[Airspace Docket No. 94-AWA-9]

Proposed Modification of the Roanoke Regional/Woodrum Field, VA, and Rochester-Monroe County Airport, NY, Class C Airspace Areas and Proposed Establishment of the Roanoke Regional/Woodrum Field, VA, Class E Airspace Area

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of proposed rulemaking.

SUMMARY: This proposed rule would modify the Class C airspace areas at Roanoke Regional/Woodrum Field, VA, and Rochester-Monroe County Airport, NY. The effective hours of the Roanoke Regional/Woodrum Field, VA, Class C airspace area would be amended to coincide with the associated radar approach control facility's hours of operation. Class C airspace areas are predicated on an operational air traffic control tower (ATCT) serviced by a radar approach control facility. In addition, this action proposes to establish Class E airspace at Roanoke Regional/Woodrum Field, VA, when the associated radar approach control facility is not in operation. This proposed action would also change the name of the Rochester-Monroe County Airport, NY, to Greater Rochester International Airport, NY. This proposal would not change the designated boundaries or altitudes of these Class C airspace areas.

DATES: Comments must be received on or before January 26, 1995.

ADDRESSES: Send comments on the proposal in triplicate to: Federal Aviation Administration, Office of the Chief Counsel, Attention: Rules Docket [AGC-200], Airspace Docket No. 94-AWA-9, 800 Independence Avenue, SW., Washington, DC 20591.

The Proposal

The FAA is considering an amendment to part 71 of the Federal Aviation Regulations (14 CFR part 71) to modify the Class C airspace areas at Rochester-Monroe County, Airport, NY, and Roanoke Regional/Woodrum Field, VA. This action proposes to change the name of the Rochester-Monroe County Airport, NY, to Greater Rochester International Airport, NY. In addition, this proposed action would modify the Roanoke Regional/Woodrum Field, VA, Class C airspace area by amending the area's effective hours to coincide with the associated radar approach control facility's hours of operation. This action also proposes to establish Class E airspace at Roanoke Regional/Woodrum Field, VA, when the associated radar approach control facility is not in operation. Establishing Class E airspace is necessary to provide controlled airspace for instrument approaches. Class C and Class E airspace designations are published in paragraphs 4000 and 6002, respectively, of FAA Order 7400.9B dated July 18, 1994, and effective September 16, 1994, which is incorporated by reference in 14 CFR 71.1. The Class C and Class E airspace designations listed in this document would be published subsequently in the Order.

The FAA has determined that this proposed regulation only involves an established body of technical regulations that need frequent and routine amendments to keep them operationally current. It, therefore—(1) is not a "significant regulatory action" under Executive Order 12866; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal. Since this is a

routine matter that will only affect air traffic procedures and air navigation, it is certified that this rule, when promulgated, will not have a significant impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.
