Approval and Promulgation of Implementation Plans North Carolina: Approval of Revisions to the State Implementation Plan

AGENCY: Environmental Protection Agency (EPA).

ACTION: Proposed rule.

SUMMARY: The EPA proposes to approve the State Implementation Plan (SIP) revisions, submitted by the State of North Carolina, which extend the Reasonably Available Control Technology (RACT) regulations for emissions of Volatile Organic Compounds (VOC) to new and expanded nonattainment areas for ozone (O₃); amend several definitions; add compliance schedules for sources located in O₃ nonattainment areas; amend the alternative compliance and exemption from compliance schedule regulations; amend the graphic arts regulation; add new regulations for several types of VOC sources; and add an interim regulation for categories of sources for which RACT guidelines are being developed. In the final rules section of this **Federal Register**, the EPA is approving the State's SIP revision as a direct final rule without prior proposal because the EPA views this as a noncontroversial revision amendment and anticipates no adverse comments. A detailed rationale for the approval is set forth in the direct final rule. If no adverse comments are received in response to that direct final rule, no further activity is contemplated in relation to this proposed rule. If EPA receives adverse comments, the direct final rule will be withdrawn and all public comments received will be addressed in a subsequent final rule based on this proposed rule. The EPA will not institute a second comment period on this document. Any parties interested in commenting on this document should do so at this time. **DATES:** To be considered, comments must be received by February 27, 1995. **ADDRESSES:** Written comments on this action should be addressed to Mr. Randy Terry at the EPA Regional Office listed below.
