**SUPPLEMENTARY INFORMATION:** The Remedial Action for Operable Unit 2 would affect on-property wetlands and the 100- and 500-year floodplain of Paddys Run. Activities involving the Solid Waste Landfill would result in direct physical impact to a 0.1 hectare- (0.2 acre-) drainage ditch wetland on the northern boundary of the Solid Waste Landfill. Indirect impacts to a 0.02 hectare- (0.04 acre-) drainage ditch wetlands north and northwest of the Lime Sludge Ponds could include the migration of eroded soil and surface water runoff and the dispersion of fugitive dust to the wetland area. In addition, approximately 0.18 hectare (0.45 acre) of drainage ditch wetland areas would be filled as a result of the construction of a haul road and pipeline. Engineering controls would be implemented during all remedial activities to minimize impacts. Potential indirect impacts to the 100- and 500-year floodplain as a result of the remedial activities involving the Inactive Flyash Pile, South Field, and Active Flyash Pile include surface water runoff and sedimentation loading into the floodplain. Direct physical impact to the floodplain could also occur as a result of heavy equipment operating within the floodplain during remediation of the Inactive Flyash Pile and South Field; however, no change in flood elevations would be expected.

Proposed actions potentially affecting these areas are subject to the substantive requirements of laws, regulations, and orders pertaining to wetlands and floodplains protection. Additionally, Executive Order (E.O.) 11988—Floodplain Management—and E.O. 11990—Protection of Wetlands—implemented by 10 CFR 1022, require federal agencies to consider the effects of proposed actions on floodplains and wetlands. These regulations require federal agencies to avoid, to the extent possible, adverse impacts associated with the occupancy and modification of floodplains and the destruction and modification of wetlands, and to avoid direct or indirect support of floodplain and wetlands development where there is a practicable alternative. Where no practicable alternative exists, proposed

actions must include all practicable measures to minimize harm. Best management practices will be utilized during the proposed projects to minimize impacts to wetland and floodplain areas.

Issued in Miamisburg, Ohio on December 21, 1994.
