**FOR FURTHER INFORMATION CONTACT:** The Associate Commissioner for Program and Integrity Reviews as shown above.

#### SUPPLEMENTARY INFORMATION:

##### A. General

The Computer Matching and Privacy Protection Act of 1988 (Pub. L. 100-503) amended the Privacy Act of 1979 (5 U.S.C. 552a) by establishing the conditions under which computer matching involving the Federal Government could be performed and adding certain protections for individuals applying for and receiving Federal benefits. The Computer Matching and Privacy Protection Amendments of 1990, set out in section 7201 of Pub. L. 101-508, further amended the Privacy Act regarding protections for such individuals. The Privacy Act, as amended, regulates the

use of computer matching by Federal agencies when records in a system of records are matched with other Federal, State, or local government records. Among other things, it requires Federal agencies involved in computer matching programs to:

(1) Make written agreements with the other agency or agencies participating in the matching programs;

(2) Obtain their Data Integrity Boards' approval of the match agreements;

(3) Furnish detailed reports about matching programs to Congress and the Office of Management and Budget;

(4) Notify applicants and beneficiaries that their records are subject to matching; and

(5) Verify match findings before reducing, suspending, terminating, or denying an individual's benefits or payments.

#### B. SSA Computer Matches Subject to the Privacy Act

We have taken action to ensure that these computer matching programs comply with the requirements of the Privacy Act, as amended.

Dated: December 15, 1994.

#### Notice of Computer Matching Programs, States' Income Eligibility Verification System Records With the Social Security Administration (SSA)

##### A. Participating Agencies

SSA and the States.

##### B. Purpose of the Matching Programs

Section 1137 of the Social Security Act (the Act) requires individual States to have in effect an income and eligibility verification system which meet certain requirements. Among other requirements, such a State verification system must provide for certain exchanges of information when relevant information may be of use in establishing or verifying eligibility or benefit amounts under benefit programs affected by the statute.

The purpose of these matching programs is to enable SSA to implement procedures consistent with requirements of section 1137 of the Act. The agreements with the States will describe the conditions under which SSA and the States agree to disclose information to each other relating to the eligibility for, and payment of, Social Security and Supplemental Security Income (SSI) benefits.

#### C. Authority for Conducting the Matching Programs

Section 1137 of the Act (a)(4)(B) (42 U.S.C. 1320b-7).

#### D. Categories of Records and Individuals Covered by the Matching Programs

SSA will provide the States with a finder file containing names and other identifying information of beneficiaries/recipients from SSA's benefit rolls. This information will be matched by each State with its wage and unemployment compensation files and a reply file of matched records will be furnished to SSA. Upon receipt of a State's reply file, SSA will match the names from the State file with the names on SSA's records to ensure that the State data pertain to the relevant Social Security or SSI recipients.

#### E. Inclusive Dates of the Match

The matching program shall become effective 40 days after a copy of the agreement, as approved by the Data Integrity Board, is sent to Congress and the Office of Management and Budget (OMB) (or later if OMB objects to some or all of the agreement), or 30 days after publication of this notice in the **Federal Register**, whichever date is later. The matching programs will continue for 18 months from the effective date and may be extended for an additional 12 months thereafter, if certain conditions are met.

## National Park Service

### Draft Comprehensive Management and Use Plan/EIS, Jaun Bautista de Anza National Historic Trail; Notice of Management Proposals and Notice of Availability of Draft Environmental Impact Statement

**SUMMARY:** Pursuant to section 102(2)(C) of the National Environmental Policy

Act of 1969 (P.L. 91-190 as amended), the National Park Service has prepared an environmental impact statement (EIS) and Comprehensive Management and Use Plan for the Juan Bautista de Anza National Historic Trail.

The *Draft Comprehensive Management and Use Plan/Environmental Impact Statement* presents a proposal and three alternatives for the management, use, and development of the Juan Bautista de Anza National Historic Trail. The proposal (alternative D) calls for marking the historic route, identifies an auto route, and envisions a continuous multi-use recreational retracement trail. The National Park Service (NPS) will take an active role in administrative oversight of the trail by helping protect a continuous trail right-of-way and historic, cultural, and natural resources associated with the trail. The NPS will certify eligible sites and segments and provide leadership for state, regional, and local governments, private landowners, organizations, corporations, and individuals to create a continuous and unified trail. The NPS will form a partnership with a non-profit trail association for the Anza Trail under the auspices of Heritage Trails Fund. Interpretive programs and a system of wayside exhibits will enhance visitor opportunities along the route. A planned promotional and tourism program will increase visitor awareness of American Indian and Spanish Colonial culture and history related to the 1775-76 Anza colonizing expedition to San Francisco Bay.

The other alternatives included in this document include a Single Theme (alternative A), Multi-theme (alternative B), and Broad Outreach (alternative C). Because action was legislated, a pure no action alternative is not considered. Alternative A most closely resembles the no action alternative required in an Environmental Impact Statement (EIS). Alternative A would limit trail recognition and resource protection to federal lands and state parks and focus interpretation on only the 1775-76 Anza trek. Trail uses would be limited to those of the original expedition. Management would emphasize volunteers, and the National Park Service would play a minor role. Alternative B is similar to the proposal but would not have the promotional aspects. Alternative C is similar to the proposal, but would broaden the interpretive themes to the overlay of history along the trail route from prehistory to the present and would include a list of points of interest associated with the trail.
