B. Request for Additional Information

EPA is requesting the following: (1) that any interested parties identify which tolerances the interested parties are willing to support by providing the data necessary to maintain the tolerances; and (2) that any interested parties identify specific existing data that the interested parties are prepared to submit to support these tolerances. Good Laboratory Practice (GLP) requirements for studies submitted in support of import tolerances are the same as for domestic uses; i.e., the studies are required to either fully meet GLP standards, or have sufficient justification presented to show that deviations from GLP requirements do not significantly affect the results of the study. Interested parties should submit this information to the address listed under ADDRESSES by March 3, 1995. For those tolerances for which interested parties do not indicate support during the comment period, EPA proposes to take final revocation action.
