

The FAA has determined that this proposed regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. It, therefore, (1) Is not a "significant regulatory action" under Executive Order 12866; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal. Since this is a routine matter that will only affect air traffic procedures and air navigation, it is certified that this rule, when promulgated, will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

As a result, the Reserve, LA, Very High Frequency Omnidirectional Range/Distance Measuring Equipment (VOR/DME) and the Harvey, LA, VORTAC will be upgraded to high class navigational aids and the airways would be realigned to use the Reserve, LA, VOR/DME or the Harvey, LA, VORTAC. This action would enhance air traffic procedures and accommodate concerns of airspace users.

DATES: Comments must be received on or before March 22, 1995.

ADDRESSES: Send comments on the proposal in triplicate to:

The Proposal

The FAA is considering an amendment to part 71 of the Federal Aviation Regulations (14 CFR part 71) to realign nine Federal airways located in Louisiana. The New Orleans, LA, VORTAC will be decommissioned because the platform on which it is located is deteriorating. As a result, the Reserve, LA, VOR/DME and the Harvey, LA, VORTAC will be upgraded to high class navigational aids and the airways would be realigned to use the Reserve, LA, VOR/DME or the Harvey, LA, VORTAC. This action would enhance air traffic procedures and accommodate concerns of airspace users. Domestic

VOR Federal airways are published in paragraph 6010(a) of FAA Order 7400.9B dated July 18, 1994, and effective September 16, 1994, which is incorporated by reference in 14 CFR 71.1. The airways listed in this document would be published subsequently in the Order.

The FAA has determined that this proposed regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. It, therefore - (1) is not a "significant regulatory action" under Executive Order 12866; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal. Since this is a routine matter that will only affect air traffic procedures and air navigation, it is certified that this rule, when promulgated, will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.
