States must provide EPA with an Intended Use Plan/Capitalization Grant Agreement, Annual Reports, and perform and report on annually State financial and compliance audits. Upon approval of the capitalization grant application, each State establishes its SRF program.

Local communities submit applications to their State for SRF financial assistance. Typically, the local community applicants are required to submit a project description, cost estimate, disbursement and construction schedules, an analysis of environmental and cost impacts, and a description of their financial capability and repayment plans. States review these applications for their conformance with the Intended Use Plan, as well as for their

I. Test Data Submissions

Test data for refractory ceramic fibers (RCFs) were submitted by three member companies of the Refractory Ceramic Fiber Coalition (RCFC) (Carborundum Company, Premier Refractories and Chemicals, Incorporated, and Thermal Ceramics, Incorporated) pursuant to a Testing Consent Order at 40 CFR 799.5000. They were received by EPA on December 23, 1994. The submission describes workplace exposure monitoring data from RCFC company facilities, as well as from their customers' facilities. The customers selected include those chosen at random and those who specifically requested monitoring. Air monitoring samples were collected from employees engaged in RCF fiber production and processing, or use in functional categories such as forming, finishing, and installation.

RCFs are used as insulation for industrial insulation applications such as high temperature furnaces, heaters, and kilns. RCFs are also used in automotive applications, aerospace uses, and in certain commercial appliances such as self-cleaning ovens.

EPA has initiated its review and evaluation process for these data submissions. At this time, the Agency is unable to provide any determination as to the completeness of the submissions.
