Revisions to Weight and Preparation Standards for Barcoded Letter Mail

AGENCY: Postal Service.

ACTION: Final rule.

SUMMARY: This amends the final rule published on December 22, 1994, to detail the rate applicable to pieces that cannot qualify for a Barcoded First-Class rate because of presort. Basically, this amendment allows such pieces to qualify for the Nonpresorted ZIP+4 rate on an exceptional basis.

EFFECTIVE DATE: January 16, 1995.

FOR FURTHER INFORMATION CONTACT: Anthony M. Pajunas, (202) 268-3669.

SUPPLEMENTARY INFORMATION: On December 22, 1994, the Postal Service published in the **Federal Register** (59 FR 65967-65971) a final rule to amend the Domestic Mail Manual (DMM) standards for the physical characteristics of automation-compatible barcoded letter-size mail. For a period of up to 1 year, beginning January 16, 1995, the Postal Service will conduct a test of live barcoded bulk third-class regular rate letter mail weighing between 3.0 and 3.3071 ounces, and barcoded bulk third-class nonprofit rate, First-Class and second-class letter mail weighing between 3.0 and 3.3376 ounces.

The revised DMM standards implemented for this test of "heavy letter mail" included that each such mailpiece be part of a mailing that is 100 percent delivery point barcoded; have the barcode in the address block; be in an envelope that has no open windows; and not be bound or have stiff enclosures.

Although Barcoded rates would apply to all pieces in such mailings at second- and third-class rates (level A, B3, and B5 Barcoded second-class rates, and basic, 3-, and 5-digit Barcoded third-class rates), pieces in the residual portion of First-Class mailings (i.e., those that could not qualify for the 3- or 5-digit Barcoded rates because of presort). Accordingly, under the final rule, these First-Class heavy letter mailpieces would not be eligible for another "basic" Barcoded rate. (The First-Class nonpresorted Barcoded rates are available only for flats and cards.)

The amendment to the final rule appearing below corrects this oversight by adding language in the DMM that makes it clear that the rate applicable to such pieces is the nonpresorted ZIP+4 rate, the same rate available to other barcoded letter-size First-Class Mail in

similar presort circumstances. For clarity, the revised text of DMM C810.1.5 below replaces the text of DMM C810.1.5 and 1.6 that appeared in the final rule, and amends the reference in DMM C810.2.3 for consistency; the revised text of DMM E147.1.1c also removes an erroneous reference to ZIP+4 barcodes.

This revision does *not* alter the thickness standards for heavy letter mail or other mail at a ZIP+4 or Barcoded rate; does *not* affect the weight or other eligibility criteria for nonpresorted ZIP+4 mail generally; and does *not* extend the availability of the nonpresorted ZIP+4 or any other ZIP+4 rate to other delivery point barcoded pieces weighing more than 3 ounces or non-delivery point barcoded pieces weighing more than 2.5 ounces. The revised rule allows the nonpresorted ZIP+4 rate for pieces weighing more than 3 ounces only if those pieces are delivery point barcoded and part of an otherwise correctly prepared Barcoded rate mailing of heavy letter mail prepared for this test.

SUPPLEMENTARY INFORMATION:

Background

The transportation conformity final rule, entitled "Criteria and Procedures for Determining Conformity to State or Federal Implementation Plans of Transportation Plans, Programs, and Projects Funded or Approved Under title 23 U.S.C. or the Federal Transit Act," was published in the **Federal Register** on November 24, 1993 (58 FR 62188). This action was required under Section 176(c)(4) of the Clean Air Act (CAA). The transportation conformity rule requires each ozone nonattainment area and maintenance area to perform a regional analysis of motor vehicle volatile organic compound and NO_x emissions from any planned transportation project. This analysis must demonstrate that the emissions which would result from the proposed transportation system if the transportation plan were implemented are within the total allowable level of
