

Operable unit two revealed that the highest concentration of chromium was present in a shallow well MW1S at a concentration of 0.058 mg/l. This value slightly exceeded the Maximum Contaminant Levels (MCL) for chromium set at 0.050 mg/l. Chromium contamination in this well was suspected to be the result of waste water discharged into the lagoon. All other contaminant concentrations were below the existing MCL, Secondary Maximum Contaminant Level (SMCL), and/or Health Advisory drinking water standards.

The ROD for Operable Unit Two, signed on August 30, 1988, outlined a No Action alternative for the groundwater at the Site. The .008 mg/l by which chromium exceeded the standard in a single well (MW-IS) was within the 20% analytical variance for Contract Laboratory Program labs. The wells were resampled on July 28-29, 1988. The highest concentration of chromium detected was .041 mg/l in MW-IS. The contaminant levels in the groundwater presented no imminent or substantial threat to human health or the environment, therefore, no groundwater treatment was necessary.

The solidification/stabilization treatment of the contaminated soil is considered a permanent remedy. No additional treatment of the solidified material is necessary, however, periodic groundwater monitoring will be conducted. EPA Region IV has entered into a Superfund State Contract with the State of South Carolina to conduct operations and maintenance activities at this Site for a period of five years. The State of South Carolina has subsequently agreed to continue with these activities beyond the five year period. EPA conducted the first of these activities on November of 1989. Both EPA and the State of South Carolina find that the remedy continues to

provide adequate protection of human health and the environment.

CERCLA Section 121(c), 42 U.S.C. 9621 and 40 CFR 300.430(f)(4)(ii) requires that five year reviews be performed at sites where contaminants remain above levels that allow for unlimited use and unrestricted exposure. The first Five Year Review was completed on September 13, 1993. The results of this review indicate that the remedial activities were effective in stabilizing the contaminant source on-site. Additional five year reviews will allow EPA and the State of South Carolina to determine if the protectiveness of the remedy will be maintained over time.

EPA, in concurrence with the State of South Carolina has determined that all appropriate fund-financed responses under CERCLA at the Independent Nail Site have been completed, and no further clean-up by the responsible parties is appropriate.

Dated: November 16, 1994.

Patrick M. Tobin,

*Acting Regional Administrator, Region IV,
Environmental Protection Agency.*

BILLING CODE 6560-50-P

FEDERAL COMMUNICATIONS COMMISSION

47 CFR Part 73

[MM Docket No. 94-143]

Television Table of Allotments: Albion, NE

AGENCY: Federal Communications Commission.

ACTION: Proposed rule; correction.

SUMMARY: This document contains corrections to the *Notice of Proposed Rule Making* in MM Docket No. 94-143,

a summary of which was published on January 3, 1995 (60 FR 91). The *Notice* is corrected to specify reference coordinates for the proposed Channel 24 allotment at Albion, Nebraska, as 41-55-58 and 98-17-23, and a plus offset for the Channel 24 allotment.

DATES: Comments must be filed by Feb. 13, 1995, and reply comments by Feb. 28, 1995.

ADDRESSES: Send comments to the Federal Communications Commission, Washington, DC 20554.

FOR FURTHER INFORMATION CONTACT: Robert Hayne, Mass Media Bureau (202) 634-6530.

SUPPLEMENTARY INFORMATION:

Need for Correction

As published, the *Notice of Proposed Rule Making* contained an error with respect to the reference coordinates and channel offset for the proposed allotment of Channel 24 to Albion, Nebraska.

Correction of Publication

Accordingly, the publication on January 3, 1995, of the Summary of the Notice of Proposed Rule Making in MM Docket 94-143, which was the subject of FR Doc. 94-32275, is corrected as follows:

On page 91, in the first and second columns, all references to "Channel 24" are corrected to read "Channel 24+."

On page 91, in the second column, the reference coordinates for Channel 24+ at Albion, Nebraska, are corrected to read "41-55-58 and 98-17-23."

Federal Communications Commission.

Douglas W. Webbink,

Chief, Policy and Rules Division, Mass Media Bureau.
