**[Investigation No. 701-TA-362 (Final)]**

**Certain Seamless Carbon and Alloy Standard, Line, and Pressure Steel Pipe From Italy**

**AGENCY:** United States International Trade Commission.

**ACTION:** Institution of a final countervailing duty investigation.

**SUMMARY:** The Commission hereby gives notice of the institution of final countervailing duty investigation No. 701-TA-362 (Final) under section 705(b) of the Tariff Act of 1930 (19 U.S.C. § 1671d(b)) (the Act) to determine whether an industry in the United States is materially injured, or is

threatened with material injury, or the establishment of an industry in the United States is materially retarded, by reason of imports from Italy of certain seamless carbon and alloy standard, line, and pressure steel pipe,<sup>1</sup> provided for in subheadings 7304.10.10, 7304.10.50, 7304.31.60, 7304.39.00, 7304.51.50, 7304.59.60, and 7304.59.80 of the Harmonized Tariff Schedule of the United States.

Pursuant to a request from petitioner under section 705(a)(1) of the Act (19 U.S.C. § 1671d(a)(1)), the U.S. Department of Commerce (Commerce) has extended the date for its final determination to coincide with that to be made in the ongoing antidumping investigation on certain seamless carbon and alloy standard, line, and pressure steel pipe from Italy. Accordingly, the Commission will not establish a schedule for the conduct of the countervailing duty investigation until Commerce makes a preliminary determination in the antidumping investigation (currently scheduled to be made by January 19, 1995).

For further information concerning the conduct of this investigation, hearing procedures, and rules of general application, consult the Commission's Rules of Practice and Procedure, part 201, subparts A through E (19 CFR part 201), and part 207, subparts A and C (19 CFR part 207).

**EFFECTIVE DATE:** December 23, 1994.

<sup>1</sup> The subject product consists of seamless carbon and alloy (other than stainless) steel pipe, of circular cross-section, not more than 114.3 mm (4.5 inches) in outside diameter, regardless of wall thickness, manufacturing process (hot-finished or cold-drawn), end finish (plain end, bevelled end, upset end, threaded, or threaded and coupled), or surface finish. The pipe is commonly known as standard pipe, line pipe, or pressure pipe, depending on the application. It may also be used in structural applications. The subject pipe is further defined in the U.S. Department of Commerce's notice of its affirmative preliminary countervailing duty determination (59 FR 60774, Nov. 28, 1994). Specifically excluded from the scope of the investigation are boiler tubing, mechanical tubing, and oil country tubular goods except when used in a standard, line, or pressure pipe application. Also excluded from the scope of the investigation are redraw hollows for cold-drawing when used in the production of cold-drawn pipe or tube.

Information can also be obtained by calling the Office of Investigations' remote bulletin board system for personal computers at 202-205-1895 (N,8,1).

**SUPPLEMENTARY INFORMATION:**

**Background.**—This investigation is being instituted as a result of an affirmative preliminary determination by the Department of Commerce that certain benefits which constitute subsidies within the meaning of section 703 of the Act (19 U.S.C. § 1671b) are being provided to manufacturers, producers, or exporters in Italy of certain seamless carbon and alloy standard, line, and pressure steel pipe. The investigation was requested in a petition filed on June 23, 1994, by the Gulf States Tube Division of Quanex Corp., Rosenberg, TX.
