation rates used in the individual cases.

[46] *See*, Appendix A, Section III.A.3. and 4. for a more detailed discussion of the base and life difference dollar impacts for the two industries.

[47] The growth rates set forth in the staff study represent current estimates, and, for the past several years, the estimates of future growth rates in the electric power business have been declining. There is every expectation that, to the extent the estimates are revised over the next few years, these revisions are likely to be in a downward direction. In addition, there is a growing practice on the part of electric utilities of sharing the cost of bulk power supply facilities (such as generating units, parts of generating units or specific transmission facilities) with non-jurisdictional systems previously served at wholesale for resale. To the extent this trend continues, the rate of growth in plant investment of jurisdictional electric utilities will be further reduced. Finally, the cogeneration and small power production program set forth in Sections 201 and 210 of the Public Utility Regulatory Policies Act (PURPA) contains provisions designed to encourage investment in generating facilities by non-jurisdictional entities in lieu of generation by jurisdictional electric utilities. This should have a further depressing effect on the growth rate of plant investment by jurisdictional electric utilities.

is uncertain. Finally, while the overall impact of the other items may be presumed to increase normalized rates as compared to flow-through rates, at least over the short term, the sporadic occurrence of these items mitigates the possibility that these items will have any significant long-term effect on rates.[48]

As we indicated above, staff's statistical results have significance beyond what they indicate will be the impact of the proposed rule on rates. They also show that, under the most plausible future conditions for both gas pipelines and electric utilities, "continual tax deferrals," as defined *supra*, will exist. Whether or not continual tax deferrals exist has been the primary concern of opponents of normalization. Staff's empirical results as well as its analysis of this issue demonstrate that this concern is misdirected and overstated.

First, staff's study shows that, even in the presence of "continual tax deferrals," normalized rates may fall below flow-through rates. This occurs in both the low and high growth cases for natural gas pipelines.[49] The reason for this occurrence is found in the Commission's policy of deducting accumulated deferred taxes from rate base. Over time, as the tax allowance exceeds taxes payable because of deferred taxes, accumulated deferred taxes continue to grow. This, in turn, increases the rate base deduction and lowers the return and tax allowance in the utility's cost of service. For the range of future growth conditions projected in the staff study for the natural gas pipeline industry, the deduction is enough to eventually bring normalized rates below flow-through rates. For the base differences (including the AFUDC interest expense) that the study models, normalized rates fall below flow-through rates in 1990 for both the low and high growth cases. For the life differences, normalized rates drop below flow-through rates in 1998 under both low and high growth assumptions. Even though the normalized rates are lower, there continue to be tax deferrals. Thus, there is no direct relationship between "continual tax deferrals" and higher rates under normalization than under flow-through.

Second, the staff study explains that as long as there is a "continual tax deferral," there is an associated continual (non-tax) cost that the utility cannot yet recover from its customers ("continual non-tax cost deferral"). Furthermore, this "continual non-tax cost deferral," which is financed by investors, is twice as large as the associated "continual tax deferral" (assuming a tax rate of 50 percent). Thus if consumers are concerned about a "continual tax deferral," investors should be doubly concerned about the associated "continual cost deferral."

Of course, it should be emphasized that for each individual expense transaction, cost recovery initially deferred is later permitted, and similarly, taxes deferred are later recognized as an offset to the tax allowance. From this perspective, there is neither a continual cost deferral nor a continual tax deferral.

The comparison between the deferred taxes and the associated deferred costs is also important with regard to the cash flow effects of normalization. As discussed above, an important conclusion of the staff study is that normalization improves the cash flow situation of utilities. In terms of those non-tax costs that are continually deferred, and assuming a 50 percent tax rate, this means that half of those costs are paid for with the additional cash provided to utilities by deferred taxes. In other words, the net drain on the utility's cash flow of the continual cost deferral is essentially halved by allowing utilities to normalize.

A final point with respect to the "continual tax deferral" concern is that utility profits are not higher as a result of deferred taxes. Even if the tax allowance under normalization exceeds the "actual taxes paid," the rate of return realized by shareholders is not increased above that allowed by the Commission. The deferred taxes work, simply, to reduce the investment that must be made in the utility with debt and equity funds from investors. The deferred taxes that are deducted from rate base are effectively treated as a form of ratepayer investment on which ratepayers are compensated (on a tax-free basis) through reduced rates. (*See*, Appendix A, Section II.B.1.)

Conclusion

In summary, evaluation of the relative merits of the two policies leads the Commission to conclude that the normalization policy better achieves the goals of the Commission. While both policies result in rates that are cost-based, the normalization policy more equitably balances the interests of present and future ratepayers by matching the interperiod allocation of tax benefits to the interperiod recovery of expenses. Normalization also achieves this objective by improving utilities' ability to attract capital and maintain cash flow and thereby to provide adequate service reliability over the long term. Normalization does not permit stockholders to realize rates of return higher than those allowed.

Flow-through, while resulting in lower rates, at least initially, imposes higher capital costs for which consumers will be responsible now and in the future. Flow-through cost allocation procedures also distort the Commission's pricing policies and result in rates that are less stable than under normalization.

For the above-stated policy reasons, and after reviewing the estimated effects on the industries and their customers, the Commission is proposing regulations that would permit utilities to use tax normalization for the timing differences identified in the proposed rule.

VII. Relationship Between Normalization and the Potential for Discriminatory Effects

We turn now to a consideration of the most appropriate way in whcih to evaluate any potential for discriminatory effects associated with our proposed normalization rule. The court in *Public Systems, supra,* expressed concern that a disparity between the normalization policies adopted by this Commission vis-a-vis those of state regulatory agencies might subject certain wholesale customers to "price squeezes." The Commission certainly is aware of this possibility and, indeed, it has been acknowledged as a potential area of inquiry.[50] However, for the following reasons we believe that a case-by-case evaluation of price squeeze issues in electric rate cases is the most soundly-conceived administrative practice. Accordingly, the Commission proposes to utilize such an approach in conjunction with the proposed normalization rule.

Price squeeze allegations are *raised* on a case-by-case basis and Section 2.17 of the Commission's regulations provides a mechanism for framing price squeeze issues in individual cases.[51] The Commission is not persuaded that any single ratemaking principle necessarily creates or eliminates the possibility of a price squeeze situation in all cases. The primary elements of a price squeeze—

[48] In this regard we note that the court in *Public Systems* recognized that "precise quantification of all elements of proposed Commission action is not required." (606 F.2d at 981.)

[49] This is also true for electric utilities, assuming a relatively small cost of capital differential. For an expanded discussion of the quantitative results for electric utilities, *see*, Appendix A, Section III.A.3.

[50] *See, e.g.*, Order Denying Rehearing of Order No. 530–B, issued September 3, 1976, at 3.

[51] The Commission's Notice of Proposed Rulemaking in Docket No. RM79–79, issued November 19, 1979, would revise the procedures for consideration of the price squeeze issue in each case in which it is alleged.

non-cost-justified disparity between relevant wholesale and retail rates and resulting anticompetitive effect—may be shown to exist or not to exist only by reference to all of the circumstances extant in a particular rate proceeding. Moreover, even upon a convincing demonstration that a price squeeze exists, the available remedies may differ depending upon the facts adduced in a given case. In *FPC* v. *Conway Corporation*, 426 U.S. 271, 279–80 (1976), the Supreme Court made clear that fashioning an appropriate remedy for price squeeze requires "an examination of the entire 'factual context in which the proposed wholesale rate will function'." (*Citing Conway Corporation* v. *FPC*, 510 F.2d 1264, 1273 (D.C. Cir. 1975).)

The rate effect of normalization of the transactions encompassed by this proposal is but one factor to be considered in the overall cost of service analysis. As with any other cost of service determination, normalization may have the effect of increasing a company's allowable revenue levels. The pertinent question is whether the resulting overall rate (i.e., the "end result") is unjust, unreasonable, unduly discriminatory or otherwise unlawful;[52] this is necessarily a case-specific assessment.

The table attached to this proposal as Appendix B sets forth the most current information available concerning the practices of state regulatory authorities with respect to normalization. Although state commissions differ considerably in their approaches to normalization, the table indicates that approximately 45 states have permitted normalization with respect to one or more timing difference transactions. Insofar as a particular state follows normalization practices similar to those of this Commission, normalization itself cannot be labelled as a cause of price squeeze.

Furthermore, even in instances where state commissions proscribe the use of normalization, we cannot conclude, as a generic matter, that our rule permitting normalization will occasion any undue disparity between relevant wholesale and retail rates. There are many differences between the principles which this Commission utilizes in setting wholesale rates and those which the various states employ in establishing retail rates. Examples include disparate treatment of rate of return, cost allocation formulae, rate base valuation methods, as well as test year selection and adjustments. It is quite conceivable that such divergent policies would have offsetting rate effects that would minimize or eliminate any rate disparity otherwise created by conflicting state-federal normalization practices.[53]

Based upon our considered opinion that Commission decisions on cost of service issues will often reduce proposed wholesale rates to a level at which price squeeze concerns are substantially diminished, if not eliminated, we recently revised our general procedures for considering price squeeze allegations.[54] Subject to discretionary modification by the presiding administrative law judge in a given case, price squeeze proceedings are now phased so that a determination concerning the otherwise just and reasonable rate level will precede an examination of price squeeze allegations. Certainly, where a price squeeze is demonstrated, the impact, if any, of normalization must be considered. However, under the phased procedures which have been initiated, normalization will appropriately be examined along with all other cost of service factors in the particular proceeding. If undue discrimination is found to exist and is caused in whole or in part by differing state-federal treatment or normalization, the Commission may consider the denial of normalization as one of the available remedies for reducing or eliminating the undue discrimination. We believe that any other treatment of normalization as it relates to price squeeze would constitute an artificial and unwarranted isolation or normalization as a ratemaking issue unrelated to other cost of service elements.

VIII. Summary of the Proposed Rule

Proposed § 2.202 permits use of the principles of tax normalization for transactions for which there are timing differences between the amounts of expenses or revenues (relating to those transactions) recognized for income tax purposes and the amounts recognized for ratemaking purposes under the Natural Gas Act or the Federal Power Act. However, those transactions for which the Commission or the FPC has previously articulated a policy of tax normalization are excluded from the scope of the rule.

The general rule in paragraph (b) permits an electric utility or a natural gas pipeline to compute its income tax allowance for its cost of service as if the amounts of expenses or revenues recognized for ratemaking purposes were recognized in the same period for income tax purposes. Thus, tax normalization will be permitted in the periods in which the differences in the amounts recognized first arise and in the periods in which they reverse. Because normalization is optional rather than mandatory, utilities that are required by their state commissions to flow-through for accounting or ratemaking may continue the flow-through practice in their wholesale filings. However, the election affords these utilities the option of using tax normalization for wholesale service alone.

Paragraph (b)(2) states what modifications must be made to rate base when a utility elects to use tax normalization. It codifies existing Commission practice with regard to rate base adjustments for accumulated deferred income tax accounts. Such adjustments are companion practices to tax normalization and relate to Accounts 188, 190 and 281–283 of the Uniform System of Accounts for Electric Utilities and Licensees and to Accounts 188, 190, 191 and 281–283 of the Uniform System of Accounts for Natural Gas Companies.

A utility can only make an election in the context of a rate filing. Although a rate applicant cannot be required to make the initial election (and an intervenor may not use tax normalization to challenge rate filings predicated on flow-through), once it makes such an election it must obtain Commission approval before discontinuing use of tax normalization. This condition is stated in paragraph (c) which also requires that an applicant making an election under § 2.202 apply the principle of tax normalization to all transactions covered by that section, i.e., all timing differences other than those addressed in Orders 203, 204, 408, 432, 404, 504, 505, 566 and 13 and Opinion 578.

The rule further provides that if a timing difference arose in a period prior to the effective date of the election, the rate applicant may only recognize the tax effects of timing differences related to the transaction to the extent that deferred taxes applicable to the transaction have previously been provided for or to the extent that an applicant uses a Commission-approved

[52] *See, FPC* v. *Hope Natural Gas Company*, 320 U.S. 491, 602 (1944) (emphasizing the importance of focusing on the "end result" of various rate determinations).

[53] For instance, any short-term rate-inflating effect that may be ascribed to normalization might be offset, in whole or in part, if this Commission were to authorize a lower rate of return than that allowed in a particular state. The same result might occur with respect to our use of original cost in valuing a company's rate base, as contrasted with the use of reproduction cost or fair value by the state in which a jurisdictional company operates.

[54] *See, e.g., Arkansas Power & Light Company*, Docket No. ER79–339, Order issued August 6, 1979, at 6. *See, also, Price Squeeze-Procedural Rules*, Docket No. RM79–79, Notice of Proposed Rulemaking, issued November 19, 1979.

method for switching from flow-through to normalization for particular timing difference transactions. Thus a rate applicant that had previously used flow-through for a transaction would not be permitted to use tax normalization for that transaction if the timing differences associated with the transaction had already reversed or if no such Commission-approved method was used. However, this prohibition would not prevent the rate applicant from electing tax normalization for all other transactions to which the prohibition did not apply.

The timing differences excluded from the scope of § 2.202 relate to:

(1) Differences that result from the use of accelerated depreciation and Class Life Asset Depreciation Range (ADR) tax provisions of the Internal Revenue Code of 1954;

(2) Differences that result from the use of accelerated amortization provisions on certified defense and pollution control facilities;

(3) Differences that result from recognition of extraordinary property losses as a current expense for income tax purposes but as a deferred and amortized expense for ratemaking purposes;

(4) Differences that arise from recognition of research, development, and demonstration expenditures as a current expense for income tax purposes but as a deferred and amortized expense for ratemaking purposes;

(5) Differences that result from different reporting for income tax purposes and ratemaking purposes of deferred gains or losses from disposition of utility plant;

(6) Differences that result from the use of the Asset Guideline Class "Repair Allowance" provision of the Internal Revenue Code of 1954; and

(7) Differences that result from recognition of purchased gas costs as a current expense for income tax purposes but as a deferred expense for book purposes.

By defining the term "timing differences" in paragraph (d)(2) to exclude those differences which exist, at least in part, because income tax law and the Commission place different dollar values on a transaction (or one does not recognize the transaction), the Commission has also excluded from the tax normalization rule those transactions for which there are "permanent differences."

The Commission's proposed rule on tax normalization will have the force and effect of a substantive rule when issued in final form. It will appear as § 2.202 of a new subpart to Part 2 and will apply to public utilities and interstate pipelines. The proposed rule is not intended to modify existing accounting procedures contained in the Commission's Uniform Systems of Accounts.

IX. Comment Procedure

Interested persons are invited to submit written comments, data, views, or arguments with respect to this proposal. Comments should be submitted to the Secretary, Federal Energy Regulatory Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426 and should reference Docket No. RM80–42. An original and 14 copies should be filed. All comments received prior to 4:30 p.m., E.D.T., June 30, 1980, will be considered by the Commission prior to promulgation of a final order. All written submissions will be placed in the public file which has been established in this docket and which is available for public inspection in the Commission's Division of Public Information, Room 1000, 825 North Capitol Street, N.E., Washington, D.C. 20426, during regular business hours.

Comments are invited on all aspects of this proposed rule. In addition, comments and data are specifically invited on the following matters:

1. Data are requested from all interested parties on the impact of the proposed rule, including the impact on both consumers and industry.

2. Respondents are particularly invited to comment on the accuracy of the analysis of the impact of the timing difference transactions quantified in the staff study and attached as Appendix A.

3. Parties are requested to provide any available data pertinent to the additional timing difference transactions identified in Appendices A or C but not quantified, as well as identification and impact of any additional timing difference transactions.

4. Parties are further requested to comment on any unique problems that might be encountered in complying with the rule as proposed, any necessary delay in the effective date of a final rule following issuance of that rule in order to assure satisfactory compliance, and any limitations on the manner in which the rule should be applied to timing differences (related to expenses or revenues) that initially arose prior to the election by an applicant to normalize under the rule. (See § 2.202(c)(2).)

5. Comments are also requested on whether the Commission should require only one of the two methods currently used regarding AFUDC, the gross-of-tax method or the net-of-tax method, whether the Commission should follow state commission policy, or whether other considerations should apply. (*See*, Appendix A, Section II.E.1.)

Upon review of the comments, the Commission will consider whether public hearings are warranted.

(Federal Power Act, 16 U.S.C. § 792, *et seq.*; Natural Gas Act, 15 U.S.C. § 717, *et seq.*; Department of Energy Organization Act, 42 U.S.C. § 7101, *et seq.*; Administrative Procedure Act, 5 U.S.C. § 553, *et seq.*)

In consideration of the foregoing, the Commission proposes to amend Part 2 of Chapter I, Title 18, Code of Federal Regulations as set forth below.

By direction of the Commission.

Kenneth F. Plumb,

Secretary.

PART 2—GENERAL POLICY AND INTERPRETATIONS

1. Part 2 is amended in the table of contents and at the end of the text of the regulations in Part 2 by adding a new Subpart to read as follows:

Rules of General Applicability

§ 2.202 Tax normalization for public utilities and interstate pipelines.

(a) *Applicability.* (1) Except as provided in paragraph (a)(2) of this section, this section applies to treatment for ratemaking purposes of all transactions for which there are timing differences.

(2) This section does not apply to timing differences addressed by the following orders and opinion:

(i) Order Nos. 203, 204 and 432 (relating to accelerated amortization of certified defense and pollution control facilities);

(ii) Order No. 404 and Opinion No. 578 (relating to accelerated methods of depreciation);

(iii) Order Nos. 408 and 566 (relating to research, development and demonstation expenses);

(iv) Order No. 504 (relating to accelerated methods of depreciation; research, development and demonstration expenses; extraordinary property losses; and use of the Asset Guideline Class "Repair Allowance" provision of the Internal Revenue Code of 1954);

(v) Order No. 505 (relating to deferred gains and losses from disposition of utility plant); and

(vi) Order No. 13 (relating to deferred gas costs under purchased gas adjustment clauses).

(b) *General rule.* (1) A rate applicant may elect to compute the income tax component of its cost of service by using tax normalization for all transactions to which this section applies.

(2) If a rate applicant makes an election under this section, its rate base

shall be reduced by the balances for those items related to rate base that are properly recordable in Account 281, "Accumulated deferred income taxes-accelerated amortization property;" Account 282, "Accumulated deferred income taxes-other property;" and Account 283, "Accumulated deferred income taxes-other." Balances for those items related to rate base that are properly recordable in Account 190, "Accumulated deferred income taxes," shall be treated as an addition to rate base. If an applicant uses an approved purchased gas adjustment clause or a research, development and demonstration tracking clause, the rate base reductions or additions required under this subparagraph shall apply only to the extent that the balances in Account 190 and Accounts 281 through 283 are not used, for purposes of calculating carrying charges, as an offset to balances properly recordable in Account 188, "Research development and demonstration expenditures," or Account 191, "Unrecovered purchased gas costs."

(c) *Conditions.* (1) Except as provided in paragraph (c)(2) of this section, a rate applicant making an election under this section shall be required to use tax normalization for all transactions to which this section applies.

(2) No recognition shall be given to the reverse tax effects of timing differences arising in a time period prior to such election unless:

(i) the applicant has previously provided for applicable deferred taxes; or

(ii) the applicant has adopted a Commission-approved ratemaking method of providing for such deferred taxes.

(3) A rate applicant making an election under this section shall be required to make such election for all future rate filings unless, upon application, the Commission orders otherwise.

(d) *Definitions.*

(1) "Tax normalization" means computing the income tax component as if the amounts of expenses or revenues recognized in each period for ratemaking purposes were also recognized in the same amount in each such period for income tax purposes.

(2) "Timing differences" means differences between amounts of expenses or revenues recognized for income tax purposes and amounts of expenses or revenues recognized for ratemaking purposes, which differences arise in one time period and reverse in one or more other time periods so that the total amounts of expenses or revenues recognized for income tax purposes and for ratemaking purposes in all of such periods are equal.

(3) "Income tax purposes" means for the purpose of computing income tax under the provisions of the Internal Revenue Code of 1954 or the income tax provisions of the laws of a State or political subdivision of a State (including franchise taxes).

(4) "Income tax component" means that part of the cost of service that covers income tax expenses allowable by the Commission.

(5) "Ratemaking purposes" means for the purpose of fixing, modifying, approving, disapproving or rejecting rates under the Federal Power Act or the Natural Gas Act.

(6) "Rate applicant" means a public utility or interstate pipeline that makes a rate filing under section 205 of the Federal Power Act or under sections 4 or 7 of the Natural Gas Act. Interstate pipeline means a natural gas company engaged in natural gas transportation subject to the jurisdiction of the Commission under the Natural Gas Act.

(7) "Transaction" means an activity or event that gives rise to an accounting entry that is used in determining revenues or expenses.

I. Introduction

This study is prepared in response to the Commission's request for an analysis of the proposed ratemaking rule for tax normalization. The study has two objectives: (1) an analytical exposition of the essential differences between the normalization and flow-through policy options and (2) a quantitative assessment of the impacts of the FERC's adoption of normalization.

The issue addressed by the proposed rule involves the appropriate interperiod allocation of a particular cost, taxes, in setting rates for electric utilities and natural gas pipelines.[55] More specifically, the issue is one of determining the appropriate period(s) in which to reflect the tax effects of certain expense and revenue transactions (referred to as "timing difference transactions") in the calculation of the tax allowance of the jurisdictional cost of service. Timing difference transactions are expenses and revenues

[55] For purposes of this study, the term "utility" refers to both electric utilities and natural gas pipelines.

which are recognized in the determination of ratemaking cost of service in different periods than when they are recognized in the computation of income taxes payable. Timing difference transactions create "timing differences" or differences between pretax cost of service (or accounting) income and taxable income that are offset by corresponding differences in other period(s). The tax effects of timing differences are the *temporary* tax reductions associated with the deduction of specific expense transactions and the *temporary* tax additions associated with the inclusion of specific revenue transactions in the determination of income taxes payable.[56]

Two methods have been proposed for dealing with the tax effects of timing difference transactions: normalization and flow-through. The distinction between these methods if based on whether the tax allowances in a utility's cost of service recognizes the expenses and revenues according to the interperiod allocation policies of the Internal Revenue Service (IRS) or according to those of the regulatory agency. Flow-through ratemaking determines a tax allowance based on the recognition of expenses and revenues in the same period that the utility is permitted to recognize them for tax purposes. In so doing, flow-through attempts to set rates for each period that would permit the utility to recover only the taxes it will actually pay in each period. In contrast, the normalization tax allowance is based on the recognition of expenses and revenues in the same period as when they are themselves recognized for ratemaking. Normalization attempts to set rates for each period that "match" the tax effects of specific expenses and revenues with the utility's recovery of expenses or pass-through of revenues.

The Commission [57] has already adopted a normalization policy with respect to the following timing differences:

(1) Differences that result from the use of accelerated depreciation and Class Life Asset Depreciation Range (ADR) tax provisions. (Order No. 404, May 15, 1970; Opinion No. 578, June 3, 1970; and Order No. 504, February 11, 1974).

(2) Differences that result from the use of accelerated amortization provisions on certified defense and pollution control facilities. (Order Nos. 203, May 29, 1958; 204, May 29, 1958; and 432, April 23, 1971).

(3) Differences that arise from recognition of extraordinary property losses as a current expense for tax purposes but as a deferred and amortized expense for book purposes. (Order No. 504, February 11, 1974).

(4) Differences that arise from recognition of research, development and demonstration expenditures as a current expense for tax purposes but as a deferred and amortized expense for book purposes. (Order No. 408, August 26, 1970; 504, February 11, 1974; and 566, June 3, 1977).

(5) Differences that result from different tax and book reporting of deferred gains or losses from disposition of utility plant. (Order No. 505, February 11, 1974).

(6) Differences that result from the use of the Asset Guideline Class "Repair Allowance" provision of the Internal Revenue Code of 1954. (Order No. 504, February 11, 1974).

(7) Differences that result from recognition of purchased gas costs as a current expense for tax purposes but as a deferred expense for book purposes. (Order No. 13, October 18, 1978).

The proposed rule would generalize, with a single regulation, the application of normalization to all other (miscellaneous) timing difference transactions. The proposed rule does not contemplate further review of previous orders approving normalization for the transactions identified above. Nor does it propose to amend the current regulations at this time with respect to ratemaking treatment for these transactions.[58] This study therefore will concentrate on the major additional timing difference transactions which would qualify for normalization under the proposed rule and which were the subjects of the remanded Order No. 530–B.[59]

This study is concerned primarily with the ratemaking aspects of the proposed rule. The accounting changes specified in the 530 orders have not been contested and are therefore continued in effect by the proposed rulemaking.

Section II explains, in more detail, the nature of interperiod tax allocation and how the alternative policies of normalization and flow-through work. Section III provides some quantitative assessment of the impact on utility rates of moving from a flow-through to normalization policy for the following timing differences:

(1) Differences that result from recognition of the following items as current expenses for tax purposes and as capitalized and amortized expenses for ratemaking purposes:

(a) the interest component of the Allowance for Funds Used During Construction (AFUDC);

(b) construction-related pensions; and

(c) construction-related taxes.

(2) Differences that result from the use of different depreciation lives for taxes and ratemaking.

(3) Differences that result from recognition of regulatory commission cost as a current expense for tax purposes and as an expense amortized over a number of years for ratemaking.

(4) Differences that result from the deduction of plant "removal (or dismantling) cost" on an "as paid" basis for tax purposes and its prior amortization over the life of the plant for ratemaking.

On an industry-wide basis, for both electric utilities and natural gas pipelines, these items constitute the major dollar items qualifying for the proposed normalization treatment. Applying tax normalization to these items would have the largest and most widespread impacts. There are numerous other items of expense and revenue that may be eligible for the proposed normalization treatment. See Appendix C of the rulemaking proposal for a more extensive, though still incomplete, listing of these items. Some of these other items may be significant for individual companies at various times. However, staff's review of these other items does not indicate any significant impact on average industry-wide electric and gas prices. Further, due to the sporadic occurrence of these items, meaningful estimates of their impacts are not feasible except on a company-by-company basis.

II. Timing Differences and Interperiod Tax Allocation

A. Overview

Interperiod tax allocation is an example of the general problem of interperiod cost allocation that regulatory commissions must resolve for all cost items in the determination of "just and reasonable" rates. Every item of expense incurred by a regulated utility and permitted to be recovered in its rates is allocated over time in one of three ways:

(1) the expense may be charged to customers in the *same period* as it is paid by the utility (e.g., normal operation and maintenance expenses); or

(2) the expense may be charged to customers in a period or periods *after* it is

[56] Throughout this study, the term "temporary" is implicitly assumed whenever reference is made to the tax effects (consequences or benefits) of timing differences. Timing differences, by definition always "reverse or turn around" so that any connotation of permanance attached to tax effects of timing differences is unfounded and contradictory.

[57] The term "Commission" is used in this study to refer both to the FPC and to the FERC. Distinctions are made only where necessary for clarity.

[58] Current precedent is that these items are normalized for ratemaking. Nothing in the Commission's proposed rule would change that precedent.

[59] Order No. 530, Order Implementing that Portion of Docket No. R–424 Relating to Interperiod Allocation of Income Taxes and Docket No. R–446 to Achieve Comprehensive Interperiod Allocation of Income Taxes, issued June 18, 1975; Order No. 530–A, Order Denying Applications For Rehearing and Clarifying Prior Order, issued January 19, 1976; Order No. 530–B, Order Revising Prior Orders, issued July 6, 1976.

paid by the utility (e.g., capital and capitalized interest expenses of new plant and equipment); or

(3) the expense may be charged to customers in a period or period *before* it is paid by the utility (e.g., removal or dismantling costs of plant and equipment).

Taxes are a cost to utilities. Just as regulatory commissions must decide whether to allow any other cost to be recognized currently in rates to customers, deferred for recovery in later periods, or prepaid, they must likewise decide whether taxes are to be recognized currently, deferred, or prepaid.

The focus of this report is on a particular problem in interperiod tax allocation—the problem arising from the existence of *timing differences*. The purpose of this section is to explain the nature of timing differences and to provide an overview of how normalization and flow-through of the tax effects of timing differences work in ratemaking.

Timing differences arise from differences between tax regulations and regulatory pricing policies. The interperiod allocations of non-tax costs and revenues by state and federal regulatory commissions do not always coincide with the interperiod cost and revenue allocation policies of the IRS. There is no reason why they should since the objectives of the IRS are often quite different from those of regulatory commissions. However, when the interperiod allocation policies diverge, timing differences are created.

Timing differences may be defined as differences between taxable income and pretax accounting income arising from "differences between the periods in which transactions affect taxable income and the periods in which they enter into the determination of pretax accounting income."[60] By substituting the phrase "pretax cost of service income" for "pretax accounting income," the definition can be made to apply to the ratemaking aspects of timing differences with which this report is primarily concerned.[61] A transaction which gives rise to a timing differene is called a *timing difference transaction.* Finally, the *tax effect of a transaction* (timing difference transaction or other) is defined as the tax reduction associated with the deduction of a specific expense transaction or the tax addition associated with the inclusion of a specific revenue transaction in the determination of income taxes payable.

There are two essential characteristics of timing differences. First, the differences (in pretax cost of service income and taxable income) arise in one period and reverse in one or more subsequent periods. Second, the reversal of the difference exactly offsets the original difference, i.e., the total amount of each timing difference transaction recognized for tax purposes over time is exactly equal to the total amount recognized for ratemaking.

In contrast, and so as to more clearly distinguish timing differences, *permanent differences* are differences between taxable income and pretax cost of service (or book) income that are not offset by reversals in other periods. Both an originating and a reverse difference are involved in timing differences. Permanent differences, however, involve only an originating difference which is never followed by a reverse difference. Permanent differences arise when a higher dollar value is placed on an expense or revenue transaction for tax purposes than for ratemaking, or vice versa. For example, until recently, a significant source of permanent differences was the statutory depletion provision of tax laws which permitted depletion deductions for tax purposes in excess of the actual costs incurred by firms. This creates a taxable income less than pretax cost of service income that is never offset by a reversal in any other period. The total expense deduction taken for tax purposes is greater than that for ratemaking. Other examples of transactions creating permanent differences include municipal bond interest, political contributions, and contributions toward officers' life insurance policies.

There are four types of transactions that qualify as timing difference transactions:

I. *Expenses* that are recognized for tax filings in periods *prior to* when they are recognized in rates;

II. *Expenses* that are recognized for tax filings in periods *later than* when they are recognized in rates;

III. *Revenues* that are recognized for tax filings in periods *prior to* when they are recognized in rates; and,

IV. *Revenues* that are recognized for tax filings in periods *later than* when they are recognized in rates.

As will be shown, Types I and IV reduce the income taxes that a utility would otherwise have to pay currently and raise the tax liability later. Types II and III increase the utility's current tax liability and decrease it later.

In this report we will concentrate on the Types I and II expense timing difference transactions. Revenue transactions can be viewed simply as negatives of expense transactions and do not require separate analysis. A second reason for concentrating on the expense types is that they are the most prevalent [62] and have the most significant impacts on utility rates.

One of the most significant expense items that would qualify for normalization under the proposed rule is the interest expense on loans used to finance construction of new plant and equipment. This is a Type I expense timing difference. This expense may be deducted for tax purposes as it is paid by the utility during the construction period, but it is not generally included as an expense in the ratemaking cost of service during that period. Instead, it is capitalized as the interest component of the Allowance for Funds Used During Construction (AFUDC) and amortized as part of the annual depreciation charge over the economic life of the plant. For both taxes and ratemaking, the total amount of AFUDC interest recognized over the construction period and operating life of the plant is identical.[63]

An example of a Type II timing difference that has effects opposite to those of the Type I AFUDC interest expense example is plant removal cost. For ratemaking, removal (or dismantling) cost may be included (as estimated) as part of the depreciation allowance over the life of the plant in the same manner as the interest expenses during construction. However, under current tax regulations, this cost cannot be recognized as a deduction for tax purposes until it is actually incurred

[60] Accounting Principles Board Opinion No. 11, issued December 1, 1967, paragraph 13e.

[61] For purposes of the discussion throughout this study, it is assumed that book income equates to cost of sevice income. It should be kept in mind, however, that there is a discontinuity in ratemaking that is absent in accounting. Rates are set on a test year basis and actual financial events may not precisely track the items of expense and revenue reflected in the cost of service. Further, the generalization that cost of service income equates to accounting income is an oversimplification since there are transactions entering into the determination of book income that relate to operations not providing service to ratepayers and, thus, not entering into the determination of ratemaking cost of service. Fines and penalties, examples of permanent differences, as discussed *infra*, are not deductible for tax purposes but are deducted in determining book income. However, they do not enter into the determination of cost of service income, i.e., they are treated as below-the-line expenses, since they are not allowable items of expense.

[62] See Appendix C to the proposed rulemaking.

[63] In some jurisdictions, the utility is permitted to include Construction Work in Progress (CWIP) in rate base with a return permitted on it. Where this occurs, the interest expense on loans used to finance construction activity is effectively recognized and charged to customers in the same periods as it is paid by the utility and recognized by the IRS. Thus, when CWIP is included in rate base, the construction period interest expense does not create a timing difference.

when the plant is dismantled. The timing difference originates during the operating life of the plant when the expense for taxes is less than the expense for ratemaking. Later, when the plant has lost its usefulness and is dismantled, the reversal occurs and the expense for taxes becomes greater than the expense for ratemaking. As with the AFUDC interest expense example, the total amount of the expense recognized for tax purposes over time is exactly equal to the total amount recognized for ratemaking. Flow-through and normalization are methods of dealing with the tax effects of timing difference transactions. Flow-through follows the interperiod allocation policies of the IRS to establish a cost of service tax allowance in each period equal to actual tax liability. Normalization, on the other hand, "matches" the tax effects of transactions in rates with the recognition of the transactions themselves in rates.[64]

These points and others may be made clearer with some numerical illustrations. Suppose, initially, that a utility has a constant annual revenue requirement (cost of service) of $1,000 with component costs as given below:

Case I: Base Case

Year	0	1	2
Equity return	$200	$200	$200
Income taxes	200	200	200
Other expenses [1]	600	600	600
Base required revenues (rates)	1,000	1,000	1,000

[1] Other expenses include all costs other than return on equity and income taxes, e.g., operation and maintenance expenses, depreciation, taxes other than income taxes, and interest charges.

In the Base Case, also assume that all costs are allocated identically over time for taxes and rates; that is, there are no timing differences. Under this assumption, the cost of service tax allowance can be said to be equal to the utility's actual tax liability in each period. The assumed tax rate is 50 percent.

The $1000 annual revenue requirement is the total cost of providing existing service. In providing this service, the utility had to obtain equity capital to finance its rate base and must, on a current basis, provide a return ($200) on this capital. The tax component of the cost of service arises from the fact that taxes are assessed on equity income. In other words, the $200 tax liability is one of the costs of providing the existing level of service.[65]

Now suppose that the utility incurs an additional non-tax expense of $100 in year zero. Initially, suppose also that tax regulations permit the utility to deduct the $100 expense in determining its tax payment during year zero. Regulatory policy, however, requires that the expense be capitalized and spread out in equal installments of $50 over years one and two.[66] In other words, tax regulations allocate the expense completely to year zero while regulatory policy requires that it be allocated to years one and two.[67]

The difference in the tax and ratemaking interperiod allocations of the $100 expense creates a Type I timing difference. The timing difference originates in year zero when the expense recognized for tax purposes ($100) is greater than the expense recognized for ratemaking purposes ($0). The difference reverses, however, during years one and two when the expense for taxes ($0) is less than the expense for ratemaking ($50). The total amount of the expense recognized for taxes over the three years ($100) is exactly equal to the total amount recognized for ratemaking ($100).

In Cases II through V, we examine the effects of various approaches to setting rates that permit the utility compensation for the additional $100 non-tax expense. For simplicity, in evaluating the approaches we will initially consider only the first-order effects on the cost of service. This includes the allowance for the expense itself and any direct tax consequences of the expense. In Case II, the additional expense is treated on a current basis for ratemaking, i.e., it is recognized in rates at the time of incurrence by the utility. This means that the utility collects for the expense through rates charged during the same year as it expends funds for it. In the succeeding three cases, however, the utility is required to defer collection of the expense beyond the year of incurrence. As a result, the utility must finance the expense in the interim. The financing of this expense with some combination of debt and equity capital increases the utility's cost of service return component. The additional equity return requirement, in turn, increases the tax liability of the utility. Additionally, under normalization (Case IV), part of the above financing need is effectively handled with the deferred tax allowance included in rates. This also has second-order effects on the return and tax components of the cost of service which will be discussed in the next section.[68]

In comparing the four cases that follow, it is important to observe that the cumulative total cost of service for the three-year period is the same—$3100. This is composed of the $3000 base cost of service and the incremental $100 expense. The cases differ only in the interperiod allocation of the $3100 in costs. In particular, the cases differ in the allocation of two costs—the additional expense and income taxes. As we proceed through the cases, we will discuss and stress the importance of comparing the allocation of the $100 expense with the allocation of taxes.

A second important point is that the incremental expense itself has no tax cost associated with it since it is not equity income. It neither increases nor deceases the total amount of taxes the utility must pay over the three-year period. In all cases, the total tax cost is $600. However, when the allocation of the expense over time for ratemaking and for taxes is different, as it is in Cases IV (normalization) and V (flow-through), the taxes the utility must pay in each period are affected. Further, in Case V (flow-through) the difference in ratemaking and tax allocation affects the tax allowance in each period.

Case II: Ratemaking Allocation Conformed to Tax Allocation

Year	0	1	2
Allocation for taxes	$100		
Allocation for rates	100		
Base equity return	200	200	200
Base income taxes	200	200	200
Additional income taxes			
Base other expenses	600	600	600
Additional expense	100		
New required revenues (rates)	1,100	1,000	1,000

By conforming regulatory policy to tax policy, the timing difference is eliminated. Required revenues (rates)

[64] In contrast, normalization is not applicable to *permanent differences* because the income taxes payable for the period in which the differences occur matches the revenues and other expenses recognized for book (and ratemaking) purposes in that period. There is no difference between the IRS and regulatory *interperiod allocation* policies. Rather the difference is in the *amount* of expenses and revenues recognized under the two policies.

[65] The pretax cost of service income (equals taxable income) is $400 ($1000–$600). When this is multiplied by the assumed 50 percent tax rate it yields a $200 tax liability and leaves a $200 return available to stockholders.

[66] This could happen because the plant for which the expense was incurred did not come on line until year one, and following the ratemaking policy of "used and useful," cost recovery would be allowed only after plant operation.

[67] In this example and through much of this study we assume that the recognition of expenses for taxes in coincident with the cash basis of the transaction, i.e., when the utility actually outlays funds for the expense. Timing differences arise, however, when tax regulations and regulatory policies recognize an expense in different periods irrespective of when the outlays are actually made by the firm. See footnote in Section II. B. 2 and discussion in Section II. C.

[68] See Section II. B. 1, *infra*.

rise only in year zero to permit the utility to charge customers for the additional expense in that year. The taxes allowed in year zero will equal the taxes actually paid since the increase in rates brings taxable income ($1,100−$700=400) up to the same level as pretax cost of service income ($1,100−$700=400). As a result, the allocation of taxes in rates remains the same as in the Base Case.

In Case III, the effects of hypothetically conforming tax regulations to ratemaking policy are considered.

Case III: Tax Allocation Conformed to Ratemaking Allocation

Year	0	1	2
Allocation for taxes		$50	$50
Allocation for rates		50	50
Base equity return	$200	200	200
Base income taxes	200	200	200
Additional income taxes			
Base other expenses	600	600	600
Additional expense		50	50
New required revenues (rates)	1,000	1,050	1,050

Again the timing difference is eliminated. The expense is allocated to the same years for both taxes and ratemaking. The increase in rates during years one and two brings taxable income and pretax cost of service income into equality so that the allocation of taxes remains the same as in the Base Case.

While Case III represents an unlikely occurrence, it establishes the time pattern of rates when the regulatory agency's interperiod cost allocation policy overrides tax policy. The ratemaking determination that the additional expense should be allocated in equal amounts to years one and two is directly reflected in the rates. Required revenues are unchanged from the Base Case in year zero and are $50 higher in each of years one and two.

In Cases IV and V, we take the timing difference as given, i.e., no change in the tax or ratemaking expense allocation policies, and compare the effects of the flow-through and normalization policy options.

Case IV: Type I Timing Difference, Normalization Policy

Year	0	1	2
Allocation for taxes	$100		
Allocation for rates		$50	$50
Base equity return	200	200	200
Base income taxes	200	200	200
Additional income taxes:			
Current	(50)	25	25
Deferred	50	(25)	(25)
Base other expenses	600	600	600
Additional expense		50	50
New required revenues (rates)	1,000	1,050	1,050

Case V: Type I Timing Difference, Flow-Through Policy

Year	0	1	2
Allocation for taxes	$100		
Allocation for rates		$50	$50
Base equity return	200	200	200
Base income taxes	200	200	200
Additional income taxes current	(100)	50	50
Base other expenses	600	600	600
Additional expense		50	50
New required revenues (rates)	900	1,100	1,100

In both of these cases, the allocation of the additional $100 expense raises cost of service by $50 in each of years one and two. Where these two cases differ is in the allocation of the utility's $600 total income tax expense. The tax allowance in each year under normalization (Case IV) is the same as in the Base Case—$200 per year. Under flow-through (Case V), however, the tax allowance is $100 in year zero and $250 in each of years one and two.

Consider first the allocation of taxes under normalization (Case IV). The tax allowance in this case is composed of two parts—current (or actual) taxes and deferred taxes. In year zero the current tax liability is $150, reflecting the $200 Base Case current liability less the tax benefits of $50 resulting from the deduciton of the incremental $100 expense. (.50×$100). However, since normalization permits the utility to retain the tax benefits arising from expenses that will not be recognized in rates until a later date, a deferred tax allowance equal to the tax benefit of the expense is included in the cost of service. The result is to set rates in year zero "as if" the utility had not incurred the expense. In years one and two, the reverse situation occurs. The current tax liability of $225 is higher than the base case liability in both of these years by $25. This reflects the fact that revenues include an allowance of $50 for an expense that was already used as a tax deduction in the utility's tax filing in year zero. The deferred tax component in these years, however, is negative to reflect the pass-through in rates of the tax benefits that were previously permitted to be retained by the utility in year zero Of primary importance in this analysis is that the total tax allowance in each year remains the same as in the Base Case—$200 per year—and the resulting time pattern of rates is identical to that of Case III. Normalization effectively neutralizes the effects of the contrary tax regulations on rates to obtain the result of simply allocating the incremental expense to the rates charged in years one and two.

Under a flow-through policy (Case V), the tax allowance in the cost of service is set equal to the actual tax liability of the utility in each year. If, in year zero, the utility were allowed the Base Case required revenues of $1,000, the deduction of the additional expense would cause the utility's actual tax liability to be $150. But the Base Case tax allowance was $200. Since the intent of the flow-through policy is to "flow through" to customers, in lower rates, the tax benefit attributable to the higher expenses recognized for taxes, it would appear that required revenues should be lowered by $50. However, this would not be enough to equate the taxes allowed with the taxes actually paid. With allowed revenues set at $950 to include a tax allowance of $150 rather than $200, the utility's taxable income is $250 ($950–$700) and its actual tax liability is $125. Once again the tax payment is lower than the tax allowance. To obtain the result of having taxes allowed equal to taxes paid in year zero, the tax allowance and required revenues must be lowered by $100 below the Base Case.[69] Only then would the taxes allowed ($100) equal the taxes actually paid in year zero (.50 × ($900–$700) = $100). By a reverse process, required revenues must be raised by $50 in each of years one and two to obtain the result of taxes allowed equal to taxes paid. Thus, the flow-through tax allowance is $100 lower than the Base Case in year zero and $50 higher in each of years one and two. The cumulative three-year tax liability of the utility, however, is not changed from the Base Case. It remains at $600. What occurs is simply a reallocation of the tax liability (and allowance) between year zero and years one and two.

Finally, it should be emphasized that the $100 tax liability that is shifted from the rates charged during year zero to the rates charged during years one and two is greater than the $50 in tax benefits associated with the deductibility of the incremental $100 expense. Flow-through does more than simply reallocate these tax benefits. It lowers rates an additional $50 in year zero and raises rates an additional $25 in each of years one and two. Thus, flow-through results in a distortion of the pricing objectives of the regulatory commission. Although the regulatory commission has determined that $50 of expenses may be collected in rates in each of years one and two, flow-through would raise revenues in each of years one and two by $100 and lower them in year zero by $100, when the expense is actually incurred. On the other hand, normalization results in rates precisely matching the commission's intention for

[69] A more detailed explanation of this result is presented in Section II. B.1, *infra*.

cost recovery; that is, rates increase only by $50 in each of years one and two.

From an overall perspective, the difference in the allocation of taxes under normalization (Case IV) and flow-through (Case V) derives from differences in the allocation of the incremental expense as a deduction for purposes of determining the tax allowance. Normalization allocates the tax deduction to years one and two, the years when the expense itself is reflected in rates. Flow-through, however, allocates the tax deduction to year zero, the year in which it is actually used by the utility in its tax filing. This comparison between the two policies reflects the differences in the basic objectives of each. Normalization attempts to "match" the allocation of the tax deductibility of expenses with recovery of the expenses themselves. In this way, the customers (in years one and two) that pay the expense obtain the benefits of the tax deductibility of the expense. The objective of flow-through, however, is to allocate taxes on a current bases, i.e., when they are actually paid. Thus, since the utility is permitted to deduct the incremental expense in year zero, the flow-through tax allowance is based on the deductibility of that expenses in year zero. In so doing, however, flow-through gives the benefits of the tax deductibility of the expense *and more,* as indicated above, to customers in year zero.

A primary rationale for normalization is equity—a matter of fairness in letting the customers who pay the expenses get the tax benefit that those expenses created. This is the *matching principle.* If we view the incremental expense in the above example as the interest portion of the Allowance for Funds Used During Construction (AFUDC), this principle may be made clearer. Year zero is the construction period for a new plant during which the AFUDC interest liability is incurred by the utility. Years one and two represent the operating life of the plant. By capitalizing the AFUDC interest into the rate base value of the plant when it becomes operational, the burden of paying the expenses is placed on customers during the operating life when they also receive the benefits from the use of the asset. The timing of collection in rates for the costs of producing the asset is thus coincident with, or matches, the use of consumption of the asset. Normalization attempts to achieve the same sort of matching with the tax benefits associated with the AFUDC interest. During the operating life when customers must bear the burden of the expense itself, they receive the tax benefits associated with it.

The primary rationale for flow-through is one of charging customers in each year no more than the actual (current) tax liability of the utility. This is referred to as the *actual taxes paid principle.* There is an inconsistency, however, attached to reliance on this principle since such a principle is not applied to all other costs. In other words, flow-through proponents generally do not advocate an "actual cost incurred (or paid)" principle. Returning to our illustration of AFUDC interest expenses, application of the actual cost incurred principle would require that the interest expenses themselves be recovered in rates at the time of incurrence. This is our Case I example where both the expense and taxes are allocated on an "as incurred" basis.[70] Thus, the main rationale for flow-through requires the application of inconsistent regulatory principles to taxes and to other costs.

Cases II through V were designed to illustrate the impact on rates of a single Type I timing difference transaction. Type II timing difference transactions affect rates in an opposite manner. For example, if the $100 incremental expense was incurred and allowed as a deduction for tax purposes in year two but allocated to years zero and one for ratemaking, the time pattern of required revenues would be opposite to that depicted in each of the above cases. With respect to the simple comparison between normalization and flow-through, normalized rates would be lower than flow-through rates in years zero and one and higher in year two. Both policies would allocate the expense itself to years zero and one. Similar to the earlier example, the difference in rates would be due to the allocation of taxes or, alternatively, the tax benefits arising from the deductibility of the expense. Since the expense itself is being recovered in rates during years zero and one, normalization would allocate ("match") the tax benefits from the deductibility of the expense to the same years. Flow-through, however, would allocate these benefits and more to year two, while raising rates in years zero and one.

There are several factors that are not considered in these simple cases but are discussed and analyzed in the remaining portions of the study. In the next section, a more detailed single transaction example is presented where we address, as noted above, the second-order effects of financing the deferral of the timing difference expense and of reducing rate base by the amount of accumulated deferred taxes. By ignoring these effects in the above cases, we obtained an equal-revenue result in undiscounted dollars, i.e., the cumulative required revenues are $3100 in each of the Cases II through V. In the next section, with the financing factor considered, we obtain an equal-revenue result in present value (discounted dollar) terms.

The above comparisons between normalization and flow-through have been directed solely toward the effects of each policy on rates. In the next section we address these effects in more detail but also consider two other impacts—on cash flow and on rates of return to stockholders.

Our discussion so far has also only addressed what happens to rates when a single timing difference transaction is introduced. This is important in providing an understanding of the basic logic of normalization and flow-through. However, much of the controversy on this issue is based on the effects over time of more than one transaction. In particular, there is concern that tax benefits associated with new transactions may offset the reversals occurring on earlier transactions. Consequently, a reversal of the differences for a group of similar (or different) transactions may not occur, at least within the foreseeable future. Under such circumstances, normalization may result in a utility continually being allowed a higher allowance for taxes in its cost of service than it will, in fact, have to pay. This occurrence, referred to as a "continual tax deferral,"[71] is discussed in Section II. C, *infra.*

In that section, we discuss the implications of "continual tax deferrals" and explain how, from the customer's perspective, they result from "continual *cost* deferrals." That is, we point out that when a utility is permitted to defer the payment of taxes due to the existence of timing differences, the utility is simultaneously deferring the

[70] It should be noted that the Case I policy is akin to the policy of allowing CWIP in rate base.

[71] A "continual tax deferral" (sometimes referred to by the misnomer "permanent tax savings") may be defined to occur when accumulated deferred taxes are always positive or when they are always constant or growing. "Continual tax deferrals" result from successive expenses that are recognized as tax deductions prior to their collection in rates or from successive revenues that are recognized for tax purposes later than rate recognition. Expenses recognized as tax deductions *after* they are recovered in rates (or revenues recognized in taxes before they are recovered in rates) give rise to what might be called "continual tax prepayments." These "tax prepayments" actually are a debit in the accumulated deferred tax account on the asset side of the balance sheet.

collection, in rates, of the expenses that give rise to the tax deferrals. Further, we explain how, with a 50 percent tax rate, the deferred expenses are twice as large as the deferred taxes. It is also noted that there is no necessary link between the existence of "continual tax deferrals" and the rates charged under normalization being continually higher than those under flow-through. In fact, our statistical impact analysis in Section III shows that it is likely that natural gas pipelines may experience "continual tax deferrals" but also have rates under a normalization policy that fall below those that would exist under a flow-through policy.[72]

Another consideration that has thus far been ignored is the effect of the two policies on the cost of capital. Section II.D, *infra*, discusses this issue and provides some evidence supporting the view that the cost of capital to utilities employing flow-through is greater than to those using normalization.

B. Single Transaction Case

In evaluating the normalization and flow-through policy options, there are three primary impacts to consider:

(1) On customers as reflected in the required revenues (or rates) charged;

(2) On utilities as indicated by their cash flow situation; and

(3) On utilities shareholders as indicated by the rates of return they are able to earn.

In this section, we undertake a detailed analysis of these impacts for a single transaction that causes a timing difference.

In order to facilitate the analysis of these impacts we shall rely on another, more complicated numerical example involving a Type I timing difference. As indicated earlier, the exact patterns of the effects are different for the other types of timing differences by the principles involved are the same.

Consider again a utility that adds a new plant that has a one-year construction period and a two-year operating life. Direct construction expenditures of $100 million are made at the beginning of year zero and financed wholly by a short-term loan at an interest rate of 10 percent. Interest due and paid at the end of the construction period is $10 million ($100 million x .10). The plant becomes operational at the beginning of year one and is immediately refinanced with long-term debt and common equity in the following proportions and cost rates:

Source	Proportion	Cost rate (Percent)	Weighted cost (Percent)
	(1)	(2)	(1) x (2)
Debt	.60	10.0	6.0
Equity	.40	15.0	6.0
Total	1.00		12.0

The overall cost of capital after the plant is operational is thus 12 percent. We assume that the capital structure and component capital costs are the same under both policy options. The problem with these assumptions and the implications of dropping them are discussed later.[73] Under normalization, we also assume that the cash flow generated by deferred taxes is used to reduce the debt and equity capital requirements at the time of refinancing in proportion to their importance in the capital structure.

We assume, for simplicity, that rates are adjusted at the beginning of each year to allow the utility to recover those costs deemed allocable to that year by the regulatory commission. Further, there are no operation and maintenance expenses involved in running this new plant; the only costs to be recovered during the operating life are depreciation, return and taxes. We also assume that all earnings are paid out as dividends in each year. Finally, we assume that the tax rate is 40 percent. Choosing a tax rate other than 50 percent permits a clearer distinction between certain costs.

Table 1 presents the summary results of the utility's incremental required revenues for the $100 million plant under normalization and flow-through. For each of the three years, the base conditions are given in the upper part of the table. The revenue requirement adjustments under normalization, and flow-through and the difference between the two are shown in the rest of Table 1, along with detail on how the revenue requirements are derived from depreciation, return and taxes. Attached to Table 1 are the mathematical notes showing the cost of service relationships used to develop required revenues.

Table 1.—*Numerical Example of Differences Between Normalization and Flow-Through Revenue Requirements for AFUDC Timing Difference on Single Project*

[Dollars in millions]

	Year		
	0	1	2
Construction expenditures	100.		
AFUDC interest expense	10.

Total	6.67	(3.97)	(3.65)

Note: ( ) indicates negative value; b.o.y.—Beginning of year

BILLING CODE 6450-01-M

[72] The same may be true for electric utilities, assuming a small cost of capital differential normalized and flow-through electric utilities.

[73] See Section II. D., *infra*.

Mathematical Notes to Table 1

Let

h = Cost of long-term debt used to finance rate base.
k = Cost of common equity used to finance rate base.
d = Debt ratio.
r = Overall rate of return (cost of capital).
$= h \cdot d + k \cdot (1-d)$
s = Cost of short-term debt used to finance construction activity.
y = Tax rate.

$$ADT_t = \begin{cases} 0 & ;t=0 \\ ADT_{t-1} + DT_{t-1} - DTR_{t-1} & ;t=1,N \end{cases}$$

CE_t = Construction expenditures in year t, incurred at beginning of year (equals construction work in progress in example).

$$= \begin{cases} \$100\ M \text{ (in example)} & ;t=0 \\ 0 & ;t=1,N \end{cases}$$

D_t^B = Straight-line book depreciation taken in year t.

$$= \begin{cases} 0 & ;t=0 \\ \dfrac{(CE_0 + s \cdot CE_0)}{N} & ;t=1,N \end{cases}$$

D_t^T = Straight-line tax depreciation taken in year t.

$$= \begin{cases} 0 & ;t=0 \\ \dfrac{CE_0}{N} & ;t=1,N \end{cases}$$

DT_t = Taxes deferred in period t.

$$= \begin{cases} y \cdot s \cdot CE_0 & ;t=0 \\ 0 & ;t=1,N \end{cases}$$

DTR_t = Deferred taxes recovered (amortized) in period t.

$$= \begin{cases} 0 & ;t=0 \\ \dfrac{DT_0}{N} & ;t=1,N \end{cases}$$

N = Service (book) life of plant.

RB_t = Rate base in year t (beginning of year).

$$= \begin{cases} 0 & ;t=0 \\ CE_0 + s \cdot CE_0 & ;t=1 \\ RB_1 - D_1^B & ;t=2 \end{cases}$$

Mathematical Notes to Table 1
(continued)

Only two components of the normalization and flow-through costs of service are different -- the return and tax allowances. For all years, the return and tax components of the normalization and flow-through costs of service can be expressed as follows:

R_t^f = return component of flow-through cost of service.

$$= r \cdot RB_t \quad (1)$$

R_t^n = return component of normalization cost of service.

$$= r \cdot (RB_t - ADT_t) \quad (2)$$

T_t^f = tax component of flow-through cost of service.

$$= \left(\frac{y}{1-y}\right)[k(1-d)(RB_t) - s \cdot CE_t + (D_t^B - D_t^T)] \quad (3)$$

T_t^n = tax component of normalization cost of service.

$$= \left(\frac{y}{1-y}\right)[k \cdot (1-d)(RB_t - ADT_t)] \quad (4)$$

The general equation for the difference between normalization and flow-through revenue requirements (RR) can thus be expressed as:

$$RR_t^n - RR_t^f = (R_t^n + T_t^n) - (R_t^f + T_t^f) \quad (5)$$

This reduces to the following:

$$RR_t^n - RR_t^f = \left(\frac{y}{1-y}\right) s \cdot CE_t - \left(\frac{y}{1-y}\right)(D_t^B - D_t^T) - \left[h \cdot d + \frac{k(1-d)}{(1-y)}\right] ADT_t \quad (6)$$

For the three period illustrative case, the following results are obtained:

$$RR_o^n - RR_c^f = \left(\frac{1}{1-y}\right) DT_o \quad (7)$$

$$RR_1^n - RR_1^f = -\left(\frac{1}{1-y}\right)\left(\frac{DT_o}{N}\right) - \left[h \cdot d + \frac{k(1-d)}{(1-y)}\right] DT_o \quad (8)$$

$$RR_2^n - RR_2^f = -\left(\frac{1}{1-y}\right)\left(\frac{DT_o}{N}\right) - \left[h \cdot d + \frac{k(1-d)}{(1-y)}\right]\left(1 - \frac{1}{N}\right) DT_o \quad (9)$$

Mathematical Notes to Table 1
(continued)

Equations (7), (8) and (9) are illustrative of the reduced form equations used in the simulation model of Section III.A.1, when the cost of capital is assumed equal under normalization and flow-through. The following equations, not used in the Table 1 calculations, are analogous to (7), (8), and (9) except that they also reflect the revenue requirement impacts attributable to cost of capital differences.

$$RR_c^n - RR_c^f = \left(\frac{1}{1-y}\right) DT_c \tag{10}$$

$$RR_1^n - RR_1^f = -\left(\frac{1}{1-y}\right)\left(\frac{DT_o}{N}\right) - \left[h' \cdot d' + \frac{k'(1-d')}{(1-y)}\right] DT_c + \left\{\left[h'd' + \frac{k'(1-d')}{(1-y)}\right] - \left[h''d'' + \frac{k''(1-d'')}{(1-y)}\right]\right\} RB_1 \tag{11}$$

$$RR_2^n - RR_2^f = -\left(\frac{1}{1-y}\right)\left(\frac{DT_o}{N}\right) - \left[h' \cdot d' + \frac{k'(1-d')}{(1-y)}\right]\left(1-\frac{1}{N}\right) DT_c + \left\{\left[h' \cdot d' + \frac{k'(1-d')}{(1-y)}\right] - \left[h'' \cdot d'' + \frac{k''(1-d'')}{(1-y)}\right]\right\} RB_2 \tag{12}$$

where

h', k' and r' = the capital costs, as previously defined, under a normalization policy.

h'', k'' and r'' = the capital costs, as previously defined, under a flow-through policy.

d' and d'' = debt ratio under normalization and flow-through, respectively.

BILLING CODE 6450-01-C

Table 2 presents financial statements for normalizaton and flow-through. Balance sheets, income statements, cash flow and tax reconciliation are given for the two treatments of the AFUDC interest timing difference.[74] The table also shows the difference between normalization and flow-through in the last three columns.

1. Impact on Rates

What are the incremental effects of this plant addition on the utility's rates during each year under the normalization and flow-through policy options? The most obvious differences between the two policies are higher revenue requirements under normalization during the construction year and lower revenue requirements during the operating life. This is shown on Table 1. This difference derives from the fact that, under normalization, the utility is permitted to retain the tax benefits derived from the AFUDC interest deduction during the construction period and pass those benefits to consumers over the operating life of the plant.

But this is not the whole story. Under both policies, the utility recovers the $10 million in AFUDC interest from consumers in equal installments of $5 million over the two-year operating life of the plant. This is shown on Table 1 by the fact that $55 million of book depreciation, rather than $50 million of tax depreciation is allowed for revenue determinations under both normalization and flow-through. Similarly, the comparative income and cash flow statements in Table 2 show $55 million of depreciation rather than $50 million under both policies. But tax regulations permit the utility to use the $10 million interest expense as a deduction when it is paid, that is, during the construction period (see, Table 2, Tax Reconciliation.) The utility is thus able to obtain tax benefits of $4 million during the construction year using the assumed 40 percent tax rate.

[74] For purposes of this example, it is assumed that a gross-of-tax AFUDC rate method is used. See Section II. E. 1, *infra*.

Table 2.—*Financial Statements Comparison Between Normalization and Flow-Through for AFUDC Timing Difference on Single Project*

[Dollars in million]

	Normalization year			Flow-through year			Difference: Normalization minus flow-through year

The flow-through policy seeks to pass these benefits to customers immediately. But, in doing this, the cost of service for year zero is reduced by more than the $4 million since reducing revenues by $4 million reduces the taxes the utility must pay still further. To achieve the result of a tax allowance equal to taxes actually paid during year zero, the flow-through cost of service is reduced $6.67 million[75] below what it would have been had the utility not incurred the interest expenses in the first place. In other words, the utility's rates are reduced below what they would have been had the utility not engaged in building the new plant. In contrast, normalization sets rates in year zero at the *same level* as they would have been if no new plant were being built.[76]

Having passed on the tax benefits during the construction period, the flow-through cost of service for the two years of the plant's operating life will be raised in exactly the reverse manner as that occurring during the construction period. In each of the two years, required revenues will be higher by about $3.33 million to reflect this impact. In contrast, under normalization, required revenues during the operating years reflect the pass-through of the benefits achieved by the utility as a result of having the use of the deferred tax funds and requiring less interim financing for the interest expense outlay made during the construction period.

The contrast between the two policies can be seen more clearly by only looking at the effects on required revenues of the addition of the AFUDC interest expense to the utility's cost of service. From Tables 1 and 2, we obtain the comparisons shown in Table 3.

Under the normalization policy, total revenue requirements are raised $5.96 milion in year one and $5.48 million in year two, but are the same in year zero as they would have been without the $10 million AFUDC interest expense. These additions to revenue requirements in years one and two include $.96 million and $.48 million represented by additional returns and additional taxes over and above the $5 million of interest expense depreciated in each year.

Table 3.—*Comparison of Revenue Effects of AFUDC Interest Expense Under Normalization and Flow-Through*

[Dollars in millions]

	Year		
	0	1	2
Normalization Required Revenues			
AFUDC Interest Expense		$5.00	$5.00
Tax Effects of Interest Expense:			
Current taxes	(4.00)	2.00	2.00
Deferred taxes	4.00	(2.00)	(2.00)
Return:			
On AFUDC portion of rate base		1.20	.60
On accumulated deferred taxes		(.48)	(.24)
Taxes:			
On accumulated deferred taxes		(.16)	(.08)
On equity portion of AFUDC rate base return		.40	.20
Total		5.96	5.48
Flow-Through Required Revenues			
AFUDC interest expense		$5.00	$5.00
Tax effects of interest expense: current taxes	(6.67)	3.33	3.33
Return: On AFUDC portion of rate base		1.20	.60
Taxes: On equity portion of AFUDC rate base return		.40	.20
Total	(6.67)	$9.93	$9.13

What is the basis for these additional returns and taxes? Let us first look at year one. At the beginning of the year, rate base includes $10 million of capitalized AFUDC expense incurred in the previous year. The $10 million higher rate base is allowed an overall return of $1.2 million (or $10 million times the 12 percent rate of return). Taxes also must be included in the cost of service on the equity portion of this higher allowed return. The equity portion of the return is $0.60 million (see *supra*, on the weighted costs of capital), and the taxes due on the equity return are $.4 million.[77]

At the beginning of year two, rate base is higher by $5 million, since $5 million of the original $10 million was depreciated in year one. The return on the $5 million in year two is $.60 million at a 12 percent rate of return, and the taxes on the equity portion of the return are $.20 million, calculated in the same manner as for year one.

Note that the return on the AFUDC portion of rate base and the taxes associated with the equity part of that return affect revenue requirements identically under normalization and flow-through, since the AFUDC interest expense ($10 million) is capitalized in the same way in either case. The difference between the policies [78] is in the return and taxes associated with the accumulated deferred taxes under normalization.

With normalization, rate base is lowered in accordance with Commission policy, at the beginning of year one, by $4 million, or the amount of deferred taxes accumulated from the prior year (year zero). The lower rate base means that the allowed return is lowered—by the deferred taxes times the rate of return, or $4 million times .12 = $.48 million. This is shown on the table as a negative, since it represents a decrease in the revenue requirements. The associated tax allowance is also decreased by an amount equal to the tax multiplier times the return on the equity portion of AFUDC in rate base.

For year two, rate base is lowered by $2 million of accumulated deferred taxes under normalization, and the return and tax allowance components of cost of service are adjusted downward by $.24 million and $.08 million, repsectively. The derivation of the return and tax allowance for year two follows the same method as used for year one.

Thus, under normalization, the AFUDC interest expenses along with the

---

[75] The following iterative process demonstrates precisely how this result is achieved. If a $10 tax deduction lowers taxable income by $10, then at a 40% tax rate, actual taxes would be lowered by $4. Lowering the cost of service tax allowance (and therefore the cost of service revenues) by $4 in order to match actual taxes would lower taxable income by $14 ($10 plus $4). This in turn would reduce actual taxes by an additional $1.60 ($4×.4), for a total of $5.60 ($4 plus $1.60, or $14×.4). The tax allowance would again have to be lovered by an additional $1.60, for total of $5.60, in order to match actual taxes. But lowering the tax allowance by an additional $1.60 would lower taxable income by an additional $1.60, for a total reduction in taxable income of $15.60 ($10 plus $4 plus $1.60). The lower taxable income of $15.60 means a reduction in actual taxes of $6.24, again a mismatch between tax allowance and actual tax. This processs continues until the tax allowance equals t/(l–t) times the initial tax deduction, where t is the tax rate. In this example, the $10 million deduction lowers the tax allowance by $6.67 million or .4/(1−.4) times $10 million. The formula t/l–t is commonly referred to as the "tax multiplier."

[76] This is an oversimplification. For construction periods greater than one year, rates are lowered under normalization before the plant becomes operational to reflect the benefits achieved by the company in having the use of the deferred tax funds and thereby decreasing its needs for external capital. See Section II.E.1, *infra*, for further discussion of this point.

[77] The taxes are calculated using the tax multiplier, as described, *supra*, and can be shown mathematically as $.60 milion times t/(l–t), where t equals the tax rate.

[78] Other that the differences in the direct tax effects of the interest expense.

return and tax benefits derived from the use of the deferred tax funds are allocated to rates charged during the operating life of the plant in years one and two. In contrast, flow-through lowers rates by substantially more than the initial tax benefits during the construction year and must raise rates significantly above the allocated interest expense levels ($5 million) during the operating life.

The comparison between normalization and flow-through can also be made from a different perspective. Assume flow-through as the base case and examine the incremental effects of normalization, as shown in Table 1. During the construction year zero, required revenues are higher by $6.67 million as compared to flow-through reflecting the allowance of $4 million in deferred taxes plus enough allowance for current taxes on the additional revenues so that the utility retains the $4 million of deferred tax funds. Then, during each of the two operating years, required revenues are reduced by the reverse of the above process. In addition, since accumulated deferred taxes are used to reduce the rate base for each period, there is a reduction in interest payments, return on equity and taxes on the equity return.

Now consider the overall impact of normalization as compared to flow-through on customers' rates. Under our example, customers pay $6.67 million more in rates in year zero than would be the case under flow-through rates. In years one and two, however, required revenues (and rates) are reduced by $3.97 million and $3.65 million, respectively, or a total of $7.62 million. Although this net customer impact is realized only through rates, for explanatory puposes an analogy can be constructed comparing the rate consequences of normalization to those of a loan advanced by customers. Admittedly, this analogy is somewhat strained since the monies provided by customers can be characterized, at most, as an involuntary loan. Nonetheless, so that we may evaluate the results, let us assume that the additional revenues generated by normalization in year zero constitute such a loan and that the subsequent rate reductions in years one and two equate with a repayment of the principal plus interest, the interest being a return to the ratepayers on their collective loan.

In this analogy, the customers advance $6.67 million in year zero and receive (1) $3.33 million of the "principal" plus $.64 million "interest" in the first year and (2) the remaining $3.33 million of the "principal" plus $.32 million "Interest" in the second year.[79] The net effect is that customers realize a "rate of return" of 9.6 percent on the additional revenues they pay in year zero.[80] Moreover, this 9.6 percent "rate of return" corresponds exactly to the savings that the utility realized by initially receiving the additional revenues from normalization, i.e., its assumed after-tax cost of capital.[81]

In evaluating the "rate of return" customers realize under this "loan" analogy, it is noteworthy that the "return" is tax free. Because the "return" actually is realized in the form of reduced utility rates, it is not reported as income by the ratepayer. To compare this "return" with other returns that are subject to taxes, one must convert it to a before-tax return. The effective before-tax rates of return for selected tax rates using our example of a 9.6 percent after-tax rate of return are: [82]

Marginal tax rate (percent)

	Before tax rate of return (percent)
0	9.6
20	12.0
36	15.0
50	19.2

This comparison shows that the higher the marginal tax bracket, the higher will be the effective before-tax return. In terms of our example, it shows that a customer in the 20 percent marginal tax bracket realizes a 12 percent before-tax "return", i.e., a "return" equal to the utility's assumed overall cost of capital or allowed rate of return. A customer in the 36 percent marginal tax bracket realizes the same "return" as the common stockholders of the hypothetical utility, 15 percent. Finally, a customer in the 50 percent marginal tax bracket (e.g., an industrial customer or another privately owned utility) realizes a "return" above that of the common stockholders.

Under the assumptions that the utility's capital structure and component capital costs are the same with both policies, the customer's "return" on the deferred tax "loan" will be equal to the utility's after-tax cost of capital. However, this capital cost value as well as the utility's overall cost of capital depends upon the utility's capital structure and component costs of capital. As a result, the customer tax rates required to equate the customer's effective before-tax "rate of return" with the utility's overall and common equity costs of capital may not be precisely as those depicted above. The above results, however, are indicative of the results that would be obtained by using more realistic values for the parameters.

Of course, many of the jurisdictional utility's customers are municipally owned electric and gas distribution systems that have no obligation to pay Federal or state income taxes. For these customers, the utility's after tax rate of return (9.6% in our example) would be the "return" they would receive in the form of lower wholesale rates.

This analogy between normalization and a customer "loan" should be further qualified. The customers who provide the "loan" may not be the same as those who receive the "return of the principal and interest" because as time passes, customers move on and off utility systems. By the same token, however, one can point out that, under flow-through, the customers who pay the expenses (e.g., AFUDC interest) may not be the same as those that get the tax benefits from the deductibility of the expenses. In our example, flow-through gives these tax benefits and more (the $3.67 million above the $4 million tax benefit) to the customers during the construction period. However, it is the customers during the operating life of the plant who must pay the AFUDC interest expenses. In addition, they are required, under flow-through, to pay additional sums to make up for the lower revenues provided by customers during the construction period.

One final point should be made before discussing the cash flow impact. Our example assumed a one-year construction period. Relaxing this assumption to allow for longer, more realistic, construction periods would show that the deduction from rate base of accumulated deferred taxes under a

[79] An argument could be made, and is with respect to certain normalized items like accelerated depreciation, that the "loan" is not from customers but rather is from the Treasury since it is the tax regulations that permit a utility to write off certain expenses faster than they are recouped in rates. But, to make this argument hold for all normalized items, one also would have to argue that the Treasury makes negative "loans", i.e., requires the utility to make "loans" back to the Treasury on items where expenses are recouped in rates prior to when they can be used as a deduction for tax purposes. An example of this would be the plant removal costs. However, in either case, it is the consumer whose rates reflect the positive and negative consequences of such "loans."

[80] If the customers' discount rate were equal to 9.6 percent, the present value of the revenues paid under flow-through and under normalization would be equal, and the customers, as a group, would be indifferent between the two policies.

[81] Using the notation of the Mathematical Notes to Table 1, the after-tax cost of capital is computed as:

$$h(1-y)d + k(1-d) = (.10)(.60)(.60) + (.15)(.40) = 0.96 \text{ or } 9.6\%$$

[82] The formula used to convert after-tax rates of return to before-tax rates of return is:

$$r_b = \frac{r_a}{(1-y)}$$

where:
r_a = after-tax rate of return
r_b = before-tax rate of return
y = tax rate

policy of normalization reduces rates during the construction period below what they would have been had the utility not engaged in building new plant.[83] From our earlier discussion, this reduction in rates can be viewed either as a "return" on the customer "loan" or as a pass-through of the savings achieved by the utility as a result of having the deferred tax funds as a source of capital.

2. Impact on Cash Flow

In general, normalization tends to improve a utility's cash flow as compared to flow-through when the cash flow is most needed and to decrease it when the need is less.[84] This conclusion follows from an understanding of how the two methods work. For those expenses that are paid by the utility before they are allowed to be collected in rates (Type I timing differences), normalization provides funds (deferred tax debits), in the periods when these expenses are paid and so lessens the impact of those expenses on the utility's cash flow. Subsequently, when the utility is collecting the expenses in rates, normalization reduces the utility's cash flow by permitting a lower than acutal tax allowance in rates (deferred tax credits). Similarly, for expenses that are collected in rates prior to when the utility incurs them (Type II timing differences), normalization reduces cash flow when the expenses are being collected in rates and increases it later when the expenses are being paid by the utility.

By referring to our single transaction AFUDC interest expense example, we can see more precisely why this occurs and, in addition, how the cash flow impact of normalization on utilities can be estimated. Table 2, *supra*, shows calculations of the utility's internal cash flow for each of the three years. Consider the construction period (year zero) when the utility is paying the interest expenses but not collecting them in rates. The utility has incremental cash flow needs of $10 million—the AFUDC interest expense. Normalization helps the utility to meet this cash flow need by providing $4 million in additional cash—the deferred taxes. Flow-through does not. Under flow-through, the net cash outflow arising from the AFUDC interest expense is $10 million. The net cash outflow under normalization is only $6 million. Thus, when the utility must pay for an expense in a period prior to when that expense is recovered in rates, normalization provides a cash inflow (deferred taxes debits) to reduce the net cash outflow of the utility. Further, the cash inflow from deferred taxes is in direct proportion to the incremental cash flow need of the utility since it is equal to the tax rate times the incremental cash flow need created by the timing difference transaction ($10 million × .4 tax rate = $4 million in deferred tax debits).

Now consider the operating life of the plant. In each of these years, the utility's internal cash flow position is improved by the fact that it is collecting $5 million in rates for which it has no current liability. This $5 million is the amortized portion of the $10 million in AFUDC interest expense and is represented in the company's financial statements as the difference between annual book and tax depreciation charges ($55 million–$50 million). During each of these years, normalization reduces the utility's internal cash flow by $2 million reflecting the pass-through to customers of the $4 million in tax benefits that were obtained by the utility during the construction period. Examining the income statement of Table 2, we see that the utility has current (actual) tax expenses of $6.24 and $4.12 million in years one and two, respectively. But the cost of service (Table 1) shows a tax allowance of only $4.24 million in year one and $2.12 million in year two.

The most important conclusion to be drawn from this analysis is that the cash flow provided by normalization is directly proportional to the incremental cash flow needs of the utility as measured by the expense or revenue transaction for which a timing difference arises. Further, this relationship is simple and strightforward. For any period in which a utility must pay an expense which it will collect through rates charged in some other period(s), earlier or later, normalization increases cash flow in the current period by an amount equal to the tax rate times the expense. For any period during which a utility collects in rates for an expense it has to pay in some other period(s), earlier or later, normalization decreases cash flow by an amount equal to the tax rate times the portion of the expense collected in that period. In general, we can say that, under normalization, whenever a utility has a cash flow need created by a timing difference expense or revenue item, the utility's internal cash flow is increased by the tax rate times the amount of the need. Similarly, whenever a utility has "excess" cash due to its collecting monies for expenses or revenues paid in other periods, normalization reduces the size of the "excess" by the tax rate times the amount of the "excess."

This relationship between the internal cash flow generated by normalization (positive or negative) and the cash flow needs arising from timing difference transactions (positive or negative) provides us with a simple and reliable measure of the impact of normalization on a utility's cash flow situation. Using a reasonable estimate of the composite federal/state tax rate of 50 percent, we can say that normalization provides additional cash in the amount of 50 percent of any incremental cash need arising from timing difference transactions and, similarly, reduces any incremental cash "excess" by 50 percent.

3. Impact on Rates of Return

We turn now to a consideration of the impact of normalization on stockholders' rates of return. Our propose here is simply to show that if the rate of return *allowed* on common equity is the same under both policies there is no reason for the rate of return *earned* on common equity to be different. To be more specific, deferred taxes do not accrue to utility stockholders.

In our numerical example in this section, we assumed that the cost of common equity, and thus the allowed rate of return on common equity, was 15 percent under both policy options. Table 2 shows the year-by-year financial results of the utility under each policy when the total revenues realized exactly equal the total revenues allowed (i.e., required revenues per Table 1). Examining Table 2 we find that under neither policy do investors earn more than 15 percent on their incremental common equity investment. In both cases, they earn exactly 15 percent.

Under flow-through, the equity investment at the beginning of years one and two is $44 million and $22 million, respectively. The net income available for distribution to the common equity stockholders is $6.6 million in year one

[83] This assumes a gross-of-tax AFUDC rate method. See Section II. E. 1, *infra*, for a discussion of the effects of the net-of-tax AFUDC rate method.

[84] In our example and in our discussion in this section, we assume the interperiod allocations of costs and revenues under tax regulations are coincident with the cash basis of transactions whenever those regulations differ from the ratemaking allocation policies. This is an oversimplification but not a gross one. Consider the following examples of items covered under the proposed regulation. Construction-related interest, taxes, and pension expenses are all recognized for tax purposes in the periods when they are paid by the utility while, for ratemaking, these expenses are allocated over the life of the associated properties. Regulatory commission expenses are recognized for taxes when incurred (cash basis) but may be spread out over two or more years for ratemaking. Similarly, when IRS regulations permit a shorter deprecation life than regulatory policy, the IRS recognition of the expense is closer to the point when the outlays were made. These are all examples of Type I timing differences. Removal costs, cited earlier as an example of a Type II timing difference, are recognized at the time of cash outlay for tax purposes but over the life of the associated plant for ratemaking. In general, there is a tendency for the interperiod allocations of costs and revenues under tax regulations to more closely follow the cash basis of transactions than the ratemaking interperiod allocations.

and $3.3 million in year two. Investors thus realized a 15 percent rate of return in each year ($6.6 million on $44 million and $3.3 million on $22 million). The comparable statistics under normalization show the same result—15 percent rates of return on common equity ($6.36 million on $42.4 million and $3.18 million on $21.20 million).

The reason that common equity stockholders do not realize higher rates of return on their investments under normalization than under flow-through is because of the deferred tax accounting. Taxes deferred are recorded on the utility's balance sheet in an accumulated deferred tax account that is separate from the common equity accounts. Further, the policy of subtracting accumulated deferred taxes from rate base effectively treats these funds as ratepayer investment and provides ratepayers with a "return" in the form of lower rates. In sum, the taxes deferred under a normalization policy do not accrue to the benefit of utility investors. If they benefit anyone, it is the customers.

Even when the more realistic assumption of a lower cost of common equity to normalized utilities than to flow-through utilities is employed,[85] it does not affect the above conclusions. The results would show realized rates of return equal to those allowed.

C. Multi-transaction Case

So far the analysis has concentrated on the time pattern of the impacts of the proposed rule for a single timing difference transaction. However, much of the controversy surrounding normalization and flow-through is based on the combined effects over time of a group of similar types of timing difference transactions or all timing difference transactions affecting a particular company.

As discussed previously, a necessary characteristic of timing differences, taken individually, is that the difference "reverses or turns around." This reversal or turn around occurs in the case of Type I and Type IV timing differences when the amount of an expense or revenue transaction recognized for tax purposes is *greater* than that for ratemaking in one period and, in some later period(s), the amount of the transaction recognized for tax purposes is *less* than that for ratemaking. For Type II and Type III timing differences, the opposite occurs. For all types, however, the reversal is not complete until the total amount recognized for taxes equals the total amount recognized in rates.

In this section, we consider the implications of combining the effects, over time, of several timing difference transactions either of the same type (e.g., AFUDC interest) or of different types (e.g., AFUDC interest and regulatory commission expenses).

Our purpose is to examine deferrals—both of the expense transactions that give rise to timing differences and of the tax effects resulting from timing differences under a normalization policy. We explain how "continual deferrals" of these expenses and tax effects can be said to exist as long as there are any timing differences for which a complete "reversal or turn around" has not yet occurred. We also explain how "continual deferrals" of taxes under normalization are necessarily associated with "continual deferrals" in the rate collection of the expenses that give rise to the deferred taxes, and how the "deferred expenses" are necessarily of a larger dollar magnitude than the associated "deferred taxes." Finally, we explain the conditions under which rates under normalization may be lower than those under flow-through in the presence of "continual deferrals."

We again assume that the interperiod allocation of expenses for taxes is coincident with the cash basis of the transactions.[86] Expenses are recognized as tax deductions when funds are expended for them. While this is obviously not valid for all timing differences, it does not distort the conclusions of the analysis. The most important reason for employing this assumption is that it permits one to make some important points in a clearer fashion than would otherwise be possible. This assumption allows us to evaluate the multiple transaction case from the perspective of the utility. Specifically, we will proceed by looking first at the effects on the firm of the cost of service treatment of the timing difference transactions. We then consider the effects of the tax deferrals under a normalization policy. Finally, we look at the full cost of service differences in rates (normalization minus flow-through).

BILLING CODE 6450-01-M

[85] See Section II. D, *infra*, for evidence of this cost of capital differential, and Section III. A. 3, *infra*, for a measure of the effects on rates of cost of capital differentials.

[86] See Sections II.A. and II.B.2, *supra*.

Table 4

Multi-plant Example Illustrating Utility Cash Outlays for AFUDC Interest Expenses Under Varying Conditions of Growth (g)

BILLING CODE 6450-01-C

Table 4 presents data on AFUDC interest expenses for four illustrative cases. The data are based on the AFUDC timing difference example developed in the previous section. However, instead of looking at a single timing difference transaction arising from the construction of a new plant, we now postulate varying levels and types of nominal growth for the utility and look at the combined impact of a number of such transactions.[87] Specifically, we postulate that the utility periodically builds a new plant (whether for growth or replacement) with the same characteristics as the plant in our earlier single transaction example (i.e., one year construction period, two year operating life) but with progressively higher costs.[88] During the construction period of each new plant the utility pays AFUDC interest expenses. It then recoups these expenses in rates charged to customers over the two-year operating life, thus achieving a reversal of the original difference for each transaction.

Table 4 shows the AFUDC interest expenses from the perspective of the utility. The first three cases assume constants growth at 0, 5, and 10 percent, respectively. The fourth case assumes staggered construction activity with the utility paying for the new plants at the 10 percent growth case costs.

The yearly totals for each case represent the utility's net outlays on AFUDC interest. A positive value indicates that the utility pays out more for AFUDC interest than it is allowed to collect in the rates charged to customers for that year. In other words, the recognition of the expense for tax purposes is greater than that for ratemaking. A negative value indicates that the utility receives more in rates than it pays out in AFUDC expenses.

In Case 1 (zero growth), we observe the net outlays on AFUDC interest dropping from $10 million to $5 million to $0 and remaining at $0 thereafter. In part, this is due to the assumption that the utility had no existing plants in year zero. If we had postulated an ongoing utility with existing plants at the same costs, the totals would have been zero throughout. The important point of the case, however, is that there is no "reversal or turn around" on a composite basis. The AFUDC interest on each new project exactly offsets the reversals occurring on each of the old projects, and there is always a balance of unrecovered expenses.

Cases 2 and 3 exhibit similar results. The reasons for presenting both of these cases will become apparent later. As with Case 1, no reversal occurs for either of these cases. In fact, because of the positive growth, we find the utility continually paying out more for AFUDC interest than it is allowed to recoup in rates. The unrecovered balance of AFUDC interest grows.

The results in all three cases may be viewed as "continual deferrals" of the utility's collection in revenues of the AFUDC interest expenses for which it has expended funds. Closer examination provides an understanding as to why these results should be expected. The explanation resides in the way the costs are allocated over time. Examine the component costs for any year. The negative values indicate the amounts of previously incurred expenses that are being recovered from customers during that period. These expenses are associated with the plants that are providing services to the customers during that period. The positive value for that year, however, represents an expense paid by the utility for the construction of a plant that will not serve customers until the next year. If we look to the next year we see that the utility is in fact being allowed to recover that expense from the customers being served at that time. Over the three-year construction/operating life of each plant the utility recovers all the costs associated with the plant; it incurs no loss. For each plant, the reversal occurs and completely offsets the original cost outlay. The reason for the "continual deferral" is that the utility is continually incurring expenses on new plants intended to serve future customers and these expenses are not permitted to be collected from customers until those plants are operating and serving the customers.

Case 4 shows the effects of staggered construction activity. In this case, we find that the utility sometimes collects more in revenues than it pays out on AFUDC interest. This may be referred to as a reversal but it is not the same as that which occurs for a single transaction. For a single transaction the reversal is a one time event. In the Case 4 example, the totals fluctuate between positive and negative over time. Further, in no single year do we find that all of the previously incurred AFUDC interest expenses have been recovered in rates. There is always a balance of unrecovered interest expenses. As a result, even this case can be referred to as one of "continual deferral."

This analysis of combined timing difference transactions has been directed toward the expense item itself rather than the associated tax effects. The purpose has been to show how the interperiod allocation, by regulators, of specific expenses affects utilities. The illustrative examples show clearly that utilities do not recover, in each period, all the expenses for which they actually had to expend funds. Further, the examples show how "continual deferrals" may arise in the customer's payment of (or the company's collection for) expenses that have been incurred by the utility.

Table 4 shows how the interperiod allocation of AFUDC interest results in a continual deferral of these expenses if the evaluation is made with respect to the effects of all such transactions in each year. A similar table can be constructed for the tax effects of timing differences under a normalization policy. Instead of the base transaction having the cash flows of $10 million ($5 million), and ($5 million), it would have $4 million, ($2 million), and $2 million. This would reflect the collection by the utility of $4 million *more* for taxes in rates than it actually paid during the construction period and the collection in rates of $2 million *less* for taxes than it actually paid during each of the operating years. Applying the various growth rates to these numbers and summing for each year would complete the table. The conclusions drawn from such a table would be similar to those we obtained from Table 4. The totals would indicate the net outlays of the utility for taxes. A negative value would indicate that the utility collected more in rates than it paid out in taxes; a positive value would indicate the reverse. For the zero growth case, we would have a time pattern of ($4 million), ($2 million), $0, $0, $0, *et cetera*. For the 5 and 10 percent growth cases, the totals would all be negative indicating that the utility was continually charging customers more for taxes than it was actually paying. For the staggered construction case, the totals would fluctuate like those in Table 4. For all cases, however, the continual deferral of taxes being paid by the utility would coincide with (or "match") the continual deferral of AFUDC interest being collected from customers.

Two points are important here. First is the fact that whenever the utility is deferring the payment of taxes under normalization due to the existence of timing differences, it is also deferring the collection of the associated

[87] For simplicity, we examine the combined impact of a number of transactions of the same type (AFUDC interest). However, one can view each of the transactions considered as a composite of all the different types of timing difference transactions affecting the utility. The conclusions would be the same.

[88] Alternatively, one could postulate a growing number of plants at the same per unit costs.

expenses. The second point concerns the magnitude of the deferred taxes relative to the deferred costs. As long as the tax rate is less than 100 percent, the deferred taxes will always be less than the deferred costs. With a tax rate of 50 percent the deferred taxes would be exactly half the deferred costs.

Table 5 presents data comparable to Table 4, but it addresses the revenue requirements under normalization in relation to those under flow-through for varying growth conditions. The data are derived from the single transaction example of Table 1 with the various growth rates applied for projects commencing in each succeeding year.[89] The totals indicate the net difference in revenue requirements under the normalization and flow-through policies. A positive value indicates that the combined impact of all the timing difference transactions results in higher revenue requirements under a normalization policy than under a flow-through policy. A negative value indicates the reverse.

BILLING CODE 6450-01-M

[89] The ability to obtain the revenue requirement differences for succeeding projects by the simple multiplication of the prior project's differences by the growth rates is based on the mathematics of the revenue requirement differences. See the discussion of the "base" difference model in Section III, *infra*.

BILLING CODE 6450-01-C

For the zero growth case, we find that normalization yields higher revenue requirements during the first two years but lower revenue requirements from then on. Similar results are obtained with a 5 percent growth factor. The difference between these two cases is that, after the first two years, the latter shows a widening difference over time while the former shows a constant difference.

In Case 3, with the growth rate at 10 percent, we find that normalization required revenues are above flow-through required revenues in all years and that after year 3, the gap widens over time. A prerequisite for this occurrence is reasonably steady growth at this high level.

Case 4 illustrates what happens when growth is not steady. In this case, normalization required revenues are higher than those produced by flow-through in some periods and lower in others. The implication is that while a firm may be growing at a reasonably high rate, if its construction activity should drop off, even for one year, normalization rates may fall below flow-through rates.

To summarize, deferrals of taxes due to normalization for timing differences can only occur when the collection in rates of the costs that gave rise to those tax defferals are also continually deferred. Further, the non-tax costs for which recovery is deferred are of a higher dollar value than the associated taxes that are deferred, given a tax rate of less than 100 percent. It is inconsistent to set rates to recover only the actual taxes paid in each period while simultaneously recovering less than the actual amount of other expenses paid in each period. Finally, from a pragmatic perspective, the overall impact on rates paid by consumers under the alternative policies of flow-through and normalization depends critically on the type and level of growth that each utility experiences in the future. Other things being equal, [90] low steady growth produces the result that normalization rates tend to be lower than flow-through rates while high steady growth produces the opposite result. Fluctuating growth results in a mixture over time of normalization rates above flow-through rates and normalization rates below flow-through rates.[91]

The generality of these conclusions should be underscored. The example of AFUDC interest expenses can easily be viewed as a composite of a variety of different timing difference transactions. Since Type I timing differences appear to be the most common and most significant, the impact of this type has been emphasized. While the assumptions relied on in the illustrative examples (life of the plant, rates of return, etc.) may not be wholly realistic, the qualitative conclusions would not change if more realistic assumptions had been used.

D. Cost of Capital Effects

The discussion so far has assumed that the cost of capital is the same for utilities using normalization as for those using flow-through. Various studies, however, have found evidence that the cost of capital is higher to utilities employing flow-through than it is to utilities using normalization.[92]

A number of theoretical arguments have been advanced to support the hypothesis of a normalization/flow-through cost of capital differential. First, the predominant effect of the timing differences affecting utilities is a reduction in current tax liability and an increase in future tax liability. Normalization provides a reserve of funds to pay the future tax liabilities. Under flow-through, however, utilities will have to seek additional rate increases to meet the higher future tax payments. Difficulties that may arise in obtaining the necessary rate increases create the additional risk which, in turn, increases the returns that lenders and investors require from flow-through utilities. This argument is cited most frequently. Implicit in this argument, however, is the assumption that rates under normalization will fall below rates under flow-through during the time frame considered relevant to investors. Otherwise there would be no necessity for rate increases under flow-through. However, under plausible growth and/or inflationary conditions for the electric utility industry, this reversal in the normalization/flow-through rate difference may not occur in the foreseeable future so that the assumption of the above argument may not hold.[93]

A second argument used to support the normalization/flow-through cost of capital differential is that regulatory commissions that require flow-through treatment for the tax effects of timing differences tend to be viewed by investors as having a pro-consumer orientation relative to those commissions that permit normalization. From an investor's perspective, this bias may increase the risk that a flow-through utility may not earn adequate returns over time. This argument is one of correlation rather than causality. The additional risk is not due to factors inherent in the method by which timing differences are handled. Rather it is based on the perception, correct or not, that those commissions that require flow-through are also the ones that give inadequate returns, allow attrition to erode earnings, and take other actions that benefit ratepayers at the expense of stockholders.

A third argument is that, when compared to flow-through, normalization stabilizes the cash flow of utilities. Normalization more closely matches cash inflows with cash outflows. It provides additional cash inflow (with deferred tax debits) when an expense is recognized for tax purposes but not for rates. Conversely, it reduces cash inflow (with deferred tax credits) when an expense is permitted to be included in rates but is not recognized for taxes. Since, in general, the recognition of expenses for taxes more closely coincides with the cash basis of transactions than the recognition for ratemaking, normalization reduces the fluctuations in utilities' cash flow and thereby reduces the risks associated with utilities' ability to meet short-term financial obligations.

Finally, a utility's external capital needs are less under normalization than under flow-through. As can be seen from (3) above, normalization increases the availability of cash from internal sources (deferred tax debits) when it is needed. Thus, the firm's external capital needs are less. If institutional constraints are such that the price a utility pays for capital increases with the size and frequency of its demands, then flow-through utilities which require more external capital will have a higher cost of capital.

For whatever reason, to the extent that flow-through companies are perceived to be more risky than normalized companies, one expects some combination of the following

[90] The growth rates referred to here are nominal growth rates, i.e., they include the effects of inflation. The cost of capital (allowed rate of return) also is a function of inflation. The inflation rates implied by each should be consistent. They are not in these examples since the main purpose was to show the effects of different growth rates irrespective of the relative magnitude of the real and inflationary components of these rates.

[91] See Section III.A.3, *infra*.

[92] These studies were concerned primarily with the application of normalization and flow-through to accelerated depreciation, a timing difference that is not within the scope of the proposed rule. See, Arthur Anderson and Co. (1977), Berndt, Sharp and Watkins (1979), Brigham and Pappas (1970), Corey (1979), Mlynarczyk (1969), O'Donnell (1965), and O'Donnell (1968).

[93] See, e.g. Section III.A.3, *infra*.

effects to be observed of flow-through companies when compared with normalized companies:

(1) Higher cost of debt;

(2) Higher cost of preferred equity;

(3) Higher cost of common equity; and/or

(4) Lower leverage (less use of debt relative to equity in financing operations).

All of these effects have been observed in the above-referenced studies.

In addition, some recent data supporting the conclusion that flow-through ratemaking results in higher capital costs than normalization are presented in Tables 6 and 7. These data tend to indicate that flow-through utilities cannot obtain as much debt financing as can normalized utilities. In each of the years 1974 through 1978, the debt ratio of flow-through companies is (slightly) less than that for normalized companies. In addition, flow-through utilities appear to pay higher interest rates on the debt they do obtain since debt cost is inversely related to bond ratings and interest coverage (times interest earned) That flow-through companies have a higher cost of common equity is indicated by the consistently lower market-to-book and price-earnings ratios.

Since these comparative data relate primarily to the normalization or flow-through of accelerated depreciation timing differences, definitive statements on the magnitude of the cost of capital differentials arising from the currently proposed rule are not feasible. It is reasonable to conclude, however, that capital costs will be lower under the normalization policy contemplated in the proposed rulemaking.

Table 6.—*Selected Comparative Financial Data for Normalized and Flow-Through Utilities, 1974–78*

	79 Normalized companies	21 Flow-Through companies
Times interest earned before FIT:

E. Other Considerations

1. *Gross-of-Tax vs. Net-of-Tax AFUDC Rate Methods.*—Under normalization, there are two general methods currently permitted to be used in accounting for AFUDC on new plant construction—the gross-of-tax and net-of-tax AFUDC rate methods.[94] The treatment of the timing difference arising from the interest expense portion of AFUDC is affected by the choice of these methods with the result that the effects on rates are not the same. In particular, the net-of-tax methods fails to pass on to customers, in lower rates, the full cost savings realized by utilities during the construction period of plant additions.

Under both methods, AFUDC is capitalized and included in the value of plant going in service. With the *gross-of-tax method,* AFUDC is accrued during the plant construction period using a before-tax AFUDC rate. At the same time, deferred taxes are accrued from the deduction of the interest expense portion of the AFUDC on a current basis. The deferred taxes provide cash inflow to the utility and lessen the need for financing. The savings achieved by this are passed on to customers by deducting accumulated deferred taxes from rate base. Rates during both the construction period and operating life thus reflect the pass-through of the savings realized by the utility in having the use of the deferred tax-derived funds for its financing.

In contrast, the *net-of-tax method* accrues AFUDC at the lower, net-of-tax AFUDC rate. This lower rate is intended to achieve the same result as the gross-of-tax method by reducing the amount of AFUDC capitalized in rate base by the tax effects (benefits) of the interest portion of the AFUDC. However, the result is not the same since there are no accumulated deferred taxes or anything comparable that can be used to reduce rate base during the period of new plant construction.

If we assume that there is no compounding of AFUDC (i.e., if no interest on interest is permitted), then the value of the rate base of a new plant when it goes into operation under the net-of-tax method will equal the value of the rate base less accumulated deferred taxes under the gross-of-tax method. As a result, the impacts of the two methods on rates would be the same during the operating life of a plant. A difference, however, occurs during the construction period. Under the gross-of-tax method, accumulated deferred taxes reduce the rate base for existing plant and thus reduce rates. Under the net-of-tax method there are no deferred taxes so that rates during the construction period are higher. Thus, the time value of the customer's "loan" during construction is lost to customers under the net-of-tax method.

The use of compounding has the effect of minimizing the revenue differential between the gross-of-tax and net-of-tax methods but does not eliminate it. Because the net-of-tax AFUDC rate is lower than the gross-of-tax rate, less AFUDC is accumulated through compounding under the net-of-tax method. However, this compounding effect is substantially smaller than the previously discussed rate base deduction effect.

[94] See, Order No. 561 and 561–A, Order Adopting Amendment to Uniform Systems of Accounts for Public Utilities and licenses and for Natural Gas Companies, and Order Denying Applications for Rehearing and Clarifying Prior Order, in Docket No. RM75–27, issued February 2, 1977 and August 1, 1977; Order No. 530–A, *supra.* The Commission has suggested that utilities follow whichever method is approved for retail rates in their wholesale filings.

2. *Special Projects* [95].—Special projects present situations where rates will be lower under normalization than under flow-through. Special projects are companies formed solely to finance and operate a single project, such as the Alaskan Natural Gas Transmission System (ANGTS). Under flow-through, tax benefits from construction-period timing differences would not be passed on to customers since there would be no sales during that period and therefore no rates through which the customers could realize the benefits. Normalization, however, would cause deferred tax debits to be accumulated during the construction period which would later be used to lower rates over the operating life.

During the project's construction period, significant costs such as AFUDC interest are incurred and may be recognized as an expense in determining tax liability. Because there are no sales and therefore no income is generated during this period, the project has negative taxable income, i.e., it is in a tax loss position. The owners can usually use this tax loss to offset other income and thereby lower their overall tax liability. In other words, there is usually no reason to carry forward tax losses to the operating phase of the project.

The costs we are considering here, however, are costs that create timing differences. By writing off these costs for taxes during the construction period, the participating firms do not have the opportunity to use them as tax deductions during the operating lives of the projects when revenues to cover the specified costs are collected. Their tax liability during the operating life will, as a result, be higher than it would have been had those costs been deductible and used to determine tax liability during the operating life.

Using our numerical example in Section II. B., we can compare the effects of the flow-through and normalization methods on required revenues for a special project.

Required Revenues

Year	0	1	2
Normalization	0	$71.96	$63.48
Flow-through	0	75.93	67.13
Difference	0	(3.97)	(3.65)

[95] The analysis in this section also would apply to newly-formed companies with more than one project if they experience a development period during which they realize timing difference-derived tax benefits but make no sales and therefore have no rates in which to reflect those benefits.

The firm has a $10 million tax deduction during year zero arising from the AFUDC interest expense. Using this deduction in its tax filing as an offset to other income, the owners are able to realize a tax benefit of $4 million during year zero. Under flow-through, this tax benefit is lost to customers.

For an ongoing utility, flow-through would have lowered required revenues by $6.67 in year zero to pass the tax benefits arising from the AFUDC interest to consumers. For a special project, however, since there are no sales in year zero, there are no rates that would do this. During the operating years, however, setting the tax allowance equal to taxes actually paid (flow-through) results in the same revenue requirements for a special project company as for an ongoing utility.

In contrast, normalization flows the tax benefits of the AFUDC interest to consumers during the operating years. It has no effect on required revenues during year zero for an ongoing utility so that nothing is lost to customers of a special project.

This analysis should be qualified. If a company is unable to utilize all deductions on a current basis, carryforward and carryback provisions of the tax laws may be used. To the extent that construction period deductions are carried forward for use during the operating life of a plant, a flow-through policy would pass the tax benefits of these deductions to customers.

A second consideration relates to projects undertaken by a coporate entity or group of corporate entities that are permitted to deduct expenditures made on a "special project" in a consolidated tax filing. If a regulatory agency permits rates to reflect the consolidated filing, under flow-through current customers of the jurisdictional corporate entity or entities will receive some portion of the benefits that would otherwise have been lost.

III. Empirical Analyses of the Impact of Normalization on Rates for Selected Timing Differences

A. Depreciation-Related Timing Differences

There are three sources of timing differences relating to the amount of depreciation claimed in any year for tax purposes and the amount allowed in ratemaking:

(1) *Method Differences.*—These are differences in the method used to compute annual depreciation charges for taxes and ratemaking that create timing differences. Regulatory agencies generally require the use of straight-line depreciation in setting rates. For tax purposes, however, utilities are permitted to use various accelerated depreciation methods. The result is annual tax depreciation charges greater than ratemaking depreciation charges in the early years of a plant's life and the reverse in later years. Over the life of a plant, however, the sum of the annual depreciation charges for ratemaking and taxes is the same. The faster writeoff of depreciation for tax purposes means that the utility pays lower taxes in the early years but higher taxes in the later years of the plant's operating life.

(2) *Base Differences.*—Certain costs are spread over the life of a plant as part of depreciation for ratemaking purposes but are written off when paid for tax purposes. The ratemaking policy of spreading such expenses over the life of a plant results in a depreciation base for ratemaking that is larger than that for taxes; hence, the phrase "base difference." Examples of expenses that give rise to base differences are construction-related taxes, pensions and interest expenses and plant removal costs.

(3) *Life Differences.*—When the tax life of an asset is different from its ratemaking (or book) life, a timing difference results. Even if straight-line depreciation is used for both ratemaking and taxes and the depreciation "base" is the same, the ability to depreciate an asset for tax purposes over a different period of time (tax life) than that permitted for ratemaking (ratemaking or book life) results in annual tax depreciation charges over the tax life. However, over the remaining ratemaking life, ratemaking depreciation charges will exceed tax depreciation charges (since the latter will be zero).

The treatment of timing differences arising from depreciation method differences—listed as (1) above—was dealt with in Commission Order No. 404. It is not an issue in the current proceeding and its impact is not evaluated in this report.

The treatment of base and life differences is an issue in this proceeding. To evaluate the impact on rates of applying normalization to the construction-related the impact on rates of applying normalization to the construction-related base differences and the life differences, staff developed two simulation models. The models as well as the data used for each industry are described below.

Removal cost base differences, also covered in the current proceeding, are less amenable to quantitative evaluation. A separtate section, below, discusses this item and addresses the

problem involved in attempting to quantify its impact.

1. The Base and Life Difference Models

To evaluate the construction-related "base" differences and the "life" differences, staff developed two simulation models designed to answer the question: "What additional revenues would be required by utilities in each year of the future if they normalized rather than flowed through the tax consequences (or effects) of new base (and life) timing differences?" A positive answer in any year means that normalization results in higher required revenues (and thus, rates) than flow-through; a negative answer indicates the reverse.

For discussion purposes, the "impact" of normalization shall refer to the revenues required under normalization *minus* the revenues required under flow-through. Thus, an increase (decrease) in the impact refers to an increase (decrease) in required revenues under normalization relative to required revenues under flow-through.

The models address the rate impact question only for the base and life timing difference transactions that arise in the initial year or later. Timing difference transactions that arose in previous years, the tax effects of which may have been flowed through or normalized, are ignored.

From an overall perspective, each model is based on an evaluation of the differences over time between normalization and flow-through revenue requirements for the incremental plant additions made by a firm (or industry) under steady growth conditions. The sum of plant additions in each year is considered a single, composite plant addition which generates effects on the normalization/flow-through revenue requirement differential over its construction period and service life. As one moves from year to year, successive composite plant additions and their effects on the revenue requirement differential are considered so that, in period 2 there are two composite plant additions having effects on this revenue requirement differential; in period 3, there are three plant additions; etc. This process can be observed in Table 7, *supra*.

Several simplifying assumptions were used in deriving the model. They are:

(1) Rates are adjusted annually to permit the utility to maintain its earned return at the level allowed. In other words, utilities are assumed to realize their required revenues in each year. Some such assumption is essential to any attempts to forecast events.

(2) Gross plant additions grow at a constant annual rate, in nominal terms, over the forecast period. In fact, there are fluctuations in the growth of gross plant additions at the firm level and, to a lesser extent, at the industry level. The effect of this assumption, however, is simply to smooth out the time pattern of the impacts. [96]

(3) Capitalized expenses (construction-related interest, pensions and taxes) incurred in each year are a constant percent of gross plant additions in the following year. This assumption follows from: a constant growth in gross plant additions; a constant relationship between the capitalized expenses and construction expenditures; and either (a) a one-year construction period (used in the actual derivation of the models) or (b) a constant mix in the construction characteristics of each year's gross plant additions. [97]

(4) The tax and book lives of the composite plant additions, the tax rate, and the costs of capital are constant over the forecast period.

These simplifying assumptions are necessary to provide manageable models with which to evaluate the impact of the proposed rule. It is doubtful that more detailed and complex modeling would yield significantly different results.

As both models are derived in essentially the same manner, the base difference model can be used to illustrate the method of derivation and the mechanics of operation. The starting point is the evaluation of the normalization/flow-through revenue requirement differentials over the construction period and operating life of a single plant addition. This is illustrated in Table 1, *supra*, Section II.B.1, for the simple example of a plant with a one-year construction period and two-year operating life. That example considered only the AFUDC interest expense "base" difference. However, one can just as easily view the $10 million AFUDC interest in that example as the sum of construction-related interest, tax, and pension expenses. The mathematics underlying the required revenue differential calculations of Table 1 are provided in the Mathematical Notes to Table 1. [98]

Growth is introduced into the analysis by hypothesizing new composite plant additions being constructed and going into service in successive years at higher dollar values, reflecting both real growth and higher unit costs due to inflation. Proceeding with the above referenced example and assuming a nominal growth rate in plant additions of 5 percent per year, it is hypothesized that $105 million ($100×1.05) would be spent on new plant construction in year one, AFUDC interest of $10.5 million ($105×.10) would accrue, and the value of the plant going into rate base at the beginning of year two would be $115.5 million. Table 5, *supra*, Section II.C., illustrates the net cost of service effects of this process with the interest expense example and assuming various growth rates. A mathematical representation is provided in Table 8.

For any year, the impact of normalization applied to base differences, defined as the excess of normalization over flow-through required revenues for new plant additions, can be determined by summing the values in the column of a matrix similar to those of Tables 5 and 8 for the desired year. The actual base and life difference models used for the impact analysis (shown in Table 9) are generalizations of the column sums of matrices similar to Table 8 where plant additions have an M year tax life and an N year book life.

In the above explanation of how the base difference model was derived, it was assumed that the cost of capital is the same for normalization and flow-through. In the models presented in Table 9, however, allowance is made for the possibility of different capital costs. This is represented by the fourth component of the base difference model and the fifth component of the life difference model. They are derived in the same manner as the other components.

BILLING CODE 6450-01-M

[96] See Section II.C, *supra*, for a demonstration of how growth fluctuations can cause normalized required revenues to be sometimes above and sometimes below flow-through required revenues.

[97] This latter construction mix assumption encompasses a constant dollar mix of plant additions and a constant time pattern in the construction expenditures for each type of plant.

[98] Note especially equations (7) through (12) for mathematical representations of the components leading to the differences in the normalization and flow-through revenue requirements.

Table 9

Page 2 of 2

Base and Life Difference Models (continued)

Definitions:

BB_0 = Gross book value of plant built in year zero and entering rate base in year 1.

BB_i = Gross book value of plant i, constructed in year i and added to rate base in year $i+1$.

$= BB_{i-1}(1+g)$

BT_i = Gross tax value of plant i.

$= (1-c)BB_i$

C_i = Costs incurred during construction period of plant i, expensed for tax purposes but capitalized in the cost of plant for book and ratemaking purposes.

$= cBB_i$

M = Tax life of plant additions.

N = Book life of plant additions.

RR_t^f = Required revenues under flow-through, period t.

RR_t^n = Required revenues under normalization, period t.

X_i = Taxes deferred during construction period of plant i due to "base" timing difference expenses.

$= yC_i$

y^f = "Pretax" overall rate of return (or cost of capital) under flow-through.

$= h''\cdot d'' + \frac{j''\cdot p''}{(1-y)} + \frac{k''\cdot e''}{(1-y)}$

y^n = "Pretax" overall rate of return (or cost of capital) under normalization.

$= h'\cdot d' + \frac{j'\cdot p'}{(1-y)} + \frac{k'\cdot e'}{(1-y)}$

Z_i = Taxes deferred in each year of tax life (M) due to difference in tax and book depreciation lives.

$= yBT_i\left(\frac{1}{M} - \frac{1}{N}\right)$

c = Capitalized expenses as a fraction of gross plant additions (book basis).

y = Tax rate.

h', h'' = Cost of long-term debt under normalization and flow-through, respectively.

j', j'' = Cost of preferred stock under normalization and flow-through, respectively.

k', k'' = Cost of common equity under normalization and flow-through, respectively.

d', d'' = Debt ratio under normalization and flow-through, respectively.

p', p'' = Preferred stock ratio under normalization and flow-through, respectively.

e', e'' = Common equity ratio under normalization and flow-through, respectively.

BILLING CODE 6450-01-C

The base and life timing differences are evaluated separately to keep the analyses as simple as possible. These separate results, however, can be summed to obtain the combined impact of the two sources of timing differences. To see the basis for adding these impacts, consider a new plant with a five year (book) operating life. The cost of the plant consists of $100 million in construction expenses plus $10 million in expenses that are deducted for tax purposes during the construction period (e.g., taxes, pensions, and interest). When the plant goes into rate base, therefore, it has an initial value of $110 million. The $10 million in capitalized expenses constitute the base difference. The amount depreciable for tax purposes is only $100 million since the capitalized expense deductions of $10 million were used during the construction period. Suppose also that the tax authorities permit the company to depreciate the plant over a four-year period for tax purposes while regulatory authorities maintain the use of a five-year operating life for depreciation. The annual depreciation charge for tax purposes will therefore be $25 million for each of 4 years ($100 million ÷ 4). For ratemaking (and financial statements), however, the depreciation charge will be $22 million for each year of the five-year service life ($110 million ÷ 5).

The following table presents the combined effects of the base and life differences:

[Dollars in millions]

Item	Year 1	2	3	4	5
Base difference:					
Book depreciation	$22	$22	$22	$22	$22
Tax depreciation	25	25	25	25	0
Difference	(3)	(3)	(3)	(3)	22

But these effects can be separated as follows:

[Dollars in millions]

Item	Year 1	2	3	4	5
Base difference:					
Book depreciation	$22	$22	$22	$22	$22
Tax depreciation	20	20	20	20	20
Difference	2	2	2	2	2
Life difference:					
Book depreciation	20	20	20	20	20
Tax depreciation	25	25	25	25	0
Difference	(5)	(5)	(5)	(5)	20

Note that the sums of the separately calculated differences for each year are equal to the differences arrived at by looking at the combined effect. It is this result that enables us to evaluate the two sources of timing differences separately.[1]

2. Data Used in Impact Analyses

Table 10 lists the data used to estimate the impact of the proposed normalization rule on rates for the base and life timing differences. This section explains the bases for the data.

Growth Rate in New Plant Additions(g) [99]
Gas.—5–10 percent
Electric.—7–14 percent

This is the most critical parameter in both models since it is the primary determinant as to whether normalization rates will eventually fall below flow-through rates. Because of this and the high degree of uncertainty surrounding estimates of future long-term growth in the two industries, a range of estimates was used.

The growth rate range for the gas pipeline industry is based on zero percent real growth together with a 5 to 10 percent range for plausible future long-term average inflation. With gas supplies relatively static, future expenditures on plant additions are expected to be primarily for replacements to maintain the existing plant capacity. This hypothesized zero real growth is consistent with the recent experience of Major Class A and B Natural Gas Pipelines and with the American Gas Association (AGA) forecasts of gas utility industry expenditures on "Utility and Pipeline Construction and Maintenance." [100]

Table 10.—*Summary of Data Used in Impact analysis*

	Natural gas pipelines	Electric utilities
Growth rate in new plant	Low: 5 percent. High: 10 percent.	Low: 7 percent. High: 14 percent.
Base year (1976) gross plant additions(BB_b).	$596 million	$12,706 million.
Capitalized expenses as a percent of gross plant additions (c).	4 percent	11 percent.
Composite straight-line book life (N).	23 years	31 years.
Composite straight-line tax life (M).	22 years	28 years.
Capital structure:		
Debt ration (d)	.45	.51.
Preferred stock ratio (p)	.05	12.
Common equity ratio (e)	.50	.37.
Capital costs—5 percent inflation:		
Debt cost (h)	7 percent	7 percent.
Preferred stock cost (l)	7 percent	7 percent.
Common equity cost (k)	12 percent	11 percent.
Capital costs—10 percent inflation:		
Debt Cost (h)	12 percent	12 percent.
Preferred Stock Cost (l)	12 percent	12 percent.
Common equity cost (k)	17 percent	16 percent.
Tax rate (y)	50 percent	50 percent.
Base year (1976) Total required revenues.	$14,748 million.	$50,553 million.

In real (1968) dollar terms, natural gas storage and transmission plant additions by major Class A and B pipelines for the period 1968–1978 are as follows ($ millions):[101]

Year	Plant additions
1968	$1,156.8
1969	1,315.1
1970	830.3
1971	571.0
1972	441.8
1973	379.4
1974	251.0
1975	323.0
1976	161.5
1977	290.6
1978	392.6

The current dollar values of natural gas transmission and storage plant additions by major Class A and B natural gas pipelines are obtained from *Statistics of Interstate Natural Gas Pipeline Companies-1978* (U.S. Department of Energy, Energy Information Administration, October 1979). Handy-Whitman construction cost indices are obtained from *The Handy-Whitman Index of Public Utility Construction Costs: Bulletin No. 109* (Baltimore, Md.: Whitman, Reguardt and Associates, 1979).

These data show a declining trend in the real value of plant additions from 1968 to about 1973. Since 1973, however, the real value of plant additions has

[1] Alternatively, this result can be shown mathematically:

$$D_b - D_t = d_b \times B_b - d_t \times B_t$$
$$= (d_b - d_t) B_t + d_b (B_b - B_t)$$
$$= \{\text{Life}\} \{\text{Base}\}$$
$$\text{(Difference)} + \text{(Difference)}$$

where:

D_b = Book depreciation charge
D_t = Tax depreciation charge
d_b = Book depreciation rate
d_t = Tax depreciation rate
B_b = Book base
B_t = Tax base

[99] This growth rate includes the capital expenditures for replacement of existing capacity.

[100] See American Gas Association, "A Forecast of Capital Requirements of the U.S. Gas Utility Industry to the Year 2000," April 20 1979. Exhibit 1 shows expected overall capital expenditures for "Utility and Pipeline Construction and Maintenance" of approximately $4 billion annually through the year 2000 (in 1978 dollars). While these statistics are not specific to interstate natural gas pipelines, they are supportive of zero real growth in natural gas pipeline operations.

[101] These data are computed as follows:

(1) multiply current dollar value of storage plant additions by the national average of the Handy-Whitman Indices of Storage Plant Construction Cost (converted to base 1968);

(2) multiply current dollar value of transmission plant additions by the national average of the Handy-Whitman Indices of Transmission Plant Construction Costs (converted to base 1968); and

(3) sum the results of (1) and (2) for each year.

remained relatively static, averaging $300 million annually.[102]

A range of 2 to 4 percent real growth is projected for the electric utility industry based on growth in kilowatt capacity as estimated by various studies. The average annual compound growth rates in the forecasts of generating capacity in these studies may be summarizied as follows:

Author	Time period covered	Average compound growth rate (percent)
Department of Energy (DOE) [1]	1977–1995	4.0
Electrical World (EW) [2]	1978–1995	3.3
Data Resources, Inc. (DRI) [3]	1978–2000	2.2

[1] U.S. Department of Energy (DOE), Energy Information Administration, *Annual Report to Congress 1978*, Volume 3, p. 268.
[2] "30th Annual Electrical Industry Forecast, *Electrical World (EW)*, September 15, 1979, p. 80.
[3] Data Resources, Inc. (DRI), "DRI Annual U.S. Energy Model," computer printout dated December 4, 1979.

The real growth rates hypothesized for each industry were adjusted to reflect a range of 5 to 10 percent for plausible future average inflation rates.[103]

Industry	Real growth (rate (g_r))	Inflation rate (p)	Nominal growth rate (g_n) [1]
Gas	0	.05	.05
	0	.10	.10
Electric	.02	.05	.07
	.04	.10	.14

[1] $g_n = (1 + g_r)(1 + p) - 1$.

Base Year (1976) Gross Plant Additions (BB_o)
Gas—$ 596 million.
Electric—$12,706 million.

This parameter works in a similar manner in each model. It is the base upon which the growth rates are applied and is thus a primary determinant of the level of the projected impacts in future years. All other parameters held constant, an increase in the value of this parameter causes an increase in the projected impact of normalization for each year in both models.

Because of the importance of this parameter on the level of the impacts, the base year should not be atypical. Available data show fluctuations in gross plant additions for both industries over recent years due, presumably, to demand and financial market uncertainties as well as to construction delays. Consequently, the average of gross plant additions for the three-year period 1975 to 1977 was used as the base year 1976 gross plant additions.

For the electric utility industry this parameter corresponds to "Total Electric Plant Additions" for all Class A and B electric utilities as reported in Section VII (Utility Plant) of *Statistics of Privately Owned Electric Utilities* [104] for selected years. For the natural gas pipeline industry, the parameter equal the additions to natural gas storage and transmission plant for all Class A and B natural gas pipelines as reported in Section VII (Gas Utility Plant) of the *Statistics of Interstate Natural Gas Pipeline Companies*.[105]

Capitalized Expenses as a Percent of Gross Plant Additions (c)
Gas: 4 percent
Electric: 11 percent

In the base difference model, this parameter, when multiplied by gross plant additions, provides an estimate of the excess of tax deductions over book deductions attributable to base timing differences. Thus, as the value of this parameter is increased, holding all other parameters constant, the impact of normalizing base differences increases in all years. In the life difference model, capitalized expenses are subtracted from the book basis of plant additions to obtain the tax basis. Thus, an increase in the capitalized expenses percentage reduces the tax basis of plant additions. This, in turn, causes the impact of normalizing life differences to be inversely related to the value of the capitalized expense percentage parameter.

The capitalized items constituting the base timing differences include construction-related taxes, pensions, and interest expenses. It is hypothesized that capitalized expenses in year t are a constant percentage of gross plant additions in year t + 1. To estimate this parameter, the following relationship is assumed:

$$\frac{(C_t)}{(BB_{t+1})} = \frac{(C_t)}{(CWIP_t)} \times \frac{(CWIP_t)}{(BB_{t+1})}$$

where:
C_t = capitalized expenses, year t
$CWIP_t$ = average construction work in progress, year t
BB_t = gross plant additions, year t

The reason for estimating the relationship between the capitalized expenses and gross plant additions by this two-component method is because data are available on AFUDC interest expenses only since 1977.[106] Thus, to estimate the relationship by the single component method would provide only one observation—capitalized expenses in 1977 divided by gross plant additions in 1978. By using the two-component method, more information can be relied on so that greater confidence can be placed in the resulting percentages.

Capitalized expenses are hypothesized to be directly related to the average amount of construction work in progress (CWIP) in each year. This is a reasonable assumption since the major component of capitalized expenses is the interest component of AFUDC. For each of the years 1977 and 1978, AFUDC interest expenses constituted approximately 70 percent of the total estimated capitalized expenses for a sample of electric utilities.[107] Based on this sample, all capitalized expenses (AFUDC interest plus construction-related pensions and taxes) constituted about 6 percent of average electric utility CWIP in 1977 and 1978.

Capitalized expense data for natural gas pipelines were more difficult to obtain. The tax reconciliation statements were less detailed than those for electric utilities. Because of this, the aforementioned 70 percent AFUDC interest relationship for electric utilities was relied on to scale up the natural gas pipeline AFUDC interest expenses to an estimate of total capitalized expenses for pipelines. For the major Class A and B interstate pipelines, the resulting capitalized expense estimates averaged 10 percent of average CWIP for 1977 and 1978.

The disparity in the values of this percentage for electric utilities (6 percent) and gas pipelines (10 percent) is reconcilable.[108] In general, the relative size of new plant and the length of the construction period has caused electric utilities to rely more on long-term capital (equity as well as debt) in financing construction than have gas pipelines. Since equity capital costs are not deductible for tax purposes like interest expenses, the use of equity

[102] Omitted from the discussion of growth are the effects of such major projects as the Alaskan Natural Gas Transmission System (ANGTS). Section II. E. 2, *supra*, explains how normalization will lead to lower rates than flow-through for such "special projects."

[103] This range of inflation rates is consistent with projections in the aforementioned DOE, EW, and DRI studies.

[104] U.S. Department of Energy, Energy Information Administration, various years.

[105] U.S. Department of Energy, Energy Information Administration, various years.

[106] The Uniform Systems of Accounts were modified to require separate accounting for the interest component of AFUDC beginning in 1977. See FPC Order No. 561, Docket No. RM75–27, issued February 2, 1977.

[107] Statistics on the companies included in Moody's "24" electric utility composite sample were used to evaluate this relationship. *Moody's Public Utility Manual* (New York: Moody's Investors Service, Inc., 1979).

[108] The value for electric utilities was about 6 percent in each of years 1977 and 1978. For gas pipelines, however, it was about 7 percent for 1977 and 12 percent for 1978. This difference probably reflects the greater use of short-term debt by gas pipelines where the cost has fluctuated dramatically.

capital for construction financing by electric utilities would tend to cause the observed disparity in the percentages of capitalized expenses to CWIP. Another contributing factor may be the particular way in which AFUDC interest is computed when long-term capital is used to finance construction, since no distinction is made between low-cost embedded debt and high-cost marginal debt.

The estimated value of the ratio of average CWIP to gross plant additions for the following year is also significantly different between the two industries. For electric utilities, CWIP averaged about 1.9 times of gross plant additions for the five-year period 1974–78. The value for gas pipelines was a ratio of about 0.4.[109] The probable explanation for this disparity is in the average length of the construction periods between the two industries. Under steady growth conditions, the longer the average construction period, the greater will be the ratio of CWIP to gross plant additions.

Using the above-determined ratios in the hypothesized relationship, we have for gas pipelines,

(.10)(0.4)=.04, or 4 percent,

and for electric utilities,

(.06) (1.9)=.11 (rounded), or 11 percent.

Composite Straight-Line Book Life (N)
Gas—23 years.
Electric—31 years.

The book life parameter enters both models in complicated ways. In the base difference model, a higher value for this parameter raises the impact through the deferred tax debit effect [110] since it results in amortizing the deferred taxes arising in each year over longer periods. Concurrently, however, a higher book life lowers the impact through its effect on the amount of accumulated deferred taxes that are subtracted in each year from rate base. On net, the former effect is predominant, all other parameters held constant. Consideration of a cost of capital differential effect which works in a manner similar to the rate base deduction effect could reverse this result so that a higher book life, other parameters held constant, could lead to a reduction in the impact.

In the life difference model, increases in the book life, all other parameters held constant, tend to increase the impact because the effect of this factor is to increase the difference between the tax and book lives and, hence, the amount of the life timing differences. While the rate base deduction and cost of capital differential effects work in the opposite direction, their relative impact is generally not significant enough to offset the former effects.

This parameter is estimated as the average of beginning and end of year 1977 total depreciable (non-land) plant in each industry divided by total depreciation expense for that year. The statistics were obtained from the previously referenced DOE annual statistical reports for each industry.

	Depreciable plant ($M) (1)	Depreciation expense ($M) (2)	Average book life (yrs.) (1)÷(2)
Natural gas pipelines	25,701	1,137	22.60
Electric utilities	145,271	4,617	31.46

Composite Straight-Line Tax Life (M)
Gas—22 years.
Electric—28 years.

The tax life parameter affects only the life difference model. In that model, when all other parameters are held constant and the tax life remains less than the book life, an increase in the tax life reduces the impact of normalization for all years. This follows from the fact that as the difference between the tax and book lives becomes smaller, the size of the differences between the amount of depreciation recognized for taxes and the amount recognized for ratemaking (due to life differences) is reduced.

For the gas pipeline industry, this parameter is estimated as the Asset Guideline Period for Asset Guideline Class 49.24 (Gas utility trunk pipelines and related storage facilities) as reported in the *1979 U.S. Master Tax Guide.*[111]

The estimated value for the electric utility industry is the weighted average of the Asset Guideline Periods for the various types of assets making up the average of beginning and end of year total depreciable electric utility plant for 1977.

	Fraction of depreciable plant (1)	Guideline period (yrs.) (2)	Weighted life (yrs.) (1) x (2)
Production:			
Steam	.345	28	9.7
Nuclear	.080	20	1.6
Hydro	.028	50	1.4
Other	.024	40	.5
Transmission	.165	30	5.0
Distribution	.331	30	9.9
Other	.027	10	.3
			28.4

Capital Structure Parameters (d, p, and e)
Gas:
Debt ratio (d)—.45
Preferred ratio (p)—.05
Common Equity ratio (e)—.50
Electric:
Debt ratio (d)—.51
Preferred ratio (p)—.12
Common Equity ratio (e)—.37

These parameters are estimated as the average for the three-year period, 1976 to 1978, for all Class A&B electrics and for the major Class A&B pipelines as reported in the previously referenced DOE annual statistical reports for each industry.

Capital Costs (h, j, k)

	5 percent inflation	10 percent inflation
Gas:		
Debt cost (h)	7	12
Preferred cost (j)	7	12
Common equity cost (k)	12	17
Electric:		
Debt cost (h)	7	12
Preferred cost (j)	7	12
Common equity cost (k)	11	16

These capital costs, together with the capitalization ratios and tax rate, detemine the "pretax" overall rate of return (or cost of capital). The effect of this overall return value is unambiguous in both models since it is the basis of the reduction in return and tax allowances arising from the deduction of accumulated deferred taxes from rate base. Thus, an increase in the "pretax" overall rate of return resulting from changes in any of its components will decrease the impact of normalization applied to base and life differences in all years.

When consideration is given to the effects of a difference in the cost of capital under normalization and flow-through, the "pretax" return value determined with the above-hypothesized parameters is assumed to be the relevant return for normalization. The differential is then added to this normalization return to yield an estimate of the "pretax" return for flow-through. Of course, the effect of increasing the cost of capital differential is to reduce the impact of normalizing both base and life timing differences.

As the model is concerned with incremental investments, the relevant financial capital costs are the marginal costs expected to prevail, on average, over the forecast period. These costs

[109] These statistics, for both gas and electric, were based on industry-wide data. The greater availability of these data permitted the evaluation of these ratios over the longer time span than was possible for the ratio of capitalized expenses to construction work in progress. The ratios were reasonably stable over the period examined.

[110] See table 9, *supra.*

[111] Commerce Clearing House, Inc., 1979, p. 431–36.

should also be consistent with the assumptions on inflation used for the growth in new plant additions.[112] Thus, two sets of costs corresponding to expected average long-term inflation rates of 5 and 10 percent were developed.

The capital costs are derived from long-term real rates of return with adjustments for risk premiums and inflation. The long-term real returns are based on the most recent Ibbotson-Sinquefield study.[113] They determined nominal rates for common stocks and long-term corporate and government bonds for the period 1926 to 1978 as the geometric mean of the total rates of return for each year. These nominal rates were converted to real rates by adjusting for the actual inflation rate of 2.5 percent for the period 1926–78. The nominal and real rates are:

	In percent	
	Nominal rate	real rate[1]
Common Stocks	8.9	6.2
Long-Term Corporate Bonds	4.0	1.5
Long-Term Government Bonds	3.2	.7

[1] For example, 1.089 ÷ 1.025 = 1.062 or 6.2%. Schematically this may be represented as.

$$(1+r_n) = (1+r_r)(1=p)$$

or

$$r_r = \frac{(1 + r_n) - 1}{91 + p)}$$

where:

r_r = real rate of return
r_n = nominal rate of return
p = inflation rate

The average historical real rate of return on long-term corporate bonds is used as the long-term real cost of both debt and preferred stock [114] for both industries. The nominal rates are then calculated by adjusting the real rate (of 1.5 percent) for the range of expected long-term inflation rates (5–10 percent):

(1.015) × 1.05 = 1.066 or 6.6%
(1.015) × 1.10 = 1.116 or 11.6%

While the assumption that debt and preferred stock costs for the two industries are equal may be reasonable, a similar assumption for common equity costs would be less so. To recognize a difference in risk between the two industries, security "betas" are used as an approximate measure of relative risk. A Wells Fargo Bank study found average industry betas of 1.02 and .85 for natural gas pipelines and electric utilities, respectively.[115] These statistics indicate that natural gas pipelines are about equal in risk to the average of all common stocks while electric utilities are only 85 percent as risky as the average.

The Ibbotson-Sinquefield rate of return data, *supra*, show the risk premium for the average common stock over long-term government bonds to be 5.7 percent. Using the above-indicated betas, estimates of the common equity risk premiums for natural gas pipelines and electric utilities are 5.8 and 4.8 percent, respectively. (1.02 × 5.7 = 5.8 and .85 × 5.7 = 4.8). When the long-term government bond rate of 3.2 percent is added to each of these industry-specific risk premiums and the results are deflated for the long-term historical inflation rate of 2.5 percent, industry-specific long-term real rates of return on common equity are obtained. These rates can then be adjusted by using the postulated 5 and 10 percent inflation rates as used above for debt, to give nominal rates:

	Nominal rate		
	Real rate (percent)	5 percent inflation	10 percent inflation
Natural gas pipelines	6.3	11.8	16.9
Electric utilities	5.4	10.7	15.9

Recognizing the imprecision involved in any method of deriving marginal costs of capital, all capital costs were rounded to the nearest whole percentage point.

Tax Rate (y)

An income tax rate of 50 percent is assumed as a composite of 46 percent for Federal income taxes and 4 percent for both state and local taxes.

Base Year (1976) Total Required Revenues

Gas: $14,748 million
Electric: $50,553 million

This variable was used to provide perspective on the forecasted impacts of normalization. Total Class A & B electric utility and natural gas pipeline operating revenues for 1976 were used to approximate total required revenues.

3. Base and Life Difference Models Results

A summary of the impact analysis results for base and life timing differences, assuming no cost of capital differential between flow-through and normalization, is given in Table 11. The incremental dollar impacts of normalizing rather than flowing through new base and life timing differences arising in 1976 or later are given in the first 8 columns of this table in both current dollars and constant 1980 dollars.[116] The last 4 columns attempt to provide some perspective by relating the *incremental* dollar impacts to estimates of the *total* revenue requirements under flow-through.

As the projected impacts depend upon the nominal growth rates in a new plant additions for each industry and as there is a high degree of uncertainty as to this future growth, a range is used for each industry. The low and high nominal growth rates used are intended to encompass the range of reasonable estimates of average future growth in each industry. The range for the natural gas pipeline industry is 5 to 10 percent while that for the electric utility industry is 7 to 14 percent. The preceding section discusses the bases for these ranges.

The year 1976 is used as the base year from which impact projections are made. It was chosen to coincide with the first year under which companies were eligible to apply for and use normalization according the policy of FPC Order No. 530-B. The models are capable of yielding projections of impacts for as many years as desired, but the further into the future one goes, the less reliable the estimates become.

BILLING CODE 6450-01-C

As indicated above, the last four columns of Table 11 attempt to provide some perspective for evaluating the incremental impacts of the proposed rule by relating them to estimates of total required revenues under flow-through. The reasons for presenting the results in this manner are threefold. First, there is a general need for some basis upon which to evaluate the impacts. A $100 impact on a base revenue requirement of $1,000 is substantially greater than a $100 impact on a $100,000 base revenue requirement. Second, the percentages permit one to make the transition from changes in revenue requirements to changes in rates. This applies to rates on a per unit of output, per customer and per firm basis.[117] The third reason stems from the fact that FERC does not have jurisdiction over all rates in each industry. The models work at the industry level and estimate the impact of industry-wide normalization of base and life differences from 1976 forward.[118] To the extent that some State commissions do not choose to permit normalization for the specified base and life timing differences, the total dollar impact values estimated by the models overstate the actual impacts.

Total dollar impacts of FERC-only adoption of normalization can be estimated by multiplying the percentage of FERC-jurisdictional required revenues to industry-wide required revenues by the industry-wide impact figures. As an indication of FERC's jurisdiction, all Class A and B electric utilities' revenues from sales for resale averaged 9.8 percent of total revenues for the period 1973 to 1977.[119] For all Class A and B interstate natural gas pipelines, the comparable statistic is 80.5 percent. Table 12 is based on using these percentages to scale down the dollar impacts of Table 11 to provide estimates of the impacts on FERC-jurisdictional required revenues.

[117] Assuming a zero overall price elasticity so that outputs remains the same under both policies even though the prices are different, a one percent increase in required revenues means a one percent increase in per unit output prices. Assuming zero price elasticities across customer classes, a one percent increase in required revenues means a one percent increase in per customer rates. Finally, since the impacts are evaluated in terms of comparing the situation of all firms adopting normalization with that of all firms adopting flow-through, the percentage impacts can be applied to an individual firm's adopting normalization rather than flow-through.

[118] The terms "industry" and "industry-wide," as used in this study, refer to all Class A and B electric utilities or all Class A and B interstate natural gas pipelines.

[119] This should be qualified. If most CWIP is related to bulk power supply facilities, the wholesale-to-total revenue ratio may understate the actual jurisdictional impact.

The base year (1976) total required revenues under flow-through is estimated as total industry-wide operating revenues for 1976. These operating revenue data reflect varying levels of performance as well as varying degrees of normalization usage by individual companies. However, due to the small magnitude of the estimated impacts relative to total operating revenues, it is doubtful that the resulting percentage impact estimates are significantly affected by these defects.

Estimates of the future flow-through revenue requirements are forecasted by a simple extrapolation from the base year operating revenue data using the same growth rates as are used for new plant additions. If new plant additions grow at an annual rate of 10 percent, revenue requirements are also projected to grow at 10 percent. The assumption of a one-to-one relationships between these two growth rates is tenuous. The total revenue requirement growth will be affected by factors other than plant costs—most importantly, fuel price or gas cost increases. Historical data indicate that total operating revenues—the proxy used for total required revenues—grew at an average annual rate of 15.9 percent for electric utilities and 13.9 percent for natural gas pipelines over the last 10 years.[120] Growth in new plant additions in both industries over recent years has not been nearly as high. The assumption of identical growth rates, therefore, most likely biases the impact results upward.

The results presented in Table 11 indicate that, for those electric utilities that began normalizing both base and life differences in 1976, rates rose, on average, a maximum of about 3.2 percent above what they would have been had a flow-through policy been maintained. For natural gas pipelines, the comparable statistic is less than .2 percent. The table also shows that these projected total impacts diminish over time so that by 1990 the estimated maximum impacts are slightly more than 1.0 percent for electric utilities and less than .05 percent for natural gas pipelines. These empirical results are also presented graphically for a 40-year period in Charts 1 and 2. The graphs show more clearly the time pattern of the projected impacts.

By far, the largest impacts occur for electric utilities. The sum of the impacts of the base and life differences is in excess of one percent in both the low and high growth cases for the first 15 to 20 years. The most important factor contributing to these impacts is AFUDC interest expense.[121] Of particular significance are the trends depicted in Chart 2 for electric utilities where for both the low and high growth cases and for both base and life differences, normalized required revenues are projected to continually exceed flow-through required revenues. In contrast, Chart 1 (natural gas pipelines) shows that there is a point after which normalized required revenues are continually less than flow-through required revenues for both base and life differences and low and high growth rates.

BILLING CODE 6450-01-M

[120] These growth rates are based on a semi-log regression of total operating revenues against time for the period 1968 to 1977.

[121] In 1977 and 1978, AFUDC interest expense represented approximately 70 percent of the total construction-related base differences for electric utilities. This is based on an analysis of a sample of 24 Class A and B electric utilities. See Section III.A.2, *supra*.

Chart 1. Normalization Impact on Rates: Natural Gas Pipelines, 1976-2015

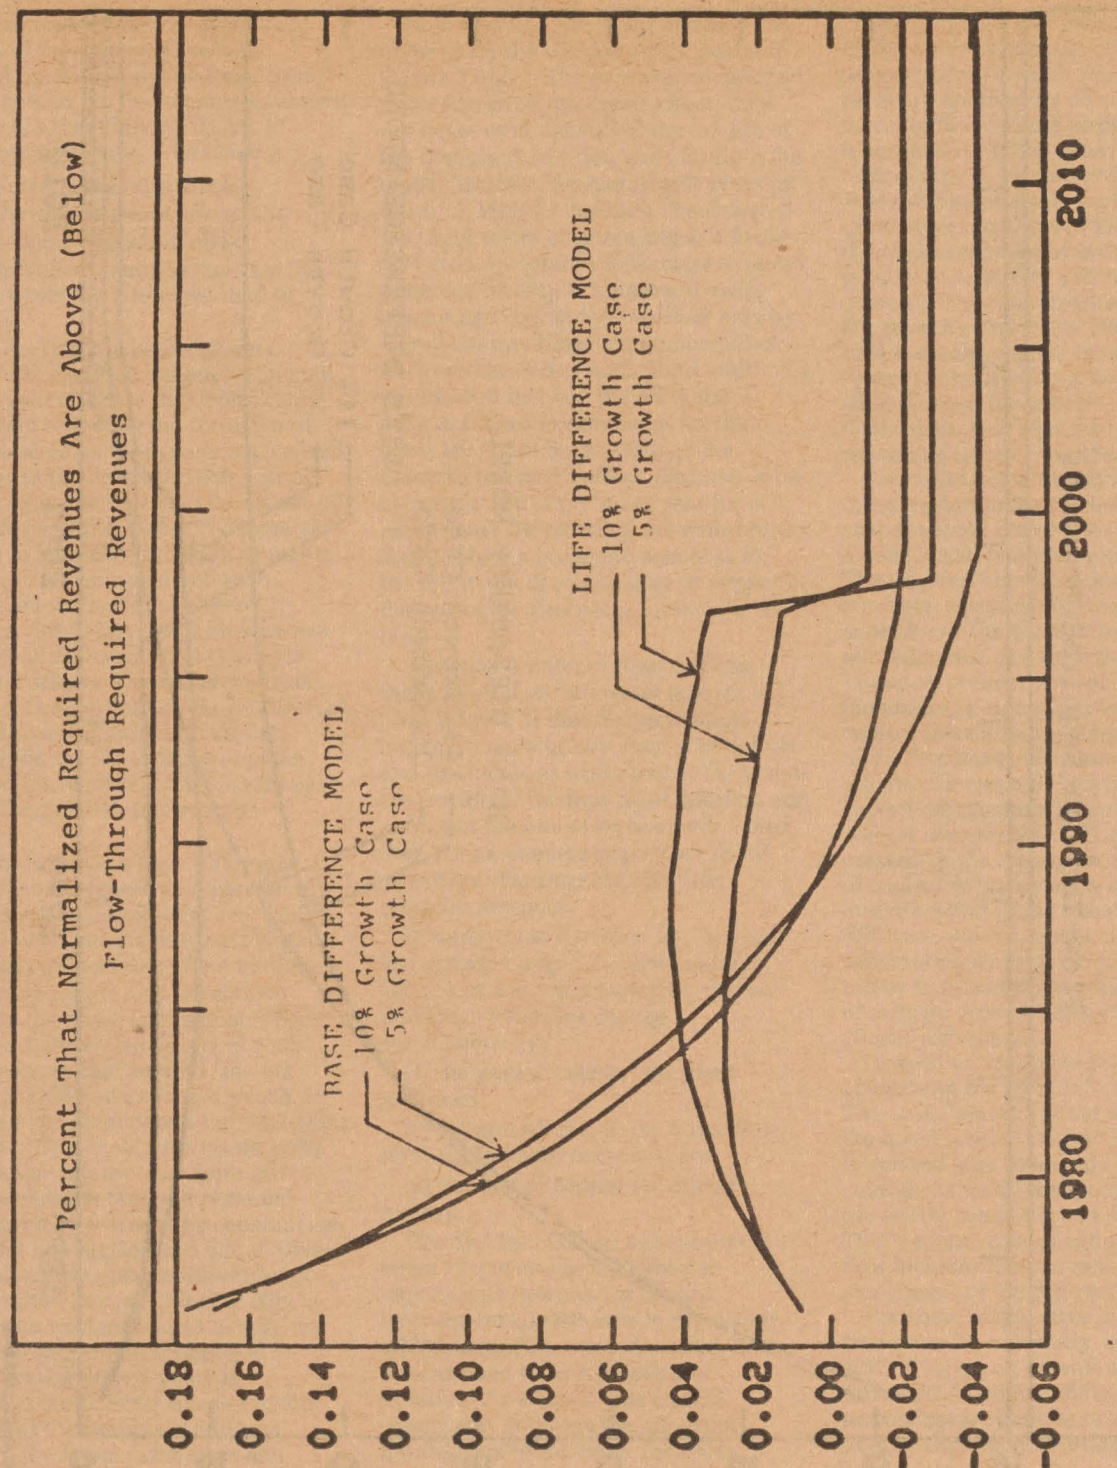

Chart 2. Normalization Impact on Rates: Electric Utilities, 1976-2015

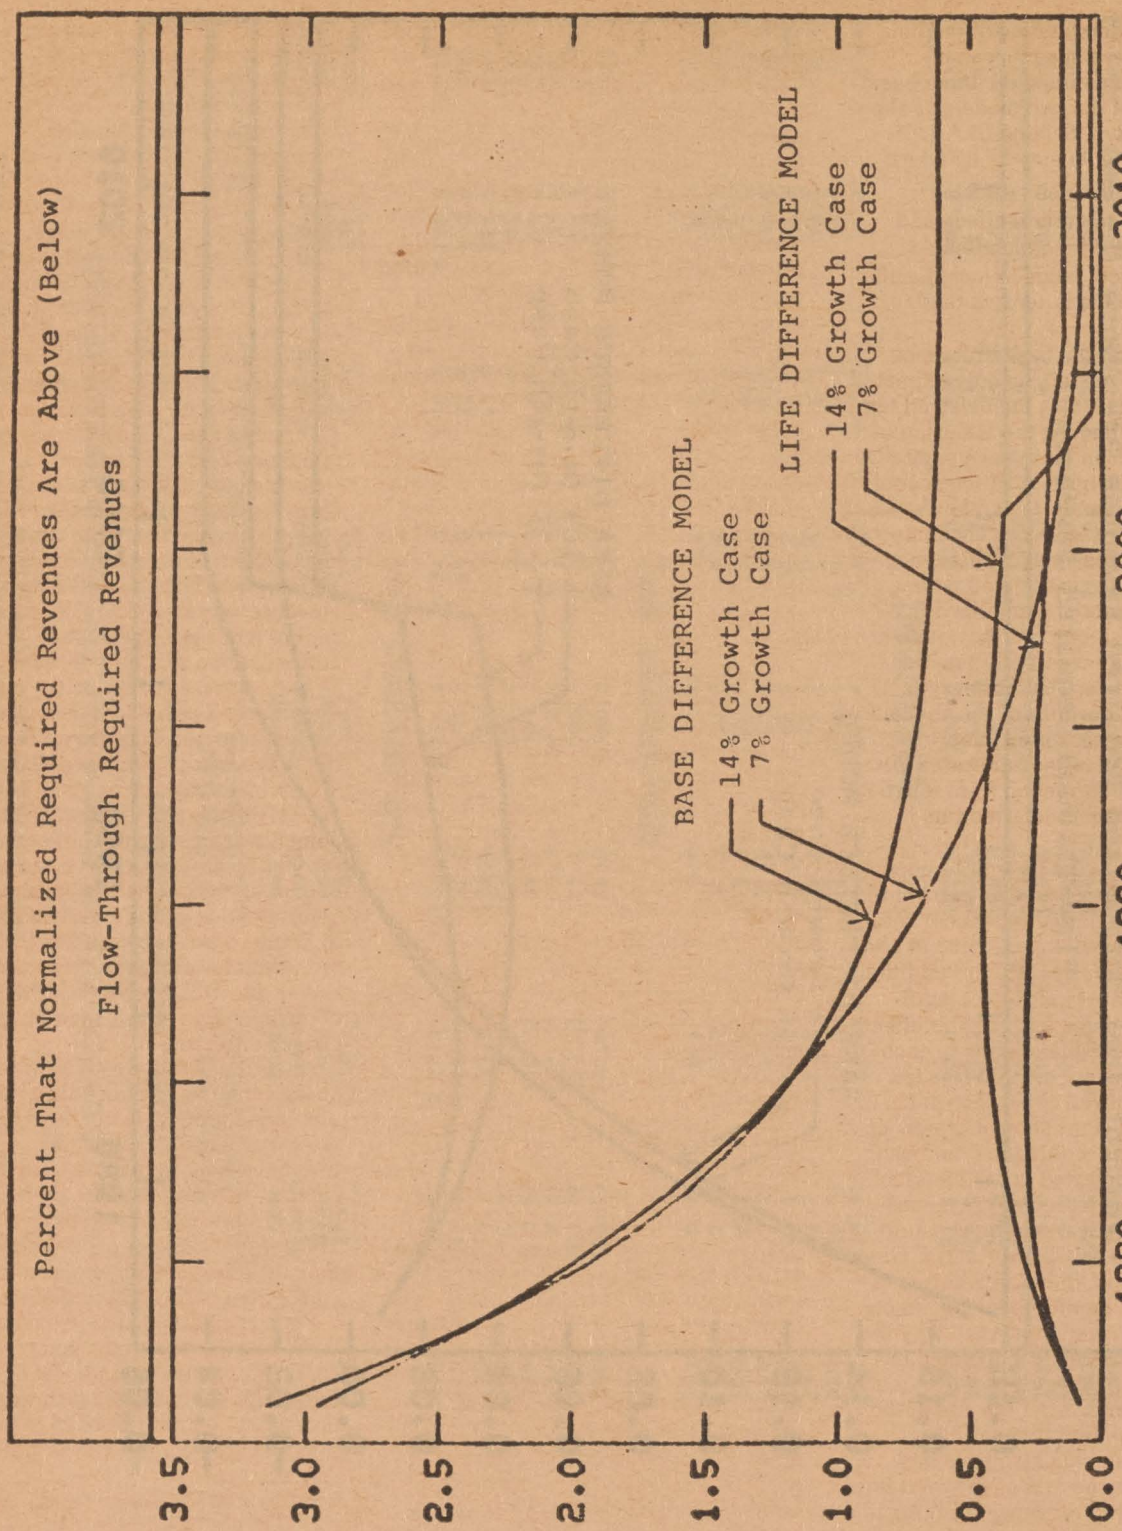

BILLING CODE 6450-01-C

A better understanding of the time patterns of these impacts can be obtained by examining the three basic components of the two models as shown in Table 9, *supra*, Section III.A.1.[122] These components may be listed as:

(1) deferred tax debit effect,

(2) deferred tax credit effect, and

(3) rate base deduction effect.

The first effect tends to increase the impacts while the latter two tend to reduce it.

Consider first the base difference model. In this model, the only impact in the first year (1976) is the deferred tax debit effect reflecting the inclusion of deferred taxes on that year's capitalized expenses in the normalization cost of service. After the first year, however, all three effects are working. The impacts rise due to increasingly higher amounts of deferred taxes associated with growing amounts of capitalized expenses. Offsetting this, however, are the deferred tax credit and rate base deduction effects. The former reflects the amortized portions of the payback of deferred taxes permitted in earlier years, while the latter represents the effects of the subtraction from rate base of the accumulated deferred tax balances.

Now note that the base difference impacts are expressed as a percent of flow-through required revenues. Total required revenues are assumed to grow at the same rate as new plant additions. This growth rate is also the rate of growth in the deferred tax debit effect since the deferred tax debits in each year are a constant percent (the tax rate) of capitalized expenses which, in turn, are a constant percent of new plant additions. Thus if only the relationship between the deferred tax debit effect and flow-through required revenues were looked at, it would be constant—a horizontal line on Charts 1 and 2. Given this relationship, the incorporation of the two other, impact-reducing effects provides an explanation as to why the base difference impacts depicted in Charts 1 and 2 show a general downward trend. After the end of the book life of the first plant addition, however, the impact stabilizes and grows at the same rate as the total flow-through required revenues resulting in a constant percentage impact.

[122] The third and fourth components of the life difference model can be combined since they relate to the same phenomenon at different points in the service life of a plant. Also, for present purposes, the cost of capital is assumed equal for normalization and flow-through of the base and life timing differences so that the cost of capital differential effect component of each model is ignored.

Now examine the time pattern of the impacts for the life difference model in Charts 1 and 2. The payback of deferred taxes (deferred tax credit effect) does not begin until the end of the tax life of the first plant addition introduced in the model (22 years for gas and 28 years for electric). Prior to this time, the deferred tax debit effect is increasing at a faster rate than the total flow-through required revenues tending to create a growing percentage impact that is offset only by a growing rate based deduction effect. Between the end of each plant addition's tax life and its book life all of the deferred taxes accumulated for that plant are "paid back" through the deferred tax credit effect. Because of the shortness of this period (1 year for gas and 3 years for electric), the deferred tax credit effect is large and accounts for the relatively dramatic drop in impact at the end of the first plant addition's tax life.

The combination of these factors tends to produce the result (shown in Charts 1 and 2) that the percentage impact initially grows, then slowly falls, and finally drops beginning at the end of the tax life of the first plant addition and ending at the end of its book life. After that, the percentage impact levels off, growing at the same rate as total required revenues.

A comparison between the high and low growth cases for either model in Chart 1 or 2 is complicated by the fact that three variables change simultaneously:

(1) the growth rate in new plant additions

(2) the growth rate in the base (flow-through) required revenues, and

(3) the cost of capital (or rate of return).

The first two are, by assumption, set equal to one another. Of greater importance, however, is the link between the growth rate in new plant additions and the cost of capital. Both are assumed to be a function of inflation. As a result, one cannot reasonably evaluate the effects of holding two of the three variables constant and varying the third except within a small margin. (This variance would presumably reflect measurement error in the real components of the variables.)

Within this context, it should be noted that, with the exception of the low growth case for electric utilities, the result that normalization rates will or will not eventually fall below flow-through rates is unaffected by small changes in the input parameters.[123] In the low growth electric utility case, as presented in Table 11, normalization rates are continually above flow-through rates for the forecast period. Incorporated in this result is a "pretax" overall cost of capital of 13.39 percent.[124] A sensitivity analysis performed on this case, however, showed that increasing this estimated cost by less than 5 percent to a level of approximately 14.00 percent,[125] all other factors (including the growth rate in new plant additions) held constant, results in normalization rates eventually falling below flow-through rates for both base and life differences after about 30 years and remaining below from then on.

As explained in Section II. D, *supra*, there is good reason to believe that the cost of capital under flow-through is higher than it is under normalization. The empirical results addressed so far, however, assumed that the cost of capital was the same under normalization and flow-through. Tables 13 and 14 present data on the impacts of the proposed rule when this cost of capital assumption is dropped. For each of the four cases discussed above, the effects of a range of "pretax" cost of capital differentials (from 0 to 50 basis points) are presented. The reason for presenting the results for a range of cost of capital differentials is because quantification of the exact differential is difficult—what one wants is the differential attributable to normalizing rather than flowing through the effects of a single type of transaction, e.g., the "base" differences.

A word of caution is warranted concerning the "pretax" differentials. The term "pretax" is not used here in the usual sense. "Pretax" cost of capital is defined here to include both the capital costs and the income taxes on the equity component of those costs. The "pretax" cost of capital differential thus includes income taxes on the equity component of the differential.

For some perspective in evaluating these results, one study, completed in 1977,[126] found an overall cost of capital differential between flow-through and normalization utilities of 25 to 50 basis points. Three qualifications, however,

[123] That is, all parameters other than the growth rate in new plant additions for which high and low estimates are used to obtain the individual cases.

[124] The term "pretax" overall cost of capital, as used here, include income taxes as well as return on debt, preferred and common equity capital.

[125] For example, if the cost of equity capital in the low growth case were 12 percent rather than the hypothesized 11 percent, the "pretax" cost of capital would be 14.13 percent.

[126] Arthur Anderson and Co. (1977). See also Berndt, Chant and Watkins (1979) and Brigham and Pappas (1970).

should be made to this range. First, the range is based on observed differentials between companies with varying degrees of normalization and flow-through usage on a variety of different types of timing differences (including accelerated depreciation). A second point, related to the first, is that it is unclear that the cost of capital effects of normalizing each type of timing difference are additive. That is, if a utility is already normalizing accelerated depreciation timing differences, the cost of capital may not be significantly affected by normalizing additional timing differences. Finally, this 25 to 50 basis point differential is not a "pretax" cost of capital differential as defined above and used in the simulation studies for Tables 13 and 14 since it does not include income taxes. For comparison purposes, this 25 to 50 basis point differential should be viewed as corresponding to *about* a 50 to 90 basis point "pretax" differential.[127]

BILLING CODE 6450-01-M

[127] This "pretax" differential range is based on: (1) component capital cost differentials of 10 to 30 basis points for debt and preferred stock and 55 to 90 basis points for common equity; (2) capitalization ratios of 0.51, 0.12, and 0.37 for debt, preferred and common equity (see Section III.A.2, *supra*); and (3) a 50 percent income tax rate. The common equity cost differentials are derived from the 25 to 50 basis point overall cost of capital differential of Arthur Anderson and Company (1977) together with their estimated senior capital cost differential and assumed capital structure of 66 percent senior and 34 percent common equity capital.

** Beyond 2005, normalized rates are projected to remain above flow-through rates for these cases.

BILLING CODE 6450-01-C

Of particular significance are the results in Table 14 relating to electric utilities. Assuming no cost of capital differential, Tables 11 and 12 and Chart 2 showed normalization rates continually above flow-through rates for electric utilities under both low and high growth conditions. In contrast, the results presented in Table 14 indicate that if the cost of capital differential is above some level (that varies in each case), normalization rates will eventually fall below flow-through rates and remain below from then on.

Finally, one of the most important conclusions of the empirical analyses is that they show that "continual tax deferrals" do not necessarily imply normalization rates continually above flow-through rates. In all four cases presented in Tables 11 and 12 and thus in the results shown in Tables 13 and 14 and for both base and life timing differences, accumulated deferred taxes are continually positive and growing throughout the forecast period. All four cases may this be considered situations of "continual tax deferrals." In contrast, however, only for the high and low growth cases for electric utilities where the cost of capital differential is assumed to be small or zero are normalization rates observed to be continually above flow-through rates.

4. *Plant Removal Costs.*

The timing difference related to plant removal costs is less amenable to modeling than the base and life timing differences. Any assumptions about future removal costs necessary to obtain meaningful results would be very spectulative.

The speculative nature of estimates of removal costs is particularly relevant to the electric utility industry. Among the most significant removal costs will be those incurred for nuclear plants. Yet estimates of these costs vary widely since the industry has had little experience with actual removal of nuclear generating plants. Also, the methods for decommissioning nuclear generating plants have widely varying estimates of costs. In a case currently before the Commission, estimates of decommissioning costs ranged from $5.4 million for moth-balling to $48.7 million for complete plant dismantling.[128] The method for decommissioning has not yet been selected by the Nuclear Regulatory Commission, and the actual costs will depend on the method selected.

For natural gas pipelines, removal costs will be especially important for offshore facilities. Over the last decade the natural gas pipeline industry has made a substantial investment of capital in the offshore area and these facilities have not reached the retirement stage. Thus, like nuclear generating plants, there has been little experience with the actual removal of offshore platforms and pipelines. Further, not only must a determination be made as to which facilities must be removed upon abandonment but also which methods and techniques should be used in their decommissioning. Adding to these difficulties are the inherent problems associated with forecasting future labor and materials price levels. The very speculative nature of estimating offshore pipeline removal costs is evident in a case currently before the Commission where estimates of removal costs ranged from $5.5 to $32.1 million.[129]

The problem of estimating removal costs for the Alaskan Natural Gas Transportation System is even more difficult and speculative as the cost of construction has not been determined at this time. Some perspective, however, can be obtained from the Trans-Alaska Pipeline System. The owners of that system anticpipate costs of over $1 billion to remove the pipeline and restore the adjacent lands to its original state.

Nevertheless, some understanding of how future removal costs will affect current rates should assist the Commission in its assessment of normalization and flow-through even though estimates of impacts on industry-wide rates are too speculative for quantification. Removal costs represent a Type II expense item—an expense that is recovered in rates *prior* to its availability as a tax deduction. It is a prepaid expense item rather than a deferred item, such as construction interest expense. The tax effects of the removal cost timing difference work in an opposite way from the tax effects of construction interest expense. With normalization of the tax effects of removal costs, customers realize the benefits from the tax deduction before the utility actually recognizes the tax deduction. Deferred tax credits are then accumulated (as accumulated defered debits) and added to rate base, giving the utility a return on the accumulated debits. Just as customers are compensated for their capital contributions through rate base deduction with normalization of Type I expenses so too is the utility compensated for its capital contribution by a rate base addition with normalization of Type II expenses.

B. Regulatory Commission Expenses

Another timing difference expense covered by the proposed rule is regulatory commission expense. Regulatory commission expenses are recognized for taxes in the year incurred. For ratemaking, however, they are generally amortized over periods ranging from 2 to 5 years for electric utilities. For natural gas pipelines, there is usually no amortization and therefore no timing difference.

The regulatory commission expenses as a percent of total operating revenues for the five-year period 1974 through 1978 were as follows:

	Class A and B natural gas pipelines	Class A and B electric utilities
1974	0.051	0.089
1975	.069	.104
1976	.057	.111
1977	.039	.108
1978	.039	.111
Average	.051%	.105%

To obtain some perspective on the impact of normalization applied to this expense item, consider the following. This is a Type I timing difference transaction. On a single transaction basis, the impacts (normalized required revenues minus flow-through required revenues) would follow a pattern similar to that of the construction-related base timing difference transactions except that the time period would be shorter (2 to 5 years) and a portion of the expense would be recognized in ratemaking during the year in which the expense is incurred. Assuming some growth in these expenses due, presumably, to inflation, projections of the impacts for a firm or industry would also follow a pattern similar to that of the base timing differences.

The comparison with base timing differences suggests that the largest impact is in the first year.[130] Suppose that a utility incurs $1 of regulatory

[128] *Connecticut Yankee Atomic Power Company*, Initial Decision, Docket No. ER78-360, issued January 23, 1980, p. 24.

[129] *Columbia Gulf Transmission Company*, Docket No. RP76-94, *et al.*; Initial Decision Determining Proper and Adequate Depreciation Rate—Including an Element Reflecting Negative Salvage—For Offshore Facilities, issued February 7, 1980.

[130] This is, in a sense, a "worst case" comparison since the primary basis for the amortization is to stabilize the fluctuations in regulatory commission expenses. For example, a three-year amortization period is based in large part on the expectation that, on average, a utility will seek a rate change or other action and incur significant regulatory commission expenses once every three years. Regulatory commission expenses will be high in one year and low in the following two years. On the other hand, the comparison with the base differences may be reasonable for the 1970's and the near-term future. Recent inflationary conditions have caused utilities to request more frequent rate increases. However, the frequency of filings should moderate over the long run.

commission expenses. A reasonable estimate of the average amortization period for electric utilities is two or three years. To obtain an estimate of the most likely maximum impact three years should be used. This means that $.33 will be recognized for ratemaking during the year incurred while $.66 will be deferred. The whole $1 will be recognized for taxes in year 1. Because of this difference, the utility will be allowed deferred taxes, under normalization, of about $.33 (or .5 x $.66) using a 50 percent tax rate. Further, because this additional revenue is taxable, another $.33 [131] must be allowed so that the original $.33 in deferred taxes is retained by the company. The sum ($.66) of the $.33 in deferred taxes plus the $.33 in additional taxes represents the incremental revenue requirements of a normalization policy over a flow-through policy for the first year. But this is less than total regulatory commission expenses incurred in that year. This means that whatever percentage regulatory commission expenses are of total operating revenues, the impact of normalization will be less. Thus, where regulatory commission expenses are only .1 percent of operating revenues, as for Class A and B electric utilities, the impact of normalization will be less. Thus, where regulatory commission expenses are only .1 percent of operating revenues, as for Class A and B electric utilities, the impact of normalization will be maximum increases in rates of less than .066 percent. And, unless regulatory commission expenses grow at a faster rate than operating revenues, this impact will diminish over time.[132]

IV. Summary of Conclusions

In determining whether normalization or flow-through is a preferable policy for the Commission to adopt, the staff analysis focused on the effects of each policy on utility rates, cash flow and rates of return. The study attempted to assess various consequences for *both* the utility and its ratepayers. Single transaction and multiple transaction cases were studied, so that distinctions between the policies could be observed (1) when transactions are viewed independently or (2) when transactions are viewed from the perspective of a utility that grows over time or continually engages in timing difference transactions. For explanatory purposes, the analysis focused on an expense item that is deducted for taxes in one time period but not recovered in rates until a later period. The analysis also discussed other expenses that, conversely, are recovered in rates in earlier periods than they are recognized for taxes, and revenue items that also create timing differences between tax and rate treatment. The conclusions are discussed in terms of the first type of expense even though they apply equally to other expense and revenue items that create timing differences.

The staff analysis draws generalized, analytic conclusions about normalization and flow-through as alternative ratemaking policies. In addition, the analysis quantifies the rate impacts on both the electric and natural gas pipeline industries when normalization rather than flow-through is used for specific items that have comparatively widespread and significant effects on rates for these industries. The analytical conclusions and the empirical impacts are summarized here.

A. Rate Impacts

The most obvious difference between the normalization and flow-through policies applied to single timing difference transactions is on the resulting rates charged customers. For those expenses that are recognized as tax deductions prior to their recognition (and recovery) in rates, normalization required revenues (and thus rates) are initially above flow-through required revenues. Later, however, this situation reverses and normalization rates fall below flow-through rates. AFUDC interest (used extensively in the study for illustrative purposes) is an example of such a timing difference transaction. The study shows, however, that for those expenses that are recognized (and recovered) in rates prior to their use as tax deductions (e.g., plant removal costs), rates under normalization are initially below and later above flow-through rates. In addition, there are certain types of revenue transactions that have comparable impacts on rates.

The staff analysis concludes that normalization produces rates that are more equitable to customers over time than flow-through. Under normalization, rates reflect ("match") the tax effects of transactions (tax reductions, or benefits, and tax additions) in the same periods that the transactions are themselves recognized in rates. Thus, for example, when ratepayers are charged for AFUDC interest expenses (over the service lives of plants) they are given the associated tax benefits. In contrast, flow-through gives the tax benefits of the AFUDC interest expenses to ratepayers during the construction period. In general, flow-through allocates the tax effects of timing difference transactions to customers in different periods than the transactions themselves are allocated.

While the primary rationale used to support flow-through is the "actual taxes paid" (in each period) doctrine, the staff study notes that this doctrine is inconsistent with the treatment accorded other costs. The "actual taxes paid" doctrine is not a particular application of some "actual costs incurred" principle since there are many costs that are included in rates on a prepaid or deferred basis. Again, AFUDC interest expense is a case in point since this cost is incurred by utilities during the construction period of new plants but is reflected in rates during the service lives of the plants. (The recognition of this expense on an "as incurred" basis for ratesetting would be tantamount to allowing construction work in progress (CWIP) in rate base.)

Flow-through has the effect of distorting regulatory pricing policies. For expenses incurred by a utility and recognized for taxes in one year but determined to be more appropriately allocated to rates charged in other years, a flow-through policy has the effect of reducing rates in the year in which the expense is incurred and does so by *more* than the tax benefits associated with that expense. Further, in the year(s) in which the expenses are recognized in rates, a flow-through policy raises rates by *more* than the amount of the expense recognition.

Normalization, on the other hand, effectively neutralizes the effects of contrary interperiod cost and revenue allocation regulations of the IRS on regulatory pricing policies. For an expense incurred in one year and determined to be more properly allocated to rates in other years, rates are unaffected during the year in which the expense is incurred and rise only by the amount of the allocated expense in the other years.

Under the Commission's normalization policy, the deferred taxes included in rates are treated as customer-contributed capital on which customers are given a "return" by way of lower rates than would otherwise be the case. This is accomplished by the Commission's policy of reducing rate base by the amount of accumulated deferred taxes. Further, as the staff study points out, this compensation to

[131] This is based on the use of the tax multiplier of 0.5/(1.–0.5) times the additional income of $.33 in deferred taxes.

[132] The base difference model was modified slightly to provide estimates of these impacts. The results for electric utilities using growth rates of both 5 and 10 percent (for inflation) were that normalization rates were higher than flow-through rates for 1976 and 1977, but were lower for all later years. The same results were obtained for gas pipelines using the same amortization period and growth rates.

ratepayers, at a rate equal to the utility's after-tax cost of capital, can be viewed as a tax-free "return" on the "loan" of deferred taxes since it is realized in the form of reduced rates rather than as taxable income.

The above conclusions are based on analyses of single timing difference transactions. In the multiple transaction case, the staff study examined the effects of various levels of growth for a utility. It was found that every timing difference reverses, but that the sum of the timing differences may cause a continual deferral of taxes so long as the recovery of the expense item itself is continually being deferred. It was further observed that the costs for which the utility's recovery are deferred are of a higher dollar value than the associated deferred taxes.

As a general matter, the overall impact on rates under flow-through and normalization depends largely on the type and level of growth that each utility experiences in the future. Apart from other considerations such as the difference in rates of return, low steady growth tends to produce normalization rates that fall below flow-through rates after a period of years. High steady growth can produce normalized rates that remain above flow-through rates; and fluctuating growth results in a mixture, over time, of normalization rates sometimes higher and sometimes lower than flow-through rates.

B. Cash Flow Impacts

The effects of normalization versus flow-through on utilities' cash flow are simpler and more straight-forward to analyze. Normalization tends to improve a utility's cash flow, as compared to flow-through, when the cash flow is most needed and to decrease it when the need is less. This is true for all types of timing differences. The interest expense timing difference is again a good example. When interest during construction funds are needed, deferred taxes under normalization provide utilities with additional internal capital. During the operating life of the plant, when the interest during construction costs are amortized in rates, but the utility has no current liability for them, normalization reduces internal cash flow.

The cash flow impacts of normalization can be easily estimated. One can measure the cash flow impact in any period as the product of the tax rate times the amount of the expenditure or the recovery of revenue. With a 50 percent tax rate, normalization provides additional cash in the amount of 50 percent of any incremental cash need arising from timing differences and reduces any incremental cash "excess" by 50 percent. Thus, the cash flow impacts of normalization are directly proportional to the incremental cash flow needs of the utility. In contrast, flow-through has no direct impact on cash flow.

C. Rate of Return Impacts and Cost of Capital Effects

The analysis concludes that, under normalization, deferred taxes—and growing accumulated deferred taxes—do not inure to utility stockholders. If the rate of return *allowed* for common equity is assumed to be the same under flow-through and normalization, the rate of return *earned* on common equity is found to be the same, all other things being equal. This is true because of the ratemaking treatment of deferred taxes. The subtraction from rate base of deferred taxes effectively treats the funds as ratepayer-contributed capital upon which the utility is not allowed to earn a return.

This is not to say that normalization and flow-through do not affect the cost of capital in different ways. Generally, the cost of capital to flow-through utilities tends to be higher than to normalized utilities, although the precise difference is not readily susceptible to quantification. The major reason for the cost of capital differential is that normalization stabilizes the cash flow of the utility in contrast to flow-through and thereby reduces the utility's risk associated with its ability to pay interest and equity returns. In addition, the deferred taxes under normalization provide a source of funds to the utility, thus lowering external capital requirements as compared to flow-through. To the extent that greater demands in the capital markets raise a utility's cost of capital, flow-through would cause a utility to have higher capital costs.

D. Other Considerations

There are several other analytical conclusions that emerge from the staff analysis. One concerns the method used for calculating the allowance for funds used during construction. The other concerns the impacts of normalization versus flow-through on special projects, such as the Alaskan Natural Gas Pipeline.

Regarding the method of calculating AFUDC, the staff analysis concludes that by calculating AFUDC using the gross-of-tax method, rates would be lower than if the net-of-tax method were used since the net-of-tax method produces no deferred taxes during construction that can be used to reduce rate base. With compounding of the AFUDC funds, the revenue differential between the two methods is reduced but not eliminated. Thus, some time value of the rate base deduction during construction is lost under the net-of-tax method.

For special projects that are formed to finance and operate a single project, rates under normalization will always be lower than under flow-through. Under flow-through, the tax benefits from construction period timing differences would not be passed on to customers since there would be no sales from the special project and therefore no rates through which customers could realize tax benefits. Normalization, however, would cause deferred tax debits to be accumulated during the construction period and used later to lower rates over the operating life of the special project.

E. Effects on Electric and Natural Gas Pipeline Rates

For selected timing differences, the staff analysis modeled the incremental effects on required revenues in each year in the future assuming that normalization rather than flow-through was used in the electric utility and natural gas pipeline industries. The models did not precisely quantify what effect on revenues would occur if only the *wholesale* rates of utilities reflected normalization. However, the staff analysis does infer the impact on wholesale revenues in the two industries from the proportion of total business subject to the Commission's jurisdiction.

Two specific types of timing differences were modeled. The first, base differences in depreciation, is caused by certain costs being spread over the life of the plant as part of depreciation for ratemaking, but being written off when incurred for tax purposes. Construction interest expense, used throughout the analytical discussion, is an example of a base timing difference. The second type of timing difference related to depreciation is the life difference that occurs when the tax life of an asset is different from its ratemaking (or book) life. The usual case is where the tax life of an asset is shorter than its ratemaking life.

One of the most significant findings in the empirical analyses is that normalized rates may fall below flow-through rates even though taxes are projected to be continually deferred. In all cases examined, and described below, accumulated deferred taxes are projected to grow continually. On the other hand, in many of the cases, normalized rates after some period of time fall below flow-through rates.

The estimated impacts are expressed in terms of current dollars and constant (1980) dollars and in terms of the percent that normalization revenues (and thus rates) are projected to be above or below flow-through revenues. A range of growth rates in new plant additions was selected because of the uncertainty of projecting future growth for these industries. As a simplifying assumption, the growth rates were assumed to be constant even though sporadic growth is more typical of industry performance.

For natural gas pipelines, the low growth case of 5 percent per year and the high growth case of 10 percent per year demonstrate that there is a point in time when normalized rates fall below flow-through rates and remain lower so long as the hypothesized conditions prevail. The percentage differences between the flow-through and normalized rates, however, are very small. Over the period examined, assuming the cost of capital is the same under both normalization and flow-through, normalized rates are, at most, about 0.2 percent higher than flow-through rates. At the other extreme, normalized rates may eventually become, at most, about 0.1 percent lower than flow-through rates.

The electric utility industry was hypothesized to grow at a low level of 7 percent annually and at a high level of 14 percent. In these two cases, again assuming no cost of capital difference between flow-through and normalization, normalized required revenues are projected to continually exceed flow-through required revenues. Again, however, the differences are reasonably small. Over the period studied, normalized rates ranged between 0.2 percent and 3.2 percent higher than flow-through rates.

When consideration is given to higher capital costs under flow-through as compared to normalization, some significant changes in the impacts occur. Most importantly, for reasonably small cost of capital differentials, normalization rates are projected to fall below flow-through rates in both low and high growth electric utility cases. With respect to natural gas pipelines, the effect of a cost of capital difference is to bring closer the time when normalization rates fall below flow-through rates.

In addition to the base and life difference models developed in the staff analysis, the impacts of normalizing regulatory commission expenses were also evaluated. Assuming regulatory commission expenses are 0.5 percent of operating revenues for pipelines and 0.1 percent of operating revenues for electric utilities, the impact of normalizing represents a maximum increase in rates of 0.04 percent for pipelines and 0.07 percent for utilities.

Finally, the staff analysis considered the impacts on rates of normalizing the tax effects of plant removal costs. No specific impacts were estimated because of the very speculative nature of removal costs at this time—particularly for nuclear power plants and offshore pipeline facilities which represent the most significant cases of removal costs. However, it was concluded that, unlike the other measured impacts, normalizing the tax effects of plant removal costs would tend to lower rates, at least initially below what they would be if the tax effects were flowed through.

Appendix C—Additional Examples of Timing Differences

Type I: Expenses that are recognized for tax filings in periods prior to when they are recognized in rates

Differences that result from expensing intangible drilling costs, delay rentals, geological and geophysical costs, and abandoned leases for tax purposes and capitalizing such costs for book purposes.

Differences that result from expensing hydrostatic testing costs for tax purposes and capitalizing such costs for book purposes.

Differences that result from expensing coal mining development costs for tax purposes and capitalizing such costs for book purposes.

Differences that result from expensing pre-operating expenses for tax purposes and deferring and amortizing such costs for book purposes.

Differences that result from expensing regulatory expenses for tax purposes and deferring and amortizing such costs for book purposes.

Differences that result from expensing storm damage costs for tax purposes but deferring and amortizing such costs for book purposes.

Differences that result from amortizing computer software costs for tax purposes over a shorter period than for tax purposes.

Type II: Expenses that are recognized for tax filings in periods later than when they are recognized in rates

Differences that result from nuclear fuel burn-up charges being greater during the burn cycle for book purposes than for tax purposes.

Differences that result from deferred compensation, profit-sharing, bonuses, vacation and severance pay being charged to expense for book purposes as accrued and expensed for tax return purposes when later paid.

Differences that result from pension costs being charged to expense for book purposes as accrued and expensed for tax return purposes when later contributed to pension fund.

Differences that result from expensing costs for repairs and maintenance for book purposes on an estimated basis and expensing such costs for tax purposes when later paid.

Differences that result from expensing inventory losses for book purposes on an estimated basis and expensing for tax return purposes when actual losses are later determined.

Type III: Revenues that are recognized for tax filings in periods prior to when they are recognized in rates

Differences that result from amounts collected subject to refund being included in revenues for tax purposes but deferred in the accounts for book purposes.

Differences that result from gains on reacquired debt being included in taxable income but deferred and amortized for book purposes.

Differences that result from transportation revenues being included in taxable income and such revenues being deferred for book purposes.

Differences that result from revenues being included in income for tax purposes and credited to exploration funds for book purposes.

Differences that result from gains on sales of property leased back being included in taxable income and deferred and amortized for book purposes.

Type IV: Revenues that are recognized for tax filings in periods later than when they are recognized in rates

Differences that result from revenues on long-term contracts being reported for book purposes on percentage-of-completion basis and reported in tax returns on a completed-contract basis.

Differences that result from installment sales being recorded for book purposes on date of sale and reported in tax returns when later collected.

18 CFR Part 282

Final Phase II Regulations Extending Incremental Pricing Program to All Industrial Users of Natural Gas; Natural Gas Policy Act of 1978; Informal Conference

[Docket No. RM80-10]

March 28, 1980.

AGENCY: Federal Energy Regulatory Commission, DOE.

ACTION: Notice of Informal Conference.

SUMMARY: On March 20, 1980, the Federal Energy Regulatory Commission (Commission) instructed Commission Staff to develop final Phase II regulations extending the incremental pricing program to all industrial users of natural gas except those specifically exempted by the Natural Gas Policy Act of 1978 (NGPA). One feature of the Commission instructions would give states the discretion to limit the impact of Phase II on individual users in order to ease any serious transitional burden. The regulations, if adopted, would provide that, if, during its first year, Phase II would result in a surcharge of more than 75 cents per thousand cubic feet to any industrial user, a state may allocate that portion of the surcharge exceeding 75 cents to other incrementally priced gas users within the state.

Notice is hereby given that an informal conference with representatives of interested State Commissions will be held for the purpose of receiving comments on this aspect of the draft Phase II regulations. The conference will be held on April 15, 1980, beginning at 9:30 a.m., in Hearing Room A at the Federal Energy Regulatory Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426

The conference will be transcribed and made a part of the record in this docket. The public is invited to observe the proceedings.

DATE: April 15, 1980, at 9:30 a.m.

ADDRESS: Federal Energy Regulatory Commission, Hearing Room A, 825 North Capitol Street, N.E., Washington, D.C. 20426.

FOR FURTHER INFORMATION CONTACT: Blaine Yamagata, Office of Commissioner Hall, 825 North Capitol Street, N.E., Washington, D.C. 20426 (202) 357-8377

Lois D. Cashell,

Acting Secretary.

AGENCY: Coast Guard, DOT.

ACTION: Proposed rules.

SUMMARY: These regulations propose a revision to the Coast Guard requirements for boat operators to carry visual distress signals. The proposed revision would add Coast Guard approved hand red flares to the list of devices that are acceptable for use on recreational boats. This proposal should be considered in conjunction with an associated proposal (CGD 80-021) to change the approval specification requirements for hand red flare distress

signals which appears elsewhere in this issue of the **Federal Register.**

DATES: Comments must be received on or before April 18, 1980.

ADDRESSES: 1. Comments should be mailed to Commandant (G–CMC/TP24) CGD 80–021A), U.S. Coast Guard, Washington, D.C. 20593. Between the hours of 7:00 a.m. and 5:00 p.m., Monday through Thursday, comments may be delivered to, and are available for inspection and copying at the Marine Safety Council (G–CMC/TP24), Room 2418, Department of Transportation, Coast Guard Headquarters, 2100 Second Street, SW., Washington, D.C. 20593.

2. Copies of the National Bureau of Standards Report FR 3950 are available from Commandant, U.S. Coast Guard (G–MMT–3/12), Washington, D.C. 20593.

FOR FURTHER INFORMATION CONTACT: LCDR Harry Schmecht, Office of Boating Safety (G–BLC–3/42), Department of Transportation, U.S. Coast Guard Headquarters, Washington, D.C. 20593, (202) 426–4176.

SUPPLEMENTARY INFORMATION: The public is invited to participate in this proposed rulemaking by submitting written views, data, or arguments. Persons submitting comments should include their name and address, identify this notice (CGD 80–021A) and the specific section of the proposal to which the comment applies, and give the reasons for the comment. Persons desiring acknowledgement that their comment has been received should enclose a stamped self-addressed postcard or envelope. The proposal may be changed in view of the comments received. All comments received will be considered before final action is taken on this proposal. Copies of all written comments received will be available for examination by interested persons at the Marine Safety Council address noted above. No public hearing is planned, but one may be held if written requests for a hearing are received and it is determined that the opportunity to make oral presentations will aid the rulemaking process.

This rule has been reviewed and determined to be non-significant under the Department of Transportation's Regulatory Policies and Procedures published on February 26, 1979 (44 FR 11034). A draft evaluation has been included in the public docket for this rulemaking, and may be obtained from the Marine Safety Council (G–CMC/24) at the address listed in the ADDRESSES section. A summary of this draft evaluation may be found in the related document (CGD 80–021) that appears elsewhere in this issue of the **Federal Register.**

Drafting Information

The principle persons involved in drafting these regulations are: JTJG John Coleman, Office of Boating Safety, and Mr. Coleman Sachs, Office of the Chief Counsel.

Background

On December 17, 1979 the Coast Guard published regulations that require carriage of Coast Guard approved visual distress signals on boats (CGD 76–183, 44 FR 73021). The regulations apply to boats used on the high seas and on coastal waters (territorial seas, the Great Lakes, and bays and sounds that empty into these waters). To give boat operators flexibility and discretion in selecting visual distress signals to satisfy their needs and personal preferences, the regulations provide a list of acceptable devices. When the regulations were published in proposed form, the list included red hand flares. In the final rule, these devices were omitted from the list.

Hand red flares were not on the list of acceptable devices due to objections that were raised over the validity of one of the tests that were proposed in the approval specifications for these flares. The test was intended to determine the potential of a fire being started on a boat by the hot slag that is expelled by burning flares. In the proposed test, newspapers were used as a surface over which the flares were burned. If the newspaper caught fire, or if the slag scorched more than half the paper, the flare failed the test. It was generally felt that the test was invalid, as newspaper does not realistically simulate any particular material or hazardous condition that exists on a recreational boat.

With the cooperation of the National Bureau of Standards, the Coast Guard has devised a new test to determine the fire causing potential of the hot slag produced by burning flares. This test requires the flares to be burned over heptane rather than newspaper. Heptane is a component of gasoline and is commonly used as a standard test fuel to represent gasoline.

The Coast Guard feels that the test will provide a more realistic measure of the hazards that exist on gasoline powered boats. It is proposing the addition of the heptane test to the approval specifications for hand red flares, as found in a related notice (CGD 80–021) published elsewhere in this issue of the **Federal Register.**

It was noted in the final rule requiring the carriage of distress signals on boats that if a satisfactory fire ignition test could be devised as part of the approval specification for hand red flares, then these devices could be added to the list of those accepted for use on boats. As the Coast Guard feels that the proposed heptane test will be suitable, it is also proposing at this time that the hand red flare be added to the list of accepted devices.

The Coast Guard is proposing that this amendment become effective on January 1, 1981. This is the effective date for the regulations covering all the visual distress signals presently listed in 33 CFR Part 175. If the proposed effective date cannot be met, some boaters who would prefer to use hand red flares may have to purchase other visual distress signals to satisfy the carriage requirement for these devices until hand red flares may be added to the list.

In order to provide manufacturers with sufficient time to produce and distribute hand red flares capable of passing the heptane test, the Coast Guard would like the regulation adding this test to the approval specifications to go into effect at least 90 days before hand red flares are authorized for carriage on boats.

Assuming the regulation adding the heptane test goes into effect on October 1, 1980, hand red flares manufactured after that date will be acceptable for use on boats. Purchasers will be able to determine which flares may be used by referring to the date of manufacture that must be marked on each device.

In consideration of the foregoing, the Coast Guard proposes to amend Title 33 of the Code of Federal Regulations as set forth below.

1. By revising the Table 175.130 to read as follows:

Table 175.130

Number marked on device:	Device description	Accepted for use	Number required to be carried
160.021	Hand red flare distress signals	Day and night[1]	3
160.022	Floating orange smoke distress signals	Day only	3
160.024	Pistol-projected parachute red flare distress signals.	Day and night[2]	3
160.036	Hand-held rocket-propelled parachute red flare distress signals.	Day and night	3
160.037	Hand-held orange smoke distress signals	Day only	3
160.057	Floating orange smoke distress signals	Day only	3

Table 175.130—Continued

	Device description	Accepted for use	Number required to be carried
160.066	Distress signal for boats, red aerial pyrotechnic flare.	Day and night[3]	3
160.072	Distress signal for boats, orange flag	Day only	1
161.013	Electric distress light for boats	Night only	1

[1] These signals must have a date of manufacture of ( ) or later to be acceptable.
[2] The signals require use in combination with a suitable launching device approved under 46 CFR 160.028.
[3] These devices may be either self-contained or pistol launched, and either meteor or parachute assisted type. Some of these signals may require use in combination with a suitable launching device approved under 46 CFR 160.026.

(46 U.S.C. 1454, 49 CFR 1.46(n)(1))

Dated: March 25, 1980.

B. E. Thompson,

Rear Admiral, U.S. Coast Guard, Chief, Office of Boating Safety.

[FR Doc. 80-10152 Filed 4-2-80; 8:45 am]

BILLING CODE 4910-14-M

DEPARTMENT OF DEFENSE

Corps of Engineers, Department of the Army

33 CFR Part 325

Processing of Department of the Army Permits; Procedures for the Protection of Cultural Resources

AGENCY: U.S. Army Corps of Engineers, DoD.

ACTION: Proposed counterpart regulations.

SUMMARY: These proposed regulations would establish the procedures to be followed by the U.S. Army Corps of Engineers in its regulatory program in order to comply with the National Historic Preservation Act, implementing regulations, and Executive Orders for the protection of historic and cultural properties. These regulations have been jointly drafted with the Advisory Council on Historic Preservation as counterpart regulations pursuant to 36 CFR 800.11. The Corps of Engineers is now following the prodedures set forth in these regulations on an iterim basis.

DATE: Comments must be received on or before June 6, 1980.

ADDRESS: Comments should be addressed to HQDA (DAEN-CWO-N), Washington, DC 20314.

FOR FURTHER INFORMATION CONTACT: Bernie Goode, Corps of Engineers, address as above, (202) 272-0199 or Peter Smith or Al Clark, Advisory Council on Historic Preservation, 1522 K Street, NW., Washington, DC. 20005, (202) 254-3886.

SUPPLEMENTARY INFORMATION: On 30 January 1979, the Advisory Council on Historic Preservation published final amendments to its regulations (36 CFR Part 800) implementing Section 106 of the National Historic Preservation Act, as amended (16 U.S.C. 470 f), and two Presidential Directives. The purpose of Section 106 is to protect properties included in or eligible for inclusion in the National Register of Historic Places through review and comments by the Advisory Council on Federal undertakings, including licensing activities, that affect such properties. The President, in his Memorandum on Environmental Quality and Water Resource Management dated 12 July 1978, directed the Advisory Council to promulgate regulations for implementing the National Historic Perservation Act. He further directed Federal agencies with consultative responsibilities under the Act to publish separate procedures for implementing the Advisory Council's regulations. Section 800.11 of the Advisory Council regulations provides that certain responsibilities of individual Federal agencies may be met by counterpart regulations jointly drafted by that agency and the Executive Director of the Advisory Council and approved by the Chairman of the Advisory Council. The regulations being proposed today are to fulfill the responsibilities of the U.S. Army Corps of Engineers as stated above for its regulatory programs. Cultural resource policies and procedures for non-regulatory programs of the Corps of Engineers are prescribed in 33 CFR Part 305. We propose to append these counterpart regulations to 33 CFR part 325, Processing of Department of the Army Permits. We welcome public comment on these proposed regulations. Accordingly, it is proposed to amend 33 CFR Part 325 by adding a new Appendix C to read as set forth below.

Note.—The Department of the Army has determined that the proposed regulations are not significant within the meaning of Executive Order 12044, and consequently do not require a regulatory analysis.

(16 U.S.C. 470)

Dated: March 26, 1980.

Hugh G. Robinson,

Brigadier General, USA, Deputy Director of Civil Works.

It is proposed to amend 33 CFR Part 325 by adding a new Appendix C to read as follows:

PART 325—PROCESSING OF DEPARTMENT OF THE ARMY PERMITS

* * * * *

Appendix C—Procedures for the Protection of Cultural Resources

1. *General.* This appendix establishes the procedures that will be followed in complying with the National Historic Preservation Act, implementing regulations, and Executive Orders which pertain to scientific, historic, architectural, and archeological resurces that may be affected by work or structures authorized by Department of the Army permits. These procedures apply only to those properties listed in or eligible for listing in the national Register of Historic Places (National Register) which would be affected by the permitted activity. The term "National Register properties" as used in this appendix shall mean those properties which are either listed in the National Register or have been determined to be eligible for listing pursuant to 36 CFR Part 63. The "permit area" is defined in paragraph 2 below and is the geographical limit of the District Engineer's responsibility to *investigate* properties which *may be* eligible for listing in the National Register. National Register properties that may be affected by the proposed work or structures, even though located outside of the permit area, are subject to consideration under the applicable laws and regulations including the procedures outlined in paragraphs 8 through 10 below. Nothing in this appendix is intended to relieve another Federal agency of its resposibilities to comply with applicable laws and regulations related to cultural resources.

2. *Permit area.* a. The term "permit area" as used in this appendix means those areas comprising the waters of the United States that will be physically affected by the proposed work or structures and uplands directly affected as a result of authorizing the work or structures. The following three tests must all be satisfied for an activity undertaken outside the waters of the United States to be included within the permit area:

(1) Such activity would not occur but for the authorization of the work or

structures within the waters of the United States;

(2) Such activity must be integrally related to the work or structures to be authorized within waters of the United States. Or, conversely, the work or structures to be authorized must be essential to the completeness of the overall project or program; and

(3) Such activity must be directly associated (first order impact) with the work or structures to be authorized.

b. For example, consider an application for a permit to construct a pier and dredge an access channel so that an industry may be established and operated on an upland area.

(1) Assume that the industry requires the access channel and the pier and that without such channel and pier the project would not be feasible. Clearly then, the industrial site, even though upland, would be within the permit area. It would not be established "but for" the access channel and pier; it also is integrally related to the work and structure to be authorized; and finally it is directly associated with the work and structure to be authorized. Similarly, all three tests are satisfied for the dredged material disposal site and it too is in the permit area even if located on uplands.

(2) Consider further that the industry, if established, would require the extension of water and sewer lines to service the industrial site. Assume that the extension would not involve the waters of the United States. The extensions would not be within the permit area because they would not be directly associated with the work or structure to be authorized.

(3) Now consider that the industry, if established, would require increased housing for its employees, but that a private developer would develop the housing. Again, even if the housing would not be developed but for the authorized work and structure, the housing would not be within the permit area because it would not be directly associated with an integrally related to the work or structure to be authorized.

c. Consider a different example. This time an industry will be established that requires no access to the navigable waters for its operation. The plans for the facility, however, call for a recreational pier with an access channel. The pier and channel will be used for the company-owned yacht and employee recreation. In the example, the industrial site is not included within the permit area. Only areas of dredging, dredged material disposal, and pier construction would be within the permit area.

3. *Affected area.* The term "affected area" as used in this appendix is that geographical area within which direct and indirect effects of the proposed work and/or structures, if permitted, could reasonably be expected to occur. This is the area of potential environmental impact and, in most cases, will exceed the limits of the permit area.

4. *Initial review and public notice.*

a. Except as indicated in b. below, the District Engineer, upon receipt of an application, will consult the published listings of the National Register to determine if any National Register properties exist within the affected area. If he determines that such properties exist within the affected area, he will identify the National Register property for inclusion in the public notice.

b. In certain specific instances, the nature, scope and magnitude of the work and/or structures to be permitted may be such that the effort to identify historic and cultural resources is not warranted. Three such situations are:

(1) Areas that have been extensively modified by previous work. In those areas previously impacted and when the proposed work is within the scope of work which has been done before, potentially eligible National Register properties that may have at one time existed within the permit area have been lost.

(2) Areas which have been created in modern times. Some recently created areas, such as dredged material disposal islands, have had no human habitation. In such cases, there is no potential for the permit area to contain potentially eligible National Register properties.

(3) Certain types of work or structures that are of such limited nature and scope that there is little likelihood of impinging upon an eligible or listed National Register property if such properties were to be present within the affected area.

Where the District Engineer determines as the result of this initial review that little likelihood exists for the proposed work to impinge upon a National Register or eligible property, no further steps need to be taken under 36 CFR Part 800. A statement concerning this determination, along with an explanation of the determination, will be included in the public notice.

c. A statement concerning the District Engineer's current knowledge of the presence or absence of National Register or eligible properties and, if present, a preliminary statement on the effects of the proposed work on those properties will be included in the public notice. The description of the proposed work and its purpose, included in the public notice pursuant to § 325.3, should be in sufficient detail to enable interested parties to identify the permit area and possible effects of the proposed activity. A copy of every public notice will be sent to the U.S. Department of the Interior, Heritage Conservation and Recreation Service (HCRS), and to the State Historic Preservation Officer (SHPO). If the District Engineer is aware of or is informed of a National Register property within the affected area, he will commence with the effect determination in accordance with paragraph 8 below.

5. *Notifications.* The District Engineer, when properly notified of the existence of a potentially eligible property shall examine the evidence presented. Proper notification must set forth specific reasons for the need to further investigate the permit area. Proper notification may consist of:

a. Specific information concerning properties which may be eligible for inclusion in the National Register and which are known to exist in the vicinity of the permit area; and

b. Specific information concerning known sensitive areas which are likely to yield resources eligible for inclusion in the National Register, particularly where such sensitive area determinations are based upon data collected from other, similar areas within the general vicinity. Comments of a general nature will not be considered proper notification nor will requests for investigations outside the permit area. Where the scope and type of work proposed by the applicant or the evidence presented leads the District Engineer to conclude that the chance of disturbance to any such resources is too remote to justify further investigation, he shall so advise the reporting party and the SHPO. If the SHPO does not agree with the conclusions of the District Engineer, the District Engineer may refer the issue to the Chief of Engineers (ATTN: DAEN–CWO–N) who, in consultation with the Advisory Council on Historic Preservation (ACHP), will decide on the need for further investigation. If the SHPO does not dispute the conclusions of the District Engineer within 20 days of being notified or if contrary guidance is not provided by DAEN–CWO–N, the District Engineer may proceed to conclude his action on the permit application.

6. *Investigations.* If the evidence indicates that further examination of the permit area is justified, the District Engineer will conduct or cause to be conducted an investigation to identify resources that may be eligible for inclusion in the National Register. As determined by the District Engineer, investigations may consist of further

consultations with the SHPO and the State Archeologist; consultations with local historical and archeological societies, university archeologists, and others with knowledge and expertise in the identification of historical, archeological, cultural and scientific resources; field examinations of the permit area by qualified personnel; and archeological testing. In appropriate cases as determined by the District Engineer, the applicant may be required, in accordance with § 325.1(e), to investigate the permit area for the presence of historical, cultural, archeological and scientific resources that may be eligible for listing in the National Register.

The Corps of Engineers' investigative responsibilities extend only to the identification of resources within the permit area. In the case where properties that may be eligible for listing in the National Register are suspected to exist in the vicinity of the permit area, the Corps' identification responsibility is only to determine whether the resource is present within the permit area. The Corps is not responsible for locating a potentially eligible property outside of the permit area.

7. *Eligibility determinations.* If the investigation confirms the presence of cultural resources within the permit area that, in the opinion of the SHPO or the District Engineer, appear to meet the criteria for inclusion in the National Register, the District Engineer will request a determination of eligibility from the Keeper of the National Register in accordance with 36 CFR 63.2 and 63.3 and notify the applicant of the further delays that will occur. If the Keeper of the National Register determines that the resources are not eligible for listing in the National Register or fails to respond within 45 days of receipt of the request, the District Engineer may proceed to conclude his action on the permit application.

8. *Effect determinations.* For all National Register properties within the affected area, the District Engineer, in consultation with the SHPO, will determine the effect of the work on those properties in accordance with 36 CFR 800.3.

If the SHPO concurs with or fails to comment within 30 calendar days on a no effect determination, the District Engineer may proceed to conclude his action on the permit application. If the SHPO disagrees with a no effect determination, the ACHP will be asked to decide if there will be an effect or not.

If an effect on a National Register property is determined, the District Engineer, in consultation with the SHPO, will then decide, in accordance with 36 CFR 800.3(b), whether or not the effect would be adverse. If a no adverse effect determination is made by the District Engineer in consultation with the SHPO, and the ACHP concurs or does not object within 30 calendar days of being so notified of the determination, the District Engineer may proceed to conclude his action on the permit application. The ACHP published guidelines in the **Federal Register** on 30 October 1978 (43 FR 5065–8) which the District Engineer should use in making effect determinations related to archeological resources.

9. *Adverse effect.* If an adverse effect determination is made by the District Engineer in consultation with the SHPO or if the Executive Director, ACHP, does not accept the District Engineer's no adverse effect determination, the District Engineer will request the comments of the ACHP pursuant to Section 106 of the National Historic Preservation Act (see 36 CFR 800.6). If, as a result of the consultation process (see 36 CFR 800.6(b)), it is concluded that the proposal would result in the irrevocable loss of significant cultural resource data, the District Engineer will formally advise the Secretary of the Interior (by notifying HCRS) of the extent to which such property may be lost if the proposed work is permitted. The District Engineer will request that the Secretary furnish, pursuant to the Preservation of Historical and Archeological Data Act of 1974, as amended, Pub. L. 93–291, 16 U.S.C. 469, et seq., plans for timely survey, recovery, and preservation of such property if, in the Secretary's opinion, it should be recovered and preserved in the public interest. The Secretary of the Interior has certain responsibilities and funding authority pursuant to Pub. L. 93–291 to conduct certain surveys and to undertake the recovery and preservation of scientific, prehistoric, historic or archeological data that may be irrevocably lost or destroyed by any Federal licensing activities and to compensate for damages resulting from construction delays or temporary loss of the use of non-Federal lands. Civil Works funds will not be expended under the regulatory program for such work. Non-Federal applicants may voluntarily elect to participate in such survey, recovery or preservation work.

If the significant data cannot or will not be recovered or preserved, the District Engineer will evaluate all factors in deciding whether or not the permit should be issued in the public interest. Upon reaching a decision, the District Engineer will notify the ACHP of the final action to be taken on the permit and the expected ultimate effect of the work on the National Register properties.

10. *Permit conditioning.* If the applicant accepts the results of the consultation process outlined in 36 CFR 800.6(b), the District Engineer will proceed to complete his action on the permit application in accordance with the results of the consultation process. The District Engineer will participate in ACHP's development of the Memorandum of Agreement prepared in accordance with 36 CFR 800.6(c) provided his commitments would not be inconsistent with Department of the Army regulatory authorities. The District Engineer will include any appropriate conditions in the permit, if issued, in accordance with § 325.4.

11. *Resources discovered during construction.* If the District Engineer finds or is notified after construction is started that a previously unidentified National Register property within the permit area will be affected by the construction, he normally will request (not require) the permittee to avoid or delay work which might affect such property and immediately notify HCRS and the SHPO. The District Engineer normally will not stop the construction nor seek an eligibility determination unless HCRS notifies the District Engineer that it will assume liability for delays in construction pursuant to its responsibility and authority under Pub. L. 93–291 or unless the permittee agrees that no compensation would be required. Upon receipt of such notification, the District Engineer will stop that portion of the work impinging on the discovered property and proceed in the same manner set forth above for properties reported during the application process period.

BILLING CODE 3710-92-M

FEDERAL EMERGENCY MANAGEMENT AGENCY

44 CFR Part 67

[Docket No. FI-3453]

National Flood Insurance Program; Revision of Proposed Flood Elevation Determinations

AGENCY: Federal Insurance Administration, FEMA.

ACTION: Proposed rule.

SUMMARY: Technical information or comments are solicited on the proposed base (100-year) flood elevations listed below for selected locations in the City of Auburn, Cayuga County, New York.

Due to recent engineering analysis, this proposed rule revises the proposed determinations of base (100-year) flood elevations published in 42 FR 54106 on or about October 4, 1977, and in the *Citizen*, published on or about August 29, 1977, and August 30, 1977, and hence supersedes those previously published rules.

DATES: The period for comment will be ninety (90) days following the second publication of this notice in a newspaper of local circulation in each commmunity.

ADDRESSES: Maps and other information showing the detailed outlines of the floodprone areas and the proposed flood elevations are available for review at the City Hall, 24 South Street, Auburn, New York. Send comments to: Mr. Bruce L. Clifford, Auburn City Manager, Memorial City Hall, 24 South Street, Auburn, New York 13021.

FOR FURTHER INFORMATION CONTACT: Mr. Robert G. Chappell, National Flood Insurance Program, Office of Flood Insurance, (202) 426–1460 or Toll Free Line (800) 424–8872, Room 5150, 451 Seventh Street SW., Washington, D.C. 20410.

SUPPLEMENTARY INFORMATION: Proposed base (100-year) flood elevations are listed below for selected locations in the City of Auburn, New York, in accordance with Section 110 of the Flood Disaster Protection Act of 1973 (Pub. L. 93–234), 87 Stat. 980, which added Section 1363 to the National Flood Insurance Act of 1968 (Title XIII of the Housing and Urban Development Act of 1968 (Pub. L. 90–448), 42 U.S.C. 4001–4128, and 44 CFR 67.4(a)) (presently appearing at its former Title 24, Chapter 10, Part 67.4(a)).

These base (100-year) flood elevations are the basis for the flood plain management measures that the community is required to either adopt or show evidence of being already in effect in order to qualify or remain qualified for participation in the National Flood Insurance Program (NFIP).

These modified elevations will also be used to calculate the appropriate flood insurance premium rates for new buildings and their contents and for the second layer of insurance on existing buildings and their contents.

The proposed base (100-year) flood elevations are:

State	City/town/county	Source of flooding	Location	#Depth in feet above ground. *Elevation in feet (NGVD)
New York	Auburn, City, Cayuga County	Hunter Brook	Corporate Limits (Downstream)	*648
			Approximately 100' upstream of Conrail	*656
			Footbridge (Upstream)	*662
			McIntosh Drive (Downstream)	*667

BILLING Code 6718-03-M

44 CFR Part 67

[Docket No. FEMA-5728]

Revision of Proposed Flood Elevation Determinations for the City of North Las Vegas, Clark County, Nevada Under the National Flood Insurance Program

AGENCY: Federal Insurance Administration, FEMA.

ACTION: Proposed rule.

SUMMARY: Technical information or comments are solicited on the proposed base (100-year) flood elevations listed below for selected locations in the City of North Las Vegas, Clark County, Nevada.

Due to recent engineering analysis, this proposed rule revises the proposed determinations of base (100-year) flood elevations published in 44 FR 64470 on November 7, 1979 and in the *Las Vegas Review Journal*, published on or about October 31, 1979, and November 7, 1979, and hence supersedes those previously published rules.

DATES: The period for comment will be ninety (90) days following the second publication of this notice in a newspaper of local circulation in the above-named community.

ADDRESSES: Maps and other information showing the detailed outlines of the floodprone areas and the proposed flood elevations are available for review at the City Hall, 2200 Civic Center Drive, North Las Vegas, Nevada 89030.

Send comments to: the Honorable Ray H. Daines, Mayor, City of North Las Vegas, City Hall, P.O. Box 4086, North Las Vegas, Nevada 89030.

FOR FURTHER INFORMATION CONTACT: Mr. R. Gregg Chappell, National Flood Insurance Program (202) 426–1460 or Toll Free Line (800) 424–8872, Room 5148, 451 Seventh Street, SW., Washington, D.C. 20410.

SUPPLEMENTARY INFORMATION: Proposed base (100-year) flood elevations are listed below for selected locations in the City of North Las Vegas, Nevada, in accordance with section 110 of the Flood Disaster Protection Act of 1973 (Pub. L. 93–234), 87 Stat. 980, which added section 1363 to the National Flood Insurance Act of 1968 (Title XIII of the Housing and Urban Development Act of 1968 (Pub. L. 90–448), 42 U.S.C. 4001–4128, and 44 CFR 67.4(a)).

These base (100-year) flood elevations are the basis for the flood plain management measures that the community is required to either adopt or show evidence of being already in effect in order to qualify or remain qualified for participation in the National Flood Insurance Program (NFIP).

These modified elevations will also be used to calculate the appropriate flood insurance premium rates for new buildings and their contents and for the second layer of insurance on existing buildings and their contents.

The proposed base (100-year) flood elevations are:

Source of flooding	Location	#Depth and *Elevation
Las Vegas Wash	Carey Avenue 50 feet downstream from centerline.	*1836
	Carey Avenue 50 feet upstream from centerline.	*1841
	Cheyenne Avenue 50 feet downsteam from centerline.	*1858
	Cheyenne Avenue 75 feet upstream from centerline.	*1865
	Losee Road 100 feet upstream from centerline.	*1915
	Intersection of Juelene Way and Lockwood Avenue.	*#1
	Intersection of Crawford Street and Judson Avenue.	*#1
	Intersection of Statz Street and Carey Avenue.	*#2
Unnamed Tributary to Las Vegas Wash.	Cheyenne Avenue at Centerline.	*1869
	Losee Road 50 feet upstream from centerline.	*1908
	Craig Road 50 feet upstream from centerline.	*1959
	Tillman Drive at centerline	*1997

(National Flood Insurance Act of 1968 (Title XIII of Housing and Urban Development Act of 1968), effective January 28, 1969 (33 FR 17804, November 28, 1968), as amended; 42 U.S.C. 4001–4128; Executive Order 12127, 44 FR 19367; and delegation of authority to Federal Insurance Administrator, 44 FR 20963)

Issued: March 17, 1980.

Gloria M. Jimenez,

Federal Insurance Administrator.

BILLING CODE 6718-03-M

DEPARTMENT OF TRANSPORTATION

Coast Guard

46 CFR Part 160

[CGD 80-021]

Distress Signals; Heptane Ignition Test for Hand Red Flares

AGENCY: Coast Guard, DOT.

ACTION: Proposed rules.

SUMMARY: This proposal would amend the Coast Guard approval specification for hand red flare distress signals. The amendments would eliminate the reference to merchant vessels in the subpart heading for this specification, and add the requirement for a heptane ignition test that is intended to measure the tendancy of the flares to start a fire on a boat. This is being proposed in order to make the hand red flare acceptable for use on recreational boats, and should be considered in conjunction with a proposal to change the equipment requirements for boats (CGD 80–021A) which appears elsewhere in this issue of the **Federal Register**.

DATES: Comments must be received on or before May 19, 1980.

ADDRESSES: 1. Comments should be mailed to the Commandant (G–CMC/24) (CGD 80–021), U.S. Coast Guard, Washington, DC 20593. Between the hours of 7:00 a.m. and 5:00 p.m. Monday through Thursday, comments may be delivered to, and are available for inspection and copying at the Marine Safety Council (G–CMC/24), Room 2418, U.S. Coast Guard Headquarters, 2100 Second St., SW., Washington, DC 20593.

2. Copies of the National Bureau of Standards Report FR 3950 are available from Commandant, U.S. Coast Guard (G–MMT–3/12), Washington, DC 20593.

FOR FURTHER INFORMATION CONTACT: Mr. Robert Markle, Office of Merchant Marine Safety (G–MMT–3/12), Department of Transportation, U.S. Coast Guard Headquarters, Washington, DC 20593, (202) 426–1444.

SUPPLEMENTARY INFORMATION: On December 17, 1979, the Coast Guard published a final rule making in the **Federal Register** that ammended ten specification regulations for pyrotechnic distress signals and line throwing appliances (44 FR 73055). One of those specification regulations was Subpart 160.021-Hand Red Flare Distress Signals for Merchant Vessels. As discussed in the preamble of that rule making, these devices were not approved for use on recreational boats owing to the need to determine the most accurate way to test the hazardous potential of the hot slag expelled by burning flares. The preamble described tests that involved the burning of flares over newspaper and over heptane. Comments were solicited on whether one or both of these tests should be adopted. No comments have been received since publication of the rule making. The Coast Guard has determined that the heptane ignition test is an appropriate way to measure the hazards of hot slag. This notice proposes the addition of such a test.

The National Boating Safety Advisory Council has been consulted and its opinions and advice have been considered in the formulation of this proposed amendment. The transcripts of the proceedings of the National Boating Safety Advisory Council at which this proposed amendment was discussed are available for examination in room 4224,

U.S. Coast Guard Headquarters, 2100 Second St., SW., Washington, DC. The minutes of the meetings are available from the Executive Director, National Boating Safety Advisory Council, c/o Commandant (G–BA/42), U.S. Coast Guard, Washington, DC 20593.

Interested persons are invited to participate in this proposed rule making by submitting written views, data, or arguments. Persons submitting comments should include their names and addresses, identify this notice (CGD 80–021) and the specific section of the proposal to which their comments apply, and give reasons for the comments. The proposal may be changed in light of comments received. All comments received before the expiration of the comment period will be considered before final action is taken on this proposal. No public hearing is planned but one may be held if written requests for a hearing are received and it is determined that the opportunity to make oral presentations will aid the rule making process.

Draft Evaluation

A Draft Evaluation has been prepared for these regulations in accordance with the Department of Transportation's Regulatory Policies and Procedures published in the **Federal Register** on February 26, 1979 (44 FR 11034). That document requires that the evaluation quantify, to the maximum extent practicable, the estimated cost of the regulations to the private sector, consumers, and federal, state and local governments, as well as the anticipated benefits and impact of the regulations.

This proposal is expected to result in an initial cost of about $40,000 and a recurring annual cost of about $1,000. These costs will be imposed directly on the private sector (the manufacturers of the flares). The manufacturers are expected to pass the costs through to the ultimate consumers of the flares in the form of price increases; however, because of the large number of flares that are expected to be produced, the price increase for an individual flare will be negligible. There is no effect on federal, state, and local governments except in their capacities as consumers of the flares. The primary benefit identified for the proposal is the increased safety for users of hand red flares.

The Draft Evaluation has been included in the public docket for this rule making, and may be examined at the Marine Safety Council (G–CMC/24) at the address listed in the ADDRESSES section.

Drafting Information

The principle persons involved in drafting these regulations are: Mr. Robert Markle, Office of Merchant Marine Safety, and Mr. Coleman Sachs, Office of the Chief Counsel.

Discussion of the Proposed Regulations

This proposal would amend Subpart 160.021 of Title 49 of the Code of Federal Regulations, which contains a specification for hand red flare distress signals. The amendments would change the title of the subpart to delete the words "for merchant vessels" and would add a heptane ignition test to the technical tests that are presently required for the device.

One source of concern to the Coast Guard since the beginning of the project to require visual distress signals on boats has been the safety of pyrotechnics, and in particular the safety of hand held flares that expell hot slag as they burn. This has been a topic of discussion at public meetings of the National Boating Safety Advisory Council over the past few years. The problem was addressed in the notice of proposed rule making for the project amending distress signal specifications (CGD 76–048a, 43 FR 49445, October 23, 1978) which included a test of the hot slag hazard that used newspaper as a test medium. Layers of newspaper were to be placed under the burning flare to catch the hot slag. If the newspaper caught fire or if the slag scorched more than half of the paper, the flare failed the test. Several comments on the proposed test expressed the opinion that newspaper lacks sufficient uniformity to be a reliable test medium and that it does not realistically simulate any particular material or hazardous condition that exists on recreational boats. Furthermore, the Coast Guard found that the newspaper was often ignited by an accumulation of slag in one spot, a condition that resulted from the flare being set in a fixed position. This would not be likely to occur if the flare were handled by an individual in a distress situation. After consideration of the matter, the Coast Guard decided to investigate possible alternatives.

The Coast Guard contracted the National Bureau of Standards (NBS) to run a series of hand flare tests that involved burning flares over newspapaer and over heptane. Heptane is one of the components of gasoline, and is used as a standard test fuel to represent gasoline. Thus heptane appears to provide a closer approximation of the fire hazard found on gasoline powered boats. After the testing had been completed, a demonstration was held at NBS for the purpose of showing the results of the test program to the Visual Distress Signal Subcommittee of the National Boating Safety Advisory Council and any interested members of the public. The results of the testing are summarized in NBS Report FR 3950 which is available in single copies without charge from the Coast Guard at the address indicated in the addresses section of this notice.

While the results of the testing were being analyzed, the Coast Guard decided to publish final rules for visual distress signals on boats without the hand flare listed as an acceptable item (CGD 76–183, 44 FR 73021, December 17, 1979). At the same time, the revised specification for the hand flare was published without a hot slag test (CGD 76–048 a & b, 44 FR 73055, December 17, 1979). This final rule included a discussion of the options open to the Coast Guard with regard to a test for hot slag.

The Coast Guard has concluded its analysis of the NBS testing. It has decided that a test using a layer of heptane floating on top of water is the most appropriate test available for determining the tendency of hot slag to start an explosion and fire, the hazard that has been of greatest concern to the Coast Guard. The heptane will burst into flame when flaming or glowing particles or sparks pass through the vapor layer that forms above it. The newspaper test was not as sensitive to this hazard as the heptane test. The consequence would be that a flare that poses an explosion hazard in the presence of gasoline vapors might not be rejected by a newspaper test. One other advantage is that heptane is not sensitive to the accumulation of slag in one spot. This notice proposes the addition of a heptane ignition test essentially as it was performed by the National Bureau of Standards.

The Visual Distress Signal Subcommittee of the National Boating Safety Advisory Council has recommended that the Coast Guard consider the need for an additional test to determine the potential of a flare to ignite the surface of materials found on recreational boats. The subcommittee feels that such a surface burning test, by augmenting the heptane test, would provide an added measure of safety for devices approved for use on boats. The Coast Guard has not included a surface burning test in this proposal, as its primary concern is with fires or explosions caused by ignited gasoline vapors, a matter that it feels is

adequately addressed by the heptane test alone.

The Coast Guard is not convinced that there is a significant risk of hot slag igniting materials used in boat construction. A series of tests of safety hazards associated with the use of flares on recreational boats was conducted for the Coast Guard in 1977. These revealed that flares would char, but not ignite painted wood, varnished wood, and fiberglass. These are the types of material on a boat that would provide the most likely surfaces over which flares would be burned. This finding would appear to reduce the necessity for including a surface burning test in the approval process for hand red flares. The results of the test series from which this information was taken are summarized in report No. AD A049 969, available from the national Technical Information Service, Springfield, Virginia 22151.

An additional factor that contributed to the Coast Guard's decision against proposing a surface burning test is the absence of any standard reference material suitable for laboratory testing. The extreme variations that would exist in any samples selected to represent material found on boats would tend to negate the value of the test results.

In proposing the addition of a heptane test, The Coast Guard is motivated primarily by its perception of the hazards that might exist on recreational boats. No accident data could be found that positively and clearly indicate that hot slag dripping from a flare poses any real and significant danger on a boat. Despite a Coast Guard requirement for hand red flares on commercial vessels, A Coast Guard Auxiliary requirement for flares on boats examined for a Courtesy Motorboat Examination Decal, a New York state law that requires flares on boats over 18 feet, and repeated attempts by the Coast Guard to solicit specific accident or hazard data in previous rule makings, and in open meetings with the National Boating Safety Advisory Council and the National Association of State Boating Law Administrators, not a single real world incident has been brought to our attention in which use of a hand flare caused a fire or explosion, or other significant harm. Despite this, the Coast Guard feels that, since most recreational boats use gasoline for fuel, a potential risk exists that justifies the minimal costs of this proposal.

Should this proposal be adopted as a final rule, the Coast Guard is considering making it effective 90 days before the effective date of its companion project (CGD 80-021A) that would add hand red flares to the list of visual distress signals approved for use on recreational boats. It would be advantageous to flare manufacturers and members of the boating community alike if hand red flares could be used as accepted devices as of January 1, 1981, the effective date for the regulation covering other visual distress signals approved for use on boats. This would avoid placing the manufacturers of hand red flares at a competitive disadvantage, and would relieve boaters who prefer to carry hand red flares from having to purchase other devices. If this amendment to the specification regulation were to become effective on October 1, 1980, it is anticipated that manufacturers will have sufficient time to supply the market by January 1, 1981 with flares that pass the heptane test. Comments are specifically solicited on whether this timetable can be realistically met.

As the heptane ignition test is being proposed for all hand held flares approved under Subpart 160.021, it would also apply to flares carried on merchant vessels, even though the Coast Guard's primary concern in the past has been the safety of flares used on recreational boats. The Coast Guard feels it is appropriate to make the test a requirement for flares used on merchant vessels as well for the following reasons:

(a) There has been concern about the safety problems associated with hot slag from hand flares used on merchant vessels. These flares could be used in and around fire hazard areas in merchant vessel casualties, especially if the crew was not aware of the potential for fire.

(b) The flares are part of the equipment pack of inflatable life rafts which are constructed of rubberized fabrics that are susceptible to fire.

(c) At least one type of approved hand held flare can already pass the heptane ignition test, indicating that others that fail the test may be able to pass it by alteration of the manufacturer's production methods, rather than complete redesign of the flare. There is no indication that a flare which passes the heptane ignition test will be significantly more expensive to manufacture than one that does not, eliminating cost as the basis for approving separate devices.

(d) Confusion might result if two similar Coast Guard approved flares were commercially available, only one of which could be used on recreational boats.

In consideration of the foregoing, the Coast Guard proposes to amend Part 160 of Title 46 of the Code of Federal Regulations as set forth below.

1. By revising the heading of Subpart 160.021 to read as follows:

Subpart 160.021—Hand Red Flare Distress Signals

2. By adding a new paragraph (d)(8) to 160.021–4 to read as follows:

§ 160.021–4 Approval and production tests.

* * * * *

(d) *Technical tests.* * * *

* * * * *

(8) *Heptane ignition.* (i) A metal pan must be used to hold a layer of water at least 12 mm (½ in.) deep with a layer of technical grade heptane on top of the water. The pan must be at least 1 m (39 in.) square with sides extending between 175 mm (7 in.) and 200 mm (8 in.) above the surface of the water. The amount of heptane used to form the layer must be 2.0 liters per square meter of pan area (6.25 fluid ounces per square foot).

(ii) The test must be conducted in a draft-free location. The ambient temperature, the temperature of the water, and the temperature of the heptane must all be between 20°C (68°F) and 25°C (77°F) at the time of the test.

(iii) The signal under test must be held with the flame end pointing upward at an angle of approximately 45°, 1.2 m (4 ft.) directly above the center of the pan. The signal must be ignited as soon as the heptane is observed to spread out over the water in a continuous layer. The signal must be allowed to burn completely, and must remain in position until it has cooled.

(iv) The heptane must not be ignited by the flare or by material from the flare.

(46 U.S.C. 481, 49 U.S.C. 1655(b)(1), 49 CFR 1.46(b)).

Dated: March 27, 1980.

Henry H. Bell

Rear Admiral, U.S. Coast Guard, Chief, Office of Merchant Marine Safety

BILLING CODE 4910-14-M

Research and Special Programs Administration

49 CFR Part 192

[Docket No. PS-67; Notice 1]

Transportation of Natural and Other Gas by Pipeline; Interior Piping

AGENCY: Materials Transportation Bureau (MTB).

ACTION: Advance Notice of Proposed Rulemaking.

SUMMARY: This Advance Notice of Proposed Rulemaking invites comments relative to the need for Federal safety regulation of gas piping located inside buildings, whether these buildings be classified as commercial, industrial, a domicile, or places of congregation such as auditoriums, churches, or schools. Interior piping upstream from gas meters is currently subject to Federal or State regulatory authority as well as local building codes, and compliance with Federal requirements may be inappropriate.

DATE: Comments must be filed by August 1, 1980. Late filed comments will be considered as far as practicable.

ADDRESS: Comments should identify the docket and notice numbers and be submitted in triplicate to the Docket Branch, Materials Transportation Bureau, Department of Transportation, 400 7th Street, S.W., Washington, DC 20590. Comments will be available at the Docket Branch, Room 8426. The Docket Branch is open Monday through Friday from 8:30 a.m. to 5:00 p.m.

FOR FURTHER INFORMATION CONTACT: Robert F. Langley, 202–426–2082.

SUPPLEMENTARY INFORMATION: The National Transportation Safety Board (NTSB) in safety recommendation P–76–10 and pipeline accident report NTSB–PAR–76–2 issued on April 19 and February 19, 1976, respectively, recommended that the MTB amend 49 CFR Part 192 to define more realistically an operator's responsibility for gas piping inside buildings. In this report (a copy of which is in the docket and may be obtained from the National Technical Information Service), NTSB described an accident which occurred in an office building in New York City.

The report stated that:

"At 6:57 a.m. on April 22, 1974, a massive, low order explosion demolished the west wall of a 25-story commercial building at 305 East 45th Street, New York, New York. The structure of the adjacent building was damaged and glass was broken in other buildings in the area. Glass fragments and slivers were blown into 46th Street, where they lay 1-inch deep in places. No persons were killed, but more than 70 persons were injured."

"The National Transportation Safety Board's investigation showed that a 6-inch service line located in the basement of the building had been struck from below and severed by a ruptured hydropneumatic pressure tank installed directly underneath. Gas at 7-inches of water column flowed at 54,000 cubic feet per hour from the open end of the separated service line. Gas leakage continued for about ½ hour. Gas odors finally were noticed by a building occupant, but the building exploded before any mitigative efforts took place.

"The 6-inch service line in the basement was considered by the Office of Pipeline Safety to be a gas distribution main and therefore under the Federal regulation 49 CFR Part 192.3. The New York State Public Service Commission's regulation, 16 NYCRR 255.1855, maintains that the pipeline operator's jurisdiction ends at the first fitting inside the wall of a customer's structure. This is based on the impracticability of a pipeline operator's trying to operate and maintain thousands of feet of gas piping inside the walls and ceilings of thousands of buildings within the State."

Current Federal Regulation of Interior Piping

The Federal gas pipeline safety standards in Part 192 apply to operators of gas pipeline systems in or affecting interstate or foreign commerce other than rural gathering systems. As the term operator is defined in § 192.3, it includes both public gas utilities who sell and transport gas to customers and customers of such utilities who purchase gas for resale rather than their own consumption. In this latter category of operators are landlords and public housing authorities who sell and distribute gas to tenants in connection with the lease of real property (dwelling units) and also membership associations who sell and distribute gas to residents of housing cooperatives or condominiums.

In accordance with the definition in § 192.3 of the term "service line," an operator's responsibility for compliance with the Federal standards extends to the outlet of each customer meter (the meter that measures gas transferred to a customer) or to the connection of operator-owned piping with the customer's piping, whichever is farther downstream. This jurisdictional limitation may encompass interior piping as well as the underground or exterior piping that normally forms the bulk of a gas distribution system.

Regarding the extent to which Part 192 applies to interior piping under the "service line" definition, MTB has made the following general interpretations:

(1) Where a customer meter is located outside a building, the customer's piping is considered to begin no farther downstream than the wall through which the pipeline enters the building.

(2) Where a customer meter is located inside a building, the piping located upstream from the outlet of the meter is subject to Part 192.

(3) In an apartment complex consisting of several buildings, the underground and exterior pipelines are a distribution system subject to Part 192.

(4) In a distribution system that comprises interior piping only or primarily interior piping, as where an exterior "master meter" measures gas that is then transported throughout a single multiple dwelling building, and there are no exterior pipelines serving other buildings, the system is not subject to Part 192. In this situation the "master meter" is considered a "customer meter" for purposes of the "service line" definition in section 192.3.

These interpretations can be generalized to say that Part 192 applies to distribution systems that comprise exterior and underground pipelines and only to interior segments of such systems that are located upstream from customer meters. In the absence of customer meters, Part 192 jurisdiction ends no farther downstream than the building wall. The basis for this generalized interpretation lies in the legislative history of the Natural Gas Pipeline Safety Act of 1968, which shows Congressional concern for the safety of exterior and underground systems, the impracticality of determining ownership of piping inside buildings, and the fact that interior piping must meet the standards of local building codes. Interior segments of pipeline up to the meter are covered because normally the operator controls the meter and ownership of gas does not pass from the operator to the customer until the gas leaves the meter.

Two examples of the application of Part 192 to interior piping are: (1) placement of meters on the upper levels of buildings, and (2) piping routed through metered buildings to get to other buildings, such as in apartment complexes.

Purpose of this Notice

MTB recognizes that a large portion of gas pipelines inside buildings that is currently subject to Part 192 is behind walls and generally inaccessible to an operator after construction of a building. This situation makes compliance with many of the applicable safety requirements in Part 192 difficult because they were adopted with exterior, primarily underground piping in mind. Likewise, it is difficult for Federal and State pipeline safety inspectors to monitor the compliance of interior gas piping with applicable pipeline safety standards. MTB, by means of the following questions in this Advance Notice, wishes to stimulate answers to the issue raised by NTSB and to the need for continued Federal regulation of interior piping.

I. Local Building Codes as Standards for Design and Installation of Interior Gas Piping

A. To what extent do local building codes govern the design, installation, and testing of interior gas piping?

B. Are the safeguards adequate?

C. Should the Federal standards for design, installation, and testing of interior gas piping continue to apply in spite of local building code requirements?

D. Should the Federal standards be amended to apply only to accessible interior piping components such as meters?

E. Where local building codes do not apply to interior gas piping or the code provisions are inadequate, should the Federal standards continue to apply until local code provisions are adopted or improved to provide an acceptable level of safety?

F. Should operators be encouraged to seek adoption of better local building codes for gas piping and enforcement of such codes, such as by providing an exemption from Federal requirements where adequate local codes exist?

G. What should be the measure of building code adequacy?

H. If the Federal standards were amended to limit their application in areas of design, installation, and testing in favor of local code provisions, should operators be required to make thorough inspections (visually and by pressure test) of interior piping before allowing gas to flow into the system? It is recognized that a total visual inspection may be difficult, and for certain construction, would have to be done in stages as construction progresses.

II. The "National Fuel Gas Code" as Standards for Operation and Maintenance of Interior Gas Piping

MTB is also concerned that local building codes, if they are to provide for public safety in lieu of the Federal standards, may not require proper operation and maintenance of interior gas piping. For example, the performance of leakage surveys as required by § 192.723 might bring to light situations which could cause accidents like the one related above in the NTSB report.

The National Fire Protection Association (NFPA) states in the preface and the history of the "National Fuel Gas Code" (NFPA 54) that the document offers general criteria for the installation, operation, and maintenance of gas piping and gas equipment on customers' premises. The "National Fuel Gas Code" was developed from American National Standards Institute (ANSI) codes and from NFPA standards already in existence. The standards of NFPA 54 were not incorporated by reference in Part 192 when the Federal standards were adopted because the topics covered were generally thought to be outside the scope of Part 192. While this is still true regarding the installation of gas appliances and utilization equipment, the subsequent interpretations of Part 192, based on the "service line" definition (See Amdt. 192–13, 38 FR 9084, April 10, 1973), and the issue raised by NTSB make it opportune to consider the suitability of NFPA 54 as a referenced Federal standard or alternative regulation for interior piping.

A. To what extent do local building codes govern the operations and maintenance of interior gas piping?

B. Should the standards as set forth in NFPA 54, Parts 1 and 2, as applicable to interior gas piping, be incorporated as regulations in Part 192?

C. If so, would the requirements be more appropriate or less burdensome than the Part 192 standards?

D. As an alternative, should regulations be developed in Part 192 which would encourage gas operators to actively lobby for building codes or other local regulations to incorporate the pertinent NFPA 54 standards?

III. Gas Detectors

Present technological developments in the art of flammable gas detection have advanced to the point where even leading mail order houses are offering reliable automatic gas leak detector alarms, similar to smoke detector alarms, for nominal sums.

A. Should operators of interior gas piping be required, either by local building codes or Federal regulations, to include gas detectors and alarms in the buildings served?

B. Should such a requirement apply instead of existing Part 192 requirements that may be difficult to meet inside buildings?

MTB would appreciate answers or comments on any or all of the above questions and ideas. While rule changes are not being proposed at this time, if a commenter feels that conversion of any of the above thoughts to Federal regulations would in any way add to a gas operator's cost of operation, the commenter should state actual costs (not generalities) expected to be involved. The derivation of the increased costs should include breakdowns, such as labor, materials, and overhead, with carrying charges listed separately.

(49 U.S.C. 1672; 49 CFR 1.53(a), Appendix A of Part 1 and Paragraph (b)(2) of Appendix A to Part 106).

Issued in Washington, DC, on March 26, 1980.

Cesar De Leon,

Associate Director for Pipeline Safety Regulation, Materials Transportation Bureau.

[FR Doc. 80-9883 Filed 4-2-80; 8:45 am]

BILLING CODE 4910-60-M

Federal Highway Administration

49 CFR Part 325

[BMCS Docket No. MC-62-1, Notice No. 80-3]

Compliance With Interstate Motor Carrier Noise Emission Standards

AGENCY: Federal Highway Administration (FHWA), DOT.

ACTION: Notice of proposed rulemaking.

SUMMARY: In response to a petition for rulemaking filed by Salt Lake County, Utah, and in settlement of a lawsuit filed by Salt Lake County against the Department of Transportation, this document proposes to amend the Interstate Motor Carrier Noise Emission Standards to allow a minimum measurement distance of 31 feet and to change the correction factor for a hard test site.

DATE: Comments must be received on or before August 1, 1980.

ADDRESS: Submit written comments, preferably in triplicate, to the docket number and notice number that appear at the top of this document, Room 3402, Bureau of Motor Carrier Safety (BMCS), 400 Seventh Street, SW., Washington, D.C. 20590. All comments received will be available for examination at the above address between 7:45 a.m. and 4:15 p.m. ET, Monday through Friday.

FOR FURTHER INFORMATION CONTACT: Mr. Gerald J. Davis, Chief, Development Branch, BMCS, 202–426–9767; or Mr. Gerald M. Tierney, Office of the Chief Counsel, 202–426–0346, Federal Highway Administration, U.S. Department of Transportation, 400 Seventh Street, SW., Washington, D.C. 20590. Office hours are from 7:45 a.m. to 4:15 p.m. ET, Monday through Friday.

SUPPLEMENTARY INFORMATION: The Interstate Motor Carrier Noise Emission Standards were published on October 15, 1975. The standards require a minimum distance of 35 feet for measuring the level of noise. This is the distance between the microphone location point and the microphone target point.

The regulations also state that when tests are made at a "hard" test site, a correction factor of 2 dB(A) is to be subtracted from the maximum sound level reading. This tolerance is specified

to ensure that unnecessary violations will not be issued.

On December 11, 1975, Salt Lake County, Utah, petitioned for a review of those requirements in the United States Court of Appeals, District of Columbia Circuit. Subsequently, as part of the settlement negotiations in that case, Salt Lake County petitioned for an amendment of 49 CFR 325.7 and 49 CFR 325.75(a). Under the Federal Highway Administration's rulemaking procedures, the petitioner asked that the minimum measurement distance specified in 49 CFR 325.7 be reduced from 35 feet to 31 feet. The petitioner also requested that the 2 dB(A) tolerance for the hard test site specified in 49 CFR 325.75(a) be deleted.

Salt Lake County contends that the minimum measurement distance should be reduced to 31 feet in order to allow communities to make use of additional measurement sites. They rely on a report by B. H. Sharp entitled "Research on Highway Noise Measurement Sites" as support for their position. They claim that their experience has been that measurements taken at less than 35 feet have proved to be both accurate and feasible.

The 35-foot minimum distance was established by the Federal Highway Administration because of the greater accuracy achieved in measuring at distances at or over 35 feet. Measurements at distances less than 35 feet are generally less accurate because of near-field acoustical effects. In addition, at closer distances, a passing truck cannot be approximated as a point source of noise, thereby invalidating certain theoretical source propagation models. Also, reflection effects from the ground tend to be exaggerated at close in measurement distances. The result is that the accuracy of measurements taken at less than 35 feet is unpredictable.

Salt Lake County's second concern is that the 2 dB(A) correction factor is unnecessary. It is their contention that at close distances differences in noise levels due to ground surfaces, either hard or soft, are negligible. It has been their experience that this correction factor is unnecessary.

The purpose of adding or subtracting a correction factor is to equate the sound level reading actually generated by the motor vehicle to the sound level reading it would have generated if the measurement had been made at a standard test site.

Pursuant to a joint motion for voluntary dismissal filed by the Department of Transportation and Salt Lake County, the court, on September 20, 1979, issued an order terminating Salt Lake County's legal actions against the Department of Transportation. As part of the settlement agreement that led to that order the Federal Highway Administration agreed to issue a Notice of Proposed Rulemaking concerning 49 CFR 325.7 and 49 CFR 325.75(a). This Notice is being issued to satisfy the requirements of that agreement and to solicit comments concerning the issues raised in Salt Lake County's petition for rulemaking.

In view of the above, the Bureau of Motor Carrier Safety proposes the following amendments to 49 CFR Part 325:

§ 325.7 [Amended]

1. Amend Table 1 in § 325.7 by adding the following entry to appear as a new first entry to read as follows.

Table 1.—*Maximum Permissible Sound Level Readings (Decibel (A))*[1,2]

If the distance between the microphone location point and the microphone target point is—	Highway operations test				Stationary tests	
	Soft site		Hard site		Soft site	Hard site
	35 mi/h or less	Above 35 mi/h	35 mi/h or less	Above 35 mi/h		
31 ft (9.5 m) or more but less than 35 ft (10.7 m)	90	94	92	96	90	92
*	*	*	*	*	*	*

§ 325.75 [Amended]

2. Amend § 325.75 by deleting and reserving paragraph (a).

Note.—The Federal Highway Administration had determined that this document does not contain a significant proposal according to the criteria established by the Department of Transportation pursuant to E.O. 12044. The anticipated impact of this proposal is so minimal that it does not warrant the preparation of a full regulatory evaluation.

(42 U.S.C. 4917, 49 CFR 1.48(b) and 301.60)

BILLING CODE 4910-22-M

Urban Mass Transportation Administration

49 CFR Part 640

[Docket No. 80-A]

Bus Rehabilitation Program—Policy and Procedures; Extension of Comment Period

AGENCY: Urban Mass Transportation Administration, DOT.

ACTION: Extension of comment period.

SUMMARY: In the Federal Register of February 11, 1980 (45 FR 9244), the Urban Mass Transportation Administration issued a notice of a proposed policy and guidelines concerning Federal grants to aid in bus rehabilitation projects of mass transit systems. Interested parties were given until March 27, 1980 to submit comments. Because of extensive interest in this action and many requests for extension of the comment period, a new closing date for comments has been established and is set out below.

DATE: Comments must be received on or before May 2, 1980.

ADDRESS: Comments must be submitted to UMTA Docket No. 80-A, 400 7th Street, S.W., Washington, D.C. 20590. All comments and suggestions received will be available for examination in room 9320 at the above address between 8:30 a.m. and 5:00 p.m., Monday through Friday. Receipt of comments will be acknowledged by UMTA if a self-addressed, stamped postcard is included with each comment.

FOR FURTHER INFORMATION CONTACT: Charlotte Adams, Office of Program Analysis, (202) 472-6997.

Dated: March 28, 1980.

Theodore C. Lutz,

Administrator.

BILLING CODE 4910-57-M

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

50 CFR Parts 611 and 655

Atlantic Squid Fishery; Proposed Regulations

AGENCY: National Oceanic and Atmospheric Administration (NOAA)/ Commerce.

ACTION: Approval and partial disapproval of amendment to the Atlantic squid fishery management plan.

notice of proposed rulemaking, and request for comments.

SUMMARY: The Assistant Administrator for Fisheries, NOAA, has approved, with the exception of one provision, an amendment to the fishery management plan for the Squid Fishery of the Northwest Atlantic Ocean (FMP). Proposed regulations to implement the management measures contained in the amendment would: (1) Establish an initial level of harvest for United States vessels catching Atlantic squid (*Illex illecebrosus* and *Loligo pealei*); and (2) establish a reserve from which squid may be distributed to the domestic and foreign fisheries.

All regulations governing the foreign fishery for squid contained in 50 CFR Part 611 are continued in effect without change.

The proposed amendments to Part 655, which include technical changes to the Atlantic squid regulations now in effect, are being published in the **Federal Register** as emergency regulations.

EFFECTIVE DATES: Comments on the proposed regulations and the amendment to the FMP are invited for a 45-day period. All comments must be submitted in writing on or before May 26, 1980.

ADDRESS: All comments on the amendment to the FMP and the proposed regulations should be sent to: Regional Director, National Marine Fisheries Service, Federal Building, 14 Elm Street, Gloucester, Massachusetts 01930. Mark: "Comments on Proposed Squid Regulations" on the outside of the envelope.

FOR FURTHER INFORMATION CONTACT: Allen E. Peterson, Jr., Regional Director, at the above address; telephone (617) 281–3600.

SUPPLEMENTARY INFORMATION: The FMP was prepared by the Mid-Atlantic Fishery Management Council (Council), and approved by the Assistant Administrator on June 6, 1979, in accordance with the Fishery Conservation and Management Act of 1976, as amended, 16 U.S.C. 1801 *et seq.* (Act). Final regulations implementing the FMP were published on December 31, 1979 (44 FR 77174). Those regulations established annual quotas on a fishing year basis (April 1–March 31) for domestic vessels harvesting *Illex Illecebrosus (Illex)* or *Loligo pealei (Loligo)*. The FMP was to expire on March 31, 1980.

On March 19, 1980, the Assistant Administrator approved, with one exception, an amendment to the FMP. The approved provisions of the amendment: (1) Extend the FMP indefinitely; (2) maintain the optimum yield (OY) for *Illex* at 30,000 metric tons (mt) and the OY for *Loligo* at 44,000 mt; (3) reduce the domestic annual harvest (DAH) of *Illex* from 10,000 mt to 5,000 mt and the total allowable level of foreign fishing (TALFF) of *Illex* from 20,000 mt to 12,000 mt; (4) reduce the DAH of *Loligo* from 14,000 to 7,000 mt and of *Loligo* from 30,000 mt to 18,000 mt; and (5) establish a reserve of *Illex* at 13,000 mt and a reserve of *Loligo* at 19,000 mt, which are available for distribution to the domestic and foreign fisheries.

Optimum Yield

Based upon the 1979 squid stock assessment, the Council has determined that the OY for *Loligo* should be maintained at 44,000 mt, and the OY for *Illex* be maintained at 30,000 mt. The OY for *Loligo* is equal to the maximum sustainable yield (MSY). The OY for *Illex* is 10,000 mt less than the MSY because scientific information for *Illex* is much less complete than for *Loligo*. The Council's approach to *Illex* is consistent with sound conservation and management principles and continues a cautious development of this fishery until biological and ecological information is developed further.

DAH, Reserve and TALFF

The Council has set the domestic annual harvest (DAH) at 5,000 mt for *Illex* and 7,000 mt for *Loligo*. These levels of DAH take into account not only past performance of U.S. fishermen in this fishery, but also changes in traditional fishing patterns and practices which the Council anticipates will take place. Because of the uncertainties concerning these changes, the Council believes that the most reasonable approach is to set a DAH which is as realistic as possible, and to establish reserves for the potential growth in the domestic fisheries.

With the creation of the reserves, the Council reduced the TALFF's for *Illex* from 20,000 mt to 12,000 mt and for *Loligo* from 30,000 mt to 18,000 mt. The Council recognizes that these reduced TALFF's could adversely impact foreign fishing. However, foreign nations can receive squid from the reserves during the fishing year to the extent that the domestic fisheries do not use the reserves.

The uncertainties as to the exact harvesting capacity of the domestic commercial fleet, the availability of foreign markets to domestic fishermen, and the Council's desire to provide an opportunity for expansion of the commercial squid for export, resulted in establishment of reserves of 13,000 mt for *Illex* and 19,000 mt for *Loligo*. Should the domestic fisheries harvest beyond the DAH during the fishing year, squid in the reserves are available to it. Squid may be allocated from the reserves to TALFF only to the extent that the reserves will not be harvested by the domestic fishermen.

An allocation procedure from reserve to TALFF must contain criteria which allow for use of the entire reserve, through absorption by DAH or transfer to TALFF. The Council's proposed procedures for reallocation from the reserve to TALFF for either species would have provided for a review of domestic fishing activities after six months of the fishing year had passed. If the Assistant Administrator had determined that the estimated harvest of either species for the fishing year would be less than 80 percent of the sum of its DAH and reserve, a portion of the reserve could have been allocated to TALFF.

The Assistant Administrator has reviewed the provision of the amendment which sets the criteria and procedures for the allocation of squid from the reserve to TALFF. He has found that this provision would prevent: (1) Timely in-season adjustments to TALFF; and (2) allocation of the entire reserve even if domestic harvesters are not likely to reach DAH. The Assistant Administrator has further determined that this provision is inconsistent with National Standard 1 of the Act, which requires that "Conservation and management measures shall prevent overfishing while achieving, on a continuing basis, the optimum yield from each fishery." Consequently, he has disapproved this provision of the amendment. In accordance with Section 304(a) of the Act, he has notified the Council, in writing, of his partial disapproval. The Council has 45 days from the date of notification to resubmit the provision. The regulatory section on allocation of the reserve will be proposed in the near future (see discussion below under "Proposed Regulations").

Proposed Regulations

The proposed amendments to the regulations would implement the conservation and management measures contained in the amendment. An allowable harvest of squid on a fishing year basis would be estimated at 30,000 mt for *Illex* and 44,000 mt for *Loligo*. Initial levels of domestic harvest would be set at 5,000 mt for *Illex* and 7,000 mt for *Loligo*. Reserves of 13,000 mt for *Illex* and 19,000 mt for *Loligo* would be established and would be potentially available for distribution to the domestic and foreign fisheries. In

addition, the proposed regulations would revise the criteria for closing the fishery.

Technical changes to the regulations currently in effect are also reflected in the proposed regulations. These changes are designed to establish uniformity in language among the regulations implementing fishery management plans proposed by the Council.

Two sections in the proposed regulations are "Reserved" and will be completed in the near future. Section 655.22 ("Allocation") will be proposed when the Assistant Administrator approves a mechanism which allocates squid from the reserve to TALFF in a manner which is consistent with the provisions of the Act. A regulatory procedure for reallocation from the reserve to DAH is unnecessary, since the portion of the reserve not allocated to TALFF is available to the domestic fishery.

Section 655.5(b)(2) ("Domestic squid processing capacity"), which will implement a provision of the original FMP, will be promulgated when the National Marine Fisheries Service, after consultation with industry, develops a report form and establishes a system to receive reports on capacity from squid processors.

Emergency Regulations

In accordance with Section 305(e) of the Act, the proposed regulations will be implemented as emergency measures in the Final Rule section of this same issue of the **Federal Register**. The Assistant Administrator has determined that the emergency action is necessary to provide conservation and management measures to govern fishing for squid until final regulations to implement the partially approved amendment are promulgated during May, 1980. A gap in the regulatory process during the early part of the 1980–1981 fishing year might have jeopardized the credibility, continuity, and effectiveness of the entire management system for this newly regulated fishery.

National Environmental Policy Act of 1969 (NEPA)

Development and implementation of this amendment have been deemed a major Federal action significantly affecting the quality of the human environment.

Executive Order 12044

For the purpose of Executive Order 12044 and NOAA Directive 21–24, the Administrator has made an initial determination that this action does not constitute a significant change to the regulations. The creation of reserves, which allow additional flexibility in the regulations so that optimum yield can be achieved, is considered a refinement but not a material or significant change to the regulations.

The amendment to the squid FMP is set forth below.

Signed at Washington, D.C., this 28th day of March, 1980.

Robert K. Crowell,

Deputy Executive Director, National Marine Fisheries Service.

(16 U.S.C. 1801 *et seq.*)

Amendment #1 to the Atlantic Squid Fishery Management Plan

I. Abbreviations Used in This Document

CFR—Code of Federal Regulations.
DAH—Domestic Annual Harvest—the capacity of U.S. fishermen to harvest squid and their intent to use that capacity.
DAP—Domestic Annual Processing—the capacity of U.S. processors to process squid and their intent to use that capacity.
EIS—Environmental Impact Statement.
fathom—6 feet.
FCMA—Fishery Conservation and Management Act.
FCZ—Fishery Conservation Zone.
fishing year—the 12 month period beginning April 1.
FMP—Fishery Management Plan.
FRG—Federal Republic of Germany.
GDR—German Democratic Republic.
GIFA—Governing International Fishery Agreement.
ICNAF—International Commission for the Northwest Atlantic Fisheries.
km—kilometer.
mt—metric ton = 2204.5 pounds.
MSY—Maximum Sustainable Yield.
NMFS—National Marine Fisheries Service.
NOAA—National Oceanic and Atmospheric Administration.
OY—Optimum Yield.
PMP—Preliminary Fishery Management Plan.
RA—Regulatory Analysis.
SA—Subarea or Statistical Area.
Secretary—Secretary of Commerce.
SEIS—Supplemental Environmental Impact Statement.
TAC—Total Allowable Catch.
TALFF—Total Allowable Level of Foreign Fishing.

II. Summary

The Fishery Management Plan (FMP) for Atlantic Squid was approved by the Assistant Administrator for Fisheries, National Oceanic and Atmospheric Administration (NOAA) on June 6, 1979. The FMP is for fishing year 1979–1980 (April 1, 1979–March 31, 1980). The basic purpose of Amendment #1 is to extend the FMP beyond fishing year 1979–1980.

The management unit for the FMP is all *Loligo pealei* and *Illex illecebrosus* under US jurisdiction in the northwestern Atlantic.

The objectives of the FMP are to:

1. Achieve and maintain optimal stocks for future recruitment.
2. Prevent destructive exploitation of squid species.
3. Minimize capture of nontarget species.
4. Achieve efficiency in harvesting and use.
5. Maintain adequate food supplies for predator species, recognizing that squid are also predators.
6. Minimize user conflicts.
7. Improve understanding of the condition of the stocks.
8. Encourage increased American participation in the squid fishery.

The management measures in the FMP are:

1. The 1979–1980 fishing year Optimum Yield (OY) for *Illex* is 30,000 metric tons (mt) and the 1979–1980 fishing year Optimum Yield for *Loligo* is 44,000 mt. The US capacity, both harvesting and processing, is 10,000 mt of *Illex* and 14,000 mt of *Loligo*. The foreign surplus (TALFF) is 20,000 mt of *Illex* and 30,000 mt of *Loligo*.
2. Any vessel owner or operator (foreign or domestic) desiring to catch squid or transport or deliver for sale any squid, must possess the appropriate valid registration or permit from the NMFS. This does not apply to individual US fishermen catching squid for their personal use.
3. Foreign fishing for squid is restricted to five designated areas.
4. Appropriate gear restrictions are imposed on foreign vessels fishing for squid.
5. Periodic reports on squid catches must be filed by foreign and domestic fishermen. Domestic dealers and processors must submit weekly reports on any transactions involving squid.
6. Incentives are provided, as discussed in Section XIII–8, to encourage development of the domestic squid industry.
7. A reassessment of the estimated US harvesting capacity for squid will be conducted annually.

Alternative management measures considered for Amendment #1 were:

1. Take No Action At This Time—This alternative would mean that the FMP would lapse. The NMFS would be required to prepare a Preliminary Management Plan (PMP). PMPs regulate foreign, but not domestic, fishermen. The effect of this alternative would be that the data that would be collected on domestic fishing and processing efforts as a result of this plan could not be collected as effectively, and assessments of the scope and development of the domestic fishery would not be as accurate as they would be with the FMP.
2. Continue The FMP For Fishing Year 1980–1981 With No Other Changes—This would mean that the FMP would need to be amended again prior to the beginning of fishing year 1981–1982. The following quantities would apply to fishing year 1980–1981:

	Metric tons	
	Illex	*Loligo*
OY	30,000	44,000
DAH	10,000	14,000
DAP	10,000	14,000
TALFF	20,000	30,000

3. Continue The FMP Without Time Limits With No Other Changes—This would eliminate the need for annual amendments to

the FMP unless necessitated by new biological or other data. The following annual quantities would result:

	Metric tons	
	Illex	*Loligo*
OY	30,000	44,000
DAH	10,000	14,000
DAP	10,000	14,000
TALFF	20,000	30,000

4. Provide A Reserve For *Illex* and *Loligo*—This concept is useful in a developing US fishery when accurate estimates of DAH and DAP cannot be made at the beginning of the fishing year. A portion of the OY would be placed in reserve and distributed during the fishing year to DAH and TALFF based on performance of the US harvesting sector and the most recent stocks assessments. This alternative could be combined with a one year extension, a two year extension, or an indefinite extension of the FMP. The following annual quantities would result:

	Metric tons	
	Illex	*Loligo*
OY	30,000	44,000
DAH	5,000	7,000
DAP	5,000	7,000
TALFF	12,000	18,000
RESERVE	13,000	19,000

5. Increase OYs—This may result in a reduction in future productivity of the stocks assuming a moderate stock-recruitment relationship. The relationship, however, between stock size and recruitment for either species is unknown. If recruitment is independent of spawning stock, increases in OYs could occur without risk to future productivity. Sufficient information is not now available with which to estimate the impact of increased OYs for *Loligo* or *Illex* until responses of the squid populations, particularly *Illex*, to present OY levels are observed.

6. Reduce OYs—This would decrease the chances of a reduction in future productivity of these stocks, but unless there is a strong stock recruitment relationship, the most likely result is that a resource available for harvest would be underutilized. This is in part predicated in the fact that the OYs selected for both *Loligo* and *Illex* take into consideration the short life spans of the species. Based on past catch estimates and trends in abundance, there is little justification for reducing the OYs for *Loligo* or *Illex* below these levels.

7. Combine The Squid And Butterfish FMPs—The Atlantic squid and butterfish fisheries are currently managed separately. The fisheries are related. Coordinated management of these fisheries would have substantive advantages in the long-run because it could facilitate comprehensive evaluation of both fisheries together. From an administrative standpoint, the regulatory process would be simplified by having one set of regulations rather than two sets of identical regulations. Merger should also result in administrative cost savings, not only in the area of regulations, but also in the amendment process.

8. Combine Objectives 5 and 7 Into A New Objective 5 And Designate Objective 8 As Objective 7—The new Objective 5 would read "Improve understanding of the condition of the stocks, including predator-prey relationships."

The Council has adopted Alternatives 4 and 8, with an indefinite extension of the FMP, as the final management measures for Amendment #1. In addition, the Council intends to combine the Squid and Butterfish FMPs as soon as possible following approval of the Butterfish FMP by the Secretary of Commerce.

App. III. List of public meetings, summary of comments, comment letters, and responses to comments—APP III 1.
App IV. Draft proposed regulations—DPR 1.

IV. Introduction

This Amendment No. 1 to the Atlantic Squid FMP is designed to extend the FMP beyond the end of fishing year 1979–1980 (March 31, 1980) and to make appropriate changes to Optimum Yield and quotas. The basic data about the fishery has not changed since the FMP was approved.

The lastest stock assessment is presented in Appendix I of Amendment No. 1. That assessment indicates that the condition of the stock does not warrant a change in the Maximum Sustainable Yields established in the FMP and does not place a biological constraint on the specification of Optimum Yields (OY) up to the MSY levels.

The alternatives presented in Amendment No. 1 are essentially refinements of the regime in the FMP.

V. Description of Stocks

The most recent stock assessment prepared by the Northeast Fisheries Center, NMFS, is presented as Appendix I to this Amendment. This document presents information regarding the squid stocks from the Gulf of Maine through the Middle Atlantic area, and updates the assessment presented in the original FMP. The assessment appended to this Amendment provides information on US and foreign catches, catch per unit of effort indices, 1978 spring, summer and autumn NMFS research trawl survey results, and 1979 spring survey results.

This assessment indicates the abundance of *Loligo* in 1979 to be probably of a magnitude "comparable to the long-term average". The NMFS survey data also suggest that *Illex* abundance may be at a near-record level in 1979. There are no data available from this assessment which would warrant, in the opinion of the Council, any chages from the Optimum Yields specified by the FMP.

VI. Description of Habitat

No data are available which would necessitate a change to this section of the FMP.

VII. Fishery Management Jurisdiction, Laws, and Policies

No data are available which would necessitate a change to this section of the FMP.

VIII. Description of Fishing Activities

No data are available which would necessitate a change to this section of the FMP.

IX. Description of Economic Characteristics of the Fishery

No data are available which would necessitate a change to this section of the FMP.

X. Description of Businesses, Markets, and Organizations Associated with the Fishery

No data are available which would necessitate a change to this section of the FMP.

XI. Description of Social and Cultural Framework of Domestic Fishermen and Their Communities

No data are available which would necessitate a change to this section of the FMP.

XII. Determination of Optimum Yield

XII–1. Specific Management Objectives

The Mid-Atlantic Council has adopted eight objectives to guide management and development of the squid fishery in the northwestern Atlantic. They are:

1. Achieve and maintain optimum stocks for future recruitment.
2. Prevent destructive exploitation of squid species.
3. Minimize capture of nontarget species.
4. Achieve efficiency in harvesting and use.
5. Maintain adequate food supply for predator species, recognizing that squid are also predators.
6. Minimize user conflicts.
7. Improve understanding of the condition of the stocks.

8. Encourage increased American participation in the squid fishery.

XII-2. Description of Alternatives

Alternative management measures considered for Amendment No. 1 were:

1. *Take No Action At This Time*—This alternative would mean that the FMP would lapse. The NMFS would be required to prepare a Preliminary Management Plan (PMP). PMPs regulate foreign, but not domestic, fishermen. The effect of this alternative would be that the data that would be collected on domestic fishing and processing efforts as a result of this plan could not be collected as effectively, and assessments of the scope and development of the domestic fishery would not be as accurate as they would be with the FMP.

2. *Continue The FMP For Fishing Year 1980–1981 With No Other Changes*—This would mean that the FMP would need to be amended again prior to the beginning of fishing year 1981–1982. The following quantities would apply to fishing year 1980–1981:

	Metric tons	
	Illex	Loligo
OY	30,000	44,000
DAH	10,000	14,000
DAP	10,000	14,000
TALFF	20,000	30,000

3. *Continue The FMP Without Time Limits With No Other Changes*—This would eliminate the need for annual amendments to the FMP unless necessitated by new biological or other data. The following annual quantities would result:

	Metric tons	
	Illex	Loligo
OY	30,000	44,000
DAH	10,000	14,000
DAP	10,000	14,000
TALFF	20,000	30,000

4. *Provide A Reserve For Illex And Loligo*—This concept is useful in a developing US fishery when accurate estimates of DAH and DAP cannot be made at the beginning of the fishing year. A portion of the OY would be placed in reserve and distributed during the fishing year to DAH and TALFF based on performance of this US harvesting sector and the most recent stocks assessments. This alternative could be combined with a one year extension, a two year extension, or an indefinite extension of the FMP. The following quantities would result:

	Metric tons	
	Illex	Loligo
OY	30,000	44,000
DAH	5,000	7,000
DAP	5,000	7,000
TALFF	12,000	18,000
RESERVE	13,000	19,000

5. *Increase OYs*—This may result in a reduction in future productivity of the stocks assuming a moderate stock-recruitment relationship. The relationship, however, between stock size and recruitment for either species is unknown. If recruitment is independent of spawning stock, increases in OYs could occur without risk to future productivity. Sufficient information is not now available with which to estimate the impact of increased OYs for *Loligo* or *Illex* until responses of the squid populations, particularly *Illex*, to present OY levels are observed.

6. *Reduce OYs*—This would decrease the chances of a reduction in future productivity of these stocks, but unless there is a strong stock recruitment relationship, the most likely result is that a resource available for harvest would be underutilized. This is in part predicated on the fact that the OYs selected for both *Loligo* and *Illex* take into consideration the short life spans of the species. based on past catch estimates and trends in abundance, there is little justification for reducing the OYs for *Loligo* or *Illex* below these levels.

7. *Combine The Squid And Butterfish FMPs*—The Atlantic Squid and butterfish fisheries are currently managed separately. The fisheries are related. Coordinated management of these fisheries would have substantive advantages in the long-run because it could facilitate comprehensive evaluation of both fisheries together. From an administrative standpoint, the regulatory process would be simplified by having one set of regulations rather than two sets of identical regulations. Merger should also result in administrative cost savings, not only in the area of regulations, but also in the amendment process.

8. *Combine Objectives 5 And 7 Into A New Objective 5 And Designate Objective 8 As Objective 7*—The new Objective 5 would read "Improve understanding of the condition of the stocks, including predator-prey relationships."

XII-3. Analysis of Beneficial and Adverse Impacts of Potential Management Options

Alternative 1 would remove regulation of the US fishery. This could lead to overfishing as this fishery expands. It would remove the data reporting requirements on US fishermen and processors. Since this alternative would not regulate US fishermen and processors, there would be a governmental cost saving.

Alternatives 2 and 3 are similar in their impacts, except that Alternative 2 would require an amendment to extend the FMP beyond fishing year 1981–1982, even though no other changes were required. The primary adverse impact from these alternatives is that they could lead to a closure of the US fishery if landings reached the DAH level. US squid landings have been increasing, although data are too limited to warrant increases in DAH and DAP above those proposed at this time. The Council has conducted a limited survey of processors and believes that the DAP quantities specified are reasonable. Since the TALFFs specified in these alternatives are the same as the TALFFs in the original FMP, the impacts of these alternatives should not differ from those of the original FMP on foreign fishermen.

Alternative 4 is intneded to address the developing nature of the US fishery. While available data support conservative estimates of DAH and DAP, the developing nature of the US fishery leads to the conclusion that provision should be made for such development, even though it cannot be accurately projected. By including a Reserve, this possible growth in the US fishery is provided for. A portion of the Reserve not needed by the US fishery could be reallocated to TALFF if the latest stock assessments available at the time of reallocation indicate that such action is warranted. This alternative would have an adverse impact of foreign fishermen relative to the original FMP in that the initial TALFFs would be substantially smaller than the TALFFs in the original FMP. However, the condition of the stock (see Appendix I) does not justify an increase in the OYs proposed.

Alternatives 5 and 6 address the question of alternative OYs. The Council has concluded that, given the latest assessment of stock condition (Appendix I), there is no reason to change the OYs from those in the original FMP. Lowering the OYs could lead to wasted resources and increased OYs could lead to overfishing.

Alternative 7 has two advantages. The first is a governmental cost saving associated with one FMP and amendments thereto, one set of regulations, one set of reports, and one permit system rather than two. The second advantage is that the combination of the two FMPs could facilitate joint management of two related fisheries. For example, the TALFF in the original Butterfish FMP was primarily intended to meet foreign by-catch requirements in the *Loligo* fishery. This problem could be addressed in a more meaningful fashion if both species were managed jointly in one FMP . In addition, the developing US fisheries for both butterfish and squid seem to involve the same fishermen and processors. A joint FMP could greatly facilitate future impact assessments on the US fishery.

Alternative 8 is intended to address the lack of information on predator-prey relationships. Objective 4, "Maintain adequate food supply for predator species, recognizing that squid are also predators" implies there is adequate knowledge so that management measures to achieve objective 4 could be implemented. The revised objective "improve understanding of the condition of the stocks, including predator-prey relationships" seems more realistic at this time.

XII-4. Tradeoffs Between the Beneficial and Adverse Impacts of the Preferred Management Option

The preferred option is a combination of alternatives 4, 7, and 8 with a multi-year extension of the FMP. This option would provide for growth of the US fishery. While the DAH for *Illex* is 5,000 mt and the DAH for *Loligo* is 7,000 mt, the Reserve amounts added to DAH allow for a maximum US harvest of 18,000 mt of *Illex* and 26,000 mt of *Loligo*. The initial DAH and DAP estimates are considered reasonable, given available data. It must be noted that, in this FMP, processing is defined to include freezing.

Therefore, since virtually all squid is at least frozen, DAP is estimated equal to DAH. It must be recognized that this is an estimate based on the best data available to the Council at the time Amendment #1 was finalized and that during the implementation of the amended FMP the fishery may develop so that DAH exceeds DAP. Such difference should not be considered a conflict with the objectives of the amended FMP. For example, the management measures set forth in Section XIII–3 specifically provide for the development of joint ventures, the approval of which would require that DAH exceed DAP.

The Council recognizes that joint ventures for squid may be developed. Given the uncertain rate of development of the domestic harvesting and processing sectors, it is impossible to reasonably estimate any differnce between DAH and DAP at this time. However, the combined values of the DAHs plus Reserves for both species should permit the development of the US fishery as well as any joint ventures. The Council's first priority is the development of the US harvesting and processing sectors in a coordinated fashion. However, it is the Council's intent that joint ventures be considered for both species on a case by case basis, with the primary criterion for approval of such joint ventures being the extent to which domestic processors can process in the catch of US harvestors. If, during the life of the plan, US harvesting capacity in fact exceeds US processing capacity and if the development of a joint venture to use the excess harvesting capacity would not harm the development of the US processing sector, such joint venture proposals could be considered.

It is recognized that the initial TALFFs specified under the preferred option could have an adverse impact on foreign fishermen relative to the quantities specified in the original FMP. However, there is a possibility that foreign fishermen would receive some of the Reserve. This management strategy seems justified in light of the need to address the needs of the developing US fishery while not setting OYs at levels that would lead to overfishing.

XII.5. Specification of Optimum Yield

The Mid-Atlantic Fishery Management Council has determined that the annual optimum yield of *Loligo* should be set at 44,000 mt. This is equal to the best conservative estimate of MSY for this species. The Mid-Atlantic Council has determined that OY should be equivalent to MSY for this species for the following reasons: (1) The best and most recent scientific evidence indicates that this species is neither overfished nor depleted in abundance, (2) the short life-span of this species suggests that the portion of the MSY not taken through fishing would be lost (with no resultant benefit to future recruitment) through natural mortality, and (3) overall demand for squid is great and probably surpasses the combined OYs described in the FMP. Thus, harvesting at the MSy level should allow for the greatest benefit to the nation while guarding against overfishing.

Scientific information for *Illex* is such less complete than that for *Loligo*. Information available to date suggests that the MSY for *Illex* in ICNAF SA 5 and 6 (equivalent for all practical purposes to the management unit specified for this FMP) may be approximately 40,000 mt for a moderate to strong stock-recruitment relationship. In some years this amount may be too high, based on USSR estimates of stock size and the application of a 37% exploitation rate (section V–2 of the original FMP).

The Council has determined that an *Illex* harvest of 30,000 mt will be the Optimum Yield. The Council has determined that this is the greatest harvest consistent with sound conservation and management principles. The following factors were taken into consideration in the establishment of this OY: (1) Uncertainties as to *Illex* population structure in the northwest Atlantic and stock-recruitment relationship; (2) environmental considerations stemming from the uncertainties of (1) and recognition of the important role *Illex* plays as prey in the ecosystem; (3) recognition of the fact that current NMFS autumn and spring survey systems are suboptimal for this species and produce untimely biological data for *Illex;* (4) recognition of the developing nature of this fishery; (5) the intent to accomodate to a limited degree the foreign squid fishery which will experience declines in its *Loligo* catches over historic levels. This OY for *Illex* is greater than the peak total catch of this species in ICNAF SA 5 and 6, while simultaneously it is conservative biologically.

It is the Council's intention to provide for a cautious development of this fishery, at least until such time as biological and ecological information about this species is more fully developed.

The Council made these determinations of Optimum Yield in light of the biological and socio-economic data and analyses presented earlier in the plan. In estimating DAH the Council has considered not only the historical domestic harvest but also the development of the fishery. The Council has been advised by fishermen and through the recently completed survey of processors that a number of US vessels will be added to this fishery in the near future.

In setting the initial DAH for *Loligo* at 7,000 mt and for *Illex* at 5,000 mt, the Council has attempted to reflect not only the past performance of US fishermen in this fishery, but the anticipated change in traditional fishing patterns and practices which the Council reasonably anticipates will take place in the next few years. The Council has set these levels in accordance with the provisions of a Reserve of 19,000 mt for *Loligo* and 13,000 mt for *Illex* to allow for an expansion of domestic effort in the fishery. As shown in Figure 1 and Tables 1 and 2, US squid landings have been increasing with catches for the firs nine months of 1979 about 3 times and 2.5 times the 16-year average for *Loligo* and *Illex*, respectively.

Traditionally, squid has usually been harvested only as an incidental catch to commercially more valuable species. Consequently, domestic catch has been small in comparison with the total catch of squid by vessels of foreign nations. For example, the US domestic catch of squid in both 1975 and 1976 amounted to only five percent of the total catch of squid in the northwest Atlantic Ocean (ICNAF SA 5 and 6). Recently, however, squid has become a more sought after commercial species due, at least in part, to an increase in ex-vessel price. The average ex-vessel price of squid has been on the rise for a number of years. Within the past year or so, the availability of foreign markets to US-caught squid has caused a dramatic increase in this price. The Council believes that ex-vessel squid prices will remain at attractive levels. This belief stems from the continuing great demand for squid by foreign markets and the diminuation in allocations of squid in the northwest Atlantic Ocean available to foreign nations as represented by the TALFF.

In the past, top quality squid has commanded a good price, competitive with other finfish species so long as total quantity remained small. As a result, domestic fishermen have had no incentive to harvest squid intensely. Whenever catch rates increased even slightly, significant decreases in price would occur because of the domestic market's inability to absorb increased product supply. With an expanded market from exports, ex-vessel price structure of *Loligo* and *Illex* should change. So long as domestic fishing interest can assure foreign markets of an adequate product supply meeting all specified product criteria, prices will remain at stable levels throughout the fishing season. This should be an added inducement to develop further the domestic squid fishery.

Aside from the incentive represented by current squid ex-vessel prices, the Council expects the current restrictive quotes for regulated species such as groundfish and surf clam and a decline in abundance of presently non-regulated species such as scallop will provide inducement for fishermen and investors to transfer effort and capital into the squid fishery. The Council has been advised that significant numbers of vessels in the New England and Mid-Atlantic areas are currently being outfitted to fish exclusively for squid. In consequence, both the incidental nature and brief duration of the domestic fishery are expected to change. This will have a dramatic effect on the level of catch by domestic fishermen.

In addition to accommodating any increase in effort in the domestic squid fishery, the present level of domestic capacity is intended to provide for that part of the domestic catch which is as yet unquantified. Squid represent an important source of bait in the recreational fishery. While data on the recreational fishery are not well developed, reports indicate a minimum of 8,400 pounds of squid landed by private recreational anglers as bait in 1973 in the States of Massachusetts and Rhode Island alone. The Council believes that this figure, when expanded to include those unreported amounts of squid caught as bait by private recreational vessels coupled with the increased levels of recreational catch since 1973, may realistically be 50 mt for these two States. Once this bait squid catch is projected for the entire east coast, the level may be substantial. These factors must be considered from a fishery management standpoint. Other aspects of the domestic squid fishery for which there are no data include catch by

private recreational anglers for their own use and the incidental catch of squid in other bottom-trawl fisheries which is discarded at sea as trash.

While the Council may adopt a different management strategy to address the various components of the domestic squid fishery in the future, the Council has determined, based upon the facts and opinions presented to it, that the present level of domestic capacity is reasonable to account for both increases in effort and the unquantified components of the fishery discussed above. As effort levels stabilize, reporting provides a more comprehensive view of the fishery, and angler surveys provide some estimate of the magnitude of the private recreational catch, the Council will be better able to estimate the anticipated domestic harvest for an upcoming fishing year. Until that time, however, the Council believes that the most reasonable approach in light of the uncertainties concerning domestic catch is to set a domestic harvesting capacity which is as realistic as possible, and to use a Reserve to provide for adjustment to DAH if the fishery grow more rapidly than current data indicate. If U.S. fishermen do not harvest their entire quota plus the Reserve, and if biological conditions warrant, then reallocations to TALFF are provided for in Section XIII–3 of this Amendment.

Loligo	44,000	44,000	7,000	7,000	19,000	18,000

Relationships Between This FMP and The National Standards

Section 301(a) of the Fishery Conservation and Management Act states that: "Any fishery management plan prepared, and any regulation promulgated to implement such plan * * * shall be consistent with the following national standards for fishery conservation and management." The following is a discussion of the standards and how this FMP meets them:

"(1) Conservation and management measures shall prevent overfishing while achieving, on a continuous basis, the optimum yield from each fishery." The best scientific evidence available indicates that neither species of squid is currently overfished nor at a reduced level of abundance. Harvests of both species at the Optimum Yield levels described in this Amendment should not endanger future harvests at comparable levels.

"(2) Conservation and management measures shall be based upon the best scientific information available." This FMP is based on the best and most recent scientific evidence currently available.

"(3) To the extent practicable, an individual stock of fish shall be managed as a unit throughout its range, and interrelated stocks of fish shall be managed as a unit or in close coordination." This FMP meets the requirements of this standard by simultaneously managing *Loligo* and *Illex* in a complementary manner.

"(4) Conservation and management measures shall not discriminate between residents of different States. If it becomes necessary to allocate or assign fishing privileges among various United States fishermen, such allocation shall be (A) fair and equitable to all such fishermen; (B) reasonably calculated to promote conservation; and (C) carried out in such a manner that no particular individual, corporation, or other entity acquires an excessive share of such privileges." The OYs and DAH estimated described in this Amendment will accommodate all U.S. demand for squid in the commercial and recreational fisheries without prejudice to residents of any State. The seasonal movements of these species make it extremely unlikely that fishermen of any State or region could harvest the U.S. capacity before the species become available to other domestic fishermen.

"(5) Conservation and management measures shall, where practicable, promote efficiency in the utilization of the fishery resources; except that no such measure shall have economic allocation as its sole purpose." Since domestic fisheries presently harvest both squid species significantly beneath the respective OY levels, no economic inefficiencies due to surplus investment or fishing effort, or similar considerations, should result from the provisions of this Amendment. As U.S. capacity estimates for squid anticipate some redirection to these species of domestic commercial fishing effort from traditional and currently depleted resources, such as groundfish, this Amendment will promote greater overall economic efficiency in domestic commercial fisheries.

"(6) Conservation and management measures shall take into account and allow for variations among, and contingencies in, fisheries, fishery resources, and catches." This Amendment and the OYs and allocations described herein take into account possible fluctuations in species abundance and expected trends in U.S. demand for squid.

"(7) Conservation and management measures shall, where practicable, minimize costs and avoid unnecessary duplication." The management measures outlined in this Amendment are consistent with and complement, but do not duplicate, management measures contained in other FMPs or PMPs. Costs of management should not differ significantly from the costs associated with implementing the original FMP.

XIII. Measures, Requirements, Conditions, or Restrictions Proposed to Attain Management Objectives

Note.—*All references to the Foreign Fishing Regulations are intended to adopt by reference the Foreign Fishing Regulations as they may exist at the time of the adoption of this FMP by the Secretary of Commerce and as they may be amended from time to time following FMP adoption.*

XIII–1. Permits and Fees

No changes are proposed in Amendment #1.

XIII–2. Time and Area Restrictions

Foreign nations fishing for squid shall be subject to the time and area restrictions set forth in part 611.50 of Title 50 Code of Federal Regulations (CFR).

Fixed Gear Avoidance

Foreign nations fishing for squid shall be subject to the fixed gear avoidance regulations set forth in part 611.50(e) of 50 CFR.

XIII–3. Catch Limitations

The fishing year for both species shall be the twelve (12) month period beginning 1 April.

The initial annual Total Allowable Levels of Foreign Fishing are 12,000 mt of *Illex* and 18,000 mt of *Loligo*.

The initial annual quotas for U.S. fishermen are 5,000 mt of *Illex* and 7,000 mt of *Loligo*.

It is the policy of the Mid-Atlantic Fishery Management Council that the Assistant Administrator for Fisheries, NOAA, be allowed to make an in-season adjustment to the estimated Domestic Annual Harvest (DAH) and Total Allowable Level of Foreign Fishing (TALFF) for *Loligo* and *Illex* based on the criteria specified by the Council as set forth below. The Council further establishes that any allocation made by the Assistant Administrator in consultation with the Council must be consistent with the objectives of this FMP. Any in-season adjustment will be made on a species-specific basis due to the differing life cycles of and fisheries for *Loligo* and *Illex*. An adjustment is a temporary in-season increase of DAH and annual domestic quota, a temporary in-season increase of TALFF, and a temporary in-season decrease in Reserve for the affected species. At the end of the fishing year (31 March), DAHs, annual domestic quotas, TALFFs, and Reserves shall revert to the amounts specified by the Mid-Atlantic Fishery Management Council in Section XII–5 of this FMP.

This Council's criteria to guide the Assistant Administrator in the allocation process are as follows:

Allocations From Reserve

The National Marine Fisheries Service (NMFS) shall review reported domestic harvest (including off-loadings at sea) for *Loligo* and *Illex* on a monthly basis. Domestic harvest shall be determined based upon vessel and processor reports required by Section XIV of this FMP and additional port sampling data collected by NMFS.

The Assistant Administrator shall project the total amount of Atlantic squid that will be harvested by US fishermen during the entire fishing year. In making these projections the Assistant Administrator shall consider not only the actual reported domestic harvest, but also the ability and intent of domestic harvestors and processors to harvest and process squid for domestic consumption and export for the remainder of the fishing year. It is the Council's intent that no reallocation shall be made from Reserve to TALFF if domestic harvestors and processors are able and willing to sell squid for export at a reasonable price and acceptable quality but foreign nations are unwilling to purchase such squid in anticipation of receiving additional allocations from the Reserve.

If joint ventures are proposed, the Assistant Administrator shall determine if approval of such proposals will have a negative impact on the US squid processing industry. If the joint ventures will not have a negative impact on the US squid processing industry, the Assistant Administrator shall allocate from the Reserve to DAH the amount of the appropriate squid species as required by such joint ventures.

If the estimated amount of Atlantic squid to be harvested by US fishermen exceeds domestic annual harvest for either or both species, the Assistant Administrator shall allocate a sufficient quantity of the affected species to domestic annual harvest. Such allocation shall ensure that the US fishery for that species of squid will not be subject to closure except in the event that domestic landings of that specis of squid threaten to exceed domestic annual harvest plus the Reserve for that species of squid.

At the end of the first six months of the fishing year, if the estimated total amount of Atlantic squid to be harvested by US fishermen is less tha 80 percent of total of domestic annual harvest plus the Reserve (i.e., 14,400 mt for *Illex* and 20,800 mt for *Loligo*), for either or both species of squid, then the Assistant Administrator shall consider an allocation of part of the Reserve for *Loligo* and/or *Illex* to TALFF.

The Assistant Administrator shall accomplish any allocation of *Loligo* and/or *Illex* through the regulatory process. Notice of proposed rulemaking stating the amount of either or both species to be allocated shall be published in the **Federal Register.** The public shall be given a 15-day comment period from the date of publication. During this time the Assistant Administrator or his designee shall consult with the appropriate committee of the Council to ensure that the proposed allocation is consistent with the objectives contained in the FMP. The Assistant Administrator shall publish final regulations in the **Federal Register** to accomplish any allocation after taking into account as appropriate: (1) The intent and capability of the domestic industry to harvest *Loligo* and/or *Illex* during the latter portion of the fishing year as expressed during the public comment period; (2) the status of the squid populations; and (3) the current harvest of *Loligo* and *Illex* by foreign nationals. The Council believes these final regulations should be published in the **Federal Register** in a timely manner to allow for proper notice. When the final regulations are published in the **Federal Register,** all comments and relevant information received including catch statistics shall be summarized.

The Council has determined that it is inappropriate to provide for allocation of the entire Reserve for both *Loligo* and *Illex* for the following reasons:

(1) Squid harvested by private domestic recreational vessels for use as bait usually goes unreported and thus is not quantifiable.

(2) The uncertainties which presently exist whereby the Council is unable to manage squid throughout the range of the *Illex* stock because of its transboundary nature.

(3) The unknown amount of incidental catch from both squid stocks which goes unreported by vessels using bottom gear.

(4) The possibility of unforeseen entry into the squid fishery by domestic fishermen late in the season.

The Council anticipates that the Assistant Administrator, after consultation with the Council, will implement the intent of the FMP to restrict US harvest in excess of DAH plus the Reserve by imposing such measures including, but not limited to, trip limitations, quarterly or half yearly quotas, and closed areas, as she deems appropriate in the final regulations. Such measures should ensure the achievement of OY in a manner that does not result in a sudden dislocation of those involved in the fishery. The Council intends that these measures will enable fishermen to redirect their effort in a timely manner should be a closure of the fishery or a substantial diminution in allowable catch become necessary.

XIII–4. Types of Gear

Foreign nations fishing for squid shall be subject to the gear restrictions set forth in § 611.50(c) of 50 CFR.

XIII–5. Incidental Catch

Foreign nations fishing for squid shall be subject to the incidental catch regulations set forth in §§ 611.13, 611.14, and 611.50 of 50 CFR.

XIII–6. Restrictions

No operator of any foreign fishing vessel, including those catching squid for use as bait in other directed fisheries, shall conduct a fishery for squid outside the areas designated for such fishing operations in this FMP.

XIII–7. Habitat Preservation, Protection and Restoration

The Council is deeply concerned about the effects of marine pollution on fishery resources in the Mid-Atlantic Region. It is mindful of its responsibility under the Fishery Conservation and Management Act to take into account the impact of pollution on fish. The extremely substantial quantity of pollutants which are being introduced into the Atlantic Ocean poses a threat to the continued existence of a viable fishery. In the opinion of the Council, elimination of this threat at the earliest possible time is determined to be necessary and appropriate for the conservation and management of the fishery, and for the achievement of the other objectives of the Fishery Conservation and Management Act as well. The Council, therefore, urges and directs the Secretary to forthwith proceed to take all necessary measures, including but not limited to, the obtaining of judicial decrees in appropriate courts, to abate, without delay, marine pollution emanating from the following sources: (1) The ocean dumping of raw sewage sludge, dredge spoils, and chemical wastes; (2) the discharge of raw sewage into the Hudson River, the New York Harbor, and other areas of the Mid-Atlantic Region; (3) the discharge of primary treated sewage from ocean outfall lines; (4) overflows from combined sanitary and storm sewer systems; and (5) discharges of harmful wastes of any kind, industrial or domestic, into the Hudson River or surrounding marine and estuarine waters.

XIII–8. Development of Fishery Resources

No changes are required as a result of Amendment No. 1.

XIII–9. Management Costs and Revenues

It is expected that the costs of implementing Amendment No. 1 should be similar to the cost of implementing the original FMP. The licensing and recordkeeping provisions are continued by the Amendment. There will be costs associated with monitoring catch levels for purposes of allocating the Reserve, but these should not differ significantly from the costs of monitoring under the original FMP for purposes of allocating from initial DAH to TALFF. The merger of the Atlantic Squid and Atlantic Butterfish FMPs should reduce governmental costs in the long-run.

XIV. Specifications and Sources of Pertinent Fishery Data

It is recommended that the reporting and recordkeeping requirements of the original FMP continue unchanged.

XV. Relationship of the Recommended Measures to Existing Applicable Laws and Policies

XV–1. Fishery Management Plans

This Amendment No. 1 to the Atlantic Squid FMP is related to other FMPs, PMPs, and proposed FMPs as follows:

1. It will amend the FMP regulating fishing for squid within the FCZ.

2. All fisheries of the northwest Atlantic are part of the same general geophysical, biological, social, and economic setting. Domestic and foreign fishing fleets, fishermen, and gear often are active in more than a single fishery. Thus, regulations implemented to govern harvesting of one species or a group of related species may impact upon other fisheries by causing transfers of fishing effort.

3. Many fisheries of the northwest Atlantic result in significant non-target species fishing mortality. Therefore, each management plan must consider the impact of non-target species fishing mortality on other stocks and as a result of other fisheries.

4. Squid are a food item for many commercially and recreationally important fish species. Also, squid utilize young hake, mackerel, and herring, and possibly many other finfish species, as food items.

5. Present ongoing research programs often provide data on stock size, levels of recruitment, distribution, age, and growth for many species regulated by the PMPs, FMPs, and proposed FMPs.

XV–2. Treaties or International Agreements

No treaties or international agreements, other than GIFAs entered into pursuant to the FCMA, relate to this fishery.

XV–3. Federal Laws and Policies

The only Federal law that controls the fisheries covered by this management plan is the FCMA.

Marine Sanctuary and Other Special Management Systems

The USS Monitor Marine Sanctuary was officially established on January 30, 1975, under the Marine Protection, Research, and Sanctuaries Act of 1972. Rules and regulations have been issued for the Sanctuary (15 CFR Part 924). They prohibit deploying any equipment in the Sanctuary, fishing activities which involve "anchoring in any manner, stopping , remaining, or drifting without power at any time" (924.3(a)), and "trawling" (924.3(h)). Although the Sanctuary's position off the coast of North Carolina at 35°00'23" N latitude—75°24'32" W longitude is located in the plan's designated management area, it does not occur within, or in the vicinity of, any foreign fishing area. Therefore, there is no threat to the Sanctuary by allowing foreign squid fishing operations under this plan. Also, the Monitor Marine Sanctuary is clearly designated on all National Ocean Survey (NOS) charts by the caption "protected area." This minimizes the potential for damage to the Sanctuary by domestic fishing operations.

Current and/or Proposed Oil, Gas, Mineral, and Deep Water Port Development

While Outer Continental Shelf (OCS) development plans may involve areas overlapping those contemplated for offshore fishery management, we are unable to specify the relationship of both programs without site specific development information. Certainly, the potential for conflict exists if communication between interests is not maintained or appreciation of each other's efforts is lacking. Potential conflicts include, from a fishery management position: (1) Exclusion areas, (2) adverse impacts to sensitive, biologically important areas, (3) oil contamination, (4) substrate hazards to conventional fishing gear, and (5) competition for crews and harbor space. The Council has recommended that the nomination for the Georges Bank Sanctuary be reinstated and that an EIS be prepared for it.

We are not aware of pending deep water port plans which would directly impact offshore fishery management goals in the areas under consideration, nor are we aware of potential effects of offshore fishery management plans upon future development of deep water port facilities.

Potential Impact on Marine Mammals and Endangered Species

Numerous species of marine mammals occur in the northwest Atlantic Ocean, yet definitive species composition is unknown. Indications are that the most numerous species in the area are the common (saddleback) dolphin (*Delphinus delphis*), harbor porpoise (*Phocoena phocoena*), and harbor seal (*Phoca vitulina*). Data on population abundance for various species, however, is sketchy at best, and for some species is non-existent. In addition, feeding behavior and preference for certain prey species are not well understood. These facts in combination make it extremely difficult to assess, even qualitatively, the potential impact of the squid management program on marine mammal populations.

The harvest levels proposed in Amendment No. 1 are not expected to cause any declines in abundance of these species. Therefore, no change in the availability of these species to those toothed cetaceans and pinnipeds that utilize squid as a food item is expected to occur. The *Illex* OY has been reduced from MSY to in part allow for the fact that *Illex* is a prey species for may species, including pilot whales.

Whenever fishing gear and marine mammals occur in the same area, there always exists a potential for an incidental kill of marine mammals. Except in unique situations (e.g., tuna-porpoise in the central Pacific), the incidental kill as a result of commercial fishing activities usually has an insignificant impact upon the stability of marine mammal populations. This is because the number of animals killed is relatively small compared to total population size.

Outside of certain marine mammals, the only threatened/endangered species occurring in the northwest Atlantic are the shortnose sturgeon (*Acipenser brevirostrum*) and several species of sea turtles. Because data on occurrences of shortnose sturgeon are vital to understanding its current status, the Council urges fishermen to report any incidental catch of this species to the Shortnose Sturgeon Recovery Project of the NMFS.

Available data appear to indicate that several species of sea turtles are regularly found in New England waters. These turtles are the Kemp's ridley (*Lepidochelys kempi*), leatherback (*Dermochelys coriacea*), loggerhead (*Caretta caretta*), and green (*Chelonia mydas*). In addition, hawksbill turtles (*Eretmochelys imbricata*) occasionally stray into the area. The Kemp's ridley sea turtle, while probably the most endangered reptile on earth (total population estimated at several thousand adult individials), is also the most frequently observed sea turtle in New England waters, especially Cape Cod Bay. Strandings of Kemp's ridley are routine, have been known to occur for some time, and result in some mortality to the stranded animals. One hypothesis is that individuals remain in the Bay until late autumn, and with the decrease in water temperature as winter approaches, these animals become subject to hypothermia and subsequently die.

In late autumn, 1978, seven Kemp's ridley turtles were found on the beaches along Cape Cod Bay. While several of these individuals were reportedly cut and bleeding when first observed, recent examination of the preserved specimens did not reveal any major physical damage to the individuals. It is possible that these animals were injured by fishing activity either through entanglement in the trawl nets or by contact with a vessel's propeller. However, there is no solid evidence to indicate that fishing operations were responsible for the kills. Based on inquiries to fishermen conducted by NMFS and Massachusetts Division of Marine Fisheries personnel, the general conclusion can be drawn that regular and numerous killings of Kemp's ridley turtles in Cape Cod Bay do not occur as a result of normal commercial fishing operations. Additional monitoring of turtles is needed.

In conclusion, the Council does not believe that continuation of the Squid FMP will have any adverse impact upon populations of marine mammals and endangered species. As additional understanding of the status and dynamics of marine mammal and sea turtle populations becomes available, the Council will integrate this information in examining potential impacts upon the environment as a result of FMPs.

XV–4. State, Local, and Other Applicable Laws and Policies

No State or local laws control the fisheries that are subject of this management plan.

State Coastal Zone Management (CZM) Programs

The proposed action entails management of squid stocks in an effort to ensure sustained productivity at some optimum level. In order to achieve this goal, all management plans must incorporate means to achieve integrity of fish stocks, related food chains, and habitat necessary for this integrated biological system to function effectively. Inasmuch as CZM plans are presently in the developmental stages, we are not aware of specific measures on the part of the individual states which would ultimately impact this fishery plan. However, the CZM Act of 1972, as amended, is primarily protective in nature, and provides measures for ensuring stability of productive fishery habitat within the coastal zone. Therefore, each State's CZM plan will probably assimilate the ecological principles upon which this particular fishery management plan is based. It is recognized that responsible long-range management of both coastal zones and fish stocks must involve mutually supportive goals. At the time that the draft of Amendment No. 1 was distributed for review, the Council had been advised that Maine, Massachusetts, Rhode Island, New Jersey, Maryland, and North Carolina have approved CZM programs. Copies of the draft were sent to the CZM agencies in those States for review and no comments were received.

XVI. Council Review and Monitoring of the Plan

The Council will review the plan each year. The review will include the most recent cruise survey data and data on the US harvesting and processing industries. This will permit a review of MSY, OY, US Capacity, and TALFF and the development of any required modifications to the FMP. These reviews will be carried out so that any amendments to the FMP can be reviewed by the Council and the public and be implemented by the Secretary of Commerce by April 1 of each year. This schedule may be modified in the future as the fishery evolves.

Appendix I—Squid (Loligo Pealei and Illex Illecebrosus) Stock Status Update: July 1979 [1]

Introduction

This document presents recent information regarding the squid stocks *Loligo pealei* and *Illex illecebrosus* from the Gulf of Maine to the Middle Atlantic area (ICNAF areas 5 + 6, Figure 1). It is an update of the squid stock status report of June 1978 (Lange, NEFC, Lab. Ref. No. 78–36) [2] and provides 1978 USA and foreign commercial catches and length frequency samples by month and USA monthly catch per effort indices; current 1979 USA and foreign commercial catches; 1978 spring, summer, and autumn USA research bottom trawl survey results, including autumn abundance and pre-recruit indices; and 1979 USA spring survey results.

Results and Discussion

Commercial Fishery

Provisional USA squid catches totaled 1,861 mt (Table 1) in 1978, compared with 2,553 mt reported in 1977. This total consisted of 1,476 mt of *Loligo* and 385 mt of *Illex*. *Illex* catches decreased 67% from the 1977 level while *Loligo* catches increased about 8%. Though some squid were caught in every month, the greatest USA catches occurred in May and June, while *Loligo* were inshore to spawn and *Illex* were in shallow waters to feed. Through April 1979, preliminary USA squid catches totaled 258 mt of *Loligo* and 20 mt of *Illex*.

US catch per effort of each squid species, based on vessel trips where 50% or more of the catch was *Loligo* or *Illex*, is presented in Table 2. In 1978, overall catch per effort, especially in the southern New England area, decreased for all vessel types from the 1976 and 1977 values.

Preliminary 1978 squid catches for other countries totaled 26,666 mt: 9,356 mt of *Loligo* and 17,310 of *Illex*. This represents a 43% decline in *Loligo* and a 27% decline in *Illex* catches when compared to 1977 values (1977 total—41,237 mt). These preliminary estimates show only 42.1% of the foreign allocation for *Loligo* and 54.6% of the *Illex* quota were taken in 1978. Even when considering only the catches and allocations of those countries with a directed squid fishery (Italy, Japan, Mexico, and Spain), only 45.8% and 76.5% of the *Loligo* and *Illex* quotas, respectively, were caught. It should be noted, however, that Japanese and Italian catches may have been restricted by limits on by catch (97% and 71%, respectively, of their butterfish allocations were taken).

Preliminary catches in the foreign fishery through June 1979, however, totaled 9,707 mt of *Loligo* (53% of the TALFF) and 3,804 mt of *Illex* (20% of the TALFF). This is about twice the catch of *Loligo* and about the same catch of *Illex* for the same time period in 1978. Based on vessel activities information reported to the NMFS for January and February 1979, there was also a 64.7% increase in the number of vessel-days on the fishing grounds for the directed squid fishery compared with January and February 1978. Therefore, overall catch per effort (mt per vessel days on grounds) increased about 1.5 times the January-February 1978 value.

Length frequency samples for *Loligo* from the US commercial fishery are summarized in Table 3. Length frequencies from the foreign squid fisheries, obtained by US observers throughout the fishing year, are presented in Tables 4a or 4b for *Loligo* and *Illex*, respectively. The mean lenghts for *Loligo* from the inshore US fishery, directed primarily at mature spawning individuals, are generally larger than those from the offshore fishery, which is focused on this species prior to inshore spawning individuals. Mean length of *Illex* from the offshore fishery increased through the year (January through December) from 15.1 to 23.7 cm.

Research Vessel Surveys

Results of US bottom trawl surveys, conducted during the springs of 1977 and 1978, indicated great reductions in catch per tow of *Loligo* (Table 5) when compared with previous years since 1968. Stratified mean catches per tow of *Illex* were also well below the 10 year average in all but the southern New England area. However, great variability in spring *Illex* catches may reflect changes in availability to the survey rather than fluctuations in total population size, since this species ranges to depths beyond the scope of the survey during that time of year.

Decreased catch per tow in the 1978 US autumn bottom trawl survey indicated a great decline in *Loligo* abundance (Lange and Sissenwine, 1979). [1] Overall abundance, as indicated by stratified mean number per tow, of all sizes from the Middle Atlantic through Georges Bank strata (Figure 1) decreased from a 7 year (1971–1977) average of 353.2 to 144.2 in autumn 1978 (Table 6.). This was due primarily to a great drop in the pre-recruit index (mean number per tow of individuals less than 9 cm) from a 7 year average of 314.4 to 93.4. This represented a decrease in the pre-recruit portion of the population from an average of 89% to 65%, while the index for recruited individuals was above average. Stratified mean number of *Illex* per tow (Table 6) increase from 1977 to 1978 to a level comparable to that of 1976, when high abundance of this species was observed. However, the mean weight per tow was about 39% less than the 1976 level, indicating smaller individuals. In fact, the proportion of those taken which were of pre-recruited size in 1978 was the second highest in the time series, indicating the possibility of a good age group entering the fishery in 1979.

Stock size estimates, based on stratified mean number per tow from the autumn survey, are presented in Tables 7 and 8 for *Loligo* and *Illex*, respectively. The estimated population size for *Loligo* (1.251×10^6) is the lowest since 1971, while that for *Illex* is the second highest since 1968, the first year that estimates were available for these species.

Preliminary analysis of spring 1979 USA survey results indicate a significant increase in the mean catch (in kilograms) per tow of *Loligo* (Table 5) when compared to the spring 1977–1978 mean (2.72 vs. 1.49). Though this is below the high 1975–1976 levels, it is comparable to other years in the time series. There was also a decrease in the mean length of *Loligo* in the 1979 spring survey compared with all other years from about 15 to about 6 cm. This may indicate the presense of a late (autumn 1978) spawned brood which is not available at the time of the autumn survey. Catches of *Illex* during the spring survey were comparable to the 1968–1978 average.

Conclusions

The continued downward trend in *Loligo* abundance in 1978 from recent (1973–1976) levels was evidenced in both commercial fishery and US bottom trawl survey data. The directed foreign fishery only caught 46% of its 1978 allocation, while US inshore catches and catch per effort were well below the 1976 and 1977 values. Research vessel survey results indicated a possible 59% drop in the abundance of *Loligo* in autumn 1978 (even through there were more recruited (greater than 8 cm) individuals than the 7 year average). This was primarily the result of a 70% decline in pre-recruit sized individuals which would be contributing to the fishery through next autumn. Catches thus far in 1979 are above those for the same time period in 1978, but estimates of effort applied to obtain this catch were also greater than in 1978. The USA spring 1979 survey results indicate a level of *Loligo* biomass comparable to the long-term average, with mean lengths smaller than normally found at that time of year. The high number of small squid appear to be from the brood which would normally have appeared in the autumn survey and will probably contribute to the fishery for the remainder of this year. Late appearance of these individuals may account for the

apparent decrease in abundance noted in autumn 1978.

The autumn 1978 *Illex* survey abundance index was again well above historic levels and comparable to the 1976 "record" level. There was also a great increase in prerecruit sized individuals, second only to the 1975 level which preceded the great abundance in 1976. If a relationship exists between this index and availablilty to the fishery, *Illex* may be very abundant in 1979. In fact, catches of *Illex* thus far in 1979 are running above the historical average. While *Illex* ranges into Canadian waters, the relationships between the stocks in these two areas is as yet unknown. Catches off Canada in 1978 totaled 98,600 mt, less than the allowable level of 100,000 mt but a 23% increase over the 1977 level and more than twice the 1976 catch.

BILLING Code 3510-22-C

PART 611—FOREIGN FISHING [Amended]

1. It is proposed to retain those regulations in Part 611 governing foreign fishing for Atlantic Squid.

PART 655—SQUID FISHERY OF THE NORTHWEST ATLANTIC

2. 50 CFR Part 655 is proposed to be amended as follows:

§ 655.1 [Amended]

Section 655.1(b) is amended by adding the following sentence at the end of the paragraph: "The Appendix to 50 CFR 611.20 contains the TALFF for squid."

§ 655.2 [Amended]

Section 655.2 is amended as follows:

1. Revise the definition of "Atlantic squid" to read as follows:

"*Atlantic squid* or *squid* means the species *Illex illecebrosus* (short-finned or summer squid) and *Loligo pealei* (long-finned or bone squid)."

* * * * *

2. Add the following definitions, in alphabetical sequence:

"*Charter or party boat* means any vessel which carries passengers for hire to engage in fishing."

"*Fishing week* means the weekly period beginning 0001 hours Sunday and ending 2400 hours Saturday."

"*Illex* means the species *Illex illecebrosus.*"

"*Loligo* means the species *Loligo pealei.*"

* * * * *

3. Revise the definition of "Vessel of the United States" to read as follows:

* * * * *

"*Vessel of the United States* means:

(a) Any vessel documented or numbered by the United States Coast Guard under United States Law; or

(b) Any vessel under five net tons which is registered under the laws of any State."

§ 655.3 [Amended]

Section 655.3(a) is revise to read as follows: Persons affected by these regulations should be aware that other Federal and State statutes and regulations may apply to their activities.

* * * * *

§ 655.4 [Amended]

In § 655.4:

1. Revise paragraph (a) to read as follows:

(a) *General.* Every fishing vessel which fishes for Atlantic squid under this Part must have a fishing permit issued under this section. Vessels are exempt from this requirement if they catch no more than 100 pounds of squid per trip.

* * * * *

2. Revise the first sentence of paragraph (c)(1) by inserting "fishing" before "permit".

3. Amend paragraph (c)(2) by deleting subdivisions (vi) through (ix) and by substituting the following:

* * * * *

(c) * * *

(2) * * *

(vi) The type of construction, type of propulsion, and type of echo sounder of the vessel;

(vii) The permit number of any current or previous Federal fishing permit issued to the vessel;

(viii) The approximate fish hold capacity of the vessel;

(ix) The type and quantity of fishing gear used by the vessel;

(x) The average size of the crew, which may be stated in terms of a normal range; and

(xi) Any other information concerning vessel and gear characteristics requested by the Regional Director.

* * * * *

4. Revise paragraph (c)(3) to read as follows:

* * * * *

(c) * * *

(3) Any change in the information specified in paragraph (c)(2) of this section shall be submitted in writing to the Regional Director by the owner within 15 days of any such change.

* * * * *

5. Revise paragraph (g) to read as follows:

* * * * *

(g) *Duration.* A permit shall continue in effect until it expires or is revoked, suspended, or modified pursuant to 50 CFR Part 621.

* * * * *

6. Revise paragraph (i) to read as follows:

* * * * *

(i) *Replacement.* Replacement permits may be issued by the Regional Director when requested in writing by the owner or operator stating the need for replacement, the name of the vessel, and the fishing permit number assigned. An application for a replacement permit shall not be considered a new application.

* * * * *

§ 655.5 [Amended]

Section 655.5 is amended as follows:

1. Revise paragraph (a)(1)(i) to read as follows:

(a) * * *

(1) * * *

(i) Maintain on board the vessel an accurate and complete fishing vessel record on forms supplies by the Regional Director.

* * * * *

2. Revise paragraph (a)(3) to read as follows:

(a) * * *

(3) Fishing vessel records shall contain information on a daily basis for the entirety of any trip during which squid or any other regulated species are caught.

(i) The information shall include dates of fishing, type and size of gear used, areas fished, duration of fishing time, time period of tow or gear set, and the estimated weight of each species taken.

(ii) Information on squid catches shall be provided separately for *Illex* and *Loligo.*

* * * * *

4. Revise paragraph (b) to read as follows:

* * * * *

(b) *Fish dealer or processor reports.* (1) Any person who receives Atlantic squid for a commercial purpose from a fishing vessel subject to this Part shall file a weekly report (Sunday through Saturday) within 48 hours of the end of any week in which squid is received. The report shall include information on all first purchases of squid (listing *Illex* and *Loligo* separately) and all other fish made during that week. Such information shall include date of transaction, name of the vessel from which Atlantic squid is received, and the amount and prices paid for squid and other fish received.

(2) *Domestic squid processor capacity.* [Reserved]

(3) Reports required by § 655.5(b) shall be made on forms supplied by the Regional Director and at a location designated by him.

(4) Any person required by § 655.5(b) to file reports shall permit an Authorized Officer or an employee of the National Marine Fisheries Service designated by the Regional Director to make inspections, and to inspect or reproduce any records or books relating to information required to be contained in these reports. These inspections may take place at the principal place of business or at the location where these required records regularly are kept.

* * * * *

§ 655.6 [Amended]

Section 655.6 is amended as follows:

1. In the second sentence of paragraph (a), insert "U.S." before "Coast Guard" wherever it appears.

2. Revise paragraph (b)(2) to read as follows:

* * * * *

(b) * * *

(2) The Official Number shall be permanently affixed to or painted on the vessel and shall be block Arabic numerals in contrasting color. However, charter or party boats may use nonpermanent markings to display the Official Number whenever the vessel is fishing for squid.

* * * * *

3. Delete paragraph (b)(3).

§ 655.7 [Amended]

Section 655.7 is amended as follows:

1. In paragraph (c) change "fish dealer/processor report" to "fish dealer or processor report."

2. In paragraph (f), delete "or" following "control" and in its place insert "of".

3. In paragraph (f), delete "this" before "Act" and in its place insert "the".

4. In paragraph (i), change "fish dealer/processor reports" to "fish dealer or processor reports."

§ 655.21 [Amended]

Section 655.21 is amended as follows:

1. Revise paragraphs (a) and (b) to read as follows:

(a) *Levels of harvest.* The allowed levels of harvest of Atlantic squid on a fishing-year basis are 30,000 mt of *Illex* and 44,000 mt of *Loligo*. The initial levels of harvest by vessels of the United States are 5,000 mt of *Illex* and 7,000 mt of *Loligo."*

(b) *Reserves.* A reserve of 13,000 mt for *Illex* and 19,000 mt for *Loligo* is available for adjustments to the initial level of foreign harvest.

* * * * *

2. Renumber paragraph (b) as paragraph (c).

§ 655.22 Allocation [Reserved]

Amend § 655.22 as follows: "Allocation. [Reserved]"

§ 655.23 [Amended]

Section 655.23 is amended as follows:

Revise paragraph (a), (b) and the introductory text of paragraph (c) to read as follows:

(a) *General.* The Regional Director shall periodically monitor catches of Atlantic squid.

(b) *Decision to close.* The Assistant Administrator shall close the domestic fishery for either species when the domestic harvest for that species has reached 80 percent of the total of the initial level of domestic harvest plus the part of the reserve which has not been allocated to the initial level of foreign harvest.

(c) *Notice of closure.* If the Assistant Administrator determines that a closure of either the *Illex* or the *Loligo* domestic fishery is necessary, the Assistant Administrator shall:

* * * * *

BILLING Code 3510-22-M

50 CFR Parts 611 and 656

Atlantic Mackerel Fishery

AGENCY: National Oceanic and Atmospheric Administration (NOAA)/ Commerce.

ACTION: Approval and partial disapproval of amendment to the Atlantic Mackerel Fishery Management Plan, notice of proposed rulemaking and request for comments.

SUMMARY: The Assistant Administrator for Fisheries, NOAA, has approved, with the exception of one provision, an amendment to the Fishery Management Plan for Mackerel Fishery of the Northwest Atlantic Ocean (FMP). Proposed regulations to implement the management measures contained in the amendment would (1) establish an initial level of harvest for United States vessels catching Atlantic mackerel and (2) establish a reserve from which mackerel may be distributed to the domestic and foreign fisheries. All regulations governing the foreign fishery for mackerel contained in 50 CFR Part 611 are continued in effect without change. The proposed amendments to Part 656, which include technical changes to the Atlantic mackerel regulations now in effect, are promulgated as emergency regulations in the final rule section of this issue of the **Federal Register.**

DATES: Comments on the proposed regulations and the amendment to the FMP are invited for a 45-day period. All comments must be submitted in writing on or before May 16, 1980.

ADDRESS: All comments on the amendment to the FMP and the proposed regulations should be sent to: Regional Director, National Marine Fisheries Service, Federal Building, 14 Elm Street, Gloucester, Massachusetts 01930. Mark: "Comments on Proposed Mackerel Regulations" on the outside of the envelope.

FOR FURTHER INFORMATION CONTACT: Mr. Allen E. Peterson, Jr. Regional Director (at above address) Telephone (617) 281-3600.

SUPPLEMENTARY INFORMATION: The FMP was prepared by the Mid-Atlantic Fishery Management Council (Council) and approved by the Assistant Administrator on July 3, 1979, in accordance with the Fishery Conservation and Management Act of 1976, as amended, 16 U.S.C. 1801 *et seq.* (Act). Final regulations implementing the FMP were published on February 21, 1980, (45 FR 11497). These regulations establish annual quotas on a fishing year basis (April 1–March 31) for domestic vessels harvesting Atlantic mackerel *(Scomber scombrus),* as well as a mechanism for making in-season reallocations of mackerel between the domestic commercial and recreational fisheries. The FMP was to expire on March 31, 1980.

On March 17, 1980, the Assistant Administrator approved, with one exception, an amendment to the FMP. The approved provisions of the amendment: (1) extend the FMP through March 31, 1981; (2) increase the optimum yield (OY) from 15,200 to 30,000 metric tons (mt); (3) increase domestic annual harvest capacity (DAH) from 14,000 to 20,000 mt; (4) increase the total allowable level of foreign fishing (TALFF) from 1,200 to 4,000 mt; and (5) establish a reserve of 6,000 mt, which is available for distribution to the domestic and foreign fisheries.

Optimum Yield

The 1979 mackerel stock assessment indicates an Atlantic mackerel stock size of 631,000 mt, a significant increase over the 1978 stock size (515,000 mt). This increase is primarily the result of an abundant 1978 year class. This year class has also helped rebuild the spawning stock size at the beginning of 1980 to a range of 421,000 to 488,000 mt; the size of the spawning stock at the beginning of 1979 was 358,000 mt. Because of the increased abundance of mackerel, the Council raised the OY for fishing year 1980–81 from 15,200 mt to 30,000 mt. The Council selected a conservative OY to assure preservation of the stock and to permit further stock rebuilding.

DAH and TALFF

With an increased abundance of mackerel, the Council expects recreational catches to rise. However, the Council does not have enough information to ascertain whether domestic commercial harvests will also expand. Therefore, the Council has set the domestic annual harvesting capacity (DAH) at 20,000 mt for fishing year 1980–81; this is a 6,000 mt increase over the previous fishing year. Unlike the original DAH, which "allocated" 9,000 mt to the recreational fishery and 5,000 mt to the commercial fishery, there is no distinction in the 20,000 mt DAH between recreational and commercial

fisheries. The Council believes that the DAH plus the reserve provides enough mackerel for all domestic fishermen; therefore, apportioning mackerel among domestic recreational and commercial fishermen is unnecessary and would only complicate management and increase management costs.

Because of the increased abundance of mackerel, foreign vessels directing their fishing toward such species as squid are likely to catch greater incidental amounts of mackerel. To prevent restricting these directed foreign fisheries, TALFF has been increased from 1,200 mt to 4,000 mt.

Reserve

The Council's uncertainties as to the exact harvesting capacities of the domestic recreational and commercial fisheries, partially caused by the rapid increase in stock size, and its desire to provide an opportunity for expansion of the commercial mackerel fishery for export, resulted in the Council's establishment of a reserve at 6,000 mt. Should the increased abundance of mackerel allow the domestic fisheries to increase their harvest during the fishing year beyond DAH, mackerel in the reserve are available to the domestic fishery. Mackerel may be allocated from the reserve to TALFF only if projections indicate the fish will not be harvested by domestic commercial and recreational fishermen.

A reserve is used in situations of uncertainty regarding growth in the domestic fisheries. For an allocation procedure from reserve to TALFF to be acceptable, the procedure must allow, in practice, a reasonable opportunity for increasing TALFF and permitting foreign harvest. Otherwise, OY may not be achieved. This amendment's procedure and criteria for allocating mackerel from the reserve to TALFF would have provided for a review of domestic fishing activities after six months of the fishing year had passed. If the Assistant Administrator had determined that the estimated domestic harvest of mackerel for the fishing year would be less than 80 percent of the total of DAH and the reserve, only a portion of the reserve would have been allocated to TALFF.

However, the Assistant Administrator has found that this provision would prevent flexibility in making in-season adjustments to TALFF and allocating the entire reserve, even if domestic harvesters do not reach DAH. He has further determined that this provision is inconsistent with National Standard 1 of the Act, which requires that "Conservation and management measures shall prevent overfishing while achieving on a continuing basis, the optimum yield from each fishery." Consequently, he has disapproved this provision of the amendment. In accordance with Section 304(a) of the Act, he has notified the Council, in writing, of his partial disapproval. The Council has 45 days from the date of notification to resubmit the provision. Proposed regulations concerning the allocation of the reserve will be published in the near future (see discussion below under "Proposed Regulations").

Proposed Regulations

The proposed amendments to the regulations would implement the conservation and management measures contained in the amendment: (1) an optimum yield of mackerel is established at 30,000 mt; (2) an initial level of domestic harvest is set at 20,000 mt; and (3) a reserve of 6,000 mt is established for distribution to the domestic and foreign fisheries as appropriate. In addition, the proposed regulations would revise the criteria for closing the fishery.

Technical changes to the regulations currently in effect are also reflected in the proposed amendments. These changes are intended to provide uniform language with the regulations implementing other fishery management plans prepared by the Council.

Two sections in the proposed regulations are "Reserved" and will be published in the near future. Section 656.22 ("Allocation") will be promulgated when the Assistant Administrator approves a mechanism which allocates mackerel from the reserve to TALFF in a manner which is consistent with the provisions of the Act. A regulatory procedure for reallocation from the reserve to DAH is unnecessary, since the entire reserve is implicitly available to the domestic fishery, if needed.

Section 656.5(b)(2) ("Domestic mackerel processor capacity"), which will implement a provision of the original FMP, will be promulgated when the National Marine Fisheries Service, after consultation with industry, develops a form and establishes a system to receive reports on capacity from mackerel processors.

One person who commented on the original FMP was concerned that the regulations could be applied to vessels which fish in the Gulf of Mexico. The FMP states that *Scomber scombrus* ranges from Labrador to North Carolina; therefore, these mackerel regulations would apply only to vessels fishing in that geographic area within waters subject to the exclusive fishery management jurisdiction of the United States. In § 656.2, the definition of "Atlantic mackerel or mackerel" has been amended to specify the range of the regulations as they pertain to this species.

Emergency Regulations

In accordance with the provisions of Section 305(e) of the Act, these proposed regulations are implemented as emergency measures in the final rule section of this issue of the **Federal Register**. The Assistant Administrator has determined that the emergency action is necessary to provide conservation and management measures to govern fishing for mackerel until final regulations to implement the partially approved amendment are promulgated during May, 1980. A gap in the regulatory process during the early part of the 1980–81 fishing year might have jeopardized the credibility, continuity, and effectivenes of the entire management system for this newly regulated fishery.

National Environmental Policy Act of 1969 (NEPA)

The development and implementation of this amendment have been deemed a non-significant Federal action which does not affect the quality of the human environment.

Executive Order 12044

For the purpose of Executive Order 12044, the Assistant Administrator has determined that this action does not constitute a significant change to the regulations. The creation of a reserve which allows additional flexibility in the regulations so that optimum yield can be achieved, is considered a refinement but not a material or significant change to the regulations. The increase in OY is consistent with the objectives of the FMP and responds to natural fluctuations in the fish biomass.

The amendment to the mackerel FMP is set forth below.

I. Abbreviations and Definitions Of Terms Used In This Document

cm = centimeter
DAH = Domestic Annual Harvest = the capacity of US fishermen to harvest mackerel and their intent to use that capacity
DAP = Domestic Annual Processing = the capacity of US processors to process, include freeze, mackerel and their intent to use that capacity
EIS = Environmental Impact Statement
FCZ = Fishery Conservation Zone
fishing year = the 12 month period beginning April 1
FMP = Fishery Management Plan
FRG = Federl Republic of Germany

GDR = German Democratic Republic
GIFA = Governing International Fishery Agreement
ICNAF = International Commission for the Northwest Atlantic Fisheries
km = kilometer
metric ton = mt = 2,204.5 pounds
MSY = Maximum Sustainable Yield
NMFS = National Marine Fisheries Service
NOAA = National Oceanic and Atmospheric Administration
NPF = Non-Processed Fish = the capacity of US fishermen to harvest mackerel which is not processed; essentially mackerel caught by marine recreational anglers.
OY = Optimum Yield
PMP = Preliminary Fishery Management Plan
Secretary = Secretary of Commerce
SEIS = Supplemental Environmental Impact Statement
TAC = Total Allowable Catch
TALFF = Total Allowable Level of Foreign Fishing

The Fishery Management Plan (FMP) for Atlantic Mackerel was approved by the Assistant Administrator for Fisheries, National Oceanic and Atmospheric Administration (NOAA) on 3 July 1979. The FMP is for fishing year 1979–1980 (1 April 1979–31 March 1980). The basic purpose of Amendment #1 to this FMP is to extend it beyond the end of fishing year 1979–1980.

The natural range of, and fishery for, Atlantic mackerel extends from approximately Cape Hatteras, North Carolina, to Labrador, Canada. Within US waters this resource and its harvest are found both in the territorial sea and the FCZ. The management unit for this FMP is all Atlantic mackerel under US jurisdiction. The objectives of the plan are to:

1. Provide opportunity for increased domestic recreational and commercial catch;

2. Maximize the contribution of recreational fishing for Atlantic mackerel to the national economy;

3. Maintain the spawning stock size of Atlantic mackerel at or above its size in 1978;

4. Achieve efficient allocation of capital and labor in the mackerel fishery; and

5. Minimize costs to taxpayers of development, research, management, and enforcement in achieving these objectives.

The following management measures are included in the FMP:

1. Restriction of Atlantic mackerel catches in the FCZ so that the total domestic catch from the territorial sea and the FCZ does not exceed 14,000 metric tons for the 1979–1980 fishing year, allocating 9,000 metric tons to the sport fishery and 5,000 metric tons to the domestic commercial fishery. The Council will reevaluate these allocations in October, 1979, or at capture of 5,000 tons of mackerel in either the sport or commercial fishery, or when 70% of either allocation has been taken in the FCZ, whichever comes first. The Regional Director of the NMFS, with the concurrence of the Council, may then redistribute these allocations between the US recreational and commercial fisheries for the balance of the fishing year.

2. Restriction of accumulative foreign Atlantic mackerel harvest to 1,200 metric tons for the 1979–1980 fishing year. This amount is intended to provide only for incidental foreign catches of mackerel. At such time as a foreign nation takes its allocation of Atlantic mackerel, it will be required to cease fishing operations that would lead to an additional catch of Atlantic mackerel.

3. All vessels fishing commercially for Atlantic mackerel, either directly or as a by-catch from other fisheries, must be registered. This provision also applies to all vessels for hire for fishing recreationally directly or indirectly for mackerel.

4. Weekly reports on mackerel catches must be filed by foreign and domestic fishermen and domestic dealers and processors must submit weekly reports on any transactions involving mackerel.

Alternatives considered for Amendment #1 were:

1. Take No Action At This Time—No action to limit the catches of Atlantic mackerel could result in a decrease of Atlantic mackerel abundance. This alternative would mean that the FMP would lapse at the end of fishing year 1979–1980. The NMFS would be required to prepare a Preliminary Management Plan (PMP) to regulate the foreign fishery. It is likely that the PMP would result in a large reallocation of mackerel to foreign fleets.

PMPs regulate foreign, but not domestic, fishermen. One effect of this alternative would be that data that would be collected on domestic fishing and processing efforts as a result of this plan could not be collected as effectively, and that assessments of the scope and development of the domestic fishery would not be as accurate as they would be with the FMP.

2. Continue The Current FMP Through Fishing Year 1980–1981 With No Other Changes—This would result in an Optimum Yield of 15,200 mt, Domestic Annaul Harvest of 14,000 mt, Domestic Annual Processing of 5,000 mt and a Total Allowable Level of Foreign Fishing of 1,200 mt. It would require that the FMP be amended again for fishing year 1981–1982.

3. Continue The FMP Without Time Limit—This would eliminate the need for annual amendments to the FMP merely to extend it into the next fishing year. The FMP could still be amended when necessary to incorporate changes in Optimum Yield, Domestic Annual Harvest, Domestic Annual Processing, or other management measures.

4. Continue The FMP With Changes To Optimum Yield And Quotas—The most recent biological assessment indicates that mackerel stock size has greatly increased over the 1978 level. This suggests that the stock rebuilding objective of the original FMP can still be met with a total catch (in US and Canadian waters) and Optimum Yield in fishing year 1980–1981 (and beyond) significantly greater than those in the original FMP. This and other information also indicates that increases in Domestic Annual Harvest, i.e., the overall US mackerel harvesting capacity, and Non-Processed Fish, defined here to equal the mackerel harvesting capacity of US recreational fishermen, estimates are justified, because the US recreational harvesting capacity is expected to increase with increases in mackerel stock size. Data on the US commercial harvesting capacity and on the intent and desire of US processors to process mackerel, however, are limited at present.

Based on the best scientific information available, a reasonable alternative, therefore, is to specify Optimum Yield at 30,000 mt, Domestic Annual Harvest at 20,000 mt, Non-Processed Fish at 15,000 mt, and Domestic Annual Processing at 5,000 mt. This would leave a surplus of 10,000 mt. Given the developing nature of the US commercial fishery, as well as imprecise recreational fishery data, it is desirable that at least a portion of any surplus (10,000 mt, as modified by changes in any of the above values) should initially be placed in a reserve and not totally allocated to the Total Allowable Level of Foreign Fishing. It is therefore proposed that the initial Total Allowable Level of Foreign Fishing be 4,000 mt, and that a reserve of 6,000 mt be provided. The above values, as modified after the review process, could be used for a finite (e.g., one or two year) or indefinite extension of the FMP as discussed in Alternative 3.

5. Revise Objective 4—Objective 4 states "Achieve efficient allocation of capital and labor in the mackerel fishery." It is proposed that the objective be revised to read "Achieve efficiency in harvesting and use." The revision

more clearly states the Council's intent than does the objective as currently worded.

A detailed discussion of these alternatives is given in Section XII of Amendment #1.

The Council has adopted Alternatives 4 and 5 for a one year extension of the FMP. Therefore, for fishing year 1980–1981, the Optimum Yield will be 30,000 mt, initial Domestic Annual Harvest will be 20,000 mt, the estimate of Non-Processed Fish is 15,000 mt, the initial TALFF is 4,000 mt, and the Reserve is 6,000 mt.

IV. Introduction

This Amendment #1 to the Atlantic Mackerel FMP is designed to extend the FMP beyond the end of fishing year 1979–1980 (31 March 1980) and to make appropriate changes to optimum yield and quotas. The basic data about the fishery has not changed since the FMP was adopted by the Mid-Atlantic Fishery Management Council in November, 1978.

The latest stock assessment is presented in Appendix I of Amendment #1.

The alternatives presented in Amendment #1 are essentially refinements of the regime in the FMP.

V. Description of Stocks

The most recent stock assessment is presented as Appendix I to Amendment #1, and is discussed in Section XII–5. This report updates the assessment used in the original FMP. It includes catch statistics, abundance indices, fishing mortality and stock size estimates, and projected options for catch in 1980, given various levels of catch in 1979, with resulting spawning stock biomass in 1981.

The assessment states, ". . . the 1978 year-class is the largest to enter the fishery since the 1969 year-class . . . Spawning stock biomass available at the beginning of 1980 will vary from an estimated 488,000 tons (36% increase from 1979), assuming a (total international) catch of 30,000 tons, to 421,000 tons (18% increase from 1979), assuming a catch of 100,000 tons." The assessment data indicate that, ". . . under all catch assumptions presented for 1979–1980, there is an accompaning projection of stock increase in 1980–1981. . . ."

VI. Description of Habitat

No data are available which would necessitate a change to this section of the FMP.

VII. Fishery Management Jurisdiction, Laws, and Policies

No data are available which would necessitate a change to this section of the FMP.

VIII. Description of Fishing Activities

No data are available which would necessitate a change to this section of the FMP.

IX. Description of Economic Characteristics of the Fishery

No data are available which would necessitate a change to this section of the FMP.

X. Description of Businesses, Markets, and Organizations Associated With The Fishery

No data are available which would necessitate a change to this section of the FMP.

XI. Description of Social and Cultural Framework of Domestic Fishermen and Their Communities

No data are available which would necessitate a change to this section of the FMP.

XII. Determination of Optimum Yield

XII–1. Specific Management Objectives

The Mid-Atlantic Council adopted the following objectives for the original FMP:

1. Provide opportunity for increased domestic recreational and commercial catch;
2. Maximize the contribution of recreational fishing for Atlantic mackerel to the national economy;
3. Maintain the spawning stock size of Atlantic mackerel at or above its size in 1978.
4. Achieve efficient allocation of capital and labor in the mackerel fishery; and
5. Minimize costs to taxpayers of development, research, management, and enforcement in achieving these objectives.

XII–2. Description of Alternatives and XII–3. Analysis of Beneficial and Adverse Impacts Of Potential Management Options

The following management measures are included in the FMP:

1. Restriction of Atlantic mackerel catches in the FCZ so that the total domestic catch from the territorial sea and the FCZ does not exceed 14,000 metric tons for the 1979–1980 fishing year, allocating 9,000 metric tons to the sport fishery and 5,000 metric tons to the domestic commercial fishery. The Council will reevaluate these allocations in October, 1979, or at capture of 5,000 tons of mackerel in either the sport or commercial fishery, or when 70% of either allocation has been taken in the FCZ, whichever comes first. The Regional Director of the NMFS, with the concurrence of the Council, may then redistribute these allocations between the US recreational and commercial fisheries for the balance of the fishing year.
2. Restriction of accumulative foreign Atlantic mackerel harvest to 1,200 metric tons for the 1979–1980 fishing year. This amount is intended to provide only for incidental foreign catches of mackerel. At such time as a foreign nation takes its allocation of Atlantic mackerel, it will be required to cease fishing operations that would lead to an additional catch of Atlantic mackerel.
3. All vessels fishing commercially for Atlantic mackerel, either directly or as a by-catch from other fisheries, must be registered. This provision also applies to all vessels for hire for fishing recreationally directly or indirectly for mackerel.
4. Weekly reports on mackerel catches must be filed by foreign and domestic fishermen and domestic

dealers and processors must submit weekly reports on any transactions involving mackerel.

Alternatives considered for Amendment #1 were:

1. *Take No Action At This Time*—This alternative would mean the the FMP would lapse at the end of fishing year 1979–1980. If this occurred, the NMFS would be required to prepare a PMP for this fishery. A PMP would annually set an OY and would estimate DAH and, thus, TALFF. A PMP, however, regulates foreign, but not domestic, harvesting. A reversion of PMP management might result in a relatively large annual reallocation of mackerel to foreign fisheries.

Another effect of this alternative would be that data on the domestic harvesting and processing capacities that would be collected as a result of the recordkeeping provisions of the FMP could not be collected, or could be collected as effectively. This would seriously limit assessments of the scope and development of the US commercial and recreational fisheries, and would eliminate other fishery and biological information needed to assess OY, DAH, DAP, and condition of the stock.

In addition, it is probable that the US and Canada will conclude and implement a bilateral fisheries treaty in the near future. Since the mackerel fishery extends significantly into Canadian waters, it is highly probable that such a treaty will specify bilateral management of this resource. Should this occur, the US would be required to manage the domestic (sport and commercial) and foreign harvest of this species in US waters in order to conform with the terms of such a treaty and whatever management measures (such as quotas) as might be promulgated on an annual basis by the international management regime. Established FMP management will greatly facilitate implementation of such bilateral managment measures, since bilateral management would require regulation of US fishermen and, under the FCMA, such regulation is possible only with an FMP, and will ensure equitable treatment of the domestic fisheries sectors under such a regime.

2. *Continue The Current FMP Through Fishing Year 1980–1981 With No Other Changes*—This would require that the FMP be amended again for the period beyond 31 March 1981. Under this alternative, OY, DAH, DAP, and TALFF would remain the same as those in the original FMP (OY =15,200 mt, DAH =14,000 mt, DAP =5,000 mt, and TALFF =1,200 mt).

This alternative might result in a closure of the US fisheries in fishing year 1980–1981 if US landings exceeded 14,000 mt during that time. A closure would be likely because of the predicted increased abundance of mackerel which should significantly increase the recreational catch as well as the commercial by-catch. Since the US mackerel fisheries are highly seasonal by region, this possibility would have grave implications for the economic welfare of the US fisheries, not only for mackerel, but also for other species with which mackerel is usually taken. Because mackerel migrate along the coast, a closure during the second half of the fishing year could result in a violation of National Standard 4 (See Section XII–5) because fishermen from certain areas would not have their historic opportunity to fish for mackerel. Since the OY specified by the original FMP is significantly less than the expected surplus production from the mackerel stock, and since the stock currently appears to be increasing in abundance, a closure of the US fisheries after their harvest of 14,000 mt would result in adverse economic impacts on US interests with minimal concomitant conservation benefits.

3. *Continue The FMP Without Time Limit With No Other Changes*—This would eliminate the need for annual amendments to the FMP. The FMP would only require amendments as necessary when significant changes occurred in the US industry and/or in stock abundance. The values of OY, DAH, DAP, and TALFF specified in the current FMP would be set without change for each fishing year.

The adverse impacts of this alternative are identical to those identified for Alternative 2 and would, in fact, be exacerbated by this Alternative, due to the developing nature of the US fisheries and the rapidly increasing abundance of mackerel. The only potential beneficial impact of this Alternative would be a reduction in administrative and regulatory costs. These savings, however, would probably be offset or exceeded by the resultant additional costs of stringent quota enforcement.

4. *Continue The FMP With Changes To OY And Quotas*—The most recent biological assessment indicates that mackerel stock size has greatly increased over the 1978 level. This suggests that the stock rebuilding objective of the original FMP can still be met with a total catch (in US and Canadian waters) and Optimum Yield in fishing year 1980–1981 (and beyond) significantly greater than those in the original FMP. This and other information also indicate that increases in DAH (Domestic Annual Harvest, i.e., the overall US mackerel harvesting capacity) and NPF (Non-Processed Fish, defined here to equal the mackerel harvesting capacity of US recreational fishermen) estimates are justified, because the US recreational harvesting capacity is expected to increase with increases in mackerel stock size. Data on the US commercial harvesting capacity and on the intent and desire of US processors to process mackerel, however, are limited at present.

Based on the best available scientific information, a reasonable alternative, therefore, is to specify Optimum Yield at 30,000 mt, DAH at 20,000 mt, NPF at 15,000 mt, and DAP at 5,000 mt. This would leave a surplus of 10,000 mt. Given the developing nature of the US commercial fishery, as well imprecise recreational fishery data, it is desirable that at least a portion of any surplus (10,000 mt, as modified by changes in any of the above values) should initially be placed in a reserve and not totally allocated to TALFF. It is therefore proposed that the initial TALFF be 4,000 mt, and that a reserve of 6,000 mt be provided. The above values, as modified after the review process, could be used for a finite (e.g., one or two year) or indefinite extension of the FMP as discussed in Alternative 3.

5. *Revise Objective 4*—Objective 4 states "Achieve efficient allocation of capital and labor in the mackerel fishery." It is proposed that the objective be revised to read "Achieve efficiency in harvesting and use." The revision more clearly states the Council's intent than does the objective as currently worded.

XII–4. Tradeoffs Between The Beneficial And Adverse Impacts Of The Preferred Management Option

Alternatives 4 and 5 have been adopted as the preferred management option. Alternative 4 will have a beneficial impact on the US fisheries in that is will allow for their expansion up to a (commercial and recreational) harvest of 26,000 mt without the need for closures and without the requirement to amend the FMP if US landings increase above the current best estimate of DAH (20,000 mt).

The FMP is extended through this Amendment for one fishing year. The Council believes this to be necessary given (a) the rapidly changing abundance of mackerel which makes difficult recommendations for TACs and OYs for the period beyond fishing year 1980–1981; (b) uncertainties regarding the capacity of the US commercial fishery beyond fishing year 1980–1981; (c) uncertainties as to the terms of

bilateral mackerel management should a fisheries agreement be concluded with Canada; (d) uncertainties regarding the catch of mackerel in Canadian waters in 1979, 1980, and beyond; (e) the desire of the Council to develop a long-term management regime for this resource in the near future. It is possible that such a long-term FMP will entail significantly different capacity assessment and regulatory techniques than are contained in the current FMP and this Amendment.

The original FMP contained an allocation of the US harvesting capacity (DAH) between recreational and commercial fishermen. The preferred option (Alternative 4) eliminates that allocation. The US quota proposed in Alternative 4 (20,000 mt) plus the provision of an additional allocation of up to 6,000 mt from the Reserve, is considered adequate for all US fishermen. The division of that overall quota between the recreational and commercial sectors would, therefore, be an unnecessary provision that would only complicate management and increase management costs.

For purposes of Amendment #1, Domestic Annual Harvest (DAH) is defined to mean the harvesting capacity of the US recreational and commercial fisheries and the intent of those fisheries to harvest that capacity. Non-Processed Fish (NPF) is defined to mean mackerel caught by the recreational fishery. The capacity of the commercial fishery (harvesting and processing) is the difference between Domestic Annual Harvest and Non-Processed Fish (DAH–NPF). In the mackerel fishery, Domestic Annual Processing (DAP) is defined to include all processing methods used by the US commercial fishery, including all handling associated with the domestic fresh fish market. Available information indicates that there are no technical or physical constraints on domestic processing capacity up to the theoretical maximum DAP level of 11,000 mt at this time.

Under Alternative 4, the initial capacity of the domestic recreational mackerel fishery would be 15,000 mt. Since the magnitude of the recreational mackerel catch is dependent to some degree on abundance, and since mackerel abundance appears to be increasing, a reasonable initial estimate of the US recreational capacity (i.e., NPF) is 15,000 mt.

Data on the commercial fishery and on the processing sector are limited at this time. The Council has conducted a survey of processors to assist in developing the estimate of DAP. Based on the limited findings of that survey and other available data, there is no reason at this time to change the estimated commercial catch (and DAP) from the quantities estimated in the original FMP. The initial capacity of the US commercial fishery would, therefore, be 5,000 mt.

Given uncertainties as to the harvesting capacities of the US sport and commercial mackerel fisheries, and in order to provide an opportunity for gradual expansion of the commercial mackerel fishery for export, Alternative 4 would introduce a Reserve into the mackerel management regime. The purpose of the Reserve would be to set aside a portion of the OY remaining after the initial estimate of DAH has been subtracted. This Reserve would be transferred to DAH if actual landings by the US recreational and/or commercial fisheries exceeded the initial estimates in Amendment #1. The portion of the reserve not needed by the US fishery could be allocated to TALFF.

This option would also increase the initial TALFF to 4,000 mt from the 1,200 mt provided in the original FMP. While this is well below the historic foreign mackerel catch, it does represent a signficant increase over the quantity provided in the original FMP. There is also the possibility that the TALFF would be further increased by an allocation from the Reserve to the extent that the Reserve would not be needed by the US fishery. Given the recent increases in mackerel abundance, it is possible that a TALFF of 4,000 mt will not allow directed foreign fishing for this species, but will allow only for a reasonable by-catch of mackerel in directed fisheries for other species. In other words, while the 1,200 mt TALFF in the original FMP was considered to be a reasonable by-catch allowance given the abundance of mackerel during fishing year 1979–1980, the increased abundance of mackerel for fishing year 1980–1981 requires an increased by-catch allowance if foreign fisheries for other species are not to be unreasonably restricted.

The revision to Objective 4 would have no real impact on the management regime. It is intended to clarify the Council's intent. Objective 4 as currently stated ("Achieve efficient allocation of capital and labor in the mackerel fishery") could be interpreted to mean that the Council intends to take a direct role in the economic operation of the fishery. The revised wording ("Achieve efficiency in harvesting and use") more clearly states the Council's intent to not introduce measures in the management regime that would contribute to inefficiency.

The primary positive impact of the adopted options is that quotas would be increased over the levels set in the original FMP while, concurrently, the stock rebuilding program of the original FMP would be continued. A lower OY would accelerate the rate of stock rebuilding and a higher OY would decelerate that rate. Obviously, quotas would need to be changed to reflect changes in OY. It is the Council's conclusion that the OY proposed represents the best present balance between harvest levels and stock rebuilding. The OY and resultant quotas, combined with the Reserve, should not have a adverse impact on the US fishery. To the extent that the proposed initial TALFF is below historic foreign catch levels, it represents a negative impact on the foreign fishery. However, the TALFF proposed, especially when combined with the possible allocation from the Reserve, represents a substantial increase from the TALFF in the original FMP.

XII–5. Specification of Optimum Yield

This Fishery Management Plan proposes an optimum yield based on: (1) the best scientific evidence currently available; (2) the probable impacts of any TAC and bilateral agreement reached with Canada for this species; (3) estimated economic and social impacts of various catch levels to the US fisheries and affected communities; and (4) environmental considerations. The maximum sustainable yield of mackerel has been estimated at 210,000–230,000 mt (Section V–4 of the original FMP). Harvest at this level on an annual basis, however, presupposes annual levels of recruitment well in excess of those observed in most of the last several years. Although the relationship between spawning stock size and recruitment to the fishery is unknown (and may be affected by environmental fluctuations), it is probable that at low levels of abundance, as has recently been the case, there is a positive correlation between spawning stock size and recruitment. Thus, analyses within the FMP and this Amendment include the assumption that the larger the spawning stock size (up to an as yet undetermined level), the higher the probability of larger recruitment to the fishery; conversely, that poor recruitment is more likely to result from small spawning stocks than from very abundant ones.

The most recent mackerel stock assessment (Anderson, 1979; NEFC Lab. Ref. 79–35; Appendix I) indicates that the total mackerel stock size (1979) has increased significantly over the 1978 level (Table I–10). This is due primarily to a very abundant 1978 year-class, which was estimated at age 1 to be 3–4

times as large as the 1975–1977 year-classes at age 1. Because the 1978 year-class will not begin to enter the spawning stock until 1980, however, increases in mackerel spawning stock size will lag increases in overall stock size. The spawning stock size in 1979 is estimated to be about 40% (by weight and number) of the 1962–1979 average spawning stock size, and slightly smaller than the estimated spawning stock size in 1978. The spawning stock size is expected to increase significantly starting in 1980, due to the maturation of the abundant 1978 year-class.

Table I–18 in Appendix I illustrates possible combinations of total mackerel catches in 1979 and 1980 and their consequential effects upon mackerel spawning stock size in 1981. Possible total catches in 1979 from 30,000 to 100,000 mt and possible total catches in 1980 from 15,000 to 150,700 mt have been considered. Table I–18 suggests that if the total (US and Canadian waters) mackerel catch in 1979 is approximately 65,200 mt, then a total catch of about 90,000 mt could be taken in 1980, with a resulting spawning stock size in 1981 at least 50% greater than that in 1979, and at least 20% greater than in 1980. Table I–18 indicates that a total catch of between (approximately) 16,000 and 140,000 mt in 1980 will result in a spawning stock size in 1981 of between (approximately) 620,000 to 490,000 mt, respectively (assuming a total 1979 catch of about 65,000 mt). A spawning stock size of 490,000 mt in 1981 would be approximately 1.4 times the size of the 1979 spawning stock (in weight), but would also represent a spawning stock size of about 55% of the average size from 1962–1979. Similarly, a 1980 total catch of about 16,000 mt would yield a 1981 spawning stock size of about 1.7 times the 1979 size and about 70% of the 1962–1979 average size. If, however, the 1979 mackerel catch in Canadian waters exceeds that assumed above (i.e., is significantly greater than 50,000 mt), then the increases in stock sizes for 1981 at the above 1980 catch levels would be less.

In order to make a meaningful prediction of the biological consequences of various Optimum Yield levels, it was necessary to assume that the entire OY provided in the original FMP for fishing year 1979–1980 (15,200 mt) will be harvested and that the catch of mackerel in Canadian waters (by Canadian and foreign vessels) for fishing year 1979–1980 will be at least 50,000 mt. Table 1 lists possible TACs for 1980 and the resultant total 1980 catches under the assumptions of (1) a 60%/40% ratio of US/Canadian quotas; (2) a total 1979 catch of 100,000 mt; and (3) full harvest of the 1980 Canadian quota. The most recent provision of the US/Canadian bilateral negotiations is that the US will receive 60% and Canada 40% of whatever TAC is agreed upon yearly for this species. If, for example, a TAC of 100,000 mt for 1979 were negotiated, the US would, under this provision, receive 60,000 mt as its quota.

Table 1.—*Possible TAC's For 1980, Resultant 1980 Total Catches, And Approximate Resultant Spawning Stock Size in 1981, Under the Assumptions: (1) a 60 percent/40 percent Ratio of United States/Canadian Quotas Within a TAC; (2) Total Catch of 100,000 mt; (3) A United States 1980 Optimum Yield of 30,000 mt; and (4) Full Harvest of the 1980 Canadian Quota.*

[In thousands of metric tons]

1980 TAC	1980 United States quota	1980 United States catch	1980 Canadian quota	1980 total catch (all waters)	Stock size in 1981	Percent change in stock size from 1979	Percent change in stock size from 1980
60	36	30	24	54	552.4	54.3	31.1
80	48	30	32	62	543.8	51.9	29.0

160	96	30	64	94	509.2	42.2	20.8
180	108	30	72	102	500.6	39.8	18.8
200	120	30	80	110	491.9	37.4	16.7
220	132	30	88	118	483.36	35.0	14.7
240	144	30	96	126	474.6	32.6	12.6

The estimated US DAH for mackerel in fishing year 1980–1981 is 20,000 mt (15,000 mt by sport fishermen and 5,000 mt by commercial fishermen). This capacity is above that estimated for 1979 due to an increase in abundance of the species. The capacity of the recreational fishery is considered reasonable in light of the reported 1970 recreational catch of approximately 32,000 mt. On the basis of a limited processor survey recently conducted, the Council cannot justify an increase in DAH or DAP over the 5,000 mt level.

It is the Council's conclusion that the mackerel fishery should be managed so as to increase spawning stock size to a level nearing the estimated average spawning stock size from 1962–1979. The average mackerel spawning stock level during that period was approximately 850,000–900,000 mt. Although the spawning stock size is expected to increase significantly in 1981 (compared to 1979) regardless of relatively large catches in 1979 and 1980 (e.g., 100,000 mt or greater), even relatively small total catches in 1979 and 1980 (e.g., 50,000 mt each year) will yield a spawning stock size in 1981 no greater than about 70% of the average spawning stock size since 1962.

In addition to this consideration, the Council believes that uncertainities regarding (a) the magnitude of mackerel catches in 1979 and 1980 in Canadian waters; (b) the implementation of bilateral management; and (c) the magnitude of negotiated mackerel TACs should bilateral management be instituted, make prudent a precautionary OY for mackerel in U.S. waters, at least in fishing year 1980–1981 and at least until major uncertainities regarding Canadian policy with regard to this responce have been resolved. Given the significant increase in mackerel abundance, however, the Council believes that a significant increase in OY over the fishing year 1979–1980 level should be made for fishing year 1980–1981.

The OY for fishing year 1980–1981 for all Atlantic mackerel under U.S. jurisdiction (the management unit of this FMP) is 30,000 mt. This catch level in fishing year 1980–1981 represents the best present balance between the Council's desires to (a) ensure continued increases in mackerel abundance, and (b) accomodate the full capacities of the U.S. recreational and commercial fisheries to harvest this species. The Council believes that an OY significantly less than this amount will not materially enhance stock rebuilding, regardles of the magnitude of the mackerel catch in Canadian waters in 1979 and 1980, given the most recent and best scientific assessment of the stock. The Council believes an OY significantly in excess of the 30,000 mt level is unjustified in light of the stock rebuilding objective of the FMP. As detailed in Sections XII–2 through XII–4, the surplus of the OY left after DAH is subtracted, 10,000 mt, is not initially allocated entirely to TALFF. Given present uncertainties as to the ultimate DAH for mackerel in fishing year 1980–1981, 6,000 mt of this surplus is placed in a Reserve. Thus, the initial TALFF for mackerel is 4,000 mt.

[1] Throughout species range.
[2] For the management unit.

Section 301(a) of the Fishery Conservation and Management Act states that: "Any fishery management plan prepared, and any regulation promulgated to implement such plan . . . shall be consistent with the following national standards for fishery conservation and management." The following is a discussion of the standards and how this amended FMP meets them:

"(1) Conservation and management measures shall prevent overfishing while achieving, on a continuous basis, the optimum yield from each fishery." The optimum yield specified in this Amendment is designed to prevent further reductions in mackerel spawning stock size. The provisions of this Amendment constitute a continuation of the program to rebuild the stocks to higher levels of abundance.

"(2) Conservation and management measures shall be based upon the best scientific information available." This Amendment is based on the best and most recent scientific evidence.

"(3) To the extent practicable, an individual stock of fish shall be managed as a unit throughout its range, and interrelated stocks of fish shall be managed as a unit or in close coordination." This Amendment has been designed in anticipation of, and to complement, a possible U.S./Canadian bilateral agreement for the species.

"(4) Conservation and management measures shall not discriminate between residents of different States. If it becomes necessary to allocate or assign fishing privileges among various United States fishermen, such allocation shall be (A) fair and equitable to all such fishermen; (B) reasonably calculated to promote conservation; and (C) carried out in such a manner that no particular individual, corporation, or other entity acquires an excessive share of such privileges." Estimates of U.S. capacity for mackerel used in this Amendment include expected catches by all fishermen (sport and commercial) in all affected coastal States. Thus, although mackerel is a migratory species which each year becomes available first to fishermen in more southern States, no closure of this fishery to fishermen in northern Mid-Atlantic or New England States should result from the provisions of this Amendment. In addition, most of the expected increase in domestic commercial catches probably will occur in New England States, which renders remote the likelihood of closure of this fishery prior to arrival of this species in northern waters.

"(5) Conservation and management measures shall, where practicable, promote efficiency in the utilization of the fishery resources; except that no such measure shall have economic allocation as its sole purpose." Since domestic fisheries presently harvest mackerel beneath the OY level, no economic inefficiencies due to surplus investment or fishing effort, or similar considerations, should result from the provisions of this FMP. As U.S. capacity estimates anticipate an increase in commercial fishing for mackerel, this FMP will not create economic inefficiency in domestic commercial fisheries.

"(6) Conservation and management measures shall take into account and allow for variations among, and contingencies in, fisheries, fishery resources, and catches." This FMP and the OY and allocations described herein take into account possible fluctuations in species abundance, expected trends in U.S. demand for mackerel, and the possible effects of Canadian mackerel catches and U.S./Canadian bilateral negotiations as they relate to this species.

"(7) Conservation and management measures shall, where practicable, minimize costs and avoid unnecessary duplication." The management measures outlined in this Amendment are consistent with and complement, but do not duplicate, management measures contained in other FMPs or PMPs. Costs of management should not differ from the costs of the original FMP.

XIII. Measures, Requirements, Conditions, or Restrictions Proposed to Attain Management Objectives

Note.—All references to the Foreign Fishing Regulations are intended to adopt by reference the Foreign Fishing Regulations as they may exist at the time of the adoption of this FMP by the Secretary of Commerce and as they may be amended from time to time following FMP adoption.

XIII–1. Permits and Fees

No changes are proposed as a result of Amendment #1.

XIII–2. Time and Area Restrictions

Foreign nations fishing for mackerel shall be subject to the time and area restrictions set forth in part 611.50 of Title 50 Code of Federal Regulations (CFR).

Fixed Gear Avoidance

Foreign nations fishing for mackerel shall be subject to the fixed gear avoidance regulations set forth in part 611.50(e) of 50 CFR.

XIII–3. Catch Limitations

The fishing year for mackerel shall be the twelve (12) month period beginning April 1.

The annual TALFF for mackerel is 4,000 metric tons.

The US Domestic Annual Harvest (quota) for mackerel is 20,000 metric tons.

A Reserve of 6,000 mt is established.

It is the policy of the Mid-Atlantic Fishery Management Council that the Assistant Administrator for Fisheries, NOAA, be allowed to make an in-season adjustment to the estimated domestic annual harvest (DAH) and Total Allowable Level of Foreign Fishing (TALFF) for mackerel from the Reserve based on the criteria specified by the Council as set forth below. The Council further establishes that any allocation made by the Assistant Administrator in consultation with the Council must be consistent with the objectives of this management plan for the mackerel fishery. An adjustment is a temporary in-season increase of DAH and annual domestic quota and an equivalent temporary in-season decrease of Reserve. These adjustments may be made if actual US landings of mackerel are expected to exceed DAH. A portion of the Reserve not needed to meet actual DAH may be allocated to TALFF. At the end of the fishing year (March 31), DAH, annual domestic quota, and TALFF shall revert to the amounts specified by the Mid-Atlantic Fishery Management Council in Section XII–5 of this FMP.

The Council's criteria to guide the Assistant Administrator in the allocation process are as follows:

The National Marine Fisheries Service (NMFS) shall review reported domestic harvest (including off-loadings at sea) for mackerel on a monthly basis. Domestic harvest shall be determined based upon vessel and processor reports required by Section XIV of this FMP, additional statistical port sampling data collected by NMFS, and surveys of marine angler catches.

The Assistant Administrator shall project the total amount of Atlantic mackerel that will be harvested by US fishermen during the entire fishing year.

If the estimated amount of Atlantic mackerel to be harvested by US fishermen exceeds DAH, the Assistant Administrator shall allocate a sufficient quantity of Atlantic mackerel to DAH from the Reserve. Such allocation shall ensure that the US fishery for Atlantic mackerel will not be subject to closure except in the event that domestic landings of that species threaten to

exceed DAH plus the Reserve for Atlantic mackerel.

At the end of the first six months of the fishing year, if the estimated total amount of Atlantic mackerel to be harvested by US fishermen is less than 80 percent of the total domestic DAH plus the Reserve (i.e., 20,800 mt), the Assistant Administrator shall consider an allocation of the remainder of the Reserve for Atlantic mackerel to TALFF.

Any allocations made under this provision shall be timely, and implemented in a manner which facilitates the conduct of the fishery with a minimum of disruption.

The Assistant Administrator shall accomplish any allocation of mackerel through the regulatory process. Notice of proposed rulemaking stating the amount of Atlantic mackerel to be allocated shall be published in the **Federal Register**. the public shall be given a 15-day comment period from the date of publication. During this time the Assistant Administrator or his designee shall consult with the appropriate committee of the Council to ensure that the proposed allocation is consistent with the objectives contained in the FMP. The Assistant Administrator shall publish final regulations as appropriate in the **Federal Register** to accomplish any allocation. The Council believes these final regulations should be published in the **Federal Register** in a timely manner, to allow for proper notice. When the final regulations are published in the **Federal Register**, all comments and relevant information received including catch statistics shall be summarized.

The Council has determined that it is inappropriate to provide for allocation of the entire Reserve for Atlantic mackerel to TALFF for the following reasons:

(1) The traditional pattern of US harvesting of mackerel throughout the latter part of the fishing year, including the last month of the fishing year.

(2) The unknown amount of incidental catch of mackerel which may be unreported.

(3) The possibility of unforeseen entry into the mackerel fishery by domestic fishermen late in the season.

(4) The development of the mackerel export market.

The Council anticipates that the Secretary, after consultation with the Council, will implement the intent of the FMP to restrict US harvest in excess of DAH plus the Reserve by imposing such measures including, but not limited to, trip limitations, quarterly or half yearly quotas, and closed areas, as she deems appropriate in the final regulations. Such measures should ensure the achievement of OY in a manner that does not result in a sudden dislocation of those involved in the fishery. The Council intends that these measures will enable fishermen to redirect their effort in a timely manner should a closure of the fishery or a substantial diminution in allowable catch become necessary.

XIII–4. Types of Gear

Foreign nations fishing for mackerel shall be subject to the gear restrictions set forth in part 611.50(c) of 50 CFR.

XIII–5. Incidental Catch

Foreign nations fishing for mackerel shall be subject to the incidental catch regulations set forth in parts 611.13, 611.14, and 611.50 of 50 CFR.

XIII–6. Restrictions

No operator of any foreign fishing vessel, including those catching mackerel for use as bait in other directed fisheries, shall conduct a fishery for mackerel outside the areas designated for such fishing operations in this FMP.

XIII–7. Habitat Preservation, Protection and Restoration

The Council is deeply concerned about the effects of marine pollution on fishery resources in the Mid-Atlantic Region. It is mindful of its responsibility under the FCMA to take into account the impact of pollution on fish. The extremely substantial quantity of pollutants which are being introduced into the Atlantic Ocean poses a threat to the continued existence of a viable fishery. In the opinion of the Council, elimination of this threat at the earliest possible time is determined to be necessary and appropriate for the conservation and management of the fishery, and for the achievement of the other objectives of the FCMA as well. The Council, therefore, urges and directs the Secretary to forthwith proceed to take all necessary measures, including but not limited to, the obtaining of judicial decrees in appropriate courts, to abate, without delay, marine pollution emanating from the following sources: (1) the ocean dumping of raw sewage sludge, dredge spoils, and chemical wastes; (2) the discharge of raw sewage into the Hudson river, the New York Harbor, and other areas of the Mid-Atlantic Region; (3) the discharge of primary treated sewage from ocean outfall lines; (4) overflows from combined sanitary and storm sewer systems; and (5) discharges of harmful wastes of any kind, industrial or domestic, into the Hudson River or surrounding marine and estuarine waters.

XIII–8. Development of Fishery Resources

No changes are required as a result of Amendment #1.

XIII–9. Management Costs and Revenues

It is expected that the costs of implementing Amendment #1 should be similar to the cost of implementing the original FMP. The licensing and reporting requirements are essentially unchanged. The monitoring necessary to allocate the Reserve should not result in costs significantly different from the costs of monitoring required in the original FMP to allocate between the US commercial and recreational sectors.

XIV. Specifications and Sources of Pertinent Fishery Data

No changes are required as a result of Amendment #1.

XV. Relationship of the Recommended Measures to Existing Applicable Laws and Policies

XV–1. Fishery Management Plans

Amendment #1 to the Atlantic Mackerel FMP is related to other FMPs, PMPs, and proposed FMPs as follows:

1. It will amend the FMP regulating fishing for mackerel.

2. All fisheries of the northwest Atlantic are part of the same general geophysical, biological, social, and economic setting. Domestic and foreign fishing fleets, fishermen, and gear often are active in more than a single fishery. Thus, regulations implemented to govern harvesting of one species or a group of related species may impact upon other fisheries by causing transfers of fishing effort.

3. Many fisheries of the northwest Atlantic result in significant non-target species fishing mortality. Therefore, each management plan must consider the impact of non-target species fishing mortality on other stocks and as a result of other fisheries.

4. Mackerel are a food item for many commercially and recreationally important fish species. Also, mackerel utilize many finfish species as food items.

5. Present ongoing research programs often provide data on stock size, levels of recruitment, distribution, age, and growth for many species regulated by the PMPs, FMPs, and proposed FMPs.

XV–2. Treaties or International Agreements

No treaties or international agreements, other than GIFAs entered into pursuant to the FCMA, relate to this fishery.

XV–3. Federal Laws and Policies

The only Federal law that controls the fishery covered by this management plan is the FCMA.

Marine Sanctuary and Other Special Management Systems

The USS Monitor Marine Sanctuary was officially established on January 30, 1975, under the Marine Protection, Research, and Sanctuaries Act of 1972. Rules and regulations have been issued for the Sanctuary (15 CFR Part 924). They prohibit deploying any equipment in the Sanctuary, fishing activities which involve "anchoring in any manner, stopping, remaining, or drifting without power at any time" (924.3(a)), and "trawling" (924.3(h)). Although the Sanctuary's position off the coast of North Carolina at 35°00'23" N latitude—75°24'32" W longitude is located in the plan's designated management area, it does not occur within, or in the vicinity of, any foreign fishing area. Therefore, there is no threat to the Sanctuary by allowing foreign mackerel fishing operations under this FMP. Also, the Monitor Marine Sanctuary is clearly designated on all National Ocean Survey (NOS) charts by the caption "protected area". This minimizes the potential for damage to the Sancturary by domestic fishing operations.

Potential Impact on Marine Mammals and Endangered Species

Numerous species of marine mammals occur in the northwest Atlantic Ocean, yet definitive species composition is unknown. Indications are that the most numerous species in the area are the common (saddleback) dolphin (*Delphinus delphis),* harbor porpoise (*Phocoena phocoena),* and harbor seal (*Phoca vitulina).* Data on population abundance for various species, however, is sketchy at best, and for some species is non-existent. In addition, feeding behavior and preference for certain prey species are not well understood. These facts in combination make it extremely difficult to assess, even qualitatively, the potential impact of the mackerel management program on marine mammal populations.

the proposed harvest level for the 1979–1980 fishing year of 11,000 mt is not expected to cause any declines in abundance of this species. Therefore, no change in the availability of these species to those toothed cetaceans and pinnipeds that utilize mackerel as a food item is expected to occur.

Whenever fishing gear and marine mammals occur in the same area, there always exists a potential for an incidental kill of marine mammals. Except in unique situations (e.g., tuna-porpoise in the central Pacific), the incidental kill as a result of commercial fishing activities usually has an insignificant impact upon the stability of marine mammal populations. This is because the number of animals killed is relatively small compared to total population size.

Outside of certain marine mammals, the only threatened/endangered species occurring in the northwest Atlantic are the shortnose sturgeon (*Acipenser brevirostrum)* and several species of sea turtles. Because data on occurrences of shortnose sturgeon are vital to understanding its current status, the Council urges fishermen to report any incidental catch of this species to the Shortnose Sturgeon Recovery Project of the NMFS.

Available data appear to indicate that several species of sea turtles are regularly found in New England waters. These turtles are the Kemp's ridley (*Lepidochelys kempi),* leatherback (*Dermochelys coriacea),* loggerhead (*Caretta caretta),* and green (*Chelonia mydas).* In addition, hawksbill turtles (*Eretmochelys imbricata)* occasionally stray into the area. The Kemp's ridley sea turtle, while probably the most endangered reptile on earth (total population estimated at several thousand adult individuals), is also the most frequently observed sea turtle in New England waters, especially Cape Cod Bay. Strandings of Kemp's ridley are routine, have been known to occur for some time, and result in some mortality to the stranded animals. One hypothesis is that individuals remain in the Bay until late autumn, and with the decrease in water temperature as winter approaches, these animals become subject to hypothermia and subsequently die.

In late autumn, 1978, seven Kemp's ridley turtles were found on the beaches along Cape Cod Bay. While several of these individuals were reportedly cut and bleeding when first observed, recent examination of the preserved specimens did not reveal any major physical damage to the individuals. It is possible that these animals were injured by fishing activity either through entanglement in the trawl nets or by contact with a vessel's propeller. However, there is no solid evidence to indicate that fishing operations were responsible for the kills. Based on inquires to fishermen conducted by NMFS and Massachusetts Division of Marine Fisheries personnel, the general conclusion can be drawn that regular and numerous killings of Kemp's ridley turtles in Cape Cod Bay do not occur as a result of normal commercial fishing operations. Additional monitoring of turtles is needed.

In conclusion, the Council does not believe that implementation of the mackerel FMP will have any adverse impact upon populations of marine mammals and endangered species. As additional understanding of the status and dynamics of marine mammal and sea turtle populations becomes available, the Council will integrate this information into the examination of potential impacts upon the environment as a result of FMPs.

Current and/or Proposed Oil, Gas, Mineral, and Deep Water Port Development

While Outer Continental Shelf (OCS) development plans may involve areas overlapping those contemplated for offshore fishery management, we are unable to specify the relationship of both programs without site specific development information. Certainly, the potential for conflict exists if communication between interests is not maintained or appreciation of each other's efforts is lacking. Potential conflicts include, from a fishery management position: (1) exclusion areas, (2) adverse impacts to sensitive, biologically important areas, (3) oil contamination, (4) substrate hazards to conventional fishing gear, and (5) competition for crews and harbor space. The Council has recommended that the nomination of the Georges Bank Marine Sanctuary be reinstated and that an EIS be prepared for it.

We are not aware of pending deep water port plans which would directly impact offshore fishery management goals in the areas under consideration, nor are we aware of potential effects of offshore fishery management plans upon future development of deep water port facilities.

XV–4. State, Local, and Other Applicable Laws and Policies

No State or local laws control the fisheries that are the subject of this management plan other than those listed in Section VII–4.

State Coastal Zone Management (CZM) Programs

The proposed action entails management of mackerel stocks in an effort to ensure sustained productivity at some optimum level. In order to achieve this goal, all management plans must incorporate means to achieve integrity of fish stocks, related food chains, and habitat necessary for this integrated biological system to function effectively. Inasmuch as CZM plans are presently in

the developmental stages, we are not aware of specific measures on the part of the individual states which would ultimately impact this fishery plan. However, the CZM Act of 1972, as amended, is primarily protective in nature, and provides measures for ensuring stability of productive fishery habitat within the coastal zone. Therefore, each State's CZM plan will probably assimilate the ecological prinicples upon which this particular fishery management plan is based. It is recognized that responsible long-range management of both coastal zones and fish stocks must involve mutually supportive goals. At the time that the draft of Amendment #1 was distributed for review, the Council had been advised that Maine, Massachusetts, Rhode Island, New Jersey, Maryland, and North Carolina had approved CZM Programs. Copies of the draft were sent to the CZM agencies in those States for review and no comments were received.

XVI. Council Review and Monitoring of the Plan

The Council will review the plan each year following the close of the mackerel fishery and the publication of the results of the spring NMFS survey cruse. This schedule will permit a review of MSY, OY, DAH, DAP, NPF and TALFF prior to the development of foreign fishing allocations. This schedule may be modified in the future as the domestic fishery evolves. An additional factor in this evaluation will be the findings of the NMFS marine angler survey.

Appendix I. Status of the Northwest Atlantic Mackerel Stock—1979*

Introduction

This report analyzes the status of the Atlantic mackerel (*Scomber scombrus*) stock distributed throughout ICNAF Subareas 3, 4, and 5 and Statistical Area 6 (SA 3–6) (Figure I–1). This analysis reported herein is an update of the assessment by Anderson and Overholtz (1979a) and utilizes procedures described in Anderson (1979) and Anderson and Overholtz (1979a). Included in this report are international commercial and US recreational catch statistics; US research vessel bottom trawl survey abundance indices; fishing mortality and stock size estimates from cohort analysis; recruitment estimates; and projected options for catch in 1980, given various levels of catch in 1979, with resulting spawning stock biomasses in 1981.

Catch

The international mackerel catch (commercial and recreational) in ICNAF SA 3–6 increased from 12,310 tons in 1960 to 431,606 tons in 1972, and subsequently dropped to only 33,450 tons in 1978 (Table I–1). The US commercial catch has ranged between 938 and 4,364 tons during 1960–1978 and averaged 2,200 tons per year; the 1978 catch was 1,604 tons. Estimated US recreational catches have varied from 522 to 33,303 tons (average of 13,200 tons) and increased sharply from 522 tons in 1977 to 6,571 tons in 1978. Canadian catches during 1960–1978 have varied from 5,459 to 24,444 tons (1978) and averaged 13,400 tons each year. Catches by countries other than the US and Canada increased from 11 tons in 1961 to 396,759 tons in 1973 and decreased to only 831 tons in 1978.

The 1978 catch statistics are presently provisional (Table I–2). The Canadian catch of 24,444 tons comprised 73% of the total, followed by the US with 8,175 tons or 24% (commercial and recreational). A total of 24,913 tons was taken in SA 3–4 and 8,537 tons in SA 5–6. The US imposed a catch limitation for 1978 of 15,500 tons for the portion of the overall stock under US jurisdiction, with only 1,200 tons allocated to distant water fleets as incidental catch in other fisheries. Of this latter amount, only 362 tons were taken; the balance (469 tons) of the distant water fleet catch was taken in SA 4 (Canadian waters).

The estimate of mackerel catch from the US recreational fishery in 1978 was based on a survey of the spring recreational mackerel fishery in the Middle Atlantic area conducted by personnel of the NMFS, Northeast Fisheries Center, Sandy Hook Laboratory, in cooperation with personnel from New Jersey, Delaware, and New York (Christensen et al., 1979a). It was estimated that 6,103 tons were caught by anglers aboard party, charter, and private boats in the area from Virginia to Maine. Assuming that the proportion of mackerel caught from boats compared to that caught from shore was the same in 1978 as estimated in the national marine angler survey conducted in 1970 (Deuel, 1973) (Virginia—New Jersey, 99.6%; New York—Maine, 90.9%), an additional 468 tons were caught by shore-based anglers. The total estimated recreational catch of mackerel in 1978 was, therefore, 6,571 tons.

Catch Composition

The international mackerel catch in numbers at age for 1978 is presented in Table I–3. The bulk of the data are Canadian (calculated by Hunt [1] and Moores [2]), although numbers at age were estimated for portions of the US recreational and commercial catch. There were no sampling data from distant water fleet catches. About 86% of the total catch in tons was accounted for by sampling data (Canada—73%; US—13%). The remaining 14% was assumed to be of the same age composition as the cumulative age composition of the sampled catch.

The 1974 and 1973 year-classes comprised 29% and 22%, respectively, of the total 1978 catch in numbers. The catch of age 1–3 fish was low in comparison to other years. Age 1 (1977 year-class) and age 2 (1976 year-class) fish comprised only 0.2% and 0.4%, respectively, of the 1978 catch, which were the lowest percentage contributions by either age group during 1962–1978. The catch in numbers of age 3 fish (1975 year-class) was 7.6%, the lowest percentage contribution by that age group since the mid-1960s. These unusually poor catches of age 1–3 fish reflect, in large part, the apparent low abundance of these year-classes (1975, 1976, and 1977), and, to a lesser extent, the decrease in distant-water-fleet (DWF) catches. In the past, the percentage contribution of age 1–3 fish was greater in DWF catches than in Canadian and USA catches. Mean age of the catch increased from 2.8 years in 1975 to 3.8 years in 1977 and then climbed sharply to 5.8 years in 1978 (Table I–5), reflecting the passage of the 1973 and 1974 year-classes through the fishery and the scarcity of younger fish in the catch in the last several years.

An estimate of the age composition of the 1978 US spring recreational catch of mackerel was made by Christensen et al. (1979b). Approximately half of the catch was comprised of fish from the strong 1967 (age 11–27%) and 1969 (age 9–23%) year-classes (Table I–4). In contrast, only about 6% of the sampled commercial catch consisted of these two year-classes. Furthermore, mackerel catches during a January–March, 1978, USSR bottom trawl survey and the US spring bottom trawl survey indicated low proportions of these older age groups and 50–60% of age 4 (1974 year-class) and 5 (1973 year-class) fish (Anderson and Overholtz, 1978b). Since the survey catches occurred primarily in offshore waters whereas the recreational fishery is conducted generally within 10–15 miles of shore, the difference in catch composition is consistent with what is known about the size and age composition of spring migrating and spawning mackerel. Sette (1943, 1950) reported that the larger, older fish were the first to move inshore to spawn followed later by smaller, younger fish.

Sampling of the spring recreational catch was also done in 1979 (Christensen [3]). Results indicate that the 1969 and 1967 year-classes again comprised about half of the catch (Table I–4). The age composition in 1978 and 1979 is consistent in indicating that the spring recreational catch is comprised mainly of large, old mackerel. Unfortunately, since sampling data were not collected prior to 1978, it is not known if this represents the typical situation or is unique to the last several years. In view of Sette's findings, however, it is likely that this is typical. The summer recreational catch of mackerel in the New England region, although less than that in the spring Middle Atlantic fishery based on past national marine angler survey results, likely includes a greater proportion of smaller fish, particularly when strong year-classes of young fish are present. Although sampling data from this component of the recreational fishery are lacking, young fish are frequently caught from shore in summer (Bigelow and Schroeder, 1953).

The international mackerel catch in numbers at age for 1962–1978 is given in Table I–5.

Mean Weights at Age

Mean weights at age, adopted by scientists in the ICNAF Assessments Subcommittee (ICNAF 1974), were used in this assessment (Table I–6). As described by Anderson (1979), these values were multiplied by the appropriate numbers at age (Table I–5) and summed by calendar year to obtain calculated catches (tons). Ratios between observed and calculated catches varied from 0.906 to 1.302 (Table I–5) and averaged 1.031. Mean weight values were applied to stock size numbers at age calculated from cohort analysis (Table I–10), with the products summed by calendar year to obtain stock biomass. Annual biomass values were corrected using the appropriate observed/calculated catch ratios. Projected catch and stock biomass levels for 1979–1981 were not corrected.

Stock Abundance Indices

US spring and autumn research vessel bottom trawl survey catch-per-tow indices (Table I–7, Figure I–3) have generally monitored trends in mackerel abundance since 1963. Surveys conducted since the previous assessment (Anderson and Overholtz, 1979a) indicate a substantial increase in mean catch per tow (kg, retransformed) during the autumn survey from 0.027 in 1977 to 0.191 in 1978, but a decrease during the spring survey from 0.447 in 1978 to 0.221 in 1979. Year-to-year changes exhibited by survey catch-per-tow indices are much less reliable than longer-term trends due to the high variability of the data (Grosslein, 1971; Anderson, 1976, 1979; Pennington and Grosslein, 1978; Sissenwine, 1978). As a result, the changes in the survey indices in 1978–1979 should be interpreted cautiously. Both the spring and autumn indices increased sharply from 1977 to 1978, but the actual improvement in stock abundance was probably less than either the 2-fold or 6-fold increase indicated by the two surveys, respectively. Results from cohort analysis (Table I–10) indicate the beginning of stock recovery from 1977 to 1978, but the increase was estimated as less than 10%. There is no logical basis for an abrupt change in actual stock size as indicated by the drop in the spring survey index from 1978 to 1979. Available information suggests that the low survey catch of mackerel in 1979 relative to 1978 was due, in part, to warmer bottom water temperatures at the time of the survey in 1979. A greater proportion of the mackerel was caught in sampling strata farther north and east (southern New England–Georges Bank area) in 1979 compared to 1978. It is likely, therefore, that a substantial portion of the mackerel normally sampled in SA 5–6 during the spring survey may, in 1979, have already migrated east and north into Canadian waters enroute to the Gulf of St. Lawrence. Anderson and Almeida (1977) were able to associate northward shifts in spring survey catches of mackerel during 1968–1976 with increases in water temperature.

The standardized US commercial catch-per-day index (Anderson, 1976) decreased slightly from 0.52 tons in 1977 to 0.48 tons in 1978 (Table I–8, Figure I–4). This index has remained fairly constant since 1975. Although this measure of relative stock abundance has generally monitored the gross fluctuations in mackerel abundance since 1964, it is limited as a reliable indicator of year-to-year change, particularly in recent years, since the index is determined from catches which have averaged less than 1% of the total catch from the stock (Anderson, 1979).

Natural Mortality

Instantaneous natural mortality (M) was assumed to be 0.30 for all ages in all years, as adopted earlier by scientists in the ICNAF Assessment Subcommittee (ICNAF 1974).

Fishing Mortality

Instantaneous fishing mortality (F) for fully-recruited age groups in 1978 was estimated using a method first proposed by Anderson et al. (1976) and employed in subsequent assessments. The technique, based on a linear relationship between mean annual F values (ages 3 and older) derived from cohort analysis and relative exploitation indices (ratio between international catch and spring survey catch per tow), predicted an F of 0.153 for 1978 (Table I–9, Figure I–5). In previous assessments (Anderson, 1979; Anderson and Overholtz, 1979a), the 1968–1977 survey values were smoothed by exponential curve and values predicted from the curve were used in calculating the relative exploitation indices. The 1968–77 time-series was smoothed because of the aberrant 1969 value and the year-to-year fluctuations in the other values; an exponential curve appeared to best describe the continuously decreasing trend. Since the 1978 value deviated sufficiently from the decreasing trend of the previous years to reflect a true increase in abundance, the actual 1978 survey value was used to calculate the relative exploitation index for 1978.

Age-specific fishing mortality (F) rates for 1962–1977 (Table I–10) were determined from cohort analysis (Pope, 1972) assuming F=0.153 at ages 4 and older in 1978. Mean annual F values for ages 3 and older increased from 0.04 in 1962–1964 to a high of 0.67 in 1976 and then decreased to 0.34 in 1977 and to an estimated 0.15 (ages 4 and older) in 1978.

Recruitment

The sizes of the 1961–1974 year-classes at age 1, estimated from cohort analysis, ranged from 433 million (1963 year-class) to 8,417 million fish (1967 year-class) (Table I–10, Figure I–9), with a mean size of 2,138 million and a median size of 1,551 million.

Power curve relationships, fitted by least squares, between (1) autumn survey catch per tow at age 0 (numbers, retransformed), and year-class size at age 1 estimated from cohort analysis for 1963–1974 (Table I–12), Figure I–6), (2) spring survey catch per tow at age 1 and year-class size at age 1 for 1967–1974 (Table I–12, Figure I–7), and (3) spring survey catch per tow at age 2 and year-class size at age 2 for 1966–1974 (Table I–12, figure I–8) were used to estimate the sizes of the 1975–1978 year-classes. Previous assessments (Anderson et al., 1976; Anderson, 1979; Anderson and Overholtz, 1979) utilized linear catch-per-tow indices for ages 0, 1, and 2. The present analysis, however, modified the procedure by using a natural log transformation of the station catches prior to calculation of the catch-per-tow indices, followed by a retransformation to the linear scale. Natural log transformation and retransformation for the catch-per-tow-at-age indices employed the same general procedures (Anderson 1979) as used for the catch-per-tow indices (kg) given in Table I–7. The purpose for and result of this modification to the technique was to reduce some of the variability inherent to the unadjusted linear survey data (Anderson, 1979).

The 1975 year-class was estimated to be 538 and 966 million fish at age 1 based on the autumn (age 0) and spring (age 1) survey catch per tow indices, respectively, and 374 million at age 2 based on the spring age 2 index (Table I–12, Figures I–6—I–8). The catch (C_2) of 26.9 million fish at age 2 in 1977 (Table I–5) and a year-class size (N_2) of 374 million fish implied from:

$$C_2 = N_2 \frac{F_2}{Z_2}(1 - e^{-Z_2}) \quad (1)$$

an F_2 of 0.087. A year-class size of 519 million at age 1 then followed from cohort analysis. Based on three estimates of its size at age 1 (538, 966, and 519 million fish), which averaged 674 million, and considering that two of the three estimates were less than the mean, the 1975 year-class size was assumed to be 600 million at age 1.

Estimates were also obtained similarly for the 1976 year-class at age 1 (0, 416, and 749 million). The zero estimate obtained from the autumn survey age 0 index, although indicative of a poor year class, was not used quantitatively in determining the size of the 1976 year class. The mean of the remaining estimates was 582 million, and, therefore, the 1976 year-class was considered to be 600 million at age 1.

The 1977 year-class was estimated to be 709 and 813 million fish at age 1, based on the autumn (age 0) and spring (age 1) survey catch-per-tow indices, respectively, but only 94 million fish at age 2 based on the spring age 2 index (Table I–12, Figures I–6—I–8). The catch (C_1) of 115,000 fish at age 1 in 1978 (Table I–3) and a year-class size (N_2) of 94 million at age 2 in 1979 implied from

$$\frac{N_2}{C_1} = \frac{Z_1 e^{-Z_1}}{F_1(1 - e^{-Z_1})} \quad (2)$$

an F of 0.00105. A year-class size (N_1) of 126 million at age 1 was then implied from Equation 1. However, in view of the above two estimates of this year-class at age 1 (709 and 813 million), 126 million was considered to be unrealistically low. It was indicated previously that the catch per tow of mackerel during the spring survey decreased from 1978 to 1979 although other evidence indicates that stock abundance improved, and that the decrease was related to increased water temperature which may have stimulated an earlier migration of mackerel from the survey area into Canadian waters. Therefore, the estimate of 126 million fish at age 1 was ignored, and the 1977 year-class was assumed to be 700 million at age 1.

The 1978 year-class was estimated to be 3,342 million fish at age 1 based on the autumn (age 0) survey catch-per-tow index (Table I–12, Figure I–6). Because of the low mackerel catch during the 1979 spring survey, as described earlier, this year-class was estimated to be only 468 million at age 1 based on the spring (age 1) index (Table I–12, Figure I–7). This latter value was considered to be a gross underestimate of the true size of the 1978 year-class. In addition to the results of the 1978 US autumn survey which predicted a large 1978 year-class, results from a bottom trawl survey conducted during 10 February–4 March, 1979, in the Georges Bank—southern New England area by the Federal Republic of Germany R/V *Anton Dohrn* also tend to suggest a large 1978 year-class. The mackerel catch during this survey was larger than that from the last several *Anton Dohrn* spring surveys and consisted almost entirely of 1978 year-class fish. These fish were all caught in stratum 10 (Figure I–2), south of Cape Cod. Since this survey was conducted 1–2 months prior to the US spring survey, it is possible that the bulk of these fish had migrated from the survey area into Canadian waters by the time the US survey sampled the same area.

An attempt was made to correct for the unusually low catch-per-tow index at age 1 in 1979. As mentioned above, the catch-per-tow index at age 2 in 1979 (1977 year-class) predicted a year-class of only 126 million at age 1 compared to estimates of 709 and 813 million at age 1 based on age 0 and 1 survey indices (Table I–11). Assuming that the mean (761 million) of the latter two estimates represented the true size of the year-class at age 1, the catch of 115,000 fish at age 1 in 1978 (Table I–3) implied a year-class size of 564 million at age 2 in 1979, instead of 94 million. The survey catch per tow index at age 2 in 1979 needed to predict 564 million fish from the calculated power curve relationship (Table I–12, Figure I–8) would be 0.229 instead of 0.009. The hypothetical index (0.229) differed from the observed index (0.009) by a factor of 25.44. Assuming that the survey catch of age 1 mackerel in the spring of 1979 was proportionately as low as the catch of age 2 mackerel, increasing the observed age 1 catch per tow index (0.029) by a factor of 25.44 resulted in a hypothetical index of 0.738. A year-class size of 1,555 million fish at age 1 was predicted from the calculated power curve relationship (Table I–12, Figure I–7) using the index of 0.738. Given two estimates of 3,342 million and 1,555 million (average = 2,448 million), the 1978 year-class was, therefore, considered to be 2,400 million fish at age 1.

For purpose of catch and stock size projections and lacking any information, the 1979 year-class was arbitrarily set at 600 million fish at age 1, or equal to the low 1975 and 1976 year-classes.

Based on results of cohort analysis and estimates based on survey catch-per-tow-at-age indices, the 1978 year-class is the largest to enter the fishery since the 1969 year-class (Table I–10), followed by the 1973 year-class. The 1975–1977 year-classes appear to be low in abundance (2–3 times smaller than the 1973–1974 year-classes) and of a size comparable to the 1962–1964 year-classes.

Partial Recruitment

Partial recruitment of an age group to the fishery in a given calendar year is defined here as the ratio of the fishing mortality (F) at that age to the average fishing mortality of fully-recruited ages in that year. Based on age-specific F values from cohort analysis (Table I–11), mackerel appear to have become fully recruited to the fishery in many years by about age 3. Exceptions to this have occurred as a result of the variability in year-class sizes and to shifts in fishing

patterns and effort. Partial recruitment coefficients for ages 1–3 during 1962–1978 are given in Table I–13. Partial recruitment during 1962–1978 has varied from 0.1 to 100.0% (average=29.3%) at age 1, 0.4 to 100.0% (average=48.7%) at age 2, and 7.0 to 100.0% (average=70.9%) at age 3. Partial recruitment was especially high (76%) at age 1 in 1975 (1974 year-class) with 100% recruitment of that year-class at ages 2 and older. The 1973 year-class did not experience high partial recruitment at age 1 (13%), but was fully recruited at ages 2 and older. Full recruitment (at or near 100%) at age 3 occurred in about half of the years (1962–1978), but in 8 of the last 12 years which was the period of the recent intensive international fishery.

Partial recruitment at age 1 decreased sharply from 76% in 1975 to 3.6% in 1976 and continued to drop to only 0.1% in 1978 (Table I–13). Partial recruitment also declined at age 2 from 100% in 1976 to 22% in 1977 and 0.4% in 1978, and at age 3 from 100% in 1977 to 12% in 1978. These coefficients may not be totally accurate as the F values from which they were derived were determined from estimated year-class sizes and known catches. However, the decreases do reflect changing conditions in the mackerel fishery. The abrupt drop in partial recruitment at age 1 in 1976 is due in part to a minimum size limit of 25 cm (total length) adopted beginning that year by ICNAF to effectively exclude the harvest of age 1 mackerel. However, this regulation in itself would not have resulted in such a decrease in fishing mortality relative to older ages, as it authorized up to 25% by number of the total catch on board vessels to be undersized fish. The decreased fishing mortality and partial recruitment evident for the 1975–1977 year-classes in 1976–1978 appears to be due primarily to the low abundance of these year-classes and the fact that the fishery during the last several years has been supported by older fish, particularly the 1973 and 1974 year-classes.

The sudden change in partial recruitment in recent years complicates the selection of coefficients for the projection of catches in 1979 and 1980. Since 73% of the catch in numbers in 1978 was Canadian (Table I–14), and indications are that the bulk of the catch in 1979 and possibly in 1980 will also be Canadian, it was decided to examine the age composition of the Canadian catch and estimate the age-specific fishing mortalities of that component of the international catch. Age composition in thousands of fish at age of the Canadian mackerel catch in SA 3–6 during 1968–1978 is given in Table I–14 (see Anderson and Paciorkowski, in press). These data indicate considerable year-to-year variability in the age composition reflecting in large part the passage of dominant as well as weak year-classes through the fishery. About 50% of the 1968 catch was age 1 fish from the outstanding 1967 year-class; the catch from this year class at ages 1–6 exceeded the catch of any other age group each year through 1973. In 1971 and 1973, small quantities of age 0 mackerel were caught. Until the last several years and the entry of the 1975–1977 year-classes to the fishery, age 1–3 mackerel were well represented in the Canadian catch. Estimates of age-specific fishing mortality attributable to the Canadian fishery were determined by applying the ratio between the Canadian catch in numbers (Table I–14) and the international catch in numbers (Table I–5) at each age in each calendar year to the appropriate F calculated from cohort analysis for the entire fishery (Table I–11). From this analysis it appeared, as for the entire fishery, that fish in most years were fully recruited to the Canadian fishery at age 3. Partial recruitment coefficients were determined for ages 1–3 as ratios of F at each age to the mean F (F at each age weighted by stock size at that age) at ages 3 and older (Table I–14). As with the partial recruitment coefficients determined for the entire fishery (Table I–12), the Canadian values exhibited considerable variation and the same general year-to-year pattern, although, on average for 1968–1978, they were lower at each age (18% vs. 20% at age 1; 33% vs. 50% at age 2; 67% vs. 81% at age 3). The 1978 values for both the Canadian and the entire fishery were low at ages 1–3 (0.1, 0.4, and 12%, respectively). With an estimated strong 1978 year-class entering the fishery in 1979 and the 1974 and older year-classes continuing to decline in abundance as they advance through the fishery, it was felt that partial recruitment coefficients at ages 1–3 fish in 1979–1980 would increase from those estimated for 1978. Lacking any additional rationale for selecting coefficients for 1979–1980, means for each age were determined by eliminating from consideration the high and low values at each age in the 1968–1978 series. The resulting values were 15% at age 1, 33% at age 2, and 70% at age 3, with full or 100% recruitment at ages 4 and older (Table I–16).

Stock Size

Age-specific stock size estimates generated from cohort analysis and annual biomass values obtained by applying mean weights at age (Table I–6) to the stock size estimates are given in Table I–10. Total stock biomass (ages 1 and older) increased from about 600,000 tons during 1962–1965 to 2.5 million tons in 1969 (Figure I–9) and then declined sharply to 485,000 tons at the beginning of 1977. The total stock has since increased about 30% to an estimated 631,000 tons at the beginning of 1979. Spawning stock biomass, defined as 50% of the age 2 fish and 100% of the age 3 and older fish, increased from about 500,000 tons in 1962–1967 to 1.9 million tons in 1970–1972 and then declined to an estimated 358,000 tons at the beginning of 1979.

Catch and Stock Size Projections

Projections of spawning stock biomass available at the beginning of 1980 were made assuming various levels of catch in 1979 ranging from 30,000 to 100,000 tons (Table I–17). Fishing mortality estimated to generate these catches varied between 0.103 (30,000 tons) and 0.380 (100,000 tons). Spawning stock biomass available at the beginning of 1980 will vary from an estimated 488,000 tons (36% increase from 1979) assuming a 1979 catch of 30,000 tons, to 421,000 tons (18% increase from 1979), assuming a catch of 100,000 tons.

Projected catches in 1980 at fishing mortality rates ranging from 0.05 to 0.50 and resultant spawning stock biomass levels available at the beginning of 1981 were made (Table I–18) for each 1979 catch option. If the 1979 catch was only 30,000 tons, or about the same level as in 1978, catches in 1980 would vary from 17,600 tons at F=0.05 to 150,700 tons at F=0.50. Resultant spawning stock biomass at the beginning of 1981, given this range in catch in 1980, would vary from 657,000 tons (84% increase from 1979 and 35% increase from 1980) to 515,000 tons (44% increase from 1979 and 6% increase from 1980).

If the 1979 catch was as high as 100,000 tons, catches in 1980 would vary from 15,000 tons at F=0.50. Resultant spawning stock biomass in 1981, givern this range in catch in 1980, would vary from 595,000 tons (66% increase from 1979 and 41% increase from 1980) to 472,000 tons (32% increase from 1979 and 12% increase from 1980).

Given the range in catch in 1979 from 30,000 to 100,000 tons, fishing in 1980 at $F_{0.1}$=0.40 would result in catches ranging from 124,600 to 106,500 tons and result in spawning stock biomass increases of 52%–38% from 1979 to 1981 and of 11% to 18% from 1980 to 1981.

Under all catch assumptions presented for 1979–1980, there is an accompanying projection of stock increase in 1980–1981, which is due to the recruitment of the estimated strong 1978 year-class. Continued recovery of

the stock will depend largely on the strength of this and subsequent year-classes as well as the magnitude of the catch in the next few years. There is no definite basis for predicting levels of future recruitment given present and projected levels of spawning biomass. However, examination of the 1962–1978 spawning stock-recruitment pattern indicates a greater probability of stronger recruitment with a spawning stock biomass in excess of 700,000 tons. During the 17-year period of 1962–1978, the estimated spawning biomass was less than 700,000 tons during 8 of those years, and only 25% (2) of the year-classes spawned during those 8 years were above median size. During the remaining 9 years, spawning biomass was equal to or greater than 900,000 tons and 78% (7) of the year-classes were at or above the median size. Since all of the years which resulted in good recruitment were consecutive, it is possible that favorable environmental conditions may have persisted during that time which were equally or more influential in determinig year-class size than spawning stock size. The available knowledge is not sufficient to distinguish the key factor(s), but does suggest a higher probability of improved recruitment as the stock continues to rebuild.

1974	.569	347,220	610,228	.468
1975	.403	293,205	727,556	.437
1976	.285	245,935	862,930	.673
1977	.202	78,120	386,733	(.330)(e,f)
1978	.447	33,450	74,832	(.153)(e)

(a) Stratified mean catch (kg) per tow indices for 1968-77 smoothed by exponential curve (see Anderson, 1979); 1978 is actual value.

(b) International commercial and recreational catch.

(c) Ratio between catch and survey catch per tow.

(d) Obtained from cohort analysis assuming F = 0.153 in 1978.

(e) Calculated from regression of relative exploitation index on mean F for 1968-76: $Y = 0.110 + 0.000000568\ X$, $r = 0.970$.

(f) Actual value calculated from cohort analysis was 0.337.

BILLING CODE 3510-22-C

Signed at Washington, D.C. this 28th day of March, 1980.

Winfred H. Meibohm,

Executive Director, National Marine Fisheries Service.

Authority: 16 U.S.C. 1801 *et seq.*

PART 611—FOREIGN FISHING

It is proposed to retain those regulations in Part 611 governing foreign fishing for Atlantic mackerel.

PART 656—ATLANTIC MACKEREL FISHERY

It is proposed to revise Part 656 by making the following amendments to the designated sections:

§ 656.1 [Amended]

Add a new sentence at the end of the paragraph (b) as follows: "The Appendix to 50 CFR § 611.20 contains the TALFF for Atlantic mackerel."

§ 656.2 [Amended]

Section 656.2 is amended as follows:

1. Add the words "ranging from Labrador to North Carolina." at the end of the definition of *Atlantic mackerel.*

2. Delete the definition of commercial fishing.

3. Delete the definition of recreational fishing.

§ 656.4 [Amended]

Section 656.4 is amended as follows:

1. Delete paragraph (a) and substitute the following:

(a) *General.* Every fishing vessel which fishes for Atlantic mackerel under this Part must have a fishing permit issued under this section. Vessels are exempt from this requirement if they catch no more than 100 pounds of mackerel per trip.

* * * * *

2. Strike (vii) in paragraph (c)(2) and substitute the following:

* * * * *

(c) * * *

(2) * * *

(vii) The permit number of any current or previous Federal fishery permit issued to the vessel.

* * * * *

§ 656.5 [Amended]

Section 656.5 is amended as follows:

1. Strike paragraph (a)(1)(i) and substitute the following:

(a) * * *

(1) * * *

(i) Maintain on board the vessel an accurate and complete fishing vessel record on forms supplied by the Regional Director.

* * * * *

2. Strike paragraph (a)(3) and substitute the following:

(a) * * *

(3) Fishing vessel records shall contain information on a daily basis for the entirety of any trip during which mackerel or any other regulated species are caught. The information shall include dates of fishing, type and size of gear used, areas fished, duration of fishing time, time period of tow or gear set, and the estimated weight of each species taken.

* * * * *

3. Strike paragraph (b) and substitute the following:

* * * * *

(b) *Fish dealer and processor reports.* (1) Any person who receives Atlantic mackerel for a commercial purpose from a fishing vessel subject to this Part shall file a weekly report (Sunday through Saturday) within 48 hours of the end of the week in which mackerel is received. This report shall include information on all first purchases of mackerel and all other fish made during the week. Such information shall include date of transaction, name of the vessel from which mackerel was received, and the amount and price paid for mackerel and all other fish received."

4. Add new subparagraph (b) (2), (3), and (4):

(b) * * *

(2) *Domestic mackerel processing capacity.* [Reserved]

(3) Reports required by § 656(b) shall be made on forms supplied by the Regional Director and submitted to a location designated by him.

(4) Any person required by § 656.5(b) to file reports shall permit an Authorized Officer or an employee of the National Marine Fisheries Service designated by the Regional Director to make inspections, and to inspect or reproduce any records or books relating to information required to be contained in those reports. These inspections may take place at the principal place of business or at the location where these required records are regularly kept.

§ 656.6 [Amended]

Section 656.6 is amended as follows:

1. The last sentence in paragraph (a) reads: "the Official Number is the documentation number issued by the U.S. Coast Guard for documented vessels or the registration number issued by a State of the U.S. Coast Guard for undocumented vessels". The word "of" which appears between "State" and "the" is stricken and the word "or" is substituted.

2. Paragraph (b)(2) is amended by striking the words "painted legibly in" which appears in the first sentence, so the sentence now reads:

"The Official Number shall be permanently affixed to or painted on the vessel and shall be block Arabic numerals in contrasting color."

§ 656.7 [Amended]

Section 656.7 is amended as follows:

1. Delete slash which appears in paragraph (c), substitute the word "or".

2. Capitalize the word "Part" which appears in paragraph (e).

3. Strike the word "or" which appears between the words "control" and "ship" in paragraph (f), and substitute "of".

4. Delete slash between "fish dealer" and "processor reports" in paragraph (i) and substitute the word "or".

§ 656.8 [Amended]

Section 656.8 is amended as follows:

1. Insert quotation marks in subparagraph (b)(2) after "you" and before "and".

2. Strike words "Federal Law Enforcement" in subparagraph (c)(4) and substitute "Authorized".

§ 656.21 [Amended]

Section 656.21 is amended as follows:

1. Strike paragraph (a) and substitute the following and renumber (b) as (c) and add a new (b) to read as follows:

(a) *Harvest levels.* The allowed level of harvest of Atlantic mackerel on a fishing year basis is 30,000 metric tons (mt). The initial level of harvest by vessels of the United States is 20,000 mt.

(b) *Reserve.* A reserve of 6,000 mt is available for adjustments to the initial level of domestic harvest and for allocation to the total allowable level of foreign fishing. Allocations to the initial level of foreign harvest shall be made in accordance with the procedures set forth in § 656.22 of this Part.

2. Strike the word "limit" in the first sentence of new paragraph (c) and substitute "restrict".

§ 656.22 [Amended]

Strike entire section, retitle "Allocation" [Reserved].

§ 656.23 [Amended]

Section 656.23 is amended as follows:

1. Strike paragraph (b) and substitute the following:

* * * * *

(b) *Decision to close.* The Assistant Administrator shall close the domestic fishery when it has harvested 80 percent of the total of the initial level of domestic harvest plus the part of the reserve which has not been allocated to the initial level of foreign harvest.

2. Strike the words "recreational or commercial" in paragraph (c).

Notices

Federal Register
Vol. 45, No. 66
Thursday, April 3, 1980

This section of the FEDERAL REGISTER contains documents other than rules or proposed rules that are applicable to the public. Notices of hearings and investigations, committee meetings, agency decisions and rulings, delegations of authority, filing of petitions and applications and agency statements of organization and functions are examples of documents appearing in this section.

ADMINISTRATIVE CONFERENCE OF THE UNITED STATES

Committee on Agency Organization and Personnel; Public Meeting

Pursuant to the Federal Advisory Committee Act (Pub. L. 92–463), notice is hereby given of a meeting of the Committee on Agency Organization and Personnel of the Administrative Conference of the United States, to be held at 9:30 a.m., Wednesday, April 16, 1980, in the library of the Administrative Conference, Suite 500, 2120 L Street, N.W., Washington, D.C.

The Committee will meet to further discuss a proposed recommendation regarding implementation of the Federal Advisory Committee Act. Attendance is open to the interested public, but limited to the space available. Persons wishing to attend should notify this office at least one day in advance. Members of the public may be permitted to present oral statements, if deemed appropriate by the Committee Chairman. Members of the public may also file a written statement with the Committee before, during, or after the meeting.

For further information concerning this meeting, contact Richard K. Berg (202–254–7020). Minutes of the meeting will be available upon request.

Stephen L. Babcock,

Executive Director.

March 31, 1980.

DEPARTMENT OF AGRICULTURE

Forest Service

Coronado National Forest Grazing Advisory Board; Meeting

The Coronado National Forest Grazing Advisory Board will meet at 10:00 a.m., May 20, 1980, at the Federal Building, Room 7X, 301 W. Congress, Tucson, Arizona. The purpose of this meeting is to discuss allotment management planning and the use of range betterment funds.

The meeting will be open to the public. Persons who wish to attend should notify Larry Allen, Coronado Supervisor's Office, telephone 602–792–6418. Written statements will be filed with the board before or after the meeting.

The board has established the following rule for public participation: Nonmembers are asked to withhold comments until the close of business.

K. R. Weissenborn,

Forest Supervisor.

BILLING CODE 3410–11–M

Soil Conservation Service

Bellefontaine High School Flood Prevention RC & D Measure, Ohio; Finding of No Significant Impact

AGENCY: Soil conservation Service, U.S. Department of Agriculture.

ACTION: Notice of a finding of no significant impact.

FOR FURTHER INFORMATION CONTACT: Mr. Robert R. Shaw, State Conservationist, Soil Conservation Service, 522 Federal Building, 200 North High Street, Columbus, Ohio 43215, telephone 614–469–6785.

NOTICE: Pursuant to Section 102(2)(C) of the National Environmental Policy Act of 1969; the Council on Environmental Quality Guidelines (40 CFR Part 1500); and the Soil Conservation Service Guidelines (7 CFR Part 650); the Soil Conservation Service, U.S. Department of Agriculture, gives notice that an environmental impact statement is not being prepared for the Bellefontaine High School Flood Prevention RC & D Measure, Logan County, Ohio.

The environmental assessment of this federally assisted action indicates that the project will not cause significant local, regional, or national impacts on the environment. As a result of these findings, Mr. Robert R. Shaw, State Conservationist, has determined that the preparation and review of an environmental impact statement are not needed for this project.

The measure concerns a plan for flood prevention. The planned works of improvement include construction of 450 feet of grassed waterway, 920 feet of subsurface drainage, 1 concrete catch basin, and 1 acre of critical area planting. Critical area planting will be applied to all areas disturbed during construction.

The Notice of a Finding of No Significant Impact (FNSI) has been forwarded to the Environmental Protection Agency. The basic data developed during the environmental assessment are on file and may be reviewed by contacting Mr. Robert R. Shaw, State Conservationist, Soil Conservation Service, 522 Federal Building, 200 North High Street, Columbus, Ohio 43215, telephone 614–469–6785. The FNSI has been sent to various Federal, State, and local agencies and interested parties. A limited number of copies of the FNSI are available to fill single copy requests at the above address.

Implementation of the proposal will not be initiated until 30 days after the date of this publication.

BILLING CODE 3410–16–M

Charleston Public School Critical Area Treatment RC & D Measure, Arkansas; Finding of No Significant Impact

AGENCY: Soil Conservation Service, U.S. Department of Agriculture.

ACTION: Notice of a finding of no significant impact.

FOR FURTHER INFORMATION CONTACT: Mr. M. J. Spears, State Conservationist, Soil Conservation Service, 5029 Federal Building, 700 West Capitol Avenue, Little Rock, Arkansas 72203, telephone 501–378–5445.

NOTICE: Pursuant to Section 102(2)(C) of the National Environmental Policy Act of 1969; the Council on Environmental Quality Guidelines (40 CFR Part 1500); and the Soil Conservation Service Guidelines (7 CFR Part 650); the Soil Conservation Service, U.S. Department of Agriculture, gives notice that an environmental impact statement is not being prepared for the Charleston Public

School Critical Area Treatment RC&D Measure, Franklin County, Arkansas.

The environmental assessment of this federally assisted action indicates that the project will not cause significant local, regional, or national impacts on the environment. As a result of these findings, Mr. M. J. Spears, State Conservationist, has determined that the preparation and review of an environmental impact statement are not needed for this project.

The measure concerns a plan for critical area treatment. The planned works of improvement include shaping, grading, sprigging, solid sodding, placement of topsoil, fertilizing, seeding, irrigation, and the installation of a diversion and riprap to reduce or control the critically eroding areas.

The Notice of a Finding of No Significant Impact (FNSI) has been forwarded to the Environmental Protection Agency. The basic data developed during the environmental assessment are on file and may be reviewed by contacting Mr. M. J. Spears, State Conservationist, Soil Conservation Service, 5029 Federal Building, 700 West Capitol Avenue, Little Rock, Arkansas 72203, telephone 501–378–5445. The FNSI has been sent to various Federal, State, and local agencies and interested parties. A limited number of copies of the FNSI are available to fill single copy requests at the above address.

Implementation of the proposal will not be initiated until 30 days after the date of this publication.

Dated: March 24, 1980.

Edward E. Thomas,

Assistant Administrator for Land Resources.

[FR Doc. 80–10113 Filed 4–2–80; 8:45 am]

BILLING CODE 3410–16–M

North Fork-Forked Deer River Watershed, Tennessee; Finding of No Significant Impact

AGENCY: Soil Conservation Service, U.S. Department of Agriculture.

ACTION: Notice of finding of no significant impact.

FOR FURTHER INFORMATION CONTACT: Mr. Donald C. Bivens, State Conservationist, Soil Conservation Service, 675 U.S. Courthouse, 801 Broadway Street, Nashville, Tennessee 37203, telephone number (615) 251–5471.

NOTICE: Pursuant to Section 102(2)(C) of the National Environmental Policy Act of 1969; the Council on Environmental Quality Guidelines (40 CFR Part 1500); and the Soil Conservation Service Guidelines (7 CFR Part 650); the Soil Conservation Service, U.S. Department of Agriculture, gives notice that an environmental impact statement is not being prepared for the land treatment to be accomplished in the North Fork-Forked Deer River Watershed, Gibson County, Tennessee.

The environmental evaluation of this federally-assisted action indicates that the proposed measures will not cause significant adverse local, regional, or national impacts on the environment. As a result of these findings, Mr. Donald C. Bevins, State Conservationist, has determined that the preparation and review of an environmental impact statement is not needed.

The proposed action involves the planning and application of conservation practices. These practices may include but are not limited to the following: contour cultivation, minimum tillage, terraces, grass waterways/pipe outlets, grass and tree plantings, wildlife upland habitat development and the use of shaping and sodding, grade stabilization, and debris basins to reduce or control critically eroding areas.

The finding of no significant impact has been forwarded to the Environmental Protection Agency. The basic data developed during the environmental evaluation and the environmental assessment are on file and may be reviewed by contacting Mr. Donald C. Bivens, State Conservationist, Soil Conservation Service, 675 U.S. Courthouse, 801 Broadway Street, Nashville, Tennessee 37203, telephone number (615) 251–5471.

The finding of no significant impact has been sent to interested Federal, state, and local agencies and other interested parties. A limited number of copies of the finding of no significant impact are available to fill single copy requests.

No administrative action on implementation of the proposal will be taken until May 5, 1980.

BILLING CODE 3410–16–M

Petrova Athletic Field RC & D Measure, New York; Finding of No Significant Impact

AGENCY: Soil Conservation Service, U.S. Department of Agriculture.

ACTION: Notice of a finding of no significant impact.

FOR FURTHER INFORMATION CONTACT: Mr. Paul A. Dodd, State Conservationist, Soil Conservation Service, Room 771 Federal Building, 100 South Clinton Street, Syracuse, New York 13260, telephone 315–423–5076.

NOTICE: Pursuant to Section 102(2)(C) of the National Environmental Policy Act of 1969; the Council on Environmental Quality Guidelines, (40 CFR Part 1500); and the Soil Conservation Service Guidelines (7 CFR Part 650); the Soil Conservation Service, U.S. Department of Agriculture, gives notice that an environmental impact statement is not being prepared for the Petrova Athletic Field RC & D Measure, Franklin County, New York.

The environmental assessment of this Federal action indicates that the project will not cause significant local, regional, or national impacts on the environment. As a result of these findings, Mr. Paul A. Dodd, State Conservationist, has determined that the preparation and review of an environmental impact statment are not needed for this project.

The measure concerns a plan for the adequate drainage of the Petrova Avenue Athletic Field. The plan includes a subsurface tile outlet system of approximately 4,325 feet. The system will outlet into the village of Saranac Lake storm drain.

The Notice of a Finding of No Significant Impact has been forwarded to the Environmental Protection Agency. The basic data developed during the environmental assessment are on file and may be reviewed by contacting Mr. Paul A. Dodd, State Conservationist, Soil Conservation Service, Room 771 Federal Building, 100 South Clinton Street, Syracuse, New York, 315–423–5076. The environmental assessment and the finding of no significant impact have been prepared and sent to various Federal, State and local agencies and interested parties. A limited number of copies of the finding of no significant impact are available to fill single copy requests at the above address.

Implementation of the proposal will not be initiated until 30 days after the date of this publication.

BILLING CODE 3410-16-M

Plum Creek Watershed, Texas; Finding of No Significant Impact

AGENCY: Soil Conservation Service, U.S. Department of Agriculture.

ACTION: Notice of finding of no significant impact.

FOR FURTHER INFORMATION CONTACT: Mr. George C. Marks, State Conservationist, Soil Conservation Service, W. R. Poage Federal Building, Temple, Texas 76501, telephone number (817) 774-1255.

NOTICE: Pursuant to Section 102(2)(C) of the National Environmental Policy Act of 1969; the Council on Environmental Quality Guidelines (40 CFR Part 1500); and the Soil Conservation Service Guidelines (7 CFR Part 650); the Soil Conservation Service, U.S. Department of Agriculture, gives notice that an environmental impact statement is not being prepared for critical area treatment in the Plum Creek Watershed project, Hays, Travis, and Caldwell Counties, Texas.

The environmental evaluation of this federally-assisted action indicates that the proposed measures will not cause significant adverse local, regional, or national impacts on the environment. As a result of these findings, Mr. George C. Marks, State Conservationist, has determined that the preparation and review of an environmental impact statement is not needed.

The proposed action involves the use of clearing, shaping, preparation of vegetation, fertilizing, vegetating, fencing, and construction of appurtenant grade stabilization structures such as pipe drops, drop inlets, formless concrete chutes, diversions, and dams to reduce or control critically eroding areas.

The finding of no significant impact has been forwarded to the Environmental Protection Agency. The basic data developed during the environmental evaluation and the environmental assessment are on file and may be reviewed by interested parties by contacting Mr. George C. Marks, State Conservationist, Soil Conservation Service, W. R. Poage Federal Building, Temple, Texas 76501, telephone number (817) 774-1255.

The finding of no significant impact has been sent to interested Federal, State, and local agencies and other interested parties. A limited number of copies of the finding of no significant impact are available to fill single copy requests at the above address.

No administrative action in implementation of the proposal will be taken until May 5, 1980.

BILLING CODE 3410-16-M

Upper Red Rock Creek Watershed, Okla.; Finding of No Significant Impact

AGENCY: Soil Conservation Service, U.S. Department of Agriculture.

ACTION: Notice of finding of no significant impact.

FOR FURTHER INFORMATION CONTACT: Mr. Roland R. Willis, State Conservationist, Soil Conservation Service, Agricultural Center Building, Stillwater, Oklahoma 74074, telephone number (405) 624-4360.

NOTICE: Pursuant to Section 102(2)(C) of the National Environmental Policy Act of 1969; the Council on Environmental Quality Guidelines (40 CFR Part 1500); and the Soil Conservation Service Guidelines (7 CFR Part 650); the Soil Conservation Service, U.S. Department of Agriculture, gives notice that an environmental impact statement is not being prepared for two floodwater retarding structures remaining to be built in the Upper Red Rock Creek Watershed project, Garfield County, Oklahoma.

The environmental assessment of this federally-assisted action indicates that the action will not cause significant impacts to human environment. As a result of these findings, Mr. Roland R. Willis, State Conservationist, has determined that the preparation and review of an environmental impact statement is not needed for this action.

Project action will involve the construction of two floodwater retarding structures.

The finding of no significant impact has been forwarded to the Environmental Protection Agency. The environmental assessment is on file and may be reviewed by the interested parties by contacting Mr. Roland R. Willis, State Conservationist, Soil Conservation Service, Agricultural Center Building, Farm Road and Brumley Street, Stillwater, Oklahoma 74074, telephone number (405) 624-4360. The finding of no significant impact has been sent to various Federal, State, and local agencies and interested parties. A limited number of copies of the finding of no significant impact are available to fill single copy requests at the above address.

No administrative action on implementation of the proposal will be taken until May 5, 1980.

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

Hawaiian Monk Seal in the Northwestern Hawaiian Islands; Public Meeting on Proposed Designation of Critical Habitat

AGENCY: National Marine Fisheries Service, National Oceanic and Atmospheric Administration, Department of Commerce.

ACTION: Notice of Public Meeting and Availability of a Draft Environmental Impact Statement.

SUMMARY: On February 7, 1980 the Environmental Protection Agency announced the availability of a draft environmental impact statement (DEIS) on the proposed designation of Critical Habitat for the Hawaiian Monk Seal in the Northwestern Hawaiian Islands and the beginning of the required 45-day review period. This DEIS is available for distribution at the locations listed below. A public meeting will be held on April 28, 1980 to discuss the proposed action. The comment period on the proposed designation of Critical Habitat will be extended unitl May 14, 1980 to allow sufficient time to submit comments on issues raised at the public meeting.

DATES: The public meeting will begin at 7:00 p.m. local time, Monday, April 28, 1980 in the State Senate Chamber, State Capital Building, Honolulu, Hawaii.

FOR FURTHER INFORMATION CONTACT: Mr. Doyle Gates, Administrator, Western Pacific Program Office, Southwest Region, National Marine Fisheries Service, NOAA, 2570 Dole Street, Honolulu, Hawaii 96812, Telephone: 808-946-2181.

AVAILABILITY OF THE DEIS:

Office of Marine Mammals and Endangered Species, National Marine Fisheries Service,

Washington, D.C. 20235, Telephone: 202–634–7471.

Western Pacific Program Office, Southwest Region, National Marine Fisheries Service, P.O. Box 3830, Honolulu, Hawaii 96812, Telephone: 808–946–2181.

BILLING CODE 3810–70–M

DEPARTMENT OF ENERGY

Economic Regulatory Administration

[EPA Cases Nos. 67023–9142–03, 04, 05–81]

Department of Defense (DOD) Naval Ordnance Station, Indian Head, Md.; Issuance of Proposed Prohibition Orders Pursuant to Sections 302 and 701 of the Powerplant and Industrial Fuel Use Act of 1978

The Economic Regulatory Administration (ERA) of the Department of Energy hereby gives notice pursuant to Section 701(b) of the Powerplant and Industrial Fuel Use Act of 1978 (FUA), 42 U.S.C. 8301 *et seq.*, of the issuance of the following proposed prohibition orders which would prohibit the installations named below from burning natural gas or petroleum as their primary energy source.

Proposed Prohibition Orders

Pursuant to the authorities granted it by Section 302(a) [1] of FUA, ERA issues these proposed prohibition orders to the following installations owned by the United States,

ERA No.	Facility	Installation	Size	Location
67023–9142–03–81	DOD–Naval	3	187 MMBTU/Hr	Indian Head, Md.
67023–9142–04–81	Ordnance	4	187 MMBTU/Hr	
67023–9142–05–81	Station-Goddard power plant	5	187 MMBTU/Hr	

Statement of Basis and Rationale for Proposed Prohibition Orders

ERA has issued regulations applicable to existing facilities 10 CFR Part 506 (Regulations), to implement the prohibitions contained in Section 302(a) of Title III of FUA. Section 506.2 of the Regulations sets forth the basis upon which ERA will propose to prohibit by order the use of natural gas or petroleum as a primary energy source by an installation where ERA finds that the installation has or previously had the technical capability to use an alternate fuel as a primary energy source.

According to the most recent fuel statistics available to ERA, Goddard 3,4, and 5 consume 680 barrels of oil daily (250,000 barrels annually). Therefore, ERA anticipates that approximately this quantity will be displaced by the conversion of Goddard 3,4, and 5 to coal or another alternate fuel as their primary energy source.

Finding of Technical Capability

In accordance with Section 302(a) of Title III of FUA, these proposed orders are based on a finding by ERA that Goddard 3,4, and 5 have or previously had the technical capability to use an alternate fuel (coal) as a primary energy source. This finding is based upon the following facts:

The Naval Ordnance Station, Indian Head, Maryland reported to DOD on Form 1391c, dated February 17, 1978 (Items 5(b) and 6) that Goddard 3,4, and 5 were designed and constructed for dual fuel firing with pulverized coal or No. 6 oil, and burned coal until 1970 at which time they commenced operations with fuel oil as the primary fuel.

The technical capability finding is made in accordance with the requirements of § 506.2 of the Regulations, taking into consideration the ability of the installations, from the point of fuel intake, to physically sustain combustion of coal and maintain heat transfer as evidenced by the burning of coal at Goddard 3,4, and 5 prior to 1971. This finding also recognizes, in accordance with § 506.2, that Goddard 3,4, and 5 are capable of burning coal notwithstanding the fact that minor adjustments may need to be made before the units may burn an alternate fuel (coal) as a primary energy source, or that pollution control equipment may be required to meet air quality requirements.

Other Required Findings

Section 302(a) of FUA states that prior to the issuance of final prohibition orders ERA must find that (1) the installations have the technical capability to use coal or another alternate fuel as a primary energy source, or they could have such capability without (A) substantial modification of the installations or (B) substantial reduction in the rated capacity of the installations; and (2) it is financially feasible for DOD-Naval Ordnance Station to use coal or another alternate fuel as the primary energy source in Goddard 3,4, and 5.

Proposed Prohibition Under Title III of FUA

Subject to the other required findings that ERA must make, ERA hereby proposes to prohibit Goddard 3,4, and 5 from burning petroleum or natural gas as their primary energy source.

Description of Prohibition Order Proceedings

Pursuant to Section 302 of FUA, ERA has promulgated regulations applicable to the issuance of prohibition orders to existing facilities, a summary of which follows:

(1) ERA has performed its initial information gathering with respect to the question of technical capability to burn alternate fuels (coal) and has informed DOD–Naval Ordnance Station that it is considering issuance of proposed prohibition orders to Goddard 3,4, and 5. ERA has also had informal discussions with DOD–Naval Ordnance Station concerning the issuance of the proposed prohibition orders.

(2) ERA has made a finding that Goddard 3,4 and 5 have or previously had the technical capability of using coal as their primary energy source. ERA is publishing this finding and proposed prohibition orders in the **Federal Register** as required by Section 701(b) of FUA. In accordance with Section 302(a) of FUA, the proposed

[1] Section 403(a)(1) of FUA provides that a Federal agency operating an installation must comply with FUA's provisions to the same extent as would be the case if the installation were owned or operated by a person in the private sector.

prohibition orders are not required to contain, at this point in the proceeding, the other pertinent findings that ERA must make before final prohibition orders can be issued. These are (1) that the installations have the technical capability to use coal or another alternate fuel as their primary energy source, or they could have such capability without (A) substantial physical modification of the installations, or (B) substantial reduction in the rated capacity of the installations and (2) that it is financially feasible for DOD–Naval Ordnance Station to use coal or another alternate fuel as the primary energy source in Goddard 3,4, and 5.

(3) In accordance with § 501.52(b)(3) of the Regulations, a public comment period of at least three months is to commence after publication of the proposed prohibition orders, during which period DOD–Naval Ordnance Station will be given an opportunity to challenge ERA's initial finding of a technical capability contained in these proposed prohibition orders. During this three month comment period, under § 501.52(b)(3) of the regulations, DOD–Naval Ordance Station is required to furnish ERA with such additional evidence as is necessary to enable ERA to make the other statutory findings set forth above, which are required to be made by ERA prior to issuance of final prohibition orders. DOD–Naval Ordnance Station will also be required during this period, to identify, but not to demonstrate its entitlement to, any exemptions for which Goddard 3,4 and 5 may qualify.

(4) Subsequent to the end of the three month public comment period, ERA will issue a notice of whether ERA intends to proceed with the prohibition order proceeding. Within three months of the issuance of the notice of intention to proceed with the prohibition order, the owner or operator of the installations that may be subject to the orders may demonstrate prior to issuance of final prohibition orders that the installations would qualify for exemptions if the prohibition had been established by rule.

(5) Subsequent to the end of the second three month period, ERA will, if it intends to issue final prohibition orders, prepare and publish a notice of availability of the tentative staff decision.

(6) Under the provisions of Section 701(d) of FUA, any interested person may request a public hearing on the proposed prohibition orders. Interested persons wishing a hearing must request a hearing within 45 days after publication of the notice of availability of the tentative staff decision. If a hearing is requested, ERA shall provide interested persons with an opportunity to present oral data, views, and arguments at a public hearing held in accordance with Subpart C of 10 CFR Part 501.

(7) At the hearing, if any, interested persons will have the opportunity to question the parties about ERA's proposed orders and tentative staff decision, the DOD–Naval Ordnance Station showing on exemptions and rebuttal of ERA's proposed orders, and ERA's rebuttal to any showing of potential qualification for exemption.

(8) After the hearing, if any, and the second three month comment period, ERA shall determine whether final prohibition orders will be issued, based upon a review of the entire adminstrative record. Copies of final prohibition orders, if issued, together with a summary of the basis therefor, will be published in the **Federal Register.** Such orders shall not take effect earlier than 60 days after publication.

Comment and Public Hearing Procedures

ERA hereby also gives notice of the opportunity to submit written comments, views, and arguments by interested persons regarding these proposed prohibition orders. Comments need not be limited to ERA's technical capability finding, but may include a discussion of all three statutory findings.

The initial comment period shall remain open for a period of three months after publication of the proposed orders in the **Federal Register** unless reduced at the request of the recipient of the proposed orders pursuant to 10 CFR 501.52(b)(8). Notice of any change during the time for public comment will be published in the **Federal Register.** Comments should make reference to the docket numbers set forth in this notice and proposed orders. Comments should address the adequacy and validity of the findings and any other aspects or impacts of the proposed prohibition orders believed to be relevant. Written comments on the proposed prohibition orders should be directed to Public Hearing Management (Case Nos. 67023–9142–03,04,05–81), U.S. Department of Energy, Box 4629, Room 3214, 2000 M Street, N.W., Washington, D.C. 20461, and should be received before 4:30 p.m. on May 14, 1980.

In accordance with 10 CFR 501.34, any interested person may request a public hearing on the proposed orders. The request must include a description of the person's interest in the proposed prohibition orders, an outline of the anticipated content of the presentation to be made at the public hearing, and an address and telephone number where the person requesting the public hearing may be reached.

Comments and other documents submitted to DOE Public Hearing Management should be identified on the outside of the envelope in which they are transmitted and on the document itself with the designation "Proposed Prohibition Orders for DOD–Naval Ordnance Station, Indian Head, Maryland." Fifteen copies should be submitted. All written comments, all oral presentations, and all other relevant information submitted to or available to ERA will be considered by ERA. Any information or data considered to be confidential by the person furnishing it must also be so identified in writing and filed in accordance with 10 CFR 501.7(f).

ERA reserves the right to determine the confidential status of the information or data and to treat it in accordance with that determination.

BILLING CODE 6450–01–M

[ERA Docket No. 80–CERT–010]

Nebraska Municipal Power Pool; Certification of Eligible Use of Natural Gas To Displace Fuel Oil

The Nebraska Municipal Power Pool (NMPP), 1335 L Street, Lincoln, Nebraska 68508, acting on behalf of The Board of Public Works of the City of Auburn, Nebraska; The Board of Public Works of the City of Fairbury,

Nebraska; The City Utilities Department of the City of Wahoo, Nebraska; The City Utilities Department of the City of West Point, Nebraska; The City Utilities Department of the City of Crete, Nebraska; The Board of Public Works of the City of Tecumseh, Nebraska; and the Village Board of Trustees of the Village of Pender, Nebraska, filed an application for certification of an eligible use of natural gas to displace fuel oil at the above member's seven municipal electric generating facilities in Nebraska, with the Administrator of the Economic Regulatory Administration (ERA) pursuant to 10 CFR Part 595 on January 3, 1980. Notice of that application was published in the **Federal Register** (45 FR 15612, March 11, 1980) and an opportunity for public comment was provided for a period of ten (10) calendar days from the date of publication. No comments were received.

The ERA has carefully reviewed NMPP's application in accordance with 10 CFR Part 595 and the policy considerations expressed in the Final Rulemaking Regarding Procedures for Certification of the Use of Natural Gas to Displace Fuel Oil (44 FR 47920, August 16, 1979). The ERA has determined that NMPP's application satisfies the criteria enumerated in 10 CFR Part 595, and, therefore, has granted the certification and transmitted that certification to the Federal Energy Regulatory Commission. A copy of the transmittal letter and the actual certification are appended to this notice.

Issued in Washington, D.C., on March 26, 1980.

Paul T. Burke,

Deputy Assistant Administrator, Office of Petroleum Operations, Economic Regulatory Administration.

Department of Energy
Washington, D.C. 20461
March 26, 1980.

Re: ERA Certification of Eligible Use ERA Docket No. 80–CERT–010, Nebraska Municipal Power Pool.

Mr. Kenneth F. Plumb,
Secretary, Federal Energy Regulatory Commission, 825 North Capitol Street, N.E., Washington, D.C.

Dear Mr. Plumb: Pursuant to the provisions of 10 CFR Part 595, I am hereby transmitting to the Commission the enclosed certification of an eligible use of natural gas to displace fuel oil. This certification is required by the Commission as a precondition to interstate transportation of fuel oil displacement gas in accordance with the authorizing procedures in 18 CFR Part 284, Subpart F. As noted in the certificate, it is effective for one year from the date of issuance, unless a shorter period of time is required by 18 CFR Part 284, Subpart F. A copy of the enclosed certification is also being published in the **Federal Register** and provided to the applicant.

Should the Commission have any further questions, please contact Mr. Finn K. Neilsen, Director, Import/Export Division, Economic Regulatory Administration, 2000 M Street, N.W., Room 4126, Washington, D.C. 20461, telephone (202) 653–3859. All correspondence and inquiries regarding this certification should reference ERA Docket No. 80–CERT–010.

Sincerely,

Paul T. Burke,

Deputy Assistant Administrator, Office of Petroleum Operations, Economic Regulatory Administration.

Certification by the Economic Regulatory Administration to the Federal Energy Regulatory Commission of the Use of Natural Gas for Fuel Oil Displacement by The Nebraska Municipal Power Pool

ERA Docket No. 79–CERT–110

Application for Certification

Pursuant to 10 CFR Part 595, Nebraska Municipal Power Pool (NMPP) filed an application for certification of an eligible use of approximately 7,080 Mcf per day of natural gas at the electric generating facilities of seven of its members with the Administrator of the Economic Regulatory Administration (ERA) on January 3, 1980. Those members are the Board of Public Works of the City of Auburn, Nebraska; The Board of Public Works of the City of Fairbury, Nebraska; The City Utilities Department of the City of Wahoo, Nebraska; the City Utilities Department of the City of West Point, Nebraska; The City Utilities Department of the City of Crete, Nebraska; The Board of Public Works of the City of Tecumseh, Nebraska; and the Village Board of Trustees of the Village of Pender, Nebraska. The application states that the eligible seller of the gas in Esperanza Transmission Company (Esperanza) and that the gas will be transported by the Northern Natural Gas Company and then local distribution companies will make delivery to the various facilities. The application and supplemental information indicate that the use of this natural gas is estimated to displace 35,000 gallons of No. 2 fuel oil (0.3 percent sulfur) per day at six of the electric generating facilities and 10,050 gallons of No. 6 fuel oil (0.5 percent sulfur) at the Fairbury facility. The application also indicates that neither the gas nor the displaced fuel oil will be used to displace coal in the applicant's facilities.

Certification

Based upon a review of the information contained in the application, as well as other information available to ERA, the ERA hereby certifies, puruanat to 10 CFR Part 595, that the use of approximately 7,080 Mcf of natural gas per day at the electric generating facilities of the NMPP members listed above purchased from Esperanza is an eligible use of gas within the meaning of 10 CFR Part 595.

Effective Date

This certification is effective upon the date of issuance, and expires one year from that date, unless a shorter period of time is required by 18 CFR Part 284, subpart F. It is effective during this period of time for the use of up to the same certified volume of natural gas at the same facilities purchased from the same eligible seller.

Issued in Washington, D.C., on March 26, 1980.

Paul T. Burke,

Deputy Assistant Administrator, Office of Petroleum Operations, Economic Regulatory Administration.

[FR Doc. 80-10118 Filed 4-2-80; 8:45 am]

BILLING CODE 6450-01-M

[ERA Cases Nos. 52007-1626-01-82; 52007-1626-02-82 and 52007-1626-03-82]

New England Electric System, Westborough, Mass.; Issuance of Proposed Prohibition Orders Pursuant to Sections 301 and 701 of the Powerplant and Industrial Fuel Use Act of 1978

The Economic Regulatory Administration (ERA) of the Department of Energy (DOE) hereby gives notice pursuant to Section 701(b) of the Powerplant and Industrial Fuel Use Act of 1978 (FUA), 42 U.S.C. 8301 *et seq.*, of the issuance of the following proposed prohibition orders which would prohibit the powerplants named below (Powerplants) from burning natural gas or petroleum as their primary energy source.

Proposed Prohibition Orders

Pursuant to the authority granted it by Section 301(b) of FUA, ERA issues these proposed prohibition orders to the following Powerplants owned by the New England Electric System (Utility).

ERA No.	Generating station	Powerplant No.	MW	Location
52007-1626-01-82	Salem Harbor	01	82	Salem, Massachusetts.
52007-1626-02-82	do	02	82	Do.
52007-1626-03-82	do	03	170	Do.

Statement of Basis and Rationale for Proposed Prohibition Orders

ERA has issued regulations applicable to existing facilities, 10 CFR Part 504 (Regulations), to implement the prohibitions contained in Section 301(b) of Title III of FUA. Section 504.5 of the Regulations sets forth the basis upon which ERA will propose to prohibit by order the use of natural gas or petroleum as a primary energy source by a powerplant, where ERA finds that the

powerplant has or previously had the technical capability to use an alternate fuel as a primary energy source.

The Utility reported to the Federal Energy Regulatory Commission (FPC Form 67), for the year ending December 31, 1978, that Salem Harbor Powerplant Nos. 1, 2 and 3 burned an average of 7,280 barrels of oil per day (2,660,000 barrels annually). The potential oil displacement in converting Salem Harbor Powerplant Nos. 1, 2 and 3 to an alternate fuel (coal), assuming a capacity factor of 70 percent, is 8,900 barrels of oil per day (3,250,000 barrels annually).

Finding of Technical Capability

In accordance with Section 301(b) of Title III of FUA, these proposed orders are based on a finding by ERA that the Utility's powerplants have or previously had the technical capability to use an alternate fuel (coal) as a primary energy source. This finding is based upon engineering drawings furnished by the Utility to ERA entitled "Salem Harbor Station Power Plant Cross Section—Unit No. 1 and 2" and "Salem Harbor Station Power Plant Cross Section—Unit No. 3," Drawing Numbers H–18264 and H–18265, both dated February 1958. The engineering drawings, as well as a site visit made by the staff of ERA on February 21, 1980, confirm that the powerplants are technically capable of burning coal.

The technical capability finding is made in accordance with the requirements of § 504.5(d) of the Regulations, taking in consideration the ability of the Powerplants, from the point of fuel intake, to physically sustain combustion of coal and maintain heat transfer. This finding also recognizes, in accordance with § 504.5(d), that the Powerplants are capable of burning coal, notwithstanding the fact that minor adjustments must be made to the Powerplants before they may burn an alternate fuel (coal) as their primary energy source or that additional pollution control equipment may be necessary to meet air quality requirements.

Other Required Findings

Section 301(b) of FUA requires that prior to the issuance of a final prohibition order ERA must also find that (1) the powerplant has the technical capability to use coal or another alternate fuel as a primary energy source, or it could have such capability without (A) substantial physical modification of the powerplant or (B) substantial reduction in the rated capacity of the powerplant; and (2) it is financially feasible for the powerplant to use coal or another alternate fuel as a primary energy source in such powerplant.

Proposed Prohibition Orders Under Title III of FUA

Subject to the other required findings that ERA must make, ERA hereby proposes to prohibit the Powerplants from burning petroleum or natural gas as their primary energy source.

Description of Prohibition Order Proceedings

Pursuant to Section 301 of FUA, ERA has promulgated Regulations applicable to the issuance of prohibition orders to existing facilities, a summary of which follows:

(1) ERA must initially gather information with respect to the question of technical capability of a powerplant to burn an alternate fuel as its primary energy source. ERA may convene a conference with a utility in accordance with Section 501.32 of the Regulations. If the powerplant has or previously had such capability the utility will be informed that ERA is considering issuance of a proposed prohibition order. In this case, ERA has made the required initial finding for the Powerplants and informed the Utility accordingly.

(2) If a decision is made to issue a proposed prohibition order, ERA must publish its technical capability finding and such proposed prohibition order in the **Federal Register** as required by Section 701(b) of FUA. ERA, having made the required decision in this case, herein publishes the required technical capability finding and proposed prohibition orders. In accordance with Section 301(b) of FUA, a proposed prohibition order is not required to contain, at this point in the proceeding, the other required findings that ERA must make before a final prohibition order can be issued.

(3) In accordance with 501.51(b)(3) of the Regulations, a public comment period of at least three months is to commence after publication of a proposed prohibition order, during which period the utility will be given an opportunity to challenge ERA's initial finding of technical capability contained in a proposed prohibition order. During this three month comment period, the utility is required to furnish ERA with such additional evidence as is necessary to enable ERA to make the other statutory findings which are required to be made by ERA prior to issuance of a final prohibition order. The utility will also be required, during this period, to identify, but not to demonstrate its entitlement to, any exemptions for which the powerplants may qualify.

(4) Subsequent to the end of the initial three month comment period, ERA will issue a notice of whether it intends to proceed with the proposed prohibition orders. Within three months of the issuance of the notice of intention to proceed with the proposed prohibition orders, the owner or operator of the powerplants that may be subject to the proposed prohibition orders may demonstrate that the powerplant would qualify for an exemption if the proposed prohibition order had been established by rule.

(5) Subsequent to the end of the second three month period, ERA will, if it intends to issue the final prohibition orders, prepare and publish a notice of availability of the tentative staff decision.

(6) Under the provisions of Section 701(d) of FUA, any interested person may request a public hearing on the proposed prohibition orders. Under the Regulations, interested persons wishing a hearing must make their request in writing no later than 45 days after publication of the notice of availability of the tentative staff decision. If a hearing is requested, ERA shall provide interested persons with an opportunity to present oral data, views and arguments at a public hearing held in accordance with Subpart C of 10 CFR Part 501.

(7) At the hearing, if any, interested persons will have the opportunity to question the parties about ERA's proposed prohibition orders and tentative staff decision, the utility's showing on any exemptions and rebuttal of ERA's proposed prohibition orders, and ERA's rebuttal to any showing of potential qualification for exemption.

(8) After the hearing, if any, and the second three month comment period, ERA shall determine whether the final prohibition orders will be issued, based upon ERA's review of the entire administrative record. The final prohibition orders, if issued, together with a summary of the basis therefor, will be published in the **Federal Register**. Such orders shall not take effect earlier than sixty days after publication.

COMMENT AND PUBLIC HEARING PROCEDURES

ERA hereby also gives notice of the opportunity to submit written comments, views, and arguments by interested persons regarding these proposed prohibition orders. Comments need not be limited to ERA's technical capability finding, but may include a discussion of all three statutory findings.

The initial comment period shall remain open for a period of three months after publication of these proposed orders in the **Federal Register**, unless reduced at the request of the recipient of the proposed prohibition orders pursuant to 10 CFR Part 501.51(b)(8). Notice of any such change during the time for public comment will be published in the **Federal Register.** Comments should make reference to the docket numbers set forth in this notice and proposed prohibition orders. Comments should address the adequacy and validity of the finding and any other aspects or impacts of the proposed prohibition orders believed to be relevant.

Written comments on the proposed prohibition orders should be directed to Public Hearing Management (Case Nos. 52007–1626–01–82, 52007–1626–02–82, and 52007–1626–03–82), U.S. Department of Energy, Box 4629, Room 3214, 2000 M Street, N.W., Washington, D.C. 20461, and should be received before 4:30 p.m. ninety days after the date of publication of this notice in the **Federal Register.** (July 2, 1980)

In accordance with 10 CFR 501.34, any interested person may request a public hearing on the proposed prohibition orders. The request must include a description of the person's interest in the proposed prohibition orders, an outline of the anticipated content of the presentation to be made at the public hearing, and an address and telephone number where the person requesting the public hearing may be reached.

Comments and other documents submitted to DOE Public Hearing Management should be identified on the outside of the envelope in which they are transmitted and on the document itself with the designation "Proposed Prohibition Orders for the Salem Harbor Powerplant Nos. 1, 2 and 3." Fifteen copies should be submitted. All written comments, all oral presentations, and all other relevant information submitted to or available to ERA will be considered by ERA. Any information or data considered to be confidential by the person furnishing it must be so identified in writing in accordance with 10 CFR 303.9(f). ERA reserves the right to determine the confidential status of the information or data and to treat it in accordance with that determination.

BILLING CODE 6450–01–M

Olin Corp.; Final Action on Consent Order

AGENCY: Economic Regulatory Administration, Department of Energy.

ACTION: Notice of final action taken.

SUMMARY: The Economic Regulatory Administration (ERA) of the Department of Energy (DOE) announces final action to accept a Consent Order after consideration of comments received from the public.

DATE: Effective Date: April 3, 1980.

FOR FURTHER INFORMATION CONTACT: Charles L. Croxton, Office of Enforcement, Economic Regulatory Administration, Department of Energy, 2000 M Street, N.W., Room 5108, Washington, D.C. 20461 (Telephone: 202/653–3541)

SUPPLEMENTARY INFORMATION: On February 21, 1980, the Office of Enforcement of the ERA published Notice of a Consent Order which has been executed between Olin Corporation and DOE. With that Notice, and in accordance with 10 CFR § 205.199J(c), the Office of Enforcement invited interested persons to comment on the Consent Order. A press release was issued simultaneously, in conformity with 10 CFR § 205.199J(c). Under the terms of 10 CFR § 205.199J(c), no Consent Order involving sums in excess of $500,000 shall become effective until the DOE publishes Notice of its execution and solicits and considers public comments with respect to its terms. Pursuant to 10 CFR § 205.199J, the Office of Enforcement of the ERA hereby gives Notice of final action taken on the Consent Order.

I. COMMENTS RECEIVED

No comments were received with respect to the terms of the Consent Order.

II. DETERMINATION

The Office of Enforcement of the ERA has determined that the refund procedures as provided in the Consent Order are appropriate under the circumstances of this case.

The Office of Enforcement has concluded that the Consent Order as executed between DOE and Olin Corporation is an appropriate resolution of the compliance proceedings described in the Notice published on February 21, 1980, and hereby gives Notice that the Consent Order is made effective upon publication in the **Federal Register.**

Issued in Washington, D.C. on this 28 day of March, 1980.

Wayne W. Porter,

Deputy Director, Enforcement Program Operations Division, Economic Regulatory Administration.

[FR Doc. 80–10117 Filed 4–2–80; 8:45 am]

BILLING CODE 6450–01–M

Office of Assistant Secretary for International Affairs

Proposed Subsequent Arrangements

Pursuant to section 131 of the Atomic Energy Act of 1954, as amended (42 U.S.C. 2160) notice is hereby given of proposed "subsequent arrangements."

The subsequent arrangements to be carried out involve the approval of the following contracts for furnishing source material to Poland:

Contract Number S–IA–102, 40.5 grams of normal uranium as ore, and 5.9 grams of thorium as monazite sand, to be used to determine uranium and thorium contained in industrial byproducts for environmental protection purposes.

Contract Number S–IA–103, 36.3 grams of normal uranium as ore, and 17.5 grams of thorium as ore, to be used for preparation of standards.

These materials will be exported pursuant to general licenses issued by the Nuclear Regulatory Commission (10 CFR section 110.23).

In accordance with section 131 of the Atomic Energy Act of 1954, as amended, it has been determined that the furnishing of the nuclear material will not be inimical to the common defense and security.

These subsequent arrangements will take effect no sooner than April 18, 1980.

For the Department of Energy.

Dated: March 28, 1980.

Harold D. Bengelsdorf,

Director for Nuclear Affairs, International Nuclear and Technical Programs.

[FR Doc. 80–10115 Filed 4–2–80; 8:45 am]

BILLING CODE 6450–01–M

Proposed Subsequent Arrangement

Pursuant to section 131 of the Atomic Energy of 1954, as amended (42 U.S.C. 2160) notice is hereby given of a proposed "subsequent arrangement."

The subsequent arrangement to be carried out involves the approval of Contract Number WC–IA–108 for the furnishing of the following source and by-product material to Egypt: tracer solutions containing 10 picocuries each of U–238 plus U–234, U–232, Radium 226, Polonium–210, and natural thorium to be used at the High Institute of public health for cross-calibration of measurement equipment. These materials will be exported pursuant to general licenses issued by the Nuclear Regulatory Commission (10 CFR 10.23 and 110.24).

In accordance with section 131 of the Atomic Energy Act of 1954, as amended, it has been determined that the furnishing of the nuclear material will not be inimical to the common defense and security.

This subsequent arrangement will take effect no sooner than April 15, 1980.

For the Department of Energy.

Dated: March 28, 1980.

Harold D. Bengelsdorf,

Director for Nuclear Affairs, International Nuclear and Technical Programs.

BILLING CODE 6450–01–M

EXECUTIVE OFFICE OF THE PRESIDENT

Office of Administration

Privacy Act of 1974; Systems of Records

Pursuant to the Privacy Act of 1974 (Pub. L. 93–579, 5 U.S.C. 552a), the Office of Administration hereby publishes for comment its systems of records [1] subject to the Privacy Act.

The Office of Administration was established under Reorganization Plan No. 1 and Executive Order 12028, and began operations January 1, 1978. These systems of records were already in existence in other Executive Office of the President agencies prior to the effective date of the Privacy Act (September 27, 1975), and transferred to the Office of Administration upon its establishment. A waiver of the 60-day advance notice requirement has been requested from the Director, Office of Management and Budget. Notice of these systems of records has been filed with the Speaker of the House, the President of the Senate and the Office of Management and Budget, as required by 5 U.S.C. 552a(o).

Comments on these systems of records should be submitted in writing on or before May 5, 1980, to the Deputy Director, Office of Administration, Old Executive Office Building, Room 200, 17th and Pennsylvania Ave, Washington, D.C. 20503. The systems of records will become effective on May 5, 1980, unless the Office of Administration publishes notice to the contrary.

Sarah T. Kadec,

Deputy Director.

Project Tracking System

OA/EOP/01

SYSTEM NAME:

Payroll Records.

SYSTEM LOCATION:

Office of Administration, New Executive Office Building, 726 Jackson Place, N.W., Washington, D.C. and at the Department of Treasury, U.S. Old Mint Data Center Division, 88 5th Street, San Francisco, California (contractor facility).

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

All EOP employees payrolled using the Department of the Treasury Payroll/Personnel Information System (TPPIS), effective May 7, 1978. Records on employees of the White House Office are not subject to the Privacy Act; however, these records are maintained in the same manner as those of other EOP agencies.

CATEGORIES OF RECORDS IN THE SYSTEM:

Individual name, social security number, age, sex, minority group designation, type of appointment, tenure, employment status, grade, step, salary, time worked and on leave, tax withholdings, other deductions, allotments to financial institutions, and other payroll-related items.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

5 U.S.C. 301, 31 U.S.C. 66a, 44 U.S.C. 3109, 3309.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

1. To generate the payroll for EOP agencies and provide necessary payroll information for agency financial management and accounting.

2. To furnish required payroll information to Federal, State, and local government taxing authorities.

3. To provide input to management information systems, budget and accounting systems, and for required statistical and financial reports to the Office of Personnel Management, the General Accounting Office, Department of the Treasury, and Congress.

4. To provide reports and/or to respond to requests for statistical information necessary for the fulfillment of programs authorized by statute or executive order (the system manager shall delete personal identifying information prior to releasing the records to ensure the individual's anonymity).

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

The Master File is maintained on disk and magnetic tape at the contractor's facility in San Francisco. Paper records and other magnetic tape records are stored in files in the Office of Administration payroll office and information services offices.

RETRIEVABILITY:

Records are retrieved by name and social security number by EOP employing agency.

SAFEGUARDS:

Records are maintained in locked file cabinets or limited access areas under personal surveillance during working hours and in locked rooms at other times. Master records on disk and computer tape are under the program control of officials at the Department of Treasury computer facility.

RETENTION AND DISPOSAL:

Records are maintained in the Office of Administration payroll office and the contractor's computer facility as long as the individual is employed at EOP. When the employee separates from the EOP, the records are transferred to the National Personnel Records Center in St. Louis, Missouri, where they are retained for 56 years and then destroyed in accordance with FPMR 101–1.14. Payroll records subject to General Accounting Office audit are retained until completion of the audit.

SYSTEM MANAGER(S) AND ADDRESS:

Assistant Director for Financial Management, Office of Administration, New Executive Office Building, 726 Jackson Place, N.W., Washington, D.C., 20503.

NOTIFICATION PROCEDURE:

Contact Deputy Director, Office of Administration, 726 Jackson Place NW., Washington, D.C. 20503.

RECORD ACCESS PROCEDURES:

Same as above.

CONTESTING RECORD PROCEDURES:

Same as above.

RECORD SOURCE CATEGORIES:

Individuals on whom records are maintained. Additional information is added from payroll transactions.

SYSTEMS EXEMPTED FROM CERTAIN PROVISIONS OF THE ACT:

None.

OA/EOP/02

SYSTEM NAME:

Travel records.

SYSTEM LOCATION:

Office of Administration, New Executive Office Building, 726 Jackson Place, N.W., Washington, D.C. 20503.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

Employees of EOP and other authorized individuals who travel at government expense on official business for EOP agencies. Records in this system on employees of the White House Office are not subject to the Privacy Act; however, they are maintained in the same manner as those of other EOP agencies.

CATEGORIES OF RECORDS IN THE SYSTEM:

Approved travel authorizations, requests for travel advances, vouchers submitted by individuals, memorandums of approval for special conveyances or actual expenses in lieu of per diem, and receipts required by Federal Travel Regulations (FPMR 101–7).

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

31 U.S.C. 66a, 44 U.S.C. 3101, 3102, 3309, and General Accounting Office and General Services Administration policy and procedures.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND PURPOSES OF SUCH USES:

1. To document authorization and reimbursement for official travel of individuals.

2. To furnish financial and statistical information to officers and employees of EOP agencies for performance of their official duties.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

Records for the current and preceding two fiscal years are filed in cabinets in the accounting office. Other records are stored in the Federal Records Center.

RETRIEVABILITY:

Records are retrieved by individual name within each EOP agency and by fiscal year.

SAFEGUARDS:

Records are maintained in file cabinets under staff surveillance during working hours and in a locked room at other times.

RETENTION AND DISPOSAL:

Records are maintained in conformity with the audit schedule of the General Accounting Office and the requirements of the General Services Administation. Non-current records are destroyed after 3 years.

SYSTEM MANAGER(S) AND ADDRESS:

Assistant Director for Financial Management, Office of Administration, New Executive Office Building, 726 Jackson Place, N.W., Washington, D.C. 20503.

NOTIFICATION PROCEDURE:

Contact Deputy Director, Office of Administration, 726 Jackson Place, NW., Washington, D.C. 20503.

RECORD ACCESS PROCEDURES:

Same as above.

CONTESTING RECORD PROCEDURES:

Same as above.

RECORD SOURCE CATEGORIES:

Content of the record is obtained from the individual to whom the information pertains. Additional information may be added by travel office staff as a result of processing and auditing the claim for reimbursement.

SYSTEMS EXEMPTED FROM CERTAIN PROVISIONS OF THE ACT:

None.

OA/EOP/03

SYSTEM NAME:

Library Circulation Records.

SYSTEM LOCATION:

Executive Office of the President Library, New Executive Office Building, 726 Jackson Place, N.W. Washington, D.C. 20503.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

Employees of EOP and other authorized individuals who have borrowed materials from the Library.

CATEGORIES OF RECORDS IN THE SYSTEM:

Titles and other identifying data on materials borrowed from the Library; room number, agency and sub-organization, and telephone number of the borrower; and the scheduled return date for each item borrowed.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

Federal Property and Administrative Services Act, Title II, Sec. 202(b)(1), 40 U.S.C. 483(b)(1).

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND PURPOSES OF SUCH USES:

To locate Library materials in circulation, and to control and inventory Library materials loaned. Disclosure is limited to Library staff and officers and other employees of EOP agencies in connection with the performance of official duties.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

These records are maintained on magnetic tape/disk and periodically in hard copy for instant reference at the Library circulation desk.

RETRIEVABILITY:

Records are arranged alphabetically by the last name of the borrower, by title of item borrowed, by organization employing the borrower, and by order of input into the system.

SAFEGUARDS:

Hard copy records are under personal surveillance by Library staff during working hours and in a locked area at other times. The master records on magnetic tape/disk are under the program control of Office of Administration data processing officials.

RETENTION AND DISPOSAL:

Records are retained on individual Library loans only until the material is returned, and then destroyed.

SYSTEM MANAGER(S) AND ADDRESS:

Assistant Director, for Information Management and Services, Office of Administration, New Executive Office Building, 726 Jackson Place NW., Washington, D.C. 20503.

NOTIFICATION PROCEDURE:

Contact Deputy Director, Office of Administration, 726 Jackson Place NW., Washington, D.C. 20503.

RECORD ACCESS PROCEDURES:

Same as above.

CONTESTING RECORD PROCEDURES:

Same as above.

RECORD SOURCE CATEGORIES:

Information is obtained from individual who borrows materials and

from physical examination of materials borrowed.

SYSTEMS EXEMPTED FROM CERTAIN PROVISIONS OF THE ACT:

None.

OA/EOP/04

SYSTEM NAME:

Researcher Request Records.

SYSTEM LOCATION:

Office of Administration, New Executive Building, 726 Jackson Place, NW., Washington, D.C. 20503.

CATEGORIES OF RECORDS COVERED BY THE SYSTEM:

Initial letter submitted by individuals who ask to examine official records of EOP agencies (except those records of the President, the White House Office, and the Office of the Vice President). The letter includes a statement of the nature and purpose of the research, and the individual's occupation, home address and place of employment. Brief descriptions and locations of records reviewed, examined, and copied are also maintained in the record. Copies of letters submitted under the Freedom of Information Act are also included in the system.

CATEGORIES OF INDIVIDUALS IN THE SYSTEM:

Individuals who have requested to examine official records or reference materials of EOP agencies.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

5 U.S.C. 301, 552; 44 U.S.C. 3101, 3103, 3105, 3106.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

To document researcher access to the offical records of the EOP agencies, and to furnish information to officers and employees of the EOP agencies in connection with the performance of their official duties. Other information may also be required to compile statistical data for the annual report to the Congress on activities under the Freedom of Information Act.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

These records are maintained in files and on index cards in the Executive Office of the President Information Center.

RETRIEVABILITY:

By name of researcher and cross-indexed by record reviewed or research subject. Access is restricted to the Records Management Staff.

SAFEGUARDS:

The records are under personal surveillance during working hours and in a locked area at other times.

RETENTION AND DISPOSAL:

Records are retained for eight years, and then destroyed.

SYSTEM MANAGER(S) AND ADDRESS:

Assistant Director for Information Management and Services, Office of Administration, New Executive Office Building, 726 Jackson Place, NW., Washington, D.C. 20503.

NOTIFICATION PROCEDURE:

Contact Deputy Director, Office of Administration, 726 Jackson Place NW., Washington, D.C. 20503.

RECORD ACCESS PROCEDURES:

Same as above.

CONTESTING RECORD PROCEDURES:

Same as above.

RECORD SOURCE CATEGORIES:

Personal information is received from the individual to whom the record pertains.

SYSTEMS EXEMPTED FROM CERTAIN PROVISIONS OF THE ACT:

None.

OA/EOP/05

SYSTEM NAME:

Office of Administration, staff parking application and carpool registration file.

SYSTEM LOCATION:

Office of Administration, Administrative Services Division, New Executive Office Building, 726 Jackson Place NW., Washington, D.C. 20503.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

OA employees who have applied for parking permits during the year; OA employees who are the principal members (drivers) of a carpool and have received special carpool parking permits; and, the riders in the carpool.

CATEGORIES OF RECORDS IN THE SYSTEM:

The system contains completed OA forms (1) "Request for Parking Permit," submitted by OA employees who desire a parking permit. The form contains the following information about the applicant: name, office/division, room number, office phone, work address, make of car, license number, home phone; (2) "Carpool Registration," submitted by employees who obtained carpool parking permits. The form contains the following information about the principal carpool member; name, office/division, room number, office phone, office address, car make, license, home phone. The form also contains the following information about the carpool riders; name, home address, work location and office phone.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

41 CFR Temporary Regulation D–65, Office of Management and Budget Circular A–118.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

The records are used by officials and employees of OA in connection with their official duties, which include managing the OA employee parking spaces.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

Forms are maintained in file folders and stored in a metal file cabinet.

RETRIEVABILITY:

Records are kept in alphabetical order by individual name (for carpool registration forms, access is by principal members name only). Access is limited to the Administrative Services Division Staff of OA.

SAFEGUARDS:

Only Administrative Services Division staff have access to these records, which are under visual surveillance during working hours, and in a locked area other times.

RETENTION AND DISPOSAL:

The forms are maintained for one (1) year following the close of the parking year (September 30).

SYSTEM MANAGER(S) AND ADDRESS:

Director for Administrative Services, Office of Administration, New Executive Office Building, 726 Jackson Place NW., Washington, D.C. 20503.

NOTIFICATION PROCEDURE:

Contact Deputy Director, Office of Administration, 726 Jackson Place NW., Washington, D.C.

RECORD ACCESS PROCEDURES:

Same as above.

CONTESTING RECORD PROCEDURES:

Same as above.

RECORD SOURCE CATEGORIES:

SYSTEMS EXEMPTED FROM CERTAIN PROVISIONS OF THE ACT:

None.

OA/EOP/06

SYSTEM NAME:

Project Tracking System.

SYSTEM LOCATION:

Office of Administration, New Executive Office Building, 726 Jackson Place NW., Washington, D.C. 20503.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

Employees of the Office of Administration who have been assigned responsibility for one or more work projects which are monitored by the system.

CATEGORIES OF RECORDS IN THE SYSTEM:

Project number; project title; issue date; completion date; office for which the project is undertaken; objective of the project; name and division of the employee primarily responsible for the project; project milestones; authority/justification for the project; data on staff time spent on each project; date on costs of projects.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

5 U.S.C. 301.

ROUTINE USES OF RECORDS IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

To monitor the progress of projects assigned to Office of Administration employees. To generate agency internal management reports. Disclosure is limited to supervisory staff, i.e., the Director, Deputy Director and Division Heads, in connection with the performance of their official duties.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

The records are maintained on magnetic tape/disk and are periodically produced on hard copy for reporting purposes.

RETRIEVABILITY:

Records are arranged alphabetically by the surname, and division of the person primarily responsible for each project, by project title, by client, and numerically by project number and by date.

SAFEGUARDS:

Hard copy records are under the personal surveillance of Office of Administration staff during working hours and in a locked area at other times. The master file is on magnetic tape/disk in the Office of Administration Computer Facility. Access to the system is controlled by a security level code and individually assigned passwords.

RETENTION AND DISPOSAL:

Hard copy records are destroyed when no longer needed for administrative purposes. Records are purged from the master file two years after the project is completed.

SYSTEM MANAGER(S) AND ADDRESS:

Staff Assistant to the Director, Office of Administration, 726 Jackson Place NW., Washington, D.C. 20503.

NOTIFICATION PROCEDURE:

Contact: Deputy Director, Office of Administration, 726 Jackson Place NW., Washington, D.C. 20503.

RECORD ACCESS PROCEDURES:

Same as above.

CONTESTING RECORD PROCEDURES:

Same as above.

RECORD SOURCE CATEGORIES:

Information is obtained from the agency senior staff who assign projects and from the individual employees to whom the projects are assigned.

SYSTEMS EXEMPTED FROM CERTAIN PROVISIONS OF THE ACT:

None.

BILLING CODE 3115-01-M

FEDERAL EMERGENCY MANAGEMENT AGENCY

U.S. Fire Administration

Board of Visitors for the National Fire Academy; Open Meeting

In accordance with Section 10(a)(2) of the Federal Advisory Committee Act (Public Law 92-463), announcement is made of the following committee meeting:

Name: Board of Visitors for the National Fire Academy.
Dates of meeting: April 24-25, 1980.
Place: Conference Room, Administration Building (Building E), National Fire Academy, Emmitsburg, Maryland.
Time: 9:00 a.m. to 5:00 p.m.
Proposed agenda:
April 24, 1980: Introductory remarks; Organizational Responsibilities of Board of Visitors; Annual Report to the Administrator; Outreach Program; Possible Committee Considerations: Target Students, Curriculum and Program Offerings for 1980, Priorities of Course Development, Outreach, Budget 1981, Facilities; Miscellaneous Considerations; Establishement of Proposed Future Meeting Dates.
April 25, 1980: Uncompleted Agenda Items; Tour of Facilities; Administrative Items.

The meeting will be open to the public with approximately 20 seats available on a first come first serve basis. Members of the general public who plan to attend the meeting should contact Mr. Clem R. Lakin, National Fire Academy, Route 1, Box 10A, Emmitsburg, Maryland 21727 (phone 301/447-6771) on or before April 17, 1980.

Minutes of the meeting will be prepared by the Board and will be available for public viewing in the Superintendent's Office, Administration Building, National Fire Academy, Emmitsburg, Maryland. Copies of the minutes will be available upon request 30 days after the meeting.

Dated: March 24, 1980.

Gordon Vickery,

Administrator, U.S. Fire Administration.

BILLING CODE 6718-04-M

DEPARTMENT OF HEALTH, EDUCATION, AND WELFARE

Alcohol, Drug Abuse, and Mental Health Administration

National Advisory Council on Alcohol Abuse and Alcoholism; Meetings

In accordance with Section 10(a)(2) of the Federal Advisory Committee Act (5 U.S.C. Appendix I), announcement is made of the following National advisory body scheduled to assemble during the month of April 1980.

National Advisory Council on Alcohol Abuse and Alcoholism

April 7, 1980; 10:00 a.m.—Open meeting, Hubert H. Humphrey Building, 200 Independence avenue SW., Washington, D.C.
Contact: Mr. James Vaughan, Room 16-C-06, Parklawn Building, 5600 Fishers Lane, Rockville, Maryland 20857, (301) 443-3387.
Purpose: The Council advises the Secretary, Department of Health, Education, and Welfare regarding policy direction and program issues of national significance in the area of alcohol abuse and alcoholism. Reviews all grant applications in terms of scientific merit and coherence with Department policies, and makes recommendations to the Secretary with respect to approval and amount of award.
Agenda: To discuss with the Surgeon General the joint HEW-Treasury report to the President and Congress required by Pub. L. 96-180 with respect to informing the general public of the health hazards associated with alcoholic beverages.

This notice is late because of the uncertainty of whether the meeting would be open to the public or closed and the Federal official was unable to get confirmation until March 28, 1980.

Substantive program information may be obtained from the contact person listed above. The NIAAA Public Affairs Office will furnish upon request summaries of the meeting and a roster of Committee members. Contact Mr. Harry Bell, Associate Director, Office of Public Affairs, NIAAA, Room 11A–17, Parklawn Building, 5600 Fishers Lane, Rockville, Maryland 20857, (301) 443–3306.

Dated: March 31, 1980.

Elizabeth A. Connolly,

Committee Management Officer, Alcohol, Drug Abuse, and Mental Health Administration.

[FR Doc. 80–10121 Filed 4–2–80; 8:45 am]

BILLING CODE 4110–88–M

Interagency Committee on Federal Activities for Alcohol Abuse; Meetings

In accordance with Section 10(a)(2) of the Federal Advisory Committee Act (5 U.S.C. Appendix I), announcement is made of the following National advisory bodies scheduled to assemble during the month of April 1980.

Interagency Committee on Federal Activities for Alcohol Abuse and Alcoholism

April 29, 1980; 9:30 a.m.—Open meeting; Conference Room 800, PH, Hubert H. Humphrey Building, 200 Independence Avenue, S.W., Washington, D.C. Contact: Mr. James Vaughan, Room 16–C–06, Parklawn Building, 5600 Fishers Lane, Rockville, Maryland 20857, (301) 443–3887.

Purpose: The Interagency Committee on Federal Activities for Alcohol Abuse and Alcoholism (1) evaluates the adequacy and technical soundness of all Federal programs and activities which relate to alcohol abuse and alcoholism and provides for the communication and exchange of information necessary to maintain the coordination and effectiveness of such programs and activities, and (2) seeks to coordinate efforts undertaken to deal with alcohol abuse and alcoholism in carrying out Federal health, welfare, rehabilitation, highway safety, law enforcement, and economic opportunity laws.

Agenda: The meeting will consist of a discussion of working group activities, the functions of the Interagency Committee and the joint HEW-Treasury report to the President and the Congress required by P.L. 96–180 with respect to informing the general public of the health hazards associated with alcoholic beverages.

Substantive program information may be obtained from the contact person listed above. The NIAAA Public Affairs Office will furnish upon request summaries of the meeting and a roster of Committee members. Contact Mr. Harry Bell, Associate Director, Office of Public Affairs, NIAAA, Room 11A–17, Parklawn Building, 5600 Fishers Lane, Rockville, Maryland 20857, (301) 443–3306.

Dated: March 27, 1980.

Michele W. Harvey,

Deputy Associate Administrator for Extramural Programs, Alcohol, Drug Abuse, and Mental Health Administration.

[FR Doc. 80–10064 Filed 4–2–80; 8:45 am]

BILLING CODE 4110–88–M

Office of Education

Community Education Program; Extension of closing date for submission of applications for fiscal year 1980

AGENCY: Office of Education, HEW.

ACTION: Extension of Closing Date for Submission of Applications for Fiscal Year 1980.

SUMMARY: This notice is to inform clients that the March 10, 1980 closing date for submission of applications under the Community Education Program is extended. The new closing date is June 30, 1980. The notice of closing date for transmittal of applications for the Community Education Program was published in the **Federal Register** on August 23, 1979. That notice directed clients to prepare the applications in accordance with the final regulations that were planned to be published in December, 1979. Unfortunately, the final regulations could not be published when planned. Therefore, the closing date is extended to give applicants sufficient time to complete their applications based on the final regulations published in this issue of the **Federal Register.**

SUPPLEMENTARY INFORMATION: Authority for this program is contained in Title VIII of the Elementary and Secondary Education Act, as amended by the Education Amendments of 1978 (Pub. L. 95–561).

This program issues awards to local educational agencies, State educational agencies, other public agencies, nonprofit private organizations, and institutions of higher education.

The purpose of the awards is to plan, establish, expand, and operate community education programs; promote efficient use of school facilities; encourage effective delivery of social services; and train persons involved in community education.

Program information and mailing instructions for applications are repeated below.

Applications Delivered by Mail

An application sent by mail must be addressed to the U.S. Office of Education, Application Control Center, Attention: 13.563, Washington, D.C. 20202.

An application must show proof of mailing consisting of one of the following:

(1) A legibly dated U.S. Postal Service postmark.

(2) A legible mail receipt with the date of mailing stamped by the U.S. Postal service.

(3) A dated shipping label, invoice, or receipt from a commercial carrier.

(4) Any other proof of mailing acceptable to the U.S. Commissioner of Education.

If an application is sent through the U.S. Postal Service, the Commissioner does not accept either of the following as proof of mailing: (1) a private metered postmark, or (2) a mail receipt that is not dated by the U.S. Postal Service.

An applicant should note that the U.S. Postal Service does not uniformly provide a dated postmark. Before relying on this method, an applicant should check with its local post office.

An applicant is encouraged to use registered or at least first class mail. Each late applicant will be notified that its application will not be considered.

Applications Delivered by Hand

An application that is hand delivered must be taken to the U.S. Office of Education, Application Control Center, Room 5673, Regional Office Building 3, 7th and D Streets, S.W., Washington, D.C..

The Application Control Center will accept a hand-delivered application between 8:00 a.m. and 4:30 p.m. (Washington, D.C. time) daily, except Saturdays, Sundays, and Federal holidays.

An application that is hand delivered will not be accepted after 4:30 p.m. on the closing date.

Program Information

The final rules governing the Community Education Program are published in this issue of the **Federal Register.** Certain changes were made between the proposed regulations and the final regulations. Therefore, an applicant should review the final regulations, particularly the evaluation criteria in Subpart D of appropriate category, before preparing an application.

Information regarding funding categories and criteria for judging applications is contained in the regulations. In general, priority is given to applications which are designed to serve as exemplary models or which build an agency's long-range capacity to maintain Community Education.

Discretionary grants will be made in the following categories:

(1) grants to LEAs to plan, establish, expand and operate exemplary projects with potential for broad replication;

(2) grants to SEAs to (a) conduct State-level activities for furthering community education, and (b) provide technical assistance to LEAs in the development of community education programs;

(3) grants to other public agencies and nonprofit private organizations for (a) training a particular national, regional, or statewide group interested in community education or in the coordinated delivery of community and human services in schools and other public agencies or developing working relationships between two or more of these groups; or (b) developing, testing and disseminating exemplary models of local activities to promote improved coordination of community and human services in schools and other public facilities.

(4) grants to IHEs to provide training to persons who are or will be engaged in community education programs. The final regulations state that the Commissioner may annually establish priorities among training areas. During FY 80, priority is given to the following training areas:

(a) *(Section 163d.11(a)(2) of the final regulations)* Training of SEA community education leaders in managing a State program and in providing technical assistance to local districts throughout their State. (This category is designed to serve a large number of SEAs throughout the Nation.)

(b) *(Sections 163d.11(a)(4) of the final regulations)* Activities to disseminate information about national training and to bring together different organizations and institutions providing training to persons in community education. (The project might establish among trainers a regular method of communication and exchange of innovative methods and practices; create a focus for the discussion of national training needs in community education; assess and create a focus for the discussion of national training needs in community education; assess and create discussion on currently available training materials and programs; and provide a directory of national training opportunities and resources.)

(c) *(Section 163d.11(a)(5) of the final regulations)* Training by statewide, regional, or national consortia composed of a variety of skilled trainers—(i) to provide interdisciplinary training to persons interested in community education; or (ii) to provide training on new methods of collaboration among agencies and institutions providing services in community education.

Available Funds

The appropriation for the Community Education Program in FY 1980 to support new projects is $3,138,000. Of this amount $1,000,000 is available for grants to LEAs, $1,138,000 is available for grants to SEAs, $500,000 is available to public agencies and nonprofit organizations, and $500,000 is available for grants to IHEs. During FY 1979, the average amounts of grants were: in the LEA category, $37,941; in the SEA category, $51,993; and the IHE category, $63,810. No minimum or maximum amounts are set.

These estimates do not bind the U.S. Office of Education except as may be required by the applicable statute and regulations. All grants will be new awards. A current grantee may apply for a new award on the same basis as an applicant not previously funded. The Program will emphasize funding projects of one year in duration. Because of limited funding, only those projects providing strong justification and scoring high during the grants review process will be considered for funding beyond one year, in accordance with EDGAR.

The grantee's share of the costs of grants under Sections 808 and 809 of the Community Schools and Comprehensive Community Education Act is 10 percent for Fiscal Year 1980.

Application Forms

Application forms and program information packages are expected to be ready for mailing by May 6, 1980. They may be obtained by writing to the Community Education Program, U.S. Office of Education (Room 5622, Regional Office Building 3), 400 Maryland Avenue, S.W., Washington, D.C. 20202.

Applications must be prepared and submitted in accordance with the regulations, instructions, and forms included in the program information package. The Commissioner strongly urges that the narrative portion of the application not exceed 50 pages in length. The Commissioner further urges that applicants not submit information that is not requested.

Applicable Regulations

Regulations applicable to this program include the following:

(a) Regulations governing the Community Education Program (45 CFR Part 163), published in this issue of the **Federal Register.**

(b) The Education Division General Administrative Regulations (EDGAR) (45 CFR Parts 100a and 100c) published in this issue of the **Federal Register.**

Further Information

For further information contact Mr. Ron Casaldi, Acting Director, Community Education Program, U.S. Office of Education (Room 5622, Regional Office Building 3), 400 Maryland Avenue, S.W., Washington, D.C. 20202, Telephone: (202) 245–0691.

(Catalog of Federal Domestic Assistance Number 13.563, Community Education Program)

Dated: March 21, 1980.

William L. Smith,

Commissioner of Education.

[FR Doc. 80–9661 Filed 4–2–80; 8:45 am]

BILLING CODE 4110–02–M

Cooperative Education Program; Closing Date for Transmittal of Applications for Demonstration Projects for Fiscal Year 1980

Applications are invited for new demonstration projects under the Cooperative Education Program.

Authority for this program is contained in Title VIII of the Higher Education Act of 1965, as amended. Section 803 of the legislation authorizes funding of "* * * projects demonstrating or exploring the feasibility or value of innovative methods of cooperative education."

(20 U.S.C. 1133b)

Demonstration grants will be awarded to assist institutions of higher education located primarily in large urban areas in developing and establishing comprehensive cooperative education programs where all or nearly all students would have the opportunity to alternate their academic study with paid work experiences which are related to their academic program.

Closing Date for Transmittal of Applications

An application for a demonstration grant must be mailed or hand delivered by May 22, 1980. A separate notice of closing date has been issued for administration, research, and training grants.

Applications Delivered by Mail

An application sent by mail must be addressed to the U.S. Office of Education, Application Control Center, Attention: 13.510, Washington, D.C. 20202.

An applicant must show proof of mailing consisting of one of the following:

(1) A legibly dated U.S. Postal Service postmark.

(2) A legible mail receipt with the date of mailing stamped by the U.S. Postal Service.

(3) A dated shipping label, invoice, or receipt from a commercial carrier.

(4) Any other proof of mailing acceptable to the U.S. Commissioner of Education.

If an application is sent through the U.S. Postal Service, the Commissioner does not accept either of the following as proof of mailing:

(1) A private metered postmark, or

(2) A mail receipt that is not dated by the U.S. Postal Service.

An applicant should note that the U.S. Postal Service does not uniformly provide a dated postmark. Before relying on this method, an applicant should check with its local post office.

An applicant is encouraged to use registered or at least first class mail. Each late applicant will be notified that its application will not be considered.

Applications Delivered by Hand

An application that is hand delivered must be taken to the U.S. Office of Education, Application Control Center, Room 5673, Regional Office Building 3, 7th & D Streets, S.W., Washington, D.C.

The Application Control Center will accept a hand-delivered application between 8:00 a.m. and 4:30 p.m. (Washington, D.C., time) daily, except Saturdays, Sundays, and Federal holidays.

An application that is hand delivered will not be accepted after 4:30 p.m. on the closing date.

Available funds

It is expected that approximately $15,000,000 will be available in FY 1980 for all types of grants awarded by the program.

Of the $15,000,000, approximately $2,000,000, to $2,500,000 will be available to support 2 or 3 demonstration projects. Awards will be for up to approximately $1,000,000 each and will be obligated from a single year's appropriation. Funds for these demonstration grants will be expended over a three-year period to provide institutions sufficient time to plan and develop comprehensive cooperative education programs.

These estimates do not bind the U.S. Office of Education except as may be required by the applicable statute and regulations.

Application Forms

Application forms and program information packages were mailed to all eligible institutions of higher education on October 23, 1979. Additional copies may be obtained from the Cooperative Education Branch, U.S. Office of Education (Room 3053, Regional Office Building 3), 7th and D Streets, S.W. Washington, D.C. 20202. Telephone: 202–245–2484.

Applications must be prepared and submitted in accordance with the regulations, instructions, and forms included in the program information package, the Commissioner strongly urges that the narrative portion of the application not exceed *25* pages. The Commissioner further suggests that applicants not submit information that is not requested.

Applicable Regulations

Regulations applicable to this program include the following:

(a) Regulations governing the Cooperative Education Program (45 CFR Part 182) published in the **Federal Register** on May 2, 1978, and revised in today's issue of the **Federal Register;** and

(b) General Provisions Regulations for the Office of Education Programs (45 CFR Parts 100 and 100a).

Note.—See the final Education Division General Administrative Regulations (EDGAR) published as Part II in this issue of the **Federal Register.** When EDGAR becomes effective, it will supersede the General Provisions Regulations for the Office of Education programs.

If EDGAR takes effect before grants are made under this program, those grants will be subject to the following provisions of EDGAR:

Subpart A (General; Subpart E (What Conditions Must Be Met by a Grantee?)
Subpart F (What Are The Administrative Responsibilities of A Grantee?) and
Subpart G (What Procedures Does The Education Division Use To Get Compliance?)

Further Information

For further information contact Mr. Morris Brown, Chief, Cooperative Education Branch, Division of Training and Facilities/BHCE, U.S. Office of Education (Room 3053, Regional Office Building 3), 7th and D Streets, S.W., Washington, D.C. 20202. Telephone: (202) 245–2146 or 245–2484.

(20 U.S.C. 1133–1133b)

(Catalog of Federal Domestic Assistance No. 13.510; Cooperative Education Program)

Dated: February 5, 1980.

William L. Smith

Commissioner of Education.

[FR Doc. 80-9662 Filed 4-2-80; 8:45 am]

BILLING CODE 4110-02-M

Emergency Adult Education Program for Indochina Refugees; Closing Date for Transmittal of Applications for Fiscal Year 1980

AGENCY: Office of Education, HEW.

ACTION: Notice of Closing Date for Transmittal of Applications for Fiscal Year 1980.

SUMMARY: Applications are invited for new projects under the Emergency Adult Education Program for Indochina Refugees. The closing date is June 18, 1980.

SUPPLEMENTARY INFORMATION:

Authority for this program is contained in section 317 of the Adult Education Act (Pub. L. 91–230), as amended.

(20 U.S.C. 1211b)

Under the Emergency Adult Education Program for Indochina Refugees, grants are awarded to State educational agencies and local educational agencies.

The purposes of the grants are to enable adult Indochina refugees to acquire basic skills necessary to function in American society and to contribute to the employability of adult Indochina refugees through development of basic educational and occupational skills.

Applications Delivered by Mail

An application sent by mail must be addressed to the U.S. Office of Education, Application Control Center, Attention: 13.579, Washington, D.C. 20202.

An applicant must show proof of mailing consisting of one of the following:

(a) A Legibly dated U.S. Postal Service postmark.

(b) A legible mail receipt with the date of mailing stamped by the U.S. Postal Service.

(c) A dated shipping label, invoice, or receipt from a commercial carrier.

(d) Any other proof of mailing acceptable to the U.S. Commissioner of Education.

If an application is sent through the U.S. Postal Service, the Commissioner does not accept either of the following as proof of mailing:

(a) A private metered postmark; or

(b) A mail receipt that is not dated by the U.S. Postal Service.

An applicant should note that the U.S. Postal Service does not uniformly provide a dated postmark. Before relying on this method, an applicant should check with its local post office.

An applicant is encouraged to use registered, certified, or at least first-class mail. Each late applicant will be notified that its application will not be considered.

Applications Delivered by Hand

An application that is hand delivered must be taken to the U.S. Office of Education, Application Control Center, Room 5673, Regional Office Building 3, 7th and D Streets, S.W., Washington, D.C.

The Application Control Center will accept a hand-delivered application between 8:00 a.m. and 4:30 p.m. (Washington, D.C., time) daily, except Saturdays, Sundays, and Federal holidays.

An application that is hand delivered will not be accepted after 4:30 p.m. on the closing date.

Program Information

Specific information regarding eligible activities under the special adult education program for Indochina refugees is contained in the regulations and in the program information package. A grant period is normally for twelve months but in no event shall it exceed eighteen months.

Available Funds

Approximately $2.5 million is anticipated for the Emergency Adult Education Program for Indochina Refugees.

It is estimated that these funds could support 25–30 projects. Grants will be awarded before September 30, 1980, for operation continuing into fiscal year 1981. No minimum or maximum amounts have been predetermined since funds required will vary according to the number of persons to be served and the types of services to be provided by the state or local educational agency.

These estimates do not bind the U.S. Office of Education except as may be required by the applicable statute and regulations.

Application Forms

Application forms and program information packages are expected to be ready for mailing by April 18, 1980. They may be obtained by writing to the Division of Adult Education, U.S. Office of Education, 400 Maryland Avenue, S.W. (ROB–3, Room 5056), Washington, D.C. 20202.

Applications must be prepared and submitted in accordance with the regulations, instructions, and forms included in the program information package. The Commissioner strongly urges that the narrative portion of the application not exceed 15 pages in length. The Commissioner further urges that applicants not submit information that is not requested.

Special Procedures

Concurrently with application submission to the U.S. Office of Education, each local educational agency applicant shall submit a copy of its application to its respective State educational agency. The Commissioner does not approve an application for a grant under the Emergency Adult Education Program for Indochina Refugees unless the State educational agency (for the State in which that applicant is located) assures the Commissioner that the proposed activity will not duplicate existing and available (Federal and non-Federal) adult education programs that meet the special needs of adult Indochina refugees. (See § 166c.222(b) of the final regulations.)

Applicable Regulations

Regulations applicable to this program include the following:

(a) Regulations governing the Emergency Adult Education Program for Indochina Refugees (45 CFR Part 166c) published in this issue of the **Federal Register.**

(b) The Education Division General Administrative Regulations (EDGAR) (45 CFR Parts 100a and 100c), except for the selection criteria (Subpart D, Part 100a.200–.206) published in this issue of the **Federal Register.**

Application Specifications

An applicant MUST forward one original and two copies of the application to the Application Control Center of the U.S. Office of Education.

Further Information

For further information, contact Mr. Paul V. Delker, Director, Division of Adult Education, U.S. Office of Education, 400 Maryland Avenue, S.W. (ROB–3, Room 5056), Washington, D.C. 20202, Telephone: (202) 245–2278.

Kanab Resource Area Office, Bureau of Land Management, 320 North First East, Kanab, Utah 84741. Telephone (801) 644-2672.

Oral and written comments will also be received at formal public hearings to be held in the following cities:

Salt Lake City, Utah, Salt Palace, Room 220, May 5, 1980, 7:30 p.m.

Kanab, Utah, BLM Area Office, 320 North First East, May 6, 1980, 7:30 p.m.

St. George, Utah, Four Season Convention Center, 747 E. St. George Blvd., May 7, 1980, 7:30 p.m.

Phoenix, Arizona, Maricopa County Board of Supervisor's Auditorium, 111 S. 3rd Avenue, May 8, 1980, 7:30 p.m.

A Hearing Officer will preside over the public hearings. Witnesses presenting oral comments should limit their testimony to ten (10) minutes. Written requests to testify orally should be sent to the District Manager, Arizona Strip District Office, 196 E. Tabernacle, St. George, Utah 84770.

Comments received on the draft environmental impact statement and draft suitability report, whether written or oral, will be given equal consideration during the preparation of the final document.

Tom Allen,

Acting State Director.

March 27, 1980.

[Survey Group 658]

Colorado: Filing of Plats of Survey

March 25, 1980.

Plats of survey of the following described lands accepted January 28, 1980 will be officially filed in the Colorado State Office, Bureau of Land Management, Denver, Colorado effective May 30, 1980.

Sixth Principal Meridian

T. 9 S., R. 90 W.

This plat represents a dependent resurvey of a portion of the east boundary and the survey of a portion of the subdivisional lines.

T. 10 S., R. 90 W.

These plats represent a dependent resurvey of a portion of the second standard parallel south, a portion of the east boundary, a portion of M.S. No. 5902, St Louis Placer, and the survey of the north and west boundaries and a portion of the subdivisional lines.

[Survey Group 407]

Plats of survey of the following described lands accepted February 14, 1980 will be officially filed in the Colorado State Office, Bureau of Land Management, Denver, Colorado effective May 30, 1980.

Sixth Principal Meridian

T. 10 S., R. 84 W.

These plats represent a dependent resurvey of a portion of the second standard parallel south, along the south boundary of Township 20 South, through Range 84 West; the west boundary and the subdivisional lines and the extension survey of the subdivisional lines; the dependent resurvey of certain boundaries of non-conforming claims; the survey of the subdivision of certain sections; the resurvey of a portion of the Aspen Townsite; and the dependent resurvey of certain boundaries of mineral surveys.

T. 10 S., R. 85 W.

These plats represent an extension survey of a portion of the subdivisional lines, the dependent resurvey of a portion of the subdivisional lines, the subdivision of certain sections, a portion of the Aspen Townsite, certain boundaries of mineral surveys.

These surveys were executed to meet certain administrative needs of the Bureau.

All inquiries about this land should be sent to the Colorado State Office, Bureau of Land Management, Room 700,

Colorado State Bank Building, 1600 Broadway, Denver, Colorado 80202.

George C. Hinton,

Chief, Public Affairs.

BILLING CODE 4310-84-M

Decker-Birney, South Rosebud, and Coalwood Management Framework Plans; Invitation to Comment

Notice is hereby given that the Miles City District, Bureau of Land Management (BLM), Miles City, Montana, invites public comments on draft amendments to portions of the Decker-Birney, South Rosebud and Coalwood Management Framework Plans (MFPs). These amendments were prepared to make relevant portions of the MFPs reflect, as completely as possible, existing statutory requirements and policies and to continue to carry out the requirements of the Federal Lands Review mandated by Section 522(c) of the Surface Mining Control and Reclamation Act (SMCRA). Dates of the comment period are April 1, 1980, through May 20, 1980.

Background standards and procedures for this MFP review and amendment preparation are contained in **Federal Register** Notice FR Vol. 44, No. 140, 42584–42662 of July 19, 1979, and FR Vol. 44, 153, 46386–46401 of August 7, 1979. The standards for this review are also discussed in a final environmental statement describing the Secretary of Interior's preferred coal program and alternatives, which was released in April, 1979.

The subject area is within the Powder River Coal Region and covers portions of Big Horn, Rosebud, Custer, Treasure, and Powder River Counties in Montana. It is adjacent to the Ashland Division of the Custer National Forest, the Northern Cheyenne and Crow Indian Reservations, and the State of Wyoming.

The plan draft amendments identify areas acceptable for further consideration for coal leasing, and are situated within those areas previously found acceptable for leasing in the original MFPs. The amendments also identify data which must be supplemented in the future prior to a final determination of acceptability. The amendments do not include decisions to lease any area for coal.

Any federal coal identified as acceptable for further consideration for leasing may be included in the first Powder River Coal Region (Montana and Wyoming) activity plan and evironmental impact statement. The Secretary of Interior has announced a preliminary Powder River Coal Regional leasing target of 776 million tons for 1982. To achieve this goal, preliminary lease tract delineation and ranking procedures will start in the summer of 1980 and the subject MFP amendments must be completed by July, 1980.

The plan draft amendments and draft environmental assessment record (EAR) have been prepared by an interdisciplinary team and in consultation with appropriate state and federal agencies as well as qualified surface owners over federally reserved coal. The amendment drafts primarily involve the application of the Secretary of Interior's unsuitability criteria and consideration of qualified surface owner views. The drafts contain narratives, tables and maps which display those areas:

(1) To which no criteria applies;

(2) To which a criterion or criteria cannot be applied pending collection of additional data;

(3) To which a criterion or criteria apply;

(4) To which a criterion or criteria apply where the District Manager does not intend to consider an exception or exemption; and

(5) To which a criterion and an exception or exemption thereto have been applied.

The plan draft amendment package includes the full text of the unsuitability criteria, an explanation of the surface owner consultation process and reprints from the Surface Mining Control and Reclamation Act pertaining to the Federal Lands Review process and surface owner consultation.

The package will be mailed to all known interested individuals; affected surface owners; industry and special interest groups; and local, state, and federal government agencies on or about April 1, 1980. Additional copies will be available from the Montana State Office (222 N. 32nd St., Billings, Montana 59107) and Miles City District Offfice as well as on file in local libraries and adjacent BLM offices.

Public meetings will be held April 24–25–26 to permit interested people the opportunity to discuss the plan draft amendments and enviromental assessment with members of the Miles City BLM District Office staff. Following is the meeting schedule: April 24, Courtroom, Powder River County Courthouse, Broadus, Montana: April 25, Mountain View Room, Commons Building, Sheridan College, Sheridan, Wyoming; April 26, Bicentennial Library, Colstrip, Montana. All meetings will be from 3 to 5 p.m. and 7 to 9 p.m. The plan draft amendment package and detail information provided during the meetings will serve as the basis for public comment. Written comments on the draft will be accepted by the Miles City District Office until May 16, 1980. Oral comments will be accepted during the meetings.

A Federal Public Hearing is also scheduled at 7 p.m. May 20, 1980, in Room 106, Miles Community College, Miles City, Montana. Purpose of the hearing is to accept testimony by anyone who could be adversely affected by these amendments of by decisions indicated in a similar document, "The Powder River Resource Area Management Framework Plan Update Report" of July, 1979. Local publicity on the hearing is forthcoming.

For further information or to submit comments on the draft documents, please contact: District Manager, Bureau of Land Management, West of Miles City, P.O. Box 940, Miles City, Montana 59301, (406) 232–4331.

Robert A. Teegarden,

Acting District Manager.

BILLING CODE 4310-84-M

Idaho Intensive Wilderness Inventory; Proposed Decision

The Federal Land Policy and Management Act of 1976 (FLPMA) requires the Secretary of the Interior to inventory roadless areas and roadless islands of the public lands to identify those areas possessing wilderness characteristics as defined in the Wilderness Act of 1964.

The **Federal Register** notice of August 10, 1979, announced the Idaho final initial wilderness inventory decision, which indicated the inventory units that required intensive inventory.

The proposed decision below shows which inventory units are recommended as Wilderness Study Areas as a result of the intensive inventory. All units are included except those for which the decision is being deferred due to the protest-appeal process still affecting the prior initial inventory decision.

		Acres proposed as wilderness study areas	Acres not proposed as wilderness study areas
Boise District			
11–17	Outcrop		6,420
14–19	Long Tom Creek		13,226
14–21	Bennett Creek		11,162
16–2	Jump Creek		8,301
16–9	Reynolds Creek Canyon		14,650
16–49c	Squaw Meadow		10,316
17–1a	Lookout Butte		20,077
17–1b	East Fork Bruneau River		10,178
17–6	Dry Lakes		26,208
17–7	Clover Crossing		6,314
17–10	Lower Salmon Falls Creek		22,287
17–11	Jarbidge River	75,340	35,670
17–12	Poison Creek		13,532

		Acres proposed as wilderness study areas	Acres not proposed as wilderness study areas
18-1	Wildhorse		7,472
19-1	Cold Springs Creek		21,380
110-91a	Box Creek[1]	428	
111-5	Poison Gulch		30,742
111-6	Little Jack's Creek	41,143	33,776
111-7a	Big Hill		12,924
111-7b	Duncan Creek		10,005
111-7c	Big Jack's Creek	54,833	10,301
111-12	Sheep Trail		19,702
111-17	Bruneau River	107,020	27,042
111-18	Pole Creek	24,509	7,247
111-19a	Camas Creek		19,347
111-19b	Bull Gulch		33,150
111-20a	Big Springs		5,342
111-20b	Upper Battle Creek		17,787
111-21	Bull Basin		17,625
111-36a	Sheep Creek West	13,070	2,306
111-36b	Sheep Creek East		12,412
	Boise District total	316,343	486,901
	Burley District		
26-1	Hanzel Mountain		20,615
26-3	South Samaria		6,615
27-1	South Deep Creek		9,609
27-2	Deep Creek Peak		6,646
28-1	Petticoat Peak	11,358	1,688
	Burley District total	11,358	45,173
	Idaho Falls District		
31-10	Illinois		11,150
31-11	Deadman Canyon		23,000
31-13	Timbered Dome		10,240
31-14	Appendicitis Hill	24,870	630
31-15	Dry Hollow		17,800
31-17	White Knob Mountains	9,950	
32-2	Sands Canyon		8,010
32-3	Hawley Mountain	15,510	640

62-2	Confluence[1]	4,577	533
62-4	Big Canyon		1,100
62-10	Marshall Mountain[6]	6,524	966
	Coeur d'Alene District total	43,045	10,407
	State total	803,836	1,120,508

[1] Unit dependent on contiguous RARE II area to meet criteria.
[2] Previously called Kinzie East
[3] Now part of Unit 56-2
[4] Now part of Unit 57-10
[5] Previously called Lava
[6] Previously called Gospel Hump.

Public meetings, open houses, and workshops will be held at the following locations throughout the State for discussion of the BLM Wilderness Review, to answer questions, and to obtain input from the public on these proposed decisions.

April 15 7:30 p.m. Idaho Falls Westbank Motel
April 16 11:30 a.m.—8:30 p.m. Arco County Courthouse
April 22 11:30 a.m.—8:30 p.m. Aberdeen High School
April 23 7:00 p.m. Salmon Salmon BLM District Office
April 29 7:30 p.m. Pocatello Holiday Inn
April 30 12:00 noon—8:00 p.m. Twin Falls Little Tree Inn
May 1 7:30 p.m. Moscow Travelodge-Clark Room
May 6 12:00 noon—8:00 p.m. Bruneau American Legion Hall
May 6 12:00 noon—8:00 p.m. Shoshone Shoshone BLM District Office
May 6 7:30 p.m. Lewiston Lewis & Clark State College, Spalding Hall-Conference Room
May 7 12:00 noon—8:00 p.m. Murphy Owyhee County Courthouse
May 8 12:00 noon—8:00 p.m. Boise Boise BLM District Office
May 8 12:00 noon—8:00 p.m. Gooding County Courthouse-Commissioner's Rm.
May 8 7:30 p.m. Coeur d'Alene North Shore Convention Center—Room 3
May 12 12:00 noon—8:00 p.m. Hailey New Blaine County Courthouse
May 14 7:30 p.m. Grangeville Idaho Bank & Trust Bldg.—Meeting room
May 15 12:00 noon—8:00 p.m. Rupert Judicial Bldg. (adj. Minidoka County Courthouse)
May 22 7:30 p.m. St. Maries Federal Building-Conference Room

In summary, 107 inventory units containing over 1,924,000 acres of BLM land were examined in detail to determine the presence or absence of wilderness characteristics. As a result of the intensive inventory field work, it has been determined that 35 inventory units totalling 803,836 acres contain wilderness characteristics, and that 72 inventory units and 1,120,508 acres do not contain characteristics.

Upon publication in the **Federal Register**, this proposed decision is subject to a 90-day public review, extending from April 4, 1980, through July 3, 1980. Comments on the decision should address the presence or absence of those wilderness characteristics as described in the Wilderness act, namely—size, naturalness, outstanding solitude or outstanding primitive recreation opportunities, and supplemental values. All comments must be received by the BLM Idaho State Office or district offices no later than July 3, 1980. Comments received after that date may not be included in the statewide analysis of comments.

The final decision on Wilderness Study Area status is scheduled for late September. With the exception of several inventory units where release of the intensive inventory has been deferred due to protests or appeals, this announcement completes the intensive inventory phase of BLM's wilderness review for Idaho. All areas identified as Wilderness Study Areas in the final decision will be further analyzed through the Bureau's Planning System to determine which areas should receive a suitable or non-suitable recommendation for wilderness designation. Those recommendations will eventually be forwarded to Congress for the final decision on possible designation of areas into the National Wilderness Preservation System.

For futher information on this proposed decision, contact the following BLM offices:

District Manager, Boise District Office, 230 Collins Road, Boise, Idaho 83702.

District Manager, Idaho Falls District Office, 940 Lincoln Road, Idaho Falls, Idaho 83401.

District Manager, Burley District Office, Route 3, Box 1, Burley, Idaho 83318.

District Manager, Salmon District Office, P.O. Box 430, Salmon, Idaho 83467.

District Manager, Coeur d'Alene District Office, 1808 N. Third Street, Coeur d'Alene, Idah 83814.

District Manager, Shoshone District Office, 400 West "F" Street, Shoshone, Idaho 83352.

State Director, Box 042, Federal Building 550 W. Fort Street, Boise, Idaho 83724.

Dated: March 28, 1980.

T. G. Bingham,

Acting State Director.

BILLING CODE 4310-84-M

[Serial No. I-7297]

Idaho; Termination of Proposed Withdrawal and Reservation of Lands

March 24, 1980.

Notice of an application, serial number I-7297, for withdrawal and reservation of lands was published as Federal Register Document No. 73-25589 on page 33423 of the issue for December 4, 1973. The applicant agency has cancelled its application insofar as it involved the lands described below. Therefore, pursuant to the regulations contained in 43 CFR, Subpart 2091, such lands will be at 10:00 a.m. on April 28, 1980, relieved of the segregative effect of the above mentioned application.

The lands involved in this notice of termination are:

Salmon National Forest

Gunbarrel Research Natural Area, Boise Meridian

T. 24 N., R. 14 E. (Protraction Diagram No. 40)
Sec. 23, S½;
Secs. 24, 25, and 26, All;
Sec. 27, NE¼;
Sec. 35, N½N½.
T. 24 N., R. 15 E. (Protraction Diagram No. 40)
Sec. 24, SW¼;
Sec. 25, NW½.

Metes and bounds description as follows:

Beginning at the confluence of Gunbarrel Creek and the Salmon River in approximate latitude 45° 24' N., longitude 114° 41' W.;

Thence southeasterly up Salmon River to the toe of the ridge being the south watershed divide of Gunbarrel Creek; easterly and northeasterly along said watershed divide to a prominent point at the head of Gunbarrel Creek in SW¼, Section 24, T. 24 N., R. 15 E.; northwesterly and southwesterly along the divide between Horse Creek on the north and Gunbarrel Creek and unnamed drainage on the south immediately west of Gun triangulation station; southwesterly along the west ridge of said unnamed drainage to the Salmon River; southeasterly along the Salmon River approximately 50 chains to the mouth of Gunbarrel Creek, the place of beginning.

The area described aggregates 1,600.00 acres in Lemhi County, Idaho.

Eugene E. Babin,

Acting Chief Branch of L&M Operations.

BILLING CODE 4310-84-M

[N-27612]

Nevada; Proposed Withdrawal and Opportunity for Public Hearing

March 26, 1980.

The Bureau of Land Management, Department of the Interior, proposes the following described lands be withdrawn, subject to valid existing rights, from appropriation under the public land laws, including the mining laws, but not the mineral leasing laws:

Mount Diablo Meridian, Nevada

T. 17 S., R. 50 E.
Sec. 26, S½;
Sec. 34, NE¼;
Sec. 35, N½N½, SE¼NE¼, SW¼NW¼, W½SW¼, N½NE¼SE¼, NW¼SE¼;
Sec. 36, W½.
T. 18 S., R. 50 E.
Sec. 1, Lots 3 and 4;
Sec. 2, Lots 1 and 2, S½NE¼.

The land described aggregates 1,419.04 acres.

The purpose of the proposed withdrawal is to protect the essential habitat of the Warm Springs Pupfish *(Cyprinodon nevadensis petoralis)*, a Federally listed endangered species. This action is an objective of the approved Warm Springs Pupfish Recovery Plan.

Pursuant to section 204(h) of the Federal Land Policy and Management Act of 1976, 90 Stat. 2754, notice is hereby given that an opportunity for a public hearing is afforded in connection with the pending withdrawal application. All interested persons who desire to be heard on the proposed withdrawal must file a written request for a hearing with the State Director, Bureau of Land Management, at the address shown below within 40 days from the date of publication of this notice. Upon determination by the State Director that a public hearing will be held, a notice will be published in the Federal Register, giving the time and place of such hearings. The hearing will be scheduled and conducted in accordance with BLM Manual Sec. 2351.16 B. All previous comments submitted in connection with the withdrawal application have been included in the record and will be considered in making a final determination on the application.

In lieu of or in addition to attendance at a scheduled public hearing, written comments or objections to the pending withdrawal application may be filed with the undersigned authorized officer of the Bureau of Land Management within the 40 day period allowed.

The above described lands are temporarily segregated from the operation of the public land laws, including the mining laws, to the extent that the withdrawal applied for, if and when effected, would prevent any form of disposal or appropriation under such laws. Segregation will terminate two years from the date of this notice.

All correspondence in connection with this withdrawal should be addressed to the Bureau of Land Management, Department of the Interior, Chief, Division of Technical Services, 300 Booth Street, P.O. Box 12000, Reno, Nevada 89520.

Charles E. Hancock,

Acting Chief Division of Technical Services.

BILLING CODE 4310-84-M

[Colorado 17593]

Order Providing for Opening of Public Lands and National Forest Lands; Proposed Withdrawal and Opportunity for Public Hearing

AGENCY: Bureau of Land Management, Interior.

ACTION: Order providing for opening of public lands and national forest lands; notice of proposed withdrawal and opportunity for public hearing.

SUMMARY: On January 31, 1973 the Water and Power Resources Service (formerly Bureau of Reclamation) filed application C-17593 for a withdrawal of additional public and National Forest lands for the Fryingpan-Arkansas Reclamation Project. On February 2, 1973 this proposed withdrawal was posted to the public records, thereby segregating the lands. On January 25, 1980, Water and Power Resources Service filed an amended application deleting some of the land orginally applied for. The deleted land is now being restored to operation of the appropriate land laws.

FOR FURTHER INFORMATION CONTACT: Alvah Q. Whitledge, 303-837-2825 at the Bureau of Land Management, Colorado State Office, 1600 Broadway, Denver, Colorado 80202.

1. On February 2, 1973 the following described national forest lands were

segregated from location and entry under the general mining laws. The public lands were segregated from operation of the public land laws, including the general mining laws. All lands remained open to the mineral leasing laws.

T. 10 S., R. 80 W., 6th P.M.
Section 17: SW¼NW¼, SW¼
Section 18: SE¼NE¼
* Section 20: N½N½, E½SW¼, SE¼
* Section 29: S½NE¼
Aggregating 1,480.00 acres more or less.
* National Forest Lands.
T. 9 S., R. 81 W., 6th P.M.
Section 36: N½
T. 11 S., R. 81 W., 6th P.M.
* Section 25: SW¼NW¼, N½SW¼, S½S½, NW¼SE¼
* Section 26: SE¼NE¼, E½SE¼

On January 25, 1980, Water and Power Resources Service amended their application to delete all but the following described lands from this application:

T. 10 S., R. 80 W., 6th P.M., Lake County, Colorado

A strip of land being 60 feet in width, being 30 feet each side of the Mt. Elbert Conduit centerline and being more particularly described as follows:

(A) Beginning at Station 402+33.64 a point which bears S47°11'W a distance of 1,934.1 feet from the Northeast corner of Section 29.

Thence on a tangent S23°41'E a distance of 514.27 feet to P.C. Station 407+47.91;

Thence on a tangent S34°30'E a distance of 483.56 feet to P.C. Station 288+71.06;

Thence on a curve to the right with a radius of 3000.00 feet for 335.25 feet to P.T. Equation Station 292+06.31 BK=293+75.51 AH;

Thence on a tangent S28°06'E a distance of 599.27 feet to P.T. Station 299+74.78 a point on the East line of Section 18;

Thence on a tangent S28°06'E a distance of 3,166.97 feet to P.T. Station 331+41.75 a point on the South line of Section 17;

Thence on a tangent S28°96'E a distance of 1,508.17 feet to P.T. Station 346+49.92 (containing 8.39 acres more or less).

All bearings stated above are grid bearings from Colorado State Plane Coordinates. The area described aggregates approximately 14.06 acres.

3. Therefore, at 10:00 a.m. on May 5, 1980 the deleted National Forest lands and public lands will be relieved of the segregative effect of this withdrawal application subject to any valid existing rights.

Any valid applications received prior to 10:00 a.m. on May 5, 1980 shall be considered simultaneously filed at that time. Applications received thereafter shall be considered in the order of filing.

4. This publication is to be considered notice of the proposed withdrawal of the lands described in paragraph 2 above, and opportunity for public hearing regarding the proposed withdrawal pursuant to Section 204(h), Federal Land Policy and Management Act of 1976 (90 Stat. 2754). All persons who desire to be heard on the proposed withdrawal must file a written request for hearing with the State Director, Bureau of Land Management, Colorado State Office, 1600 Broadway, Denver, CO 80202.

This must be done or before May 5, 1980.

If a public hearing is to be held, notice of such hearing will be published in the Federal Register giving the time and place. The hearing will be scheduled in accordance with BLM Manual Section 2351.16B.

In lieu of or in addition to attendance at a scheduled public hearing, written comments or objections to the proposed withdrawal application may be filed with the Bureau of Land Management on or before May 5, 1980.

5. The lands described in paragraph 2 remain temporarily segregated from the operation of the public land laws, including the mining laws, to the extent that the withdrawal applied for, if and when effected, will prevent any form of disposal or appropriation under such laws. Current administrative jurisdiction over the segregated lands will not be affected by the temporary segregation. In accordance with Section 204(g) of the Federal Land Policy and Management Act of 1976, the segregative effect of the pending withdrawal application will terminate on October 21, 1991, unless sooner terminated by action of the Secretary of the Interior.

Robert D. Dinsmore,

Chief, Branch of Adjudication.

BILLING CODE 4310-84-M

Status of California's Wilderness Inventory Program

Part I—Wilderness Inventory of Public Lands Outside the California Desert Conservation Area

A. Status of previously announced decisions: "Final Intensive Inventory, Public Lands administered by BLM California outside the California Desert Conservation area—Wilderness," December 1979.

The final intensive wilderness inventory decisions, for public lands administered by the California State Office, Bureau of Land Management, were announced in the above report and by a Federal Register Notice on January 7, 1980. A total of 3,203,000 acres in 266 inventory units were intensively inventoried. Ninety-three inventory units or parts thereof, totaling 1,134,000 acres were identified as Wilderness Study Area's (WSA's). Two hundred thirty two inventory units or parts thereof, totaling 2,069,000 acres were found not to qualify as WSA's.

1. *Final Decisions.*

The January 7, 1980, Federal Register Notice established a 30 day protest period which closed on February 5, 1980. With the exception of those inventory units on which a protest was filed, my previously announced decisions are now final. The inventory decisions are final for the following units:

Bakersfield District CA-010—002, 007, 011, 012, 016, 017, 020, 025, 026, 030, 032, 035, 036, 037, 042, 046, 052, 070, 071, 072, 074, 077, 078, 079, 085, 090, 091A, 092, 094, 095, 096, 097, 099, 100, 102, 103, 105A, 105B, 108, and 109.

Susanville District CA-020—002, 102A, 102B, 103, 103A, 103B, 104, 104A, 105, 202, 205, 206, 207, 207A, 208, 208A, 212A, 303A, 303B, 304, 305, 306, 308A, 309A, 310A, 310B, 311, 312A, 313B, 602, 603, 605A, 610, 612, 614A, 615, 616, 617, 617A, 619, 619A, 619D, 619E, 619F, 620, 704, 704A, 705A, 708, 802, 803, 804, 805, 805A, 806, 808, 809, 810, 811, 812, 813, 814, 815, 818, 819, 821A, 905A, 905B, 905C, 906, 909, 909A, 911, 912, 917, 918, 1004A, 1006A, 1006B, 1009A, 1012, and 1015.

Redding District CA-030—101, 201, 203, 204, and 503.

Folsom District CA-040—102, 201, 301A, 301B, 303, 305A, 305B, 305C, 308, and 309.

Ukiah District CA-050—111, 112, 113, 121, 132, 212, 221, 222, 313, 314, 315, 317, and 331.

Riverside District CA-060—002, 020A, 020B, 020C, 020F, 020G, 021A, 021B, 022, 023, 024A, 024B, 024C, 024D, 024E, 025A, 025B, 027A, 027B, 027C, 027D, 028, and 029.

The identified WSA's in the above inventory units will continue to be subject to the interim management requirements of Section 603–C of the Federal Land Policy and Management Act of 1976 (FLPMA). The non-WSA units or parts of units are no longer under these interim management requirements.

2. *Protested Decisions.*

For any unit on which a protest was filed my announed decision is stayed until the protest and administrative appeal process is completed. Protests were received on the following inventory units:

Bakersfield District CA–010—022, 023, 027, 028, 029, 040, 045, 055, 056, 057, 058, 059, 060, 062, 063, 064, 065, 068, 075, 080, 081, 082, 083, 084, 088, 091B, 104, 106, and 110.

Susanville District CA–020—003, 004, 005, 006, 102, 209, 210, 211, 212, 303, 307, 308, 309, 310, 313, 313A, 402, 604, 605, 605B, 606, 608, 609, 611, 613, 614, 619B, 619C, 703, 705, 706, 904, 905, 910, 911A, 913A, 913B, 915, 916, 1006, 1007, 1008, 1009, and 1013.

Redding District CA–030—402, 501, and 504.

Folsom District CA–040—202, 203, and 207.

Ukiah District CA–050—131, 134, 135, 211, 213, 214, 312, 316, 318, 319, and 332.

Riverside District CA–060—020D, 020E, and 026.

In summary protests have been received on a total of 93 intensive inventory units containing 1,295,533 acres of public land. Of this 279,664 acres were identified as WSA's and 1,015,869 acres as not meeting the criteria for designation as a WSA. Protested inventory units remain under the interim management requirements of Section 603–C of FLPMA while the unit is under protest or appeal. I expect to announce my decisions on these protests in the **Federal Register** about June or July.

3. *Appealed Decisions* (Final Initial Inventory, July 1979).

As announced in our December 1979 report and our **Federal Register** Notice of January 7, 1980, the following 12 initial wilderness inventory units have been formally appealed to the Interior Board of Land Appeals (IBLA):

CA–010–031, 033, 047, 069, 087, 101, CA–020–701, 901, 1001, CA–030–300, 400, and 500.

As of the time of preparation of this notice, all or portions of these units were still under appeal and they remain under the interim management restrictions of Section 603–C of FLPMA.

B. Proposed Decisions.

As announced in the above report (Final Intensive Inventory, December, 1979) my intensive wilderness inventory decisions were deferred on several interstate units. These interstate inventory units are roadless areas of public land which across BLM State Office administrative boundries. The interstate unit may or may not also cross State boundries.

The California administered portion of each interstate unit was published in draft form on July 16, 1979 (**Federal Register**, Vol. 44, No. 137, Monday July 16, 1979 pp. 41354 and 41355) and was subjected to a 90 day public comment period. Publication of these joint proposed decisions starts a new 90 day public comment period on the entire roadless inventory unit.

The public is invited to comment on the draft narrative findings and maps and to submit additional information to assist in the assessment of wilderness characteristics on these public lands. All comments will be treated equally whether they are sent by mail or provided in writing or orally at a public meeting. Public meetings are being announced by the Oregon and Nevada State Directors.

A copy of the draft summary report and maps for both the Oregon-California and the Nevada-California interstate units is being sent to all persons on California's mailing list. One inventory unit was originally thought to be an interstate unit but additional road definition showed it to be administered entirely by the California State Office. It is included in the Nevada-California report to allow for additional public review. Additional copies of these reports are available from the State Director (Wilderness), Bureau of Land Management, 2800 Cottage Way, Rm. E–2841, Sacramento, California 95825. (Copies of the draft interstate inventory reports are also available from the appropriate adjacent state office. For Oregon-California units this is the State Director, Bureau of Land Management, P.O. Box 2965, Portland, Oregon 92708. For Nevada-California units this is the State Director, Bureau of Land Management, 300 Booth Street, P.O. Box 12000, Reno, Nevada 89520.)

Under authority delegated to me be the Director, Bureau of Land Management, I hereby determine that the public lands in these interstate inventory units which are administered by the Bureau of Land Management, California have been inventoried according to the provisions of the Bureau's Wilderness Inventory Handbook of September 27, 1978 and that a joint proposed decision has been reached for the entire interstate unit by the affected State Directors.

These interstate units include 232,980 acres administered by the California State Office. Of this 118,470 acres in all or part of 4 inventory units are proposed as WSA's and 114, 510 acres in all or part of 12 units are proposed as lacking wilderness characteristics. (There is a total of 320,735 acres of public land in 15 inventory units; 87,755 acres are administered by an adjoining BLM State Office.) These inventory units and proposed decisions are as follows:

1. Oregon-California Interstate Units.

The Oregon State Director announced his decisions on the Oregon-California interstate units in **Federal Register** Notice scheduled to have been published on March 27, 1980. The 90 day public review period for these units closes June 25, 1980.

(a) Units proposed as WSA's: None

(b) Units proposed as lacking wilderness characteristics.

	Oregon State Office	California State Office		Total Public Land
	Oregon	Nevada	California	
1–126/CA–020–1010, Coleman Valley/Macy Flat	(23,640)	13,060		36,700
1–157/CA–020–1005, Coleman Valley West/ Coleman Ranch	(10,000)	13,005		23,005
1–164/CA–020–1004, Snuff/Twelve Mile Creek	(1,440)	11,670	3,020	16,130
Total	(35,080)	37,735	3,020	75,835

2. Nevada—California Interstate Units.

The Nevada State Director is scheduled to announce his decisions on the portions of the Nevada—California interstate units administered by the Nevada State Office on April 1, 1980. The 90 day public review period for these units closes June 30, 1980.

(a) Units proposed as WSA's.

	Nevada State Office		California State Office		Total Public Land
	NV	CA	NV	CA	
NV-020-006A/ CA-020-914, East Fork High Rock Canyon	(7,470)		46,450		53,920
NV-020-008/ CA-020-913, Little High Rock Canyon [1]	(8,703)		43,440		52,143
NV-020-012/ CA-020-618, 612 Poodle Mountain [1]	(102,449)		25,380		127,829
NV-030-531/ CA-010-105, Slinkard		(2,240)		3,200	5,440
Total	(118,622)	(2,240)	115,270	3,200	239,332

[1] Part of unit not a WSA.

(b) Units Proposed as lacking wilderness characteristics.

	Nevada State Office	California State Office		Total Public Lands
	NV	NV	CA	
NV-020-001/CA-020-919, Ten Mile Spring	(9,800)	1,590		11,470
NV-020-004/CA-020-813A8B, Hog Ranch Mountain	(4,620)	5,360		9,980
NV-020-006/CA-020-914A, Warm Springs Canyon	(56,419)	8,950		65,369
NV-020-008/CA-020-913, Little High Rock Canyon [1]	(430)	1,000		1,430
NV-020-009/CA-020-823, Leadville	(25,703)	1,320		27,023
NV-020-010/CA-020-816, 820, 821, Crutcher	(17,100)	35,645		52,745
NV-020-012/CA-020-618, 621, Poodle Mountain	(8,651)	680		9,331
NV-020-021/CA-020-822A & B, 823, No Name	(4,110)	1,120		5,230
NV-030-603/CA-020-403, Fort Sage Mountain	(10,200)		12,790	22,990
Total	(137,113)	55,665	12,790	205,568

[1] Most of unit is a WSA.

3. California Inventory Unit.

One unit, CA-020-822, was reported in our December 1979 Final Intensive Inventory Report as being deferred because it was an interstate unit. Further road definition has separated off units CA-020-822A and CA-020-822B leaving unit CA-020-822 as a non-interstate unit. This unit is being republished to allow for additional public comment. The comment period for this unit closes on June 30, 1980.

Unit Proposed as Lacking Wilderness Characteristics

	California State Office—Nevada	Total Public Land
CA-020-822 Negro Creek	5,300	5,300

4. Summary of proposed intensive inventory decisions (items B-1, 2, and 3 above) by State and by District.

Public Lands Administered by the California State Office

	Units [1]	Acres
State of Nevada:		
Susanville district:		
Proposed as WSA	3	115,270
Proposed as non-WSA	12	98,700
Subtotal		213,970
State of California:		
Bakersfield district:		
Proposed as WSA	1	3,200
Susanville district:		
Proposed as non-WSA	2	15,810
Subtotal		19,010
Grand total		232,980

[1] An inventory unit may fall into more than one category.

The proposed intensive inventory decisions for the contiguous public lands in these interstate units which is administered by another state office are being announced by the State Director of that office as stated in items B-1 and B-2 above. A final decision is expected to be announced in September 1980.

Part II—California Desert Conservation Area, Final Wilderness Inventory, March 31, 1979, and Amendments and Clarifications, December 27, 1979

The status of the California Desert Conservation Area (CDCA) wilderness inventory was announced in a Federal Register Notice on January 7, 1980. That notice divided the wilderness inventory units for the CDCA into three categories based on their status at that time. This notice uses the same categories and gives the current status of the inventory units in each group.

1. Final Decisions: The above Federal Register Notice listed the units on which the wilderness inventory decision was final. Area 367 was omitted from this list and area 376A was erroneously listed as 367A (following area 375). The wilderness inventory is final for both area 367 and 376A. (The complete list is on page 1456 of the January 7, 1980 Federal Register Notice).

2. Amended Decisions: The above notice listed five units for which an amended inventory decision had been made. The protest period closed on February 5, 1980, and the amended decision is now final for areas 145, 159, 184, 184A, and 184B.

3. Appealed Decisions: The above notice listed 30 inventory units which had been appealed to the Interior Board of Land Appeals. These 30 units are: Areas 117, 131, 136, 137A, 143, 150, 156, 158, 172, 207, 217, 221, 222, 227, 242, 251, 251A, 263, 264, 265, 266, 271, 299, 305, 321, 325, 334, 343, 348, and 376. As of the time of preparation of this notice, these units were still under appeal and they remain under the interim management restrictions of Section 603-C of FLPMA.

Part III—Summary of California's BLM Wilderness Inventory to date.

The following table summarizes the present status of the BLM, California State Office wilderness inventory program.

		Public land acres
State of California		16,434,000
California Desert Conservation Area (CDCA) [1]		12,120,000
Areas lacking wilderness characteristics		(6,617,000)
Areas with wilderness characteristics (WSA's)		(5,503,000)
Outside the CDCA		4,314,000
Areas lacking wilderness characteristics		(3,476,000)
Dropped in the Initial Inventory [2]	2,160,000	
Dropped in the Intensive Inventory [3]	1,301,000	
Proposed to be dropped	16,000	
Areas with wilderness characteristics (WSA's)		(838,000)
Identified WSA's in the Intensive Inventory [3]	835,000	
Proposed WSA's	3,000	
State of Nevada (administered by CA State Office)		1,433,000
Areas lacking wilderness characteristics		(1,018,000)
Dropped in the Initial Inventory [2]	151,000	
Dropped in the Intensive Inventory [3]	768,000	
Proposed to be dropped	99,000	
Areas with wilderness characteristics (WSA's)		(415,000)
Identified WSA's in the Intensive Inventory [3]	300,000	
Proposed WSA's	115,000	

[1] CDCA—Thirty inventory units totaling 3,197,000 acres have been appealed to the Interior Board of Land Appeals (IBLA).

[2] Initial Inventory—Twelve inventory units totaling 443,175 acres have been appealed to IBLA.

[3] Intensive Inventory—Ninty-three inventory units totaling 1,295,533 acres have been protested (see item I-A-2 above).

James B. Ruch,

State Director, California.

BILLING CODE 4310-84-M

Western Slope Carbon, Inc., Notice of Invitation

Western Slope Carbon, Inc. has filed Application Number C-30007 with the Denver Office of the Bureau of Land Management for a license to conduct coal exploration work on the following tract in Gunnison County, Colorado:

T 13 S., R 90 W., 6th P.M.
Sec. 1: N. ½;

Sec. 2: N. ½;
Sec. 3: N. ½;
Sec. 4: N. ½; SW ¼.

The company is planning to drill three exploratory holes, one in each section of the tract described. A copy of the exploration plan is available for public inspection at the Denver BLM office.

The Public Is Hereby Invited To Participate in Western Slope Carbon's exploration program under the license applied for. Any interested party is invited to notify the Leader of the Montrose Team, Branch of Adjudication of the Bureau of Land Management, Room 700, Colorado State Bank Bldg., Denver, Colorado 80202, and Western Slope Carbon at 315 East 200 South, Salt Lake City, Utah 84111, attention of Al Amundson, Chief Engineer, Tel. 801/534–3329. Such notifications must be received, in writing, by both the BLM Office and Western Slope Carbon within 30 days after the publication of this Notice in the **Federal Register** (May 5, 1980) which is expected to occur approximately 10 days after its first publication in this newspaper. Any interested party must pay its prorata share of all exploration costs related to this license.

This Notice is published by Western Slope Carbon pursuant to the requirements of the applicable Coal Management Regulations, Subpart 3410 of Title 43 of the Code of Federal Regulations.

Merrill G. Anderson,

Team Leader, Montrose Branch of Adjudication.

BILLING CODE 4310–84–M

Fish and Wildlife Service

Availability of Environmental Assessments for Wildlife Restoration Projects

AGENCY: Fish and Wildlife Service, Department of the Interior.

ACTION: Notice of availability for inspection and public comment.

SUMMARY: This notice provides a listing of Environmental Assessments available for public review to supplement those previously listed in the **Federal Register** July 20, August 3, September 6, October 5, November 16, and December 27, 1979, and March 7, 1980. The Assessments and Findings of No Significant Impact were prepared on certain projects conducted by State fish and wildlife agencies under the Federal Aid in Wildlife Restoration program. The public is invited to comment, and information is provided on the locations at which the documents may be reviewed.

DATE: Comments must be received at the locations indicated by May 5, 1980.

ADDRESSES: The assessments are available for inspection at the following locations:

FWS Federal Aid Office, 1000 N. Glebe Road, Arlington, Virginia 22201.
Region 1, FWS, Lloyd 500 Building, Suite 1692, 500 N.E. Multnomah Street, Portland, Oregon 97232.
Region 2, FWS, 500 Gold Avenue, S.W., P.O. Box 1306, Albuquerque, New Mexico 87103.
Region 3, FWS, Federal Building, Fort Snelling, Twin Cities, Minnesota 55111.
Region 4, FWS, Richard B. Russell Federal Building, 75 Spring Street, SW., Atlanta, Georgia 30303.
Region 5, FWS, 1 Gateway Center, Suite 700, Newton Corners, Massachusetts 02158.
Region 6, FWS, P.O. Box 25486, Denver Federal Center, Denver, Colorado 80225.
Alaska Area Office, FWS, 1011 E. Tudor Road, Anchorage, Alaska 99507.
Central headquarters office of the State fish and wildlife agency.

Interested persons are invited to submit comments to the appropriate Regional Director at the above regional addresses on or before May 5, 1980. Copies of the assessment may be obtained at the Regional Offices upon payment of reasonable reproduction costs pursuant to 43 CFR, Part 2, Appendix A. Copies of any Finding of No Significant Impact will be provided free of cost.

FOR FURTHER INFORMATION CONTACT: Mr. Charles K. Phenicie, Chief, Division of Federal Aid, U.S. Fish and Wildlife Service, Washington, D.C. 20240, telephone 703–235–1526.

SUPPLEMENTARY INFORMATION: On June 26, 1979, the U.S. District Court for the District of Columbia issued an order dismissing Civil Action No. 78–430 involving the Federal Aid in Wildlife Restoration program. The dismissal effected an agreement by plaintiffs and defendants which included a provision that the Fish and Wildlife Service would publish in the **Federal Register** a notice of availability of certain Environmental Assessments for inspection and public comment. Pursuant to the stipulated agreement, this notice lists Environmental Assessments prepared to date and will be supplemented as other assessments are prepared.

The principal author of this notice is Dr. Robert J. Sousa, U.S. Fish and Wildlife Service, Division of Federal Aid, Washington, D.C. 20240, telephone 703–235–1526.

Notice is hereby given of availability for inspection and comment of environmental assessments for the following Federal Aid project funded in part by the U.S. Fish and Wildlife Service (FWS) under the Pittman-Robertson Federal Aid in Wildlife Restoration Act, 16 U.S.C. 669 et seq: (Activities listed are not exclusive.)

Region 6

Colorado W–111–D: This regional development project covers management and maintenance activities on 17 Wildlife Management Areas in the northwest quadrant of Colorado. Work is directed toward maintenance of facilities and habitat conditions for game and nongame wildlife species and provision of public use opportunities for wildlife-oriented recreation. Among project activities are herbaceous seeding, rangeland rehabilitation, vegetation control, and routine maintenance of all existing facilities.

Dated: March 31, 1980.

Robert S. Cook,

Acting Director, U.S. Fish and Wildlife Service.

BILLING CODE 4310–55–M

National Park Service

Committee for the Preservation of the White House; Meeting

Notice is hereby given in accordance with the Federal Advisory Committee Act that a meeting of the Committee for the Preservation of the White House will be held at 2:00 p.m. on Friday, May 2, 1980, in the Indian Treaty Room of the Old Executive Office Building (on Pennsylvania Avenue, NW., just west of the White House), Washington, D.C.

The Committee was established for the purpose of advising the Director of the National Park Service so that he may make recommendations to the President concerning the preservation and the interpretation of the museum character of the principal corridor on the ground floor and the principal public rooms on the first floor of the White House. The Committee shall make recommendations as to the articles of furniture, fixtures, and decorative objects which shall be used or displayed in the aforesaid areas of the White House and to the decor and arrangements therein best suited to enhance the historic and artistic values of the White House and of such articles, fixtures, and objects.

Purpose of the meeting: The Committee will discuss and recommend priorities for acquisition to the White House Collection, receive subcommittee reports and reports on previous acquisitions and loans.

The meeting will be open to the public. Public attendance depending on available space will be limited to those who have notified the Executive Secretary of the Committee in writing at least 5 days prior to the meeting of their intention to attend the May 2 meeting.

Any member of the public may file a written statement with the Committee before, during or after the meeting. To the extent that time permits the Committee Chairman may allow public participation.

All communication regarding the Committee should be addressed to Mr. Elmer S. Atkins, Executive Secretary, Committee for the Preservation of the White House, Room 344, 1100 Ohio Drive, SW., Washington, D.C. 20242.

Dated: March 28, 1980.

Manus J. Fish, Jr.,

Regional Director, National Capital Region.

BILLING CODE 4310-10-M

Water and Power Resources Service

Interim Water Service Contracts; Intent To Enter Into Interim Water Service Contracts

The Water and Power Resources Service (Service), Department of the Interior, may enter into interim water service contracts for irrigation and municipal and industrial (M&I) water when such water is available and surplus to project needs. Contracts of this type can be entered into upon short notice to meet emergency needs or temporary demands. However, without departmental approval, such contracts may not exceed 1 years in duration and are limited to not more than 10,000 acre-feet per irrigation contract or 500 acre-feet per M&I contract. All interim contracts will specify quantities, rates and other terms and conditions in compliance with Reclamation law and Service policy.

The Regional Director, Amarillo, Texas, has authority to execute interim water service contracts of not to exceed 1 year in duration and not more than 2,000 acre-feet per irrigation contract or 500 acre-feet per M&I contract in Texas, Oklahoma, southern Kansas, and all but the extreme western portions of New Mexico. At this time, it appears that water, surplus to project needs, will be available for sale from the San Juan-Chama Project, New Mexico. The New Mexico Interstate Stream Commission has expressed interest in negotiating an interim water service contract for a period of 1 year and for up to 2,000 acre-feet of water from the San Juan-Chamas Project. The water will be used by the Commission to provide emergency agricultural water supplies to prevent crop losses in New Mexico.

Approximately 5,000 acre-feet of San Juan-Chama Project water is estimated to be surplus to project needs in 1980. Pursuant to Service policy, interim water service for irrigation will be provided at a cost equal to a proportionate share of annual operation and maintenance costs and an appropriate share of capital costs. In past years the cost of interim irrigation water service from the San Juan-Chama Project has ranged from $4.70 to $5.20 per acre-foot.

Other Service projects in the region with regulated reservoir storage may have minor quantities of surplus water available this year to meet temporary or emergency demands. All releases will be subject to State laws for beneficial use and prior appropriation rights.

Parties interested in receiving information about the Service's interim water marketing program should contact Mr. Ira M. Stevens, Repayment and Economics Branch, Water and Power Resources Service, 714 South Tyler, Suite 201, Amarillo, Texas 79101, telephone (806) 378-5430. Unless significant public interest in the proposed interim water marketing program is demonstrated in response to this notice, announcement of the availability of negotiated draft contracts will be limited to those parties who have expressed an interest therein. Written comments on any draft contract must be submitted not later than 30 days after the completed draft is declared available.

Parties interested in obtaining a temporary supply of water from a Service project should apply in writing to the Regional Director, Water and Power Resources Service, Amarillo, Texas, at the above address.

Dated: March 25, 1980.

Clifford I. Barrett,

Assistant Commissioner of Water and Power Resources.

BILLING CODE 4310-09-M

INTERSTATE COMMERCE COMMISSION

Motor Carrier Finance Applications; Decision-Notice

The following applications seek approval to consolidate, purchase, merge, lease operating rights and properties, or acquire control of motor carriers pursuant to 49 U.S.C. 11343 and 11344. Also, applications directly related to these motor finance applications (such as conversions, gateway eliminations, and securities issuances) may be involved.

The applications are governed by Special Rule 240 of the Commission's Rules of Practice (49 CFR § 1100.240). These rules provide, among other things, that opposition to the granting of an application must be filed with the Commission within 30 days after the date of notice of filing of the application is published in the **Federal Register.** Failure seasonably to oppose will be construed as a waiver of opposition and participation in the proceeding. Opposition under these rules should comply with Rule 240(c) of the Rules of Practice which requires that it set forth specifically the grounds upon which it is made, and specify with particularity the facts, matter and things relied upon, but shall not include issues or allegations phrased generally. Opposition not in reasonable compliance with the requirements of the rules may be rejected. The original and one copy of any protest shall be filed with the Commission, and a copy shall also be served upon applicant's representative or applicant if no representative is named. If the protest includes a request for oral hearing, the request shall meet the requirements of Rule 240(c)(4) of the special rules and shall include the certification required.

Section 240(c) further provides, in part, that an applicant who does not intend timely to prosecute its application shall promptly request its dismissal.

Further processing steps will be by Commission notice or order which will be served on each party of record. *Broadening amendments will not be accepted after the date of this publication except for good cause shown.*

Any authority granted may reflect administratively acceptable restrictive amendments to the transaction proposed. Some of the applications may have been modified to conform with Commission policy.

We find with the exception of those applications involving impediments (e.g., jurisdictional problems, unresolved fitness questions, questions involving possible unlawful control, or improper division of operating rights) that each applicant has demonstrated, in accordance with the applicable provisions of 49 U.S.C. 11301, 11302, 11343, 11344, and 11349, and with the Commission's rules and regulations, that the proposed transaction should be authorized as stated below. Except where specifically noted this decision is neither a major Federal action significantly affecting the quality of the

human environment nor does it appear to qualify as a major regulatory action under the Energy Policy and Conservation Act of 1975.

In those proceedings containing a statement or note that dual operations are or may be involved we find, preliminarily and in the absence of the issue being raised by a protestant, that the proposed dual operations are consistent with the public interest and the national transportation policy subject to the right of the Commission, which is expressly reserved, to impose such conditions as it finds necessary to insure that applicant's operations shall conform to the provisions of 49 U.S.C. 10930.

In the absence of legally sufficient protests as to the finance application *or* any application directly related thereto filed within 30 days of publication (or, if the application later becomes unopposed), appropriate authority will be issued to each applicant (except those with impediments) upon compliance with certain requirements which will be set forth in a notification of effectiveness of this decision-notice. To the extent that the authority sought below may duplicate an applicant's existing authority, the duplication shall not be construed as conferring more than a single operating right.

Applicant(s) must comply with all conditions set forth in the grant or grants of authority within the time period specified in the notice of effectiveness of this decision-notice, or the application of a non-complying applicant shall stand denied.

MC–F–14260F, filed December 11, 1979. COORS TRANSPORTATION COMPANY (Coors) (5101 York Street, Denver, CO)—purchase (portion)—Lucius, Inc. (Lucius) (9250 North Wadsworth Blvd., Broomfield, CO 80020). Representative: Leslie R. Kehl, 1600 Lincoln Center Bldg., 1660 Lincoln Street, Denver, CO 80264. Coors is seeking authority to purchase a portion of the interstate operating rights of Lucius. Adolph Coors Company, a non-carrier and the sole stockholder of Coors, seeks to acquire control of said rights through the transaction. Coors is purchasing that portion of the interstate operating rights contained in certificates issued to Lucius in MC–138069 (Sub-No. 2 and 7), which authorizes the transportation of *alcoholic beverages and non-alcoholic beverage mixes,* (except commodities in bulk), over irregular routes, (1) from points in CA, to Denver, CO, and (2) from points in CA, to Pueblo, CO, restricted in (1) and (2) above to the transportation of traffic destined to the named destinations. Lucius is retaining that portion of MC–138069 (Sub-Nos. 2 and 7) which authorizes the transportation of *alcoholic beverages and non-alcoholic beverage mixes* (except commodities in bulk), over irregular routes, (1) from points in MI and LA and St. Louis, MO, to Denver, CO; (2) from points in IL, IN, KY, TX (except Houston), to Denver, CO; (3) from Houston, TX, to Denver, CO, (4) from Cincinnati, OH, to Denver, CO, and (5) from St. Louis, MO, Cincinnati, OH, and points in IL, IN, KY, LA, MI, and TX, to Pueblo, CO, restricted in (1) through (5) above to the transportation of traffic destined to the named destinations. Coors is authorized to operate as a motor common carrier pursuant to certificates issued in MC–145054 and sub-numbers thereunder and as a motor contract carrier pursuant to permits issued in MC–136407 and sub-numbers thereunder throughout the States of AZ, CA, CO, KS, ID, LA, OK, OR, MT, NM, NE, NV, TX, UT, WA, and WY. (Hearing site: Denver, CO.)

Notes.—(1) Application has been filed for temporary authority under 49 U.S.C. 11349. (2) Dual operations may be involved.

MC–F–14321F, filed February 21, 1980. SMITHWAY COACHES, LTD. (Smithway) (P.O. Box 404, Ft. Dodge, IA 50501)—purchase—Fort Dodge Transportation Company (Fort Dodge) (One North 20th Street, P.O. Box 654, Fort Dodge, IA 50501). Representative: Arlyn L. Westergren, Suite 106, 7101 Mercy Road, Omaha, NE 68106. Smithway seeks authority to purchase the interstate operating rights of Fort Dodge. Harold C. Smith, Russell J. Hilken, and William G. Smith, equal stockholders of Smithway also seek authority to acquire control of said rights through the transaction. Smithway is purchasing the interstate operating rights contained in Fort Dodge's Certificates in MC–117324 and subnumbers thereunder, which authorize operations, in interstate or foreign commerce, as a motor common carrier, as follows: (1) *Passengers and their baggage,* in round-trip charter operations, over irregular routes, beginning and ending at Fort Dodge, IA, and points within 50 miles thereof, and extending to points in MN, WI, IL, NE, MO, AR, CO, CA, NY, LA, SD, and DC; (2) *Passengers and their baggage,* and *express, mail, and newspapers* in the same vehicle with passengers, over regular routes, (a) between Algona and Fort Dodge, IA, serving all intermediate points: from Algona over U.S. Hwy 169 to junction IA Hwy 222, then over IA Hwy 222 to Livermore, IA, than return over IA Hwy 222 to junction U.S. Hwy 169, then over U.S. Hwy 169 to junction IA Hwy 413, then over IA Hwy 413 to Fort Dodge, and return over the same route, and (b) between Fort Dodge and Spirit Lake, IA, serving all intermediate points; from Fort Dodge over IA Hwy 413 to junction U.S. Hwy 169, then over U.S. Hwy 169 to Humboldt, IA, then over IA Hwy 3 to Pocahontas, IA, then over IA Hwy 17 to junction IA Hwy 10, then over IA Hwy 10 to Havelock, IA, then return over IA Hwy 10 to junction IA Hwy 17, then over IA Hwy 17 to junction unnumbered hwy, then over unnumbered hwy to Mallard, IA, then return over unnumbered hwy to junction IA Hwy 17, then over IA Hwy 17 to junction unnumbered hwy, then over unnumbered hwy to Graettinger, IA, then return over unnumbered hwy to junction IA Hwy 17, then over IA Hwy 17 to Estherville, IA, then over IA Hwy 9 to Spirit Lake, and return over the same route; (3) *Passengers and their baggage,* and *express and newspapers* in the same vehicle with passengers, over regular routes, between Spirit Lake, IA, and Worthington, MN, serving all intermediate points: from Spirit Lake over IA Hwy 9 to junction IA Hwy 238, then over IA Hwy 238 to Harris, IA, then over unnumbered county hwys to the IA–MN State line, then over MN Hwy 264 to Round Lake, MN, then over unnumbered county road to Worthington, MN, and return over the same route; (4) *Passengers and their baggage,* in round-trip charter and special operations, over irregular routes, beginning and ending at points in Carroll, Greene, Sac, Calhoun, Webster, Hamilton, Hardin, Buena Vista, Pocahontas, Humboldt, Wright, Franklin, Palo Alto, Hancock, Kossuth, Emmet, and Dickinson Counties, IA, and Nobles County, MN, and points in that part of Boone County, IA, on and west of IA Hwy 17, and extending to points in the United States (including AK, but excluding HI); and (5) *Passengers and their baggage,* and *express* moving in the same vehicle with passengers, over regular routes, between Humboldt and Hampton, IA, serving all intermediate points on the specified routes: from Humboldt over IA Hwy 3 to junction IA Hwy 302, then over IA Hwy 302 to Thor, IA, then return over IA Hwy 302 to junction IA Hwy 3, then over IA Hwy 3 to junction IA Hwy 17, then over IA Hwy 17 to Eagle Grove, IA, then return over IA Hwy 17 to junction IA Hwy 3, then over IA Hwy 3 to Hampton, and return over the same route. Smithway presently holds no operating authority from the Commission. However, Smithway is affiliated with Smithway Motor Xpress, Inc., a motor common carrier pursuant to certificates in MC–

138627 and sub-numbers thereunder, which authorize the transportation of specified commodities in the States of AR, IL, IN, IA, KS, KY, MI, MN, MO, NE, ND, OH, OK, PA, SD, TN, and WI. (Hearing site: Des Moines, IA, or Omaha, NE.)

Note.—Application for temporary authority has been filed.

MC–F–14299F, filed January 22, 1980. OLIVER MOTOR SERVICE, INC. (Oliver) (P.O. Box 223, East Hwy 54, Mexico, MO 65265)—purchase—GUSTAVE A. SCHMIDT, d.b.a. SCHMIDT TRUCK LINE (Schmidt)(910 Sunset Drive, Macon, MO 63552). Representative: Leonard R. Kofkin, 39 South LaSalle Street, Chicago, IL 60603. Oliver seeks authority to purchase the interstate operating rights and property of Schmidt. John F. Oliver, the sole stockholder of Oliver, seeks authority to acquire control of said rights and property through the transaction. Oliver is purchasing the interstate operating rights of Schmidt that are contained in Certificate No. MC–81724, which authorizes the transportation, as a motor common carrier, (1) over *regular routes,* transporting: (a) *steel, steel castings,* and *fittings,* between Centralia, MO and Chicago, IL and Indianapolis, IN; (i) from Centralia over MO Hwy 22 to Mexico, MO, then over U.S. Hwy 54 to junction U.S. Hwy 36, then over U.S. Hwy 36 to Springfield, IL, and then over U.S. Hwy 66 to Chicago; (ii) from Centralia over the above-specified route to junction U.S. Hwy 36, then over U.S. Hwy 36 to Indianapolis; (iii) from Centralia over MO Hwy 22 to Mexico, MO, then over U.S. Hwy 54 to junction MO Hwy 19, then over MO Hwy 19 to junction U.S. Hwy 40, and then over U.S. Hwy 40 to Indianapolis; and return over these routes to Centralia. Service is authorized to and from the intermediate point of East St. Louis, IL and the off-route points of Alton, Monsanto, and Madison, IL; (b) *acid, in carboys,* between Monsanto, IL and Centralia, MO, from Monsanto over IL Hwy 3 to East St. Louis, IL, then over U.S. Hwy 40 to junction MO Hwy 19, then over MO Hwy 19 to junction U.S. Hwy 54, then over U.S. Hwy 54 to Mexico, MO and then over MO Hwy 22 to Centralia; and (c) *empty carboys,* from Centralia over the above-specified route to Monsanto. Service is not authorized to or from the intermediate points; and (2) over *irregular routes,* transporting: (a) *livestock,* between Centralia, MO and points within 30 miles of Centralia on the one hand, and, on the other National Stock Yards, IL; and (b) *household goods,* as defined by the Commission, between Centralia, MO and points within 15 miles of Centralia on the one hand, and, on the other, points in IL. Oliver is authorized to operate as a motor common carrier pursuant to certificates issued in MC–124511 and sub-numbers thereunder. (Hearing site: St. Louis, MO.)

Note.—Application for temporary authority has been filed.

Decided March 26, 1980.

By the Commission, Review Board Number 5, Members Krock, Taylor, and Williams.

MC–F–14311F, filed January 30, 1980. BICENTENNIAL TRANSPORT, INC. (Bicentennial) (317 North Point Blvd., Baltimore, MD 21224)—purchase (portion)—TIDEWATER INLAND EXPRESS, INC. (Tidewater) (258 Rohoboth Blvd., Milford, DE 19963). Representative: Leonard A. Jaskiewicz, 1730 M Street, NW, Suite 501, Washington, DC 20036. Bicentennial seeks authority to purchase a portion of the interstate operating rights of Tidewater. Angelo R. Teeter, the majority stockholder of Bicentennial, also seeks authority to acquire control of said rights through the transaction. Bicentennial is purchasing that portion of Tidewater's operating rights in MC 87109 (Sub-21), which authorizes the transportation, as a motor common carrier, over regular route, of *general commodities* (except those of unusual value, Classes A and B explosives, household goods as defined by the Commission, commodities in bulk, and those requiring special equipment), between Baltimore, MD, and Alexandria, VA, over U.S. Hwy 1, serving all intermediate points and the off-route points in MD and VA within 5 miles of DC and points within 6 miles of Baltimore. Bicentennial is authorized to operate as a motor contract carrier, in interstate or foreign commerce, over irregular route, under continuing contracts with Forman Brothers, Inc., of Washington, DC, pursuant to Permits issued in MC–143991 and sub-numbers thereunder. (Hearing site: Washington, DC.)

Note.—Dual operations may be involved.

MC–F–14317F, filed February 14, 1980. DeHAVEN TRANSFER & STORAGE CO., INC. (DeHaven) (2009 Russell Avenue, SW, Roanoke, VA 24010)—purchase (portion)—GILBERT STORAGE & TRANSFER CORP. (Gilbert) (P.O. Box 10425, Lynchburg, VA 24506). Representative: John R. Sims, Jr., 915 Pennsylvania Bldg., 425 13th Street, NW., Washington, DC, 20004. DeHaven seeks authority to purchase a portion of the interstate operating rights of Gilbert. George L. DeHaven, the sole stockholder of DeHaven, also seeks authority to acquire control of said rights through the transaction. DeHaven is purchasing that portion of Gilbert's Certificate MC 4194 which authorizes operations, as a motor common carrier, over irregular routes, transporting *household goods,* as defined by the Commission, between points in VA, on the one hand, and, on the other, points in KY, NC, SC, TN, WV, MD, PA, DE, NJ, NY, and DC. DeHaven is authorized to operate as a motor common carrier, in interstate or foreign commerce, over irregular routes, transporting *used household goods* and *household goods* in the States of VA, WV, IN, KY, OH, NC, VA, IL, MI, PA, NY, and DC, pursuant to certificates in MC 129335 and sub-numbers thereunder. (Hearing site: Washington, DC.)

Note.—Application for temporary authority has been filed.

MC–F–14320F, filed February 20, 1980. HOUSTON FREIGHTWAYS, INC. (Houston) (P.O. Box 473, Galena Park, TX 77547)—purchase—TOM HICKS TRANSFER COMPANY, INC. (Hicks) (P.O. box 16006, Houston, TX 77022). Representatives: J. G. Dail, Jr., P.O. Box LL, McLean, VA 22101 and C. W. Ferebee, P.O. Box 16006, Houston, TX 77022. Houston seeks to purchase the interstate rights of Hicks. J. W. Dial and Ramsey Truck Line, Inc., who control Houston through equal stock ownership, seek to acquire control of said operating rights through the transaction. Houston is purchasing the interstate operating rights contained in Hicks' certificates in MC–63792 and (Sub-10, 12, 13, 14, 15, 17, 20, 24, 25, 26, 28, 30, E–1, E–2, E–3, E–4, E–5, E–6, E–7, E–8, E–9, E–10, and E–11), which authorize transportation, in interstate or foreign commerce, as a common carrier, by motor vehicle, of: (1) *Machinery, equipment, materials and supplies* used in, or in connection with, the discovery, development, production, refining, manufacture, processing, storage, transmission, and distribution of natural gas and petroleum and their products and by-products, and *Machinery, materials, equipment and supplies* used in, or in connection with, the construction, operation, repair, servicing, maintenance, and dismantling of pipe lines, including the stringing and picking-up thereof, except the stringing and picking-up of pipe in connection with main pipe lines, (a) between points in LA, TX, and AR, (b) between points in KS, OK, and TX, and (c) between points in TX, on the one hand, and, on the other, points in NM, CO, UT, and WY; (2) *Heavy machinery,* and *heavy or cumbersome commodities* not included in the authority granted above which, because of size or weight, require the use of special equipment, and *parts thereof,* Between Houston, TX, on the one hand, and, on the other, points in

AR, LA, and TX; (3) *Machinery, equipment, materials, and supplies* used in, or in connection with, the construction, operation, repair, servicing, maintenance, and dismantling of pipelines, other than pipelines used for the transmission of natural gas, petroleum, their products and by products, water, or sewerage, restricted to the transportation of shipments moving to or from pipeline rights of way, (a) between points in AL, FL, and GA, (b) between points in AR, LA, and MS, (c) between points in LA and MS, on the one hand, and, on the other, points in AL, FL, and GA, (d) between points in LA, TX, and AR, (e) between points in KS, OK, and TX, and (f) between points in TX, on the one hand, and, on the other, points in NM, CO, UT, and WY. (4) *Machinery, equipment, materials and supplies* used in, or in connection with, the discovery, development, production, refining, manufacture, processing, storage, transmission, and distribution of natural gas and petroleum and their products and by products, and *machinery, materials, equipment and supplies* used in, or in connection with, the construction, operation, repair, servicing, maintenance, and dismantling of pipe lines, including the stringing and picking-up thereof, except the stringing and picking-up of pipe in connection with main pipe lines, (a) between points in AL, FL, and GA, and (b) between points in LA, and MS, on the one hand, and, onthe other, points in AL, FL, and GA, (5) *Machinery, materials, supplies and equipment* incidental to, and used in, the construction, development, operation, and maintenance of facilities for the discovery, development, and production of natural gas and petroleum, *commodities,* the transportation of which requires the use of special equipment, and *related articles and supplies* when their transportation is incidental to the transportation of commodities which by reason of size or weight require special equipment, and *self-propelled articles* each weighing 15,000 pounds or more restricted to commodities which are transported on trailers, between points in AR, LA, and MS; (6) *general commodities* (except those of unusual value, classes A and B explosives, household goods as defined by the Commission, commodities in bulk and those requiring special equipment), from Monroe and West Monroe, LA, to Bastrop, Ruston, and Winnsboro, LA, (7) *Earth drilling machinery and equipment,* and *machinery, equipment, materials, supplies* and *pipe* incidental to, used in, or in connection with (a) the transportation, installation, removal, operation, repair, servicing, maintenance, and dismantling of drilling machinery and equipment, (b) the completion of holes or wells drilled, (c) the production, storage, and transmission of commodities resulting from drilling operations at well or hole sites and (d) the injection or removal of commodities into or from holes or wells, (a) between points in AL, GA, and FL, (b) between points in LA, and MS, on the one hand, and, on the other, points in AL, GA, and FL, (c) between points in AR, LA, and MS, (d) between points in KS, OK, and TX, (e) between points in TX, on the one hand, and, on the other, points in NM, CO, UT, and WY, and (f) between points in LA, TX, and AR; (8) *Iron and steel articles,* (a) from Houston, TX, to points, in AR, LA, and TX, (b) from Baytown, TX, to points in AR, KS, LA, MS, NM, and OK, (c) between the facilities of Steel, Inc., at New Orleans, LA, on the one hand, and, on the other, points in AR, LA, MS, NW, TX (except points east of Interstate Hwy 45), OK (except points east of Interstate Hwy 35), and KS (except points east of interstate Hwy 35), (d) from points in Jefferson and Orange Counties, TX, to points in LA (9) *Iron and steel articles* (except oilfield pipe or tubing), from the palnt site of Gulf States Tube Corporation at Rosenberg, TX., to points in TX, LA, MS, AR, OK, and NM, restricted to the transportation of traffic originating at the named origins; (10 *Iron and steel articles,* except cast iron pipe, between the facilities of Romar Steel, Inc., at New Orleans and Morgan City, LA, Birmingham, AL, and Houston, TX, on the one hand, and, on the other, points in AL, AR, CO, FL, GA, KS, LA, MS, MO, NM, OK, TN, and TX; (11) *Pipe* (except oilfield and pipeline commodities as defined in *Mercer Extension—Oilfield Commodities,* 74 M.C.C. 459), from Gainesville, TX, to points in LA, MO, OK, and TX, restricted to the transportation of traffic originating at the facilities of the Jones & Loughlin Steel Corporation at Gainesville, TX; (12) *Plastic pipe,* and *plastic tubing,* from the plant site of Tex-Tube Division, Detroit Steel Corp., a division of Cyclops Corporation, at Houston, TX, to points in AR, AL, CO, TX, OK, KS, LA, NM, FL, MO, WY, UT, GA, and MS; (13) *Steel billets, bars and rods,* from the plant site and storage facilitries of Georgetown Texas Steel Corp., at or near Beaumont, TX, to points in AL, AR, FL, and TN, restricted to the transportation of traffic originating at the named origin facilities; (14) (1)(a) *Air pollution control equipment, heating and cooling equipment, pressure vessels, solid waste compactors and balers, and (1)(b) parts and accessories for the commodities indicated in (1)(a) above,* From Houston, TX, to points in AL, AZ, AR, CO, FL, GA, ID, IL, IA, IN, KS, KY, LA, MT, MI, MN, MS, MO, NE, NV, NM, NC, ND, OH, OK, SC, SD, TN, VA, WV, WI, WY, and UT: and (2) *Materials, supplies and parts and equipment used in the manufacture of air pollution control equipment, heating and cooling equipment, pressure vessels, solid waste compactors and balers,* From the above-named destinations, to the above-named origin. (15) *Slab Zinc Smelter,* From the facilities of National Zinc Company, at Bartlesville, OK, to points in AL, LA, MS, TX, KY, and TN. (16) *Commodities,* the transportation of which, because of size or weight require the use of special equipment, and *parts* thereof, when their transportation is incidental to the transportation of which commodities, (a) between Houston, TX, on the one hand, and, on the other, points in MS, AR, and LA, and (b) between points in AR, LA, and MS. Houston is authorized to operate in interstate or foreign commerce, as a motor common carrier, pursuant to its Certificate MC 143209. Ramsey Truck Line, Inc., holds no authority from the Commission. (Hearing site: Houston, TX.)

Notes.—(1) This notice does not purport to be a complete description of the operating rights of the carriers involved.

(2) An application for temporary authority has been filed.

MC–F–14252F, filed December 6, 1979. MAISLIN TRANSPORT OF DELAWARE, INC. (Delaware) (7401 Newman Blvd. LaSalle, Quebec H8N 1X4, Canada)—control and merger—GATEWAY TRANSPORTATION CO., INC. (Gateway) (445 Park Plaza Drive, P.O. Box 851, La Crosse, WI 54601). Representatives: A. David Millner, P.O. Box 1409, 167 Fairfield Road, Fairfield, NJ 07006 and Roland Rice, 116 Perpetual Bldg., 1111 E Street, NW, Washington, DC 20004. Delaware seeks to acquire control of Gateway through MI Acquisition Corporation (MIAC), a newly created subsidiary of Delaware. MIAC seeks to acquire from 50.1% to 100% of the issued and outstanding capital stock of Gateway. MIAC will be subsequently merged into Gateway, leaving Delaware as the holder of Gateway's stock. Maislin Transport, Ltd., of LaSalle, Quebec, Canada, the sole stock holder of Delaware, and in turn, Maislin Industries, Ltd., a non-carrier holding company of LaSalle, Quebec, Canada, and sole stockholder of Maislin Transport, Ltd., seeks to acquire control of Gateway through the transaction. Gateway is a motor common carrier pursuant to authority

issued in certificates in MC–80430 and sub-numbers thereunder which authorize the transporation, in interstate or foreign commerce, of numerous general and specified commodities, over regular and irregular routes, in AL, AR, CT, FL, GA, IL, IN, IA, KS, KY, MA, MI, MN, MO, NJ, NY, OH, PA, RI, TN, TX, WI, and WV. Delaware is a motor common carrier pursuant to authority issued in Certificates in MC–60580 and sub-numbers thereunder, which authorize the transportation of general and specified commodities, over regular and irregular routes, in CT, DE, MA, MD, ME, NH, NJ, PA, RI, VA, VT, WV, and DC. Maislin Transport, Ltd., is a motor common carrier pursuant to authority issued in certificates in MC–108006 and sub-numbers thereunder, which authorize the transportation of general and specified commodities, over regular and irregular routes, in CT, DE, MA, MD, ME, NH, NJ, NY, PA, RI, VA, VT, WV, and DC. Maislin Transport, Ltd., is a motor common carrier pursuant to authorty issued in Certificates in MC–108006 and sub-numbers thereunder, which authorize the transportation of general and specified commodities, over regular and irregular routes, in CT, ME, MA, NH, NJ, NY, PA, RI, and VT. Impediments: (1) There is a question of Maislin's financial ability to consummate the transaction and operate as proposed. (2) MI Acquisition Corporation must join as a party to the application. (3) Delaware is planning to sell, prior to consummation, its operating rights which duplicate those of Gateway. (4) Applicant must notify the Commission, in writing, prior to consummation, of the total percentage of stock to be acquired. (Hearing site: Washington, DC.)

Notes.—(1) Application has been filed for temporary authority. (2) FD–29211, Maislin Transport of Delaware, Inc.—Notes, Guarantees and Assumption of Obligations, and Gateway Transportation Co., Inc.—Notes and Guarantees, has been granted by order served February 4, 1980.

MC–F–14302F, filed January 17, 1980. J AND M TRANSPORTATION, INC. (J & M) (1079 Old Maricopa Road, Casa Grande, AZ 85222)—purchase (portion)—DAVID C. BURNS, d.b.a. BURNS TRUCKING (Burns) (1146 East Main Street, Casa Grande, AZ 85222). Representative: Donald E. Fernaays, Suite 320, 4040 East McDowell Road, Phoenix, AZ 85008. J & M seeks authority to purchase a portion of the interstate operating rights of Burns. Majorie Smerber and James Smerber who control J & M through equal stock ownership, seek to acquire control of said rights through the transaction. J & M is purchasing the interstate operating rights of Burns that are contained in Permit No. MC–141618 (Sub-No. 2) which authorizes the transportation, over irregular routes of *mineral wool insulation* (except in bulk), from Fontana, CA, to points in AZ, under continuing contract(s) with Rockwool Industries, Inc., of Fontana, CA. J & M presently holds no authority from the I.C.C. Majorie Smerber and James Smerber who control J & M through stock ownership, also control Smerber Trucking, Inc. They are president and vice president of both firms respectively. Smerber Trucking is authorized to operate as a contract carrier pursuant to its permit issued in MC 136821 (Sub-1). (Hearing site: Phoenix, AZ.)

Decided: March 19, 1980.

By the Commission, Review Board Number 5, Members Krock, Taylor, and Williams.

Agatha L. Mergenovich,

Secretary.

BILLING CODE 7035–01–M

Motor Carrier Finance Applications; Decision Notice

As indicated by the findings below, the Commission has approved the following applications filed under 49 U.S.C. 10924, 10926, 10931 and 10932.

We find: Each transaction is exempt from section 11343 (formerly section 5) of the Interstate Commerce Act, and complies with the appropriate transfer rules.

This decision is neither a major Federal action significantly affecting the quality of the human environment nor a major regulatory action under the Energy Policy and Conservation Act of 1975.

Petitions seeking reconsideration must be filed on or before April 23, 1980. Replies must be filed within 20 days after the final date for filing petitions for reconsiderations; any interested person may file and serve a reply upon the parties to the proceeding. Petitions which do not comply with the relevant transfer rules at 49 CFR 1132.4 may be rejected.

If petitions for reconsideration are not timely filed, and applicants satisfy the conditions, if any, which have been imposed, the application is granted and they will receive an effective notice. The notice will indicate that consummation of the transfer will be presumed to occur on the 20th day following service of the notice, unless either applicant has advised the Commission that the transfer will not be consummated or that an extension of time for consummation is needed. The notice will also recite the compliance requirements which must be met before the transferee may commence operations.

Applicants must comply with any conditions set forth in the following decision-notices within 30 days after publication, or within any approved extension period. Otherwise, the decision-notice shall have no further effect.

By the Commission, Review Board Number 5, The Motor Carrier Board, Members Krock, Pohost, and Williams.

Agatha L. Mergenovich,

Secretary.

MC–FC–78307, filed September 20, 1979. Transferee: J & J DINA TRUCKING INC., 21 Barnstable Road, E. Rockaway, NJ 11518. Transferor: E. PERLER & SON, INC., 21 Barnstable Rd., W. Rockaway, NJ 11518. Representative: Robert B. Pepper, 168 Woodbridge Ave., Highland Park, NJ 08904. Authority sought for the purchase by transferee of the operating rights of transferor set forth in Permit MC 108024, issued May 21, 1969, authorizing the transportation of *tin cans*, from New York, NY to points in CT, NJ, NY, and PA within 100 miles of New York, NY; *rejected shipments* of tin cans, from the above-specified destination points to New York, NY; *scrap tin*, from New York, NY, to Carteret, NJ. Transferee presently holds no authority from this Commission. Application has been filed for temporary authority 49 U.S.C. 11349.

MC–FC–78310, filed September 20, 1979. Transferee: AMERICAN EAGLE MOTOR COACH, INC., 72 Sycamore Street, Fairhaven, MA 02719. Transferor: SOUTHERN MASSACHUSETTS BUS LINES, INC., 1091 Kempton Street, New Bedford, MA 02740. Representative: Charles A. Webb, Suite 800 South, 1800 M Street, N.W., Washington, D.C. 20036. Authority sought for the purchase of the operating rights of transferor, as set forth in Certificate MC 96345 and Sub-2, 3, and 4, issued April 29, 1949, August 21, 1963, May 19, 1966, and June 11, 1971, respectively, as follows: (A) *passengers and their baggage*, restricted to traffic originating at the points indicated, in round-trip charter operations, over irregular routes, from points and places in the towns of New Bedford, Achushnet, Fair Haven, and Dartmount, MA to points and places in ME, NH, RI, CT, NY, and NJ, and return; (B) and from points and places in the above-specified MA towns to points and places in MA, through CT and RI and return; *passengers and their baggage, and express, mail, and newspapers in the same vehicle with passengers, and*

baggage of passengers in a separate vehicle, over regular routes, between Hyannis, MA and Chatham, MA, serving all intermediate points; from Hyannis over MA Hwy 28 via Harwich Port, MA, to Chatham and return over the same route; (C) *passengers and their baggage,* in special operations, in round-trip sightseeing and pleasure tours, over irregular routes, beginning and ending at points in Barnstable County, MA, and those in Bristol and Plymouth Counties, MA, south of US Hwy 44, and extending to points in CT, DE, ME, MD, MA, NH, NJ, NY, PA, RI, VT, VA and the DC; and (D) *passengers and their baggage,* in the same vehicle with passengers, in special operations, in round-trip sightseeing and pleasure tours, over irregular routes, beginning and ending at Plymouth, Middleboro, and Centerville, MA and points in that part of Bristol County, MA, on and south of U.S. Highway 44 and extending to points in the US (except CT, DE, ME, MD, MA, NH, NJ, NY, PA, RI, VT, VA, HI, AK and the DC). Application for temporary authority has been filed under 49 U.S.C. 11349.

MC–FC–78329, filed September 28, 1979. Transferee: CHRISTOPHER RATCLIFFE d.b.a., RATCLIFFE DELIVERY, INC., 512 Lock Ave., Wheeling, WV 26003. Transferor: JACK C. STENGER, d.b.a., WHEELING PACKAGE DELIVERY, 512 Lock Ave., Wheeling, WV 26003. Authority sought for the purchase by transferee of the operating rights of transferor as set forth in Certificate No. MC–116252, issued April 11, 1957, authorizing the transportation of *Such commodities* as are sold by retail stores, speciality shops, and mail order department stores, in a retail delivery service, between Wheeling, WV, on the one hand, and, on the other, points in Monroe, Belmont, Harrison, and Jefferson Counties, OH. Transferee presently holds no authority from this Commission. Application has not been filed for temporary authority under 49 U.S.C. 11349.

MC–FC–78350. By decision of February 27, 1980 issued under 49 U.S.C. 10926 and the transfer rules at 49 C.F.R. 1132, The Motor Carrier Board approved the transfer to ALL-ROADS MOVING & STORAGE, INC., Fullerton, CA, of Certificate No. MC 64339, issued November 23, 1954, to LEONARD E. CARLSON AND LAWRENCE V. CARLSON, A Partnership, d.b.a. FULLERTON TRANSFER AND STORAGE, authorizing the transportation of *Household Goods* as defined by the Commission, between points in Orange County, CA north and west of the Santa Ana River; and between points in Orange County, CA north and west of the Santa Ana River, on the one hand, and, on the other, points in the Los Angeles, CA Commercial Zone, as defined by the Commission. Applicants' Representative: Mr. Vern E. Caumiant, 1400 E. Walnut, Fullerton, CA 92631.

Federal Register Summary for Certificate or Permit

MC–FC–78357. By decision of March 13, 1980 issued under 49 U.S.C. 10926 and the Transfer Rules at 49 C.F.R. 1132. The Motor Carrier Board approved the transfer to David Sellick d.b.a. Lost Trail Stages of Certificate No. MC 113730 (Sub-No. 1) issued 2/5/78 to Edward J. Osterman d.b.a. Lost Trail Stages authorizing the transportation of passengers and their baggage, and express and newspapers in the same vehicle with passengers, Between Salmon, ID and Darby, MT, serving all intermediate points: From Salmon over U.S. Highway 93, to Darby, and return over the same route. Representative: David Sellick, Route #1, Box 189, Salmon, ID 83467.

MC–FC–78372. On reconsideration, by decision of March 19, 1980 issued under 49 U.S.C. 10926 and the transfer rules at 49 CFR 1132, The Motor Carrier Board approved the transfer to Delta Transport Corporation, West Springfield, MA, of Certificate No. MC 143287, issued July 24, 1978, to Holmes and Holmes, Inc., Wilmington, DE authorizing the transportation of *General commodities* (except those of unusual value, classes A and B explosives, household goods as defined by the Commission, commodities in bulk, and those requiring special equipment), from points in CT, ME, MA, NH, NJ, NY, PA, RI, and VT, to points in OH, PA, and WV; *General commodities* (except those of unusual value, classes A and B explosives, household goods as defined by the Commission, accompanied baggage, commodities in bulk, those requiring special equipment, automobiles, trucks, and buses), from Baltimore, MD, to points in Allegheny, Beaver, Butler, Lawrence, Mercer, and Westermoreland Counties, PA. Restriction: The service authorized is subject to the following restrictions: Said authority is restricted to traffic moving on bills of lading issued by P.O.W. Freight Systems, Inc. Said authority in part (2) above is restricted to traffic having a prior movement in foreign commerce. Applicants' representative: James M. Burns, 1382 Main St., Suite 413, Springfield, MA 01103.

MC–FC–78403. By decision of February 14, 1980 issued under 49 U.S.C. 10926 and the transfer rules at 49 CFR 1132, The Motor Carrier Board approved the transfer to R. St. Amant-Mover, Inc., Cambridge, MA. of Certificates MC–96242 and MC–96242 (Sub-No. 1), issued November 23, 1940, and October 23, 1950, to Rosario St. Amant, Cambridge, MA, authorizing the transportation of *Household goods,* between Cambridge, MA and points within 25 miles of Cambridge, on the one hand, and, on the other, points in ME, NH, VT, RI, CT, NY, and NJ; *addressing machines,* and *equipment* incidental to and used in the operation of such machines, between Boston, Cambridge, and Watertown, MA, on the one hand, and, on the other, points in NY and NY within 35 miles of New York, NY, including New York, NY. Applicants' representative: Nicholas V. Scali, 30 Federal St., Boston, MA 02110.

MC–FC–78405. By decision of March 6, 1980 issued under 49 U.S.C. 10926 and the transfer rules and 49 CFR 1132, Division 1 approved the transfer to Great American Van Lines, Inc., Alexandria, VA of Certificates MC–110585 (Sub-Nos. 2 and 9), issued December 24, 1975, and July 12, 1978, respectively, to Republic Van & Storage Co., Inc., Baltimore, MD, authorizing the transportation of (1) *new furniture, refrigerators, motorcycles, oil well equipment and supplies, store fixtures, radio and radar equipment, candy, bicycles, tires and window shades,* from points in the Los Angeles, CA, Commercial Zone, as defined by the Commission, to points in the Los Angeles Harbor, CA, Commercial Zone, as defined by the Commission, restricted to shipments moving to territories or possessions of the United States; (2) *Emigrant movables,* between points in Logan County, OK, on the one hand, and, on the other, points in KS; and (3) household goods, as defined by the Commission, between points in AL, AR, CA, CO, CT, DE, FL, GA, ID, IL, IN, IA, KS, KY, LA, ME, MD, MA, MI, MN, MS, MO, NE, NV, NH, NJ, NM, NY, NC, OH, OK, OR, PA, RI, SC, TN, TX, UT, VT, VA, WA, WV, WI, WY, and DC. Also, *Household goods,* as defined by the Commission, between points in HI (this certificate expires July 12, 1981). Approval of the transaction was conditioned as follows: (1) Prior to issuance of an effective notice in this proceeding, Mr. Jack Kagan, president and owner of transferee, shall submit a certified statement that he has terminated control and management of International Export Packers, Inc. (2) Prior to or concurrently with consummation, transferor shall settle its

debts with owner-operators and confirm this in writing to the Commission. Applicants' representatives: Alan F. Wohlstetter, 1700 K St. NW., Washington, DC 20006, for transferee, and John C. Bradley, 1600 Wilson Blvd., Arlington, VA 22209, for transferor.

MC–FC–78408. By decision of February 15, 1980 issued under 49 U.S.C. 10926 and the transfer rules at 49 CFR 1132, The Motor Carrier Board approved the transfer to T & T Pipe Hauling, Inc., North Lima, OH, of Permits MC–126193 and MC–126193 (Sub-Nos. 1 and 2), issued August 9, 1976, August 9, 1976, and February 10, 1977, respectively, to Sigle Trucking Co., North Lima, OH, authorizing the transportation of *Iron or steel pipe*, (1) from North Lima, OH, to points in PA and WV, (2) from North Lima, OH, to points in IN, (3) from the plant of PLEXCO, a division of Amsted Industries, Incorporated, of Franklin Park, IL, at Glenwillard, PA, to points in OH (except North Lima), (4) from Middletown, OH, to the plant site of PLEXCO, a division of Amsted Industries, at Glenwillard, PA, (5) from Wheeling, WV, Alliquippa, Wheatland, and Ambridge, PA, to the plant site of PLEXCO, a division of Amsted Industries, at North Lima, OH; and pipe and conduit, between North Lima, OH, and points in MI, all under continuing contract(s) with Plexco, a division of AMSTED Industries, Incorporated, of Franklin Park, IL. Applicants' representative: Joe F. Asher, 88 E. Broad St., Columbus, OH 43215.

MC–FC–78419. By decision of February 15, 1980 issued under 49 U.S.C. 10926 and the transfer rules at 49 CFR 1132, The Motor Carrier Board approved the transfer to Cole Freight Company, of Crestwood, IL, of Certificates Nos. MC–111398 Subs 2, 3, 6, 7, 1, 9, and 15, to Fischbach Trucking Co., of Akron, OH, authorizing generally the transportation of such commodities as are manufactured, processed, or dealt in by rubber or rubber product manufacturers; asbestos roofing shingles; conduit and pipe; aluminum sidings; battery boxes; and similar commodities, from and to named points in TN, OH, AR, MA, NY, IL, IN, CT, DE, RI, NJ, KY, MI, and PA. Applicants' representative: John P. McMahon, 100 East Broad St., Columbus, OH 43215.

MC–FC–78430. By decision of February 26, 1980 issued under 49 U.S.C. 10926 and the transfer rules at 49 CFR 1132, The Motor Carrier Board approved the transfer to Valley Express, Inc., of Glyndon, MN, Certificate No. MC–143659 (Sub-No. 4F) issued November 26, 1978, to Valley Trucking, Inc., of Fargo, ND, authorizing the transportation of *frozen potato products*, from the facilities of International Co-op, at or near Grand Forks, ND, to points in the United States (except Alaska, Hawaii, and North Dakota), restricted to the transportation of traffic originating at the named origin facilities. Applicant's representative is: Richard P. Anderson, 502 First National Bank Building, Fargo, ND 58126.

MC–FC–78442. By decision of January 29, 1980 issued under 49 U.S.C. 10926 and the transfer rules at 49 CFR 1132, The Motor Carrier Board approved the transfer to Arctic Slope Regional Construction, Inc., and Alaska General Construction Company, A Partnership, d.b.a. Arctic Slope/Alaska General Construction Company of Annex, Anchorage, Alaska of Certificate No. MC 123298 issued 2/18/63 to KAPS Transport (Alaska), Inc. Sharon Pendley, Trustee, of Fairbanks, Alaska authorizing the transportation of general commodities, except Classes A and B explosives, commodities in bulk, and household goods as defined by the Commission, between points in Alaska except points on the Alaska Panhandle south of Haines, Alaska. Applicant's representative is: Arthur R. Kauver, Esq., 810 West Second Avenue, Anchorage, Alaska 99501.

MC–FC–78453. By decision of February 28, 1980 issued under 49 U.S.C. 10926 and the transfer rules at 49 CFR 1132, The Motor Carrier Board approved the transfer to Sumrell Bus Service, Inc., of Hempstead, NY., of Certificate No. MC 34752, issued February 2, 1962 to Lincoln Coach Co., Inc., of Yonkers, NY, authorizing the transportation of passengers and their baggage, restricted to traffic originating at the point indicated in charter operations, from New York, NY., to points in Connecticut, New Jersey, Pennsylvania, Massachusetts, New Hampshire, Maine and the District of Columbia, and return. Applicant's representative is: Sidney J. Leshin, 575 Madison Ave., New York, NY. 10022.

MC–FC–78454. By decision of February 14, 1980 issued under 49 U.S.C. 10926 and the transfer rules at 49 CFR 1132, The Motor Carrier Board approved the transfer to Yorkville Van & Storage Co., Inc., of New York, NY., of Certificate No. MC–83144, issued May 27, 1966 to John Clausen, d.b.a. Yorkville Van & Storage Co., of New York, NY, authorizing the transportation of household goods, between points in New York, NY, on the one hand, and, on the other, points in CT, MA, NJ, NY, PA, and RI. Applicant's representative is: Alvin Altman, 888 Seventh Ave., New York, NY 10019. Transferee holds no authority from this Commission. An application seeking TA lease has not been filed.

MC–FC–78455. By decision of February 27, 1980 issued under 49 U.S.C. 10926 and the transfer rules at 49 CFR 1132, The Motor Carrier Board approved the transfer to Harold B. Legge Transport, Ltd., of Nova Scotia, Canada, of Certificates No. MC 125441 Subs 1 and 3, issued April 20, 1964 and November 11, 1972, to Ernest D'Angelo, of Nova Scotia, Canada, authorizing the transportation of *bananas*, and *fresh fruit, fresh berries* and *fresh vegetables* in mixed loads, *cardboard boxes*, knocked down, and *inserts* and *overwraps* for fish, from Boston, MA, to the Port of Entry on the United States-Canada Boundary line at or near Calais, Maine, to points in Massachusetts, New York, New Jersey and Pennsylvania, bananas from Albany, New York to ports of entry on the United States-Canada Boundary Line at or near Houlton and Calais, Maine. Applicant's representative is: John F. O'Donnell, 60 Adams St., P.O. Box 238, Milton, MA 02187. Transferee holds no authority from this Commission. An application seeking TA lease authority has been filed.

MC–FC–78457. By decision of February 14, 1980 issued under 49 U.S.C. 10926 and the transfer rules at 49 CFR 1132, The Motor Carrier Board approved the transfer to Corbet, Int., of Hawatha, KS, of Certificate No. MC 130 issued July 25, 1969 to Dallas L. Corbet, of Hawatha, KS, authorizing the transportation of livestock, over a regular route from Hawatha, KS to St. Joseph, MO, serving named intermediate and off-route points; and livestock, lumber, shingles, groceries, and farm machinery, from St. Joseph, MO, to Hawatha, KS, over a regular route, serving named intermediate and off-route points. Transferee holds no authority from the Commission. An application seeking TA lease has not been filed. Applicant's representative is: Eugene W. Hiatt, 207 Casson Bldg, 603 Topeka Blvd, Topeka, KS 66603.

MC–FC–78458. By decision of February 19, 1980 issued under 49 U.S.C. 10926 and the transfer rules at 49 CFR 1132, The Motor Carrier Board approved the transfer to Freight Carriers Towing & Recovery, Inc., of Atlanta, GA, of Certificate No. MC 143845 (Sub-No. 1) issued September 29, 1978 to Tank's Enterprises, Inc., of Austelle, GA, authorizing the transportation of disabled motor vehicles, by use of wrecker equipment only, and replacement vehicles for disabled motor vehicles, between points in Georgia, on

the one hand, and, on the other, points in Alabama, Florida, Mississippi, North Carolina, South Carolina, and Tennessee. Applicant's representative is: William N. Robinson, 231 Washington Avenue, N.E., Marietta, GA 30060.

BROKER LICENSE

MC–FC–78460. By decision of February 19, 1980 issued under 49 U.S.C. 10924 and the transfer rules at 49 CFR 1133, The Motor Carrier Board approved the acquisition by Frank Patrick, Inc., of Milwaukee, WI, of Control of Travel & Tour Service, Inc., of Milwaukee, WI, which hold License Nos. MC 12720, issued September 27, 1977, No. MC 12720 (Sub-No. 2), issued March 7, 1972, and No. MC–1270 (Sub-No. 3), issued August 6, 1975, authorizing operators, as a broker, at Milwaukee, WI, in connection with the transportation by motor vehicle, in interstate or foreign commerce, of passengers and group of passengers and their baggage, in charter and special operations, between points in the United States, including Alaska and Hawaii; at Milwaukee, WI, in connection with the transportation by motor vehicle, in interstate or foreign commerce, of passengers and their baggage, in charter and special operations, beginning and ending at Minneapolis and St. Paul, MN, and extending to points in the United States, including Alaska and Hawaii; and at Chicago, IL, in connection with the transportation by motor vehicle in interstate or foreign commerce, of passengers and their baggage in round-trip special or charter all-expense tours, beginning and ending at Chicago, IL, and extending to points in the United States, except Alaska and Hawaii. Applicant's representative is: William C. Dineen, 710 North Plankinton Ave., Milwaukee, WI 53203.

MC–FC–78461. By decision of February 15, 1980 issued under 49 U.S.C. 10926 and the transfer rules at 49 CFR 1132, The Motor Carrier Board approved the transfer to Leland C. Ridgeway, Jr., d.b.a. Ridgeway Transfer of Fairfield, NE, of Certificate No. MC–97764 (Sub-No. 1) issued July 7, 1972 to John A. Kluver, d.b.a. Kluver Transfer of Fairfield, NE, authorizing the transporation of *general commodities,* except those of unusual value, classes A and B explosives, household goods as defined by the Commission commodities requiring special equipment; between Edgar and Omaha, NE, serving the intermediate points in Lincoln and Sutton, NE, and the off-route points of Fairfield, Deweese, Angus, Shickley, and Davenport, NE; *general commodities,* except those of unusual value, classes A and B explosives, household goods as defined by the Commission, commmodities in bulk, and those requiring special equipment, between Fairfield and Hastings, NE, serving no intermediate points, and serving Glenvil, NE, as an off-route point, *household goods,* between Edgar, NE, and points within 20 miles of Edgar, on the one hand, and, on the other, points in IA, KS, MO, CO, and IL. *Livestock* and *agricultural commodities,* between Edgar, NE, and points within 20 miles of Edgar, on the one hand, and, on the other, points in IA, KS, MO, SD, and CO. Applicant's representative is: Leland C. Ridgeway, Jr., Route 1, Fairfield, NE 68938.

Application for TA authority has not been filed. Transferee holds no authority.

MC–FC–78463. By decision of February 15, 1980 issued under 49 U.S.C. 10926 and the transfer rules at 49 CFR 1132, The Motor Carrier Board approved the transfer to A.V.L. Inc., of Akron, OH, of Certificates Nos. MC–96469 and MC–96469 (Sub-No. 1) issued May 21, 1951 to Art Nelson, Individual, of Crsytal Lake, IL, authorizing the transportation of (1) race and show horses, ponies, and mules, and stable supplies, and equipment and personal effects of attendants in the same vehicle with horses, ponies, and mules, between points in IL, IN, KY, MI, MO, OH, and WI; and (2) horses, other than ordinary horses, and personal effects of attendants, supplies and equipment, including mascots, used in the care and exhibition of such animals, between Chicago, IL, and points in IL within 500 miles of Chicago, and points in DE, RL, GA, IA, MN, MD, NJ, NY, NC, OK, PA, SC, TX, LA, AR, TN, VA, traversing MS, AL, and DC for operating convenience only. Applicant's representative is: Lewis S. Witherspoon, 88 East Broad street, Columbus, OH 43215.

Application for TA authority has been filed. Transferee presently hold no authority.

MC–FC–78464. By decision of February 15, 1980 issued under 49 U.S.C. 10926 and the transfer rules at 49 CFR 1132, The Motor Carrier Board approved the transfer to J & B transportation Co., Inc., of Fort Worth, TX, of Certificate of Registration No. MC 133506 issued March 16, 1978, to Mustang Transportation, Inc., of Shreveport, LA, evidencing a right to engage in transportation in interstate commerce corresponding in scope to state certificate No. 8930 dated October 4, 1976, issued by the railroad Commission of Texas, Transportation Division, authorizing (*SEE ATTACHMENT FOR AUTHORITY*). Applicant's representative is: A. William Brackett, Attorney, 1198 Continental Life Building, Fort Worth, TX 76102.

No TA authority application has been filed. Transferee presently holds no authority.

Attachment

To transport the following commodities between all points in Texas:

Outfield equipment and pipe, and other specified commodities.

[FR Doc. 80–10081 Filed 4–2–80; 8:45 am]

BILLING CODE 7035–01–M

Permanent Authority Decisions; Decision-Notice

The following applications, filed on or after March 1, 1979, are governed by Special Rule 247 of the Commission's *Rules of Practice* (49 CFR 1100.247). These rules provide, among other things, that a petition for intervention, either in support of or in opposition to the granting of an application, must be filed with the Commission within 30 days after the date notice of the application is published in the **Federal Register.** Protests (such as were allowed to filings prior to March 1, 1979) *will be rejected.* A petition for intervention without leave must comply with Rule 247(k) which requires petitioner to demonstrate that it (1) holds operating authority permitting performance of any of the service which the applicant seeks authority to perform, (2) has the necessary equipment and facilities for performing that service, and (3) has performed service within the scope of the application either (a) for those supporting the application, or, (b) where the service is not limited to the facilities of particular shippers, from and to, or between, any of the involved points.

Persons unable to intervene under Rule 247(k) may file a petition for leave to intervene under Rule 247(1) setting forth the specific grounds upon which it is made, including a detailed statement of petitioner's interest, the particular facts, matters, and things relied upon, including the extent, if any, to which petitioner (a) has solicited the traffic or business of those supporting the application, or, (b) where the identity of those supporting the application is not included in the published application notice, has solicited traffic or business identical to any part of that sought by applicant within the affected marketplace. The Commission will also consider (a) the nature and extent of the property, financial, or other interest of the petitioner, (b) the effect of the decision which may be rendered upon petitioner's interest, (c) the availability

of other means by which the petitioner's interest might be protected, (d) the extent to which petitioner's interest will be represented by other parties, (e) the extent to which petitioner's participation may reasonably be expected to assist in the development of a sound record, and (f) the extent to which participation by the petitioner would broaden the issues or delay the proceeding.

Petitions not in reasonable compliance with the requirements of the rule may be rejected. An original and one copy of the petition to intervene shall be filed with the commission indicating the specific rule under which the petition to intervene is being filed, and a copy shall be served concurrently upon applicant's representative, or upon applicant if no representative is named.

Section 247(f) provides, in part, that an applicant which does not intend to timely prosecute its application shall promptly request that it be dismissed, and that failure to prosecute an application under the procedures of the commission will result in its dismissal.

If an applicant has introduced rates as an issue it is noted. Upon request, an applicant must provide a copy of the tentative rate schedule to any protestant.

Further processing steps will be by Commission notice, decision, or letter which will be served on each party of record. *Broadening amendments will not be accepted after the date of this publication.*

Any authority granted may reflect administrative acceptable restrictive amendments to the service proposed below. Some of the applications may have been modified to conform to the Commission's policy of simplifying grants of operating authority.

Findings: With the exception of those applications involving duly noted problems (e.gs., unresolved common control, unresolved fitness questions, and jurisdictional problems) we find, preliminarily, that each common carrier applicant has demonstrated that its proposed service is required by the present and future public convenience and necessity, and that each contract carrier applicant qualifies as a contract carrier and its proposed contract carrier service will be consistent with the public interest and the transportation policy of 49 U.S.C. § 10101. Each applicant is fit, willing, and able properly to perform the service proposed and to conform to the requirements of Title 49, Subtitle IV, United States Code, and the Commission's regulation. Except where specifically noted, this decision is neither a major Federal action significantly affecting the quality of the human environment nor a major regulatory action under the Energy Policy and Conservation Act of 1975.

In those proceedings containing a statement or note that dual operations are or may be involved we find, preliminarily and in the absence of the issue being raised by a petitioner, that the proposed dual operations are consistent with the public interest and the transportation policy of 49 U.S.C. § 10101 subject to the right of the Commission, which is expressly reserved, to impose such terms, conditions or limitations as it finds necessary to insure that applicant's operations shall conform to the provisions of 49 U.S.C. § 10930(a) [formerly section 210 of the Interstate Commerce Act.]

In the absence of legally sufficient petitions for intervention, filed on or before May 5, 1980 (or, if the application later becomes unopposed), appropriate authority will be issued to each applicant (except those with duly noted problems) upon compliance with certain requirements which will be set forth in a notification of effectiveness of the decision-notice. To the extent that the authority sought below may duplicate an applicant's other authority, such duplication shall be construed as conferring only a single operating right.

Applicants must comply with all specific conditions set forth in the following decision-notices on or before May 5, 1980, or the application shall stand denied.

Note.—All applications are for authority to operate as a common carrier, by motor vehicle, in interstate or foreign commerce, over irregular routes, except as otherwise noted.

Volume No. 33

Decided: March 5, 1980.

By the Commission, Review Board Number 1. Members Carleton, Joyce and Jones.

MC 8515 (Sub-32F), filed November 8, 1979. Applicant: TOBLER TRANSFER, INC., Jct. Interstate 80 and IL Hwy 89, Spring Valley, IL 61362. Representative: Leonard R. Kofkin, 39 South LaSalle St., Chicago, IL 60603. Transporting *general commodities* (except classes A and B explosives, household goods as defined by the Commission, commodities in bulk, and those requiring special equipment), (a) between Burlington, IA, Quincy, Springfield, Decatur, and Delavan, IL, and LaFayette, IN, on the one hand, and, on the other, those points in IL on and north of U.S. Hwy 36, and (b) between Burlington, IA, Quincy, Springfield, Decatur and Delavan, IL, on the one hand, and, on the other, LaFayette, IN. (Hearing site: Chicago, IL.)

MC 7555 (Sub-74F), filed November 13, 1979. Applicant: TEXTILE MOTOR FREIGHT, INC., P.O. Box 70, Ellerbe, NC 28338. Representative: Terrence D. Jones, 2033 K Street NW., Washington, DC 20006. Transporting (1) *paints and chalking compound, and materials, equipment, and supplies used in the manufacture thereof* (except in bulk), between the facilities of United Coatings, Inc., at (2) Charlotte, NC, (b) Chicago, IL, (c) Indianapolis, IN, and (d) Memphis, TN, on the one hand, and, on the other, those points in the United States in and east of MN, IA, MO, AR, and LA. (Hearing site: Washington, DC.)

Note.—Dual operations may be involved.

MC 13434 (Sub-82F), filed November 14, 1979. Applicant: GRANT TRUCKING, INC., P.O. Box 256, Oak Hill, OH 45656. Representative: David A. Turano, 100 East Broad St., Columbus, OH 43215. Transporting *iron and steel articles,* from points in IN, IL, and PA, to the facilities of Brown Steel Co., at Columbus, OH. (Hearing site: Columbus, OH.)

MC 22195 (Sub-181F), filed November 6, 1979. Applicant: DAN DUGAN TRANSPORT COMPANY, a corporation, 41st & Grange Ave., Sioux Falls, SD 57105. Representative: F. Fred Fischer (same address as applicant). Transporting (1) *fertilizer and fertilizer ingredients,* from Grand Forks, Drayton, Fargo, Carrington, Lignite and Enderlin, ND, and Crookston, MN, to ports of entry on the United States-Canada international boundary in ND and MN, (2) *liquid fertilizer and fertilizer ingredients (except anhydrous ammonia),* in bulk, in tank vehicles, from Grand Forks, ND and Climax, MN, to ports of entry on the United States-Canada international boundary line in ND, and MN, (3) *anhydrous ammonia,* in bulk, in tank vehicles, from Velva, ND, to points in MT, SD, and MN, and (4) *fertilizer and fertilizer ingredients,* from Hendrum, MN, to points in ND, SD, and MN. (Hearing site: Moorhead, MN, or Sioux Falls, SD.)

MC 30844 (Sub-661F), filed November 14, 1979. Applicant: KROBLIN REFRIGERATED XPRESS, INC., P.O. Box 5000, Waterloo, IA 50704. Representative: John P. Rhodes (same address as applicant). Transporting *foodstuffs* (except in bulk, in tank vehicles), from the facilities of Sanna Division of Beatrice Foods Co., at Menomonie, Cameron, Vesper, Wisconsin Rapids, and Eau Claire, WI, to points in the United States (except AK & HI), restricted to transportation traffic originating at the named origins and destined to the indicated destinations. Conditions: The person or

persons who appear to be engaged in common control of applicant and another regulated carrier must either file an application under 49 U.S.C. § 11343 or submit an affidavit indicating why such approval is unnecessary. Affidavits are due 20 days from the date of publication. (Hearing site: Chicago, IL.)

MC 44735 (Sub-47F), filed November 13, 1979. Applicant: KISSICK TRUCK LINES, INC., 7101 East 12th, Kansas City, MO 64126. Representative: William B. Barker, 641 Harrison St., Topeka, KS 66603. Transporting (1) *clay (except in bulk), concrete products, and refractory products,* between points in AR, KS, MO, OK, IL, IA, NE, and TX, on the one hand, and, on the other, points in LA, MS, and TN, (2) *refactory products,* (a) between points in IL, IA, and NE, on the one hand, and, on the other, points in AR, KS, MO, OK, and TX, and (b) between points in AR, KS, MO, OK, and TX, and (3) *materials and supplies* used in the manufacture and installation of (1) and (2) above, (except in bulk), between points in AR, KS, MO, OK, TX, LA, MS, IL, IA, NE, and TN. (Hearing site: Kansas City, MO, or Oklahoma City, OK.)

MC 61825 (Sub-117F), filed November 14, 1979. Applicant: ROY STONE TRANSFER CORPORATION, V. C. Drive, P.O. Box 385, Collinsville, VA 24078. Representative: John D. Stone (same address as applicant). Transporting (1) *animal feed* (except in bulk), from Columbus, OH, to points in NC, SC, and VA, and (2) *prefabricated buildings and parts,* from Youngstown, OH, to points in GA. (Hearing site: Washington, DC.)

MC 61825 (Sub-124F), filed November 14, 1979. Applicant: ROY STONE TRANSFER CORPORATION, V. C. Drive, P.O. Box 385, Collinsville, VA 24078. Representative: John D. Stone (same address as applicant). Transporting (1) *paper and paper products, and materials, equipment, and supplies used in the manufacture and distribution of paper and paper products* (except commodities in bulk), between the facilities of Olinkraft, Inc., at or near Monroe-West Monroe, LA, on the one hand, and, on the other, those points in the United States in and east of AL, IL, KY, TN, and WI, and (2) *bound books,* from Grand Rapids, MI, to Fincastle, VA. (Hearing site: Washington, DC.)

MC 65475 (Sub-29F), filed November 14, 1979. Applicant: JETCO, INC., 4701 Eisenhower Ave., Alexandria, VA 22304. Representative: J. G. Dail, Jr., P.O. Box LL, McLean, VA 22101. Transporting *tanks, tank components, and ducts,* from the facilities of Witherup Fabrication and Erection, Inc., at or near Kennerdell, PA, to points in the United States (except AK, and HI). (Hearing site: Washington, DC.)

MC 65475 (Sub-30F), filed November 14, 1979. Applicant: JETCO, INC., 4701 Eisenhower Ave., Alexandria, VA 22304. Representative: J. G. Dail, Jr., P.O. Box LL, McLean, VA 22101. Transporting (1) *iron and steel articles,* and (2) *materials, equipment, and supplies* used in the manufacture of iron and steel articles, between Springfield, VA, and Burnsville, MN, on the one hand, and, on the other, points in AL, CT, DE, FL, GA, IL, IN, IA, KY, MD, MA, MI, MN, MS, MO, NH, NJ, NY, NC, ND, OH, PA, RI, SC, SD, TN, VT, VA, WV, and WI. (Hearing site: Washington, DC.)

MC 85934 (Sub-111F), filed November 14, 1979. Applicant: MICHIGAN TRANSPORTATION CO., a corporation, 3601 Wyoming, P.O. Box 248, Dearborn, MI 48120. Representative: Martin J. Leavitt, 22375 Haggerty Road, P.O. Box 400, Northville, MI 48167. Transporting *fly ash,* in bulk, in tank vehicles, from points in Lucas County, OH, to points in Monroe County, MI. (Hearing site: Chicago, IL, or Washington, DC.)

MC 90794 (Sub-7F), filed November 14, 1979. Applicant: DI-JUB LEASING CORP., P.O. Box 155 Uptown, Hoboken, NJ 07030. Representative: Thomas F. X. Foley, State Highway 34, Colts Neck, NJ 07722. Transporting (1) *general commodities* (except those of unusual value, classes A and B explosives, household goods as defined by the Commission, commodities in bulk, and those requiring special equipment), in containers or in trailers, having a prior or subsequent movement by water, between the facilities of Seatrain Lines, Inc., at or near (a) Wilmington, NC, (b) Philadelphia, PA, (c) Charleston, SC, (d) Norfolk, VA, and (e) New York, NY, on the one hand, and, on the other, points in CT, DE, MD, MA, NH, NJ, NY, NC, PA, SC, VA, and DC, and (2) *cargo containers* and *chassis* for cargo containers, between points in CT, DE, MD, MA, NH, NJ, NY, NC, PA, RI, SC, VA, and DC. (Hearing site: Newark, NJ, or New York, NY.)

MC 94265 (Sub-326F), filed November 6, 1979. Applicant: BONNEY MOTOR EXPRESS, INC., P.O. Box 720434, Windsor, VA 23487. Representative: Clyde W. Carver (same address as applicant). Transporting *manufactured tobacco and tobacco products, and packaging materials,* from the facilities of R. J. Reynolds Tobacco Company, at Winston-Salem, NC, to points in ND. (Hearing site: Winston-Salem, NC, or Washington, DC.)

MC 94265 (Sub-327F), filed November 6, 1979. Applicant: BONNEY MOTOR EXPRESS, INC., P.O. Box 720434, Windsor, VA 23487. Representative: Clyde W. Carver (same address as applicant). Transporting *toilet preparations,* from the facilities of Iodent Way Chemical Company, Inc., at Elizabethton, TN, to points in GA, IN, KS, MA, MI, NV, NJ, NY, NC, OH, PA, RI, SC, TX, VA, and WV. (Hearing site: Atlanta, GA, or Washington, DC.)

MC 101474 (Sub-27F), filed November 14, 1979. Applicant: RED TOP TRUCKING CO., INC., 7020 Cline Ave., Hammond, IN 46323. Representative: Alki E. Scopelitis, 1301 Merchants Plaza, Indianapolis, IN 46204. Transporting (1) *iron and steel articles,* and (2) *materials, equipment and supplies* used in their manufacture (except commodities in bulk, in tank vehicles), between the facilities of Inland Steel Company, at East Chicago, IN, on the one hand, and, on the other, those points in the United States in and east of ND, SD, NE, CO, OK, and TX. (Hearing site: Chicago, IL, or Indianapolis, IN.)

MC 105045 (Sub-125F), filed October 31, 1979. Applicant: R. L. JEFFRIES TRUCKING CO., INC., P.O. Box 3277, Evansville, IN 47701. Representative: Richard C. McGinnis, 711 Washington Building, Washington, DC 20005. Transporting *plastic pipe,* from the facilities of Can-Tex Industries, Division of Harsco Corporation, at or near Sparta, TN, to those points in the United States in and east of WI, IL, KY, TN, and MS. (Hearing site: Nashville, TN, or Washington, DC.)

MC 106674 (Sub-445F), filed November 14, 1979. Applicant: SCHILLI MOTOR LINES, INC., P.O. Box 123, Remington, IL 47977. Representative: Jerry L. Johnson (same address as applicant). Transporting (1) *construction materials,* and (2) *materials and supplies* (except in bulk) used in their manufacture or distribution, between the facilities of the Celotex Corporation, at or near Texarkana, AR, on the one hand, and, on the the other, points in IL, IN, KY, NC, SC, and TN. (Hearing site: Chicago, IL, or Indianapolis, IN.)

MC 107515 (Sub-1297F), filed October 31, 1979. Applicant: REFRIGERATED TRANSPORT CO., INC., P.O. Box 308, Forest Park, GA 30050. Representative: Alan E. Serby, 3390 Peachtree Road, N.E., 5th Floor, Lenox Towers South, Atlanta, GA 30326. Transporting *foodstuffs,* from the facilities of J. Hungerford Smith Co., Inc., at or near Humboldt, TN, to points in the United States (except AK, and HI). (Hearing site: Memphis, TN.)

Note.—Dual operations may be involved.

MC 107515 (Sub-1298F), filed October 31, 1979. Applicant: REFRIGERATED TRANSPORT CO., INC., P.O. Box 308, Forest Park, GA 30050. Representative: Alan E. Serby, 3390 Peachtree Road, N.E., 5th Floor, Lenox Towers South, Atlanta, GA 30326. Transporting (1) *intravenous solutions,* and (2) *commodities used in the application* of intravenous solutions, from the facilities of Travenol Laboratories, at or near Memphis, TN, to Atlanta, GA. (Hearing site: Chicago, IL.)

Note.—Dual operations may be involved.

MC 109124 (Sub-99F), filed November 14, 1979. Applicant: SENTLE TRUCKING CORPORATION, P.O. Box 7850, Toledo, OH 43619. Representative: James M. Burtch, 100 E. Broad Street, Suite 1800, Columbus, OH 43215. Transporting (1) *insulating material,* and (2) *materials, equipment and supplies* used in the manufacture, distribution and installation of insulating materials, between the facilities of Owens-Corning Fiberglas Corporation, at Newark, OH, on the one hand, and, on the other, points in United States (except AK and HI). (Hearing site: Columbus, OH.)

MC 109124 (Sub-100F), filed November 14, 1979. Applicant: SENTLE TRUCKING CORP., P.O. Box 7850, Toledo, OH 43619. Representative: James M. Burtch, 100 E. Broad Street, Suite 1800, Columbus, OH 43215. Transporting (1) *pulpboard, wallboard, and fiberboard,* and (2) *materials, equipment and supplies* used in the manufacture, distribution, and installation of the commodities of (1) above, between the facilities of Owens-Corning Fiberglas Corporation, at or near Meridian, MS, on the one hand, and, on the other, those points in the United States on and east of a line beginning at the mouth of the Mississippi River, and extending along the Mississippi River to its junction with the western boundary of Itasca County, MN, then northward along the western boundaries of Itasca and Koochiching Counties, MN, to the international boundary line between the United States and Canada. (Hearing site: Columbus, OH.)

MC 109584 (Sub-206F), filed November 14, 1979. Applicant: ARIZONA-PACIFIC TANK LINES, a corporation, 3980 Quebec St., P.O. Box 7240, Denver, CO 80207. Representative: Rick Barker (same address as applicant). Transporting *fertilizer,* in bulk, in tank vehicles, from points in Maricopa County, AZ, to points in Dona Ana and Luna Counties, NM. (Hearing site: Phoenix, AZ, or Los Angeles, CA.)

MC 111375 (Sub-120F), filed November 15, 1979. Applicant: PIRKLE REFRIGERATED FREIGHT LINES, INC., P.O. Box 3358, Madison, WI 53704. Representative: Bernard J. Kompare, Suite 1600, 10 S. LaSalle St., Chicago, IL 60603. Transporting *such commodities* as are dealt in by manufacturers of (1) chemicals, (2) cleaning and scouring compounds, and (3) plastic film, sheeting and laminating equipment, (except commodities in bulk), from the facilities of Thiokol/Dynachem Corporation, in Orange County, CA, to points in IL, and IN, restricted to the transportation of traffic originating at the named origins and destined to the indicated destinations. (Hearing site: Los Angeles, CA.)

MC 115654 (Sub-185F), filed November 14, 1979. Applicant: TENNESSEE CARTAGE CO., INC., P.O. Box 23193, Nashville, TN 37202. Representative: Henry E. Seaton, 929 Pennsylvania Bldg., 425 13th St., N.W., Washington, DC 20004. Transporting *meats, meat products, meat byproducts, dairy products, and articles distributed by meat-packing houses,* in vehicles equipped with mechanical refrigeration, from Memphis, TN, to St. Louis, MO, and points in IL, IN, KY, and OH. (Hearing site: Nashville, TN, or Chicago, IL.)

MC 116254 (Sub-301F), filed November 6, 1979. Applicant: CHEM-HAULERS, INC., 118 East Mobile Plaza, Florence, AL 35630. Representative: Mr. Hampton M. Mills (same address as applicant). Transporting *iron and steel articles,* from Atlanta, GA, to those points in the United States in and east of MN, IA, MO, AR, and TX. (Hearing site: Nashville, TN, or Washington, DC.)

MC 116915 (Sub-105F), filed November 7, 1979. Applicant: ECK MILLER TRANSPORTATION CORP., Rt. #1, Box 248, Rockport, IN 47635. Representative: Fred F. Bradley, P.O. Box 773, Frankfort, KY 40602. Transporting (1) *aluminum and aluminum articles,* and (2) *materials, equipment, and supplies* used in the manufacture thereof (except commodities in bulk), between the facilities of Howmet Corporation, at or near Rockwall, TX, on the one hand, and, on the other, points in the United States (except AK and HI). (Hearing site: New York, NY.)

MC 117574 (Sub-342F), filed November 8, 1979. Applicant: DAILY EXPRESS, INC., P.O. Box 39, 1076 Harrisburg Pike, Carlisle, PA 17013. Representative: E. S. Moore, Jr. (same address as applicant). Transporting *such commodities* as are dealt in or used by dealers and manufacturers of agricultural equipment, industrial equipment, and lawn and leisure products (except commodities in bulk and automobiles, trucks, buses, as described in *Descriptions in Motor Carrier Certificates,* 61 M.C.C. 209 and 61 M.C.C. 760), from the facilities of Sperry New Holland Division, Sperry Corporation, at or near Columbus, NE, to points in AL, CT, DE, FL, GA, KY, MA, MD, ME, MS, NC, NH, NJ, NY, OH, PA, RI, SC, TN, VA, VT, and WV, restricted to the transportation of traffic originating at the named facilities and destined to the indicated destinations (except on traffic moving in foreign commerce). (Hearing site: Chicago, IL, or Washington, DC.)

MC 117574 (Sub-343F), filed November 9, 1979. Applicant: DAILY EXPRESS, INC., P.O. Box 39, 1076 Harrisburg Pike, Carlisle, PA 17013. Representative: E. S. Moore, Jr. (same address as applicant). Transporting (1) *machinery and equipment* used in the installation, assembly thereof, between Baltimore, MD, Cleveland, OH, Lancaster, PA, New York, NY, and Pittsburgh, PA, on the one hand, and, on the other, points in CT, DE, IL, IN, IA, KY, ME, MD, MA, MI, MN, MO, NH, NJ, NY, OH, PA, RI, VT, VA, WV, WI, and DC, restricted to the transportation of traffic moving in foreign commerce. (Hearing site: Washington, DC.)

MC 117574 (Sub-344F), filed November 8, 1979. Applicant: DAILY EXPRESS, INC., P.O. Box 39, 1076 Harrisburg Pike, Carlisle, PA 17013. Representative: E. S. Moore, Jr. (same address as applicant). Transporting (1) *building materials* and (2) *materials, equipment, and supplies* used in the production of color television picture tubes, and (2) *accessories, parts, materials and supplies* used in the installation and erection thereof, from the facilities of The Celotex Corporation at Sunbury, PA, to points in CT, DE, GA, IL, IN, IA, KY, MA, MD, ME, MI, MN, MO, NC, NH, NJ, NY, OH, PA, RI, SC, TN, VA, VT, WV, WI, and DC, restricted to the transportation of traffic originating at the named facilities. (Hearing site: Harrisburg, PA, or Washington, DC.)

MC 117765 (Sub-276F), filed November 6, 1979. Applicant: HAHN TRUCK LINES, INC., 1100 S. MacArthur, P.O. Box 75218, Oklahoma City, OK 73147. Representative: R. E. Hagan (same address as applicant). Transporting (1) *plumbing goods,* (2) *bathroom vanities and accessories,* and (3) *equipment, materials and supplies* used in the manufacture and distribution of the commodities named in (1) and (2) above, (except commodities in bulk), between Phoenix, AZ, Redlands, CA, Union Point and Monroe, GA, Renssalaer and Crawfordsville, IN, Leominster, MA, Ottumwa, IA, Salem, OH, New Castle, PA, Hondo and Corsicana, TX, and Milwaukee, WI, on the one hand, and,

on the other, points in the United States (except AK and HI), restricted to the transportation of traffic originating at or destined to the facilities of Universal-Rundle Corporation. (Hearings site: Oklahoma City, OK.)

MC 119654 (Sub-85F), filed November 14, 1979. Applicant: HI-WAY DISPATCH, INC., 1401 West 26th St., P.O. Box 509, Marion, IN 46952. Representative: Norman R. Garvin, 1301 Merchants Plaza, Indianapolis, IN 46204. Transporting *scrap and waste paper,* from points in IL, and WI, to points in IN, restricted to the transportation of traffic destined to the facilities of Clevepak Corporation. (Hearing site: Indianapolis, IN, or Chicago, IL.)

MC 123405 (Sub-77F), filed October 31, 1979. Applicant: FOOD TRANSPORT, INC., R.D. #1, Thomasville, PA 17364. Representative: Christian V. Graf, 407 North Front Street, Harrisburg, PA 17101. Transporting *frozen foodstuffs,* from the facilities of Imperial Freight Brokers, Inc., at Miami, FL, to Hanover, PA, restricted to the transportation of traffic originating at and destined to the named points. (Hearing site: Indianapolis, IN, or Chicago, IL.)

MC 124154 (Sub-99F), filed November 14, 1979. Applicant: WINGATE TRUCKING COMPANY, INC., P.O. Box 645, Albany, GA 31702. Representative: W. D. Wingate (same address as applicant). Transporting *machinery and machinery parts, wooden bobbins, and materials and supplies used in the manufacture,* between Greenville, SC, on the one hand, and, on the other, points in the United States (except AK and HI). (Hearing site: Atlanta, GA, or Washington, DC.)

MC 124154 (Sub-103F), filed November 14, 1979. Applicant: WINGATE TRUCKING COMPANY, INC., P.O. Box 645, Albany, GA 31702. Representative: W. D. Wingate (same address as applicant). Transporting (1) *agricultural chemicals,* and (2) *materials, supplies and equipment used in the manufacture* of the commodities in (1) above, between points in the United States (except AK and HI), restricted to the transportation of traffic originating at or destined to the facilities of FMC Corporation's Agricultural Chemical Group. (Hearing site: Atlanta, GA, or Washington, DC.)

MC 134645 (Sub-32F), filed November 6, 1979. Applicant: LAKE STATE TRANSPORT, INC., P.O. Box 944, Highway 75 South, St. Cloud, MN 56301. Representative: Anthony E. Young, 29 S. LaSalle St., Suite 350, Chicago, IL 60603. Transporting *foodstuffs* (except in bulk), from New Hope and Minneapolis, MN, to points in WA, OR, CA, AZ, CO, ID, UT, NV, and MT, restricted to the transportation of traffic originating at the facilities of Creamette, Inc. (Hearing site: Minneapolis, MN.)

(F) Sacaton—In connection with 145 above. D. Irregular routes: (1) Within the San Francisco Territory as described in Note A. (2) Within the Los Angeles Basin Territory as described in Note B.

Note A.—San Francisco territory: San Francisco Territory includes all the City of San Jose and that area embraced by the following boundary: Beginning at the point the San Francisco-San Mateo County Line meets the Pacific Ocean; thence easterly along said County Line to a point one mile west of State Highway 82; southerly along an imaginary line one mile west of and paralleling State Highway 82 to its intersection with Southern Pacific Company right-of-way at Arastradero Road; southeasterly along the Southern Pacific Company right-of-way to Pollard Road, including industries served by the Southern Pacific Company spur line extending approximately two miles southwest from Simla to Permanente; easterly along Pollard Road to W. Parr Avenue; easterly along W. Parr Avenue to Capri Drive; southerly along Capri Drive to Division Street; easterly along Division Street to the Southern Pacific Company right-of-way; southerly along the Southern Pacific right-of-way to the Campbell-Los Gatos City Limits; easterly along said limits and the prolongation thereof to South Bascom Avenue (formerly San Jose-Los Gatos Road); northeasterly along South Bascom Avenue to Foxworthy Avenue; easterly along Foxworthy Avenue to Almaden Road; southerly along Almaden Road to Hillsdale Avenue; easterly along Hillsdale Avenue to State Highway 82; northwesterly along State Highway 82 to Tully Road; northeasterly along Tully Road and the prolongation thereof to White Road; northwesterly along White Road to McKee Road; southwesterly along McKee Road to Capitol Avenue; northwesterly along Capitol Avenue to State Highway 238 (Oakland Road); northerly along State Highway 238 to Warm Springs; northerly along State Highway 238 (Mission Blvd.) via Mission San Jose and Miles to Hayward; northerly along Foothill Blvd. and MacArthur Blvd. to Seminary Avenue; easterly along Seminary Avenue to Mountain Blvd.; northerly along Mountain Blvd. to Warren Blvd. (State Highway 13); northerly along Warren Blvd. to Broadway Terrace; westerly along Broadway Terrace to College Avenue; northerly along College Avenue to Dwight Way; easterly along Dwight Way to the Berkeley-Oakland Boundary Line; northerly along said boundary line to the Campus Boundary of the University of California; westerly, northerly and easterly along the campus boundary to Euclid Avenue; northerly along Euclid Avenue to Marin Avenue; westerly along Marin Avenue to Arlington Avenue; notherly along Arlington Avenue to San Pablo Avenue (State Highway 123); northerly along San Pablo Avenue to and including the City of Richmond to Point Richmond; southerly along an imaginary line from Point Richmond to the San Francisco waterfront at the foot of Market Street; westerly along said waterfront and shoreline to the Pacific Ocean; southerly along the shoreline of the Pacific Ocean to point of beginning.

Note B.—Los Angeles basin territory: Los Angeles Basin Territory includes that area embraced by the following boundary: Beginning at the point the Ventura County-Los Angeles County Boundary Line intersects the Pacific Ocean; thence northeasterly along said county line to the point it intersects State Highway 118, approximately two miles west of Chatsworth; easterly along State Highway 118 to Sepulveda Boulevard; northerly along Sepulveda Boulevard to Chatsworth Drive; northeasterly along Chatsworth Drive to the corporate boundary of the City of San Fernando; westerly and northerly along said corporate boundary of the City of San Fernando to Maclay Avenue; northeasterly along Maclay Avenue and its prolongation to the Angeles National Forest Boundary; southeasterly and easterly along the Angeles National Forest and San Bernandino National Forest Boundary to Mill Creek Road (State Highway 38); westerly along Mill Creek Road to Bryant Street; southerly along Bryant Street to and including the unincorporated community of Yucaipa; westerly along Yucaipa Boulevard to Interstate Highway 10; northwesterly along Interstate Highway 10 to Redlands Boulevard; northwesterly along Redlands Boulevard to Barton Road; westerly along Barton Road to La Cadena Drive; southerly along La Cadena Drive to Iowa Avenue; southerly along Iowa Avenue to State Highway 60; southeasterly along State Highway 60 and U.S. Highway 395 to Nuevo Road; easterly along Nuevo Road via Nuevo and Lakeview to State Highway 79; southerly along State Highway 79 to State Highway 74; thence westerly to the corporate boundary of the City of Hemet; southerly, westerly and northerly along said corporate boundary to The Atchison, Topeka & Santa Fe right-of-way; southerly along said right-of-way to Washington Road; southerly along Washington Road through and including the unincorporated community of Winchester to Benton Road; westerly along Benton Road to Winchester Road (State Highway 79) to Jefferson Avenue; southerly along Jefferson Avenue to U.S. Highway 395; southerly along

U.S. Highway 395 to the Riverside County-San Diego County Boundary Line; westerly along said boundary line to the Orange County-San Diego County Boundary Line; southerly along said boundary line to the Pacific Ocean; northwesterly along the shoreline of the Pacific Ocean to point of beginning, including the point of March Air Force Base.

E. Regular route—Serving no intermediate points, as alternate routes for operating convenience only in conjunction with carrier's regular-route and irregular-route operations: (1) Between Alpine, CA and junction Interstate Hwy 8 and Interstate Hwy 10, near Casa Grande, AZ, over Interstate Hwy 8. (2) Between Cabazon and EL Centro, CA: From Cabazon over Interstate Hwy 8 to Indio, CA, then over CA Hwy 86 to El Centro. (3) Between Keene and Blythe, CA: From Keene over CA Hwy 58 to Barstow, CA, then over Interstate Hwy 40 to Needles, CA, then over CA Hwy 95 to Blythe. F. In performing the service herein authorized, carrier may make use of any of all streets, roads, highways, and bridges necessary or convenient for the performance of said service. G. Tacking Intended. Condition: Issuance of a certificate is subject to the coincidental cancellation, at applicant's written request, of the outstanding Certificate of Registration, in MC–48632 SUB 15f issued March 30, 1979. (Hearing site: San Francisco, CA.)

MC 52793 (Sub-55F), filed December 11, 1979. Applicant: BEKINS VAN LINES CO.—New Products Division, 3090 Via Mondo, Compton, CA 90221. Representative: David P. Christianson, 707 Wilshire Boulevard, suite 1800, Los Angeles, CA 90017. (Hearing site: Portland, OR.)

MC 144926 (Sub-9F), filed January 24, 1980. Applicant: E. W. WYLIE CORPORATION, P.O. Box 1188, Fargo, ND 58107. Representative: Thomas J. Van Osdel, 502 First National Bank Bldg., Fargo, ND 58126. Contract carrier, transporting *tanks and parts, attachments and accessories* for tanks, (1) from the facilities of O'Day Equipment, Inc., at Fargo, ND, and Sioux Falls, SD, to points in ND, SD, MN, IA, WY, MT, NE, ID, WA, and OR, and (2) from Minneapolis, MN, to the facilities of O'Day Equipment, Inc., at Fargo, ND, and Sioux Falls, SD, under continuing contract(s) with O'Day Equipment, Inc. (Hearing site: Fargo, ND, or Minneapolis, MN.)

MC 145437 (Sub-14F), filed January 14, 1980. Applicant: JWI TRUCKING, INC., 8100 North Teutonia Ave., Milwaukee, WI 53209. Representative: Michael J. Wyngaard, 150 East Gilman St., Madison, WI 53703. Contract carrier, transporting *wearing apparel and materials, equipment and supplies* used or useful in the manufacture, sale or distribution of wearing apparel from Carson City, NV, to points in CA, OR, and WA, under continuing contract(s) with Jockey International, Inc. (Hearing site: Madison, or Milwaukee, WI.)

MC 145437 (Sub-15F), filed January 14, 1980. Applicant: JWI TRUCKING, INC., 8100 North Teutonia Ave., Milwaukee, WI 53209. Representative: Michael J. Wyngaard, 150 East Gilman St., Madison, WI 53703. Contract carrier, transporting *Wearing apparel and materials, equipment and supplies* used or useful in the manufacture, sale or distribution of wearing apparel (except commodities in bulk), from Medina, OH and Union, SC to Farmingdale, NY, under continuing contract(s) with Jack Winter Appeal, Inc., and Mary Lester Fashion Fabrics, Inc. (Hearing site: Madison, or Milwaukee, WI.)

MC 146056 (Sub-4F), filed January 31, 1980. Applicant: PURITY TRANSPORTATION COMPANY, a Corporation, 1171 N. Water, Decatur, IL 62523. Representative: Robert T. Lawley, 300 Reisch Bldg., Springfield, IL 62701. Contract carrier, transporting (1) *bakery products,* from Bloomington, Champaign, Decatur, and Rockford, IL, to points in IA, MO, and WI, and (2) *flour,* from Winona, MN, to Rockford, IL, under

continuing contract(s) in (1) and (2) with Purity Baking Company, of Decatur, IL. (Hearing site: Chicago, IL.)

MC 146187 (Sub-18F), filed January 21, 1980. Applicant: THE TEN WHEELERS, INC., Rt. 2, Gregory Rd., Greenback, TN 37742. Representative: Edward C. Blank, II, P.O. Box 1004, 805 So. Garden St., Columbia, TN 38401. Transporting *floor coverings and articles* used in the installation and maintenance of floor coverings, from the facilities of Armstrong Cork Co., at Lancaster and East Hampfield Township, PA, to points in AL, FL, GA, KY, LA, MS, NC, SC, and TN, restricted to the transportation of traffic originating at the above named origins and destined to the indicated destinations. (Hearing site: Nashville, TN, or Lancaster, PA.)

MC 147787 (Sub-5F), filed January 21, 1980. Applicant: SOUTHERN DRAYAGE, INC., 4223 Space Center Dr., Jackson, MS 39205. Representative: John A. Crawford, 17th Floor Deposit Guaranty Plaza, P.O. Box 22567, Jackson, MS 39205. Contract carrier, transporting (A) *lawn mowers, rotary snow plows, lawn and garden tractors and parts, equipment and accessories* for the foregoing commodities, from points in Lincoln County, MS, to points in AL, FL, GA, IL, IN, KY, MA, MI, NJ, NY, NC, OH, PA, SC, TN, VA, and WI, and (B) *equipment, materials, and supplies* (except commodities in bulk) used in the manufacture of the commodities in (A), from points in IL, IN, KY, MI, OH, TN, and WI to points in Lincoln County, MS, under continuing contract(s) with Jacobsen, Division of Textron, Inc. (Hearing site: Jackson, MS.)

Note.—Dual operations may be involved.

MC 148227 (Sub-2F), filed January 28, 1980. Applicant: D–T INCORPORATED, 1002–B Koenigheim, San Angelo, TX 76903. Representative: Tom C. Massey, 202 W. Twohig, Suite 202, P.O. Box 2809 San Angelo, TX 76902. Contract carrier, transporting *motorcycles*, from Baton Rouge, LA, to Lubbock, San Angelo, Big Spring, Midland, Abilene, and Odessa, TX, under continuing contract(s) with Cycle City, Inc., of Lubbock, Cycles Unlimited, of San Angelo, Honda of Lubbock, A–1 Cycle Shop, of Big Spring, Glenn's Motors, Inc., of Midland, Kents Honda, of Abilene, and Permian Basin Honda, of Odessa. (Hearing site: Dallas, or Fort Worth, TX.)

MC 148376 (Sub-2F), filed January 7, 1980. Applicant: BILCO TRANSPORTATION, INC., 660 Riverside Rd., Watsonville, CA 95076. Representative: Eldon M. Johnson, 650 California St., Suite 2808, San Francisco, CA 94108. Contract carrier, transporting *foodstuffs*, in vehicles equipped with mechanical refrigeration, (1) from points in ID, OR, WA, and CO to the facilities of A. C. Arioto and Sons, in San Jose, CA, and (2) from the facilities of A. C. Arioto and Sons, in San Jose, CA to points in WA, under continuing contract(s) in (1) and (2) with A. C. Arioto & Sons, of San Jose, Ca. (Hearing site: San Francisco or San Jose, CA.)

MC 149117F, filed January 11, 1980. Applicant: ARLYNE CORPORATION, P.O. Box 232, Hazel Park, MI 48030. Representative: William B. Elmer, 21635 East Nine Mile R, St. Clair Shores, MI 48080. Contract carrier, transporting *iron and steel, iron and steel products, and materials and supplies* used in connection with the manufacture, processing and distribution of iron and steel and iron and steel products between points in Wayne County, MI, on the one hand, and, on the other, points in IL, IN, KY, OH and PA, under continuing contract(s) with Potomac Steel Corp. (Hearing site: Detroit, MI.)

MC 149167 (Sub-1F), filed January 31, 1980. Applicant: MAVERICK RENTING & LEASING, INC., 105 Howell St., Jersey City, NJ 07306. Representative: Piken & Piken, Queens Office Tower, 95–25 Queens Blvd. Rego Park, NY 11374. Contract carrier, transporting *bakery products* (except commodities in bulk), (1) between the facilities of Entenmann's Inc., at North Lake, IL, on the one hand, and, on the other, points in MO, MI, OH, WI, IN, IL, KY, and IA, and (2) between the facilities of Entenmann's at or near Miami, FL, on the one hand, and, on the other, points in AL and GA, under continuing contract(s) in (1) and (2) with Entenmann's Inc. (Hearing site: New York, NY.)

MC 149286F, filed January 9, 1980. Applicant: BORDERS TRANSPORTATION COMPANY, INC., General Delivery, Ulysses, KY 41264. Representative: Jewell Borders (same address as applicant). Contract carrier, transporting *mining machinery and equipment, and parts, attachments, and accessories* for the foregoing commodities, (1) between the facilities of Eimco Elkhorn, Division of Envirotech Corporation, at Martin, KY, Monroe, NC, and Salt Lake City, UT, and (2) from the facilities named in (1) above, to points in CO, IL, IN, KS, KY, MO, NM, NC, OH, PA, TN, UT, VA, WV, WY, and SC, under continuing contract(s) in (1) and (2) with Envirotech Corporation of Menlo Park, CA. (Hearing site: Louisville or Lexington, KY.)

MC 149326F, filed January 31, 1980. Applicant: JACK W. STRINGER & CHARLOTTE STRINGER, d.b.a. J & C STRINGER TRUCKING, a partnership, 211 W. Hight, R.R. #2, Macon, IL 62544. Representative: Robert T. Lawley, 300 Reisch Bldg., Springfield, IL 62701. Contact carrier, transporting *corn and soybean products* (except in bulk), from Decatur, IL, to points in CA, IN, MI, OH, and TX, under continuing contract(s) with A. E. Staley Manufacturing Company, of Decatur, IL. (Hearing site: Chicago, IL, or St. Louis, MO.)

MC 149327F, filed January 31, 1980. Applicant: D. J. SALYER, INC., 84 Manchester St., Concord, NH 03301. Representative: Fritz R. Kahn, Suite 1100, 1660 L St., NW., Washington, DC 20036. Transporting *building and construction materials, equipment and supplies, and commodities the transportation of which because of size or weight requires the use of special equipment, and parts for the foregoing commodities*, between points in NH, VT, and MA, on the one hand, and, on the other, points in NH, ME, VT, RI, CT, MA, NY, and NJ. (Hearing site: Boston, MA, or Washington, DC.)

MC 149366 (Sub-2F), filed January 23, 1980. Applicant: NORTH CENTRAL JOBBERS, INC., Northwood, ND 58264. Representative: William J. Gambucci, Suite M–20, 400 Marquette Ave., Minneapolis, MN 55402. Transporting *lime, salt, and calcium chloride*, from Duluth, MN, to points in MT, ND, and SD. (Hearing site: Duluth or Minneapolis, MN.)

Agatha L. Mergenovich,

Secretary.

BILLING CODE 7035–01–M

DEPARTMENT OF JUSTICE

National Institute of Justice

Preindictment Decisionmaking; Solicitation

The National Institute of Justice announces a competitive research solicitation aimed at examining Pre-Indictment Decision Making.

The solicitation asks for preliminary proposals to be submitted for peer review in accordance with the criteria set forth in the solicitation. In order to be considered, all proposals must be postmarked no later than May 23, 1980. A grant or cooperative agreement for an 18 month research project is planned, with funding not to exceed $150,000. To maximize competition for this award, both profit-making and non-profit organizations are eligible to apply.

Copies of the solicitation may be obtained by sending a mailing label to: Solicitation Request No. 131, Pre-

Indictment Decision Making, National Criminal Justice Reference Service, Box 6000, Rockville, Maryland 20850.

Dated: March 25, 1980.

Harry M. Bratt,

Primary and Principal Assistant to the Acting Director, National Institute of Justice.

[FR Doc. 80-10104 Filed 4-2-80; 8:45 am]

BILLING CODE 4410-18-M

Role of the Grand Jury; Solicitation

The National Institute of Justice announces a competitive research solicitation aimed at examining the Role of the Grand Jury.

The solicitation asks for proposals to be submitted for peer review in accordance with the criteria set forth in the solicitation. In order to be considered, all proposals must be postmarked no later than May 17, 1980. A grant or cooperative agreement for an 18 month research project is planned, with funding support not to exceed $200,000. To maximize competition for this award both profit-making and non-profit organizations are eligible.

Copies of the solicitation may be obtained by sending a mailing label to: Solicitation Request, The Role of the Grand Jury, National Criminal Justice Reference Service, Box 6000, Rockville, Maryland 20850.

For questions pertaining to this request for solicitations, contact Jonathan Katz, Adjudication Division, Office of Research Programs, NIJ, 633 Indiana Avenue, N.W., Washington, D.C. 20531, (301) 492-9114.

Dated: March 25, 1980.

Approved:

Harry M. Bratt,

Primary and Principal Assistant to the Acting Director, National Institute of Justice.

BILLING CODE 4410-18-M

NATIONAL AERONAUTICS AND SPACE ADMINISTRATION

[Notice (80-22)]

Space and Terrestrial Applications Steering Committee; Annual Comprehensive Review

Section 7(b) of Pub. L. 92-463, the Federal Advisory Committee Act, dated October 6, 1972, requires a comprehensive review of Federal advisory committees.

In accordance with implementing instructions of Office of Management and Budget Circular No. A-63, Transmittal Memorandum No. 5, as modified February 14, 1980, NASA is reviewing for continuation the Space and Terrestrial Applications Steering Committee, Proposal Evaluation Advisory Subcommittee.

The intent of this advisory subcommittee is to obtain the advice of the scientific community in evaluating research and investigations proposals for inclusion in NASA's Space and Terrestrial Applications programs. The Space and Terrestrial Applications Steering Committee, under which the subcommittee operates, is a NASA-sponsored interagency committee, composed wholly of Government employees.

The public is hereby invited to submit comments on the proposed continuation of this advisory subcommittee. Comments should be addressed to, or delivered to: National Aeronautics and Space Administration, Attn: Code LB-4, 400 Maryland Avenue SW., Washington, DC 20546. Comments should be received no later than April 10, 1980. Additional information may be obtained by calling Mary R. Lippolis, 202/755-8383.

Russell Ritchie,

Deputy Associate Administrator for External Relations.

March 31, 1980.

NATIONAL TRANSPORTATION SAFETY BOARD

[N-AR 80-14]

Reports, Safety Recommendations and Responses; Availability

The National Transportation Safety Board last week made available to the public copies of the following reports:

Highway

Safety Effectiveness Evaluation of the National Highway Safety Administration's Rulemaking Process, Volume III: Current Rulemaking (NTSB-SEE-80-2).—Under authority of the Independent Safety Board Act of 1974, the Board may "evaluate, assess the effectiveness, and publish the findings of the Board with respect to the transportation safety consciousness and efficacy in preventing accidents of other Government agencies * * *." The subject case history is the third and final factual report upon which the Safety Board will base an evaluation of the effectiveness of NHTSA's rulemaking process under the Federal Motor Vehicle Safety Standards (FMVSS).

Two earlier case histories, issued by the Safety Board last fall, covered NHTSA's truck air brake system rulemaking (FMVSS-121) and its motor vehicle passive restraint rulemaking (FMVSS-208). Volume III describes NHTSA's rulemaking procedures and summarizes eight selected standards which illustrate them:

- FMVSS 108—Lamps, Reflective Devices and Associated Equipment.
- FMVSS 130—Heavy Duty Vehicle Brake Systems.
- Low Tire Pressure Warning Indicators.
- FMVSS 203/204—Impact Protection for the Driver from the Steering Control System and Steering Control Rearward Displacement.
- FMVSS 214—Side Door Strength (Side Impact Protection).
- Pedestrian Initial Impact Protection.
- FMVSS 302—Flammability of Interior Materials (School Buses).
- FMVSS 400—Systems Safety Standards (Occupant Crash Protection).

Neither Volume III nor the two earlier case histories contain an analysis but will help serve as a basis for the Safety Board's evaluation of the NHTSA rulemaking process, to be published as Volume IV. Volume III was developed by the Safety Board through extensive interviews with NHTSA personnel, through examination of internal agency documents, including formal and informal documentation of specific rules, and through review of public dockets related to the standards. NHTSA has had the opportunity to review and comment on a draft of this report.

Special Study—Fatal Highway Accidents on Wet Pavement—The Magnitude, Location, and Characteristics (NTSB-HSS-80-1).—The problem of highway accidents on wet pavement, although not well defined, has been considered by many States to be of moderate to major concern. This special study was undertaken by the Safety Board to determine the magnitude of the wet-pavement accident problem nationwide, to determine the significance of the locations of the wet-pavement accidents, and to determine the characteristics of these accidents. Data developed by the Safety Board indicate that during 1976 and 1977, 13.5 percent of all fatal accidents occurred on wet pavement, while precipitation occurred only about 3.0 to 3.5 percent of the time nationwide. This indicates that fatal accidents on wet pavement occur 3.9 to 4.5 times more often than might be expected, and that the wet-pavement accident problem should be of concern to all States.

To measure the performance of the activities of States aimed at reducing wet-pavement accidents, the Safety Board developed a Wet Fatal Accident Index for each State. This method

indicated an area in the United States with good performance and a belt with poorer-than-average performance. Additionally, NHTSA's fatal Accident Reporting System data showed the types of accidents and the characteristics of the roads where fatal accidents occurred during period when the pavement was wet.

As a result of this special study, the Safety Board on March 12 issued three recommendations (Nos. H–80–21 through-23) to the Federal Highway Administration and one recommendation (No. H–80–24) to NHTSA. (See 45 FR 18209, March, 20, 1980.)

Marine

Accident Report—Collision of Greek Bulk Carrier M/V IRENE S. LEMOS and Panamanian Bulk Carrier M/V MARITIME JUSTICE, Lower Mississippi River, near New Orleans, Louisiana, November 9, 1978 (NTSB–MAR–80–4).—At 0640, on November 9, the carriers collided at mile 78.3 AHP, about 15 statute miled below New Orleans. Because of dense fog, the visibility at the time of the collision was less then 400 feet. The vessels struck nearly head-on, damaging the bows of both vessels. There were no deaths or injuries. Cost of repairs to the two vessels was estimated at $4 million. About 1,800 barrels of fuel oil were discharged into the Mississippi River and resulted in local health officials securing the municipal water intake ½ mile downriver.

The Safety Board determined that the probable cause of the accident was the poor judgment of the pilots of the MARITIME JUSTICE and the IRENE S. LEMOS when they agreed to meet and pass in near zero visibility conditions at English Turn Bend, where the risk of collision was much greater than in a straight portion of the river and the failure of the vessels to move to the extreme right of the channel. Contributing to the accident was the failure of the mate on the MARITIME JUSTICE and the master of the IRENE S. LEMOS to exercise their responsibility to assure that the vessels were navigated safely, rather than indiscriminately relying on the pilots of the vessels.

This accident was investigated jointly by the Safety Board and the U.S. Coast Guard. The investigation included a public hearing which convened in New Orleans on November 14, 1978, and reconvened on November 28, 1978. This report is based on the factual information developed by this investigation. As a result of the investigation, the Safety Board on March 20, 1980, forwarded by separate letters the following recommendations:

M–80–9 through M–80–13 to the U.S. Coast Guard

Determine which bends on the lower Mississippi River present difficult navigational problems and should be limited to one-way traffic during conditions of reduced visibility, and promulgate appropriate restrictions (M–80–9)

Require the New Orleans Vessel Traffic Center to inform participating vessels routinely of important weather information, such as dense fog, and withdraw the current instructions which require vessels to request such information specifically. (M–80–10)

Accelerate rulemaking, Docket No. 75–112, to make participation in the New Orleans Vessel Traffic Service mandatory. (M–80–11)

Develop and implement a plan of action for the Captain of the Port of New Orleans and the New Orleans Vessel Traffic Center that will insure prompt action to control traffic movements on the lower Mississippi River during conditions of limited visibility. (M–80–12)

Re-evaluate the proposed level of vessel traffic service (VTS) on the lower Mississippi River, and determine if an extended surveillance system is needed to overcome the severe limitations of the present VTS to provide useful, accurate information to participants. (M–80–13)

Require that every master of an oceangoing vessel inform himself of the pilot's plan to maneuver his ship in or out of a harbor and that the master determine, with the pilot's assistance, the critical aspects of the maneuver, including the pilot's plan for emergencies. The master should then be required to instruct his crew to insure that high-risk tasks receive priority. (M–74–15, reiterated)

Amend 33 CFR 164.11(k) to require that masters and pilots discuss beforehand and agree to the essential features and relevant checkpoints of maneuvers expected to be undertaken. (M–77–33, reiterated)

M–80–14 through–17 to the Crescent River Port Pilots Association

Promulgate a policy that member pilots refrain from meeting or overtaking other vessels at bends on the lower Mississippi River which present difficult navigational problems during conditions of reduced visibility. (M–80–14)

Promulgate a policy that member pilots confer with ship's masters on any high risk maneuvering agreements made over the bridge-to-bridge radiotelephone, well in advance of the execution. (M–80–15)

Promulgate a policy that member pilots participate in the New Orleans Vessel Traffic Service to improve its level of effectiveness and reliability. (M–80–16)

Instruct member pilots regarding the importance of complying with Article 15 of the Inland Rules of the Road which states, in part: "In fog, mist, falling snow, or heavy rainstorms, whether by day or night, the signals described in this article shall be used as follows, namely: (a) A steam vessel under way shall sound, at intervals of not more than one minute, a prolonged blast." (M–80–17)

Include in the prescribed procedures for pilots under their jurisdiction a requirement that pilots specifically ascertain vessel maneuvering characteristics before getting underway, and that they discuss with the master before getting underway the essential features and relevant checkpoints for maneuvers to be undertaken. (M–79–107, reiterated)

Each of the above new recommendations, M–80–9 through M–80–17, is designated "Class II, Priority Action." The three reiterated recommendations were, as of March 20, classified as "open" by the Safety Board.

Pipeline

Accident Report—Southern Natural Gas Pipeline Company Rupture and Fire of a 14-inch Gas Transmission Pipeline, Southeast of New Orleans, Louisiana (Offshore), July 15, 1979 (NTSB–PAR–80–1).—Investigation showed that the pipeline was ruptured by a grappling hook from the PETE TIDE II, an anchor-handling boat working in the Gulf of Mexico. A seven-man, anchor-handling crew either was swept or jumped overboard, and the escaping natural gas was ignited by an unknown source aboard the boat. Two men are missing and presumed dead; four men were injured. The boat was damaged by fire, and 2,638 Mcf of natural gas was lost.

The Safety Board has determined that the probable cause of the accident was the rupture of a 14-inch natural gas transmission pipeline by a grappling hook from the PETE TIDE II, an anchor-handling boat. The natural gas from the ruptured pipeline rose to the surface of the water and was ignited by a source on board the PETE TIDE II. Contributing to the accident were the insufficient information given by Shell Oil Company to the contractor concerning the existence and location of the pipeline and the failure of Shell to mark the pipeline.

As a result of its investigation of this accident, the Safety Board on March 13 issued by four separate letters eight safety recommendations: P–80–15 to the American Gas Association, the American Petroleum Institute, the Offshore Operators Committee and the International Association of Drilling Contractors, jointly; P–80–16 and –17 to the United States Coast Guard; P–80–18 to the U.S. Department of the Interior; and P–80–19 through 22 to the Shell Oil Company. (See 45 FR 20255, March 27, 1980.)

Railroad

Accident Report—Rear-End Collision of Consolidated Rail Corporation Freight Trains ALPG–2 and APJ–2, near

Royersford, Pennsylvania, October 1, 1979 (NTSB–RAR–80–2).—Consolidated Rail Corporation (ConRail) eastbound freight train ALPG–2 struck the rear of standing ConRail eastbound freight train APJ–2 on the No. 2 main track near Royersford. The engineer and conductor of ALPG–2 were killed. The locomotive unit of ALPG–2 was derailed and destroyed. The caboose of APJ–2 and a total of 20 cars were derailed. Damage was estimated to be $562,000.

The probable cause of this accident, as determined by the Safety Board, was the failure of the conductor of train ALPG–2, who was operating the train without authority and under the influence of marijuana, to comply with a "stop and proceed" signal aspect located 3,600 feet from the collision site and to respond to flagging protection provided by the rear brakeman of train APJ–2 and stop the train. Contributing to the accident was the conductor's failure to perform his assigned duties by (1) ensuring that the head brakeman performed his duties in his assigned location in the locomotive; and (2) ensuring that the engineer was physically fit and capable of operating the train in conformity with all applicable rules and regulations. Also contributing was the absence of an adequate backup system to control the train in the event that the crew failed to do so.

A "Class II, Priority Action" recommendation, No. R–80–5, was issued by the Safety Board on March 5 to ConRail. (See 45 FR 16367, March 13, 1980.) In addition, the Safety Board reiterates the following recommendation which was made to the Federal Railroad Administration on December 30, 1975, as a result of its investigation of a train collision at Meeker, La.:

> Promulgate regulations which require an adequate backup system for mainline freight trains that will insure that a train is controlled as required by the signal system in the event that the engineer fails to do so. (R–76–3)

Special Investigation Report—The Accident Performance of Tank Car Safeguards (NTSB–HZM–80–1).—The derailment of the Southern Pacific Transportation Company freight train near Paxton, Texas, on September 8, 1979, provided the Safety Board with the opportunity to examine the effectiveness of tank car safeguards during a derailment. Reconstruction of the accident damage sequence showed that safeguards did, in fact, reduce the potential for a spill and catastrophic overheating of thermally coated cars. It was also observed that damage to the top fittings and lower outlet valves, which occurred when cars collided with each other and with other objects after they left the track, was the most frequent cause of product loss.

As a result of this investigation, the Safety Board on March 12 made recommendations to the Department of Transportation concerning the extension of safeguard requirements to all types of tank cars, modification of cars to prevent collision damage to top fittings and lower outlet valves, investigation of the effect of car placement in collisions, and crashworthiness testing of new tank car designs. (See recommendations R–80–10 through 16; 45 FR 18212, March 20, 1980.)

Special Study—Railroad Emergency Procedures (NTSB–RSS–80–1).—The Safety Board has investigated at least 19 accidents during the past 10 years in which serious shortcomings were noted in the procedures used by railroad operating personnel during the emergency. In view of an increasing number of train accidents, the Safety Board undertook this special study to document the reasons for these procedural shortcomings. The study examines accident experience and the rules and procedures which the railroads use for guidance of their train crewmembers, and evaluates the effectiveness of existing procedures.

A major conclusion of this study was that the rules which almost all railroads use for guidance of their train crewmembers during emergencies do not establish lines of authority, task identification, task scheduling, or task assignment. Calling for corrective action, the Safety Board on March 5 issued recommendations R–80–6 and –7 to the Federal Aviation Administration and reiterated recommendation R–76–29. (See 45 FR 16367, March 13, 1980.)

Aviation Safety Recommendation Letters

A–80–22 and –23.—Last May 30 a deHavilland DHC–6–200 (N68DE), owned and operated by Downeast Airlines, crashed while making a "localizer only" approach to runway 3 at the Knox County Regional Airport, Rockland, Maine. Both flight crewmembers and 15 of the 16 passengers were killed; the surviving passenger was injured seriously.

The Safety Board's investigation of the accident revealed that although instrument approaches to the Knox County Regional Airport are from the south, there are no reference visibility markers to measure low visibility conditions south of the airport. In addition, the Board notes that there are no published guidelines which specify the number and location of visibility markers needed at airports to assure representative surface visibility values. Accordingly, on March 26 the Safety Board recommended that the Federal Aviation Administration:

> Insure that lighted visibility markers are installed south of the Knox County Regional Airport, Rockland, Maine, within sight in clear visibility conditions of the normal weather observation position. One of the markers should be placed about ¾ statute mile from the point of observation. (A–80–22)
>
> Establish guidelines on the location and number of visibility markers necessary at airports to assure representative surface visibility values for airport runways and the airport runway environment. (A–80–23)

A–80–24 and –25.—On April 21, 1979, a Piper Model PA–18 Super Cub crashed at the Lebanon (N.H.) Regional Airport. The sky was clear and although the wind was calm, the airplane was observed to bounce severely several times during the attempted landing. The airplane then turned right, and a go-around was initiated. Shortly thereafter, the aircraft crashed near the airport boundary and burned. The pilot was killed, and his passenger was seriously injured.

The Board notes that the pilot was in the process of delivering this new airplane from the Piper factory at Lock Haven, Pa., to Lebanon when the accident occurred. Although he had accumulated several hundred flight hours in tricyle gear aircraft, his experience in tailwheel airplane was limited to about 5 hours. Moreover, before the date of the accident, he had not flown in a tailwheel airplane for 2 years. While the pilot made a number of takeoffs and landings with a flight instructor in the PA–18 immediately before he departed for Lebanon, the Safety Board believes that the scope of this familiarization was inadequate and did not prepare him sufficiently to take charge of the aircraft.

Further, the Safety Board notes that the safe operation of tailwheel airplanes requires a unique measure of operational familiarization that is not transferable from experience in tricycle gear aircraft. Tailwheel airplanes are especially prone to loss of directional control during takeoff and landing, and to severe bouncing if the landing is not performed properly. The pilot's knowledge and level of proficiency concerning crosswind takeoffs and landings, power (wheel) landings, recovery from bounced landings, and go-around procedures are particularly critical to safe operation of tailwheel aircraft. The Safety Board's special study, "Single-Engine, Fixed-Wing General Aviation Accidents, 1972–1976," has shown that the total accident rate

for tailwheel aircraft is more than twice that of aircraft with tricycle landing gear.

The Safety Board believes that an adequate checkout of pilots in tailwheel airplanes is essential and that continued safe operation of these airplanes requires a minimum level of recent experience somewhat greater than presently required. The checkout should focus on safe takeoffs and landings and should provide measurable assurance of the pilot's capability to operate the airplane in all phases of flight. Consequently, the Safety Board recommends that the FAA:

Amend FAR 61.31, "General Limitations," to require that before acting as pilot-in-command of a tailwheel airplane, a private or commercial pilot receive flight instruction (including all normal and contingent aspects of takeoffs and landings) from an authorized flight instructor who has found him competent to pilot such airplanes and has so endorsed his pilot logbook. This requirement need not apply to pilots who have logged flight time as a pilot-in-command in tailwheel airplanes before the effective date of this amendment. (A–80–24)

Amend FAR 61.57, "Recent Flight Experience: Pilot in Command (c) General Experience," to make more stringent the current requirements for the pilot-in-command of a tail wheel configured airplane carrying passengers. (A–80–25)

Each of the above aviation safety recommendations is designated "Class II, Priority Action."

Responses to Safety Recommendations

Aviation

A–79–93.—The Federal Aviation Administration on March 18 responded to a recommendation issued last December 19 following invesigation of the Columbia Pacific Airlines' Beech 99 crash during takeoff from Richland (Wash.) Airport, February 10, 1978. The recommendation asked FAA to require that the Beech 99 and Beech 100 flight manuals include a checklist procedure that requires the crew to verify the operational status of the stabilizer out-of-trim warning system. (See 44 FR 76604, December 27, 1979.)

FAA states that a check of the trim warning system before the first flight of the day is a good operating practice. The manufacturer concurs and has agreed to add that item to the checklist which forms a part of the flight manuals for the Beech 99 and Beech 100 airplanes.

A–79–108.—FAA's letter of March 19 is in response to a recommendation issued last December 28 during the investigation of the Pan American Boeing 747 accident at Heathrow Airport, London, on December 27, 1979. The recommendation urged FAA to issue a telegraphic Airworthiness Directive to require a one-time inspection of the engine pylon structure in the area of pylon station 128 for loose or missing fasteners and fatigue damage for B–747 aircraft equipped with P&W JT9D engines. (See 45 FR 2117, January 10, 1980.)

FAA reports that last December 28, it issued telegraphic Airworthiness Directive T79–NW–21, effective upon receipt, which required inspection of the fasteners attaching the nacelle strut forward engine mount bulkhead to the horizontal firewall of the strut for loose or missing fasteners and inspection of the bulkhead chords and webs for cracks. The Airworthiness Directive was published at 45 FR 8285, February 7, 1980.

Intermodal

I–78–14 through –16.—Letter of February 22 from the Association of American Railroads (AAR) is in response to the Safety Board's February 6 comments on ARR's December 21, 1979, response to these recommendations, developed as a result of the Board's observation during investigation of a number of railroad derailment accidents that wreckage-clearing operations involving hazardous materials are in need of improvement. (See 43 FR 39870, September 7, 1978.)

With reference to recommendation I–78–14, the Board noted on February 6 that ARR's Bureau of Explosives is making an effort to understand and deal with such related problems as the integrity of damaged tank cars and the use of explosives charges in evacuating tanks. The Board asked to be furnished a detailed update of ARR's findings and proposed actions when such become available, stressing the fact that this particular recommendation is concerned with the wreckage-clearing phase of hazardous materials railroad accidents. Also, the Board encouraged AAR to include safety procedures for hazard assessment and wreckage-clearing coordination in the AAR publication, "Emergency Handling of Hazardous Materials in Surface Transportation," ans asked to receive a copy of any such material as will be included in the publication.

In commenting on I–78–15, which recommended that AAR disseminate these safety procedures, as soon as they are documented, to railroad personnel, wreckage-clearing contractor personnel, special emergency response team personnel, and public officials in the communities through which railroads operate, the Board noted that AAR has many pamphlets for distribution discussing the handling of certain types of accidents. The Board asked to be furnished copies of those pamphlets, if available, that are specifically related to this issue.

The Board noted that the issue of regular reviews of selected railroad wreckage-clearing operations, as recommended in I–78–16, is not addressed in AAR's December 21 letter.

The Board expressed appreciation for AAR's efforts in the area of safety for hazardous materials being transported by railroad, and encouraged AAR to work closely with the Federal Railroad Administration to fulfill recommendation I–79–13 which was issued last October 2 and directs ERA to address the area of health and safety during hazardous materials railroad wreckage-clearing operations.

AAR's February 22 response reports that several discussions have been held, subsequent to last December 21, with representatives of FRA concerning a cooperative AAR–FRA program which would address recommendation I–78–14. AAR is encouraged by the willingness of FRA to participate in such a project, and both parties are in the process of identifying all of the individual topics which must be considered. This task will soon be completed, after which AAR will develop the necessary procedures and will advise the Board of progress made and forward copies of material as it becomes suitable for publication.

It is AAR's intention also to review, update and revise as necessary information currently in print, and copies of the revised publications will be furnished to the Board as they are completed.

AAR notes that I–78–16 suggests a continuing review with upgrading as necessary of safety procedures. AAR believes that this procedure can be considered to be effectively implemented. At its regular bi-monthly meetings the Bureau of Explosives Steering Committee conducts a "post-mortem" on major derailments which have occurred since the prior meeting. No official minutes are kept, and frank and open discussions are encouraged. Lessons learned are carried back to the individual roads for consideration and implementation; matters of a general nature will appear in Bureau publications.

Pipeline

P–79–28.—On March 5 the Lone Star Gas Company responded to a recommendation issued last October 4 as a result of the Safety Board's investigation of a pipeline accident which occurred at North Richland Hills, Texas, on January 19, 1979. The

recommendation asked Lone Star to determine through sample inspections the extent of the problem of circumferential cracking on its service line/gas main connections similar to that at the accident locations, and to take appropriate action to reduce the probability of the recurrence of similar accidents. (See 44 FR 60183, October 18, 1979).

Lone Star reports that immediate action was taken and 328 random sample inspections were made of swing-joints and main connections in the cities of Arlington and North Richland Hills. These inspections indicate that there is no "immediate danger" with such connections as implied in the recommendation. There were no indications of problems with circumferential stress cracking at the connections or threads on the swing-joint and main connections, and no swing-joint or main connection was found to be in an excessive strain which would cause circumferential cracking at any of the threaded connections.

To augment these on-site inspections, Lone Star reviewed its leak repair work orders involving service line replacements, swing-joints, and service tap connections for instances of material failure caused by soil movement and stress cracking at the threaded connections. No instances of circumferential cracking at service line/gas main connections were revealed.

Railroad

R–80–2 and –3.—The Atchison, Topeka and Santa Fe Railway Company (AT&SF) on February 20 responded to recommendations issued as a result of investigation of the Amtrak passenger train derailment which occurred near Lawrence, Kans., October 2, 1979. The recommendations were forwarded January 25 and urged AT&SF to (1) establish requirements for testing automatic train stop (ATS) equipment over inert inductors at intial terminals before in-service departure of locomotives to determine that both the ATS alarm will sound and the brakes will automatically apply; and (2) establish rules and procedures which require crewmembers operating Amtrak locomotives to post-acknowledge all automatic train stop inductor locations unless the ATS equipment has a pre-acknowledgment device which indicates that the system is functioning. (See 45 FR 8391, February 7, 1980.)

AT&SF believes that recommendation R–80–2 should formally be addressed to Amtrak instead of the Santa Fe since Amtrak personnel are in charge of locomotives prior to in-service departure at initial terminals. In Santa Fe's case, the initial terminals where Amtrak locomotives require testing of ATS over inert inductors before in-service departure are Los Angeles and Chicago. AT&SF notes that under Santa Fe rules, the engineman is required to assure himself that the ATS device has been tested prior to departure. If the ATS cut-out cock is not sealed or the cab card does not indicate that a proper test has been accomplished, such information is to be properly reported. In addition, a Santa Fe Mechanical Department employee also checks the cab card to see if the ATS has been tested and to make certain that the ATS cut-out cock is sealed before an Amtrak locomotive departs on a passenger train over Santa Fe territory equipped for ATS. Nonetheless, AT&SF states, the requirements for testing of ATS on Amtrak locomotives over inert inductors before in-service departure from initial terminals is Amtrak's responsibility.

AT&SF reports implementing recommendation R–80–3 whereby the present procedure for acknowledgment and release of ATS applications has been amended to require crewmembers operating *all* Amtrak locomotives to post-acknowledge all ATS inductor locations. While Amtrak does have some locomotives presently operating on Santa Fe between Los Angeles and San Diego that have ATS equipment with a pre-acknowledgment device which indicates the system is functioning, AT&SF requires post-acknowledgment on *all* Amtrak locomotives. Until such time that Amtrak deems it necessary to equip *all* of its locomotives operating on Santa Fe with ATS equipment have pre-acknowledgment devices, uniform post-acknowledgment will be required to avoid possible confusion as a result of its engineers working with Amtrak locomotives equipped with different types of ATS devices.

Further, AT&SF notes that prior to Amtrak, Santa Fe locomotives used in passenger service were equipped with positive pre-acknowledgment devices which also provided an indication on the speed tape when an engineer pre-acknowledged an inductor. AT&SF has previously indicated to Amtrak that the positive pre-acknowledgment type of device is favored for the following reasons:

(a) It indicates that the ATS is functioning and is accompanied by a bell that can be heard by those in the cab of the locomotive.

(b) Positive pre-acknowledgment is an indication that the engineer is alert to a restriction(s) ahead.

(c) It gives the engineer an opportunity to react ahead of post-acknowledgment so that he has more than four to six seconds before a penalty brake application is experienced.

AT&SF strongly recommends that Amtrak be required to have uniform ATS devices on its locomotives operating on the Santa Fe, preferably of the positive pre-acknowledgment type.

Note.—Single copies of the Safety Board's reports are available without charge, as long as limited supplies last. Copies of recommendation letters, responses and related correspondence are also provided free of charge. All requests for copies must be in writing, identified by report or recommendation number. Address requests to: Public Inquiries Section, National Transportation Safety Board, Washington, D.C. 20594.

Multiple copies of reports may be purchased from the National Technical Information Service, U.S. Department of Commerce, Springfield, Va. 22161.

(49 U.S.C. 1903(a)(2), 1906)

Margaret L. Fisher,

Federal Register Liaison Officer.

BILLING CODE 4910–58–M

Areas of Responsibility for NTSB Field Offices

Notice is hereby given that, effective May 1, 1980, the National Transportation Safety Board's 10 Field Offices will be responsible for investigating aviation, highway, pipeline, and railroad transportation accidents which occur in the United States, as indicated below and shown on the accompanying modal maps:

Atlanta

Location: 1720 Peachtree Street, N.W., Atlanta, Georgia 30309.
Telephone: 404–881–7385 (commercial); 257–7385 (Federal telecommunications).
Jurisdiction: *Aviation*—Georgia, Alabama, Mississippi, Tennessee, North Carolina, South Carolina, Kentucky, Virginia, West Virginia, Maryland, and the District of Columbia. *Highway*—Georgia, Tennessee, North Carolina, South Carolina, Mississippi, Alabama, and Florida. *Railroad*—Georgia, Mississippi, Alabama, South Carolina, and Florida.

Chicago

Location: 2300 E. Devon Avenue, Suite 140, Des Plaines, Illinois 60018.
Telephone: 312–827–8858 (commercial); 384–9248 (Federal telecommunications).
Jurisdiction: *Aviation*—Illinois, Indiana, Ohio, Minnesota, Wisconsin, and Michigan. *Railroad*—Illinois, Indiana,

Ohio, Minnesota, Wisconsin, and Michigan.

Denver

Location: 10255 East 25th Avenue, Suite 14, Aurora, Colorado 80010.
Telephone: 303–837–4492 (commercial); 327–4491 (Federal telecommunications).
Jurisdiction: *Aviation*—Colorado, Utah, Wyoming, Montana, North Dakota, and South Dakota. *Railroad*—Colorado, Utah, Wyoming, Montana, North Dakota, and South Dakota.

District of Columbia Field Office

Location: 800 Independence Avenue, S.W., Washington, D.C. 20594.
Telephone: 202–472–6091 (railroad commercial); 202–472–5973 (pipeline); 472–6091 (railroad Federal telecommunications); 472–5973 (pipeline Federal telecommunications).
Jurisdiction: *Pipeline*—Washington, Oregon, Idaho, Montana, Wyoming, North Dakota, South Dakota, Nebraska, Minnesota, Iowa, Wisconsin, Illinois, Michigan, Indiana, Ohio, Kentucky, Tennessee, Florida, Georgia, South Carolina, North Carolina, Virginia, West Virginia, Maryland, Delaware, Pennsylvania, New Jersey, New York, Vermont, Maine, New Hampshire, Massachusetts, Rhode Island, Connecticut, and the District of Columbia. *Railroad*—Virginia, Maryland, West Virginia, Kentucky, Tennessee, and North Carolina.

Fort Worth

Location: Federal Building, Room 7A07, 819 Taylor Street, Fort Worth, Texas 76102.
Telephone: 817–334–2616 (commercial); 334–2616 (Federal telecommunication).
Jurisdiction: *Aviation*—Texas, New Mexico, Oklahoma, Arkansas, and Louisiana. *Pipeline*—California, Nevada, Utah, Arizona, Colorado, New Mexico, Kansas, Oklahoma, Texas, Missouri, Arkansas, Louisiana, Mississippi, and Alabama.

Fort Worth

Jurisdiction: *Railroad*—Texas, New Mexico, Oklahoma, Arkansas, and Louisiana.

Kansas City

Location: Federal Building, Room 1748, 601 East 12th Street, Kansas City, Missouri 64106.
Telephone: 816–374–3576 (commercial) 758–3576 (Federal telecommunications).
Jurisdiction: *Aviation*—Missouri, Kansas, Nebraska, and Iowa. *Highway*—Missouri, Texas, Oklahoma, Arkansas, Kansas, Nebraska, North Dakota, South Dakota, Minnesota, Iowa, Wisconsin, Illinois, Indiana, and Kentucky. *Railroad*—Missouri, Kansas, Nebraska, and Iowa.

Los Angeles

Location: 15000 Aviation Boulevard, P.O. Box 6117, Lawndale, California 90261.
Telephone: 213–536–6041 (commercial); 213–536–6045 (commercial Law Judges); 966–6041 (Federal telecommunications aviation); 966–6036 (Federal telecommunications Railroad & Highway); 966–6045 (Federal telecommunications Law Judges).
Jurisdiction: *Aviation*—California, Nevada, Arizona, and Hawaii. *Highway*—California, Nevada, Arizona, New Mexico, Colorado, Utah, Wyoming, Montana, Idaho, Oregon, and Washington. *Railroad*—California, Nevada, and Arizona.

Miami

Location: 4471 N.W. 36th Street, Miami Springs, Florida 33166.
Telephone: 305–526–2940 (commercial); 350–2940 (Federal telecommunications).
Jurisdiction: *Aviation*–Florida, and the Commonwealth of Puerto Rico.

New York

Location: Federal Building, Room 102, JFK International Airport, Jamaica, New York 11430
Telephone: 212–995–3716 (commercial); 665–3716 (Federal telecommunications).
Jurisdiction: *Aviation*—New York, Pennsylvania, Delaware, New Jersey, Rhode Island, Connecticut, Massachusetts, New Hampshire, Vermont, and Maine. *Highway*—New York, Pennsylvania, Delaware, New Jersey, Rhode Island, Connecticut, Massachusetts, New Hampshire, Vermont, Maine, Michigan, Ohio, West Virginia, Virginia, Maryland, and District of Columbia. *Railroad*—New York, Pennsylvania, Delaware, New Jersey, Rhode Island, Connecticut, Massachusetts, New Hampshire, Vermont, and Maine.

Seattle

Location: 19415 Pacific Highway South, Room 303, Seattle, Washington 98188.
Telephone: 206–764–3782 (commercial); 399–3792 (Federal telecommunications).
Jursidiction: *Aviation*—Washington, Oregon, and Idaho. *Railroad*—Washington, Oregon, and Idaho.

William L. Lamb,
Chief, Field Investigation Division.

OFFICE OF MANAGEMENT AND BUDGET

Agency Forms Under Review

March 31, 1980.

Background

When executive departments and agencies propose public use forms, reporting, or recordkeeping requirements, the Office of Management and Budget (OMB) reviews and acts on those requirements under the Federal Reports Act (44 USC, Chapter 35). Departments and agencies use a number of techniques including public hearings to consult with the public on significant reporting requirements before seeking OMB approval. OMB in carrying out is responsibility under the Act also considers comments on the forms and recordkeeping requirements that will effect the public .

List of Forms Under Review

Every Monday and Thursday OMB publishes a list of the agency forms received for review since the last list was published. The list has all the entries for one agency together and grouped into new forms, revisions, extensions, or reinstatements. Some forms listed as revisions may only have a change in the number of respondents or a reestimate of the time needed to fill them out rather than any change to the content of the form. The agency clearance officer can tell you the nature of any particular revision you are interested in. Each entry contains the following information:

The name and telephone number of the agency clearance officer (from whom a copy of the form and supporting documents is available);
the office of the agency issuing this form;
the title of the form;
the agency form number, if applicable;
how often the form must be filled out;
who will be required or asked to report;
an estimate of the number of forms that will be filled out;
an estimate of the total number of hours needed to fill out the form; and the name and telephone number of the person or office responsible for OMB review.

Reporting or recordkeeping requirements that appear to raise no significant issues are approved promptly. Our usual practice is not to take any action on proposed reporting requirements until at least ten working days after notice in the **Federal Register** but occasionally the public interest requires more rapid action.

Comments and Questions

Copies of the proposed forms and supporting documents may be obtained from the agency clearance officer whose name and telephone number appear under the agency name. The agency clearance officer will send you a copy of the proposed form, the request for clearance (SF83), supporting statement, instructions, transmittal letters, and other documents that are submitted to OMB for review. If you experience difficulty in obtaining the information you need in reasonable time, please advise the OMB reviewer to whom the report is assigned. Comments and questions about the items on this list should be directed to the OMB reviewer or office listed at the end of each entry.

If you anticipate commenting on a form but find that time to prepare will prevent you from submitting comments promptly, you should advise the reviewer of your intent as early as possible.

The timing and format of this notice have been changed to make the publication of the notice predictable and to give a clearer explanation of this process to the public. If you have comments and suggestions for further improvements to this notice, please send them to Jim J. Tozzi, Assistant Director for Regulatory and Information Policy Office of Management and Budget, 726 Jackson Place, Northwest, Washington, D.C. 20503.

DEPARTMENT OF AGRICULTURE

Agency Clearance Officer—Richard J. Schrimper–447–6201.

New Forms

Farmer's Home Administration
Planning and Performing Part 1924 Subpart A, Construction and other development
On occasion
Individuals and nonfarm business, 458,510 responses, 450,110 hours
Charles A. Ellett, 395–5080.
Agricultural Marketing Service
Fruit and Vegetable Market News Report
FV–17, 29, 100, 100–1, 116, 351, 372, 498–1, and 498–2 FV–372
Other (See SF–83)
Fruit and vegetable producers and processors, 15,734 responses, 3,181 hours
Charles A. Ellett, 395–5080

Reinstatements

Food and Nutrition Service
Monthly Distribution of Donated Commodities to Family Units
FNS–152
Monthly
State Distribution Agencies, 360 responses, 1,440 hours

Youth served on a one-time basis by the RYA-funded projects form
Other (see SF–83)
Staff of runaway youth projects; client files, 34,980 responses, 8,745 hours
Barbara F. Young, 395–6132
Social Security Administration
Quality Control in Aid to Families With Dependent Children (AFDC) and Quality Control in Adult Programs
SSA–4341 & 4342
Semi-annually
Welfare recipients, 60,728 responses, 873,270 hours
Barbara F. Young, 395–6132.

Extensions

Office of Human Development
Social Services Reporting Requirements (SSRR)
Annually
State title XX agencies, 255 responses, 8,670 hours
Barbara F. Young, 395–6132.

DEPARTMENT OF LABOR

Agency Clearance Officer—Paul E. Larson—523–6341

New Forms

Employment and Training Administration
Job Corps Indochinese Refugee Report
ETA–RC25
Monthly
Contractors who operate Job Corps Centers, 840 responses, 420 hours
Arnold Strasser, 395–5080.
Employment and Training Administration
CETA Prime Sponsor Data Processing Status Survey
ETA–RC29
Annually
State and local agencies, 473 responses 39 hours
Arnold Strasser, 395–5080.
Occupational Safety and Health Administration
Pesticide Questionnaire
OSHA–153T
Single time
Manufacturers and formulators of pesticides, 270 responses, 555 hours
Arnold Strasser, 395–5080.

Revisions

Occupational Safety and Health Administration
Log of Inspection and Designation of Competent Person;
Tests
OSHA–73 & 74
On occasion
Shiprepairers and builders, 625 responses, 625 hours
Arnold Strasser, 395–5080.

Extensions

Bureau of Labor Statistics
Report on Work Stoppages
ES228
Monthly
State employment security agencies, 600 responses, 600 hours
Office of Federal Statistical Policy and Standard, 673–7974.

RAILROAD RETIREMENT BOARD

Agency Clearance Officer—Pauline Lohens—312–751–4692

New Forms

Application for Reimbursement/ Verification of Enrollment
Notice of Change in Educational Program for New Career Training Assistance
UI–112, 113 and 114
On occasion
Railroad employees, 1,025 responses, 405 hours
Barbara F. Young, 395–6132

Revisions

Referral Card, Report on Placement or Refusal of Referral
or Job Offer to Railroad Retirement Board
ES–1 and 21C
On occasion
Referral card for UI Claimants, 21,000 responses, 883 hours
Barbara F. Young, 395–6132.
Applicant's Referral Report and Referral Card
ES–20A and 20B
On occasion
Referral card for UI claimants, 10,000 responses, 250 hours
Barbara F. Young, 395–6132.

UNITED STATES INTERNATIONAL TRADE COMMISSION

Agency Clearance Officer—Charles Ervin—523–0267

New Forms

Producers' Questionnaire for Investigation Nos.
731–TA–18 thru 24
Single time
Producers of iron and steel, 38 responses, 3,040 hours
Phillip T. Balazs, 395–4814
Importers' Questionnaire for Investigation Nos.
731–TA–18 thru 24
Single time
Importers of iron and steel, 69 responses, 5,520 hours
Phillip T. Balazs, 395–4814.

VETERANS ADMINISTRATION

Agency Clearance Officer—R. C. Whitt—389–2282

Revisions

Comprehensive evaluation of Health Services
10–1465, A & B
Annually
VA patients, 35,000 responses, 8,750 hours
Laverne V. Collins, 395–3214.

C. Louis Kincannon,

Acting Deputy Assistant Director for Reports Management.

BILLING CODE 3110–01–M

DEPARTMENT OF TRANSPORTATION

Coast Guard

[CGD 80–30]

Advisory Committees; Applicants for Membership

The Coast Guard is seeking applicants who are interested in being appointed as a member or as an alternate member on one of the following technical advisory committees:

1. Chemical Transportation Advisory Committee (CTAC)

CTAC advises the Coast Guard on rulemaking matters relating to the carriage of hazardous materials on vessels, the transfer of these materials between the vessels and shore, and waterfront facilities over which these materials move.

2. Rules of the Road Advisory Committee (RORAC)

RORAC provides advice and consultation to the Coast Guard with respect to matters concerned with proposals affecting the Navigational Rules of the Road. Emphasis in the immediate future will be on revision and unification of the current pilot rules in conjunction with the committee's past efforts to unify the present Inland Navigation Rules and on amending the International Regulations for Preventing Collisions at Sea, 1972 (72 COLREGS).

In order to acquire the balance of membership required by the Federal Advisory Committee Act, the Coast Guard is particularly interested in receiving applicants from minorities, women, and public interest representatives. Selection will be based upon expertise in the subjects under consideration.

Each committee meets once or twice a year at a location selected by the sponsor. Members serve at their own expense and receive neither travel nor per diem allowances.

Interested persons should write to Commandant (G–CMC/24), U.S. Coast Guard, Washington, D.C. 20593, prior to May 1, 1980 identifying which committee they wish to apply for. Supplemental information will then be forwarded. Appointments will be announced by the Commandant.

Bruce P. Novak,

Deputy Executive Secretary, Marine Safety Council.

March 31, 1980.

BILLING CODE 4910–14–M

[CGD 80-36]

Seminar To Discuss New Tanker Equipment and Construction Standards; Tanker Seminar

Purpose: The purpose of this notice is:

1. To inform the public of a seminar that will be conducted by the Coast Guard on May 30, 1980 to discuss—

a. Implementation of the final tanker regulations issued in Part V of the **Federal Register** on November 19, 1979 as mandated by the Port and Tanker Safety Act of 1978 (PTSA);

b. Future regulations to be issued under the mandate of the PTSA; and

c. Related work being conducted at IMCO; and

2. To solicit written comments and/or questions from the tanker industry regarding the regulations of November 19 and the draft regulatory guide prepared by the Coast Guard to facilitate implementation of these regulations.

Discussion: On November 19, 1979 the Coast Guard issued final rules for segregated ballast tanks (SBT), dedicated clean ballast tanks (CBT), crude oil washing (COW) systems, inert gas systems (IGS), and improved steering gear standards. These regulations are consistent with the standards developed at the Tanker Safety and Pollution Prevention (TSPP) Conference held under the auspices of the Inter-Governmental Maritime Consultative Organization (IMCO) in London during February 1978. They were issued under the mandate of Section 5 of the PTSA.

The Coast Guard has prepared a draft regulatory guide to provide background information and interpretive guidance regarding these new design and equipment standards. This guide is expected to make implementation of these regulations uniform and easier for those who must deal with them. To facilitate implementation of these detailed regulations and to answer any specific questions and/or comments pertaining to the regulations or the guide, the Coast Guard has decided to conduct a tanker industry seminar. Other provisions of Section 5 of the PTSA and related ongoing IMCO work will also be briefly discussed at this seminar. The following provides detailed information pertaining to the seminar and how to obtain a copy of the draft regulatory guide:

Date: May 30, 1980, from 9:00 AM to 5:00 PM.

Place: Room 7132, 1111 Constitution Ave. N.W., Internal Revenue Service Building, Washington, D.C. For security reasons, the entrance on Constitution Ave. must be used when entering the building.

Audience: Interested tanker industry representatives. Notification of attendance must be received in writing by Mr. Joseph J. Angelo, U.S. Coast Guard (G-MMT-1/13), 2100 Second Street S.W., Washington, D.C. 20593 at least one week prior to the seminar.

Objective:

1. To provide a brief overview of the tanker standards mandated by the PTSA and related ongoing IMCO work.
2. To provide a brief discussion and description of the new equipment and construction standards.
3. To discuss and answer any specific questions pertaining to the regulations and the Coast Guard's draft regulatory guide.

Equipment and Construction Standards to be Addressed:

1. Segregated Ballast Tanks.
2. Protectively Located Segregated Ballast Tanks.
3. Dedicated Clean Ballast Tanks.
4. Crude Oil Washing Systems.
5. Inert Gas Systems.
6. Improved Steering Gear Standards.

How to Obtain Documents: Copies of the subject regulations and the draft regulatory guide can be obtained by contacting Mr. Angelo at the address listed under *Audience* or by calling (202) 426-4431. It is recommended that anyone interested in participating in the seminar obtain copies of both the regulations and the guide prior to attending the seminar.

Format: The main purpose and major portion of this seminar will be aimed at answering any questions and/or comments of the tanker industry regarding the regulations of November 19 and the guide. To conduct a successful seminar and to allow the Coast Guard to provide meaningful, useful answers to the questions and/or comments, it is imperative that the questions and/or comments be received by the Coast Guard in writing at least TWO WEEKS PRIOR TO THE SEMINAR. They should be submitted to Mr. Angelo at the address listed under *Audience*. All written questions and/or comments that are received two weeks prior to the seminar will be answered at the seminar. If time permits, oral questions and/or comments will be taken from the floor after all written ones have been answered.

Seminar Outline:

1. Introduction and opening remarks.
2. Overview of the new tanker standards and related IMCO work.
3. Discussion and description of the equipment and construction standards, answering written questions where appropriate, as follows:

A. Steering gear.
B. Inert gas systems.
C. SBT, CBT, and COW systems.

4. Discussion of the Coast Guard draft regulatory guide, answering questions where appropriate.
5. General discussion and question and answer period for oral questions, if time permits.

Person to Contact: For any questions regarding the Tanker Seminar or this Notice, contact Mr. Angelo at (202) 426-4431.

Dated: March 27, 1980.

Henry H. Bell,

Rear Admiral, U.S. Coast Guard Chief, Office of Merchant Marine Safety.

BILLING CODE 4910-14-M

Federal Highway Administration

Environmental Impact Statement; Lancaster County, Neb.a

AGENCY: Federal Highway Administration (FHWA), DOT.

ACTION: Notice of intent.

SUMMARY: The FHWA is issuing this notice to advise the public that an environmental impact statement will be prepared for a proposed highway project in Lancaster County, City of Lincoln, Nebraska.

FOR FURTHER INFORMATION CONTACT: Walter Running, Federal Highway Administration, Federal Building, 100 Centennial Mall North, Lincoln, Nebraska 68508, Telephone: (402) 471-5527; or Richard Erixson, Public Works Department, 555 South 10th Street, Lincoln, Nebraska 68508, Telephone (402) 473-6566.

SUPPLEMENTARY INFORMATION: The FHWA, in cooperation with the Nebraska Department of Roads and the City of Lincoln, will prepare an environmental impact statement (EIS) for the proposed Northeast Diagonal, a major urban arterial on a new location, from the east edge of the Central Business District of Lincoln, to 27th and Fair Street. Project length is 1.7 miles.

A draft 4(f) evaluation will also be prepared, addressing possible impacts to University of Nebraska recreation fields. Probable impacts include relocation of families and businesses, and modifying access to some properties. Project corridors have potential involvements with the 100-year floodplain and historic buildings.

Needs which would be fulfilled by the proposed action include: (1) Improved traffic capacity, (2) Improved access to the Central Business District, (3) Removing arterial traffic through the

UNL campus, (4) Separate conflicting land uses, (5) Improve safety, and (6) Save energy. The project is consistent with the City-County Comprehensive Plan.

Alternatives being considered include the "do nothing" construction in a 19th Street corridor, and construction in a 22nd Street corridor.

Early coordination through meetings and correspondence will be attained with the public; Lincoln/Lancaster County Railroad Transportation Safety District; State Fair Board; University of Nebraska; State Historical Society; and other local, State, and Federal agencies. A formal scoping meeting will not be held.

Issued on: March 26, 1980.

Steiner M. Silence,

Director, Office of Environment & Design.

[FR Doc. 80-10021 Filed 4-2-80; 8:45 am]

BILLING CODE 4910-22-M

Environmental Impact Statement; Lewis & Clark County, Mont.

AGENCY: Federal Highway Administration (FHWA), DOT.

ACTION: Notice of intent.

SUMMARY: The FHWA is issuing this notice to advise that an environmental impact statement will be prepared for three proposed highway projects in Lewis & Clark County, Montana.

FOR FURTHER INFORMATION CONTACT: Mr. William S. Dunbar, Progam Development Engineer, Federal Highway Administration, Federal Office Building, 301 S. Park, Drawer 10056, Helena, Montana 59601, Telephone (406) 449-5310; or Mr. Steve Kologi, Chief, Preconstruction Section, Montana Department of Highways, 2701 Prospect Street, Helena, Montana 59601, Telephone (406) 449-2495.

SUPPLEMENTARY INFORMATION: The FHWA, in cooperation with the Montana Department of Highways, will prepare an environmental impact statement (EIS) on a proposal to improve 0.3 mile of Cruse Avenue and 1.3 miles of Last Chance Gulch in Helena, Montana. The improvement will extend from 6th Avenue and Cruse Avenue to North Montana at Cedar Street. Three separate projects are involved but the EIS will evaluate both the individual and combined effects of the proposed projects.

Proposed Project 5815(1), Cruse Avenue, will begin at 6th Avenue extending northerly on new alignment about 0.3 mile to a connection with Neil Avenue. The alternates to be studied will be confined within a narrow corridor between Jackson and Logan Street. The proposed action will result in the taking of some buildings and vacant lots. The do-nothing alternate and possible minor alternatives will be studied.

Proposed Project M 5807(1), North Last Chance Gulch, will begin at Neill Avenue and extend northerly along Last Chance Gulch about 0.45 mile to Lyndale Avenue. The area is primarily commercial and the existing facilities will not be able to handle future traffic volumes. Various proposed alternates including minor upgrading or do-nothing will be considered. No persons or businesses are expected to be displaced.

Proposed Project M 5807(2), North Last Chance Gulch, will begin at Lyndale Avenue and extend northerly along Last Chance Gulch about 0.82 mile to Montana Avenue and Cedar Street. A full four-lane facility will be studied as well as minor alternatives, such as minor widening and resurfacing, and the do-nothing alternate. It is anticipated that the four-lane section will involve right-of-way acquisition but will not require relocation of individuals or businesses.

The present alignment has two old narrow railroad grade separation structures. It is adjacent to Memorial Park so a draft section 4(f) evaluation will also be prepared as part of this project.

Early coordination with the public and appropriate local, State and Federal agencies will be accompished to assist in the identification of significant impacts. A scoping meeting was held 10:00 am March 17, 1980 at the Highway Complex, Helena, Montana. The views of interested agencies were solicited and coordination with them will continue through all stages of the development of the environmental document.

Preliminary views on impacts are as follows: Since the proposed project will improve access to the central city it is expected to be consistent with the President's Urban Policy. The effect on any sites found eligible for listing on the National register of Historic Places will be studied.

Due to the modest size of Helena, alternate modes of transportation are not considered feasible. Air Quality impacts will be briefly studied but are not anticipated to be significant.

To ensure that the full range of issues related to this proposed action are addressed and all significant issues identified, comments and suggestions are invited from all interested parties. Comments or questions concerning the proposed action and the EIS should be directed to the FHWA at the address provided above.

Issued: March 25, 1980.

Harold N. Steward,

Division Administrator, Helena, Mont.

National Highway Traffic Safety Administration

Automotive Fuel Economy Program; Report to Congress

March 27, 1980.

The attached document "Automotive Fuel Economy Program, Fourth Annual Report to Congress," has been prepared pursuant to Section 502(a)(2) of the Motor Vehicle Information and Cost Savings Act, (Pub. L. 92-513), as amended by the Energy Policy and Conservation Act (Pub. L. 94-163), which requires in pertinent part that "each year, beginning in 1977, the Secretary shall transmit to each House of Congress, and publish in the **Federal Register** a review of average fuel economy standards under this part."

Joan Claybrook,

Administrator.

[DOT HS-805 279]

Automotive Fuel Economy Program Fourth Annual Report to the Congress, January 1980

U.S. Department of Transportation, National Highway Traffic Safety Administration, Washington, D.C. 20590

Preface

This Fourth Annual Report to the Congress (1980) summarizes the progress made by the National Highway Traffic Safety Administration (NHTSA) during fiscal year 1979 in the implementation of the applicable sections of Title V: "Improving Automotive Efficiency," of the Motor Vehicle Information and Cost Savings Act (15 U.S.C. 1901 *et seq.*) as amended (the Act). Section 502(a)(2) of the Act requires submission of a report and publication in the **Federal Register** (F.R.) in January of each year. Also included is a report on the utilization of advanced automotive technology required by Section 305, Title III of the Department of Energy Act of 1978 (Pub. L. 95-238).

Title V requires the Secretary of Transportation to implement a program for improving the fuel economy of new automobiles (including passenger cars and light trucks) in the U.S. market. On June 22, 1976, the authority to administer the fuel economy program was delegated by the Secretary to the Administrator of NHTSA (41 FR 25015).

NHTSA's responsibilities include (1) establishing average fuel economy

standards for manufacturers of passenger automobiles and light trucks; (2) promulgating regulations concerning procedures, definitions, and reports necessary to support the fuel economy standards; (3) the consideration of petitions for exemption from established fuel economy standards by low volume manufacturers (under 10,000 vehicles produced annually) and the establishment of alternative standards; (4) reporting to Congress annually on the progress of the fuel economy program. and (5) the execution of fuel economy enforcement activities.

Passenger car fuel economy standards have been established by Congress for Model Years 1978–1980 and 1985 and by the Department of Transportation for the 1981–84 model years. Standards for light trucks have been established by the Department of Transportation for the 1979–81 model years, and proposed standards have been issued for model years 1982–1985.

Table of Contents

Preface.
Executive Summary.
I. Energy Outlook:
A. Introduction.
B. Petroleum Demand And Supply.
C. Effects of Fuel Economy Standards On Petroleum Savings.
II. Passenger Car Fuel Economy Activities:
A. Sales Patterns And Trends.
B. Reevaluation of The 1981–1984 Standards.
III. Light Truck Fuel Economy Activities:
A. Sales Patterns And Trends.
B. 1981 Light Truck Fuel Economy Standards.
C. Current Rulemaking Activities.
IV. Other Fuel Economy Related Activities:
A. Low Volume Automobile Manufacturers.
B. Legislative Recommendations.
C. Evaluation of Federal Fuel Economy Standards.
D. Compliance Activities.
E. Federal Acquisition Program.
F. The Gas Guzzler Tax.
G. Voluntary Truck And Bus Fuel Economy Improvement Program.
V. Utilization of Advanced Technology:
A. Conventional Spark Ignition Engines.
B. Turbocharged Spark Ignition Engines.
C. Diesel Engines.
D. Stratified Charge Engines.
E. Energy Storage.
F. Improved Transmissions.
G. Weight Reduction.
H. Computer-aided Design.
I. Aerodynamics and Rolling Resistance.
VI. Future Technology And Research And Development Activities:
A. Overview of NHTSA Activities.
B. Incentives For The Development of Advanced Technology.
C. Development of Advanced Technology.

Executive Summary

With the growing number of uncertainties revolving around the supply of petroleum the United States is faced with the necessity of fuel conservation and the development of alternatives to the use of oil. The Nation has become increasingly dependent on the actions and decisions of a few foreign governments for its oil supplies—a situation which can only be remedied by increasing domestic energy production and by reducing demand. As President Carter said in his address to the Nation in July 1979, "This intolerable dependence on foreign oil threatens our economic independence and the very security of our Nation." The need to conserve is no longer an option, it is a necessity. Every effort must be made to bring about a reduction in fuel consumption through energy conservation programs and research efforts. The automotive energy conservation program enacted after the 1973–74 Arab oil embargo is now beginning to pay off, not only to aid in near term conservation, but also to provide a means for future conservation through new technology.

The U.S. imported only 18 percent of its oil needs at a cost of $1.5 billion in 1959. Thirteen years later, imported oil accounted for only 20 percent of total consumption and cost the Nation $4.0 billion. By 1975, it was necessary to import 39 percent of the domestic demand for oil at a cost of $27.0 billion. This doubling of the amount and seven-fold increase in the cost of imported oil was the result of large OPEC price increases, falling domestic crude oil production, and continued increases in demand.

By 1978, imported oil constituted 45 percent of oil consumed and cost the Nation $42.0 billion, despite the fact that demand was growing at a slower rate. OPEC, supplying 83 percent of the U.S.'s imported oil in 1978, has taken advantage of the tight world oil market by doubling prices from $12.70 per barrel in December 1978 to more than $24.00 per barrel today. Currently, prices on the "spot" market are approaching $40 per barrel. The total U.S. bill for oil imported in 1979 is now expected to be $60.0 billion. An increase of this magnitude has had severe adverse effects on our trade balance, inflation, economic growth, unemployment, confidence in the dollar as an international reserve currency and on sales of automobiles.

The Energy Policy and Conservation Act, enacted on December 22, 1975, was designed to increase domestic energy supplies and availability, restrain energy demand and plan for coping with energy emergencies. As an integral part of its provisions for conservation, Title V, *Improving Automotive Efficiency*, was established, requiring the Secretary of Transportation to set corporate average fuel economy standards for passenger cars and light trucks. At this time, passenger car fuel economy standards have been established through the 1985 model year, when the fleet average must be 27.5 miles-per-gallon (mpg). Light truck standards have been established for the 1979–81 model years requiring achievements of 16.7 mpg for two-wheel drive (4x2) light trucks and 15.0 mpg for four-wheel drive (4x4) light trucks by 1981. In addition, light truck standards achieving even greater mpg levels have been proposed for the 1982–85 model years. Single values of 17.4 mgp for 4x2's and 15.6 mpg for 4x4's are proposed for model year 1982, whereas a range of values is proposed for model years 1983–85.

These standards make significant contributions to the Nation's total effort to conserve energy. Projected cumulative passenger automobile fuel savings from model year 1978 through model year 2000 will approximate 395 billion gallons (9.4 billion barrels). Comparable fuel savings for light trucks are estimated to be approximately 114 billion gallons (2.7 billion barrels). Thus, total fuel savings should be more than 500 billion gallons over the next 20 years. This is equivalent to a 19 percent savings compared to pre-standard consumption levels—and will provide the Nation with the equivalent of an additional 5 year supply of gasoline for its passenger car and light truck fleet.

But the benefits from the program, although increasing over time, are also being felt now. In 1979, gasoline consumption declined five percent from 1978 levels. This decrease represents a savings of 120 million barrels per year. While better trip planning, increased use of public transportation, carpools and vanpools, intermittent shortages of gasoline, higher prices, and more energy efficient driving techniques have all played a part in this reduction, increased new vehicle fuel efficiency is estimated to have contributed almost 25 percent of these savings. These improvements in fuel economy alone have reduced our trade deficit in 1979 by about $1 billion.

Using the schedule of real gasoline prices cited in Chapter I (Table I–2) the savings over the 1978–2000 period yields a combined discounted present value of approximately $215 billion (1979 dollars). In the year 2000 alone, the savings for passenger car owners are estimated to be $12.1 billion and $3.7 billion for owners of light trucks, resulting in a combined consumer

savings of $15.8 billion (1979 dollars).* The magnitude of these savings to the individual new car purchaser as well as to the Nation as a whole are also significant. The average purchaser of a 1985 model year car, for instance, is expected to realize a net savings over the vehicle's lifetime of $1,540 (present value of fuel savings minus estimated retail price increases) when compared to a model year 1977 automobile. Likewise, the average purchaser of a model year 1981 light truck is expected to realize a net savings of $1,240 over the average 1978 vehicle.

Fiscal year 1979 has been a year of re-evaluation for the Automotive Fuel Economy Program. In late 1978, Ford and General Motors sought lower passenger automobile fuel economy standards for model years 1981–84. It was the opinion of the Department of Transportation that the arguments presented by Ford and General Motors provided no statutory basis for revising the standards, and instead, that their information reinforced earlier conclusions that the current standards are both technically feasible and economically practicable. Revision of the standards thus did not appear justified.

With the onset of the gasoline shortage in the late Spring 1979 and rising gasoline prices, large new car sales plunged and small new car sales reached record highs. As a consequence of this consumer demand for more fuel efficient vehicles, sales of imports grew by an impressive 22.1 percent during 1979. In response to the shift in demand, the president of General Motors, Elliott M. Estes, reversed his company's position and announced in August that General Motors now intends to exceed the established standards:

> You can be sure, if there is any conceivable way to do so our fleet average will be more than 27.5 miles-per-gallon by 1985. And to the extent that we can offer outstanding mileage in vehicles that meet our customers' requirements for room and utility we will be encouraging the people to stay ahead of Washington, and that's good for all of us—the customer, the country and the industry.

General Motor's shift in position which was followed by statements from other companies, was reflective of changes in consumer demand and concern about long-term fuel availability. Since the early 1970's, there have been shifts in market shares for passenger cars due to increased consumer demand for more fuel efficient vehicles and because of the effects of domestic corporate strategies. During the 1973–74 oil embargo, the demand for larger automobiles declined, but returned to pre-embargo levels soon after the crisis. However, since that time, the small car market has been gaining a larger segment with the onset of the Iranian crisis and the continued diminishing supply of oil accelerating this shift. Perhaps Mr. Estes most aptly represented the manufacturers' view of the consumer shift in demand when he said, "A cat which sits on a hot stove and gets burned might forget and do it again. But twice burned is a hard lesson learned."

In June 1979, the Department of Transportation (DOT) issued a final rule which reduced the light truck, two-wheel drive standard for model year 1981 from 18.0 mpg to 17.2 mpg. The action was taken in light of new information provided to the Department by Chrysler, General Motors, and Ford which showed that the fuel economy improvement capability in light trucks was less than determined by earlier rulemaking. The standard was further reduced to 16.7 mpg upon notice from the Environmental Protection Agency (EPA) that it would not be able to approve the use of improved lubricants for use in fuel economy testing by January 1, 1980. The standard for four-wheel drive vehicles was also affected by the EPA determination and was lowered to 15.0 mpg from 15.5 mpg.

Currently, the National Highway Traffic Safety Administration (NHTSA) is engaged in light truck rulemaking for model years 1982–85. To date, the introduction of new fuel efficient light trucks has yielded encouraging results with respect to consumer acceptability of redesign for fuel efficiency. Also, the Agency is continuing to monitor and analyze the financial capabilities of the industry to make necessary investment expenditures. The proposed mpg levels are estimated to save between 11 and 17 billion gallons of gasoline over the lifetime of the model years 1982–85 fleets compared to their consumption if the fleet fuel economy remained at the level of the model year 1981 standards. This amounts to between 900 and 1,390 gallons per vehicle or a net dollar savings between $510 and $1,120 (1979 dollars) over the life of the vehicle. The final standards for the 1982 model year will be issued in March 1980 with the 1983–85 standards to be promulgated subsequently.

On December 17, 1979, the Department submitted to Congress a series of amendments for improving the fual economy program. The first recommendation was "to exempt automobile manufacturers producing fewer than 10,000 vehicles per year from both the fuel economy standards and the semiannual reporting requirements." The production volume of these manufacturers is so low that there is minimal gasoline saved through such regulation and their economic and technical capabilities to make necessary fuel economy improvements is severely limited. Also, an excise tax will have to be paid on most of these vehicles under the gas guzzler tax in the future which is a more efficient way to encourage improvements.

Secondly, the Department recommended an extension of the period for applying credits earned for exceeding fuel economy standards against penalties for violating the standards. This amendment, which proposes to extend this time period from one to three years, is designed to facilitate compliance by manufacturers in the unlikely event that they may be unable to meet the required levels during a given year due to unforeseen circumstances. It is not intended either that manufacturers, other than those that are financially troubled, would use the extended credit period routinely or that any manufacturer would exploit it to unnecessarily delay fuel economy improvements.

The third amendment would permit a manufacturer whose U.S. production of automobiles began after the Energy Policy and Conservation Act was passed in 1975, to average its domestically-produced cars with 75 percent U.S. content with its foreign-produced automobiles for purposes of fuel economy compliance. This recommendation is designed to avoid inadvertently discouraging foreign manufacturers from using U.S. content in the vehicles it produces in the United States.

In addition to its ongoing research and development activities in the investigation of advanced technology for fuel efficiency, the Agency sponsored the First International Automotive Fuel Economy Conference on October 31 through November 2, 1979, which brought together an international community of researchers on automotive fuel economy. Basic research of this nature fosters dramatic strides in the state-of-the-art through the use of advanced technology.

The Department of Transportation is working with other agencies to implement the proposed Cooperative Automotive Research Program which will expand research in automotive technology. The program will involve basic research in thermal and fluid sciences, structural mechanics,

*Conservatively assuming no new passenger car improvements beyond 1985 and no new light truck improvements beyond 1981.

electrochemistry, aerodynamics, materials sciences and processing, control systems friction and wear, and acoustics and vibration. The program will involve both industry and government funding and planning. University, industry, and Federal laboratories will perform the research to promote independent innovative ideas.

In addition, DOT is preparing to implement a proposed program for the assessment of midterm automotive technology to complement and expand its research for improvement of automotive fuel economy in the next ten years. The program is designed to identify and evaluate improved automotive technology to be utilized by manufacturers in the future. The program will include research in improved engines and drivetrains, structural design improvements and development of fuel efficient prototype passenger cars and light trucks which will demonstrate to the consumer and the industry what can be achieved with near term technology.

The Department is also examining the benefits for fuel economy improvement beyond 1985, the ability of the industry to make those improvements and the role that the Federal government will play in securing those achievements. It appears that fuel economy improvements of 20–50 percent above the 1985 standards are technically achievable, and the optimistic estimates of potential fleet fuel economy of 50 mpg for automobiles and 37 mpg for light trucks would accomplish fuel savings of 650,000 barrels per day by 1995. The Department believes that improving fuel economy should be pursued in a manner consistent with, and in order to preserve, a strong domestic automobile industry.

I. Energy Outlook

A. Introduction

As President Carter indicated in his address to the Nation on July 15, 1979:

> In little more than two decades we've gone from a position of energy independence to one in which almost half the oil we use comes from foreign countries, at prices that are going through the roof. Our excessive dependence on OPEC has already taken a tremendous toll on our economy and our people. This is the direct cause of the long lines which have made millions of you spend aggravating hours waiting for gasoline. It's a cause of the increased inflation and unemployment that we now face. This intolerable dependence on foreign oil threatens our economic independence and the very security of our Nation.
>
> The energy crisis is real. It is worldwide. It is a clear and present danger to our Nation. These are facts and we simply must face them.

The Automotive Fuel Economy Program is now in its fourth year, and continues, perhaps now even more than ever, to be instrumental in achieving the President's goals of reduced dependence on foreign oil and lower inflation and unemployment levels.

This chapter describes the contribution that improvements in new car and truck fuel efficiency are making to the conservation of petroleum in the United States, and provides a brief description of the past and future energy trends.

B. Petroleum Demand and Supply

Domestic demand for refined petroleum products, (Figure I–1) experienced a 1.9 percent average annual growth rate between 1972 and 1979. The percentage of U.S. demand for petroleum supplied by all importers more than doubled since 1960 with a peak of 48 percent of U.S. petroleum demand supplied by other countries in 1977. This percentage declined between 1978 and 1979 (January-July) by 3 percentage points. The domestic demand for petroleum products shows an increase in motor gasoline, jet fuel, distillate fuel oil, and other products; while showing a decrease in residual fuel oil and kerosene from 1977 to 1978. However, the average petroleum demand increase of 1.6 percent [1] in 1978 is relatively small in comparison with changes that occurred in earlier years,[2] and is largely the result of the congressionally set standard of 18 mpg.

The average portion of U.S. petroleum supplied by imports for 1973 to 1979 (January-July) was 41 percent. During 1978 and 1979, the percentage of imported petroleum remained stable, but the percentage supplied directly by OPEC countries declined in 1978 and the first part of 1979 (January–July). The supply disruption of Iranian fuel in 1978, together with the decreases in North African production, may account for this decrease in OPEC petroleum supply.

C. Effects of Fuel Economy Standards on Petroleum Savings

Federal policies to influence energy use in transportation are critical since the transportation sector is the major consumer of petroleum-based fuels, accounting for 53 percent of total U.S. Consumption of petroleum. (See Table I–1). Passenger cars and trucks consume approximately 82.5 percent of the energy used in transportation (Figure I–2). Automobiles are responsible for about 92 percent of domestic passenger travel.[3]

Based upon compliance with the model year (MY) 1978–1985 fuel economy standards for passenger automobiles, projected cumulative passenger automobile fuel savings estimates from calendar years (CY's) 1978 through 2000 will approximate 395 billion gallons (9.4 billion barrels), or a 21 percent reduction over 1977 consumption levels.* These savings represent an estimated cost savings of $167 billion (discounted present value at 10 percent per annum), assuming the schedule of real prices of gasoline given in Table I–2.

Based upon MY 1979–1981 fuel economy standards for light trucks, projected cumulative light truck savings from CY's 1978 through 2000 will approximate 114 billion gallons or a 13.7 percent reduction over 1977 consumption levels.* These savings also represent an estimated consumer savings of approximately $48 billion.

Table I–1.—*Petroleum Consumption by Sector,* * *1978*

(Million barrels per day)

	Petroleum consumption	Percent of total consumption
Transportation	10.09	53
(Passenger cars and trucks)	(8.39)	(44)
(Other transportation)	(1.70)	(09)
Industrial	3.83	20
Residential/commercial	3.02	16
Electric utilities	1.80	10
Miscellaneous	1.93	1
Totals	18.93	100

1988	1.44
1989	1.48
1990	1.53
1991	1.57
1992	1.62
1993	1.67
1994	1.72
1995	1.77
1996	1.82
1997	1.88
1998	1.93
1999	1.99
2000	2.05

NOTE.—A 3-pct annual incrase in the real price of gasoline is assumed.

Figure I–3 illustrates the reduction in fuel consumption based upon anticipated compliance with the fuel economy standards which have been enacted to date for both passenger automobiles and light trucks. It shows a projected reduction during CY 2000 of 28 billion gallons resulting from passenger car standards, and of 8.6 billion gallons resulting from the light truck standards. Reduction in fuel consumption of these vehicles, in CY 2000, is thus projectd to be 36.6 billion gallons, or 26.8 percent of the total that otherwise would have been consumed.

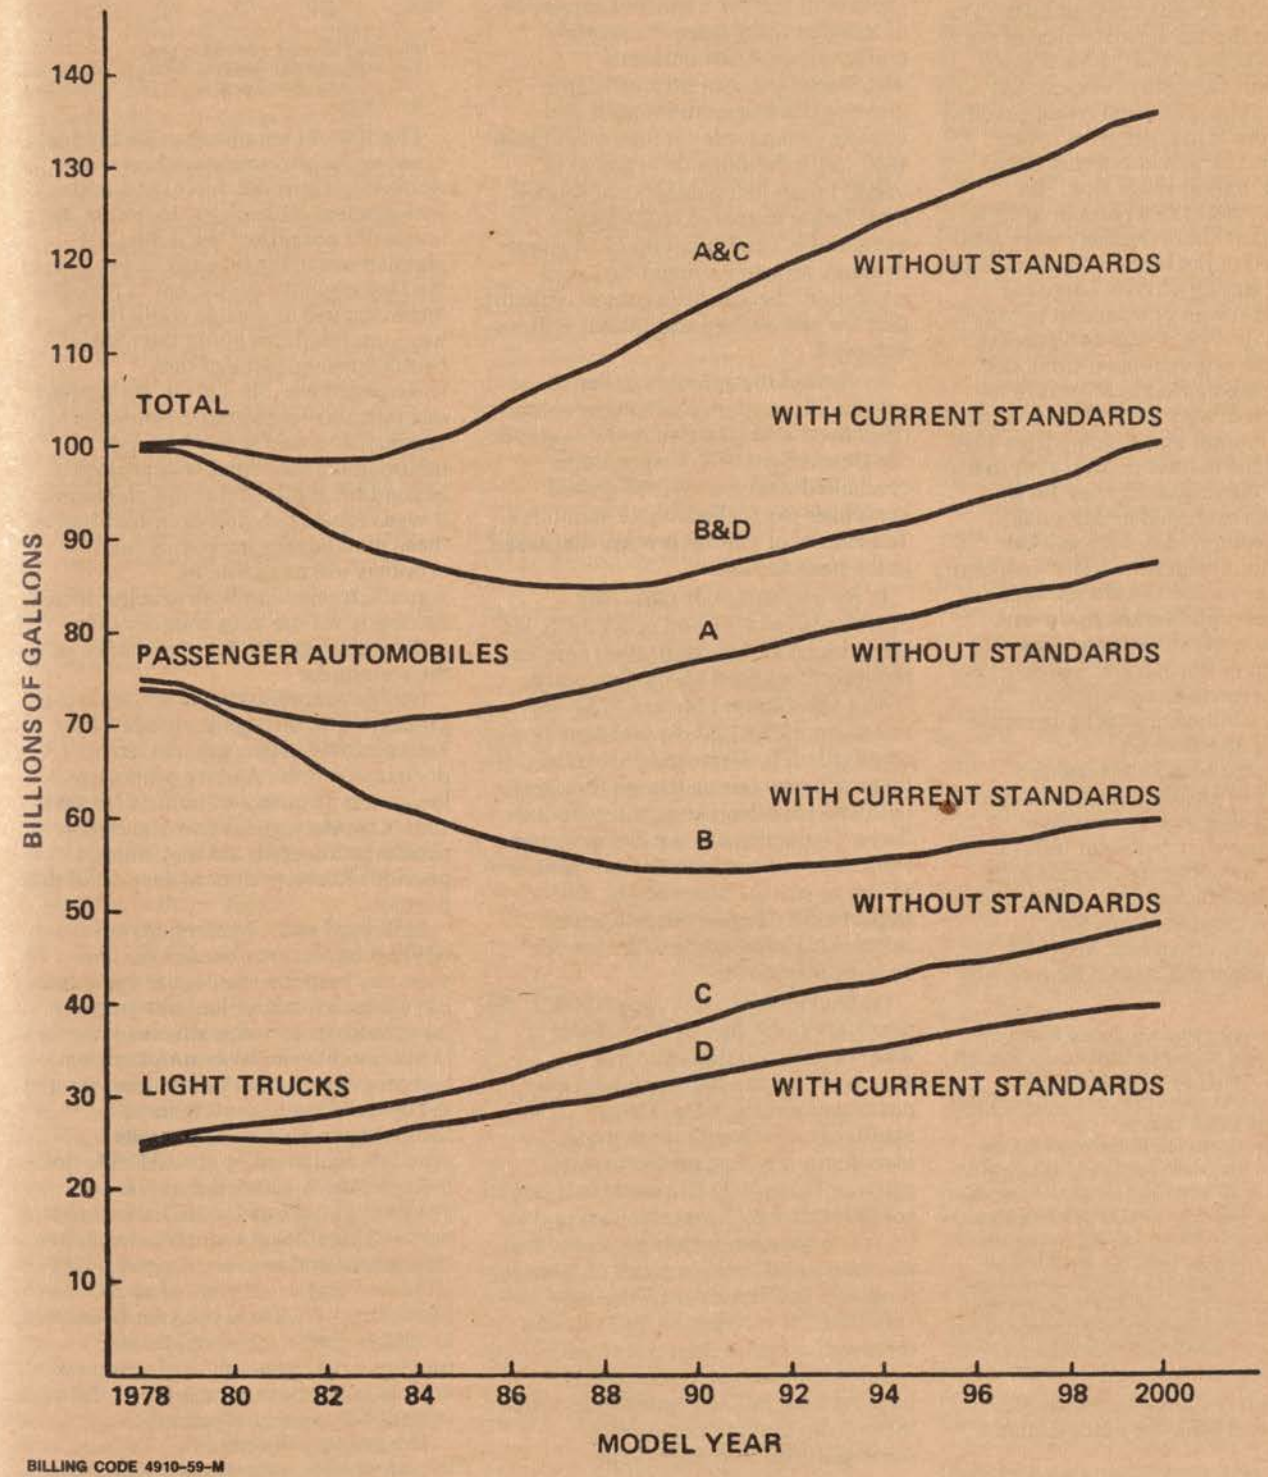
PROJECTED ANNUAL FUEL CONSUMPTION



BILLING CODE 4910-59-M

II

Passenger Car Fuel Economy Activities

A. *Sales Patterns and Trends.*—The need to further improve domestic new car fuel economy was emphasized by the effects of gasoline supply restrictions during early 1979. As a consequence of limited fuel availability large new car sales plunged and small new car sales reached record highs. The increase in the small cars' share of the market reflected a shift toward more fuel-efficient vehicles in response to shortages of gasoline and rising gasoline prices. Sales of imports grew by an impressive 22.1 percent during 1979, increasing market share from 18.1 percent in 1978 to 23.3 percent in 1979.

The market share declines were most pronounced in the larger vehicle classes during the Spring of 1979. Large car market share was 24.6 percent in May 1978; in May 1979, it was 14.6 percent. Mid-size car sales dropped from 33.4 percent of the market in May 1978 to 27.1 percent in May 1979. Even compacts lost some market share, going from 10.9 percent of the market in May 1978 to 8.9 percent of the market in May 1979. Subcompact and smaller car sales soared, however. May 1978 market share of these vehicles was 31.1 percent; for the same month in 1979 the share was 49.4 percent. Market share data (November 1979) show large cars with 18.2 percent of the market; mid-size cars with 35.5 percent; compacts with 7.3 percent; and subcompacts and smaller cars having 39.1 percent.

Sales promotions and increased availability of gasoline resulted in the most recent increase in larger car market shares, but customer interest in improved fuel economy remains high. This increased demand for fuel economy has spurred industry plans for increasing fuel efficiency. Mr. E. M. Estes, President of General Motors, has stated:

> Our U.S. customers, concerned about the availability and price of gasoline, are buying with fuel efficiency paramount in their thinking. It seems clear that this will continue to be the case in the future.
>
> There is every reason to believe that the impact of the fuel shortages and higher prices that arrived in 1979 will be longer lasting than they were in 1973–74. A cat which sits on a hot stove and gets burned might forget and do it again. But twice burned is a hard lesson learned . . . . if there is any conceivable way to do so, our fleet average will be more than 27.5 mpg by 1985. Meeting the demands of our customers has traditionally been the way we've earned success in our industry.[1]

In addition to increased consumer interest in fuel-efficient automobiles, competitive pressures within the industry have also served as a driving force toward an industry mix of vehicles with substantially improved fuel economy. The industry trend toward downsizing and utilization of fuel-efficient technologies, such as front-wheel-drive, are in part the result of manufacturers either following the successful lead of a single company or of a desire to increase or maintain market share. Most domestic manufacturers currently anticipate meeting passenger automobile fuel economy standards through model year 1985. With the sales distribution of vehicle sizes being influenced toward even larger shares of fuel-efficient vehicles by a combination of consumer demand, industry competition, and regulation, there is little reason to doubt that the established regulations will be achieved.

In view of these trends in the automobile market, changing economic conditions and manufacturers' requests, the Department of Transportation conducted a review of established passenger car fuel economy standards. The results of that review are discussed in the next section.

B. *Re-evaluation of 1981–1984 Standards.*—At the end of CY 1978, the Department of Transportation received requests from Ford Motor Company (Ford) and General Motors (GM) for reduction of the 1981–84 fuel economy standards. The Department treated these submissions as though they were petitions for rulemaking. It concluded that no reductions in the fuel economy standards were warranted as a matter of law or policy. Accordingly, the Department decided not to open a rulemaking proceeding to reduce the 1981–84 standards.

(1) Background.—On June 30, 1977, the Secretary published in the **Federal Register** average fuel economy standards for the 1981–84 model year passenger automobiles. These standards, along with most recent manufacturers' mpg projections are given in Table II–1. The standards were set at levels which were determined to be the "maximum feasible average fuel economy level" and to result in "steady progress" toward meeting the 1985 standard. As interpreted, the "steady progress" criterion does not require equal increments of fuel economy improvement in each model year, only increments that are not grossly disproportionate to each other.

Table II–1.—*Passenger Automobile Fuel Economy Standards and Manufacturers' MPG Projections*

	Standard	GM	Ford	Chrysler	AM
1978	18.0	[1] 19.0	[1] 18.4	[1] 18.4	[1] 18.6
1979	19.0	[2] 19.1	[2] 19.1	[2] 120.4	[2] 19.9
1980	20.0	[3] 21.3	[3] 21.6	[3] 20.3	[3] 21.5
1981	22.0	[4]	[4]	[4]	[4]
1982	24.0	[4]	[4]	[4]	[4]
1983	26.0	[4]	[4]	[4]	[4]
1984	27.0	[4]	[4]	[4]	[4]
1985	27.5	[4]	[4]	[4]	[4]

[3] 1980 Pre-Model Year Report to NHTSA by manufacturer.
[4] Not available.

The 1981–84 standards reflected fuel economy improvements achievable through the introduction of available fuel-efficient technology. However, the levels did not reflect the industry's planned use of diesel engines because of the Department's policy not to presume increased use of diesels while there were uncertainties about the public health consequences of their widespread use. No shift in the product mix (such as selling more compacts and subcompacts and fewer full and intermediate size cars) was projected beyond the plans of the manufacturers. It was recognized, however, that both of these methods for improving fuel economy are available to manufacturers, and both provide some flexibility for the auto companies in selecting a program for compliance with the standards.

(2) *The Manufacturer's Requests.*—In January 1979, through early May 1979, Ford and GM began submission of documents to the Agency proposing lower fuel economy standards for 1981–1984. Chrysler agreed that standards should be lowered, but they did not provide extensive data in support of that position.

Both Ford and GM claimed that NHTSA had overestimated the fuel economy benefits that would come from certain technologies, had not properly taken into account the effects of changes in automotive emission standards and test procedures, and had underestimated the costs of implementing those technologies, particularly on the schedule indicated by the NHTSA. Both manufacturers claimed that less stringent standards for 1981–84 would permit a significant reduction in capital investment and in new car prices. GM indicated that a schedule of standards increasing by 1.5 mpg per year from 1980 to 1985 (a linear schedule) would provide a net economic saving to new vehicle purchasers, compared to the current schedule of standards.

The primary thrust of the manufacturers' submissions was that consumers would be better off (in the

[1] University of Michigan Automotive Seminar, Traverse City Michigan, August 1, 1979.

sense of out-of-pocket expenses) under less stringent fuel economy standards than under current standards. The basis for this argument was that the manufacturers would use in the near term the most cost-effective methods for improving fuel economy (those with the largest fuel economy benefit for a given initial vehicle price increase) and that the technologies needed to comply with standards for the mid-1980's will be the more costly remaining items. GM indicated that a reduction in the standards through model year 1984 would provide more time for them to develop new technology to meet the later standards, and that the new technology would be more desirable from the consumer's viewpoint.

Although the Ford and GM submissions called into question several of the detailed projections in the agency's standard setting analysis and in its analysis for the 1979 Report to Congress, the fundamental conclusion that the current standards are feasible was not challenged. Both Ford and GM submitted product plans for meeting the current standards which differ from each other significantly and differ from the paths projected by NHTSA in the 1981–84 rulemaking and in the 1979 Report to Congress, although Ford's plan was somewhat similar to the NHTSA's analysis for Ford.

(3) *NHTSA Analysis.*—(a) *Statutory Considerations.*—Section 502(f) of the Act provided the legal framework for responding to Ford's and GM's submissions. That section states that passenger automobile fuel economy standards for 1981–85 may be amended only if the basic requirements of the law applicable to their original establishment are met. In the case of the 1981–84 standards, those standards must be set at a level which available information and analysis shows to be the "maximum feasible average fuel economy level" and which will result in "steady progress" toward meeting the standard for model year 1985. The 1985 standard also must be established at the "maximum feasible" level if it is amended. The schedule for fuel economy standards proposed by Ford and GM would certainly satisfy the statutory "steady progress" requirement, since they would result in equal increments of fuel economy improvement in each year. Therefore, the key issue in addressing the manufacturers' analyses advocating a reduction of the fuel economy standards was whether the reduced standards would satisfy the "maximum feasible" requirement.

Section 502(e) of the Act requires that the Secretary of Transportation, in determining the maximum feasible average fuel economy level, consider four factors: (1) technological feasibility, (2) economic practicability, (3) the effect of other Federal motor vehicle standards on fuel economy, and (4) the need of the nation to conserve energy. The Agency's interpretation of these four considerations has been discussed in previous rulemaking documents, most completely in the June 30, 1977, decision of the 1981–84 passenger car fuel economy standards.

In addition to reconsidering the applicable statutory criteria, the Agency performed a year-by-year cost-benefit analysis of the two fuel economy schedules to evaluate the manufacturers' claims that lower fuel economy standards would have greater net benefit to consumers.

(b) *Technical Analysis.*—The Agency views the main purposes behind the enactment of the fuel economy provisions of the Energy Policy and Conservation Act (EPCA) to be concern over our increasing vulnerability to foreign suppliers of petroleum and the serious national problems of increasing fuel costs and disruptions in supply. At the same time, the Agency recognizes that both the public and the government are intensely concerned about increases in prices and costs in the U.S. and world economies. The Ford and GM arguments did bear on that matter. Therefore, the Agency carefully examined the costs and benefits to consumers of the current passenger car fuel economy standards, as well as the lower alternative proposed by the manufacturers to determine the cost-effectiveness of each alternative.

The procedure used by the Agency to evaluate the consumer price impacts of the fuel economy standards differed in several important respects from the procedure the Agency would use in a statutory rulemaking proceeding. First, the effects of the standards on the consumer were analyzed using a straightforward cost-benefit analysis, looking at readily quantifiable costs and benefits associated with the standard. This approach was adopted as a method of measuring consumers' out-of-pocket expenditures and did not consider various indirect benefits of energy conservation (such as the effect on national security of high rates of oil imports).

The second difference between the Agency's analysis in this case and a normal, standard-setting analysis is that price increases were calculated based on the manufacturers' product plans (modified minimally by NHTSA) rather than on a compliance plan developed entirely by the Agency. In setting fuel economy standards, the Agency adopts a path that generally minimizes cost and risk in order to demonstrate what is *feasible*. In this analysis, the Agency did not make such a determination but merely examined the companies' present plans for compliance.

The final difference between this analysis and standard-setting is that the agency relied on manufacturer-supplied information almost exclusively in determining the vehicle price increases due to fuel economy standards. In rulemaking, on the other hand, the Agency would attempt to ascertain how large any initial price increases (if any) *need* be to cover the manufacturers' costs.

The Agency's analysis did make limited revisions to the manufacturers' product plans, however. Some items in those plans were believed to be unlikely candidates for actual inclusion in production vehicles, because of their high price and minimal fuel economy benefit. For that reason, and especially because these items unnecessarily increased consumer prices, the items were deleted in NHTSA's analysis. The adjusted product plans retained the basic technological and marketing strategies of the companies. No adjustment was made to the manufacturer's plans to reflect recent increases in demand for more fuel efficient vehicles and engines. In general, the NHTSA believes that the auto makers have been somewhat conservative in their estimates of the potential fuel economy improvement of certain technologies.

Two aspects accounted for most of the differences in fuel economy improvements estimated by the manufacturers and by NHTSA. These were the impacts of EPA requirements and manufacturers' decisions on how to meet them.

First, the Agency's analysis makes an allowance for possible reductions in fuel economy associated with EPA's modifications to its test procedures and emissions requirements. Second, the analysis did not include considerations of the possible impact of emissions standards being promulgated for diesel engine particulates, nor the impact of requests for waivers of the diesel standard for oxides of nitrogen. These actions could have an effect on the types and sizes of vehicles in which diesel engines can be used and the fuel economy benefit which would result from their use, but the EPA decisions on these matters have not been made. The high degree of uncertainty related to EPA's decision on diesel particulate

standards was the principal factor leading to the exclusion of any improvements in fuel economy from the analysis. The NHTSA therefore assumed no use of diesel engines for fuel economy improvements.

Based on these factors, the Agency estimated that for the 1981–85 period as a whole, the existing standards will save new car purchasers an additional $500–$680 million (discounted to 1980) compared to the linear schedule, or between $10 and $14 per car. Over a wide range of gasoline prices, the current schedule of standards has greater net consumer benefits than a linear schedule. As the price of gasoline rises, relative to manufacturing costs, the benefits of the existing standards, compared to those advocated by Ford and GM, will continue to increase.

(c) *The Need of the Nation to Conserve Energy.*—Although the numerical difference between the current fuel economy standards and a "linear schedule" may appear small, the linear schedule would result in the consumption of approximately 7.7 billion gallons more gasoline over the life of the 1981–84 passenger automobile fleet than would the current standards. The current standards will produce total gasoline savings of about 60 billion gallons (1.4 billion barrels) over the life of the 1981–85 fleet, compared to maintaining the 1980 standard of 20 mpg over that period (see Table II–2).

Table II–2.—*Comparison of Lifetime Fuel Consumption for Alternate Fuel Economy Schedules*

Model year	Projected domestic vehicle production (millions)	20 MPG	Current schedule [1]	Linear schedule
1981	9.6	56.6	51.5	52.7
1982	9.7	57.2	47.7	49.8
1983	9.8	57.8	44.5	47.2
1984	10.0	59.0	43.7	45.4
1985	10.1	59.6	43.3	43.3

[1] Lifetime fuel consumption (billion gallons) current schedule.

Fuel Savings for Alternate Schedules.—*Lifetime Fuel Savings (Billion Gallons)*

Model year	Current schedule over constant 20 MPG	Linear schedule over constant 20 MPG	Current over linear
1981	5.1	3.9	1.2
1982	9.5	7.4	2.1
1983	13.3	10.6	2.7
1984	15.3	13.6	1.7
1985	16.3	16.3	—
Total	59.5	51.8	7.7

Further, the national expenditures for imported oil are a major factor in our persistent foreign trade deficit, which in turn affects the value of our currency in foreign markets, the prices we must pay for foreign goods, and the overall rate of inflation. All of these petroleum related consequences are significant.

Given the propects for sharply higher gasoline prices during the period in which the 1981–85 passenger car fleet will be on the road, it is likely that consumers will be better off under the current standards than under a less stringent schedule, even ignoring the unquantifiable social costs.

(4) *Conclusions.*—The arguments submitted by Ford and GM provided no statutory basis for revising the standards. If any thing, the information supplied by the two principal manufacturers reinforced the earlier conclusions that the current standards comply with all requirements of the Act and are both technologically feasible and economically practicable, since both companies project being able to meet the current standards. Existing passenger car fuel economy standards have encouraged manufacturers to offer improved product lines of fuel-economical cars which are also being demanded in the market. Average fuel economy standards for model year 1979 have been met, and exceeding the 1980 fuel economy goals is projected by the companies, as shown in Table II–1. Revision of passenger car fuel economy standards did not, therefore, appear justified. This is not to say, however, that review and re-evaluation of the standards may not be necessary as economic conditions change within the industry and the rest of the economy. NHTSA is committed to promulgating fuel economy levels which are consistent with changing technological and economic conditions, and will review established standards as conditions warrant.

III

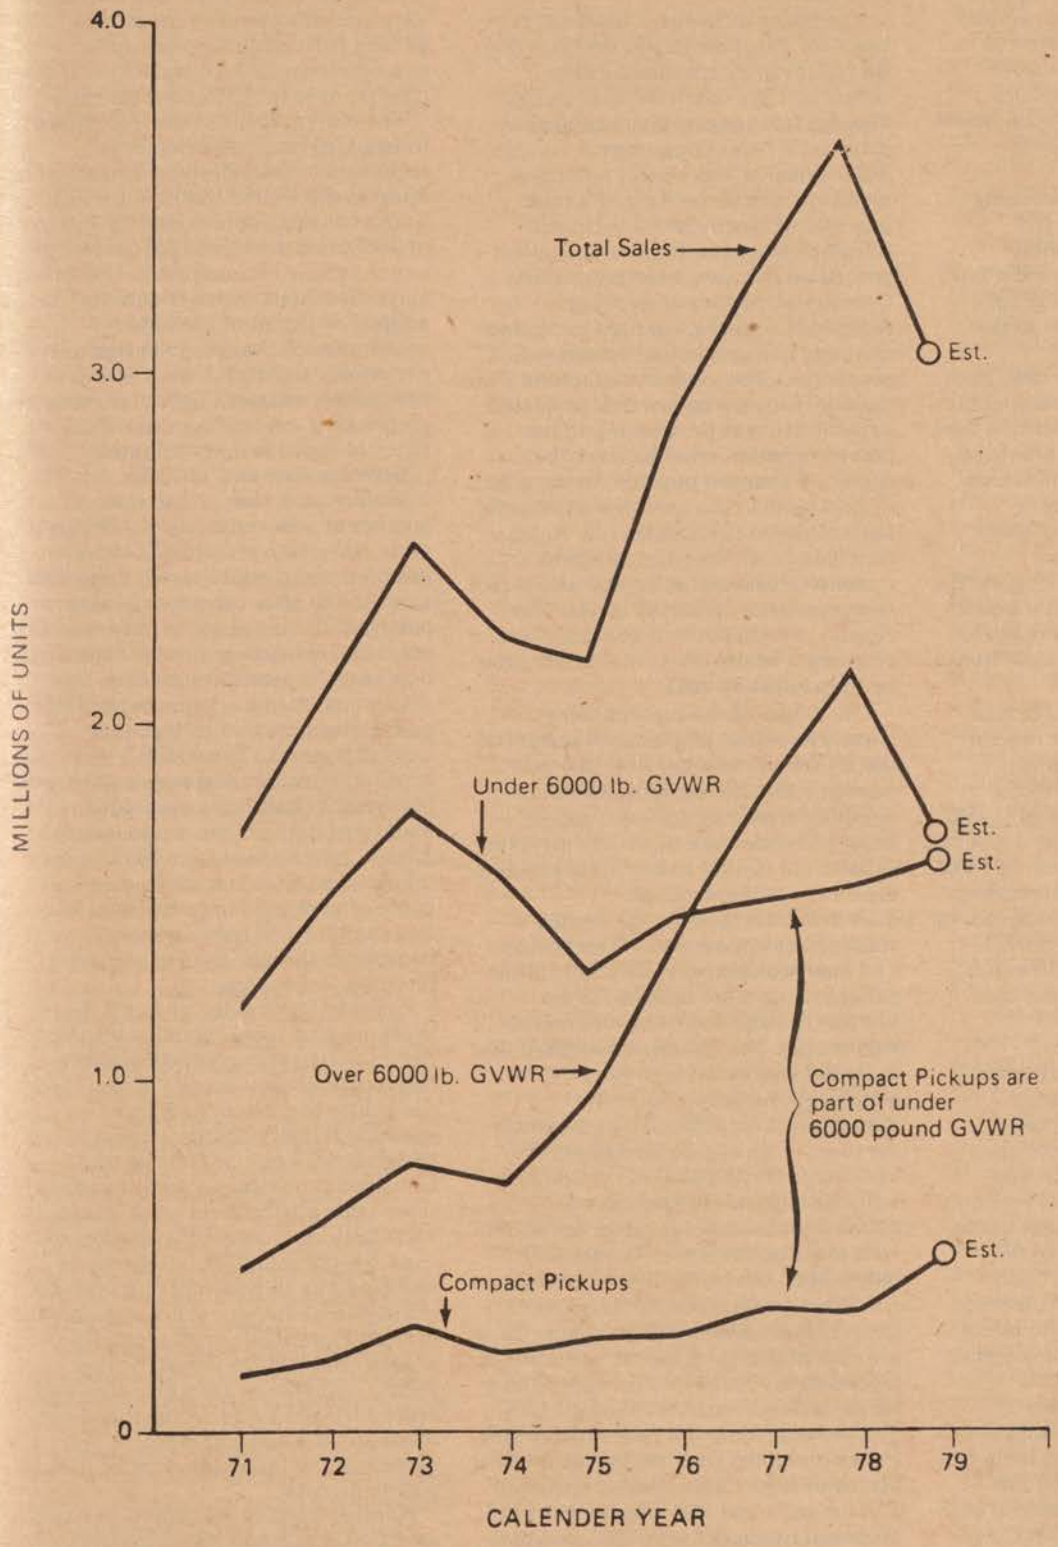
Light Truck Fuel Economy Activities

A. *Sales Patterns and Trends.*—1. *Historical Sales.*—Throughout the seventies, the light truck market has exhibited a high level of growth. In 1971, total sales were nearly 1.7 million. By 1978, sales had increased by more than a factor of two, to about 3.7 million units.

The NHTSA believes this rapid growth will not continue into the eighties and that 1979 represents a turning point for the market. The 1979 sales were down to approximately 3.1 million units or, about where the 1977 sales had been.

A more detailed lood at the growth of the light truck market is provided in Figure III–1, where the sales of Class I (up to 6,000 lb. Gross Vehicle Weight Rating (GVWR) and Class II (6,001 to 10,000 lb. GVWR) trucks ar shown for the period 1971 through 1979. Class I sales were 29 percent higher in 1978 than in 1971, and sales of the heavier weight trucks grew 338 percent higher in 1978 than in 1971. The heavier trucks accounted for about 29 percent of the total light truck market in 1971. In 1978, they accounted for 58 percent of the total light truck market. The trend in the 0–6,000 lb. GVWR trucks between 1971 and 1979 showed an increase of nearly 16,000 units per year. The 6,001–10,000 bl. GVWR trucks increased about 180,000 units per year in this time period. The rapid growth in the Class II trucks can be traced to the 1975 model year. One possible cause is the imposition of more stringent emission standards for the 6,000 lb. GVWR-and-under category in 1975 which raised the relative cost of owning and operating these vehicles. As a result, manufacturers sought to sell more of the heavier-rated trucks and avoid the standards. The behavior of the market in the 1973–1974 energy shortages is important in estimating future sales of light trucks. In 1973, the sale of the 0–6,000 lb. trucks peaked at over 1.7 million units. In 1974, this dropped to about 1.5 million, and in 1975 it dropped to about 1.3 million. By 1978, it has not yet regained the 1973 peak. Sales of these trucks have continued declining through 1979. Heavier truck sales experienced a slight drop between 1973 and 1974, and then went on to increase every year through 1978; however, during the first ten months of 1979, class II truck sales have fallen nearly 25 percent as fuel prices rose and gasoline availability became more uncertain.

FIGURE III-1
Historical Sales



Source: NHTSA Light Truck Data Base

BILLING CODE 4910-59-C

Historical sales data also show that the market shares of compact trucks has remained relatively constant during the period 1970–1978 at about 9.5 percent. Between 1978 and 1979, in an apparent reaction to the fuel situation, compact truck sales rose by an estimated 39 percent, while all other truck sales decreased by 15 percent. The 1979 market share for compact trucks, based on the first ten months of 1979 is estimated at 14.2 percent.

B. *1981 Light Truck Fuel Economy Standards.*—In June of 1979, the National Highway Traffic Safety Administration (NHTSA) issued a final rule which reduced the average fuel economy standard applicable to two-wheel drive (4x2) light trucks, manufactured in model year 1981, from 18.0 mpg to 17.2 mpg. The review action was taken in response to a petition from Chrysler Corporation which provided NHTSA with new information which indicated that their capability of improving the fuel economy of those trucks was less than had been determined in earlier rulemaking. At the same time, Chrysler's request to reduce the fuel economy standards applicable to the four-wheel drive (4x4) light trucks was denied.

Upon indication that Chrysler was having difficulties in working toward compliance with 1981 standards, NHTSA investigated other vehicle manufacturers' abilities to comply with the 1981 standards. Ford projected being able to achieve 17.6 mpg for its 1981 4x2 fleet and GM projected its improvement capability to be 16.2 mpg. Subsequent to this investigation, increased market demand for fuel-efficient vehicles has led the manufacturers to project that they will be able to exceed the standards (excluding Chrysler).

NHTSA agreed with the positions taken by Chrysler and the other companies in most respects, the exception being a disagreement about whether or not the use of improved lubricants could provide a fuel economy benefit for 1981 model year light trucks. The impact on the standards of this disagreement was contingent upon whether the Environmental Protection Agency (EPA) would permit the use of these lubricants in fuel economy testing by January 1, 1980. The final rule establishing the truck standards assumed that the EPA would approve the use of improved lubricants in its fuel economy testing procedures by this time. The final rule also provided that if approval were not given by that date, the standards would each be 0.5 mpg less. Because EPA has indicated that it will not be able to approve use of the lubricants by this date, each of the standards will indeed be 0.5 mpg less; i.e., 16.7 mpg for 4x2's, 15.0 mpg for 4x4's, and 14.5 mpg for limited product line vehicles.

The major differences between the basis for this most recent decision and that of the prior rulemaking are: reductions in expected fuel economy benefits from engine displacement or drive ratio reductions, engine improvements and weight reduction; modifications to the Agency's prior baseline or larger-than-anticipated effects of emission standards and test procedure changes; reduced benefits from aerodynamics and rolling resistance changes; changes in product mix; and changes in fuel economy test procedures. For other manufacturers, the main factor causing lowered projected capabilities was (in addition to the previously mentioned factors), the Agency's changed position on the effect of 1979 model year emission standards. In the 1980–81 rulemaking, the Agency concluded that the more stringent emission standards need not reduce fuel economy below pre-1979 levels. The Agency now believes that a fuel economy penalty does exist and cannot be fully offset by 1981.

The values of the fuel economy standards reflect NHTSA's judgment of the maximum levels of average fuel economy that the major domestic manufacturers can achieve without having to undertake measures involving substantial market risks. The benefits to the nation of the domestic manufacturers meeting the 18 mpg standard as opposed to a standard of 17.2 mpg are approximately 710 million gallons of gasoline saved over the lifetime (128,000 miles) of 1981 model year trucks. The Agency considered that potential energy savings to be significant; however, the risks associated with achieving an 18 mpg standard were evaluated against the benefits to the national of compliance with the higher standards. It was decided that the market risks associated with meeting the higher 4x2 standard outweighed the potential energy savings.

C. *Current Rulemaking Activities.*—Current fuel economy rulemaking efforts are centered around the development of fuel economy standards for light trucks for the model years 1982 through 1985. The promulgation of a final rule for light trucks for model year 1982 is planned for March of 1980. Fuel economy values of 17.4 for 4x2's and 15.6 mpg for 4x4's are proposed for model year 1982, whereas a range of values are proposed for model years 1983–85. The proposed mpg levels are estimated to save between 11 and 17 billion gallons of gasoline over the lifetime of the model years 1982–85 fleets compared to their consumption if the fleet fuel economy remained at the level of the model year 1981 standards. This amounts to between 900 and 1,390 gallons per vehicle or a net dollar savings between $510 and $1,120 (1979 dollars) over the life of the vehicle.

The current focus of the Department's rulemaking on these vehicles is important to the petroleum conservation effort in the United States since light trucks consume approximately 7 percent of petroleum consumed (20 percent of motor vehicle consumption). One of the major questions which is currently beign addressed is that of consumer acceptance of changes in design and performance of light trucks. Results of preliminary research indicates consumer preferences are tending toward fuel efficient vehicles and attributes.

Between now and 1985, the manufacturers plan to introduce a number of new truck models. During this same period other factors such as inflation and gasoline availability will also tend to alter consumer buying patterns. To contribute to increased fuel economy, consumers must purchase the new fuel-efficient truck models. One way to estimate market acceptability prior to introduction is to conduct market research. The NHTSA has sponsored market research studies, and the manufacturers have provided marketing data in their responses to a July 26, 1979 request from NHTSA for information. Some estimates can be made of which vehicle attributes are important to different classes of consumers through the use of market research techniques.

Considering first the pickup/leisure users, current research indicates that there are two primary motivations to buy a pickup, the overall "utility," and the ability to use the truck for occasional light hauling. Survey respondents who use pickups for commercial purposes appear to have three main attributes in mind: capacity, versatility, and durability. Owners of vans used primarily for pleasure are motivated by the concept of a movable environment. Interior space appears to be a critical vehicle attribute to the leisure oriented van owner. Trailer pulling and light hauling are important secondary attributes. Versatility and durability are also important to van owners but of lesser importance than to pickup owners.

Another important attribute in truck selection is payload (the difference between its curb weight and its GVWR). Results of preliminary research seems to indicate that if payload were the

attribute most important to the consumer, there are numerous vehicle design concepts which could satisfy this need. Cargo volume and the type of engine installed in the light truck are also important attributes for the consumer. The results of some studies indicate that four and six cylinder engines may be gaining in acceptability. Potential truck purchasers seem to have altered their engine size preferences in favor of smaller, more fuel-efficient engines; therefore, consumers seem willing to trade off certain quick acceleration attibutes for more fuel-efficient vehicles.

Another question currently being addressed in light truck rulemaking is that of the manufacturers' financial abilities to maintain high levels of capital spending during the early 1980's. Unexpected sales declines and mix shifts toward more fuel-efficient vehicles, coupled with record spending levels, have led to third quarter 1979 North American automotive operating losses of GM, Ford, and Chrysler. Passenger car and light truck sales are expected to continue to be down during CY 1980 due to the impact of the current economic downturn and rising gasoline prices. A protracted sales decline (or shift toward supply-constrained small vehicles) might threaten manufacturers' abilities to finance investments by requiring even higher levels of borrowing than the already high levels being anticipated by the industry. If such a situation appeared imminent, the provisions of the Act would allow a revision of the standards to reflect the change in economic practicability.

Attention has also been directed toward the emission/fuel economy question during current rulemaking activities. Stricter emission standards and testing procedures have been proposed by EPA for Model Year 1983, but no final rules have been issued. NHTSA currently has estimates of the effects of these standard and procedure changes on fuel economy, and is awaiting data and commnts from interested parties. Any comments received will be considered before the Agency sets light truck standards for model years 1983–1985.

In summary, there are important questions beign addressed in current light truck rulemaking activities, dealing with consumer acceptability, manufacturers' financial capabilities, and emissions. Preliminary research has yielded encouraging results with respect to the fuel-saving potential of future light truck rulemaking reflecting continued consumer acceptance of light truck redesign for fuel efficiency.

Finally, it appears that all manufacturers have met the model year 1979 average fuel economy standards for light trucks, and also project meeting the model year 1980 standards. With the introduction of new fuel-efficient designs and technologies into new model light trucks, the emphasis of the manufacturers on fuel economy is clear.

IV. Other Automotive Fuel Economy Related Activities

A. Low Volume Automobile Manufacturers

The Act provides an automobile manufacturer producing less than 10,000 vehicles per year an opportunity to obtain an exemption from established fuel economy standards, providing that an alternative fuel economy standard is established at the maximum feasible average fuel economy level. By this provision, all manufacturers, even the very small ones, are required to improve fuel economy.

Based on experience administering this provision, the Department of Transportation recommended in the Third Annual Report to the Congress that low volume automobile manufacturers be exempted from the fuel economy standards and reporting provisions of the act, although they would still be subject to the labeling requirements of the statute. In addition, these manufacturers will still be held liable for fuel economy improvements through the gas guzzler tax initiated by the Energy Tax Act of 1978, administered by the Treasury Department. The Energy Tax Act of 1978 imposes on the sale by a manufacturer of an automobile a tax determined in accordance with tables provided under the Act (discussed in Section F). The tax is applicable to model types of 1980 and later model year automobiles which have a certain fuel economy level. The Act also provides that a small manufacturer may apply to the Secretary of the Treasury for an alternate rate schedule by showing that it is not feasible for that manufacturer to meet the tax-free fuel economy level.

In the past year, changes were also made in the procedure for administering low volume automobile manufacturers' petitions. The major change was to eliminate the requirement for public comment on the receipt of a request for exemption. The change reduced the administrative burden and maintained appropriate opportunity for public review and comment.

B. Legislative Recommendations

The National Highway Traffic Safety Administration (NHTSA) conducted an analysis of the need for the changes in the fuel economy program for the January 1979 Report to the Congress, as required by Section 502(a)(2) of the Cost Savings Act. As part of this analysis, NHTSA sought the views of the manufacturers and the public on possible program improvements. One of the prime concerns in developing legislative recommendations was to minimize the burdens on the vehicle manufacturers while still securing substantial improvements in automobile fuel economy.

In that Report on Automotive Fuel Economy, three amendments to the Act were recommended. These amendments, together with an additional fourth amendment, are now incorporated into a Departmental draft bill transmitted to the Congress last December. The first amendment would amend Section 502(c) of the Act to exempt passenger car and light truck manufacturers producing fewer than 10,000 vehicles per year from both the fuel economy standards and the Act's semi-annual reporting requirements. The production volume of these manufacturers is so low that there is minimal gasoline saved through such regulation and their economic and technical capabilities to make necessary fuel economy improvements are severely limited. An exemption for these manufacturers would therefore have no significant effect on fuel economy and would save both the manufacturers and the government a lot of unnecessary work.

The second amendment would allow a manufacturer to average U.S. assembled automobiles with its imports if U.S. production began after the Act was passed. This amendment would be consistent with domestic employment opportunities by encouraging foreign manufacturers to build new cars in this country, as Volkswagen has recently done, and use a high percentage of parts, labor, and materials originating in the United States.

The third amendment would modify the automotive fuel economy system of credits and penalties to allow the credits a manufacturer may earn to be carried forward or backward for three years instead of the current one year. This amendment is designed to facilitate compliance to meet the required levels during a given year due to unforseen circumstances. It is not intended either that manufacturers, other than those that are financially troubled, would be able to use the extended credit period routinely or that any manufacturer would be able to exploit it in order to deliberately delay fuel economy improvements in later years.

The fourth amendment would exempt a manufacturer from a finding of unlawful conduct for its failure to comply with a fuel economy standard if it has earned sufficient credits in the three years prior to the year of the penalty to completely offset such penalty. The section would also provide relief from a finding of unlawful conduct to a manufacturer that has not earned sufficient credits before the year of penalty, on the condition that the manufacturer submits a plan showing that it will earn sufficient credits during the following three years to offset the penalties. If the manufacturer, despite its plan, has a net penalty at the end of the three-year carry-back period, it would be considered to have acted unlawfully. The amendment would thus continue the statute's emphasis on compliance.

C. Evaluation of Federal Fuel Economy Standards

The National Highway Traffic Safety Administration has initiated a comprehensive program to evaluate the effectiveness of the automobile fuel economy standards. The program involves the collection and analysis of (1) "on-the-road", (or consumer experienced) fuel economy data, and (2) consumer costs of the standards. The analysis will include:

(1) Estimates of total fuel savings for both individual model years and the aggregate for all vehicles produced under the standards,

(2) a comparison of the total benefits in fuel conserved with the total consumer costs of implementing the standards.

(3) an analysis of how a vehicle's fuel economy changes over time and,

(4) comparison of on-the-road fuel economy with the fuel economy measured by the EPA procedure.

The evaluation program began in the Summer of 1979 with a pretest which demonstrated the feasibility of collecting reliable data using a log, or diary technique. The full-scale survey is scheduled to commence in early 1980 and will involve a national probability sample of approximately 40,000 vehicles, covering model year 1977, 1978, and 1979 passenger cars and model year 1978 and 1979 light trucks. In addition to broad geographical coverage, the sample will be allocated to account for seasonal effects on fuel economy, and will cover most make-model combinations for both domestic and import vehicles. Survey results are scheduled to be available on a quarterly basis, with initial tabulations in August 1980. This will be the first nationally representative, statistically reliable survey of the differences between actual, in-use fuel economy and the counterpart EPA values.

The Department of Energy conducted a study [1] of the divergence between EPA and on-the-road fuel economy using primarily 1974–1978 commercial fleet data. These data, while the only source available, may not be representative of on-the-road consumer experience. The Department of Transportation survey will provide valid data to permit comparisions of a CAFE-basis as well as a more detailed make-model level for most vehicle classifications.

D. Compliance Activities

The law requires new car dealers to display the *Gas Mileage Guides* prominently in their showrooms and to keep adequate stock on hand to meet the public demand. During 1979, twenty-one new car dealers have been fined for violating the Section of Federal law requiring them to display and stock *Gas Mileage Guides*. Civil penalties of $500 were assessed against each dealer by the National Highway Traffic Safety Administration. NHTSA plans to intensify this enforcement effort in 1980.

The agency is soliciting, with favorable results, assistance of vehicle manufacturers in developing an educational program for their franchised dealers. The program will promote better understanding by dealers of their obligations to properly display and make available *Gas Mileage Guides*.

E. Federal Acquisition Program

Section 510 of Title V requires that all passenger automobiles acquired by all executive agencies achieve a fleet average fuel economy of at least the average fuel economy standard applicable to automobile manufacturers. This section defines acquisitions as those vehicles purchased or leased for a period of 60 continuous days or more. In July 1977, these requirements were extended to include light trucks, effective 1978. As mandated by Executive Order, the fleet average fuel economy for all passenger automobiles federally acquired must exceed the statutory fuel economy standard by 2 mpg in FY 1978, 3 mpg in FY 1979, and 4 mpg in FY's 1980–85. The Executive Order further requires that no automobile may be acquired if the mpg rating is below the standard for that particular year.

During Fiscal Year 1978, agencies acquired 15,294 vehicles, attaining a fleet average fuel economy of 21.0 miles per gallon (mpg), three mpg higher than the applicable standard for that year. This will result in a gasoline savings of 16.28 million gallons over the assumed useful life of 60,000 miles for vehicles in the GSA fleet.

Through September 30, 1979, agencies have acquired 17,072 passenger vehicles which have attained a fleet average fuel economy of 22.4 MPG. This will result in a total savings of 20.87 million gallons of gasoline over the expected life. During FY 1979, agencies also acquired 595 4x4 light trucks with an average fuel economy of 17.9 mpg, and 3,022 4x2 light trucks with an average fuel economy of 19.6 mpg.

Additional savings are expected in Fiscal Year 1980 as the fleet average fuel economy objective for the Federal fleet increases to 24 MPG, the fuel economy standard rises to 20 MPG, and the program is extended to include light trucks up to 8,500 pounds Gross Vehicle Weight Rating (GVWR).

F. The Gas Guzzler Tax

The gas guzzler tax is an excise tax levied on new passenger automobiles which do not meet specific fuel economy standards. The tax becomes effective commencing with 1980 model years cars. In any one year, the amount of the tax increases as the fuel economy level of the automobile decreases. The magnitude of the tax on each fuel economy level [1] also increases each year. For example, the gas guzzler tax schedules for 1980 and 1986 are as follows:

If in MY 1980 the fuel economy level of the model type in which the automobile falls is:

	The tax is
At least:	
15	0
14 but less than 15	$200
13 but less than 14	300
Less than 13	550

The tax schedule for 1986 or later model year automobiles is as follows:

If the fuel economy of the model type in which the automobile falls is:

	The tax is
At least:	
22.5	0
21.5 but less than 22.5	$500
20.5 but less than 21.5	650
19.5 but less than 20.5	850
18.5 but less than 19.5	1,050
17.5 but less than 18.5	1,300
16.5 but less than 17.5	1,500
15.5 but less than 16.5	1,850
14.5 but less than 15.5	2,250
13.5 but less than 14.5	2,700
12.5 but less than 13.5	3,200
Less than 12.5	3,500

[1] "Comparison of EPA and In-Use Fuel Economy of 1974–1978 Automobiles," U.S. Department of Energy, October 1979.

[1] These fuel economy levels are based on a combination of city and highway mileage ratings and should not be confused with EPA city mileage ratings appearing on new vehicle window stickers.

G. Voluntary Truck and Bus Fuel Economy Improvement Program

In 1975, the Department of Transportation, the Department of Energy (then the Federal Energy Administration), and the Environmental Protection Agency initiated a joint Industry/Government Voluntary Truck and Bus Fuel Economy Improvement Program. The basic intent of the program is that it should be a voluntary effort effected in the marketplace, not a legislated or regulatory program. Voluntarism provides the much-needed flexibility to adopt the best approaches for each of the greatly dissimilar vehicle configurations and services performed by large trucks and buses.

Currently, the program includes two hundred and fifty organizations that have committed themselves to find solutions to the energy challenge in the commercial vehicle industry by taking actions as:

—Developing and offering more fuel-efficiency testing

—Conducting and reporting on fuel economy testing

—Providing fuel economy product information, advertising and training programs

—Purchasing fuel-efficient new vehicles and add-on or replacement components

—Developing, conducting, and/or supporting fuel saving driver training and motivation programs

—Providing forums for the exchange on fuel economy

Among the high points of the Voluntary Program's activity to date are:

—Sponsorship of a broad program initiated by the Society of Automotive Engineers for development and vertification of consensus standards for the accurate and consistent measurement of fuel economy of trucks and buses and for the evaluation of separate components.

—Information exchange for members on individual fuel-economy successes and failures. Program member reports are received regularly and the information is distributed to the members. For example, in 1979 one large carrier provided a well-documented report of fleet average mpg improvement of 34 percent (3.8 mpg to 5.1 mpg) since 1973 with a 1982 goal of 5.63 mpg or 48 percent improvement.

—The Double Nickel Challenge's "Race to the Fuel Pump," conducted in August 1978, in which 32 owner-operator truckers, driving their own rigs on a test track, proved that travelling at 55 mph saves fuel compared to higher speeds. The results indicated that fuel economy improved 10.5 percent at 55 mph when compared with operation at a higher speed of the driver's own choosing. Phase 2 of the Double Nickel Challenge, "The Race to the Loading Dock" is looking at productivity at 55 mph versus higher speeds and at the cost of arriving later for a load versus being first in line to load and unload. Phases 3 through 5 will be "The Race to the Maintenance Shop," "The Race to the Hospital" and "The Race to the Bank" looking at the savings in maintenance costs, accidents and finally, adding up the results of all the "races."

—In November of 1979, the Voluntary Program sponsored two heavy duty truck sessions at NHTSA's First International Fuel Economy Research Conference and, jointly with the Society of Automotive Engineers, sponsored a Symposium "Choices and Challenges: Medium Duty Truck Power Plants."

—During 1979, the Voluntary Program SAE/DOT fuel economy measurement test by fleets, manufacturers, and eight test vehicles (four standard trucks—two Class 8 with trailers, and two Class 6—are paired with four similar vehicles having fuel saver components) were continued. The trucks and support are contributed by industry and the tests conducted in accordance with SAE Recommended Practices developed under the Voluntary Program.

The Voluntary Program has been the prime motivator for the voluntary purchase of fuel saving components on new trucks. In the years 1973 through 1978, commercial vehicles saved 2.6 billion gallons of fuel as vehicle operators purchased fuel savings components on their vehicles at a rapidly increasing rate. Savings through 1979 are estimated at 3.6 billion gallons.

V. Utilization of Advanced Technology

In this Chapter the methods currently being used by the automotive industry in achieving fleet average fuel economy goals are surveyed, with emphasis placed on the degree to which advanced technology has played a role in this phase of the energy conservation effort. In this respect, Chapter V responds to the statutory requirement of the Department of Energy Act of 1978 (P.L. 95–238), Title III, Section 305, which directs the Secretary of Transportation to submit a report to Congress each year on the results of an evaluation of the extent to which the automotive industry utilizes advanced automotive technology. Most of the technologies evaluated are either partially implemented or are estimated to be available for implementation by the mid-1980s.

Seven general categories of technological improvement has been identified which could lead to increased fuel economy in the mid-eighties for both passenger automobiles and light trucks (Table V–1). Pictures of specific technologies shown are provided courtesy of the Ford Motor Company, General Motors Corporation and the Chrysler Corporation.

A. Conventional Spark Ignition Engines

Several technical changes by all producers can be expected to provide improvements to overall fuel efficiency of conventional spark engines. These include: better fuel control, better combustion chamber design and increased use of electronics. Most of the automotive manufacturers have been gradually expanding their use of electronic engine controls, beginning in the early 1970's with electronic ignition systems. The basic reason for this trend is that electronic control of engine variables provides for a better optimization of fuel economy and emissions.

Some microprocessor control systems have already been introduced which monitor various engine functions and vary spark timing, air-fuel ratios, exhaust gas recirculation, and idle speed. Optimized engine control is expected to yield a one percent to three percent fuel economy gain. After the introduction of microprocessor controlled systems, it can be expected that they will be further developed to increase the number of power-train functions (including transmission functions, such as shifting) monitored and controlled. Application of electronics is expected to continuously increase in both cars and light trucks.

B. Turbocharged Spark Ignition Engines

General Motors, Ford, Saab, and Porsche are now offering turbocharged engines in at least one of their lines of automobiles. Turbocharging offers the

potential for improved fuel economy by permitting the substitution of a small engine for a large one without affecting vehicle acceleration performance. In general, the turbocharged engines currently in use appear to be intended to improve performance without regard to fuel economy. Volkswagen, under current contract to DOT, has developed test data showing that a turbocharged spark ignition engine in a 3000 lb. inertia weight vehicle can achieve 33 mpg EPA composite fuel economy, while meeting MY 1981 emission standards. It is expected that turbocharged spark ignition engines will be increasingly used in the future, in both automobiles and light trucks. Figure V–1 is a diagrammatical sketch of Ford's 2.3L turbocharged engine.

BILLING CODE 4910-59-M

TABLE V-1

Representative Fuel Economy Improvement Techniques for Passenger Cars and Light Trucks In the Mid-Eighties

Technology	Typical Improvement in Fuel Economy from 1978 (1)	
1. Weight Reduction (downsizing, materials substitution, and/or alternate configurations for body or powertrain)	10% reduction in weight increases fuel economy by 8% at constant acceleration performance.	
2. Engine Improvement		
Improved Spark Ignition Engine Efficiency		
a. Optimized control	1-3%	
b. Engine quality	0-20% (2)	
Alternate Engines		
a. Diesel	25%	
b. PROCO	20%	
Turbocharging	car-specific depending on replacement of current engine by a smaller turbocharged engine. Typically 5-10% improvement in fuel economy	
3. Transmission Improvement		
Improved Automatic Transmission related to current 3-speed		
a. Locked-up torque converter	3-6%	
b. Wide range 3-speed	2%	
c. Wide range 4-speed	5%	
d. Improved efficiency	1-2%	
e. Improved engine/transmission matching	1-2%	
f. 4-speed with locked-up torque converter	8-11%	
Overdrive Manual Transmission	5%	
4. Improved Lubricants		
a. Crankcase		
1. lower viscosity	1%	3% total
2. friction modified	1%	
b. Rear axle lower viscosity	1%	
5. Reduced Parasitic Losses	1-4%	
6. Reduced Tire Rolling Losses	5%	
7. Improved Aerodynamics		
a. Complete Body redesign	5%	
b. Add-on devices	3%	

(1) These values are not necessarily additive
(2) As compared to an average 1978 engine.

BILLING CODE 4910-59-C

C. *Diesel Engines*

Diesel engines are increasingly being used in automobiles and light trucks sold in the U.S. Currently, General Motors, Mercedes-Benz, Peugeot, and Volkswagen offer diesel-powered automobiles. Similarly, General Motors and Volkswagen offer light trucks powered by diesel engines. In May 1979, General Motors had built over 77,000 cars with diesel engines, or about twice the number built in the 1978 model year. New diesel car sales in the U.S., as a percent of total U.S. car sales, is reported to have more than doubled between October 1978 and October 1979, increasing from 1.0 percent to 2.8 percent.[1] Other manufacturers of cars and light trucks are actively working on diesel engines, and it appears that the market for these engines will increase in the future.

Although the diesel engine has the advantage of achieving higher fuel economy than the gasoline engine, it also has problems with emissions, mainly with regard to NO_x and particulates. A major concern is the potential health problem associated with the possible carcinogenicity of the relatively large quantities of particulate matter exhausted by the diesel engine. An evaluation of research and public issues associated with the prospective widespresad use of diesel-powered light duty vehicles is being sponsord by EPA, DOE and DOT. The evaluation is being performed by the National Academy of Science, and involves all the biomedical, environmental, technical, energy and economic aspects relevant to the potential problem. It is scheduled for completion at the end of 1980. The Departments of Transportation and Energy together with the Environmental Protection agency are also conducting a study of the economic, energy and health implications of projected growth in the diesel-engine-equipped fleets of passenger automobiles and light trucks. This three-agency study is intended to assist policy makers in the Federal Government. The study currently is planned for completion in Spring, 1980.

d. *Stratified Charge Engines*

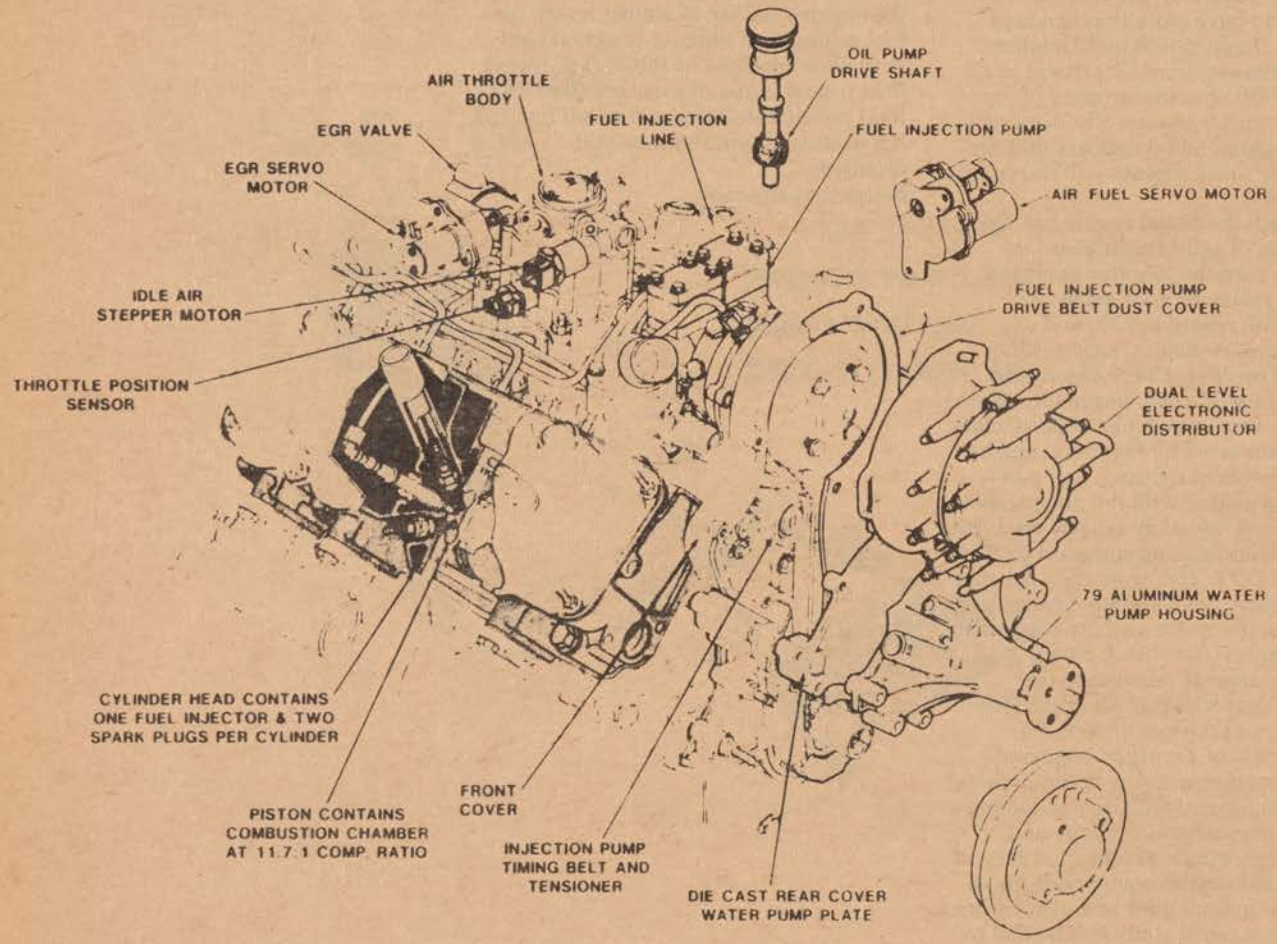
Development of a direct injected stratified charge spark ignition (or gasoline) engine with progrmmed combustion (called PROCO, Figure V–2) is continuing at Ford. A higher compression ratio and a very lean air/fuel ratio provides a 15–20 percent improvement in fuel economy over current conventional engines while maintaining acceptable emission levels. Currently in the pre-production engineering phase, Ford is field testing a fleet of about 200 automobiles equipped with this engine. Initial plans were to develop the PROCO system using Ford's 5.7 liter V–8 but consideration is not being given to a smaller engine (5.0 liter) in light of the recent market shift to small cars. Application of the PROCO engine to light trucks is also expected. Success in the introduction and commericalization of the PROCO engine would be particularly beneficial to autotmobiles and light trucks in view of the engines' ability to almost match the fuel economy of indirect injection light duty diesel engines. A PROCO-powered fleet is now under experimentation as a final test of durability and reliability, but noise and vibration are still problems.

BILLING CODE 4910-59-M

[1] *Wards's Automotive Reports*, November 19, 1979, p. 371.

FIGURE V-2

5.0 LITER PILOT PROCO ENGINE



BILLING CODE 4910-59-C

E. Energy Storage

General Motors has a development program for electric vehicles and is reported to have plans to introduce them on the market by the mid 1980's. They will be used first in vans and delivery vehicles because of greater ease in carrying batteries and routinely scheduled overnight charges.

F. Improved Transmissions

GM and Chrysler have introduced lockup torque converter clutches on some of their automatic transmissions and are expected to gradually expand their application in the early 1980's. Figure V–3 is a picture of a cutaway model of GM's THM 200 transmission with a lockup clutch.

Ford introduced a four-speed automatic transmission in certain 1980 model automobiles and it is expected that it will use this transmission in more 1981 models, including some light trucks. The overdrive fourth gear combined with a split power path provides a substantial improvement in highway fuel economy (approximately 10 percent). GM and Chrysler are expected to introduce their own four-speed automatic transmissions with lockup torque converters in the early 1980's.

G. Weight Reduction

1. *Downsizing.*—Redesign of automobiles to reduce their overall size and weight while maintaining interior room has been so far the major means of weight reduction employed by automobile manufacturers. Extensive downsizing began in MY 1977 with the GM standard size cars and has continued to date with all manufacturers having reduced the size of their standard and intermediate models. Further downsizing by all producers can be expected in the early 1980's.

BILLING CODE 4910-59-M

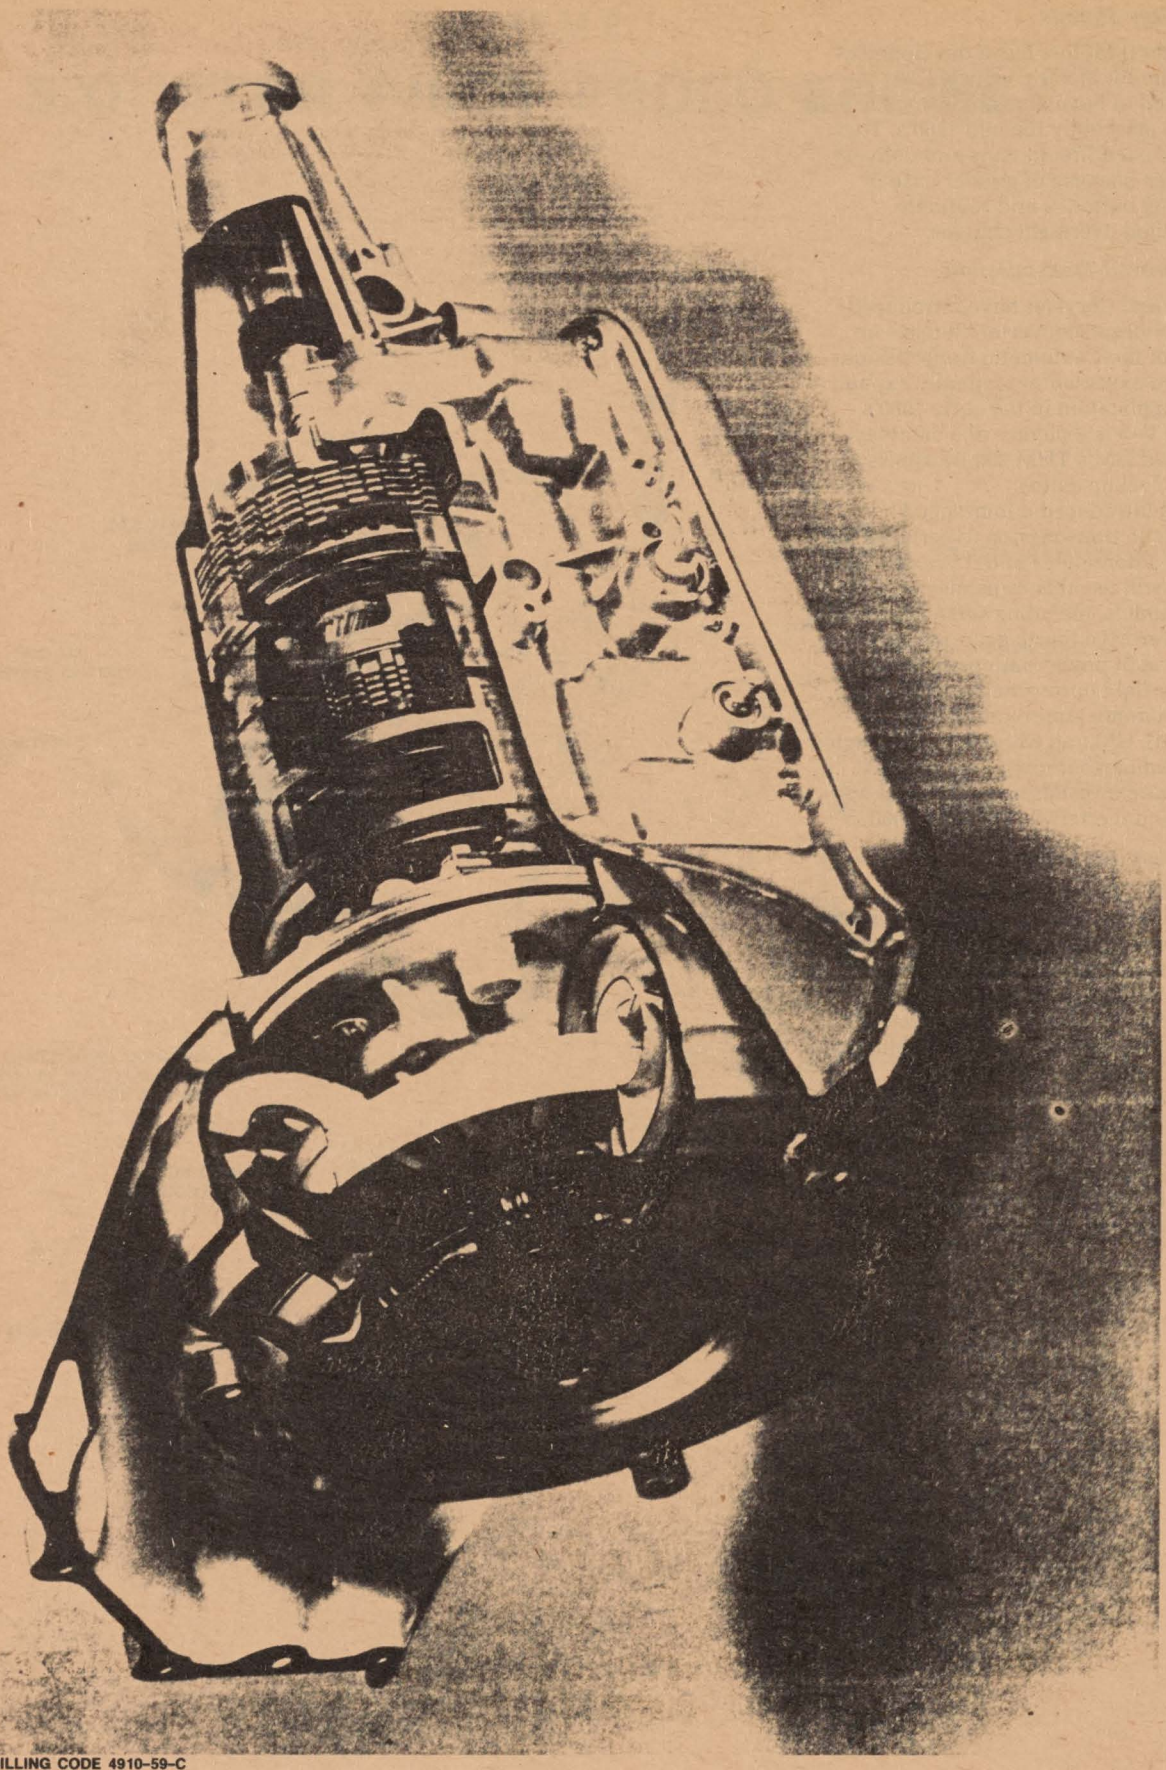


FIGURE V-3
THM 200 TRANSMISSION

BILLING CODE 4910-59-C

Because of the different functional requirements, substantial reduction in the size of standard light trucks is not expected. However, introduction of smaller, compact light truck models in addition to existing standard models is likely. These smaller models should give the option of better fuel economy to truck buyers who are giving more emphasis to that attribute.

2. *Front Wheel Drive.*—Closely associated with future downsizing will be the introduction of front wheel drive. Front wheel drive design for a given interior volume is significantly lighter than its rear wheel drive counterpart because it facilitates an overall more efficient packaging.

In April 1979, GM introduced front wheel drive in its new, downsized compact cars. General Motors' new X-cars show a 30 percent improvement in fuel economy over their 1979 counterparts. Approximately one half of this is estimated to result from weight reduction, while the other half is due to technological improvements. GM has announced its intention to extend the use of front wheel drive across a major portion of its product line by the mid-1980's. Chrysler Corporation (which already uses front wheel drive in its Omni/Horizon car, Figure V–4) has also announced its intention to convert all of its passenger car models to front wheel drive by 1985. Chrysler is expected to begin this conversion in earnest in 1981 with the introduction of a new front wheel drive compact. Ford is expected to introduce some front wheel drive models in the early 1980's; a similar trend for Japan's high volume small cars is likely.

BILLING CODE 4910-59-M

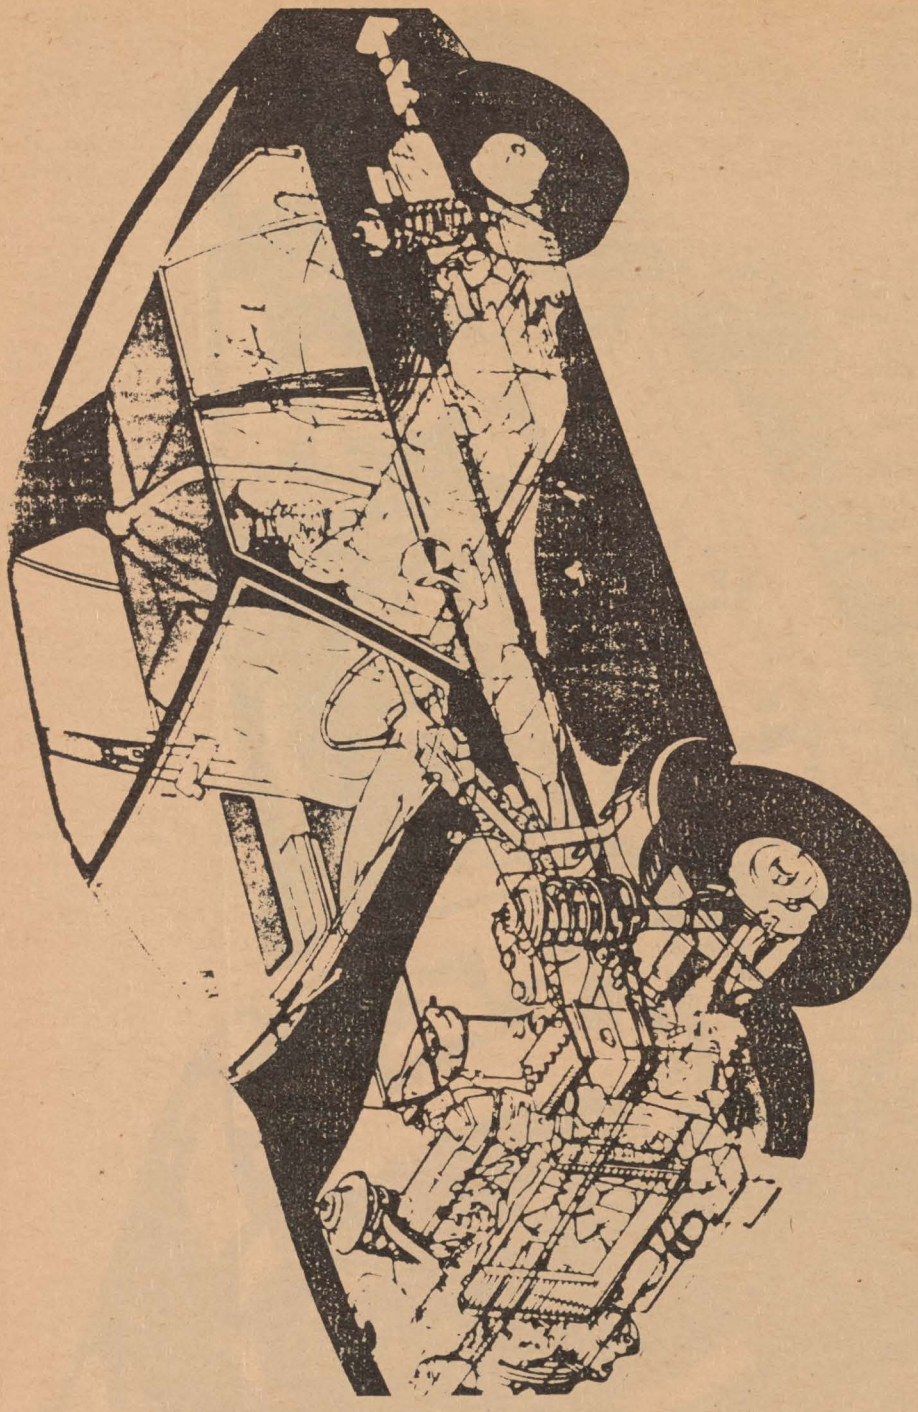

FIGURE V-4
FRONT WHEEL DRIVE OMNI

BILLING CODE 4910-59-C

3. *Material Substitution.*—Since 1975, the application of high strength low alloy steel, plastics and aluminum in place of heavier, conventional steel, cast iron and other materials, has increased substantially. For the most part, this increase has been accomplished by the more extensive use of the lighter materials in components where the success of their use had already been demonstrated. Weight reduction through materials substitution will be vigorously pursued by auto manufacturers as the implementation of further downsizing proves impractical.

H. *Computer-aided Design.*—All auto manufacturers are placing considerable emphasis on improved aerodynamics as a source of improved fuel efficiency. Advances in computer technology have made possible the application of computers in the creation and simulation of new automotive designs. These techniques will provide increased ability to design vehicles more as systems and will be capable of evaluating complex design parameters, including material substitutions. The applicability of computer-aided design has already been demonstrated through its use on one of the new 1980 compact model models on the market.

I. *Aerodynamics and Rolling Resistance.*—Aerodynamic drag will be reduced on the order of 20 percent in the early 80's as new more aerodynamically efficient body designs are introduced and/or aerodynamic add-on devices are employed. It may ultimately be possible to further reduce aerodynamic drag an additional 20 to 30 percent through "ground-up" design of bodies for minimum aerodynamic drag. Each 10 percent reduction in drag should result in an approximate 2–3 percent improvement in fuel economy. By the early eighties, rolling resistance will be reduced by 35 percent compared to today's average radial tire largely through the use of increased inflation pressures and construction materials exhibiting lower hysteretic losses (losses due to delays in the effects of changing forces). Even further reductions may be possible with still higher inflation pressures as improvements in suspension compliance permit. Each 10 percent reduction in rolling resistance should result in an approximate 1 to 2 percent improvement in fuel economy.

VI. Future Technology and Research and Development Activities

A. Overview of NHTSA Activities

As part of its program to promote research and development of fuel-efficient vehicles, NHTSA sponsored two conferences to exchange and disseminate information on automotive fuel economy research. One was the Agency's second Contractor's Coordination Meeting held December 11–13, 1978. The purpose of this conference was to present information on the content and results of contract research sponsored by NHTSA to support automotive fuel economy regulations. Six technical sessions were held:

- Fuel Economy and Emissions Considerations
- Motor Vehicle Demand Forecasting
- Consumer Research
- Engines
- Weight Reduction
- Industrial Behavior

NHTSA also sponsored the First International Automotive Fuel Economy conference held from October 31–November 2, 1979. This conference provided the opportunity for an international exchange of ideas between scholars and practitioners concerning matters of technology, economics and public policy relating to fuel economy. At the opening sessions, representatives from the leading automotive producing countries presented Government Status Reports on "Energy Use and Conservation Programs in the Automotive Transportation Sector."

Representatives from Japan, Italy, the United Kingdom, Canada, Sweden, France, Germany and the United States made presentations on their existing fuel economy programs, results thus far achieved, and future plans. Nine technical sessions were held and 51 papers were delivered. The major subject areas covered in the conference included:

- Future Powertrain Concepts
- A Systems Approach to Improved Fuel Economy
- Diesel Engine Technology
- Current Spark Ignition Engines
- Vehicle Design Materials
- Heavy Duty Trucks
- The Market and the Consumer
- Improved Transmission and Hybrid Vehicle concepts

All participating countries were supportive of the conference objectives of sharing ideas and progress on changing technologies and economic impacts concerning fuel economy. The conference encouraged efforts toward an international undertaking for energy conservation directed toward motor vehicles. There was unanimous agreement by representatives from all the countries that similar information exchanges in the future would be beneficial to all. The next conference will be hosted by another country in the fall of 1981 with subsequent conferences to occur every two years.

In addition, in February 1979, a conference on Basic Research directions for Advanced Automotive Technology was held in Boston, Massachusetts. The conference was funded by NHTSA and organized in cooperation with the Department's Transportation Systems Center. Its purpose was to obtain the views and advice of knowledgeable and interested scientists and engineers from various fields and institutions throughout the United States and the world. An examination of material presented suggested basic research needs in eight specific topics of engineering sciences. These topics are listed in Section C below. New technical knowledge in these topic areas has been lacking and hence impeding progress toward the evaluation of new automotive technology. The President agreed with the conclusions of this conference and proposed an allocation of $800 million for implementation of an industry/government cooperative program of basic research. The costs of the research are to be shared by both industry and government, each undertaking specific research projects and individually bearing their respective costs. Negotiations are currently in progress concerning the details of sharing arrangements.

In 1979, the NHTSA continued to expand its research capability to support its automotive fuel economy regulatory responsibilities. the Department of Transportation's Transportation Systems Center in Cambridge, undertook the bulk of the effort, under the general management of the NHTSA, through both in-house and contract research. Research continued in five general project areas:

- *Assessment of Automotive Technology*
- *Effects of Other Federal Standards on Fuel Economy*
- *Industrial Analysis*
- *Economic Analysis and Impact Evaluation*
- *Market Analysis and Impact Evaluation*

The primary activities were research and analysis in support of the revision of the 1981 light truck standards, assessment of manufacturers' capabilities to increase fuel economy for model years subsequent to 1985, and cost and manufacturability analysis in support of other motor vehicle standards and their effect on fuel economy.

In the technology area, research efforts have yielded several promosing avenues leading toward improved fuel economy. The most outstanding finding is that a turbocharged spark ignition four cylinder engine can achieve 32 mpg in a 3,000 pound vehicle. This can be

accomplished without a reduction in performance and moreover meets 1981 emissions standards. Research on weight reduction continues to hold promise, principally because of the substitution of lighter weight materials for conventional case iron and carbon steel. Thus, given the inverse relationship between vehicle weight and vehicle fuel economy, fuel efficient automobiles in the 40–50 mpg range are technologically feasible by 1995. Further transmission improvements also show promise. A step beyond the four-speed lockup transmission currently being produced by Ford is the continuously variable transmission which potentially offers a further 10 percent improvement in fuel economy. Altogether, research efforts are following an evolutionary pattern whereby continuous step by step progress toward fuel economy is being achieved.

Improvements in fuel efficiency of motor vehicles occasionally involves technological change which adversely impacts on the regulatory efforts of other federal agencies. When this occurs, there is need for cooperation among the agencies involved. An example is the diesel engine. This engine dramatically increases fuel economy but at the same time increase particulate emissions. To better understand the significance and ramifications of this problem, DOT, EPA and DOE have sponsored a joint study with the National Academy of Sciences on "The Research and Policy Implications of the Substitution of Diesel Engines in Future Light Duty Vehicles."

Since a cornerstone success criterion for attainment of fuel economy objectives rests upon technological innovation by the industry, it is also important to be aware of their progress and problems. NHTSA's ongoing activities here include a comprehensive data collection system at industry, firm and plant levels concerning production processes, costs, suppliers, capital needs for retooling and related data. This is supported by vehicle teardown studies and surrogate plant construction.

These, together with ongoing information collected directly from the industry, form the basis for measurement and analysis of such factors as (1) progress toward achieving technological objectives, (2) progress of innovational activity, (3) key technological breakthroughs affecting future fuel economy, (4) the flow of production and financial planning, and (5) the incidence of technical bottlenecks which may act to inhibit achievement of fuel economy regulations.

Research efforts continued to improve knowledge about several related economic considerations relevant to the implementation of the fuel economy standards. At the industry level, research was completed on the labor, materials and capital needed by the industry to meet fuel economy standards. Studies on consumer attitudes toward fuel efficient vehicles indicate that gasoline availability and rising prices are increasingly perceived to be a fact of life and that fuel economy is now a key influence on auto purchase decision making. This is verified by continual tracking of auto sales, scrappage and vehicle use. At the regional level, NHTSA's research capabilities were expanded to include the analysis of economic impacts associated with the implementation of the CAFE standards. The purpose is to determine the income and employment effects on the auto and other closely-associated industries.

B. Incentives for the Development of Advanced Technology

Although much progress has already been made, research and development efforts relating to fuel economy will take on even greater importance in coming years. Recent events concerning the international oil supply situation give new emphasis to the need for a concerted effort for even greater strides toward more fuel efficient vehicles.

As part of an intended research and development program to improve fuel economy, the President has proposed a 10 year $200 million program to conduct research and analysis to support NHTSA's rulemaking activities in fuel economy.[1] The emphasis of the proposed research effort is on technology assessment because technological change, together with its implementation across the entire motor vehicle industry, will be the key toward a successful program of fuel economy in the future.

Progress to date has been impressive; in fact, there are now prototypes of automobiles which achieve greater than 50 mpg. Still, the widespread adoption of these vehicles might require changes in lifestyles for many people.

The President's program, which is designed to cover technologies which could be implemented in a moving timeframe 7–15 years into the future, would focus research in three primary areas: Engine and Powertrains; Structural Design Improvement, and Fuel Efficient Prototype Vehicle Development.

The study of improved engine and drivetrain components and system would focus on emissions control technology for diesel engines in automobiles and light trucks, a new family of direct injection diesels for light duty applications, an optimized gasoline spark ignition engine, advanced transmissions and controls for passenger cars and light trucks, and advanced engines for heavy trucks and buses.

The assessment of structural design improvments would study new structural concepts and the opportunity for weight reduction through redesign and materials substitution. Also, the durability and mass producibility of new structures and substitute materials would be analyzed. Finally, the third area of study would concentrate on the integration of advanced concepts into particular vehicle types such as the two-passenger urban vehicle and the commercial pickup truck.

The fulfillment of energy conservation objectives will require an investigation of all technological options. The President's program will enable a detailed analysis of every technological alternative for possible application to motor vehicles. This will also provide for a fuel economy improvement which is progressive but at the same time realistic. Clearly there is still much work to be done and many benefits to be gained by devoting more time and resources toward improved fuel efficiency of motor vehicles. Given that passenger cars and trucks consume about 82.5 percent of the energy used in transportation, these efforts are likely to yield substantial energy conservation benefits. The President's program will provide badly needed resources to strengthen this effort. It will provide the Department of Transportation with the opportunity to increase its research activities in those areas of technology which remain promising, but questionable for near-term implementation. The Department anticipates that such technololgy implementation will be encouraged through its participation and leadership in this program.

C. Development of Advanced Technology

To date, the automobile industry has concentrated its efforts and resources on applied technology to satisfy near-term federal standards for fuel economy, emission control, and safety. Relatively few incremental modifications have been made to the existing scientific knowledge base, which must be

[1] Transportation Energy Efficiency Act, 1979, Title IV, Fuel Economy Technology Assessment (Proposed Legislation).

expanded to underpin the engineering for the automobile of the 1990's and beyond.

At the federal level, there has been only limited emphasis on basic automotive research. A number of federal statutes have directed government involvement in automotive technology, related to setting emission and safety standards and energy conservation policies. Current government automotive technology programs are primarily development and demonstration efforts focused on specific technological options for engines, emission control systems, safety systems, and alternative fuels.

A proposed Department of Transportation Cooperative Automotive Research Program seeks to overcome decades of inattention to the need for replenishing the basic science and engineering foundations of automotive technology. It would develop a substantial body of basic research aimed at fundamentally improving automotive technology for the development of more fuel-efficient and socially acceptable automobiles during and beyond the 1990's.

This basic research program would expand the technological foundations for new engineering needed to improve fuel economy and produce socially acceptable automobiles beyond the mid-1980's. Incremental modifications to existing technology will enable the automobile industry to meet near-term requirements for energy conservation, but the long-term goal of decreased reliance on imported oil depends on fundamental technological advancements in automotive engineering and design.

The proposed Cooperative Automotive Research Program will involve joint industry-government funding and planning. The President included $800 million for a directed program of basic research in his proposed $16.5 billion Energy Efficiency Program for encouraging mass transit and automobile initiatives. A range of university, industry, and federal laboratories will perform the research to ensure independent sources of new ideas. Personnel exchanges among the laboratories will maintain the flow of information and the transfer of new engineering knowledge. The Secretary of Transportation will establish a new office of basic automotive research under his direct guidance to administer the Department's part of the program.

The major research areas indentified at this time include the following technical disciplines:

- Thermal and fluid sciences
- Structural mechanics
- Electrochemistry
- Aerodynamics
- Materials science and processing
- Control systems
- Friction and wear
- Acoustics and vibration

The program will provide new sources of ideas and innovation by broadening the automotive research community. It will stimulate competition by making new ideas readily available at the same time it trains additional automotive scientists and engineers.

BILLING CODE 4910-59-M

DEPARTMENT OF THE TREASURY

Office of the Secretary

Privacy Act of 1974; Revised System of Records

AGENCY: Office of the Secretary, Department of the Treasury.

ACTION: Notice of intent to revise Privacy Act systems of records.

SUMMARY: Pursuant to the requirements of the Privacy Act of 1974 (5 U.S.C. 552a) the Assistant Director (Telecommunications Management) gives notice of the proposed change in the system location for Treasury/OS 00.193 (44 FR 48411, August 17, 1979), Employee Locator and Automated Directory System. The data will now be maintained on Treasury owned and operated equipment located in the Main Treasury Building. Adequate safeguards will continue to be maintained and the security will be increased since access will be limited to designated Treasury personnel.

DATES: Public comments on this system are not required since this change in location is not an expansion of the system. The amended system location will become effective April 1, 1980.

ADDRESS: Department of the Treasury, Office of Administrative Programs, Telecommunications Management, Mezzanine Floor, 1331 G Street, N.W., Washington, D.C. 20220.

FOR FURTHER INFORMATION CONTACT: Mr. Harold R. Patterson, Assistant Director (Telecommunications Management), Department of the Treasury, 1331 G Street, N.W., Mezzanine Floor, Washington, D.C., 20220, 202-376-0413.

Dated: March 24, 1980.

W. J. McDonald,

Assistant Secretary (Administration).

Treasury/OS 00.193

SYSTEM NAME:

Employee Locator and Automated Directory System.

SYSTEM LOCATION:

(1) Employee Locator: Main Treasury Building, 15th and Pennsylvania Avenue, N.W., Washington, D.C. 20220. (2) Automated Directory System: Main Computer—Main Treasury Building, 15th and Pennsylvania Avenue, N.W., Washington, D.C. 20220.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

All Department of the Treasury employees located in the Washington, D.C., Metropolitan Area.

CATEGORIES OF RECORDS IN THE SYSTEM:
