**SUPPLEMENTARY INFORMATION:**

**History**

On July 29, 1994, the FAA proposed to amend part 71 of the Federal Aviation Regulations (14 CFR Part 71) to establish Class E airspace at Hazelton Municipal Airport, PA (59 FR 42535). The proposal would establish that amount of controlled airspace as deemed necessary by the FAA to contain aircraft utilizing existing IFR procedures to and from the airport.

Interested parties were invited to participate in this rulemaking proceeding by submitting written comments on the proposal to the FAA. No comments objecting to the proposal were received.

Airspace Reclassification, in effect as of September 16, 1993, has discontinued the use of the term "Transition Area," and Transition Area is now Class E airspace. Except for editorial changes, this amendment is the same as that proposed in the notice. The coordinates for this airspace docket are based on North American Datum 83. Class E airspace designations for airspace

extending upward from 700 feet above the surface of the earth are published in Paragraph 6005 of FAA Order 7400.9B, Airspace Designations and Reporting Points, dated July 18, 1994, and effective September 16, 1994, which is incorporated by reference in 14 CFR 71.1. The Class E airspace designation listed in this document will be published subsequently in the Order.

**The Rule**

This amendment to Part 71 of the Federal Aviation Regulations establishes Class E airspace at Hazelton, PA, to contain aircraft utilizing existing IFR procedures to and from the Hazelton Municipal Airport, PA.

The FAA has determined that this regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. Therefore, this regulation: (1) is not a "significant regulatory action" under Executive Order 12866; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal. Since this is a routine matter that will only affect air traffic procedures and air navigation, it is certified that this rule will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

**Modification of Class D and Class E Airspace; Morgantown, WV**

**AGENCY:** Federal Aviation Administration (FAA), DOT.

**ACTION:** Final rule.

**SUMMARY:** This action revises controlled airspace in the vicinity of Morgantown, WV, due to the decommissioning of the Bobtown, WV, non-directional radiobeacon (NDB), a proposed cancellation of an NDB or Global Positioning System (GPS) standard instrument approach procedure (SIAP), and a review of air traffic control procedures in the area. A minor change is also being made in the legal description of Class E airspace described in the original notice due to an incorrect radial being used.

On August 16, 1994, the FAA proposed to amend part 71 of the Federal Aviation Regulations (14 CFR Part 71) to revise Class D and Class E airspace in the vicinity of Morgantown, WV (59 FR 46205). The proposal would revise that amount of controlled airspace to reflect revised air traffic control procedures in the area.

Interested parties were invited to participate in this rulemaking proceeding by submitting written comments on the proposal to the FAA. No comments on the proposal were received.

Airspace Reclassification, in effect as of September 16, 1993, has discontinued the use of the terms "Control Zone and Transition Area," and Control Zones and Transition Areas are now Class D and Class E airspace respectively. Except for editorial changes, this amendment is the same as that proposed in the notice. The coordinates for this airspace docket are based on North American Datum 83. Class D and Class E airspace designations for Morgantown, WV are published in Paragraphs 5000, 6002, and 6005 of FAA Order 7400.9B, Airspace Designations and Reporting Points, dated July 18, 1994, and effective September 16, 1994, which is incorporated by reference in 14 CFR 71.1. The Class D and Class E airspace designations listed in this document will be published subsequently in the Order.

**The Rule**

This amendment to Part 71 of the Federal Aviation Regulations revises Class D and Class E airspace in the vicinity of Morgantown, WV to reflect airspace actually needed by the FAA to contain existing air traffic control procedures.

The FAA has determined that this regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. Therefore, this regulation: (1) Is not a "major rule" under Executive Order 12291; (2) is not a "significant rule" under DOT Regulatory Policies
