

Adjustment Assistance, Employment and Training Administration, has instituted investigations pursuant to Section 221(a) of the Act.

The purpose of each of the investigations is to determine whether the workers are eligible to apply for adjustment assistance under Title II, Chapter 2, of the Act. The investigations will further relate, as appropriate, to the determination of the date on which total or partial separations began or threatened to begin and the subdivision of the firm involved.

The petitioners or any other persons showing a substantial interest in the subject matter of the investigations may request a public hearing, provided such request is filed in writing with the Director, Office of Trade Adjustment Assistance, at the address shown below, not later than February 6, 1995.

Interested persons are invited to submit written comments regarding the subject matter of the investigations to the Director, Office of Trade Adjustment Assistance, at the address shown below, not later than February 6, 1995.

The petitions filed in this case are available for inspection at the Office of the Director, Office of Trade Adjustment Assistance, Employment and Training Administration, U.S. Department of Labor, 200 Constitution Avenue, NW., Washington, DC 20210.

Signed at Washington, D.C. this 9th day of January, 1995.

**McKay Drilling Company Aroura, CO; Operating at Other Sites in the Following States: TA-W-30, 578A North Dakota TA-W-30, 578B Wyoming; Notice of Termination of Investigation**

Pursuant to Section 221 of the Trade Act of 1974, an investigation was initiated on December 19, 1994 in response to a worker petition which was filed on December 1, 1994 on behalf of workers at McKay Drilling Company, Incorporated, Aroura, Colorado (TA-W-30,578) and operating out of the following states: North Dakota (TA-W-30,578A) and Wyoming (TA-W-30,578B).

All workers were separated from the subject firm more than one year prior to the date of the petition. Section 223 of the Act specifies that no certification may apply to any worker whose last separation occurred more than one year before the date of the petition. Consequently, further investigation in this case would serve no purpose, and the investigation has been terminated.

Signed in Washington, DC this 13th day of January 1995.

[TA-W-30,310 Syracuse, New York]  
[TA-W-30,310A All Other Sites in New York]

**Niagara Mohawk Power Corp.; Amended Certification Regarding Eligibility To Apply for Worker Adjustment Assistance**

In accordance with Section 223 of the Trade Act of 1974 (19 USC 2273) the Department of Labor issued a Certification of Eligibility to Apply for Worker Adjustment Assistance on November 10, 1994, applicable to all workers of the subject firm. The certification was published in the **Federal Register** on December 9, 1994 (59 FR 63823).

At the request of the State Agency, the Department reviewed the certification for workers of the subject firm. New findings show that worker separations occurred at other locations in the state.

Accordingly, the Department is amending the certification to properly reflect the correct worker group.

The intent of the Department's certification is to include all workers of Niagara Mohawk Power Corporation

who were adversely affected by increased imports of electricity.

The amended notice applicable to TA-W-30,310 is hereby issued as follows:

"All workers of Niagara Mohawk Power Corporation Syracuse, New York and at other locations in the state of New York who became totally or partially separated from employment on or After August 29, 1993 are eligible to apply for adjustment assistance under Section 223 of the Trade Act of 1974."

Signed at Washington, DC, this 11th Day of January, 1995.

**Phillips-Van Heusen Warehouse & Distribution Center, West Hazleton, PA; Dismissal of Application for Reconsideration**

Pursuant to 29 CFR 90.18 an application for administrative reconsideration was filed with the Director of the Office of Trade Adjustment Assistance for workers at Phillips-Van Heusen Warehouse & Distribution Center, West Hazleton, Pennsylvania. The review indicated that the application contained no new substantial information which would

bear importantly on the Department's determination. Therefore, dismissal of the application was issued.

**NUCLEAR REGULATORY COMMISSION**

**U.S. Enrichment Corporation's Gaseous Diffusion Plants Establishment of Local Public Document Rooms**

The Nuclear Regulatory Commission (NRC) has established a local public document room (LPDR) for each of the U.S. Enrichment Corporation's (USEC) Paducah and Portsmouth gaseous diffusion plants located in Paducah, Kentucky, and Piketon, Ohio, respectively.

Members of the public may now inspect and copy documents and correspondence related to the Paducah and Portsmouth Plants at the following locations:

1. *USEC Paducah Plant:* Paducah Public Library, 555 Washington Street,

Paducah, Kentucky 42003. Hours of operation: Monday through Thursday 9:00 a.m. to 9:00 p.m.; Friday and Saturday 9:00 a.m. to 6:00 p.m.; and Sunday 1:00 p.m. to 6:00 p.m. Contact: Ms. Marie Liang, Assistant Director, telephone number (502) 442-2510.

2. *USEC Portsmouth Plant:* Portsmouth Public Library, 1220 Gallia Street, Portsmouth, Ohio 45662. Hours of operation: Monday through Friday 9:00 a.m. to 8:00 p.m.; Saturday 9:00 a.m. to 5:30 p.m.; and Sunday 1:00 p.m. to 5:00 p.m. Contact: Mr. Charles T. Cook, Director, telephone number (614) 354-5688.

Interested parties may visit or contact either of the LPDRs directly or may address their requests for records to the NRC's Public Document Room, 2120 L Street NW., Washington, DC 20555, or telephone (202) 634-3273.

Questions concerning the NRC's local public document room program or the availability of documents should be addressed to Ms. Jona L. Souder, LPDR Program Manager, Freedom of Information/Local Public Document Room Branch, U.S. Nuclear Regulatory Commission, Washington, DC 20555-0001, telephone number (301) 415-7170, or toll-free 1-800-638-8081.

Dated at Rockville, Maryland, this 24th day of January, 1995.

For the Nuclear Regulatory Commission.

BILLING CODE 7590-01-M

[Docket No. 50-382]

**Entergy Operations, Inc; Notice of Consideration of Issuance of Amendment to Facility Operating License, Proposed No Significant Hazards Consideration Determination, and Opportunity for a Hearing**

The U.S. Nuclear Regulatory Commission (the Commission) is considering issuance of an amendment to Facility Operating License No. NPF-38 issued to Entergy Operations, Inc. (the licensee), for operation of the Waterford Steam Electric Station, Unit 3, located in St. Charles Parish, Louisiana.

The proposed amendment would modify the technical specifications (TSs) by adding a new TS 3.0.5, and the associated Bases. The new TS 3.0.5 will allow the equipment removed from service or declared inoperable to comply with ACTIONS to be returned to service under administrative controls

solely to perform testing required to demonstrate its OPERABILITY or the OPERABILITY of other equipment. This proposed change is based on the Combustion Engineering improved standard TSs approved by the NRC.

Before issuance of the proposed license amendment, the Commission will have made findings required by the Atomic Energy Act of 1954, as amended (the Act) and the Commission's regulations.

The Commission has made a proposed determination that the amendment request involves no significant hazards consideration. Under the Commission's regulations in 10 CFR 50.92, this means that operation of the facility in accordance with the proposed amendment would not (1) involve a significant increase in the probability or consequences of an accident previously evaluated; or (2) create the possibility of a new or different kind of accident from any accident previously evaluated; or (3) involved a significant reduction in a margin of safety. As required by 10 CFR 50.91(a), the licensee has provided its analysis of the issue of no significant hazards consideration, which is presented below:

The proposed change will allow an orderly return to service of inoperable equipment. Specification 3.0.5 will permit equipment removed from service to comply with required Actions to be returned to service under administrative controls to verify the operability of the equipment being returned to service or operability of other equipment. The administrative controls will ensure the time involved will be limited to only the time required to demonstrate the component or system operability. This new specification provides an acceptable method of demonstrating the operability of TS equipment before it is returned to service and allows for verifying other TS equipment is operable. Therefore, the proposed change will not involve a significant increase in the probability or consequences of any accident previously evaluated.

The proposed change will not alter the operation of the plant or the manner in which the plant is operated. The equipment is only being tested in its design configuration or being returned to service to allow testing of another component or system. Therefore, the proposed change will not create the possibility of a new or different kind of accident from any accident previously evaluated.

The proposed Specification will only allow the return to service of equipment that is expected to fulfill its safety function. The use of Specification 3.0.5 will be limited to the performance of testing on the equipment being returned to service or on other equipment that is dependent on the equipment being returned to service. The testing is limited to post maintenance testing and testing to prove operability. Therefore, the proposed change will not involve a significant reduction in a margin of safety.
