

SIP approvals under section 110 and subchapter I, part D of the Act do not create any new requirements, but simply approve requirements that the State is already imposing. Therefore, because the Federal SIP approval does not impose any new requirements, I certify that it does not have a significant impact on any small entities affected. Moreover, due to the nature of the Federal state relationship under the Act, preparation of a regulatory flexibility analysis would constitute Federal inquiry into the economic reasonableness of State action. The Act forbids USEPA to base its actions concerning SIPs on such grounds. *Union Electric Co. v. U.S. E.P.A.*, 427 U.S. 246, 256-66 (S.Ct. 1976); 42 U.S.C. 7410(a)(2).

Under section 307(b)(1) of the Clean Air Act, petitions for judicial review of this action must be filed in the United States Court of Appeals for the appropriate circuit by March 28, 1995. Filing a petition for reconsideration by the Administrator of this final rule does not affect the finality of this rule for the purposes of judicial review nor does it extend the time within which a petition for judicial review may be filed, and shall not postpone the effectiveness of such rule or action. This action may not be challenged later in proceedings to enforce its requirements. (See section 307(b)(2).)

RIN 2060-AC19

National Emission Standards for Hazardous Air Pollutants for Source Categories; Organic Hazardous Air Pollutants From the Synthetic Organic Chemical Manufacturing Industry and Other Processes Subject to the Negotiated Regulation for Equipment Leaks; Extension of Compliance

AGENCY: Environmental Protection Agency (EPA).

ACTION: Final rule; extension of compliance.

SUMMARY: On October 24 and 28, 1994, EPA announced a partial 3-month stay and reconsideration of certain aspects of the "National Emission Standards for Hazardous Air Pollutants From the Synthetic Organic Chemical Manufacturing Industry and Other

Processes Subject to the Negotiated Regulation for Equipment Leaks" 59 FR 19402 (April 22, 1994) and 59 FR 29196 (June 6, 1994) (collectively known as the "hazardous organics NESHAP" or the "HON"). The EPA also proposed, pursuant to Clean Air Act section 301(a)(1), 42 U.S.C. 7601(a)(1), to extend temporarily the applicable compliance dates for sources subject to the stay, but only as necessary to complete the two reconsiderations (including appropriate regulatory action) of the rule in question. The EPA received no adverse public comment on either of the two proposed short-term compliance extensions. The EPA is extending the compliance dates until April 24, 1995. A short-term extension of this nature is well within the 3-year period allowed by the Act.

EFFECTIVE DATE: January 27, 1995.

SUPPLEMENTARY INFORMATION:

I. Compliance Extension

On October 24, 1995 (59 FR 53359) EPA announced that, pursuant to Clean Air Act section 307(d)(7)(B), it is reconsidering certain portions of the HON rule. The October 24, 1995 administrative stay applied only to those source owners or operators who make a representation in writing that resolution of the area source definition issues could affect whether the facility is subject to the HON. Readers should refer to that notice for a complete discussion of the background and rule affected.

On October 28, 1995 (59 FR 54131), EPA announced an administrative stay of the effectiveness of the provisions for compressors and for surge control vessels and bottoms receivers for sources subject to the October 24, 1994 compliance date pending reconsideration of those provisions. Readers should refer to that notice and the associated proposed amendments to subpart H (59 FR 54154) for a complete discussion of the background and the proposed changes to the rule.

Along with both notices of partial stay and reconsideration, EPA also proposed to extend the compliance dates beyond the 3 months provided, as necessary to complete reconsideration and revision of the rule in question.

Ten comment letters were received on each of the two notices of partial stay and reconsideration. No adverse

comments were received on either proposal to extend the compliance dates beyond 3 months, if necessary, in order to complete reconsideration and revision of the rules in question. As EPA finds that it is not able to complete the reconsideration and the regulatory action to the rule within the 3 month period, EPA is extending the compliance date until April 24, 1995. The EPA expects to complete the regulatory action on both petitions for reconsideration before the April compliance date.

II. Judicial Review

Under section 307(b)(1) of the Clean Air Act (CAA), judicial review of the actions taken by this final rule is available only on the filing of a petition for review in the U.S. Court of Appeals for the District of Columbia Circuit within 60 days of today's publication of this action. Under section 307(b)(2) of the CAA, the requirements that are subject to today's notice may not be challenged later in civil or criminal proceedings brought by EPA to enforce these requirements.

Pursuant to the provisions of 5 U.S.C. 605(b), I hereby certify that this rule will not have a significant economic impact on a substantial number of small business entities.
