and of plans for addressing such shortfall. Such notice must be provided within thirty days after the LEC becomes aware of an anticipated shortfall or within five days after denying capacity to a video programmer, whichever occurs first. The Commission also conforms its existing enhanced services safeguards against anticompetitive conduct by adding video dialtone delivery service to the service categories for which it requires that Regional Bell Operating Companies (RBOCs) and GTE Service Corporation (GTE) report installation and maintenance activities. In addition, the Commission requires the RBOCs and GTE to file, within 90 days after publication in the **Federal Register,** a detailed description of the types of Customer Proprietary Network Information (CPNI) to which they anticipate having access as providers of video dialtone service, and to explain how they would plan to use such information in marketing video dialtone services to video programmers or consumers.
