IV. Regulatory Impact Statement

We generally prepare a regulatory flexibility analysis that is consistent with the Regulatory Flexibility Act (RFA) (5 U.S.C. 601 through 612), unless the Administrator certifies that a notice would not have a significant economic impact on a substantial number of small entities. For purposes of a RFA, States and individuals are not considered small entities. However, providers are considered small entities. Additionally, section 1102(b) of the Act requires the Secretary to prepare a regulatory impact analysis if a notice may have a significant impact on the operations of a substantial number of small rural hospitals. Such an analysis must conform to the provisions of section 604 of the RFA. For purposes of section 1102(b) of the Act, we define a small rural hospital as a hospital that is located outside of a Metropolitan Statistical Area and has fewer than 50 beds.

This notice does not contain rules; rather, it reflects the DSH allotments for each State as determined in accordance with §§ 447.297 through 447.299.

We have discussed the method of calculating the preliminary FFY 1995 national aggregate DSH target and the preliminary FFY 1995 individual State DSH allotments in the previous sections of this preamble. These calculations should have a positive impact on payments to DSHs. Allotments will not be reduced for high-DSH States since we are now interpreting the 12-percent limit as a target. Low-DSH States will get their base allotments plus their growth amounts.

In accordance with the provisions of Executive Order 12866, this notice was reviewed by the Office of Management and Budget.
