DEPARTMENT OF AGRICULTURE

Commodity Credit Corporation

7 CFR Part 1421

Grains and Similarly Handled Commodities; 1980 and Subsequent Crops Peanut Farm-Stored Loan and Purchase Program

AGENCY: Commodity Credit Corporation, USDA.

ACTION: Final rule.

SUMMARY: The purpose of this rule is to make minor changes that will remove detailed operating procedures from the existing regulations. These procedures are subject to change on an annual basis and will, therefore be published in the annual crop supplement. This rule is necessary in order to eliminate the necessity of an annual amendment to the program regulations and to provide continuity of this program with respect to other programs subject to the General Regulations in Part 1421.

EFFECTIVE DATE: February 2, 1981.

FOR FURTHER INFORMATION CONTACT: Harold L. Jamison, Price Support and Loan Divison, ASCS, USDA, 3747-South Building, P.O. Box 2415, Washington, D.C. 20013, (202) 447-7973. A Final Impact Statement describing the program options is available upon request from Gypsy Banks, (ASCS), (202) 447-6733.

SUPPLEMENTARY INFORMATION: This final action has been reviewed under USDA procedures established in Secretary's Memorandum 1955 to implement Executive Order 12044 and has been classified "not significant." A notice of proposed rulemaking was published in the **Federal Register** on December 4, 1979 (44 FR 69656) in accordance with 5 U.S.C. 533 and Executive Order 12044 stating that the Secretary was preparing to make determinations and issue regulations relative to a loan and purchase program for 1980 crop peanuts. Such determinations were to include operational provisions needed to carry out the program. No comments were received concerning the operational provisons. In compliance with Secretary's Memorandum No. 1955 and "Improving USDA Regulations" (43 FR 50988), initiation of review of those regulations contained in 7 CFR 1421.280.292 for need, currrency, clarity and effectiveness will be made within the next five years. The title and number of the federal assistance program that this final rule applies to is:

(Title: Commodity Loans and Purchases (D.E); Number: 10.051 as found in the Catalog of Federal Domestic Assistance)

This action will not have a significant impact specifically on area and community development. Therefore, review as established by OMB Circular A-95 was not used to assure that units of local government are informed of this action.

Final Rule

Accordingly, the General Regulations Governing Price Support for 1978 and Subsequent Crops in this Part 1421 are supplemented as stated herein for the 1980 and subsequent crops peanut farm-stored loans and purchases. The material previously appearing in this subpart remains in full force and effect as to the crops to which it was applicable. Effective for the 1980 crop of peanuts, the regulations in 7 CFR 1421.280 through 1421.292 and the title of the subpart are amended to read as follows:

The storage deduction for early delivery provided for in § 1421.22(g) of the general regulations shall be at the rate specified in the storage contract (Form CCC–1028A, Peanut Receiving and Warehouse Contract for Commercial Storage) of the warehouse where delivered. The deduction shall be from the date delivery is accomplished to, and including, the original loan maturity date. The storage deduction charge for early delivery shall not be applicable to any additional peanuts delivered to the association in accordance with § 1421.290 of this subpart.

§ 1421.285 Determination of quantity.

The quantity of peanuts placed under farm-stored peanut loans shall be determined in accordance with § 1421.17 of the general regulations and shall be expressed in units of tons and tenths of tons. Notwithstanding the provisions of § 1421.17 of the general regulations, loans shall be made on 100 percent of the estimated quantity of additional peanuts.

§ 1421.286 Price support rates.

(a) *Quota peanuts.* Loans and purchases on quota peanuts shall be at the basic quota price support loan rate for that type farmers stock peanuts as set forth in the annual peanut crop supplement to the regulations in this subpart.

(b) *Additional peanuts.* Loans on additional peanuts shall be made on the basis of a percent of the basic quota price support loan rate for that type farmers stock peanuts as set forth in the annual peanut crop supplement to the regulations in this subpart.

§ 1421.287 Delivery charge and other charges.

(a) *Delivery charge.* A delivery charge as determined by CCC will be made for the quantity of peanuts acquired by CCC as a result of a loan or purchase and shall be handled in accordance with § 1421.11 of the general regulations.

(b) *Other charges.* CCC will not pay storage or handling charges on any peanuts under farm storage loans.

§ 1421.288 Maturity of loans.

Farm-stored peanut loans will mature on demand but not later than the date specified in the annual peanut crop supplement to the regulations in this subpart.

§ 1421.289 Producer-handler purchases of additional peanuts under loan.

(a) *General.* Producer-handlers may at any time before loan maturity, forfeit their additional peanuts to CCC and immediately repurchase such peanuts from CCC by paying the amount necessary under the following sales policies:

(1) For unrestricted use, at 105 percent of the quota loan rate, if purchased before December 31 of the calendar year in which the crop was grown, and at 107 percent of the quota loan rate, if purchased after December 31 of the calendar year in which the crop was grown.

(2) For edible export, at the applicable sales price as set forth in 7 CFR 1446.34.

(3) For crushing (either domestic or export), at the additional support level.

(b) *Purchases before January 25 following the calendar year in which the crop was grown.* If the producer-handler purchases his additional peanuts by January 25 following the calendar year in which the crop was grown, the county committee shall determine the sale price under the appropriate sales policy specified in subparagraph (a). Loans will be settled at the county office, and amounts collected in excess of that necessary to settle loans will be sent to the association for the respective area. The association will place the net gains and producer's names in an appropriate pool.

(c) *Purchases after January 25 following the calendar year in which the crop was grown.* The county committee shall determine the sale price under the appropriate sales policy specified in subparagraph (a). Any amount collected in excess of the loan indebtedness shall accrue to CCC.

§ 1421.290 Transfer of producer's farm stored loan on additional peanuts to warehouse stored association loan.

Producers may deliver additional peanuts under a farm stored loan to the association and obtain loan advances on such additional peanuts with the prior approval of the county office anytime prior to January 25 following the calendar year in which the crop was grown. Association advances shall be payable jointly to the producer and the county office and shall be used to settle the farm stored loan.

§ 1421.291 Required producer-handler records and supervision of farm stored additional peanuts under loan or purchased by producer-handler under loans.

(a) *Required records.* Each producer-handler shall maintain records as required in 7 CFR Part 1446 for all additional peanuts which are purchased and sold on which an MQ–94 is issued. The following records shall be maintained for all peanuts purchased from CCC which are not inspected. Each producer-handler shall maintain records which show all sales and other disposals of peanuts. Such records shall show date of sale, quantity, type, and to whom sold. Records shall be maintained in such a manner which will enable the county office to readily reconcile quantities sold with all peanuts produced by the producer. All records shall be maintained for a period of three years following the end of the marketing year in which the peanuts were produced.

(b) *Supervision of farm-stored peanuts. (1) Under loan.* The county office shall inspect and account for all additional peanuts under loan as determined necessary by the county committee.

(2) *Additional peanuts purchased for use as seed and not inspected.* The county office shall supervise the disposition of all additional peanuts purchased for use as seed and not inspected. The identical peanuts under loan must be disposed of and the

producer must account for all peanuts which were under additional loan. The producer-handler shall request a county office representative to supervise the disposition of the peanuts and shall give the county office at least 3 working days notice. The county office shall determine to what extent supervision is needed.

(3) *Additional peanuts on which MQ-94 is issued.* The producer-handler shall be subject to all provisions in Part 1446 relating to disposal of additional peanuts.

(c) *Costs of supervision.* The producer-handler shall pay all costs of supervision as determined by the county committee for county office supervision when county supervision is completed and by the association for peanuts supervised by association representatives when association supervision is completed.

(d) *Penalties.* In the event that the producer-handler disposes of more additional peanuts pledged for loan than purchased in accordance with § 1421.289, the producer-handler shall be subject to a penalty equal to 120 percent of the quota loan rate on such peanuts.

§ 1421.292 Settlement.

(a) *General.* Settlement for eligible peanuts acquired by CCC under a loan or purchase will be made with the producer as provided in paragraphs (a), (d), (e), (j), and (k) of § 1421.22 of the general regulations and in this section.

(b) *Settlement values. (1) General.* The settlement value of the peanuts acquired by CCC shall be the amount computed on the basis of the net weight and quality thereof, an allowance of four-tenths of a cent ($0.004) per pound, net weight, to compensate the producer for shrinkage during storage and less discounts of (i) $2 per ton, net weight for each full 1 percent of foreign material in excess of 10 percent, and (ii) $10 per ton, net weight, for peanuts containing more than 10 percent moisture.

(2) *Values for quota peanuts.* The settlement value for quota peanuts shall be the applicable quota support rates including premiums and discounts as provided in the annual peanut crop supplement to the regulations in this subpart except that the additional support rate shall be used (i) for any peanuts for a farm delivered by a producer to CCC which, when added to the peanuts otherwise marketed or considered marketed from the farm as quota peanuts, would exceed the farm poundage quota if CCC determines that the producer made an inadvertent error in determining the loan quantity (If such excess quantity was not due to an inadvertent error, such quantity shall not be accepted and shall be subject to marketing quota and/or poundage quota penalties as set forth in 7 CFR Part 729), or (ii) for all peanuts which do not grade Segregation 1 at time of delivery, if the producer does not elect to settle such additional loan peanuts as quota peanuts. If the producer elects to settle such peanuts as quota peanuts, the quantity shall not exceed the smaller of the difference between the production of Segregation 1 peanuts on the farm and the farm poundage quota or the undermarketing of quota peanuts shown on the farm marketing card.

(3) *Values of additional peanuts.* The settlement value for additional peanuts shall be the applicable additional support rate including the premiums and discounts as provided in the annual crop supplement to the regulations in this subpart.

FEDERAL RESERVE SYSTEM

12 CFR Part 204

[Docket No. R-0337; Reg. D]

Reserve Requirements of Depository Institutions; Quarterly Deposit Reporting and Reserve Maintenance

AGENCY: Board of Governors of the Federal Reserve System.

ACTION: Final rule.

SUMMARY: The Board of Governors has amended Regulation D—Reserve Requirements of Depository Institutions (12 CFR Part 204) to extend the lag between the last day of the reserve computation period and the first day of the corresponding reserve maintenance period from eight to 22 days for depository institutions subject to the quarterly procedure for filing deposit data used to compute required reserves. In addition, for nonmember depository institutions, the beginning of the reserve maintenance period associated with the first quarterly reserve computation period is being deferred from January 29, 1981, until March 19, 1981. These actions will facilitate the implementation of the quarterly reporting and reserve maintenance procedures by relieving operational burden for depository institutions and for Federal Reserve Banks.

EFFECTIVE DATE: January 15, 1981.

FOR FURTHER INFORMATION CONTACT: Martha Bethea, Assistant Director (202/452-3181), or William R. Jones, Section Chief (202/452-3822), Division of Research and Statistics; Gilbert T. Schwartz, Assistant General Counsel (202/452-3625), or Paul S. Pilecki, Attorney (202/452-3281), Legal Division, Board of Governors of the Federal Reserve System, Washington, D.C. 20551.

SUPPLEMENTARY INFORMATION: The Board of Governors has amended its Regulation D—Reserve Requirements of Depository Institutions (12 CFR Part 204) to revise the procedure for the filing of quarterly reports applicable to depository institutions that have less than $15 million in total deposits.[1] Under the amendment, the lag between the last day of the seven-day deposit reporting period ("computation period") and the first day of the period during which reserves are required to be held ("reserve maintenance period") is extended from eight to 22 days for all depository institutions subject to the quarterly reporting procedure. In addition, for the first quarterly report by nonmember depository institutions in January 1981, the beginning of the corresponding reserve maintenance period has been deferred from January 29, 1981 until March 19, 1981.

Under Regulation D, as depository institution with total deposits of less than $15 million as of December 31, 1979, is eligible for a quarterly procedure of reporting its deposits and maintaining required reserves. This procedure is intended to reduce the reporting and reserve management burden of smaller depository institutions and to reduce the reserve requirement processing burden of the Reserve Banks. (Edge and Agreement Corporations and U.S. branches and agencies of foreign banks, however, are not eligible for quarterly reporting and reserve maintenance.) Institutions eligible for the quarterly reporting and maintenance procedure complete and file the Report of Transaction Accounts, Other Deposits and Vault Cash (FR 2900) with the Federal Reserve only once during each

[1] The Board has deferred reserve requirements of nonmember depository institutions that have less than $2 million in total deposits as of December 31, 1979, until May 1981. At that time, the Board will determine whether a further deferral is warranted.

calendar quarter and maintain required reserves over a subsequent three-month period based on the report filed. The period during which reserves will be maintained has been revised under the Board's action so that the reserve maintenance period will begin on the fourth Thursday after the close of the reserve computation period and will end on the third Wednesday after the end of the reporting institution's next reserve computation period. Reserve balances to be held at the Federal Reserve over the three-month maintenance period, either directly or indirectly on a pass-through basis, will equal required reserves as computed based on the deposit report for the computation period less daily average vault cash held during the computation period. An institution is required to maintain reserve balances at its required level on a daily average basis for each week during the quarterly reserve maintenance period. The Board believes that this revised procedure will facilitate reporting and reserve management for smaller institutions.

In order to facilitate further the implementation of the quarterly reporting procedure, the Board has determined to defer the beginning of the first quarterly reserve maintenance period for nonmember depository institutions until March 19, 1981. The Board believes that this one-time deferral is appropriate to provide an additional period of adjustment because of the large volume of reports that will be collected for the first quarterly computation period.

After the first reporting period in January 1981, quarterly reporting will be staggered so that each month one-third of all quarterly reporters will report data for a seven-day period. Since the maintenance period for the January report will not begin until March, the staggered reporting cycle will commence during that month.

The one-time deferral of the reserve maintenance period will not apply to member banks. As currently scheduled, a member bank subject to quarterly reserve reporting will, beginning January 29, 1981, maintain reserves based on deposits and vault cash held during the January 15–21, 1981, reserve computation period. This requirement will be fixed until the beginning of the member bank's next maintenance period which will begin 22 days after the close of its next reserve computation period. All member banks will continue to report reserve requirement data on a weekly basis through the reserve computation period ending on January 21, 1981. The increase in the lag between the end of the computation period and the start of the reserve maintenance period will not apply to a member bank until its first reserve computation period after January 1981. Staggered quarterly reporting by member banks that have less than $15 million in total deposits will begin in March 1981.

The Board believes that these modifications will be more equitable to depository institutions and also will help to minimize the burden associated with maintaining required reserves. In order to provide sufficient time for depository institutions to prepare for these changes, and because the amendment relaxes a regulatory restriction, the Board, for good cause finds that the notice, public procedure, and deferral of effective date provisions of 5 U.S.C. 553(b) with regard to this action are impracticable and contrary to the public interest.

Effective January 15, 1981, pursuant to the Board's authority under section 19 of the Federal Reserve Act (12 U.S.C. 461 *et seq.*), Regulation D (12 CFR Part 204) is amended by revising subparagraph (2) of § 204.3(d) to read as follows:

§ 204.3 Computation and maintenance.

* * * * *

(d) *Special rule for depository institutions that have total deposits of less than $15 million.* * * *

(2) Required reserves are computed on the basis of the depository institution's daily average deposit balances during the seven-day computation period. In determining the reserve balance that a depository institution is required to maintain with the Federal Reserve, the average daily vault cash held during the computation period is deducted from the amount of the institution's required reserves. The reserve balance that is required to be maintained with the Federal Reserve shall be maintained during a corresponding period that begins on the fourth Thursday following the end of the institution's computation period and ends on the third Wednesday after the close of the institution's next computation period. Such reserve balance shall be maintained in the amount required on a daily average basis during each week of the quarterly reserve maintenance period.

Secretary of the Board.

[Docket No. 76-NE-25; Amdt 39-4031]

General Electric Company CT58 Turboshaft Engines; Airworthiness Directives

AGENCY: Federal Aviation Administration (FAA) DOT.

ACTION: Revocation of airworthiness directive.

SUMMARY: Amendment 39-2702 (41 FR 36488) AD 76-17-09 reduced the cyclic and hourly life limits of certain compressor rear shafts in CT58 engines used in external lift operations. Amendment 39-3610 (44 FR 72103) AD 79-23-04 requires a more representative method of counting cycles for General Electric CT58 engines used for repetitive heavy-lift operation. As amendment 39-3610 accomplishes the same objectives as 39-2702, the latter is redundant and is being revoked.

EFFECTIVE DATE: February 9, 1981.

FOR FURTHER INFORMATION CONTACT: Ralph S. Hawkins, Engine Projects Section (ANE-214E), Engineering and Manufacturing Branch, Flight Standards Division, Federal Aviation Administration, New England Region, 12 New England Executive Park, Burlington, Massachusetts 01803; telephone (617) 273-7337.

SUPPLEMENTARY INFORMATION:

Prior Regulatory History

This amendment revokes amendment 39-2702 (41 FR 36488) AD 76-17-09 which reduced the cyclic and hourly life limits of certain compressor rear shafts in CT58 engines used in external lift operations.

Amendment 39-3610 (44 FR 72103) was issued on December 13, 1979, to remove rotating components from use prior to the accumulation of an excessive number of cycles which could cause component failure. The FAA has determined that amendment 39-3610 accomplishes the objectives of amendment 39-2702, AD 76-17-09, and imposes requirements beyond the scope of AD 76-17-09. Therefore, in accordance with its policy to eliminate redundant regulations the FAA is revoking AD 76-17-09.

Adoption of the Amendment

Accordingly, pursuant to the authority delegated to me by the Administrator, Section 39.13 of Part 39 of the Federal Aviation Regulations (14 CFR 39.13) is amended by revoking amendment 39-2702 (41 FR 36488) AD 76-17-09. This

revocation becomes effective February 9, 1981.

(Secs. 313(A); 601, 603, Federal Aviation Act of 1958, as amended (49 U.S.C. 1354(a), 1421, 1423); Sec. 6(c), Department of Transportation Act (49 U.S.C. 1655(c)); 14 CFR 11.89)

Note.—The FAA has determined that this document involves a regulation which is not significant under Executive Order 12044, as amended, on June 27, 1980, by Executive Order 12221, as implemented by DOT regulatory policies and procedures (44 FR 11034; February 26, 1979). Since this regulatory action relieves a duplicate requirement, and imposes no additional burden on any person, the anticipated impact is so minimal that it does not warrant preparation of a regulatory evaluation.

Issued in Burlington, Massachusetts on January 21, 1981.

Director, New England Region.

Publication of Prescribed Maximum Lawful Prices Under the Natural Gas Policy Act of 1978

AGENCY: Federal Energy Regulatory Commission, DOE.

ACTION: Final rule.

SUMMARY: Pursuant to the authority delegated by 18 CFR § 357.307(1), the Director of the Office of Pipeline and Producer Regulation revises and publishes the maximum lawful prices prescribed under Title I of the Natural Gas Policy Act (NGPA) for the months of February, March and April, 1981. Section 101(b)(6) of the NGPA required that the Commission compute and publish the maximum lawful prices before the beginning of each month for which the figures apply.

EFFECTIVE DATE: January 27, 1981.

FOR FURTHER INFORMATION CONTACT: Kenneth A. Williams, Director, OPPR, (202) 357-8500.

January 26, 1981.

Section 101(b)(6) of the Natural Gas Policy Act of 1978 (NGPA) requires that the Commission compute and make available maximum lawful prices and inflation adjustments prescribed in Title I of the NGPA before the beginning of any month for which such figures apply.

Pursuant to this requirement and § 375.307(1) of the Commission's regulations, which delegates the publication of such prices and inflation adjustments to the Director of the Office of Pipeline and Producer Regulation, the maximum lawful prices for the months of February, March and April, 1981, are issued by the publication of the price tables for the applicable quarter. Pricing tables are found in § 271.101(a) of the Commission's regulations. Table I of § 271.101(a) specifies the maximum lawful prices for gas subject to sections 102, 103, 106(b)(1)(B), 107(c)(5), 108, and 109 of the NGPA. Table II of § 271.101(a) specifies the maximum lawful prices for sections 104 and 106(a) of the NGPA. Table II of § 271.101(a) contains the inflation adjustment factors.

Kenneth A. Williams,

Director, Office of Pipeline and Producer Regulation.

§ 271.101 [Amended]

Employment Taxes: Advance Payments of Earned Income Credit

AGENCY: Internal Revenue Service, Treasury.

ACTION: Final regulations.

SUMMARY: This document contains final Employment Tax Regulations relating to advance payments of the earned income credit. Statutory provisions relating to these advance payments were added to the Internal Revenue Code of 1954 by the Revenue Act of 1978. These final regulations provided employees eligible for advance payments of earned income credit and their employers with the guidance needed to comply with the new law.

DATE: This document and the regulations prescribed herein are effective with respect to wages paid after March 4, 1981.

FOR FURTHER INFORMATION CONTACT: Eileen Murphy of the Legislation and Regulations Division, Office of Chief Counsel, Internal Revenue Service, 1111 Constitution Avenue, NW., Washington,

D.C. 20224 (Attention: CC:LR:T, 202-566-3297).

SUPPLEMENTARY INFORMATION:

Background

On May 9, 1979, the **Federal Register** published proposed amendments to the Employment Tax Regulations (26 CFR Part 31) under section 3507 of the Code, as well as temporary regulations (26 CFR Part 38) which contained the same rules. A public hearing was held on November 13, 1979. After consideration of all comments regarding the proposed amendments, those amendments are adopted as revised by this Treasury decision.

The effectiveness of these regulations will be evaluated on the basis of comments and information received from the public, other Government agencies, and offices within the Treasury Department and Internal Revenue Service.

Explanation of Provisions

Section 3507 provides, generally, that every employer paying wages after June 30, 1979, to an employee with respect to whom an earned income credit advance payment certificate is in effect must, at the time of paying the wages, also pay the employee the advance earned income credit amount of that employee. The regulations contain provisions relating to the definition of the terms "employee" and "wages", determination of the advance earned income credit amount, treatment of the advance earned income credit amount as payment of income tax withholding and FICA taxes, and failure to make advance payments. In addition, the regulations prescribe the content of earned income credit advance payment certificates and provide rules for determining when a certificate takes effect and how it may be revoked.

Changes in the Regulations

The proposed regulations provided that all employees receiving wages subject to income tax withholding or FICA taxes were eligible to receive advance payments of the earned income credit. The final regulations, however, provide that employers of agricultural workers paid on a daily basis are not required to make advance payments to these workers. This change reflects the following legislative history to Code section 3507: "The committee believes that the Secretary should interpret the statute in a manner that will address the problems which occur in giving advance payments to agricultural workers in the field. Specifically, the committee believes that employers should not be required to make advance payments to these workers when they are paid on a daily basis because of the administrative difficulties employers would encounter in trying to maintain a list of all workers who had filed advanced payment certificates and, in having each day, every crew leader compare the name of every worker being paid to the names on this list. Since these workers are not now subject to mandatory income tax withholding, employers are not required to consult similar records (*i.e.*, withholding allowance certificates) in computing net pay. In view of the potential administrative burden, the committee believes that employers should not be required to make advance payments to these workers paid on a daily basis and not subject to mandatory income tax withholding." Senate Finance Committee Report on the Technical Corrections Act of 1979 (S. Rep. No. 96-498, 96th Cong., 1st Sess. at 13-14 (1979)).

The proposed regulations also contained provisions concerning additions to tax and penalties applicable to employers who fail to make advance payments. The final regulations have been modified to clarify these provisions. The revised provisions make it clear that an employer is liable for penalties if the employer has not properly withheld and deposited the applicable income taxes or FICA taxes (or both) and has not made the required advance payments.

Comments and Changes Due to Comments

Many of the comments received from employers spoke of the administrative burden or expense imposed on employers by the required payment of advance earned income credit amounts. No changes to the regulations were made in response to these objections, since the regulations impose no burdens not required by section 3507 of the Code.

Two comments expressed concern about an employee who receives excess advance payments of the earned income credit and must repay (to the government) the amount of this excess with the employee's income tax return after year end. A provision has been added to the regulations (§ 31.3507-1(b)) that permits, but does not require, an employer to stop making advance payments to an employee who has received at least $10,000 of earned income from the employer during the calendar year, for the reason that such an employee would not, under present law, be eligible for the earned income credit.

A comment addressed the provision in the regulations (§ 31.3507-2(d)(2)) that states that an invalid certificate (*e.g.*, one that is not signed) filed in revocation of a prior certificate is effective to revoke the prior certificate, but in all other respects is a nullity. The comment objected to this provision, arguing that such a certificate, if invalid, should be invalid for all purposes. This provision (§ 31.3507-2(d)(2)) was changed in the final regulations to provide that an invalid certification would not operate to revoke a prior certificate. Thus, the prior certificate would remain fully in effect, unless, as provided in § 31.3507-2(b)(2), it were considered invalid because the employee had clearly so indicated by an oral or written statement to the employer.

Drafting Information

The principal author of this regulation is Eileen Murphy of the Legislation and Regulations Division of the Office of Chief Counsel, Internal Revenue Service. However, personnel from other offices of the Internal Revenue Service and Treasury Department participated in developing the regulation, both on matters of substance and style.

Adoption of Amendments to the Regulations

Accordingly, the amendments to 26 CFR Part 31 published as a notice of proposed rulemaking in the **Federal Register** for May 9, 1979 (44 FR 27183, 27089) are adopted as proposed, except that certain revisions and additions are made as set forth below. Also, the Temporary Employment Tax Regulations under the Revenue Act of 1978 (26 CFR Part 38) are hereby deleted. These actions are effective with respect to wages paid after March 4, 1981.

Paragraph 1. Section 31.3507-1, as proposed, is amended by revising paragraphs (a)(1), (b), and (c)(4) to read as follows:

§ 31.3507-1 Advance payments of earned income credit.

(a) *General rule*—(1) *In general.* Every employer paying wages after June 30, 1979, to an employee with respect to whom an earned income credit advance

payment certificate is in effect must, at the time of paying the wages, also pay the employee the advance earned income credit amount of that employee. For the purposes of applying this section and § 31.3507–2—

(i) In the case of an individual who receives wages which are subject to income tax withholding, the term "employee" has the same meaning as set forth in section 3401(c) and the regulations thereunder, and the term "wages" has the same meaning as set forth in sections 3401(a) and 3402(e) and the regulations under those sections; and

(ii) In the case of an individual who does not receive wages which are subject to income tax withholding, but who receives wages which are subject to employee FICA taxes, the term "employee" has the same meaning as set forth in section 3121(d) and the regulations thereunder and the term "wages" has the same meaning as set forth in section 3121(a) and the regulations thereunder.

An individual not having wages subject to either income tax withholding or employee FICA taxes is not entitled to advance payments of the earned income credit. Moreover, notwithstanding subdivisions (i) and (ii) of this paragraph (a)(1), employers are not required to pay advance earned income credit amounts to agricultural workers paid on a daily basis. For this purpose an "agricultural worker" is an employee who performs "agricultural labor", as that term is defined in section 3121(g) and the regulations thereunder.

* * * * *

(b) *Advance earned income credit amount.* The advance earned income credit amount of an employee is determined, with respect to any payroll period, on the basis of the employee's wages from the employer for the period and in accordance with the advance amount tables prescribed by the Commissioner of Internal Revenue and then in effect for the payroll period. See, however, paragraph (c)(2) of this section. The advance amount paid is reflected on the employee's W–2 form as a separate item (and neither as a reduction of withholding nor an increase in compensation). For purposes of applying this section and § 31.3507–2, the term "payroll period" has the meaning set forth in section 3401(b) and the regulations thereunder. As required by section 3507(c)(2)(A), these advance amount tables must be similar in form to, and coordinated with, the tables prescribed under section 3402 (relating to income tax collected at the source). Sections 3507(c)(2)(B) and 3507(c)(2)(C) provide, respectively, separate rules for the treatment in the advance amount tables of the advance earned income credit of the following two separate classes of employees:

(1) Employees who are not married (within the meaning of section 143), or employees whose spouses do not have an earned income credit advance payment certificate in effect; and

(2) Employees whose spouses have an earned income credit advance payment certificate in effect.

If during the calendar year an employer has paid an employee amounts of earned income, within the meaning of section 43(c)(2)(A)(i), which in the aggregate equal or exceed $10,000, the employer need not make further payments of advance earned income credit to the employee during that calendar year.

(c) *Payment of advance earned income credit amount as payment of withholding and FICA taxes.* * * *

(4) *Failure to make advance payments.* The failure to pay an employee, at the time required by paragraph (a)(1) of this section, all or any part of an advance earned income credit amount as required by this section is treated, for all purposes including penalties, as a failure by the employer as of that time to deduct and withhold under chapter 24 of the Internal Revenue Code of 1954 an amount equal to the advance amount (or part thereof) not paid. This treatment applies to the failure to pay an advance amount to an eligible employee without regard to whether the employee is ultimately not entitled to claim the earned income credit (in full or in part) on a return for the year, so long as the employee has a valid earned income credit advance payment certificate in effect with the employer at the time when the wages were paid. If an employer fails to pay an advance earned income credit amount as required under this section, the advance amount will not be collected by the Internal Revenue Service from the employer if the employer has properly withheld and deposited all income taxes and FICA taxes applicable with respect to the employee. However, such amount may be collected if the employer has not properly withheld and deposited these taxes.

Par. 2. Section 31.3507–2, as proposed, is amended by revising paragraph (d)(2)(i) to read as follows:

§ 31.3507–2 Earned income credit advance payment certificates.

* * * * *

(d) Period during which cetificate remains in effect; change of status.

* * * * *

(2) *Change of status—(i) Revocation of certificate.* If, after an employee has furnished an earned income credit advance payment certificate—

(A) The employee no longer wishes to receive advance earned income credit payments; or

(B) There has been a change of circumstances which has the effect of either making the employee ineligible for the earned income credit for the taxable year or causing a certificate to be in effect for the employee's spouse,

then the employee must revoke the certificate previously furnished by furnishing the employer a new certificate (Form W–5 or identical form) in revocation of the earlier certificate. Depending upon the nature of the change of circumstances, the employer may be required, pursuant to the new certificate, to pay further advance earned income credit amounts to the employee (but in different amounts than previously paid to the employee). The Form W–5 (or identical form) must be prepared in accordance with the instructions applicable thereto and must set forth fully and clearly the data therein called for. In the case of revocation due to change of circumstances, the new certificate in revocation must be delivered to the employer within ten days after the employee first learns of the change of circumstances. The new certificate is effective under the rules provided in paragraph (c)(2) of this section for later certificates. A new certificate furnished by an employee which is invalid within the meaning of paragraph (b)(2) of this section is considered a nullity with respect to all payments of wages thereafter to the employee. The prior certificate of the employee remains in effect, unless the employee clearly indicates by an oral or written statement to the employer that the prior certificate is invalid. See paragraph (b)(2) of this section. The employer is not required to ascertain whether any employee has experienced a change of circumstances described in subdivision (i)(B) of this paragraph which necessitates the employee's furnishing a new certificate. However, the employer should inform the district director if the employer has reason to believe that an employee has experienced a change of circumstances as described if the employee does not deliver a new certificate to the employer within the ten day period.

* * * * *

Par. 3. Section 31.6302(c)-1(a)(1)(i) is amended by the addition of a new subdivision (c) to read as follows:

§ 31.6302(c)-1 Use of Government depositaries in connection with taxes under Federal Insurance Contributions Act and income tax withheld.

(a) *Requirement*—(1) *In general.*
(i) * * *

(c) The periods within which taxes must be deposited under this section are determined, in the case of employers paying advance earned income credit amounts, by reference to the amount of taxes required to be deposited after reduction for advance amounts paid to employees.

This Treasury decision is issued under the authority contained in section 7805 of the Internal Revenue Code of 1954 (68A Stat. 917, 26 U.S.C. 7805).

William E. Williams,
Acting Commissioner of Internal Revenue.

Approved: January 16, 1981.

Emil M. Sunley,
Acting Assistant Secretary of the Treasury.

Paragraph 1. Section 31.3507-1 is added to read as set forth below:

§ 31.3507-1 Advance payments of earned income credit.

(a) *General rule*—(1) *In general.* Every employer paying wages after June 30, 1979, to an employee with respect to whom an earned income credit advance payment certificate is in effect must, at the time of paying the wages, also pay the employee the advance earned income credit amount of that employee. For the purposes of applying this section and § 31.3507-2—

(i) In the case of an individual who receives wages which are subject to income tax withholding, the term "employee" has the same meaning as set forth in section 3401(c) and the regulations thereunder, and the term "wages" has the same meaning as set forth in sections 3401(a) and 3402(e) and the regulations under those sections; and

(ii) In the case of an individual who does not receive wages which are subject to income tax withholding, but who receives wages which are subject to employee FICA taxes, the term "employee" has the same meaning as set forth in section 3121(d) and the regulations thereunder and the term "wages" has the same meaning as set forth in section 3121(a) and the regulations thereunder.

An individual not having wages subject to either income tax withholding or employee FICA taxes is not entitled to advance payments of the earned income credit. Moreover, notwithstanding subdivisions (i) and (ii) of this paragraph (a)(1), employers are not required to pay advance earned income credit amounts to agricultural workers paid on a daily basis. For this purpose an "agricultural worker" is an employee who performs "agricultural labor", as that term is defined in section 3121(g) and the regulations thereunder.

(2) *Cross references.* For determination of the advance earned income credit amount of an employee, see paragraph (b) of this section. For rules relating to the treatment of the payment of an employee's advance earned income credit amount as equivalent to payment by the employer of withholding and FICA taxes, see paragraph (c) of this section. For rules describing the earned income credit advance payment certificate, see § 31.3507-2 (a) and (b). For rules relating to the employee's furnishing of the earned income credit advance payment certificate and the payroll periods for which the certificate is effective, see § 31.3507-2 (c) and (d).

(b) *Advance earned income credit amount.* The advance earned income credit amount of an employee is determined, with respect to any payroll period, on the basis of the employee's wages from the employer for the period and in accordance with the advance amount tables prescribed by the Commissioner of Internal Revenue and then in effect for the payroll period. See, however, paragraph (c)(2) of this section. The advance amount paid is reflected on the employee's W-2 form as a separate item (and neither as a reduction of withholding nor an increase in compensation). For purposes of applying this section and § 31.3507-2, the term "payroll period" has the meaning set forth in section 3401(b) and the regulations thereunder. As required by section 3507(c)(2)(A), these advance amount tables must be similar in form to, and coordinated with, the tables prescribed under section 3402 (relating to income tax collected at the source). Sections 3507(c)(2)(B) and 3507(c)(2)(C) provide, respectively, separate rules for the treatment in the advance amount tables of the advance earned income credit of the following two separate classes of employees:

(1) Employees who are not married (within the meaning of section 143), or employees whose spouses do not have an earned income credit advance payment certificate in effect; and

(2) Employees whose spouses have an earned income credit advance payment certificate in effect.

If during the calendar year an employer has paid an employee amounts of earned income, within the meaning of section 43(c)(2)(A)(i), which in the aggregate equal or exceed $10,000, the employer need not make further payments of advance earned income credit to the employee during that calendar year.

(c) *Payment of advance earned income credit amount as payment of withholding and FICA taxes*—(1) *In general.* (i) The provisions of this paragraph (c) apply for all purposes of the Internal Revenue Code of 1954. Payments of advance earned income credit amounts pursuant to paragraph (a)(1) of this section do not constitute the payment of compensation. These payments by the employer are treated as made—

(A) First, from the aggregate amount, with respect to all employees, required to be deducted and withheld for the payroll period under section 3401 (relating to income tax withholding);

(B) Second, from the aggregate amount, with respect to all employees, required to be deducted for the payroll period under section 3102 (relating to employee FICA taxes); and

(C) Third, from the aggregate amount of the taxes imposed for the payroll period under section 3111 (relating to employer FICA taxes).

For purposes of the requirements of sections 3401, 3102, and 3111, as the case may be, and 6302, amounts equal to the advance earned income credit amounts paid to employees are treated as if paid to the Treasury Department on the day on which the wages (and advance amounts) are paid to the employees. The employer must report the payment and treatment of the advance amounts on the employer's Form 941, 941E, 942, or 943, as the case may be, in accordance with the applicable instructions.

(ii) The provisions of paragraph (c)(1)(i) of this section may be illustrated by the following example:

Example. Employer X has ten employees, each of whom is entitled to advance earned income credit payment of $10. The total of advance amounts paid by the employer to the ten employees for the payroll period is $100. The total of income tax withholding for the payroll period is $90. The total of employee FICA taxes for the payroll period is $61.30, and the total of employer FICA taxes for the payroll period is also $61.30. Under the rules of paragraph (c)(1)(i) of this section, the total of advance amounts paid to employees is treated as if X had paid the Treasury Department on the day X paid the employees' wages: first, the $90 aggregate amount of income tax withholding; and second, $10 of the aggregate amount of employee FICA tax. X remains liable only for $112.60 of the

aggregate FICA tax [$51.30 + $61.30 = $112.60]. Q04

(2) *Advance payments exceeding taxes due.* (i) If, for any payroll period, the aggregate amount of advance earned income credit amounts required to be paid by an employer under paragraph (a)(1) of this section exceeds the sum of the amounts for the payroll period referred to in paragraphs (c)(1)(i) (A) through (C) of this section, the employer reduces each advance amount paid for the payroll period by an amount which bears the same ratio to the excess of the advance amounts as the subject advance amount bears to the aggregate of advance amounts for the payroll period. However, this paragraph (c)(2) does not apply if the employer makes the election provided by paragraph (c)(3) of this section.

(ii) The provisions of paragraph (c)(2) of this section may be illustrated by the following example.

Example. Assume the same facts as the example in paragraph (c)(1)(ii) of this section, except that the employer is a state government which does not pay FICA taxes. Under these facts, the advance amounts would be $10 greater than the $90 total of income tax withholding for the payroll period. Assume 10 employees each receiving $10 in advance payments. Under the rule of this paragraph (c)(2), the employer X reduces the amount of the advance amount paid to each employer by 1/10, computed as follows: $10/$100 = 1/10. This is the same result as would be obtained by reducing the advance payment of $10 for each of the ten employees by one-tenth 10/100 of the $10 excess or $1.00.

(3) *Election to treat excess amounts as advance tax payment.* In lieu of reducing advance payments under paragraph (c)(2) of this section, an employer may elect under this paragraph (c)(3) to pay in full all advance earned income credit amounts. However, if no election is made, the employer is required to reduce advance amounts paid in accordance with paragraph (c)(2) of this section. The election, if made, applies to all advance earned income credit amounts required to be paid for the payroll period. The employer reflects the election on the employer's Form 941, 941E, 942, or 943 as the case may be, and must specify (with supporting computations) the amount of the excess of advance amounts paid and the payroll period to which the excess relates. Separate elections may be made for separate payroll periods. The excess of advance amounts paid is treated as an advance payment by the employer of employment taxes described in subdivisions (i) through (iii) of this paragraph (c)(3) and due for the period reported on the Form 941, 941E, 942, or 943 which includes the payroll period during which the excess amounts were paid. The amount of the excess advance payment is applied to the amounts of the employer's liability—

(i) First, for income tax withholding due under section 3401 for the reporting period in which the payment is made;

(ii) Second, for employee FICA taxes due under section 3102 for the reporting period in which the payment is made; and

(iii) Third, for employer FICA taxes due under section 3111 for the reporting period in which the payment is made.

If the amount of the employment taxes (as described) for which the employer remains liable for the reporting period in which the excess payment is made is less than the excess payment, the employer may claim a refund of that portion of the excess amount paid which exceeds the employer's remaining liability for these taxes for the reporting period. This refund may be claimed, in the same manner as a refund of wage withholding taxes paid by the employer under section 3401, on the employer's Form 941, 941E, 942, or 943, as the case may be, for the reporting period. In the absence of a claim for refund, that portion of the excess amount will be applied by the Internal Revenue Service against the employer's liability for employment taxes reported on the employer's Form 941, 941E, 942, or 943, as the case may be, filed for the next reporting period.

(4) *Failure to make advance payments.* The failure to pay an employee, at the time required by paragraph (a)(1) of this section, all or any part of an advance earned income credit amount as required by this section is treated, for all purposes including penalties, as a failure by the employer as of that time to deduct and withhold under chapter 24 of the Internal Revenue Code of 1954 an amount equal to the advance amount (or part thereof) not paid. This treatment applies to the failure to pay an advance amount to an eligible employee without regard to whether the employee is ultimately not entitled to claim the earned income credit (in full or in part) on a return for the year, so long as the employee has a valid earned income credit advance payment certificate in effect with the employer at the time when the wages were paid. If an employer fails to pay an advance earned income credit amount as required under this section, the advance amount will not be collected by the Internal Revenue Service from the employer if the employer has properly withheld and deposited all income taxes and FICA taxes applicable with respect to the employee. However, such amount may be collected if the employer has not properly withheld and deposited these taxes.

Par. 2. Section 31.3507-2 is added to read as follows:

§ 31.3507-2 Earned income credit advance payment certificates.

(a) *Definition.* for the purposes of this section and § 31.3507-1, an earned income credit advance payment certificate is a statement furnished by an employee to the employer which—

(1) Certifies that the employee reasonably expects to be eligible to receive the earned income credit provided by section 43 for the employee's last taxable year under subtitle A of the Internal Revenue Code of 1954 which begins in the calendar year in which the wages are paid;

(2) Certifies that the employee does not have an earned income credit advance payment certificate in effect for the calendar year (in which the wages are paid) with respect to the payment of wages by another employer, and

(3) States if the employee's spouse has an earned income credit advance payment certificate in effect with any employer. For the rule for determining if an employee's spouse has a certificate in effect, see paragraph (c)(3) of this section.

(b) *Form and content of earned income credit advance payment certificate*—(1) *In general.* Form W-5 (Earned Income Credit Advance Payment Certificate) is the prescribed form for the earned income credit advance payment certificate. The Form W-5 must be prepared in accordance with the instructions applicable thereto and must set forth fully and clearly the data therein called for. In lieu of the prescribed form, a form the provisions of which are identical with those of the prescribed form may be used.

(2) *Invalid certificates.* A Form W-5 does not meet the requirements of section 3507 or this section and is invalid if it is not completed or signed or contains an alteration or unauthorized addition (as defined in § 31.3402(f)(5)-1(b) (1) and (2)). Any earned income credit advance payment certificate which the employee clearly indicates to be false by oral statement or written statement to the employer must be treated by the employer as a certificate which is invalid as of the date of the employee's statement. For purposes of the preceding sentence, the term "employer" includes any individual authorized by the employer to receive earned income credit advance payment certificates or to make payroll distributions. If an employer receives

from an employee an invalid certificate, the employer must consider it a nullity with respect to all payments of wages thereafter to the employee and must inform the employee of the certificate's invalidity. The employer is not required to ascertain whether any completed and signed earned income credit advance payment certificate is correct. However, the employer should inform the district director if the employer has reason to believe that the certificate contains any incorrect statement.

(c) *When earned income credit advance payment certificate takes effect*—(1) *No previous certificate.* An earned income credit advance payment certificate furnished the employer where no previous certificate is or has been in effect with the employer for that employee for the calendar year takes effect with—

(i) The date of the beginning of the first payroll period ending on or after the date on which the certificate is received by the employer;

(ii) The date of the first payment of wages made without regard to a payroll period on or after the date on which the certificate is received by the employer; or

(iii) The first day of the calendar year for which the certificate is furnished, if that day is later than the otherwise applicable effective date specified in subdivision (i) or (ii) of this paragraph (c)(1).

(2) *Previous certificate.* Except as otherwise provided in this paragraph (c)(2), an earned income credit advance payment certificate furnished the employer where a previous certificate is or has been in effect with the employer for that employee for the calendar year takes effect on the date of the first payment of wages made on or after the first status determination date (as defined in paragraph (c)(4) of this section) occurring at least thirty days after the date on which the certificate is received by the employer. However, if the employer so chooses, the employer may treat the certificate as effective on the date of any payment of wages made on or after the date on which the certificate is received by the employer (without regard to any status determination date).

(3) *Certificate of spouse.* For the sole purpose of applying paragraph (a)(3) of this section, in determining if a certificate is in effect with respect to an employee's spouse, the spouse's certificate is treated as then in effect if the spouse's certificate will be or is reasonably expected to be in effect on the first status determination date following the date on which the employer receives the employee's certificate.

(4) *Status determination date.* For the purposes of this section, the term "status determination date" means January 1, May 1, July 1, and October 1 of each year.

(d) *Period during which certificate remains in effect; change of status*—(1) *Period certificate remains in effect.* An earned income credit advance payment certificate which takes effect during a calendar year continues in effect with respect to the employee only during that calendar year and until revoked by the employee or until another certificate takes effect. See paragraphs (d)(2) and (c)(2) of this section.

(2) *Change of status*—(i) *Revocation of certificate.* If, after an employee has furnished an earned income credit advance payment certificate—

(A) The employee no longer wishes to receive advance earned income credit payments; or

(B) There has been a change of circumstances which has the effect of either making the employee ineligible for the earned income credit for the taxable year or causing a certificate to be in effect for the employee's spouse,

then the employee must revoke the certificate previously furnished by furnishing the employer a new certificate (Form W-5 or identical form) in revocation of the earlier certificate. Depending upon the nature of the change of circumstances, the employer may be required, pursuant to the new certificate, to pay further advance earned income credit amounts to the employee (but in different amounts than previously paid to the employee). The Form W-5 (or identical form) must be prepared in accordance with the instructions applicable thereto and must set forth fully and clearly the data therein called for. In the case of revocation due to change of circumstances, the new certificate in revocation must be delivered to the employer within ten days after the employee first learns of the change of circumstances. The new certificate is effective under the rules provided in paragraph (c)(2) of this section for later certificates. A new certificate furnished by an employee which is invalid within the meaning of paragraph (b)(2) of this section is considered a nullity with respect to all payments of wages thereafter to the employee. The prior certificate of the employee remains in effect, unless the employee clearly indicates by an oral or written statement to the employer that the prior certificate is invalid. See paragraph (b)(2) of this section.

The employer is not required to ascertain whether any employee has experienced a change of circumstances described in subdivision (i)(B) of this paragraph which necessitates the employee's furnishing a new certificate. However, the employer should inform the district director if the employer has reason to believe than an employee has experienced a change of circumstances as described if the employee does not deliver a new certificate to the employer within the ten day period.

(ii) *Change in spouse's certificate.* If, after an employee has furnished an earned income credit advance payment certificate stating that a certificate is in effect for the spouse of the employee, the certificate of the spouse is no longer in effect, the employee may furnish the employer with a new certificate which reflects this change of circumstances.

Par. 3. Section 31.6307(c)-1 is amended by the adding new paragraph (a)(1)(i)(c) to read as follows:

§ 31.6302(c)-1 Use of Government depositaries in connection with taxes under Federal Insurance Contributions Act and income tax withheld.

(a) *Requirement*—(1) *In general.*

(i) * * *

(c) The periods within which taxes must be deposited under this section are determined, in the case of employers paying advance earned income credit amounts, by reference to the amount of taxes required to be deposited after reduction for advance amounts paid to employees.

Amendment To Relieve Public Coast Stations Operating in the 2 MHz Band From Monitoring and Logging Calls on the Distress Frequency 2182 kHz

AGENCY: Federal Communications Commission.

ACTION: Final rule.

SUMMARY: This document amends the rules to relieve public coast stations operating in the 2 MHz band from monitoring and logging calls on the distress frequency 2182 kHz. This action was prompted by a petition for rulemaking. The effect of this action is to relieve public coast stations from monitoring, and logging calls on the distress frequency 2182 kHz.

EFFECTIVE DATE: March 3, 1981.

ADDRESS: Federal Communications Commission, Washington, D.C. 20554.

FOR FURTHER INFORMATION CONTACT: Roy Carleton Howell, Private Radio Bureau, (202) 632–7175.

SUPPLEMENTARY INFORMATION:

In the matter of amendment of Part 81 of the rules to relieve public coast stations operating in the 2 MHz band from monitoring and logging calls on the distress frequency 2182 kHz; Report and order (Proceeding Terminated).

Adopted: January 8, 1981.

Released: January 23, 1981.

By the Commission: Chairman Ferris absent.

Background

1. As a result of a December 1979 FCC Report to Congress in regard to marine public coast telecommunications, on April 9, 1980, the Commission adopted a Notice of Proposed Rule Making (NPRM) proposing to amend the rules to relieve those public coast stations offering 2 MHz (MF-medium frequency) radiotelephony service from the requirement to maintain a watch on the distress, safety and calling frequency 2182 kHz, and to log in detail any distress calls made or received on that frequency. An NPRM was published at 45 Fed. Reg. 27795 on April 24, 1980, and the Commission received comments in response to its NPRM.

2. Public coast stations are land stations in the maritime mobile service which are open to public correspondence and render a common carrier service. These stations transmit messages to and receive messages from ships at sea, for a fee set in accordance with tariffs on file with the Commission. All marine radiotelephone units in the MF band are equipped with the distress frequency 2182 kHz.

3. Pursuant to Title 14 of the U.S. Code, the United States Coast Guard (USCG) has developed a comprehensive program to provide safety services to the maritime community. On August 2, 1979, in a Notice of Inquiry into *High Seas Public Coast Station Operations, Services and Industry* the USCG made the following statement:

> (The Coast Guard) has a singular advantage over public coast stations in dealing with distress and safety because it has facilities and personnel dedicated primarily to that purpose, whereas the public coast station, from practical and economic necessity, must concentrate its efforts on the handling of its regular traffic. Because of this focalization the Coast Guard can keep up with and does employ the latest developments and advances in equipment in its safety and distress telecommunications system.[1]

The USCG is technologically better equipped to handle safety and distress communications than public coast stations.

4. In its December 1979 Report to Congress (which resulted from the earlier August 2, 1979, Notice of Inquiry) the Commission stated with respect to Public Coast Station operation that:

> With the possible exception of the 500 kHz safety watch by radiotelegraph stations during the silent periods, these watches are an unwarranted and unnecessary burden on the coast stations.[2]

Commission records illustrate that approximately fifty percent of all public coast stations have been granted a waiver from maintaining the 2182 kHz safety and distress watch. Additionally, the vast majority of the USCG's search and rescue (SAR) cases were received by the USCG's monitoring, and only a very few by public coast stations.[3]

5. Inasmuch as 2182 kHz is also a calling frequency, most public coast stations will continue to monitor this frequency much of the time in order to provide their commercial service. Furthermore, the Commission is not proposing repeal of the rule section that requires public coast stations to maintain a capability to transmit and receive on 2182 kHz. The Commission's rule adopted herein also requires public coast stations to help the USCG with distress communications when the USCG requests assistance.

Discussion of the Comments

6. Comments were filed by the USCG, Mobile Marine Radio, Inc. (MMR), the American Telephone and Telegraph Company (AT&T), the American Institute of Merchant Shipping (AIMS), and the Atlantic Richfield Company (ARCO). The majority of these comments favored the Commission's proposal. We are affording the USCG's recommendations and comments great weight insofar as Congress has vested general jurisdiction for maritime safety in the USCG pursuant to 14 U.S.C. 2.

7. The USCG agreed fundamentally with the Commission's proposal in the April 9, 1980, NPRM. In regard to the Commission's proposed amendment to relieve public coast stations from maintaining the safety and distress watch on the frequency 2182 kHz, the USCG stated:

[1] Notice of Inquiry into *High Seas Public Coast Station Operations, Services and Industry* (General Docket No. 79–189, released August 2, 1979), U.S. Coast Guard Comments filed September 10, 1979, paragraph 2.7.

[2] See the December 1979 FCC Report to Congress, *A Study of Maritime Public Coast Station Operations, Services And Industry*, at p. 17.

[3] For example, in 1978, of the 85,883 SAR cases handled by the Coast Guard, 85,829 were picked up by the Coast Guard and only 54 by public coast stations. These figures include distress calls on all maritime bands. Report to Congress, p. 17.

The USCG has no objection to deleting the mandatory provisions that public coast stations continuously guard 2182 kHz for distress or safety calls. We believe, however, that all stations should be alert to distress calls if heard during their normal operations and to at least insure that a USCG unit is responding. Although a USCG station may be propagationally capable of receiving the distress signal, the signal environment of multiple users can often result in failure to recognize a specific call which is heard by another station. As soon as the USCG becomes active in the exchange, the public coast station has no further obligation unless requested to relay. The obligation in 81.191(b)(3) to assist when requested by the USCG is predicated upon the USCG already being alerted. In practice, some alerts through public coast stations are received by them on frequencies other than a designated distress channel.[4]

The USCG concluded, in summary, that "the proposed amendment to Part 81 which relieves public coast stations of mandatory guard on 2182 kHz is acceptable."[5]

8. The USCG also concurred with the Commission's proposal to relieve public coast stations operating in the 2 MHz band from the responsibility to log the watch and detailed distress communications. Based on the USCG's longstanding expertise in providing safety services to the maritime community, the USCG made the following statement in regard to the logging issue:

The mandatory requirements for detailed logs concerning distress exchanges are unnecessary insofar as the USCG is concerned.[6]

9. The USCG did make one recommendation for a minor change relative to the proposed amendment to § 81.191(b)(3) as follows:

Public coast stations licensed in the band 1605–3500 kHz *which may hear distress calls should observe whether the Coast Guard has established communications exchange and assist as appropriate,* or shall provide assistance for distress communications when requested by the Coast Guard.[7]

We are adopting the USCG's recommended change. As as result public coast stations licensed in the band 1605–3500 kHz which may hear distress calls must observe the exchange and assist as appropriate, or shall provide assistance for distress communications when requested by the USCG.

10. MMR and AT&T supported the rulemaking in its entirety. MMR strongly endorsed the Commission's proposals concerning the maintenance of radiotelephone watches by public coast stations, and of station records. In its comments filed June 30, 1980, MMR stated:

Mobile Marine Radio Strongly endorses the amendments proposed in this Notice concerning the maintenance of radiotelephone watches by public coast stations and of station records. Justification for said amendments is set forth in the NPRM. Further justification is found in the *High Seas Public Coast Station Operations, Services and Industry* proceeding, Gen. Docket No. 79–189, and with specific respect to the role and responsibility of public coast stations in the maintenance of a distress watch, in MMR's Comments, Reply Comments, Further Reply Comments and Supplemental Comments in PR Docket No. 79–68 concerning the 156.8 MHz distress watch.[8]

11. AT&T supported the Commission's proposal to relieve maritime stations operating in the 2 MHz band of the requirement to maintain a watch on the distress, safety and calling frequency 2182 kHz and to log distress calls made or received on that frequency. In regard to these issues, AT&T stated:

* * * As AT&T notes in its Comments in General Docket No. 79–189 (the Public Coast Station Inquiry), compliance with the Rules pertaining to the maintenance of a radiotelephone log for distress, urgency, or safety communications at times requires the complete attention of an operator and thus can affect the quality of service to other vessels not involved in the emergency situation. However, it is expected that the United States Coast Guard would use automatic recording devices to log signals on the distress frequency as it already does when called upon for assistance. Moreover, such a record would be superior to the present public coast station manual record which is already duplicative at the moment the Coast Guard responds to a call. If the Coast Guard is to be responsible for the watch for distress communications, it should assume the associated responsibility for maintaining the detailed account of the safety watch and distress communications.[9]

12. AIMS was not entirely supportive of the Commission's proposal. They stated:

* * * It is our opinion that this proposal to relieve public coast stations operating in the 2 MHz band from maintaining a watch on the distress, safety and calling frequency 2182 kHz is premature in light of the probable transition to a more improved, viable safety communications network via radiotelephone, such as found in comments submitted pertaining to FCC Docket No. 79–336.[10]

13. ARCO did not support the Commission's proposals as set out in the April 9, 1980, NPRM. ARCO questions the capability of the USCG to handle distress situations without assistance from public coast stations. ARCO formulates its argument based on the following language:

The Commission considers the U.S. Coast Guard coverage of 2182 kHz sufficient for safety and distress purposes, however, it would require Public Coast Stations to have the capability of operating on 2182 kHz "to help the Coast Guard with distress communications". This in itself is an admission of the questionable capability of the U.S. Coast Guard to handle distress situations without assisfance from the Public Coast Stations.[11]

14. There is clear and convincing evidence that the USCG has handled search and rescue cases competently. In 1978, for example, of the 85,883 search and rescue cases handled by the USCG, 85,829 were picked up by the USCG and only 54 by public coast stations; and, these figures include distress calls on all maritime bands.[12] Insofar as 2182 kHz is also a calling frequency, most public coast stations will continue to monitor this frequency much of the time in order to provide its commercial service. For this reason reason when a public coast station is monitoring 2182 kHz for calls, it can assist the USCG with any distress communication. Accordingly, we conclude that these rule changes are warranted.

Summary of the Decision

15. The rules we are adopting will relieve public coast stations operating in the 2 MHz band from the responsibility to log the watch and detailed distress communications. Furthermore, these rules will eliminate the requirement of public coast stations in the MF band from maintaining the safety and distress watch on the frequency 2182 kHz. Additionally, they require those public coast stations licensed in the band 1605–3500 kHz which may hear distress calls to observe whether the USCG has established communications exchange and assist as appropriate, or provide assistance for distress communications when requested by the USCG.

49 CFR Parts 192 and 195

[Amdt. 192-37 and 195-21; Docket No. PS-65]

Transportation of Natural and Other Gas and Hazardous Liquids by Pipeline Incorporation by Reference

AGENCY: Materials Transportation Bureau (MTB), DOT.

ACTION: Final rule.

SUMMARY: This final rule amends Department of Transportation regulations which govern the transportation of natural and other gas and hazardous liquids by pipeline. The amendments update the existing references to industry prepared documents to later published editions of those documents. The amendments relieve the burden of having to comply with out-of-date documents and enhance safety by requiring compliance with the latest published editions.

EFFECTIVE DATE: This final rule will become effective March 4, 1981.

FOR FURTHER INFORMATION CONTACT: Ralph T. Simmons, 202–426–2392.

SUPPLEMENTARY INFORMATION: On March 4, 1980, MTB issued a Notice of Proposed Rulemaking (NPRM) (45 FR 16226; March 13, 1980) proposing to update the existing references in Parts 192 and 195 to industry prepared documents. The NPRM also proposed editorial modifications of several rules that incorporate by reference the industry documents. Interested persons were given until April 30, 1980, to comment on the proposed amendments.

Eighteen different persons submitted comments, primarily gas utility and gas transmission and liquid transmission companies and their trade associations, but also State and federal agencies and industry standard making bodies. In accordance with section 4 of the Natural Gas Pipeline Safety Act of 1968 (49 USC 1673), the Technical Pipeline Safety Standards Committee (TPSSC) met in Washington, D.C., on June 17–20, 1980, to review the technical feasibility, reasonableness, and practicability of the amendments proposed in the NPRM. A copy of the Committee's report is available in the docket, and may be obtained by writing to the Docket Branch, Materials Transportation Bureau, 400 7th Street, S.W., Washington, D.C. 20590. A discussion of any rejection of the views of the TPSSC is given below in the discussion of the sections of the final rules involved.

To incorporate materials by reference, MTB must comply with the requirements of the Office of the Federal Register. These requirements were set forth in a final rule published March 28, 1979, 44 FR 18630, and a correction published on April 2, 1979, 44 FR 19181.

The relevant parts of the Office of the Federal Register's requirements are that the Director of the Office of the Federal Register must approve each incorporation by reference and that the material incorporated by reference must be generally available to any person affected by the regulations that reference the material.

Industry documents which have been superseded by later published editions

are not generally available, and, therefore, do not meet the requirements of the Office of the Federal Register for incorporation by reference. For this reason, MTB has deleted from Appendixes A and B of Part 192 and from § 195.3 references to the earlier editions of documents, the current edition of which is now referenced in the final rule.

Five commenters from industry and industry associations stated that the superseded industry documents and editions of documents now out-of-print should continue to be listed in Parts 192 and 195. Their reasons were: (1) Delisting of specifications will cause the material manufactured to the deleted specification to be unqualified for use and the mere discontinuation of a published standard does not mean that the material made to that standard is obsolete or unsafe. (2) Many documents are discontinued for procedural purposes only and to only allow reuse of material made to those documents upon the grant of a waiver is wasteful.

MTB's policy is to encourage industry's use of the latest technology, materials, and practices available. The updating of industry documents referenced in Parts 192 and 195 is in keeping with that policy. The keeping of industry documents referenced in Parts 192 and 195 as current as possible will permit industry to take advantage of the latest technical advances affecting their operations. It is not MTB's intent, by not continuing to list superseded editions of documents, to prohibit the future use of materials and components manufactured, designed, or installed in accordance with those superseded editions at the time they were listed as applicable editions under Parts 192 and 195. This point is made clear by new language added to §§ 192.7 and 195.3. Since MTB will no longer list in Parts 192 and 195 those editions of industry documents which have been superseded, to learn which superseded editions may still be used, a person must refer to the earlier editions of 49 CFR in which they were listed.

Discussion of Comments

In general, all commenters agreed with the purpose of the Notice of Proposed Rulemaking. Their reasons were that the updating of references is vitally necessary for the industry to take advantage of recent changes in manufacturing practices, technology, and materials and that the proposed changes are needed to enhance public safety by allowing the use of improved pipe, fittings, and construction techniques.

In response to MTB's statement in the NPRM that editions of documents with later publication dates than shown in the NPRM would be included in the final rule if found acceptable, five commenters furnished lists of industry documents which have later dates than the ones referenced in the NPRM. MTB has reviewed these and has incorporated them by reference in the final rule.

There was a mixed reaction to MTB's goal stated in the NPRM to replace references to industry documents with performance standards.

Ten commenters, of which eight were from industry and two from standards making bodies, supported the goal. They made the following statements: (1) Under a system of performance requirements, the operator is free to use development material, within the generalized performance constraints, based upon an evaluation of risk/benefit factors. (2) The referenced standards may contain inappropriate language, since many of them include optional or supplementary requirements for the purpose of providing flexibility. (3) The referenced standards may contain inadequacies or misleading requirements. (4) Referenced standards may stifle innovation and new development, since they reflect state-of-the-art technology. (5) General performance requirements for an entire class of equipment or procedures could encourage more rapid public safety improvement and expedite the utilization of modern technology.

Of the two commenters who did not support MTB's goal of performance standards, one was from industry and one was a State public service commission. Their statements were: (1) The industry is very much familiar with the industry standards and has been using them for years for procurement and operating purposes. (2) To specify performance requirements in lieu of referencing industry standards would be duplicative in nature, since the referenced standards are written in performance language. (3) The existing industry standards are well prepared, accepted by industry, and adequate. (4) MTB's ultimate goal of eliminating industry standards is not consistent with the policy of OMB (OMB Circular A-119). (5) The substitution of performance standards for existing referenced specifications puts an unnecessary and almost impossible burden on each of the fifty State regulatory agencies. (6) It is in the best interest of public safety and is also the most economical and efficient way of utilizing the various pipeline safety efforts to regularly update the referenced specifications.

MTB does not agree with the arguments of the commenters opposed to the development of performance standards for pipelines. MTB believes that defining a level of performance in terms of integrity and reliability for pipeline facilities which is capable of being accomplished within economic and technical constraints, and in sufficient detail that all affected parties can understand what constitutes compliance will enhance the level of public safety and permit industry greater flexibility in the use of current technology. The argument regarding conflict with OMB Cir. A-119 is specious, since the policies announced in that circular relate only to Federal procurement and Federal participation on voluntary standards setting bodies. Also, MTB feels the enforcement challenge can be met by developing performance standards which are capable of objective measurement. MTB invites interested persons to submit for MTB's consideration any performance standards that meet these objectives.

Two commenters from industry, one from a State agency, and one from an industry association stated that MTB should establish a regular schedule for updating referenced industry documents to keep them current. MTB has established a yearly schedule of updating referenced documents to coincide with the annual republication of 49 CFR. To make such a schedule viable, MTB needs the cooperation of the voluntary standards making bodies, and welcomes the assistance and cooperation of the standards making bodies in keeping the referenced standard as current as possible.

In the 1980 edition of API 1104, "Standard for Welding Pipelines and Related Facilities," the Section 6.9 requirements for measurement of undercutting next to root beads have been reviewed and found acceptable by MTB. The provision for the use of the comparator shim (depth measuring device) contained in earlier editions has been removed from Section 6.9. Therefore, it is no longer necessary to retain the effective prohibition of the use of the comparator shim in Parts 192 and 195. Since the 1980 edition of API 1104 is incorporated by this amendment, appropriate changes are made in §§ 192.227(a), 192.229(c), 192.241(c), 195.222 and 195.228(b) in the final rule.

The final rule corrects several oversights in the NPRM: In Sections 192.113 and 195.106(e), ASTM A-155 is removed from the tables and ASTM A-671, ASTM A-672, and ASTM A-691 are inserted in lieu thereof. The designation

of ANSI A21.1 is changed to ANSI C 101–67, since this is the new ANSI designation. Also, the table in § 192.117 has been removed, since ANSI A21.3, ANSI A–21.7, and ANSI A–21.9 have been discontinued by ANSI and the design information given in the table may be gotten from ANSI C 101–67. Further, the designation of the National Electrical Code is changed from "ANSI C1" to "NFPA–70."

The TPSSC recommendation stated that the proposed rulemaking was technically feasible, reasonable, and practicable if it did not prohibit the use or reuse of materials made to an earlier listed edition. MTB believes the above discussion of policy answers TPSSC's concern in this regard.

In consideration of the foregoing, 49 CFR Parts 192 and 195 are amended as follows:

INTERSTATE COMMERCE COMMISSION

49 CFR Part 1109

[Ex Parte No. 320]

Rail Market Dominance and Related Considerations

AGENCY: Interstate Commerce Commission.

ACTION: Stay of removal of existing regulations.

SUMMARY: The Commission removed its existing market dominance regulations at 49 CFR 1109.1 by notice published in the **Federal Register** on December 18, 1980 (45 FR 83237). The Commission is now staying the removal of these regulations, except (49 CFR 1109.1(g)(2)).

EFFECTIVE DATE: January 21, 1981.

FOR FURTHER INFORMATION CONTACT: Richard B. Felder or Jane F. Mackall, (202) 275-7656.

SUPPLEMENTARY INFORMATION: By motion filed January 9, 1981, the Chlorine Institute, Inc., *et al.* requests the Commission stay pending judicial review our removal of the market dominance regulations at 49 CFR 1109.1. In our decision served December 11, 1980 and published in the **Federal Register** on December 18, 1980, (45 FR 83237) we removed these regulations because of changes in the market dominance standards made by the Staggers Rail Act of 1980. The Chlorine Institute argues that our removal order constitutes a final rule of substantive law promulgated without notice and comment in violations of the Administrative Procedure Act requirements of 5 U.S.C. 553. It also submits that the removal order constitutes a violation of terms of section 202(b) of the Railroad Revitalization and Regulatory Reform Act of 1976 (the 4-R Act) which mandates that the Commission promulgate and maintain regulations for determining market dominance.

The motion for stay will be granted in part. I do not agree that there has been a violation of the Administrative Procedure Act, inasmuch as removal of the regulations was the subject of notice and comment in Ex Parte No. 320 (Sub-No. 1) (proposed at 45 FR 3353, January 17, 1980 and withdrawn at 45 FR 83302, December 18, 1980).

Nonetheless, only part of the regulations, 49 CFR 1109.1(g)(2), is in direct conflict with the Staggers Act. There is no necessity for the immediate removal of the other parts of 49 CFR 1109.1. Moreover, a stay of the removal will forestall unnecessary litigation. Therefore, a partial stay will be granted pending the issuance of final rules in Ex Parte No. 320 (Sub-No. 2). *Market Dominance Determinations and Consideration of Product Competition* (notice of proposed policy published in **Federal Register** on December 18, 1980, 45 FR 83342 and reclassified as a notice of proposed rulemaking elsewhere in this issue).

It is ordered:

The motion of the Chlorine Institute, Inc., *et al.* for stay pending judicial review is granted. Our December 11, 1980 removal order is stayed in part, and the market dominance regulations at 49 CFR 1109.1, except for § 1109.1(g)(2), shall remain in effect until final rules in Ex Parte No. 320 (Sub-No. 2) become effective.

Decided: January 21, 1981.

By the Commission, Marcus Alexis, Vice Chairman.

Agatha L. Mergenovich,

Secretary.

Proposed Rules

Federal Register
Vol. 46, No. 21
Monday, February 2, 1981

This section of the FEDERAL REGISTER contains notices to the public of the proposed issuance of rules and regulations. The purpose of these notices is to give interested persons an opportunity to participate in the rule making prior to the adoption of the final rules.

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 39

[Docket No. 80-GL-21-AD]

Airworthiness Directives; Hamilton Standard Hydromatic Propellers

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of proposed rulemaking.

SUMMARY: This notice proposes to adopt an Airworthiness Directive (AD) that would require repetitive visual inspections of aluminum blades for corrosion on Hamilton Standard Hydromatic Propellers. The proposed AD is needed to detect corrosion in the aluminum blade and shank area, particularly under the blade seal. Corrosion in the blade fillet and shank area may lead to fatigue cracking and resultant blade loss. There have been three recent incidents where blades have separated at the butt end of the blade due to corrosion and resultant fatigue. The resulting imbalance may tear the engine from the aircraft.

DATES: Comments must be received on or before March 16, 1981.

ADDRESSES: Send written comments in duplicate to the Office of Regional Counsel, Federal Aviation Administration, Attn: Rules Docket (AGL-7), Docket No. 80-GL-21-AD, 2300 East Devon Avenue, Des Plaines, Illinois 60018.

The applicable technical manuals may be obtained from Hamilton Standard, Division of United Technologies Corporation, Windsor Locks, Connecticut 06096.

A copy of the applicable technical manuals is contained in Room 240, 2300 E. Devon Ave., Des Plaines, IL 60018.

FOR FURTHER INFORMATION CONTACT: Bob Alpiser, Engineering and Manufacturing Branch, AGL-214, Flight Standards Division, FAA, 2300 East Devon Avenue, Des Plaines, IL 60018, telephone (312) 694-7130.

SUPPLEMENTARY INFORMATION: Interested persons are invited to participate in the making of the proposed rule by submitting such written data, views, or arguments as they may desire. Information on the economic, environmental, and energy impact that might result because of adoption of the proposed rule is requested. Communications should identify the regulatory docket number and be submitted in duplicate to the address specified above. All communications received on or before the closing date for comments will be considered by the Administrator before taking action on the proposed rule. The proposals contained in this notice may be changed in light of comments received. All comments submitted will be available, both before and after the closing date for comments, in the Rules Docket for examination by interested persons. A report summarizing each FAA-public contact, concerned with the substance of the proposed AD, will be filed in the Rules Docket.

There have been reports of corrosion in the blade fillet and shank area, particularly under the blade seal, on aluminum blades installed on Hamilton Standard Hydromatic Propellers. Corrosion can lead to fatigue and cause a propeller blade failure. Since this condition is likely to exist on other propellers of the same type design, the proposed AD would require repetitive visual inspections on these propellers.

The Proposed Amendment

Accordingly, the Federal Aviation Administration proposes to amend § 39.13 of Part 39 of the Federal Aviation Regulations (14 CFR 39.13) by adding the following new Airworthiness Directive:

Hamilton Standard: Applies to Hamilton Standard aluminum propeller blades installed on propeller types 23D40, 23E50, 33D50, 33E60, 22D30, 22D40, 34D50, 34D51, 43D50, 43E60, 34E60, 23260, 24260, and 43H60, as installed on various aircraft.

Compliance is required as indicated, unless already accomplished. To prevent propeller blade failure due to corrosion and fatigue, accomplish the following:

(a) Propeller blades in service. Within the next 12 months after the effective date of this AD or within 18 months since last inspection, whichever occurs later, remove blades and visually inspect for evidence of corrosion in the blade fillet and shank area, particularly under the blade seal, in accordance with Hamilton Standard Aluminum Blade Maintenance Instructions No. P5072 or Hamilton Standard Aluminum Blade Overhaul Manual No. 130B as revised by Temporary Revision No. 2. Reinspect blades every 18 months thereafter.

(b) Assembled propellers in storage. Remove blades and visually inspect for evidence of corrosion in the blade fillet and shank area, particularly under the blade seal, in accordance with Hamilton Standard Aluminum Blade Maintenance Instructions No. P5072 or Hamilton Standard Blade Overhaul Manual No. 130B prior to installation or prior to exceeding 18 months combined storage plus time installed.

(c) Disassembled propeller blades in storage. Visually inspect blades for evidence of corrosion in the fillet and shank area prior to assembling to a propeller.

(d) Blades showing evidence of corrosion in the fillet or shank area must be replaced with a serviceable blade or given a normal blade overhaul in accordance with Hamilton Standard Aluminum Blade Overhaul Manual No. 130B as revised by Temporary Revision No. 2.

(e) Upon request of an operator, the Chief, Engineering and Manufacturing Branch, AGL-210, Federal Aviation Administration, Great Lakes Region, may adjust the compliance time specified in paragraph (a) of this AD provided such requests are made through an FAA Maintenance Inspector and the request contains substantiating data to justify the request for that operator.

(f) For purposes of this AD, an FAA-approved equivalent must be approved by the Chief, Engineering and Manufacturing Branch, AGL-210, Federal Aviation Administration, Great Lakes Region.

(Secs. 313(a), 601, and 603, Federal Aviation Act of 1958, as amended, (49 U.S.C. 1354(a), 1421, and 1423); Sec. 6(c), Department of Transportation Act (49 U.S.C. 1655(c); 14 CFR 11.85)

Note.—The Federal Aviation Administration has determined that this document involves a proposed regulation which is not considered to be significant under Executive Order 12044, as implemented by Department of Transportation Regulatory Policies and Procedures (44 FR 11034; February 26, 1979). A draft regulatory evaluation prepared for this document is contained in the public docket, and a copy may be obtained by writing Engineering and Manufacturing Branch, AGL-214, Flight Standards Division, FAA, 2300 East Devon Avenue, Des Plaines, Illinois 60018.

It has been determined under the criteria of the Regulatory Flexibility Act that this proposed rule, at promulgation, will not have a significant impact on a substantial number of small entities.

Issued in Des Plaines, Illinois on January 12, 1981.

James M. Dermody,

Acting Director, Great Lakes Region.

BILLING CODE 4910-13-M

14 CFR Part 71

[Airspace Docket No. 80-ASW-50]

Proposed Alteration of Control Zone: San Antonio, Tex. (Kelly AFB)

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of Proposed Rule Making.

SUMMARY: The nature of the action being taken is to propose alteration of a control zone at San Antonio, Tex. (Kelly AFB). The intended effect of the proposed action is to provide additional controlled airspace for aircraft executing new instrument approach procedures to Kelly Air Force Base. The circumstance which created the need for the action is the establishment of a VORTAC facility on the airport.

DATES: Comments must be received on or before March 4, 1981.

ADDRESSES: Send comments on the proposal to: Chief, Airspace and Procedures Branch, Air Traffic Division, Southwest Region, Federal Aviation Administration, P.O. Box 1689, Fort Worth, Texas 76101. The official docket may be examined at the following location: Office of the Regional Counsel, Southwest Region, Federal Aviation Administration, 4400 Blue Mound Road, Fort Worth, Texas. An informal docket may be examined at the Office of the Chief, Airspace and Procedures Branch, Air Traffic Division.

FOR FURTHER INFORMATION CONTACT: Kenneth L. Stephenson, Airspace and Procedures Branch, ASW-535, Air Traffic Division, Southwest Region, Federal Aviation Administration, P.O. Box 1689, Fort Worth, Texas 76101; telephone: (817) 624-4911, extension 302.

SUPPLEMENTARY INFORMATION: Subpart F 71.171 (45 FR 356) of FAR Part 71 contains the description of control zones designated to provide controlled airspace for the benefit of aircraft conducting instrument flight rules (IFR) activity. Alteration of the control zone at San Antonio, Tex. (Kelly AFB), will necessitate an amendment to this subpart.

Comments Invited

Interested persons may submit such written data, views, or arguments as they may desire. Communications should be submitted in triplicate to Chief, Airspace and Procedures Branch, Air Traffic Division, Southwest Region, Federal Aviation Administration, P.O. Box 1689, Fort Worth, Texas 76101. All communications received on or before March 4, 1981 will be considered before action is taken on the proposed amendment. No public hearing is contemplated at this time, but arrangements for informal conferences with Federal Aviation Administration officials may be made by contacting the Chief, Airspace and Procedures Branch. Any data, views, or arguments presented during such conferences must also be submitted in writing in accordance with this notice in order to become part of the record for consideration. The proposal contained in this notice may be changed in the light of comments received. All comments submitted will be available, both before and after the closing date for comments, in the Rules Docket for examination by interested persons.

Availability of NPRM

Any person may obtain a copy of this notice of proposed rule making (NPRM) by submitting a request to the Chief, Airspace and Procedures Branch, Air Traffic Division, Southwest Region, Federal Aviation Administration, P.O. Box 1689, Fort Worth, Texas 76101, or by calling (817) 624-4911, extension 302. Communications must identify the notice number of this NPRM. Persons interested in being placed on a mailing list for future NPRMs should contact the office listed above.

The Proposal

The FAA is considering an amendment to Subpart F of Part 71 of the Federal Aviation Regulations (14 CFR Part 71) to alter the control zone at San Antonio, Tex. (Kelly AFB). The FAA believes this action will enhance IFR operations at Kelly AFB by providing controlled airspace for aircraft executing proposed instrument approach procedures using the new VORTAC. Subpart F of Part 71 was republished in the **Federal Register** on January 2, 1980 (45 FR 356).

The Proposed Amendment

Accordingly, pursuant to the authority delegated to me, the FAA proposes to amend 71.171 of Part 71 of the Federal Aviation Regulations (14 CFR Part 71) as republished (45 FR 356) by deleting the present description and substituting the following:

San Antonio, Texas (Kelly AFB)

Within a 5-mile radius of Kelly AFB (latitude 29°23'03"N., longitude 98°34'51"W.); and within 2 miles each side of the 343° radial of the VORTAC (latitude 29°22'29"N., longitude 98°34'51"W.) extending from the 5-mile radius area to 8.5 miles north of the VORTAC and within 2 miles each side of the 322° radial of the VORTAC extending from the 5-mile radius area to 7 miles northwest of the VORTAC and within 2 miles each side of the 159° radial of the VORTAC extending from the 5-mile radius area to 7 miles south of the VORTAC.

(Sec. 307(a), Federal Aviation Act of 1958 (49 U.S.C. 1348(a)); and Sec. 6(c), Department of Transportation Act (49 U.S.C. 1655(c)))

Note.—The FAA has determined that this document involves a proposed regulation which is not significant under Executive Order 12044, as implemented by DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979). Since this regulatory action involves an established body of technical requirements for which frequent and routine amendments are necessary to keep them operationally current and promote safe flight operations, the anticipated impact is so minimal that this action does not warrant preparation of a regulatory evaluation and a comment period of less than 45 days is appropriate.

Issued in Fort Worth, Texas on January 29, 1981.

[EDR-419; Docket 39173; Dated: January 21, 1981]

Pro Rata and Single Entity Charters; Removal of Restrictions on Administration Costs

AGENCY: Civil Aeronautics Board.

ACTION: Notice of Proposed Rulemaking.

SUMMARY: The CAB proposes to amend its rules governing pro rata and single entity charters to remove all restrictions on administrative costs.

DATE: Comments by: March 30, 1981. Comments and other relevant information received after this date will be considered by the Board only to the extent practicable. Requests to be put on the Service List by: February 11, 1981. The Docket Section prepares the Service List and sends it to each person listed, who then serves comments on others on the list.

ADDRESSES: Twenty copies of comments should be sent to Docket 39173, Civil Aeronautics Board, 1825 Connecticut Avenue, N.W., Washington, D.C. 20428. Individuals may submit their views as consumers without filing multiple copies. Copies may be examined in

Room 711, Civil Aeronautics Board, 1825 Connecticut Avenue, N.W., Washington, D.C. as soon as they are received.

FOR FURTHER INFORMATION CONTACT: David Schaffer, Office of the General Counsel, Civil Aeronautics Board, 1825 Connecticut Avenue, N.W., Washington, D.C. 20428; 202-673-5442.

SUPPLEMENTARY INFORMATION: In its answer to EDR-397, 45 FR 26083, April 17, 1980, Transamerica Airlines, Inc. urged the Borad to eliminate a wide range of restrictions on pro rata charters. Most of the suggestions are discussed in the accompanying final rule, ER-1209 issued today. However, we tentatively agree with Transamerica's comments dealing with administrative costs, and propose to implement those suggestions.

Sections 207.43, 208.213, 212.43 and 214.33 place restrictions on charter costs. Only $500 of the administrative costs of organizing a charter flight may be divided among charter participants per roundtrip flight. When there are fewer than 80 charter participants, the ceiling is only $300. If total expenditures, exclusive of expenses for air transportation or land tours, exceed $750 per roundtrip flight, the expenditures must be supported by properly authenticated vouchers.

Air carriers and foreign air carriers are no longer required to file tariffs with the Civil Aeronautics Board for their charter flights (ER-1125, 44 FR 33056, June 8, 1979). Because the Board no longer has oversight over the more important areas of charter rates, fares, and charges, it is unreasonable for us to continue to monitor charges for administrative costs in those same charters. In the transition to deregulation, we are seeking to eliminate this type of unnecessary governmental intrusion. Therefore, we propose that the restrictions on charges for administrative costs be removed.

The requirement that authenticated vouchers be produced if the total expenditures of a charter, exclusive of air transportation or land tours, exceeds $750 is similarly outdated. Continuation of the requirement, even if the qualifying amount were raised, would result in unnecessary paperwork and a continuing regulatory intervention that we no longer favor. We therefore propose to eliminate this requirement.

Accordingly, the Civil Aeronautics Board proposes to amend Chapter II of 14 CFR, as follows:

PART 207—CHARTER TRIPS AND SPECIAL SERVICES

§ 207.43 [Amended]

1. In Part 207, *Charter Trips and Special Services*, § 207.43(c) and (d) would be removed and reserved.

PART 208—TERMS, CONDITIONS, AND LIMITATIONS OF CERTIFICATES TO ENGAGE IN CHARTER AIR TRANSPORTATION

§ 208.213 [Amended]

2. In Part 208, *Terms, Conditions, and Limitations of Certificates to Engage in Charter Air Transportation*, § 208.213(c) and (d) would be removed and reserved.

PART 212—TRIPS BY FOREIGN AIR CARRIERS

§ 212.43 [Amended]

3. In Part 212, *Charter Trips by Foreign Air Carriers*, § 212.43(c) and (d) would be removed and reserved.

PART 214—TERMS, CONDITIONS, AND LIMITATIONS OF FOREIGN AIR CARRIER PERMITS AUTHORIZING CHARTER TRANSPORTATION ONLY

§ 214.33 [Amended]

4. In Part 214, *Terms, Conditions, and Limitations of Foreign Air Carrier Permits Authorizing Charter Transportation Only*, 214.33(c) and (d) would be removed and reserved.

Care Labeling of Textile Products and Leather Clothing; Extension of Time To File Technical Comment

AGENCY: Federal Trade Commission.

ACTION: Extension of time to file technical comment on proposed rule.

SUMMARY: On January 5, 1981, notice of approval, in substance, of the amendments to the Trade Regulation Rule Concerning Care Labeling of Textile Products and Leather Clothing was published in the **Federal Register**, 46 FR 935. Opportunity to submit technical comment on the proposed rule was opened until Feburary 4, 1981. This notice extends the comment period to March 6, 1981.

DATES: Comments on the drafting of the changes made in the rule must be filed no later than March 6, 1981.

ADDRESS: Send comments to Secretary, Federal Trade Commission, 6th & Pennsylvania Avenue, N.W., Washington, D.C. 20580. Submissions should be labeled, "Care Labeling Amendment."

FOR FURTHER INFORMATION CONTACT: Earl Johnson, Federal Trade Commission, 6th and Pennsylvania Avenue, N.W., Washington, D.C. 20580, (202) 724-1362.

SUPPLEMENTARY INFORMATION: The Commission has received requests for extension of up to 60 days in which to file technical comments. The basis for the requests for extension point out the several significant changes since the earlier proposal and the fact that the rule now covers such a broad range of textile products.

The record has been opened only for the submission of technical comments on the extent to which the language chosen in the published draft rule is suited to achieving the Commission's intentions. However, the Commission has determined that a limited extension of 30 days is in the public interest. Accordingly, all technical comments must be filed no later than March 6, 1981. The Commission anticipates that no further extension of time will be necessary.

By direction of the Commission.

Regulations Governing Application for License for Major Unconstructed Projects and Major Modified Projects; Application for License for Transmission Lines Only; and Application for Amendment to License

AGENCY: Federal Energy Regulatory Commission, DOE.

ACTION: Notice of Proposed Rulemaking.

SUMMARY: The Federal Energy

Regulatory Commission (Commission) proposes to amend the regulations governing three kinds of licensing under Part II of the Federal Power Act (Act) for: (1) major water power projects that have an installed generating capacity greater than 1.5 megawatts and that would either utilize the water power potential of a dam that, at the time application is filed, is not constructed ("major unconstructed project") or that would change the state of existing project works so as to produce a significant increase in the normal maximum surface area or elevation of an impoundment or otherwise produce a significant envrionmental impact ("major modified project"); (2) only the transmission lines that transmit power from a licensed water power project or other hydroelectric project authorized by Congress to the point of junction with the distribution system or with the interconnected primary transmission system; and (3) any amendment to a license that would entail a change in the physical features, plans, mode of operation, or constuction period of project or its boundary.

The proposed rule would also make conforming changes in §§ 4.31, 16.7, 131.2, and Appendix A of Part 2 of the Commission's requirements. The proposed regulations would reorganize the license applications. The regulations are designed to ease the burden of preparing applications and to assist the Commission in processing applications for license. The rulemaking is therefore expected to expedite hydropower development.

Regulations Governing Applications for License for Major Unconstructed Projects and Major Modified Projects; Applications for License for Transmission Line Only; and Applications for Amendment to License; Proposed Rulemaking

Issued: January 23, 1981.

The Federal Energy Regulatory Commission (Commission) proposes to amend the regulations governing applications for license under Part I of the Federal Power Act (Act) for: (1) major water power projects with an installed generating capacity greater than 1.5 megawatts (MW) that would either utilize the water power potential of a dam that, at the time application is filed, is not constructed ("major unconstructed project") or that would change the state of existing project works so as to produce a significant increase in the normal maximum surface area or elevation of an impoundment or otherwise produce a significant environmental impact ("major modified project"); (2) only the transmission lines that transmit power from a licensed water power or other hydroelectric project authorized by Congress to the point of junction with the distribution system or with the interconnected primary transmission system; and (3) any amendment to a license that would entail a change in the physical features, plans, mode of operation, or construction period of the project or its boundary.

The proposed rule would also make conforming changes in §§ 4.31, 4.50, 16.7, 131.2, and Appendix A of Part 2 of the Commission's regulations.

I. Background

This rulemaking is the third phase of a program of licensing reform for all projects within the Commission's jurisdiction built for the generation of electrical energy by means of water power. The first phase of this reform was instituted in 1978, when the Commission issued the so-called "short-form" application procedures for all "minor" projects, *i.e.*, those with a capacity of 1.5 MW or less.[1]

On October 22, 1979, the Commission issued rules which prescribe general filing requirements and evaluation procedures applicable to both preliminary permit and license applications, and which simplify the procedures for application for preliminary permits, amendments to permits, and cancellations of permits.[2]

On November 19, 1979, the Commission next issued rules that establish application procedures for licensing major projects which are located at existing dams and have a generating capacity of greater than 1.5 MS.[3]

The Commission has also issued related rules to encourage development of specialized kinds of hydroelectric facilities. It recently established procedures to exempt from all or part of Part I of the Act any small conduit hydroelectric facility that has a generating capacity of 15 MW or less.[4] Similarly, the Commission issued rules on November 7, 1980, setting forth procedures to exempt from all or part of Part I of the Act certain small hydroelectric projects having a proposed installed generating capacity of 5 MW or less.[5]

The existing requirements for the types of license applications which are affected by this rulemaking are located in various parts of Title 18 of the Code of Federal Regulations. Substantive requirements applicable to one or all of these applications may be found in §§ 2.80 and 2.81, Appendix A to Part 2, §§ 4.40, 4.41, 4.70, 4.71, 5.1 through 5.4, 16.7, 131.2, 131.3, and 131.4 of the Commission's regulations. A potential applicant faces the prospect of meeting information requirements embodied in up to 23 separate exhibits.

The proposed rules set forth in this notice are designed to ease the burden of compliance in several ways. First,

[1] Order No. 11, "Regulations Governing Applications for Short-form License (Minor)" (Docket No. RM78–9), issued September 5, 1978, 43 Fed. Reg. 40215, September 11, 1978. The 1.5 MW capacity criterion was based on the fact that the Commission is authorized under Section 10(i) of the Act (16 U.S.C. § 803(i)) to give less intensive scrutiny to minor projects. The Public Utility Regulatory Policies Act of 1978 ("PURPA") (16 U.S.C. § 2705 et seq.) encourages development of small hydroelectric power projects with an installed capacity of 15 MW or less at existing dams. Among other measures, PURPA mandates simplified and expeditious licensing for such small water projects. The Energy Security Act of 1980 (94 Stat. 611) increases that capacity level to 30 MW. The first phase of the Commission's reforms therefore covered only a portion of the projects identified under PURPA.

[2] Order No. 54, "Regulations Prescribing General Provisions for Preliminary Permit and License Applications; and Regulations Governing Applications for Amendments to and Cancellation of Permits" (Docket No. RM79–23), issued October 22, 1979, 44 FR 61328, October 25, 1979.

[3] Order No. 59, "Regulations Governing Applications for License for Major Projects—Existing Dams" (Docket No. RM79–36), issued December 16, 1979, 45 FR 75383, December 20, 1979.

[4] Order No. 76, "Exemptions of Small Conduit Hydroelectric Facilities from Part I of the Federal Power Act" (Docket No. RM79–35), issued April 18, 1980, 45 FR 28085, April 28, 1980.

[5] Order No. 106, "Exemption from All or Part of Part I of the Federal Power Act of Small Hydroelectric Power Projects with an Installed Capacity of 5 Megawatts or Less" (Docket No. RM80–65), issued November 7, 1980, 45 FR 76115, November 16, 1980.

they reduce the requested information that is needed for the Commission to carry out its duties under existing law in an informed and responsible manner.[6] For example, the provisions requiring extensive documentation of the nature of the applicant and its authority to file the application have been eliminated and requirements relating to evidence of compliance with state laws have been simplified.[7] This in no way relieves the applicant of the obligation comply with any applicable state law not preempted by Part I of the Act.

Second, the Commission has consolidated the requests for information according to related subject matter. All paragraphs and exhibits requesting information on environmental matters [8] have been consolidated into Exhibit E (Environmental Report), required under § 4.41(f). Rational organization of the requirements should reduce confusion and redundancy in the materials submitted.

Finally, the rules minimize the element of subjective interpretation in the Commission's requirements by reducing the requests for information, where possible, to simple, objective, descriptions of what is desired. The Commission believes that clearer, simpler requirements and a cooperative effort will help avoid the application deficiencies that have plagued the licensing program in the past.

Projects of the type covered by this rulemaking usually result in more significant environmental impacts than do water power projects at existing dams which do not entail significant construction or alteration of the impoundment level. Under the proposed rule, the Commission therefore requires of any applicant for a major unconstructed project or a major modified project an Environmental Report of considerably greater detail than it does for smaller projects or most projects at existing dams. In conjunction with this requirement, the Commission is revising its National Environmental Policy Act regulations which specify that any Environmental Report must be tailored to the size and type of water power project for which the applicant seeks a license.[9]

Under the proposed rule, an applicant for license of a project with an installed generating capacity of 5 megawatts or less may file under the Commission's abbreviated application procedures. The Commission is proposing in a companion rulemaking that abbreviated application procedures be applied to all projects with a total generating capacity of 5 MW or less.[10] However, this change would not alter the current requirement that a more extensive Environmental Report (Exhibit E) be filed for any major unconstructed or major modified project with an installed capacity in Excess of 1.5 MW.

II. Initial Regulatory Flexibility Analysis

The Commission's statement concerning the impact of this rulemaking on small entities is combined with the analysis of the proposed rulemaking governing minor water power projects in Docket No. RM81–10, issued as a companion to this rulemaking.

III. Summary of the Proposed Regulations

A. Major Unconstructed Projects and Major Modified Projects

§ 4.40 Applicability and definitions. This section states that §§ 4.40 and 4.41 apply to any application for an initial license for a major unconstructed project, and an initial license or new license for a major modified project. Applications for license of major water power projects with an installed generating capacity of 5 MW or less must be filed under §§ 4.60 and 4.61 of the Commission's regulations. Section 4.40 defines "major unconstructed project", "major modified project", "initial license", and "new license", and offers the assistance of the Commission staff in determining whether §§ 4.40 and 4.41 apply to the applicant's proposed project.

§ 4.41 Contents of application. This section describes the contents of an application for a license for a major unconstructed project or a major modified project. The rule requires applicants to consult with local, state, and Federal natural resource agencies prior to filing their applications for license. These regulations follow other Commission procedures by affording other agencies an opportunity to review the proposed development and to be part of the planning process before the application has been filed with the Commission. Otherwise, proceedings might often be delayed while agencies consider the effects of projects on their areas of responsibility and fashion recommendations. With pre-application consultation, key environmental issues will be identified and addressed at an earlier point in the process and the Commission's own required consultation with other agencies will be expedited.[11] The applicant must allow at least 60 days for each agency consulted to respond to the applicant's request for documentation of the consultation process. In addition, the Commission will supply to each such agency a copy of the completed application, as filed, in order to provide further opportunity for comment.

(a) *Initial statement.* The initial statement provides certain basic information necessary for identification and orientation purposes, including the nature of the application, the name, business address, and telephone number of the applicant and its authorized agents, the nature of the applicant, and the name and location of the project. The applicant is also required to state that it has complied with the laws of the state where the project is located with respect to obtaining property rights and the rights to appropriate, divert, and use water for power purposes, and with respect to obtaining authorization to engage in the business of producing, transmitting, and distributing power, and any other business necessary to

[6] Section 405 of PURPA (16 U.S.C. § 2705) provides that the Commission's simplified licensing procedures must be "consistent with the applicable provisions of law" and that no project covered by the procedures will be exempted from "any requirement applicable to any such project under the National Environmental Policy Act of 1969, the Fish and Wildlife Coordination Act, the Endangered Species Act, or any other provision of Federal Law."

[7] See existing §§ 4.40(b) and 4.41—Exhibits A–F. These requirements have been distilled to simple statements in the initial portion of the application under § 4.41(a). Since the entire application is subscribed and verified under § 1.16 of our rules, the statements themselves will suffice as evidence. Additional information will be requested in cases where it is needed.

[8] See existing §§ 2.80, 2.40(k) and (l), 4.41 (Exhibits H, R, S, V, and W, and Appendix A to Part 2.

[9] Sections 2.80 through 2.82, constituting most of the Commission's existing environmental review regulations, would be replaced under the rulemaking implementing the National Environmental Policy Act of 1969 (NEPA) in Docket No. RM79–69. These changes are intended to conform the Commission's regulations to the guidelines of the Council on Environmental Quality. Appendix A of Part 2 would be amended and transferred to new Part 380 under the same rulemaking. 44 FR 50052, August 27, 1979.

[10] "Regulations Governing Applications for License for Minor Water Power Projects and Major Water Power Projects 5 Megawatts or Less," (Docket No. RM81–10), issued January 21, 1981.

[11] Several statutes, including PURPA, require the Commission to consult with other agencies. Section 405 of PURPA provides that, prior to issuing a license for a project which fits the PURPA criteria, the Commission must "provide opportunity for consultation with the Council on Environmental Quality and the Environmental Protection Agency with respect to the environmental effects of such project." This duty will be carried out in accordance with our established procedures for consultation during the license application review process. Moreover, in certain circumstances, other agencies may have concurrent jurisdiction with respect to authorization of a project. Prior consultation by applicants will facilitate coordination with these other agencies. *See* section 10(c) of the Act, 16 U.S.C. § 803(c).

accomplish the purposes of the requested license.[12]

(b) *Exhibit A.* This exhibit provides a description of the physical structures and features of the project. If the project includes more than one dam and associated facilities, each such discrete development must be described separately. The exhibit also includes a tabulation of any lands of the United States that are enclosed within the project boundary. This tabulation is necessary in order to record accurately the lands which have been reserved from entry, location, or other disposal pursuant to section 24 of the Act, 16 U.S.C. 818.

(c) *Exhibit B.* A statement of project operation and resource utilization is provided by this exhibit. The exhibit calls for a description of the available water supply and technical documentation of the manner in which the applicant proposes to utilize that water supply for the generation of power. The applicant must also explain how it intends to sell the power. Finally, the applicant must describe any plans it has for future hydro-electric development on the affected stream. The information in this exhibit will assist the Commission in determining whether the applicant's existing or proposed development and operation comport with optimum development of the waterway, as required by section 10(a) of the Act, 16 U.S.C. 803(a).

(d) *Exhibit C.* The third exhibit provides a proposed construction schedule for new construction on the project and a construction history for existing project works, including the dates of commencement and completion of construction and the date of first commercial operation.

(e) *Exhibit D.* This exhibit provides a statement of costs and financing. If the applicant seeks a new license for a proposed change in the existing state of project works or project operations which would result in a significant increase in the normal maximum surface area of elevation of an existing impoundment, and is not a municipality or a state, it must provide an estimate of the amount that would be payable (net investment) if the United States exercised its right to take over the project upon expiration of the license pursuant to section 14 of the Act, 16 U.S.C. § 807.

If the applicant seeks an initial license, and any portion of the proposed project consists of previously constructed, unlicensed water power structures or facilities, a statement of the original cost of those project works and the corresponding land and water rights must be provided. The Commission is required by section 4(b) of the Act, 16 U.S.C. § 797(b) to obtain information on the original cost of a project, in order to determine the economic viability of the project and the quality of the applicant's plan.

Estimated costs of any proposed new development and estimated annual costs must also be provided, as well as information concerning the value of project power to the applicant and the sources and extent of financing and annual revenues available to meet the estimated costs. This information would enable the Commission to assess the economic and financial viability of the project.

(f) *Exhibit E.* This exhibit provides a report on the environmental resources of the project, the impacts of the project on those resources, the proposed measures to mitigate the impacts or to protect and enhance the resources, and an environmental assessment of alternative sites, facility designs, and energy options. The information required is more detailed and extensive than the information required by the existing regulations governing applications for major projects—existing dams.[13] The more stringent requirements are justified on the basis that there are greater impacts associated with the construction of dams and the creation of impoundments, or any significant modification of an existing dam which would increase the maximum surface area or elevation of the impoundment or otherwise cause a significant environmental impact.

The Environmental Report contains a general description of the environment of the proposed project area and detailed analysis of water use and quality; fish, wildlife and botantical resources; historic and archaeological resources; socio-economic impacts; geological and soil resources; recreational resources; aesthetic resources; and, land uses.

An applicant must explain why it considers any measures proposed by any agency consulted not to be appropriate.

(g) *Exhibit F.* This exhibit consists of general design drawings of the principal projects works. The drawings must show plans, elevations, profiles, and sections for each structure, and must be accompanied by sufficient information concerning structural strength and stability and other controlling factors to demonstrate that the structures are safe and adequate for their stated functions.

The applicant may file either preliminary of final design drawings with the application, and five copies of a supporting design report must accompany the drawings, describing the basis for the design depicted in the design drawings. The supporting design report must include design assumptions and the result of all design analyses in sufficient detail for staff to make an independent assessment of the safety and adequacy of the proposed project works.

(h) *Exhibit G.* The final exhibit is a map of the project. The map must show the geographical location of the project, the physical interrelationships of project works and other features, a project boundary enclosing the project purposes, and any lands of the United States that are within the project boundary.

B. Transmission Lines

Sections 4.70 and 4.71, governing applications for license for transmission lines only, would be revised to direct applicants to use the exhibits provided in § 4.41 or § 4.61, depending upon the installed generating capacity of the project served by the transmission line and whether the line is constructed at the time of a license application. All applications for license for transmission line only must include an initial statement indicating the name and address of the applicant, the name of the project to which the transmission line will be connected, and the proposed market for the power.

An application for license of any unconstructed transmission line connected to a water power project with an installed capacity of more than 5 MW must include the exhibits required under § 4.41, to the extent that those requirements ar appropriate to transmission lines. Applications for license for any line that is already constructed or that is unconstructed but proposed to be connected to a project with a capacity of 5 MW or less must include the short-form exhibits required under § 4.61, to the extent that those requirements are appropriate to transmission lines.

C. Amendment of License

Sections 5.1 through 5.4 would be revoked, and the regulations governing applications for amendment of a license would be transferred to a new subpart of Part 4 of the regulations. Under new Subpart L, all applications for amendment of a license must include an initial statement indicating the name, address, and telephone number of the applicant, a description of the proposed changes, and the reasons for the

[12] *See* section 9(b) of the Act, 16 U.S.C. § 802(b).

[13] *See* § 4.51(f) of the Commission's regulations.

changes. Subpart L then refers applicants to § 4.41, 4.51 or 4.61, depending upon the installed generating capacity of the project and whether or not the dam and impoundment are constructed at the time the application is filed.

An application for amendment of a license for a major unconstructed or major modified project must include the exhibits required under § 4.41. An application for amendment of a license for a major project—existing dam must include the exhibits required under § 4.51. Lastly, an application for amendment of a license for a minor hydroelectric power project must include the exhibits required under § 4.61, but if the project is between 1.5 MW and 5 MW at the site of a dam proposed to be constructed after the issuance of the amendment, the application must include an Environmental Report (Exhibit E) from § 4.41.

III. Other Proposed Changes and Deletions

In addition to the described amendments to §§ 4.40, 4.41, 4.70, 4.71, and 5.1 through 5.4, the Commission proposes further changes to the existing regulations. Section 4.50, which defines the applicability of the major project—existing dam regulations, would be amended to indicate that §§ 4.50 and 4.51 do not apply to those projects that fall within the category of major modified projects. The proposed Phase III regulations govern such projects and are referenced in § 4.50(a). Section 4.31 would be amended to reflect the nomenclature of §§ 4.40 and 4.41.

Section 4.51 is amended to make clear the applicant's responsibilities with respect to pre-application consultation with Federal, state, and local agencies. The requirements of the documentation process are noted at he beginning of § 4.51, and are removed from other paragraphs of the rules.

Section 16.7 would be revised to refer applicants for a "non-power license" to the requirements of § 4.51 ("major project—existing dam").

Finally, the proposed rule would revoke four existing provisions of the Commission's regulations. The title of Appendix A of Part 2, which prescribes the Environmental Report required of applicants for license under the Act, is revised because the proposed rule contains a new environmental report (Exhibit E). With the adoption of the rule, Appendix A would no longer apply to any type of hydroelectric license. Section 131.2, which prescribes the proper form for an application for license, would be revoked, since the proposed rule contains a new application format. With the adoption of the proposed rule, § 131.2 would no longer apply to any type of hydroelectric license. Similarly, §§ 131.5, which prescribes the form for an application for transmission line only, and § 131.30, which prescribes the form for amendment of license, would be revoked, since the proposed rule contains new application formats for both circumstances. With the adoption of the proposed rule, §§ 131.5 and 131.30 would no longer apply to any type of hydroelectric license.

Subpart E—Application for License for Major Unconstructed Project and Major Modified Project

§ 4.40 Applicability and definitions.

(a) *Applicability.* The provisions of §§ 4.40 and 4.41 apply to any application for an initial license for a major unconstructed project that would have a total installed capacity of more than 5 megawatts, and any application for an initial or new license for a major modified project with a total installed capacity more than 5 megawatts. An applicant for license for any major unconstructed or major modified water power project that would have a total installed generating capacity of 5 megawatts or less must submit application under §§ 4.60 and 4.61.

(b) *Definitions.* For the purposes of this subpart:

(1) "Initial license" means any license for a water power project that is issued under the Federal Water Power Act of 1920 or the Federal Power Act.

(2) "Major unconstructed project" means any unlicensed water power project that is proposed to:

(i) have a total installed generating capacity of more than 1.5 MW; and

(ii) use the water power potential of a dam and impoundment which, at the time application is filed, has not been constructed.

(3) "Major modified project" means any major project—existing dam, as defined in § 4.50(b)(5) of this chapter, that is proposed to include:

(i) any repair, modification or reconstruction of an existing dam that would result in a significant change in the normal maximum surface area or the normal maximum surface elevation of an existing impoundment; or surface area or the normal maximum surface elevation of an existing impoundment; or

(ii) any change in existing project works or operations that would result in a significant environmental impact.

(4) "New license" means any license for a water power project that is issued

under the Federal Power Act after the initial license for that project, except an annual license issued under section 15 of the Federal Power Act.

(c) *Guidance from Commission staff.* A prospective applicant for a license for a major unconstructed project or major modified project may seek advice from the director of the Commission's Division of Hydropower Licensing regarding the applicability of those sections to its project [see § 4.31(g)], including the determinations whether any proposed repair, modification or reconstruction of an existing dam would result in a significant change in the normal maximum surface elevation of an existing impoundment, or whether any proposed change in existing project works or operation would result in a significant environmental impact.

(d) *Consultation.* Each application for license for a major unconstructed project or a major modified project must be prepared after consultation with the appropriate Federal, state and local natural resources agencies, which are to be given the opportunity to comment on the proposed project prior to filing of the application. A list of agencies to be consulted may be obtained from the Director of the Commission's Division of Hydropower Licensing. If any agency that an applicant is required to consult fails to provide documentation of the consultation process within a reasonable time, in no case less than 60 days after such documentation is requested, the applicant may submit a summary of the consultation and any recommendations of the agency.

(iii) an identification of all borrow areas and quarry sites and an estimate of required quantities of suitable material;

(iv) stability and stress analyses for all major structures and critical abutment slopes under all probable loading conditions, including seismic and hydrostatic forces induced by water loads up to the Probable Maximum Flood as appropriate; and

(v) the bases for determination of seismic loading and the Spillway Design Flood in sufficient detail to enable independent evaluation.

(4) The applicant must submit five copies of the supporting design report described in subparagraph (3) above (not fourteen copies as required under § 4.31(b) of the Commission's regulations) at the time preliminary and final design drawings are submitted to the Commission for review.

(h) *Exhibit G* is a map of the project that must conform to the specifications of § 4.32. If more than one sheet is used, the sheets must be numbered consecutively, and each sheet must bear a small insert sketch showing the entire project and indicating that portion depicted on the sheet. If at any time after the application is filed there is any change in the project boundary, the applicant must submit, within a reasonable period following the completion of project construction, a final Exhibit G showing the extent of such changes.

The map must show:

(1) *Location of the project and principal features.* The map must show the location of the project as a whole with reference to the affected stream or other body of water and, if possible, to a nearby town or any other permanent monuments or objects, such as roads, transmission lines or other structures.

that can be noted on the map and recognized in the field. The map must also show the relative locations and physical interrelationships of the principal project works and other features described under paragraph (b) of this section (Exhibit A).

(2) *Project boundary.* The map must show a project boundary enclosing all of the principal project works and other features described under paragraph (b) of this section (Exhibit A). If accurate survey information is not available at the time the license application is filed, applicant must so state and a tentative boundary may be submitted. The boundary must enclose only those lands necessary for operation and maintenance of the project and for other project purposes, such as flowage, public recreation, shoreline control or protection of environmental resources. If the boundary is on land coverd by a public land survey, ties must be shown on the map at sufficient points to permit accurate platting of the position of the boundary relative to the lines of the public land survey. If the lands are not covered by a public land survey the best available legal description of the position of the boundary must be provided, including distances and directions from fixed monuments or physical features. The boundary must be described as follows:

(i) *Impoundments.* The boundary around a project impoundment must be located no more than 200 feet (horizontal measurement) from the exterior margin of the reservoir, defined by the normal maximum surface elevation, except where deviations may be necessary in describing the boundary according to the method used, or where additional lands are necessary for project purposes, such as public recreation. The boundary may be described by any combination of the following methods:

(A) contour lines, including the contour elevation [preferred method];

(B) specified courses and distances (metes and bounds); or

(C) if the project lands are covered by a public land survey, lines parallel to the lines of the survey.

(ii) *Continuous features.* The boundary around linear project features such as access roads, transmission lines and conduits may be described by specified distances from center lines or offset lines of survey. The width of such corridors must not exceed 200 feet, unless good cause is shown for a greater width. Several sections of a continuous feature may be shown on a single sheet, with information showing the sequence of continuous sections.

(iii) *Noncontinuous features.* The boundary around noncontinuous project works such as dams, spillways and powerhouses must enclose only those lands that are necessary for safe and efficient operation and maintenance of the project, or for other specified project purposes, such as public recreation or protection of environmental resources. The boundary may be described by any combination of the following methods:

(A) contour lines;

(B) specified courses and distances; or

(C) if the project lands are covered by a public land survey, lines upon or parallel to the lines of the survey.

(3) *Federal Lands.* Any public lands and reservations of the United States ("Federal lands") [*see* 16 U.S.C. § 796(1) and (2)] that are within the project boundary, such as lands administered by the U.S. Forest Service, Bureau of Land Management, or National Park Service, or Indian tribal lands, and the boundaries of those Federal lands, must be identified on the map by:

(i) legal subdivisions of a public land survey of the affected area (a protraction of identified township and section lines is sufficient for this purpose); and

(ii) the Federal agency, identified by symbol or legend, that maintains or manages each identified subdivision of the public land survey within the project boundary; or

(iii) in the absence of a public land survey, the location of the Federal lands according to the distances and directions from fixed momunments or physical features. When a Federal survey monument or a Federal bench mark will be destroyed or rendered unusable by the construction of project works, at least two permanent, marked witness monuments or bench marks must be established at accessible points. The maps show the location (and elevation, for bench marks) of the survey monument or bench mark which will be destroyed or rendered unusable, as well as of the witness monuments or bench marks. Connecting courses and distances from the witness monuments or bench marks to the original must also be shown.

(4) *Non-Federal Lands.* For those lands within the project boundary not identified under paragraph (h)(3) of this section, the map must identify by legal subdivision:

(i) lands owned in fee by the applicant and lands that the applicant plans to acquire in fee; and

(ii) lands over which the applicant has acquired or plans to acquire rights to occupancy and use other than fee title, including rights acquired to be required by easement or lease.

3. Section 4.31 is amended by revising paragraph (a)(2)(iii) to read as follows:

(iii) License for a major unconstructed project and a major modified project: §§ 4.40 and 4.41;

4. Section 4.50 is amended by revising paragraph (a) to read as follows:

§ 4.50 Applicability and definitions.

(a) *Applicability.* (1) The provisions of §§ 4.50 and 4.51 apply to any application for either an initial license or new license for a major project—existing dam that would have a total installed capacity of more than 5 megawatts, except any such project (*see* § 4.40) that would:

(i) include any proposed repair, modification or reconstruction of an existing dam that would result in a significant change in the normal maximum surface area or normal maximum surface elevation of an existing impoundment; or

(ii) include any proposed new development or change in project operation that would result in a significant environmental impact.

(2) An applicant for license for any major project—existing dam that would have a total installed capacity of more than 5 megawatts or less must submit application under §§ 4.60 and 4.61.

FEDERAL MARITIME COMMISSION

46 CFR Part 524

[General Order 23, Revised; Docket No. 81–6]

Exemption of Certain Agreements From the Requirements of Section 15, Shipping Act, 1916

AGENCY: Federal Maritime Commission.

ACTION: Proposed rulemaking.

SUMMARY: Certain agreements between common carriers by water which relate to routine administrative or housekeeping matters would be exempted from filing and approval requirements in order to lessen regulatory burdens upon ocean carriers. Such agreements have previously been routinely approved and appear to be of little or no competitive consequence.

DATES: Comments due on or before April 3, 1981.

ADDRESSES: Comments (original and 15 copies) to: Secretary, Federal Maritime Commission, 1100 L Street NW., Rm. 11101, Washington, D.C. 20573, (202) 523–5725.

SUPPLEMENTARY INFORMATION: Section 35 of the Shipping Act, 1916 (46 U.S.C. 833a) allows the Commission to exempt any class of agreements between persons subject to the Act where it finds that such exemption will not impair effective regulation, be unjustly discriminatory, or be detrimental to commerce. Pursuant to this authority, the Commission has recently published final rules exempting nonexclusive transshipment agreements and nonexclusive equipment interchange agreements from the provisions of section 15 of the Act (46 U.S.C. 814). The Commission also exempted agreements solely involving terminal facilities located in foreign countries.

The Commission is now proposing to grant an additional exemption for a class of agreements which can best be termed "non-substantive." Such agreements generally relate to routine housekeeping or administrative matters between common carrier members of conferences or rate agreements. This type of agreement: (1) reflects changes in the name of a port or country currently served; (2) substitutes officers and/or committee assignments; or (3) relates to the procurement, maintenance and sharing of office facilities, furnishings, equipment, supplies and personnel.

The Commission has previously dealt with such agreements by delegating its authority to its Managing Director, who in turn delegated it to the Bureau of Compliance. *See* Commission Order No. 1, section 7.13; Commission Order No. 201.1, section 4.06. However, it is now considering their exemption since they appear to meet the criteria of section 35, and their exemption would not impair the Commission's effective regulation pursuant to its statutory mandate.

In the event that the Commission adopts a formal rule exempting non-substantive agreements, it should be noted that the parties to such agreements may nonetheless submit them to the Commission for approval. In addition, even though certain non-substantive agreements may become exempt from the filing and approval requirements of section 15, they would have to be filed with the Commission for informational purposes if they modify an agreement which is subject to section 15.

Therefore, it is ordered, That pursuant to 5 U.S.C. 553 and sections 35 and 43 of the Shipping Act, 1916 (46 U.S.C. 833 and 841(a)), the Commission proposes to amend 46 CFR Part 524 as follows:

1. A new paragraph (d) would be added to § 524.2 to read:

§ 524.2 [Amended]

* * * * *

(d) A non-substantive agreement is an agreement between common carriers by water acting individually or through conferences which: (1) amends a previously approved agreement by reflecting changes in the name of a port or a country currently served under the agreement; (2) substitutes officers and/or committee assignments; or (3) concerns the procurement, maintenance or sharing of office facilities, furnishings, equipment, supplies and personnel.

2. Section 524.3 would be amended by adding a final sentence which reads:

§ 524.3 [Amended]

* * * and provided further, that a non-substantive agreement which modifies an agreement which is subject to the requirements of section 15 shall be filed with the Commission for informational purposes only within 30 days of its effective date.

By the Commission.

Secretary.

Separate Statement of FCC Commissioner James H. Quello

In re: Proposal to Reassign Channel 9 from New York City to a Northern New Jersey Community.

I have voted affirmatively to adopt the Notice of Proposed rulemaking looking toward reallocation of channel 9 from New York City to a northern New Jersey community. This is the initial step toward providing the State of New Jersey with its first commercial VHF station, and I fully support the action proposed today.

As the Notice has recognized, there have always been three major impediments to a reallocation of a New York City or Philadelphia VHF channel to New Jersey: (1) the singling out of a particular channel; (2) the loss of existing service by relocation; and (3) inability of a single VHF station to cover the whole state. During my term as Commissioner I have developed an ever-increasing determination to encourage and support provision of adequate television service to the State of New Jersey by whatever means within the limit of the law. In the recent past I voted for adding six new UHF stations to New Jersey, and I supported a rulemaking proposing to mandate network affiliation for New Jersey UHF stations. I voted to require additional physical presence in New Jersey for nine New York and Philadelphia stations which would include officers, personnel, and news bureaus with direct landline or microwave connections to main studios. I was the only commissioner who voted for placing the transmitter of a New Jersey station (Channel 58) on top of the World Trade Center in order to obtain substantial additional New Jersey coverage.

While I have voted in favor of the proposed rulemaking today, I wish to make it clear that this does not alter my views with respect to the qualifications of RKO General, Inc. to remain a licensee of WOR-TV, Channel 9, New York City. *RKO General, Inc. (WNAC-TV)* 78 FCC 2d 1 (1980). While the Channel 9 situation may involve conflicting interests, I believe today's Notice of Proposed Rulemaking will contribute to an assessment of the priorities of such interests and will implement an early and expeditious provision of a commercial VHF channel allocation for the State of New Jersey—an allocation long overdue and much in demand.

National Highway Traffic Safety Administration

49 CFR Part 571

[Docket No. 80-18; Notice 2]

Federal Motor Vehicle Safety Standards; Seat Belt Assembly Anchorages; Extension of Comment Period

AGENCY: National Highway Traffic Safety Administration (NHTSA).

ACTION: Extension of comment period.

SUMMARY: On December 11, 1980 (45 FR 81625), the National Highway Traffic Safety Administration issued a notice of proposed rulemaking to amend Safety Standard No. 210, *Seat Belt Assembly Anchorages,* to require all vehicles with automatic restraint systems at the right front designated seating position to be equipped with anchorages for Type 1 lap belts at that position. The proposal would also require all light-weight vehicles to have anchorages or pre-drilled holes suitable for the installation of anchorages for tether straps on child restraint systems at all rearmost designated seating positions. The notice of proposed rulemaking specified a comment period closing date of February 9, 1981. The agency has received petitions from the Motor Vehicle Manufacturers Association of the United States, Inc. (MVMA) and from Fiat Motors of North America, Inc. to extend the comment period of this rulemaking for one month, to March 11, 1981.

Both petitioners state that more time is needed to respond to the proposed requirements because of delays occasioned by the closing of operations during the Christmas and New Year holidays. The MVMA also stated that a report by Pioneer Engineering and Manufacturing Company, referenced in the notice, was not available in the NHTSA Docket at the time the proposal was issued, and that this has caused them some delay. That report was placed in the Docket during the proceeding on *Child Restraint Systems* on February 28, 1980 (74-09-GR-109). However, since it was not referenced under the docket number and notice number of the subject rulemaking, some confusion apparently resulted. In light of this fact, and in view of delays caused by the holidays, the agency believes the petitioners' request has merit. Therefore, the comment period is hereby extended until March 11, 1981.

DATES: New comment closing date: March 11, 1981.

ADDRESSES: Comments should refer to the docket number and notice number and be submitted to: Docket Section, Room 5109, Nassif Building, 400 Seventh Street, S.W., Washington, D.C. 20590 (Docket hours: 7:45 a.m. to 4:15 p.m.).

49 CFR Part 571

Federal Motor Vehicle Safety Standards; Grant of Petition for Rulemaking

AGENCY: National Highway Traffic Safety Administration (NHTSA).

ACTION: Grant of Petition for Rulemaking.

SUMMARY: The purpose of this notice is to grant a petition for rulemaking to amend Safety Standard No. 209, *Seat Belt Assemblies* (49 CFR 571.209). The petition requested that the standard be amended to update technical material that is incorporated by reference in the standard. Specifically, the petition asked that the ASTM reference in paragraph S4.3(a)(1) of the standard, regarding corrosion resistance, be changed from "A166-61T" to "B456-71". The ASTM "A166-61T" standard was discontinued in 1967 and replaced by "B456-71", but Standard No. 209 has not been amended to incorporate the up-dated version. The petition stated that the newer version more adequately reflects modern technology, and pointed out that, because of its age, "A166-61T" is becoming increasingly difficult to obtain. The agency has determined that these arguments have merit, and the petition is hereby granted.

The petition also requested that two minor technical changes be made in Standard No. 209 (typographical errors). However, since those changes have already been made, it is not necessary to further amend the standard in that regard (45 FR 29045, May 1, 1980).

The agency intends to initiate rulemaking in response to this petition, and to conduct a general review of Safety Standard No. 209 to update aspects of the standard that should be changed or deleted because of technological changes that have occurred since the standard was first issued.

The granting of a petition for rulemaking does not signify that a final rule will necessarily be issued. That determination is made during the course of the rulemaking proceeding, in accordance with statutory criteria.

INTERSTATE COMMERCE COMMISSION

49 CFR Part 1044

[Ex Parte No. MC-58 (Sub-No. 1)]

Regulations Governing Designation of Process Agents by Motor Carriers and Brokers—Modification

AGENCY: Interstate Commerce Commission.

ACTION: Notice of Proposed Rulemaking.

SUMMARY: The Commission proposes that authorized motor carrier tariffs and schedules contain a list of the carriers' designated service of process agents. Motor carriers which are not required to file tariffs or schedules may continue to use the Commission's prescribed form for designation or may file the designations in tariffs. Brokers would continue to designate agents through use of the prescribed form.

The purpose of the proposal is to allow the public easier access to identity of carriers' agents, to reduce the carriers' paperwork burden, and to conserve Commission resources.

DATES: Comments must be received on or before March 19, 1981.

ADDRESS: An original and 15 copies of any comments should be sent to: Room 5340, Interstate Commerce Commission, Washington, D.C. 20423.

FOR FURTHER INFORMATION CONTACT: Martin E. Foley, (202) 275-7348.

SUPPLEMENTARY INFORMATION: Section 10330(b) of the Interstate Commerce Act (49 U.S.C. 10330(b)) requires the motor carriers and brokers of transportation file with the Commission the name and address of an agent upon whom court process can be served (commonly known as "process agents"). Brokers must designate an agent in each State in which the broker maintains an office or writes contracts. Motor carriers must designate an agent not only for operations conducted in States named in their Commission-issued authorities, but also for each State traversed in the course of such operations. Even motor carriers providing transportation only within, or between, foreign countries must designate an agent in each State traversed in the course of that transportation.

At the present time, motor carriers and brokers file their designation of agents with the Commission by aprescribed form. Whenever a designation is changed, added or cancelled, a new form must be filed. Keeping these filings current, and disseminating that information in response to public inquiry, expends considerable Commission resources.

Under the proposed rules, motor carriers filing tariffs or schedules would no longer be required or permitted to designate their process agents by means of the forms now used. Rather, the names and addresses of those agents would be published in the carriers' tariffs or schedules. Since carriers are otherwise obligated to file and post their tariffs and schedules, must keep them open to public inspection, and must allow any person to subscribe to those publications, there would ensue a lessened need for the public to contact the Commission to determine the identity of designated agents. Thus, the carriers will benefit by utilizing their tariff/schedule publications to provide information now required to be filed in a separate fashion; the public will gain by having that information more readily obtainable; the Commission will receive fewer requests for information which will be more readily available through the tariffs and schedules.

The manner of providing tariff/schedule designation of agents has been made as flexible as possible: carriers may name their process agents in each of their own publications filed with the Commission; or may file a separate process agents tariff/schedule as a governing publication to their other filed tariffs and schedules; or they may participate in an agency tariff publication serving as a governing publication to the individual carrier's own tariffs or schedules. The last option may prove to be the most practicable. We anticipate that several organizations which have established a network of nationwide process agents will become tariff agents for the purpose of making that network available to carriers. Upon execution of proper power of attorney and payment of reasonable fees—perhaps on a per-State basis—carriers could avail themselves of these established process agent services.

Since brokers are not otherwise required to file tariffs/schedules with the Commission, the proposed rules do not impose on them the requirement that they designate process agents in that form. However, there is no prohibition against broker use of tariff agents to effect compliance with the requirement for designation of process agents. Thus, brokers will use the prescribed form to identify process agents by: (1) naming their own established agents; (2) by naming non-tariff firms or organizations which provide an established agency network; or (3) by naming tariff-filing firms or organization which provide an established agency network. As now designed, the proposed rules will not permit designation of process agents through *broker*-filed tariffs or schedules. Although we could allow that option, we believe brokers would uniformly opt to use the prescribed form and would not utilize the alternative of filing their own tariffs. We invite comment on this point, and if we receive interest in broker-filed tariffs/schedules, we will reconsider the matter.

Not all motor carrier operations are subject to the tariff/schedule filing requirements of the Interstate Commerce Act. For example, tariffs and schedules are not required to be filed by motor carrier traversing one or more States—for operating convenience only—when providing the movement of goods from one point in a foreign country to another point in that same foreign country. And for that type of operation the proposed rules do not impose on motor carriers the need to designate process agents in tariff form. Rather, we propose that either the tariff form or the Commission's prescribed form may be utilized to effect compliance. Again, we believe that the use of tariff agents might provide the most practicable mechanism for compliance.

As discussed above, we do not propose that brokers or every motor carrier be required to designate their service of process agents in tariff form. We realize that the proposed rules permit two merchanisms for designation of agents: (1) in tariff form and (2) in prescribed form. We seek comments on the advisability of a two-system reporting of process agents. What advantages will result? What disadvantages? Would continuation of a single system be more desirable? If so, should that single system be the prescribed form for all reporting parties; the tariff form for all parties; or some other form—and what should that form be? We also invite comments on all other aspects of the proposed rules set forth in the Appendix.

Regulatory Flexibility: Certification of No Adverse Impact

5 U.S.C. 603 requires that the Commission examine the impact of the proposed rules on small business and small organizations. In this proceeding, we do not propose new reporting requirements; rather, we seek to modify

the process by which existing requirements are met. As previously explained the proposed mechanics for reporting designated process agents should facilitate—not complicate—the existing requirements. Thus, we anticipate no adverse economic impact on small businesses or organizations. We do, however, invite comment on this issue.

This Notice of Proposed Rulemaking is issued under 5 U.S.C. 553 and 49 U.S.C. 10321.

It does not appear that this proposal will significantly affect the quality of the human environment or conservation of energy resources.

Dated: January 22, 1981.

By the Commission, Chairman Gaskins, Vice Chairman Alexis, Commissioners Gresham, Clapp, Trantum, and Gilliam.

Agatha L. Mergenovich,

Secretary.

Appendix

We propose to revise 49 CFR Part 1044 as follows:

PART 1044—DESIGNATION OF PROCESS AGENTS BY MOTOR CARRIERS AND BROKERS

Sec.

1044.1 Applicability.
1044.2 Form of designation.
1044.3 Eligible persons—service of process agents.
1044.4 Coverage Required.
1044.5 Change of designated agents.

Authority: 5 U.S.C. 553 and 49 U.S.C. 10321

§ 1044.1 Applicability.

Motor carriers and brokers shall observe the regulations prescribed in this part in complying with the requirements of 49 U.S.C. 10330(b) relating to the filing of designations of persons upon whom court process may be served. The terms motor carrier and broker, as used here, includes any fiduciary of such motor carrier or broker as defined in § 1132.5 of this chapter—Transfers of Operating Rights.

§ 1044.2 Form of designation.

(a) *Designation by Tariff.*

Every motor carrier operating under a certificate, permit or grant of temporary authority from the Commission shall maintain a current limit of the names and complete addresses *(P.O. Box not acceptable)* of all designated process agents in each of its tariffs or schedules filed with the Commission. Alternatively, the list of process agents may be maintained in a separate governing tariff filed by the carrier or by its authorized tariff agent under power of attorney. Changes in, or additions to, the list of process agents may be filed to become effective on not less than one day's notice.

(b) *Designation by prescribed form.*

(1) Every motor carrier, for operations other than those authorized by the Commission under a certificate, permit or grant of temporary authority, shall make designation of process agents either in tariff form as set forth in § 1044.2(a), or by use of the form prescribed by the Commission for that purpose.

(2) Every broker shall make designation of process agents by use of the form prescribed by the Commission for that purpose.

(3) Designations made through use of the prescribed form shall include all States for which agent designations are requried. The prescribed form permits individual or blanket designations. Individual designations are those established specifically by the brokers and carriers themselves. Blanket designations are those established in each State by associations or corporations, and filed with the Commission. Broker and carrier use of blanket designations must specify the serving association or corporation. Brokers and carriers using this option must maintain one copy of the prescribed form with the Commission and one copy at its principal place of business.

§ 1044.3 Eligible persons service of process agents.

All persons designated as process agents (including brokers and motor carriers designating themselves as process agents) must have residence in, or maintain an office in the State for which they are designated. If an official of a State is designated, evidence of their willingness to accept service of process on behalf of the motor carrier or broker must be furnished.

§ 1044.4 Coverage required.

(a) Every broker shall designate and maintain process agents in each State in which it maintains an office or writes contracts pursuant to Commission-issued authority. Every motor carrier (including common carriers of passengers in charter service) shall designate and maintain process agents in each State in which, or through which, it operates pursuant to Commission-issued authority. Motor carriers (including private carriers) traversing States when performing service within, or between, foreign countries shall designate and maintain a process agent in each State traversed.

(b) Process agents must be maintained continuously, including a minimum of 1 year following partial or complete cessation of operations.

§ 1044.5 Change of designated agents.

Brokers and motor carriers must maintain with the Commission ever-current information of process agents. Changes of agents, or changes of addresses of agents, must be promptly filed in the same manner—i.e., in tariff form or in prescribed form—as was the information to be supplanted. Tariff changes may be made effective on not less than 1 day's notice. Changes in agents through use of the prescribed form requires that the newly submitted prescribed form show *all* required designated agents in order that the previously filed prescribed form can be discarded.

49 CFR Part 1109

[Ex Parte 320 (Sub-No. 2)]

Market Dominance Determinations and Consideration of Product Competition

AGENCY: Interstate Commerce Commission.

ACTION: Notice of Proposed Rulemaking; Reclassification.

SUMMARY: A document previously published by the Commission as a notice was erroneously classified (45 FR 83342, December 18, 1980). It should have appeared in the Proposed Rules section of the **Federal Register** under the part heading 49 CFR Part 1109. The document interpreted and implemented new provisions in Section 202 of the Staggers Rail Act of 1980 and requested comments on market dominance and whether and to what extent product competition should be a factor in determining whether rates are unreasonably high.

DATES: Effective date of this reclassification is February 2, 1981. Comments for the notice of proposed rulemaking are due by February 2, 1981.

ADDRESSES: Comments are sent to Room 5340, Interstate Commerce Commission, Washington, DC, 20423.

FOR FURTHER INFORMATION CONTACT: Richard B. Felder or Jane F. Mackall (202) 275-7656.

SUPPLEMENTARY INFORMATION: The Notice of Proposed Policy which is being reclassified by this document was published at 45 FR 83342, December 18, 1980. That decision discussed the issue of market dominance and the provisions of the Rail Act which limit the jurisdiction of the Commission to decide

whether particular rates are unreasonably high. Comments received in the proposed rulemaking proceeding in Ex Parte 320 (Sub-No. 1) which was withdrawn at 45 FR 83302, December 18, 1980, were discussed in relation to this new proceeding.

The decision also discussed product competition under section 205 and whether and to what extent it should be considered in proceedings to determine the reasonableness of rail rates.

Comments were solicited and are due by February 2, 1981. That date is being extended elsewhere in this issue.

SUMMARY: A letter petition was filed by James W. Lawson on January 23, 1981 requesting a 30 day extension of the due date for filing comments in this proceeding which interpreted and implemented new provisions in Section 202 of the Staggers Rail Act of 1980 and requested comments on market dominance and product competition. By notice of proposed policy published in the Federal Register on December 18, 1980, 45 FR 83342, (served by the Commission on December 11, 1980 as a notice of proposed rulemaking) this proceeding was instituted to implement Section 202 of the Staggers Rail Act of 1980 and comments were due on February 2, 1981. CIVIL AERONAUTICS BOARD

[Docket 38011]

Order Proposing To Fix Final Subsidy Rates for Alaska Airlines, Inc.

AGENCY: Civil Aeronautics Board.

ACTION: Summary of Order 81-1-146.

SUMMARY: The Board has proposed to fix three final subsidy rates for Alaska Airlines, Inc. The first rate, for the period from April 9, 1980, through December 31, 1980, is $1.82 million. This rate is based on an annual subsidy need of $3.78 million, derived from data for the years ended June 30 and September 30, 1980, adjusted to reflect an annual payback of $1.09 million, and further adjusted to reflect the partial year applicability. The payback is based on the carrier's previous final rate, which included the annual payback amount until April 1, 1981. (See CAB Order 78-6-161.) The second rate, for the period January 1, 1981, through March 31, 1981, is $2.67 million on an annual basis. This rate is based on an annual subsidy need of $3.75 million, also adjusted for the payback. The $30,000 reduction in annual need reflects the net impact of the new temporary mail rates recently established in the *Wien Air Alaska Mainline and Bush Mail Rates Investigation.* (See CAB Order 80-11-81.) The third rate, effective April 1, 1981, is $3.75 million annually, and reflects the elimination of the payback provision, which expires March 31, 1981.

DATES: Parties must file notices of objection by February 9, 1981 and answers and supporting documents by March 2, 1981.

Eastern Air Lines, Inc.; Order Granting Exemption

Issued Under Delegated Authority January 26, 1981. Application of Eastern Air Lines, Inc.; for an exemption from Section 416(b) of the Federal Aviation Act of 1958.

By application filed January 23, 1981, Eastern Air Lines requests that the exemption granted by the Board in Order 81-1-114, January 22, 1981, be amended to the extent necessary to permit it to provide free unlimited transportation over its domestic routes to the former hostages and their family members (spouse, parents and children) for a period up to 30 days after January 25, 1981.

We find that this request is consistent with the public interest, and therefore we will approve the exemption. We will also extend this exemption to all other U.S. air carriers.

Acordingly, acting under authority delegated by the Board in the Board's Regulations, 14 CFR 385.16,

1. We exempt all U.S. air carriers from the provisions of Section 403 of the Federal Aviation Act of 1958, and Parts 221 and 223 of the Board's Economic Regulations, insofar as the enforcement of Section 403 and Parts 221 and 223 would prevent them from providing the free transportation as described herein.

2. We will serve a copy of this order on Eastern Air Lines, Inc. and on all other U.S. air carriers.

Persons entitled to petition the Board for review of this order pursuant to the Board's Regulations, 14 CFR 385.50, may file such petitions within ten days after the date of this service.

[Docket 37294]

Priority and Nonpriority Domestic Service Mail Rates Investigation; Order To Show Cause

Adopted by the Civil Aeronautics Board at its office in Washington, D.C. on the 28th day of January, 1981.

By Order 78-11-80, the Board adopted a review procedure and updating formula for establishing final domestic service mail rates for future periods on a semi-annual basis. This order reflects all revisions adopted subsequently by the Board,[1] proposes tentative final rates, and establishes revised temporary rates for the first quarter of 1981.

In addition, it also incorporates a further modification to the formula. As indicated in PS-99,[2] with the elimination of schedule P-5(a), the carriers are no longer providing regulatory depreciation data to the Board. This makes it necessary to use the reported "book" depreciation. We have restated the 1974 base period cost data to reflect the use of book depreciation for comparative purposes and have used book depreciation in computing the proposed rates.

These rates shall serve as temporary rates for the first quarter of calendar year 1981 until the final rate order is issued. Since these rates are subject to retroactive adjustment, we waive the procedural requirements of Rule 310 with respect to the establishment of the temporary rates.

The tentative final service mail rates set forth in the attached Appendix A reflect the application of the following cost escalation factors:

1. Fuel Cost: The cost per gallon as at February 15, 1981, the midpoint of the quarter for which the rates are to be effective, is estimated by (a) computing the average monthly increase in price over the latest four months; (b) projecting the average monthly increase for a period of three months; and (c) adding the three-month increase to the November 1980 average cost per gallon (See Appendix D); and

2. Other Costs: cost escalation from April 1, 1980, to April 1, 1981, is based on a comparison of unit costs for the year ended September 30, 1979, with unit costs for the year ended September 30, 1980.

These rates represent a decrease of approximately 2.4 percent in the linehaul charges (due to a decrease in the rate of increase in fuel prices) and an increase of 6.1 percent in the terminal charges from the final rates established for the fourth quarter of calendar year 1980.

The Board tentatively finds and concludes that:

(1) The fair and reasonable final rates of compensation to be paid in their entirety by the Postmaster General pursuant to the provisions of section 406 of the Federal Aviation Act of 1958, as amended, to the carriers for the transportation of that mail described in Order 79-7-16, ordering paragraph 3, subparagraphs (c), (d) and (e), between the points listed in subparagraph (c), *supra*, the facilities used and useful therefor, and the services connected therewith, for the period January 1 through March 31, 1981, are those rates set forth in the attached Appendix A.

(2) Order 79-7-16, ordering paragraph 3(g), shall be amended to read as follows: All weight in excess of the minimum chargeable weight per container established herein shall be charged at the sum of the full linehaul charge for the applicable service established in subparagraph (e) above, and the capacity-related portion of the terminal charge per pound originated as follows:

[Rates in cents]

	Standard container	Daylight container
January 1, 1981 through March 31, 1981	3.728	3.697

(3) The fair and reasonable temporary rates of compensation for the transportation of mail by aircraft in domestic service for the period April 1, 1981, until further Board order are the final rates established for the period January 1 through March 31, 1981.

(4) The terms and conditions applicable to the transportation of each class of mail at the rates established here are those set forth in Order 79-7-16.

Therefore, in accordance with the Federal Aviation Act of 1958, as amended, particularly sections 204(a) and 406, and the Board's Procedural Regulations promulgated in 14 CFR, Part 302,

1. We direct all interested persons to show cause why the Board should not adopt the foregoing tentative findings and conclusions, and fix, determine and publish the final rates specified above to be effective January 1 through March 31, 1981;

2. We direct all interested persons having objections to the rates or to the tentative findings and conclusions proposed here to file with the Board a notice of objection within ten (10) days after the date of service of this order, and, if notice is filed, to file a written answer and any supporting documents within 30 days after service of this order;

3. If no notice is filed, or, if after notice, no answer is filed within the designated time, or if an answer timely filed raises no material issue of fact, we will deem all further procedural steps waived and we may enter an order incorporating the tentative findings and conclusions set forth here and fixing the final rates set forth in the attached Appendix A;

4. The fair and reasonable temporary rates of compensation for the transportation of mail by aircraft in domestic service for the period January 1, 1981, until further Board order are the rates set forth in the attached Appendix A; and

5. We shall serve this order upon all parties to this proceeding.

We shall publish this order in the **Federal Register.**

By the Civil Aeronautics Board.

Secretary.

Order Proposing to Fix Final Subsidy Rates for Wien Air Alaska

AGENCY: Civil Aeronautics Board.

ACTION: Summary of Order 81-1-145.

SUMMARY: The Board has proposed to fix two final subsidy rates for Wien Air Alaska for the periods from April 16, 1979, through December 31, 1979, and from January 1, 1980, through December 31, 1980. The Board has also proposed to set a temporary rate for the carrier effective January 1, 1981. The proposed rate for the period from April 16, 1979, through December 31, 1979, is $3.59 million, of which $789,701 is still due and payable to the carrier. This rate is based on actual calendar year 1979 results using a 12 percent past period rate of return. The tax allowance portion of this rate, $403,348, could be subject to full or partial refund, depending on Wien's tax position during the tax year in which it receives that portion of the rate as yet unpaid. The proposed rate for the period from January 1, 1980, through December 31, 1980, is $6.16 million of which $1.98 million is still due and payable to the carrier. This rate is based on a forecast of calendar year 1980 results using a 12.35 percent future period rate of return. The proposed temporary rate effective January 1, 1981, is $5.86 million annually. This rate is based on the rate for calendar year 1980, after adjustments to reflect the possible impact of the *Wien Air Alaska Mainline and Bush Mail Rates Investigation*, which is currently in progress, and the route awards granted to competing carriers in the *Alaskan Bush Points Show Cause Proceeding* (Order 80-9-149). Two temporary rates are being proposed: $3.11 million annually for the bush portion of Wien's eligible system, and $2.75 million annually for the mainline portion of Wien's eligible system.

DATES: Parties must file notices of objection by February 9, 1981 and answers and supporting documents by March 2, 1981.

Office of the Secretary

Commerce Technical Advisory Board; Renewal

In accordance with the provisions of the Federal Advisory Committee Act, 5 U.S.C. App. (1976), and Office of Management and Budget Circular A-63 of March 1974, after consultation with the General Services Administration, the Secretary of Commerce has determined that the renewal of the Commerce Technical Advisory Board is in the public interest in connection with the performance of duties imposed on the Department by law.

The Committee was first established by the Secretary of Commerce in January 1963, at the suggestion of the President of the United States. It has been in continuous operation since then, with the Charter renewed in accordance with the law. The original purpose for the creation of this Committee remains constant: to provide a forum for discussion of science and technology issues and their increasing importance to the economy of the nation. Research indicates that the Committee's function cannot be accomplished by any organizational element or other committee of the Department.

The Committee will continue with a balanced representation of approximately 25 members, chaired by the Department's Assistant Secretary for Productivity, Technology and Innovation, and will operate in compliance with the provisions of the Federal Advisory Committee Act.

Copies of the Committee's charter will be filed with appropriate committees of the Congress and with the Library of Congress.

Inquiries or comments may be addressed to the Committee Control Officer, Mrs. Florence S. Feinberg, Special Assistant to the Assistant Secretary for Productivity, Technology and Innovation, U.S. Department of Commerce, Washington, D.C. 20230, telephone: (202) 377-5065, or the Department's Committee Management Analyst, telephone: (202) 377-4217.

Office of the Secretary

Massachusetts Coastal Zone Management Program; Appeal by Gloucester

ACTION: Notice of Appeal.

SUMMARY: On December 29, 1980, the Secretary of Commerce received an appeal by the City of Gloucester from an objection by the Massachusetts Coastal Zone Management Office to the City's certification that a waiver of the Clean Water Act's secondary treatment of wastewater requirements would be consistent with the State's Coastal Zone Management Program. This appeal has been filed pursuant to Section 307(c)(3)(A) of the Federal Coastal Zone Management Act, 16 U.S.C. 1458(3)(A) (CZMA) and implementing regulations at 15 CFR 930.127.

DISCUSSION: The grounds for this appeal are that the activity is consistent with the objectives and purposes of the Federal CZMA. However, in this case there appears to be a preliminary issue as to whether the State's objection was issued within six months of the City's certification as specified by sections 307(c)(3)(A) of the CZMA and 15 CFR 930.63(a) of the regulations. If the objection was not so issued, the State is conclusively presumed to concur in the certification and the necessity for any appeal is removed. Consequently, any comments at this time will be relevant if addressed to this issue. If the Secretary decides that the substantive issues need

to be resolved, additional time to comment on these issues will be provided. Comments should be addressed to Linda Mabry, Office of General Counsel, U.S. Department of Commerce, Washington, D.C. 20235 by March 2, 1981.

DEPARTMENT OF ENERGY

Assistant Secretary for Fossil Energy; Proposed Contract Award

AGENCY: Department of Energy.

ACTION: Notice of Proposed Contract Award.

SUMMARY: In accordance with Department of Energy (DOE) Procurement Regulations, DOE gives public notice that a contract option is being exercised, after taking into account the existence of potential organizational conflicts of interest, because this procurement is determined to be in the best interests of the United States.

FOR FURTHER INFORMATION CONTACT:

Mr. Jeff Rubenstein, U.S. Department of Energy, Office of Procurement Operations, Room IJ-009, Forrestal Building, Washington, D.C. 20585, (202) 252-1042.

Mr. Kamel S. Youssef, U.S. Department of Energy, Office of Engineering and Component Management, Office of Fossil Energy, Room E-369, Germantown Building, Washington, D.C. 20545, (301) 353-2983.

Findings and Determination

Upon the basis of the following findings and determination, the proposed contract option described below is being exercised, recognizing the existence of potential organizational conflicts of interest pursuant to the authority of DOE Procurement Regulation 31 CFR 9-1.5409(a)(3).

Findings

1. The U.S. Department of Energy (DOE), Fossil Energy Office of Engineering and Component Management, is conducting research and development and demonstration

(RD&D) programs to develop technology that will permit rapid commercialization of processes for converting coal into products that substitute for those derived from oil and natural gas. Specific tasks within this program are being accomplished in an orderly manner under tight schedules to ensure the earliest availability of technically proven coal conversion technologies for use by the emerging synthetic fuels industry.

2. In order to obtain independent assessments of key portions of Energy RD&D programs, DOE entered into a contract in 1976 with the Engineering Societies Commission on Energy, Inc. (ESCOE). ESCOE is a non-profit corporation formed by five Founder Engineering Societies (American Institute of Chemical Engineers, American Institute of Mining and Metallurgical and Petroleum Engineers, American Society of Civil Engineers, American Society of Mechanical Engineers, Institute of Electrical and Electric Engineers). A two year contract extension is now proposed to be awarded. Specifically, ESCOE will provide technical assistance to DOE Fossil Energy by conducting independent studies in the technology areas of coal liquefaction, pipeline gas, coal combustion, in situ gasification, shale oil recovery, enhanced oil and gas recovery, and MHD.

3. The professional staff at ESCOE consists of the Executive Manager and Engineers in Residence and Visiting Engineers who come to ESCOE on leave from their sponsoring employers. Engineer in Residence appointments are for periods of approximately two years and appointments for Visiting Engineers (usually on sabbatical from a university engineering faculty) are normally for several months. For Engineers in Residence, the full cost of salaries, fringe benefits, and relocation are paid by ESCOE.

ESCOE has a unique ability to provide a staff of technical experts with private industry or academic training and experience in a broad range of skills needed, but often not otherwise available within DOE or other government agencies especially in liquefaction and gasification technologies. The ESCOE organization provides a unique interface with the community of professional societies of engineers via its five major engineering societies sponsors. The ESCOE services in the form of independent studies are very much desired to cover the diversification of engineering disciplines and to provide an independent fresh look at specific activities which will enhance the soundness of FE demonstration program.

4. ESCOE has provided information bearing on whether there might arise in the course of the work, possible organizational conflicts of interest (1) with respect to being able to render impartial, technically sound and objective assistance or advice, or (2) which may give the contractor or subcontractor an unfair competitive advantage.

5. Based on an evaluation of the work to be performed and taking into account the organizational structure of ESCOE and the fact that some of the staff of ESCOE come from energy concerns, it has been determined that a potential organizational conflict of interest exists.

6. Because ESCOE has the unique capability and staff to perform the work for the Office of Engineering and Components Management within the programmatic time constraints, it is neither feasible or desirable to disqualify ESCOE from this contract extension award, in accordance with 41 CFR 9–1.5409(a)(1). Furthermore, it is not possible to totally avoid the potential organizational conflicts of interest by inclusion of appropriate conditions in the resulting contract, pursuant to 41 CFR 9–1.5409(a)(2).

7. Mitigation to the extent feasible under 41 CFR 9–1.5409(a)(3), will be obtained through independent staff review by DOE Officials. All final conclusions and recommendations will solely be those of DOE. In addition, information developed under this contract will be disseminated throughout the synthetic fuels industry by standard DOE distribution procedures.

8. ESCOE will agree to protect proprietary information by requiring all employees to sign confidentiality agreements approved by the contracting office as to form and content, and to furnish the contracting officer with an executed copy of individual confidentiality agreements prior to assigning work to that employee under the contract. These individual confidentiality agreements will be acknowledged in writing by an authorized representative of the sponsoring organization.

9. The contractor's employees will be governed by an ECSCOE code of conduct which will include restrictions upon (a) post employment, (b) participation in matters in which or their sponsoring employer have a personal interest, (c) use of Government or proprietary information, (d) consulting or other outside employment, and (e) receipt of gifts or entertainment.

10. In addition, the Organizational Conflict of Interest Special Clause, 41 CFR 9–1.5403–2(6), shall be included in the contract, modified as necessary, to meet the specific circumstances experienced.

Determination

In light of the above findings and in accordance with 41 CFR 9–1.5409(a)(3), the proposed two year contract extension award is in the best interests of the United States.

Dated: January 27, 1981.

Deputy Assistant Secretary for Management.

Economic Regulatory Administration

Domestic Crude Oil Allocation Program; Entitlements Notice for November 1980

AGENCY: Department of Energy, Economic Regulatory Administration.

ACTION: November 1980 Entitlements Notice.

SUMMARY: Under the Department of Energy's (DOE) Domestic Crude Oil Allocation (Entitlements) Program, this is the monthly Entitlements Notice which sets forth the entitlements purchase or sale requirements of domestic refiners and eligible firms for November 1980.

DATES: Payments for entitlements required to be purchased under this notice must be made by January 31, 1981. The monthly transaction report specified in § 211.66(i) shall be filed with the DOE by February 10, 1981.

FOR FURTHER INFORMATION CONTACT:

David A. Welsh or Robert H. Thompson (Entitlements Program Office), Economic Regulatory Administration, 2000 M Street, NW., Room 6212C, Washington, D.C. 20461, (202) 653–3459 or 653–3475.

Jeffrey Stoermer (Office of General Counsel), Department of Energy, Forrestal Building, 1000 Independence Avenue, SW., Room 6A–127, Washington, D.C. 20585, (202) 252–6754.

SUPPLEMENTARY INFORMATION: In accordance with the provisions of 10 CFR 211.67 relating to the Domestic Crude Oil Allocation Program of the Department of Energy (DOE), administered by the Economic Regulatory Administration (ERA), the monthly notice specified in § 211.67(i) is hereby published.

Based on reports for November 1980 submitted to the DOE by refiners and other firms as to crude oil receipts, crude oil runs to stills, eligible product imports, eligible petroleum substitutes, and imported naphtha utilized as a petrochemical feedstock in Puerto Rico; application of the entitlements adjustment for residual fuel oil production shipped in foreign flag tankers for sale in the East Coast market and Michigan provided in § 211.67(d)(4); application of the entitlement adjustments for California lower tier

and upper tier crude oil provided in § 211.67(a)(4); December 1980 deliveries of crude oil to the Strategic Petroleum Reserve; and application of the entitlement adjustment for small refiners provided in § 211.67(e), the national domestic crude oil supply ratio (DOSR) for November is calculated to be .097598.

In accordance with § 211.67(b)(2), to calculate the number of barrels of deemed old oil included in a refiner's adjusted crude oil receipts for the month of November 1980 each barrel of old oil is equal to one barrel of deemed old oil, each barrel of upper tier crude oil (excluding ANS upper tier crude oil) is equal to .690493 of a barrel of deemed old oil and each barrel of ANS upper tier crude oil is equal to .366448 of a barrel of deemed old oil.

The issuance of entitlements for the month of November 1980 to refiners and other firms is set forth in the Appendix to this notice. The Appendix lists the name of each refiner or other firm to which entitlements have been issued, the number of barrels of deemed old oil included in each such refiner's adjusted crude oil receipts, the number of entitlements issued to each such refiner or other firm, and the number of entitlements required to be purchased or sold by each such refiner or other firm.

Pursuant to 10 CFR 211.67(i)(4), the price at which entitlements shall be sold and purchased for the month of November 1980 is hereby fixed at $26.55, which is the exact differential as reported for the month of November 1980 between the weighted average per barrel costs to refiners of old oil and of imported and exempt domestic crude oil.

In accordance with 10 CFR 211.67(b), each refiner that has been issued fewer entitlements for the month of November 1980 than the number of barrels of deemed old oil included in its adjusted crude oil receipts is required to purchase a number of entitlements for the month of November 1980 equal to the difference between the number of barrels of deemed old oil included in those receipts and the number of entitlements issued to and retained by that refiner. Refiners which have been issued a number of entitlements for the month of November 1980 in excess of the number of barrels of deemed old oil included in their adjusted crude oil receipts for the month and other firms issued entitlements shall sell such entitlements to refiners required to purchase entitlements.

The number of entitlements issued to refiners in a month under the Entitlements Program is determined by multiplying the refiners' volume of crude oil runs to stills for the month by the DOSR. As a result of the phased decontrol of crude oil prices, the DOSR has been declining and will continue to decline each month through September 1981. In light of the declining DOSR, the number of entitlements issued to refiners on the basis of a particular number of runs to stills decreases from month to month. For this reason, and in view of the recent Decision and Order issued by DOE's Office of Hearings and Appeals in *Dorchester Gas Corporation* (BEA-0310, December 17, 1980), the Office of Petroleum Operations (OPO) has, beginning with this notice, changed its method of processing amended reports under § 211.67(j) involving corrections to the volume of runs to stills reported. Under the new method OPO first determines the dollar amount of the error in the previous month by multiplying the volume of runs as to which there exists a reporting error times the DOSR and entitlement price for the month of the reporting error. The dollar amount of the error in the previous month is then divided by the entitlement price for the current month to arrive at the appropriate adjustment to the number of entitlements issued in the current month. This adjustment is listed in the Appendix labeled "Exceptions and Corrections." This new method of calculating entitlement adjustments to reflect corrections of reporting errors is effective prospectively with the issuance of this notice. Under no circumstances will this policy be applied retroactively.

The listing of refiners' old oil receipts contained in the Appendix reflects any adjustments made by ERA pursuant to § 211.67(h).

Included in the Appendix are entitlements issued pursuant to the provisions of 10 CFR 211.67(a)(5) under which ERA may approve a firm's application for designation as a producer of a petroleum substitute.

In accordance with 10 CFR 211.67(a)(7), adopted effective August 29, 1980 (45 FR 56788, August 25, 1980), the Strategic Petroleum Reserve (SPR) has been issued entitlements for crude oil purchased, delivered and accepted for delivery into the SPR in the month of December 1980. An entry in the Appendix for the SPR has been included.

The listing contained in the Appendix identifies, in a separate column labeled "Exceptions and Corrections", additional entitlements issued to refiners pursuant to relief granted by the Office of Hearings and Appeals (prior to March 30, 1978, the Office of Administrative Review of the Economic Regulatory Administration). Also set forth in this column are adjustments for relief granted by the Office of Hearings and Appeals for 1975 and 1976, which adjustments are reflected in monthly installments. The number of installments is dependent on the magnitude of the adjustment to be made. For a full discussion of the issues involved, see *Beacon Oil Company, et al.*, 4 FEA par. 87,024 (November 5, 1976).

The listing contained in the appendix indicates that a correction has been made to Arizona Fuels' entitlement position. A positive adjustment of 33068 entitlements has been made to correct for an ERA error in processing an amended report made by Arizona Fuels. A negative adjustment of 11922 entitlements reflects a portion of Arizona Fuels' outstanding and continuing purchase obligation. See Entitlements Notice for October 1977, 42 FR 64401 (December 23, 1977). Thus, Arizona Fuels' outstanding and continuing purchase obligation has been reduced by an amount equal to 11922 times the entitlement price for November 1980. Moreover, this notice constitutes a direction to Arizona Fuels to sell 11922 entitlements to Arizona Fuels at the entitlement price for November 1980, or $26.55. See 10 CFR 211.67(k).

For the month of November 1980, imports of residual fuel oil eligible for entitlement issuances totaled 21,209,882 barrels.

In accordance with § 211.67(a)(4), the number of barrels of California lower tier and upper tier crude oil, as reported by refiners to the DOE, and the weighted average gravity thereof are as follows:

	Volumes	Weighted average gravity
California Lower Tier Crude Oil	712,347	25
California Upper Tier Crude Oil	1,374,288	25

The total number of entitlements required to be purchased and sold under this notice is 20,070,458.

Based on reports submitted to the DOE by refiners as to their adjusted crude oil receipts for November 1980 the pricing composition and weighted average costs thereof are as follows:

	Volumes in thousands of B/D	Weighted average cost	Percent of total volumes*
Lower Tier	927	$7.21	6.9

Payment for entitlements required to be purchased under 10 CFR 211.67(b) for November 1980 must be made by January 31, 1981.

On or prior to February 10, 1981, each firm which is required to purchase or sell entitlements for the month of November 1980 shall file with the DOE the monthly transaction report specified in 10 CFR 211.66(i) certifying its purchases and sales of entitlements for the month of November 1980.

The monthly transaction report forms (ERA–116) for the month of November 1980 have been mailed to all reporting firms. Firms that have been unable to locate other firms for the required entitlements transactions by January 31, 1981, are requested to contact the ERA at (202) 653–3873 to expedite consummation of these transactions. For firms that have failed to consummate required entitlement transactions on or prior to January 31, 1981, the ERA may direct sales and purchases of entitlements pursuant to the provisions of 10 CFR 211.67(k).

This notice is issued pursuant to Subpart G, 10 CFR Part 205. Any person aggrieved hereby may file an appeal with the Office of Hearings and Appeals in accordance with Subpart H of 10 CFR Part 205. Any such appeal shall be filed on or before March 4, 1981.

Issued in Washington, D.C., on January 27, 1981.

Georgia Power Co., Request for Classification

AGENCY: Economic Regulatory Administration, Department of Energy.

ACTION: Notice of request for classification.

SUMMARY: On July 24, 1980, the Georgia Power Company (Georgia Power) of Atlanta, Georgia, requested that the Economic Regulatory Administration (ERA) of the Department of Energy (DOE) classify as "existing," two boilers being installed at its Plant Scherer facility in Juliette, Georgia, pursuant to 10 CFR 515.13 (Final Rule to Permit Classification of Certain Powerplants and Installations as Existing Facilities issued by ERA on October 12, 1979, and published in the **Federal Register** on October 19, 1979 (44 FR 60690)) and pursuant to the provisions of the Powerplant and Industrial Fuel Use Act of 1978, 42 U.S.C. 8301 *et seq.*, (FUA or the Act). FUA imposes statutory prohibitions against the use of petroleum and natural gas by new major fuel burning installations (MFBIs). The statutory prohibitions that apply to new MFBIs do not apply to MFBIs that are classified as existing.

The purpose of this notice is to invite interested persons to submit written comments on this matter prior to the issuance of the final decision by ERA.

DATES: Written comments are due on or before February 23, 1981.

ADDRESSES: Ten (10) copies of written comments shall be submitted to: Department of Energy, Case Control Unit, Department of Energy, 2000 M Street, NW., Room 3214, Washington, D.C. 20461.

Docket No. ERA-FC-029 should appear on the envelope and the document therein.

SUPPLEMENTARY INFORMATION: Georgia Power Company (Georgia Power), a subsidiary of the Southern Company of Atlanta, Georgia, is currently installing two 237.7 million Btu/hr boilers at their plant Scherer in Juliette, Georgia. The package boilers, Start-up Boilers No. 1 and 2, are designed to be capable of burning No. 2 fuel oil. The steam generated by Start-up Boilers 1 and 2 will be used to provide a source of steam for the start-up of four 818 megawatt coal-fired electric generating units at Plant Scherer. Georgia Power is eligible to request classification of Start-up Boilers 1 and 2 as "existing" under criteria set forth in 10 CFR 515.10 because contracts for construction or acquisition of the unit were signed prior to November 9, 1978.

In accordance with the provisions of 10 CFR 515.13 ERA will classify an eligible installation as "existing" if it is demonstrated to the satisfaction of ERA that cancellation, rescheduling, or modification of the construction or acquisition of the installation would result in a substantial financial penalty or significant operation detriment. Pursuant to 10 CFR 515.13(a) of the Final Rule, ERA will classify a facility as existing upon demonstration that at least 25 percent of the total projected project cost as of November 9, 1978, was expended in nonrecoverable outlays as of that date. A summary of the pertinent facts relied on by Georgia Power and submitted as part of its petition are as follows:

Start-up No. 1:	
Total projected project cost as of Nov. 9, 1978	$1,218,916
Total project expenditures, including obligation and cancellation charges, as of Nov. 9, 1978	$651,570
Total recoverable expenditures	0
Total nonrecoverable outlays	$651,570
Nonrecoverable outlays percent of total projected project cost as of Nov. 9, 1978	53
Start-up No. 2:	
Total projected project cost as of Nov. 9, 1978	$1,218,916
Total project expenditures, including obligation and cancellation charges, as of Nov. 9, 1978	$651,570
Total recoverable expenditures	0
Total nonrecoverable outlays	$651,570
Nonrecoverable outlays percent of total projected project cost as of Nov. 9, 1978	53

ERA hereby invites all interested persons to submit written comments on this matter. Proposed Contract Award

AGENCY: Economic Regulatory Administration

ACTION: Notice of proposed contract award.

SUMMARY: In accordance with the Department of Energy Procurement Regulations, DOE gives public notice that a contract is being awarded after taking into account the existence of potential organizational conflicts of interest, because this procurement is determined to be in the best interest of the United States.

FOR FURTHER INFORMATION CONTACT: Mr. Alfred Metz, Office of Fuels Conversion, Economic Regulatory Administration, Department of Energy, 2000 M St., N.W., Washington, DC 20461.

SUPPLEMENTARY INFORMATION: Upon the basis of the following findings, mitigation and determination, the proposed contract described below is being awarded, after taking into account the existence of potential organizational conflicts of interest, because this procurement is determined to be in the best interest of the United States pursuant to the authority of Depatment of Energy Procurement Regulation 41 CFR 9-1.5409(a)(3).

Findings

(1) The Department of Energy (DOE), Economic Regulatory Administration

(ERA), Office of Fuels Conversion (OFC), implements the provisions of the Powerplant and Industrial Fuel Use Act of 1978 (the "Act") (Pub. L. 95–988). A primary purpose of the Act is to reduce the importation of petroleum and increase the Nation's capability to use indigenous energy resources of the United States by encouraging and fostering the greater use of coal and other alternate fuels, in lieu of natural gas and petroleum as a primary energy source by utilities and major fuel burning installations. In implementing the Act, ERA, on an individual facility basis, (1) issues prohibition orders against the further use of petroleum or natural gas, and (2) processes petitions for exemption from the prohibitions against petroleum or natural gas use contained in the Act.

(2) In the course of implementing the Act it is necessary for ERA to obtain, by contract, engineering consulting services on individual prohibition orders and exemption petitions. The contractor will conduct work on an "as required" basis and an engineering report containing the results of the analyses and evaluations performed on each task shall be submitted. The contractor will be required to make on-site engineering evaluations to determine the physical and operation parameters of the installation, including land availability and available or necessary fuel handling and combustor hardware and pollution control equipment. This analysis will also include an evaluation of the characteristics of the fuels that the unit was designed for, and the characteristics of the fuels that can be burned in compliance with air pollution control requirements.

(3) The Department of Energy's selection procedures for Architect-Engineers were used. Interested firms submitted Standard Forms 254 (Architect-Engineer and Related Services Questionnaire), and Standard Form 255 (Architect-Engineer and Related Services Questionnaire for Specific Projects) in response to an advertisement in the Commerce Business Daily (CBD) on July 16, 1980. Two Architect-Engineer Evaluation Boards were established to review the submitted information. With the approval of the selection official, the top-ranked firm, Gibbs & Hill Inc., New York, NY, was invited to submit a price proposal. Contract negotiations have been conducted with that firm. Due to the substantial difference in qualifications between the first and second ranked firms for these particular sevices and the immediate need for the services, it was not in the best interest of DOE to negotiate with any other firms to seek to avoid a conflict in interest.

(4) In accordance with 41 CFR 9–1.5405, the proposed contractor and its parent organization Dravo Corporation, provided DOE disclosure information concerning their interests relating to the contract to be performed with respect to (1) the contractor's ability to render impartial technically sound and objective assistance and advice and (2) whether an unfair competitive advantage may be conferred on the contractor as a result of performing specific tasks.

(5) After a thorough review of the information submitted, DOE determined there was a possible organizational conflict of interest. This result is due to the nature of the business in which the firm is engaged. Approximately 80 percent of the firm's income is from energy-oriented businesses. Gibbs & Hill actively seeks work with private industry to provide professional engineering consulting services similar to that required by this procurement. Services rendered to the power industry include all forms of conventional fuel-fired powerplants including those fired by oil, gas, combined cycle and coal. Project activities include all aspects of land use studies, environmental engineering and pollution control.

Mitigation

(1) The CBD announcement provided that the selected contractor would be given an opportunity to eliminate areas of potential conflict from the proposed scope, with any eliminated work subject to separate award. In addition, prior to performing a task, the contractor will submit a statement as to whether performing that task for the Government would create a conflict because of work performed for the company in question under a past, present, or currently planned relationship. The contractor will also be required to state whether performing that task would require the firm to review work the firm had previously performed. Similar information will be required from any subcontractors. DOE will independently review that statement and if a conflict is found, the contractor will be disqualified and that task will be assigned to another contractor or completed with other resources at DOE's disposal. In the case of a prohibition by rule for a class of powerplants or MFBIs, DOE will, prior to the contractor performing any task, establish that no conflict exists for any facility included in the class.

(2) All work performed by the contractor under this procurement will be independently reviewed by DOE. All final decisions will be made by the Government and the contractor will play an advisory role only. In addition, all pertinent contractor analyses will become a part of the public record of the particular action in question and thus will be subject to close third-party scrutiny for the validity of the data and technical findings presented.

(3) Similarly, any work which the contractor might perform for a private client and which is submitted by that company as part of an action under the Act will also become part of the public record subject to a confidentiality determination and will be subject to review and comment. Furthermore, any information so developed for and submitted by a company will be independently evaluated and verified by DOE.

(4) The contract awarded under this procurement will include the Organizational Conflict of Interest Special Clause (41 CFR 9–1.5408–2(b)) which will apply to both prime and any subcontractors. The primary purpose of this clause is to aid in ensuring that the contractor is not biased due to its past, present, or currently planned interests (financial, contractual, organizational, or otherwise) which relate to work under this contract and does not obtain any unfair competitive advantage over other parties by virtue of its performance of this contract.

(5) The contractor (and any subcontractor) will be specifically prohibited from securing business from or contracting with any company for any unit at a specific site for which the contractor performed engineering evaluation or analysis services for ERA under this contract for two years after the completion of such engineering evaluation or analysis services for that unit.

(6) The contractor (and any subcontractor) will be specifically prohibited from doing any final design services of any nature for that unit for which the preliminary engineering evaluation or analysis were performed for ERA under this contract.

(7) The contractor (and any subcontractor) will be specifically prohibited from securing business from or contracting with any company for which company-specific engineering evaluation or analysis services have been performed by the contractor for ERA under this contract, relating to any actions under FUA for a period of two years after completion of the contract (including the option year if exercised by DOE).

Determination

In light of the above findings, and mitigation, I hereby determine in

accordance with 41 CFR 9-1.5409(a)(3) that award of this contract would be in the best interests of the United States.

Dated: January 28, 1981.

Barton R. House,

Acting Administrator, Economic Regulatory Administration.

Colorado Interstate Gas Co.; Filing of Proposed Distribution of Gas Supplier Refunds To Exempt and Non-Exempt Customers (Revised)

January 23, 1981.

Take notice that on December 8, 1980, Colorado Interstate Gas Company (CIG) filed Substitute First Revised Sheet No. 61E to its FERC Gas Tariff, Original Volume No. 1, relating to the distribution to its exempt and non-exempt customers of certain gas supplier refunds received by CIG attributable to service rendered prior to January 1, 1980. Said tariff sheet is proposed to become effective January 1, 1981.

CIG states that pursuant to discusion with the Commission Staff, the instant filing is identical to the First Revised Sheet No. 61E, submitted to the Commission on November 25, 1980, except that the language limiting CIG's obligation to make refunds to those circumstances where the amount to be refunded exceeds one mill ($0.001) per Mcf is leleted. Additionally, the reference to § 154.38 of the Commission's Regulations in connection with the computation of interest on accrued refunds is changed to § 154.67.

CIG states that copies of this filing were served upon all parties contained in the list of customers and public bodies submitted with the November 25, 1980 filing.

Any person desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426, in accordance with §§ 1.8 and 1.10 of the Commission's Rules of Practice and Procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before February 9, 1981. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Gasco, Inc.; Application for Adjustment

Issued: January 13, 1981.

On December 24, 1980, Gasco, Inc., a wholly-owned subsidiary of Rocky Mountain Natural Gas Company, Inc. (RMNG), filed with the Federal Energy Regulatory Commission (Commission) an Application for Adjustment under section 502(c) of the Natural Gas Policy Act of 1978 (NGPA), 15 U.S.C. §§ 3301-3432. Gasco seeks relief from the maximum lawful price allowed by section 105 of the NGPA, insofar as it applies to its intrastate sales of natural gas to Conoco, Inc.

Section 105 of the NGPA sets the maximum lawful price for natural gas sold under an existing contract or any successor to an existing contract which was not committed or dedicated to interstate commerce on the day before the NGPA's day of enactment. The maximum lawful price is the lower of the contract price on the date of enactment, November 9, 1978, or the maximum lawful price for new natural gas pursuant to section 102 of the NGPA. Gasco states that Conoco currently pays $.15 per Mcf. Gasco's average cost per Mcf for the four-year period ending October, 1980, was $.4415. Gasco has suffered a $33,761.95 loss for those four years due to the Conoco contract. Conoco would consider paying a higher price if it is approved by the Commission. The contract for sale is 24 years old and continues as long as production lasts. Gasco also states that costs will continue to increase due to inflation and increasing maintenance costs. In addition, the other customer purchasing gas from the field pays $.93 per Mcf and Gasco claims this results in inherent unfairness. For these reasons, Gasco contends that an adjustment under section 502(c) is necessary to alleviate special hardship, inequity, or unfair distribution of burdens and requests that it be allowed to charge Conoco the greater of the contract price or the average cost of the gas sold.

The procedures applicable to the conduct of this adjustment proceeding are found in § 1.41 of the Commission's Rules of Practice and Procedure (44 FR 18961, March 30, 1979).

Any person desiring to participate in this adjustment proceeding shall file a petition to intervene in accordance with the provisions of § 1.41. All petitions to intervene must be on file on or before February 17, 1981.

Original Sheet No. 4b reflects incremental pricing surcharges for the period December 1, 1980 through May 31, 1981 totalling $69.00.

Any person desiring to be heard and to make any protest with reference to said filing should on or before January 21, 1981, file with the Federal Energy Regulatory Commission, Washington, D.C. 20426, petitions to intervene or protests in accordance with the Commission's rules of practice and procedure (18 CFR 1.8 or 1.10). ENVIRONMENTAL PROTECTION AGENCY

[ER-FRL 1743-7]

Final Determination of the Administrator Concerning the North Miami Landfill Site Pursuant to Section 404(c) of the Clean Water Act

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice of Decision to Restrict Use of Disposal Site at North Miami, Florida.

SUMMARY: This is notice of the Administrator's final determination pursuant to Section 404(c) of the Clean Water Act to restrict the use of the site of the North Miami Landfill (including the withdrawal of specification) as a disposal site, based on his finding that the discharge of certain dredged and fill materials into the North Miami Landfill would have unacceptable adverse effects on shellfish and fishery areas, wildlife, and recreational areas of Biscayne Bay, adjacent wetlands and lakes within the site.

EFFECTIVE DATE: The effective date of the final determination is January 19, 1981.

FOR FURTHER INFORMATION CONTACT: William S. Sipple 404 Program Branch, Office of Environmental Review (A-104), U.S. Environmental Protection Agency, 401 M St., SW., Washington, D.C. 20460, (202)-472-3400.

Copies of the Administrator's final determination are available for inspection in the Public Information Reference Unit, EPA Library, Room M 2404, 401 M St., SW., Washington, D.C. 20460.

SUPPLEMENTARY INFORMATION: Under Section 404(c) of the Clean Water Act, the Administrator of EPA has the authority to prohibit or restrict the use of a site as a disposal site for dredged or fill material, after notice and opportunity for public hearing, whenever he determines that such disposal will have an unacceptable adverse effect on municipal water supplies, shellfish beds and fishery areas (including spawning and breeding areas), wildlife, and recreational areas.

In accordance with the Section 404(c) regulations (40 CFR § 231), EPA's Regional Administrator for Region IV, Ms. Rebecca Hanmer, initiated Section 404(c) proceedings with respect to the North Miami Landfill site. The background of this action is summarized in her notices of proposed determination and public hearing (published at 45 FR 51275, August 1, 1980; 45 FR 57169, August 27, 1980; and 45 FR 59630, September 10, 1980).

On November 28, 1980, Ms. Hanmer forwarded her recommended determination and the administrative record for the Administrator's review and final determination on the North Miami Landfill site. Her recommendations (for restriction for use for specification of the area covered by Department of the Army permit 75B-0869 and for denial of the use for specification of the area covered by permit application 77B-0376) were based upon existing and anticipated water quality impacts that pose a risk of unacceptable adverse effects to fishery areas, wildlife and recreation areas of Biscayne Bay, adjacent wetlands and lakes within the site.

After consideration of the record in this case, including public comments, the hearing record, comments from the Office of the Chief of Engineers, and consultation with Mr. Howard Neu, the Mayor of the City of North Miami, the Administrator determined that the discharge of certain dredged and fill materials at the North Miami Landfill site would have unacceptable adverse effects on shellfish and fishery areas, wildlife, and recreational areas of Biscayne Bay, adjacent wetlands and lakes within the site. Therefore, he concluded that use of the site as a disposal site should be restricted as follows:

1. That no additional solid waste (including garbage) shall be deposited in the areas covered by permit 75B-0869 and permit application 75B-0376 that are waters of the United States.

2. That clean fill may be deposited over the entire area *already filled* with solid waste. This material may be obtained from offsite upland sources of clean fill or by excavating up to 19 acres of shallow lakes (i.e., less than minus 6 feet MSL) on-site in wetland areas free of solid waste or other contamination immediately north of the Mangrove Preserve adjacent to the site.

3. That no fill of any kind shall be deposited in the previously unfilled waters of the United States at the site except as provided in Paragraphs 4-7 below.

4. That if necessary for temporary access roadways to the lake sites

mentioned in Paragraph 2 above, clean fill may be deposited in the wetland area immediately north of the mangrove preserve in order to excavate and transport clean fill for covering the existing solid wastes.

5. That clean fill for a dike may be deposited around the periphery of the eastern edge of the existing disposal site to contain any surface leachate flows that could occur in the future.

6. That clean fill from the existing dike may be deposited, to the extent necessary to restore the original elevation, in the ditch from which such material was excavated.

7. That clean fill may be deposited as necessary for the placement of an additional culvert, as described in permit 75B-0869, or for the substitution of a bridge for the culvert.

However, specification of the site for deposition of clean fill as indicated above is subject to a number of conditions. These conditions, as well as specific findings and reasons for the restrictions and conditions, are set out in the Administration's final determination.

Dated: January 26, 1981.

Director, Office of Environmental Review.

Prevention of Significant Deterioration of Air Quality: Delegation of Authority to the State of Florida for the Technical and Administrative Review

AGENCY: Environmental Protection Agency.

ACTION: Informational Notice.

SUMMARY: Section 301 in conjunction with Sections 101 and 110 of the Clean Air Act authorizes the Administrator to delegate his authority to implement and enforce the Prevention of Significant Deterioration of Air Quality (PSD) regulations to any State which has submitted adequate implementation and enforcement procedures. The Florida Department of Environmental Regulation submitted to the EPA Region IV office a request that EPA relinquish to them it's responsibility for the technical and administrative review of sources regulated under the PSD program. After a thorough review of the request and information submitted, the Regional Administrator determined that such delegation was appropriate for the source categories and with the conditions set forth in the letter reproduced below.

EFFECTIVE DATE: October 27, 1980.

FOR FURTHER INFORMATION CONTACT: Archie Lee, Air Programs Branch, environmental Protection Agency, 345 Courtland Street, N.E., Atlanta, Georgia 30365. 404/881-3286 or FTS 257-3286.

SUPPLEMETNARY INFORMATION: On September 22, 1980, EPA Region IV office received a letter from the Florida Department of Environmental Regulation requesting delegation of authority for the implementation of the technical and administrative portions of the PSD program. After a thorough review of the request and information submitted, the Regional Administrator determined that for the source categories set forth in the following official letter to the Secretary of the Florida Department of Environmental Regulation, delegation was appropriate subject to the conditions set forth therein. Therefore, pursuant to the authority delegated to her by the Administator, the Regional Administrator formally notified the Secretary of the Florida Department of Environmental Regulation by the following letter that she relinquishes responsibility for implementation of the technical and administrative portions of the PSD program to the State of Florida.

October 27, 1980.

Mr. Jacob D. Varn,

Secretary, Department of Environmental Regulation, Twin Towers Office Building, 2600 Blair Stone Road, Tallahassee, Florida 32301.

Dear Mr. Varn: This is in response to your letter of September 22, 1980, requesting responsibility for implementation of the technical and administrative portions of the Prevention of Significant Air Quality Deterioration (PSD) program. We have reviewed the procedures for new source review of the State of Florida and have determined that they provide an adequate and effective procedure for the implementation of the technical and administrative portions of the PSD program by the State of Florida. Therfore, pursuant to 40 CFR 52.01 and 40 CFR 52.21 (52.21(v)), we hereby delegate our authority for the technical and administrative portions of the federal PSD program, as described in 40 CFR 52.21 to the State of Florida as follows:

A. EPA delegates its authority for the technical and administrative review of all sources located or to be located in the State of Florida subject to review under the Federal Regulations for the Prevention of Significant Air Quality Deterioration promulgated in 40 CFR 52.21 for any of the following stationary sources of air pollutants which emit, or have the potential to emit, 100 tons per year or more of any pollutant regulated under the Clean Air Act (the "Act").

Fossil fuel-fired stream electric plants of more than 250 million British thermal units per hour heat input, coal cleaning plants (with thermal dryers), kraft pulp mills, portland cement plants, primary zinc smelters, iron and steel mills, primary aluminum ore reduction plants, primary copper smelters, municipal incinerators capable of charging more than 250 tons of refuse per day, hydrofluoric acid plants, sulfuric acid plants, nitric acid plants, petrcleum refineries, lime plants, phosphate rock processing plants, coke oven batteries, sulfur recovery plants, carbon black plants (furnace process), primary lead smelters, fuel conversion plants, sintering plants, secondary metal production facilities, chemicasl process plants, fossil-fuel boilers (or combinations thereof) totaling more than 250,000,000 British thermal units per hour heat input, petroleum storage and transfer facilities with a capacity exceeding 300,000 barrels, taconite ore processing facilities, glass fiber processing plants, charcoal production facilities, and notwithstanding the source sizes specified above, any sources which emit or have the potential to emit, 250 tons per year or more of any pollutant regulated under the Act.

B. EPA delegates to the State of Florida its authority and procedures for technical review and evaluation of new sources and public participation promulgated in 40 CFR 52.21(q), but not its authority under 40 CFR 52.21(q)(vii) and (viii) to take final action on an application, modify existing PSD construction approvals, or its authority to take enforcement action.

C. For purposes of and in accordance with paragraph B above, the State of Florida shall

follow the procedures in 40 CFR 52.21(q), except that the word "State" shall be substituted for the word "Administrator". A copy of the State's preliminary determination, a copy of all materials submitted by the owner or operator, a copy or summary of other materials (if any) considered by the State in making its preliminary determination, and a copy of the notice pursuant to 40 CFR 52.21(q)(iii) shall be sent to the EPA Regional Office immediately upon issuance of a Preliminary Determination. Immediately upon issuance of a Final Determination, the State shall forward a copy of the final analysis to the EPA Regional Office. Upon receipt of the State's final analysis, the EPA Regional Office shall take final action on an application pursuant to 40 CFR 52.21(q) (vii) and (viii).

D. This delegation is based upon the following conditions:

1. Quarterly reports containing pertinent information relating to the status of sources subject to 40 CFR 52.21 (or other reports as required by the Regional Administrator) will be submitted to EPA by the State of Florida as part of the existing reports normally submitted to EPA through program plan reporting.

2. In accomplishing the delegated PSD technical and administrative review, the State will apply all applicable Federal air permitting rules and follow the applicable Federal permit processing procedures. If at anytime it is determined that State rules or statutes prohibit the Department from applying or following any such standard or procedure, the pertinent portion of the delegation may be revoked.

3. If the Regional Administrator determines that the State procedure for implementing the technical and administrative portions of PSD is inadequate, or is not being effectively carried out, this delegation may be revoked in whole or in part. Any such revocation shall be effective as of the date specified in a Notice of Revocation to the Florida Department of Environmental Regulation.

4. Acceptance of this delegation of presently promulgated PSD regulations (40 CFR.52.21 as amended 8–7–80) does not commit the State of Florida to accept responsibility for new Federal standards or requirements promulgated after the effective date of this delegation.

5. Public availability of information shall be in accordance with 40 CFR 52.21(q).

6. EPA shall overview the conduct of the technical and administrative portions of the PSD program through an overview program consistent with that described in the State/EPA agreement.

7. Upon receipt of a permit application for the following source types, EPA will be immediately notified and provided with a duplicate copy of all materials supplied to the State by the source (the application and any additional information); coal-fired power plants, petroleum refineries, synfuel facilities, and hazardous waste incinerators.

The State and EPA will develop a system of communication sufficient to guarantee a program that includes the items described below:

a. Each agency is informed of the current compliance status of subject sources in the State of Florida.

b. Prior EPA concurrence is obtained on any matter involving interpretation of 40 CFR 52.21 (including unique questions of applicability of the standards).

c. PSD reviews (including requests for information and enforcement actions based thereon) already initiated by EPA prior to this delegation, shall be completed by EPA.

A notice announcing this delegation will be published in the **Federal Register** in the near future. The notice will state, among other things, that effective immediately, all reports required pursuant to PSD by sources located or to be located in the State of Florida should be submitted to the Bureau of Air Quality Control, Department of Environmental Regulation, Twin Towers Office Building, 2600 Blair Stone Road, Tallahassee, Florida 32301. Any such reports which have been or may be received by EPA, Region IV, will be promptly transmitted to the State agency.

Since this delegation is effective immediately, there is no requirement that the State notify EPA of its acceptance. Unless EPA receives from the State written notice of objections within ten (10) days of receipt of this letter, the State will be deemed to have accepted all of the terms of the delegation.

Sincerely yours,

Rebecca W. Hanmer,

Regional Administrator.

Copies of the request for delegation of authority are available for public inspection at the Environmental Protection Agency, Region IV Office, 345 Courtland Street, N.E., Atlanta, Georgia 30365.

The following requests for clearance of reports intended for use in collecting information from the public were received by the Regulatory Reports Review Staff, GAO, on January 27, 1981. See 44 U.S.C. 3512(c) and (d). The purpose of publishing this notice in the **Federal Register** is to inform the public of such receipts.

The notice includes the title of each request received; the name of the agency sponsoring the proposed collection of information; the agency form number, if applicable; and the frequency with which the information is proposed to be collected.

Written comments on the proposed CAB and ICC requests are invited from all interested persons, organizations, public interest groups, and affected businesses. Because of the limited amount of time GAO has to review the proposed requests, comments (in triplicate) must be received on or before February 20, 1981, and should be addressed to Mr. John M. Lovelady, Senior Group Director, Regulatory Reports Review, United States General Accounting Office, Room 5106, 441 G Street, NW, Washington, DC 20548.

Further information may be obtained from Patsy J. Stuart of the Regulatory Reports Review Staff, 202-275-3532.

Civil Aeronautics Board

The CAB requests an extension without change clearance of the reporting provisions contained in §§ 250.3 and 250.9 of Part 250, Priority Rules, Denied Boarding Compensation Tariff and Reports of Unaccommodated Passengers. These provisions require U.S. certificated route air carriers and foreign air carriers authorized to transport passengers to file with the Board (1) priority rules for determining which passenger holding confirmed reserved space shall be denied boarding on an oversold flight, and (2) a written statement explaining denied boarding compensation. These filing provisions are mandatory under the Federal Aviation Act of 1958, as amended. The CAB estimates respondents will number approximately 162 and that reporting burden will average 15 minutes per report.

Interstate Commerce Commission

The ICC requests an extension without change clearance of Form BOC-3, Designation of Agents—Motor Carriers and Brokers. Form BOC-3 is filed by ICC regulated carriers to designate an agent to accept service of legal process on behalf of a carrier from any court in any action brought against the carrier in the state named. An agent must be named for each state in or through which a carrier operates. Designations are submitted on occasion as changes occur in operating authority or agent redesignation. Designations are

mandatory under the Interstate Commerce Act. The information furnished is on file for use by the public. The ICC estimates that annual responses will number approximately 6,000 and that reporting burden will average 15 minutes per response.

Decision-Notice

The following applications, filed on or after July 3, 1980, seek approval to consolidate, purchase, merge, lease operating rights and properties, or acquire control of motor carriers pursuant to 49 U.S.C. 11343 or 11344. Also, applications directly related to these motor finance applications (such as conversions, gateway eliminations, and securities issuances) may be involved.

The applications are governed by Special Rule 240 of the Commission's Rules of Practice (49 CFR § 1100.240). An interim proposed final Rule 240 reflecting changes to comport with the Motor Carrier Act of 1980 was published in the July 3, 1980, **Federal Register** at 45 FR 45529 under Ex Parte 55 (Sub-No. 44), *Rules Governing Applications Filed By Motor Carriers Under 49 U.S.C. §§ 11344 and 11349.* These rules provide among other things, that opposition to the granting of an application must be filed with the Commission in the form of verified statements within 45 days after the date of notice of filing of the application is published in the **Federal Register.** Failure seasonably to oppose will be construed as a waiver of opposition and participation in the proceeding. If the protest includes a request for oral hearing, the request shall meet the requirements of Rule 240(C) of the special rules and shall include the certification required.

Persons wishing to oppose an application must follow the rules under 49 CFR 1100.240(B). A copy of any application, together with applicant's supporting evidence, can be obtained from any applicant upon request and payment to applicant of $10.00, in accordance with 49 CFR 1100.240(A)(h).

Amendments to the request for authority will not be accepted after the date of this publication. However, the Commission may modify the operating authority involved in the application to conform to the Commission's policy of simplifying grants of operating authority.

We find, with the exception of those applications involving impediments (e.g., jurisdictional problems, unresolved fitness questions, questions involving possible unlawful control, or improper divisions of operating rights) that each applicant has demonstrated, in accordance with the applicable provisions of 49 U.S.C. 11301, 11302, 11343, 11344, and 11349, and with the Commission's rules and regulations, that the proposed transaction should be authorized as stated below. Except where specifically noted this decision is neither a major Federal action significantly affecting the quality of the human environment nor does it appear to qualify as a major regulatory action under the Energy Policy and Conservation Act of 1975.

In the absence of legally sufficient protests as to the finance application *or* to any application directly related thereto filed on or before March 19, 1981, (or, if the application later becomes

unopposed), appropriate authority will be issued to each applicant (unless the application involves impediments) upon compliance with certain requirements which will be set forth in a notification of effectiveness of this decision-notice. To the extent that the authority sought below may duplicate an applicant's existing authority, the duplication shall not be construed as conferring more than a single operating right.

Applicant(s) must comply with all conditions set forth in the grant or grants of authority within the time period specified in the notice of effectiveness of this decision-notice, or the application of a non-complying applicant shall stand denied.

Dated: January 22, 1981.

Persons wishing to oppose an application must follow the rules under 49 C.F.R. 1100.240(B). A copy of any application, together with applicant's supporting evidence, can be obtained from any applicant upon request and payment to applicant of $10.00, in accordance with 49 C.F.R. 1100.240(A)(h).

Amendments to the request for authority will not be accepted after the date of this publication. However, the Commission may modify the operating authority involved in the application to conform to the Commission's policy of simplifying grants of operating authority.

We find, with the exception of those applications involving impediments (e.g., jurisdictional problems, unresolved fitness questions, questions involving possible unlawful control, or improper divisions of operating rights) that each applicant has demonstrated, in accordance with the applicable provisions of 49 U.S.C. 11301, 11302, 11343, 11344, and 11349, and with the Commission's rules and regulations, that the proposed transaction should be authorized as stated below. Except where specifically noted this decision is neither a major Federal action significantly affecting the quality of the human environment nor does it appear to qualify as a major regulatory action under the Energy Policy and Conservation Act of 1975.

In the absence of legally sufficient protests as to the finance application *or* to any application directly related thereto filed within 45 days of publication (or, if the application later becomes unopposed), appropriate authority will be issued to each applicant (unless the application involves impediments) upon compliance with certain requirements which will be set forth in a notification of effectiveness of this decision-notice. To the extent that the authority sought below may duplicate an applicant's existing authority, the duplication shall not be construed as conferring more than a single operating right.

Applicant(s) must comply with all conditions set forth in the grant or grants of authority within the time period specified in the notice of effectiveness of this decision-notice or the application of a non-complying applicant shall stand denied.

Expedited Procedures for Recovery of Fuel Costs; Decision

Decided: January 27, 1981.

In our decision of January 21, 1981, a 16-percent surcharge was authorized on all owner-operator traffic, and on all truckload traffic whether or not owner-operators were employed. We ordered that all owner-operators were to receive compensation at this level.

The weekly figure set forth in the appendix for transportation performed by owner-operators and for truckload traffic is 16.5-percent. Accordingly, we are authorizing that the surcharge for this traffic be increased to 16.5-percent. All owner-operators are to receive compensation at this level.

There will be no change in the authorized surcharge of 2.8-percent on

less-than-truckload (LTL) traffic performed by carriers not utilizing owner-operators. However, the surcharge for the bus carriers is increased to 6.2-percent, and that for United Parcel Service to 1.8-percent.

Notice shall be given to the general public by mailing a copy of this decision to the Governor of each State and to the Public Utilities Commission or Boards of each State having jurisdiction over transportation, by depositing a copy in the Office of the Secretary, Interstate Commerce Commission, Washington, D.C., for public inspection and by delivering a copy to the Director, Office of the Federal Register for publication therein.

It is ordered that this decision shall become effective Friday 12:01 a.m., January 30, 1981.

By the Commission, Chairman Gaskins, Vice Chairman Alexis, Commissioners Gresham, Clapp, Trantum, and Gilliam.

Agatha L. Mergenovich,

Secretary.

BILLING CODE 1505-01-M

Permanent Authority Decisions; Decision-Notice

The following applications, filed on or after July 3, 1980, are governed by Special Rule 247 of the Commission's Rules of Practice, see 49 CFR 1100.247. Special Rule 247 was published in the **Federal Register** of July 3, 1980, at 45 FR 45539. For compliance procedures, refer to the **Federal Register** issue of December 3, 1980, at 45 FR 80109.

Persons wishing to oppose an application must follow the rules under 49 CFR 1100.247(B). A copy of any application, together with applicant's supporting evidence, can be obtained from any applicant upon request and payment to applicant of $10.00.

Amendments to the request for authority are not allowed. Some of the applications may have been modified prior to publication to conform to the Commission's policy of simplifying grants of operating authority.

Findings

With the exception of those applications involving duly noted problems (e.g., unresolved common control, fitness, water carrier dual operations, or jurisdictional questions) we find, preliminarily, that each applicant has demonstrated its proposed service warrants a grant of the application under the governing section of the Interstate Commerce Act. Each applicant is fit, willing, and able to perform the service proposed, and to conform to the requirements of Title 49, Subtitle IV, United States Code, and the Commission's regulations. Except where noted, this decision is neither a major Federal action significantly affecting the quality of the human environment nor a major regulatory action under the Energy Policy and Conservation Act of 1975.

In the absence of legally sufficient interest in the form of verified statements filed on or before March 16, 1981, (or, if the application later becomes unopposed) appropriate authorizing documents will be issued to applicants with regulated operations (except those with duly noted problems) and will remain in full effect only as long as the applicant maintains appropriate compliance. The unopposed applications involving new entrants will be subject to the issuance of an effective notice setting forth the compliance requirements which must be satisfied before the authority will be issued. Once this compliance is met, the authority will be issued.

Within 60 days after publication an applicant may file a verified statement in rebuttal to any statement in opposition.

To the extent that any of the authority granted may duplicate an applicant's other authority, the duplication shall be construed as conferring only a single operating right.

Note.—All applications are for authority to operate as a motor common carrier in interstate or foreign commerce over irregular routes, unless noted otherwise. Applications for motor contract carrier authority are those where service is for a named shipper "under contract".

DEPARTMENT OF JUSTICE

Drug Enforcement Administration

[Docket No. 81-1]

Burroughs Wellcome Co.; Importation and Manufacture of Controlled Substances; Objections, Requests for Hearing, and Hearing

On July 26, 1979 at 44 FR 43821 (1979), notice was given that Burroughs Wellcome Co., US 11–13 North, P. O. Box 1887, Greenville, North Carolina 27834, had made application to the Drug Enforcement Administration to be registered as a bulk manufacturer of the following basic class of controlled substances: opium extracts, opium fluid extracts, opium tinctures, opium powders, opium granulated, concentrate of poppy straw, and codeine, all listed in Schedule II of the Controlled Substances Act of 1970; and that Burroughs Wellcome had also made application to be registered as an importer of the following basic class of controlled substances; imported raw opium, poppy straw and concentrate of poppy straw, all listed in Schedule II of the Controlled Substances Act of 1970. Opportunity was given for the filing of comments or objections or requests for hearing with respect to said applications.

Requests for hearing have been filed by Penick Corporation (Penick), Mallinckrodt, Inc. (Mallinckrodt), Merck & Co., Inc. (Merck), Lee Laboratories, Inc. (Lee Labs), and Argon Research Corporation (Argon). Penick, Mallinckrodt, Merck and Lee labs are presently registered, or have applications for registration pending, to import and bulk manufacture all of the basic class controlled substances for which Burroughs Wellcome seeks registration to import and bulk manufacture. Applications have been filed by Argon to import and/or bulk manufacture several of the same basis class controlled substances indentified in Burroughs Wellcone's applications.

Penick Corporation states that, on the basis of information available to it, it does not believe that registration of Burroughs Wellcome would be consistent with U.S. obligations under international treaties, conventions, and protocols or with the public interest as defined in the controlled Substances Act and other applicable regulations. Penick also expresses its concern with the intent of Burroughs Wellcome, presently a fomulator of codeine analgesics, to integrate backward into the bulk manufacturing market. Penick sees such registration of Burroughs Wellcome as part of a trend which would have an adverse effect on competition, supply, and diversion control.

Mallinckrodt states its belief, also based on available information, that registration of Burroughs Wellcome would not be consistent with relevant international obligations and standards nor with the public interest. It also believes that the granting of Burroughs Wellcome's applications would have an adverse impact on the maintenance of adequate and uninterrupted supplies of the subject controlled substances and would tend to increase the risks of diversion industry-wide. Mallinckrodt also submits that registration of Burroughs Wellcome would have an adverse impact on competition at the bulk manufacturing level and also upon generic and other formulators which presently compete with Burroughs Wellcome.

Merck desires to be heard with respect to the appropriateness of granting the subject applications under the criteria set forth in 21 U.S.C. 823(a) and 958(a). Merck does not believe that Burroughs Wellcome's applications meet the statutory requirements for registration for reasons which include the following: (1) Registration of Burroughs Wellcome would be inconsistent with U.S. obligations under international treaties, conventions and protocols: (2) According to Merck, the present supply of and competition with respect to the Schedule II substances in question are adequate and therefore, under the statute, additional persons may not be registered; and (3) Registration of Burroughs Wellcome would be contrary to the public interest because such registration would allow Burroughs Wellcome to integrate backward into the bulk manufacturing industry, with anti-competitive results.

Lee Labs and Argon both express interest in the applications filed by Burroughs Wellcome because of their own present respective status as applicants for similar registrations. In additions, Lee Labs states its desire to be heard with respect to whether the registration of Burroughs Wellcome would be consistent with the public interest under the criteria set forth in the Controlled Substances Act and applicable regulations, and with U.S. international treaty obligations. Argon asserts that it desires to ensure that only that number of establishments is registered which can produce an adequate and uninterrupted supply of the subject substances.

According, notice is hereby given pursuant to 21 C.F.R. 1301.43 and 1311.42 that a hearing will be held on the aforesaid applications for registration commencing at 10:00 a.m. on Friday, March 6, 1981, in Hearing Room No. 3, Gelman Building, Lower Level, 2120 L Street, NW., Washington, D.C., the proceedings on the day being limited to a preliminary discussion to identify proper parties and issues, and to determine procedures and set dates and locations for further proceedings. Any person entitled to participate in said hearing and desiring to do so must file a Notice Of Appearance pursuant to 21 CFR 1301.54 and 1316.48 on or before March 4, 1981. A person who has filed a request for hearing need not also file a Notice Of Appearance.

Dated: January 27, 1981.

Administrator, Drug Enforcement Admininstration.

OFFICE OF MANAGEMENT AND BUDGET

Agency Forms Under Review

January 28, 1981.

Background

When executive departments and agencies propose public use forms, reporting, or recordkeeping requirements, the Office of Management and Budget (OMB) reviews and acts on those requirements under the Federal Reports Act (44 USC, Chapter 35). Departments and agencies use a number of techniques including public hearings to consult with the public on significant reporting requirements before seeking OMB approval. OMB in carrying out its responsibility under the Act also considers comments on the forms and recordkeeping requirements that will affect the public.

List of Forms Under Review

Every Monday and Thursday OMB publishes a list of the agency forms received for review since the last list was published. The list has all the entries for one agency together and grouped into new forms, revisions, extensions (burden change), extensions (no change), or reinstatements. The agency clearance officer can tell you the nature of any particular revision you are interested in. Each entry contains the following information:

The name and telephone number of the agency clearance officer (from whom a copy of the form and supporting documents is available);

The office of the agency issuing this form;

The title of the form;

The agency form number, if applicable;

How often the form must be filled out;

Who will be required or asked to report;

The Standard Industrial Classification (SIC) codes, referring to specific respondent groups that are affected;

Whether small businesses or organizations are affected;

A description of the Federal budget functional category that covers the information collection;

An estimate of the number of responses;

An estimate of the total number of hours needed to fill out the form;

An estimate of the cost to the Federal Government;

The number of forms in the request for approval;

The name and telephone number of the person or office responsible for OMB review; and

An abstract describing the need for and uses of the information collection.

Reporting or recordkeeping requirements that appear to raise no significant issues are approved promptly. Our usual practice is not to take any action on proposed reporting requirements until at least ten working days after notice in the **Federal Register**, but occasionally the public interest requires more rapid action.

Comments and Questions

Copies of the proposed forms and supporting documents may be obtained from the agency clearance officer whose name and telephone number appear under the agency name. The agency clearance officer will send you a copy of the proposed form, the request for clearance (SF83), supporting statement, instructions, transmittal letters, and other documents that are submitted to OMB for review. If you experience difficulty in obtaining the information you need in reasonable time, please advise the OMB reviewer to whom the report is assigned. Comments and questions about the items on this list should be directed to the OMB reviewer or office listed at the end of each entry.

If you anticipate commenting on a form but find that time to prepare will prevent you from submitting comments promptly, you should advise the reviewer of your intent as early as possible.

The timing and format of this notice have been changed to make the publication of the notice predictable and to give a clearer explanation of this process to the public. If you have comments and suggestions for further improvements to this notice, please send them to Jim J. Tozzi, Assistant Director for Regulatory and Information Policy, Office of Management and Budget, 726 Jackson Place, Northwest, Washington, D. C. 20503.

SECURITIES AND EXCHANGE COMMISSION

[Release No. 21893; 70-6425]

American Electric Power Service Corporation; Proposed Service Agreement

January 23, 1981.

Notice is hereby given that American Electric Power Service Corporation ("Service Company") 2 Broadway, New York, New York 10004, a service company subsidiary of American Electric Power Company, Inc. ("AEP"), a registered holding company, has filed with this Commission an application and amendments thereto pursuant to the Public Utility Holding Company Act of 1935 ("Act"), designating Sections 13 and 15 of the Act and Rules 86, 87, 89, 90, 91 and 93 promulgated thereunder as applicable to the proposed transactions. All interested persons are referred to the amended application, which is summarized below, for a complete statement of the proposed transactions.

Service Company maintains an organization of employees who are experienced in the problems and operations of public utilities and related businesses, together with appropriate facilities and equipment, through which it furnishes services to other member companies of the AEP system. All such services are rendered at cost. Service Company presently has service agreement with seven of the eight AEP operating utilities: Appalachian Power Company, Indiana and Michigan Electric Company, Kentucky Power Company, Kingsport Power Company, Michigan Power Company, Ohio Power Company and Wheeling Electric Company. There is at present no service agreement with Columbus and Southern Ohio Electric Company ("CSOE"), an operating utility acquired by AEP in 1980.

Each of the existing service agreements provides, in general, that costs which can be identified as incurred in connection with services performed for a specific company are to be charged to such company and that costs which cannot be so identified are to be allocated in one of several ways which can be summarized as followed:

(1) Costs of the Engineering Department attributable to construction are allocated to system companies on the basis of the proportion of certain construction expenditures of each company to the total of such construction expenditures of all companies;

(2) Costs of the Engineering Department attributable to operation are allocated to system companies on the

basis of the proportion of each company's operating utility revenues derived from the public to the consolidated operating utility revenues of all companies;

(3) Costs of the commerical and New Business Department, the Purchasing Department, the Insurance and Retirement Department and the Internal Auditing Department are allocated to system companies on basis of the proportion of each company's operating utility revenues derived from the public to the consolidated operating utility revenues of all companies; and

(4) Costs of other departments are allocated twenty-five percent (25%) to AEP, with the remaining seventy-five percent (75%) being allocated to the operating utility companies on the basis of the proportion of each company's operating utility revenue derived from the public to the consolidated operating utility revenue of all companies.

By order dated February 2, 1979 (HCAR No. 20910), the Commission amended the Uniform System of Accounts for Mutual Service Companies and Subsidiary Service Companies (as amended, the "System of Accounts") and amended Rule 93 promulgated under the Act so as to require service companies to keep their records in accordance with System of Accounts. Service companies were given until January 1, 1980, to change their accounting practices to conform to the System of Accounts, the major thrust of which is the development of detailed work order system to accumulate reimbursable costs and charges to customers. Service Company seeks Commission authorization to enter into a proposed service agreement ("Service Agreement") with the operating companies of the AEP system, which agreement is designed to implement the System of Accounts. Authorization is also sought for approval of arrangements to bill CSOE through December 31, 1981, only a portion of the costs otherwise allocable to it, and to bill AEP in accordance with the work order system, as described further herein.

The Service Agreement provides that all costs of Service Company will be accumulated and billed pursuant to a work order system which was put into effect on January 1, 1980. The work order system is designed to accumulate all costs on a job, project or functional basis, as appropriate. In this connection, all employees, including officers, of Service Company shall keep, within reasonable cost-benefit standards, time records which permit ready identification of hours worked, account numbers charged and work order numbers charged. Charges for salaries will be determined from the time records of employees and will be computed on the basis of each employees's hourly rate. Records of employee-related expenses, overhead and general administrative expenses will be maintained for each functional service group of Service Company, and such expenses shall be allocated to work orders in the same manner as salaries are allocated. Each work order will specify the company to be charged, or, if more than one company is to be charged, the method of allocation of charges.

Under the Service Agreement, costs accumulated on work orders shall be billed to system companies as follows:

(1) Costs accumulated on job, project or functional work orders for services performed for a single company will be billed to that company.

(2) Costs accumulated on job or project work orders for services performed for two or more companies will be allocated among and billed to such companies, the appropriate method of allocation will be determined by Service Company at the time each such work order is initiated and notice of such allocation method will be given to the companies affected.

(3) Costs accumulated on functional work orders for services of a general nature which are applicable to all system companies or to a class or classes of such companies will be allocated among and billed to such companies by application of one or more of the allocation ratios described in Article II of the Service Agreement. Article III of the Service Agreement specifies the method or methods of allocation which shall be applicable to functional work orders of each group of the Service Company. Such methods of allocation may be modified, or another method of allocation substituted, if Service Company determines that such modification or substitution is necessary for an equitable allocation of costs among system companies. Notice of any change in the method of allocation applicable to a work order shall be given to the companies affected. No substitution or change in the methods of allocation can be made unless the proposed new method of allocation is approved by this Commission.

Under Article II of the Service Agreement the following ratios (most of which will be revised semi-annually, based on figures as at June 30 and December 31) shall be applied to allocate costs accumulated on functional work orders for services of a general nature performed by the Service Company groups:

1. Kwh Sales Ratio—a ratio the numerator of which is the operating company's twelve month kwh sales, both billed and unbilled, and the denominator of which is the sum of the total twelve month's kwh sales, both billed and unbilled, of all operating companies.

2. Operating Company Load Ratio—a ratio the numerator of which is the "maximum demand" in effect for a calendar month for an operating company and the denominator of which is the "maximum demand" in effect for a calendar month for all operating companies.

3. Number of Customers Ratio—a ratio the numerator of which is the number of each operating company's firm electric customers (and/or gas customers, where applicable) and the denominator of which is the sum of the number of firm electric customers (and/or gas customers, where applicable) of all operating companies.

4. Number of System Company Employees Ratio—a ratio the numerator of which is the mumber of each system company's employees (exclusive of certain union employees, where applicable), and the denominator of which is the sum of the number of employees (exclusive of certain union employees, where applicable) of all system companies.

5. Number of Service Company Employees by Group Ratio—a ratio the numerator of which is the number of each group's employees and the denominator of which is the sum of the number of employees of all groups.

6. Plant Investment Ratio—a ratio the numerator of which is each system company's investment in utility plant, including coal mining assets (both owned and leased), net of accumulated provisions for depreciation, depletion and amortization, and the denominator of which is the sum of such net investments of all system companies.

7. Level of Construction Ratio—a ratio the numerator of which is the "defined construction expenditures" of each operating company and the denominator of which is the total of such "defined construction expenditures" of all such operating companies.

8. Tons of fuel acquired ratio—a ratio the numerator of which is the number of tons of coal (and equivalent tons in the case of oil) acquired for or on behalf of an operating company by Service Company during the previous twelve months and the denominator of which is the sum of the number of tons of coal (and equivalent tons in the case of oil) acquired for or on behalf of all operating companies by Service Company during such period.

9. Computer Resource Unit Ratio—a ratio the numerator of which is the current month's number of computer resource units (a measure of computer demand converted to a common base) associated with all work orders of the group for a system company and the denominator of which is the sum of all the current month's computer resource units associated with all work orders of the group for all system companies.

10. Coal Company Combination Ratio—a ratio the numerator of which is the sum of each system coal company's twelve months' gross payroll, original cost of fixed assets, original cost of leased assets and twelve months' gross revenues and the denominator of which is the combined totals of all system coal companies.

Under Article III of the Service Agreement, the above-cited ratios will be used to allocate costs on functional work orders for services of a general nature by the below designated specific Service Company groups as follows (with the particular ratio, by number as set forth above, in parentheses after the specific group activity): Administrative Services (5); Automotive Services (1 or 10, as appropriate); Civil Engineering (7); Computer Applications (1 or 9, as appropriate); Construction (7); Controllership (1, 7 or 10, as appropriate); Customer Service (3); Design (1 or 7, as appropriate); Electrical Engineering (1 or 7, as appropriate); Electrical Research and Development (1 or 7, as appropriate); Engineering Education Programs (1); Environmental Engineering (2 or 10, as appropriate); Executive Group (1, 7 or 10, as appropriate); Finance (1 or 10, as appropriate); Fuel Supply (8 or 10, as appropriate); Insurance and Pension (4 or 6, as appropriate); Land Management (1); Legal (1 or 10, as appropriate); Materials Handline (2 or 7, as appropriate); Mechanical Engineering (2 or 7, as appropriate); Nuclear Engineering (2, but only for operating companies having nuclear generating facilities); Operations (2); Personnel (4 or 5, as appropriate); Public Affairs (1 or 10, as appropriate); Purchasing (1 or 10, as appropriate); Quality Assurance (2); Rates (1 or 2, as appropriate); System Planning (1, 2, or 7, as appropriate); Transmission and Distribution Operations (1); Technical Education (2); and Treasury (1, 7 or 10, as appropriate).

Certain operating companies of the AEP system now have, or may from time to time have, a joint ownership in a generating plant with non-affiliates. With respect to such an operating company, the costs of a Service Company group accumulated on functional work orders for services of a general nature, which would under the Service Agreement ordinarily be subject to allocation to such operating company on the basis of its interest in such generating plant, would be allocated to the operating company only to the extent that such operating company had direct responsibility for, or directly participated in, some phase of the construction and/or operation of such generating plant and then only to the extent of the partial interest of such operating company in such generating plant.

Under the Service Agreement, interest cost on Service Company's borrowed capital shall be allocated to system companies based on a ratio the numerator of which is the total annual costs, exclusive of such interest cost, charged by Service Company to a system company and the denominator of which is the sum of the total annual costs, exclusive of such interest cost, charged by Service Company to all such companies. This ratio will be revised annually based on figures as of December 31.

The proposed new methods of allocation under the Service Agreement were put into effect on January 1, 1980, and differ from those specified in the service agreements presently in effect. Should any subsequent modification be deemed necessary by this Commission, Service Company will retroactively adjust its charges to reflect the changes made.

It is stated that Service Company began providing services to CSOE (which AEP acquired May 9, 1980) on July 1, 1980. Charges to work orders for services provided directly to CSOE by Service Company shall be billed as incurred. CSOE presently has its own internal service departments, which will be eliminated by 1982 through attrition and the integration of its employees into Service Company. Until then it is proposed that CSOE will bear only a portion of the charges otherwise allocable to it as an operating company, as follows:

Period and portion
July 1, 1980 to December 31, 1980: 25 percent.
January 1, 1981 to June 30, 1981: 50 percent.
July 1, 1981 to December 31, 1981: 75 percent.
January 1, 1982 and thereafter: 100 percent.

Should any subsequent modification in the proposed method of billing CSOE be deemed necessary by this Commission, Service Company will retroactively adjust its charges to reflect the changes made.

Through December 31, 1979, Service Company had billed AEP at a flat rate of 25 percent of the costs of services rendered by Service Company. From and after January 1, 1980, in accordance with the System of Accounts, AEP will be billed in accordance with the work order system. Work orders will be established for specific services performed for AEP, and will include charges for salaries, which will be determined from employees time records and will be computed on the basis of each employee's hourly rate. Employee-related expenses, overhead and general administration expenses will be allocated to such work orders in the same proportion as the salaries of the Service Company group performing services for AEP. The methods of allocation specified in Article III of the Service Agreement will not be directly applicable to AEP, except with respect to allocation of interest costs and costs of the computer applications group.

The fees and expenses to be incurred in connection with the proposed transactions are estimated at $4,000. It is stated that the State Corporation Commission of Virginia has authorized Appalachian Power Company to enter into the Service Agreement, that the West Virginia Public Service Commission has authorized Appalachian Power Company and Wheeling Electric Company to enter into the Service Agreement, and that no other state commission and no federal commission, other than this Commission, has jurisdiction over the proposed transactions.

Notice is further given that any interested person may, not later than February 18, 1981, request in writing that a hearing be held on such matter, stating the nature of his interest, the reasons for such request, and the issues of fact or law raised by said amended application which he desires to controvert; or he may request that he be notified if the Commission should order a hearing thereon. Any such request should be addressed: Secretary, Securities and Exchange Commission, Washington, D.C. 20549. A copy of such request should be served personally or by mail upon the applicant at the above-stated address, and proof of service (by affidavit or, in case of an attorney-at-law, by certificate) should be filed with the request. At any time after said date, the application, as amended or as it may be further amended, may be granted as provided in Rule 23 of the General Rules and Regulations promulgated under the Act, or the Commission may grant exemption from such rules as provided in Rules 20(a) and 100 thereof or take such other action as it may deem appropriate. Persons who request a hearing or advice as to whether a

hearing is ordered will receive any notices and orders issued in this matter, including the date of the hearing (if ordered) and any postponements thereof.

For the Commission, by the Division of Corporate Regulation, pursuant to delegated authority.

George A Fitzsimmons,

Secretary.

BILLING CODE 8010-01-M

[Release No. 11582; 812-4721]

The Australian Industry Development Corporation c/o Richard D. Spizzirri, Esq., Davis, Polk & Wardwell

January 23, 1981.

Notice is hereby given that The Australian Industry Development Corporation ("Applicant") One Chase Manhattan Plaza, New York, New York 10005 filed an application on August 26, 1980, and an amendment thereto on December 12, 1980, for an order of the Commission pursuant to Section 6(c) of the Investment Company Act of 1940 ("Act") exempting Applicant from all provisions of the Act. All interested persons are referred to the application on file with the Commission for a statement of the representations contained therein, which are summarized below.

Applicant states that it was established by the Australian Industry Development Corporation Act of 1970 as amended ("AIDC Act") as a wholly-owned statutory corporation of the Commonwealth of Australia ("Australian Government") to provide a source of funds necessary to promote sound development of industrial and resource development projects in Australia, and to aid Australian interests in participating in the ownership and control of such projects. Applicant commenced operations in 1971. Applicant states that it provides financing for industries concerned with the manufacture, processing, treatment, transportation and distribution of goods, and the development and use of natural resources or technology. Subject to certain considerations of national policy, Applicant states that it operates as a profit-making commercial enterprise and publishes all information which is required under Australian laws to be published by public companies or which is customarily provided by such companies. Applicant also states that its principal office is located at 212 Northbourne Avenue, Braddon, Australia.

Applicant states that it is not a bank within the meaning of the Banking Act 1959 and therefore operates outside the banking system regulated by Reserve Bank of Australia. However, Applicant represents that its principal business is the lending of money and that it obtains funds for such loans by the issuance of its debt obligations. Thus Applicant argues that it may be considered to be engaged in the business of banking, specifically that it may be considered a "development bank" or, alternatively, an "industrial bank". Although not regulated under the Banking Act of 1959, Applicant represents that its business is influenced by Australian federal monetary authorities. Applicant states that its annual borrowing program is subject to approval of the Australian Loan Counsel and interest rates paid on term borrowings must be approved by the federal treasurer. In addition, Applicant is required to seek approval for all its international borrowings. Moreover, Applicant states that its structure, operations and activities are subject to regulation under the AIDC Act.

According to the application, the AIDC Act specifies that Applicant will be governed by a board of directors consisting of an Executive Chairman, the Secretary to the Department of Industry and Commerce, the Secretary to the Department of Trade and Resources and not less than five nor more than eleven other directors, appointed by the Governor-General. Under the AIDC Act, A $100,000,000 [1] has been appropriated as the capital of Applicant, of which A $62,500,000 has been paid in by the Australian Government. Applicant states that the remainder of the appropriated amount is payable by the Australian Government in installments as Applicant's outstanding borrowings increase and additional capital is needed as a base for further borrowings. Applicant represents that pursuant to the AIDC Act, the statutory capital will not ordinarily be used in funding operating loans and investments.

Applicant states that its capital together with any other moneys not immediately required for the performance of its functions are held in a diversified general investment portfolio designed to meet normal investment criteria of security, income and liquidity. Applicant states that although there is technically no limit to the amount of funds which can be held in the general investment portfolio, general portfolio investments do not constitute a primary purpose of Applicant and funds, other than Applicant's statutory capital, are held in the general investment portfolio only until actually required for operational loans and investments. According to the application, as of June 30, 1980, the general investment portfolio totaled A $78,266,000 or 16.83 percent of Applicant's total assets, and for the year then ended produced 29.4 percent of Applicant's total income. Applicant states that as of June 30, 1980, 77.86 percent of the general investment portfolio consisted of interest bearing investments, 18.1 percent were shares in companies and 4.03 percent were freehold properties.

Applicant states that is is authorized by AIDC Act to borrow money, both in Australia and abroad, up to an amount not exceeding eight times the sum of its paid-in statutory capital plus reserves. At June 30, 1980, Applicant's total borrowings aggregated A $375,802,000 of which 70.56 percent constituted borrowings in Australian currency and 29.44 percent comprised borrowings in foreign currencies (in U.S. dollars, Swiss Francs and Deutschemarks). Applicant further states that its borrowed funds are substantially short-term (*i.e.*, original term of up to five years).

As stated in the application, the AIDC Act requires that Applicant perform its function of providing a source of funds for development with a view to securing an improvment in the balance of Australia's external trading operations and with regard to governmental policies, including the current monetary policy. The AIDC Act further requires Applicant to perform its functions in such manner as will promote trade, commerce, economic development, and further the development of Australian resources necessary for the defense of the Commonwealth. According to the application Applicant's clients range from large, well established companies to newer, smaller companies with little growth or performance history. In deciding whether to finance a particular company or to participate in a particular enterprise or project, Applicant states that the AIDC Act requires that Applicant have regard to (a) the importance of the industry concerned to the Australian economy, and (b) the extent to which the financing or participation would contribute to the effective performance of Applicant's functions. In addition, pursuant to the AIDC Act, Applicant states that its financial statements are reviewed annually by the Auditor General of Australia, whose report is submitted to the Treasurer for consideration in each House of Parliament, and that the

[1] The exchange rate for one Australian dollar was U.S. $1.1675 at December 10, 1980, U.S. $1.158 at June 30, 1980, and U.S. $1.1215 at June 29, 1979.

Auditor General has responsibility under the Federal Audit Act to report to Parliament anything untoward which comes to his attention in the course of the audit.

Applicant states that its financings are generally medium-term secured loans at fixed or variable interest rates, with provisions for repayment by installments after a fixed period. Applicant represents that such loans normally have maturities within the three to eight year range and that the weighted average maturity of its present portfolio for all operational loans is approximmately 7.8 years. According to the application, as of June 30, 1980, operational loans totaled A $318,252,000 or 86.49 percent of Applicant's total operational financing programs and 68.43 percent of Applicant's total assets; and for the year ended June 30, 1980, reserves from such operational loans provided 59.27 percent of Applicant's total income.

According to the application, under the AIDC Act, Applicant may also contribute equity capital to a company or participate in the equity of a development project. However, Applicant represents that operational equity investment financings generally are made only to supplement equity capital available from other sources where this is important to the development of a particular venture or to meet objectives with respect to Australian ownership or participation. As required by the AIDC Act, Applicant states that it seeks to dispose of any equity participation as soon as feasible, having regard to the well-being of the venture itself and its own statutory objectives. Applicant states that while equity investments play a role in its financing activities, it is not a large part of such activities. According to the application, as of June 30, 1980, operational equity investments totaled A $39,389,000, or 10.70 percent of Applicant's total operational financing programs and only 8.47 percent of Applicant's total assets; and for the year then ended operational equity investments provided 2.33 percent of Applicant's total income.

According to the application, Applicant proposes to issue and sell in the United States prime quality commercial paper notes ("Notes") in minimum denominations of $100,000 through major United States commercial paper dealers. Applicant represents that it will secure an undertaking from each such dealer that the Notes will be sold to institutional investors and other entities and individuals that ordinarily purchase commercial paper notes and will not be offered for sale to the general public. Applicant states that it proposes to issue and sell the Notes initially in amounts up to U.S. $30,000,000–$50,000,000 outstanding at any one time, and that the Notes will not have maturities exceeding 270 days nor will they include any provisions for extension, renewal or automatic rollover at the option of either the holders or Applicant. Applicant represents that the short-term notes will be direct liabilities of Applicant, and will rank *pari passu* among themselves and equally with all other unsecured, unsubordinated indebtedness of Applicant.

Applicant states that it plans to sell the Notes without registration under the Securities Act of 1933 ("1933 Act"), in reliance upon an opinion of its special counsel in the United States that the offering will qualify for an exemption from the registration requirements of the 1933 Act provided for certain short-term commercial paper by Section 3(a)(3) thereof. Accordingly, Applicant states that the Notes will have the characteristics, including their negotiability, maturity and minimum denomination, such as to qualify them for exemption under Section 3(a)(3) and that the proceeds of the sale of the Notes (to the extent not applied to the repayment of maturing Notes or to the payment of current expenses) will be used by Applicant for current transactions. Applicant represents that it will not proceed with its proposed offering until it has received such an opinion letter. Applicant does not request Commission review or approval of such opinion letter and the Commission expresses no opinion as to the availability of any such exemption. Applicant further represents that the presently proposed issue of debt securities and any further issue of its debt securities in the United States shall have received, prior to issuance, one of the three highest investment grade ratings from at least one of the nationally recognized investment rating organizations, and that its special United States counsel shall have certified that such rating had been received; provided, however, that no such rating shall be required to be obtained, if in the opinion of its special United States counsel, such counsel having taken into account for the purposes thereof the doctrine of "integration" referred to in various releases and no-action letters made public by the Commission, and exemption from registration is available with respect to such issue under Section 4(2) of the 1933 Act.

Applicant undertakes to ensure that the dealer will provide each offeree of the Notes, prior to any sale of Notes to such offeree, with a memorandum describing the business of Applicant and containing the most recent publicly available audited financial statements of Applicant audited in acccordance with Australian auditing practices. Applicant states that the offering memorandum will include a paragraph highlighting the material differences between Australian accounting standards applicable to Applicant and generally accepted accounting principles employed by similar U.S. institutions. Applicant represents that such memoranda will be at least as comprehensive as those customarily used in offering commercial paper in the United States and will be updated periodically to reflect material changes in the business or financial status of Applicant. Applicant further represents that in the future it may issue other debt securities, but that such securities will be offered or sold only pursuant to a registration statement under the 1933 Act, or an opinion of its special United States counsel that an exemption from registration under the 1933 Act is available, or pursuant to a staff position that no action would be take if such securities are not registered. Applicant further undertakes to provide to any person to which it offers such debt securities in the United States (and undertakes to ensure that any underwriter or dealer through whom it makes such offers will so provide, prior to any sale of debt securities to such offeree) disclosure documents which are at least as comprehensive in their description of Applicant and the businesses of Applicant as those customarily used in United States offerings of such securites, and which contain the financial statements of Applicant. Applicant consents to having any order granting the relief requested under Section 6(c) of the Act expressly conditioned upon its compliance with the foregoing undertakings concerning disclosure documents.

Applicant represents that it will appoint a bank or trust company having an office in New York City, the Commission or a New York City corporation providing corporate services for lawyers as agent to accept service of process in any suit, action, or proceeding, based on the Notes or with respect to the offer and sale of the Notes and instituted in any state or federal court by the holder of any Note. The application states that Applicant will expressly submit to the jurisdiction of state or federal courts in the City and

State of New York in respect to any such suit, action or proceeding. Applicant will also be subject to suit in any other court in the United States which would have jurisdiction because of the manner of the offering of the Notes or otherwise. The application further states that such appointment of an agent to accept service of process and such consent to jurisdiction shall be irrevocable until all amounts due and to become due with respect to the Notes have been paid. The application also states that Applicant will similarly consent to jurisdiction and appoint an agent for service of process in any such suit, action, or proceeding arising from any future offerings of debt securities that it may make in the United States or with respect to the disclosure documents prepared in connection therewith.

Section 6(c) of the Act provides, in pertinent part, that the Commission, by order upon application, may conditionally or unconditionally exempt any person, security or transaction, or any class or classes of persons, securities or transactions, from any provision under the Act or any rule or regulation thereunder, if and to the extent that such exemption is necessary or appropriate in the public interest and consistent with the protection of investors and the purposes fairly intended by the policy and provisions of the Act.

Section 3(a)(3) of the Act defines investment company to mean "any issuer which is engaged or proposes to engage in the business of investing, reinvesting, owning, holding, or trading in securities, and owns or proposes to acquire investmant securities having a value exceeding 40 percent of the value of such issuer's total assets (exclusive of Government securities and cash items) on an unconsolidated basis".

Applicant requests an order pursuant to Section 6(c) of the Act exempting it from all the provisions of the Act because of uncertainty as to whether an entity such as Applicant would be considered an investment company as that term is defined in the Act. Applicant submits that it is different from the type of institution Congress intended the Act to regulate. Applicant also submits that an exemption pursuant to Section 6(c) of the Act would benefit institutional and other sophisticated investors in the United States by making Applicant's debt securities more readily available to such investors. Without such an exemption Applicant states that it would be precluded from publicly offering its securities in the United States.

In addition, Applicant submits that approval of its application will assist it in its primary function of furthering the development of Australian industry by providing Applicant with an efficient and reliable source of U.S. dollars which will enable it to assist Australian export related projects on an exchange risk free basis. Applicant further submits that approval of the application will not give it a competitive advantage over United States issuers of commercial paper, United States banks or bank holding companies, but merely will place Applicant on a par with such domestic issuers. Applicant finally argues that its capital structure and operations are extensively supervised and regulated by Australian public officials under the AIDC Act and that this control and regulation together with the requirements of Section 3(a)(3) of the 1933 Act and the anti-fraud provisions of the Securities Exchange Act of 1934 will afford substantial protection to investors in its debt securities.

Applicant concludes that granting the requested exemptive relief pursuant to Section 6(c) of the Act would be appropriate in the public interest and consistent with the protection of investors and the purposes fairly intended by the policy and provisions of the Act.

Notice is further given that any interested person may, not later than February 17, 1981, at 5:30 p.m., submit to the Commission in writing a request for a hearing on the application accompanied by a statement as to the nature of his interest, the reasons for such request, and the issues, if any, of fact or law proposed to be controverted, or he may request that he be notified if the Commission shall order a hearing thereon. Any such communication should be addressed: Secretary, Securities and Exchange Commission, Washington, D.C. 20549. A copy of such request shall be served personally or by mail upon Applicant at the address stated above. Proof of such service (by affidavit or, in the case of an attorney-at-law, by certificate) shall be filed contemporaneously with the request. As provided by Rule 0–5 of the Rules and Regulations promulgated under the Act, an order disposing of the application herein will be issued as of course following said date unless the Commission thereafter orders a hearing upon request or upon the Commission's own motion. Persons who request a hearing, or advice as to whether a hearing is ordered, will receive any notices and orders issued in this matter, including the date of the hearing (if ordered) and any postponements thereof.

For the Commission, by the Division of Investment Management, pursuant to delegated authority.

[Release No. 21898; 70-6273]

Blackhawk Coal Co. and Indiana & Michigan Electric Co.; Proposed Additional Investment in Spending by and Adjustment to Capitalization of Coal Mining Subsidiary

January 27, 1981.

Notice is hereby given that Indiana & Michigan Electric Company ("I&M"), 2101 Spy Run Avenue Fort Wayne, Indiana 46801 an electric utility subsidiary of American Electric Power Company, Inc. ("AEP"), a registered holding company, and Blackhawk Coal Company ("Blackhawk") c/o American Electric Power Service Corp. 161 West Main Street Lancaster, Ohio 43130, a coal mining subsidiary of I&M, have filed with this Commission a post-effective amendment to their application-declaration previously filed and amended pursuant to the Public Utility Holding Company Act of 1935 ("Act"), designating Sections 6, 7, 9, 10, 12(b), 12(c) and 12(f) of the Act and Rules 42, 43, 45, 46 and 50(a)(3) promulgated thereunder as applicable to the proposed transactions. All interested persons are referred to the application-declaration, as amended by said post-effective amendment, which is summarized below, for a complete statement of the proposed transactions.

By order dated August 7, 1980 (HCAR No. 21672), as modified by order dated September 30, 1980 (HCAR No. 21672A), I&M was authorized to transfer to Blackhawk its interest in certain coal mines located in Carbon County, Utah and in reserves, leases, options, equipment and rights related thereto (all such assets, collectively, the "Mines"), on terms and conditions set forth in said orders. Jurisdiction was reserved with respect to proposed expenditures of $13,000,000 for mine improvements to be made between January 1, 1981, and June 30, 1981.

By post-effective amendment it is stated that a contemplated sale of the Mines by December 31, 1980, was not consummated, that no sale of the Mines is now contemplated in the immediate future, and that applicants-declarants request (1) authorization for Blackhawk to spend up to $13,000,000 on mine

improvements to be made prior to June 30, 1981, and for I&M to invest in Blackhawk up to $13,000,000 to finance such expenditures, and (2) authorization for an adjustment of the capitalization of Blackhawk to reflect the acquisition of a United States coal lease.

Concerning the proposed mine improvements it is stated that capital expenditures associated with the Crandall Canyon Project are essential to the continuation of current mining operations. That project involves the construction of major mine ventilation shafts, underground transportation, and surface facilities which are necessary to maintain the present 1.5 million-ton annual rate of coal production from the Mines. It is stated these improvements for the entire Crandall Canyon Project will cost approximately $40,200,000 (with future expenditures by Blackhawk and investment in Blackhawk by I&M to be the subject of subsequent filings with this commission), will be completed by 1983 and could support an increase in the production level to 2.0 million tons per year.

Coal is presently being mined from Blackhawk's No. 3 and No. 5 mines. Based on current production levels, the reserves accessable from the No. 5 mine will be depleted by 1984. The No. 3 mine has a potential remaining life of up to forty years. However, the existing ventilation systems in both mines are operating at a near maximum capacity. Without the air ventilation improvements associated with the Crandall County Project, it is anticipated that the existing ventilation system, which provides the air movement required to comply with Federal mines safety and health regulations, will be inadequate after 1982 and result in a rapid decline in production. Major improvements are also required in the underground transportation system, in surface facilities such as warehouses, maintenance shops and bathhouses, and in the sanitary sewer system.

Blackhawk has planned an improvement program which is designed to maintain production from the No. 3 mine until the recoverable clean coal reserves, estimated at 60 million tons, are exhausted. The initial improvements involve the construction of two large diameter vertical mine shafts (intake and exhaust) which it is anticipated will satisfy the ventilation requirements for the life of the No. 3 mine. Other improvements are designed to reduce round-trip travel time from the mine portal to the working face, including the construction of a new elevator system, conversion of battery-powered to diesel underground transportation equipment and improvements to mine roadways. The improvement program also includes the construction of new surface facilities which will replace temporary and obsolete facilities, accomodate additional work force, and improve employee efficiency and morale.

It is proposed that I&M will supply Blackhawk with the additional capital required for the $13,000,000 of improvement expenditures through June 30, 1981 (which Blackhawk will either spend for such improvements or reimburse itself for funds previously spent thereon), such capital to be split between I&M's purchase of debt, in the form of a promissory note of Blackhawk maturing December 31, 2010, and the purchase of equity in proportions corresponding to the respective debt-equity ratios of I&M at the end of 1980. The interest rate on such debt will be set at the effective interest cost of I&M's most recent issue of first mortgage bonds preceding the additional investment.

Concerning a proposed adjustment to the capitalization of Blackhawk, it is stated that under a settlement agreement effective November 30, 1979, with the former operator of the Mines, I&M agreed to pay Braztah Corporation and McCulloch Oil Corporation, if the assignment of a certain United States coal lease to Franklin Real Estate Company (a real estate subsidiary of AEP) were approved by the Bureau of Land Management, Department of Interior, before June 27, 1985, the amount of $3,888,000 (the "Contingent Braztah Obligation"), in installments beginnng on June 27, 1981, and on each June 27 thereafter to and including June 27, 1985, with interest on the unpaid balance of said amount at the rate of 8 percent per annum from June 27, 1979. That assignment has been approved effective September 1, 1980. I&M and Franklin Real Estate Company will assign ownership of such lease to Blackhawk, which will assume the Contingent Braztah Obligation. Since that coal lease will not be utilized immediately, but will be held by Blackhawk for future development, I&M and Blackhawk consider that it will be appropriate to adjust Blackhawk's capitalization to offset any impact that assumption of the Contingent Braztah Obligation might have on the cost of coal sold by Blackhawk to I&M. It is proposed that, upon assumption of the Contingent Braztah Obligation, Blackhawk will simultaneously reduce its long-term capitalization of $3,888,000 by: (1) prepaying $1,750,000 principal amount of its 10.13 percent promissory note due December 31, 2010, held by I&M, and (2) redeeming 2,138 shares of its common stock at its stated value of $1,000 per share (for a total of $2,138,000). Such amounts reflect the 45 percent-55 percent debt-equity ratio used to determine Blackhawk's initial capitalization. It is proposed that payment of such amounts shall be effected by the issuance to I&M by Blackhawk of a non-interest bearing promissory note due December 31, 1990, in the principal amount of $3,888,000.

Since it is anticipated that the proposed investment by I&M in Blackhawk to finance the Crandall County Project will occur substantially contemporaneously with the assumption by Blackhawk of the Contingent Braztah Obligation, it is proposed that Blackhawk and I&M may elect to credit up to $2,138,000 against the additional amount to be invested by I&M in the common stock of Blackhawk, in lieu of redeeming such amount of common stock in connection with such assumption; provided, however, that the amount of any such credit shall be deemed to be a new investment by I&M in Blackhawk, for all purposes of the prior orders in this proceeding, and of the date of such credit.

Applicants-declarants claim exemption from the competitive bidding requirement of Rule 50 for Blackhawk's issuance of its common stock and notes to I&M pursuant to Rule 50(a)(3).

The fees and expenses to be incurred in connection with the proposed transactions will be supplied by further amendment. It is stated that no federal commission and no state commission, other than this Commission, has jurisdiction over the proposed transactions.

Notice is further given that any interested person may, not later than February 23, 1981, request in writing that a hearing be held on such matter, stating the nature of his interest, the reasons for such request, and the issues of fact or law raised by said application-declaration, as amended by said post-effective amendment, which he desires to controvert; or he may request that he be notified if the Commission should order a hearing thereon. Any such request should be addressed: Secretary, Securities and Exchange Commission, Washington, DC 20549. A copy of such request should be served personally or by mail upon applicants-declarants at the above-stated addresses, and proof of service (by affidavit or, in case of an attorney-at-law, by certificate) should be filed with the request. At any time after said date, the application-declaration, as amended by said post-effective amendment or as it may be

further amended, may be granted and permitted to become effective as provided in Rule 23 of the General Rules and Regulations promulgated under the Act, or the Commission may grant exemption from such rules as provided in Rules 20(a) and 100 thereof or take such other action as it may deem appropriate. Persons who request a hearing or advice as to whether a hearing is ordered will receive any notices and orders issued in this matter, including the date of the hearing (if ordered) and any postponements thereof.

For the Commission, by the Division of Corporate Regulation, pursuant to delegated authority.

[Release No. 21897; 70-6488]

Cedar Coal Co. et al.; Proposed Post-Effective Amendment Regarding Mining Equipment Leases by Coal Mining Subsidiaries

January 26, 1981.

In the matter of Cedar Coal Company, Central Appalachian Coal Company, Southern Appalachian Coal Company, 301 Virginia Street East, Charleston, West Virginia 25327. Central Ohio Coal Company, Windsor Power House Coal Company, 301 Cleveland Avenue SW., Canton, Ohio 44702. Southern Ohio Coal Company, Post Office Box K, Moundsville, West Virginia 26041.

Notice is hereby given that Cedar Coal Company ("Cedar"), Central Appalachian Coal Company ("CACCo"), and Southern Appalachian Coal Company ("SACCo"), coal mining subsidiaries of Appalachian Power Company ("Appalachian"), and Central Ohio Coal Company ("SOCCo"), Windsor Power House Coal Company ("WPHCCo"), and Southern Ohio Coal Company ("SOCCo"), coal mining subsidiaries of Ohio Power Company, which, like Appalachian, is an electric utility subsidiary of American Electric Power Company, Inc., a registered holding company, have filed with this Commission post-effective amendments to the application previously filed in this proceeding pursuant to the Public Utility Holding Company Act of 1935 ("Act"), designating Sections 9 and 10 of the Act as applicable to the proposed transactions. All interested persons are referred to the application as now amended, for a complete statement of the proposed transactions.

By order dated September 24, 1980 (HCAR No. 21726), Cedar, CACCo, SACCo, Appalachian and SOCCo were authorized to enter into a separate master leasing agreement with Connecticut Bank and Trust Company and Donald E. Smith, as Trustees for the Bank of New York ("Leassee") pursuant to which the Trustees will commit to lease during 1980 and 1981 to such companies coal mining equipment with a total cost to Trustees not exceeding $25,000,000.

By post-effective amendment it is requested that WPHCCo be included as an applicant in the application and amendments thereto. Applicants anticipate leasing coal mining equipment during 1980 and 1981 under the Lease having a total estimated value as set forth below:

[In thousands of dollars]

Company	New equipment cost	Estimated replacement equipment cost	Contingency allowance	Total
Cedar	$1,256	$3,270	$274	$4,800
CACCo	1,310	650	90	2,050
COCCo	150	3,711	239	4,100
SACCo	3,865		235	4,100

Totals	14,948	8,701	1,351	25,000

Assuming a prime interest rate of 21½ percent over the term of the leased equipment, the equivalent effective annual interest rate would be 21.70 percent on a weighted basis or lower if the LIBO is less than 21½ percent.

The generating plants named below expect to burn Applicants' coal in the indicated amount:

[In thousands of tons]

Coal company	Receiving plant	Plant burn (annual)			Operating Company
		Actual 1979	Estimate 1980	Estimate 1981	
Cedar	Amos (a)	7,618	7,209	7,074	Appalachian.
CACCo	Mountaineer	0	755	3,020	Appalachian.
SACCo	Amos		(see above)		Appalachian.
COCCo	Muskingum	3,829	3,244	3,532	Ohio.
SOCCo	(1) Gavin (b)	8,218	8,063	7,483	Ohio.

	(2) Gavin		(see above)		Ohio.
	(3) Mitchell		(see above)		Ohio.
Totals		25,990	24,648	27,137	

The table below indicates each Applicant's "proven and probable" reserves of clean, recoverable coal, its current annual production capacity, and the anticipated additional production capacity to be obtained from the equipment proposed to be leased together with other new investments.

[In thousands of tons]

Applicant	Total reserves	1979 tons shipped	Anticipated additional clean tons capacity	Total anticipated clean tons capacity
Cedar	122,235	1,774	721	2,495
CACCo	22,250	684	200	884
SACCo	57,275	1,242	1,153	2,395

SOCCo	324,340	4,623	1,577	6,200
WPHCCo	32,735	570	111	680
Totals	661,335	12,344	3,761	16,105

The form of the proposed Master Lease Agreement between trustees and WPHCCo will be substantially in the same form as previously authorized, however, all references to "the Coal Contract" and "the Coal Contract Letter" shall not be effective until the coal contract between Ohio Power Company and WPHCCo is prepared and all requisite regulatory approvals of that contract obtained. Such approvals will not be required to enter into and incur obligations under the Master Lease or to leasing equipment thereunder. The Coal Contract Letter to the Lessor from Ohio Power and WPHCCo will be executed and delivered after all requisite approvals have been obtained. Ohio Power Company and WPHCCo have agreed with the Bank of New York to prepare the Coal Contract and use their best efforts to obtain such approvals.

It is stated that no state commission and no federal commission, other than this Commission has jurisdiction over the transactions proposed in the post effective amendments. No fees or expenses are expected to be incurred in connection with the transactions proposed in the post effective amendments.

Notice is further given that any interested person may, not later than February 17, 1981, request in writing that a hearing be held on such matter, stating the nature of his interest, the reasons for such request, and the issues of fact or law raised by the filing which he desires to controvert; or he may request that he be notified if the Commission should order a hearing thereon. Any such request should be addressed: Secretary, Securities and Exchange Commission, Washington, D.C. 20549. A copy of such request should be served personally or by mail upon the applicants at the above-stated addresses, and proof of service (by affidavit or, in case of an attorney at law, by certificate) should be filed with the request. At any time after said date the application, as amended or as it may be further amended, may be granted effective as provided in Rule 23 of the General Rules and Regulations promulgated under the Act, or the Commission may grant exemption from such rules as provided in Rules 20(c) and 100 thereof or take such other action as it may deem appropriate. Persons who request a hearing or advice as to whether a hearing is ordered will receive any notices or orders issued in this matter, including the date of the hearing (if ordered) and any postponements thereof.

The Columbia Gas System, Inc. and Columbia Gulf Transmission Co.; Proposed Short-Term Loan to Partnership Equity Investment in Partnership and Issuance of Common Stock and Promissory Notes

January 27, 1981

Notice is hereby given that Columbia Gas System, Inc. ("Columbia"), 20 Montchanin Road, Wilmington, Delaware 19807, a registered holding company, and Columbia Gulf Transmission Company ("Gulf"), 3805 West Alabama Avenue, Houston, Texas 77027, a wholly-owned subsidiary, have filed an application-declaration and an amendment thereto with this Commission pursuant to the Public Utility Holding Company Act of 1935 ("Act"), designating Sections 6(b), 9, 10, and 12 and Rules 16, 43 and 45 promulgated thereunder as applicable to the proposed transactions. All interested persons are referred to the application-declaration, which is summarized below, for a complete statement of the proposed transactions.

Gulf is an interstate pipeline company regulated be the Federal Energy Regulatory commission under the Natural Gas Act. Contingent upon approval of this Commission, Gulf has entered into a General Partnership Agreement ("Agreement") dated September 15, 1978 for the purpose of constructing and operating a pipeline system for the transportation of natural gas from Oklahoma to Arkansas. The proposed partnershipp, Ozard Gas Transmission System ("Ozark"), will be comprised of the following equal basis partners: Gulf, Ozark Gas Pipeline Corporation ("OGPL"), Tennessee Ozark Gas Company ("Tennessee Ozard") and Oklahoma Natural Development Corporation ("ONDC"). Ozark will be managed by a management committee composed of representatives of each of the four partners. Ozark has entered into a Construction Agreement and an Operating Agreement for OGPL to construct and operate the pipeline system.

Subject to the approval of FERC, Ozark proposes to construct, operate and maintain a pipeline system consisting of approximately 285 miles of 20 inch trunk pipeline and approximately 170 miles of 4 inch, 6 inch, 8 inch, or 10 inch lateral gathering lines (together with appurtenant facilities), compression facilities totaling 3,125 horsepower (10 stations varying in power from 50 horsepower to 1,500 horsepower) and dehydration facilities. The 20 inch line will extend from Pittsburg County, Oklahoma to a point of interconnection with Natural Gas Pipe Line Company of America ("NGPL") in White County, Arkansas.

Columbia Gas Transmission Corporation ("TCO"), another Columbia subsidiary, and Tennessee Gas Pipeline Company ("Tennessee"), a Division of Tenneco Inc., have acquired rights to purchase any gas discovered and produced from approximately 1,115,000 net acres in the Arkoma Basin in Oklahoma and Arkansas, and will continue to negotiate for the purchase or additional acreage and reserves in the Arkoma Basin and other areas from which gas is economically deliverable to

Ozark. Gas reserves available to Ozark from the Arkoma Basin are estimated at 874 Bcf, including 77 Bcf of proven reserves, 126 Bcf of probable reserves yet to be drilled and 671 Bcf of potential reserves which may be explored and drilled through the remainder of this century.

TCO and Tennessee have entered into separate Gas Transportation Agreements with Ozark under which TCO and Tennessee are each entitled to 50 percent of the capacity of the line. ONDC has an option, exercisable within two years after the pipeline's initial operation, to utilize up to 25 percent of the pipeline's capacity to the extent not committed to TCO and Tennessee. Ozark will receive the gas owned by TCO, Tennessee and ONDC if it so elects and transport the gas for delivery to NGPL, for the account of and/or for exchange with each of the shippers. TCO's gas will be delivered to the Columbia service territory through delivery by displacement to Gulf's existing pipeline facilities under the terms being negotiated. The system will be designed to be capable of transporting 170,000 Mcf of natural gas per day. The average annual flow rate through the facilities during the first year of service will be 146,400 Mcf per day including compressor and dehydration fuel.

Ozark proposes to finance the construction of the pipeline system on a project basis with the partners contributing equity equal to 30 percent of the construction cost and with financial institutions providing debt financing for the remaining 70 percent. Construction of the proposed facilities is estimated to cost a total of approximately $118.8 million, and to last less than one year. OGPL, Gulf, Tennessee Ozark and ONDC will each contribute approximately $9 million as their respective equity investments for a total equity contribution by the partners of approximately $35.5 million, 30 percent of the estimated construction cost.

During the construction period, the balance of the costs over the equity investment will be funded through either short-term loans from the partners or permanent financing from financial institutions. If short-term funding is elected, Gulf and each of the partners will make short-term advances of approximately $21 million each to Ozark. Such advances will be made as necessary for construction. When the facilities are placed in service, such short-term advances will be repaid with the proceeds of a private placement of long-term debt securities by Ozark.

Gulf's proposed short-term loan of approximately $21 million to the partnership will be funded through open account advances from Columbia. The open account advances will initially bear interest at the rate in effect from time to time at the agent bank for Columbia's short-term loan line of credit. Interest charges to Gulf subsequently will be adjusted, after the short-term financing period, to the effective cost of money achieved on this short-term borrowing for this purpose.

With respect to the $9 million equity investment, Gulf proposes to finance this amount through the issuance and sale to Columbia of up to $4.5 million of its common stock, $25 par value, and through the issuance and sale to Columbia of up to $4.5 million of 20 year Installment Promissory Notes and/or 7 year Floating Rate Term Notes. The Installment Notes are to be unsecured and dated the date of their issue. The principal amounts will be due in twenty (20) equal annual installments on March 30 of each of the years 1983 to 2002 inclusive. Interest on the installment notes would accrue from the date of their issuance, and is to be paid semi-annually in accordance with the provisions of the notes. The interest rate would be the effective cost of money to Columbia at its latest sale of debentures prior to the issuance of the notes, decreased by the amount necessary for the interest rate to be a multiple of $\frac{1}{10}$ of 1 percent. Columbia sold $100,000,000 principal amount of debentures on August 13, 1980 (HCAR No. 21671), at an effective cost of money of 12.9 percent. Subject to market conditions, Columbia anticipates selling additional long-term securities during the project's construction period. Therefore, installment notes issued prior to such additional sale of debentures would bear an interest rate of 12.9 percent.

Should Columbia issue any notes under the Revolving Credit and Term Loan Agreement, dated as of April 1, 1980, among Columbia and certain banks named therein, floating rate notes due March 31, 1987 would be issued by Columbia Gulf in lieu of installment notes. Such floating rate notes would be dated the date of their issue, and would bear interest at Columbia's effective cost of money for any borrowings under the revolving credit agreement. Any such floating rate notes issued would be refinanced upon maturity.

The issuance of common stock, installment notes and floating rate term notes by Gulf to Columbia, and the open account advances to Gulf from Columbia are exempt pursuant to Section 6(b) from the requirements of Section 7. Such transactions are excepted from competitive bidding pursuant to Rule 50(a)(3).

It is stated that no state commission and no federal commission, other than this Commission, has jurisdiction over the proposed transactions. A statement of the fees and expenses incurred in connection with the proposed transactions will be provided by amendment.

Notice is further given that any interested person may, not later than February 20, 1981, request in writing that a hearing be held on such matter, stating the nature of his interest, the reasons for such request, and the issues of fact or law raised by said application-declaration, as amended, which he desires to controvert; or he may request that he be notified if the Commission should order a hearing thereon. Any such request should be addressed: Secretary, Securities and Exchange Commission, Washington, D.C. 20549. A copy of such request should be served personally or by mail upon the applicants-declarants at the above addresses, and proof of service (by affidavit or, in case of an attorney at law, by certificate) should be filed with the request. At any time after said date, the application-declaration, as amended, or as it may be further amended, may be granted and permitted to become effective as provided in Rule 23 of the General Rules and Regulations promulgated under the Act, or the Commission may grant exemption from such rules as provided in Rules 20(a) and 100 thereof or take such other action as it may deem appropriate. Persons who request a hearing or advice as to whether a hearing is ordered will receive any notices and orders issued in this matter, including the date of the hearing (if ordered) and any postponements thereof.

For the Commission, by the Division of Corporate Regulation, pursuant to delegated authority.

Filing of Proposed Amendment to the Plan for an Intermarket Trading System

January 26, 1981.

On September 18, 1980, the participants in the Intermarket Trading

System ("ITS") [1] filed with the Commission an amendment ("Amendment") to the "Plan for the Purpose of Creating and Operating an Intermarket Communications Linkage" ("ITS Plan").[2] The ITS is an experimental market linkage facility which links participating market centers and provides facilities and procedures for routing of commitments to trade and administrative messages between and among the participants.[3]

The Amendment would effect changes in Section 8(a) of the ITS Plan concerning the method of allocating "development costs" [4] among the participants in the ITS Plan. Under the Amendment, each existing participant's share of any development cost incurred on or after January 1, 1980 which benefits all participants would be equal to its share of the "volume base" [5] for the calendar quarter preceding the quarter in which the ITS participants agree to incur such cost.[6] Similarly, under the Amendment, each new participant's share of any development cost incurred on or after January 1, 1980 and prior to it becoming a participant shall be equal to its share of the development cost had it been an existing participant at the time the cost was incurred, provided that such development cost benefited such participant.[7] The share of previously incurred development costs paid by each new participant shall be retained by the NYSE, unless the NYSE was not charged a portion of any particular development cost incurred after June 30, 1978 because the particular development cost did not benefit the NYSE, in which case the new participant's payment with respect to that development cost shall be distributed to the participants that paid such development cost, *pro rata* in accordance with their payment thereof.[8]

Publication of the submission is expected to be made in the **Federal Register** during the week of February 2, 1981. In order to assist the Commission in determining whether to approve the Amendment, interested persons are invited to submit written data, views and arguments concerning the submission on or before March 2, 1981. Persons desiring to make written comments should file six copies thereof with the Secretary of the Commission, Securities and Exchange Commission, 500 North Capitol Street, Washington, D.C. 20549. Reference should be made to File No. 4–208.

Copies of the submission, including all amendments, all written statements with respect to the Amendment which are filed with the Commission, and of all written communications relating to the Amendment between the Commission and any person other than those which may be withheld from the public [9] will be available for inspection and copying at the Commission's Public Reference Room, 1100 L Street, N.W., Washington, D.C. 20549.

For the Commission, by the Division of Market Regulation, pursuant to delegated authority.[10]

Secretary.

[3] The ITS Plan was first approved on an interim basis in 1978. Securities Exchange Act Release No. 14661 (April 14, 1978), 43 FR 17419. Approval on a temporary basis has been extended through January 31, 1983. Securities Exchange Act Release No. 16214 (September 21, 1979), 44 FR 56069.

[4] The term "development costs" is defined in Section 8(a) of the ITS Plan.

[5] As defined in Section 8(a) of the ITS Plan, the "volume base" for any calendar quarter is computed by adding together (a) the total volume reported by the CTA Plan processor in Network A Eligible Securities during the calendar quarter for which the volume base is being computed and (b) the total volume reported by the Amex during such calendar quarter in those ten Network B Eligible Securities in which the greatest trading volume occurred on the Amex during such calendar quarter.

[6] Under the current formula, each existing participant's share of any development cost incurred after June 30, 1978 would be equal to its share of development costs incurred prior to July 1, 1978, as such costs had been allocated by agreement among the then ITS participants.

[7] Under the current formula, each new participant's share of development costs incurred prior to July 1, 1978 would be equal to its share of the "1977 volume base", as defined in Section 8(a) of the ITS Plan. The "1977 volume base" is computed by adding together (a) the total volume reported by the CTA Plan processor in Network A Eligible Securities during the first ten months of 1977 and (b) the total volume reported by the Amex during the same period in those ten Network B Eligible Securities in which the greatest trading volume occurred on the Amex during that period. The Amendment extends the use of the current formula to include development costs incurred prior to January 1, 1980.

[8] Under the current formula the NYSE retains the share of development costs incurred prior to July 1, 1978 paid by any new participant.

Edward D. Jones & Co. Tax-Free Trust; Filing of Application

January 26, 1981.

Notice is hereby given that Edward D. Jones & Co. Tax-Free Trust ("Applicant"), 421 Seventh Avenue, Pittsburgh, Pennsylvania 15219, registered under the Investment Company Act of 1940 ("Act") as an open-end, diversified, management investment company, filed an application on December 1, 1980, and an amendment thereto on January 2, 1981, requesting an order of the Securities and Exchange Commission ("Commission") pursuant to Section 6(c) of the Act, exempting Applicant from the provisions of Section 2(a)(41) of the Act and Rules 2a–4 and 22c–1 under the Act to the extent necessary to permit Applicant to value its portfolio assets pursuant to the amortized cost method of valuing portfolio securities. All interested persons are referred to the application on file with the Commission for a statement of the representations contained therein which are summarized below.

Applicant states that it is organized as a Massachusettes Business Trust. Applicant states that all representations and responsibilities imposed on "Management" in its application shall be deemed to apply to its board of trustees. Applicant's investment adviser is Daily Cash Research Corporation and its shares are sold without a sales charge. Applicant states that it is designed as an investment vehicle for investers with temporary cash reserves seeking federally tax-exempt dividend income. The Applicant's investment objective is to provide investors dividend income exempt from federal income taxes, while seeking relative stability of principal. Applicant states that it seeks to achieve its investment objective by investing in a diversified portfolio of short term, high quality municipal obligations issued by or on behalf of states, territories and possessions of the United States and the District of Columbia and their political subdivisions, agencies and instrumentalities, the interest from which is in the opinion of Bond Counsel for the issuers, exempt from federal income tax. The Trust will invest only in short-term Municipal Obligations, including Industrial Revenue Bonds, which were originally issued for a term of more than one year, if at the time of purchase there is one year or less remaining to maturity and (a) the securities are rated within the two highest ratings for municipal securities—Aaa or Aa—by Moody's Investors Services or —AAA or AA—by Standard & Poor's Corporation, Inc. or (b) which at the time of purchase carry an effective guarantee by the U.S. Government as to the payment or principal and interest or (c) which were originally issued for a term of one year or less and which at the time of purchase are rated within Moody's

short-term Municipal Obligations highest rating of MIG–1 or Standard and Poor's highest municipal commercial paper rating of A–1 or unrated, where the board of trustees determines that such short-term Municipal Obligations are "high quality".

Applicant states that all other assets held in its investment portfolio shall consist of temporary investments and cash. Applicant states that its temporary investments will consist of high quality short-term instruments issued by or on behalf of municipal or corporate issuers; U.S. Treasury Bills, all other marketable obligations issued or guaranteed by the U.S. Government, its agencies or instrumentalities, instruments of banks and saving and loan associations (such as certificates of deposit, demand deposits and time deposits, savings shares and bankers acceptances); repurchase agreements and prime commercial paper including variable amount demand master notes. The Applicant states that it will not invest in instruments issued by banks or saving and loan associations unless at the time of investment they have capital, surplus and undivided profits in excess of $100,000,000 as of the date of their most recently published financial statements. Applicant states that commercial paper investments will be limited to commercial paper rated A–1 by Standard & Poor's Corporation, Prime 1 by Moody's Investors Services, Inc. or F–1 by Fitch Investors Service.

The Order requested herein would exempt Applicant from the provisions of Section 2(a)(41) of the Act and Rules 2a–4 and 22c–1 thereunder. Section 2(a)(41) of the Act defines value to mean: (1) with respect to securities for which market quotations are readily available, the market value of such securities and, (2) with respect to other securities and assets, fair value as determined in good faith by the investment company's board of directors.

Rule 22c–1 provides, in part, that no registered investment company, or no principal underwriter or dealer therefor issuing any redeemable security shall sell, redeem or repurchase any such security except at a price based on the current net asset value of such security which is next computed after receipt of a tender of such security for redemption or of an order to purchase or sell such security.

Rule 2a–4 provides, as here relevant, that the current net asset value of a redeemable security issued by a registered investment company used in computing its price for the purposes of distribution, redemption, and repurchase shall be an amount which reflects calculations, whether or not recorded in the books of account, made substantially in accordance with the provisions of that rule, with estimates used where necessary or appropriate. Rule 2a–4 further states that portfolio securities with respect to which market quotations are readily available shall be valued at current market value, and other securities and assets shall be valued at fair value as determined in good faith by the board of directors of the registered investment company. Prior to the filing of this application, the Commission expressed its view that, *inter alia:* (1) Rule 2a–4 under the Act requires that portfolio instruments of "money market" funds be valued with reference to market factors, and (2) it would be inconsistent generally with the provisions of Rule 2a–4 for a "money market" fund to value its portfolio instruments on an amortized cost basis (Investment Company Act Release No. 9786, May 1, 1977).

Section 6(c) of the Act provides, in part, that upon application the Commission may conditionally or unconditionally exempt any person, security, or transaction, or any class or classes of persons, securities, or transactions, from any provision or provisions of the Act or any rule or regulation thereunder, if and to the extent that such exemption is necessary or appropriate in the public interest and consistent with the protection of investors and the purposes fairly intended by the policy and provisions of the Act.

In support of its request for exemptive relief Applicant states that investors are not concerned with the theoretical difference which might occur between yield achieved through pricing to some sort of "market" and yield computed by using the amortized cost valuation method. Applicant states that by valuing its portfolio of high quality instruments of short-term maturities at amortized cost, it would be able to achieve the two qualities which investors in a money market fund seek: (1) continuity of stability of principal and (2) steady flow of predictable and competitive investment income. Applicant states that by declaring income daily as earned and valuing its portfolio assets by the amortized cost method, investors would achieve a steady income flow and avoid the volatility which might result from valuing its assets based on market prices.

Applicant represents that it has found through experience that investment in a portfolio of high quality money market instruments of short-term maturities will enable it to provide the required stability to investors. Applicant states that maintaining an average portfolio maturity of 120 days accomplishes both aforementioned investor aims because such a portfolio obviates the possibility of significant volatility in the value of portfolio instruments as effectively as does an average matuirty of shorter duration, and such a portfolio provides a yield on portfolio instruments commensurate with yields available in the general money market which would not be otherwise available with a portfolio having an average maturity of shorter duration.

Applicant further states that its request for exemptions is based on its existing and proposed investment policies, which have been adopted by the board of trustees and authorized executive committees and are described in its application and prospectus. Applicant represents that its board of trustees has determined in good faith that use of the amortized cost valuation method to value Applicant's portfolio instruments is appropriate in the public interest, and consistent with the protection of investors and the purposes fairly intended by the policy and provisions of the Act.

Applicant has agreed that the following conditions may be imposed in any order of the commission granting the exemptive relief requested:

1. In supervising Applicant's operations and delegating special responsibilities involving portfolio management to Applicant's investment adviser, Applicant's board of trustees undertakes—as a particular responsibility within the overall duty of care owed to its shareholders—to establish procedures reasonably designed, taking into account current market conditions and Applicant's investment objectives, to stabilize Applicant's net asset value per share, as computed for the purpose of distribution, redemption and repurchase, at $1.00 per share.

2. Included within the procedures to be adopted by the board of trustees shall be the following duties and responsibilities:

(a) Review by the board of trustees, as it deems appropriate and at such intervals as are reasonable in light of current market conditions, to determine the extent of deviation, if any, of the net asset value per share as determined by using available market quotations from Applicant's $1.00 amortized cost price per share, and the maintenance of records of such review.[1]

[1] To fulfill this obligation, Applicant states that it intends to use actual quotations or estimates of market value reflecting current market conditions chosen by its board of trustees in the exercise of its

(b) In the event such deviation from Applicant's $1.00 amortized cost price per share exceed ½ of 1 percent, a requirement that the board of trustees will promptly consider what action, if any, should be initiated by it.

(c) Where the board of trustees believes that the extent of any deviation from Applicant's $1.00 amortized cost price per share may result in material dilution or other unfair results to investors or existing shareholders, it shall take such action as it deems appropriate to eliminate or to reduce to the extent reasonably practicable such dilution or unfair results, which may include: redeeming shares in kind; selling portfolio instruments prior to maturity to realize capital gains or losses, or to shorten Applicant's average portfolio maturity; withholding dividends; or utilizing a net asset value per share as determined by using available market quotations.

3. Applicant will maintain a dollar-weighted average portfolio maturity appropriate to its objective of maintaining a stable net asset value per share; provided, however, that Applicant will neither (a) purchase any instrument with a remaining maturity of greater than one year, nor (b) maintain a dollar-weighted average portfolio maturity which exceeds 120 days.[2]

4. Applicant will record, maintain, and preserve permanently in an easily accessible place a written copy of the procedures (and any modifications thereto) described in condition 1 above, and Applicant will record, maintain and preserve for a period of not less than six years (the first two years in an easily accessible place) a written record of the board of trustees considerations and actions taken in connection with the discharge of its responsibilities, as set forth above, to be included in the minutes of the board of trustees' meetings. The documents preserved pursuant to this condition shall be subject to inspection by the Commission in accordance with Section 31(b) of the Act, as if such documents were records required to be maintained pursuant to rules adopted under Section 31(a) of the Act.

5. Applicant will limit its portfolio investments, including repurchase agreements, to those United States dollar-denominated instruments which the board of trustees determines present minimal credit risks, and which are of high quality as determined by any major rating service or, in the case of any instrument that is not rated, of comparable quality as determined by the board of trustees.

6. Applicant will include in each of its quarterly reports, as an attachment to Form N-1Q, a statement as to whether any action pursuant to condition 2(c) above was taken during the preceding fiscal quarter and, if any such action was taken, will describe the nature and circumstances of such action.

Notice is further given that any interested person may, not later than February 19, 1981, at 5:30 p.m., submit to the Commission in writing a request for a hearing on the application accompanied by a statement as to the nature of his interest, the reasons for such request, and the issues, if any, of fact or law proposed to be controverted, or he may request that he be notified if the Commission shall order a hearing thereon. Any such communication should be addressed: Secretary, Securities and Exchange Commission, Washington, D.C. 20549. A copy of such request shall be served personally or by mail upon Applicant at the address stated above. Proof of such service (by affidavit or, in the case of an attorney-at-law, by certificate) shall be filed contemporaneously with the request. As provided by Rule 0-5 of the Rules and Regulations promulgated under the Act, an order disposing of the application herein will be issued as of course following said date unless the Commission thereafter orders a hearing upon request or upon the Commission's own motion. Persons who request a hearing, or advice as to whether a hearing is ordered, will receive any notices and orders issued in this matter, including the date of the hearing (if ordered) and any postponements thereof.

For the Commission, by the Division of Investment Management, pursuant to delegated authority.

Secretary.

discretion to be appropriate indicators of value, which may include among others, (i) quotations or estimates of market value for individual portfolio instruments, or (ii) values obtained from yield data relating to classes of money market instruments published by reputable sources.

[2] In fulfilling this condition, if the disposition of a portfolio security results in a dollar-weighted average portfolio maturity in excess of 120 days, Applicant will invest its available cash in such a manner as to reduce the dollar-weighted average portfolio maturity to 120 days or less as soon as reasonably practicable.

Nacional Financiera, S.A., c/o Peter Darrow, Esq., Cleary, Gottlieb, Steen & Hamilton; Filing of Application

January 26, 1981.

Notice is hereby given that Nacional Financiera, S.A. ("Applicant"), One State Street Plaza, New York, New York 10004, filed an application on December 22, 1980 and amendments thereto on January 9, 1981, and January 26, 1981, for an order of the Commission, pursuant to Section 6(c) of the Investment Company Act of 1940 ("Act"), exempting Applicant from all provisions of the Act. All interested persons are referred to the application on file with the Commission for a statement of the representations contained therein, which are summarized below.

Applicant states that it is the principal agency of the Federal Government ("Government") of the United Mexican States ("Mexico") for financing the economic development of Mexico. Applicant further states that it was organized in 1934 as a statutory corporation pursuant to its Ley Organica ("Organic Act"), which was revised and reenacted in 1975 and that, subject to considerations of national policy, it operates as a profitmaking commercial enterprise. Applicant's principal office is at Isabel la Catolica 51, Mexico 1, D.F. As of the end of June, 1980, Applicant operated 25 branches in Mexico and its commercial banking affiliate, Banco Internacional, S.A., had 272 branches in Mexico. In addition, Applicant maintains representative offices in Washington, D.C., New York, London and Tokyo.

The Organic Act of Applicant provides that its capital stock will consist of Series A shares, which may be owned solely by the Government of Mexico and which constitute 51% of Applicant's capital stock, and Series B preferred shares. As of June 30, 1980, Applicant had outstanding 13,270,000 Series B preferred shares of which 46.4% was owned by the Government of Mexico and 53.6% was owned by institutions and individuals. Applicant states that its Series B preferred shares are traded publicly on the Mexico City stock exchange.

Applicant represents that its principal areas of activity include the borrowing of funds and the extension of loans and loan guarantees and that on June 30, 1980, Applicant had outstanding loans of approximately $8,027 million and loan guarantees of approximately $2,971 million. As of June 30, 1980, Applicant's fixed-rate term deposits and international borrowings in an amount

of $10,010 million accounted for approximately 96.2% of its outstanding liabilities (including stockholders' equity). Applicant further states that it makes equity investments in public and private Mexican enterprises, engages in stock market transactions, administers 123 governmental trusts designed to promote development in certain sectors of the Mexican economy, and acts as the financial agent of the Government of Mexico as part of its role as the principal financing vehicle for the economic development of Mexico.

Applicant represents that it is subject to a variety of regulatory measures in Mexico principally administered by the Mexican Secretariat of Finance and Public Credit (the "Secretariat"), the Bank of Mexico and the National Banking and Insurance Commission. The Secretariat is the principal instrument of the Government of Mexico for the control of the borrowing activities of Mexico's public sector. Accordingly, Applicant is required to obtain advance authorization from the Secretariat for the negotiation and contracting of external borrowings since such borrowings are deemed part of the total debt of Mexico's public sector for purposes of the annual debt limit established by the Secretariat. In addition, Applicant must submit to the Secretariat annual funding estimates and disbursement plans, and is required to report periodically on its lending and guarantee activities. The Secretariat also requires that Applicant file its annual audited financial statements with it prior to making such financial statements public. Mexican law also requires that all credit institutions maintain a ratio of liabilities and guarantees, (excluding loans or other liabilities guaranteed by the Government to capital and capital reserves of no greater than twenty to one. According to the Applicant, Mexican General Corporation Law requires that Applicant's financial statements be reviewed annually by independent auditors. Applicant further states that its Organic Act provides for the election of two examiners who may not be employees of Applicant or relatives of members of Applicant's management and whose function is to oversee the conduct of Applicant's business and report to the shareholders of Applicant. In addition, the application states that Applicant is required to file monthly reports containing detailed financial statements with the National Banking and Insurance Commission. Finally, Applicant states that the President of Mexico may veto any resolution adopted by its Board of Directors if it appears that the resolution jeopardizes the financial stability or prestige of Applicant or is contrary to the monetary or credit policy of the Government of Mexico.

Applicant proposes to issue and sell short-term negotiable promissory notes of the type generally referred to as commercial paper ("Notes"). The Notes will be in bearer form, denominated in United States dollars and issued in minimum denominations of $100,000. They will rank *pari passu* among themselves and equally with all other unsecured indebtedness of Applicant, including deposits, and superior to the rights of shareholders of Applicant. Applicant states that its General Counsel is of the opinion that the Notes constitute transactions for which the Mexican nation will be responsible under Article 15 of Applicant's Organic Law. Accordingly, in case of the failure of Applicant to duly and punctually make any payment in respect of the Notes, the Government of Mexico acting on behalf of the Mexican nation will be directly and unconditionally obligated to make such payment when it becomes due and payable according to the terms of the Notes, regardless of whether or not any holder of any Note has instituted any suit, action or proceeding or exhausted the holder's remedies or taken any steps to enforce any rights against Applicant or any other person to compel such payment or collect all or part of such sums, regardless of any condition or contingency, and without diligence, presentment, protest or any other notice to Applicant. Applicant states that while it cannot predict with certainty the aggregate amount of Notes which will be outstanding, it currently believes that during the first year of sale the aggregate amount of Notes outstanding will average between $100 million and $200 million.

Applicant states that the characteristics of the Notes, the manner of offering, and the use of the proceeds of the Notes to finance current transactions will qualify the Notes for the exemption from registration under the Securities Act of 1933 ("1933 Act") provided by Section 3(a)(3) of the 1933 Act. Applicant will not issue and sell the Notes until it has received an opinion of its legal counsel in the United States to the effect that the proposed offering is entitled to the exemption provided by Section 3(a)(3) of the 1933 Act. Applicant does not request review or approval of such opinion letter and the Commission expresses no opinion as to the availability of any such exemption. Applicant further represents that the presently proposed issue of Notes, and any future issue of securities in the United States will have received, prior to issuance,one of the three highest investment grades from at least one nationally recognized statistical rating organization and that its United States counsel will have certified that such rating has been received.

Applicant undertakes to ensure that the Notes will be sold through one or more commercial paper dealers to traditional types of commercial paper purchasers, and will not be advertised or otherwise offered to the general public. Applicant also undertakes to ensure that each dealer in the Notes will provide each offeree of the Notes, prior to any sale of Notes to such offeree, with a memorandum that describes the business of Applicant and that contains the most recent publicly available fiscal year-end balance sheet and income statement of Applicant, which have been audited in such manner as is customarily done for Applicant by its auditors. Such memorandum will be updated periodically to reflect material changes in Applicant's business and financial condition. The memorandum will be at least as comprehensive as those customarily used in offering commercial paper in the United States. Such memorandum will describe the material differences between the accounting principles applied by Applicant in the preparation of the financial statements and generally accepted accounting principles applicable to similar financial institutions in the United States. Applicant consents to any order granting the relief requested pursuant to Section 6(c) of the Act being expressly conditioned upon Applicant's compliance with all undertakings regarding disclosure documents.

The application states that Applicant will appoint a bank or trust company in the City of New York as its authorized agent to issue the Notes from time to time. In addition, Applicant states that it will appoint its representative office in the City of New York, the Commission or a corporate entity which normally acts in such capacity to accept any service of process in any action based on the Notes and instituted in any state or federal court by the holder of any Note. Applicant consents to the jurisdiction of any State or federal court in the City and State of New York in respect of any such action. Such appointment of an authorized agent to accept service of process and consent to jurisdiction will be irrevocable until all amounts due and to become due with respect to the Notes have been paid by Applicant. Applicant will also be

subject to suit in any other court in the United States which would have jurisdiction because of the manner of the offering of the Notes or otherwise. Applicant states that the authorized agent will not be a trustee for the holders of the Notes or otherwise obliged to act for them. Applicant similarly represents that it will consent to jurisdiction and will appoint an agent for service of process in suits arising from any future offer of debt securities that it may make in the United States.

Applicant states that in the future it might offer other debt securities, but not equity securities, for sale in the United States. In connection with any such offering, applicant undertakes to insure that any offeree will be provided, prior to any sale, with disclosure documents at least as comprehensive in their description of Applicant and its business and financial condition as the dealer's memorandum referred to above. In no event will such disclosure be less comprehensive than is customary for United States offerings of similar debt securities. In addition, Applicant states that any future offering of debt securities of Applicant which is subject to the registration requirements of the 1933 Act will be made pursuant to offering documents which comply with the requirements of the 1933 Act. Applicant consents to having any order granting the relief requested under Section 6(c) of the Act expressly conditioned upon its compliance with its undertakings regarding disclosure documents. Applicant further states than any such future offering will be made with due regard to the provisions of Rule 146 and the doctrine of "integration" referred to in Securities Act Release Nos. 4434, 4552 and 4708 and various "no action" letters made public by the Commission.

Section 3(a)(3) of the Act defines investment company to mean "any issuer which is engaged or proposes to engage in the business of investing, reinvesting, owning, holding, or trading in securities, and owns or proposes to acquire investment securities having a value exceeding 40 per centum of the value of such issuer's total assets (exclusive of Government securities and cash items) on an unconsolidated basis."

Section 6(c) of the Act provides, in part, that the Commission, by order upon application, may conditionally or unconditionally exempt any person, security or transaction, or any class or classes of persons, securities or transactions, from any provision of the Act, or any rule or regulation under the Act, if and to the extent that such exemption is necessary or appropriate in the public interest and consistent with the protection of investors and the purposes fairly intended by the policy and provisions of the Act. Applicant states it is applying to the Commission because of uncertainty whether or not it would be defined as an "investment company" under the Act.

Applicant contends that approval of its application is both necessary and appropriate in the public interest. According to Applicant, if it were deemed an "investment company" and its application denied, it would be precluded from publicly offering securities in the United States and, thus, denied access to a major financing source. Applicant asserts that the public interest would be served by permitting institutional and other sophisticated investors the opportunity to acquire commercial paper issued by it.

Applicant further asserts that the requested exemption would be consistent with the protection of investors. Applicant states that the extensive regulation by the Government of Mexico affords substantial protection to investors. Applicant further states that investors will be afforded added protection because payment of the Notes will be unconditionally guaranteed by Mexico under the terms of Applicant's Organic Act. In addition, Applicant states that certain anti-fraud provisions of the federal securities laws will apply to the offering of any debt security by it.

Notice is further given that any interested person may, not later than February 20, 1981, at 5:30 p.m., submit to the Commission in writing a request for a hearing on the application accompanied by a statement as to the nature of his interest, the reason for such request, and the issues, if any, of fact or law proposed to be contoverted, or he may request that he be notified if the Commission shall order a hearing thereon. Any such communication should be addressed: Secretary, Securities and Exchange Commission, Washington, D.C. 20549. A copy of such request shall be served personally or by mail upon Applicant at the address stated above. Proof of such service (by affidavit or, in the case of an attorney-at-law, by certificate) shall be filed contemporaneously with the request. As provided by Rule 0–5 of the Rules and Regulations promulgated under the Act, an order disposing of the application will be issued as of course following said date unless the Commission thereafter orders a hearing upon request or upon the Commission's own motion. Persons who request a hearing, or advice as to whether a hearing is ordered, will receive any notices and orders issued in this matter, including the date of the hearing (if ordered) and any postponements thereof.

For the Commission, by the Division of Investment Management, pursuant to delegated authority.

POSTAL SERVICE.

(Board of Governors)

The Board of Governors of the United States Postal Service has voted (by mail ballot) to close to public observation a portion of its meeting scheduled for February 4, 1981. Each of the members

of the Board voted in favor of closing this portion of the meeting (except that the vote of one member had not been received at the time of this Notice). The portion is expected to be attended by the following persons: Governors Hardesty, Ching, Babcock, Camp, Hughes, Hyde, Jenkins, and Sullivan; Postmaster General Bolger; Deputy Postmaster General Benson, Secretary of the Board Cox; Counsel to the Governors Califano; and Senior Assistant Postmaster General Finch.

The portion of the meeting to be closed is to involve a discussion of developments in the general rate case currently pending before the Postal Rate Commission (Commission Docket No. R80–1).

The Governors are of the opinion that public access to the discussion would be likely to disclose matters whose disclosure would be inconsistent with the public interest in having the Governors discuss the matter without concern for unreasonably influencing particular litigation, the rate case being currently the subject of administrative litigation and it being highly likely that it would become the subject of judicial review.

Accordingly the Governors have determined that, pursuant to section 552b(c)(10) of title 5, United States Code, and section 7.3(j) of title 39, Code of Federal Regulations, the portion of the meeting to be closed is exempt from the open meeting requirement of the Government in the Sunshine Act in that it is likely to specifically concern the participation of the Postal Service in a civil action or proceeding, and that the public interest does not require the discussion of this matter to be open to the public. In accordance with section 552b(f)(1) of title 5, United States Code, and section 7.6(a) of title 39, Code of Federal Regulations, the General Counsel of the United States Postal Service has certified that in his opinion the portion of the meeting to be closed might properly be closed to public observation pursuant to 552b(c)(10) of title 5, United States Code, and section 7.3(j) of title 39, Code of Federal Regulations.

Louis A. Cox,

Secretary.

Department of Agriculture

Federal Grain Inspection Service

Replacement of the Milled Rice Interpretive Line Samples for the Degree of Milling

DEPARTMENT OF AGRICULTURE

Federal Grain Inspection Service, USDA.

Replacement of the Milled Rice Interpretive Line Samples for the Degree of Milling

AGENCY: Federal Grain Inspection Service

ACTION: Notice of Intention to Replace the Interpretive Line Samples for the Degree of Milling of Milled Rice.

SUMMARY: The Federal Grain Inspection Service (FGIS) hereby notifies interested parties in the rice industry that the interpretive line samples for the degree of milling in milled rice are scheduled for replacement in 1981.

FOR FURTHER INFORMATION CONTACT: James L. Driscoll, Director, Standardization Division, FGIS, USDA, Richards-Gebaur AFB, Building #221, Grandview, Missouri 64030, telephone (816) 348–2861.

SUPPLEMENTARY INFORMATION: The Agricultural Marketing Act of 1946, as amended (7 U.S.C. 1621–1627) provides for the issuance by the Secretary of Agriculture of standards with respect to the quality, condition, quantity, grade, and packaging of agricultural commodities. Under the U.S. Standards for Milled Rice (7 CFR 68.301–68.316), one of the quality factors determined in inspection is the degree of milling. The degree of milling is a determination of the amount of bran removed in the processing of milled rice. The grades, U.S. No. 1 and 2 are required to be at least "well milled", U.S. No. 3 and 4 grades are required to be at least "reasonably well milled", and the grades, U.S. No. 5 and 6 are required to be at least "lightly milled".

The determination of the degree of milling is made subjectively with the aid of interpretive line samples which are prepared to represent the least acceptable amount of bran removal for each of the three milling degree levels. Due to the natural deterioration of these interpretive line samples, it is FGIS policy that the samples be replaced with freshly milled rice every two years. It is the intention of FGIS to duplicate the present interpretive line samples as closely as possible in this replacement process. Rice inspectors, rice millers and other interested parties will be afforded the opportunity to participate in the preparation and review of the replacement samples to insure that the interpretive lines are properly maintained.

(Secs. 203, 205, Pub. L. 79–733 (1946), 60 Stat. 1087 and 1090).

Done in Washington, D.C., on January 28, 1981.

Acting Administrator.

(Notice No. 81-1)

STATE FIREARMS CONTROL ASSISTANCE

Published Firearms Laws of Political Subdivisions and States

Pursuant to the provisions of Section 921 (a) (19), Title 18, United States Code (U.S.C.), and Section 178.24, Title 27, Code of Federal Regulations (27 CFR, Part 178), the following is the annual revised compiled list of published ordinances of political subdivisions within the United States that are relevant to the enforcement of 18 U.S.C., Chapter 44, relating to firearms. State firearms laws are also included.

The list was developed from (a) copies of firearms ordinances published by political subdivisions obtained through a national mail survey, and (b) State firearms laws.

The Bureau applied the following criteria in deciding which firearms ordinances published by political subdivisions were relevant or nonrelevant to the enforcement of 18 U.S.C., Chapter 44.

RELEVANT

Firearms ordinances published by political subdivisions, considered relevant to the enforcement of 18 U.S.C., Chapter 44, and therefore included in the accompanying list, are those which:

1. Prohibit the sale, possession, or receipt of any type of firearm or ammunition, or allow any exemption to such prohibitions;
2. Prohibit the sale, possession, or receipt of any type of firearm or ammunition to or by a particular class of persons; e.g., aliens, felons, drug addicts, or mental incompetents;
3. Restrict the sale, possession, or receipt of firearms, such as fully automatic firearms, short-barreled shotguns and rifles, and destructive devices; i.e. bombs, grenades, molotov cocktails, etc.
4. Require waiting periods or notification to law enforcement officials before a weapon may be delivered to a purchaser;
5. Require a permit, license, or I.D. card before a weapon may be sold and/or delivered to a purchaser; and
6. Restrict the age at which a person may purchase a firearm or ammunition.

NOT RELEVANT

Firearms ordinances published by political subdivisions, considered not relevant to 18 U.S.C., Chapter 44, and therefore not included in the accompanying list, are those which:

1. Prohibit the carrying of weapons such as legal handguns, long-barreled rifles or shotguns, slingshots, dirks, daggers, etc. on persons or in vehicles;
2. Prohibit the discharge of weapons within city limits or on private property;
3. Require recordkeeping after sale of the firearms;
4. Require notification to local police departments of sale of firearms after the sale has been made; and
5. Require licenses for selling BB guns, slingshots, dirks, daggers, and other dangerous weapons.

This list comprises the 1980 list of published laws and implements Title 1 of the Gun Control Act of 1968 (82 Stat. 1213; 18 U.S.C., Chapter 44) and supersedes that list published on June 19, 1979 (44 FR 35603).

COMMENTATOR'S NOTE

It is the opinion of the Arkansas Attorney General that convicted felons who receive a full gubernatorial pardon before July 8, 1977, are no longer subject to a State ban on the possession of firearms. (b) the defendant used, possessed, made, repaired, sold, or otherwise dealt in any of the above enumerated articles under circumstances negating any likelihood that the weapon could be used unlawfully.

(3) Criminal use of prohibited weapons is a class B felony if the weapon is a bomb, machine gun, or firearm specially made or specially adapted for silent discharge. Otherwise, it is a class D felony.

41-3105. Legitimate manufacture, repair, and transportation of prohibited weapons. Section 3104 [§41-3104] shall not be construed to prohibit the manufacture, repair, transportation, or sale of the weapons enumerated therein to or for authorized representatives of the armed forces or to or for the authorized representatives of any law enforcement agency.

This register shall show the model and serial number, date of manufacture, sale, loan, gift, delivery or receipt, of every machine gun, the name, address, and occupation of the person to whom the machine gun was sold, loaned, given, or delivered, or from whom it was received; and the purpose for which it was acquired by the person to whom the machine gun was sold, loaned, given or delivered, or from whom received. Compiler's Note

In the opinion of the California Attorney General: "California is not constitutionally required to recognize outer state gubernatorial or presidential pardons for purposes of section 12021. Nor is California compelled to recognize relief granted by federal authorities pursuant to 18 U.S.C. 925(c). However, under 18 U.S.C.A. 5024, states are required to recognize the expungement of a youth offender's conviction pursuant to 18 U.S.C.A. 5021. California would recognize such an expungement for purposes of section 12021."

(a) Except as otherwise provided in this section, this section does not apply to sales at wholesale. No transferor shall deliver a handgun to a transferee until at least seven [7] calendar days shall have elapsed from the time of the application for the transfer and, when delivered, the handgun shall be securely wrapped and unloaded.

(1) The seven [7] day waiting period shall not apply to * * * law enforcement officers. * * *

(2) The seven [7] day waiting period shall also be waived for any person to whom a qualified or unlimited handgun-carrying license has been issued, upon exhibition of the license to the transferor. The transferor shall note on the application-to-purchase form the serial number of the license, the expiration date, the issuing authority, and the notation "waiting period waived," together with the date on which the handgun or handguns are released to the applicant. 1751. Definitions. For purposes of this Part, "machine gun" includes all firearms of any calibre, commonly known as machine rifles, machine guns, and sub-machine guns, capable of automatically discharging more than eight cartridges successively without reloading, in which the ammunition is fed to the gun from or by means of clips, disks, belts, or some other separable mechanical device. The members of such Corps, National Guard, and organizations may possess, carry, and transport machine guns while on duty.

(3) Persons possessing war relics may purchase and possess machine guns which are relics of any war in which the United States was involved, may exhibit and carry the machine guns in the parades of any military organization, and may sell, offer to sell, loan, or give the machine guns to other persons possessing war relics.

(1) "Dealer" means any person not a manufacturer or importer engaged in this state in the business of selling any firearm. The term includes wholesalers, pawnbrokers, and other persons dealing in used firearms.

(2) "Department" means the Department of Public Safety.

(3) "Firearm" means a shotgun having a barrel of less than eighteen inches in length; a rifle having a barrel of less than sixteen inches in length; any weapon made from either a rifle or a shotgun if said weapon has been modified to have an overall length of less than twenty-six inches; any other firearm, pistol, revolver or shotgun from which the serial number or mark of identification has been obliterated, from which a shot is discharged by an explosive, if that weapon is capable of being concealed on the person; or a machine gun or gas grenade; and includes a muffler or silencer for any firearm, whether or not the firearm is included within this definition. Pistols and revolvers and those rifles and shotguns which have not previously been defined in this Paragraph as firearms from which serial numbers or marks of identification have not been obliterated are specifically exempt from this definition.

(4) "Importer" means any person who imports or brings into the state any firearm.

(5) "Machine gun" means any weapon, including a submachine gun, which shoots or is designed to shoot automatically more than one shot without manual reloading, by a single function of the trigger.

(7) "Muffler" or "silencer" includes any device for silencing or diminishing the report of any portable weapon such as a rifle, carbine, pistol, revolver, machine gun, submachine gun, shotgun, fowling piece, or other device from which a shot, bullet, or projectile may be discharged by an explosive and is not limited to mufflers and silencers for firearms as defined in this Section.

(8) "Transfer" includes the sale, assignment, pledge, lease, loan, gift, or other disposition of any firearm.

1782. Exemptions from Part. This Part does not apply to the following persons and things:

(1) Sheriffs or equivalent municipal officers in municipalities of over ten thousand, when they are acting in their official capacity.

(2) The arms, accoutrements, and equipment of the military and naval forces of the United States or of other officers of the United States authorized by law to possess weapons of any kind.

(3) The arms, accoutrements, and equipment of the militia.

1783. Registration with department of public safety. Every person possessing any firearm shall register with the department the number or other mark identifying the firearm, together with his name, address, and place of business or employment, the place where the firearm is usually kept, and, if the person is other than a natural person, the name and home address of the executive officer thereof having control of the firearm and the name and home address of the person having actual possession thereof.

1784. Application to possess or transfer. No person shall continue to possess or shall transfer any firearm without the prior approval of the department. Interested persons shall file written

B. No one shall obliterate, remove, change, or alter this number or mark. Whenever, in a trial for a violation of this Sub-section, the defendant is shown to have or to have had possession of any firearm upon which the number or mark was obliterated, removed, changed, or altered, that possession is sufficient evidence to authorize conviction unless the defendant explains it to the satisfaction of the court.

1789. Records of importers, manufacturers, or dealers. Importers, manufacturers, and dealers shall keep such books and records and render such returns in relation to the transactions in firearms specified in this Part as the department requires.

1790. Rules and regulations; importation of firearms. The department may prescribe such rules and regulations as are necessary for carrying out the provisions of this Part.

Editor's Note

A number of Ohio municipalities have incorporated portions of Ohio State law into their ordinances. In these instances, the ordinance language is identical to the corresponding portion of the State law. Further numerous municipalities have ordinances with identical section numbering.

To avoid repetition of State law language and cross references between municipal and State codifications, we have first set out the cross references, followed by a listing of the municipalities having ordinances which contain identical sections. The reader can then refer to the appropriate portion of State law.

As an example, Section 549.01 of Amelia's municipal ordinance contains the same language as Section 2923.11 of Ohio State law. Section 549.01 of each municipality's ordinance following Amelia also contains language identical to Section 2923.11.

EDITOR'S NOTE:

A number of the Washington municipalities included herein have incorporated portions of the Washington State law into their municipal ordinances. In these instances, the ordinance language is identical to the corresponding portion of the State law.

To avoid undue repetition of State law language, listings for municipalities falling within this category contain only municipal codification reference, followed by the words "adopts", "same as" or "extracted from" and the corresponding State law citations. Unless otherwise indicated, the right-hand citation refers to the Washington State law, which is printed immediately before the State's municipal ordinance listing.

In those instances in which one municipal ordinance is cross referenced to the text of an identical municipal ordinance provision appearing in the book, the right-hand reference includes the name of the municipality cited.

Federal Motor Vehicle Safety Standards; Grant of Petition for Rulemaking

AGENCY: National Highway Traffic Safety Administration (DOT).

ACTION: Grant of petition for rulemaking.

SUMMARY: The purpose of this notice is to grant a petition for rulemaking submitted by Mr. Ralph Nader. Mr. Nader petitioned for an amendment of Safety Standard No. 208, *Occupant Crash Protection*, to increase the barrier crash test speed of that standard to 40 mph beginning September 1, 1984, and to 50 mph by September 1, 1986. Currently, the standard specifies a test speed of 30 mph. In its "Five Year Plan for Motor Vehicle Safety and Fuel Economy Rulemaking", first issued March 16, 1978, the agency outlined a new research and development program aimed at consolidating and upgrading all occupant protection rules to develop a new series of standards in which each standard would comprehensively cover frontal, side, rear or rollover crash protection. That program encompasses a consideration of the changes requested by the petitioner.

FOR FURTHER INFORMATION CONTACT: Mr. Robert Nelson, Office of Vehicle Safety Standards, National Highway Traffic Safety Administration, Washington, D.C. 20590 (202–426–2264).

SUPPLEMENTARY INFORMATION: Safety Standard No. 208, *Occupant Crash Protection* (49 CFR 571.208), specifies a dynamic barrier crash test for vehicles equipped with automatic restraints under which instrumented test dummies placed in the vehicle must meet specified injury criteria. The standard specifies a 30-mph vehicle speed for this crash test. Mr. Ralph Nader has petitioned the agency to increase this vehicle speed to 40 mph beginning September 1, 1984, and to 50 mph beginning September 1, 1986.

The petitioner stated that the current 30-mph crash speed of Standard No. 208 will be inadequate to prevent the increase in fatalities that can be expected over the next twenty years. The petitioner argued that this is true because of the dramatic shift to smaller cars that is currently occurring and because of the changes this will create in the vehicle fleet mix. To support his contention that 50-mph crash protection is technologically feasible, the petitioner stated:

Work performed by Minicars and Calspan under NHTSA contracts has shown that air bags can be constructed from currently available hardware that will meet or better the injury criteria levels of FMVSS 208 in 50 mph barrier impacts.

The petitioner stated that automatic crash protection at 50 mph would result in the savings of more than 75 percent of all fatalities and 60 percent of all injuries now occurring in frontal passenger car collisions below 50 mph.

The agency agrees with the petitioner that increasing occupant crash protection is a worthwhile goal. The agency currently has a comprehensive program aimed at achieving that goal. On March 16, 1978, the NHTSA issued its "Five Year Plan for Motor Vehicle Safety and Fuel Economy Rulemaking" (43 FR 11100). That Plan described a new program that the agency was beginning to consolidate and upgrade all occupant crash protection rules. Under this program, NHTSA expects to develop a new series of occupant protection standards in which each standard would comprehensively cover frontal, side, rear or rollover crash protection. The agency is currently conducting research and development work to produce an advanced set of test dummies and to upgrade and consolidate the existing occupant crash protection standards.

As a part of this program, the agency will consider how the frontal crash protection criteria of Safety Standard No. 208 can be improved. This evaluation will include an analysis of the appropriate crash test speeds to be specified in an upgraded standard. The agency is currently analyzing accident data files, particularly the National Crash Severity Study, to evaluate injury modes and injury distributions as a function of crash mode and crash speed. Assessments are being made as to the number of injuries and fatalities that would occur with restrained occupants at various crash speeds above 30 mph.

The granting of this petition for rulemaking does not mean that a final rule implementing the requested changes will necessarily be issued. That determination is made during the course of the rulemaking proceeding, in accordance with statutory criteria.

[Docket No. 25; Notice 43]

Consumer Information Regulations, Uniform Tire Quality Grading

AGENCY: National Highway Traffic Safety Administration, DOT.

ACTION: Notice of proposed rulemaking.

SUMMARY: This notice proposes amendment of the Uniform Tire Quality Grading Standards to prescribe a standardized process for translating treadwear and traction test results into tire grades. The notice also proposes expanding the numerical increments used to denote treadwear grades. The notice seeks to improve the uniformity of the grading system by eliminating the differences which now exist in the methods by which manufacturers assign tire grades.

DATES: Comments must be received on or before April 3, 1981. Proposed effective date: January 1, 1982.

ADDRESSES: Comments should refer to the docket number and be submitted to Room 5108, Nassif Building, 400 Seventh Street, SW., Washington, D.C. 20590.

FOR FURTHER INFORMATION CONTACT: Dr. F. Cecil Brenner, Office of Automotive Ratings, National Highway Traffic Safety Administration, 400 Seventh Street, SW., Washington, D.C. 20590, 202–426–1740.

SUPPLEMENTARY INFORMATION: The Uniform Tire Quality Grading (UTQG) Standards specify procedures for evaluating treadwear, traction and temperature resistance performance of tires. In the treadwear grading category, the regulation prescribes a formula by which tread depth measurements obtained on a test course are translated into a projected mileage figure for the individual tire tested. This figure can then be converted to a percentage of the nominal 30,000 mile treadwear value for the test course to provide a UTQG grade for the tested tire (49 CFR 575.104(e)(2)).

Traction grades are based on a series of traction coefficient measurements obtained by repeatedly running a tire over wet asphalt and concrete surfaces. Formulas are used to translate the measurements into adjusted traction coefficients for the tire on both concrete and asphalt (49 CFR 575.104(f)(2)). These adjusted traction coefficients are then compared to stated criteria to determine the grade level for which the tire qualifies (49 CFR 575.104(d)(2)(ii)).

Temperature resistance grades are determined by running a tire on a laboratory test wheel at successively higher 25 rpm speed increments until failure (49 CFR 575.104(g)). Grade assignments are based on a comparison of the highest speed successfully completed and specified criteria for the grade levels (49 CFR 575.104(d)(2)(iii)).

The Need for a Statistical Procedure for Grading

While the UTQG standards provide specific procedures regarding computation of grades for individual tires, manufacturers and brand name owners exercise considerable discretion in assigning grades to their tire lines. Product variability among tires of the same design has necessitated judgments regarding the number of tires of a given line or size to be tested and the best method of interpreting these test results and assigning an appropriate grade for a group of tires.

Following implementation of the regulation, the National Highway Traffic Safety Administration (NHTSA) sent special orders to several major tire manufacturers requesting UTQG test data for bias and bias-belted tires, and information on the method by which this data was translated into tire grades. Response to these special orders indicated wide variation within the industry regarding procedures for grade assignment. Some manufacturers evaluated data by applying statistical procedures to estimate the percentage of their production which would perform in accordance with particular grade levels. Manufacturers differed in their judgments of what represented an acceptable level of compliance with the regulation. Other manufacturers did not use a statistical procedure, relying instead on business and engineering judgment in the assignment of grades. These differing approaches and judgments give rise to a very real prospect of different manufacturers, faced with similar test results, assigning different grades to their tires. Clearly, such a result would reduce the value of the UTQG information to consumers.

Proposed Statistical Procedure

In order to improve the uniformity of the grading system and the usefulness of UTQG information to consumers, and to reduce uncertainty for industry, NHTSA now proposes incorporation into the UTQG Standards of a standardized statistical procedure for grade assignment. Under the proposal, a statistical procedure of variables sampling for percent defective or noncompliant, equivalent to that used in Military Standard 414, would be used in the determination of treadwear and traction grades. Since sampling plans of the type proposed can only be used where the property measured is a continuous variable (e.g., projected mileage, adjusted traction coefficient) use of the procedure is not proposed in the case of temperature resistance performance, which is measured in 25 rpm increments.

In establishing and enforcing Federal motor vehicle safety standards, NHTSA has traditionally required that each vehicle or piece of equipment be capable of performing at or above the specified minimum performance level. However, in the case of UTQG, where the agency is seeking to provide consumers with information on a continuum of values representative of actual performance, the conservatism in grading necessary to assure 100% compliance could seriously impair the usefulness of the grading information to consumers. NHTSA recognizes the inherent variations in performance among tires of the same design and the need to assure that tire grades are truly representative of the overall performance of a particular tire line or size. Thus, under the proposed procedure, manufacturers and brand name owners would assign grades based on a goal of 95% of their tires conforming to the grade assigned.

The proposed statistical procedure would permit the tire producer to determine whether, for the number of tires tested, a particular grade assignment is consistent with this goal. The producer would be required to assign the highest UTQG grade consistent with the goal. NHTSA would employ a similar statistical procedure to evaluate compliance with the standard. While producers would retain control of the number of tires they chose to test, testing of a larger sample would provide greater certainty that the grade arrived at is accurate.

Statistical Methodology

In the case of treadwear testing under the proposal, a tire producer would select the number of tires it wishes to test and determine the grade for each tire in the manner prescribed in 49 CFR 575.104(e), except the projected mileage percentage would not be rounded to the nearest lower ten unit increment. The producer would find the mean of the projected mileage percentage for all tires tested ($\bar{x}$) and subtract from this the nearest lower incremental UTQG grade (L). This figure would be divided by the standard deviation of the sample of tested tires (s) to yield a value Q_L where

$$Q_L = \frac{\bar{x} - L}{s} .$$

The producer would make reference to a Table of Q Values (Table 2) to determine an estimate of percent noncompliant ($\hat{p}$) for the sample data based on the Q value and the sample size. This table is an expanded version of Table B–5 of Military Standard 414 (Docket No. 25, Notice 43, Number 1). The producer would then turn to a Table of Maximum Values of $\hat{p}$ Consistent with 5% Goal (Table 3) computed in accordance with sections 4 and 6 of "Mathematical and Statistical Principles Underlying Military Standard 414" (Docket No. 25, Notice 43, Number 2) using a probability of acceptance of 95%. If the $\hat{p}$ value obtained at the grade level in question is equal to or below the maximum acceptable $\hat{p}$ value for that sample size, the producer cannot assign a higher or lower grade to the tires. If the $\hat{p}$ value is greater than the maximum permissible for the sample size, the producer would then follow the same procedure for successively lower grade increments to determine the highest grade consistent with the 95% compliance goal. Since the maximum permissible $\hat{p}$ values decrease as sample size increases, the producer can be more confident that the grade thus determined will be accurate by increasing the number of tires tested.

Traction grading would be conducted according to the same procedure and using the same tables. Adjusted traction coefficents for asphalt and concrete would be determined as provided in 49 CFR 575.104(f). An average and standard deviation for the overall adjusted traction coefficients from the various test sequences would be determined separately for each test surface. The tables would then be used to determine a traction cofficient for the tire on each surface consistent with the 95% compliance goal. These traction coefficients would form the basis for the assignment of grades according to the criteria of 49 CFR 575.104(d)(2)(ii).

In evaluating compliance with the treadwear and traction requirements, NHTSA would conduct its own testing to assure that tires have not been overgraded or undergraded. With respect to overgrading, the agency would seek to assure that the probability that a tire's performance is below the grade level assigned is small. At the same time the agency would attempt to limit the chance of finding a product in noncompliance, when in fact its grade assignment was reasonable. NHTSA would employ a statistical procedure consistent with that outlined above, except that in place of the table of maximum p values, the agency would use a table computed on the basis of a compliance goal of 90% and a 5% risk that a noncompliance will be found when in fact the assigned grade is justified. NHTSA believes that the targets chosen provide an acceptable balance between the needs of the consumer for accurate information and the industry's need for confidence regarding compliance. The same procedure would also be used to verify that the grade assigned is the highest grade consistent with NHTSA's test data.

For purposes of NHTSA's compliance testing, the agency will not be limited to drawing its sample from a particular plant of manufacture or production period. Comment is requested on how samples should be drawn by the agency for such testing.

NHTSA has tentatively concluded that the statistical procedure proposed in this notice is superior to the existing open-ended requirement and to the alternative concepts available for grade assignment. NHTSA believes that grading uniformity will be improved under the proposed system by assuring that a large, specified percentage of each tire line will exceed the performance level assigned to it, while avoiding significant undergrading. Procedures of the type selected have been proven operable in many years of use by the Department of Defense and other Federal agencies.

Alternative methodologies based on attributes sampling plans, i.e., systems which specify a permissible number of failures in a sample of a certain size, require a larger sample size to provide a comparable level of assurance in judging a performance characteristic. Confidence interval plans, in which the conclusion can be drawn that 95% of the time the true average of a population will fall between two values on a continuum, present even greater drawbacks. If a grade were based on the low end of the confidence interval, the true average of the population could well be at or close to the low end of the interval and as much as half the population could perform below the grade assigned. Thus, the variables sampling plan outlined above appears to NHTSA to be clearly preferable.

Treadwear Grade Interval

As noted above, the current UTQG treadwear test procedure requires that, in determining tire grades, projected percentages of the NHTSA nominal treadwear mileage value of 30,000 miles be rounded off to the nearest lower 10 unit increment (49 CFR 575.104(e)(2)(ix)(F)). Thus, each treadwear grade level difference represents an interval of 3,000 projected miles on the San Angelo, Texas test course. For tires with projected mileages in the 20,000 to 40,000 mile range, as is common for bias and bias-belted tires, this interval represents from 7.5 to 15% of the tires' projected treadlife.

However, since the issuance of the UTQG Standards, the percentage of the tire market represented by radial tires has increased markedly. Radials, which typically yield projected treadlives of close to 60,000 miles on the San Angelo course, now make up over 50% of the market. This percentage is expected to climb to 75 to 80% in the next few years. The 3,000 mile intervals represented by the present 10 unit increments account for only 5% of the projected treadlife of these tires. To insure that the treadwire grade intervals continue to represent a significant difference in quality, NHTSA proposes to amend section 575.104(e)(2)(ix)(F) to require that projected mileage percentages be rounded off to the nearest lower 20 unit increment (e.g., 80, 100, 120 . . .). This change would result in each grade interval representing roughly 10% of the total projected treadlife of the typical radial tire on the San Angelo course.

NHTSA has evaluated this proposal and has determined that the proposed changes are not significant within the meaning of Executive Order 12221 and the Department of Transportation policies and procedures for internal review of proposals. The agency has further determined that the costs involved in conversion to the proposed grading procedure are not great enough to warrant preparation of a regulatory evaluation. The agency has also concluded that the environmental consequences of the proposed changes will be minimal.

This notice has been reviewed for the purposes of the Regulatory Flexibility Act. The impact of this regulation on small businesses will be minimized by the exemption from Uniform Tire Quality Grading System Regulation of certain limited production tires. (See 45 FR 23442; April 7, 1980.) Also, this amendment would not require additional testing to be conducted by tire manufacturers. It would merely specify how the manufacturers would calculate their tire ratings from their test data.

In consideration of the foregoing, it is proposed that 49 CFR § 575.104, Uniform Tire Quality Grading, be amended as follows:

§ 575.104 [Amended]

1. Paragraph (d)(1)(i) would be amended by substitition of the words, "Except as provided in Appendix D, paragraph (a), each" in place of the word "Each" is the third sentence thereof, and by addition of a new sentence, "The treadwear and traction performance grades shall be assigned to each tire in accordance with the procedures for determination of maximum and minimum permissible grades in Appendix D, paragraph (b)." at the end thereof.

2. Paragraph (d)(2)(i) would be amended by substitution of the number "20" in place of the "10" and the number "140" in place of the number "150" in the second sentence thereof.

3. Paragraph (e)(2)(ix)(F) would be amended by substitution of the number "20" in place of the number "10" in the second sentence thereof.

4. A new Appendix D would be added as follows:

Appendix D

(a) The NHTSA will evaluate compliance with the treadwear and traction grade labeling requirements of this standard based on a goal that 90% of the tires of a particular line or size will be able to achieve the level of performance represented by the grades with which they are labeled. In so doing, the NHTSA will apply a 5% level of risk that a tire line or size will be found out of compliance with the requirements of the standard, when it was graded by its manufacturer of brand name owner on the basis of available test data in accordance with the procedures for determination of maximum and minimum permissible grades, as set forth below.

(b) In determining permissible treadwear and traction performance grades, find the mean of the unrounded adjusted projected mileage percentages for all tires tested (x), or in the case of traction testing, the means for both asphalt and concrete of the adjusted traction coefficients for all tires tested. Subtract from this figure the nearest lower incremental treadwear grade level (L), or in the case of traction testing, the nearest lower traction coefficient index for the surface (i.e., for concrete .35 or .26; for asphalt .47 or .38). Divide this figure by the standard deviation(s) for the property in question, for the sample of tested tires:

$$Q_L = \frac{\bar{x} - L}{s}$$

Find the estimate of percent noncompliant ($_p$) in Table 2 for Q for the sample size tested. If the $_p$ value obtained in Table 2 is greater than the maximum acceptable $_p$ in Table 3 for the sample size tested (max $_p$), apply successively lower incremental values for L until a $_p$ value is obtained which is equal to or less than max $_p$. The first L value which produces a $_p$ value equal to or less than max $_p$ is both the maximum and minimum permissible performance level for the property tested for purposes of grade assignment."

5. New tables 2 and 3 would be added as follows:

Interested persons are invited to submit comments on the proposal. It is requested but not required that 10 copies be submitted.

All comments must be limited not to exceed 15 pages in length. Necessary attachments may be appended to these submissions without regard to the 15-page limit. This limitation is intended to encourage commenters to detail their primary arguments in a concise fashion.

If a commenter wishes to submit certain information under a claim of confidentiality, three copies of the complete submission, including purportedly confidential information, should be submitted to the Chief Counsel, NHTSA, at the street address given above, and seven copies from which the purportedly confidential information has been deleted should be submitted to the Docket Section. Any claim of confidentiality must be supported by a statement demonstrating that the information falls within 5 U.S.C. section 552(b)(4), and that disclosure of the information is likely to result in substantial competitive damage; specifying the period during which the information must be withheld to avoid that damage; and showing that earlier disclosure would result in that damage. In addition, the commenter or, in the case of a corporation, a responsible corporate official authorized to speak for the corporation must certify in writing that each item for which confidential treatment is requested is in fact confidential within the meaning of section 552(b)(4) and that a diligent search has been conducted by the commenter or its employees to assure that none of the specified items has previously been disclosed or otherwise become available to the public.

All comments received before the close of business on the comment closing date indicated above will be considered, and will be available for examination in the docket at the above address both before and after that date. To the extent possible, comments filed after the closing date will also be considered. However, the rulemaking action may proceed at any time after that date, and comments received after the closing date and too late for consideration in regard to the action will be treated as suggestions for future rulemaking. The NHTSA will continue to file relevant material as it becomes available in the docket after the closing date, and it is recommended that interested persons continue to examine the docket for new material.

Those persons desiring to be notified upon receipt of their comments in the rulemaking docket should enclose, in the envelope with their comments, a self addressed stamped postcard. Upon receiving the comments, the docket supervisor will return the postcard by mail.

TABLE OF EFFECTIVE DATES AND TIME PERIODS—FEBRUARY 1981

This table is for determining dates in documents which give advance notice of compliance, impose time limits on public response, or announce meetings.

Agencies using this table in planning publication of their documents must allow sufficient time for printing production.

In computing these dates, the day after publication is counted as the first day. When a date falls on a weekend or a holiday, the next Federal business day is used (see 1 CFR 18.17).

A new table will be published in the first issue of each month.

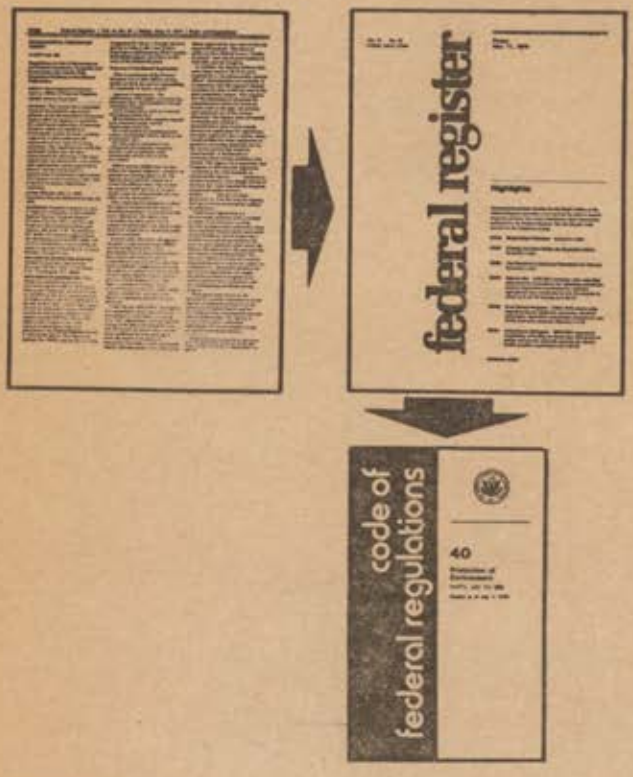
List of Public Laws

Note: No public bills which have become law were received by the Office of the Federal Register for inclusion in today's **List of Public Laws.**

[Last Listing January 28, 1981]

The Federal Register

Regulations appear as agency documents which are published daily in the **Federal Register** and codified annually in the **Code of Federal Regulations**



The **Federal Register**, published daily, is the official publication for notifying the public of proposed and final regulations. It is the tool to use to participate in the rulemaking process by commenting on the proposed regulations. And it keeps people up to date on the Federal regulations currently in effect.

The **Federal Register** contains many reader's aids—Highlights, Grant information, list of hearings and Sunshine meetings—which simplify the user's job.

The **Code of Federal Regulations** (CFR) contains the annual codification of the final regulations printed in the **Federal Register**. Each of the 50 titles is updated annually.
