The Proposal

The FAA is considering an amendment to part 71 of the Federal Aviation Regulations (14 CFR part 71) to establish Class D airspace at Cocoa Beach, FL. The United States Air Force operates a part time control tower at the Cape Canaveral AS Skid Strip Airport. Additionally there is a TACAN-A IAP to the airport. Therefore the United States Air Force has requested the establishment of Class D airspace for this airport. Designations for Class D airspace are published in Paragraph 5000 at FAA Order 7400.9B dated July 18, 1994 and effective September 16, 1994, which is incorporated by reference in CFR 71.1. The Class D airspace designation listed in this document would be published subsequently in the Order.

The FAA has determined that this proposed regulation only involves an established body of technical regulations for which frequent and

routine amendments are necessary to keep them operationally current. It, therefore, (1) is not a "significant regulatory action" under Executive Order 12866; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal. Since this is a routine matter that will only affect air traffic procedures and air navigation, it is certified that this rule, when promulgated, will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

SUPPLEMENTARY INFORMATION:
Background

On November 15, 1994, OSHA published a notice of proposed rulemaking on its respiratory protection standard (59 FR 58884 *et seq.*). The proposal is intended to update the current respirator standard to reflect changes in methodology, technology, and approach related to respiratory protection that have occurred since the existing respiratory protection standard was adopted in 1971.

Extension of the Comment Period and Re-scheduling of the Public Hearings

OSHA has received four written requests to extend the comment period for an additional 60 days from: Organization Resources Counselors, Inc. (Ex. 54-13); the American Petroleum Institute (Ex. 54-4); the Dow Chemical Company (Ex. 54-12); and TSI Incorporated (Ex. 54-15). The requesters state that because of the holidays and the press of other year-end business, the opportunity for interested persons to submit extensive comments, and for trade associations to coordinate among their members requires an extension of the time for comment. Based on these requests, the Agency has agreed to extend the comment period. It also has re-scheduled the public hearings.

OSHA's procedures for participating in its rulemaking were printed in the proposal notice (59 FR 58935). All persons interested in participating are requested to review these procedures in their entirety. For convenience these procedures are summarized below.
