BILLING CODE 4310-55-P

Availability of an Environmental Assessment and Finding of No Significant Impact, and Receipt of an Application for an Incidental Take Permit for La Costa Villages, Carlsbad, CA

AGENCY: Fish and Wildlife Service, Interior Department.

ACTION: Notice.

SUMMARY: Fieldstone/La Costa Associates and the City of Carlsbad, California (applicants) have applied for an incidental take permit from the Fish and Wildlife Service (Service) pursuant to section 10(a)(1)(B) of the Endangered Species Act of 1973 (Act), as amended. The proposed permit would authorize take of the threatened coastal California gnatcatcher (*Poliptila californica californica*) in San Diego County, California, for a period of 30 years. The proposed taking is incidental to planned home and road construction on 1,940 acres of land primarily owned by Fieldstone/La Costa Associates.

This notice advises the public that the Service has re-opened the comment period on the permit application and the environmental assessment (EA). The permit application includes a Habitat Conservation Plan (HCP), two HCP addendums, and an Implementing Agreement (IA). The EA package includes an EA, EA addendum, and a draft Finding of No Significant Impact (FONSI) which concludes that issuing the incidental take permit is not a major Federal action significantly affecting the quality of the human environment, within the meaning of section 102(2)(C) of the National Environmental Policy Act (NEPA) of 1969, as amended.

This notice is provided pursuant to section 10(c) of the Act and NEPA regulations (40 CFR 1506.6). The Service will evaluate the application, associated documents, and comments submitted thereon to determine whether the application meets the requirements of NEPA regulations and section 10(a) of

the Act. If it is determined that the requirements are met, a permit will be issued for the incidental take of the coastal California gnatcatcher. The final NEPA and permit determinations will not be completed until after the end of the 30-day comment period and will fully consider all public comments received during the comment period.

This notice supplements an earlier notice published in the **Federal Register** on October 28, 1994 (59 FR 54207). That notice announced an initial 30-day public comment period on the HCP, first HCP addendum, and draft EA. The draft EA was not available for public review until two weeks into the initial 30-day comment period. Subsequently, an addendum to the draft EA, a second addendum to the HCP, and an IA were completed that include a description of a change in mitigation for a portion of the proposed project. Consequently, the Service has re-opened the period for public comment on the NEPA documents and the complete application package, as revised.

DATES: Written comments on the HCP, HCP addendums, IA, EA, EA addendum, and draft FONSI should be received on or before March 2, 1995.

ADDRESSES: Comments should be addressed to Mr. Gail Kobetich, Field Supervisor, U.S. Fish and Wildlife Service, 2730 Loker Avenue West, Carlsbad, California 92008. Comments may be sent by facsimile to telephone (619) 431-9618. Please refer to permit No. PRT-795759 when submitting comments.

FOR FURTHER INFORMATION CONTACT: Gail Kobetich (Field Supervisor) or Ken Corey (Biologist) at the above address, or telephone (619) 431-9440.

Individuals wishing copies of the documents should immediately contact Ken Corey. Documents also will be available for public inspection, by appointment, during normal business hours at the above address.

SUPPLEMENTARY INFORMATION: Proposed grading and construction activities would directly impact 30 of 48 pairs of the threatened coastal California gnatcatcher (gnatcatcher) and 550 of 1,064 acres of suitable gnatcatcher habitat on-site (506 of 944 acres of coastal sage scrub and 44 of 120 acres of southern maritime chaparral). In addition, 254 of 307 acres of grassland and 69 of 114 acres of riparian scrub/woodland would be directly impacted on-site. Approximately 18 pairs of gnatcatchers, 438 acres of coastal sage scrub, 76 acres of southern maritime chaparral, and 173 acres of associated habitats will be conserved and managed on-site in perpetuity. In addition, the

applicants will provide \$1,000,000 for purchase of an off-site mitigation parcel, within the City of Carlsbad, to be approved by the Service.

The applicants have requested the issuance of permits (immediately or when a species is listed) under section 10(a) of the Act that would authorize incidental take, in accordance with the terms of the HCP, for up to 66 sensitive species listed in the HCP. Of these species, the coastal California gnatcatcher is the only federally-listed species observed on-site. Section 10(a) permits are issued only for federally-listed species; however, unlisted species that subsequently become listed, and are adequately conserved by the original HCP, can be added by permit amendment.

A concern has been raised regarding the consistency of the HCP with certain subarea and subregional plans under the statewide Natural Community Conservation Planning program (NCCP) (see 59 FR 54208). All interested agencies, organizations, and individuals are urged to provide comments on the permit application, NEPA documents, and the NCCP consistency issue. All comments received by the closing date will be considered in finalizing NEPA compliance and permit issuance or denial.

The Service will publish a record of its final action in the **Federal Register**.

Dated: January 25, 1995.

Thomas J. Dwyer,

Deputy Regional Director, Region 1, Portland, Oregon.
