BILLING CODE 4510-26-P

DEPARTMENT OF DEFENSE**Department of the Army****Corps of Engineers****33 CFR Part 334****Danger Zones, Atlantic Ocean South of the Entrance to the Chesapeake Bay, Virginia Beach, Virginia**

AGENCY: U.S. Army Corps of Engineers, DOD.

ACTION: Proposed rule.

SUMMARY: The Corps of Engineers proposes to amend the regulations which establish a danger zone in the waters of the Atlantic Ocean south of the entrance of the Chesapeake Bay due to the relocation of the Southeast Sea lanes of the Atlantic Federal Project Channel. The relocation of the danger zone is necessary to provide an

additional measure of safety for vessels operating in the area. As a result of this amendment, the danger zone will be shifted to the south. The overall size and configuration of the danger zone will remain the same.

DATES: Written comments must be received on or before February 19, 1995.

ADDRESSES: Send written comments on this proposal to HQUSACE, ATTN: CECW-OR, Washington, D.C. 20314-1000.

FOR FURTHER INFORMATION CONTACT: Mr. Rick Henderson at (804) 441-7653 or Mr. Ralph Eppard at (202) 272-1783.

SUPPLEMENTARY INFORMATION: Pursuant to its authorities in Section 7 of the Rivers and Harbors Act of 1917 (40 Stat. 266; 33 U.S.C. 1) and Chapter XIX of the Army Appropriations Act of 1919 (40 Stat. 892; 33 U.S.C. 3), the Corps proposes to amend the danger zone regulations in 33 CFR 334.390.

The Commanding Officer, Fleet Combat Training Center, Atlantic, U.S. Navy, has requested that the danger zones be amended to reflect changes in the routing of the Southeast Sea Lanes. There are no changes which will affect the public's use of the area. As presently configured, the danger zone is in the path of vessels entering and departing the Southeast Sea Lanes south of the entrance to the Chesapeake Bay. This proposed amendment, if approved, will move the entire danger zone to the south.

Economic Assessment and Certification

This proposed rule is issued with respect to a military function of the Defense Department and the provisions of E.O. 12866 do not apply. The relocation of the danger zones will have only minimal impact on recreational, commercial or fishing vessels within the area because the vessels are not prohibited from use of the area except when firing is in process at the range. The configuration of the danger zone is not affected by this amendment. There will be no impacts on small businesses or governments in the area. I hereby certify that this regulation will have no significant economic impact on a substantial number of small entities.

FEDERAL EMERGENCY MANAGEMENT AGENCY

44 CFR Part 67

[Docket No. FEMA-7122]

Proposed Flood Elevation Determinations

AGENCY: Federal Emergency Management Agency (FEMA).

ACTION: Proposed rule.

SUMMARY: Technical information or comments are requested on the proposed base (100-year) flood elevations and proposed base (100-year) flood elevation modifications for the communities listed below. The base (100-year) flood elevations and modified base (100-year) flood elevations are the basis for the floodplain management measures that the community is required either to adopt or to show evidence of being already in effect in order to qualify or remain qualified for participation in the National Flood Insurance Program (NFIP).

DATES: The comment period is ninety (90) days following the second publication of this proposed rule in a newspaper of local circulation in each community.

ADDRESSES: The proposed base flood elevations for each community are available for inspection at the office of the Chief Executive Officer of each community. The respective addresses are listed in the following table.

FOR FURTHER INFORMATION CONTACT: Michael K. Buckley, P.E., Chief, Hazard Identification Branch, Mitigation Directorate, 500 C Street SW., Washington, DC 20472, (202) 646-2756.

SUPPLEMENTARY INFORMATION: The Federal Emergency Management Agency proposes to make determinations of base flood elevations and modified base flood elevations for each community listed below, in accordance with Section 110 of the Flood Disaster Protection Act of 1973, 42 U.S.C. 4104, and 44 CFR 67.4(a).

These proposed base flood and modified base flood elevations, together with the floodplain management criteria required by 44 CFR 60.3, are the minimum that are required. They should not be construed to mean that the community must change any existing ordinances that are more stringent in their floodplain management requirements. The community may at any time enact stricter requirements of its own, or pursuant to policies established by other Federal, State, or regional entities. These proposed elevations are used to meet the floodplain management requirements of the NFIP and are also used to calculate the appropriate flood insurance premium rates for new buildings built after these elevations are made final, and for the contents in these buildings.

National Environmental Policy Act

This proposed rule is categorically excluded from the requirements of 44 CFR Part 10, Environmental Consideration. No environmental impact assessment has been prepared.

Regulatory Flexibility Act

The Associate Director, Mitigation Directorate, certifies that this proposed rule is exempt from the requirements of the Regulatory Flexibility Act because proposed or modified base flood elevations are required by the Flood Disaster Protection Act of 1973, 42 U.S.C. 4104, and are required to establish and maintain community eligibility in the NFIP. No regulatory flexibility analysis has been prepared.

Regulatory Classification

This proposed rule is not a significant regulatory action under the criteria of Section 3(f) of Executive Order 12866 of September 30, 1993, Regulatory Planning and Review, 58 FR 51735.

Executive Order 12612, Federalism

This proposed rule involves no policies that have federalism implications under Executive Order 12612, Federalism, dated October 26, 1987.

Executive Order 12778, Civil Justice Reform

This proposed rule meets the applicable standards of Section 2(b)(2) of Executive Order 12778.
