DEPARTMENT OF THE INTERIOR

Fish and Wildlife Service

Notice of Availability of Draft Conservation Agreement for the Virgin Spinedace for Review and Comment

AGENCY: U.S. Fish and Wildlife Service, Interior.

ACTION: Notice of document availability.

SUMMARY: The Fish and Wildlife Service (Service) announces the availability for public review of a Draft Conservation Agreement for the Virgin spinedace (*Lepidomeda mollispinis mollispinis*). This species is proposed for Federal listing as threatened pursuant to the Endangered Species Act (Act) of 1973, as amended. The Conservation Agreement was developed by the Utah Department of Natural Resources, with

participation from the following parties—Bureau of Land Management, National Park Service, Nevada Department of Conservation and Natural Resources, Arizona Game and Fish Department, Washington County Water Conservancy District, and the Service. The agreement focuses on reducing and eliminating significant threats and enhancing and/or stabilizing specific reaches of occupied and unoccupied historical habitat of the Virgin spinedace. The Service solicits review and comment from the public on this draft agreement.

DATES: Comments on the Draft Conservation Agreement must be received on or before March 28, 1995 to be considered by the Service during preparation of the final conservation agreement and prior to the Service's determination whether it will be a signatory party to the agreement.

ADDRESSES: Persons wishing to review the Draft Conservation Agreement may obtain a copy by contacting the Field Supervisor, U.S. Fish and Wildlife Service, 145 East 1300 South, Suite 404, Salt Lake City, Utah 84115. Written comments and materials regarding the Draft Conservation Agreement should also be directed to the same address. Comments and materials received will be available on request for public inspection, by appointment, during normal business hours at the above address.

FOR FURTHER INFORMATION CONTACT: Mr. Roberts D. Williams, Assistant Field Supervisor (see **ADDRESSES** section) (telephone 801/524-5001).

SUPPLEMENTARY INFORMATION:

Background

The Virgin spinedace is a small minnow endemic to the Virgin River drainage basin in southwestern Utah, northwestern Arizona, and southeastern Nevada. Over the last 50 years, the range of the species has declined by approximately 37-40 percent due to human impacts such as water development projects, agriculture, mining, urbanization, and introduction of nonactive fishes. The Virgin spinedace was proposed for listing as a threatened species on May 18, 1994 (59 FR 25875). In May 1994 the Utah Department of Natural Resources initiated development of a Conservation Agreement, working cooperatively with other agencies, in an effort to reduce the threats affecting the Virgin spinedace.

The Conservation Agreement outlines five general management actions and four general administrative actions required to meet the objectives of the agreement. These actions include

reestablishing and maintaining required flows, enhancing and maintaining habitat, selectively controlling nonnative fish, maintaining genetic viability, monitoring populations and habitat, coordinating conservation activities, implementing the conservation schedule, funding conservation actions, and assessing conservation progress.

Public Comments Solicited

The Service will use information received in its determination as to whether it should be a signatory party to the agreement. Comments or suggestions from the public, other concerned governmental agencies, the scientific community, industry, or any other interested party concerning this draft document are hereby solicited. All comments and materials received will be considered prior to the approval of any final document.
